CANAL

RECORD

Volume VIII.

BALBOA, CANAL ZONE, WEDNESDAY, AUGUST 26, 1914.

No. 1.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD.

Balboa, Canal Zone.

Isthmus of Panama.

No communication either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Empire District to Close September 1.

The Governor has approved the recommendation of the Chief Quartermaster that the Empire district be closed on September 1, or as soon thereafter as possible. The removal of the offices of the Accounting Department from Empire to the new Administration Building on Balboa Heights, has resulted in the transfer of most of the gold bachelor employes out of the district. There were 82 families occupying regularly assigned quarters for gold employes at Empire on August 1, but of this number, it is expected that about 60 families will have been given permanent assignments in the Corozal and Ancon-Balboa districts by September 1. The occupants of family quarters remaining unassigned after that date will be transferred temporarily to Culebra. The transfer of these employes will permit of the closing of the hotel, commissary, and district quartermaster's office, and will allow the Health Department to close the offices of the district physician and the sanitary inspector, and the police and fire division to withdraw its representatives.

The labor camp at Cunette, near Empire, will also be closed on September 1, and the present occupants of houses there will be temporarily transferred to the camps at Cerro, Lirio, and Rio Grande. There are no colored bachelor employes at present at the Cunette camp, and but very few colored married employes. With the closing of the Empire district, the labor train to that point will be discontinued, but it will probably continue to be operated to Culebra until the removal of the employes in that district to the Pacific end, or elsewhere, has been effected.

Improvement of Additional Block at La Boca.

Another block, to be known as Block A, is to be added to the improved area at the La Boca silver settlement. Some of the houses now standing at Porto Bello are to be removed

to this site, and later on, it is probable that the present European laborers mess hall and the commissary at East Balboa will be reerected in this locality. With the houses now available, and those to be removed from Porto Bello, it is thought that there will be sufficient accommodations for all families of silver employes on the permanent force. The water and sewer work, and the necessary curbing in Block A, will be performed at once, and if funds are available, the streets will be macadamized also. The new extension is on the side toward East Balboa, and comprises two blocks, A and B, but nothing will be done in the way of improving Block B at present.

First Foreign Vessel Through the Canal

The *Daldorch*, a cargo steamer, belonging to J. and M. Campbell of Glasgow, Scotland, loaded with 11,500 tons of wheat, arrived at Balboa on Thursday, August 20, and passed through the Canal bound for Limerick, Ireland, on Saturday, August 22. It left Tacoma, Washington, on the day of the outbreak of hostilities in Europe, intending to sail around South America. At Cape San Lucia, the captain received a radio message instructing him to use the Canal, which will probably effect a saving of about 40 days in its voyage.

Eight vessels passed through the Canal southbound, and seven northbound, during the week ending 8 a. m., August 22.

Canal Tolls in July.

The tolls collected by the captain of the port of Balboa during the month of July aggregated \$4,688.40; at Cristobal, \$2,970, a grand total of \$7,658.40. Collections on account of pilotage amounted, as follows: Cristobal, \$1,240; Balboa, \$332; total, \$1,572. Total revenues, \$9,230.40. During July, the work of measuring the following vessels was in progress: *Acajutla* and *Salvador* of the Salvador Railway Company; *Hualлага* of the Compañia Peruana de Vapores; *Limari* and *Palena* of the Compañia Sud-Americana de Vapores; and *Santa Clara* and *Santa Catalina* of W. R. Grace and Company. The measurements for the steamships *Acajutla* and *Limari* were practically completed at the close of the month. Two Navy warrant officers, a carpenter and a machinist, have been employed as measurers.

Moving to Balboa.

The occupation of the Administration Building on Balboa Heights has been begun, and by September 15, it is expected that nearly all of the offices now quartered in the administration buildings at Culebra and Ancon will have been transferred to the new location. The pay roll, voucher, injury claim, and property sections of the Accounting Department at Empire was moved on Friday, August 21, and the remainder of the Auditor's office on Monday, August 24. The Paymaster's office was transferred on Tuesday, August 25, and the Collector's office on Wed-

nesday, August 26. The work of moving the offices in the administration building at Culebra will be begun on August 30, and will be carried out in accordance with the schedule published in circular letter form in another part of this issue. Moving the offices of the Executive Office in the administration building at Ancon—Division of Civil Affairs, police and fire division, schools, posts, and THE CANAL RECORD, was begun on Wednesday, August 26. The offices of the Division of Canal Transportation, Health Department, and Quarantine Service, in the same building, will not be moved until some time next month.

Hydraulic Grader at Work in Culebra Cut.

The hydraulic grader, No. 1, was towed from the wharf at Paraiso on Monday, August 24, to the north side of Gold Hill and has been placed at work on the east side of Culebra Cut sluicing off lumps in the irregular surface of a dead slide, north of the east Culebra slide. The material which is washed into the Canal will be removed later by dipper and ladder dredges.

Paving of B Street Extension Completed.

The work of paving the extension of B street in Panama City, from Ancon avenue to the intersection of the Zone boundary road with the old Balboa road, a distance of 1,560 feet, was begun on May 25, by forces of the Division of Municipal Engineering, and completed on August 13. The appropriation made for this improvement was \$12,000, approximately one-third of which was borne by the Panama Tramways Company, and the remainder by the Municipality of Panama. The proportion of the cost charged to the tramways company is comprised in the paving of the space occupied by the tracks, 42 inches in width, and 18 inches on each side of the rails, a total width of six feet six inches. The width of the street is irregular, but averages about 21 feet for the newly paved section; it is widest between Ancon avenue and Eighteenth street, 24 feet. The work performed by the engineering force consisted in the preparation of the subgrade, and the spreading over it of a concrete pavement six inches thick. In addition, the grade of the street and car tracks were changed to conform to standard requirements, a new curb was installed on the north side of the street, parallel with Pinel Brothers' new property addition, and the turn into Twentieth street was widened to facilitate the passage of vehicles. B street is now entirely paved from Central avenue to the old Balboa road.

Charge for Quarters at Culebra.

Effective September 1, a charge will be made for quarters at Culebra that may be occupied by gold employes who have received special assignments for quarters at Empire and Culebra. No rental will be charged employes who have received regular assign-

ments under the rules at Culebra. This decision was reached in view of the fact that the commissary and delivery services will have to be continued, and the fire and police forces, and the offices of the district physician and sanitary inspector maintained in practically the same manner as at present, although they will serve a much smaller population.

Sanitary Census of Panama and Colon.

The Governor has authorized the Chief Health Officer to take a census of the cities of Panama and Colon, the work to be done under the supervision of the health officers of the two cities. It was regarded as desirable to have the work performed by enumerators who were employed at the time of taking the Canal Zone census in 1912, but it was found that most of the men had left the Isthmus, therefore, the enumeration will be made by the sanitary inspectors. The census of Panama was begun on August 13 by the health officer and two of the inspectors. The count in the more thickly populated districts of Guachapali, Marañon, the barrio of Calidonia, and Chorrillo, will be completed first. The census is made at this time, in order to arrive at a basis for future estimates in connection with health statistics, and only questions pertaining to the population will be asked; these comprise the number of persons in a room, male or female, and color. No separate count will be taken of the children. The census at Colon has not yet been begun, but it will be carried out along the same general lines. Until the tabulation of the census returns for the two cities are completed, which will probably be a month or more, the Chief Health Officer has been authorized to add 15,000 to the present estimate of 47,172 as the population for Panama city, or a total estimated population of 62,172. The estimate for the city of Colon, 20,302, will be allowed to stand, as owing to the decrease in Canal work at the Atlantic end, the city has not been growing as rapidly as Panama. The recent police census of the Canal Zone, which showed a population of 37,702, will be adopted as a basis for future health statistics in that territory.

Canal Excavation in July.

The grand total of Canal excavation to August 1, 1914, was 224,073,363 cubic yards, leaving 14,772,224 cubic yards remaining to be excavated, according to the revised estimate as of August 1, 1914, which increased the estimate of July 1, 1913 by 6,527,593 cubic yards.

The total excavation in July was 964,994 cubic yards, as compared with 1,167,870 cubic yards in June. The output of the dredges constituted all but a fraction of the amount excavated, and little more than one-half of the total was taken out in the Culebra Cut section from slides. The dry excavation in July was entirely confined to terminal operations at Balboa, and amounted to 47,314 cubic yards.

Material excavated by dredges, apart from the Culebra Cut section, consisted of 57,678 cubic yards removed at the Atlantic entrance, 35,248 cubic yards at the Cristobal coaling plant site, 28,679 cubic yards from the Pacific entrance, and 311,067 cubic yards taken out of the Balboa terminal basin, and used for the fill of the swamp between Corozal, Ancon, and Balboa.

Hydraulic operations at Gold Hill resulted in the removal of 53,374 cubic yards.

No concrete was placed in the locks, dams,

or spillways during July, and no additional fill was made to dams.

The detailed figures of excavation, by sections, follow:

Mean rainfall along Canal (nine stations), 5.69 inches.

By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, locks, etc.; that is, it represents material taken from the area to be occupied by the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside any of the constituent parts of the Canal, such as prism, diversions, locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

Mrs. McPherson of Gatun has organized a class of girls for Scotch dances and physical

culture. The class meets in the Gatun clubhouse on Tuesday and Thursday afternoons in each week.

Obituary.

Thomas McLaughlin, an American living at Corozal, employed as a locomotive engineer in the Transportation Department, died at Ancon Hospital at 10 a. m., on Saturday, August 22. He was 35 years of age, and is survived by his wife, and a son who were on the Isthmus at the time of his death. He came from Rochester, N. Y., on August 27, 1906.

Mrs. Lillian Boyd, wife of Oscar Boyd, residing at Ancon, died at Ancon Hospital at 4.40 p. m., on Monday, August 24, after a short illness. She was born in New York City, was 35 years of age, and had been on the Isthmus about two years, coming here from Jersey City, N. J. She is survived by her husband, a child, 15 months old, and two stepchildren.

Mrs. Edith L. Donnelly, wife of J. W. Donnelly, residing at Empire, died at Ancon Hospital, on Saturday, August 15. She was 31 years of age, and had been on the Isthmus four years, coming here from Washington, D. C. The body was shipped to the United States for interment, on the *Tenadores*, on Wednesday, August 19.

Metal Trades Council.

The next regular meeting of the Metal Trades Council of Panama will be held at the Balboa clubhouse on Sunday, August 30, at 1 p. m.

H. A. S. LEVERING, *Secretary*.

BALBOA, C. Z., August 24, 1914.

Pythian Sisters.

It is requested that all communications and correspondence regarding Canal Zone Temple, No. 1, Pythian Sisters, be addressed to Mrs. Marian L. Stanner, mistress of records and correspondence, Box 209, Gatun, C. Z. The regular meetings of the lodge are held at Ancon hall.

Missing Men.

Any one having knowledge of the whereabouts of A. W. Terrell, last heard of in Panama city, is requested to communicate with the American Consulate General, Panama.

Any one having information regarding the whereabouts of John Vallentine Brown, who is supposed to be on the Isthmus, is requested to communicate with the American Legation, Panama.

The estates of these deceased employees of the Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against these estates, or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Ancon, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

SOCIAL LIFE OF THE ZONE.

Cristobal Woman's Club.

The executive board of the Cristobal Woman's Club held a meeting in the clubhouse on Wednesday afternoon, August 26, for the purpose of preparing for the opening of the club in September. The adjourned annual meeting will be held on September 2, when officers for the year will be elected, and on Wednesday afternoon, September 15, the annual reception to the outgoing and incoming officers will take place. Plans for the year will be decided upon at these meetings. The club will enter upon the eighth year of its existence in October.

Church Notes.

The Corozal Union Sunday school held a picnic on Saturday, August 22, which was attended by about 80 children and adults, this number including the pupils of the school and the neighborhood children. The party left Corozal for Panama on the early morning train and proceeded from the railroad station by tram cars to Bella Vista bathing beach, where the day was spent. Mrs. A. L. Hackenberg had charge of the outing, assisted by other ladies from the village.

On Sunday evening, August 23, Mrs. D. Fulton was the speaker at the meeting of the Cristobal Union Church. Her subject was "Strong womanhood."

The Ladies' Aid Society of the Cristobal church will hold its first meeting of the season in the church on Wednesday afternoon, September 2, at 3 o'clock. An interesting program is promised; there will be a special speaker.

The Woman's Altar Guild of St. Luke's Hospital chapel will meet in the chapel for a corporate communion on Tuesday morning, September 1, at 8 o'clock. The service will be followed by a short business meeting.

Mission Work Among the San Blas Indians.

Letters have been received on the Isthmus from Miss Annie Coope, the American missionary now located as a teacher in the San

Blas country, giving details of her work. Miss Coope has an assistant, one of the members of the Christian Mission Church in Providence, Rhode Island, and the two women conduct a day school of 15 children and a night school composed of 50 men. Donations recently sent to Miss Coope were six blackboards and a supply of chalk, a reclining chair, a small tea table, a dozen Spanish-English Bibles, several packages of Perry pictures, and magazines and books.

Cristobal Bible Students' League.

The Cristobal Bible Students' League has been recently organized, under the leadership of the Rev. A. B. DeRoos. Its membership is made up of men and women who have expressed a determination to study and work for definite results. The league is interdenominational.

PERSONAL.

Hon. Levi M. Kagy, American member of the Joint Land Commission, sailed for New York on the *Cartago* on Wednesday, August 19, on a short business trip to his home in Salem, Ill.

The Rev. Harry Compton, pastor of the Methodist Episcopal Church in Panama, sailed for New York for six weeks vacation, on Saturday, August 22. During his absence the work will in charge of the Rev. C. W. Ports, assistant pastor of the church.

Improved Order of Red Men.

A special meeting of the chiefs and brethren of Panama Tribe, No. 8, of the Improved Order of Red Men, will be held at the Ancon lodge hall on Saturday evening, August 29, at 8 o'clock. There will be the raising of chiefs, initiation of new brethren, and a "Smoker," followed by corn and venison. A cordial invitation is extended to all chiefs and brethren to attend.

R. H. HULL,
Chief of Records.

BAI BOA, C. Z., August 24, 1914.

EXECUTIVE ORDER

Relating to the Customs Service.

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

1. If the master of a vessel, arriving at any port in the Canal Zone from a foreign port, shall fail or refuse to produce to the proper officer of the customs, upon demand by him, the ship's manifest and copies thereof, or shall fail or refuse to give a true account of the destination of such vessel, he shall be subject to a fine of not exceeding \$500.

2. If any merchandise be found on board any vessel arriving in the Canal Zone from a foreign port, which is not included in her manifest, the master of such vessel shall be liable to a penalty equal in amount to the value of the merchandise not manifested, and all such merchandise, belonging to or consigned to the officers or crew of the vessel, shall be forfeited, provided, however, that the penalty authorized by this section shall not be imposed if it should be made to appear to the chief customs officer, at the port of entry, or to the court in which the trial shall be held, that no part of the cargo has been unladen, except as accounted for in the master's report, and that the errors and omissions in the manifest were made without fraud or collusion; in such case the master may be allowed to correct his manifest by means of a post-entry. It shall not be lawful to grant a permit to unload any such merchandise, so omitted from the manifest, before such post-entry or addition to report or manifest has been made.

3. If sea stores are found on board of a vessel arriving at the Canal Zone from a foreign port, which are not specified in the list furnished the boarding officer, or if a greater quantity of such articles is found than that specified in such list, or if any of the articles are landed without a permit being first obtained from the customs officer for that purpose, all of such articles omitted from the list or manifest, or so landed, shall be seized and forfeited, and the master of the vessel shall be liable to a penalty of treble the value of the articles so omitted or landed.

4. The officers of the Bureau of Customs are authorized to administer oaths, and to certify invoices covering shipments of merchandise from the Canal Zone to the United States. In the performance of this duty they shall be governed by the United States Consular regulations, and by the circular instructions concerning the certification of invoices issued to consuls of the United States, in so far as they are applicable, provided, however, that any special instructions heretofore issued, or which may be issued by the Treasury Department, concerning the certification of invoices in the Canal Zone, shall be complied with.

5. Any person violating any of the customs laws, or the customs rules and regulations established, or to be established, by the Governor of The Panama Canal in conformity with existing laws and orders, shall be subject to a fine not exceeding \$500 for each violation of such regulations.

6. This Order shall take effect from and after this date.

HOLLOW CONCRETE BLOCKS.

Corozal Plant Has Produced over 100,000 per Month for Nine Months.

The plant at Corozal for the manufacture of hollow concrete blocks for use in the permanent Canal buildings completed its ninth month of service on August 10. Operations began there on November 10, 1913, and have been carried on continuously since, both day and night shifts having been employed practically all the time. Up to August 10 the plant turned out a total of 902,308 blocks, an average of over 100,000 per month.

Now that the greater part of the erection of the new buildings authorized at this time has been accomplished, the demand for the larger blocks, used principally in exterior walls, has dropped off, and the principal present demand is for three, four, and 6-inch blocks (all 12 inches wide by 12 inches long), for use in interior columns and partitions.

Work on the smaller blocks is being carried on to the capacity of the machines equipped with molds of these sizes. The output of the Pauley machines originally installed in the plant is being supplemented by the use of four hand operated machines for smaller blocks, which use what is known as the dry process, and were constructed for field use when the building operations were in full swing.

During the height of construction of the new Administration Building, the permanent quarters, and the electric substations, the output from the Corozal plant was not sufficient to meet the demand, and additional equipment for making similar hollow concrete blocks by the dry process was installed on the townsite at Balboa in the form of eight portable molding machines. Two of these machines made blocks three by 12 by 14 inches; two made blocks three by 12 by 12 inches, and four made blocks four by 12 by 12 inches. The blocks made by the two machines first mentioned were for the columns in the new Administration Building; this size is not being used now. This field plant produced a total of 30,000 blocks. In addition, terra cotta blocks, three, four, and six inches thick, to the number of 100,000, were requisitioned from the United States.

The field machines have since been transferred to Corozal to be operated in connection with the Pauley process plant. They are wooden structures, devised by concrete foremen and carpenters at Balboa, and each occupies a space about six feet long, four feet high, and four feet deep. Each contains a trough, with removable ends and partitions, in which are set the molds for four blocks, each three by 12 by 12 inches. The moistened concrete material is poured into the molds from above by hand, and tamped by means of a mallet and a steel bar. Each machine is operated by two laborers, the material being mixed by another in an adjacent trough. The output is about 150 blocks per machine in each 8-hour shift. Materials are used in the same proportions as for the wet process, namely, three parts of cement, four and one-half parts of sand, and six parts of screenings. The blocks turned out have been generally satisfactory, though showing less uniformity and greater breakage than those manufactured by the wet process.

Several improvements have been made in the methods of operating at the plant, which have made it possible to reduce the force of laborers by about one-half. One is the sub-

stitution of a power driven tumbler or rattler for hand labor in removing particles of concrete from the cast iron palettes, which, inserted at the bottoms of the molds, form the bases on which the blocks are hauled until they harden, when the palettes are loosened by a hammer. Two laborers operate the tumbler and do work for which 14 men were formerly required.

Another device which has given general satisfaction is a washer for cleaning screenings. The screenings are shoveled from the cars into an inclined trough, about 10 feet long, at both ends of which are powerful jets which throw the screenings into motion. As they slide down the flume they fall on inclined screens, the particles of rock passing through into a pile, while the finer particles of earth are carried away by the water, through a discharge flume. In addition to cleansing the screenings mechanically, and allowing a reduction of force of 12 laborers, the washer has done away with dust, which was formerly very objectionable. Moreover, as the finer particles are carried away and settle, a quantity of sand can be skimmed off the top. This is used to a great extent in place of Chame sand and effects considerable saving in the cost of material.

Blocks are now shipped to the permanent quarters at Balboa, the office building for Balboa shops, and the substations at Cristobal and Balboa. The substations are still using all sizes, but at the other points the consumption is almost entirely confined to the smaller sizes. The distribution of the blocks manufactured at the Corozal plant up to August 10 is shown in the following tabulation:

Changes in United Fruit Company's Steamship Services.

The local office of the United Fruit Company makes the following announcements concerning its services to and from Colon:

The regular service with New Orleans, changed slightly during the past two months by the temporary retirement of the steamship

Atenas for repairs, has been resumed in completeness; two vessels sail from Colon for New Orleans every Thursday, one going direct, and the other by way of Bocas del Toro and Havana.

The direct service with New York by means of the steamships *Calamares*, *Pastores*, and *Tenadores* has been cancelled. The last sailing in this service was that of the *Tenadores*, from Colon on Wednesday, August 19. The weekly connection with New York, by way of Kingston, will be maintained, as before, by the steamships *Almirante*, *Metapan*, *Santa Marta*, and *Zacapa*.

There will be absolutely no increase in rates, passenger or freight, on account of the present European war.

The service of Elders and Fyffes, Limited, represented on the Isthmus by the United Fruit Company, between Colon, and Bristol, England, will be suspended indefinitely, after the sailing of the steamship *Bayano* from Colon on Saturday, September 5.

The Lighthouse Service.

Panama railroad barge No. 2 has been transferred to the Division of Canal Transportation, and after some alterations, will be used in connection with the launch *Balboa* as a lighthouse tender. The old Atlantic Division motor car house at Gatun has been rerecited at one end of the concrete dock for small boats on Gatun Lake, for use of the master of the lighthouse tender as a storehouse and office. A preliminary survey of Bona Island on the Pacific coast of the Isthmus was made in July, with a view of es-

tablishing a fourth order light thereon. In the Atlantic and Pacific sections of the Canal, the 1-foot burners on the lighting buoys have been changed to ½-foot; in the lake area they have been changed from one foot to three-fourths of a foot, and the moorings of a part of the buoys have been lengthened.

Award for Placing Backfill.

Bids were opened at the office of the Chief Quartermaster on August 10 for the placing of 42,000 cubic yards of backfill at Fort Amador, and 16,825 cubic yards of backfill on Perico Island, the material to be obtained from the Balboa dump in the vicinity of the new radio station. Six proposals were received, as follows: R. W. Hebard, \$1.09 per cubic yard; Pritchett and Johnson, 63½ cents per cubic yard for backfill at Fort Amador only; Ralph M. Elder, 50 cents per cubic yard at Fort Amador, and 80 cents per cubic yard at Perico Island; William Bodette, 49 cents per cubic yard; C. J. Alberts, 43¾ cents per cubic yard; D. J. McCauley, 42 cents per cubic yard. The contract was awarded to the low bidder, D. J. McCauley, who has made bond for the successful performance of the work in the sum of \$2,500.

OFFICIAL CIRCULARS.

Schedule for Occupying New Administration Building.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., August 20, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

The following recommendations of the Chief Quartermaster are approved, and it is directed that steps be taken immediately to prepare for the move along the lines recommended by him:

"I beg to submit the following schedule for the removal of the offices from the Administration Building at Culebra and the Auditor's Office at Empire to the new Administration Building at Balboa:

Auditor's Office, Empire, August 20 to 25.

ADMINISTRATION BUILDING, CULEBRA.

First move, August 30 to 31.

Governor's office—Colonel Goethals, Mr. McIlvaine, Mr. Copeland, 30 clerks.

Colonel Hodges' office—Colonel Hodges, Mr. C. J. Embree, Mr. Carlson, five clerks, five draftsmen.

Mr. Rousseau's office—Mr. Rousseau, two clerks.

Cable office—Two clerks, one inspector.

Second move, September 2 to 3.

Chief Quartermaster's office—Captain Wood, three inspectors, one veterinarian, 20 clerks.

Costkeeping accountant—Mr. Faure, Mr. Smith, 19 clerks.

Building Division—Mr. Holmes, Mr. Cook, Mr. Kritz, Mr. Hearn.

Fortifications—Lieutenant Acher, one engineer, two clerks, four draftsmen.

Third move, September 6 to 7.

Mr. F. H. Cooke's office—Mr. Cooke, three clerks, 16 draftsmen, one supervisor.

Mr. Kuentz's office—Mr. Kuentz, one clerk, eight draftsmen.

Building Division (balance)—Twelve draftsmen.

Fourth move, September 9 to 10.

Mr. F. C. Nichols' office—Mr. Nichols, one draftsman.

Assistant Engineer Nichols' office—Mr. A. B. Nichols, one office engineer, one assistant engineer, one engineer, four clerks, two draftsmen.

Fifth move, September 12.

Mr. Malsbury's office—One engineer, three draftsmen.

Landscape Architect's office—No employes in office at present.

Sixth move, September 13 to 14.

Clubhouses—One superintendent, one secretary.

Hydraulics—Five office employes.

Surveying Officer—One surveying officer, one clerk.

"In making up this schedule, I have taken the Executive offices first, and the designing and drafting forces last. I think a short interval should be left between the move of each section in order to get desks records and personnel straightened out in the new building. Moreover, there is a considerable quantity of records, office furniture, etc., that there would be confusion if the whole forces were moved at once.

"I would not recommend the removal of the Panama railroad offices until the close of the month. First, to allow the personnel to get straightened out in the new building; second, to give us an opportunity to have bachelor quarters available. We ought to be able to make some reduction in the building force by the first of October, and the vacancies thus created will take care of the forces of the Panama railroad. Details of the program of the moves will be submitted later.

"Instructions should be issued to the chief clerks or heads of the offices that all files and records not needed in the transaction of current business should be prepared for shipment and removal as quick as possible. These records can be turned over to the district quartermaster at any time between August 20 and 25, and shipped between the 25th and 28th.

"Heads of each office should make up lists of the gold married and bachelor employes of their offices, furnishing copies of this list to the district quartermasters at Ancon, Corozal, and Culebra. These lists should be furnished at least one week in advance of the removal of the offices. The employes, after securing their assignment, should notify the district quartermaster at Culebra when they wish their personal effects removed to Ancon, Balboa, or Corozal."

GEO. W. GOETHALS,
Governor.

Distribution and Sale of Water.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., August 5, 1914.

CIRCULAR No. 682:

The following regulations governing the distribution of and certain charges for domestic and industrial water supply within the Canal Zone will become effective September 1, 1914:

1. All water mains, together with all laterals leading

from same, shall be installed and maintained by the Division of Municipal Engineering.

(a) This shall include all water lines on the docks of the Panama railroad in the Canal Zone, all lines within the Balboa shop district, the 4-inch line to the Naos Island fortification reservation boundary, the 6-inch line to the fortification boundary at Margarita Point, and the detached water supply system at Frijoles and Monte Lirio.

(b) This shall not include the water supply system at Toro Point or the water supply system at Darien.

2. In general, the cost of installations, maintenance and repairs of water mains and laterals, as described above, will be borne by the Division of Municipal Engineering.

(a) In certain cases of special installations, the distribution of initial costs will be authorized by the Governor.

(b) The original cost of water lines installed within the shop district at Balboa by the Mechanical Division, and on the docks in Balboa and Cristobal by the Panama railroad, shall be charged to the Division of Municipal Engineering.

3. All departments and divisions of The Panama Canal, including the Panama railroad, except as specifically excepted below; fortifications; radio stations; and artillery and infantry posts lying within the maintenance districts above outlined, shall be charged monthly at cost for all water consumed.

(a) The monthly consumption shall be based on metered flow for all principal lines.

(b) The flow from smaller lines may be estimated and charged for at a flat rate.

(c) For the present, the Panama railroad will continue to receive water consumed in Cristobal without charge.

4. The Division of Municipal Engineering will install, maintain, and repair all water meters, and take and record the readings of same.

5. The sale of water over docks to ships and to individuals and companies will be handled by the Division of Municipal Engineering.

6. Water will be delivered to ships upon request of the captain of the port, to whom a statement of amount of water delivered and total amount of charge for same will be given.

7. Water sold to ships will be charged for at a flat rate per thousand gallons, with a minimum fixed charge. Water sold to private companies and to individuals, other than employes of the United States Government, will be charged for at a flat rate per thousand gallons, plus the cost of labor in installing water meters where necessary.

8. Bill covering sales to individuals and companies will be made out by the Division of Municipal Engineering and turned over to the Auditor for collection.

GEO. W. GOETHALS,
Governor.

Prices to be Charged for Water.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., August 14, 1914.

CIRCULAR No. 682-1:

The following rates are fixed for water sold to individuals, companies, and others:

1. Water delivered to vessels at docks—Twenty-five cents per thousand gallons, with a minimum charge of \$3. This rate to be effective August 15, 1914.

2. Water furnished nonemployes within the Canal Zone—Meter rate, 30 cents per thousand gallons, minimum charge \$1.50 per month, with a discount of 33½ per cent on either rate if bills are paid within 15 days after rendition. This rate to be effective September 1, 1914.

3. Flat rates for dwelling houses and other purposes—For each connection, with not more than three fixtures, \$1.50 per month; for each fixture in addition, 75 cents per month, with a discount of 33½ per cent if bills are paid within 15 days after rendition. This rate to be effective September 1, 1914.

GEO. W. GOETHALS,
Governor.

Rendition of Bills for Manufacturing and Repair Jobs, and Miscellaneous Services.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., August 1, 1914.

CIRCULAR No. 659-1:

1. Bills rendered against individuals and companies for manufacturing and repair jobs, or miscellaneous services, will contain a description of the work done or service rendered and the total charge therefor without showing any detail, such as labor, material, or surcharges.

2. The same rule will apply to separate bills rendered against the Panama Railroad Company, the Canal Zone Government, and other branches of the United States Government.

3. The amount of the charge against individuals and

companies will be determined from the cost records by adding to the actual cost a surcharge sufficient to cover the general overhead expenses and a margin of profit.

4. The charges against other branches of the United States Government, employes for their personal use, and against charitable and religious institutions, and social and fraternal organizations of employes, will be the actual cost of the work done or service rendered as determined by the cost records, plus a surcharge equal to the percentage the general overhead expenses bear to the charges to ultimate objects for the latest month available.

5. The Auditor will fix the rate of surcharge to be added to the cost of work done or services rendered for outsiders, and may change said rate from time to time upon approval by the Governor. He will also furnish departments and divisions interested with the rate of surcharge to be added to cover general overhead expenses.

GEO. W. GOETHALS,
Governor.

Operation of Tugs, Barges, Motor Boats, and Other Small Craft in Canal Zone Waters.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., August 11, 1914.

CIRCULAR No. 683:

1. Attention is invited to Paragraphs 56, 195, and 196 of the Executive Order of July 9, 1914, prescribing rules and regulations for the operation and navigation of the Panama Canal, as quoted below:

56. No vessel, company, nor individual will be authorized to maintain or operate permanently any tugs, launches, lighters, or floating equipment of any kind within the Canal waters without permission from the Governor; nor shall any small craft or boat of any kind be operated without the proper authority from him.

195. All privately owned boats of every description must be registered and numbered, and the numbers must be obtained before they will be allowed to operate in any part of the Canal waters.

196. When numbers have been assigned, they shall be displayed in a conspicuous place, in the prescribed form.

2. Companies and owners will be compelled to comply therewith by September 1, 1914. Licenses and license tags must be obtained from the Board of Local Inspectors, the fee for which will be \$1. The Board of Local Inspectors will prescribe the limits within which the craft will be allowed to operate.

3. These regulations shall not be interpreted to include Canal craft, nor the boats of foreign or domestic vessels temporarily in Canal Zone waters, provided they be used solely for the ship's business and convenience.

4. The fact that any one holds a master's, mate's, pilot's, or navigator of motor boat's license, is not to be interpreted to mean that this authorizes him to operate any boat or small craft, without the boat itself has been authorized to operate; nor shall the fact that any boat has been certificated by the Board of Local Inspectors be interpreted to mean that such boat is authorized to operate before a separate and special license has been obtained to do so.

5. This license is to be considered as a special one, subject to revocation at any time. It is entirely different and should not be confused with the yearly certificate of inspection as issued by the Board of Local Inspectors.

GEO. W. GOETHALS,
Governor.

Electric Current Furnished Individuals and Companies.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., July 25, 1914.

CIRCULAR No. 676-1:

The furnishing of electric current by The Panama Canal to individuals and companies in the Canal Zone is approved, as follows:

1. All applications for service of this character shall be made on regular forms and be approved by the Governor before any work is done.

2. All secondary and interior wiring, including entrance switch, will be installed, in accordance with the rules and requirements of the National Board of Fire Underwriters of the United States, by The Panama Canal and be paid for by the applicant in accordance with existing rules and rates for labor and material furnished by The Panama Canal to individuals and companies, after which this wiring and other material shall become the property of the applicant.

3. Authorized employes of The Panama Canal must be permitted to inspect the interior and other secondary wiring at any convenient time, and the applicant shall pay The Panama Canal for any alterations which may be necessary from time to time to keep the installation in safe condition in accordance with the rules and requirements of the National Board of Fire Underwriters of the United States.

4. No additions or alterations in the secondary or

interior wiring are permitted, except on approved request to The Panama Canal and by the forces of The Panama Canal and upon the same terms as the original installation.

5. The Panama Canal will furnish at its own expense the necessary transformers. In general, any necessary extensions to the outside primary wiring circuits and pole lines to furnish the desired service will be paid for by the applicant, but the ownership thereof shall remain with The Panama Canal. Due consideration will be given in each case to any variation deemed equitable from this policy.

6. Payment for current consumed shall be made by the applicant in accordance with approved rates for individuals and companies on a flat rate basis, where the total connected load is 1,000 watts or less. If the total connected load is more than 1,000 watts, or if it is considered by the Electrical Division of The Panama Canal to be advisable, it will be arranged in advance by mutual agreement whether payment shall be made at a flat rate, or whether the current shall be metered and paid for in accordance with the approved rate per kilowatt hour, for individuals and companies. The Panama Canal will furnish meters at its own expense, where their use is considered advisable. The cost of current stoppings for lamps will cover the exchange of a reasonable number of lamps for the sockets of broken lamps, and the cost of ordinary repairs to wiring, etc. (Lamp exchanges will be governed by conditions of service and by the guaranteed life of the lamp of lamps in question.)

7. The base price for charges at a flat rate shall be \$0.75. The various sizes of lamps, motors, heating appliances, etc., will be divided into classes, according to power consumed. The monthly charge for each unit will be obtained by multiplying the base price by the class number to which it belongs. A list showing the classes to which the various items belong will be furnished by the Electrical Division of The Panama Canal on request. The charge for metered current shall be \$0.08 per kilowatt hour. The minimum charge per month for any installation shall be \$3, regardless of the number of units used or the amount of current consumed.

8. A deposit shall be made with the Collector to cover the estimated cost of any installation. If the actual cost exceeds the deposit, the additional amount must be paid. Any balance will be refunded.

9. A permanent deposit shall be made with the Collector in excess of charges for two months, as fixed by the Auditor, to guarantee payment of monthly charges. This deposit will be refunded only when the Auditor has received notice from the Electrical Division that service has been discontinued, and any unpaid charges have been deducted. Notice that service is no longer required should be sent to the Electrical Engineer, and application for refund should be made to the Auditor.

10. Bills will be rendered to customers whose current is measured by meter only. No bills will be rendered to customers who are charged for current at a flat rate.

11. If the monthly charges are not paid to the Collector within 15 days after the close of the month in which the charges accrue, the amount of same will be increased by 25 per cent, the total charges for the two months will be deducted from the deposit, and the service discontinued. Service will thereafter be resumed only by authority of the Governor and after payment has been made for the cost of turning the current off and on, and a new deposit has been made.

12. Deposits may be made with the Collector to cover charges for not less than six months against which the monthly accruals will be applied.

13. Under no circumstances shall the applicant resell, sublet, or otherwise dispose of any electric current supplied by The Panama Canal, to tenants, lessees, or others at a greater price than said applicant pays for same.

14. The Panama Canal reserves the right to discontinue the service on due notice at any time and without notice if the monthly charges are not paid as stipulated above, or if any other condition of these rules is violated. By making any installation or by furnishing electric current, The Panama Canal incurs no obligation, expressed or implied, on account of interruption or discontinuance of the service, and the applicant waives all claims for loss or damage that may arise by reason of such interruption or discontinuance.

GEO. W. GOETHALS,
Governor.

Leaves of Absence.
THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., August 21, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

Several cases have recently been brought to my attention in which employes have been granted leaves of absence on recommendation of the head of a department or division, and prior to the expiration of such leave it has been found necessary to terminate their services on account of reduction in force.

From now on it is particularly desirable that heads

of departments and divisions exercise extreme care in recommending leaves of absence, and in any case where there is a possibility of the employe's service being terminated within a short period he should be so informed, and if he still desires to take the leave of absence it will be upon his own responsibility.

GEO. W. GOETHALS,
Governor.

Special Orders.
WAR DEPARTMENT,
WASHINGTON, August 4, 1914.

SPECIAL ORDERS
No. 181.
Extract.

25. Capt. Thomas J. Smith, Ordnance Department, will proceed via this city and the New York Arsenal, N. Y., for consultation with the Chief of Ordnance and the commanding officer of the New York Arsenal, to the coast defenses of Balboa and Cristobal, C. Z., for the purpose of proof firing armament installed in the coast defenses of The Panama Canal, and upon the completion of this duty will return to his proper station via the New York Arsenal. Upon arrival in the Canal Zone, Captain Smith will report to the Governor of The Panama Canal. The travel directed is necessary in the military service.
(2193478 A. G. O.)

W. W. WOTHERSPON,
Major General, Chief of Staff.

By order of the Secretary of War.
Official:

GEO. ANDREWS,
The Adjutant General.

Uniformity in Costkeeping Forms.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., August 19, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

In order to secure uniformity, eliminate duplication, and unnecessary expense, any forms which may be considered desirable for costkeeping purposes by any department or division will hereafter be first submitted to the costkeeping accountant for approval before any requisition is forwarded for the printing of same.

GEO. W. GOETHALS,
Governor.

Act of Congress.
THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., July 18, 1914.

CIRCULAR No. 600-6:
RELIEF AND PROTECTION OF AMERICAN SEAMEN.
The extract from an Act of Congress quoted below is published for the information of all concerned.
GEO. W. GOETHALS,
Governor.

An Act making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1915.

1. Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums be, and they are hereby, severally appropriated, in full compensation for the Diplomatic and Consular Service for the fiscal year ending June 30, 1915, out of any money in the Treasury not otherwise appropriated, for the objects hereinafter expressed, namely:

RELIEF AND PROTECTION OF AMERICAN SEAMEN.
2. Relief and protection of American seamen in foreign countries, and shipwrecked American seamen in the Territory of Alaska, in the Hawaiian Islands, Porto Rico, the Panama Canal Zone, and the Philippine Islands, \$20,000.

Approved, June 30, 1914.

Duties of Chief Engineers of Vessels in Transit.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., August 14, 1914.

CIRCULAR No. 684:
1. In future, in addition to the regular engineer officers of the watch, the chief engineer of all ships shall remain on duty in the engine room during the approach to and while passing through the locks.

2. It shall be his principal duty to see that signals from the bridge, for the operation of the engines, are understood and correctly and promptly answered.

GEO. W. GOETHALS,
Governor.

Making Out Form 167 C. E.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., August 19, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:
The instructions contained in my letter of May 3,

1911, that two copies of Form 167 C. E., physical examination of applicants for employment, be executed by the examining physician, are revoked. Henceforth it will be necessary to make out only one copy of this form.

GEO. W. GOETHALS,
Governor.

Auction Sale of Over and Unclaimed Freight.

THE PANAMA CANAL,
THE PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT.

On September 15, 1914, at 9 a. m. the Panama railroad will dispose of at public auction, on Dock 11, Cristobal, an accumulation of over and unclaimed freight, to recover freight and storage charges. Items to be sold will consist of a miscellaneous lot of wines, liquors, tobacco, dry goods, hardware building material, household goods, iron, steel, and general merchandise.

IMPORTANT—The Panama railroad will deliver at any station, at owner's risk, free of charge, articles purchased at this sale.

C. H. MOTSETT,
Superintendent.

COMMISSARY DEPARTMENT.

Emergency Sales of Ice.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,
CULEBRA, C. Z., August 19, 1914.

CIRCULAR No. 177-1:

District quartermasters and commissary storekeepers—Commissary storekeepers are authorized, when they have ice to spare, to sell small pieces to commissary patrons in emergencies. In the case of new employes or employes returning from leave, the district quartermaster may be notified and deliveries commenced at once, and the ice order card sent to Cristobal, dated far enough ahead to afford ample time for order to be handled in routine manner at Cristobal and ice to commence coming on effective date shown on card.

The ice furnished by commissary in the intervening days and all other emergency sales of ice will be covered by invoice or "G2" department sales slip and accounted for, as follows:

1. Each storekeeper will set aside five sales books and one invoice book, Com. Form 120, for use in making ice sales, and will at once notify the commissary accountant of the beginning and ending numbers of the series.

2. Each emergency sale of ice will be covered by a sales slip or invoice on which will be shown customer's name, house number, and amount of ice sold. Duplicate of sales slip or original of invoice will be given to customer. Duplicate of invoice will be forwarded to accounting office with daily reports. Originals of sales slips and triplicates of invoices will be held until the end of each month and forwarded to accountant's office, attached to a letter stating:

1. The amount of emergency ice sales during the month.
2. The quantity supplied by quartermaster.
3. The quantity supplied by commissary.

R. E. Wood,
Chief Quartermaster.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and from 3 to 6.30 p. m.

The gold departments of the Cristobal store, will open at 2 p. m., on Saturdays and sailing days of Panama railroad vessels.

In rush periods, all stores will remain open until 7 p. m.

Cold Storage Prices.

Retail prices of cold storage provisions for the week beginning August 27, 1914:

FRESH MEATS.		Price.
Mutton—Stewing, per pound		8
Shoulder, trimmed, per pound		12
Leg (8 to 10 pounds), per pound		19
Cutlets, per pound		20
Short cut chops, per pound		23
Shoulder, chops, per pound		14
Lamb—Stewing, per pound		10
Shoulder, trimmed, per pound		15
Leg (5 to 8 pounds), per pound		24
Chops, per pound		29
Shoulder, chops, per pound		18
Cutlets, per pound		29
Veal—Stewing, per pound		10
Shoulder, for roasting (not under 4 pounds), per pound		13
Chops, shoulder, per pound		18
Chops, per pound		27
Loin, for roasting, per pound		27
Cutlets, per pound		31
Beef—Suet, per pound		3

CANAL CLUBHOUSES.

Activities of the Young Men's Christian Association.

COROZAL.

Señor Alcindo Barcellos gave an entertaining piano recital at the local clubhouse on Thursday evening, August 20. About 200 persons were present. Several selections were played by Dr. Hill of Corozal, accompanied by Señor Barcellos on the piano.

The regular weekly pictures were shown Saturday night. Music was furnished by Mrs. Shady and Mr. Sundstrum.

The following high scores were made in bowling during the week ending August 22: Duckpins—Davis, 105, 105, 103; Gustavson, 100; Walker, 110, 102; Brien, 107; Koontz, 107. Tenpins—Terittier, 202; Sims, 205; Edwards, 210; Koontz, 202.

CULEBRA.

Motion pictures were exhibited in the time office, in the Administration Building annex, on Friday, August 21. There was an attendance of 125.

GATUN.

Mrs J. L. Caldwell sang two soprano solos at the Sunday evening service on August 23. Mr. F. G. Smith, the secretary, led the song service. One hundred and forty people were present. Mrs. A. P. Boyd will sing at the service to be held on August 30, and Dr. Hill, violinist, will play on September 6. The public of Gatun is invited to attend these services.

The bowling alleys were crowded on Saturday evening, August 22, when ladies' night was observed. The Argyle stringed orchestra furnished the music for the evening. Mr. Gilbert and Mrs. Tricker won first prize.

New students can be taken on at any time for the German class, which meets on Mondays and Wednesdays, at 7 o'clock.

Two hundred and thirty-six soldiers of Companies I and L, Tenth Infantry, have joined the Gatun Y. M. C. A.

Prof. Bermudez and Señora Bermudez will give an exhibition of mind reading at the Y. M. C. A., on Friday evening, August 27.

Instruction on the violin and piano are given at the Y. M. C. A. under competent teachers. For particulars see the secretary.

CRISTOBAL.

Following the luncheon, Friday, August 21, of the men interested in athletics, it was decided to have an athletic committee to promote and supervise the athletics of the Cristobal clubhouse. Mr. Wm. Mathuea was elected chairman of all athletics. Mr. Walter Cousineau was elected chairman of the basketball committee; E. H. E. Nash, lawn tennis; Mr. A. Quinn, track team; Mr. Nat Kaunitz, handball; and Mr. Alfred Hansli, volleyball. It was decided to organize immediately a local basketball league, composed of from four to six teams.

Cristobal defeated Corozal at basketball on Saturday, August 22, by a score of 34 to 21. In the indoor baseball game that immediately followed the basketball game, Corozal defeated Cristobal, 19 to 14.

Thirty-five books were added to the library last week. A number of the books were selected to be of aid in the discussion club.

Mr. and Mrs. Grover won first place in the married folks' bowling tournament by one point. The scores follow: Mr. and Mrs. Grover, 495; Mr. and Mrs. Collins, 494; Mr. and Mrs. Buser, 486; Mr. and Mrs. Sloan, 485; Mr. and Mrs. Bevington, 475; Mr. and Mrs. Cotton, 462; Mr. and Mrs. Connor, 414; Mr. and Mrs. Blaney, 377.

Mr. Barte is in the lead in the "Ragtime" bowling tournament, with 36 games to his credit and nine lost. Mr. Collins is a close second, with 32 games won and 10 lost.

High scores in tennis for the week were: Barte, 232, 222; Pinney, 224; Collins, 203; in duckpins: Henry, 119; Scheid, 111; Sloan, 105; Steele, 104.

An all-Isthmian checker tournament is planned for Saturday, September 5. All men interested in checkers are invited to take part.

Supplies for the Canal.

The following steamers, with supplies for The Panama Canal and Panama Railroad Company, arrived at the ports of Colon and Cristobal during the week ending August 8:

Prinz Sigismund, August 3, from New York, with 194 bundles galvanized iron pipe, 128 pieces galvanized iron pipe, for stock.

Times, August 3, from Gulfport, Miss., with 740 pieces untreated yellow pine piles, for Division of Terminal Construction.

Lewis K. Thurlow, August 4, from New York, with 8,226 pieces clay conduit, 33 sacks dowel pins, for stock; 4,745 pieces clay conduit, 16 sacks dowel pins, for Panama Railroad Company.

Advance, August 4, from New York, with one box

slate slabs, 32 cases woodwork, eight cases hardware, 40 drums hypochlorite of lime, for Division of Municipal Engineering; one propeller, one reel hoisting cable, 13 pieces castings, for Dredging Division; 13 crates steel shutters, one box mining machinery, one box magnetos for Mechanical Division; 16 galvanized boilers, one crate asbestos roofing, three cases electrical material, for Division of Fortifications; four boxes electrical material, one crate asbestos roofing, 25 barrels special governor oil, eight boxes steel plates, eight boxes transformers and oil, for Electrical Division; 98 pieces (1,318 board feet), ash lumber, seven cases brass rods, 200 bundles brooms, nine crates tin kettles, six cases sheet copper, 32 pigs stereotype metal, 350 kegs nads, 205 coils manila rope, four barrels roofing cement, five cases stationary, seven cases ticking, 65 pieces steel plates, 100 drums lubricating oil, 10 packages iron pipe fittings, for stock.

Parismina, August 5, from New Orleans, with 18 reels telephone cable, for Panama Railroad Company; two rough castings, for Dredging Division; 2,958 pieces (63,603 board feet), white oak lumber, 817 pieces (27,145 board feet) yellow pine car lumber, for Mechanical Division; 20 kegs washers, 3,800 cases kerosene, for stock.

Abnirante, August 5, from New York, with three pieces steel angles, for Dredging Division; nine cases electrical machinery, 60 reels cable, 10 cases electrical material, for Electrical Division; six crates electrical machinery for Division of Municipal Engineering; four cases electrical machinery, for Panama Railroad Company; 51 cases electrical machinery, for Division of Fortifications; 70 kegs nuts, three cases metallic tubing, for stock.

Aenas, August 6, from New Orleans, with 414 pieces (13,122 board feet) poplar lumber, for Mechanical Division; 19 reels telephone cable, for Panama Railroad Company; 821 bundles doors, windows, etc., 35 packages doors, etc., for permanent buildings.

Pastores, August 7, from New York, with four cases copper sheets, three cases hardware, for permanent buildings; seven cases dredging sleeves, for Dredging Division; two cases locks, 19 boxes machinery, for Division of Fortifications; 12 kegs bolts and clips, for Division of Terminal Construction; four boxes bolt clippers and rasps, 34 boxes trucks, 50 kegs galvanized staples, nine cases talc crayons, five boxes copper wire cloth, five cases brass rods, for stock.

Imvergyle, August 8, from New Orleans, with 3,952 barrels paving brick, for Division of Terminal Construction; 547 bundles (13,304 board feet) yellow pine flooring, 313 pieces yellow pine ship lap lumber, 2,836 pieces pipe, 1,500 pieces pipe, and 1,860 pieces fittings, for stock.

Movements of Vessels at Port of Balboa.

The arrivals and departures of steamships at the port of Balboa during the week ending at 8 a. m., August 22, were, as follows:

Arrivals—August 16, Arizonian, from Colon; August 17, Missouriian, and Isabella, from Colon; August 18, Montanan, from San Francisco; Quito, from Tumaco; Admiral Dewey, and Teniente Rodriguez, from Colon; August 19, Santa Catalina, from Chilean ports; Peru, (PSN), from Callao; August 20, Kentuckian, from San Francisco; Daldorch, from Tacoma; August 21, Pennsylvania, from San Francisco; Peter H. Crowell, and Admiral Schley, from Colon.

Departures—August 16, Pleiades, and Pennsylvania, to Colon; Arizonian, to San Francisco; August 17, Quilque, to Guayaquil; Huasco, to Valparaiso; Pachitea, to Callao; Missouriian to San Pedro; Isabella, to San Francisco; August 18, Lasata, to Los Angeles; Teniente Rodriguez, to Callao; August 19, Admiral Dewey, to San Francisco; August 20, Santa Catalina, and Montanan, to Colon; Aztec, to San Francisco; August 21, Quito, to Callao; Admiral Schley, to San Francisco; Peter H. Crowell, to San Francisco; August 22, Daldorch, to Limerick.

Legal Notice.

United States of America } In the District Court.
Canal Zone.

The following named American citizens died intestate leaving personal property within the Canal Zone to the amount stated:

Nelson Wheeler U.S.C. \$ 28.99
George Wagner " 179.09

The Administrator of Estates has filed a petition for the escheat of the abovenamed estates, in accordance with Section 779 of the Code of Civil Procedure.

Notice is hereby given to all heirs or creditors of the above estates to appear before this court in the court house at Ancon, on September 26, 1914, at 9 o'clock, a. m., to establish their claims, or to show cause why the said estates should not escheat to the Government of the Canal Zone.

E. M. GOOLSBY,
Clerk of District Court.

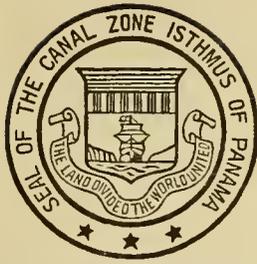

FOUND—On special train to Balboa, August 4, a kodak. Owner please call at House 161-D, Culebra, or telephone 223, Empire.

MOVEMENTS OF OCEAN VESSELS.

The following is a list of sailings and scheduled arrivals of the Panama Railroad Steamship Line; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and the United Fruit Company's Line:

Table with columns for destination (NEW YORK TO CRISTOBAL, CRISTOBAL TO NEW YORK, NEW YORK TO COLON, COLON TO NEW YORK, NEW ORLEANS TO COLON, COLON TO NEW ORLEANS), ship name, departure date, arrival date, and agent.

CANAL

RECORD

Volume VIII.

BALBOA, CANAL ZONE, WEDNESDAY, SEPTEMBER 2, 1914.

No. 2.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Balboa, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Revised Estimate of Excavation.

The revised estimate of excavation as of July 1, 1914, brings the grand total estimate of Canal excavation up to 238,845,587 cubic yards, which is an increase of 64,178,993 cubic yards, as compared with the estimate of December 1, 1908. The following table shows the increases in estimates which have been made from time to time since that of December 1, 1808:

ESTIMATES.	Increase.	Total estimate.
	<i>Cubic yards.</i>	<i>Cubic yards.</i>
December 1, 1908.....		174,666,594
July 1, 1910.....	7,871,172	182,537,766
July 1, 1911.....	4,676,278	187,214,044
September 1, 1911.....	8,109,335	195,323,379
July 1, 1912.....	16,903,000	212,227,000
November 1, 1912.....	277,759	212,504,138
February 1, 1913.....	5,634,161	218,138,299
July 1, 1913.....	14,214,701	232,353,000
July 1, 1914.....	6,492,587	238,845,587
Total.....	64,178,993	238,845,587

Slides in the Culebra Cut section have been responsible for over 50 per cent of the yardage involved in the total increase, as shown by the following table:

ESTIMATES.	Increase due to slides.
	<i>Cubic yards.</i>
July 1, 1910.....	6,104,150
July 1, 1911.....	4,676,278
July 1, 1912.....	4,615,000
February 1, 1913.....	5,634,161
July 1, 1913.....	11,280,000
July 1, 1914.....	2,848,636
Total.....	35,158,225

Of the remainder of the material involved in the total increased estimate, the principal factors have been removal of silt from the Chagres section, excavation for the terminal improvements at the Atlantic and Pacific entrances, including coaling plants, dry docks and the inner harbor at Balboa, and silting in both entrances, the latter properly chargeable to maintenance work. The recent estimates make provision for 10,695,000 cubic yards pertaining to terminals, no quantities for

which were included in the 1908 estimate. The cost was provided for under "Contingencies."

Of the remaining excavation to be accomplished as of August 1, 1914, aggregating 14,772,224 cubic yards, including both wet and dry excavation, 62,600 cubic yards are to be removed at the Cristobal coaling plant, 28,000 cubic yards in sundry installations at Gatun Locks, and 113,186 cubic yards at the Balboa terminal. Of the excavation by dredges, 1,900,400 cubic yards remain to be removed from the Atlantic channel, 1,500,000 cubic yards of which is properly chargeable to maintenance, and 1,203,929 cubic yards, consisting of shoals in Limon Bay, excavation at the Cristobal coaling plant, and other accessories. Within the limits of the old Central Division, 4,581,692 cubic yards remain to be taken out chiefly on account of slides, and 251,000 cubic yards from the channel in the old Chagres section, north of Gamboa. At Balboa, 6,631,417 cubic yards remain to be excavated, 3,202,933 cubic yards in connection with terminal improvements, and the remainder from the Pacific channel, where the excavation will be largely of a maintenance nature.

New Canal Tugs Named.

The two Type A tugs, now under construction by the Staten Island Shipbuilding Company for use in The Panama Canal and approaches thereto, will be named the *Gorgona* and the *Tavernilla* respectively. These names were those of two important Canal Zone settlements during the construction period of the Canal, later abandoned on account of being in the Gatun Lake area.

Rules Governing Transfer of Employes from or to the Isthmian Service.

Effective September 1, the following rules will govern employes transferred to The Panama Canal Service in the United States, and *vice versa*; and employes temporarily detailed to duty in the United States or on the Isthmus.

When an employe leaves the Isthmus to work for The Panama Canal in the United States his service on the Isthmus will be terminated. He will be paid off and all obligations will be cancelled the same as though he were leaving the service altogether. He will be paid for any leave which can be commuted into cash, or he will be given such annual leave as may be due him. The same rule will apply to employes in the United States transferred to the Isthmus. If they have not used as much of their annual leave in the United States as they might have done under the rules, they will forfeit the unused part, and their services will terminate on the date they sail for the Isthmus, on which date a new employment in the Isthmian service will begin. When an employe is sent to the United States for temporary duty, he will be given a travel order setting forth the conditions of his employment in the United

States, and his service will not be broken. The same principle will apply to employes in the United States temporarily detailed to duty on the Isthmus.

Isthmus No Place for Men Seeking Work.

The Chief of Police has advised that many of the laborers discharged at the plantations of the United Fruit Company at Bocas del Toro are arriving at Colon; that there are now approximately 1,000 idle laborers in that city, and that this number, owing to the lack of work at the docks and elsewhere, is constantly augmenting. Representations have been made to the Panama Government to the effect that the laws restricting immigration be rigidly enforced, especially Article 2 of decree No. 19 of March 22, 1909, wherein it is provided that aliens shall not be permitted to land on the Isthmus unless they have a sum of money equivalent to 15 balboas in their possession, and, in addition, the American consular representatives in the West India islands have been requested to spread the information broadcast that there is no more work to be had on the Canal. The continued arrival of the unemployed at Colon, in the face of the present labor congestion menaces the welfare and security of the resident population, and it is necessary that all reasonable means be taken to curtail this undesirable immigration.

Transisthmian Duct Line Reaches Cristobal.

Excavation for the northern section of the 4-way transisthmian duct line for telephone and telegraph and railway signal cables was completed on Thursday, August 20. This section extends from Gamboa to Fourteenth street, Cristobal, at a point near interlocking tower A of the Panama railroad. On the southern section, from Gamboa to Balboa, excavation of the trench has reached Miraflores tunnel dump, and the laying of duct is in progress south of Pedro Miguel.

The laying and concreting of duct in the northern section is in progress between Mount Hope and Cristobal. From a point opposite the pumping plant of the waterworks at Mount Hope, the line is to be of doubled capacity, or 8-way, to Fourteenth street, where it connects with a 12-way line which is the permanent trunk of distribution through Cristobal and Colon. The existing duct for the distribution system at the northern terminal has been completed for about a year, but authority was granted on August 21 for an additional line, 220 feet long, to extend from the manhole beneath building No. 2, Cristobal, to the new Pier 10, and for a 3,200-foot line to extend from the Garfield House, the present end of the line in the Colon Beach district, to the Colon radio station.

A branch will be laid at Darien, and an extension built at Balboa, for the radio stations at those points. The line at Darien, branching directly off the main transisthmian line, will be about 300 feet long; a joint

duct line for all cables for the Balboa radio station will extend beyond the Balboa town-site about 3,000 feet.

The pulling of cables into the completed portion of the duct has advanced from Gamboa to Mindi, in the northern section, and has not been begun in the southern section. Two cables are at present being pulled in two of the ducts; one is a duplex cable containing 50 pairs of wires, for the telegraph and telephone service, and the other is for the electrical control of the automatic signal system of the Panama railroad. Both cables have been spliced and tested to a point about seven miles north of Gamboa. The two other spaces of the 4-way duct are not to be occupied at present. One of these has been reserved for the Central and South American Telegraph Company, for its cable service, and the other for future requirements.

Balboa Heights Money Order Office.

Effective September 1, the post-office at Balboa Heights became a money order office, for the issuance and payment of money orders.

Sash Operating Device at Ancon Commissary.

A sash operating device has been installed by the Supply Department in connection with the opening and closing of windows in the new Ancon commissary. Its chief difference from other apparatus for this purpose is the method of operation, which provides for a central control. This control is actuated by a hand wheel located at a convenient height from the floor, and is transmitted to a horizontal shaft by a worm and gear. At each window there is a rack and pinion that opens and closes the sash as the horizontal shaft is made to revolve. In this manner, the sashes in the 21 windows at the commissary are opened or closed in one operation. The apparatus has proved especially convenient at the commissary in view of the height of the windows from the floor. It is manufactured by Lord and Burnham of New York City.

Assembling the "Teredo No. 2."

The Dredging Division is constructing, out of old equipment, a drill barge to take the place of the *Teredo*, which was wrecked and sunk by an explosion at the base of Cucaracha slide. It will be known as the *Teredo No. 2*. Three drill frames salvaged from the old *Teredo* will be mounted on barge *No. 7*, which has been retired from the Chame sand service. Steam will be supplied by a Scotch boiler taken out of the old double-end clam-shell dredge *No. 3*, at the time that vessel was converted into the hydraulic grader *No. 1*, new high pressure boilers being installed for the heavy pumping service. Electric lighting

equipment, pipes, valves, etc., will be reclaimed for the *Teredo No. 2* from the old French ladder dredge *Badger*, which has been condemned and is being dismantled at the Cristobal dry dock.

PERSONAL.

Dr. H. T. Summersgill, superintendent of the leper and insane asylum when it was located at Miraflores, and later assistant chief medical clinic at Ancon Hospital, has recently been appointed superintendent of the University Hospital at San Francisco, as well as taking charge of the present University of California Medical School. In addition, he will aid in completing the plans for the new teaching hospital buildings, for the erection of which, friends of the university have donated \$615,000. Since separating from the Canal service in June, 1908, Dr. Summersgill has been at the head of a number of different hospitals, and at the time of his recent appointment was superintendent of the New Haven hospital.

Skiffs for Use of Lock Pilots.

Requisition has been forwarded to the United States for six skiffs, which will be stationed one at each end of each of the Canal locks for the purpose of putting pilots on board of approaching ships, and taking them off again when the vessel has passed through; also, for running lines. These boats will be about 15 feet long, light, but very strongly built, with room for two oarsmen. They will have smooth sides, plenty of beam, be of light draft, broad in the stern sheets, and fitted with a painter, boathook, two stretchers, and a rudder and yoke.

Employees' Change of Address.

In order to prevent delay in the delivery of mail to employees who have recently changed their post-office address, especially those who have moved to Balboa Heights, the Director of Posts requests that their correspondents and the publishers of newspapers and magazines to which they subscribe be advised of the change.

The superintendent of clubhouses and playgrounds has been granted the temporary use of a plot of ground between the Balboa coral and the street railway tracks for the laying out of baseball grounds.

Married.

HILL-NORTHCUTT—On Friday, August 14, at Oklahoma City, Okla., Katharine Northcutt of Columbia, Mo., to Frank M. Hill of Memphis Tenn., the Rev. R. E. Goodrich of St. Luke's Church officiating. Canal Zone residence Balboa.

SEELEY-ENSMINGER—On August 12, 1914, at the Methodist church at Emporium, Pa., Miss Maria Luisa Enslinger, formerly of Panama, to Mr. Morris M. Seeley of Balboa. Residence, Ridgway, Pa.

Deceased Employees.

The estates of these deceased employes of the Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against these estates, or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Ancon, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

ZONE ATHLETIC TEAM.

Plan to Organize one for the San Francisco Exposition Meet.

The project of sending a team of athletes to the San Francisco exposition to represent The Panama Canal has been approved by the Governor, providing sufficient funds can be raised, and the amateur status of the athletes composing the team, can be established with the Amateur Athletic Union.

While there are no Government funds available for this purpose, permission has been given for the raising of money by subscription and entertainments in the clubhouses, and it is thought that in this way sufficient money can be secured to defray at least a portion of the expenses of the team. A series of vaudeville entertainments is now under consideration, the receipts of which will be used for this purpose.

The tentative plans contemplate the sending of a team of between 10 and 12 men, to be chosen, as follows:

The forming of a team will be placed in the hands of a committee. Three experts in athletic work, will be appointed by the superintendent of clubs and playgrounds and approved by the Executive Secretary; these two officials, or their representatives, will be the members of the committee. This committee will analyze the results of various athletic meets held in the Zone, and select the strongest team of athletes now on the Isthmus. These athletes will compete in the Corozal meet on Labor Day, under the title of "Exposition team." The results of the Labor Day meet will be analyzed by the same committee and changes made in the team if, in the opinion of the committee, a stronger one can be formed. The team will, in turn, compete as a team in a meet to be held on Thanksgiving Day, when the results will again be analyzed and the same procedure followed in the Washington Birthday meet, in 1915, immediately after which the committee will make final decision as to the team to represent the Canal Zone at the exposition.

Although records for swimming events on the Isthmus have not been carefully preserved, a comparison of Panama Canal records made in open water, with tank records, indicates that the Zone swimmers will be able to compete in the open water events at San Francisco.

A meeting of the tentative San Francisco exposition team, chosen for a tryout in the Labor Day meet, was held at the Hotel Tivoli on Saturday evening, August 29. The athletes all agreed to the plan outlined for the gradual forming of a team in a series of meets, and consented to sign articles of training. A committee has been appointed to select a coach and trainer. The team will meet once a week for practice, in addition to individual training. It is estimated that about 100 entries have already been received for the athletic meet on Labor Day. The games committee have decided to hold entries open until Friday. They should be in the hands of the clerk of the course by Friday noon.

Sanitary Census of Colon in Progress.

Enumeration for the sanitary census of the city of Panama was completed on Saturday, August 29, and the compilation of returns is being made at the office of the Health Officer of Panama. Enumeration in the city of Colon was begun on Monday, August 31, by two of the three sanitary inspectors who made the canvass in Panama.

EXECUTIVE ORDER

To Amend the Executive Order of April 15, 1913, entitled "Executive Order to Provide Maritime Quarantine Regulations for the Canal Zone, and the Harbors of the Cities of Panama and Colon, Republic of Panama."

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

I. The certificate to the form of original bill of health prescribed by Section 1 of the Executive Order of April 15, 1913, entitled "Executive Order to provide maritime quarantine regulations for the Canal Zone, and the harbors of the cities of Panama and Colon, Republic of Panama," is hereby amended to read, as follows:

I hereby certify that the vessel has complied with the quarantine rules and regulations of The Panama Canal, and that the vessel leaves this port bound for _____, Canal Zone, or _____, Republic of Panama, via _____.

Given under my hand and seal this _____ day of _____, 191—.

(SEAL)

(Signature of Consular Officer.)

II. The certificate to the form of supplemental bills of health prescribed by Section 1 of the abovementioned Executive Order is hereby amended to read, as follows:

I certify also that with reference to the passengers, effects, and cargo taken on at this port the vessel has complied with the quarantine rules and regulations of The Panama Canal.

Given under my hand and seal this _____ day of _____, 191—.

(SEAL)

(Signature of Consular Officer.)

III. Section 1 of the above mentioned Executive Order is hereby amended by adding the following paragraph to said section:

Vessels clearing from a foreign port to a port in the United States or one of their dependencies, and touching at any port of the Canal Zone, or Panama, or of Colon, Republic of Panama, shall not be required to obtain an additional bill of health under the quarantine rules and regulations of The Panama Canal, but it shall be sufficient that such vessel obtain extra copies of the bill of health and of the supplemental bill of health, if any, issued in the foreign port by the officer authorized by the quarantine laws of the United States. Such extra copies of the bill of health, or of the supplemental bill of health, as the case may be, shall be delivered by the captain of the vessel to the quarantine officer of The Panama Canal upon arrival of the vessel in ports of the Canal Zone, or the ports of Panama or Colon, Republic of Panama.

IV. Section 16 of the said Executive Order is hereby amended by adding thereto the following paragraph:

The baggage of cabin passengers embarking at infected ports shall be treated as provided in this section for baggage of steerage passengers.

V. The second paragraph of Section 19 of the abovementioned Executive Order is hereby amended to read, as follows:

(a) Vessels from the United States or their dependencies; (b) Vessels from foreign ports; (c) Vessels with sickness

aboard; (d) Vessels from Panamanian ports where any quarantinable disease prevails; (e) Vessels from Panamanian ports carrying passengers or articles suspected by the quarantine officer as being capable of conveying the infection of a transmissible disease.

VI. Section 26 of the abovementioned Executive Order is hereby amended to read, as follows:

Section 26. The quarantine officer, after his inspection of the vessel and its documents, shall decide whether said vessel or its personnel or passengers, or any article aboard said vessel is liable to convey any of the following diseases: Plague, yellow fever, cholera, smallpox, typhus fever, or leprosy; and, if so, such vessel shall be placed in quarantine and forbidden entry until free from such liability of conveying any such diseases, and he shall take such measures in respect to the vessel, its passengers or personnel, or of cargo as in his judgment may be required to prevent the entry of such diseases into the Canal Zone, or the cities of Panama or Colon, Republic of Panama.

VII. Section 34 of said Executive Order is hereby amended to read, as follows:

Any person violating any of the provisions of these regulations shall be punished by a fine not exceeding Five Hundred Dollars (\$500), or by imprisonment in jail not exceeding ninety (90) days, or both such fine and imprisonment at the discretion of the court. The punishment herein prescribed shall be imposed by the district court of the Canal Zone.

VIII. This Order shall take effect from and after the date upon which the Panama Canal is officially and formally opened for use and operation by the proclamation of the President of the United States.

WOODROW WILSON.

THE WHITE HOUSE,

August 14, 1914.

[No. 2020.]

Changes in Police Districts.

In accordance with a general order issued from the office of the chief of police and fire division, approved by the Governor, effective September 1, the number of police districts in the Canal Zone has been reduced to two, namely, Balboa and Cristobal. The boundaries of these districts are coextensive with the boundaries of the judicial subdivisions of the Canal Zone, established by Executive Order of the President, dated March 12, 1914, and effective April 1, 1914.

The police district of Empire has been abolished, effective August 31, 1914, and that part of the district lying within the Balboa judicial subdivision has been absorbed in the Balboa police district, and that part lying within the Cristobal judicial subdivision, has been absorbed in the Cristobal police district.

The boundary limits of the Culebra sub-district include now only that territorial section of the Canal Zone lying between the Canal and the west boundary of the Canal Zone, the north boundary of Pedro Miguel subdistrict, and the south boundary of the Cristobal police district.

That part of the Canal Zone lying east of the Canal, between the Chagres River and

the present north limits of the Pedro Miguel police subdistrict, is designated as included within the Pedro Miguel subdistrict. The subdistrict of Paraiso has been abolished and absorbed within the other subdistricts named.

The Balboa police district central station is to be located at Ancon until further orders, and will have the following substations and call stations:

Substations—Culebra, Pedro Miguel, Corozal, Las Sabanas, and Naos Island.

Call stations—Balboa dock.

The Cristobal police district central station is located at Cristobal and has the following substations and call stations:

Substations—Gatun, Gamboa, Frijoles, and Monte Lirio.

Call stations—Colon Hospital, and Margarita Island (Coco Solo Point).

The usual transfer of office property and records of stations affected has been made. The police records at Empire central station were packed in cases, each case being distinctly marked, describing contents, and sent to the Culebra substation for storage.

New Pastor of Union Church.

The Rev. William Flammer, the new minister of the Union Church of the Canal Zone, will sail from New York for Colon on September 8. He will be accompanied by his wife and three children. The parsonage for his residence, a Type-17 house removed from Culebra, is being erected at Balboa, and the committee expects to have it ready for occupancy on his arrival. Immediately after the minister takes charge, the schedule of the pastoral work in connection with the church will be outlined.

Canal Zone Motorcycle Club.

The Canal Zone Motorcycle Club was organized on August 23, with headquarters at Ancon. A second meeting of the club was held at the Ancon lodge hall on August 30. The club will hold a sociability run on Labor Day, September 7. All riders are invited to attend whether members of the club or not. The start will be made at 8.30 a. m., from McIntyre's garage, on the right hand side of the road just after crossing the railroad tracks at Panama, below the Hotel Tivoli. It is requested that participants bring their lunches.

Obituary.

Ray M. Page, a nonemployee, living at Mount Hope, died on August 24 at Santo Tomas Hospital. He was 32 years of age, single, and is survived by his cousin, Fred Harman, living at Mount Hope.

Funeral services in connection with the death of Charles Irving Evans, son of Dr. and Mrs. Forrest M. Evans of Balboa, will be held at St. Luke's Hospital chapel, Ancon, on Sunday morning, September 6, at 11.15 o'clock. Rev. C. W. Ports will officiate, and the Balboa Union Sunday school will be present. The child died on Tuesday, August 28. He was five years of age, and was born at Bocas del Toro.

Resolutions of Sympathy.

At the last regular meeting of Isthmian Canal Rebekah Lodge, No. 1, of Ancon, resolutions of sympathy and respect were passed on the death of Mrs. Helen Wago, one of its members, formerly residing at Corozal.

CANAL SIGNALS.

Code Adopted for Use in Operating Vessels In the Canal and the Locks.

A signal code has been adopted in connection with the operation of vessels through the Canal, and approaches thereto, together with instructions as to its use, as follows:

Vessels should hoist their designation signal when approaching and entering the terminal ports, and when passing Gamboa signal station.

The signal stations at the terminal ports and at Gamboa will be prepared to make and answer signals by the International Code; in addition, the station at Gamboa will be equipped with shapes and lanterns for making special signals by day and night.

The ends of the approach walls at each lock will be fitted with a signal apparatus for directing the movements of vessels in making the approach.

All vessels in transit through the Canal must abide by the orders conveyed by signals, or otherwise; and any violation of these rules will make the vessel liable for damages for such violation.

Vessels should be ready in advance to make or answer signals to the signal stations, or answer those made from the locks. The interrogatory and answering pennant of the International Code may be used by vessels in conjunction with the special signals in use at the locks and Gamboa signal station.

All signals made by locks or signal stations, be they special or otherwise, when understood, shall be answered by hoisting the answering pennant of the International Code.

During daylight, a vessel passing through the Canal will fly its colors at all times, and on coming in sight of the signal station at Gamboa or a terminal port, will immediately hoist its designation signal and keep it flying until answered; in case no instructions to the contrary be given, it will continue on its course.

SPECIAL CODE AT GAMBOA SIGNAL STATION.

The following code will be used at the Gamboa signal station, and at any others that may be established later:

The shapes at signal stations will be a sphere and a cone, as illustrated herewith:

At night, a white lantern will replace the sphere and a red lantern the cone.

Signals will be hoisted at yard arms; during the day, a red cone at the masthead will refer to vessels bound to the northward, from Balboa to Colon, and a black sphere to vessels bound the other way; at night, a red light at the masthead will refer to northbound vessels, and a white light to southbound vessels.

SPECIAL CODE.

Spheres and cones in the order named.

FROM SIGNAL STATION.

- One sphere—"Proceed."
 Two spheres—"Proceed at half speed."
 Three spheres—"Proceed cautiously, keep sharp lookout for Canal craft, steamers, or obstructions."
 One cone—"Moored at this station."
 Two cones—"Moored at next station, unless otherwise ordered."
 Three cones—"Slow down or stop for communications or orders."

FROM SIGNAL STATION TO CANAL CRAFT.

- Three cones—"Wish to communicate, have orders or message for you."

FROM VESSELS TO SIGNAL STATION.

- One cone—"Will moor at this station, unless otherwise ordered."
 Two cones—"Will moor at next station unless otherwise ordered."
 Three cones—"We wish to communicate."
 One sphere and one cone—"Our engines and steer-gear are disabled, require a tug."
 Two spheres and one cone—"We are aground, require assistance."
 One sphere, one cone, and one sphere—"We have fire on board (or are leaking badly.) Request that salvage tug be sent."
 One sphere and two cones—"Passed a vessel (or Canal craft) apparently in distress. Advise reporting it and sending tug."
 One cone and one sphere—"Request medical assistance at next lock or terminal."
 Two cones and one sphere—"Our radio is out of order and not working."

FROM EITHER ONE TO THE OTHER.

- One cone and two spheres—"Do not understand your signals."

SIGNALLING VESSELS AT THE LOCKS.

A scheme of signalling has also been adopted in connection with the passing of vessels through the Canal locks. A large red arrow will be placed near each end of each middle approach wall, which will be used in giving the following signals:

Arrow pointed vertically upward—"Not ready, keep away," meaning that lockage cannot take place for several hours.

Arrow pointed upward at an angle of 45 degrees—"Keep away, but be ready to enter on signal."

Arrow pointed downward at an angle of 45 degrees—"Moored against approach wall near outer end."

Arrow in a horizontal position—"Enter."

In the last three signals, the head of the arrow points toward the lock chamber to be used. In addition to the arrow, the "Answering" and "Interrogatory" pennants of the International Code will be used in connection with ships' signals.

Employees Suffering from Malaria.

The Chief Health Officer has recommended to the Governor that severe measures be resorted to, if necessary, to enforce compliance with recently promulgated regulations for persons suffering with malaria.

The following notice has been placarded prominently all over the Canal Zone:

1. Patients suffering from malaria often retain the germ of the disease in their blood after all the symptoms have disappeared, so that they are apparently well. Such cases are a danger to the community, in that they infect the mosquitoes and through them other people. Besides this, such cases are not permanently cured and will relapse whenever their resisting power is lowered from any depressing cause.

2. As patients naturally do not desire to remain in hospital after they feel well enough to work, it is necessary that they should continue under treatment in quarters until they are permanently cured. It is, therefore, directed that employees suffering from malaria shall, when discharged from the hospital, report to their district physician for treatment, and shall continue to report for treatment for at least one month and until pronounced cured.

3. Any employe who willfully fails to comply with this regulation shall be suspended without pay, or be discharged from the service.

4. Heads of departments and divisions, hospital and district physicians, foremen and others concerned, are directed to do all in their power to assist in enforcing this order.

Approved:

GEO. W. GOETHALS,
Governor.

CHAS. F. MASON,
Chief Health Officer.

Despite this notice, and instructions given all malarial patients on their discharge from the hospital, the reporting to district physicians has not been carried out satisfactorily. While great progress has been made in controlling malaria on the Isthmus, so that the

general rate among employes is lower than in any preceding year, it is now felt that not much more progress can be made until all carriers of the disease are brought under treatment.

Noncompliance with the instructions has been almost entirely confined to silver employes. They have apparently either not understood the instructions, or have not comprehended the importance of complying with them.

Award for Trench Excavation.

Bids for the excavation of the trench for the new water main between Gamboa and Miraflores were opened at the office of the Chief Quartermaster on August 10. Three proposals were received, as follows: R. W. Hebard, 77 cents per cubic yard for the earth excavation, and \$2.84 for the rock; C. J. Alberts, 74 cents per cubic yard for the earth, and \$1.58 per cubic yard for the rock; A. B. deObarrio, 60 cents per cubic yard for the earth, and \$1.60 per cubic yard for the rock. On the combined bid for rock and earth excavation, A. B. deObarrio was the lowest, and has been awarded the contract, making bond in the sum of \$12,000.

The contractors' forces have begun work in the rock section, south of Gamboa. No excavation for the trench will be permitted in the sections where soft material predominates until the pipe laying gang is ready to begin work. A quantity of the pipe has been received and is being distributed.

Motor Car House near New Administration Building.

Forces of the building division of the Supply Department are erecting a motor car house just east of the temporary station of the Panama railroad at Balboa, at the foot of the hill on which the new Administration Building stands. The foundation will be of concrete and the superstructure will be of wood. It will be 82 feet eight inches in greatest length by 39 feet eight inches in greatest width, and the central portion will be two stories in height. It will be equipped with four tracks, connecting with a spur from the main line of the railroad, and each track will run over a concrete repair pit. Adjoining the main room will be rooms for the storage of gasoline and oil; for a small repair shop, equipped with a lathe, a milling machine, a drill press, etc., and for quarters for a hostler. On the second floor will be family quarters for the machinist in charge, who will also be a chauffeur for emergency calls. These quarters will consist of a living room, three bedrooms, kitchen, and bath, and will have porches in front and rear.

Excavation for the foundation was begun on July 29. The foundation, floors, the four repair pits, and most of the frame work have been completed. The finishing work is in progress and it is expected that the house will be ready for use within a short time.

Order of Isthmian Conductors.

The next regular meeting of the Order of Isthmian Conductors will be held at Ancon lodge hall on Sunday, September 6, at 9.30 a. m. GEO. B. ALLEN, Secretary-Treasurer.

CRISTOBAL, C. Z., August 31, 1914.

Contract has been entered into with Mr. Thomas M. Blake of New York City, for furnishing 1,000,000 pounds of No. 1 timothy hay at the rate of \$1.10 per hundredweight.

CANAL WORK IN JULY.

Monthly Report of the Governor to the Secretary of War.

CULEBRA, C. Z., August 25, 1914.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of July, 1914:

Department of Operation and Maintenance.

The Division of Erection was abolished on July 15, and the work of continuing the erecting of machines, etc., was taken over by the superintendents of the locks.

Six towing locomotives were received, making 27 received up to July 31. Work on all guard valve machines was completed. The transformer rooms at Gatun were completed. Twenty-three thousand seven hundred and twenty feet of cable were pulled into ducts, making a total to date of 2,406,134 feet. Mechanical and electrical installation of chain fender machines was advanced to within 20 per cent of completion. Of the 22 fender chains on order, four complete chains have been received and installed, and the installation of others is advancing as rapidly as the material is received.

Twenty-one lockages were made at Gatun, 26 at Pedro Miguel, and 26 at Miraflores.

Electrical Division—The hydroelectric station at Gatun was regularly operated on load after July 13, and the steam station was closed. The output of the hydroelectric station was 416,460 kilowatt-hours. The output of all the other stations was 2,258,367 kilowatt-hours, of which 1,898,580 were from Miraflores steam plant. This division took over what work remains on the transisthmian transmission line, and on the permanent substations, on July 15.

Municipal engineering—Maintenance and repair work, and some construction for the Panama Government, were carried on in both the northern and southern districts. Construction of the new waterworks for Panama city and the Pacific terminus of the Canal was advanced, and work on the Gamboa pump station was continued.

Meteorology and hydrography—Rainfall was below station averages for all stations, except one, the totals ranging from 2.42 inches at Trinidad, to 10.74 inches at Colon. The total yield for Gatun Lake watershed was 67 per cent below the 25-year normal for July. There was no increase or decrease in storage during the month, the elevation of the lake on July 1 and July 31 being 84.85 feet above sealevel.

Division of Terminal Construction.

PACIFIC TERMINALS.

Dry dock and entrance basin—Studies and designs of the dry dock were continued, and the cross section of the entrance basin wall was decided upon, and work on the design was continued. Three shovels continued excavation, removing 42,930 cubic yards. Excavation in the entrance basin amounted to 1,737 cubic yards, and the work there is almost completed.

Quay wall and piers—Design included a study for the installation of tide gages on pier No. 1, tracing of the gangway for Quay Wall i-j-m-n, study of guides for the pontoons, and designing of floor slabs. Construction included the placing of 3,291 cubic yards of concrete in the floor and 241 cubic yards in the substructure of pier No. 1, the laying of railroad track on the pier, the continuation of cais-

son sinking for Quay Wall e-f, and the completion of anchorages for Quay Wall f-g.

Coaling plant—Design work included supports for the berm cranes and internal retaining wall, plans for the modification of the berm cranes, studies for the foundations, floor slabs, decking, curtain walls, and piers of the unloader wharf; and studies for the foundation and general layout of the reloader wharf. Construction included the placing of 1,604 cubic yards of concrete, and of 8,498 cubic yards of backfill in connection with the berm crane supports and the retaining wall. Work was begun on the piers for the unloader wharf.

Permanent shops—Design and construction were continued, and maintenance work was done.

ATLANTIC TERMINALS.

Coaling plant—The erection of construction trestles was continued. The west bridge track wall was practically completed. Caisson work advanced satisfactorily; 30 caissons have been driven to rock under the reloader wharf, and driving has commenced on 29 caissons for the unloader wharf. About 600 linear feet of the east shore of the site have been riprapped with hard rock brought from the dry dock site at Balboa.

BREAKWATERS.

Naos Island—Settlement on the breakwater was very slight and confined to a short stretch of the mole. Fill was not pushed as rapidly as in past months, and only 19,980 cubic yards of material were dumped. A measured line was laid out along the mole and from it there was begun a survey which will show the condition of the breakwater and the surrounding harbor bottom.

East breakwater, Colon—Construction of trestle was continued, 245,472 feet of pile having been driven during the month. Wash borings and resistance tests were continued, and the survey on the breakwater site was completed.

RADIO STATIONS.

At Darien, the contractor proceeded with the erection of tower No. 1, and at the end of the month it had been erected as high as the 150-foot level. Design of the electrical substation was advanced.

FUEL OIL PLANTS.

Bids from 26 bidders on special oil pumps, manifold fittings, oil line pipe, and pipeline fittings were canvassed, and recommendations for awards were made. An estimate of the total cost of the plants at both entrances was prepared.

Preliminary drawings, including general layout of foundations for boilers, pumps, buildings, etc., at the Pacific terminus, were prepared. Surveys were made to determine the route best adapted to gravity flow of oil from storage tanks to the handling plant. Dredging of the oil ship berth was completed, and work on the design of a landing for oil boats was advanced.

At the Atlantic entrance, the location of the handling plant was determined, and a preliminary survey for excavation purposes was begun.

LANDSCAPE ARCHITECT.

Work in connection with the new village at Balboa and Balboa Heights was continued. Experiments with Telford base for roads instead of MacAdam proved successful, the former taking the asphaltum coat perfectly. Roads under the new system are being constructed at greatly reduced cost.

Dredging Division.

The status of dredging on July 31 was, as follows:

LOCATION.	July Excavation. Cu. yds.	Remaining, July 31. Cu. yds.
Miraflores Locks to Pacific.....	28,679	1,638,733
Miraflores Lake.....		306,434
Culebra Cut.....	431,634	4,581,692
Gatun Lake.....		51,090
Gatun Locks to Atlantic.....	57,678	448,700
Total Canal prism.....	517,991	7,026,559
Balboa terminals.....	311,067	
Atlantic terminals.....	223,390	
Gravel.....	37,950	
Sand.....	22,209	
Grand total.....	1,112,508	

Culebra Cut—The excavation in Culebra Cut during the month was, as follows:

LOCATION.	Earth. Cu. yds.	Rock. Cu. yds.	Total. Cu. yds.
Empire slide.....			
Gamboa dike.....		3,674	3,674
Culebra slide, east.....	62,836		62,836
Culebra slide, west.....	56,320		56,320
Cucaracha slide.....	47,997	260,807	308,804
Total.....	47,997	383,637	431,634

Mechanical Division.

At Balboa shops, the work continued to be on the repair of dredge parts, construction of pontoons and caissons, rebuilding of Lidgerwood cars, and general manufacturing in all the shops. At Cristobal, eight vessels were docked, construction of caissons for the Cristobal coal plant was continued, and repairs to floating equipment were carried on. At Paraiso, the work was almost exclusively on repairs to dredging equipment.

Shop orders authorized during the month numbered 756, completed 807, uncompleted at end of month, 436. The output of the foundry was 226,701 pounds of iron, 47,488 pounds of steel, and 10,602 pounds of brass. Hostling was done on 5,568 pieces of equipment; shop repairs were made on 695 cars, and field repairs on 4,811.

Division of Canal Transportation.

Routine work of the lighthouse service, issuing of licenses to navigators and chauffeurs, inspection and certification of vessels, inspection of boilers, and appraisal of vessels, was done. A general survey of the floating equipment at the Atlantic and Pacific entrances to the Canal was made. An investigation was made of the accident to the drill barge *Teredo* in Culebra Cut on July 20.

The Board of Admeasurement rendered decisions on the following questions: As to the measurement of

1. Irregularly piled deck loads.
2. Rooms originally built for carrying passengers, but used for ship's officers, ship carrying freight only.
3. Dining saloon under No. 2.
4. Locker space, underneath stairs, used for medicine and cleaning gear.
5. Open space underneath stairs, leading from passageway to deck above, used only by officers of the ship.
6. Deck lockers used for boatswain's stores.
7. Space occupied by clerks, pursers, stewards, cooks, on ships carrying freight only.

Ninety-six vessels arrived at, and 95 departed, from the port of Cristobal. Of these, 52 were British, four French, 14 German, 18 American, one Spanish, three Dutch, one Italian, three Norwegian. Twenty-eight vessels arrived at, and 26 departed, from Balboa. Of these, seven were American, 13 British, three Chilean, four Peruvian, and

one Panamanian. The collections for tolls amounted to \$7,658.40, and for pilotage, to \$1,572.

Supply Department.

FORCE AND QUARTERS.

The force reports for the fourth Wednesday in July showed 32,437 employes of The Panama Canal and the Panama Railroad Company at work, of whom 4,712 were white Americans, 1,349 were European laborers, and the balance were West Indian laborers and artisans. The occupants of Government quarters numbered 7,558 Americans, men, women, and children; 1,339 Europeans, and 8,618 West Indians.

BUILDINGS.

Work at the settlement on Balboa Heights is rapidly nearing completion; all building authorized at LaBoca, except the mess hall, is completed, and plans are under way for moving a number of buildings from Porto Bello.

MATERIALS AND SUPPLIES.

The value of materials received during the month was \$818,483.28. It came forward in 39 steamers, and the weight of cargo, exclusive of lumber, piles, and ties, was 20,313 tons.

COMMISSARY AND SUBSISTENCE.

Subsistence operations during the month resulted in a net profit of \$2,661.29.

Accounting Department.

The cash balance in Canal appropriations on July 31 was \$3,219,752.48, which includes deficits in seven items, amounting in all to \$107,090.30. The cash balance in fortifications appropriations was \$4,402,215.76. The rolls for July, not including Panama railroad and fortification rolls, amounted to \$1,192,866.07; fortification rolls, \$63,481.42.

Payments were made by the disbursing clerk, Washington, in the amount of \$1,347,176.36, and by the Paymaster on the Isthmus, \$2,867,600.06, a total of \$4,214,776.42, of which \$199,431.90 was paid to the commissary. Collections on the Isthmus amounted to \$696,200, of which \$421,958.16 was repaid to appropriations, \$200,145.07 was trust funds, and \$74,996.77 was deposited as miscellaneous receipts. The latter amount includes \$11,606.69 collected as tolls.

Health Department.

Although it is not yet apparent, the large increase in the numbers of employes living in Colon and Panama cities will unquestionably have an effect on the vital statistics. In February, 1912, at the time of the last Canal Zone census was taken, only 9,872 employes out of 42,174 lived in the terminal cities, while now over one-half of the employes are living there. The number of names on the rolls during July was 46,616, the admissions to hospitals numbered 1,424, including patients treated in quarters, a rate of 366.57 per thousand per annum, as compared with 513.87 for July, 1913. The total number of deaths from all causes among employes was 27, of whom 16 died from disease, a rate of 4.12 per thousand per annum, as compared with 5.38 for July, 1913. The death rate by disease for black employes was 4.56 per thousand per annum, and for whites, 1.69 per thousand per annum. These data are based upon the police census taken in June, which confirms the opinion previously held that the estimated population of the Canal Zone and the terminal cities was higher than the facts warranted.

Executive Department.

Civil affairs—Among the questions taken

up with the Government of Panama during the month were routine postal matters, segregation of stables in the city of Panama, measures to reduce infant mortality in the cities of Panama and Colon, and the provision in Colon for houses for the people who must leave the village of New Gatun by December 31, 1914, in accordance with the approved plan of depopulation. The customs affairs were administered, a summary of the arrivals and departures of vessels will be found under the caption, "Division of Canal Transportation." Thirty-two estates were settled during the month, and at the end of the month, 40 were in course of settlement. Licenses were issued, as follows: For automobiles and motorcycles, 18; bicycles, 134; hunting, and carrying of firearms, 160.

Division of Posts—Money order sales for July amounted to \$360,049.82; receipts from stamp and card sales, \$6,727.76; deposits in postal savings accounts, \$290,558; withdrawals, \$205,301.

Police and prisons—Arrests made numbered 603, of whom 26 were women; deportations of criminal characters, nine; commitments to the penitentiary, three; discharged from penitentiary, 10; confined in penitentiary at end of month, 68.

Fire protection—Eleven fires occurred during the month, loss to Government, \$365.

Courts—In the district courts, seven civil cases, 27 criminal, and 37 probate were settled during July. Eight civil cases, 37 criminal, and 43 probate cases were filed. One hundred and three cases of all kinds were pending on July 31. In the Magistrate's court for the town of Balboa, 12 civil and 354 criminal cases were tried; Cristobal, 10 civil and 238 criminal cases.

Panama Railroad.

Traffic congestion continued during July, necessitating the handling of considerable cargo by barge. At Colon, 128,000 tons of cargo were handled, including 29,000 tons rehandled. Eighty-five ships entered at Cristobal and Colon, the Panama railroad having five ships arriving, with 850 first-class and 37 steerage passengers; and six ships departing, with 518 first-class and 101 steerage passengers. Eight empty and nine loaded barges were dispatched through the Canal southward, and 15 loaded barges were received from Balboa at Cristobal, the aggregate tonnage handled in both directions being about 10,000 tons.

Cristobal terminal docks—Pier No. 9 was completed during July. Work was continued on pier No. 7, on the driving of false work trestle. On pier No. 10, concrete side walls were rubbed and finished, steel doors were erected and painted, 129 cubic yards of concrete truss protection were placed, and 1,985 square yards of paving were laid.

Telephone and signal—The 9-position switchboard at the new Administration Building at Balboa was 50 per cent completed, and wiring was 90 per cent completed during the month. In the construction of the trans-isthmian duct line, 60,292 trench feet were completed during the month, and the whole line was 62 per cent completed at the end of the month.

Respectfully,

GEO. W. GOETHALS,
Governor.

The office of the Resident Engineer of the Division of Municipal Engineering, now at Gatun, will be moved to Balboa Heights on September 14.

WORK ON CHIRIQUI RAILROAD.

Grading Completed for a Distance of Seven Miles
—Track Laying to Start this Month.

Grading on the new railroad in the province of Chiriqui has been completed for a distance of about seven miles, four miles between the port of Pedregal and the city of David, and three miles on the La Concepción branch of the road. This branch line, extending from David to the village of La Concepción, a distance of about 18 miles, will be the first to be completed.

About 25,000 Oregon pine creosoted ties have been delivered to date; these cost, laid down, about \$1 each. The contractors, R. W. Hebard and Company, are preparing specifications and conditions under which native ties, delivered at any point on the line, will be purchased. It is anticipated that 25,000 native hardwood ties can be obtained locally. The contractors are purchasing from The Panama Canal all the old 70-pound rail in good condition that can be spared, in addition to a miscellaneous lot of other equipment, including two small Porter locomotives, used in the construction of the Canal locks. Most of this equipment is to be used in the railroad construction work, and a part of it, namely, a number of dump and flat cars, and piledrivers is now undergoing repairs at the Balboa shops.

The force at present employed on the grading work consists of 25 gold, and 200 silver employes, and is being gradually increased with the expansion of operations. An office building and storehouse have been erected, and barracks are being built for the silver employes, all of whom will be housed and furnished free medical attendance. A mess will be maintained for the gold employes. There will be no commissary; all supplies are purchased from local dealers in David.

The most difficult piece of construction on the David-Boquete line will be the descent into the Boquete valley, through which flows the Caldera River. This valley is a deep gash in the mountains, and the descent into it is very abrupt. When the wagon road was built into the valley, it was constructed on so steep a grade as to require two pairs of oxen to pull an ordinary cartload of freight up the incline. The contractors have planned to excavate the track bed along the face of the cliff getting to the floor of the valley on a 5-per cent grade. The terminus of the Boquete road will be on the south bank of the Caldera River, near one end of the cable bridge that furnishes a means of communication to the Panamanian post-office at Lino, and the coffee plantations of the Boquete highlands.

The European war has as yet placed no difficulties in the way of continued construction of the Chiriqui road, and it will be proceeded with along the lines originally planned. Rail is being forwarded by each steamer, and it is intended to start track laying at the port of Pedregal in the latter part of September, and lay a line to the site of the first steel bridge at the Cristobal River, a distance of eight miles. The contractors calculate on being able to work 1,000 laborers during the next dry season.

Theft from Post-Office at Toro Point.

A thief, or thieves, broke into the commissary store at Toro Point in the night of August 15-16 and stole stamps and coin, belonging to the post-office, to the value of \$18.61.

DREDGE "CULEBRA" RETIRED.

Dug Nearly 19,000,000 Cubic Yards During Its Period of Service.

The seagoing suction dredge *Culebra* has been retired from service. It has been moored alongside the wharf at Paraiso, and forces of the Dredging Division have covered the funnel, removed the tools and portable equipment and furniture, treated the machinery with preservatives, and otherwise completed its preparation for indefinite storage.

The retirement of the *Culebra* follows the practical completion of the work it is best suited to do, in the Pacific entrance and at the lake level. Its sister ship, the *Caribbean*, now at work in the Atlantic entrance, will be able, it is thought, to handle the maintenance work of removing silt, in both entrances. The remainder of the heavy work in the Pacific entrance will be done by ladder, dipper, and pipeline suction dredges. Construction work in the Atlantic entrance was completed in December, 1913, and subsequent work has been confined to the removal of silt.

The *Culebra* was built by the Maryland Steel Company, and sailed from its yards at Sparrows Point on October 9, 1907, for Balboa, by way of the Strait of Magellan. The vessel arrived at Balboa on December 28, and was placed in commission on January 21, 1908. It worked in the Pacific entrance channel and in the slips alongside the wharves at the Pacific terminus until January 20, 1914, when it was transferred to the Gatun Lake level and put at work removing gravel washed into the Canal channel near Gamboa by the Chagres River. It was transferred to the dry dock at Mount Hope for overhauling early in June, and on June 14, was returned to Balboa, where it was engaged alongside the steel pier and in the entrance channel until the time of its retirement. Following is a summary of its output up to July 1, 1914, by fiscal years:

FISCAL YEAR.	Cubic yards.	Days out of commission.
1907-1908.....	2,174,954
1908-1909.....	3,960,153	21
1909-1910.....	3,099,029	22
1910-1911.....	2,993,788	16
1911-1912.....	2,414,297	39
1912-1913.....	1,785,166	70
1913-1914.....	2,481,153	9
Total.....	18,908,540	177

Value of Material Received in July.

The total value of material received during the month of July was \$818,483.28, distributed, as follows:

Mount Hope (stock).....	\$316,007.06
Division of Erection.....	53,296.51
Division of Terminal Construction.....	32,515.63
Erection force, locks.....	37,595.11
Engineer of Maintenance.....	9,843.66
Dredging Division.....	17,899.56
Mechanical Division.....	65,205.24
Electrical Division.....	10,144.88
Canal transportation.....	4,111.40
Municipal engineering.....	25,902.59
Permanent buildings.....	24,396.59
Panama railroad.....	138,614.17
Fortifications.....	69,171.70
Executive Secretary.....	5,531.98
Auditor.....	1,085.21
Total operation and maintenance.....	\$811,321.34
Sanitary Department.....	7,161.94
Grand total.....	818,483.28

Election of Officers of Tivoli Club.

At the meeting of the Tivoli Club, held at the Hotel Tivoli in the forenoon of Sunday, August 20, the following were elected officers for the ensuing year: President, Mr. Walter Emery; first vice-president, Mr. William K. Jackson; second vice-president, Dr. H. C.

Clark; secretary and treasurer, Mr. Seymour Paul; members of the board of governors, the above *ex officio*, and Lieut. W. H. Wilbur and Mr. A. S. Zinn.

Customs Inspection at Cristobal Docks.

In order to maintain a closer supervision over the movements of individuals at the Cristobal docks, and to prevent the unauthorized introduction of parcels and packages, it has been decided to issue annual customs passes to those who have occasion to use the small boat landing between Dock 8 and Pier 9 regularly. One-trip permits may be issued by those in authority to men in the military and naval service of the United States who may desire to bring in parcels and packages; all others will be required to submit their property to inspection before they will be allowed

to leave the dock enclosure. It has been customary in the past to land laborers employed in the fortification work on Toro Point at these docks. This practice has been discontinued, and, hereafter, the employees will be landed at Dock 13 on the French canal, which will be nearer to the camp where most of them live. The employment of a customs inspector, whose duty it will be to see that the above regulations are carried out, has been authorized.

I. B. of S. S. and D. M.

The next regular meeting of the International Brotherhood of Steamshovel and Dredgemen will be held in Ancon lodge hall on Sunday, September 6, at 1.30 p. m.

R. G. WARREN, *Secretary-Treasurer.*
COROZAL, C. Z., August 26, 1914.

LABOR FORCE AND QUARTERS IN JULY.

The force report of July 22 shows the actual working force of The Panama Canal on that date to have been 27,044; of the Panama Railroad Company, 5,314, and of the contractors, 79, a total effective working force of 32,437. This is an increase of 2,269, as compared with the statement of June 24, and a decrease of 10,047, as compared with the force report of July 30, 1913. The gold force on the Canal work, composed almost exclusively of white Americans, was 4,712, divided, as follows: The Panama Canal, 4,198; Panama Railroad Company, 508; contractors, six, an increase in the total gold force over the preceding month of 601. Detailed figures of the total force employed on the Isthmus, by departments and divisions, are given below:

DEPARTMENT OR DIVISION.	SILVER EMPLOYES*										Total silver	Total gold.	Grand total.			
	Artisans.					European labor.		Laborers.

(1) Includes eight Asiatics. (2) Includes eight American negroes, and 11 Panamanians on the gold roll. (3) Includes Sabanas police station, Taboga Island, Naos Island, Culebra Island, and Palo Seco. (4) Includes Miraflores. (5) Includes 50 Panamanians. (6) Includes Empire, Las Cascadas, and Bas Obispo. (7) Includes eight American negroes. (8) Includes Colon Beach and Colon Hospital. (9) Includes 35 East Indians, 15 American citizens, and 181 Panamanians. Gold force of contractors (included above), 34 bachelors.

JOINT LAND COMMISSION.

Awards.

Award No. 56, docket No. 45, July 15, 1914—In the matter of the claim of Ildefonso Pinto for improvements on lands of Miraflores—An award is hereby made against the United States, in favor of Ildefonso Pinto, for the settlement of all rights, claims, or other interests in all growing crops, fruit trees and buildings, all other improvements of every kind, and all other rights and claims in lands designated as "Miraflores" on the property map of the Canal Zone, which the said Pinto may have, in the total sum of \$250, United States currency. This award shall be paid to the claimant above-named on or before the 15th day of September, 1914, and if payment, or tender of payment, of this award is not made on or before that date, said award shall thereafter bear interest at the rate of six per centum (6%) per annum until paid.

FEDERICO BOYD, LEVI MONROE KAGY, S. LEWIS, Commissioners.

NOTE—The full commission heard and passed upon the above claim, but on account of the illness and subsequent death of Commissioner Marks, his signature hereto was not obtained.

Award No. 57, docket numbers as noted, July 15, 1914—In the matter of sundry claims—An award is hereby made against the United States, in favor of the persons hereinafter named, in the sum of \$720, United States currency. This award shall be paid to the respective claimants hereinafter named, in the amounts hereinafter specified, on or before the 15th day of September, 1914, and if payment, or tender of payment, of any items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum (6%) per annum until paid.

Diaz, Juan, docket No. 361, for all rights, claims and other interests in growing crops, fruit trees, house without tax number, and any other buildings and any other improvements, which the said Diaz may possess or may have possessed on the lands of Balde Ospino, near Tabernilla, the sum of \$70, United States currency.

Melendez, Pascual, docket No. 169, for all rights, claims and other interests in growing crops, fruit trees, buildings, and any other improvements, which the said Melendez may possess or may have possessed in the public lands of the United States in the Trinidad valley, the sum of \$200, United States currency.

Skipper, Catherine, docket No. 29, for all rights, claims and other interests in growing crops, fruit trees, house without tax number, and any other buildings and any other improvements, which the said Catherine Skipper, or her husband, William A. Skipper, deceased, may possess or may have possessed on the public lands of the United States on the western side of the relocated line of the Panama railroad, and on the south side of the Frijoles River, the sum of \$200, United States currency. It is directed that this award be paid to Catherine Skipper, as administratrix of the estate of William A. Skipper, deceased.

Williams, Samuel, docket No. 33, for all rights, claims and other interests in growing crops, fruit trees, house without tax number, and any other buildings and any other improvements, which the said Williams may possess or may have possessed on the slopes of the Cerro Pelado, Cuatro Calles land, the sum of \$250, United States currency. Total, \$720, United States currency.

FEDERICO BOYD, LEVI MONROE KAGY, S. LEWIS, Commissioners.

NOTE—The full commission heard and passed upon the above claim, but on account of the illness and subsequent death of Commissioner Marks, his signature hereto was not obtained.

Rules of Dismissal.

Rule of dismissal No. 130, docket Nos. 147 and 202, July 15, 1914. In the matter of the claims of Pablo Surita for property located at Las Palmas, Trinidad valley—Pablo Surita was a possessor in good faith of a portion of national public lands of the Republic of Panama at the mouth of the Siri River in the Trinidad River valley, upon which he had entered prior to 1903. As such, he was entitled to compensation for his improvements before being ejected therefrom, in accordance with Article 2 of Law 48 of 1882, and by virtue of Article VI of the Treaty ratified February 26, 1904, between the United States and the Republic of Panama. On the 19th day of May, 1911, the improvements, which are now under water, were purchased by the Panama Railroad Company. Subsequent to this sale of his improvements, Surita went further away and started new cultivations at Las Palmas, in the same valley of the Trinidad River. These cultivations, for which he now claims compensation, are also outside of the 10-mile strip granted to the United States for Canal purposes, but within the auxiliary lands ultimately covered by the waters of Gatun Lake. To this claim, a general denial is filed by Counsel for the United States.

The question raised by this claim is very important

involving the status of the claimants in the valley of the Trinidad River, who had been paid for earlier improvements and afterward started new cultivations; and it becomes necessary to enter into an analysis of the situation.

FIRST FINCA, AT THE MOUTH OF THE SIRI RIVER.

On the 20th day of September, 1910, the Isthmian Canal Commission requested the authorities of the Republic of Panama to "Withdraw from right of preemption and settlement all the public lands which may likely be finally flooded" by Gatun Lake, and which were comprised up to elevation 100 feet above mean sealevel. In response to this request, the Republic of Panama issued Decree 89 of November 10, 1910, where-by it was provided:

"Article 2. Be it provisionally declared that the intervening pieces of national lands remaining above water within the perimeter of the lands of the Republic of Panama, outside the Canal Zone, and which in future may be flooded by the Gatun Lake, as well as those lands lying immediately around the same, which, for any reason, might be found to be absolutely necessary for the use or policing of the lake, are withdrawn from adjudication."

As a consequence of this provision, thenceforth all the portions of the public lands in the valley of the Trinidad River lying below elevation 100 feet above mean sealevel were provisionally withdrawn from adjudication.

Article 5 of the same decree provided:

"The rights of private persons already legitimately acquired in the sections of land to which the dilation of the lake will extend, in the Republic of Panama, shall be respected."

The law governing the adjudication of the public land in the Republic of Panama was at that time Act No. 19 of May 29, 1907, and by Article 81 thereof, it was established:

"The rights to public lands acquired by private persons in conformity with legal dispositions prior to the present law shall be respected, although they may be without titles."

The rights referred to in the abovequoted article were those secured by the Colombian Laws No. 61 of 1874, and No. 48 of 1882, since 1907 abrogated by the new Panamanian legislature, regulating the public lands. The Colombian cultivator's law granted to the cultivator of public lands privileges corresponding to possessors in good faith, entitling them to be indemnified to the extent of the value of their improvements which were on the land, before being dispossessed thereof. The finca, which Surita had at the mouth of the Siri River, was thereby thoroughly protected by Decree 89 of November 10, 1910, and Article 81 of Law 19 of 1907.

On the 19th day of May, 1911, Surita's improvements at this location were purchased by the Panama Railroad Company, and consequently all the right that Surita had to compensation for same became extinguished so far as he was personally concerned.

SEGUNDO FINCA AT LAS PALMAS.

Subsequent to the sale made to the Panama Railroad Company, Surita went further up the Trinidad valley, and started a new cultivation at Las Palmas, for which he now appears before the Joint Land Commission and claims compensation, the improvements for which he claims being under water at this time. The circumstances of their being under water clearly show that Surita had settled in the region provisionally withdrawn from adjudication by Decree 89 of 1910 and although he does not pretend to seek adjudication of the land which he had cultivated at Las Palmas, he does pretend to have entered upon such lands and cultivated them in good faith.

Almost a year after the new cultivation of Surita's was started—on March 16, 1912—the authorities of the Canal Zone, in a communication to the Secretary of Foreign Affairs of the Republic of Panama, stated that the lake to be formed between Gatun and Pedro Miguel for Canal purposes would encroach an area greater than the prescribed width of the Canal Zone, and, inasmuch as that portion of the land under the jurisdiction of the Republic of Panama would become covered by water, asked that the occupation of the portion of land by private persons be prohibited, and that permission be granted for the establishment thereon of police service to enforce that prohibition on the part of the Zone authorities. In accordance with this request, the Government of the Republic of Panama, through the Secretary of Government and Justice, issued, on the 29th day of March, 1912, resolution No. 22, of which the pertinent part reads, as follows:

"Be it resolved, that the Government of the United States of America is hereby authorized to proceed through its representatives in the Canal Zone to the occupation of the territory outside of the Zone which may be necessary to complete the formation of the Gatun Lake, which constitutes one of the most salient features of the Isthmian Canal. In consequence, the Government of the Republic of Panama will cease in the exercise of all authority in that territory, which, in fact, comes

under the control of the American Government."

On April 30, 1912, the Head of the Department of Civil Administration of the Canal Zone, acting under instructions of the Chairman and Chief Engineer of the Isthmian Canal Commission, made the following presentation to the Panama Government:

"In relation to this matter, I have the honor to advise Your Excellency that I am in receipt of a letter from the Chairman and Chief Engineer of the Commission, dated the 22nd instant, in which he advises me, as follows:

"For the proper maintenance, operation, sanitation, and protection of the Canal, the United States needs a strip of land around Gatun Lake, which may be tentatively fixed by the 100-foot contour. The acquisition under Article Second of the Treaty between the United States and Panama of this strip of land around Gatun Lake having been once agreed to by Panama, the matter would be clearly and definitely outlined."

"In view of the present situation, it is desired that proper representations be made to the Panamanian Government, with a view to the issuance of a decree that will resolve the matter along the foregoing lines."

The Republic of Panama thereupon issued decree No. 46 of May 17, 1912, Articles 1 and 2 of which are, as follows:

"Article 1. There is hereby recognized, in pursuance of Article II of the Hay-Bunau-Varilla Treaty, the right of the United States to the use, occupation, and control of the area (or extension) of land which will be covered by Gatun Lake, and of that part of the shores of said lake which reach an elevation of 100 feet above sea-level, for the purposes herein above indicated."

"Article 2. Settlement or entry upon the National public lands included in the belt three miles in width, surrounding and immediately contiguous to the 100-foot contour line above mentioned, is hereby temporarily prohibited."

Therefore, from the middle of the year 1907, and up to the time when the United States began to exercise over the area of the Trinidad valley below the 100-foot contour line, "All the rights, power, and authority which the United States would possess and exercise if it were the sovereign of the territory to the entire exclusion of the exercise by the Republic of Panama of any such right, power, or authority," the Law No. 19 of May 29, 1907, was in force therein.

In accordance with such law, as is stated in Article III

"The occupation of National public lands is not permitted, except under the conditions which this law establishes."

Surita could not go upon said lands without first complying with the obligations set forth in the following provisions of said law:

"Article 71. The licenses for transitory cultivation will be granted for two years, and the tax upon these licenses shall be paid in advance at the rate of 20 cents, balboa (B.0.20) in the current year, and will be increased gradually 10 cents, balboa (B.1.00) each year until it reaches one balboa (B.1.00) a hectare in the ninth year, remaining so in the future. These licenses will not be given for a piece of land greater than eight hectares."

"Article 72. The municipal alcaldes in the districts where there is no national land office will issue these licenses in stub books by power conferred by the respective agent of lands after the corresponding tax has been paid in the respective municipal tax office."

"Article 73. The licenses in question shall contain:

- The number of the order which corresponds to them;
- The name of the person in whose favor it is issued;
- The proof of having paid the tax;
- The area of the land and its situation, and
- The proof of its having been issued without prejudice to a third person."

The evidence before the Commission shows:

First—That Pablo Surita began the second cultivation in 1911.

Second—That the entrance of Surita in 1911 upon said lands could only have been made subject to the provisions of Law 19 of 1907.

Third—That the said Surita did not obtain the license referred to in Article 71 of said Law 19.

Fourth—That he was on lands embraced by his cultivation at Las Palmas in contravention with Article III of said Law 19.

In view of the facts herein set forth, we have reached the conclusion that no rights had accrued in favor of Pablo Surita for his illegal occupation of the lands at Las Palmas, therefore, he is not entitled to any award against the United States, and his claim is accordingly dismissed.

FEDERICO BOYD, S. LEWIS, Commissioners appointed by the Republic of Panama.

LOST—On August 20, one pair of aluminum frame spectacles, in case, white getting on the 5.10 p. m. train from SNOB, about 150 feet south of roundhouse at Balboa. Finder is requested to leave same at district quartermaster's office, Balboa. Liberal reward.

OFFICIAL CIRCULARS.

Panama Canal Library.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., August 24, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

In connection with the consolidation of records, a library is being established in the new Administration Building at Balboa to provide for the accumulation of official books, documents, reports, etc., which are indiscriminately kept in the various offices on the Isthmus at present.

It is desired that all available books not required for immediate need of other offices be forwarded to the library, in order that the collection there may be as complete as practicable with matters of interest to the Canal. If a receipt is desired for any books turned in to the library, you should submit a duplicate copy of your letter of transmittal.

A catalogue file will form part of the library and every effort will be made to keep it as complete and up-to-date as the demands of the service require. Steps will be taken to have the library placed on the mailing lists of various manufacturers handling equipment and supplies, etc., of interest to the Canal. If there are any special catalogues of interest to your work which should be placed in the library, please advise this office. You are also requested to send in any catalogues, which have not become obsolete, and which you think should be kept in the library.

Shipments of books, etc., should be directed to "The Panama Canal Library, Administration Building, Balboa Heights."

GEO. W. GOETHALS,
Governor.

Customs Regulations.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z. July 14, 1914.

CIRCULAR No. 679:

1. *Article 1.* There is hereby established a Bureau of Customs for The Panama Canal which shall be charged with the following duties:

2. The entry and clearance of vessels at the ports of the Canal Zone and in transit through the Panama Canal.

3. The custody of goods, wares, and merchandise introduced into the Canal Zone, pending the release thereof on presentation of evidence in due form that said goods, wares, and merchandise are entitled to free entry, or that the import duties due to the Republic of Panama have been paid, or that payment has been waived.

4. The enforcement of the immigration laws and regulations of the Canal Zone, except as this duty is assigned by law or Executive Order to the Chief Quarantine Officer.

5. The certification of invoices covering shipments from the Canal Zone to the United States.

6. Such services to seamen as are commonly rendered by shipping commissioners in American ports, or by American consuls in foreign ports.

7. *Article 2.* The Executive Secretary of The Panama Canal shall be charged with the supervision of the Customs Service. The captains of the ports of the Canal Zone shall be, *ex officio*, officers of the Customs Service for the purpose of entering and clearing vessels. There shall be employed such inspectors and other subordinate officers as may be necessary to carry on the work of the bureau as determined by competent authority. Employees of The Panama Canal, or of the Panama Railroad Company on the Isthmus, whose duties relate to vessels using the Panama Canal and its terminal ports, or to cargo discharged in the Canal Zone, may be appointed customs officers for special and defined purposes, and they shall discharge their duties as such without additional compensation.

8. *Article 3.* Subject to the direction of the Executive Secretary, and except as otherwise provided for in these regulations, inspectors of customs shall perform the duties heretofore performed by deputy collectors of customs in the Canal Zone.

9. *Article 4.* Vessels may enter and clear at either the port of Balboa or the port of Cristobal. If they desire to pass through the Canal without stopping at the opposite terminal port, they may clear from the port of entry, but should they stop at the opposite port for the purpose of taking on or discharging freight or passengers, or taking stores, provisions, supplies, coal, fuel, or water, they may be compelled to enter and clear from both ports.

10. *Article 5.* When a vessel arrives at the port of Balboa, or the port of Cristobal, or at the Panama Canal in transit, the master thereof shall furnish to the boarding officer representing the Bureau of Customs, or if no customs officer shall come aboard, to the captain of the port, on a blank form which will be furnished for that purpose, a report of arrival, which shall include such statistical data relating to the vessel, its

cargo and passengers, as may be required by the various departments of The Panama Canal.

11. *Article 6.* There shall be also furnished to the boarding officer a full manifest of the cargo, in writing, signed by the master and specifying the marks, kinds, and quantities thereof, the port or ports where the cargo was shipped, the different ports to which it is consigned or intended to be entered, and the names of the consignees. Any form of manifest in substantial compliance with these requirements will be accepted, and it may be in English, or in the language of the nation to which the vessel belongs. If in a foreign language, the master or agent of the vessel must furnish a translation. If the regular manifest does not substantially comply with the requirements, then a statement shall be furnished for statistical purposes, containing the information specified.

12. *Article 7.* An additional copy of the manifest must be furnished by the master or agent of the vessel for each port in the Canal Zone at which cargo is discharged; provided, that in lieu of a copy of the complete manifest there may be furnished, at the option of the master or agent, a copy of only such portions of the manifest as relate to the cargo to be so discharged.

13. *Article 8.* There shall also be furnished to the boarding officer the clearance issued to the vessel at the last port of call, a copy of the passenger list, which shall distinguish between passengers in transit and passengers to be landed in the Canal Zone, a copy of the crew list, list of sea stores, purser's statement, certificate of discharge from quarantine, and, in case of vessels of the United States, the register and articles.

14. *Article 9.* The master shall certify under oath that the manifest, passenger list, and other documents delivered by him to the boarding officer are complete and true.

15. *Article 10.* No vessel shall be permitted to enter until the master or agent shall produce a certificate of discharge from quarantine.

16. *Article 11.* Before an entry is made of a vessel of the United States, the register and articles must be produced to the customs officers, and these papers are to be retained until a clearance is granted.

17. *Article 12.* It is not necessary for the captain or master of any vessel of war or public vessel owned or chartered by a foreign government to report and enter on arrival at the Panama Canal, at either of the terminal ports, unless engaged in the transportation of merchandise in the way of trade, but such vessel shall be subject to the quarantine regulations and to the regulations relative to the payment of tolls and of bills for material, supplies, repairs, harbor, pilotage, towage, wharfage, and other services furnished to vessels by The Panama Canal, and such public or chartered vessels, other than men of war, may be required to certify as to the number of passengers or troops on board, and the character and kind of cargo, when requested by the Canal authorities to do so.

18. *Article 13.* The Bureau of Customs shall have exclusive control over all goods, wares, and merchandise, including passengers' baggage and packages of every kind and nature introduced into the Canal Zone, pending the release thereof on presentation of evidence in due form that such goods, wares, and merchandise are entitled to free entry, or that the import duties due to the Republic of Panama have been paid, or that payment has been waived. No such goods, wares, or merchandise shall be released for delivery to consignees or for reexport, except upon the order of a customs officer.

19. *Article 14.* A copy of a manifest of cargo landed at any point in the Canal Zone shall be delivered by the Bureau of Customs to the customs authorities of the Republic of Panama.

20. *Article 15.* The master of a vessel clearing from the Panama Canal, or any port of the Canal Zone, shall be required to furnish to the Bureau of Customs a manifest of all goods, wares, and merchandise, including packages of every kind and description, accepted for shipment from the Canal in said vessel, showing the kinds, quantities, value, and destination thereof, and also a list of all passengers embarked in the Canal Zone, or if no cargo has been accepted for shipment and no passengers have embarked, a statement to that effect. But with the consent of the Bureau of Customs, previously obtained, these documents may be furnished through an agency on the Isthmus within 48 hours after the clearance of the vessel. The manifests, passenger lists, and statements submitted in compliance with the article shall be subscribed and sworn to by the master or agent of the vessel.

21. *Article 16.* Vessels leaving the Panama Canal, the port of Balboa, or the port of Cristobal, shall be cleared by the port captain at the port of departure.

22. *Article 17.* The captain of the port will not issue a clearance until he has ascertained:

(a) That the documents and statistical data in regard to cargo and passengers, as required by these and other regulations governing the use of the Panama Canal, have been furnished by the master of the vessel, or that

satisfactory arrangements have been made to furnish same through an agency on the Isthmus.

(b) That all tolls, and bills for materials, supplies, repairs, harbor pilotage, towage, or wharfage, furnished to vessels by The Panama Canal, or the Panama Railroad Company, have been paid, or that their payment has been secured.

(c) That the vessel has complied with the quarantine and immigration laws and regulations of the Canal Zone.

(d) That the laws and regulations governing the shipment and discharge of seamen, and for the protection of seamen, have been complied with.

23. *Article 18.* The Executive Secretary charged with the supervision of the Customs Service of the Canal Zone shall, in person or through such assistants as he may designate, perform the duties of a shipping commissioner, and he shall render such services to American seamen as are commonly rendered by shipping commissioners in the United States, and by American consuls abroad. In the performance of these duties, he shall be governed by the Navigation Laws of the United States, and by the United States Consular Regulations, in so far as they are applicable.

24. *Article 19.* Questions which may arise in the administration of the Customs Service of the Canal Zone which are not specifically provided for in these regulations shall be decided in accordance with the Customs Regulations of the United States, in so far as the latter regulations are not locally inapplicable.

GEO. W. GOETHALS,
Governor.

Act of Congress.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., July 18, 1914.

CIRCULAR No. 600-8:

WAR VESSELS ATTENDING PANAMA-PACIFIC EXPOSITION
—RADIO STATIONS.

The extracts from an Act of Congress quoted below are published for the information of all concerned.

GEO. W. GOETHALS,
Governor.

AN ACT making appropriations for the fiscal year ending June 30, 1915, and for other purposes.

1. *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* that the following sums be, and they are hereby, appropriated, to be paid out of any money in the Treasury not otherwise appropriated, for the naval service of the Government for the year ending June 30, 1915, and for other purposes:

PAY, MISCELLANEOUS.									
*	*	*	*	*	*	*	*	*	*
CONTINGENT, NAVY.									
*	*	*	*	*	*	*	*	*	*

2. That the sum of \$104,000, or so much thereof as may be necessary, be expended, on the approval and authority of the Secretary of the Navy, for entertaining the officers and crews of foreign fleets which may be sent to attend and participate in the Panama-Pacific International Exposition in consequence of the invitation of the President of the United States, extended in pursuance of the authority contained in the joint resolution of Congress, approved February 15, 1911, and of the authority contained in the Act making appropriations for the naval service for the fiscal year ending June 30, 1912, and for other purposes, approved March 4, 1911, and for defraying such other expenses incident to the visit of the said foreign fleets as the Secretary of the Navy may deem proper, and the said sum shall be available until November 15, 1915.

3. That the tolls that have been or may be prescribed by the President, in pursuance of the authority contained in the Panama Canal Act, approved August 24, 1912, to be levied by the Government of the United States for the use of the Panama Canal, shall not be assessed against nor collected from any war vessel of any foreign nation which may pass through the Panama Canal *en route* to or in returning from the Panama-Pacific International Exposition: *Provided*, that such vessel has been sent by its Government to attend and participate in the said exposition in consequence of the invitation of the President of the United States, extended in pursuance of the authority contained in the joint resolution of Congress, approved February 15, 1911, and of the authority contained in the Act making appropriations for the naval service for the fiscal year ending June 30, 1912, and for other purposes, approved March 4, 1911.

4. The Secretary of the Navy is hereby authorized and empowered to define and establish suitable anchorage grounds in Hampton Roads, Virginia, and the adjacent waters for the combined fleets of the United States and foreign Governments which may rendezvous there prior to proceeding to the Panama-Pacific International Exposition, to be held in the city and county of San Francisco, California, in the year 1915, as well as to define and establish suitable anchorage grounds

In the Bay of San Francisco and the approaches and waters adjacent thereto during the continuance of the said Panama-Pacific International Exposition, and the Secretary of the Navy is hereby further authorized to make such rules and regulations regarding the movements of all vessels in all of the waters named as may be necessary, in order to insure the proper and orderly conduct of such features as may be planned for the combined fleets, and to provide for the safety of the vessels participating therein; and such rules and regulations when so issued and published shall have the force and effect of law.

* * * * *
BUREAU OF STEAM ENGINEERING.
* * * * *

5. Toward the purchase and preparation of necessary sites, purchase and erection of towers and buildings, and the purchase and installation of machinery and apparatus of high power radio stations (cost not to exceed \$1,000,000), to be located, as follows: One in the Isthmian Canal Zone, one on the California coast, one in the Hawaiian Islands, one in American Samoa, one on the island of Guam, and one in the Philippine Islands, \$400,000, to be available until expended.

Approved June 30, 1914.

Division and Field Accounting for Property.
THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., July 20, 1914.

CIRCULAR No. 656-2. (Superseding Circular No. 656);

1. *Voucher numbers*—Foremen's orders, requisitions, inspection calls, or other evidences of debits against accountable officers; also, credits to accountable officers' accounts, will be given voucher numbers.

2. *Debits to responsible officers:*

(a) Accountable officers shall, upon receipt of debit papers, Form PC 907, Form PC 924-1 (Q. M. D. 4), and inspection calls, immediately forward two copies of each to the responsible officer, who shall immediately acknowledge receipt of the property on one copy, which will be returned to the accountable officer for his file, and retain the other copy for his file, as a debit to his responsibility.

(b) Foremen's orders for nonexpendable property shall be made in sextuplicate, and shall be signed only by responsible officers or their material foremen, four copies to be sent to the storehouse issuing the material, and two copies to be retained in the foreman's order book. One of the two remaining copies shall be signed by the responsible officer as a receipt and forwarded to the accountable officer, immediately upon receipt of the property, and the other copy retained as a debit to the responsible officer's account. When the quadruplicate copy is received from the Auditor by accountable officers, both copies will be given voucher number and the responsible officer notified of the number given and any changes that may have been made in designation. Debit will be entered on the responsible officer's record under these voucher numbers. In writing foremen's orders, pencil carbon must be used and each employe authorized to draw foremen's orders shall provide himself with a metal backing up sheet. Storekeepers will not honor foremen's orders unless all copies presented are legible, and shall see that prices and additional descriptions are also plainly entered on all copies.

3. *Credits to responsible officers*—One copy of all credit papers shall be furnished to the responsible officer whose account is to be credited, and filed by him under their respective voucher numbers, as credits to his responsibility.

4. *Record of responsibility:*

(a) An abstract of the debits and credits to each responsible officer's account shall be kept by the accountable officer on Form PC 935 (Q. M. D. 7); provided, that this shall not be construed to mean that records already written up on existing forms shall be rewritten immediately; they may be continued on their present forms until such time as it becomes necessary to rewrite the record.

(b) Accounts with foremen and others who actually have property in use shall be kept by the responsible officer in the same manner and on the same form.

5. *Transfers between responsible officers*—Transfers of property between responsible officers within a division must be made on Form PC 395. Receipts for property transferred between responsible officers will be numbered serially by accountable officers, and consecutive file kept by accountable officers so that ready reference can be had for inspection.

6. *Memorandum receipts*—Responsible officers, on receipt of property, shall take receipt for same on Form PC 401, from the employe actually having the property in his possession, giving one copy to the employe signing the receipt. Foremen and others charged with property, when transferring any of their property to another foreman or employe under the same responsible officer within a division, must take receipt for same on Form PC 401, furnishing copy to employe to whom the property is transferred, copy to the responsible officer, and retain

one copy. The same form shall be used in crediting foremen for property returned to responsible officers. The property for which any employe is responsible must be checked at least once every six months.

7. *Property handled by tool rooms*—These instructions will not apply to property issued from tool rooms on shop checks, but accountable or responsible officers will take receipts from tool room foremen as prescribed in Paragraphs 2 and 6, and tool room foremen will, in turn, issue tools on metal checks as at present, except in cases where gangs are on detached service, when Form PC 401 must be secured, as provided for in Paragraph 6.

8. *Property on locomotives*—The property on locomotives of The Panama Canal and the Panama railroad must be standardized, where same has not already been done, and a copy of the standard list of property assigned to each locomotive will be posted in locomotive cab. Locomotive engineers will be held responsible for the property shown on this list while in charge of any particular locomotive, and no receipts will be required as provided for in Paragraph 6.

9. *Supply Department property*—Property in use by families will be held on memorandum receipt given district quartermasters, and district quartermasters will not use Form PC 401, except where property is issued to foremen, sanitary inspectors, and others, in which cases the same procedure will be followed as provided for in Paragraphs 2 and 6.

10. *Property releases*—All gold employes leaving the service or entering on leave will be required to secure releases from property and quarters, which, for Panama Canal employes, must be presented to the Auditor of The Panama Canal, or to the branch of his office at Cristobal or Ancon, before final payment will be made.

11. *Property entrusted to silver employes*—Responsible officers will be required to see that property for which they are responsible and which may be in the possession of silver employes, is satisfactorily accounted for before such employes leave the service.

12. *Release of accountable officers*—Final payments to accountable officers will be withheld in the Auditor's office until such time as an audit of property accounts is made or a transfer effected to some other accountable officer, after which a release will be issued by the Auditor.

13. *Release of responsible officers*—Releases to responsible officers will be issued by accountable officers, and releases to all other gold employes will be issued by responsible officers.

14. *General*—The Auditor of The Panama Canal will have general supervision over division and field accounting for property, and is charged with the responsibility for the proper compliance with the provisions of this circular.

Examinations by Board of Local Inspectors.

THE PANAMA CANAL,
BOARD OF LOCAL INSPECTORS,
ANCON, C. Z., August 29, 1914.

The Board of Local Inspectors will conduct examinations at the administration building, Ancon, on Wednesday, September 9, 1914, beginning promptly at 2 p. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Ancon, forms of application and information re-

specting the filling out of same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles, with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the regular examination, at 2 p. m., at the administration building, Ancon; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the administration building, Ancon.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. The test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; the deputy inspector will be present at the Panama railroad station at Gamboa at the hour abovementioned.

By direction of the chairman of the board.

W. H. HYDE,
Clerk to the Board.

COMMISSARY DEPARTMENT.

Special Sales.

The following special sales are announced:

DRY GOODS.

Complete sale at Cristobal, until close of business September 8.

SHOES.

At Corozal, until close of business, September 8.

MEN'S AND WOMEN'S FURNISHINGS.

At Corozal, until close of business, September 8.

HATS.

At Corozal and Cristobal until close of business, September 8.

HARDWARE.

At Cristobal, week beginning September 4.

PIPES.

Special sale at all big commissaries.

Oranges from Costa Rica.

The commissary department received recently an experimental shipment of Costa Rica oranges, which were placed on sale at some of the principal stores. They were larger in size than the average California orange, have a much thinner skin, and are very juicy, the pulp being of a reddish color, and possessing a flavor distinct from either the native or imported varieties. They command a higher price than the native or Jamaican orange, retailing at the commissaries at 30 cents a dozen. The shipment was supplied by the United Fruit Company.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and from 3 to 6.30 p. m.

The gold departments of the Cristobal store, will open at 2 p. m., on Saturdays and sailing days of Panama railroad vessels.

In rush periods, all stores will remain open until 7 p. m.

Cold Storage Prices.

Retail prices of cold storage provisions for the week beginning September 3, 1914:

Canal Supplies.

The following steamers, with supplies for The Panama Canal and Panama railroad, arrived at the ports of Colon and Cristobal during the week ending August 15:

Panama, August 10, from New York, with five cases paper, 40 cases polish, 80 cases lard oil, 63 bundles brooms, three boxes rubber hose, five cases paint, nine cases copper, 10 drums lubricating oil, three carboys ammonia, 17 bundles shovels, 41 cases cotton fire hose, for stock; 3,097 bags lime, 407 barrels plaster, 13 cases hardware, one case machinery, 27 barrels paint, 10 packages tile, for permanent buildings; 116 packages medical supplies, for Health Department; one box screws, one box wire cloth, 23 crates building paper, for Division of Fortifications; one package repair parts, one package pulleys, 13 packages steel couplings, four cases engine parts, for Dredging Division; one package badges, for Canal Zone Government; one box stationery, one package drawing paper, one box blueprint paper, for Executive Office, Culebra; one package repair parts, 59 cases glass, one box tools, five crates asbestos roofing, two boxes chemicals and chemical apparatus, for Division of Municipal Engineering; one package gears, one case ebony wood, four packages grille frames, for lock erection; six boxes electrical material, for Electrical Division; four cases brass checks, for Accounting Department; five pieces castings, five pieces steel billets, for Supply Department; three cases velocipedes, 30 reels telephone cable, for Panama railroad; one box magnetos, one transfer car, 35 brake shoes, one case hardware, 37 packages steel shutters, for Mechanical Division; and a miscellaneous cargo, the whole consisting of 4,333 packages, weighing approximately 295 tons.

Ancon, August 12, from New York, with 12,040 bags Portland cement, 15 cases paint, for stock; 1,667 crates tile, for permanent buildings; 12 boxes coupon books, for Accounting Department; one box rubber hose, 12 empty cylinders, for Mechanical Division; one box transformers, nine cases electrical material, for Electrical Division; two reels wire, 21 cases electrical material, for Division of Fortifications; two electric towing locomotives, four cases electrical material, for lock erection; and a miscellaneous cargo, the whole consisting of 125,812 packages, weighing approximately 6,349 tons.

Turrialba, August 12, from New Orleans, with 500 pieces (16,619 board feet) yellow pine lumber, one box hammers, 30 boxes paint, for stock; 279 pieces castings, 587 pieces (17,231 board feet) yellow pine lumber, for Mechanical Division; 14 cases brass bolts, for lock erection; 15 boxes polished marble, for permanent buildings.

Santo Maria, August 13, from New York, with 75 boxes window glass, eight cases magna boiler covering, one box brass fittings, for stock; one box brass fittings, for Division of Municipal Engineering.

Abangores, August 13, from New Orleans, with six cases skylight glass, 124 pieces dressed white oak lumber, for stock; 43 pieces rough white oak lumber, three crates wire screens, one box hardware, 1,208 sacks silica sand, for Mechanical Division; 39 reels telephone cable, for Panama railroad.

Tenadores, August 14, from New York, with 399 bundles shovels, 19 boxes bronze wire cloth, one case files, one case saw sets, for stock; nine crates steel boxes, for Electrical Division.

Olaf, August 14, from Ferdinandina, Fla., with 65,793 pieces (1,346,222 board feet) yellow pine lumber, 194 pieces (10,051 board feet) cypress lumber, for stock.

Chancellor, August 14, from Liverpool, with six reels wire rope, one box pinions, one wheel, for Dredging Division.

CANAL CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Members who are now located in towns where no privileges are available should communicate with the general secretary relative to adjustment of ticket.

BALBOA.

A new Hires fountain has been received from the United States and will be installed in the refreshment parlor. A number of plants have been received from the district quartermaster and placed in front of the clubhouse.

The "Voyage of the Discovery," by Capt. Robert E. Scott, in two volumes, has been added to the library; also, a new Rand-McNally atlas.

A number of the local checker players will go to Cristobal next Saturday night to play in the tournament to be held there. A series of games between the two clubhouses will be arranged shortly to decide the championship.

COROZAL.

High scores in bowling during the past week were made by the following men: Duckpins—Ryan, 104; Ruggles, 112; Gustavson, 104. Tenpins—White, 205, 209, 222; Territtier, 219; Boisen, 203; Oettli, 200.

The local league basketball games the past week were fast. The "French" defeated the "Germans" by a score of 36 to 13, and the "English" defeated the "Russians," 25 to 16. The following are the lineups for the teams:

"Germans"—Doherty, Capt.; Howe, Hartshorne, Roberts, Territtier, Souder.

"French"—Whiston, Capt.; Violett, Connant, Mitchell, Hutchings, Cautlers, Gerchow.

"English"—Plank, Capt.; Bessey, Morrison, Dwelle, E. C., Parkis, Ridge, L.

"Russians"—Owens, Sims, Huldquist, Capt.; Koontz, Otis, Sommers.

The Corozal boys were visited by the Pedro Miguel boys, who defeated them at indoor baseball, but Corozal won the basketball and bowling.

PEDRO MIGUEL.

Prof. Magnocci gave an entertainment in sleight of hand and ventriloquism at the Pedro Miguel clubhouse on Tuesday, August 18.

Mr. Russell, secretary of the Pedro Miguel clubhouse is in Ancon Hospital, but expects to be out in 10 days. Mr. P. T. Woolworth is in charge of the clubhouse during his absence.

A "Southern social" will take place on Thursday night, September 3. A banquet, consisting of popular Southern dishes, will be served.

CULEBRA.

In the final chess tournament between Culebra and Ancon players, played at Culebra, the result was: Culebra, 17 1/2; Ancon, 12 1/2.

On account of the removal of all offices to Balboa Heights, effective September 5, the Culebra clubhouse will be open only in the evening from 6 o'clock to 10 o'clock on week days. It will remain open, however, all day on Sundays and holidays. For the present, motion pictures will be continued in the old time office. Newspaper and periodical subscriptions expired on September 1.

GATUN.

The special entertainment given on Friday evening, August 27, was attended by about 300 civilians and soldiers. The program comprised motion pictures, sleight of hand feats, ventriloquism, and an exhibition of expert rifle shooting by Prof. Aros Satam and Paq'n'ta Tomaski.

Mrs. Boyd sang at the song service on Sunday evening August 30. Mr. Kjellander led the choral singing.

Dr. Hill, violinist, of Corozal, will play on September 7.

Entry blanks for the Labor Day meet may be procured from the secretary or the physical director.

CRISTOBAL.

Mr. S. P. Verner has been elected chairman of the discussion club, and Mr. N. Rohden, secretary. At the regular meeting of the club, on Thursday, August 27, Messrs. Hipp, Rohden, Weaver, Larsen, Stevens, Stevenson, and Kromer were selected as the committee on programs, and Messrs. Fox, Fluery, Male, Wentzinski, and Bouton, as the committee on publicity.

The men are showing interest in the newly organized athletic association. Under the leadership of Mr. Quinn, the men are practicing every evening in the lot adjoining the clubhouse for the field meet at Corozal on Labor Day. Twelve men have registered for a total of 35 entries.

The basketball committee met and organized four teams for the local league on Thursday, August 27. The opening game of the schedule was played on Tues-

day, September 1. The lineup of teams was, as follows:

"Senators"—Huber, Simons, Wilson, Patrick, Saunders, Neeson, and Wright.

"Naps"—Fraser, Duffy, Cousineau, Hughes, Kautitz, Fitzpatrick, and Roberts.

"Yankees"—Luce, Ashton, Haasli, Croxford, Warbuton, Jurss, and Strong.

"Athletics"—Burgoon, D. Raymond, J. Raymond, Pring, Cotton, Whitver, Mathues.

The men interested in lawn tennis met on Monday, August 31, under the leadership of Mr. Nash, and planned for a local tennis tournament.

The "You'uns" defeated the "We'uns" at basketball on Saturday, August 29, by a score of 38 to 34.

At the single folks' bowling tournament held on Monday, August 24, Mr. Henry and Miss Lillian Cotton won by rolling the high total of 567 pins. The other teams were, in the order of their scores: Mr. Russell and Miss Stevens, Mr. Gibson and Miss G. Butler, Mr. Drew and Miss Bevington, Mr. Smith and Miss Pearson, Mr. D. Raymond and Miss Cori, Mr. Steele and Miss C. Madison, Mr. Scheid and Miss Ragsdale, Mr. Nash and Miss M. Butler, Mr. Ashton and Miss L. Madison, Mr. Prager and Miss Holland.

The following high scores were rolled during the week ending August 29:

Duckpins—Henry, 120; E. Cotton, 109; Scheid, 105; Collins, 103; Pinney, 102; Smith, 100; Mrs. Bevington, 100.

Tenpins—Strong, 223; Collins, 222; Burns, 108; Barte, 207; Russell, 200.

Cristobal took all three games from Corozal at tenpins on Saturday, August 29. Scores follow:

Table with 4 columns: Player, Cristobal score, Corozal score, Total score. Includes players like Rusty, Burns, Strong, Peterson, Collins, etc.

All men interested in checkers are invited to participate in the all-isthmian checker tournament to be held at the Cristobal clubhouse on Saturday, September 5.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., August 31, 1914.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts, and may be procured upon request of the addressees:

Table with 2 columns: Name, Address. Includes Abston, J. M., Marden, Wm. C., Galyean, G., O'Brien, Edward F. (2), Lane, William, Pulliam, Miss Caroline, Lasswell, Miss A., Williams, C. (pamphlet).

Movements of Ocean Vessels at the Port of Balboa.

The following vessels arrived at, or departed from, the port of Balboa during the week ending 8 a. m., August 29:

Arrivals—August 24, Ecuador, from Guayaquil; August 25, Mexican, from Colon; August 26, Palena, from Valparaiso; Nebraska from San Pedro; August 27, Quito, from Guayaquil; Mantaro, from Callao; August 28, Carolyn, from Colon; Erbuna, from Colon; Barracouta, from San Francisco; L. Luckenbach, from San Francisco.

Departures—August 24, Monavi, to Guayaquil; Ancon, to Colon; Kentuckian, to Colon; City of Sydney, to San Francisco; August 25, Isthmian, to San Francisco; Peru, to Callao; Teniente Rodriguez, to Callao; Mexican, to San Francisco; August, 26, Niagara, (yacht) to Colon; August 28, Nebraska, to Colon; Carolyn, to Colon; August 29, L. Luckenbach, to Colon; Erbuna, to Japan.

During the week, three vessels passed through the Canal southbound, and six northbound.

Legal Notice.

United States of America } In the District Court. Canal Zone.

The following named American citizens died intestate leaving personal property within the Canal Zone to the amount stated:

Table with 2 columns: Name, U.S.C. amount. Includes Nelson Wheeler (\$28.99), George Wagner (179.09).

The Administrator of Estates has filed a petition for the escheat of the abovenamed estates, in accordance with Section 779 of the Code of Civil Procedure.

Notice is hereby given to all heirs or creditors of the above estates to appear before this Court in the courthouse at Ancon, on September 26, 1914, at 9 o'clock, a. m., to establish their claims, or to show cause why the said estates should not escheat to the Government of the Canal Zone.

E. M. GOOLSBY, Clerk of District Court

MOVEMENTS OF OCEAN VESSELS.

The following is a list of sailings and scheduled arrivals of the Panama Railroad Steamship Line; of the Royal Mail Steam Packet Company; and the United Fruit Company's Line:

NEW YORK TO CRISTOBAL.

Table with 4 columns: Ship name, Line, Sails, Arrives. Includes Panama, Allianca, Colon, Advance, etc.

CRISTOBAL TO NEW YORK.

THE CANAL RECORD,
Balboa, Canal Zone,
Isthmus of Panama.

No communication either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Effects of the European War on the Prices of Commodities.

The effect of the war in Europe has begun to be felt on the commissary prices. Meat is the first item to be seriously affected. This is due to the fact that the beef contract is based on a sliding scale, which varies according to the wholesale prices in the Chicago market. Prices on beef and other meats have materially advanced within the past 30 days. The commissary is protected by its contract on groceries and canned goods up to September 30. The new contract will become effective October 1, and it is probable that there will be some advance in the prices on certain commodities.

Flour has advanced in price but not materially. The price of rice is advancing rapidly. Sugar has advanced in price more than any other commodity. Granulated sugar is selling at retail in Chicago for 10 to 12 cents per pound at the present time.

The supply of glassware and china from Europe will be shut off, and there will be some difficulty in obtaining shipments from England. The commissary has on hand a large supply of glassware, and a fair supply of ordinary kitchen and table ware. Arrangements are being made to replace the aluminum cooking utensils, formerly purchased abroad, with stock from the United States.

There is a good stock on hand of woollens and linens, and about two months' supply of boots and shoes. Prices on these are rising rapidly in the United States, and it is anticipated that on new purchases there will be an advance in price.

The supply of cheap hosiery, formerly purchased in Germany, has been entirely cut off.

No particular advance in the prices of cigars and tobacco is anticipated. There will probably be difficulty in obtaining English tobaccos and cigarettes, and they will be replaced by those of domestic manufacture.

Shipments from Germany are entirely suspended, and, owing to the difficulty in ne-

gotiating New York drafts in London, the English shippers are refusing to make deliveries. Efforts are, however, being made to overcome this difficulty.

General Overhauling for the "Vulcan."

The rock breaker *Vulcan* was removed from the dry dock at Mount Hope in the morning of Wednesday, September 2, after undergoing a general overhauling. The principal repair work was strengthening the well in the center of the hull, through which the ram is dropped for breaking rock. The angle bars which formed the original reinforcement of the well were supplanted by steel channels. While this work was in progress, the loose rivets in the hull were renewed, the wooden wearing strips on the bottom were replaced, the bottom and sides of the hull were repainted, the boiler was retubed, and minor repairs were made to pipes and machinery.

This is the first time the *Vulcan* has been on the ways for general repair since it was placed in service five years ago. It was shipped, knocked down, from the Lobnitz yards in Scotland, and erected at the marine shops at Balboa.

Steamship Company Increases Passenger Rates.

The Royal Mail Steam Packet Company has issued a notice that, owing to the increased cost of operating its ships, on account of the European war, rates to Trinidad, Barbados, and the northern islands have been increased 25 per cent for all classes of passengers. The old rates to New York and Kingston, Jamaica, and the special repatriation rate for deck passengers from Colon to Barbados granted to Panama Canal employes remain unaltered.

Portable Gang Plank at Gatun Locks.

A portable gang plank will be installed on the center wall at Gatun Locks for the purpose of facilitating the disembarkation of the pilot, the special Canal passage crew for handling lines in the locks, and others, from a vessel on the down lockage. The gang plank can be run out while the water is equalizing thereby affording, without delay in the lockage, an opportunity for those on board to go ashore. The pilot will be able to handle his vessel from the lock wall when it is leaving the locks, as the water will be at low level, and 30 minutes, or more, in time will be saved in getting ready for the next lockage, by having the pilot already on the wall.

Many vessels passing through the Canal do not have sufficient men to handle the lines in the locks properly. For these vessels it is required that they take on additional men at the entering terminal port, which crew is discharged at the other end.

For ships going directly to sea, or which do not dock at the second port, it is necessary to provide some form of transportation from

ship to shore, and it must be larger than an ordinary pilot launch.

The gang plank will allow this crew to disembark at Gatun, thus avoiding the water transportation. The same considerations apply in the case of passengers who may have obtained permission to pass through the Canal, the main items of interest lying, of course, between, and at the Atlantic and Pacific locks.

Special Ancon-Balboa Street Car Service.

In view of an increasing demand for a later street car service between Ancon and Balboa at night than was formerly furnished, the Panama Tramways Company, on Monday, September 7, began the operation of a special service, following the completion of the regular schedule for the day. As this arrangement creates an added expense to the tramways company, it has been granted authority by the Governor of the Panama Canal to increase the fare collected from passengers carried on the cars operated on this special schedule within the Canal Zone from five to 10 cents per person, making the fare from the Zone boundary at Chorrillo, or "Limit" as it is known, to the end of the line at Balboa, 10 cents, United States currency, and from Ancon to Chorrillo, 10 cents, or double the day rate from Ancon to Balboa. For the present, only one car will be operated in this service, making three round trips between the termini of the line at Balboa and Ancon. The car does not run to the station in the Ancon Hospital grounds, for the reason that it is not considered safe to cross the railroad track in the Tivoli district at that time of the night, but, instead, will stop at the road crossing to the Hotel Tivoli. It takes a car about 40 minutes to make the round trip, and on this basis, the following schedule has been placed in effect:

CARS TO LA BOCA.

From	First trip.	Second trip.	Third trip.
	A.M.	A.M.	A.M.
Tivoli.....	12.20	1.05	1.55
Santa Ana.....	12.20	1.10	2.00
Chorrillo.....	12.25	1.15	2.05

CARS TO ANCON.

From	First trip.	Second trip.	Third trip.
	A.M.	A.M.	A.M.
La Boca.....	12.40	1.30	2.20
Chorrillo.....	12.48	1.38	2.28
Santa Ana.....	12.55	1.45

On Sundays and holidays the cars will leave each station 20 minutes later than shown in the above table.

Library of Reference Works and Catalogues.

A general reference library is to be established in the new Administration Building at Balboa, for the primary purpose of collecting at one known and easily accessible place books and catalogues which may be of use to employes in their work.

The nucleus of the collection will be the books of general engineering interest now in

the various offices of the organization. The offices will retain such books as deal with their special provinces and are frequently consulted, but will send to the general library the works of wider range for which they have less use. The books of general nature will be of more value in the common library than highly specialized books, for the reason that an employe who is seeking especially technical information would do better to consult directly the department which makes a specialty of the matter he is studying.

A collection of catalogues from manufacturers and distributors of goods used in the Canal work, in connection with complete files of the principal American and foreign technical magazines, with their advertising matter, will be one of the most valuable features of the library. This is expected to make advanced information in the various branches of engineering accessible to all, and to facilitate the purchase of the most satisfactory goods.

Manufacturers and distributors who think there may be use for their goods in the varied work of the Canal are invited to send catalogues to "The Panama Canal Library, Balboa Heights, Canal Zone." They are requested to send catalogues in duplicate. One copy is to be placed in the files of the library, and the other will be available for circulation among the various offices which may send requests to the library for catalogues on specific subjects. This invitation applies to all, irrespective of whether they have been heretofore in communication with any divisions of the Canal organization. It is desired to keep the catalogue library as complete and up-to-date as possible, and it is believed it will be an efficient way of keeping producer and consumer in touch.

PERSONAL.

Hon. Levi Monroe Kagy of the Joint Land Commission, accompanied by the new member, Hon. Nicholas Cornett of Lawrenceburg, Ind., will sail from New York on the *Ancon* on September 10.

Mr. Dan E. Wright sailed for New York on the *Panama* on Wednesday, September 9, on special leave of absence.

Cristobal Dancing Club.

The monthly dance of the Cristobal Dancing Club will be held in the Cristobal clubhouse on Saturday evening, September 12.

The Panama railroad passenger station at Colon will be repainted, and necessary repairs made to the window frames. The work will be done by forces of the Supply Department.

OPENING OF ZONE SCHOOLS.

Thursday, October 1, the Appointed Date—Arrangements for Attendance.

The public schools of the Canal Zone will open on Thursday, October 1, 1914.

All children residing in the Canal Zone, whether of employes or nonemployes, and all children of nonresident employes of The Panama Canal are entitled to free school privileges. No child will be admitted, however, who will not be six years old on or before February 1, 1915.

Schools for white children will be opened at the following places: Balboa Heights, Grades 1 to 12; Ancon, Grades 1 to 8; Corozal, Grades 1 to 8; Pedro Miguel, Grades 1 to 7; Paraiso, Grades 1 to 4; Culebra, Grades 1 to 8; Las Cascadas, Grades 1 to 8; Gatun, Grades 1 to 8; Cristobal, Grades 1 to 10.

Schools for colored children, Grades 1 to 8, will be opened at the following places: La Boca, Ancon, Paraiso, Gatun, Mount Hope, and Cristobal.

All pupils on the Balboa side of the nurses' quarters (house No. 152), and the insane asylum, will attend school at Balboa Heights; and all pupils on the Ancon side of these designated buildings will attend school at Ancon. Pupils who live at East Balboa will attend school at Balboa Heights. Eighth grade pupils living at Pedro Miguel will attend school at Corozal. Fifth, sixth, and seventh grade pupils living at Paraiso will attend school at Pedro Miguel, and eighth grade pupils will attend at Corozal. Another year of high school work may be offered at Cristobal if conditions warrant.

Schools for white children will open and close according to the following schedule:

WHITE SCHOOLS.	A.M.	P.M.
Balboa Heights.....	8.00-11.00	1.00-3.00
Ancon.....	8.00-11.00	1.00-3.00
Corozal.....	8.00-11.00	1.00-3.00
Paraiso.....	8.00-11.00	1.00-3.00
Culebra.....	8.00-11.00	1.00-3.00
Las Cascadas.....	8.00-11.00	1.00-3.00
Gatun.....	9.00-12.00	2.00-4.00
Cristobal—		
Grades one to three, inc.	8.30-11.30	1.30-3.30
Other grades.....	9.00-12.00	2.00-4.00

Eighth grade pupils from Paraiso and Pedro Miguel will take the train arriving at Corozal at 7.49 a. m., and return on the train leaving Corozal at 3.11 p. m. Fifth, sixth, and seventh grade pupils from Paraiso will have brake service to Pedro Miguel and return. Pupils living between Pedro Miguel and Gatun, and attending elementary school at Gatun, or high school at Cristobal, will take train arriving at Gatun and Cristobal at 9.05 a. m., and 9.20 a. m., respectively. They will return on

train leaving Cristobal and Gatun at 4.25 p. m., and 4.40 p. m., respectively. High school pupils attending school at Balboa Heights, and living on the Las Cascadas-Panama shuttle line, will take the train arriving at Balboa Heights at 7.55 a. m., and return on the train leaving Balboa Heights at 3.05 p. m. Those living on the Colon-Panama line will take the train arriving at Balboa Heights at 8.45 a. m., and return on the train leaving Balboa Heights at 5.35 p. m.

The sessions in all colored schools will be from 8 to 11 a. m., and from 1 to 3 p. m.

Wherever practicable, the first grade in all schools will dismiss 30 minutes earlier than the other grades in the morning; and the first, second, and third grades will dismiss 30 minutes earlier in the afternoon.

BRAKE SERVICE SCHEDULE.

There will be one brake in the Paraiso-Pedro Miguel service. It will leave Paraiso for Pedro Miguel in the forenoon at 7.45, returning at 11 o'clock. In the afternoon, the brake will leave Paraiso at 12.45, and leave on its return at 3 o'clock.

There will be two brakes in the Colon Beach-Cristobal service operated on the following schedule:

COLON BEACH TO SCHOOL—FORENOON SESSION.	
	A.M.
For Grades 1 to 3.....	8.15
For upper grades.....	8.45
SCHOOL TO COLON BEACH—FORENOON SESSION.	
For Grades 1 to 3.....	11.30
For upper grades.....	12.00
COLON BEACH TO SCHOOL—AFTERNOON SESSION.	
	P.M.
For Grades 1 to 3.....	1.15
For upper grades.....	1.45
SCHOOL TO COLON BEACH—AFTERNOON SESSION.	
For Grades 1 to 3.....	3.30
For upper grades.....	4.00

Requests should be made to the office of the superintendent of schools, Balboa Heights, immediately for railroad transportation for all white children living in communities where schools of appropriate grades, or brake service, are not provided.

Additional Accommodations at Palo Seco.

Owing to an increased number of inmates at the Palo Seco leper asylum, an additional wooden building for housing the male patients has been authorized. It will be one story in height, 30 by 70 feet in plan, containing five rooms, each 12 by 18 feet in plan, with a window at the end of each room opening on a 6-foot porch, which will extend along the sides of the building for its full length. The roof will be of galvanized iron, and the foundations will be wooden posts resting on concrete footings. The work will be done by the male patients, six or seven of them having some knowledge of carpentry. The number of patients at the asylum on September 1 was 51, divided, as follows: Males, 39; females, 12.

Ordering Eye Glasses for Patients.

The chief of the eye and ear clinic at Ancon Hospital has been authorized to order eye glasses for those of his patients who desire him to do so. Under this plan, eye glasses will be furnished at actual cost plus an amount necessary to cover breakage and other losses.

Team service will hereafter be furnished Canal employes living in Panama city, in the same manner as in the Zone settlements, when the district quartermasters find it feasible to comply with the requests, and providing no extra expenses need be incurred.

Deceased Employes.

Name.	Check No.	Native of	Isthmian residence.	Employed by	Date of death.
Gill, St. Clair.....	35644	Barbados.....	Panama.....	Op. and Mtce..	August 31.
Lawrence, Thomas.....	37717	Jamaica.....	Camp Biedr....	Panama railroad	August 23.
Leacock, Fitz.....	85111	Barbados.....	New Gatun.....	Panama railroad	September 3.
Johnson, Uriah.....	57774	Jamaica.....	Panama.....	Panama railroad	September 1.
Seales, St. Clair, alias S. Sealy.	203509	Barbados.....	Rio Grande.....	Supply Dept....	August 18.

The estates of these deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against these estates, or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Ancon, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

SOCIAL LIFE OF THE ZONE.

Federation of Societies of Women for Christian Work.

A meeting of the executive board of the Panama Federation of Societies of Women for Christian work will be called the first week in October, on the return of the vice-president and other officers to the Isthmus. The object of this meeting will be to prepare for a convention to be held in October, this being the time of the second anniversary of the first general missionary convention of women to be held in the Canal Zone. The first was held by the Ladies' Aid Society at Empire on October 25, 1912.

Church Notes.

Meetings of the Woman's Altar Guild of St. Luke's Hospital chapel, Ancon, were resumed, with a corporate communion and a short business meeting on Tuesday morning, September 1. Eight names were presented for membership in the guild. The meetings will hereafter be, as follows: On the first Tuesday morning in each month, corporate communion at 8 o'clock, followed by a business meeting; on the third Tuesday in each month, in the afternoon at 3.30 o'clock, at the homes of members, by invitation. The first of these afternoon meetings will be held at the residence of Mrs. S. T. Darling, Ancon Hospital grounds, on Tuesday, September 15. The library will be installed in the Sunday school room in the chapel and placed in circulation as soon as possible. Library rules will be made public through these columns.

The junior auxiliary of St. Luke's church tendered a farewell reception to its president at the residence of the chaplain on Wednesday afternoon, September 2. Preceding the reception, a business meeting was held, when reports of all the committee were read. As the president is leaving the Isthmus, it was necessary to elect new officers, and the following were chosen: President, Julia Heald; secretary, Lillian McGeachy; treasurer, Ruth Cummings. The office of vice-president was abolished. Louise Dexter, the retiring president, was elected honorary president. The auxiliary voted a gift of \$10 to the church mission work among the Oneida Indians in Wisconsin, a portion of their property having recently been destroyed by a hurricane. The next meeting of the auxiliary will be at Ancon Hall on Wednesday afternoon, September 9, for physical culture and folk dancing. All meetings are held from 3.45 to 4.45 p. m.

St. Luke's Sunday school will hold a picnic on Thursday, September 10. A launch has been chartered, and the party will spend the day at Taboga. Tickets for the round trip will be 50 cents, United States currency. Those attending will be expected to take their own lunch.

Camp Fire Girls.

A camp fire girls organization has been formed at Corozal, with Mrs. J. H. Hackenberg as guardian. There are about 12 members. Two of these girls were members of the original camp fire on the Isthmus, which was organized at Gatun in 1912, with Mrs. William L. Sibert as guardian. The meetings of the Corozal camp fire are held at the home of Mrs. Hackenberg weekly.

An organization similar to the camp fire, but not to be affiliated with the central organization in New York, is under consideration

for the young girls in Pedro Miguel. Out of this organization, will no doubt be developed the regular camp fire, but it is not considered desirable to form a permanent organization until later in the year.

Red Cross Lectures for Women.

The course of Red Cross lectures for women, which was begun on July 17, will be completed with the lecture on Friday afternoon, September 18. The examination, following the completion of the course, will be given by Dr. Harry E. Ford, Captain, Medical Corps, United States Army, of Camp Otis.

Address on Prohibition.

Mrs. D. E. Fulton, the American lecturer who has been speaking at various public meetings in churches and halls, delivered an address on prohibition in the Government clubhouse, Cristobal, on Thursday evening, September 3. She made an appeal for worldwide prohibition for the building up of the nations.

Patriotic Exercises at Seawall Methodist Church.

The pupils of the Panama Methodist college, are preparing for a special patriotic exercises to be held in the seawall church on Sunday morning, September 13. The occasion is the celebration of the centenary of the publication of the national anthem, "The Star Spangled Banner."

Men's Catholic Club of Balboa.

The men's Catholic club of Balboa elected officers for the new year at a recent general meeting. A program was carried out, consisting of addresses by Mr. J. P. Corrigan, the retiring president of the club, and the Rev. Father McDonald, priest in charge and founder of the society. The newly elected officers are: President, Patrick Moran; vice-president, J. Sweny; recording secretary, Frank Sheenan; financial secretary and treasurer, Father McDonald; sergeant-at-arms, James E. Hawkey. The club meets at the Balboa lodge hall. The committee in charge is composed of Messrs. J. E. Hawkey, chairman; F. Sheenan, F. L. Maney, Charles F. Williams, J. O'Rourke, and James Ormsby.

American Institute of Electrical Engineers.

The September meeting of the Panama section of the American Institute of Electrical Engineers will be held at Bella Vista beach, Panama, on the evening of September 19. A special street car will leave the Panama station of the Panama railroad at 6.30 p. m., and will go direct to the beach.

The paper of the evening will be entitled the "Electrical and mechanical characteristics of the loose wheel drive, as applied to the operation of street cars" and will be presented by Mr. H. K. Ovalle, superintendent of the Panama Tramways Company.

After the meeting we will hold a beach party. All members and their friends (including the ladies) are urged to be present. Refreshments can be obtained at the pavilion. Visitors are welcome.

C. J. EMBREE,
BALBOA, C. Z., Secretary-Treasurer.
September 8, 1914.

Obituary.

Henry Ehrman, a nonemployee, died on August 29 at his home in Colon. He was 44 years of age, and had been on the Isthmus 26 years, coming here from New Orleans, La. He is survived by his wife living in Colon.

A PROCLAMATION

By the President of the United States of America.

NEUTRALITY—BELGIUM AND GERMANY.

Whereas, the United States is in fact aware of the existence of a state of war between Belgium and Germany; And, Whereas, the United States is on terms of friendship and amity with the contending powers, and with the persons inhabiting their several dominions:

And, Whereas, there are citizens of the United States residing within the territories or dominions of each of the said belligerents and carrying on commerce, trade, or other business or pursuits therein;

And, Whereas, there are subjects of each of the said belligerents residing within the territory or jurisdiction of the United States, and carrying on commerce, trade, or other business or pursuits therein;

And, Whereas, the laws and treaties of the United States, without interfering with the free expression of opinion and sympathy, or with the commercial manufacture or sale of arms or munitions of war, nevertheless impose upon all persons who may be within their territory and jurisdiction the duty of an impartial neutrality during the existence of the contest;

And, Whereas, it is the duty of a neutral government not to permit or suffer the making of its waters subservient to the purposes of war;

Now, Therefore, I, WOODROW WILSON, President of the United States of America, in order to preserve the neutrality of the United States and of its citizens and of persons within its territory and jurisdiction, and to enforce its laws and treaties, and in order that all persons, being warned of the general tenor of the laws and treaties of the United States in this behalf, and of the law of nations, may thus be prevented from any violation of the same, do hereby declare and proclaim that by certain provisions of the Act approved on the 4th day of March, A. D. 1909, commonly known as the "Penal Code of the United States" the following acts are forbidden to be done, under severe penalties, within the territory and jurisdiction of the United States, to-wit:

1. Accepting and exercising a commission to serve either of the said belligerents by land or by sea against the other belligerent.

2. Enlisting or entering into the service of either of the said belligerents as a soldier, or as a marine, or seaman on board of any vessel of war, letter of marque, or privateer.

3. Hiring or retaining another person to enlist or enter himself in the service of either of the said belligerents as a soldier, or as a marine, or seaman on board of any vessel of war, letter of marque, or privateer.

4. Hiring another person to go beyond the limits or jurisdiction of the United States with intent to be enlisted as aforesaid.

5. Hiring another person to go beyond the limits of the United States with intent to be entered into service as aforesaid.

6. Retaining another person to go beyond the limits of the United States with intent to be enlisted as aforesaid.

7. Retaining another person to go beyond the limits of the United States with intent to be entered into service as aforesaid. (But the said act is not to be construed to extend to a citizen or subject of either belligerent, who, being transiently

within the United States, shall, on board of any vessel of war, which, at the time of its arrival within the United States, was fitted and equipped as such vessel of war, enlist or enter himself or hire or retain another subject or citizen of the same belligerent, who is transiently within the United States, to enlist or enter himself to serve such belligerent on board such vessel of war, if the United States shall then be at peace with such belligerent.)

8. Fitting out and arming, or attempting to fit out and arm, or procuring to be fitted out and armed, or knowingly being concerned in the furnishing, fitting out, or arming of any ship or vessel with intent that such ship or vessel shall be employed in the service of either of the said belligerents.

9. Issuing or delivering a commission within the territory or jurisdiction of the United States for any ship or vessel to the intent that she may be employed as aforesaid.

10. Increasing or augmenting, or procuring to be increased or augmented, or knowingly being concerned in increasing or augmenting, the force of any ship of war, cruiser, or other armed vessel, which, at the time of her arrival within the United States, was a ship of war, cruiser, or armed vessel in the service of either of the said belligerents, or belonging to the subjects of either, by adding to the number of guns of such vessels, or by changing those on board of her for guns of a larger calibre, or by the addition thereto of any equipment solely applicable to war.

11. Beginning or setting on foot or providing or preparing the means for any military expedition or enterprise to be carried on from the territory or jurisdiction of the United States against the territories or dominions of either of the said belligerents.

And I do hereby further declare and proclaim that any frequenting and use of the waters within the territorial jurisdiction of the United States by the armed vessels of a belligerent, whether public ships or privateers, for the purpose of preparing for hostile operations, or as posts of observation upon the ships of war, or privateers, or merchant vessels of a belligerent lying within or being about to enter the jurisdiction of the United States, must be regarded as unfriendly and offensive, and in violation of that neutrality which it is the determination of this Government to observe; and to the end that the hazard and inconvenience of such apprehended practices may be avoided, I further proclaim and declare that from and after the eighteenth day of August, instant, and during the continuance of the present hostilities, no ship of war, or privateer, of any belligerent shall be permitted to make use of any port, harbor, roadstead, or waters subject to the jurisdiction of the United States from which a vessel of an opposing belligerent (whether the same shall be a ship of war, a privateer, or a merchant ship) shall have previously departed, until after the expiration of at least 24 hours from the departure of such last mentioned vessel beyond the jurisdiction of the United States. If any ship of war, or privateer, of a belligerent shall, after the time this notification takes effect, enter any port, harbor, roadstead, or waters of the United States, such vessel shall be required to depart and to put to sea within 24 hours after her entrance into such port, harbor, roadstead, or waters, except in case of stress of weather or of her requiring provisions or things necessary for the subsistence of her crew, or for repairs; in any

of which cases, the authorities of the port or of the nearest port (as the case may be) shall require her to put to sea as soon as possible after the expiration of such period of 24 hours, without permitting her to take in supplies beyond what may be necessary for her immediate use; and no such vessel which may have been permitted to remain within the waters of the United States for the purpose of repair shall continue within such port, harbor, roadstead, or waters for a longer period than 24 hours after her necessary repairs shall have been completed, unless within such 24 hours a vessel, whether ship of war, privateer, or merchant ship of an opposing belligerent, shall have departed therefrom, in which case the time limited for the departure of such ship of war, or privateer, shall be extended so far as may be necessary to secure an interval of not less than 24 hours between such departure and that of any ship of war, privateer, or merchant ship of an opposing belligerent which may have previously quit the same port, harbor, roadstead, or waters. No ship of war, or privateer, of a belligerent shall be detained in any port, harbor, roadstead, or waters of the United States more than 24 hours, by reason of the successive departures from such port, harbor, roadstead, or waters of more than one vessel of an opposing belligerent. But if there be several vessels of opposing belligerents in the same port, harbor, roadstead, or waters, the order of their departure therefrom shall be so arranged as to afford the opportunity of leaving alternately to the vessels of the opposing belligerents, and to cause the least detention consistent with the objects of this proclamation. No ship of war, or privateer, of a belligerent shall be permitted, while in any port, harbor, roadstead, or waters within the jurisdiction of the United States, to take in any supplies, except provisions and such other things as may be requisite for the subsistence of her crew, and except so much coal only as may be sufficient to carry such vessel, if without any sail power, to the nearest port of her own country; or in case the vessel is rigged to go under sail, and may also be propelled by steam power, then with half the quantity of coal which she would be entitled to receive, if dependent upon steam alone, and no coal shall be again supplied to any such ship of war, or privateer, in the same or any other port, harbor, roadstead, or waters of the United States, without special permission, until after the expiration of three months from the time when such coal may have been last supplied to her within the waters of the United States, unless such ship of war, or privateer, shall, since last thus supplied, have entered a port of the government to which she belongs.

And I do further declare and proclaim that the statutes and the treaties of the United States, and the law of nations, alike require that no person, within the territory and jurisdiction of the United States, shall take part, directly or indirectly, in the said wars, but shall remain at peace with all of the said belligerents, and shall maintain a strict and impartial neutrality.

And I do hereby enjoin all citizens of the United States, and all persons residing or being within the territory or jurisdiction of the United States, to observe the laws thereof, and to commit no act contrary to the provisions of the said statutes or treaties, or in violation of the law of nations in that behalf.

And I do hereby warn all citizens of the United States, and all persons residing or being

within its territory or jurisdiction that, while the free and full expression of sympathies in public and private is not restricted by the laws of the United States, military forces in aid of a belligerent cannot lawfully be originated or organized within its jurisdiction; and, that while all persons may lawfully and without restriction by reason of the aforesaid state of war, manufacture and sell within the United States arms and munitions of war, and other articles ordinarily known as "Contraband of war," yet they cannot carry such articles upon the high seas for the use or service of a belligerent, or attempt to break any blockade which may be lawfully established and maintained during the said wars, without incurring the risk of hostile capture and the penalties denounced by the law of nations in that behalf.

And I do hereby give notice that all citizens of the United States and others who may claim the protection of this Government, who may misconduct themselves in the premises, will do so at their peril, and that they can in no wise obtain any protection from the Government of the United States against the consequences of their misconduct.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done in the City of Washington, this 18th day of August in the year of our Lord one thousand nine hundred and fourteen, and of the independence of the United States of America the one hundred and thirty-ninth.

WOODROW WILSON.

By the President:

W. J. BRYAN, *Secretary of State.*

[No. 1276.]

Assistants in Charge of Panama Canal Exhibit.

Mr. Ralph W. Roberts, who has been in charge of the sightseeing service of the Panama railroad since the resignation of Mr. W. M. Baxter, Jr., has been appointed to take charge of the Panama Canal exhibit at the International Panama-Pacific Exposition in San Francisco. He is allowed two assistants in this work, and the positions have been filled recently by the appointment of Mr. W. S. Clough of the office of the Governor to one, and of Mr. Homer G. Cornthwaite, assistant chief hydrographer in the Division of Meteorology and Hydrography, to the other. Mr. Roberts' duties will consist in giving lectures on the method of operating the Canal, and other features of interest, aided by a Canal model. One of the other appointees will assist him in this work, taking his place during his absence. The other assistant will attend to all of the clerical and stenographic work. The men will not leave for the United States until all of the details necessary to be worked out on the Isthmus have been attended to.

Service of Elders and Fyffes, Limited.

Correcting a notice previously given out, that the service of Elders and Fyffes, Limited, between Colon and Bristol, England, would be cancelled after the sailing of the steamship *Bayano*, from Colon on September 5, the United Fruit Company announces the receipt of later advice that the steamship *Chagres* will call at Colon on Saturday, September 19, and sail for Bristol on the same day. Notice of future sailings in the Elders and Fyffes service will be given when advice is received by the United Fruit Company from its head office.

JOINT LAND COMMISSION.

Rules of Dismissal.

(Continued from last week.)

Specially concurring rule of dismissal No. 130, docket Nos. 147 and 202, July 15, 1914. In the matter of the claim of Pablo Surita, for property located at Las Palmas in Trinidad valley—Pablo Surita was a possessor in good faith of a portion of the public lands of the Republic of Panama at the mouth of the Siri River, in the Trinidad valley at the time the Treaty was entered into between the United States and the Republic of Panama.

As such occupant, under the terms of the Treaty, he was entitled to compensation for his improvements, before being ejected from the premises occupied by him, and his rights were recognized by the United States Government and he was paid for his improvements.

Subsequent to the payment for these improvements, Surita went further away and started a new cultivation at what is called Las Palmas, which cultivation later on was covered by the waters of Gatun Lake. This second cultivation, as well as his first one, was outside of the 10-mile strip of territory granted to the United States by the Republic of Panama by the Treaty between these two countries, but was within the limits of other lands outside of the said Zone granted by the said Treaty to the United States, and within the territory now occupied by Gatun Lake.

A general denial is filed by the Counsel for the United States, denying all liability on the claim for any damages on account of this second cultivation made by Surita.

We are unable to agree with the very learned and able opinion filed by our colleagues on this claim as to certain matters of fact found by them and as to the law in force in the territory in which this second cultivation of Surita was located at the time Surita made the second improvement. We, however, concur in the conclusion reached by our colleagues, that there is no liability on the part of the United States on this claim and file this, our specially concurring opinion.

We hold that at the time claimant made his second cultivation, on which he bases his claim, the lands occupied by him were United States territory and were not subject to settlement; and that he had no right to make his second improvement; and that his occupancy of the lands covered by the second improvement was an unauthorized, post-Treaty occupancy of said lands; and that, therefore, no liability on the part of the United States accrued; and that he is not entitled to any award against the United States; and, with our colleagues, we agree that his claim should be and is accordingly dismissed.

LEVI MONROE KAGY, American member of the Joint Land Commission.

NOTE—The above opinion was concurred in by Commissioner Marks, but on account of his illness and subsequent death, his signature hereto was not obtained.

Rule of dismissal No. 132, July 15, 1914, docket numbers as shown. In the matter of sundry claims—With reference to the claims for improvements of the persons hereinafter named, the evidence before the Commission is that previous payments have been made. A careful examination has been made of all cases in which payment has been reported, and the commission has reached the conclusion that the claimants have no property for which an award could be sought from this commission which is not covered by the previous payments hereinafter noted:

Brice, Edward, docket No. 213. The property included in this claim was covered by payment of the Panama Railroad Company to the claimant on September 19, 1911, for a "House and miscellaneous fruits and cultivations on land owned by the Panama Railroad Company in the valley of the Chagres River, which are situated below contour line of 87 feet above sealevel.

Desir, E. P., docket No. 140. The property included in this claim was covered by award No. 44 of September 22, 1913. It appears that in writing up said award No. 44, the house tax number was erroneously stated as 648, while it should have been 618.

Rincon, Adelina, docket No. 46. The property included in this claim was covered by payment of the Disbursing Officer of the Isthmian Canal Commission in February, 1912, Voucher 18650, for "House tax number 1864, all fruit trees and growing crops and all other improvements in or near Calmito, Canal Zone.

White, Alexander, docket No. 216. The property covered by this claim was covered by payment of the Panama Railroad Company to the claimant on September 19, 1911, for a "House and miscellaneous fruits and cultivations on land owned by the Panama Railroad Company in the valley of the Chagres River, which are situated below a contour line of 87 feet above sealevel.

In view of the payments herein noted, no claim against the United States of America can be recognized

by the Joint Land Commission, and these claims are accordingly hereby dismissed.

FEDERICO BOYD, LEVI MONROE KAGY, S. LEWIS, Commissioners.

NOTE—The full commission heard and passed upon the above claim, but on account of the illness and subsequent death of Commissioner Marks, his signature hereto was not obtained.

Rule of dismissal, No. 131, docket numbers as noted, July 15, 1914. In the matter of sundry claims in the Trinidad valley—The claims submitted to the commission by the persons hereinafter named show that the claimants were occupiers of auxiliary public lands in the Republic of Panama, in the valley of the Trinidad River, outside of the Canal Zone, required for Canal purposes, and that they had been paid for earlier improvements thereon and had afterward started new cultivations in said region below the 100-foot contour line, for which they now claim compensation.

In the opinions rendered by the commission on the 15th day of July, 1914, relating to the case of Pablo Surita, the commission arrived at the same conclusion by different means, and said:

"In view of the facts herein set forth, the commission has reached the conclusion that no rights had accrued in favor of Pablo Surita for his illegal occupation of the lands of Las Palmas, therefore, he is not entitled to any award against the United States, and his claim is accordingly dismissed."

On the basis of this conclusion, the claims of the following persons are hereby dismissed for the reasons stated in the opinions covering the cases of Pablo Surita:

Docket	Claimant.	Location.
148-161	Juan Chiro	Siri Grande.
162	Nemisio Gonzalez	La Tagua.
163	Juan Arias	Cuchirvo.
166	Juan Mendoza	Mouth of the Trinidad.
167	Juan Melendez	Cuchirvo.
172	Pedro Fernandez	Las Cruces.
173	Juan Navarro	El Cuipto.
179	Teodoro Dominguez	Las Cruces.
181	José Fulgencio Ovalle	San Antonio
184	Guillermo Diaz	Agua Clara
185	Antonio Rodriguez	Los Pastos.
186	Severo Sanchez	Las Cruces.
188	Andres Gonzalez	San Antonio.
193	Nicolas Gonzalez	El Astillero.
194	Cristobal Aguilar	La Leona.
195	Casimiro Sanchez	Calle Larga.
198	Octavio Mendoza	Las Cruces.
200	José de Jesus Navarro	Calle Larga.
206	Inez Benites	El Astillero.

FEDERICO BOYD, LEVI MONROE KAGY, S. LEWIS, Commissioners.

NOTE—The full commission heard and passed upon the above claims, but on account of the illness and subsequent death of Commissioner Marks, his signature hereto was not obtained.

Rule of dismissal No. 133, docket No. 354, July 15, 1914. In the matter of the claim of David Kerr, for property on Tabernilla lands—The records of the commission show that in some cases more than one statement of claim has been filed covering the same property. In the following instance, duplicate claim has been filed with the commission, covering property for which prior claim has already been disposed of as hereinafter shown:

Kerr, David, docket No. 354. This claim covering improvements on property on the Tabernilla lands is a duplicate of docket No. 1206, dismissed by the commis-

sion of 1913, under rule of dismissal No. 37, dismissing claims already settled.

In view of the facts referred to above, this claim calls for no further action on the part of the commission, and is accordingly dismissed.

FEDERICO BOYD, LEVI MONROE KAGY, S. LEWIS, Commissioners.

NOTE—The full commission heard and passed upon the above claim, but on account of the illness and subsequent death of Commissioner Marks, his signature hereto was not obtained.

Rule of dismissal No. 134, docket No. 375, July 15, 1914. In the matter of the claim of Santos Vagambre for improvements near Frijoles—The claim of Santos Vagambre for improvements said to have been located on the Juana Maria estate near Frijoles, is dismissed for the reason that the evidence submitted to the commission is not such as would justify an award being made.

FEDERICO BOYD, LEVI MONROE KAGY, S. LEWIS, Commissioners.

NOTE—The full commission heard and passed upon the above claim, but on account of the illness and subsequent death of Commissioner Marks, his signature hereto was not obtained.

Auction Sale of Over and Unclaimed Freight.

On September 15, 1914, at 9 a. m., the Panama railroad will dispose of at public auction, on Dock 11, Cristobal, an accumulation of over and unclaimed freight, to recover freight and storage charges.

Items to be sold will consist of a miscellaneous lot of wines, liquors, tobacco, dry goods, hardware, building material, household goods, iron, steel, and general merchandise.

IMPORTANT—The Panama railroad will deliver at any station, at owner's risk, free of charge, articles purchased at this sale.

C. H. MOTSETT, Superintendent.

WEATHER CONDITIONS, CANAL ZONE, AUGUST, 1914.

The rainfall for the month was generally below normal, except at stations along the Atlantic coast. Monthly totals ranged from 4.97 inches at Trinidad to 21.30 inches at Porto Bello. The maximum precipitation recorded in one day was 7.10 inches at Agua Clara on the 12th.

An unusually heavy rain fell in the vicinity of Gatun on the 12th. The maximum fall in one hour at Gatun amounted to 4.72 inches.

Monthly mean air temperatures were everywhere above the station averages, while the average hourly wind movement was the highest of record for the month of August at all stations.

No fogs were observed during the month at either coast station, and but few at the interior stations. Of the fogs observed, 79 per cent were dissipated by 6.30 a. m.; 97 per cent by 7.30 a. m., and 100 per cent by 8.30 a. m.

The following table summarizes the weather conditions for the month:

Elevations of Gatun Lake, (feet above mean sea level)—Mean for the month 84.93 feet; maximum, 85.06 feet on the 17th; minimum, 84.78 feet on the 4th. Evaporation from lake surface 4.684 inches.

OFFICIAL CIRCULARS.

Organization for the New Administration Building Offices.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., August 24, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

1. The organization of the offices in the new Administration Building will be, as follows:

2. The *Personnel Bureau* will check all personnel papers, such as employments, promotions, changes of rating, requests for leave, and routine personnel inquiries, and prepare them for the action of heads of departments and divisions.

3. The *Record Bureau* will index and file all papers, and will furnish files and records upon request of proper officials; it will also attend to the mailing of communications, and will have charge of the library.

4. *Property and requisitions*—For the various departments and divisions which will move into the new Administration Building at Balboa, one requisition and property clerk will be allowed to each department or division carrying a separate account for property (four for the Supply Department, which takes care of property for quartermaster's, subsistence, commissary, permanent buildings, fortifications, and Governor's office.) All these requisition and property clerks will be given desk room in room No. 310 on the third floor. Room No. 314 will be reserved until it is

"Confidential"), addressed to heads of departments or divisions in the Administration Building will be opened and distributed by the Chief Clerk of the Executive Office. Where necessary, previous correspondence will be attached, and papers sent to the bureau or official who should give the matter first attention.

8. The following additions to the Executive Office, to be selected from the departments and divisions indicated, will be authorized, these transfers to be made on the date of moving into the new building.

Please furnish immediately the names of those selected for these positions. All others should be notified of discharge account of reduction of force. Aliens and non-Civil Service clerks occupying classified positions must be selected first for such discharge.

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, Panama Railroad Company.

Certificates to be Furnished Silver Employees When on Leave.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., August 29, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

In view of the reduction in the silver force and the large number of unemployed laborers on the Isthmus, steps have been taken by the British authorities to prevent, so far as possible, further immigration from the British West Indies.

Hereafter, any silver employe granted a leave of

absent time to have the order of transfer issued not later than the date on which the transfer takes place.

GEO. W. GOETHALS,
Governor.

Local Agent, P. R. R., Colon.

THE PANAMA CANAL,
PANAMA RAILROAD COMPANY,
FREIGHT AND PASSENGER DEPARTMENT,
COLON, R. P., September 8, 1914.

CIRCULAR No. 119:

Effective September 8, 1914, Mr. A. B. Goodenow, station agent, Culebra, is appointed local agent, Colon, vice Mr. C. J. King, transferred.

J. C. ANGEL,
Freight and Passenger Agent.

Approved:
C. H. MOTSETT, Superintendent.

Panama Railroad Company (To be determined later.)						

ascertained whether any additional space will be required in that room. These requisition and property clerks will continue to handle the work for their respective divisions as in the past, but it is desired to get them centralized, with the end in view of working out a plan for the centralization of that work, and a reduction in the cost of the work later on.

This force will keep the property accounts, prepare requisitions and work requests, and maintain the necessary checks on these matters.

If any additional assistance is required by these clerks for typewriting papers or writing letters, it will be furnished by the Correspondence Bureau, where the stenographers and typewriters for the entire building are to be pooled.

5. The *Correspondence Bureau* will do the stenographic, typewriting, and miscellaneous correspondence and clerical work for the entire building. A limited number of stenographers and clerks will be selected from the various offices, who are familiar with the correspondence, reports, estimates, and clerical work of those offices, and who will be assigned such work by the chief correspondence clerk, as they are best qualified by past experience to do. Each official will be given the same stenographer regularly so far as practicable. It is enjoined that correspondence be reduced to a minimum; matters between departments and divisions will be settled by conferences, records being made of conclusions reached where the importance of the subject justifies it.

6. The force carried in the bureaus named above will be carried as a part of the Executive Office, and not on the rolls of any department or division.

7. All official mail (except where marked "Personal" or

absence to be spent in the British West Indies shall be furnished a certificate to that effect, which must be presented by the employe at the British Consulate at Colon for endorsement.

GEO. W. GOETHALS,
Governor.

Important Communications to be Submitted to the Governor Before Mailing.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., September 3, 1914

HEADS OF DEPARTMENTS AND DIVISIONS IN THE ADMINISTRATION BUILDING:

Because of instructions that have issued to subordinates of which I had no knowledge, except through such subordinates, and as I desire to keep in close touch with the work, it is requested that to all communications signed by you relating to matters of importance a slip be attached, addressed to me to note, before they are mailed or otherwise despatched.

GEO. W. GOETHALS,
Governor.

Transfer of Gold Employes.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., September 2, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

When gold employes are transferred from one division to another, this office must be notified in suf-

COMMISSARY DEPARTMENT.

Special Sales.

Supplies for the Canal.

The following steamers, with supplies for The Panama Canal and Panama railroad, arrived at the ports of Colon, Cristobal, and Balboa, during the week ending August 22:

Alliana, August 16, from New York, with 19 boxes range parts, 206 cases paper, 125 kegs bolts and nuts, eight boxes forges, five kegs litharge, 25 kegs washers, 2,180 kegs nails, six casks lime, 19 packages miscellaneous material, two barrels webbing, 60 kegs bolts, one box tools, four pieces steel billets, nine pieces steel beams, for stock; one box magnetos, 16 castings, 18 kegs potash, four boxes hinges, five cases brake shoes, one box blueprint paper, for Mechanical Division; two boxes stationery, four packages blueprint machine apparatus, for Executive Secretary; 40 bags feed, 29 packages medical supplies, one box artificial leg, one package photographic plates, for Health Department; three packages electrical material, two barrels glassware, three crates lamps, 100 bundles pipe, one box fittings, one box electrical fixtures, for Electrical Engineer; 19 reels cable, for Panama railroad; three pieces fender chain, one box chain fender material, for Division of Lock Erection; 10 pieces pipe, one case charts, for Division of Municipal Engineering; one box engine parts, six cases rubber dredging sleeves, three pieces dredge parts for Dredging Division; 40 pieces fenders, for Division of Canal Transportation; two cases sandpaper, two cases hardware, 12 packages tiling, for permanent buildings; 3,600 bolts for Division of Terminal Construction; and a miscellaneous cargo, the whole consisting of 3,008 packages, weighing approximately 290 tons.

Tagus, August 17, from Liverpool, with three packages Lloyd's registry books, for Division of Canal Transportation.

Alm, August 17, from Mobile, Ala., with 120 bags dairy feed, for stock; 603 pieces pipe, for Division of Municipal Engineering.

Cartago, August 19, from New Orleans, with three kegs washers, for stock; one box hardware, 459 sacks silica sand, 28 pieces (2,541 board feet) rough white oak lumber, 327 pieces (14,106 board feet) yellow pine car lumber, for Mechanical Division; one reel telephone cable, for Panama railroad.

Metapan, August 19, from New York, with 500 cases raw linseed oil, two boxes paint, for stock; one steel angle for Dredging Division.

Ilerdia, August 20, from New Orleans, with 46 barrels rosin, eight pieces (1,600 board feet) rough treated lumber, 5,307 pieces (52,418 board feet) S4S yellow pine lumber, for stock; 743 pieces (15,974 board feet) rough white oak lumber, S2S, for Mechanical Division; 33 crates marble, for permanent buildings; one dredge dipper, for Dredging Division.

Pennsylvania, August 21, from San Francisco, with 831 bales alfalfa hay, for stock.

Colm, August 21, from New York, with three cases electrical machinery 106 pieces steel angles, five crates butcher's blocks, two packages pulley blocks, three cases bronze rods, eight packages grindstones, 14 cases paint, five boxes lamps, 13 cases tissue caps, 11 crates asbestos millboard, 10 cases files, 27 pieces pipe, 10 cases lanterns, 50 barrels flour, 467 kegs bolts, 20 packages miscellaneous material, 19 pieces steel beams, 91 pieces steel channels, one box pneumatic tool parts, one box steam gage springs, 15,280 bags cement, for stock; 102 pieces rails and splice bars, two barrels paint, for Division of Terminal Construction; three cases electrical machinery, for Division of Lock Erection; one case electrical machinery, one box clock parts, four packages steel shutters, one case cotton sleeve, one case compound, for Panama railroad; one box dry goods, four packages medical supplies, 422 cases medicine bottles, for Health Department; 218 cases electric machinery, eight pieces frogs, for fortifications; 86 cases glass shades and electrical material, four crates valves, six barrels insulated wire, for Electrical Division; two cases glass globes, one case electrical machinery, one box duplicating pads, one box chisels, 16 packages steel shutters, two boxes tools, two boxes chemical apparatus, 75 kegs chlorate potash, 25 barrels molding sand, for Mechanical Division; 1,297 pieces hollow tile, 407 barrels plaster, 22 cases glass, for permanent buildings; one case supplies, two packages books, one box tags, for Executive Secretary; one box units, 15 pieces pipe and fittings, for Division of Municipal Engineering; one crate dynamos, one case drawing paper, two cases electrical material, four reels wire cable, for Dredging Division; and a miscellaneous cargo, the whole consisting of 19,414 packages, weighing approximately 494 tons.

CANAL CLUBHOUSES.

Rain Spoiled Athletic Meet at Corozal.

Owing to the heavy downpour of rain on Labor Day, which lasted nearly all of the morning, the athletic meet which was scheduled for Corozal had to be abandoned. Instead of this meet, basketball games were organized and played off during the morning in the Corozal gymnasium with the following results:

The first game was between Cristobal and Balboa, the former winning by a score of 21 to 12. The second game was between Company E of the Tenth Infantry and Corozal, the latter winning, 25 to 6. In the third game, the first half was played by Cristobal against the Coast Artillery, Cristobal winning 24 to 4. The second half was played by Corozal against the Coast Artillery, Corozal winning 13 to 5.

The line-up of the basketball teams was, as follows: Cristobal—F. Mathues, F. W. Burgoon, C. Fraser, A. Fraser, and C. Raymond.

Corozal—Simms and Bretney, F. Huldquist, F. Howe, Cronthers, and G. Ridge.

Balboa—Dubendorff and F. Adams, C. Russell, Hulsebosch, and G. Hoff.

Company E—Sears, and F. Redmond, C. Gillis, Fisher, McNally, and G. Cabbage.

Coast Artillery Corps—Wright and F. Maxwell, G. Totten, Gillee, Vernon, and G. Howell.

A special train left Corozal at 1.30 for the aquatic meet, which was held at the lumber dock at Balboa. All the aquatic races were run as scheduled and the results were, as follows:

440-yard swim—Won by Bingaman; W. Fraser, second; Porter, third; time seven minutes, 5 4/5 seconds.

880-yard swim—Won by E. Green; Bingaman, second; Porter, third; time, 17 minutes 20 seconds.

One-mile swim—Won by J. W. Greene; Porter, second; Olsen, third; Murphy, fourth; time, 31 minutes, 5 1/5 seconds.

Fancy diving—Won by Hanson; Hill, second; E. A. McEwen, third; F. E. McEwen, fourth.

Plunge for distance—Won by Hansmann; Nash, second; W. Fraser, third. Distance, 47 feet four inches.

Back swim—Won by A. Fraser; Nash, second; W. Fraser, third. Time, 49 4/5 seconds.

Half-mile relay race between Cristobal and Balboa—Won by Balboa. Time 14 minutes, 39 2/5 seconds. The teams: Cristobal—Nash, McEwen, A. Fraser, W. Fraser. Balboa—Bingaman, Hanson, E. Greene, W. Greene.

Throughout the day music was furnished both at Corozal and Balboa by the Tenth Infantry Band.

In view of the probability of rain, it has been decided not to attempt to run off the track and field events, which were not held on Labor Day, and the money of all who entered for these events will be refunded. Any contestant in the track and field events who does not receive his fee back should notify the general secretary, room No. 309, Administration Building, Balboa Heights.

GENERAL.

To continue the plan of selecting a team for San Francisco, weekly contests will be held at Corozal on Saturday afternoons and early evenings under the direction of Frank S. Williams, coach, and A. N. Kjellander, trainer. These men have been chosen by a committee to look after the interests of the projected San Francisco team.

Effective September 9, all communications to the superintendent of clubs and playgrounds should be addressed to room No. 309 Administration Building, Balboa Heights.

BALBOA.

Professor Satam and wife gave an exhibition of sleight-of-hand, ventriloquism, and crack shooting at the local clubhouse on Friday night, September 4.

The plot of ground to be used as a ball field near the corral is being leveled off and placed in shape to play practice games on.

CULEBRA.

All subscriptions to periodicals expired September 1, but owing to the fact that the clubhouse will be kept open evenings for the time being, a few magazines will be regularly supplied.

GATUN.

The Argyle stringed orchestra entertained the members of the local clubhouse on Friday evening, September 4.

The class in English has 12 students enrolled.

Ladies' night will be observed in the bowling alleys on Thursday evening, September 10. There will be special music. An unusually large number of participants are expected.

Motion pictures will be shown this week on Friday, September 11, instead of Saturday, September 12, as originally scheduled.

The Sunday evening song service continues to draw a good attendance. Mrs. Randolph acted as accom-

panist for Dr. Hill's violin solos on Sunday evening, September 6, and also played a violin solo.

CRISTOBAL.

The first game in the local basketball tournament was taken by the "Naps" from the "Senators" by the close score of 16 to 15. The "Athletics" defeated the "Yankees" on Thursday, September 3; score, 38 to 17.

Mr. E. H. A. Nash was elected president of the Cristobal Tennis Club at the meeting held on Monday, August 31. Mr. George Schoid was elected secretary-treasurer. A tournament in singles and doubles was agreed on to begin Wednesday, September 9. A challenge has already been issued by Ed Keeling and B. C. Poole to play the winners at doubles in this tournament.

The Cristobal tenpin team averaged 925 for the three games against Gatun on Saturday night, September 5. The scores were:

Table with 2 columns: Cristobal and Gatun. Rows include Rosteck, Burns, Russell, Peterson, Collins, Strong, O'Meara, Hansel, Page, Young, and Conley with scores.

Totals... 902 999 874 749 770 745

High bowling scores for the week ending September 5 were: Tenpins—Russell, 246, Collins, 234, Strong, 213, Rosteck, 226, Peterson, 225, Leonard, 201, Burns, 200. Duckpins—Henry, 119; Pinney, 108; Smith, 104, Roberts, 104; Sloan, 102; Steele, 101; Bevington, 100.

Mr. Barte proved winner in the "Ragtime" tournament by winning 39 games and losing nine.

The monthly married folks bowling tournament will be held on Monday, September 14.

Cristobal defeated the Balboa checker team on Saturday, September 5, in an interesting contest by the score of 31 wins, 26 lost, and eight draws. The scores follow:

Table with 4 columns: Balboa, Cristobal, IV, L, D. Rows include Clove, Burns, Harris, Wasted, Larsen, Custer, Stevens, Dennis with scores.

Totals... 26 30 8 31 25 8

Mr. G. C. Bunker, who is connected with the waterworks at Mount Hope, will speak at the meeting of the discussion club on Thursday, September 17, on the subject of water purification.

Movements of Vessels at Port of Balboa.

The arrivals and departures of steamships at the port of Balboa during the week ending at 8 a. m., September 5, were, as follows:

Arrivals—August 29, Son José, from San Francisco; Californian (yacht), from Colon; August 30, Manavi, from Tumaco; Transvaal, from North Pacific; August 31, Huallaga, from Callao; September 2, Texan, from San Francisco; Guatemala, from Callao; St. Kentigern, from Colon; September 3, Virginian, from Colon, September 5, Anglo-Saxon from Pisagua, Chile.

Departures—August 31, Transvaal, to Colon; Paleno, to Valparaiso; Montoro, to Callao; Californian, to San Francisco; Ecuador, to Guayaquil; September 1, Pennsylvania, to San Francisco; September 2, St. Kentigern, to Pacific ports; September 3, Virginian, to San Francisco, September 5, Texan to Colon.

Three vessels passed through the Canal southbound and three northbound during the week ending 8 a. m., September 5.

Misdirected Letters.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts, and may be procured upon request of the addressee:

- List of names and addresses: Altidor, Gabriel; Alexander, Fred.; Bain, W. C.; Barrows, C.; Bartell, Arthur C.; King, Mrs. M. J.; Kurtz, Warren; Latimer, R. B. (2); Lindo, Percival; Louis, Mrs. Harrett, care D. Louis; McCahill, Lee; McLean, Wm.; Mack, Otto W.; Miles, John; Morgan, George; Naecker, Sam; O Connor, Joe; Oettle, Chas.; Pressill, Walter; Putnam, Mrs. Leland S.; Rawlins, Leopold; Robbins, Lt. Albert M. (pamphlet); Sanford, Robert B. Jr. (catalogue); Schildener, William R.; Shuff, A. H.; Spicer, Geo. E.

MOVEMENTS OF OCEAN VESSELS.

The following is a list of sailings and scheduled arrivals of the Panama Railroad Steamship Line; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and the United Fruit Company's Line:

Table with columns: Sails, Arrives, and ship names like Allianca, Colon, Advance, Panama.

CRISTOBAL TO NEW YORK.

Table with columns: Ship name, Sails, Arrives, and dates for Panama, Allianza, Colon, Advance.

NEW YORK TO COLON.

Table with columns: Ship name, Sails, Arrives, and dates for Santa Marta, Metapan, Oruba, Zacapa, Almirante, Trent, etc.

COLON TO NEW YORK.

Table with columns: Ship name, Sails, Arrives, and dates for Almirante, Trent, Santa Marta, Metapan, Orotava, Zacapa, Almirante, Danube, Santa Marta, etc.

NEW ORLEANS TO COLON.

Table with columns: Ship name, Sails, Arrives, and dates for Cartago, Abangarez, Heredia, Atenas, Cartago, Turrialba, Cartago, Abangarez.

COLON TO NEW ORLEANS.

Table with columns: Ship name, Sails, Arrives, and dates for Atenas, Parismina, Turrialba, Cartago, Abangarez, Heredia, Atenas, Parismina.

*Will carry mail from the United States. †Will carry mail to the United States. ‡Will carry mail for Alabama, Arkansas, Louisiana, Mississippi, and Texas.

Legal Notice.

United States of America Canal Zone. The following named American citizens died intestate leaving personal property within the Canal Zone to the amount stated:

Table with columns: Name, U.S.C., and amount for Nelson Wheeler and George Wagner.

The Administrator of Estates has filed a petition for the escheat of the abovenamed estates, in accordance with Section 779 of the Code of Civil Procedure.

Notice is hereby given to all heirs or creditors of the above estates to appear before this Court in the courthouse at Ancon, on September 26, 1914, at 9 o'clock, a. m., to establish their claims, or to show cause why the said estates should not escheat to the Government of the Canal Zone.

E. M. GOOLSBY, Clerk of District Court.

CANAL

RECORD

Volume VIII.

BALBOA, CANAL ZONE, WEDNESDAY, SEPTEMBER 16, 1914.

No. 4.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Balboa, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Mooring Berth for Ships at Gamboa.

Test piles are being driven a short distance out from the bank of the Canal, opposite the Gamboa railroad station, preliminary to the placing of a number of pile dolphins, to which vessels passing through the Canal may moor. It was originally contemplated to construct a concrete mooring wharf at this point, the estimated cost of which, as determined by a board appointed for the purpose, was \$93,850. In addition, it was found that a certain amount of dredging would have to be done to carry out this project, which increased the total estimate to \$123,850. In view of the excessive cost of the wharf structure, and inasmuch as dolphins will serve almost equally as good a purpose, the latter were adopted.

The plan calls for the driving of a row of piles, in two sets, each set extending a distance of 300 feet along the bank of the Canal. Between the two sets of dolphins, there will be an open space 300 feet long, in the center of which a mooring buoy will be established. Mooring buoys will also be placed, one at a distance of about 150 feet from the outer end of each set of dolphins. The dolphins will serve to prevent ships that are obliged to tie up at this point from grounding on the side of Canal when moored to the buoys. In rear of the dolphins, a row of deadmen will be established for additional fasts for the ships' lines. Under the new plan, no dredging will be required, as the dolphins will be located in 30 feet of water, which will breast the ships out to a depth at keel of between 35 and 40 feet.

The main purpose of having ships passing through the Canal moor at this point is to save time. In case a vessel, upon arriving at Gamboa, finds that another ship is passing through the Culebra Cut section, it will be necessary for it to tie up until the Cut is clear. Without the mooring facilities, and in case a ship is already in the Cut, another vessel proceeding to Balboa, having passed Gatun Locks, would have to anchor in Gatun Lake

until advised that the first ship had passed out of the Cut. The mooring facilities offered at Gamboa will allow a vessel to continue on its voyage as far as that point, thereby saving two hours, or more, of time.

The End of the "Badger."

The old French ladder dredge *Badger* has been condemned on account of a defective hull. It is being stripped of serviceable equipment at the Cristobal dry dock, and the Resident Engineer of the Dredging Division has requested authority to use the hull for a boat landing at Balboa.

The *Badger* was built in Belgium in 1886, and was operated in the Pacific entrance channel by the second French canal company, and afterward beached. It was recovered by the Americans and rebuilt at the Balboa shipways in 1908, at a cost of \$58,624.50. It has been operated in the Pacific entrance almost continuously since that time, with the exception of about four months of work in Culebra Cut. Its sister dredge, the *Marmot*, which has had a similar history, is still at work in the Cut.

The hull of the *Badger* is of iron, and is 112 feet two inches long, 29 feet six inches in the beam, and 11 feet six inches deep. The ladder was equipped with 32 buckets of 15 cubic feet capacity, and capable of digging to a depth of 45 feet below the surface of the water. In its rebuilt form, the dredge burned fuel oil, under three Scotch marine boilers, 96 inches in diameter by 103 inches long. The main engines were two in number, of French make, vertical tandem compound, with 12½, 25½, and 14½-inch stroke.

Change in Service at Cristobal Hotel.

As an experiment, it has been decided to discontinue the serving of regular meals at The Panama Canal hotel in Cristobal, and substitute therefor a *a la carte* service. The change will be placed in effect as soon as the serving counters, which are being installed at one end of the hotel, have been completed, probably about the first of the coming week. In general, the new service will be conducted along the following lines: Patrons of the hotel will procure their food by entering a railed enclosure surrounding the serving counters, and making request for the dishes they want. The names of the articles on the bill of fare for that particular meal, together with prices, will be prominently posted. After having been served, they will be given a check for the amount due, which, in passing out of the enclosure with their food, they will tender along with their meal book, or commissary coupon book, to the cashier. This transaction completed, they may seat themselves at the neighboring tables, and proceed with their meal. The above plan, with minor modifications, is the same as that adopted at many restaurants and eating houses in the United States. Heretofore, at most Canal hotels, it has been the custom to provide linen covers for some of the tables, and oilcloth covers for the rest,

with the restriction that people eating at tables furnished with linen covers must wear their coats. Under the new plan at the Cristobal hotel, persons wishing to eat at the tables with linen covers will be charged a small sum extra.

Articles on the bill of fare will be sold at very reasonable rates, as for example: Soup, three cents a plate; coffee, three cents a cup; ice cream, four cents a dish, and other dishes in proportion. A special effort will be made to vary the menu as much as possible from day to day. It is not believed that the new arrangement will increase the cost of an employe's eating; on the other hand, he will have the privilege of selecting the dishes he likes best, and paying only for what he gets. Many employes, who have been on the Isthmus for a considerable period of time, have adopted a lighter diet; many do not care for more than their coffee or chocolate and bread and fruit in the morning; still others prefer more vegetables and less meat, while some are heavy meat eaters. The new service is designed to satisfy, as far as possible, individual preferences; it will be tried out under the direction of Maj. W. R. Grove, Inspector for the Supply Department, and if the plan proves satisfactory, it will probably be introduced at other Canal hotels.

Panama City Stables.

An arrangement has been concluded between The Panama Canal and Panama Government authorities whereby stables already in use in the city of Panama will not, for the present, be required to remove to other sites, provided they comply strictly with all sanitary rules and regulations. No new stables, however, shall be constructed or placed in operation, without first procuring a permit from the Health Department, such permit to designate the area within which they are to be located.

Discharged for Disregarding Regulations against Malaria.

The Governor has ordered the discharge of four employes of the Panama railroad at Gatun, and one employe of the Division of Operation and Maintenance at Pedro Miguel Lock, for failure to comply with the sanitary regulations. The specific cause of their discharge was their failure to report to the district physician after being treated in the hospital for malaria, according to notices posted over the Canal Zone and verbal instructions given them at the time of their discharge from the hospital.

The Health Department points out that its efforts to free the Isthmus from malaria are offset greatly by such neglect as these employes were guilty of, and that as a matter of fact and record the menace to life and health of residents of the Isthmus is greater from malaria than from the more generally dreaded diseases, such as typhus and yellow fever, and plague. It is only by prolonged treat-

ment that malaria can be cured, and persons often retain the germ of the disease in their blood after all the symptoms have disappeared, so that they are apparently well. While numerous uncured cases are at large to infect mosquitoes it will be impossible to bring the rate of infection from malaria much below its present level. While that level is lower now than ever before, there is still enough of the disease to cause an appreciable amount of suffering and inefficiency. Malaria is the cause of most admissions to the hospital, and since January 1, 1914, it has been the direct cause of three deaths, while it has been a contributory cause in a larger number.

Decrease of Local Cases of Typhoid Fever.

The rate of infection from typhoid fever, which was over 14 per 1,000 in 1907, has been reduced steadily. In the year 1913, it was 0.67 per 1,000, and so far in 1914, that is, to September 1, it has been 0.66. In the two months preceding September 1, only one case originated on the Isthmus, though a number were taken to Ancon Hospital for treatment from ships calling at the Canal ports. One case has originated on the Isthmus this month; it is that of a negro laborer employed at Coco Solo, who became infected from eating raw conch recovered on the beach near Coco Solo Point, which had apparently been contaminated by the discharge from the Colon sewers.

Tests of Local Materials in Making Concrete.

Samples of materials available on the Isthmus for making concrete will be sent to the United States for the purpose of determining in what proportions they can best be used, in order to secure the required strength and density at the minimum cost of production. Tests, also, have been requested in connection with the manufacture of small concrete blocks and standard mortar briquets. A shipment of these materials is being prepared, and will consist of 10 barrels of No. 1 Ancon

rock (large size), 10 barrels of No. 2 Ancon rock (small size), 10 barrels of Ancon quarry screenings, and 10 barrels of Punta Chame sand. In addition, the Panama railroad has been requested to forward 20 barrels of Chagres River gravel for similar test. In selecting the rock, sand, screenings, and gravel, only average or fairly representative samples will be taken.

White Men Seeking Work in the Interior of Panama.

Following the receipt of advices that Americans have been attempting to make their way overland from the vicinity of the Canal to David, in Chiriqui province, Panama, in the hope of securing employment on the construction of the Chiriqui railroad, attention is called to the fact that all white men used on this work, are engaged by the contractor in the city of Panama. Further, the distance to David from the city of Panama is about 180 miles by air line, or approximately twice as far by the coast or the trails through the jungle, and the country between offers practically no means of legitimate livelihood for a white man without funds. A white man out of employment will have a much better chance of procuring work and faring well in the cities of Colon and Panama than in the interior of the Republic, and as advised in THE CANAL RECORD of September 2, the Isthmus is at present no place for men seeking work.

PERSONAL.

Capt. W. H. Rose, Electrical Engineer of The Panama Canal, accompanied by his family, sailed for the United States on the *Panama*, on Thursday, September 10, on leave of absence.

Effective September 1, the Rev. Father Henry Collins was appointed honorary chaplain and assistant to the Rev. Father Daniel Quijano, chaplain at Ancon Hospital.

The estates of these deceased or insane employes of the Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against these estates, or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Ancon, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

POPULATION OF PANAMA CITY

Estimate of 60,000, Based on Recent Sanitary Census, Adopted as Official.

The compilation of the reports of the enumerators employed by the Health Department to take a census of the city of Panama shows a count of 56,106 persons, not including the area beyond the bull ring, in the Sabanas district. In view of the fact that the census, aiming at a fairly accurate approximation, was taken quickly, and no return calls were made for the enumeration of occupants of rooms vacant at the time of visiting; that heads of families frequently gave answers which seemed to be wrong, in the belief that the census was for the purpose of imposing new taxes, and frequently omitted the number of their children entirely; and that the Sabanas district beyond the bull ring is believed to contain between 1,700 and 1,800 people who could not be enumerated on account of the expense, the Health Officer of Panama is of the opinion that about 5,000 might be added to the enumerated total. The official figures for the population of the city of Panama, as of September 1, have, accordingly, been set at 60,000. The estimate which the Health Department had been using was 62,172.

The persons enumerated have been classified, as follows:

CLASSIFICATION.	City.	Sabanas.	Total.
Canal employes.	12,851	4	12,855
Nonemployes.	42,495	756	43,251
Total.	55,346	760	56,106
Males.	29,723	400	30,123
Females.	25,623	360	25,983
Total.	55,346	760	56,106
Whites.	13,516	46	13,562
Yellows.	1,360	11	1,371
Blacks.	33,492	199	33,691
Panamanians.	6,978	504	7,482
Total.	55,346	760	56,106

In the segregation by colors, the enumerators included under the designation "Panamanian" all persons not strictly in the other classes, but who were, in the judgment of the enumerators, natives of the country.

A census of the city, taken by the Government of Panama about the middle of the year 1911, showed a total population of 37,505. The increase in three years may be estimated, accordingly, at approximately 23,000, a gain for the period of about 60 per cent. The whites were then counted as 7,045; mestizoes, 17,319; negroes, 10,963; yellows, 1,160. As between males and females, the numbers were 19,375 males and 18,130 females. The census of the Canal Zone taken between February 1 and March 31, 1912, enumerated the number of employes of the United States Government, and Canal contractors, living in the city of Panama. They amounted then to 3,789, and their number has increased since by approximately 9,000. The first sanitary census of the city of Panama was taken in 1904, at which time the enumeration showed a population of a little over 20,000.

A contract has been entered into with the J. G. Rainwater Lumber Company of New Orleans, La., for supplying 852,314 board feet of white oak lumber, rough sawed, for freight car repairs, at \$45 per thousand feet.

Brake service at Culebra will be discontinued on October 1.

SOCIAL LIFE OF THE ZONE.

Cristobal Woman's Club.

The Cristobal Woman's Club entered upon its eighth year at an adjourned session of the annual meeting held in the Government clubhouse on Wednesday afternoon, September 2. The officers elected are: President, Mrs. Charles A. Hearne; first vice-president, Mrs. W. C. Harrison; second vice-president, Mrs. Edward Davey; recording secretary, Mrs. Numa Nunn; corresponding secretary, Mrs. J. P. Dovell; treasurer, Mrs. George Whitney. Mrs. Charles Butters was appointed chairman of the program committee. The annual reception to the outgoing and incoming officers, and new members, will be held in the Cristobal clubhouse on Wednesday afternoon, September 30.

Ladies' Aid Society of the Cristobal Union Church

The Ladies' Aid Society of the Cristobal Union Church held its opening meeting for the year at the church on Tuesday afternoon, September 8. The meeting opened with the regular business routine, and was followed by selections of music given by Mrs. Harde- man, Mrs. Wilkes, and Miss Sarah Harrison. The report of the chairman of the program committee for the year 1913-14, showed that eight meetings were held, one each month from October to May. The subjects and programs for the meetings were, as follows: October, "Home life in Japan," reader, Mrs. Harrison; November, "China," speaker, Mr. Lum, a Chinese merchant in Colon; December, "Christmas," papers by various members of the society; January, "Mexico;" February, "Our island possessions;" March, "The Salvation Army," speaker, Mrs. Grimes of the Army institute in Colon; April, "Our home missions," speaker, Mrs. Thomas Edwin Brown, Jr.; May, "The Southern Industrial Education Association," speaker, Mrs. Martha S. Gielow.

Besides the maintenance of the regular expenses of the society, the ladies' aid society contributed \$15 to the Salvation Army, and \$10 to the Southern Industrial Education Association.

The outline for the programs for the present year includes some practical subjects. There will be three mothers' meetings, with appropriate addresses, two programs for the consideration of home life in foreign countries, and one for the discussion of the work of the various religious bodies in mission fields.

The officers for the year are: President, Mrs. S. P. Verner; vice-president, Mrs. W. C. Harrison; secretary, Mrs. F. H. Townsend; treasurer, Mrs. W. M. Smith. Mrs. Harrison was elected a member of the board of the Panama Federation of Societies of Women for Christian Work.

The council of the Cristobal Union Church has asked the ladies' aid society to cooperate with it in the plans for an evening "Social" to be held in the church this month.

Centenary of "Star Spangled Banner" Observed.

Patriotic exercises in honor of the centenary of "The Star Spangled Banner" were held at the Variedades Theatre, Panama, by the Sunday school of the seawall Methodist Church and the pupils of the Panama Methodist Episcopal College, on Monday evening, September 14. The management made no charge for the use of the theatre, and the Guatemalan orchestra donated its services. The proceeds from the entertainment will go toward a fund for the education of a young

Ecuadorian girl at the Wesleyan College at Delaware, Ohio, under the patronage of the Panama Methodist Church Sunday school, and the Woman's Foreign Missionary Society. The program was, as follows:

Part 1.	
Guatemalan Orchestra.	
Hymn— <i>Star-tit flag</i>	School
Invocation.	
Himno Nacional de Panama.....	School
"The Star Spangled Banner."	
Address.	
Part 2.	
Orchestra.	
Song— <i>Come let us live with our children</i>	
Hymn— <i>Our festive day</i>	School
Recitation— <i>The child's world</i>	Thelma Burrell
Song— <i>Playing school</i>	The little ones
Recitation— <i>La tentacion</i>	Plinio Rodriguez
Song— <i>Baby girl</i>	Little girls
Recitation— <i>Over the meadow</i>	Granville Humber
Song— <i>The band</i>	Alvin Sasso, Percy Sasso, Bolivar Avilez, Alfonso Lopez, Jeronimo Avilez, Floy Ensminger.
Recitation— <i>Young soldiers</i>	Eugene Eisenmann
Solo— <i>Better be good</i>	Berta Ensminger
Exercise song.....	Intermediate class
Orchestra.	
Part 3.	
Song— <i>Out in the beautiful garden</i>	
Recitation— <i>The battle of Blenheim</i>	Rosebud Halman
Apostrophe al agua pura.....	Las señoritas
Recitation— <i>Old Ironsides</i>	Boys and girls
Song— <i>Jolly boys and laughing girls</i>	Boys and girls
Class work.....	First aid to the injured
Patriotic drill.....	Sixteen girls

Flag Raising by Cristobal Boy Scouts.

On Saturday, September 12, at 6 a. m., the Cristobal Boy Scouts conducted a ceremonial flag raising, in honor of the centenary of "The Star Spangled Banner." The boys stood at salute as the flag was slowly raised, and one verse of the hymn was sung. This is the third flag raising of the Cristobal company; the first flag was presented by Colonel Goethals and raised for the first time on July 4, 1912; the second was the gift of Capt. Frank O. Whitlock, and was raised on January 1, 1913; the present flag was presented by Mr. E. C. Beck. The division has a membership of about 15 boys. Mr. William R. Anderson is the scout master.

War Relief Funds.

On Sunday evening, September 13, patriotic services were held in St. Paul's Anglican church, Panama. The litany was sung, and the service closed with the singing of the British national anthem. The offering is to be devoted to a war relief fund.

The relief fund for St. John's Ambulance Society, London, which has been raised by subscriptions among West Indians in the city of Colon, has reached the sum of \$250, United States currency. The money will be forwarded to headquarters in London, to be used for the relief of wounded British soldiers.

National Society of Craftsmen.

Members of the National Society of Craftsmen on the Isthmus interested in the formation of a craftsmen club are requested to communicate with Charles Proescher, Corozal.

Obituary.

Martin J. Dunn, a veterinary surgeon employed by the Supply Department, with residence at Culebra, died at Ancon Hospital on Sunday morning, September 13, at 9.35 o'clock. He was born at Oxford, N. Y., was 54 years of age, and had been in the Canal service since February 3, 1910, coming here from Detroit, Mich., his former home. He served as a veterinary surgeon in the Philippine Service for over five years. He is sur-

vived by his wife, two sons, Ray H. and Ernest J. Dunn, and a daughter, Miss Shellie M. Dunn, a teacher in the Canal Zone schools. Members of the family were with him at the time of his death.

Edward F. Slayback, a supervisor in the employ of the Panama railroad, residing in Panama city, died at Ancon Hospital on Saturday, September 12, from tetanus. On September 4, he stepped on a nail in the Panama railroad yards in Panama, but failed to report the injury to a physician; two days later his jaw began to trouble him, and on September 8, he sought treatment and was admitted to the hospital the following day. He was born at Lowell, Benton County, Arkansas, on October 14, 1871, and was unmarried. He came to the Isthmus on April 10, 1905, and became a bridge carpenter in the old architectural department at Cristobal. On September 20, 1905, he transferred to the Panama railroad, but left the service on December 31, 1907. He was reemployed by the Panama railroad on June 8, 1908, as a pile driver foreman, and was engaged in the relocation work until July 1, 1911, when he returned to the maintenance department as supervisor. He was a bridge carpenter from 1895 to 1899, with the Missouri Pacific Railroad at Eldorado, Kansas, and from 1899 to 1905, was with the Great Northern Railway at Everett, Washington. A sister, Mrs. Ina Kendrick, lives at Lowell, Ark.

Roebing E. Broome, an American employed as a foreman at Miraflores Locks, in the Department of Operation and Maintenance, was killed by an electric shock received from a towing locomotive, on the north end of the center wall of the locks, at 2.40 p. m., Thursday, September 10. He was born at Memphis, Tenn., March 18, 1874, and had been on the Isthmus since November 10, 1912. He was employed as an erector in the installation of miter gate machinery at the Pacific locks until December 16, 1913, when he was made a foreman. He is survived by his wife, Mrs. Edna W. Broome, and a daughter, living at No. 111 North Hermitage avenue, Trenton, N. J. The coroner's jury, appointed to investigate the accident, returned a verdict that death was caused in the manner above described.

Clubhouse for Colored Employees at La Boca.

The clubhouse at La Boca, for the use of colored employes living in that settlement, is nearing completion, and is expected to be ready for occupancy about October 1. The building was formerly the clubhouse at Porto Bello, and is being rebuilt along practically the same lines. It will be under the supervision of the Superintendent of Clubs and Playgrounds, and will have a colored secretary, a trained man, who will be furnished by the International Committee of the Y. M. C. A.

Pedro Miguel School.

The forenoon sessions at the school for white children at Pedro Miguel will be from 8 to 11, and the afternoon sessions from 1 to 3. This information was inadvertently omitted from the table of opening and closing of sessions, printed in THE CANAL RECORD of September 9.

Married.

HOWARD-KULLER—in the Government chapel at Gatun, on Saturday evening, September 12, Eva Kuller, daughter of Mr. and Mrs. Benjamin F. Kuller, to Mr. E. Thurston Howard, the Rev. Edward J. Cooper officiating. Canal Zone residence, Gatun.

PANAMA TELEGRAPH LINES.

P. R. R. Forces Rebuilding Government's Route to Empire—Reconstruction of Entire System.

The work of rebuilding the Panama Government's telegraph and telephone line between Panama and Empire, which is a part of its interior system of communication extending to David in the province of Chiriqui, is being performed by the forces of the telegraph and telephone department of the Panama railroad, the Government to reimburse the railroad company for the cost.

The wires, consisting of two pairs of No. 6 copper, designed for the toll line circuits between Panama and David, and three pairs of No. 10 copper, to be used for the telegraph service and intermediate local telephone business, will be carried out of Panama city in a 15-pair, No. 13 gage, paper-covered lead cable. This cable will leave the central office in the Government post-office building, corner of Fourth street and North avenue, and follow the beach on poles, converted from iron rail, to a point in the district of Trujillo, crossing the old American wharf structures, the Panama Tramways Company car barn, and other buildings on high standards. From Trujillo, the route extends along Twelfth of October street, which leads directly to Calidonia; there it crosses over the street car company's trolley line at the foot of Calidonia bridge, and continues to the picket fence enclosing the Panama railroad's right-of-way. The cable route parallels the railroad right-of-way to a point a short distance beyond the Tivoli station where labor trains stop. Here the route changes to bare copper wires, the pole line following the old Panama railroad main line track between Corozal and Panama as far as El Diablo, where it leaves the railroad, passes over a hill and back of the town of Corozal, thence in as direct a route as possible over the old Miraflores dump to a point about 1,500 feet from the southern entrance to Miraflores tunnel. At this point, the wires will be carried into a 15-pair, No. 13 gage, paper-covered lead cable through a duct in the Miraflores-Pedro Miguel duct line to Pedro Miguel Lock, and from there through the cable tunnel beneath the upper lock chamber to the west side of the Canal. Here the bare copper wires will begin again, the pole line continuing to Empire, where it connects with the route to Chorrera and other points in the interior.

The poles to be used in the rebuilding of the section of line between Panama city limits and Empire are new; they are of iron, hollow, eight meters (about 26 feet) in length, equipped with two iron cross-arms with white porcelain insulators, and were purchased in Germany. Between the central office and city limits old iron rail has been used for poles. Along the beach these poles have been set in concrete, and, in addition, they have been armored with the same material for a height of two feet above maximum tide level to protect them from passing vehicles, as well as to prevent the corrosive action of seawater. The pole line has been completed out of Panama to a point north of Corozal, but no cable or wire have been strung to date.

The Panama Government is arranging to rebuild the greater part of its interior telegraph and telephone lines, and in pursuance of this plan, will string two pairs of No. 6 copper wire all the way to David for toll line business. Between Empire and Aguadulce, there will be a new 6-meter pole line,

equipped with three No. 10 copper circuits, in addition to the toll lines. From Aguadulce to Divisa, there will be a new 8-meter pole line, equipped with 10 No. 10 copper wires; from Divisa to Santiago, there will be four No. 10 copper wires, and from Santiago to David, a 6-meter pole line, equipped with three No. 10 copper wires, the various sections above-mentioned constituting the main Panama-David line. The No. 10 circuits are designed to handle all of the intermediate telegraph and telephone business. A branch line, equipped with four No. 10 copper wires, will be built from Divisa to the towns of Santa Maria, Parita, Chitré, Los Santos, and Las Tablas. From Santiago, through Atalaya, Ocu, Pesé, to Chitré, the existing single iron wire will be replaced by a No. 10 copper metallic circuit. It is further planned to construct a new line, equipped with two No. 10 copper circuits, from David to Boquete. To date, eight wires have been strung on the reconstructed line from Empire to Chame, and a construction force is now working toward San Carlos. New exchanges are to be installed at David, Chitré, and at Lino in the Boquete region. The exchange at David will probably be housed in a new building, which will also furnish office room for the telegraph, telephone, and postal services. At Chitré and Aguadulce, apparatus will be installed for the recharging of batteries. The Panama Government will continue the use of the magneto system of telephone equipment in its new central office installations.

The following data relative to the telegraph and telephone branch of the Panama Government were compiled by the inspector-general in charge, in January of this year: At that time there were 23 telegraph offices in the Republic. Every telegraph office is considered a telephone office, as the telegraph lines serve as telephone lines for short distances. There was a total of 40 telephone offices not including the 23 combination offices. There were about 485 miles of telegraph pole lines, and about 715 miles of wire. There was about 300 miles of telephone wire serving the 23 telegraph stations mentioned above. When the work of rebuilding the old lines, and making extensions and alterations to the present system, is completed there will be a total of 2,730 miles of copper wire in service.

Dumping of Rock on East Breakwater Begun.

The dumping of rock on the east breakwater in Limon Bay was begun on Tuesday, September 15. The rock is excavated at the Sosa Hill quarry and shipped across the Isthmus in trains of 42 Lidgerwood flat cars. Two steamshovels are engaged in the excavation at present, and five trainloads are shipped each day.

Each train is drawn by a locomotive of the 600 class, but a booster engine is used on loaded trains between Pedro Miguel and New Culebra, past the summit of the continental divide at La Pita; the rise in this 5-mile distance is about 175 feet. The returning trains of empties will be handled all the way by a single locomotive. Balboa will be the basis of transportation operations, and a train will ordinarily make the trip to Coco Solo and back in the same day.

Locomotives will begin the day's work at Balboa fully coaled; in some instances the amount which the 600-class engines carry will be sufficient for the trip over and back, but arrangements have been made for an aux-

iliary supply at Coco Solo. A 24-tonbin, with chute, has been erected near the pile yard out of material reclaimed from the larger chute used for the Toro Point breakerwater. A watering tank and turning wye have been part of the Coco Solo yard equipment for some time. The machine shop there can make minor repairs, and the shops at the Cristobal dry dock are within easy access.

Dumping began at bent No. 358 of the trestle, approximately 5,925 feet from the shore. Full train lengths are being dumped by means of a Lidgerwood unloader and plow brought from Toro Point. The sounding bridge used on the Toro Point construction has been placed in service for taking measurements to determine the cross-section of the fill.

Order of Isthmian Conductors.

The next regular meeting of the Order of Isthmian Conductors will be held at Ancon lodge hall on Sunday morning, September 20, at 9.30 o'clock. All members are urged to attend, as matters of great importance will be taken up at this meeting.

GEO. B. ALLEN, *Secretary-Treasurer.*

CRISTOBAL, C. Z., September 13, 1914.

First U. S. Naval Vessel Through the Canal.

The United States transport *Buford* arrived from San Francisco on September 6, and was passed through the Canal on its way to Galveston, on September 9. This is the first United States naval vessel to navigate the Panama Canal.

Rainfall September 1 to September 12, 1914, Inclusive.

SAFETY DEVICES ON THE P. R. R.

Handling the Traffic in the Busy Construction Days—Standard Practices now in Effect.

In solving the operating problems of the Panama railroad, the standard signal practices in the United States were closely followed, although local conditions were so peculiar that many original details were incorporated into the general scheme of protection, in order to obtain the desired results.

When the old main line was in service, prior to February 15, 1912, the heaviest main line traffic was carried over double track. Trains were operated and spaced by manual block signals. This plan of handling traffic was necessary at that time, because the chief train dispatcher would not have been able to issue the "Running orders" for so many extra trains, and the flexibility of the caution aspect on the manual block signal, in addition to a rigid enforcement of the yard limit rule, allowed trains to follow each other at a less distance than could be successfully accomplished by automatic block signals. When the old main line between Gatun and Gorgona was abandoned and traffic partially shifted to the single track on the relocated line, conditions changed, and the factor of safety had to be given immediate consideration, resulting in the following program:

First—A scheme of signal aspects as simple as possible, but sufficiently flexible to care for present and future traffic.

Second—The preparation of a book of signal instructions covering such aspects, and later, the revision and rearrangement of the *Book of Rules* which included these instructions.

Third—The examination of all transportation men on the rules, and their instruction as to the use of signals.

Fourth—The protection of congested points by interlocking plants, or other mechanical signals; also, the protection of the main track on descending grades by derails located in sidings and operated from the switchstands.

Fifth—The installation of automatic block signals as fast as permanent track and reduced traffic conditions would permit.

Delays of various kinds, however, made it impossible to entirely fulfill the fourth and fifth requirements above mentioned. The signal instructions were issued to the transportation forces early in 1912, and a description of these aspects appeared in THE CANAL RECORD of November 13, 1912. The revised *Book of Rules* was distributed in December of the same year. Examinations were held at various points on the Isthmus in a baggage car assigned to that service. A committee, representing both the Isthmian Canal Commission and the Panama railroad, was appointed to conduct these examinations, and to explain the new scheme of signaling. It required approximately four months to examine and instruct the 450 transportation men. These were taken in classes of 10 or 12, and the average time required per class was eight hours. The committee's aim was to demonstrate the relation between definitions, rules, and train orders, but the real test consisted in writing 38 typical train orders on a blackboard; in this manner, 51 vital points were brought out through questions and discussions.

The protective devices now in use on the Panama railroad consist of interlocking plants, station signals, switch signals, pipe-connected derails, and automatic block signals. During the past two years, the disc signal aspect has

been eliminated, and all existing semaphore arms were changed to operate in the upper right hand quadrant. During the same period, 23 interlocking plants, with 365 active levers, 66 station signals, 18 switch signals, 26 pipe-connected derails, two staff machines, and 122 automatic, or other power operated signals were installed. Many of these have been changed or rebuilt to keepstep with the changing conditions, and within the past few months, some unnecessary apparatus has been removed.

At old Tower R, the train movement at one time averaged one train for each one and two-thirds minutes. This average for nine hours is one, it is believed, that has been rarely exceeded in the busiest terminals in the United States. Circumstances made the installation of a mechanical interlocking machine necessary, and the time element was so valuable that derails had to be left out of the combinations, in order to save the few seconds of time required to handle the additional levers. In order to expedite line ups and prevent confusion, the yardmaster, located in the upper story of the cabin, indicated all routes on an electric track diagram by the means of push buttons. Electrical adjuncts, such as indicators and power operated signals were added, in order to safely expedite train movements through the interlocked limits of old Tower R, and electrical connections to Gamboa cabin protected traffic from head end movements while on the Gamboa bridge. This plant was in operation for 17 months, and during that period no accidents or collisions occurred within the protected territory.

In March, 1913, when the heavy dirt train traffic was shifted from the Canal tracks on the lower level to the Panama railroad main line and passed through the Miraflores tunnel, it was necessary to incorporate a better system of protection through this congested territory. An absolute staff system was installed and the converging tracks at North cabin and South cabin interlocked. This apparatus was described in THE CANAL RECORD of January 11, 1913. In the above arrangement it was also necessary to omit derails on two of the tracks leading into the tunnel for the simple reason that the time required to handle even two additional mechanical levers was so valuable that it had to be considered. During the existence of the heavy traffic, it was no uncommon occurrence to pass 230 trains through the tunnel between 6 a. m. and 6 p. m., and the daily average was over 200 trains. With the maximum traffic, as enumerated above, the capacity of the tunnel and the staff system was taxed to the limit. The staff system controlled this territory for over 13 months without an accident, but on account of a recent reduction in the number of trains, it was superseded by automatic signal protection, covering the gauntlet track installed through the tunnel a short time ago.

The automatic scheme now in use at the tunnel is so designed that the automatic signals stand normally in their "Stop" position. A train approaching with the current of traffic from either end enters a clearing section 1,500 feet in advance of the signal. If all conflicting entrance points and the gauntlet are unoccupied, the signal will change to "Proceed," and allow the train to pass on through the tunnel. If not, the signal arm will remain in the horizontal position. Movements against the current of traffic are controlled in the same manner,

except the clearing sections are only 150 feet long, requiring the train to come to a full stop before entering the tunnel. The first train entering a clearing section will receive a "Proceed" aspect regardless of right, class, or direction. This change represented another compromise on the side of economy, and safely handles the present traffic without any manual assistance at either end of the tunnel.

A number of questions have come up within the past few months relative to automatic stops. When a railroad has to resort to automatic stops as an additional check upon the human element of its traffic personnel, it immediately removes the responsibility from the engineman and places it in the hands of the signal maintainer. Such a step is, according to general belief, not in accordance with the fundamental principles of good railroading, as the engineman should at all times have complete control of his train, and with the scheme of aspects on the Panama railroad and their controls there appears to be no reasonable excuse for overrunning a signal in its stop position. To fill all requirements, an automatic stop should be able to successfully cover the following:

1. It must have continuous control.
2. It must operate with the engine running either forward or backward.
3. When two or more engines are on one train, it must affect the leading engine only.
4. It must operate on both steam and electric propulsion.
5. It must comply with and stay within the theoretical clearance of both roadway and equipment.
6. It must work under all weather conditions.
7. It must stop a train should any of its parts be damaged or missing.
8. It must not be dangerous to passengers and employes.
9. It must be sufficiently rugged to withstand wear, tear, and vibrations.
10. It must be convenient for inspection and repairs.
11. It must register each train stop it has made.
12. It must allow a train to pass a "Limited speed" aspect below a predetermined speed, or stop such trains if the speed is greater than the maximum speed allowed.
13. It must make an application of the air in beginning to stop a train, regardless of speed, at not less than 4,000 feet in advance of any home or automatic signal with its arm in the horizontal position.
14. It must be so arranged that an engineman cannot cut the apparatus out of service during the trip, and, in the event an automatic stop is made, it must be necessary for him to get under engine or tank to release brakes.
15. It must be so arranged that trains cannot enter the main track at any point unless the route is unoccupied and the switch indicators show "Proceed."

With these requirements in sight, it is seen that undue complications enter into such schemes of safety devices; that they place the movements of trains subordinate to the factor of safety, shift responsibility to the wrong personnel, and reduce the actual capacity of the main track from 12 per cent to 35 per cent, according to the spacing of existing signals. The local conditions on the Panama railroad and the personnel in the train

service make automatic stops unnecessary.
INTERLOCKING PLANTS.

The protection offered by the interlocking plant is confined to a restricted territory, such as a railroad crossing, a junction, end of double track, etc. On the Panama railroad, all plants are mechanical. The locking and machines are built in the field, and all material is in accordance with the latest signal practice.

The cabin contains the machine the levers of which correspond to the outside functions, and they are so interconnected that all levers must be manipulated in a predetermined sequence. This arrangement gives the signalman complete control over all switches, derails, and signals connected to his machine. The connections from the lever to switches, derails, and detector bars are made by 1-inch pipe specially riveted and carried on antifriction pipe carriers; this pipeline has a travel of 8½ inches, and turns are made with bell cranks. All pipelines over 150 feet have to be compensated for changes in temperature. The connections for mechanical signals are made with No. 9 gage (B. W.) special galvanized steel wire, supported on wire carriers, and require no compensation in distances less than 1,200 feet. Turns are made by inserting chain in the wire line and carrying this around 10-inch sheave wheels. Switches are locked by a round plunger the end of which is sawed square, and they are so adjusted as to "Stick" if the points stand open three-sixteenths of an inch, or more.

To prevent a switch or derail from being thrown under moving equipment, a detector bar is placed alongside the rail. This bar is ¾-inch by 2¼ inches by 55 feet, supported by 14 radial links, and operates through an arc of 120 degrees when being moved in either direction. It is placed on the outside of the rail, inclines at an angle of 15 degrees toward the center of the track, and rises one and one-quarter inches above the top of the rail, when on center. The presence of car or engine wheels over the bar prevents the signalman from throwing the lock lever, and as that lever locks the switch lever both inside the cabin and at the switch proper, it is, therefore, impossible to throw a switch under a moving train.

All signals are equipped with an additional check called a bolt-lock; this works in conjunction with derails and switches in such a way that the signal cannot be brought to its "Proceed" position unless the track is properly lined up, and, on the other hand, if the signal does not respond to the lever movement and go to its stop position as the signal lever is placed normal, the route cannot be changed until the signal is placed at "Stop" by some other method.

AUTOMATIC SIGNALS.

Automatic signals differ from manual block signals in several respects. They operate automatically, as their name implies, without any manual assistance. Except at Miraflores tunnel, they operate normally clear, instead of normally danger, as with the manual block, and they provide "Space element" blocking, instead of "Time element" blocking. Automatic signals space and protect traffic at all points outside of interlocking plants, giving both head end and rear end protection, as well as offering protection against broken rails, misplaced switches, and cars beyond the fouling point in turnouts. The control of the signal arm between "Stop" and "Limited speed"

is actuated by track circuit controls ranging from four-tenths of a mile to 2.65 miles, according to grade, traffic, and other conditions.

The continuous track circuit is the fundamental factor of their automatic operation. Battery at approximately 1-volt pressure is fed to one main track rail; the current passes up this rail, through a 4-ohm track relay, and returns on the other rail to the battery. This current, in passing through the relay coils, energizes them and picks up the armature on the relay; this, in turn, relays a local current of about 10 volts that operates the signal motor, energizes its slot arm, and holds the signal in its "Proceed" position.

When a train enters the track section, its wheels and axles form a path of much less electric resistance than the relay, so the current takes that path and the relay coils being thus deprived of energy, cease to attract the armature, which opens by gravity. The local circuit is then interrupted, the slot arm disengages, and the signal arm itself falls to its "Stop" position by gravity. The act of throwing a main track switch for a turnout places the same relative conditions in effect. The switch point mechanically operates a switch box that short circuits the rails in the same manner as the wheels and axles under the equipment. In order to prevent trains, running under clear signals, from being "Side-swiped" the outer ends of all crossovers are also equipped with switch boxes, which require both ends of all crossovers to be left lined up for straight track. Every electrical and mechanical feature incorporated in the entire system is so designed that, should it break or any part of it be removed, the signal will go to "Stop", thus placing a so-called signal failure on the side of safety in all cases.

The control of the signal arm from "Limited speed" to "Normal speed" is actuated by a polarized line circuit. The signal ahead feeds battery to the line through a quick acting pole changer; this circuit is then carried through front contacts on a 4-ohm relay at each track section to a 1,000-ohm relay at the following signal. The neutral armature is actuated by current in either direction, but, in addition to this, the 1,000-ohm relay has a polarized contact that is energized and moves according to the direction of the current. These contact points on the polarized relay are used to make or break an additional local circuit that controls the signal arm between its 45-degree and its vertical position.

Automatic signals may always be distinguished by a number on the front of the mechanism case. This number indicates, in miles and hundredths, the distance from Colon. Northward signals are always given even ending numbers, and southward signals even ending numbers. This scheme of numbering allows changes or additions without disturbing the individual numbers on other existing signals, and allows concise and intelligent telegraphic report to be made in case of a signal failure.

In introducing automatic signals into operating problems on the Panama railroad, rapidly changing conditions and the peculiarities of the tropical climate developed many new details never before encountered, although, in general, the best signal practice followed by railroad systems in the United States has been observed. The maintenance of automatic signals on the Isthmus, however, requires considerable more work and a much

more rigid inspection than in the United States. This is due to the deterioration of battery, the corroding effects of the climate on contacts, the tendency of finished iron parts to rust, and occasional injuries of various kinds received from outside agencies.

The automatic signals between Colon and Miraflores average 210,000 arm movements per month. The reported interruptions that are chargeable to the system have averaged less than 15 per month. When the automatic signals are extended to Panama, some existing interlockings rearranged, and two additional plants installed, the factor of safety on the Panama railroad will be coordinate with its other operating problems.

Increased Emigration in August.

The report of quarantine operations at the Atlantic and Pacific terminal ports for the month of August show an excess of emigration over immigration of 701, as compared with a net emigration in July of 405. The total net emigration from the Isthmus to foreign ports since July 1, 1913 has been 16,272, the greater part of whom consisted of laborers returning to their former homes on account of the closing down of Canal work.

The total number of persons embarking at Colon and Cristobal for foreign ports during August was 3,505, consisting of 1,876 cabin, and 1,629 steerage passengers. The number of persons landing from foreign ports at these points was 2,326, consisting of 1,308 cabin, and 1,018 steerage passengers. The excess of those who embarked over those who landed was 1,179. The immigration from Europe in the steerage class has practically ceased, only 25 persons arriving from there in August. The West India islands contributed 634, as compared with 925 for the previous month; Colombia, 131; Costa Rica, 106, and Cuba, 31. A total of 740 persons entered the Atlantic terminal ports during the month from Bocas del Toro, and 261 from other coast towns of the Republic. Of the arrivals at Colon and Cristobal, 1,913 were men, 620 were women, and 288 were children. The number of persons arriving "In transit" was 1,270, as compared with 1,482 in July.

The number of persons arriving at the ports of Balboa and Panama from foreign ports during August was 923, consisting of 747 cabin, and 176 steerage passengers. The number of persons who embarked for foreign ports during the same period was 445, consisting of 332 cabin, and 113 steerage passengers. The excess of those who landed over those who embarked was 478.

Ninety-three vessels entered the Atlantic ports during August, and 31 the Pacific ports a total of 124.

Panama Canal Marine Association.

The Panama Canal Marine Association will hold its regular meeting on Sunday, September 20, 1914, at 7.30 p. m., at the lodge hall in Paraiso. Refreshments will be served. Consult time table for train service.

F. E. NEHLS, Recording Secretary.
BALBOA, C. Z., September 15, 1914.

Type-18 Quarters at Gatun to be Rented.

The recommendation that two Type-18 bachelor quarters at Gatun, which have been vacant for some time and are not now needed for unmarried employes, be rented to employes desiring nonhousekeeping quarters, has been approved.

EXECUTIVE ORDER

To Require Security for Costs In Civil Cases.

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

Section 1. The plaintiff in any civil suit, or special proceeding, may be ruled to give security for the costs upon motion of the defendant, or of any officer of the court interested in the costs accruing in such suit; and if such rule be entered against the plaintiff, and he fail to comply therewith, within the time prescribed by the court or judge thereof, the suit shall be dismissed.

A new or additional undertaking may be ordered within such time as the court or judge may prescribe, upon proof that the original undertaking is insufficient security, and failure on the part of the plaintiff to comply with the order of the court, or judge, within the time prescribed, shall cause the dismissal of the suit.

This section shall apply to suits in the Magistrates' Courts, as well as in the District Court.

The security for costs required by this section may consist of a money deposit, bond of a surety company, or cost bond with two or more good and sufficient sureties, the form of such security to be determined by the judge or magistrate of the court before whom the proceedings are pending.

Section 2. All bonds given as security for costs shall authorize judgment against all of the obligors of said bonds for such costs, to be entered in the final judgment of the case or special proceedings.

Section 3. Any party to a suit who is required to give security for costs, may file with the secretary, or his assistant, or with the magistrate, as the case may be, an affidavit to the effect that he is too poor to pay the costs of the court, and is unable to give security therefor. The secretary of the district court, or his assistant, or the magistrate, as the case may be, may contest the inability of the party to pay the costs, or his inability to give security for the same, the contest to be tried before the judge of the District Court in cases pending in that court, and before the magistrate in cases pending in one of the Magistrates' Courts; and the contest shall be heard at such time as the court or magistrate may determine.

If no contest is made upon the affidavit, or if the same is admitted by the court or magistrate after the contest, it shall be the duty of the officers of the court thereafter to issue and serve all processes and perform all duties on behalf of such party as in other cases.

Section 4. The public administrator, and executors, administrators, and guardians appointed by the courts of the Canal Zone shall not be required to give security for costs in any suit brought by them in their fiduciary character.

Section 5. No security for costs shall be required of The United States, The Panama Canal, the Canal Zone Government, or any of its dependencies.

Section 6. The provisions of this Order, relating to security for costs, shall apply to an intervenor, and shall also apply to a defendant who seeks a judgment against the plaintiff on a counterclaim, after the defendant shall have discontinued his suit.

Section 7. When the costs are secured by

the provisions of an attachment or other bond, filed by the party required to give security for costs, no further security shall be required.

Section 8. All laws, orders, and decrees, or parts thereof, in conflict with this Order, are hereby repealed, provided, that this Order shall not be construed to impair the power conferred upon the courts in respect to costs by Article III of the Executive Order of September 29, 1911, "To amend Sections 51, 62, and 526, and to repeal Sections 63 and 529 of the Code of Civil Procedure of the Canal Zone."

Section 9. This Order shall take effect 60 days from this date.

WOODROW WILSON.

THE WHITE HOUSE,
August 14, 1914.
[No. 2019.]

EXECUTIVE ORDER

Regulating Operation of Street Railway Cars at Crossings.

By virtue of authority vested in me, I hereby establish the following Executive Order for the Canal Zone:

Section 1. It shall be unlawful for a motor-man or any person in control of a street railway car to run same over or upon any street crossing, road crossing, or street railway crossing, at a speed of more than five miles per hour, and without commencing to sound gong, horn, or whistle when at least 100 feet from said crossing, and continuing to sound same until the crossing has been passed.

Section 2. It shall be unlawful for a motor-man or any person in control of a street railway car to run same over or upon any railroad crossing, without bringing the car to a full stop at least 10 feet from the nearest rail, and without ascertaining from a view of the railroad track made either by himself or by the conductor that the crossing may be safely passed.

Section 3. A violation of any of the provisions of this Order shall be punished by a fine of not more than \$100, or imprisonment for not more than 30 days, or by both fine and imprisonment in the discretion of the Court.

Section 4. This Order shall take effect 30 days from and after this date.

WOODROW WILSON.

THE WHITE HOUSE,
August 22, 1914.
[No. 2026.]

EXECUTIVE ORDER

Relating to Postal Crimes in the Canal Zone.

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

Section 1. The Postal Laws and Regulations of the United States, not locally inapplicable, which define crimes against the Postal Service, and prescribe punishments therefor, are hereby extended to the Canal Zone, and shall be enforceable in the courts of the Canal Zone in the manner and form prescribed for other criminal cases by the Canal Zone laws.

Section 2. This Order shall take effect from and after this date.

WOODROW WILSON.

THE WHITE HOUSE,
August 14, 1914.
[No. 2018.]

FLOATING PUMPING PLANT

Constructed of Old Equipment to Assist in Un-watering Lock Chambers.

A floating pumping plant has been constructed for use as an auxiliary to the pumping system of the floating caisson dam for un-watering lock chambers. The old iron barge No. 7, which is rectangular in plan, 125 feet long by 25 feet wide, and draws about four feet of water, was used as the pontoon on which to mount the pumping system. The main pumps are two Worthington 18-inch centrifugal dredging pumps, driven by 655-horsepower, 2,080-volt induction motors, direct-connected, and were among the units used for the removal of spoil sluiced by the hydraulic monitors in the Canal channel, south of Miraflores Locks. A 10 by 10-inch motor-driven vacuum pump is connected with the main pumps for priming service.

When a chamber is to be pumped out, the outfit will be towed inside and moored alongside the lower gate. It will lower evenly as the surface of the water falls and rest finally on the upstream portion of the sill of the gate. To provide for the discharge from this position, as well as to provide a constant head against which to pump, the outlet has been made through two vertical standpipes, rising 60 feet above the pumps, and clearing by one foot the highest gates alongside which the outfit will be used. The standpipes are held in place by wire guy ropes and are equipped with elbows at the upper ends, to carry the discharge to the other side of the gate. Each standpipe is fitted at the bottom with a ball and socket joint so it can be easily lowered when it is desired to move the outfit from one lock to another.

The main pumps were designed for heavy duty against a discharge head of 100 feet. As the head against which they are to pump in this service is approximately 63 feet, it was necessary either to change the impellers or artificially increase the head, in order to operate them with the motors with which they were equipped. The cost of changing the impellers led to the adoption of a plan for increasing the effective head. This was done by substituting a 16-inch for the original 18-inch discharge pipe, and bolting over the outlet a blind flange bored with a 12-inch aperture. The resultant increase in friction and back pressure will approximate a head of 100 feet in an 18-inch discharge pipe.

The suction lift is approximately seven feet, and when the water in the chamber has been lowered so that the barge rests on the gate sill, the suction pipes will be led into openings of the lateral culverts beneath the chamber floor, so that the floor can be kept dry.

Power will be transmitted to the barge through flexible cables leading from the lock walls. A 10 to 1 transformer has been installed on the barge to raise the potential of the regular lock circuits, 220, to the 2,200 volts required by the motors.

The outfit has been completed and is now moored at the lower end of Gatun Locks, awaiting a test of operation which will be made shortly. The pumping units have a rated capacity of delivering 17,500 gallons per minute under the conditions for which they were built originally, and it is expected that in this service they will discharge at approximately their full capacity.

OFFICIAL CIRCULARS.

Deposit of Bonds to Secure Payment of Drafts.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., August 19, 1914.

CIRCULAR No. 685:

By virtue of authority vested in me under Section 8 of Executive Order No. 1917, dated April 16, 1914, regulations to govern the details of the acceptance, deposit, safekeeping, sale, or return of bonds to be held to secure the payment of drafts drawn on banks in the United States for conversion into cash in payment of tolls, bills for materials, supplies, harbor pilotage, towage, and other services, are prescribed, as follows:

Section 1. Bonds will be accepted in accordance with the terms and conditions of Section 5 of Executive Order No. 1917, dated April 16, 1914, which provides that

Unless, in the opinion of the Governor of The Panama Canal, payment in cash to the Collector of The Panama Canal is necessary for Canal purposes, drafts on banks in the United States under the supervision of the Comptroller of the Currency and otherwise satisfactory to the Governor of The Panama Canal, may be accepted for conversion into cash to effect payment of tolls and for bills for materials and supplies, repairs, harbor pilotage, towage, and other services, provided the payment of such drafts is secured by deposit of high grade bonds with the official of The Panama Canal designated by the Governor of The Panama Canal, under the following conditions:

Bonds will be acceptable only from steamship companies having frequent sailings through the Canal or from the agents of several vessels or steamship companies. The bonds deposited by any one agency or company shall be sufficient to cover the tolls on a minimum number of vessels, as fixed by the Governor of The Panama Canal. Bonds of the United States, the Philippines, Porto Rico, and the District of Columbia will be accepted at their par value. If otherwise satisfactory to the Governor of The Panama Canal, or his representative, bonds of the Hawaiian Territory, the Philippine Railway Company, and those of States, municipalities, and high grade railroads, such as are legal investments for savings banks in the States of New York, Massachusetts, Connecticut, or New Jersey, will be accepted at 90 per cent of their market value, but not exceeding 90 per cent of their par value.

The Governor of The Panama Canal may refuse to accept coupon bonds and may limit exchanges of bonds by depositors.

Section 2. The Assistant Auditor of The Panama Canal is hereby designated as the agent of the Governor of The Panama Canal to accept, safely keep, provide for exchanges and withdrawals, and account for bonds deposited by steamship companies, banks, or others acting as agents of steamship companies, to secure payment of drafts as provided for in Section 1 hereof.

In the event of the absence or inability of the Assistant Auditor to perform such duty, the chief clerk to the Assistant Auditor, or such other person as the Assistant Auditor may designate, is authorized to act as the agent of the Governor for the purposes specified above.

Any bond which the Assistant Auditor may be required to give, as provided for in Section 3 hereof, shall cover the acts of the chief clerk, or any other person designated to act for him.

Section 3. When requested to do so by any depositor, the Assistant Auditor of The Panama Canal shall be required to give a bond in such penal sum as may be requested, conditioned that he will faithfully perform the duties in connection with the acceptance, safekeeping, accounting for, and return of all bonds deposited with him to secure drafts, and that he will return to the owners of said bonds all such bonds deposited, as have not been destroyed by fire, or other casualty, or by burglary, or he is not required to sell, as hereinafter specified, and that he will faithfully account for and turn over to the persons entitled thereto all money received by him by virtue of the sale of any bonds placed on deposit under these regulations. Such bond shall be so conditioned as to cover the acts of the person acting as the agent of the Governor in the absence or inability of the Assistant Auditor, as provided for in Section 2 of these regulations. The depositor will be required to pay the premium on any bond which he may request the Assistant Auditor to give.

The Governor may require the Assistant Auditor to give bond to the United States in such amount as he deems advisable.

Section 4. The Panama Canal shall rent for the use of the Assistant Auditor at some convenient place in Washington, D. C., a safety deposit box or boxes, in which the bonds to be deposited under these regulations shall be kept. The conditions governing the use of such box shall be as specified in Section 10 of these regulations. Every depositor of bonds will be required to pay to The Panama Canal the sum of five dollars (\$5) per year for every fifteen thousand dollars (\$15,000) worth of bonds deposited, to be applied in payment of the rent

of such safety deposit box, and such other expenses as are incidental to the safekeeping of such bonds, provided that this payment may be increased or reduced as experience may require, in the discretion of the Governor.

Section 5. Steamship companies or their agents, or the agents of vessels, who desire to qualify, so as to have drafts accepted in payment of tolls and bills for material and services, shall make application to The Panama Canal, addressed to the Assistant Auditor in Washington, D. C., on a form to be provided for that purpose, to be allowed to deposit bonds to secure the payment of such drafts. The application shall give the names of vessels, their tonnage and about how frequently it is contemplated they will sail through the Panama Canal, or require supplies or services, the bank or banks in the United States on which it is proposed to have drafts drawn, the amount of drafts which such banks have agreed to accept, and a list of bonds it is proposed to deposit: *Provided, however,* That if the applicant desires to have drafts accepted for the payment of tolls on any vessel of designated lines, or for other charges against such vessels without reference to the list of vessels given, the application shall give the name and address of the agent or agents whose drafts will be accepted in payment of charges against vessels designated by such agent or agents.

Section 6. Upon receipt of the application required by Section 5 properly completed, from any steamship company or its agent, or agents of vessels authorized to qualify under Section 5 of Executive Order No. 1917, dated April 16, 1914, quoted in Section 1 hereof, the Assistant Auditor will inform such applicant of the initial amount of bonds or other securities which will be required. The minimum initial deposit of any applicant shall not be less than fifteen thousand dollars (\$15,000) worth of bonds when accepted at the values specified in Section 1 of these regulations, and more may be required if it should appear from the statements contained in the application that the amount of drafts drawn during a period of 30 days would probably be in excess of fifteen thousand dollars. Bonds or securities conforming to the requirements of Section 1 and in the amount specified in the notification of the Assistant Auditor of The Panama Canal, shall be forwarded to the Assistant Auditor of The Panama Canal, Washington, D. C. Either registered or coupon bonds, or both, will be accepted, unless notified to the contrary by the Assistant Auditor when the application is passed upon. The Assistant Auditor of The Panama Canal will dispose of maturing coupons covering interest accruing on bonds and other securities, as may be directed by the person, company, or corporation making the deposit.

Section 7. The Assistant Auditor shall determine, as a matter of fact and law, whether the bonds tendered for deposit conform to the requirements of Section 5 of Executive Order No. 1917, dated April 16, 1914, quoted in Section 1 of these regulations, and also whether such bonds have been properly registered or assigned. If the bonds are accepted, the Assistant Auditor shall issue receipt therefor, in quadruplicate one to be forwarded to the depositor, one to be placed in the safety deposit box with the bonds, one to be forwarded to the Auditor of The Panama Canal, and one to be retained by the Assistant Auditor.

When withdrawals or exchanges are made, as hereinafter provided, quadruplicate receipts shall be made and distributed as above provided. If the Assistant Auditor should hold that the bonds do not comply with the requirement of Executive Order No. 1917, dated April 16, 1914, they shall be retained, subject to the order and risk of the applicant for whose account they were tendered, and the applicant so notified.

Section 8. Immediately after the bonds have been accepted by the Assistant Auditor, he shall place them in the safety deposit box which The Panama Canal is required to rent under Section 4 of these regulations, and shall notify the applicant that his drafts will be accepted when drawn in accordance with the information given in the application submitted by him. A copy of the application, and of the notice of its acceptance, shall be sent to the Auditor of The Panama Canal, and one to the Collector of The Panama Canal. The depositor agrees not to have outstanding drafts at any time in excess of the acceptable value of the bonds on deposit.

Section 9. Bonds deposited may be withdrawn and other bonds substituted for them, provided that the bonds offered as substitutes comply with these regulations. The Governor shall have the right, however, to place limit on exchanges, if experience demonstrates that such action is necessary. Applications for changes in the list of vessels, and for the withdrawal or substitution of bonds, shall be made in the same manner and in accordance with the same rules that apply to original applications. The depositor shall not be allowed to reduce the amount of bonds on deposit, nor to close his account and withdraw all bonds without giving 30 days' notice of his intention to

close, and showing that all drafts drawn are paid: *Provided, however,* if the depositor can show that all drafts drawn are paid, and that the Auditor and Collector of The Panama Canal, and the banks on which drafts are to be drawn, have been notified of the intention to withdraw the bonds, the 30 days' notice provided herein may be waived.

Section 10. Bonds deposited under these regulations shall be kept in a safety deposit box rented for that purpose as specified in Section 4 hereof. Such box shall have a combination lock. The person, company, or corporation from whom the box is rented shall have a representative present whenever the box is opened by the Assistant Auditor. The box shall be opened only during the office hours of the person, company, or corporation from whom rented. The Assistant Auditor shall not remove any of the bonds from said box unless requested to do so by a depositor, except such as he may be authorized to sell, as hereinafter provided for.

Section 11. It is understood that all bonds deposited under these regulations, are deposited as security for the payment of drafts drawn by or for the depositor to be converted into lawful money for the payment of tolls or bills for material or services furnished by The Panama Canal, and for the payment on demand of the expenses provided for in these regulations and under Executive Order No. 1917, dated April 16, 1914. It is also understood that the face value of any draft drawn under these regulations and accepted by the Collector of The Panama Canal will be paid upon presentation at the bank upon which drawn, and that such bank shall pay said draft without any discount whatsoever, and that, if said draft is not paid in full when presented, the Assistant Auditor in whose possession the said bonds have been placed, shall have the right, with the approval of the Secretary of War, to withdraw said bonds from the safety deposit box, as provided for in Section 10 of these regulations, and sell them, or such part of them, as may be necessary to provide for the payment of said draft: *Provided, however,* That, where practicable, notice of the failure to pay a draft will be given and the steamship company, or its agent, will be allowed to deposit a sum equal to the draft to be applied in payment thereof. Care will be exercised in the sale of bonds to the best advantage, but The Panama Canal will not be responsible for losses which may result from a forced sale, inability to obtain the best prices, or other causes. The Assistant Auditor shall have the right to deliver bonds sold under these regulations to the purchaser and to do such other acts as may be necessary to confer title on the purchaser.

Section 12. The depositor guarantees that the statements contained in the application that he is required to make under Section 5 of these regulations are true. Such statements and these regulations shall constitute the conditions under which the bonds are to be accepted, held, and accounted for: *Provided, however,* that changes in these regulations may be made by the Governor of The Panama Canal. Such changes in the regulations shall become operative on depositors after notice thereof, and if the depositor is not satisfied with such changes he may withdraw his deposit under the conditions specified in Section 9 of these regulations.

Section 13. All correspondence in relation to the deposit of bonds under these regulations shall be carried on with the Assistant Auditor of The Panama Canal, and he shall render the initial decision of all questions. The Chief of the Washington Office of The Panama Canal, and the Governor of The Panama Canal, shall, however, have supervisory control over the Assistant Auditor, and questions in dispute between the Assistant Auditor and a depositor may, upon the application of the depositor, be decided by either of the above officers, and such decision, when rendered, shall be accepted as final and conclusive and given all the force and effect of the decision of an arbiter: *Provided, however,* that decisions made by the Chief of the Washington Office may, upon an application made within 30 days from the date of such decision, be reviewed by the Governor.

Section 14. The Panama Canal will accept for conversion into cash such drafts as may be drawn under these regulations and issue to the masters of vessels for which such drafts are drawn, such receipts and clearance papers as they would be entitled to if they had paid lawful money of the United States to The Panama Canal equal to the face value of such drafts, except that the receipts shall show that they were given for drafts to effect payment, identifying the drafts by number, and on what bank drawn, and, upon the payment of the drafts so accepted, such receipts shall become conclusive evidence of the payment of tolls or other bills for the amounts specified therein.

Section 15. The Collector of The Panama Canal will forward to the United States for collection, without delay, any drafts he may receive under these regulations.

Section 16. The Auditor of The Panama Canal may

require the depositor to make such reports of bonds deposited, drafts drawn and delivered to the Collector, as he may deem necessary. The Auditor shall examine or cause to be examined, the safety deposit boxes in which bonds are deposited as often as he may consider necessary to ascertain that the contents thereof are intact, and that all bonds received by the Assistant Auditor are accounted for.

GEO. W. GOETHALS,
Governor.

Notice to Mariners.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., August 28, 1914.

CIRCULAR No. 643-5:

1. Construction work on the east breakwater, Colon Harbor, has been carried to a distance of about 6,000 feet to seaward from its shore end, off Coco Solo Point, and is being extended at the rate of 64 feet per day. Its full length will be 11,235 feet, and when completed, the distance between its end and that of the west breakwater will be about three-eighths of a mile.

2. During the course of construction two fixed lights, one above the other, will be shown from the end of the breakwater; in addition, a black gas buoy showing a flashing white light, visible one second and eclipsed two seconds, will be moored off its seaward end and be shifted from time to time as the work progresses. Upon its completion, a structure similar to that at the end of the west breakwater, will be erected, showing a white light elevated 30 feet, visible eight miles, making a double flash in one second and then eclipsed one second. The buoy light will be visible for a distance of five miles.

GEO. W. GOETHALS,
Governor.

Launch Service.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., September 8, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:
Owing to the increased demand for launch service, and with a view of eliminating all unnecessary calls on the Division of Canal Transportation, I desire that you furnish this office at once a list of employes in your department or division who are authorized by you to request launch service without your specific approval in each instance. This statement should further specify whether the employe is authorized to request launch service outside of regular working hours, and on Sundays or holidays, and, if so, the character of the work requiring such service.

For the present, at least, the captains of the ports will furnish the head of each department or division a weekly statement showing the number of calls for launch service made by employes in his department or division, and the purpose for which the service was rendered.

GEO. W. GOETHALS,
Governor.

Task Work and Work by Contract.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., September 10, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:
In line with increased economy and efficiency, it is desired to perform all work as "Task work," or by contract, instead of by day's labor, where same will result in increased economy and efficiency or earlier completion. All heads of departments and divisions are required to submit a report to me not later than September 19, containing their recommendations formulated in line with this order.

GEO. W. GOETHALS,
Governor.

Charges for Launch Service.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., September 1, 1914.

CIRCULAR No. 686-1:
Effective September 1, 1914, the following charges will be made:

1. For launches of the *Birdena*, *Search*, and *Balboa* type—Seven dollars and fifty cents for the first hour, and \$5 for each hour or fraction thereafter.

2. For small gasoline launches—Five dollars for the first hour, and \$2.50 for each hour or fraction thereafter.

GEO. W. GOETHALS,
Governor.

Return of Material or Equipment to United States.

THE PANAMA CANAL,
THE PANAMA RAILROAD COMPANY,
EXECUTIVE OFFICE,
CULEBRA, C. Z., August 26, 1914.

CIRCULAR No. 687:
Hereafter, no material, supplies, instruments, ma-

chines, or equipment will be shipped to the United States to be disposed of, either in part payment for similar equipment, or by direct sale, before being acted upon by the Surveying Officer and approved survey obtained authorizing such shipment.

GEO. W. GOETHALS,
Governor, The Panama Canal.
President, The Panama Railroad Company.

Accountable Official.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,
BALBOA HEIGHTS, C. Z., September 14, 1914.

CIRCULAR No. 70:
Effective at once, Mr. J. F. Warner is designated an accountable official of The Panama Canal, and as such will account for all nonexpendable property in use in the new Administration Building, Balboa Heights.

Officials now accountable for property contained in that building will transfer same to Mr. Warner at once.

Approved:
GEO. W. GOETHALS,
Governor.

Acting Electrical Engineer.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., September 8, 1914.

All concerned—During the absence on leave of Capt. W. H. Rose, Electrical Engineer, and effective September 9, 1914, Mr. Hartley Rowe, Electrical Superintendent, will perform the duties of electrical engineer.

H. F. HODGES,
Engineer of Maintenance.

Lunch Room at Administration Building.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., September 10, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS IN THE ADMINISTRATION BUILDING:
Commencing at noon on Tuesday, September 15, 1914, there will be opened in the basement of the Administration Building, a lunch room, where light lunches, consisting of coffee, pie, sandwiches, etc., will be served at nominal prices between the hours of 12 noon and 1.30 p. m. Commissary and hotel coupons only will be accepted.

Tables and chairs will be provided for the use of the patrons of the lunch room and employes desiring to bring their own lunches with them. Employes will not be permitted to bring lunches to the offices, or any part of the building, excepting the basement.

C. A. MCLVAINE,
Executive Secretary.

Storage of Documents in New Administration Building.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., September 8, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS IN THE ADMINISTRATION BUILDING:
A section in the basement, next to the blueprinting room, has been set aside as a document room for the storage of extra copies of annual reports, Executive Orders, circulars, THE CANAL RECORD, Laws of the Canal Zone, Minutes of Commission meetings, hearings, and similar printed matter.

If you have any surplus copies of such publications, you should turn them over to the Record Bureau for storage, and if there are any you require for convenient reference in your office, you should note your needs on the bottom of this circular and return it to the Record Bureau.

C. A. MCLVAINE,
Executive Secretary.

Transfer of P. R. R. Steamship Ticket Office.

THE PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,
COLON, R. P., September 12, 1914.

CIRCULAR No. 446:
To all concerned—Effective September 16, 1914, the steamship ticket office will be transferred from the general office building to the Colon passenger station. Please notify all concerned accordingly.

C. H. MOTSETT,
Superintendent.

Billing Recovered P. C. and P. R. R. Material.

THE PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,
COLON, R. P., September 12, 1914.

CIRCULAR No. 445:
To all concerned—The following instructions will govern the billing of Panama Canal and Panama railroad material recovered and shipped to depot quartermaster and other departments and divisions:
MATERIAL RECOVERED FROM PANAMA CANAL TRACKS.
Material recovered from Panama Canal tracks and

shipped to the depot quartermaster at Mount Hope should be handled on Panama Canal billing.

Material recovered from Panama Canal tracks and shipped to departments and divisions of The Panama Canal to be handled on Panama Canal billing.

Material recovered from Panama Canal tracks and shipped to the Panama railroad should be handled on company billing.

MATERIAL RECOVERED FROM PANAMA RAILROAD TRACKS.
Material recovered from Panama railroad tracks and shipped to the depot quartermaster at Mount Hope should be handled on company billing.

Material recovered from Panama railroad tracks and shipped to departments or divisions of the Panama railroad should be handled on company billing.

Material recovered from Panama railroad tracks and shipped to divisions or departments of The Panama Canal should be handled on Panama Canal billing.

Please be governed accordingly in the handling of these shipments.

C. H. MOTSETT,
Superintendent.

Examinations by Board of Local Inspectors.

THE PANAMA CANAL,
BOARD OF LOCAL INSPECTORS,
ANCON, C. Z., September 14, 1914.

The Board of Local Inspectors will conduct examinations at the administration building, Ancon, on Wednesday, September 23, 1914, beginning promptly at 2 p. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators, of motor boats. All applicants for licenses must procure from the office of the board, Ancon, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles, with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday the day previous to the regular examination, at 2 p. m., at the administration building, Ancon; on Wednesday, the day of the regular examination, at 2 p. m., at the administration building, Ancon.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. The test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa, at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be at the Panama railroad station at the hour abovementioned.

By direction of the chairman of the board,
W. H. HYDE,
Clerk to the Board.

CANAL CLUBHOUSES.

Activities of the Young Men's Christian Association.

COROZAL.

High scores in bowling for the last two weeks were made by the following: Tenpins—Terittier, 204, 259; Davis, 201; White, 204, 202, 213, 236; Hanna, 212, 203; Koontz, 205, 220; Moore, 201. Duckpins—Kyte, 122; Richardson, 106; Ryan, 100, 101, 104, 107; Gustavson, 104, 107, 101, 100; Davis, 101, 103, 116, 114, 103; Gill, 104; Orr, 104; Parkis, 114, 100, 106; Sommers, 103; Fischer, 100, 103; Seeley, 104; Moore, 118; Ruggles, 107.

Corozal defeated the Cristobal tenpin bowlers on the local alleys on Saturday night, in three games.

Much interest is shown in the way the men turn out for basketball. Company M of the Tenth Infantry decided to remain neutral and withdrew from the league before playing their first game. Another team, calling themselves the "Japs," have entered the contest. The team lineups were as follows:

"Germans"—M. H. Dougherty, Howe, Hartshorne, Roberts, Territtier, Souder, Russell.

"French"—Whiston, Violette, Conant, Mitchell, Hutchings, Cautners, Gerchow.

"English"—Bessey, Plank, Morrison, E. Dwelle, Parkis, Ridge, Brehmey.

"Russians"—Owens, Sims, Huldquist, Koontz, Otis, Ross, Sommers.

"Japs"—Garlington, Sawyer, Clagus, Gow, Kuntz.

The standing, including Thursday evening's games, is, as follows:

Table with 4 columns: Team, Won, Lost, P. C. Rows include French, English, German, Japs, Russians.

There will be special music, piano, violin, and drum, with the regular moving pictures, on Friday evening of this week.

Corozal won two games of basketball from Cristobal on Saturday evening, September 12 by the scores of 46 to 13, and 27 to 7.

Cristobal (first team)—Mathues, Burgoon, Fraser, Strong, Roberts, Cousineau, Hulsebasch.

Corozal (first team)—Whiston, Sawyer, Huldquist, Plank, Conant, Bartholomew.

Cristobal (second team)—Neeson, Anderson, Fraser, Cousineau, Hulsebasch, Roberts, Mathues.

Corozal (second team)—Bessey, Dougherty, Morrison, Violette, Conant, Howe.

PEDRO MIGUEL.

A married folks' duckpin tournament was held on Thursday evening, September 9. The results were, as follows:

High double total for three games—Mr. and Mrs. Bartlett, 504.

High ladies' score—Mrs. Anderson, 89.

High men's score—Mr. Bartlett, 98.

Pennants will be given as prizes.

High duckpin scores for the week ending September 12 were, as follows: Davis, 103, 103, 100; Anderson, 101; Hodges, 101, Reddinger, 104.

High rubber band scores were: Holloway, 104; Whiston, 105. High score in tenpins was made by Ottell, 210.

The local pool tournament ended in a tie between Mr. Eggleston and Mr. Edwards, both winning 13 and losing two games. The tie will be played off in a short time.

GATUN.

An interesting bowling tournament was held on Friday evening, September 11. The piano was placed in one corner of the room and Mrs. E. T. Gilbert played during the evening. The ten highest scores were:

Table with 2 columns: Name, Score. Rows include Mrs. W. Tricker, Mrs. J. Walsh, Mrs. M. Conley, Mrs. F. Easter.

Table with 2 columns: Name, Score. Rows include Mrs. M. Conley, Mrs. W. Tricker, Mrs. J. Walsh, Mrs. J. Walsh and Mr. F. G. Smith, Mr. and Mrs. M. Conley, Mrs. M. Conley and Mr. F. G. Smith.

The Pedro Miguel boys visited Gatun on Saturday, September 12. A basketball game was won by Gatun, by a score of 13 to 5. The result of the baseball game was Gatun, 12; Pedro Miguel, 9. Pedro Miguel took two out of three games in duckpins.

CRISTOBAL.

Mr. Henry won a box of cigars for high average in the local ragtime tournament, held on Wednesday, September 9. Mr. Russell was second, and Mr. Nash, third.

Cristobal took all three games from Corozal in duckpins on Saturday, September 12. Scores follow:

Table with 4 columns: Name, Score. Rows include Pinney, Drew, Gibson, Smith, Henry, Orr, Moore, Gill, Parkis, Ryan.

Total... 454 452 483 432 411 400

The Cristobal ladies lost two out of three games of duckpins to the Gatun ladies on Wednesday, September 9.

High scores for week were, as follows: Tenpins—Collins, 213. Duckpins—Henry, 117; Buser, 112; Bevington, 103; Steele, 103.

The single folks' tournament will be held on Monday, evening, September 28.

In the local basketball tournament, the "Senators" defeated the "Yaokees" by 37 to 14 on Tuesday, September 8.

Corozal will send two basketball teams to Cristobal on Saturday, September 26, to play the Cristobal teams.

Knights of Columbus.

CRISTOBAL, C. Z., September 16, 1914.

A change of meeting place is announced for next Sunday's meeting of Nombre de Dios Assembly, Fourth Degree, to La Salle College, adjoining San Francisco Church and the National Theatre.

A. P. E. DOYLE, Master.

Family Quarters.

Applications for married quarters on file on August 31, were as follows:

Table with 3 columns: District, List No. 1, List No. 2. Rows include Ancon, Ancon Hospital, Corozal, Paraiso, Gatun, Cristobal.

NOTE—The figures in parentheses show the number of applicants already occupying regular or nonhouse-keeping family quarters at stations other than those at which applications are filed.

Movements of Vessels at Port of Balboa.

The arrivals and departure of steamships, with port of call at Balboa, during the week ending at 8 a. m., September 12, were, as follows:

Arrivals—September 6, Newport, from San Francisco; Quilpué, from Guayaquil; September 8, Limari, from Valparaiso; September 9, Pachitea, from Callao; September 11, Iglos (whaler) from South Pacific.

Departures—September 5, Manavi, to Tumaco; September 6, San José, to San Francisco; September 7, Huallaga, and Guatemala, to Callao.

Vessels through the Canal.

The following vessels passed through the Canal during the week ending September 12:

SOUTHBOUND.

Table with 5 columns: Date, Vessel, Line, From, To. Rows include Sept. 7, 10, 16.

NORTHBOUND.

Table with 5 columns: Date, Vessel, Line, From, To. Rows include Sept. 6, 7, 9, 11, 12.

MOVEMENTS OF OCEAN VESSELS.

The following is a list of sailings and scheduled arrivals of the Panama Railroad Steamship Line; of the Royal Mail Steam Packet Company; of the Hamburg-American Line, and the United Fruit Company's Line.

NEW YORK TO CRISTOBAL.

Table with 3 columns: Vessel, Sails, Arrives. Rows include Advance, Panama, Allianca, Colon, etc.

CRISTOBAL TO NEW YORK.

Table with 3 columns: Vessel, Sails, Arrives. Rows include Colon, Advance, Panama, Allianca, Colon, etc.

NEW YORK TO COLON.

Table with 3 columns: Vessel, Sails, Arrives. Rows include Metapa, Oruba, Zacapa, Almirante, Trent, Santa Marta, Metapan, Orotava, Zacapa, Almirante, Danube, Santa Marta, Metapan, Tagus, Zacapa, etc.

COLON TO NEW YORK.

Table with 3 columns: Vessel, Sails, Arrives. Rows include Santa Marta, Metapa, Orotava, Zacapa, Almirante, Danube, Santa Marta, Metapan, Tagus, Zacapa, Almirante, Essequibo, Santa Marta, Metapan, Oruba, etc.

NEW ORLEANS TO COLON.

Table with 3 columns: Vessel, Sails, Arrives. Rows include Heredia, Atenas, Cartago, Turrialba, Heredia, Abangarez, Parismina, Atenas, Cartago, Turrialba, etc.

COLON TO NEW ORLEANS.

Table with 3 columns: Vessel, Sails, Arrives. Rows include Abangarez, Parismina, Atenas, Cartago, Turrialba, Heredia, Abangarez, Parismina, etc.

*Will carry mail from the United States. †Will carry mail to the United States. ‡Will carry mail for Alabama, Arkansas, Louisiana, Mississippi, and Texas.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending September 26, 1914:

Table with 6 columns: Date, Low, High, Low, High, Low. Rows include Sept. 20, 21, 22, 23, 24, 25, 26.

75th meridian time.

Balboa, Canal Zone,
Isthmus of Panama.

No communication either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Canal Earnings in August Nearly \$100,000.

Canal revenues for the month of August amounted to \$91,664.55, the greater part of which sum was received after August 15, the date the Canal was officially opened to commerce. The earnings in detail were, as follows:

PORT OF CRISTOBAL.	
Tolls collected.....	\$41,910.20
Pilotage.....	2,144.00
Total.....	\$44,054.20
PORT OF BALBOA.	
Tolls collected.....	\$46,491.60
Pilotage.....	1,085.00
Launch service.....	33.75
Total.....	\$47,610.35

The first receipts from the use of the Canal were reported in May, and consisted principally of tolls collected from freight transhipped at Balboa and taken through to Cristobal on Panama railroad barges, in order to relieve the congestion at that time existing on the railroad. The records show that there was but little difference in the cost of handling by this plan than over the railroad, but the barge service accomplished the purpose in taking care of the heavy cargoes of sugar and other commodities brought to Balboa during this period. The total earnings of the Canal to September 1, from tolls, pilotage, etc., by months is, as follows:

PORT OF CRISTOBAL.	
May.....	\$3,214.92
June.....	4,518.16
July.....	4,210.00
August.....	44,054.20
Total.....	\$55,997.28
PORT OF BALBOA.	
May.....	4,141.20
June.....	5,360.80
July.....	5,020.40
August.....	47,610.35
Total.....	\$62,131.75
Grand total.....	\$118,129.03

New Quarantine House for Steerage Passengers at Colon.

Building No. 14 of Colon Hospital, formerly a ward for male negro patients, is being remodeled for use as a quarantine detention

house for steerage passengers. This is a large building, tile roofed, near the east end of the area of ward buildings and adjoining the area devoted to residences and the former nurses' quarters. The nurses' quarters are being made into a detention house for cabin passengers, and the quarantine reservation will include it and building No. 14 at its eastern and western limits, respectively. The entire reservation is to be fenced off. The old detention house beyond the radio station will be abandoned, and its site will probably be included in the Naval reservation.

In the remodeling of building No. 14, the principal part of it will be devoted to male passengers, a wing being partitioned off for women, with a further subdivision for white women. The mess will be in the wing adjoining the women's section. Standee bunks to the number of about 350 will be erected in the several sections. It is expected that the building will be ready for occupancy in the early part of October.

Floating Cranes Nearing Completion.

Fire was started under the boilers of the new floating crane *Ajax* on Monday, September 21, and tests will be made on the machinery. These will include running the spindle carriage up and down, revolving the various drums, and slewing the bell around. On September 25, the *Ajax* is to be towed to Gatun Locks and placed in the middle chamber of the east flight for the attachment of the jib, which has been erected on the east backfill; this work will require about eight days.

The work of removing the forms for the concrete of the counterweight of the *Ajax* was begun on Tuesday, September 15, and the same forms are now being erected on the *Hercules*. The counterweights weigh about 150 tons, and are made of concrete, containing about 45 tons of scrap iron. The mass as mixed weighs about 164 pounds to the cubic yard. The mass concrete placed in the locks weighed approximately two tons to the cubic yard.

United Fruit Company's Steamers Transferred to American Registry.

The United Fruit Company's steamers *Cartago* from New Orleans, and *Zacapa* from New York, arrived at Colon on Wednesday, September 23, flying the American flag for the first time. The total number of vessels in the United Fruit Company's freight and passenger services is 90, with an aggregate gross tonnage of 248,607, and of this number, 25, comprising the "Great white fleet" will be transferred to American register under the new law. The first of the United Fruit Company's ships to change its registry at New Orleans was the *Marrowijne*, one of the three steamers purchased two years, or more, ago from the Royal Dutch West India Company. The flag raising was made the occasion of a celebration by the New Orleans

business men, under the auspices of the merchant marine committee of the Association of Commerce. The first ship under the new registry, out of New York, was the *Zacapa* abovementioned. The United Fruit Company's vessels were built in Great Britain, and registered at Glasgow. Under the American flag, their home ports will be New York and New Orleans. The *Cartago*, which has the honor of being the first of the United Fruit Company's vessels in the New Orleans-Colon service to fly the American flag, was the first ship of the company's modern fleet to enter the port of Colon. This occurred in 1908.

Other companies that have so far applied for American registry include the United States Steel Products Company, operating nine vessels, and the Robert Dollar Steamship Line.

Status of Steamship Passengers Going Through the Canal.

The Superintendent of Canal Transportation has defined the status of steamship passengers going through the Canal, as covered by Article 13 of the Rules and Regulations for the operation and navigation of the Panama Canal, which reads, as follows:

Article 13. Pilotage for vessels in transit through the Canal will be free, nor will they be charged pilotage for entering or leaving a terminal port, when it is for the sole purpose of passing through the Canal, but should any such vessel while in Canal waters, discharge or receive freight or passengers, or take on board supplies, provisions, stores, or fuel, or remain for the purpose of effecting repairs, or make either terminal a port of call, she may be liable for entrance or departure pilotage, as the Canal authorities may direct.

This section, he explains, was introduced into the Rules and Regulations to cover instances where a ship uses the terminal ports to take on new passengers, or permanently lands others whose voyage is completed so far as this ship is concerned, in either of which cases, the ship will be liable for pilot dues the same as if it had taken on or discharged freight. When passengers are booked for a continuous voyage on a vessel which will pass through the Canal, and which may be detained for the convenience of the Canal authorities for making measurements, or other purposes, there can be no objection whatever to passengers landing, nor should there be any pilot charges under these conditions.

Arrival of Coast Artillerymen.

Three companies of the Coast Artillery Corps, the 21st from Fort Howard, near Baltimore, the 45th from Fort Dupont, near Wilmington, Del., and the 144th, from Fort Moultrie, near Charleston, S. C., arrived on the Isthmus on the United States transport *Kilpatrick* on Friday, September 18. The *Kilpatrick* left Charleston on September 11, and the voyage down was all that could be desired. The 21st company, which has been assigned to Fort Sherman on Toro Point, is temporarily quartered in building No. 2 on Cristobal Point. The commissioned officers

of the company are Capt. Wade H. Carpenter, who has not yet arrived, First Lieut. Raphael R. Nix, temporarily in command, and Second Lieut. Austin McC. McDonald. The 45th and 144th companies will be quartered for the next few days in the old Panama Canal type houses at Empire. They have been assigned to Fort Amador, at the Pacific entrance, and will be transferred to that point and go into permanent barracks probably next week. The barracks are expected to be completed ready to turn over on Monday, September 28. The commissioned officers of the 45th company are: Capt. Chas. E. T. Lull, who has not yet joined his company; First Lieut. Robert C. Eddy, temporarily in command, and Second Lieut. Homer A. Bagg. The commissioned officers of the 144th company are: Capt. John M. Dunn; First Lieut. Marcel S. Keene, and Second Lieut. Bert S. Dubois. The present strength of the three companies are, as follows: 21st, 100 men; 45th, 107 men; 144th, 105 men. The number of companies of Coast Artillery Corps now on the Isthmus is six; six more companies are due to arrive at some future date. The *Kilpatrick*, which brought the Tenth Infantry to the Isthmus in 1911, left Cristobal on September 19 for Vera Cruz to transport home the troops which have been on active duty there.

Tramway Improvements.

The Panama Tramways Company has been authorized to double track its line in the Canal Zone from the boundary at Chorrillo to the terminus of the present double track line at the foot of the hill near East Balboa. The additional construction was decided on partly as a measure of safety, and partly to avoid the delay passengers are sometimes subjected to in waiting at the top of the hill at East Balboa until the car from the opposite direction comes up. The danger in the single track line at this point is of a car on the present double track line getting away from the motorman while going down the hill and colliding with a car coming from the opposite direction on the single track. In addition, double tracking the line as above described will allow for a 5-minute service, instead of a 7-minute service as at present. The company has also arranged to build a shelter for the convenience of passengers near the boundary at Chorrillo. The above work will be started as soon as the material arrives from the United States.

Canal Excavation in August.

The grand total of Canal excavation to September 1, 1914, was 225,248,058 cubic yards, leaving 13,597,529 cubic yards remaining to be excavated according to the revised estimate of August 1, 1914.

The total excavation in August was 1,174,695 cubic yards, as compared with 964,994 cubic yards in July. Of this amount, dredges removed all but 144,343 cubic yards, taking out 423,558 cubic yards from the Culebra Cut section, as compared with 431,634 cubic yards for the previous month. The dry excavation amounted to 69,904 cubic yards, and was confined entirely to operations at the terminal sites. Hydraulic work in the rear of Gold Hill resulted in the removal of about 75,000 cubic yards, a considerable increase over the month of July.

The detailed figures of excavation, by

sections, and a statement of concrete placed in the locks, follow:

ATLANTIC SECTION.

Mean rainfall along Canal (nine stations), 10.04 inches.

By "Work" excavation is meant excavation actually made for one of the constituent parts of the Canal, such as prism, diversions, locks, etc.; that is, it represents material taken from the area to be occupied by

the Canal and constitutes excavation useful for the completed Canal.

By "Plant" excavation is meant excavation outside any of the constituent parts of the Canal, such as prism, diversions, locks, etc. It includes material necessary to be excavated for construction purposes only, and is chargeable against the particular plant item for which it is performed, such as prism, diversions, locks, etc.

Joint Land Commission Resumes Business.

The Joint Land Commission resumed its sessions on Friday morning September 18 after an interruption of two months caused by the death of the Hon. David Marks on July 17, and following upon the arrival on the Isthmus of the Hon. Nicholas Cornet, the second American member of the commission. The commission set aside Monday, Tuesday, and Wednesday of this week for the purpose of giving hearings to the reargument, by the attorneys representing the United States and the claimants, of certain claims which were accorded public hearings in June, but, owing to the death of Commissioner Marks, were not finally disposed of. This action was taken in order to familiarize the new commissioner with the cases upon which he, with the other members of the commission, will be called upon to render decision.

The following is a calendar of cases set for hearing by the Joint Land Commission for the week ending October 3, 1914, at its offices in house No. 114, Ancon: MONDAY, SEPTEMBER 28.

<i>Docket No.</i>	<i>Claimant.</i>	<i>Docket No.</i>	<i>Claimant.</i>

The estates of these deceased or insane employees of the Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against these estates, or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

SOCIAL LIFE OF THE ZONE.

Postponement of Women's Club Reception

The annual reception of the Cristobal Woman's Club, which was to have been held in the Government clubhouse on Wednesday afternoon, September 30, has been postponed, owing to the absence of the newly elected president, Mrs. Charles A. Hearne, from the Isthmus. Mrs. Hearne is expected to arrive in Colon about October 1, and the reception will be held on the Wednesday following, October 7. Commander Dismukes will deliver an address. The program for the year has been completed and will be published as soon as it is approved by the president.

Church Notes.

The Rev. William C. Flammer, the new pastor of the Union Church of the Canal Zone, preached his first sermon on the Isthmus in the Union Church, Cristobal, on Sunday evening, September 20. He attended the session of the Sunday school and the Christian Endeavor society on the same day.

The Ladies Aid Society will give a reception to the pastor and his family at the home of the president, Mrs. S. P. Verner, Colon Beach, on Thursday afternoon, September 24.

The Reverend Mr. Flammer will preach in the recreation hall of the Government clubhouse in Balboa, on Sunday morning, September 27, at 11 o'clock.

There will be a meeting of the executive board of the Union Church of the Canal Zone in the Government clubhouse, Pedro Miguel, on Sunday afternoon, September 27. The pastor of the church will be present, and the itinerary of his work and services will be arranged.

The Isthmian Sunday School Association will hold its quarterly meeting on Sunday, October 11. The place of the convention will be announced later.

Hebrew Services, Colon.

Divine service will be conducted at our synagogue on Third street and Broadway, on the approaching Day of Atonement, as follows: Tuesday evening, September 29, at 6.30; Wednesday morning, September 30, at 8.30.

H. J. HENRIQUEZ, *Secretary.*

COLON, R. P., September 16, 1914.

PERSONAL.

The Hon. Nicholas Cornet, who has been appointed to succeed the late David Marks as one of the American members on the Joint Land Commission, arrived on the Isthmus on the *Ancon*, on Thursday, September 17, accompanied by the Hon. Levi Monroe Kagy, the other American member of the commission, who has been making a short visit to his home in the United States. Judge Cornet was born at Treves, Germany, in 1857, of American parents. He is a resident of Lawrenceburg, Ind., has practiced law there for 25 years, and was at one time attorney for the Baltimore and Ohio Railroad. He also served one term of six years as judge of the Ripley County Circuit Court. He received his appointment on the Joint Land Commission at Venice, while traveling with his family in Europe, and returned to the United States on the first vessel available.

Capt. Frank O. Whitlock, accompanied by Mrs. Whitlock and their two children, sailed

for New York on Tuesday, September 22. Captain Whitlock has been assigned to service with the Twelfth Cavalry, by special orders dated September 2, 1914, and his resignation from The Panama Canal service will be effective October 1. He was born in Cedar Rapids, Iowa, in 1879, entered the United States Military Academy in June, 1896, was appointed second lieutenant of cavalry in June, 1900, first lieutenant in February, 1901, and captain on March 3, 1911. He was on detached service at the Military Academy from August 15, 1903, until June 24, 1905, when he was transferred to the Isthmus, reporting for duty as Assistant General Quartermaster on July 12. After the arrival of Mr. Stevens, the General Quartermaster, Captain King, was relieved from duty, and Captain Whitlock applied for transfer to his former post of duty at West Point, and returned there in August, 1905. He was again assigned to Canal duty on October 1, 1908, as Assistant Subsistence Officer. He was appointed Subsistence Officer on February 25, 1914, vice Lieut.-Col. E. T. Wilson, resigned, and held this post until the consolidation of the Supply Department, when he was made Assistant Chief Quartermaster of The Panama Canal.

Mr. F. M. M. Richardson, who has been appointed Superintendent of Clubhouses to succeed Mr. A. B. Dickson, resigned, arrived on the Isthmus on September 15. He is a native of Louisville, Ky., and a graduate of the University of Tennessee. He entered the service of the Young Men's Christian Association as educational secretary of the industrial department of that association at Wilmerding, Pa., where the Westinghouse air brake factory is situated. Since 1909, he has been traveling secretary for the railroad department of the International Committee of the Y. M. C. A. His special work has been the promotion of educational activities among railroad associations, and the organization and development of educational features for various railroad companies which maintain apprentice schools for employes, among these being the St. Louis Southwestern, the Delaware, Lackawanna and Western, and the Baltimore and Ohio railway systems; and the schools for engineers on the Cotton Belt route and the Wabash. Mr. Richardson will assume his duties as head of the system of clubhouses in the Canal Zone on September 27.

Missing Men.

Any one having knowledge of the whereabouts of Barton Murphy, formerly of Mattoon, Ill., and of Mathew Garard, both of whom are supposed to be on the Isthmus, is requested to communicate with the American Minister, Panama city.

Metal Trades Council.

The next regular meeting of the metal trades council of Panama will be held in the Balboa clubhouse on Sunday, September 27, at 1.30 p. m. There will be business of importance.

BALBOA, C. Z., September 21, 1914.

H. A. S. LEVERING, *Secretary.*

Married.

HUGHES-PENDLETON—At the residence of Mr. C. A. McIvaine, Culebra, on August 29, Miss Florence Pendleton of New York City, to Mr. Joseph E. Hughes of Phoenixville, Pa., the Rev. Henry R. Carson officiating. Canal Zone residence. Ancon.

A PROCLAMATION.

President Fixes October 4 to Pray for Return of Peace in Europe.

Whereas great nations of the world have taken up arms against one another and war now draws millions of men into battle whom the counsel of statesmen have not been able to save from the terrible sacrifice; and

Whereas in this, as in all things, it is our privilege and duty to seek counsel and succor of Almighty God, humbling ourselves before Him, confessing our weakness and our lack of any wisdom equal to these things; and

Whereas it is the especial wish and longing of the people of the United States in prayer and counsel and all friendliness to serve the cause of peace;

Therefore, I, Woodrow Wilson, President of the United States of America, do designate Sunday, the fourth day of October next, a day of prayer and supplication, and do request all God fearing persons to repair on that day to their places of worship, there to unite their petitions to Almighty God, that, overruling the counsel of men, setting straight the things they cannot govern or alter, taking pity on the nations now in the throes of conflict, in His mercy and goodness showing a way where men can see none, He vouchsafe His children healing peace again and restore once more that concord among men and nations without which there can be neither happiness nor true friendship, nor any wholesome fruit of toil or thought in the world; praying also to this end that He forgive us our sins, our ignorance of His holy will, our wilfulness and many errors, and lead us in the paths of obedience to places of vision and to thoughts and counsels that purge and make wise.

In witness whereof I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the City of Washington, this eighth day of September, in the year of our Lord one thousand nine hundred and fourteen, and of the independence of the United States of America the one hundred and thirtieth.

WOODROW WILSON.

By the President:

W. J. BRYAN,

Secretary of State.

Physical Examination of Hotel and Mess Employes.

The Health Department has completed a physical examination of all men working in the Government hotels and messes in whom the presence of communicable disease would constitute a menace to the health of patrons. In addition to bodily examination for tuberculosis, venereal and blood diseases, etc., tests of stools and urine were made to determine the presence of typhoid, paratyphoid, and dysentery. One typhoid carrier was found in the person of a waiter in a silver mess at Corozal, and he was discharged and deported. Several other employes at different messes were discharged for unclean habits, but, in general, the sanitary condition of the personnel was found to be highly satisfactory. These examinations will be repeated from time to time, and all new men employed in the hotel and mess service will be subjected to similar examination.

The new Ford automobile, recently purchased for the Health Department of Panama, has been placed in service.

TERMINAL COALING PLANTS.

Progress of Work on Permanent Storage and Handling Plants at Canal Entrances.

In the construction of the permanent Atlantic entrance coaling station, situated at the north end of Mindi Island, across the French canal from Cristobal, the area for the dry storage has been filled to its final elevation of two feet above sealevel, the concrete walls along the sides of this area have been practically completed, and work is advancing toward the north, or sea end of the plant, which will contain the subaqueous storage; and on the construction of the wharves which will enclose the storage spaces and carry the moving and stationary coal handling machinery.

It was planned at first to make the storage area 1,000 feet long, but in consequence of greater demand for storage space by coaling companies its length was increased to 1,700 feet by an extension of 700 feet to the south. The width of the storage has been increased from 250 feet to 310 feet. The total storage now provided for at this plant is 485,000 tons; the original plans were for 300,000 tons.

Forty 6-foot steel cylinder caissons have been set for the unloader wharf, but none of them have yet been sunk to rock; for the reloader wharf, 90 caissons have been set and 35 have been driven to rock and excavated. It has been found feasible to drive the cylinders to rock with a steamhammer, through from 30 to 65 feet of material, and afterward to do practically all the excavation by orange peel buckets. Both wharves will extend a distance of 1,170 feet from the initial station at the sea end of the plant, and will be connected there by an end wharf. The reloader wharf will be on the west side, toward the Canal, and the unloader wharf will be on the east side, toward Cristobal.

Pipeline suction dredge No. 83 is dredging to 28 feet below sealevel the area to be occupied by the subaqueous coal storage. The spoil is being used to back fill west wall, which area, when completed, will be used for storage of material. At this time, the material excavated is almost entirely coral rock and sand. Later, the dredge will proceed to the excavation of the berths alongside the wharves, which will be dredged to a depth of 41 feet for a distance of 1,065 feet. On the east, or Cristobal side, the channel will be 500 feet wide, including practically the width of the French canal; on the west side, along the reloader wharf, the berth will be not less than 250 feet wide.

The construction of the smaller coaling plant for the Pacific terminus is being carried out on different lines. The site of the plant is directly to the south of the entrance to dry dock No. 1. The unloader wharf will form a seawall along the south side of the entrance, and the excavation for the entrance will thus provide the slip alongside the wharf. The reloader wharf will extend from the outer end of the unloader wharf at an angle of 48° 7', toward the land end of the present Panama railroad pier at Balboa. The storage pile will lie parallel to and south of the unloader wharf. The Atlantic plant will be in effect a pier, with berthing places on both sides, the coal being stored within the pier; the Pacific plant will be in effect a continuous wharf, with an angle, the vessels berthing only along the front of the wharf, with the coal storage space in the rear.

The subaqueous storage will lie to the rear of the center of the unloader wharf, and will be covered by a dry storage, which will extend beyond it on either side. The storage will have a width of 350 feet. The subaqueous storage will be 300 feet long, with its bottom 18 feet below mean tide. The total length of storage will be 800 feet, and the bottom of the dry storage will be at 10 feet above sealevel. The total storage space will accommodate 215,000 tons, of which 50,000 tons may be stored under water.

As the site of the coaling plant adjoins that of the entrance to the dry dock, most of the excavation required has been accomplished in the dry in connection with the dry dock excavation. The storage basins have thus been completely excavated, with the exception of the southeast corner, which is now occupied by tracks of the Panama railroad, and the berth along the greater part of the unloader wharf has been excavated as a part of the entrance to the dry dock. The part of the entrance which has been excavated and the site of the dry dock are protected by a cofferdam, which will be removed by dredges when the dry dock is nearly completed. The dredges will complete the entrance basin and in so doing will dredge the slip alongside the reloader wharf.

Retaining walls have been built along the south and east sides of the storage spaces. That on the south side is of riprap, and that on the east side is of concrete.

Concrete is now being placed for the piers which will support the unloader wharf, and work is in progress on about two-thirds of them. Supports for the cantilever cranes, which will command the storage areas, have been built across the east dry area, and pier supports have been placed in the middle, or subaqueous area. Piles are being driven for supports for the south track of the crane runway across the west area; supports for the north runway over this area will be built on rock fill, which is now being dumped.

No work has been done on the reloader wharf. This will be supported on 6-foot steel cylinder caissons, sunk to rock and filled with concrete, similar to the caissons which will

support both unloader and reloader wharves of the Atlantic coaling plant.

Contracts for the operating machinery for the two plants were entered into on August 19, 1913. To date, none of the material has been delivered on the Isthmus. The machinery for the Atlantic plant will be all new. For the Pacific plant, the unloading and re-loading towers and the conveying system will be new, but a part of the handling machinery will consist of four double cantilever cranes which were used in building the Pacific locks of the Canal and will be reconstructed for this service.

More Offices Moved.

The offices of the Superintendent of Canal Transportation, and of the Chief Health Officer, and Chief Quarantine Officer, formerly in the old administration building, Ancon, were moved on Friday and Saturday, September 18 and 19, into the Administration Building at Balboa Heights. The Ancon building now contains only the offices of the Special Attorney, the legal department, and the branch pay office. The accounting department of the commissary branch of the Supply Department at Cristobal was moved to Balboa last week also.

Society of the Chagres.

To the members of the Society of the Chagres: The attention of members of the Society of the Chagres is invited to Article 16 of the Constitution reading, as follows:

"Any 10 members may nominate a fellow-member for election to any office of the society. All such nominations must be submitted to the secretary-treasurer in writing not later than October 31. As soon thereafter as possible, but in any event not later than November 15, the secretary-treasurer shall prepare and mail to each member of this society a ballot containing names of all candidates nominated for each office. At the annual meeting of the society, the vote cast by letter ballot shall be canvassed and those candidates receiving a plurality of the votes shall be declared elected."

Under the foregoing article nominations are in order for president, vice-president, secretary-treasurer, and four members of the executive committee.

JOHN K. BAXTER,
Secretary-Treasurer.

CANAL EXCAVATION TO SEPTEMBER 1, 1914.

EXECUTIVE ORDER

To Amend the "Rules and Regulations for the Operation and Navigation of the Panama Canal, Etc."

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

I. Rule No. 2 of the "Rules and regulations for the operation and navigation of The Panama Canal, and approaches thereto, including all waters under its jurisdiction," dated July 9, 1914, is hereby amended so as to read, as follows:

2. Any person violating any of the provisions of the rules and regulations, established hereunder, shall be deemed guilty of a misdemeanor and, upon conviction thereof, shall be punished by a fine not to exceed five hundred dollars (\$500), or by imprisonment not to exceed six months, or by both such fine and imprisonment, at the discretion of the court.

II. This Order shall take effect from and after this date.

WOODROW WILSON.

THE WHITE HOUSE,

September 3, 1914.

[No. 2037.]

EXECUTIVE ORDER.

By direction of the President, it is ordered:

That Nicholas Cornet, who has been appointed a member of the Joint Commission for the appraisalment and settlement of damages to property in the Canal Zone, in accordance with the provisions of Articles VI and XV of the Convention between the United States and Panama, concluded November 18, 1903, be allowed twenty-five (\$25) dollars per day for his services, including all expenses, from the time of his sailing from New York until his return thither; provided, that he shall be granted free transportation on the Panama Railroad Steamship Line from New York to the Isthmus and return, free transportation over the Panama railroad, and such other transportation as may be necessary when traveling on official business on the Isthmus; he shall also be allowed the ordinary privileges of Government employes on the Isthmus, including employes' rates at the hotels of The Panama Canal or the Panama Railroad Company on the Isthmus.

LINDLEY M. GARRISON,
Secretary of War.

WAR DEPARTMENT,
Washington, D. C.,

September 8, 1914.

Spanish War Veterans and Veterans of Foreign Service.

A joint meeting of Chagres Camp, No. 1, United Spanish War Veterans, and Post No. 40, American Veterans of Foreign Service, will be held in the Moose hall, on Central avenue, Panama, on Saturday evening, September 26, beginning at 8 o'clock.

O. J. RICE, U. S. W. V.

J. W. WILLIAMSON, A. V. F. S.

COROZAL, C. September 19, 1914.

The crews used in coaling steamshovels at Balboa have been taken off, and this work is now done at noon or at night by placing the cars of coal where the watchmen can coal the shovels.

CANAL CLUBHOUSES.

Activities of the Young Men's Christian Association.

GENERAL.

Mr. T. S. Boez, who was formerly secretary at the Gorgona clubhouse and who has been for two years in the United States in Y.M.C.A. work, has returned, and has been appointed secretary of the Balboa clubhouse. Mr. Adams, formerly secretary of the Balboa clubhouse, has resigned, and will attend the Y.M.C.A. Training School at Springfield, Mass.

Mr. H. B. Monroe has been appointed assistant secretary at the Cristobal clubhouse. He was formerly in Y.M.C.A. work at Bennington, Vt., Revelstoke, B.C., and Rochester, Minn.

A meeting of the committee on the selection of a team to represent the Canal Zone at the Panama-Pacific International Exposition in San Francisco, was held in the Corozal clubhouse on Friday, September 18. It was decided to have Mr. J. S. Williams devote his attention largely to the aquatic team, and Mr. A. Kjellander to the track team. Messrs. Woolworth and Kjellander were appointed to select the events to be run on Saturday nights, in a competition beginning on October 3. These events will be open to all employes of The Panama Canal and Panama railroad and the sons of employes. The events scheduled are, as follows: October 3, 1.0-yard dash and mile run; October 10, 800-yard run and running high jump; October 17, 220-yard dash and 16 pound shot put; October 24, 440-yard dash and pole vault; October 31, 220-yard hurdles and running broad jump; November 7, 120-yard high hurdles and hammer throw. The next practice night will be Saturday, September 26, when Mr. Kjellander and Mr. Woolworth will both be on hand to coach the men. Mr. Williams will meet the swimmers at the Corozal float at the same time.

BALBOA.

The following men participated in a checker tournament Saturday night: Messrs. Custer, Watson, McKenzie, Harris, Clawe, Wallerstat. The tournament was won by Mr. Custer, with Messrs. Watson and McKenzie following.

Balboa sent several track men to Corozal Saturday night, to try out with other men from along the line, under the direction of the physical director from Gatun.

The Balboa baseball association was organized at the clubhouses, with 21 charter members, Saturday night. Work is progressing nicely on the ball field. The first game will probably be played this week. The game scheduled with the Tenth Infantry was postponed because the grounds were not in shape.

COROZAL.

The Balboa basketball team came over to Corozal on Saturday night and defeated the Corozal second team by the score of 26 to 24. Mr. Kjellander, physical director of the Gatun Y. M. C. A., acted as referee.

The standing of the teams in the Corozal local basketball league is, as follows:

Team.	Won.	Lost.	P. C.
English.....	4	1	.800
French.....	3	1	.750
Japs.....	1	1	.500
Germans.....	1	2	.333
Russians.....	0	4	.000

Capt. in Kyte's duck pin team was defeated Friday night by the Pedro Miguel team.

High scores in bowling for the past week were, as follows: *Tenpins*—White, 213, 215; Hanna, 200; Terittier, 228; Otis, 233. *Duckpins*—Rich, 100; Gustavson, 102, 112; Otis 117.

GATUN.

Mr. A. N. Kjellander will give all of his time to the Gatun clubhouse from now on. The gymnasium nights have been changed to Tuesday and Friday. The boys' days will be Monday and Wednesday afternoons, and Saturday mornings.

A reception was tendered the secretary of the Gatun clubhouse, Mr. Frank Gardner Smith, on Friday evening, September 19, the occasion being the fifth anniversary of his arrival on the Isthmus. Complimentary addresses were made by Mr. U. C. Gayer, chairman of the executive council, and Mr. E. C. Wood. The balance of the program consisted of selections by the quartet from Company C, Tenth Infantry, a solo by Mrs. McPherson, recitations from Kipling's "Barrack room ballads," by Private Magee, Company C, Tenth Infantry; a solo in German, and an encore in English by Mrs. Weiss; and a series of rag time selections on the piano by Corporal Foster, Company C, Tenth Infantry. Refreshments were served and the program continued informally down stairs.

CRISTOBAL.

Mr. G. C. Bunker, bacteriologist, addressed the discussion club on Thursday, September 17, on "Water

purification." Mr. Bunker had prepared a side view of the rapid sand filter, such as is in use at the Mount Hope filtration plant. He also showed the method of clearing the water by means of alum; of killing disease bacteria by means of bleach (chloride of lime), and plant bacteria by means of hypochlorite of calcium. Mr. Bunker stated that the Canal Zone filtering plants are furnishing as pure water as can be had.

The "Athletics" defeated the "Senators" in the local basketball league on Tuesday, September 15, by a score of 31 to 25. On Thursday, September 17 the "Naps" defeated the "Yankees," by a score of 27 to 13.

Corozal clubhouse will send two teams to play basketball at Cristobal on Saturday, September 26.

Seventy of the Cristobal-Colon Beach children, members of the gymnasium classes, were taken on an outing to Margarita Point on Friday, September 18. After viewing the fortifications under the guidance of Messrs. Fitzpatrick and Townsend, the children enjoyed a swim and finished the day by making a raid on the cocoanut trees, each youngster carrying home a good sized cocoanut.

The following men rolled high scores for the week ending September 19: *Duckpins*—Steele, 108, Henri, 107; Pinney, 104; Smith, 100. *Tenpins*—Peterson, 248; Strong, 244; Russell, 233; Burns, 205; Gibson, 200.

OFFICIAL CIRCULARS.

Act of Congress—Registry of Foreign-built Vessels.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., September 5, 1914.
CIRCULAR No. 600-11:

The Act of Congress quoted below is published for the information of all concerned.

GEO. W. GOETHALS,
Governor.

AN ACT to provide for the admission of foreign-built ships to American registry for the foreign trade, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that the words "Not more than five years old at the time they apply for registry" in Section 5 of the Act entitled "An Act to provide for the opening, maintenance, protection, and operation of the Panama Canal, and the sanitation and government of the Canal Zone," are hereby repealed.

Section 2. That the President of the United States is hereby authorized whenever, in his discretion, the needs of foreign commerce may require, to suspend by order, so far and for such length of time as he may deem desirable, the provisions of law prescribing that all the watch officers of vessels of the United States registered for foreign trade shall be citizens of the United States.

Under like conditions, in like manner, and to like extent, the President of the United States is also hereby authorized to suspend the provisions of the law requiring survey, inspection, and measurement by officers of the United States of foreign-built vessels admitted to American registry under this Act.

Section 3. This Act shall take effect immediately.
Approved August 18, 1914.

Launch "Louise".

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., September 12, 1914.
CIRCULAR No. 600-12:

The Act of Congress quoted below is published for the information of all concerned.

GEO. W. GOETHALS,
Governor.

AN ACT to present the steam launch *Louise*, now employed in the construction of the Panama Canal, to the French Government.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that, as a mark of appreciation of the sacrifices and services of the French people in the construction of the Panama Canal, the steam launch *Louise*, built in France in 1885, and employed in the construction of the Canal successively by the French Panama Canal Company and by the United States, be put in good condition and presented to the French Government.

Section 2. That the sum of \$6,000 is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to pay the expense of executing this Act, to be disbursed by the Governor of the Canal Zone.

Approved August 25, 1914.

Rates for Service of Tugs and Other Floating Equipment.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
CULEBRA, C. Z., August 15, 1914.

CIRCULAR No. 686:

The rates quoted below are effective this date for the following services furnished individuals, companies, and others:

1. For service of tugs in harbors and for temporary service of tugs in the Canal, lakes, and Culebra Cut, or for conveying vessels, per hour or fraction thereof.....	\$15.00
2. For towage direct from entrance of Canal, or from dock, or from anchorage in the harbor at either end, or entrance of Canal, or to dock, or to anchorage in the harbor at the other end, whether loaded or in ballast:	
Per net vessel ton (as determined by Panama Canal certificate of measurement).....	.10
Or per displacement ton (as determined by Panama Canal certificate of measurement).....	.04
Minimum charge for each vessel.....	150.00
3. The Canal authorities reserve the right to take small vessels through the Canal at the rates specified in Paragraph 2 at the convenience of the Canal, also, the right to take more than one vessel at one time.	
4. For the small tugs <i>DeLesseps</i> and <i>Sanidad</i> , and for clapsnets, per hour.....	10.00

Crane boat, *La Volley*, per hour..... 20.00
Wrecking barge, per hour..... 7.50

GEO. W. GOETHALS,
Governor.

Fire Hydrants and Standpipes.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., September 8, 1914.
CIRCULAR No. 688:

1. All water hydrants and standpipes installed within the Canal Zone for the purpose of fire protection will be painted white, and no hydrants or standpipes installed for other purposes will be given this color.

2. All fire hydrants and standpipes that may be opened by hand without wrenches will be marked in addition to the above "For fire only."

3. The opening or use of fire hydrants or standpipes by unauthorized persons, except in the event of fire, is in violation of the ordinances of the Canal Zone and is a misdemeanor punishable by fine.

4. The attention of all employees of The Panama Canal and the Panama Railroad Company is particularly directed to the above; any employee found violating the above ordinance will, in addition to prosecution, be summarily discharged from the service.

GEO. W. GOETHALS,
Governor.

Credit Sales Made by Storehouses.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., September 12, 1914.
To all concerned:

1. Effective at once, the following procedure will be observed in handling invoices and bills covering credit sales made by storehouses:

(A) To branches of the United States Government on the Isthmus:

(a) Shipments and deliveries on requisitions will be invoiced on Form P. C. 924-1. Proper surcharges will be shown on all copies.

(b) Storekeepers will mail to the Auditor an advance copy of each invoice, and will forward to the requisitioning official the original and four copies.

(c) The consignee will sign and send to the Auditor the original and two copies of each invoice.

(d) The Auditor will hold all invoices until the third day of the month following that in which the invoices are dated, and will then prepare bill on Form A-15 (yellow.) The Auditor will forward the original (to which will be attached the originals of invoices) and two copies of the bill to the proper officials, who will approve and return the original to the Auditor.

(e) In case of deliveries on foremen's orders, the usual copies will be forwarded to the Auditor daily to be included in a monthly bill. The Auditor will forward the original and two copies of the bill to the proper official, who will approve and return the original to the Auditor. One copy of the bill (which is to be retained by the receiving official) will be supported by duplicate copies of foremen's orders.

(B) To other purchasers:

(a) Shipments and deliveries will be invoiced on Form P. C. 924-1.

(b) In addition to the regularly required advance copy, the storekeeper will send to the Auditor the original and two copies of each invoice.

2. One copy of each invoice covering credit sales will be stamped with the bill number and returned to the issuing storekeeper for his file.

R. E. WOOD,
Chief Quartermaster.
H. A. A. SMITH,
Auditor, Panama Canal.

Typewriters Not Required for Actual Service.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

BALBOA HEIGHTS, C. Z., September 14, 1914.
CIRCULAR No. 195:

Heads of departments and divisions—The storekeeper, Balboa, has on file requisitions for seven second hand typewriters, which cannot be filled, as no machines are available.

It is believed there is a considerable number of old typewriters in the various offices which can be turned in, repaired, and made serviceable.

Please canvass your offices, and ship to the storekeeper, Balboa, at once, any machines not required for actual service.

R. E. WOOD,
Chief Quartermaster.

Teachers' Meeting.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
DIVISION OF SCHOOLS,

BALBOA HEIGHTS, C. Z., September 18, 1914.
To all teachers—The first meetings of the teachers

will be held on Wednesday, September 30, in the schoolhouse for white children at Balboa. The colored teachers will meet at 9 o'clock in the morning, and the white teachers at 2 o'clock in the afternoon.

A. R. LANG,
Superintendent of Schools.

High School Entrance Examinations.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
DIVISION OF SCHOOLS,

BALBOA HEIGHTS, C. Z., September 18, 1914.
High school entrance examinations will be held at the school building for white children at Balboa on Monday, September 28, at 8.30 a. m. Eighth grade pupils who failed of promotion in June will have an opportunity at this time to take an examination in the subjects in which they failed. Those passing the examination will be permitted to enter the high school on trial.

A. R. LANG,
Superintendent of Schools.

Changes in P. R. R. Organization.

THE PANAMA CANAL,
THE PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,
COLON, R. P. September 23, 1914.

CIRCULAR No. 448;

To all concerned—Effective October 1, 1914, the office of freight and passenger agent of the Panama railroad and Panama Railroad Steamship Line on the Isthmus is abolished. On and after that date, all agents, including the local agents at Colon and Panama, will report to and receive instructions from the Superintendent of Railroad Transportation on all matters pertaining to administrative, personnel, transportation, accidents, etc., but will be guided by instructions received from the Local Auditor regarding accounting, tariffs, rates, ticket sales, cash reports, etc. The steamship ticket agent will report direct to his office.

Approved:
GEO. W. GOETHALS,
Governor.
C. H. MOTSETT,
Superintendent.

Measurement of Vessels.

The following vessels were measured and tonnage certificates issued to them during the month of August: *Cristobal*—Private yacht *Lasala*; private yacht *California*; Peruvian gunboat *Teminte Rodriguez*.

Balboa—*Acajulla* of the Salvador Railway Company; *Pennsylvanian*, *Montanau*, *Kentuckian*, and *Nebraskan* of the American-Hawaiian Steamship Company; *Santa Catalina* of W. R. Grace and Company; private yacht *Niagara*, and the *Palena* of the Compañia Sud-Americana de Vapores.

Sale of Old French House Boat.

OFFICE OF CHIEF QUARTERMASTER,
BALBOA HEIGHTS, C. Z.

Sealed bids will be received at this office until 3 p. m., Tuesday, October 6, 1914, for house boat, rebuilt at Balboa shipways in 1907 from old French barge; steel hull, equipped for house boat purposes; length, 72 feet four inches; beam, 18 feet; depth, seven feet two and one half inches; draft, four feet; gross tonnage, 100; displacement, 125 tons. House boat has no number or name; is located at Balboa, and may be inspected by application to the Board of Local Inspectors, Ancon. Right is reserved to reject any or all bids. Bids should be addressed to the Chief Quartermaster, Balboa Heights, Canal Zone, plainly marked, "Proposal to purchase old French house boat, to be opened October 6, 1914."

COMMISSARY DEPARTMENT.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m., on Saturdays and sailing days of Panama railroad vessels.

In rush periods, all stores will remain open until 7 p. m.

Supplies for the Canal.

The following steamers, with supplies for The Panama Canal and Panama railroad, arrived at the ports of Colon and Cristobal during the week ending September 5:

Panama, September 3, from New York, with four boxes paint, three cases oil, 85 cases sal soda, 301 bales hay, three packages wire clamps, 107 packages switch material, 22 cases copper tubes, seven boxes brass valves, 26 boxes bronze wire cloth, 33 coils manila rope, 240 kegs boat spikes, 53 cases sheet copper, 50 bundles galvanized pipe, 350 bundles brooms, 120 bags bran, 720 rolls roofing paper, 204 barrels roofing pitch, 51 kegs galvanized spikes, 20 kegs galvanized staples, 18 packages bolts, 30 packages miscellaneous material, six pieces steel blooms, 20 pieces steel beams, four boxes dry storage batteries, two carboys sulphuric acid, for stock; one case cutters, three boxes photo material, one package flags, for Executive Secretary; one box tags, one bucket, 139 packages signal material, 50 cases electrical material, for Panama railroad; four propeller wheels, one box pumps, four pieces dredge parts, for Dredging Division; one box typewriter parts, one box tools, one package blueprint paper, 40 kegs manganese dioxide, for Mechanical Division; one box coloring, 15 crates hypochlorite of lime, one box brass valves and fittings, four cases electrical material, 14 crates pumps, two cases packing, for Division of Municipal Engineering; one package spare parts, one box electrical material, one box diving outfit, two cases asbestos lumber, for lock erection; two packages photo plates, two packages vaccine, one package antitoxin, for Health Department; one box rods, 311 packages vault material, one case glass, 12 cases iron doors and fittings, for permanent buildings; four barrels lubricating oil, for Division of Fortifications; one box apparatus, one case pipe fittings, 24 hundred pipes, 21 cases copper wire, 29,997 pieces conduit, four boxes wire solder, one box electrical material, one reel cable, 20 cases electrical material, for Electrical Division; 619 pieces rail fittings, for Division of Terminal Construction; and a miscellaneous cargo, the whole consisting of 34,478 packages, weighing approximately 564 tons.

Almirante, September 3, from New York, with 11 barrels rosin, 25 barrels pitch, 11 bundles leather belting, 70 farm wagon wheels, for stock; eight cases insulating tape, for Electrical Division; one tub copper sleeves, for lock erection.

Turrialba, September 3, from New Orleans, with 1,097 pieces (10,866 board feet), yellow pine lumber, 120 bags sucrose dairy feed, for stock; 522 pieces (24,819 board feet), yellow pine car lumber, 25 bundles wheels, 41 pieces castings, for Mechanical Division; 54 pieces rough castings, for Division of Terminal Construction.

MOVEMENTS OF OCEAN VESSELS.

(Week ending 8 a. m., September 20.)

THROUGH THE CANAL—ATLANTIC TO PACIFIC.

*Will carry mail from the United States.

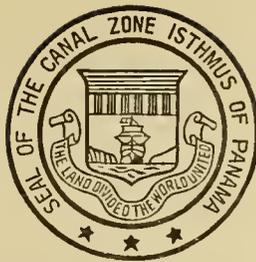

†Will carry mail to the United States.

Will carry mail for Alabama, Arkansas, Louisiana, Mississippi, and Texas.

Panama Railroad Company's steamers sail from Piers 9, and 11, Cristobal, at 3 p. m.

Hotel Aspinwall Launch Service.

The launch Louise will sail from the dredge landing at Balboa for the Hotel Aspinwall on Tabara Island at 9.25 a. m., on Monday, Thursday, and Saturday of each week. The time of sailing permits connection to be made with train No. 3, which arrives at Panama from Colon at 9.25 a. m., daily.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Appointment of Board on Accommodations for Troops.

The Secretary of War has approved the recommendation of the Governor for the creation of a local board to decide questions relative to the location and general type of buildings to be erected under the \$700,000 appropriation for providing quarters for troops on the Isthmus. The Governor has appointed the following as members of this board: Col. W. F. Blaauvelt, commanding, Tenth Infantry, Camp Otis; Lieut.-Col. Chas. F. Mason, Chief Health Officer; Maj. B. T. Clayton, Tenth Infantry; Maj. W. E. Cole, Coast Artillery Corps, and Capt. R. E. Wood, Chief Quartermaster. In connection with the general subject of quarters for troops, the board is empowered to set aside at Corozal, Margarita Island, and at the several locks, such tracts of land as it may deem suitable for the erection of barracks and other buildings.

Physical Examination for Gold Employes.

Each permanent male employe of The Panama Canal on the Isthmus on the gold roll will be given a physical examination to determine his general condition and to take steps toward remedying chronic ailments. This procedure is in line with work done by life insurance companies among their policy holders, and is comparable to general examination and overhauling given machinery, or to the practice of persons of going periodically to a dentist for examination and repair of the teeth.

Under the plan recommended by the Chief Health Officer and approved by the Governor, the examinations for Ancon and vicinity will be held at Ancon Hospital, and for Cristobal and vicinity, at Colon Hospital. The examination of employes in the more isolated settlements will be conducted by the nearest district physician. All doubtful cases will be referred to and passed on by the Ancon Hospital Examining Board.

Printed forms will be furnished, divided into

two parts, one part to contain a series of questions, with space for the answers, which are to be filled in by the employe; and the other part to contain a report of the physical examination of the employe, signed by the examining physician. These forms, when completed, will be filed and added to from year to year, so as to make the record of each gold employe's physical condition, as long as he remains in the service, complete.

Arrangements will be made with heads of departments and divisions as to the date and place of the examination, and the number and names of those employes who can be spared on a certain date and hour. The work of examining the employes will begin about November 1, and it is expected that it can be completed within 30 days thereafter.

Motorcycles for Police and Fire Division.

Three motorcycles have been ordered from the United States for the use of the police and fire division. The terminal central police stations at Ancon and Cristobal will each be provided with a machine, while the third will be reserved for the use of the police and fire inspectors. The machines assigned to the central stations will be for service in connection with the enforcement of speed regulations, patrol service, and for emergency calls. They will be substituted for three horses, which have been condemned and will not be replaced.

Floating Caisson on Its Way from San Francisco.

The floating lock entrance caisson dam left San Francisco for Balboa on September 16, at 11 a. m., according to cable advice received on September 21. It is in tow of the tug *Hercules* and it is expected that they will make about 95 miles daily. This makes them due at Balboa about October 25; the distance from San Francisco to Panama by the usual route for direct vessels is reckoned at 3,277 nautical miles, which would require of the tow approximately 34½ days of actual travel, and three or four days may be allowed for coaling and taking on other supplies.

Dumping on Naos Island Breakwater Discontinued.

Dumping of spoil on the Naos Island breakwater was discontinued on Thursday, September 10, and it is believed that this work is now finished, with the exception of slight fills here and there, which will be made later, in leveling up the top for the proposed permanent railroad track and highway. For the past four months the breakwater has been at approximately final elevation, and the work has been principally in evening the fill; during the month of August the quantity of spoil placed on the breakwater was about 1,200 cubic yards. The top of the completed breakwater is at 18 feet above mean sealevel and is 40 feet wide, thereby allowing ample space for a 14-foot

roadbed for tracks, and an 18-foot highway. Grading and ballasting will make the top of the rails and the crown of the highway at 19 feet above sealevel. Above water, the slope of the fill approximates one on one, but lower down the slope flattens out considerably.

Task Work at Cristobal Coaling Plant.

A part of the work of installing the caissons at the Cristobal coaling plant will be handled by the "Task" method. This will include bottom excavation, assembling of the spiral reinforcement, and assembling and riveting of the caissons. The excavation for the caissons will be handled by orange peel buckets as far as possible; at a lower depth, 4-man crews will continue the work, the rate of pay for which will be \$1.50 per lineal foot of excavation. For assembling the spiral reinforcement, a rate of \$0.0025 per pound has been fixed, and for assembling and riveting the caissons, which includes clamping, bolting, riveting, and calking each joint, the rate will be \$3.99 per completed joint. This latter work will require about 18 men to a crew.

Work at Oil Tank Sites.

Forces of the Division of Municipal Engineering have constructed a roadbed for the Division of Terminal Construction, around the knoll, south of the waterworks at Mount Hope, for the purpose of laying a spur track, about 1,000 feet long, from the main line of the Panama railroad to the area reserved for the Atlantic terminal fuel oil handling plant. The track will be used in connection with the transportation of material and supplies required for the building of the new pumping station, and later, the roadbed will serve for supporting the pipe lines from the handling plant to the oil docks. These pipe lines will carry the oil from tank vessels to the storage tanks of individuals and companies, as well as those of the Government, or from the storage tanks to steamers taking on oil.

The construction of the roadbed was accomplished on the "Task" plan. Two crews were employed, one reporting for duty at 5.30 a. m., and continuing work until about 1 p. m., when the second crew took its place, working up to about 7 p. m. The material, which was handled into place by Decauville equipment, was partly a sticky red clay, very difficult to work in during the recent heavy rains. Under the "Task" plan, however, the work proceeded without delay, the men getting out their daily quota, rain or shine, and earning about \$1.50, United States currency, per day, per man.

The site of the pumping station has been located in a small pocket between knolls, facing the Mount Hope-Gatun road, at the western limit of the oil tank reservation. The building will be of wood frame construction throughout, with open sides and ends,

and a corrugated iron roof; the floor will be of concrete. A small amount of excavation will be necessary in leveling off the site. The pump room will be 30 by 50 feet, and boiler room, 50 by 50 feet, in plan. The main machinery to be installed will consist of two horizontal, duplex-compound, specially constructed oil pumps, capable of maintaining pressure at 250 pounds, and two boilers equipped with oil-burning furnaces.

The foundation for the boilers and stack of the Pacific terminal handling plant have been installed, and the boilers erected by the Division of Terminal Construction. This plant will be erected near the water front on the Balboa dump, in the depression between the two high dumps, and will be connected by pipe lines, with a berth about 1,200 feet off shore. The dredging of this berth, 1,400 feet long by 75 feet wide, to a depth of 45 feet at mean tide, has been completed, and the sinking of caissons for the construction of oil cribs alongside the berth is in progress.

It is expected that both plants will be ready for service about the first of January, 1915. The two 42,000-barrel Government tanks at both terminals have been completed, with fire walls, and have been temporarily rented to the Union Oil Company until such time as the Government is ready to take over their operation. Tank No. 4, at Balboa, has been filled by the lessee. To date, 11 tank sites in the farm adjoining the proposed handling plant at the Pacific terminal have been leased to companies and individuals, and one tank has been erected by W. R. Grace and Company. On the Atlantic side, eight sites have been leased, but no tanks, other than the two Government tanks, have been erected.

Concrete Work on Dry Dock No. 1 may be Let on Contract.

Invitations for proposals on the mixing of the concrete for dry dock No. 1 at Balboa will be issued shortly by the Chief Quartermaster. The contractor will supply labor only, the materials and equipment being furnished by The Panama Canal.

Conviction Under New Opium Law.

Lam Hing, a Chinese merchant of Colon, Lee Leen Onn, a member of the Chinese crew on the United Fruit Company's steamer *Carlago*, and David Brown and Cornelius Hilaire, West Indians in the employ of Lam Hing, were tried in the District Court at Cristobal on Wednesday, September 23, for violating the opium law which recently became effective in the Canal Zone. The evidence showed that Lam Hing had sold to the Chinese sailor, two tins of the drug, amounting to about 25 pounds. The opium was being carted to the Cristobal docks, where the *Carlago* was berthed, in a sandalwood box, when a Zone policeman, whose suspicions were aroused, caused an investigation. As a result of the trial, Lam Hing and Lee Leen Onn were found guilty, and were fined \$500 and \$100, respectively. The West Indians, who claimed to have been simply obeying orders and in ignorance of the contents of the box, were permitted to go free. The opium was confiscated by the Zone Government as authorized by the law, which prohibits the exportation of smoking opium from the United States, or from any territory under its control or jurisdiction, or from countries in which the United States exercises an ex-

traterritorial jurisdiction, under heavy penalties and confiscations.

PERSONAL.

Mrs. Geo. W. Goethals returned to the Isthmus on the *Panama*, which docked at Cristobal on Monday, September 28.

Mr. A. B. Nichols, Office Engineer, under the Engineer of Maintenance, has resigned, effective October 12, and will sail for the United States on the *Panama* on October 4. He was appointed to the Canal service on May 13, 1904, arriving on the Isthmus on May 31. He was assistant engineer at Gatun until June 1, 1905, when he was promoted to resident engineer in the Culebra Division. In July, 1906, he was appointed Office Engineer at Culebra, which position he has since held. From 1899 to 1901, he was a division engineer in the employ of the Isthmian Canal Commission having in charge the surveys for the Nicaragua canal route. Mr. Nichols is the oldest employe in the Canal Service, and is president of the Society of the Incas, an organization of 1904 employes. His home city is Philadelphia.

A cable message has been received from Dr. M. E. Connor at Santiago, Cuba, announcing his resignation, effective September 22, as Health Officer at Panama. He was appointed to the Canal Service on November 29, 1904, and was assistant quarantined officer at various times until 1906, when he was appointed Health Officer at Bocas del Toro. He remained at this post until June 1, 1907, when he was made Health Officer at Colon. On April 1, 1914, he was transferred to the position of Health Officer at Panama. He was born at Amesbury, Mass., was educated in the public schools of that place, and there fitted himself for Dartmouth Medical College at Hanover, N. H. He was graduated from the latter institution, with the degree of Doctor of Medicine, with the class of 1901. Later, he enlisted as a private in the Hospital Corps of the Army for service in the Philippines, and held the post of acting assistant surgeon when he resigned therefrom.

Mr. A. B. Dickson, Superintendent of Clubs and Playgrounds, sailed on the *Ancon*,

on Saturday, September 26, on annual leave of absence, at the end of which period he resigns from the service. He is the fourth superintendent of the clubhouses operated by the Government under the auspices of the Young Men's Christian Association. He arrived on the Isthmus on April 18, 1910, as secretary of the clubhouse at Empire, serving in that capacity until August 12, 1911, when he was appointed Superintendent of Clubhouses. He continued in this post until April 1, 1914, when the scope of his work was enlarged to include the playground system, and he was made Superintendent of Clubs and Playgrounds. He was born at Binghamton, N. Y., and entered the Young Men's Christian Association work as assistant secretary at Buffalo, N. Y., in 1896. In 1898, he went to New York City, as social secretary in the Twenty-third street Y. M. C. A., and remained there until the opening of the new building at Twenty-third street and Seventh avenue, when he was appointed financial secretary, which post he held until he came to the Isthmus. He devoted two years to the study of voice culture in New York City under Oscar Saenger, and was tenor soloist in St. John's Methodist church, Brooklyn; and the Church of the Incarnation, and the Broadway Tabernacle, in New York City. He expects to spend three months in Dayton, Ohio, before resuming work.

Mr. A. Raggi, assistant engineer in the employ of The Panama Canal, who left on July 16 on leave of absence, which he expected to spend in Switzerland, returned to the Isthmus on the *Perou*, which docked on September 24. He arrived at Bordeaux, France, two days after war was declared, and was unable to continue to his destination. He was detained 11 days in Paris waiting for a train, and six days in Havre waiting for the *Perou* to sail. Like other tourists, Mr. Raggi was caught without ready funds, and was obliged to make shift the best way he could. On the return trip, which was made via Gibraltar, the Azores, and the north coast of South America, there were over 400 passengers, and both the food and water supply ran short. A sharp lookout was constantly maintained for hostile vessels.

Deceased Employes.

Name,	Check No.	Native of	Isthmian residence.	Employed by	Date of death.
Eriche, Wm. D.....	44706	Martinique.....	Empire.....	Supply Dept....	1914. Sept. 24.
Palmer, Chas. B.....	224	Jamaica.....	La Boca.....	Panama railroad.	Sept. 15.

Insane Employes.

Name.	Check No.	Native of	Isthmian residence.	Employed by	Date of commitment.
Coppin, David.....	19,706	Barbados.....	New Gatun.....	Panama railroad.	1914. Sept. 25.

The estates of the deceased or insane employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against these estates, or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

SOCIAL LIFE OF THE ZONE.

Cristobal Woman's Club Resumes Meetings.

The first general meeting and reception of the Cristobal Woman's Club was held in the Government clubhouse on Wednesday afternoon, September 30, at 3 o'clock. Commander D. E. Dismukes delivered an address on compulsory military service. There was a short musical program under the direction of Mrs. Nunn and Mrs. Dovell. On October 21, the second meeting for the month will be held, when the program will consist of papers, as follows: "Kaiser Wilhelm II—The Kaiser, as he is—His home life—His personal influence," reader Mrs. Verner; "The German Army", reader, Mrs. Davey; "The German Navy", reader Mrs. Harrison.

Day of Prayer to be Observed in the Canal Zone.

In response to the President's proclamation fixing October 4 as a day of prayer for the return of peace in Europe, published in THE CANAL RECORD of September 23, the president of the Union Church of the Canal Zone has issued an appeal to the local Union church organizations and the Sunday school workers, asking that an observance of the day be made in accordance with the spirit of the proclamation. He also suggests that sermons be preached in the Union churches touching upon the subject of universal peace. The local Sunday schools, federated in the Isthmian Sunday School Association, have been asked by the president of the association to observe the day in the same spirit.

Throughout the Canal Zone the churches will make special supplications for peace in Europe.

Church Notes.

A class of American children took first communion at the Roman Catholic church, Balboa, on Sunday morning, September 27, the Rev. Father McDonald, parish priest, officiating. The service of the rite of confirmation followed in the afternoon at 3.30.

The new pastor of the Union Church of the Canal Zone met with the executive council of the church in the clubhouse at Pedro Miguel on Sunday afternoon, September 27. Delegates were present from the local organizations at Cristobal, Gatun, Paraiso, Pedro Miguel, Corozal, and Balboa. The questions discussed were a change in the handling of the finances in the local organizations, the arrangement of an itinerary for Mr. Flammer, and the advisability of publishing a bulletin or official paper in the combined interests of the Union church and the Isthmian Sunday School Association. On this latter question, a committee was appointed, composed of Mr. Weaver, chairman, Mr. Stokoe and Mr. Warner.

The Rev. Mr. Flammer will speak at the Gatun chapel on Sunday morning, October 4.

The governing board of the Panama Federation of Societies of Women for Christian Work will hold a meeting at the Hotel Tivoli, Ancon, on Friday afternoon, October 2, at 3 o'clock.

First Aid Class for Women.

The examinations for the first aid class for women under the Red Cross, have been held in two sections. The first of these was last Friday, and the second is to be given on Friday, October 2. These examinations are written and credits are given those passing success-

fully, the certificate issued from the national headquarters in Washington enabling the holder to render first aid in the event of accident anywhere in the world.

A second course of lectures on nursing is being planned to follow the finished work.

Assignment of Teachers.

The following assignments of teachers in the schools for white children have been made; the grades indicated are provisional:

Balboa high school—Jessie H. Daniels, principal; M. L. Cloys, science; Ninetta Mattes, Cora E. Sessons, Olga J. Frost, Spanish and French.

Cristobal grade and high school—Katherine I. Davis, principal; Wenonah W. Dillon, first grade; Edith McI. McCarthy, second grade; Helen D. Parmelee, third and fourth grades; Ezoa Smith, fifth and sixth grades; May L. Smith, seventh and eighth grades.

Ancon—Grace E. McCray, principal, first grade; Florence M. Dildine, second grade; Charlotte Carter, third and fourth grades; Mallye A. DeCamp, fifth and sixth grades; Etta Reed, seventh and eighth grades.

Balboa—Elise Cage, principal, first grade; Shellie M. Dunn, second grade; Ila T. Hall, third grade; Dove L. Prather, fourth and fifth grades; Mary F. Adams, fifth and sixth grades; Ida B. Potts, seventh and eighth grades.

Corozal—Mary M. Shea, principal, fifth and sixth grades; Anna Mosteller, first and second grades; Mary Edmonds, third and fourth grades; Edna M. Spencer, seventh and eighth grades.

Pedro Miguel—Georgia T. Munroe, principal, sixth and seventh grades; Marie Birmingham, first, second, and third grades; Anne W. Holme, fourth and fifth grades.

Paraiso—Mary E. Flenning, first to fourth grades.

Culebra—Maybelle C. James, first to eighth grades.

Las Cascadas—Virginia C. Henshaw, first to eighth grades.

Gatun—Emma M. Cobban, principal, fifth, sixth, and seventh grades; Beulah E. Schield, first and second grades; Annie E. Stone, third and fourth grades.

Line teachers—Shirley C. Dorsey, first to fourth grades; Ida O. Erickson, fifth to eighth grades.

Supervisor, industrial training—A. H. Edgerton.

The schools at Culebra and Las Cascadas will be opened with grades one to eight, and at Gatun, with grades one to seven. This provision is temporary, as in case there are not enough pupils in those villages to carry on the upper grade work they will be discontinued, and the pupils assigned to their grades in the schools in the nearest station to their homes.

Civil Service Examinations.

Examinations for the following named positions are scheduled to be held, probably on October 25, 1914 (place and date to be left blank on application): Agricultural inspector, Philippine Service; aid, Lighthouse Service; assistant observer; cadet engineer and cadet officer, Lighthouse Service; civil engineer and draftsman, nonapportioned Departmental Service; copyist ship draftsman and ship draftsman, Navy Department; mechanical draftsman, topographic draftsman, Panama Canal Service; engineer, Indian Service (show optional); junior engineer (civil), junior engineer (mechanical

or electrical), Engineer Department at Large; junior engineer (mining), Bureau of Mines; scientific assistant, Department of Agriculture; teacher, Indian Service; and trained nurse, Indian and Panama Canal Services.

Applications should be filed by October 17, 1914. ISTHMIAN CIVIL SERVICE BOARD.

Canal Zone Motorcycle Club.

The Canal Zone Motorcycle Club will hold its regular monthly meeting at Ancon lodge hall on Sunday, October 4, at 10.30 a. m. Among other things for attention are the adoption of the by-laws. All members are requested to attend, and all interested are invited to be present.

J. L. CALDWELL, *Secretary-Treasurer.*

ANCON, C. Z., September 28, 1914.

Panama Canal Marine Association.

The Panama Canal Marine Association will hold its regular meeting on Sunday, October 4, at 7.30 p. m., sharp, at Paraiso. Members are cordially invited.

F. E. NEHLS,

Recording Secretary.

BALBOA, C. Z., September 28, 1914.

Weight of Concrete in Counterweights of Cranes.

In a note in THE CANAL RECORD of last week on the floating cranes *Ajax* and *Hercules*, it was stated that the concrete for the counterweights, containing a large proportion of scrap iron, weighs about 164 pounds to the cubic yard; this should have read "164 pounds to the cubic foot."

Obituary.

The death of Alice Mae, the little daughter of Theo. M., and Ethel Mae Drake, occurred at the home of her grandparents at Chicago, Ill., on Thursday, September 10. Interment was at Mount Greenwood.

Funeral Services.

The remains of our late Brother Joseph Cavanaugh will be buried at Mount Hope cemetery on Sunday morning, October 4. A funeral car will be attached to train No. 4, leaving Panama at 7.10 a. m. Those attending can return on train No. 5, leaving Colon at 11.05 a. m. The funeral lodge will be held in the lodge room, building No. 1, Cristobal, at 7.30 a. m., and will proceed to Mount Hope to meet the funeral train. The usual Masonic burial service will be held.

FRANK L. HEALD,

W. M., Sojourners Lodge, Cristobal, C. Z.

I. B. of S. S. and D. M.

The next regular meeting of the International Brotherhood of Steamshovel and Dredgemen will be held at Ancon lodge hall, on Sunday, October 4, 1914, at 2.30 p. m.

R. G. WARREN, *Secretary-Treasurer.*

COROZAL, C. Z., September 27, 1914.

Missing Man.

Any one having knowledge of the whereabouts of Ysmael Fernandez Ollero, who was formerly employed on the Canal, but who left here for Cuba in 1910, is requested to communicate with the Office of the Governor.

A slight seismic disturbance was recorded at Ancon from 6.37 to 6.47 p. m., on Tuesday, September 22. The maximum amplitude of the movement was four millimeters, and the approximate distance of the epicenter from Ancon was 330 miles.

CANAL WORK IN AUGUST.

Monthly Report of the Governor to the Secretary of War.

BALBOA HEIGHTS, C.Z.,

September 24, 1914.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of August, 1914:

A test voyage through the Canal from Cristobal to Balboa was made on August 3 by the steamship *Cristobal* of the Panama Railroad Steamship Line, and the return trip was made the following day. A similar trip was made by the *Advance* on August 9 from Cristobal to and through Miraflores Locks, and by the *Panama* on August 11 for the same distance.

The first complete voyage through the Canal, from deep water to deep water, was made by the *Ancon* on August 15, the time consumed being approximately nine hours and 40 minutes.

On the following day, six vessels, which had been waiting at the terminals, were passed through, three from Balboa to Cristobal, and three from Cristobal to Balboa, one of the latter being a pleasure yacht. All of the vessels named above were of American register. The first war vessel to make the trip through the Canal was the *Teniente Rodriguez*, a Peruvian torpedo boat destroyer, which was passed through on August 18. The first foreign vessel to make the passage was the *Daldorch*, a cargo steamer of Glasgow.

In all, 18 vessels passed through the Canal from the Atlantic to the Pacific in August, and 23 passed from the Pacific to the Atlantic Ocean. The tolls collected amounted to \$88,401.80.

Department of Operation and Maintenance.

WORK UNDER ENGINEER OF MAINTENANCE.

Lock construction and maintenance—Three towing locomotives were received, making a total of 30 to date. These machines are being tested and put into service immediately after their receipt at the locks.

The mechanical and electrical installation of the chain fender machines for all locks is approximately 94 per cent complete. Twenty-two fender chains have been ordered, of which five complete chains at Gatun, and three at Pedro Miguel, have been installed.

Six thousand two hundred feet of cable were pulled into the ducts at Pedro Miguel, and 7,710 feet at Miraflores, making a grand total to date of 2,420,044 feet pulled into the ducts at all locks. This includes the Gatun duct line and the Pedro Miguel-Miraflores transmission line.

Forty lockages were made at Gatun, 48 at Pedro Miguel, and 48 at Miraflores. Since August 15, the date on which the Canal was opened to commerce for vessels of a limited draft, there has been a total of 20 through commercial lockages, enabling 22 vessels to make the complete passage of the Canal.

The latest advice from the inspector in the United States is to the effect that the floating caisson will not be ready to depart from San Francisco before the latter part of the present month.

Electrical Division—The net output of the power plants was, as follows:

	k. w. h
Gatun hydro-electric station.....	638,430
Miraflores steam station.....	2,253,140
Empire steam station.....	81,840
Balboa steam station.....	4,364

The output of the air compressor plants was, as follows:

Balboa—340,112,864 cubic feet free air compressed to 105 pounds.
Empire—39,683,435 cubic feet free air compressed to 105 pounds.

Maintenance and repair work throughout the Canal Zone, and construction work on the new transmission line and substations, underground conduit systems in the Ancon-Balboa and Gatun districts, new Balboa shops, and in new and reconstructed quarters, was carried on.

Municipal engineering—The work of this division in the northern and southern districts in the Canal Zone; also, in the cities of Colon and Panama, included the usual maintenance and repair work on water and sewer systems and streets, together with the operation of pumping stations and water purification plants. The construction of the new Panama water works was continued, work being carried on at Miraflores on the water purification plant and pump station No. 2, at Ancon, on pump station No. 3, and at Gamboa, on the pump station. The walls of the pump sumps were brought up to the floor level, and forms and steel set for basement floor. A total of 363½ yards of concrete was poured during the month. Surveys were completed of the Gamboa-Miraflores pipe line, and 7,411 feet of cast iron pipe for same were received and distributed.

Meteorology and hydrography—The rainfall was generally below normal, except at stations along the Atlantic coast, monthly totals ranging from 4.97 inches at Trinidad to 21.30 inches at Porto Bello. The maximum precipitation recorded in one day was 7.10 inches at Agua Clara on the 12th. The total yield of Gatun Lake watershed was 32 per cent below the 7-year normal for August, while that at Alhajuela was 30 per cent below the 25-year normal. The elevations of Gatun Lake at the beginning and at the end of the month indicate an increase in storage of 480,000,000 cubic feet.

Monthly mean air temperatures were everywhere above the station averages, while the average hourly wind movement was the highest which has been recorded for August at all stations.

A slight seismic disturbance was recorded at Ancon on August 17. The shock was of Intensity I, Rossi-Forel scale; its epicenter was approximately 115 miles distant from Ancon.

Department of Operation and Maintenance—Division of Terminal Construction.

WORK UNDER ENGINEER OF TERMINAL CONSTRUCTION—PACIFIC TERMINALS.

Dry dock—The final section and details of the wall were decided upon and studies were made of the piping and outlets, and their final locations were practically agreed upon. One shovel was engaged excavating in the floor of the dry dock site, along the north wall, and 18,979 cubic yards were excavated. The placing of concrete in the south wall was begun on August 17, and 4,105 cubic yards were placed.

Coaling plant—The design of the girders for the berm crane supports was practically completed. Four hundred and twenty-three cubic

yards of concrete were placed. Rock fill was placed in the west area of the coal pocket.

Quay walls and pier—All of the piers, which will form the foundation for the south sea wall, had been started and were well under way at the close of the month. A total of 3,156 cubic yards of concrete was placed. In Section d-e-f of the quay wall, the work consisted of pile driving, the sinking of caissons for the foundation, and the placing of concrete therein. On Section g-h-i, all of the fender piles were driven along the face of the dock, and 541 linear feet of buffer timbers were placed. In Section i-j-m-n, concrete in the curb and balustrade was completed, and the only work remaining to be done is the placing of pavement on the floor. On pier No. 1, 19 bollards were placed along the edge, and 541 linear feet of buffer timbers were bolted on. The fill was completed. Permanent track was laid, and 1,657 square yards of brick floor were placed and grouted in.

Fuel oil plant—Foundations for the boilers for the fuel oil handling plant were placed, and piling was driven as supports for the steel caissons which will be placed for the oil berths.

Ancon quarry—The output consisted of 49,575 cubic yards of crushed rock.

Naos Island breakwater—Work on the breakwater consisted of the placing of 1,280 cubic yards of rock. A complete survey was made of the breakwater and a report was made thereon. It appears that the fill has nearly reached its equilibrium.

Permanent shops—Erection was continued on 10 buildings. The installation of steel roller doors in the ends of buildings Nos. 1, 2, 4, and 12, and the laying of tile roof on the office building were completed.

Sosa Hill quarry—The quarrying of hard rock to be used in the east breakwater at the Atlantic entrance necessitated the stripping of considerable light material from the quarry, amounting to 42,943 cubic yards. Arrangements were completed for the quarrying and transportation of hard rock.

ATLANTIC TERMINALS.

Coaling plant—Plans and specifications were issued for the purchase and construction of structural steel framing for the deck structure, and details for the foundations for viaducts and track scales at the shore extension were advanced. A total of 702 cubic yards of concrete was placed in the bridge track retaining wall. Piling, with actual penetration of 10,048 linear feet, was driven, and 749 linear feet of steel cylinders were sunk.

East breakwater—Preliminary work of constructing storage tracks and trestles was advanced, and preparations were made to receive rock from Sosa Hill quarry.

Fuel oil plant—The placing of center and corner stakes for 30 tanks south and east of Mount Hope cemetery, the grading of the site, and excavation of the 30-foot cut through the saddle southwest of the site for the passing of pipe to the oil dock, were carried on.

RADIO STATIONS.

Municipal engineering work was continued at the Colon, Balboa, and Darien radio stations. At Darien, the contractor completed the erection of the first 200 feet of tower No. 1, with the exception of the joints, and proceeded with the erection of tower No. 2.

LANDSCAPE ARCHITECT.

The forces under the landscape architect completed a plan of the townsite to accompany the annual report, set stakes for the clubhouse, court house, Union church, and other

buildings at Balboa and Balboa Heights; and continued the construction of road, and water and sewer mains.

Dredging Division.

The status of dredging on August 31 was, as follows:

LOCATION.	August excavation, Cu. yds.	Remaining August 31, Cu. yds.
Miraflores Locks to Pacific.....	138,187	1,500,000
Miraflores Lake.....	306,434
Culebra Cut.....	423,558	4,083,695
Gatun Lake.....
Gatun Locks to Atlantic.....	179,506	443,030
Total Canal prism.....	741,251	6,333,159
Balboa terminals.....	271,106
Atlantic terminals.....	182,243
Gravel.....	38,650
Sand.....	13,975
Total.....	505,974
Grand total.....	1,247,225

Culebra Cut—The excavation in Culebra Cut during the month was, as follows:

LOCATION.	Earth, Cu. yds.	Rock, Cu. yds.	Total, Cu. yds.
Empire slide.....
Culebra slide, east.....	39,070	39,070
Culebra slide, west.....	886	27,329	28,215
Cucaracha slide.....	76,084	280,189	356,273
Total.....	76,970	346,588	423,558

Water hyacinths—The destruction of water hyacinths in Gatun Lake was continued, 12,736 square yards of plants being poisoned, and 2,544 square yards pulled up and piled upon the bank. One large bed of young plants was found on the old Tabernilla dump. There was a noticeable breaking up of the grass or "floating" islands.

Mechanical Division.

The character of work was substantially the same as in previous months, but the quantity was materially reduced, and a large reduction in force of artisans was effected. The foundry output was larger than for July, due to a temporary increase in the output of iron, but it is believed that this will decrease constantly from now on. The reduction of overtime work was continued until it is now almost negligible, and it is believed that in the near future the night shift in the machine shop and blacksmith shop at Balboa may be done away with.

Shop orders authorized during the month numbered 815; carried over from July, 436; completed during August, 820; carried over into September, 431. The output of the foundry was 269,447 pounds of iron, 23,905 pounds of steel, and 16,700 pounds of brass. Hoisting was done on 5,456 pieces of equipment; shop repairs were made on 1,357 cars, and field repairs on 4,791. Light repairs were made on 1,305 other pieces of equipment, and heavy repairs on nine.

Division of Canal Transportation.

Forty-one ships made the passage of the Canal in August. Eleven vessels were measured and certificates were issued; four were in process of measurement at the end of the month. Thirteen vessels were examined to see if measurements conformed to The Panama Canal rules. Tolls collected amounted to \$88,401.80.

The Board of Local Inspectors inspected and certificated nine vessels. The appraisal of the floating equipment of The Panama Canal and Panama railroad was completed, and a report thereon was made. Seven licenses to chauffeurs were issued.

Ninety-three vessels arrived at Cristobal,

and 92 departed, the former being divided, as follows: American, 34; British, 42; German, four; Danish, one; Italian, one; Dutch, two; French, one; Spanish, one; Norwegian, five; Peruvian, one.

Fifty vessels arrived at Balboa, and 50 departed therefrom. The arrivals were: American, 27; British, 12; Peruvian, six; Panamanian, one; Chilean, two; Danish, two.

Supply Department.

FORCE AND QUARTERS.

The force report for the last Wednesday in August showed a total of 28,883 employes of The Panama Canal and Panama railroad, of whom 4,529 were white Americans, and 24,354 were laborers, chiefly West Indian negroes; the last number included 999 European laborers. The occupants of Government quarters numbered 7,476 white Americans, of whom 4,404 were men; 1,167 European laborers, of whom 1,052 were men; and 9,113 West Indian laborers, of whom 6,202 were men, a total of 17,756. The number of West Indians occupying Government quarters was about one-third of the total number employed. The total force was reduced approximately 1,000 men during August. The United Fruit Company has shut down most of its construction work in Central America, and many of the laborers recruited on the Isthmus for that work last fall are returning here; the result is that there is a large number of unemployed West Indians on the Isthmus, and many of them are suffering real hardship.

BUILDINGS.

The administrative offices were moved from Empire, and the timekeeping office from Culebra. All bachelors were moved out of Empire and the hotel was closed.

MATERIAL AND SUPPLIES.

The value of material received was \$774,023.28, approximately \$150,000 less than for the same month last year. Material came forward in 36 steamers, and the total weight of cargo, exclusive of lumber and piling, was 22,989 tons.

Accounting Department.

The cash balance in Canal construction appropriations on August 31 was \$20,991,776.50; fortification appropriations, \$5,220,871.33. The pay rolls for August, exclusive of the Panama railroad and fortifications, amounted to \$1,164,184.76, about \$27,000 less than for the previous month. The fortification pay roll was \$57,518.66. Payments were made by the Disbursing Clerk at Washington amounting to \$1,359,225.15; by the Paymaster on the Isthmus, \$1,622,394.14; and \$193,239.12 to the Panama railroad on account of collections for commissary books. Collections from Canal Zone and miscellaneous funds amounted to \$13,795.91, Canal Zone revenues; \$208,459.29, money order funds; \$239,880, postal savings funds, and \$8,283.28, Canal clubhouse funds.

Health Department.

No cases of yellow fever, smallpox, or plague originated on, or were brought to the Isthmus during the month. The health of employes continued very good. The number of names on the rolls for the preceding month was 44,132. Using this as a basis, the admissions to hospitals and quarters on account of illness, 1,352, give a rate of 367.62 per thousand per annum, as compared with 543.71 for August, 1913. The total of deaths from all causes was 24, twelve from disease, or 3.26

per thousand per annum, as compared with 4.31 for the corresponding month of 1913.

The admission rate to hospitals and death rate for disease for black employes were 128.06 and 2.90 per thousand, as compared with 358 and 5.26 for white employes. In August, for the first time, it was possible to separate the statistics for white Americans from those for white Europeans. On the basis of 5,178 American employes, and 1,660 European employes, the death rate for Americans was 6.95, while no Europeans died. The admission rate for Americans was 342.99, and for Europeans, 404.82. The admission rate for malaria was much higher among Europeans.

Executive Department.

Division of Civil Affairs—At the port of Cristobal, 52 vessels entered and 50 cleared, an unusually heavy business, due in part to the use of the new docks by vessels which formerly entered at Colon, and also to the opening of the Canal. At the port of Ancon, 40 vessels entered, and 40 cleared, also a marked increase over the business of previous months. There were 45 inspections of household goods packed for shipment to the United States, including in all 271 pieces of freight.

Thirteen estates were settled during the month, and on August 31, there were 53 estates in course of settlement. Cash received during the month amounted to \$3,348.70, and the total value of estates settled amounted to \$199.94.

One hundred and four licenses were issued during the month; of this number, 17 were for automobiles and motorcycles, 40 were for bicycles, and 47 for hunting and the keeping or carrying of firearms.

Postmasters remitted on account of stamp sales and postage due collections during the month, \$6,320.43. The money order business aggregated \$285,298.20, and fees on this business amounted to \$1,330.10. The postal savings deposits for the month were \$332,672, and the withdrawals \$145,829. There was a balance of postal savings funds on hand at the close of the month of \$771,881.

Police and prisons—Arrests made numbered 462, of whom 18 were females; deportations of criminal characters, four; committed to the penitentiary, six; discharged from penitentiary, seven; confined in penitentiary on August 31st, 67.

Fire protection—Eight fires occurred, with a loss of \$294 to the Government, and of \$10 to private parties.

Courts—In the District Courts, three civil, 25 criminal, and 33 probate cases were settled; seven civil, 24 criminal, and 24 probate cases were filed; 97 cases of all kinds were pending on August 31. In the Magistrates' Courts, 24 civil and 404 criminal cases were tried.

Panama Railroad.

Cargo handled at Colon and Cristobal amounted to approximately 88,000 tons, which includes 19,000 tons of cargo rehandled on account of car shortage. On account of the opening of the Canal, coal handling operations increased, and approximately 3,000 tons of coal were bunkered into ships. Five Panama railroad steamers arrived, carrying 471 first-class, and 28 steerage passengers; and seven departed carrying 761 first-class, and 173 steerage passengers.

At the Balboa agency, approximately 27,000 tons of cargo were handled from 27 ships

arriving, and the same amount for 28 ships departing.

The construction of pier No. 10 was completed, with the exception of dredging along the face of the pier, and the driving of about 50 fender piles. The work consisted of the laying of 915 square yards of brick pavement, raising the grade of the depressed tracks, and installing bumping posts. On pier No. 7, the preparation of contract drawings was continued during the month. Driving of trestle for false work was continued, and about 52 per cent of the total is in place. Wash drill soundings were started, and 24 holes were drilled. Work on the duct line was continued by the telephone and signal forces, and a total of 13.45 miles was completed on the transisthmian line proper, making the entire line about 91 per cent completed.

Respectfully submitted,
 GEO. W. GOETHALS,
Governor.

Lease of Tank for Temporary Storage of Diesel Engine Oil.

A small oil tank situated on the Balboa dump has been rented to the local agency of W. R. Grace and Company, under a revocable license, for the temporary storage of about 3,000 barrels of Diesel engine oil, which will be discharged from the steamer *Cuzco*, due to arrive at Balboa about October 7. This oil is to be redelivered within the next few weeks to a steamer, equipped with Diesel engines of the internal combustion type, belonging to the Johnson Line of Stockholm, Sweden, which will pass through the Canal on its way to San Francisco. The expense of installing pipe lines, etc., will be borne by the lessee. Although W. R. Grace and Company have an oil tank under erection on the Balboa reservation, it will not be ready for use for several weeks.

Additional Improvements at La Boca.

The improvement of Block A in the La Boca silver settlement, which includes the installation of water and sewer pipes, and the building of streets, curbs, and gutters, is practically completed. The work has been performed at a cost considerably below the estimate, and because of this and the further fact that the improvements can probably be made more cheaply now than later, authority has been given similarly to improve Block B, which adjoins Block A. Two blocks will thus be added to the silver townsite ready to be built on at any time it is desired.

OFFICIAL CIRCULARS.

Act of Congress—Sundry Civil Appropriation Act, 1915.

THE PANAMA CANAL,
 EXECUTIVE OFFICE,
 CULEBRA, C. Z., August 14, 1914.

CIRCULAR No. 600-10:

The extracts quoted below from an Act of Congress are published for the information of all concerned.

GEO. W. GOETHALS,
Governor.

AN ACT making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1915, and for other purposes.

1. *Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled*, that the following sums be, and the same are hereby, appropriated, for the objects hereinafter expressed, for the fiscal year ending June 30, 1915, to-wit:

UNDER THE WAR DEPARTMENT.—NATIONAL CEMETERIES.

2. Disposition of remains of officers, soldiers, civilian employes, and so forth. For expenses of interment, or of preparation and transportation to their homes or to such national cemeteries as may be designated by proper authority, in the discretion of the Secretary of War, of the remains of officers, including acting assistant surgeons, and enlisted men of the Army active list; for the expenses of interment, or of preparation and transportation to their homes, of the remains of civil employes of the Army in the employ of the War Department who die abroad, inclusive of Alaska and the Canal Zone, Panama, or on Army transports, or who die while on duty in the field or at military posts within the limits of the United States; for the expenses of interment of military prisoners who die at military posts; for the expenses of removal of remains from abandoned posts to permanent military posts or national cemeteries, including the remains of Federal soldiers, sailors, or marines, interred in fields or abandoned private and city cemeteries; and in any case where the expenses of burial or shipment of the remains of officers or enlisted men of the Army who die on the active list are borne by individuals, where such expenses would have been lawful claims against the Government, reimbursement to such individuals may be made of the amount allowed by the Government for such services, to be paid out of the funds appropriated by this Act, but no reimbursement shall be made under this Act of such expenses incurred prior to July 1, 1910, \$57,500.

UNDER THE DEPARTMENT OF COMMERCE.—COAST AND GEODETIC SURVEY.

3. *Field expenses.* For surveys and necessary resurveys of the Atlantic and Gulf coasts of the United States, including the coasts of outlying islands under the jurisdiction of the United States; provided, that not more than \$25,000 of this amount shall be expended on the coasts of said outlying islands, and the Atlantic entrance to the Panama Canal, \$65,000.

PANAMA-PACIFIC INTERNATIONAL EXPOSITION.

4. *Building to install the Government exhibit at the Panama-Pacific International Exposition.* For the construction of a suitable building in that part of the reservation of the United States known as the Presidio of San

Francisco, State of California, in which the Government Exhibit Board, created by the sundry civil appropriation Act approved June 23, 1913, shall install, display, and safeguard the exhibit of the Government of the United States at the Panama-Pacific International Exposition, \$500,000; provided, that the said building shall be so located and planned and shall be of such a permanent character as will make it available and useful for military purposes of the United States after the close of the said exposition, and shall be on such general plan and design and in such location as shall be approved by the Secretary of War; provided further, that the said building shall be erected under the authority of the Secretary of War, by contract or otherwise, as he may direct; provided further, that not exceeding \$50,000, or so much thereof as may be necessary, may be expended from the appropriation made herein, on the approval and authority of the Secretary of War, for entertaining the officers and representatives of foreign governments who may attend and participate in the Panama-Pacific International Exposition in consequence of the invitation of the President of the United States, extended in pursuance of the authority of Congress.

5. The provisions contained in the Act entitled "An Act making appropriations for the sundry civil expenses of the Government for the fiscal year ending June 30, 1914," which provides for the participation of the United States in the Panama-Pacific International Exposition, be amended, as follows: Under the head of "To provide for the participation of the United States in the Panama-Pacific International Exposition," the paragraph on Page 81, which reads, as follows: "The President of the United States is authorized to detail three civilian officers or employes from the executive departments as members of a commission which is hereby constituted as the National Exposition Commission; one of said commissioners, who shall be the chairman of said commission, shall be detailed from the Department of State. Vacancies in said commission shall be filled in the same manner as original appointments. Each commissioner shall receive, in addition to his original compensation, his actual necessary traveling expenses and an allowance of \$10 per day in lieu of subsistence. Said commissioners may appoint a secretary at \$2,500 per annum, and the sum of \$15,000, or so much thereof as may be necessary, may be expended for clerical, office, and other necessary and actual expenses of said commission," and insert in lieu thereof the following: "The President of the United States is authorized to detail two civilian officers or employes from the executive departments, also one to be appointed from civil life, as members of the commission which is hereby constituted as the National Exposition Commission; one of said commissioners, who shall be the chairman of said commission, shall be detailed from the Department of State, the commissioner appointed from civil life to receive a salary at the rate of \$5,000 per annum until the exposition closes. Vacancies in said commission shall be filled in the same manner as original appointments. Each commissioner detailed as aforesaid shall receive, in addition to his original compensation, necessary traveling expenses and an allowance of \$10 per day in lieu of subsistence while on duty in San Francisco. Said commissioners may appoint a secretary at \$2,500 per annum, and the sum of \$15,000, or so much thereof as may be necessary, may be expended for clerk hire and actual expenses of said commission."

6. *Copyright and patent branch office, Panama-Pacific International Exposition.* To defray all the expenses connected with the establishment, equipment, and maintenance (including necessary printing) of the branch office at San Francisco, California, provided for in Section 2 of the Act approved September 18,

CLASSIFIED EXPENDITURES—THE PANAMA CANAL.

A statement of classified expenditures of The Panama Canal to June 30, 1914, follows:

PERIODS.	Department of Civil Administration.	Department of Law.	Department of Sanitation.	Department of Construction and Engineering.	General Items.	Fortifications.	Total
Total to June 30, 1909.....	3,427,090.29		9,673,539.28	69,622,561.42	78,022,606.10		160,745,797.09
Total—Fiscal year, 1910.....	769,351.37		1,803,040.95	26,300,167.05	2,863,088.83		31,675,648.20
Total—Fiscal year, 1911.....	755,079.44		1,717,792.62	27,477,776.19	3,097,959.72		33,048,607.97
Total—Fiscal year, 1912.....	820,398.57	24,729.16	1,620,391.12	28,897,738.10	2,819,926.53	1,212,881.66	35,396,065.14
Total—Fiscal year, 1913.....	681,389.06	20,253.11	1,435,400.96	33,017,852.99	1,063,322.52	1,901,475.86	38,119,694.50
July, 1913.....	61,472.81	1,597.91	121,487.47	2,138,540.39	237,534.13	131,333.71	2,691,966.42
August, 1913.....	57,950.95	1,469.10	112,862.29	2,299,554.75	244,860.32	150,364.19	2,867,001.60
September, 1913.....	63,469.40	1,835.57	106,731.16	2,276,467.78	242,779.94	149,735.89	2,841,019.74
October, 1913.....	66,063.85	1,502.47	107,280.12	2,154,953.40	413,883.08	147,589.32	2,891,272.24
November, 1913.....	58,728.48	1,387.60	85,696.96	1,774,974.81	160,575.73	113,307.35	2,194,670.93
December, 1913.....	63,433.93	1,781.65	91,197.00	1,787,820.21	136,525.07	174,216.04	2,254,973.90
January, 1914.....	69,525.61	1,835.50	86,263.15	2,188,791.94	155,386.12	168,495.83	2,670,298.15

March, 1914.....	70,083.76	1,488.29	54,735.28	2,212,862.73	318,230.02	162,791.71	2,820,209.79
April, 1914.....	72,562.60		101,841.17	2,030,705.66	220,211.74	1,714,528.66	4,139,849.83
May, 1914.....	65,553.24		91,383.57	2,340,858.71	163,030.52	216,379.74	2,877,295.78
June, 1914.....	52,997.45		*29,042.97	2,836,380.85	43,666.13	376,204.98	3,280,296.44
Grand total.....	7,163,235.38	60,109.73	17,270,494.99	211,295,071.34	90,374,263.38	6,793,089.73	332,956,264.55

*Denotes credit.

1913, (Public, Numbered Fourteen), \$50,000, of which sum \$15,000, or so much thereof as may be necessary, shall be expended under the direction of the Secretary of the Interior, and \$15,000, or so much thereof as may be necessary, shall be expended under the direction of the Librarian of Congress, each of whom is authorized to pay to the Public Printer the cost of any portion of such printing and binding required for the said branch office which may be ordered by him from the Government Printing Office; to designate from among the employes of the Patent Office and Copyright Office, respectively, such employes as may be actually necessary for the service of the respective divisions of the said branch office, one of the employes so designated from each of said bureaus to act as his disbursing officer; and to select and employ from time to time at San Francisco such additional persons as the exigencies of the work there may require. All persons from the Patent Office and Copyright Office thus designated for service at San Francisco shall receive no compensation other than their regular salaries, but while absent from Washington, District of Columbia, and engaged upon the business of the aforesaid branch office, shall be allowed their actual and necessary traveling expenses, together with a per diem allowance in lieu of the cost of subsistence, to be fixed by the Secretary of the Interior or Librarian of Congress designating such persons, not to exceed \$3 per day.

7. The Government Exhibit Board, for which provision was made in the sundry civil Act approved June 23, 1913, shall, after consultation by correspondence or otherwise with the heads of the executive departments and the Regents of the Smithsonian Institution, the Isthmian Canal Commission, the Interstate Commerce Commission, the Civil Service Commission, the Commissioners of the District of Columbia, the American National Red Cross, the Commission of Fine Arts, the Librarian of Congress, the Public Printer, the Governor of Porto Rico, the Governor of Alaska, the Governor of Hawaii, and the United States Geographic Board, determine the nature, character, and extent of the exhibits of the United States Government to be made at the Panama-Pacific International Exposition, to be held at San Francisco, California, in 1915, and shall be charged with the selection, purchase, preparation, safekeeping, exhibition, and return of such articles and materials as said board may decide shall be exhibited; and the said board is empowered to select, purchase, and exhibit articles or materials representing the activities of any department, office, commission, or organization named in this paragraph.

* * * * *

THE PANAMA CANAL.

8. To continue the construction of the Panama Canal, to be expended under the direction of the President, in accordance with an Act entitled "An Act to provide for the construction of a canal connecting the waters of the Atlantic and Pacific Oceans," approved June 28, 1912, and Acts amendatory thereof or supplementary thereto.

9. *First.* For salaries of officers and employes of The Panama Canal, including assistant purchasing and shipping agents, and all other employes in the United States, \$150,000.

10. *Second.* For incidental expenses, including rents, cable and telegraph service, supplies, stationery and printing, and actual necessary traveling expenses in the United States (including rent of offices in the District of Columbia not exceeding \$7,500, textbooks and books of reference, \$1,000, and additional compensation to the Auditor for the War Department for extra services in auditing accounts for The Panama Canal, \$1,000), \$62,000.

11. *Third.* For pay of the Governor of The Panama Canal and officers and employes on the Isthmus, other than skilled and unskilled labor, including civil engineers, superintendents, instrumentmen, transitmen, levelmen, rodmen, draftsmen, timekeepers, mechanical and electrical engineers, quartermasters, clerks, accountants, stenographers, storekeepers, messengers, office boys, foremen and subforemen, wagon masters, watchmen, and stewards, including those temporarily detailed for duty away from the Isthmus, in the departments of Construction and Engineering, Quartermaster's, Subsistence, Disbursements, and Examination of Accounts, and for those employed in connection with the preservation of plans, drawings, and other records, \$2,414,000;

12. *Fourth.* For skilled and unskilled labor on the Isthmus, including engineers, conductors, firemen, brakemen, electricians, teamsters, cranemen, machinists, blacksmiths, and other artisans, and their helpers; janitors, sailors, cooks, waiters, and dairymen, for the departments of Construction and Engineering, Quartermaster's, Subsistence, Disbursements, and Examination of Accounts, \$7,000,000.

13. *Fifth.* For the purchase and delivery of material, supplies, and equipment, including cost of inspecting material and of paying traveling expenses incident thereto, whether on the Isthmus or else-

where; purchase, maintenance and repair of motor cars, firefighting apparatus, towing locomotives, and other motor propelled vehicles, and such other expenses not in the United States as the Governor deems necessary to best promote the construction of the Panama Canal, and such expenses as are incurred in assembling, sorting, storing, repairing, and selling materials, supplies, and equipment heretofore or hereafter purchased or acquired for the construction of the Panama Canal, which are unserviceable or no longer needed, including the amount necessary to continue the construction of the two colliers provided for under the Act approved June 23, 1913, subject to the limit of cost therein fixed, and including the payment of damages caused to the owners of private lands, or private property of any kind, by reason of the grants contained in the Treaty between the United States and the Republic of Panama proclaimed February 26, 1904, or by reason of the operations of the United States, its agents, or employes, or by reason of the construction, maintenance, operation, sanitation, and protection of the said Canal or of the works of sanitation and protection therein provided for, whether compromised by agreement between the claimant and the Chairman of the Commission or allowed by a joint commission, and the payment for land and land under water as authorized in Section 3 of The Panama Canal Act, for the departments of Construction and Engineering, Quartermaster's, Subsistence, Disbursements, and Examination of Accounts, and including also payment to the Wheeling Mold and Foundry Company of Wheeling, West Virginia, of the sum of \$9,076.21, to carry into effect an equitable settlement with that company which could not be made by reason of the ruling of the Comptroller of the Treasury, this sum having been deducted as liquidated damages on the various contracts and being in excess of the actual damages to the Commission, \$9,000.00.

14. *Sixth.* For miscellaneous expenditures, cable and telegraph service, stationery and printing, local railway transportation, special trains, including pay train service; transportation of currency to the Isthmus, recruiting and transporting laborers, transporting employes from the United States, repatriating laborers and employes, actual necessary traveling expenses while on the Isthmus on official business; expenses incident to conducting hearings and examining estimates for appropriations on the Isthmus, and a 10 per cent incidental and contingent expenses not otherwise provided for, for the departments of Construction and Engineering, Quartermaster's, Subsistence, Disbursements, and Examination of Accounts, \$725,000.

15. *Seventh.* For pay of officers and employes of the department of Civil Administration, including foremen, subforemen, skilled and unskilled labor watchmen, messengers and storekeepers, of the departments of Civil Administration and Law, including those necessarily and temporarily detailed for duty away from the Isthmus, and for expenses of the official representation of Congress attending the formal opening of the Canal, \$500,000.

16. *Eighth.* For the operation, maintenance, and extension of water works, sewers, and pavements in the cities of Panama and Colon, during the fiscal year 1915, the necessary portion of such sums as shall be paid as water rentals or directly by the Government of Panama for such expenses.

17. *Ninth.* For material, supplies, equipment, construction and repairs of buildings, and contingent expenses of the departments of Civil Administration and Law, including not exceeding \$500 for law books, \$72,000.

18. *Tenth.* For pay of the officers and employes other than skilled and unskilled labor, including hospital dispensers, internes, nurses, attendants, messengers, office boys, foremen, and subforemen, watchmen, and stewards, of the Department of Sanitation on the Isthmus, including those temporarily detailed for duty away from the Isthmus, \$300,000.

19. *Eleventh.* For skilled and unskilled labor of every grade and kind, for the Department of Sanitation on the Isthmus, \$120,000.

20. *Twelfth.* For material, supplies, equipment, construction and repairs of buildings, medical aid and support of the insane and of indigent persons permanently disabled, while in line of duty and in the employ of The Panama Canal, from earning a livelihood, and contingent expenses of the Department of Sanitation on the Isthmus, including not exceeding \$75,000 for removal of quarantine station from Culebra Island to the vicinity of Balboa, and for converting the hospital at Colon into a quarantine station, and for new equipment for both, \$375,000.

21. The foregoing sums, so far as necessary, shall be available for the operation of the Canal, for the permanent organization authorized to be established under The Panama Canal Act, for dry docks, repair shops, yards, docks, wharves, warehouses, storehouses, and other necessary facilities and appurtenances, including the collection of tolls, for the purpose of pro-

viding coal and other materials, labor, repairs, and supplies, for office buildings, quarters, and other necessary buildings, for the payment of claims arising out of injuries or deaths of employes; and for the consolidation and preservation of the files of papers and other records which have accumulated or may accumulate during the construction of the Canal and needed or useful or having a permanent value or historical interest.

22. In all, \$20,718,000, the same to be immediately available and to continue available until expended; provided, that all expenditures from the appropriations heretofore, herein, and hereafter made for the construction of the Panama Canal, including any portion of such appropriations which may be used for the construction of dry docks, repair shops, yards, docks, wharves, warehouses, storehouses, and other necessary facilities and appurtenances; for the purpose of providing coal and other materials, labor, repairs, and supplies; for the construction of office buildings and quarters, and other necessary buildings, exclusive of fortifications and colliers, and exclusive of the amount used for operating and maintaining the Canal; and for the permanent organization after the Canal is opened for use and operation, may be paid from or reimbursed to the Treasury of the United States out of the proceeds of the sale of bonds authorized in Section 8 of the said Act approved June 28, 1902, and Section 39 of the Tariff Act approved August 5, 1909.

23. Except in cases of emergency, or conditions arising subsequent to and unforeseen at the time of submitting the annual estimates to Congress; and except for those employed in connection with the construction of permanent quarters, offices and other necessary buildings, dry docks, repair shops, yards, docks, wharves, warehouses, storehouses, and other necessary facilities and appurtenances, for the purpose of providing coal and other materials, labor, repairs, and supplies; and except for the permanent operating organization under which the compensation of the various positions is limited by Section 4 of The Panama Canal Act, there shall not be employed at any time during the fiscal year 1915 under any of the foregoing appropriations for The Panama Canal, any greater number of persons than are specified in the notes submitted respectively in connection with the estimates for each of said appropriations in the annual Book of Estimates for said year, nor shall there be paid to any of such persons during that fiscal year any greater rate of compensation than was authorized to be paid to persons occupying the same or like positions on the first day of July, 1913; and all employments made or compensation increased because of emergencies or conditions so arising shall be specifically set forth, with the reasons therefor, by the Governor in his report for the fiscal year 1915.

24. In cases of emergencies arising subsequent to and unforeseen at the time of submitting the annual estimates to Congress, 10 per centum of the foregoing amounts shall be available interchangeably for expenditure on objects named, but not more than 10 per centum shall be added to any one item of the appropriation.

FORTIFICATIONS, PANAMA CANAL.

25. For the following for fortifications and armament thereof for the Panama Canal, to be immediately available and to continue available until expended, namely:

26. *Electric light and power plants:* For the purchase and installation of electric light and power plants for the seacoast fortifications on the Canal Zone, \$33,550.

27. *For buildings and material.*

(a) *Toro Point*—One concrete storehouse, \$5,000; 10 buildings, at \$900 each, \$9,000.

(b) *Miraflores or Gatun*—One storehouse, \$5,000;

(c) *Obstacles*—Two thousand five hundred coils of barbed wire, at \$3 each, \$7,500; 2,500 pounds of staples, at \$0.03, \$75.

(d) *Telephone line*—Twenty-two miles, at \$1,400 per mile, \$30,800. In all \$57,375.

28. *For maintenance of clearings and trails:*

Clearings, 4,370 acres, \$21,000; trails, 70 miles; \$900. In all, \$21,900.

29. For the purchase, manufacture, and test of ammunition for seacoast and land defense cannon, including the necessary experiments in connection therewith, and the machinery necessary for its manufacture at the arsenal, \$233,000; provided, that the Chief of Ordnance, United States Army, is authorized to enter into contracts or otherwise incur obligations for the purposes abovementioned not to exceed \$500,000, in addition to the appropriation herein made.

30. For the alteration, maintenance, and installation of the seacoast artillery, including the purchase and manufacture of machinery, tools, and materials necessary for the work, and expenses of civilian mechanics, and extra-duty pay of enlisted men engaged thereon, \$26,000.

31. For alteration, maintenance, and repair of submarine mine material, \$2,700.

32. *Fire control:* For the construction of fire control

stations and the purchase and installation of accessories therefor, \$50,000.

33. For construction on the Panama Canal Zone of barracks, quarters, storehouses, and other buildings necessary for accommodating the mobile army and Coast Artillery troops to be stationed there, including water, sewer, and lighting systems, roads, walks, and so forth; and for repairing and remodeling existing buildings to render them suitable for sheltering troops, \$700,000.

34. In all, specifically for fortifications and armament thereof for the Panama Canal, \$1,124,475.

35. Section 2. That all funds collected by the Government of the Canal Zone from rentals of public lands and buildings in the Canal Zone and the cities of Panama and Colon, and from the Zone postal service, and from court fees and fines, and collected or raised by taxation in whatever form under the laws of the Government of the Canal Zone, are hereby appropriated until and including June 30, 1915, as follows: The revenues derived from the postal service to the maintenance of that service; the remaining revenues, including any balances unexpended in prior years, after setting aside a miscellaneous and contingent fund of not exceeding \$10,000, to the maintenance of the public school system in the Zone; to the construction and maintenance of public improvements within the Zone; to the maintenance of the administrative districts, and for the expenses of the subdivisions of the Canal Zone after they are established under Section 7 of The Panama Canal Act; to the maintenance of Canal Zone charity patients in the hospitals of The Panama Canal, and to the maintenance of administrative district prisoners; provided, that, if the revenues of the Canal Zone Government are not sufficient for the purposes herein specified, the necessary part of the amounts appropriated for the departments of Civil Administration and Law, under Items 7 and 9, may be used therefor. A detailed and classified statement of all receipts and expenditures, without the duplication of items, under this paragraph, shall be submitted to Congress after the close of the fiscal year 1915.

36. Section 3. That during the fiscal year 1915, all moneys received by the Governor of The Panama Canal from any services rendered or materials and supplies furnished to employees of the United States or of the Panama Railroad Company, to the Panama Railroad Company, to the Canal Zone Government, to the Panama Government and to other departments of the United States Government, from hotel and hospital supplies and services; from rentals, wharfage, and so forth; from labor, materials, and supplies and other services furnished to vessels and to those unable to obtain similar labor, materials, supplies, and services elsewhere; from the sale of scrap and other byproducts of manufacturing and shop operations; from the sale of obsolete and unserviceable material, supplies, and equipment purchased or acquired for the operation, maintenance, protection, sanitation, and government of the Canal and Canal Zone; and from exchanges of typewriting, adding, and other machines, shall be credited to the appropriation from which payments for the materials, supplies, labor, or other services were originally made. Moneys heretofore or hereafter received from the sale of material, supplies, and equipment purchased or acquired for the construction of the Panama Canal, after deducting all expenses of assembling, sorting, storing, repairing, and selling such material, supplies, and equipment, which deductions shall be credited to the appropriations from which such expenses are paid, and the moneys received as a reimbursement for the expenditures incurred in constructing water works, sewers, and pavements in the cities of Panama and Colon, including interest on such expenditures, excluding payments on account of the expenses for maintenance of such water works, sewers, and pavements incurred under agreement with the Panama Government, and otherwise herein disposed of, shall be covered into the Treasury as miscellaneous receipts. After the Canal is opened for use and operation, the net profits accruing during the fiscal year 1915 from the operations herein authorized shall be covered into the Treasury of the United States, as provided for the profits accruing from the business authorized in Section 6 of The Panama Canal Act.

37. Section 4. That the consolidation of the functions of receiving, disbursing, and accounting for the funds of the Canal Zone Government and the Panama railroad operations on the Isthmus with the functions of receiving, disbursing, and accounting for the funds appropriated for The Panama Canal shall be and is hereby authorized in so far as may be practicable; provided, that separate accounts shall be kept of the transactions under each fund.

38. Section 5. That the collecting officers of The Panama Canal shall render their accounts in such detail, and shall transmit with their accounts to the accounting officers of the Treasury charged with the settlement thereof, all such papers, records, and copies relating to their transactions as collectors as shall be

prescribed in regulations approved by the President, and, in his judgment, not incompatible with the methods of accounting prescribed in the so-called Dockery Act approved July 31, 1894.

39. Section 6. That for the fiscal year 1916, and annually thereafter, the estimates of appropriations for The Panama Canal shall be submitted in detail, showing the amounts required for personal services, and the amounts required for material, including all supplies, under the heads of construction, maintenance, operation, sanitation, and civil government, and following each there shall be submitted notes giving in parallel column information which will show the number, by grade or classes, of officers, employees, and skilled and unskilled laborers proposed to be paid under each of said appropriations for the ensuing fiscal year and those paid at the close of the fiscal year next preceding the period when said estimates are prepared and submitted, also, in connection with each item for material and miscellaneous purposes other than salaries or pay for personal services, the amounts actually expended or obligated, quantities purchased, and prices paid for material or supplies during the entire fiscal year next preceding the preparation and submission of said estimates.

40. There shall also be submitted in connection with the foregoing information, statements of actual unit cost of all construction work done, and of estimated unit cost of work proposed to be done for the fiscal years included in the notes so required to be submitted with the annual estimates.

41. Section 7. That the appropriations herein made for The Panama Canal, other than those for fortifications, or balances thereof, may be available, during the last half of the fiscal year 1915, for expenditure for the purposes indicated by the several titles enumerated in the foregoing section, namely, construction, maintenance, operation, sanitation, and civil government, and be accounted for at the end of that year in such detail or classification, respectively, thereunder, as may be determined by the Governor of The Panama Canal or hereafter required by Congress, and such balances may, on and after January 1, 1915, constitute one fund for expenditure under said respective titles.

42. Section 8. That until the close of the fiscal year 1915, when any material supplies, and equipment heretofore or hereafter purchased or acquired for the construction of the Panama Canal, is no longer needed, or is no longer serviceable, it may be sold in such manner as the President may direct, and without advertising in such classes of cases as may be authorized by him.

43. Section 9. Appropriations herein for printing and binding shall not be used for any annual report or the accompanying documents unless the head of each executive department, or other branch of the public service, or the Commissioners of the District of Columbia making such a report, shall furnish copy to the Public Printer in the following manner: Copies of the documents accompanying such annual reports on or before the 15th day of October of each year, copies of the annual reports on or before the 1st day of November of each year, and complete revised proofs of the accompanying documents and the annual reports on the 10th and 20th days of November of each year, respectively. The provisions of this section shall not apply to the annual reports of the Smithsonian Institution.

44. Section 10. That Section 6 of the sundry civil appropriation Act approved August 24, 1912, is amended to read, as follows:

Section 6. That there shall be submitted hereafter, in the annual Book of Estimates, following every estimate for a general or lump sum appropriation, except public building or other public works constructed under contract, a statement showing in parallel columns:

First, the number of persons, if any, intended to be employed, and the rates of compensation of each, and the amounts contemplated to be expended for each of any other objects or classes of expenditures specified or contemplated in the estimate, including a statement of estimated unit cost of any construction work proposed to be done; and

Second, the number of persons, if any, employed, and the rate of compensation paid each, and the amounts expended for each other object or class of expenditure, and the actual unit cost of any construction work done, out of the appropriation corresponding to the estimate so submitted, during the complete fiscal year next preceding the period for which the estimate is submitted.

Other notes shall not be submitted following any estimate embraced in the annual Book of Estimates other than such as shall suggest changes in form or order of arrangement of estimates and appropriations and reasons for such changes.

45. Section 11. That no part of any money appropriated by this Act shall be used during the fiscal year 1915 for the purchase of any typewriting machine at a price in excess of the lowest price paid by the Government of the United States for the same make and substantially the same model of machine during

the period of the fiscal years 1913 and 1914; such price shall include the value of any typewriting machine or machines given in exchange, but shall not apply to special prices granted on typewriting machines used in schools of the District of Columbia or of the Indian Service.

46. Section 12. That it shall not be lawful hereafter to pay to any person, employed in the service of the United States under any general or lump sum appropriation, any sum additional to the regular compensation received for or attached to any employment held prior to an appointment or designation as acting for or instead of an occupant of any other office or employment. This provision shall not be construed as prohibiting regular and permanent appointments by promotion from lower to higher grades of employments.

47. Section 13. That the heads of executive departments and other Government establishments are authorized to prescribe per diem rates of allowance not exceeding \$4 in lieu of subsistence to persons engaged in field work or traveling on official business outside of the District of Columbia and away from their designated posts of duty, when not otherwise fixed by law. For the fiscal year 1916, and annually thereafter, estimates of appropriations from which per diem allowances are to be paid shall specifically state the rates of such allowances.

48. Section 14. That all sums appropriated by this Act for salaries of officers and employes of the Government shall be in full for such salaries for the fiscal year 1915, and all laws or parts of laws to the extent they are in conflict with the provisions of this Act are repealed.

Approved August 1, 1914.

Passes to Military Reservations.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., September 21, 1914.
HEADS OF DEPARTMENTS AND DIVISIONS:

Attention is invited to the fact that passes to military reservations for employes in the performance of their duties, should be requested in writing by the head of the employe's department or division.

GEO. W. GOETHALS,
Governor.

Notice to Mariners—Range Lights, Gatun Lake.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., September 8, 1914.
CIRCULAR No. 643-6:

Owing to the absence of night traffic in the Gatun Lake section, all of the gas lighted ranges from Gatun Locks to Gamboa will be extinguished on or about September 12, 1914, until further orders. This does not apply to the electric range at Gatun Locks for northbound vessels, to the electric range for southbound vessels, to the sections from Atlantic and Pacific ends to Gatun and Miraflores Locks, respectively, nor to any of the gas buoys or beacons.

GEO. W. GOETHALS,
Governor.

Accountable Officials.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,

BALBOA HEIGHTS, C. Z., September 21, 1914.
CIRCULAR No. 71:

Effective at once, Maj. Wm. R. Grove is designated an accountable official of The Panama Canal and the Panama railroad, vice Capt. F. O. Whitlock.

Approved: 11. A. A. SMITH
GEO. W. GOETHALS, Auditor, Panama Canal.
Governor.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,

BALBOA HEIGHTS, C. Z., September 21, 1914.
CIRCULAR No. 72:

Effective at once, Mr. Benj. L. Jacobson, Depot Commissary, is designated an accountable official of the Panama railroad.

Approved: 11. A. A. SMITH,
Auditor, Panama Canal.
GEO. W. GOETHALS,
Governor.

Increased Pay for Substituting Prohibited.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

CULEBRA, C. Z., August 28, 1914.
CIRCULAR No. 603-4:

1. The Sundry Civil Appropriation Act, approved August 1, 1914, contains the following clause:

Section 12. That it shall not be lawful hereafter to pay to any person, employed in the service of the United States under any general or lump sum appropriation, any sum additional to the regular

compensation received for or attached to any employment held prior to an appointment or designation as acting for or instead of an occupant of any other office or employment. This provision shall not be construed as prohibiting regular and permanent appointments by promotion from lower to higher grades of employment.

2. Section 16-e of Circular 603, issued April 1, 1914, is rendered null by this provision.

GEO. W. GOETHALS,
Governor.

Information Desired Concerning Transits and Levels.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., September 23, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

It is requested that statement be furnished to the surveying officer with as little delay as practicable, showing the following information with reference to transits and levels:

- Number on hand (kind and make).
- Present condition of instruments on hand.
- Number actually required for present use.
- Surplus instruments on hand, if any.
- Will additional instruments be required at a later date, and if so, when and what class?
- When is it expected that instruments now in use can be released?

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, Panama Railroad Company.

Transportation For Employees Whose Services are Terminated.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., September 26, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

Hereafter, when notifying an employe that his services are to be terminated, he should be instructed to make application immediately for steamship transportation, if he intends to leave the Isthmus, indicating the boat and date upon which he desires to sail. Upon receipt of this information, transportation request will be issued immediately and reservation arranged by this office. If the employe fails to purchase his ticket within four days from the date transportation request is issued, reservation will be canceled. Transportation requests must be delivered to employe promptly, and the fact that they must purchase tickets within four days, in order to hold the reservation, should be impressed upon them.

The above refers only to employes whose services are to be terminated.

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, Panama Railroad Company.

Care of Official Records.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., September 24, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

There seems to be some misunderstanding regarding the care and manner of keeping official records after they have served their current use. In several instances lately, records have been shifted from one place of storage to another, until they have become disarranged, so that they were practically inaccessible or had lost their identity.

Such laxity is inexcusable. If records have no permanent or historical value, they should be recommended for destruction on the form prescribed therefor, but under no circumstances should they be transferred from one division to another, nor placed in storage away from the office to which they belong, without authority from this office.

This is also applicable to records in the Administration Building, which in some instances heretofore, have been indiscriminately placed in the basement for storage, without first arranging with the Record Bureau to receive them, in order that proper storage space should be allotted.

GEO. W. GOETHALS,
Governor.

Accidents and Errors in Work for Other Divisions.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., September 25, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

Objections have been raised by some departments and divisions to being charged for accidents and errors which have occurred while work was being done for them by another department or division. Faulty castings made by the Mechanical Division, and other errors, are billed back to that division and taken up by them in their overhead accounts, which are eventually prorated to the work done. However, the construction divisions have no similar method of disposing of ex-

penses in connection with accidents, etc., which may occur while they are performing work for other divisions. As it is assumed that the same care is exercised by a division in doing work for another as it would exercise in work of its own, I desire that expenditures in connection with work of this character be charged to the work being performed.

GEO. W. GOETHALS,
Governor.

Services of Stenographers After Hours.

THE PANAMA CANAL,
OFFICE OF EXECUTIVE SECRETARY,
BALBOA HEIGHTS, C. Z., September 24, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS IN THE ADMINISTRATION BUILDING:

Officials in the building requiring the services of stenographers after regular office hours, or at night, are requested to notify the clerk in charge of the Correspondence Bureau prior to 5 p. m., when such services are required.

Requests for services of this character should be limited to emergency work and not be made habitually.

Stenographers will be assigned to this duty in the order in which their names appear upon a special roster, arranged alphabetically, which will be kept for this purpose. Any stenographer who has worked three or more hours of overtime after 5 p. m. since his name was last reached on the roster will not again be called. Report overtime worked to Mr. Luedtke.

C. A. McILVAINE,
Executive Secretary.

Approved:
GEO. W. GOETHALS,
Governor.

Messenger Service in Administration Building.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., September 29, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

Two messengers are today being located at each of the six annunciator stations in the building, and will be available for general messenger service from now on. In assigning messengers to the various stations an effort has been made to place at each station one who are most familiar with the work of the departments and divisions to be served by the station.

A messenger force to collect and distribute papers will be established in a few days, or as soon as arrangements have been completed for the new mailing division which will serve the entire building, full details of which will be furnished at a later date.

By direction of the Governor.

C. A. McILVAINE,
Executive Secretary.

Superintendent Clubhouses and Playgrounds.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, September 26, 1914.

To all concerned—Effective September 26, Mr. F. M. M. Richardson is appointed Superintendent of Clubs and Playgrounds, vice Mr. A. B. Dickson, resigned.

C. A. McILVAINE,
Executive Secretary.

Stationery Storeroom.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,
BALBOA HEIGHTS, C. Z., September 22, 1914.

CIRCULAR No. 198:

To heads of departments and divisions—A stationery storeroom is being installed in the basement of the new Administration Building, Balboa Heights, in which will be carried a general line of stationery supplies, as well as all special forms in use by the various departments.

It is expected that all stationery forms, pencils, inks, blueprint paper, etc., as well as small items of nonexpendable property, will be procured from this storeroom. All stationery supplies, or material of the character abovementioned, which is in excess of your September requirements, and which is now in your possession, should be turned into this storeroom at once for reissue.

In ordering supplies, use shall be made of foremen's order books, expendable and nonexpendable property being ordered on their respective forms. There is now a considerable stock of stationery on hand, which has already been expended, and for the balance of the month no foreman's order will be required for this material, but for new stock received during the current month, you will be required to execute a foreman's order. With a view to reduce the number of orders to a minimum, and yet conform to the purpose for which the storehouse was established, you are requested to anticipate your requirements for a period of 10 days,

or two weeks, but in any event to confine your orders to original units or packages in so far as is consistent with economy and efficiency. In the case of special forms, used exclusively by one department or division, they will be requisitioned by the storekeeper and carried in stock by him, but upon receipt of the material, foreman's order for the entire amount may be drawn by the department or division for which the forms were ordered, but only such quantity will be withdrawn for use as will answer a 30-day period at most, the remainder to be kept in the storehouse and obtained as requirements demand. This class of supplies will be withdrawn on memoranda receipts, and not on foreman's orders. General stock items will be ordered by the storekeeper on such quantities as deemed necessary and issued to all departments and divisions.

Heads of departments and divisions will designate such person or persons as they desire to sign foreman's orders for stationery, and who may be called upon to submit a complete list of the material, forms, supplies, etc., used by this particular division, as well as an approximate estimate of the consumption of same for a three months' period. Departments using draft material should anticipate their requirements at as early date as possible, as much of this material must be ordered from the United States.

R. E. WOOD,
Chief Quartermaster.

Postal Savings System Abolished.

BALBOA HEIGHTS, C. Z., September 24, 1914.

CIRCULAR No. 251:

To all postmasters—You are advised that the Executive Order of September 8, 1911, establishing the postal savings system in the Canal Zone has been repealed by a second Executive Order signed by the President September 5, 1914, to be effective from and after October 1, 1914.

Therefore, from and after the abovementioned date, Canal Zone postmasters will receive no more deposits in the postal savings bank. All accounts opened in accordance with the order of September 8, 1911, and remaining open on October 1, 1914, shall continue as prescribed in said order and by the regulations adopted by the board of trustees, until they are finally closed by the withdrawal of all deposits.

Effective October 1, 1914, all postmasters will discontinue sending to this office the daily postal savings statement. The regular weekly statement showing postal savings certificates paid, will be made to the Auditor until all accounts are closed. Withdrawals from the postal savings deposits may be met by the transfer of funds from the money order accounts in the regular manner, or upon request this office will have funds furnished by the Collector.

At the close of business September 30, 1914, postmasters will return by registered mail to the Collector of The Panama Canal at Balboa Heights, all unused postal savings certificates remaining on hand accompanied by a list showing number of each series and total value. Copies of this list will also be sent to the Auditor and to the Director of Posts.

JOHN K. BAXTER,
Director of Posts.

Deposit Money Orders.

THE PANAMA CANAL,
OFFICE OF DIRECTOR OF POSTS,
BALBOA HEIGHTS, C. Z., September 24, 1914.

CIRCULAR No. 252:

To all postmasters—In accordance with an Executive Order signed by the President, September 5, 1914, for the accommodation of persons desiring to deposit their savings in the post-offices of the Canal Zone, money orders may be issued in the Canal Zone payable to the purchaser at the office of issue, for which no fee will be charged.

This order was made effective from and after October 1, 1914.

DEPOSITORY OFFICES.

Section I.

1. All money order post-offices in the Canal Zone are designated as postal savings depository offices.

DEPOSITORS.

Section II.

1. Deposits may be made by any person of the age of 10 years, or over, in his or her own name, and by a married woman in her own name and free from any control or interference by her husband.

2. Deposits must be made by depositor in person; deposits will not be received in the name of any corporation, association, society, firm, or partnership, or in the name of two or more persons jointly.

3. Except when otherwise authorized by the Director of Posts, deposits will be accepted only from a person who is a resident of the Canal Zone, or who is an employe of The Panama Canal or the Panama Railroad Company.

DEPOSITS.

Section III.

1. Postal savings deposits will be evidenced by non-

transferable and nonnegotiable money orders to be issued without the payment of a fee in even denominations of \$5 and multiples thereof, payable only at the office of issue.

2. All applications for deposit money orders, the original orders and their corresponding advices, will be stamped across the face by the issuing clerk with the special rubber stamp "Postal savings, nontransferable." This should be done before the issue of the money order. Employees will be required to place their metal check numbers on all applications for deposit money orders.

3. The advices of deposit money orders will be placed in a special file until they are paid, when they will be stamped with the date of payment and transferred to the regular file of "Paid" money order advices.

4. Postmasters must issue the smallest possible number of money orders on account of a single deposit.

5. A single deposit money order cannot be issued for more than \$100.

6. Deposit money orders are valid until paid.

7. Whenever necessary, postmasters will require a depositor to place on the back of the corresponding advice of a deposit money order, his signature, metal check number, age, nationality, or other data for proper identification.

WITHDRAWAL OF DEPOSITS.

Section IV.

1. Deposit money orders will be paid out of the daily money order receipts at post-offices. The rules governing the payment of ordinary money orders, not in conflict with these regulations, will also apply to the payment of deposit money orders.

2. The amount of reserve which postmasters are authorized to keep on hand shall be fixed by the Director of Posts, with the approval of the Executive Secretary, and any person desiring to withdraw large sums should notify the postmaster of the depository office at least three days in advance.

3. When a postmaster is unable to meet the payment of money orders presented at his office, he will make application to the Director of Posts for the amount necessary, and the funds will be forwarded to him by the Collector of The Panama Canal.

4. Payment of deposit money orders may be made by a Collector's check, when an employee is going on leave or has resigned, on request to the Director of Posts from the post-office where the deposit was made. A Collector's check will not be issued for funds that have been on deposit less than 30 days. A depositor is also entitled to apply for and receive one Collector's check for not less than \$100, not oftener than once in three months.

5. In case of the death of a depositor, money orders to his favor will be paid to the duly authorized executor or administrator of his estate upon authority of the Director of Posts.

ACCOUNTS.

Section V.

1. Postmasters will carry as a separate memorandum in their money order cash books the amount of deposit money orders issued each day, and also report same in the first column of their daily money order statement (Form 6019-a) to the Director of Posts. The total amount of deposit money orders issued for each semimonthly period will also be reported as a separate item on the recapitulation sheet of the regular money order statement to the Auditor. This item will be placed under "International issues," which should be changed to read "Deposit issues."

2. The money order account will not be changed in any way by reporting the amount of deposit money orders as a separate item, as this is intended to be only a record of the amount of deposit money orders issued. Both deposit and regularly issued money orders will be included in the total amount of money orders issued in both the daily cash book and the semimonthly statement to the Auditor.

3. When listing deposit money orders on the semimonthly statement to the Auditor, postmasters will mark in the first space of the column for fees the letter D to indicate the issue of a deposit order.

4. Postmasters will list paid deposit money orders on a separate sheet of their semimonthly statements to the Auditor. The total amount of deposit money orders paid for each semimonthly period will be placed on the recapitulation sheet of the regular money order statement to the Auditor under "International paid," which should be changed to read "Deposit paid." This will not change the total amount of money orders paid for the period, which should include both deposit and regular money orders.

When transacting deposit money order business, postmasters will be governed by all rules and regulations of the money order system now in force that do

not conflict with the instructions of this circular and are applicable to local conditions.

JOHN K. BAXTER,
Director of Posts.

Panama Railroad Correspondence.

THE PANAMA CANAL,

THE PANAMA RAILROAD COMPANY,

OFFICE OF SUPERINTENDENT,

COLON, R. P., September 24, 1914.

CIRCULAR No. 450:

To all concerned—Referring to my circular No. 448, September 23, advising that October 1, 1914, the freight and passenger department will be abolished.

On and after that date all loss and damage and over-charge claims, and correspondence pertaining thereto, will be addressed to the Local Auditor.

All correspondence pertaining to personal injury claims should be addressed to the Superintendent.

C. H. MOTSETT,
Superintendent.

Sightseeing Trips of the "Louise" through Culebra Cut Discontinued.

THE PANAMA CANAL,

THE PANAMA RAILROAD COMPANY,

COLON, R. P., September 23, 1914.

CIRCULAR No. 449:

All concerned—On and after September 27, the sightseeing and pleasure trips made by the motor boat Louise through Culebra Cut will be discontinued. Agents will see that all literature advertising this service in their possession, or posted at stations, is destroyed.

C. H. MOTSETT,
Superintendent.

Examination by Board of Local Inspectors.

BOARD OF LOCAL INSPECTORS,

BALBOA HEIGHTS, September 28, 1914.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 308, on Wednesday, October 7, 1914, beginning promptly at 2 p. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability to properly operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m. at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m. at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m.; and at Balboa, at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

By direction of the chairman of the board.

W. H. HYDE,
Clerk, Board of Local Inspectors.

New Pay Car Schedule.

THE PANAMA CANAL,

OFFICE OF THE PAYMASTER,

BALBOA HEIGHTS, C. Z., September 29, 1914.

The Panama Canal pay car will travel on the 9th, 10th and 11th of October, and on the same days thereafter, until further notice, using the following approximate schedule:

9TH.

From Colon to Margarita fortifications, Coco Solo breakwater, scrap yard, Mount Hope depot, dry dock shops and new coaling station.

10TH.

From Panama—Naos Island, 7 to 7.30. Brakwater dumps, 7.35 to 7.50. Balboa yard office, 7.55 to 8.10. Permanent buildings (north of Balboa commissary), 8.10 to 8.45. Balboa shops (beginning at machine shop), 9 to 10.30. Gangs from Big Tree to Panama, 10.35 to 11.05. Panama yards for lunch. Dry dock, east side, 12.50 to 1.10. Foundry, 1.12 to 1.30. New pier, 1.45 to 2. Balboa material and lumber yard, 2 to 2.20. Corozal, 2.30 to 3. Miraflores Locks, 3.20 to 4.20. Return to Panama.

11TH.

From Panama—Pedro Miguel, 6.40 to 7.05. Paraiso

shops, 7.12 to 7.50. Culebra, 8 to 8.20. Empire, 8.23 to 8.40. Las Casca's, 8.43 to 8.48. Gamboa bridge, 10 to 10.15. Radio station, 10.25 to 11.40. Gatun, 11.20 to 1. Miraflores Hill, 2.30 to 3. Miraflores transformer house, 3.20 to 3.40. Return to Panama.

The pay office at the new building is prepared to pay all time vouchers and gold and silver tickets of employees working in and around the new building, but will not be prepared to make heavy silver payments until the new vaults are ready to store silver, about the middle of October. Employees, especially silver men, not located at the new building should wait for the pay car, or go to the Ancon office until the middle of October.

JOHN H. McLEAN,
Paymaster.

Proposals for Construction of Railroad Station at Balboa Heights.

THE PANAMA CANAL,

OFFICE OF CHIEF QUARTERMASTER,

Sealed proposals will be received at the office of the Chief Quartermaster, Panama Canal, Balboa Heights, C. Z., for the erection, by contract, of the new Panama railroad station at Balboa Heights. Bids will be received until 3 p. m., October 17, 1914, when they will be opened in the office of the Chief Quartermaster.

The buildings are to be constructed of concrete blocks and stucco, with reinforced concrete foundations and umbrella shed. The Panama Canal will furnish all material on cars at the site of the work, and the contractor will be required to furnish all labor. Plans and specifications may be obtained at the office of the Chief Quartermaster, Balboa Heights. A deposit of \$15 will be required to insure their return.

Each bidder must accompany his proposal with a certified check, cash, or money order for 10 per cent of the amount bid, as a guarantee of his acceptance of the contract.

Bids should be marked "Proposal for Panama railroad station."

The Panama Canal reserves the right to reject any or all bids.

R. E. WOOD,
Chief Quartermaster.

Sale of Old French House Boat.

OFFICE OF CHIEF QUARTERMASTER,

BALBOA HEIGHTS, C. Z.

Sealed bids will be received at this office until 3 p. m., Tuesday, October 6, 1914, for house boat, rebuilt at Balboa shipways in 1907 from old French barge; steel hull, equipped for house boat purposes; length, 52 feet four inches; beam, 18 feet; depth, seven feet two and one half inches; draft, four feet; gross tonnage, 100; displacement, 125.6 tons. House boat has no number or name; is located at Balboa, and may be inspected by application to the Board of Local Inspectors, Ancon. Right is reserved to reject any or all bids. Bids should be addressed to the Chief Quartermaster, Balboa Heights, Canal Zone, plainly marked, "Proposal to purchase old French house boat, to be opened October 6, 1914."

Misdirected Letters.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts, and may be procured upon request of the addressee:

Atney Johnie	McDonald, D. S.
Baldinger, Baron von	McLoud, O. O. (paper)
Bartlett, W. J.	Morrison, Henry
Brooks, J. C.	Moustafer, Al
Copeland, Lewis	Murphy, Mrs. T. E.
Cull, Geo.	Nurse, Clemmott
Dupont, Julius	Parry, F. M.
Elmore, C. M.	Patterson, J. E. (book)
Fenner, C. W.	Pender, W. J.
Hart, Charles F.	Poland, George
Hellicksen, L. A. (paper)	Ransbottom, E. C. (paper)
Hitt, M.	Roderick, Bertie
Herrick, Jack	Ruggles, Mrs. Frank C.
Heslin, Mrs. T. H.	Shea, Phillip L.
Johnson, Harry	Smith, Jas. D.
Jones, Joseph	Smith, Richard B.
Kinninmonth, A. B.	Spahr, Frederick
Krout, S. E. (paper)	Stewart, Oscar
Kyle, Thomas	Sudson, Mrs. (paper)
LeJeune, J. D.	Wilcox, John R.
Levy, Felise (2)	Wilkins, G.
Lynch, Carlos C. (paper)	Wourts, Mrs. Lizzie

Married.

DUVAL-MYERS—At Ancon, on Thursday, September 3, Miss Ola Myers of Olney, Ill., to Mr. William F. Duval of Clayton, Md., Judge William H. Jackson officiating.

AANSTOOS-ROBINSON—At Springdale, Conn., on September 10, Miss Helen Gertrude Robinson of Springdale, Conn., to Mr. Theodore Arnold Aanstoos of New Rochelle, N. Y. Canal Zone residence, Cristobal.

CANAL CLUBHOUSES.

Activities of the Young Men's Christian Association.

BALBOA.

A team of checker players from Cristobal will come to Balboa on Saturday evening, October 3, to play the Balboa checker players.

The Balboa basketball team will play the Ancon basketball team on the open air court, Wednesday evening, September 30, at 5.30.

There will be a farewell reception to Mr. George Adams, the former secretary of the Balboa Y. M. C. A., on Saturday night, October 3, beginning at 8 p. m. There will be an entertainment and refreshments. Everybody is invited to attend and admission will be free to all.

COROZAL.

The following high scores were made on the bowling alleys during the past week: *Tenpins*—Seeley, 312; White, 205, 204. *Duckpins*—Kite, 107; Walker, 102; Ryan, 100.

Physical Director Woolworth has been appointed to take Secretary Dwelle's place while the latter is on vacation.

Considerable activity is seen at Corozal in athletics and aquatic practice; most of the men are training hard for the events at the Panama-Pacific exposition at San Francisco in 1915. Physical activities have also taken on renewed interest.

A list of new library books to be ordered is now complete.

The standing of the basketball league to September 23, 1914, was, as follows:

Team.	Won.	Lost.	P. C.
French.....	4	1	.800
English.....	4	2	.666
Germans.....	2	2	.500
Japs.....	1	2	.333
Russians.....	0	4	.000

PEDRO MIGUEL.

The bowling scores for the past week were, as follows: *Tenpins*—Oetli, 210; Farrar, 202.

Duckpins—Butholomew, 120; Holloway, 105, 102; Piper, 105, 103; Davis, 101, Whiston, 101; Bartlett 108, 106; Anderson, 102; Abramson, 103; MacDonald, 10, 109, 101.

Two duckpin games were played with Corozal during the past week. The results were, as follows:

First game—Corozal, 443, 441, 426; Pedro Miguel, 409, 448, 410. Second game—Corozal, 425, 456, 466; Pedro Miguel, 416, 444, 445.

Under the leadership of Mr. Westman, a wrestling class is being started. The first class was held on Tuesday evening, September 29. All members of the clubhouse are privileged to join; there is no cost connected with it.

GATUN.

The open air concert given by the Tenth Infantry band on Thursday evening, September 20, was attended by a large number of the civilians and soldiers of Gatun. An impromptu entertainment was held in the lobby of the clubhouse afterward. Corporal Foster, the rag-time pianist, played several selections; Privates Daniels and Conley sang vocal solos; Messrs. Smith and VanDyke gave an imitation of a violin duet, and Private Dougherty gave a buck and wing dance.

The winners at the "Cream puff bowling tournament" on Friday evening, September 25 were: Mr. W. Housel and Mrs. M. Conley, for first prize; Mr. E. Walsh and Mrs. M. Conley, second, and Mrs. A. Kjellander and Mrs. M. Conley, third. Among others who participated were Messrs. E. T. Gilbert, F. G. Smith, M. Conley, C. Dustheimer, E. Housel, F. Chambers, H. McPherson; and among the lady bowlers were Mrs. De la Latorre, Mrs. W. Tricker, Mrs. E. Howard, Mrs. W. Housel, Mrs. J. Walsh, Mrs. E. Gilbert, and Miss Kuller. Corporal Foster entertained at the piano during the evening.

On Saturday evening, September 26, an informal song service was held for the soldiers. The quartet, Messrs. Conley, Daniels, Foster, and Baker sang several numbers. This was followed by several wrestling matches between the following contestants; Privates Apeheff, Esclier, Thompson, Valliancourt, Joblonka and Gonda.

Mrs. W. Crook of Culebra sang two solos at the song service on Sunday evening, September 27. Mr. F. M. Ray gave a piano solo. The special music for next Sunday will be celo solos.

CRISTOBAL.

Mr. Fletcher Stevens, custodian of Brazos Brook reservoir, addressed the discussion club on Friday, September 25, on "Canal Zone agriculture." Mr. Stevens stated that truck gardening should be a paying venture in this section of the Isthmus, as he has found no difficulty in growing lettuce, beans, peas, beets, squash, and other vegetables. In regard to sugar cane, pineapples, bananas, and other tropical fruits,

Mr. Stevens was even more sanguine, his experience along with that of others present, having been that tropical fruits can be grown to great advantage in the Canal Zone and adjacent country.

A class in English for Germans has been started. Ten men are enrolled, with Mr. J. W. Weaver, as instructor.

Two basketball games were played with Corozal on Saturday, September 26. Corozal took the first game, 42 to 28; the second game was won by Cristobal, 49 to 14. The Balboa Y. M. C. A. has challenged Cristobal to a match at basketball, to be played at Cristobal on Saturday, October 3.

The "Bachelors" defeated the "Henpecked" in three games of tenpins on Saturday, September 26. Scores follow:

<i>Bachelors.</i>			<i>Henpecked.</i>		
Henri.....	179	207	224	Buser.....	145
Russell.....	161	163	168	Bevington...	137
Strong.....	167	200	113	Collins.....	131
Gibson.....	211	150	188	Pinney.....	173
Peterson.....	130	136	170	Burns.....	117
	848	856	863		703
					724
					774

The following men rolled high scores on the bowling alleys for the week ending September 26:

Tenpins—Collins, 246; Henri, 224; Russell, 229; Pinney, 201; Peterson, 214. *Duckpins*—Henri, 110, Gibson, 108; Sloan, 101; Russell, 101.

COMMISSARY DEPARTMENT.

Transfer of Accountability at Commissaries and Line Hotels.

THE PANAMA CANAL, SUPPLY DEPARTMENT.

BALBOA HEIGHTS, C. Z., September 23, 1914.

CIRCULAR No. 34-2:

To all district quartermasters, commissary storekeepers, and hotel stewards of line hotels—The accountability for the property at line hotels and retail commissaries will be transferred to the district quartermasters in whose district the hotel and commissary are located. Chief stewards and commissary storekeepers will prepare their requisitions, as heretofore, but instead of mailing them to the Chief Quartermaster, they will send them to the district quartermaster, who will forward them to the proper place where they are to be filled. The depot quartermaster and storekeepers will render invoices for hotel and commissary equipment against the district quartermaster concerned.

For the information of the Auditor and the cost-keeping accountant, all invoices must show to which hotel or commissary the delivery was made, in order that at these invoices will not be confused with deliveries to the quartermaster branch.

This procedure will become effective October 1, 1914.

R. E. WOOD,
Chief Quartermaster.

Additions to Stock.

Soap, Life Buoy, cake.....	\$0.04 1/2
Hats, women's outing, ea.....	.46

Pork, loin chops or roast, lb.....	.24

*Prices of all articles on this list sold to commercial steamship lines and foreign naval vessels will be increased by 20 per cent. Ice will be sold to commercial steamship lines and foreign naval vessels at 33 cents

per 100 pounds delivered on dock at Colon or Cristobal and at 39 cents per 100 pounds delivered on dock at Balboa.

Regular established steamship lines with agencies on the Isthmus will be allowed a discount of nine per cent on all purchases.

Cold Storage Prices.

The following changes have been made in the retail prices of cold storage provisions for the week beginning October 1, 1914:

Frankfurter sausage, increased to 15 cents per pound.

Roquefort cheese, increased to 45 cents per pound. Swiss cheese, reduced to 27 cents per pound.

Celery, reduced to 4 cents per pound. Cucumbers, reduced to 3 cents per pound.

Rhubarb, reduced to 2 1/2 cents per pound. Apples, reduced to 6 cents per pound.

Lemons, reduced to 13 cents per dozen. Peaches, reduced to 6 cents per pound.

Plums, reduced to 5 cents per pound. Tropical sweet potatoes, kale, and grapes are out of stock. Yeast, at 2 cents per cake, has been added to stock.

Rainfall, September 1 to September 26, 1914, Inclusive.

MOVEMENTS OF OCEAN VESSELS.

(Week ending 8 a. m., September 27.)

Service Around South America.

The steamship *Potosi* of the Pacific Steam Navigation Company passed through the Canal on September 25, on its way from Liverpool to the west coast of South America. It discharged cargo for a day at Balboa, and is now lying in Panama Bay, making preparations for sailing. Its itinerary will be down the west coast, through the Strait of Magellan, up the Atlantic coast of South America, and across to Liverpool. This is a route over which the Pacific Steam Navigation Company contemplated a fortnightly service, using large passenger vessels of the class of the *Orcoma*, but the use of many of its larger vessels by the British Government as transports in war has caused the indefinite suspension of the plan. The *Potosi*, which is primarily a cargo vessel, with accommodations for 12 saloon passengers, will follow the route without definite schedule.

Boston-Pacific Line.

The steamship *Atlantic*, which passed through the Canal on September 18, on its way from Boston to East San Pedro, is to be in regular service in what will be known as the "Boston-Pacific Line." On its outward voyage, this vessel carried a miscellaneous cargo of manufactured articles, including steel, shoes, and machinery; on its return, it will carry lumber, fruit, wine, etc. The *Pacific*, another new vessel for service in this line, has recently completed its trials and is due to sail from Boston about October 1.

Sailing of Vessels in Regular Service With the Isthmus.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing about every six days, direct, between Colon and New York by the United Fruit Company and the Royal Mail Company, sailings via Kingston weekly and fortnightly, respectively; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

NEW YORK TO CRISTOBAL.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

No communication either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Canal Record Index.

The index to Volume VII of THE CANAL RECORD, in form suitable for binding, will be ready for distribution shortly. It will be sent free, on application, to such persons, institutions, libraries, etc., as desire to preserve their copies of THE CANAL RECORD in book form. Application should be made to Mr. John K. Baxter, Chief, Division of Civil Affairs, Balboa Heights, C. Z.

Artillery Companies Transferred to Fort Amador.

The 45th and the 144th companies of the Coast Artillery Corps, which had been in temporary quarters at Empire since their arrival on the Isthmus on September 18, moved on October 5 to an encampment at Fort Amador, near the land end of Naos Island breakwater. They have been combined in one command with the 81st company, which is quartered at Fort Grant.

The 21st company, which also arrived on the Isthmus on September 18, is still in temporary quarters in building No. 2, Cristobal. The companies at Toro Point are the 44th and the 119th.

Commissary Supply Trains to be Eliminated.

The extra train for carrying supplies to the line commissaries from Cristobal, and that for returning the empty cars to Cristobal for reloading, are to be abolished when the new schedule of the Panama railroad, No. 20, goes into effect. Instead, solid cars will be handled daily to the principal main line villages in the regular tonnage freight, No. 101, leaving Colon at 2 a. m., and arriving at Panama at 4.15; and twice a week to the villages on the Las Cascadas branch.

Perishable supplies, bread, and laundry for the villages on the branch line will be loaded in peddle cars daily, sent out on train No. 101, dropped off at the dump north of Miraflores tunnel, and picked up by the passenger train leaving Panama at 5 a. m., for Las Cascadas. This train, on its return trip to Panama, will drop these cars at the tunnel dump, and they will be picked up by the regular freight train,

No. 102, which will also take back to Colon the solid cars dropped at the principal main line towns by No. 101.

Perishable supplies for the minor points on the main line, including Mount Hope, Mendi, Lirio, Frijoles, Darien, Gamboa, Gamboa stockade, New Culebra, and Miraflores Locks, and extra deliveries for the principal towns, will be handled in a peddle car attached to the regular passenger train leaving Colon at 7.10 a. m., and dropped off like express matter at each stop for which there is a consignment.

Rooms at New Gatun and Empire.

Figures gathered by the police division show that on August 31, there were at New Gatun, out of a total of 206 houses 1,310 rooms with tenants, and 783 without. At Empire on the same date, there were, out of a total of 287 houses, 483 rooms with tenants, and 1,722 without. These figures do not include Panama Canal quarters.

Panamantan Customs Officers May Inspect Consignments to Colon at Cristobal Docks.

A provisional arrangement has been entered into between the Government of the Canal Zone and the Republic of Panama by which officers of the customs service of Panama are allowed to go on the wharves at Cristobal for the purpose of checking and examining cargo, consigned to Colon on which the duty has been paid. This has been effected especially for the benefit of consignees in Colon of perishable merchandise. The former arrangement was that all such goods unloaded on the wharves in Cristobal should be transferred to the freight house of the Panama railroad at Colon, and checked and claimed there. This was at all times a cause of delay, and the objection to the procedure has increased recently, for the reason that vessels from New Orleans have been required to moor at the new ratproof wharves, all of which are in Cristobal. In instances of unusual urgency, the collector of the port of Colon had been issuing permits for the release of consignments without examination, but this was disadvantageous to the Republic of Panama since it allowed no check of the cargo by its officers to determine whether the shipments released corresponded with the invoices on the basis of which duty was paid and permits for release were issued.

The new arrangement simply allows the same inspection on the wharves as was formerly made at the freight house. The authority of the Panamanian inspectors on the wharves extends only to cargo for delivery in Colon; it has nothing to do with transit cargo, cargo consigned to The Panama Canal or the Panama Railroad Company, or to cargo in transit for the city of Panama. The latter is examined on arrival at Panama, as heretofore. The Government of the Canal Zone retains complete administrative control of the docks.

TRAFFIC THROUGH THE CANAL

Has Exceeded Anticipations Notwithstanding International Conditions—Summary.

In view of the general check on business over the world in consequence of the European war, and the interference by war vessels with the shipping of belligerent nations, the traffic through the Canal, in the first month and a half of its commercial service, has exceeded anticipations. From August 15 to October 1st, 81 vessels had passed through the Canal, and as traffic has been unusually heavy during the past week, the total number of transits to date is approximately 100.

During the month of August, 12 vessels passed through from the Atlantic to the Pacific, and 12 from the Pacific to the Atlantic, a total of 24. Twenty of these were American vessels, two were British, one was Danish, and one a Peruvian naval vessel. The first British vessel was the *Daldorch*, which passed from the Pacific to the Atlantic on August 22. The Danish vessel, the *Transvaal*, went from the Pacific to the Atlantic on August 31. The Peruvian gunboat *Teniente Rodriguez*, which went from the Atlantic to the Pacific on August 18, was the first foreign vessel to use the Canal.

In September, the British vessels took first place, numbering 27. The number of American vessels in that month was 25. The first Dutch vessel to use the Canal, the *J. B. Aug. Kessler*, passed from the Atlantic to the Pacific on September 24, and on the following day occurred the first use of the Canal by a Norwegian vessel, when the *Capella I, Hidalgo, Juarez, and Morelos*, comprising a whaling fleet, went to the Atlantic from the Pacific. Counting these as separate vessels, the total number of Atlantic, or northbound vessels, was 30, and of Pacific, or southbound, 27. No ships of other nationalities than the above-mentioned went through the Canal during the month, and to date it has not been used by vessels of other nations than those specifically named above.

To October 1, the total net Canal tonnage carried from the Atlantic to the Pacific through the Canal, including that handled in 58 barges, prior to the formal opening of the Canal, was 144,343 tons; the aggregate net Canal tonnage transported from the Pacific to the Atlantic, including 57 barges, was 153,312 tons, making a grand total of 297,655 tons. The total tolls collected, including pilotage on vessels stopping at the terminal ports, amounted to \$369,706.29.

Whaling Fleet Passes Through the Canal.

The steamships *Capella I, Hidalgo, Juarez, and Morelos*, which sailed for Sandfjord, Norway, from Colon, on September 28, after passing through the Canal, comprise a whaling fleet which had been operating in Magdalena Bay, Mexico. The *Capella I* is the principal vessel, about 350 feet in length, equipped with apparatus for dissecting and flensing the

whales, and rendering the blubber; the three other vessels, each 100 feet in length, are the whalers proper, which capture the whales and tow them alongside the *Capella I*. The smaller vessels are capable of a speed of about 12 knots, which enables them to overtake and capture a whale ordinarily within an hour or so of sighting it. The three whalers averaged about four captures a day, together, but one of them made a record of six "Humpbacks" in one day. The kind of whales taken in Magdalena Bay included "Humpbacks," California "Grays," and "Sulphurbottoms."

The fleet had about eight months of hunting, which resulted in the production of about 20,000 barrels of oil (3,400 tons), valued at \$300,000. The *Capella I* carries a crew of 40 men, and the whalers nine each. By using the Canal, in place of traveling around South America on the home voyage, the master of the fleet estimated that he would save between \$25,000 and \$30,000 in actual expenses of travel, after paying tolls amounting to \$4,012. The fleet will arrive home about four months earlier than by the longer route. It is expected that it will return to the Canal for another season of whaling in Magdalena Bay about November, 1915.

Mail for Vessels Using the Canal.

Mail or cablegrams for officers or crews of vessels which will call at the Canal terminal ports or pass through the Canal should be addressed to Cristobal or Balboa, Canal Zone, with the name of the vessel written plainly. If practicable, the probable date of arrival should be given.

In case of vessels of regular lines, with offices or known representatives on the Isthmus, mail should be addressed in care of such office or representative.

Where there are no such representatives of the vessel on the Isthmus, to the knowledge of the sender, mail may be addressed "Care of captain of the port" (Cristobal or Balboa), but registered mail will be held at post-office, as the captains of the port may not assume responsibility for its delivery.

The use of the offices of the port captains for the transmission of communications is not solicited, but when it will be of service, it will be readily accorded. The arrangement has been made for the convenience of shipping people, and is in line with the principle that the offices of the port captains are clearing houses for communications with vessels.

Keeping Tab on the Progress of Vessels through the Canal.

A wall board, 12 feet long by three feet high, bearing a map of the Canal and its approaches, painted on the wood on a scale of 1:12,000, has been mounted in the port captain's office at each end of the Canal, and push pins, standing for ships, will be used to give a visual representation of the status of traffic at any time.

Upon the departure of a vessel from either terminal to go through the Canal, the time of its departure is telephoned immediately to the port captain's office at the other terminal, and its arrival at and departure from each of the locks, as well as Culebra Cut, is reported at the time to both port captains, by telephone or radio. The times of these arrivals and departures are recorded on blanks prepared for the purpose, which are the same as those for pilots' reports, and at the same time the push pin standing for any vessel reported

is moved to a corresponding location on the wall board.

From the reports, and from knowledge of the usual rates of progress through the several sections of the Canal, the men in the port captains' offices can tell with a considerable degree of accuracy where a vessel should be at any moment, barring accident. The speed of vessels through the open channels is nearly uniform, as practically all of them can make the maximum speed allowable, except in about 10 miles of Gatun Lake, where a speed of 15 knots is permitted. Some of the vessels cannot attain this, but those that can do not usually go faster than 12 knots. The maximum speeds allowable for vessels in transit through the Canal are, as follows:

Steamers entering or leaving a port, or in the entrance channels, or in Culebra Cut, or in Miraflores Lake, six knots; in Gatun Lake, in the 1,000-foot channels, 15 knots; in the 800-foot channels, 12 knots; and in the 500-foot channels, 10 knots.

"Foston Hall" Burned at Sea.

The steamship *Foston Hall*, the first foreign built vessel to transfer to American registry at one of the Canal ports, which was done at Cristobal on September 17, after the vessel had passed through the Canal on its way from Chile to New York with a cargo of nitrate, has been reported burned off Watling's Island. The vessel was 368 feet long by 49½ feet in the beam, was registered as of 4,032 gross tons, and was built in 1902.

Passengers from Havana Not Detained at Local Quarantine.

The Chief Quarantine Officer announces that, until further notice, steamship passengers embarking at Havana, Cuba, will not be detained at Colon or Cristobal if all on board the vessel are well at the time of arrival. Passengers in transit for Colon or Cristobal may go on shore at Havana without liability of detention on reaching the Isthmus. This exemption does not affect the existing quarantine against other Cuban ports.

The "Falk" Brings Cargo from the "Wasgenwald."

The Norwegian steamer *Falk*, which arrived at Colon on Friday, October 2, from St. Thomas, Danish West Indies, had on board a quantity of cargo transferred to it from the Hamburg-American line steamer *Wasgenwald*, which has been anchored in St. Thomas harbor since the early part of August. Included in the cargo were eleven blooded cattle from Denmark, consigned to Ecuador, insured at approximately \$1,000 each. Up to the time of their arrival at Colon, they had been at sea about 70 days.

Cruiser "Denver" at Balboa.

The U. S. S. *Denver*, a third class cruiser in general service in the Pacific Ocean, arrived at Balboa on October 2, from Corinto. The vessel is to remain in port about a week for the purpose of taking on coal and other supplies, and giving the personnel shore liberty.

Operation of Pontoon Bridge.

The following regulations will govern the operation of the pontoon bridge over the Canal at Paraiso between the hours of 8 a. m., and 4 p. m., each day: Canal traffic will have the right-of-way and the bridge must be kept open; it will only be closed for scheduled trains, when the movement of such trains will not interfere with passing vessels. The oper-

ator at the bridge will be required to keep himself informed of the movements of vessels, either through the captain of the port at Balboa, or the lockmaster at Pedro Miguel, but the opening and closing of the bridge will be subject to the orders of the Captain of the port at Balboa in all cases.

Steamship Brokers.

The United Fruit Company announces, through its general agent on the Isthmus, that, in addition to the handling of its steamers at Cristobal, it has arranged to enter into a general steamship brokerage business. It will act as agents and stevedores for all steamers desiring to break bulk at Colon, Cristobal, or Balboa; also, purchase supplies, including coal or oil for fuel; pay Canal tolls, and attend to all other details necessary for the passage of steamers through the Canal. Further information may be obtained from the office of the United Fruit Company, Cristobal, C. Z.

PERSONAL.

Mr. James C. Courts, clerk of the House Committee on Appropriations, arrived on the *Panama* on Monday, September 28, and returned to New York by the same vessel, which sailed from Cristobal on Sunday, October 4. He was accompanied by his daughter.

New Railroad Timetable.

A new timetable, No. 20, will go into effect on the Panama railroad at 12.01 a. m., on Sunday, October 11. The principal changes in the operation of the main line passenger trains are in the arriving and leaving time. No. 3 will leave Colon at 7.15 a. m., daily, instead of 7 o'clock, and No. 4 will leave Panama at 7.10 a. m., instead of 7.35. No. 7 will leave Colon at 5.05 p. m., instead of 4.25, and No. 8 will leave Panama at 5.05, instead of 5.30. There is no change in the arriving and leaving time of Nos. 5 and 6. The Sunday night train out of Colon at 9.35, and the Sunday night train out of Panama, at 11.15, have been discontinued.

On the Las Cascadas-Panama branch line the number of shuttle trains on week days between the two terminals has been reduced from five to three, and changes in the arriving and departing time have been made. The first train from Panama for Las Cascadas leaves at 5 a. m., instead of 6, the next two leave at 7.10 and 11 o'clock, respectively, but go only to Pedro Miguel. The next train for Las Cascadas leaves at 12.10 p. m., and the last train of the day on week days leaves at 6.15; there is a train for Pedro Miguel at 5.05 p. m. On Sunday, there are three additional trains on this line, two for Las Cascadas, and one as far as Pedro Miguel.

All trains in the Colon-Gatun shuttle service will be discontinued with one exception, namely, the train leaving Colon at 5.50 a. m., which returning, leaves Gatun at 6.25.

Contract for Oil Pumps and Auxiliary Equipment.

A contract has been entered into with the National Transit Company of Oil City, Pa., for supplying four oil pumps, 14 by 20 by 12 by 18 inches, two for use at the Cristobal oil handling plant, and two for the Balboa plant, at the price of \$3,503 each. In addition, the firm is to supply four sets of auxiliary spare parts for these pumps at a total price of \$1,208.

SOCIAL LIFE OF THE ZONE.

Convention of the Panama Federation of Women for Christian Work.

The convention of the Panama Federation of Women for Christian Work will be held at the Methodist church, Panama, on Saturday, October 24, the Woman's Foreign Missionary Society of the church entertaining. It has been decided to have a short business meeting in the morning, beginning at 10 o'clock, and a program in the afternoon. This program, which will be held in the church, will consist of addresses, music, exercises by the Camp Fire girls of Cristobal and the San Blas Camp at Corozal, congregational singing, and instrumental selections. The pastor of the Union Church of the Canal Zone has been asked to take part in the program. At the meeting of the executive board, held at the Hotel Tivoli on Friday afternoon, October 2, there were present representatives from Colon, Cristobal, Empire, Ancon, Balboa, and Panama.

St. Luke's Altar Guild.

The annual corporate communion of the members of St. Luke's Altar Guild, Ancon, will be held on Sunday, October 18, St. Luke's Day, instead of on All Saint's Day, October 31, as formerly. The annual meeting, with election of officers, will be held on the Tuesday following, October 20, at the home of Mrs. Darling, hospital grounds. These events will mark the beginning of the eighth year of the existence of the guild.

Register of Employes Visiting San Francisco.

Following the suggestion of the Society of the Chagres that a register of former employes of the Isthmian Canal Commission and The Panama Canal, and of the Panama Railroad Company on the Isthmus, be kept at the Panama-Pacific exposition in connection with the Canal exhibit, the Governor has directed the Washington office to arrange for the manufacture of a register with space for approximately 5,000 entries. Visiting employes will register chronologically, as at a hotel, and the pages will be ruled with spaces for the employe's name, period of residence on the Isthmus, department or division in which employed, Isthmian residence, period of stay in San Francisco, his San Francisco address, and remarks or messages to friends.

Masons Apply for a Building Site in Ancon.

The following Masonic lodges have asked for a site in Ancon for the erection of a Masonic Hall: Canal Zone Lodge, A. F. and A. M.; Canal Zone Chapter, No. 1, Royal Arch Masons; Canal Zone Council, No. 1, R. and S. M., and the Canal Zone Commandery, No. 1. The site requested is the vacant area, known in French times as Ancon section; later, the site of of the American corral in Ancon. It is proposed to build a 2-story frame structure, approximately 40 by 110 feet, with the lower story fitted for an assembly or social hall, library, and offices, and the upper story for lodge purposes. The above lodges will bear the expenses of the building jointly in case construction is authorized.

Lighting Improvement at Hotel Tivoli.

A new lighting system has been installed at the entrance to the Hotel Tivoli. At the outer edge of the approach and driveway, two 24-foot standards have been placed, each

bearing two lanterns, and on the building six similar lanterns, called "English Inn" lights, have been affixed. The lighting is designed to illuminate the driveway and circle.

Camp Otis Notes.

The first number of *The Pioneer*, a small weekly paper, published at Camp Otis in the interests of the officers and enlisted men of the Tenth and Fifth Infantry and the Coast Artillery Corps, has been issued. The paper contains editorials, contributed articles on various current topics of post life, notices of amusements and athletic events and church services, notes of the hospital corps and letters from the men. The Reverend M. C. Doran, chaplain of the Tenth Infantry, is the editor. The paper appears each Sunday.

A Young Men's Hebrew Association has been formed for the Jewish men of the Tenth Infantry. Meetings of the association are held every Saturday evening in the Camp Otis chapel at 7.30 o'clock.

The new recreation hall at Camp Otis is soon to be opened for indoor athletics. The lower story of the building will be a roller skating rink and it is proposed to form a hockey team of the best skaters. Teams for basketball and volleyball will also be organized as soon as the equipment arrives from New York. Chaplain Doran is in charge of the amusement features of the camp.

Columbus Day.

Panama Council, Knights of Columbus, will celebrate Columbus Day this year on Sunday, October 11, beginning with a mass *pro pace* at St. Mary's church, Balboa, at which the council will attend Holy Communion and listen to an appropriate eulogium on the order's patron. This will be followed by a Communion breakfast at the Balboa hotel. The Ancon lodge hall will be the scene of a first degree at 2 o'clock in the afternoon. Visiting Knights of Columbus are invited to be present.

Cristobal Council will partake of the blessed sacrament at the Church of the Immaculate Conception in Colon, where services will be held on Sunday, at 7 a. m. A banquet will be given in honor of Columbus at the Hotel Washington, Sunday evening, at 8.30 o'clock.

The program for the Columbus Day celebration, to be held on October 11, 1914 is, as follows: At 9 a. m., mass in Balboa chapel, with Holy Communion; 10.30 a. m., breakfast; 1 p. m., exemplification of the first degree in Ancon Lodge Hall.

Visiting knights are cordially invited to attend.

THOS. H. CHARNLEY, G. K.

BALBOA, C. Z., September 28, 1914.

Cristobal Council announces that Columbus Day will be celebrated on Sunday, October 11, by attending Holy Communion at the Church of the Immaculate Conception, Colon, at 7 o'clock mass, upon the arrival of the Gatun shuttle train. A banquet will be held at the Hotel Washington in the evening, at 8.30.

A. P. E. DOYLE, *Grand Knight*.

CRISTOBAL, C. Z., October 5, 1914.

Election of officers of Cristobal Council, Knights of Columbus, for the year ending

September 30, 1915, will be held at the next meeting, Tuesday, October 13, at 8 p. m., in the lodge hall, building No. 1, Cristobal.

WM. H. MARSH, *Recorder*.

CRISTOBAL, C. Z., October 3, 1914.

The next regular meeting of Nombre de Dios Assembly, Knights of Columbus, will be held on Sunday, October 11, at 2.30 p. m., at lodge hall, building No. 1, Cristobal. The annual election of officers will be held at this meeting.

THEO. A. AANSTOOS,
Faithful Navigator.

CRISTOBAL, C. Z., October 7, 1914.

Obituary.

Paul E. Roche, an American, employed as a foreman in the Supply Department, residing at Ancon, died at Ancon Hospital at 11 p. m., on Wednesday, September 30, from organic heart trouble. He was 49 years of age, was born in New York City, and had been on the Isthmus since October 2, 1906. He is survived by his wife, Mrs. Marguerite J. Roche, and two daughters, one of whom is Mrs. Gertrude V. Buehler, residing in Panama, and the other, Miss Pauline W. Roche.

Cristobal Dance Club.

The regular dance of the Cristobal Dance Club will be held on Saturday evening, October 10, at the Canal clubhouse. Dancing starts promptly at 8.15.

W. H. MARSH, *Secretary*.

CRISTOBAL, C. Z., October 5, 1914.

Missing Boy.

Any one having knowledge of the whereabouts of Dudley Gray, age 14, formerly a student at the Calumet high school in Chicago, Ill., and who disappeared from that city on February 6, 1914, is requested to communicate with the United States Consul General in Panama. The boy is fond of outdoor sports and farm life, and had made a special study of wireless telegraphy.

Missing Man.

Any one having information as to the whereabouts of Elias W. Caswell, who is supposed to be on the Isthmus, is requested to communicate with Mr. Wilbur W. Sherman, 165 Campbell street, New Bedford, Mass.

Meeting of the O. P. I. A.

The regular monthly meeting of Panama Local, No. 1, auxiliary of the O. P. I. A. of the United States and Canada, will be held at the Hotel Normandie, Panama, on Sunday, October 11, at 2.30 p. m.

PHILIP SHEA,

Corresponding Secretary.

CRISTOBAL, C. Z., October 4, 1914.

Copies of the Official Handbook Available.

A surplus supply of the Official Handbook of The Panama Canal is available for distribution, and copies may be obtained free on application, in person or by mail, to the Executive Office, Balboa Heights, Canal Zone.

The Kingdom of Italy has established a Legation in Panama, with Mr. Carlos Raguzzi as *chargé d'affaires*.

Married.

BECHLEM-NEILSON—At the Cristobal Union Church, on Wednesday, September 23, Miss Dora Neilson of The Dalles, Oregon, to Mr. Albert W. Bechlem, the Rev. William Flammer officiating. Canal Zone residence, Gatun.

EXECUTIVE ORDER

To Amend the Executive Order of March 20, 1914, Relating to Compensation to be Paid to Injured Employees of The Panama Canal and Panama Railroad Company.

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

Section 1. Paragraph E of Section 12, of the Executive Order of March 20, 1914, relating to injury compensation to be paid to employees of The Panama Canal, and the Panama Railroad Company, is hereby amended to read, as follows:

(E) If the deceased employe leaves a parent, either partially or wholly dependent on him for support, or a brother, sister, grandparent of grandchild, wholly dependent on him for support, there may be paid to such relation monthly such portion or portions of the monthly pay of the employe as may be determined by the Governor of The Panama Canal, provided that the total compensation to all beneficiaries under this and Paragraphs A, B, C, and D of this section shall not exceed 50 per cent of the monthly pay of the deceased employe; and provided, that in order to make payment to the relatives under this paragraph, the Governor of The Panama Canal may, if necessary, reduce the proportion payable to widow or children under Paragraphs A, B, C, and D of this section; and provided further, that payment for the benefit of a relative under this paragraph shall cease if he dies, marries, or, in the opinion of the Governor, becomes capable of selfsupport, but in no case shall payment continue more than eight years.

This amendment shall be effective from the date the Order of March 20, 1914 became effective, viz., April 1, 1914.

WOODROW WILSON.

THE WHITE HOUSE,
September 19, 1914.
[No. 2052.]

EXECUTIVE ORDER.

To Amend the Canal Zone Law Against Gambling.

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

1. Section 1 of Act No. 4, entitled "An Act to prohibit gambling in the Canal Zone, Isthmus of Panama, and to provide for the punishment of violations thereof, and for other purposes," enacted by the Isthmian Canal Commission on August 22, 1904, is hereby amended to read, as follows:

Section 1. Every person, within the limits of the Canal Zone, who shall play at any game whatever for any sum of money or other property of value, or shall bet any money or property upon any gaming table, bank, or device, or who shall bet upon any game played at or by means of any such gaming table or gambling device, shall, upon conviction, be fined in any sum not exceeding one hundred dollars (\$100), or by imprisonment in jail not exceeding thirty (30) days, or shall suffer both such fine and imprisonment in the court's discretion.

2. This Order shall take effect 30 days

from and after its publication in THE CANAL RECORD.

WOODROW WILSON.

THE WHITE HOUSE,
September 19, 1914.
[No. 2051.]

Sanitary Census of Colon.

The enumeration of the inhabitants in the city of Colon, recently made by sanitary inspectors, under the direction of the Cristobal-Colon Health Officer, has been completed, and shows a count of 27,831 divided, as follows:

EMPLOYES AND NONEMPLOYES.	
Canal employes.....	5,395
Nonemployes.....	22,436
Total.....	27,831
RACES.	
Whites.....	1,728
Panamaianians.....	3,841
Yellow.....	583
Blacks.....	21,679
Total.....	27,831
SEXES.	
Male.....	15,348
Female.....	12,483
Total.....	27,831

In view of the fact that the enumerators made but one visit, and that a number of people were found temporarily absent from their rooms, the figures given above have been increased by 1,500. The estimate of 29,331, therefore, has been adopted as the official basis for the compilation of future health statistics for that city. The estimate in use by the Health Department since June, 1912, was 20,232.

The first sanitary census of Colon was taken in August, 1904, and at that time the city had but 7,214 inhabitants. The last count, therefore, shows a gain in population in 10 years of over 400 per cent. In 1911, a census was taken by the Panama Government, which showed the population to have been 17,748 divided, as follows:

	Male.	Female.
Whites.....	1,548	1,108
Mestizoes.....	1,905	2,485
Negroes.....	5,529	4,452
Mongolians.....	533	92
Indian.....	100	1
Totals.....	9,610	8,138

Progress on United Fruit Company's New Building.

The United Fruit Company's new office building, situated on the Cristobal water front adjoining the fire station, is completed, with

the exception of some interior painting and additional installations on the first floor; it is expected that the offices will be ready for occupancy shortly.

The building is of reinforced concrete throughout, 89 feet six inches in length by 66 feet six inches in width, inclusive of the 11-foot veranda. The lower floor will be devoted entirely to the offices of the company; the upper floor to quarters for the resident manager. The interior trimmings, counters, and other office furnishings are done in solid mahogany, imported from Honduras. The counters are so arranged as to entirely enclose the offices from the space allotted for the use of the general public; they will be surmounted by a bronze grill, provided with suitable openings for the transaction of business. The various departments, auditing, freight, and passenger, will be railed in, and in one corner of the building there is a separate room fully enclosed, for the private office of the manager. A record room, modern fireproof vault, toilets, and ceiling electroliers are among the other facilities provided. The floor is of red tile, and in it, near the main entrance has been worked a representation of the company's house flag. A private branch exchange switchboard, equipped for serving 12 telephone instruments, will be installed near the gate for the admission of visitors to the inner offices, and in this location, the switchboard attendant can not only answer calls, but give out information to the public as well. The gate will be fitted with a button device, so that it can be opened or closed by any one in any of the offices.

The present office of the company, which is in a 2-story frame building, near the Panama railroad general offices, will be rented; the upper floor will be fitted up with entirely new furniture and used as quarters for the company's unmarried employees.

The Columbia Smelting and Refining Works of New York City has entered into contract with The Panama Canal for the purchase of 40,500 pounds of old brass condenser tubes at the price of \$0.0951 per pound, and of 42,500 pounds of sheet copper at the price of \$0.1106 per pound.

Mr. C. N. Chau has been appointed vice-consul of the Republic of China to the Republic of Panama.

Deceased Employees.

Name.	Check No.	Native of	Isthmian residence.	Employed by	Date of death.

The estates of these deceased employes of the Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against these estates, or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

FACILITIES FOR SHIPPING.

Ample Provisions for Supplying and Repairing Vessels—Prices.

The Canal is to be equipped with complete facilities for supplying vessels with coal, fuel oil, miscellaneous stores, and general supplies, such as are taken on at any of the great ports of the world; and for dry docking and repairing vessels of the largest size now afloat. The facilities for this service are not all completed at this time, but the accommodations for shipping, other than in dry docking vessels, are ample for the traffic, and all the facilities are being pushed toward completion. Following is a summary of present accommodations: A compendium of charges is given at the end of the article.

FUEL.

Coal may be taken on at either the Atlantic or the Pacific terminal, but it costs \$1 a ton more at Balboa than at Cristobal, on account of the cost of transportation across the Isthmus. The coal comes from the fields of Virginia and West Virginia and is shipped to the Atlantic seaboard. It is handled to vessels at the Atlantic end of the Canal by a cantilever crane, commanding a coal wharf, or in lighters, and at the Pacific end lighters are the present means. Between 600 and 750 tons can be taken on in the working day of nine hours at either terminal, with the present facilities.

Fuel oil is supplied at the Pacific terminus by the Union Oil Company. The berth alongside its crib carries 30 feet of water at mean tide. Oil is delivered from tanks, aggregating 150,000 barrels capacity, at the rate of from 1,300 to 1,600 barrels per hour. The Panama Canal is constructing extensive fuel oil handling plants at both terminals. A number of tanks belonging to individuals and companies will be connected with the plants, as well as two 42,000-barrel tanks belonging to the Government, at each terminal. Upon the completion of its plants, in January, 1915, The Panama Canal will assume entire control of handling oil.

Water is sold at the rate of 25 cents per 1,000 gallons, delivered at the dock, but the minimum charge is \$3. Ships passing through the Canal may take up fresh water from the lakes without hindrance. Not all of this water, however, is entirely clean or suitable for industrial uses. All water sold at the docks is drawn from the regular water supply systems and has been purified.

GENERAL SUPPLIES.

As The Panama Canal and the Panama Railroad Company are together operating a large number of vessels, of a variety of classes, from tugs to oceangoing passenger and freight vessels, supplies for practically any kind of vessel are kept on hand on the Isthmus. Such supplies are for sale to all ships using the Canal, or calling at the terminal ports. The storehouses at Cristobal and Balboa have in stock all standard lubricants, light and heavy hardware, cordage, and miscellaneous ship chandlery supplies.

Foodstuffs and the general variety of merchandise handled by the commissary department of The Panama Canal may be purchased for ships. The fact that the Supply Department is supplying regularly most of the food and wearing apparel of approximately 50,000 people is a warrant that its operations are on a scale which can easily include the needs of ships now coming to the Canal.

Prices are generally lower than the retail prices in the United States, or possibly about 10 per cent higher than the wholesale prices there, and compare favorably with prices in any port of the world.

A large stock of fresh meats, vegetables, fruits, canned groceries, bakery products, etc., is always on hand, and advance arrangements can be made for supplies of any article obtainable in the markets of the world.

Ice may be purchased in any reasonable quantity.

Laundry is handled quickly. No advance notice is required, and ship's laundry can be returned on the same day it is received. A vessel entering the Canal can forward its laundry by rail to the plant at Cristobal, or the one at Ancon, and receive it back by the time it is ready to clear from the other end of the Canal. Passengers' laundry can be handled with corresponding dispatch, but it is preferred to have at least two days for the work.

REPAIRS.

Except for the limitations imposed at present by the absence of a large dry dock, and of lathes for turning the largest crank shafts and longest line shafts of modern vessels, the Canal shops can do practically any repair work which a vessel might bring. Sufficient materials, including heavy billets and all sizes of plates and angles, are kept on hand to meet every probable need. The foundry can make steel castings up to five tons in weight, and iron castings up to 10 tons, as well as brass castings of any ordinary size.

The shops at Balboa are equipped with a 540-ton hydraulic forging press, an open side extension planer with capacity to plane 132 inches wide, 96 inches high, and 24 feet long, lathes large enough for ordinary line shaft work, and the usual accessories of fully equipped machine, boiler, and shipfitters' shops. The shops alongside the dry dock at Mount Hope can do small machine work of moderate size, and practically any plate work likely to be required. By submitting to the delay necessary to transport parts to Balboa, all the facilities of the Balboa shops are also available for work at Mount Hope. The Mount Hope dry dock can take ships drawing 13½ feet of water and 300 feet long; the permanent dry dock now under construction at Balboa will take any vessel that can pass through the Canal.

The Balboa shops contain a plant for the generation of oxygen and acetylene, and both they and the shops at Mount Hope are equipped with tools for all kinds of cutting and welding. Compressed air, steam, water, oil, and electric current are available at the repair wharves in the maximum quantity required. Locomotive and wrecking cranes are available at the wharf side for lifting, and a derrick barge with a lifting capacity of 40 tons may be brought into service if necessary. Two floating derricks of 250-ton capacity each are being erected now, and are to be ready for service in December, 1914.

Contracts for doing repair work at a stated cost cannot be made by The Panama Canal, though estimates of probable cost can be furnished from the shops. Charges are made on the basis of actual cost of repairs, plus a percentage to cover overhead expenses, prescribed by The Panama Canal.

PERSONAL ACCOMMODATIONS.

The Hotel Washington at Colon and the

Hotel Tivoli at Ancon, adjoining Balboa, and the Hotel Aspinwall, on Taboga Island, are owned and operated by the Government for the accommodation of the traveling public. Reservations can be made in the same way as at privately owned hotels.

Ancon Hospital is equipped with 800 beds. It treats about 35,000 cases a year, in which approximately 7,000 surgical operations are performed. Its staff of physicians and surgeons includes men of marked experience and ability, and several experts in tropical medicine. The treatment of cases from neighboring countries and from ships is a part of its regular work.

Direct cable connections extend from the Isthmus to New York and to the west coasts of Mexico, Central, and South America. The radio stations at Colon and Balboa handle commercial business.

METHOD OF APPLICATION.

Steamship captains, or agents, desiring the services of The Panama Canal in the way of supplies, repairs, etc., will receive prompt response on communicating with the captain of the port at Balboa or Cristobal. Ships may communicate their wants by radio, in advance of arrival. The Canal organization, having made ample preparations for serving vessels, is desirous of giving prompt and satisfactory service on a businesslike basis, without unnecessary delay or red tape.

The captain of the port will furnish information in regard to placing orders, and should be notified of all orders placed, so that he may be able to keep track of them in relation to clearing ship, etc. If orders are placed direct, application should be made to the following:

Coal—Receiving and forwarding agent, Panama railroad, Cristobal, or Balboa.

Fuel oil—Union Oil Company, Balboa. (Temporarily.)

Ships' supplies—Depot quartermaster, Cristobal, or quartermaster's storekeeper, Balboa.

Foodstuffs, general merchandise, ice, laundry, etc.—Depot commissary, Cristobal, or commissary storekeeper, Balboa.

Repairs—Superintendent of Mechanical Division, Balboa.

Water and miscellaneous supplies, and information—Captain of the port, Cristobal, or Balboa.

Electric repairs such as wiring, lights, dynamo, etc.—Electrical Engineer, Balboa Heights.

Bills for all supplies will be submitted through the offices of the deputy collectors at the ports for collection, or cash may be sent with orders. Bills for supplies furnished ships of regularly established lines will be submitted to the local agents, if desired.

PRICES OF SUPPLIES.

The following is a partial list of the charges prevailing at present for various services, but they are subject to change from time to time:

Coal—At Cristobal, from lighters, trimmed in bunkers, per ton, \$5.40; from cars alongside wharf, handled by ships' gear, per ton, \$5.15; use of steam hoist and crane, per hour, \$1. At Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil—Regular sales, \$1.30 per barrel.

Water—Delivered at dock, 25 cents per 1,000 gallons; minimum charge, \$3.

General supplies, foodstuffs, etc.—Prices are usually less than retail prices in the United States. Wholesale lists may be obtained from the offices of the port captains.

Ice—At Cristobal, 30 cents per 100 pounds; at Balboa, 35 cents per 100 pounds.

Laundry—The following representative prices will give a fair idea of charges: *For passengers*—Drawers or undershirts, 10 cents each; socks, five cents per pair; collars, three cents each. *For ships*—Waiters' coats, 10 cents each; blankets, 10 cents each; trousers, and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each. **CHARGES FOR SERVICES.**

Barges and lighters—With towing machine, 400 tons or over, \$2.25 per hour; without towing machine, 400 tons or over, 90 cents per hour; under 400 tons, 30 cents per hour.

The charge for barges or lighters will depend upon the kind and class of service rendered, time in use, and charges in connection with handling freight and cargo.

Wharfage—All steam or motor vessels, per day or fraction thereof, per foot of length, measured over all, 15 cents. Sailing vessels, 100 feet in length, or less, per foot, five cents; over 100, but less than 200 feet, per foot, 10 cents; over 200 feet, per foot, 15 cents.

Dry docking at Mount Hope—For vessel docked alone, \$75 for the first day, and \$25 for each subsequent day. For a vessel docked with another vessel, \$50 for the first day, and \$18 for each subsequent day.

Launches—Larger launches, for the first hour, \$7.50, and \$5 for each succeeding hour; smaller launches, \$5 for the first hour, and \$2.50 for each succeeding hour.

Diver's service—For the first four hours, or fraction thereof, from time of arrival at point of diving, \$60; for each subsequent hour, \$10.

Freight—Rates for handling freight depend upon the kind and class of services required. Freight is handled at the terminal ports either by the Panama railroad or the agents of vessels.

Tugs—For harbor work, shifting berths, work around piers or locks, and short tows, \$15 per hour. For towing through the Canal, four cents per displacement ton, or 10 cents per net Panama Canal ton; minimum charge for towing through the Canal, \$150.

Pilotage—Charges are based upon the maximum draft; rate per foot, or fraction of foot exceeding six inches, \$1. In case pilot is taken on outside of the Atlantic breakwaters, an extra charge of \$10 is imposed. There is no charge for pilotage when a vessel goes direct through the Canal, without stopping at either terminal port to take on or discharge cargo or passengers. Through passengers will be allowed to land without affecting the status of the vessel in this respect.

Tolls—On merchant vessels carrying passengers or cargo, per net ton (each 100 cubic feet) of actual earning capacity, \$1.20.

On vessels in ballast, without passengers or cargo, 40 per cent less than the rate for vessels with passengers or cargo, *i. e.*, per ton, 72 cents.

On Naval vessels, other than transports, colliers, hospital ships, and supply ships, per displacement ton, \$1.50.

On Army and Navy transports, colliers, hospital ships, and supply ships, the vessel to be measured by the same rules as are employed in determining the net tonnage of merchant vessels, per net ton, \$1.20.

Additional charges are made for deck loads, depending on the space occupied; per net vessel ton, \$1.20.

For passengers, no specific charge is made,

but passenger space is included in the net tonnage upon which tolls are charged.

Control of Radio Communication in Republic of Panama Vested in the United States.

By decree No. 130 of August 29, 1914, signed by the President of Panama, the control of all radiotelegraphic communication within the Republic of Panama is vested in the United States, as follows:

1. That by the terms of the Bunau-Varilla-Hay Treaty, the Republic of Panama is obliged to assist the United States by all necessary and suitable measures for the conservation, protection, and defense of the inter-oceanic canal constructed across the Isthmus.

2. That the said Government considers it indispensable to assume, from now on, per-

manent and complete control of the wireless stations, fixed and movable, in all the territory and territorial waters of the Republic of Panama.

3. That it is to the interest and for the safety of the Republic of Panama that wireless communication be controlled and regulated by the nation, which, by a solemn pact, has guaranteed its independence, therefore,

4. It is decreed that from this date the radiotelegraphic stations, fixed and movable, and everything relating to wireless communication in the territory and territorial waters of Panama shall be under the complete and permanent control of the United States of America, and to attain that end said Government will take such measures as it deems necessary.

LABOR FORCE AND QUARTERS IN AUGUST.

The force report of August 26 shows the actual working force of The Panama Canal on that date to have been 24,762; of the Panama railroad, 4,059, and of contractors, 62, a total effective working force of 28,883. This is an decrease of 3,554, as compared with the statement of July 22. The gold force on the Canal work, composed almost exclusively of white Americans, was 4,529, divided, as follows: The Panama Canal, 4,009; Panama railroad, 512; contractors, eight, a decrease in the total gold force, as compared with the preceding month, of 183. Detailed figures of the total force employed on the Isthmus, by departments and divisions, are given below:

DEPARTMENT OR DIVISION.	SILVER EMPLOYES*											Total silver	Total gold	Grand total

(1) Includes eight American negroes, and two Panamanians on the gold roll. (2) Includes Sabanas police station, Taboga Island, Naos Island, Culebra Island, and Palo Seco. (3) Includes Miraflores. (4) Includes one Asiatic. (5) Includes 50 Panamanians. (6) Includes Empire, Las Cascadas, and Bas Obispo. (7) Includes eight American negroes. (8) Includes Colon Beach and Colon Hospital. (9) Includes 26 East Indians. (10) American citizens, and 82 Panamanians. Gold force of contractors (included above), 27 bachelors.

SCHOOL ATTENDANCE.

Enrollment In Schools for White Children Larger Than Anticipated.

The Canal Zone schools were opened on Thursday, October 1, with an unexpectedly large enrollment in the schools for white children on the first day. There are nine grade schools for white children, two less than last year; and two high schools, one each at Balboa and Cristobal. The schools at Empire and Porto Bello were closed permanently last year. It had been expected that the reduction of force and the movement of the population toward the Pacific end of the Canal would greatly reduce the number of pupils in the schools along the line, but this was not the case. At Culebra, as an illustration, where provision had been made for a very small school, the enrollment on the opening day was 78, and on Monday, October 5, it had increased to 84. Last year the enrollment on the opening day was 30. The same was the case at Ancon, where 57 children were enrolled in the third and fourth grades, and at Cristobal, where 61 in the third and fourth grades were present on the opening day. The result of this increased enrollment over that which had been expected, was that five additional rooms were opened on the first day and relief teachers had to be engaged temporarily.

The largest school for white children is at Cristobal, which opened with 190 pupils. Following is the enrollment on the opening day, by schools: Balboa, 100; Ancon, 153; Corozal, 133; Pedro Miguel, 52; Paraiso, 34; Culebra, 78; Las Cascadas, 19; Gatun, 107; Cristobal, 190; total, 866. High school—Balboa, 65; Cristobal, 20; total, 85, making a grand total of 951 in the schools for white children.

There are 36 teachers in the force of the schools for white children, not including the supervisor of industrial teaching.

The enrollment for the first day in the schools for colored children was 475. This low figure does not indicate the normal size of the schools, however, as the colored children seldom enroll on the opening day of school if it falls near the end of the week. At Ancon school, for example, the enrollment on October 1 was 63, while on Monday, October 5, there were 112 children present; at LaBoca, the increase was 70, at Paraiso, 20, and at Cristobal, the first day's enrollment was increased by 77 pupils on Monday. There are six schools operated for colored children, with a staff of 20 teachers. The colored enrollment by schools for the opening day, follows: La Boca, 129; Ancon, 63; Paraiso, 32; Gatun, 32; Mount Hope, 15; Cristobal, 204; total, 475. On Monday, October 5, the enrollment at these schools was 731, an increase of nearly 50 per cent.

Sand Unloading Operations Retr transferred to Balboa.

Effective September 3, the sand unloading operations, which have been carried on for several months past at the south end of Miraflores Locks, were retransferred to Balboa. The completion of dredging work at the east end of slip No. 1, immediately in front of Quay Wall g-h-i, allows the sand service to be removed to that point, and about 350 feet of the water front of the quay wall, measured from the head of slip No. 1 has been reserved for it. A temporary track has been laid on top of the quay wall, for a distance of about 400

feet, which will be used as a loading track for steel dump cars. It will be necessary to employ a light locomotive in placing the cars in position, as the concrete girders and beams in the floor, except along the permanent track, are not designed to bear up railway equipment. The loading of the cars from barges will be accomplished by locomotive cranes operating clamshell buckets.

Messrs. C. L. Parker, John H. Smith, C. C. McColley, and John F. Warner have

been appointed a committee to inspect the wooden office furniture in the new Administration Building, with a view of ultimately replacing it with metallic equipment.

Woman's Auxiliary, U. S. W. V.

The Woman's Auxiliary to the United Spanish War Veterans met at the home of Mrs. E. von Muenchow, Ancon, on Wednesday afternoon, September 23. The next meeting is scheduled to take place at Empire lodge hall on Wednesday, October 14.

Brushes, counter duster.
(shown in supplement No. 1 as "Dusters, counter.")
E Dynamometers.
E Equipment, sand blast.
E Hammers, piledriver.
Shoes (wearing apparel).
E Tables, operating.

MEMORANDA FOR ACCOUNTABLE OFFICIALS.

When designation of property is changed from nonexpendable to expendable, accountable officials will list items on regular invoice (form P. C. 924-1), showing reference to circular changing designation. The accountable official will sign invoice, and will show the account number against which charge is to be made. The original and one signed copy will be forwarded to the Auditor.

When the classification of an item is changed from "Tools" to "Equipment," or reverse, accountable

officials will prepare invoices relieving one account and charging the other. Signed original and one copy of such invoices will be sent to the Auditor, as in the case of transfer between officials.

Items of property heretofore considered nonexpendable and carried on the return of property for the period ending March 31, 1914, and which were not included in the list of nonexpendable property or supplements thereto, will be listed and submitted to the Auditor for a ruling under the provisions of Paragraph 1 of Circular 656-1.

Approved: H. A. A. SMITH,
Auditor, Panama Canal.
GEO. W. GOETHALS,
Governor.

Changes In Supply Department—Building Division Created.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., September 30, 1914.

CIRCULAR No. 660-20:

1. Effective October 1, 1914, the construction and repair of buildings for The Panama Canal and the Panama Railroad company, exclusive of minor repairs costing less than \$50, and building construction for account of the Army, will be handled by a building division, in charge of a constructing quartermaster, reporting direct to the Governor. District repair work costing less than \$50 will be handled by the force of the Supply Department.

2. Maj. W. R. Grove, U. S. A., is hereby appointed Chief Quartermaster in charge of the Supply Department, relieving Capt. R. E. Wood, U. S. A., who is hereby appointed Constructing Quartermaster.

GEO. W. GOETHALS,
Governor.

Employment of Term "Laborer" Defined.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., September 24, 1914.

CIRCULAR No. 603-5:

Section 12 of the Executive Order of February 2, 1914, (Panama Canal Circular 601-4), as quoted in Section 13 of Circular 603 is interpreted so as to include within the grade "Laborer" all alien hourly employes receiving 40 cents or less per hour. Overtime to such laborers is payable only after 10 hours' service in each day.

GEO. W. GOETHALS,
Governor.

Division and Field Accounting for Property.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

CIRCULAR No. 656-4 (Amending Circular No. 656-2):

1. Section 10 of Circular No. 656-2, Line 3, is amended by striking out the word "Auditor", and substituting the word "Paymaster."

2. As amended, this section will read, as follows:

"10. Property releases—All gold employes leaving the service or entering on leave will be required to secure releases from property and quarters, which, for Panama Canal employes, must be presented to the Paymaster of The Panama Canal, or to the branch of his office at Cristobal or Ancon, before final payment will be made."

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, the Panama Railroad Company.

Notice to Mariners—Dumping Grounds near Pacific Entrance of Canal.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., September 17, 1914.

CIRCULAR No. 643-7:

1. Material dredged from the Canal is being dumped immediately to the southward and westward of the Pacific entrance of the Canal, and vessels are warned that there is less water there than is shown on the charts. In order to be perfectly safe vessels should keep to the northward and eastward of the extension of the axis of the Canal, and to the eastward of a line running north and south through San José Rock and Taboguilla Island.

2. The dumping ground will be marked by a line of black nun buoys, placed about ½-mile to seaward of it and spaced ½-mile apart. They will be unnumbered, and established, as follows:

(a) The first one on a line joining the outer gas buoy, No. 1, at the seaward end of the dredged channel, with Taboguilla Island, distant from the former ½-mile. The second on the same line distant one mile from the gas buoy. The azimuth of this line is 173° 30' true (S. 6° 30' E.)

(b) The remainder of the buoys will be on a line passing through the second buoy, with Commission Rock and Melones Island in range. The azimuth of this line is about 235° true (S. 55° W.)

3. These buoys will be moved from time to time as

occasion may demand without further notice. During dredging operations they may be lighted at night with small oil lanterns showing white lights, but these are not to be depended upon by vessels, as they are only intended for the use of the towboats engaged in dredging operations.

GEO. W. GOETHALS,
Governor.

Office Engineer in Charge of Drafting Force.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., September 21, 1914,

HEADS OF DEPARTMENTS AND DIVISIONS:

The Office Engineer will be in charge of the entire drafting force centralized in the drafting room, with the exception of that pertaining to the Fortification Division. General drafting work to be executed will be apportioned by him to the proper member of the force. Designing engineers or officials in charge of construction or maintenance work may be assigned certain draftsmen for their particular work, and will then be authorized to give instructions to such draftsmen directly; the general oversight and discipline of such assigned draftsmen will, however, remain with the Office Engineer.

GEO. W. GOETHALS,
Governor.

Measuring Sand, Gravel, and Stone.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., October 1, 1914.

CIRCULAR No. 637-3 (Superseding 637, 637-1, and 637-2) Effective October 1, 1914, the following quantities will be standard for measuring carloads of sand, gravel, and crushed stone:

	Cu. Yds.
Standard or large coal cars.....	25
Rodger ballast cars.....	20
P. C. wooden and steel flats, without side-boards.....	10
P. C. wooden and steel flats, with side-boards.....	15
Oliver dump cars and Western dump cars (small).....	15
Oliver dumpcars and Western dump cars (large).....	23

All circulars in conflict herewith are hereby revoked.
GEO. W. GOETHALS,
Governor.

Post-office at Frijoles Discontinued.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., September 28, 1914.

CIRCULAR No. 253:

To all postmasters—You are advised that the post-office at Frijoles will be discontinued at the close of business September 30, 1914. Therefore, no registered matter should be accepted for dispatch to that office after that date. All ordinary mail addressed to Frijoles will be delivered by the railway mail messengers to the police officer at that station, who will hold it for delivery at the police station.

JOHN K. BAXTER,
Director of Posts.

Proposals for Construction of Railroad Station at Balboa Heights.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER,

Sealed proposals will be received at the office of the Chief Quartermaster, Panama Canal, Balboa Heights, C. Z., for the erection, by contract, of the new Panama railroad station at Balboa Heights. Bids will be received until 3 p. m., October 17, 1914, when they will be opened in the office of the Chief Quartermaster.

The buildings are to be constructed of concrete blocks and stucco, with reinforced concrete foundations and umbrella shed. The Panama Canal will furnish all material on cars at the site of the work, and the contractor will be required to furnish all labor. Plans and specifications may be obtained at the office of the Chief Quartermaster, Balboa Heights. A deposit of \$15 will be required to insure their return. Each bidder must accompany his proposal with a certified check, cash, or money order for 10 per cent of the amount bid, as a guarantee of his acceptance of the contract.

Bids should be marked "Proposa for Panama rail road station."

The Panama Canal reserves the right to reject any or all bids.

R. E. WOOD,
Chief Quartermaster.

Married.

CARSON-HESS—At Vernon, Ind., on September 9, Miss Edna D. Hess, to Mr. George Barr Carson, the Rev. Daniel C. Simpson officiating. Canal Zone residence, Balboa Heights.

JOINT LAND COMMISSION.

Rule of Dismissal No. 135, September 19, 1914.

In view of the agreements before noted, these claims call for no further action by this commission, and they are accordingly dismissed.

(Signed) FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule 136.

In the matter of an award to Saturnina Borsallo, Carmen Posada, Elvira Posada, for property in the town of Gorgona, docket No. 497 (1250-A) September 19, 1914—Rule in re award No. 41 of September 20, 1913:

This award included an item of \$1,200 United States currency, for a house in Gorgona, the property of Saturnina Barsallo, Carmen Posada, and Elvira Posada, docket No. 497. It was stated that the house referred to bore the tax number 704. The proper designation of the house of this claimant is tax number 708, and the original award is hereby amended so to read.

(Signed) FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule No. 137, September 19, 1914, Docket No. 1379.

In the matter of the claim of D. W. Ogilvie, for property located at Juan Grande—Two claims have been filed by the claimant D. W. Ogilvie for slightly different properties, but the previous award made to Ogilvie showed only one of the two docket numbers, although the award in reality covered both properties. In order that the records of the commission may be complete and show all docket numbers which have been acted upon, the commission rules, as follows:

That the award previously announced and herein- below shown be amended to show, in addition to the docket number already shown, the docket number listed below:

Name of Claimant.	Award No.	Date.	Dock No. already shown.	Dock No. to be shown.
Ogilvie, D. W. (David W.).....	2	6-24-13	36	1,379

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Tide Table.

The following table shows the time of high and low tides at Panama for the week ending October 17, 1914:

DATE.	High	Low	High	Low	High
	A.M.	A.M.	A.M.	P.M.	P.M.
Oct. 11.....	1.32	7.22	2.03	7.57	
Oct. 12.....	2.24	8.12	3.01	8.59	
Oct. 13.....	3.31	9.20	4.09	10.15	
Oct. 14.....	4.49	10.44	5.22	11.32	
Oct. 15.....	5.59	12.03	6.27		
Oct. 16.....	12.38	6.59	1.06	7.22	
Oct. 17.....	1.31	7.50	1.59	8.12	

75th meridian time.

Hotel Aspinwall Lunch Service.

The launch Louise will sail from the dredge landing at Balboa for the Hotel Aspinwall on Taboga Island at 9.25 a. m., on Monday, Thursday, and Saturday of each week. The time of sailing permits connection to be made with train No. 3, which arrives at Panama from Colon at 8.45 a. m., daily.

COMMISSARY DEPARTMENT.

Sheffield Farms Milk.

Fresh Sheffield Farms milk will hereafter be bottled at Cristobal and sold in the retail commissaries at 10 cents per quart. An additional charge of five cents will be made for the bottle, which will be refunded on return.

Increase in Price of Breads.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

CRISTOBAL, C. Z., October 2, 1914.

Owing to the increased price of flour and the fact that bread has been sold without profit, the price of pan, special, graham, rye, and butternut breads will be increased, effective October 11, 1914, by one cent per loaf.

On the same day, the weight of each loaf will be increased from 15½ ounces to 18 ounces, thus making the net increase in price less than one cent per loaf.

BENJ. L. JACOBSON,
Depot Commissary.

Sale of Soup Bones.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

CRISTOBAL, C. Z., October 2, 1914.

In addition to soup beet at eight cents per pound, the commissaries will, effective today, sell soup bones at two and one-half cents per pound.

BENJ. L. JACOBSON,
Depot Commissary.

Revised Cleaning and Pressing Price List.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

CRISTOBAL, C. Z., October 6, 1914.

The following changes in prices in the cleaning and pressing department of the commissary laundries will be effective October 12, 1914:

ARTICLE.	Old price	New price
Coats, pressed.....	\$0.50	\$0.40
Coats, cleaned and pressed.....	.75	.60
Trousers, pressed.....	.25	.20
Trousers, cleaned and pressed.....	.50	.40
Vests, pressed.....	.25	.20
Vests, cleaned and pressed.....	.35	.25
Skirts, ladies', pressed.....	.40	.40
Skirts, ladies', cleaned and pressed.....	.75-.1.50	.65-1.25
Coats, ladies', pressed.....	.40	.40
Coats, ladies', cleaned and pressed.....	.75-.1.50	.65-1.25
Dresses, pressed.....	.60	.60
Dresses, cleaned and pressed.....	1.50-2.50	1.25-2.50
Waists, silk, cleaned and pressed.....	.50	.35

BENJ. L. JACOBSON,
Depot Commissary.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m., on Saturdays and sailing days of Panama railroad vessels.

In rush periods, all stores will remain open until 7 p. m.

The following retail prices of cold storage provisions will be effective October 8:

FRESH MEATS.	Price.
Mutton—Stewing, per pound.....	10
Shoulder, trimmed, per pound.....	16
Leg (8 to 10 pounds), per pound.....	25

CANAL CLUBHOUSES.

Activities of the Young Men's Christian Association.

BALBOA.

A farewell reception was given at the clubhouse on Saturday evening, October 3, in honor of the secretary, George R. Adams. The following program was given: Selection, Corozal mandolin club; recitation, Mr. Butler; violin solo, Dr. Hill, accompanied by Mrs. Randolph; demonstration of physical culture, Jack Hawkey; vocal solo, Mr. Case, accompanist, Miss Otis; recitation, "A son of the tropics" Mr. Foster; selection Corozal mandolin club; piano solo, Mrs. Randolph. Mr. Van Fleet, on behalf of the community, expressed the appreciation of Mr. Adams' work. Refreshments of home made cakes and lemonade were served.

The checker tournament, which was postponed on account of the reception, will be held on Saturday evening, October 10. All clubhouses are requested to send players.

COROZAL.

Considerable interest is being shown in wrestling, 10 men having signed up for instruction under Mr. Westman.

Corozal took two out of three games in duckpins from Pedro Miguel on Friday night, by the following score:

Corozal.		Pedro Miguel.	
Moore.....	93 84 104	Davis.....	99 82 84
Gill.....	76 70 100	Piper.....	79 .. .
Ryan.....	100 80 86	Halloway....	87 84
White.....	99 75 96	Whiston....	85 89 91
Ruggles....	94 99 100	McDonald... 92 82 76	
		DeCorra....	80 108 89

Totals.... 462 408 486 435 448 424

High scores for the week were, as follows: *Tenpins*—Moore, 208; Parks, 200, 206; Terittier, 201, 225; Davis, 214. *Duckpins*—White, 103; Mundberg, 110; Gustavson, 113; Gill, 100; Seebt, 102, 101; Moore, 104; Gill, 100; Ryan, 100; Ruggles, 100.

The vocal solos of Mrs. A. P. Boyd were a special feature of the moving picture show on Thursday night.

The standing in the basketball league is, as follows:

Team.	Won.	Lost.	P. C
French.....	4	1800
English.....	4	2666
Germans.....	2	2500
Japs.....	1	3250
Russians.....	1	4200

PEDRO MIGUEL.

The local pool tournament, which ended in a tie between Mr. Edwards and Mr. Eggleston, was played off on Monday evening, September 28, resulting in favor of Mr. Edwards, by the close score of 50 to 49 points.

The local high duckpin scores for the past week were made by the following men: Anderson, 106; Whiston, 110; Davis, 109, 103; Hodges, 108; DeCorra, 104; Abramson, 110; Holloway, 105, 102, 101.

Eighty new books were recently ordered from the United States. The list includes a number of books requested by the members, and a number of others that will make a valuable addition to the local library.

The wrestling class under Mr. Westman is attracting a number of men who enjoy the exercise this pastime entails.

Members interested in a gymnasium class are invited to join the class now forming, to meet twice weekly.

GATUN.

A reception was held on Saturday evening, October 3, in honor of Mr. F. M. M. Richardson, superintendent of clubhouses and playgrounds. Mrs. Richardson, and the Reverend William Flammer, minister of the Canal Zone Union Church. The program follows:

Overture, Prochaska' orchestra; song, "All hail the power of Jesus' name"; invocation, Rev. Stephen Witt, soprano solo, Mrs. William Crook; "Gatun's welcome," Mr. W. C. Gayer, chairman Gatun Executive council; piano solo, Mrs. E. T. Gilbert; "The soldier's welcome," Corporal Baker; song, "Onward, Christian soldiers;" "The Union Church of Gatun," Mr. J. N. Twitchell, president Gatun Union Church; bass solo, Mr. H. Cantor; "Other Y. M. C. A.'s," Mr. C. R. Russell, secretary at Pedro Miguel; cornet solo, Mr. John Sweika; "Defense," Mr. Richardson and Mr. Flammer; song, "America;" reception to guests; refreshments and music. The committee of arrangements consisted of Messrs. W. C. Gayer, chairman; Thomas Richardson, J. T. Smith, E. T. Gilbert, A. N. Kjellander.

The Gatun clubhouse observed the proclamation of the President of the United States calling for prayers for the return of peace in Europe by having special prayers at the song service on Sunday evening, October 4. Musicien Sweika played two cornet solos.

A boys' bowling tournament is being formed. Any boy member may join. The fee is 50 cents. Mr. Kjellander has charge.

A "Smoker" will be given within a few days. The

affair will be in the nature of a farewell to the soldiers now at Gatun.

CRISTOBAL.

The monthly single folks tournament held on September 28 resulted, as follows:

Miss Cotton and Mr. Parker, 505; Miss Butler and Mr. Smith, 491; Miss Cox and Mr. Morgan, 456; Miss Bevington and Mr. Drew, 441; Miss Campbell and Mr. Russell, 427; Miss Cori and Mr. Bevington, 422; Miss Ragsdale and Mr. Prager, 419; Miss McKenzie and Mr. Patrick, 407; Miss Krabbe and Mr. Buser, 401; Miss McKenzie and Mr. Purchase, 398.

Mr. Henri Rodeghiero rolled the high score in duckpins, and Mr. P. C. Petersen rolled the high score in tenpins during September. Each received a box of cigars as a prize.

The two local pool tournaments for the month resulted in Mr. Alfred Hansli winning the first place, and Mr. Stanley Ashton, second, in French pool; Mr. Stanley Ashton, first place, and Mr. Ed. Roberts, second prize, in straight pool. Suitable medals will be given the winners. For running the highest number of balls during the tournament, Mr. Ed. Roberts was awarded a box of cigars.

The "Athletics" defeated the "Yankees" in the local basketball league on Thursday, October 1, by the score of 36 to six.

The Balboa basketball team plays at Cristobal on Saturday, October 17.

A checker team will play at Balboa on Saturday October 10.

Upon request, a minstrel show will be given. Music has been ordered and practice on the songs will begin the latter part of the month. All men interested are invited to enroll in the chorus.

THE CANAL RECORD,

Balboa Heights, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Progress on Canal Colliers.

A progress report on the new Canal colliers, the *Achilles* and *Ulysses*, now building at the yards of the Maryland Steel Company at Sparrow's Point, Md., shows that on August 31, work on both vessels was well ahead of contract time. The estimated degree of completion of the *Achilles*, under the hull specifications, including equipment and installation of ordnance, was 37.6 per cent, of which 28 per cent was represented by work, and 9.6 per cent by material. The elapsed time in building to August 31 was 4.6 months, and on that date the collier was estimated to be 1.2 months ahead of schedule. The estimated degree of completion of the *Ulysses*, under the hull specifications, which are similar to those of the *Achilles*, was 42.2 per cent, of which 35.8 per cent was represented by work, and 6.4 per cent by material. The elapsed time in building to August 31 was 4.6 months, showing work on this vessel to be 1.8 months ahead of schedule.

United States Navy Collier "Jupiter" Passes Through the Canal.

The collier *Jupiter*, which arrived at Balboa on Thursday, October 8, on its way from the north Pacific Ocean to Philadelphia, where it will restock with coal, is the largest vessel to have passed through the Canal to date. It is 520 feet long, 65 feet in the beam, and has a mean draft of 27 feet eight inches. When loaded with its normal supply of coal, its displacement is 19,360 tons.

The *Jupiter* is the only large vessel in the world driven by electricity. The electricity is developed by a turbogenerator, driven by steam, for which coal is the fuel, and transmitted to large motors connected to the twin shafts. The ship's officers say that the propelling system is satisfactory, and effects an economy of about 35 per cent in comparison with the usual systems. The *Jupiter* makes a speed of 14 knots, and its sister ship, the *Cyclops*, which is driven by marine engines, makes a speed of 14.61 knots.

The ship's passage through the Canal was begun in the morning of Saturday, October 10,

and on that day it was taken as far as the anchorage basin near the upper entrance to Gatun Locks, where it lay for about 48 hours for the effect of the fresh water on its barnacles. Its transit of the Canal was completed on Monday, October 12, and it cleared for Philadelphia on Monday evening at 7 o'clock. Its passage from Balboa as far as Gatun Locks was made in less than six hours, the shortest time yet required for this part of the transit, and demonstrated the smoothness of operation that has been developed in handling vessels through the Canal.

The colliers *Achilles* and *Ulysses*, now building for The Panama Canal, will be slightly smaller than the *Jupiter*. They will be approximately 500 feet long and 62 feet in the beam, with about the same depth and draft as the *Jupiter*.

Work of Admeasurers of Vessels.

With the increasing traffic through the Canal, the admeasurers of vessels at the two terminal ports have been kept busy. The majority of the vessels coming to the Canal for transit have been provided with certificates previous to arrival, but these have to be checked, and, in many instances, corrected before the vessel can enter the Canal. The time required for this is from an hour to about one day, but it is frequently longer, according to the degree of accuracy of the original measurement and the nature of the vessel. When a vessel comes without a certificate, the time required for its measurement approximates a day. After the verification of a ship's certificate, the only measurement required for future passage is that of deck load, if the vessel is carrying any.

Of the 30 vessels going through the Canal from Atlantic to Pacific during the month of September, four, including a motor boat, were given original measurement for Canal certificates at Cristobal. The remainder came provided with certificates; of these, 19 were checked and found correct, and seven were remeasured, their certificates being altered to conform with the rules of The Panama Canal. The schooner *Anthony D. Nichols* was measured at the port of Cristobal, but did not pass through the Canal. Of the 31 vessels going from Pacific to Atlantic during September, 16 were given original certificates at Balboa, and 15, provided with certificates, had them checked, and, in most cases, altered slightly. The steamship *Limari*, engaged in traffic on the west coast, was measured and certificated, but did not use the Canal. In addition to the foregoing, two launches and four deck loads were measured at Balboa for Canal tonnage.

In the cases of vessels with erroneously prepared certificates, the fault seems to lie principally in lack of care in interpreting the rules for measurement, or in following the certificate for the Suez Canal, the rules for which vary in some instances from the Panama rules.

WEATHER PROBABILITIES.

Probable Conditions on Isthmus During October and November.

Based on the records taken at Colon and Ancon for the past seven years, by the Division of Meteorology and Hydrography of The Panama Canal, the following weather conditions may be expected to prevail at the Canal entrances during the months of October and November.

OCTOBER.

Winds—Light variable winds will prevail at the Atlantic entrance to the Canal, south-east predominating. The average velocity should be about seven miles per hour, although the wind occasionally during rain squalls of short duration, may reach a maximum velocity of from 30 to 36 miles an hour.

Over the interior and at the Pacific entrance light northwest winds will prevail with a considerable percentage of variable wind. The maximum velocities here, too, during occasional rain squalls may exceed 30 miles an hour. These squalls are invariably of too short duration to produce a heavy sea.

Rain—The average October rainfall at the Atlantic entrance of the Canal is 14.40 inches, and on the Pacific side, 10.80 inches. Twenty-five days with rain may be expected on the Atlantic side, and about 20 on the Pacific. The average number of days with heavy rain (one inch or more) has been six on the Atlantic side, and two at the Pacific entrance.

Throughout the length of the Canal, the greater part of the rainfall occurs during the daytime; the heaviest precipitation is usually recorded between the hours of 1 p. m. and 3 p. m. At this season of the year, the percentage of daytime rainfall is higher over the interior and on the Pacific side than at the Atlantic entrance.

Fogs—Practically no fogs may be expected at either Canal entrance. Night and early morning fogs will be numerous over the interior. The average number of nights during the month with light or dense fog over Culebra Cut, at the continental divide, has been 25. As practically all fogs lift or dissipate before 8.30 a. m., they will not constitute a hindrance to the navigation of the Canal under present operating conditions.

Temperature—The average air temperatures in the shade will be approximately 80° Fahrenheit on both sides. The extreme maximum temperature may not be expected to rise above 92° Fahrenheit, or the minimum to fall below 70° Fahrenheit. The mean daily range is 10° Fahrenheit on the Atlantic side, and 14° Fahrenheit on the Pacific.

Barometric pressure—Barometric readings are quite uniform from day to day. The average sealevel pressure will be approximately 29.85 inches. Fluctuations in air pressure are so slight that local barometric readings are of practically no value in forecasting weather conditions. The maximum

reading during the month may not be expected to exceed 29.95 inches, nor the minimum to fall below 29.70 inches.

Storms—The territory traversed by the Panama Canal is remarkably free from severe storms of wide extent, although local rain and thunder storms are of common occurrence. This is the season of the West Indian hurricane and rough weather may be expected to the northward of the Atlantic entrance. These storms never extend as far south as the Isthmus, but a rough sea and heavy swell, accompanied by brisk northerly winds, are occasionally experienced outside the breakwater, following the passage of a hurricane across the Caribbean Sea to the northward.

Smooth seas and quiet weather usually prevail at the Pacific entrance to the Canal during the month of October.

Tides—Tidal fluctuations need not be considered in navigating the Atlantic entrance to the Canal, as the average tidal range is only about 0.9 feet, and the extreme range less than two feet.

The average tidal range at the Pacific entrance is about 13 feet, while the maximum range may reach 20 feet.

Panama tide predictions for the remainder of the month are presented in the following table:

DATE.	Time and height of high and low water.			
Wed., Oct. 14.....	4:49	10:44	17:22	23:32
Thurs., Oct. 15.....	4 8	11 2	3 9	12 0
Fri., Oct. 16.....	0:38	6:59	13:06	19:22
Sat., Oct. 17.....	1:31	7:50	13:59	20:12
Sun., Oct. 18.....	2:20	8:38	14:47	20:59
Mon., Oct. 19.....	3:04	9:23	15:32	21:44
Tues., Oct. 20.....	3:48	10:08	16:15	22:29
Wed., Oct. 21.....	4:31	10:52	16:59	23:14
Thurs., Oct. 22.....	5:15	11:37	17:45	23:59
Fri., Oct. 23.....	6:00	12:22	18:33	24:44
Sat., Oct. 24.....	6:49	13:15	19:24	25:33
Sun., Oct. 25.....	7:42	14:12	20:23	26:26
Mon., Oct. 26.....	8:46	15:17	21:33	27:24
Tues., Oct. 27.....	9:55	16:28	22:54	28:26
Wed., Oct. 28.....	11:12	17:40	24:00	29:33
Thurs., Oct. 29.....	12:40	18:55	25:00	30:46
Fri., Oct. 30.....	14:00	20:15	26:00	31:6
Sat., Oct. 31.....	15:30	21:45	27:00	32:15

The tides are placed in the order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Survey Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.). All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning; for instance: 15:47 is 3:47 p. m.

NOVEMBER.

Wind—Light variable winds will continue throughout the month at the Atlantic entrance to the Canal, southeast predominating. The average velocity should be about nine miles per hour, although maximum velocities of from 30 to 40 miles per hour are possible during occasional rain squalls of short duration.

At the Pacific entrance and over the inter-

rior, light northwest winds will prevail, with a considerable percentage of variable wind during the daytime. Maximum velocities here may reach 30 miles an hour during short rain squalls.

Rain—The average November rainfall at the Atlantic entrance of the Canal is 21.70 inches, and on the Pacific side, 10.50 inches. Twenty-seven days with rain may be expected on the Atlantic side, and about 23 on the Pacific. The average number of days with heavy rain (one inch or more) has been 10 on the Atlantic side, and three at the Pacific entrance. Over the interior and at the Pacific entrance, the greater part of the rainfall (about 70 per cent) occurs during the daytime, while along the Atlantic coast nearly half of the rain falls at night.

Fogs—Practically no fogs may be expected at either Canal entrance. The average number of nights during the month with light or dense fog in the Culebra Cut section of the Canal, near the continental divide, has been 14. As practically all of these fogs lift or dissipate before 8.30 a. m., they will not affect the navigation of the Canal during the daytime.

Temperature—The average air temperature in the shade will probably be slightly below 80° Fahrenheit on both sides. The extreme maximum temperature may not be expected to rise above 94° Fahrenheit, or the minimum to fall below 68° Fahrenheit. The mean daily range is approximately eight degrees Fahrenheit on the Atlantic side, and 14° Fahrenheit on the Pacific.

Barometric pressure—The average sealevel pressure will continue close to 29.85 inches. Fluctuations in air pressure on the Isthmus are so small that local barometric readings are of practically no value in forecasting weather conditions. The maximum reading the month may not be expected to exceed 29.98 inches, or the minimum to fall below 29.68 inches.

Storms—The so-called "Northers" may possibly extend as far south as the Atlantic entrance of the Canal during the month of November. These storms are characterized by steady brisk northerly winds ranging in velocity up to 30 or more miles per hour, and are usually accompanied by a heavy swell. The winds alone are of insufficient force materially to affect navigation at the Atlantic entrance, but the accompanying swell and heavy sea outside the breakwater may at times prove somewhat troublesome.

Smooth seas and quiet weather may be expected to prevail throughout the month at the Pacific entrance to the Canal.

Tides—Tidal fluctuations need not be considered in navigating the Atlantic entrance of the Canal, as the average tidal range is less than one foot, and the extreme range about two feet.

At the Pacific entrance, the average tidal range is about 13 feet, while the maximum range may reach 20 feet. Panama tide predictions for November are given below:

NOVEMBER.

DATE.	Time and height of high and low water.			
Sun., Nov. 1.....	2:36	8:48	15:07	21:02
Mon., Nov. 2.....	3:10	9:24	15:39	21:37

Mon., Nov. 30.....	27:00	31:51	36:11	41:41

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11.00 p. m.). All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning; for instance: 15:47 is 3:47 p. m.

Coal in Cargo Space.

A vessel coming to the Canal for transit "In ballast" had coal stored in a part of the cargo space, and was accordingly charged the rate of \$1.20 a ton, instead of the ballast rate of 72 cents. The ruling that cargo space must not be occupied if a vessel is to be rated "In ballast" is clear, and The Panama Canal will insist upon strict compliance.

Even in the case of a vessel of foreign registry, in transit from one United States port to another under a customs declaration of being in ballast, and prohibited by law from carrying cargo between such ports, it is pointed out that this does not affect the actual condition in regard to the space designated by the Panama rules as *earning capacity*, which alone forms the fundamental basis upon which tolls are charged.

Collapse of Section of Trestle Bridge Over French Canal.

A section, about 50 feet long, of the temporary trestle bridge over the French canal at Mount Hope, used for the passage of work and labor trains from the mainland to the site of the new coaling station on Telfer's Island, collapsed suddenly on Monday after-

noon, October 12, carrying a 75-ton crane and its engineer to the bottom of the canal, a depth of about 22 feet. The engineer extricated himself from the machine with some difficulty, but finally reached shore safely. A heavy piledriver passed over the trestle a few minutes before the accident, and at that time there was no intimation of trouble. The trestle was being used only until the new iron bridge, now under construction at the same point, is completed.

Moving of Panama Railroad Offices

The Panama railroad offices at Colon are being moved to the new Administration Building at Balboa Heights, and it is expected that by Thursday of this week the transfer will have been effected. Arrangements have been made by the chief of the Record Bureau to take over the railroad records in the offices of the superintendent and superintendent of railroad transportation, in line with the general plan of consolidation, and the miscellaneous clerical and correspondence work will be assigned to the Correspondence Bureau of the Executive Office. The timekeeping force will be accommodated in the general timekeeping office, and as soon as practicable the same system of timekeeping will be used for the railroad as for The Panama Canal.

The rooms assigned for the railroad's use in the Administration Building are, with one exception, situated on the third floor of the west wing, as follows: Superintendent, No. 336; superintendent of railroad transportation, No. 337; roadmaster, and superintendent of bridges and buildings, No. 333; chief dispatcher's office, No. 340; property clerk, No. 314; telephone and signals, No. 329; correspondence clerks, No. 205.

Effective November 1, 1914, the forces in the offices of the superintendent, superintendent of railroad transportation, roadmaster, superintendent of bridges and buildings, and the telephone and signal department will be transferred to the Executive Office of The Panama Canal, and the railroad billed for services rendered.

The offices vacated by the railroad in Colon will be occupied temporarily by the captain of the port and by the Cristobal-Colon quarantine service.

Agricultural Opportunities.

Canal employes interested in agricultural opportunities in the State of Oregon may procure copies of publications issued by the Oregon State Immigration Commission upon application to the Office of the Executive Secretary, Balboa Heights.

Remeasuring and Renumbering Lighters, Barges, and Small Craft.

A plan has been approved for the remeasuring and renumbering; also, reclassification of all the scows, lighters, barges and small boats in the service of the The Panama Canal and the Panama railroad. This will involve an inspection of all this class of craft and preparation of a report showing the reclassification, new measurements, old numbers now on craft, and new numbers assigned and applied when the inspection and remeasurement is made. The Board of Local Inspectors will designate a representative from the Division of Canal Transportation to supervise the work; each division using floating equipment will be called upon to furnish the necessary labor and material.

The new numbers applied to scows, lighters, barges, etc., will be 12 inches high, painted in

white on each side of craft, as well as on the inside of bulkheads, the exact location in each instance to be determined by the representative of the Board of Local Inspectors, it being the intention to have numbers appear in as nearly uniform places on the boats and as conspicuously as possible. Pangas, cayucas, and other small rowing or paddling craft will be numbered consecutively from one upward, without regard to class, using 2-inch letters and figures, painted on both sides of the bow; in addition, the numbers will be branded into the wood both inside and outside of each boat.

Future equipment, when placed in service, will be assigned numbers by the Board of Local Inspectors, acting in conjunction with the Surveying Officer.

PERSONAL.

Mr. T. H. Rossbottom, assistant to the vice-president, and secretary of the Panama Railroad Company, with headquarters in New York City, accompanied by his daughter, arrived on the *Colon*, which docked at Cristobal on Sunday, October 11.

Mr. F. R. Blunt, superintendent of transportation, sailed for New York on the *Turrialba*, on Thursday, October 7, on 15 days' special leave of absence.

Granite for Dry Dock No. 1.

A contract has been entered into with the Stone Mountain Granite Corporation of Stone Mountain, Ga., to supply the granite required for the entrance to dry dock No. 1 at the Balboa terminals. The stone is to bear heavy and sustained pressures imposed by the miter gates and floating caisson, and will be subject to the action of sea water. Award has been made for approximately 11,496 feet of dressed, and 752 cubic feet of rough granite. All sill stone for the miter gates is to be delivered on the Isthmus on or before November 24, 1914, and the remainder of the order on or before December 19, 1914.

Changes in Cristobal Commissary.

Some alterations, designed in the main to give more counter and shelf room, have been made in the interior of the Cristobal commissary. The department for tobacco, cigars, candy, etc., formerly occupied a space to the right of the entrance to the gold section, in an

enclosure that formed the dividing line between the gold and silver sides. This enclosure has been removed and the counters and shelving in both front and rear through the building have been made continuous. The candy and tobacco department will be in about the same general location as before, but the goods will be displayed on new shelves built against the wall of the building, and customers will be served over a new counter rounded at the ends. Two gates, spaced about eight feet apart, have been placed in the main aisle, which forms the barrier between the gold and silver sides. The purpose of two gates is to provide additional space when the silver side is overcrowded, by opening one of the gates, and *vice versa*. About 40 feet of additional counter and shelf space both in front and the rear of the commissary, have been gained in the rearrangement. In addition, the aisles for the salesmen have been narrowed, while the customers' aisle has been enlarged in width; the manager's raised office has also been widened and now affords a much better view of the sales departments. The packing of shipments for line customers, etc., heretofore done in a department outside the main building, known as XG, has been abolished, and packing operations will be carried on inside, in a special space set apart for the purpose.

Knights of Columbus.

The regular monthly meeting of Nombre de Dios Assembly, Knights of Columbus, was postponed from Sunday, October 11 to Sunday, October 25, at 2.30 p. m., at lodge hall, building No. 1, Cristobal. The annual election of officers will take place at this meeting.

THEO. A. AANSTOOS,
Faithful Navigator.

Panama Canal Marine Association.

The Panama Canal Marine Association will hold its regular meeting on Sunday, October 18, at 7.30 p. m., in its hall at Paraiso.

F. E. NEHLS,
Recording Secretary.

BALBOA, C. Z., October 12, 1914.

Labor train service out of Culebra will be discontinued on October 19.

The post-office at Bas Obispo will be moved to Corozal and reerected on a site in the rear of the railroad station.

Deceased Employes.

Name.	Check No.	Native of	Isthmian residence.	Employed by	Date of death.
Campbell, Chas.	50549	Jamaica	Cristobal	Panama railroad.	Oct. 8, 1914.
Douglas, Chas.	23046	St. Kitts	Colon	Dredging Div.	Sept. 26, 1914.
Grant, Alexander	2624	U. S. A.	Paraiso	Paraiso shops	Sept. 3, 1914.
Lloyd, George	51584	Fortune Island	Cristobal	Panama railroad.	Oct. 5, 1914.
Lynch, Reynold	218907	Barbados	Corozal	Supply Dept.	Oct. 2, 1914.
Maloney, Herman	47457	Barbados	Enterprise	Drill runner Sos. Hill.	Oct. 5, 1914.
Sobesty, Daimen	20338	Martinique	Colon	Health Dept.	Oct. 1, 1914.
Thomas, Solomon	9990	Jamaica	Panama	Panama railroad.	Oct. 2, 1914.
Williams, Robert	53870	Jamaica	Mount Hope	Fortifications	Oct. 4, 1914.

The estates of these deceased employes of the Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against these estates, or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

SOCIAL LIFE OF THE ZONE.

Christmas Gifts for Children in War Zone.

A New York paper has begun a movement to have the children of the United States send Christmas presents to the children in the war zone of Europe, including Japan, who have been made fatherless by the war. The proposition has met with an immediate response and throughout the country children are organizing for the project. The idea is to designate in each city and town one or more receiving depots where the gifts of the children will be sent. These receiving depots will, in their turn, forward the gifts to one central depot in New York City, whence they will be forwarded by ship, called the "Children's ship" in time to reach Europe before December 25. Arrangements will have been made for depositing and forwarding depots in the port towns where the steamer will call. The President and officials of the United States Government are interested, though not officially connected with the movement, and aid has been promised to insure the safe delivery of the freight on the children's ship.

An invitation has been extended to the children in the Canal Zone to join this movement. Through their clubs, camp fire girls, and boy scouts, their school classes and the Sunday schools, the American children are asked to form organizations for the purpose of collecting gifts. These gifts should be preferably small articles such as may be easily transported. The Governor of the Panama Canal has promised free transportation into the United States for the children's gifts. Parcels should be sent to the district quartermaster in any Canal village, marked "Christmas gifts for Europe," where they will be received and packed for shipment. While toys and books will be acceptable, emphasis is being laid on the necessity for useful articles, as the presents are intended primarily for distribution among the children of the poorer classes on whom the loss of the father and breadwinner falls most heavily.

La Boca Clubhouse.

A clubhouse for colored men, under the direction of the Young Men's Christian Association, will be opened in La Boca about October 15. The building to be used is the old Porto Bello clubhouse, which has been reconstructed for the purpose. Thomas B. Neely, a colored Y. M. C. A. man, has been engaged as secretary of the building and the club. He arrived on the Isthmus on Sunday, October 4. He is a graduate of Tuskegee Institute; also, of Howard University, an institution for colored people founded by Gen. O. O. Howard, at Washington, D. C. After his graduation he entered the Y. M. C. A. work and has served in various positions in the department for colored men. He was general secretary of the association in this department at Columbus, Ga., when he resigned to accept the appointment in the Canal Zone.

Medical Examination of Schoolchildren.

The annual medical examination of all the children attending the Canal Zone schools, excepting the high school, has been authorized to take place during the school week beginning on Monday, October 26. A form containing simple questions concerning the physical condition, tendencies, and habits of each child, will be sent to all parents and

guardians of children in the schools, which will serve as a guide to the examining physician. This form, filled out and signed by the parent or guardian, will be handed to the examining physician when he comes to the school. Special cards are issued for children found to have defective teeth, containing the result of the examination and advice to the parent or guardian to have the child taken to a dentist. With this card is a detachable coupon which the dentist consulted will fill out stating the nature of the work done, and then forward to the Division of Schools. In case the child is not treated by the examining dentist, the reason why is stated on the coupon. The same system is used in the cases of children found to be defective in the matter of eyes, ears, or nose. Advice here given is that the child be taken to the surgeon in charge of the eye and ear clinic, either at the Ancon or Colon Hospitals. A detachable coupon similar to that issued with the dentist's report is furnished with this card. By this system an accurate card health record of the schools can be kept from year to year.

Reading on Trains.

A circular has been issued to the pupils traveling on the trains instructing them to avoid reading as much as possible while traveling. If reading or study are found to be necessary, the pupils are cautioned to minimize it. A protection to the strain of the eyes, if reading is necessary, will be found in slipping a card or piece of paper under each successive line. The further caution is given to the pupils never to read on the evening train on the approach of dusk, or when the lamps are lighted. The circular is in line with the effort to maintain the highest possible physical efficiency in the pupils of the Canal Zone schools.

Canal Medals.

The medals and service bars earned by Canal and Panama railroad employes for the period 1911 to 1913 were received on September 29, and are being distributed. The list of medals earned is smaller than in any previous period, with the exception of 1904 to 1906. The number of first and second service bars is also considerably less than for the preceding period, while the number of third service bars increased. A statement of the number of medals and service bars issued for each period from 1904 to 1913, inclusive, follows:

PERIOD.	No. medals	First bar	Second bar	Third bar
1904-1906.....	232
1905-1907.....	885
1906-1908.....	1,147	146
1907-1909.....	1,384	536
1908-1910.....	943	704	92
1909-1911.....	959	830	362
1910-1912.....	939	615	498	74
1911-1913.....	294	384	376	192
Total.....	6,783	3,215	1,328	266

Medal and bar service ceases to be earned after December 31, 1914.

Meteorological observations at Ancon were discontinued at 12, midnight, on September 30, on and after which date, the reports at Balboa Heights were made the official station reports.

Mr. F. M. M. Richardson, superintendent of clubs and playgrounds, has been appointed secretary of the Canal Zone chapter of the American National Red Cross.

JOINT LAND COMMISSION.

Awards.

Award No. 58, docket numbers as shown, October 5, 1914. In the matter of sundry claims—An award is hereby made against the United States in favor of the persons hereinafter named, in the sum of \$645, United States currency.

This award shall be paid to the respective claimants hereinafter named, in the amounts hereinafter specified, on or before the 5th day of November, 1914, and if payment, or tender of payment, of any item of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum, until paid:

Acosta, Gobino, docket No. 240, for all rights, claims, and other interests in growing crops, fruit trees, house without tax number, and any other buildings and any other improvements which the said Acosta may possess or may have possessed on the lands of Agua Salud, near Buena Vista, the sum of \$200, United States currency.

Acosta, Lucio, docket No. 247, for all rights, claims, and other interests in growing crops, fruit trees, house without tax number, and any other buildings and any other improvements which the said Acosta may possess or may have possessed on the lands of Agua Salud, near Buena Vista, the sum of \$200, United States currency.

Becas, (Bacus) Filomena, docket No. 253, for all rights, claims, and other interests in growing crops, fruit trees, house without tax number, and any other buildings, and any other improvements which the said Becas (Bacus) may possess or may have possessed on the lands of Palenquillo, near old Frijoles, the sum of \$125, United States currency.

Castillo, (Cantillo), Louisa, docket No. 238, for all rights, claims, and other interests in growing crops, fruit trees, house without tax number, and any other buildings and any other improvements which the said Castillo (Cantillo), may possess or may have possessed on the lands claimed by Samuel Miller, near Buena Vista, the sum of \$120, United States currency.

Total, \$645, United States currency.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Award No. 59, docket No. 28, October 5, 1914—In the matter of the claim of Maria Cespedes, for property near Aguas Claras and Gatuncillo Rivers—An award is hereby made against the United States, in favor of Maria Cespedes, in the sum of \$1,000, United States currency, for all rights, title, claims, and other interests in lands, growing crops, fruit trees, houses without tax numbers, and any other improvements which the said Maria Cespedes may possess or may have possessed on the lands below the 100-foot contour line, described in the claim as being "Three (3) leagues in circumference, starting from a point at the confluence of Aguas Claras and Gatuncillo Rivers."

This award shall be paid to the claimant herein named, in the amount herein specified, on or before the 5th day of November, 1914, and if payment or tender of payment of this award is not made on or before that date, such award shall thereafter bear interest at the rate of six per centum (6%) per annum until paid.

The claim in so far as it refers to gold and silver mines known as "Emanuel," "Ensenada," and "Dolores," is hereby dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rules of Dismissal.

Rule of dismissal No. 138, October 3, 1914. In the matter of sundry claims—With reference to the claims for improvements of the persons hereinafter named, the evidence before the commission is that they have made settlements with the United States for their houses and other improvements. The names of such persons, their docket numbers, the tax numbers (where stated) of the houses included in the settlements, and their locations, follow:

Name.	Docket No.	Tax No.	Locality.
Cabeza, Gabriela.....	1702	897	Nombre de Dios
Carabajal, Andres (Carabajal).....	1190		Nombre de Dios
Galvan, Bruno.....	1198	C-911-P	Nombre de Dios
Galvan, Clemente.....	1241	893	Nombre de Dios
Marquez, José (Marques).....	1690	C-909-P	Nombre de Dios
Morales, Felipe.....	1202	C-907-P	Nombre de Dios
Nino, Celestino.....	1688	C-899-P	Agua Dulce
Pacheco, Ceferino (Senterino).....	1689	877	Nombre de Dios
Palomino, Roque.....	1706	898	Nombre de Dios
Perez, Blas C.....	1707	890	Nombre de Dios
Reed, Louis (Reid).....	1200		Nombre de Dios
Salazar, Pedro.....	1193		Nombre de Dios
Thigariidi, Cecilio (Thieralo, Cicello).....	1709	C-901-P	Nombre de Dios

Villalobos, Vicente... 1188 Nombre de Dios
Wood, Cyril... 1194 859 Nombre de Dios

In view of the agreements before noted, these claims call for no further action by this commission, and they are accordingly dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule of dismissal No. 139, docket numbers as shown, October 3, 1914. In the matter of sundry claims—The following claims for improvements, said to have been located on the Buena Vista lands, are hereby dismissed for the reason that the evidence submitted to the commission does not justify an award being made:

Claimant.	Docket No.	Location.
Canady, James (Kennedy, Robert)	239	Buena Vista
Marina, Juana Josefa	251	Buena Vista

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule of dismissal No. 140, docket No. 27-1, October 5, 1914. In the matter of the claim of Hortensio de Leon, et al—Hortensio de Leon, Braulio Quesada, Crescencia Quesada, Octaviano Barrios, Tibursio Carmona, and Victoria de los Rios de Jimenez, claim to be the owners of about five hundred (500) hectares of land known as "Aguardientito" and located near Cruces, Canal Zone, which lands are declared by the United States to have been necessary for the construction, maintenance, operation, protection, and sanitation of the Panama Canal.

The document which they rely upon as evidence of title is a series of sworn statements made before the Circuit Court of Gorgona in the month of December, 1895, by several persons who at the request of José Quesada, Juan Pio Jimenez, Rimigio Barrios, Tibursio Carmona, and Ventura de Leon testified that José Quesada had been occupying with houses, clearing, and cultivations, public lands known as "Aguardientito" for more than 13 years; Juan Pio Jimenez for more than 17 years; Rimigio Barrios for seven years, and Tibursio Carmona and Ventura de Leon for over five years, each of them, but said document is not sufficient title of ownership, according to the Colombian laws in force in the territory of the Canal Zone prior to the American occupation in 1904.

The ownership to lands of "Aguardientito" already occupied by José Quesada, Juan Pio Jimenez, Rimigio Barrios, Tibursio Carmona, and Ventura de Leon for 17, 13, seven, and five years, respectively, up to 1895, as it is shown in the declaration of witnesses submitted to the commission, could not have been acquired by extraordinary prescription, because, in accordance with Article 2532 of the Civil Code, "The lapse of time necessary to acquire by this kind of prescription (extraordinary) is 30 years against any person, and is not suspended in favor of those enumerated in Article 2530," and the time they have been on said lands hardly covers the period of years required for the acquiring of them by extraordinary prescription.

Furthermore, Law 48 of August 28, 1882, amendatory of Cultivators' Law of 1874, said:

"11. Public lands (tierras baldías) shall be considered property of public use and the ownership thereof shall not prescribe against the nation, in any case, in conformity with the provisions of Article 2519 of the Civil Code."

From the above facts, the commission has reached the conclusion that Hortensio de Leon, Braulio Quesada, Crescencia Quesada, Octaviano Barrios, Tibursio Carmona, and Victoria de los Rios de Jimenez are not the owners of the lands of "Aguardientito," and their joint claim is hereby dismissed without prejudice to any claim they, or either of them, may have for improvements on said premises.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Supplies for the Canal.

The following steamers, with supplies for The Panama Canal and Panama railroad, arrived at the ports of Colon and Cristobal during the week ending September 26. In addition there is included the material from cargoes of the steamer *Santa Clara*, which was not reported before:

Santa Clara, September 18, from Baltimore, with 3,168,485 pounds structural steel, 1,577,900 pounds structural steel, for Division of Terminal Construction, and 2,108,714 pounds structural steel, for Panama railroad.

Advance, September 23, from New York, with seven cases electrical machinery, one reel cable, 1,200 pieces clay conduit, two boxes copper rail bonds, one box glass-ware, two cases patterns, for lock erection; two cases electrical machinery, 30 packages copper wire and fittings, eight boxes loading coils, 13 reels cable, two boxes adding machine for Panama railroad; one box bronze wearing rings, for Dredging Division; two cases electrical material, two cases electrical machinery, 101 bundles conduit and fittings, 177 bundles iron pipe,

20,004 pieces clay conduit, two reels cable, two boxes spare parts, for Electrical Division; three crates structural steel, 27 crates hypochlorite of lime, one box pump parts, five cases glass and woodwork, five crates steel troughs, 27 crates water meters, 13 barrels sulphate of copper, for Division of Municipal Engineering; 13 barrels structural steel, nine cases steel castings, three bundles rubber belt, one box repair parts, for Division of Terminal Construction; two cases pneumatic tool parts, one case brake shoe heads, four cases sewing machines, one box leather bands, one box bandsaws, one box threadtight, one package books, one package pulley blocks, one box blueprint paper, for Mechanical Division; 14 cases addressograph machine, one case typewriter, for Accounting Division; eight packages medical supplies, one box artificial limb, one package books, for Health Department; one package badges, for Division of Canal Transportation; three crates iron lamp posts, for Division of Fortifications; one case woodwork, one case handrail, nine cases sheet copper, two barrels liquid paint, 25 rolls wire concrete reinforcement, for permanent buildings; 25 packages stationery material, seven kegs forgings, three cases bolts and nuts, 16 cases solder, 40 cases lampblack, 60 cases paint, one box injectors, nine packages hardware, two boxes flags, one crate bottle carriers, two boxes pitchers, two cases marine motors, 25 kegs mule shoes, two bundles wagon springs, two boxes fange parts, one keg emery, two kegs bicarbonate of soda, three cases waiters' coats, 166 crates shelving, two boxes tools, for stock; and a miscellaneous cargo, the whole consisting of 22,188 packages, weighing approximately 334 tons.

Cartago, September 23, from New Orleans, with 204 bales rice straw, for stock.

Zacapa, September 23, from New York, with 46 packages electrical material, for Panama railroad; four reels wire rope, for Dredging Division; two cases sandpaper, 12 barrels paint in oil, three boxes iron pipe-fittings, 122 boxes window glass, 11 barrels rosin, 18 cases paint in oil, three boxes varnish, for stock.

Alm, September 24, from Mobile, with 250 pieces iron water pipe, for Division of Municipal Engineering; 2,351 pieces (64,506 board feet) yellow pine lumber, for stock.

Turrialba, September 24, from New Orleans, with one keg iron castings, for Mechanical Division; six steel castings, for Dredging Division; two boxes chisels, three boxes industrial truck, for stock.

Stages of the Chagres River, Gatun Lake, and Miraflores Lake.

Maximum heights of the Chagres River, Gatun and Miraflores Lakes for the week ending midnight, Saturday, October 10, 1914. All heights are in feet above mean sea level:

Proposals for Construction of Railroad Station at Balboa Heights.

THE PANAMA CANAL, OFFICE OF CHIEF QUARTERMASTER.

Sealed proposals will be received at the office of the Chief Quartermaster, Panama Canal, Balboa Heights, C. Z., for the erection, by contract, of the new Panama railroad station at Balboa Heights. Bids will be received until 3 p. m., October 17, 1914, when they will be opened in the office of the Chief Quartermaster.

The buildings are to be constructed of concrete blocks and stucco, with reinforced concrete foundations and umbrella shed. The Panama Canal will furnish all material on cars at the site of the work, and the contractor will be required to furnish all labor. Plans and specifications may be obtained at the office of the Chief Quartermaster, Balboa Heights. A deposit of \$15 will be required to insure their return.

Each bidder must accompany his proposal with a certified check, cash, or money order for 10 per cent of the amount bid, as a guarantee of his acceptance of the contract.

Bids should be marked "Proposal for Panama railroad station."

The Panama Canal reserves the right to reject any or all bids.
W. R. GROVE,
Chief Quartermaster

CANAL CLUBHOUSES.

Activities of the Young Men's Christian Association.

BALBOA.

The Balboa basketball team will go to Cristobal Saturday night, October 17, to play the Cristobal team.

The Cristobal checker club has promised a team to represent it at the local checker tournament on Saturday night, October 17, at the Balboa clubhouse.

Captain Weber, an intertranscontinental traveler, who is out on a 36,000-mile walk from New York to Buenos Aires and return, will deliver a lecture at the clubhouse Saturday night at 8 o'clock. Admission is free to all.

The boys of Balboa between the ages of 13 and 16 years met in the Y. M. C. A. on Saturday morning, October 10, at 10 a. m., and organized a boys' club, known as the "Balboa bugs." This club is open to all boys between the above ages. T. S. Booz was elected "Big bug," Steve Engelke, "Pinch bug," and James Roberts, "Scratch bug." The first degree of the order will be conferred upon all boys present next Saturday morning at 10 o'clock. All boys who can keep a secret are invited to be present.

COROZAL.

The following high scores were recorded for the past week:

Duckpins—Ruggles, 108; Kite, 106; Ryan, 102, 100; White, 101; Walker, 101.

Tenpins—White, 221, 201; Kite, 200.

Mr. Weston met a large and enthusiastic wrestling class on Saturday night. This class meets once a week. Every one is welcome. There is no instruction charge.

Practice for the track and field events for the San Francisco exposition was held on Saturday evening.

The list of new library books to be sent to the United States, while complete, is being held up, awaiting the return of library books now out and overdue.

GATUN.

The special musical numbers for the Sunday evening song service were two violin solos by Mr. Wright, accompanied by Mrs. D. W. Dennis.

Gatun entertained the Corozal duckpin team on Saturday evening, October 10, Gatun taking two out of three match games.

Messrs. Wright and Sales supplied piano and drum music for last week's motion pictures. They will play again Saturday evening thisweek.

The boys of the Pedro Miguel Y. M. C. A. were the guests of the boys of Gatun on Saturday, October 10. The results of the three contests were:

Indoor baseball—Gatun 14; Pedro Miguel 13.

Basketball—Gatun 9; Pedro Miguel, 6.

Duckpins—Gatun, 241; Pedro Miguel, 207.

CRISTOBAL.

Mr. Milton A. Smith took first prize in the monthly ragtime bowling tournament on Wednesday, October 7. The games bowled were cocked-hat, duckpins, and tenpins. Score, 239; Pinney, second, 219; and Cotton, third, 203.

Capt. H. Weber, a veteran of the Boer war, who has traveled much in South America on foot, gave an account of his travels, showing many pictures and curios on Thursday, October 8.

A meeting of the boys' department was held on October 13 to select teams for a series of aquatic contests. All the boys of Colon Beach and Cristobal between the ages of 10 and 16 years are invited to enter.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., October 12, 1914.

The following insufficiently addressed letters originating in the United States and its possessions have been received at the office of the Director of Posts, and may be procured upon request of the addressee:

- Haltman, Robert Whitfield, George E.

FOUND—A small leather purse. Owner may recover same upon application to the office of THE CANAL RECORD, Balboa Heights, identifying property.

OFFICIAL CIRCULARS.

Charges for Deck Hands Furnished Vessels in Transit.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., October 5, 1914.

CIRCULAR No. 691:

1. In case The Panama Canal furnishes additional hands for vessels in transit through the Canal, for the purpose of assisting in handling lines, etc., the charge against the vessel shall be at the rate of \$2 per man for complete trip through the Canal. When such extra men are furnished by the Canal, the charges shall be collected in advance by the Collector after the bill has been submitted by the captain of the port.

2. The above should not be construed to mean that agents or masters will be prohibited from employing such men as they may require for this service.

GEO. W. GOETHALS,
Governor.

Danger from Spillway Discharges.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., October 9, 1914.

To all concerned—To regulate properly the levels of Gatun and Miraflores Lakes, it is necessary at times to operate the gates of the spillways at any hour of the day or night. It is not practicable to give special warning or notice on each occasion of such operation.

All persons are hereby cautioned that the channels and rivers below the spillways are liable to sudden freshets due to the operation of the regulating gates, and that such freshets may endanger life or property lying within the reach of the waters.

GEO. W. GOETHALS,
Governor.

Building Division.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., October 9, 1914.

CIRCULAR No. 660-21:

The Building Division created by Circular 660-20, is a part of the organization of the Department of Operation and Maintenance, effective October 1, 1914, to conform to the general plan of carrying all construction divisions in that department. All employes reporting to the Constructing Quartermaster will be carried on the rolls of the Department of Operation and Maintenance, Building Division.

GEO. W. GOETHALS,
Governor.

Tug Service Through Culebra Cut.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., October 5, 1914.

CIRCULAR No. 686-2 (Amending Circular No. 686):

Hereafter, during construction work in Culebra Cut, and until normal conditions obtain, no charge will be made for tug service to the vessels using the Cut, unless the size of the vessel be such that a tug would be required to insure safety, provided the Canal were completed to its designated size.

GEO. W. GOETHALS,
Governor.

Consolidation of Offices.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., October 12, 1914.

To all concerned:

1. The office of the local auditor of the Panama Railroad Company will be moved to Balboa Heights and consolidated with the office of the Auditor of the Panama Canal on October 15, 1914.

2. The Auditor of the Panama Canal will assume the duties of local auditor of the Panama Railroad Company at the beginning of business October 15, 1914. Any mail matter for the local auditor should be addressed accordingly to Balboa Heights.

3. Effective at the beginning of business October 16, 1914, the duties of local treasurer pertaining to the disbursement of funds by the railroad company will be assumed by Mr. John H. McLean, Paymaster, and the duties of the local treasurer pertaining to making collections will be assumed by Mr. T. L. Clear, Collector, Panama Canal.

4. The local treasurer at Colon and the cashier at Panama will close their accounts as such at the close of business October 15, and transfer all cash to Mr. John H. McLean, Paymaster. Mr. Wardlaw's accounts will be closed as soon as possible thereafter, whereupon, as deputy collector, he will assume the duties now performed by the cashier in the Panama station.

5. On and after October 16, all payments of the Panama Railroad Company at Colon will be made by the Paymaster through his representative at that point, Mr. E. A. Keeling, and all collections will be made by

the Collector through his representative, Mr. E. P. Sine, deputy collector at Cristobal.

6. Station agents and other collecting agents of the Panama Railroad Company from Colon south to and including Gamboa will make their remittances to the deputy collector at Cristobal. All remittances of station agents and other collecting agents of the railroad company south of Gamboa will be made to the deputy collector in the Panama station.

7. The accounts of Mr. Wardlaw and his cashier will be closed out under the supervision of the present local auditor of the Panama Railroad Company and the Auditor, Panama Canal.

Approved: H. A. A. SMITH,
Auditor, Panama Canal.

GEO. W. GOETHALS,
Governor, Panama Canal.
President, Panama Railroad Company.

Steamshovel Cranemen Wanted.

THE PANAMA CANAL,
OFFICE OF EXECUTIVE SECRETARY,

BALBOA HEIGHTS, C. Z., October 10, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

The United Fruit Company requires the services of two steamshovel cranemen at Port Limon. They will pay \$110 a month for experienced men, and \$60 a month to begin with for men without experience. Application should be made to the office of the United Fruit Company in Cristobal.

C. A. MCLVAINE,
Executive Secretary.

Inventory of Nonexpendable Property in Administration Building.

THE PANAMA CANAL,
OFFICE OF EXECUTIVE SECRETARY,

BALBOA HEIGHTS, C. Z., October 10, 1914.

Heads of Departments and Divisions in the Administration Building—At an early date it is the intention to take a complete inventory of the nonexpendable property in the new Administration Building at Balboa Heights.

In order to eliminate as much unnecessary work as possible in connection with this inventory, it is desired that heads of departments and divisions, at the earliest practicable date, send to the property clerk, in the basement of the building, any material of this nature, which may be unserviceable or no longer needed.

Any material of this nature now in the basement, or to be sent to the basement, should be labeled to show the division to be credited, and whether "Unserviceable," or "No longer desired."

Material not needed in one division may be of some service in another, and arrangements may be made with the property clerk for transfer.

All material of this class, which has been stored in corridors, should be at once removed to the basement, or to the offices and rooms for which intended.

Instructions will be issued within a few days covering preparations for the general inventory.

C. A. MCLVAINE,
Executive Secretary.

Examinations by Board of Local Inspectors.

THE PANAMA CANAL,
BOARD OF LOCAL INSPECTORS,

BALBOA HEIGHTS, October 9, 1914.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 308, on Wednesday, October 21, 1914, beginning promptly at 2 p. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m. at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m.; and at Balboa, at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

By direction of the chairman of the board.
F. M. NIXON,
Clerk, Board of Local Inspectors.

COMMISSARY DEPARTMENT.

Milk and Cream.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER,
BALBOA HEIGHTS, C. Z., October 8, 1914.

To district quartermasters and commissary storekeepers:

A report of the chemist relative to quality of fermillac and sweet milk is quoted below:

"1. A sample of fermillac, ex steamer *Santa Maria*, September 10, 1914, sample of sweet milk, and fermillac, ex steamer *Advance*, September 22, 1914, and a sample of sweet milk, ex steamer *Panama*, September 28, 1914, have been inspected, representing the last two shipments and the stock on hand.

2. The fermillac was found to be in good condition in both instances. A slight separation is noticeable, as a general rule, in all fermillac bottles, but the contents readily mix in an even consistency.

3. The sample of sweet milk, ex steamer *Advance*, had an odor coming from the inside of the neck of the bottle and the top of the cream layer, but after cleaning the inside of the neck of the bottle with a soft cloth no odor was perceptible, and when the milk and cream were mixed by pouring from the bottle it was found to be sweet and in good condition.

4. The sample of sweet milk ex steamer *Panama*, was free from odor, was sweet and in good condition.

5. Oftentimes there is considerable odor from the top of the cream layer and inside of the neck of the bottles, and the older the milk the more pronounced is this odor, but by carefully cleaning the neck of the bottle after opening, and removing a very small amount of the cream from the top before mixing, the odor disappears."

Please call the above report to the attention of commissary patrons and request them to handle milk on opening as indicated in Paragraph 5.

W. R. GROVE,
Chief Quartermaster.

Ginger Snaps.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

BALBOA HEIGHTS, C. Z., October 12, 1914.

District quartermasters and commissary storekeepers—Ginger snaps will hereafter be baked twice a week. Orders for delivery on Tuesday mornings must reach the depot commissary not later than the preceding Saturday; orders for delivery on Friday morning must reach the depot commissary not later than the preceding Wednesday.

W. R. GROVE,
Chief Quartermaster.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m., on Saturdays and sailing days of Panama railroad vessels.

In rush periods, all stores will remain open until 7 p. m.

Cold Storage Prices.

The following retail prices of cold storage provisions will be effective October 15:

	FRESH MEATS.	Price.
Mutton—	Stewing, per pound.....	10
	Shoulder, trimmed, per pound.....	16

Flour, lb.	.03	.03 1/2

WEATHER CONDITIONS, CANAL ZONE, SEPTEMBER, 1914.

Rainfall during the month was generally above normal, being heavier over the upper Chagres River basin and along the Atlantic coast. September rainfall was above the station averages at 12 stations and deficient at six stations. The monthly totals ranged from 6.38 inches at Miraflores to 28.92 inches at Indio, on the upper Chagres. The maximum precipitation recorded in one day was 3.39 inches at Trinidad on the 10th.

Monthly mean air temperatures and relative humidity were approximately normal, while there was a slight deficiency in atmospheric pressure. The average daytime cloudiness was the highest which has been recorded for September, at both stations.

No fogs were observed during the month at either coast station, while the average number of nights with fog at the interior station was 11. Of the fogs observed, 49 per cent were dissipated by 6.30 a. m., 88 per cent by 7.30 a. m. and 93 per cent by 8.30 a. m.

Elevation of Gatun Lake (feet above mean sea level): Mean for month 85.57; maximum, 86.17 on 30th; minimum, 84.82 on 8th. Evaporation from lake surface 4.074 inches.

The following table summarizes the weather conditions for the month.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone,
Isthmus of Panama.

No communication either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Oil Cargoes.

Some shipping companies are under the impression that, in order to pass a vessel loaded with crude oil, or similar products, through the Canal, it is necessary to first obtain permission, by cable, in advance. This is not the case. In general, there is no objection to such vessels using the Canal, unless some unusual condition of vessel or cargo obtains, which might endanger the Canal, or interfere with its navigation, and permission for their passage will be granted on arrival at the Isthmus. Section 4 of the Executive Order, providing "Rules and regulations for the operation and navigation of The Panama Canal and approaches thereto, including all waters under its jurisdiction," was introduced, so that the Canal authorities might have discretionary power in individual cases in passing judgment on the condition of the vessel, and the nature and location of its cargo, where such cargo consists of explosives or highly inflammable materials, etc. There has been no case to date where vessels carrying oil cargoes have been refused the transit, nor is there a likelihood of such refusal, if the ordinary precautions have been observed.

Removal of Offices Into P. R. R. Building.

The Panama railroad building at Colon, which was vacated on Wednesday, October 14, by most of the railroad force, is being occupied by other divisions of the Canal work. The office of the captain of the port, formerly in the wooden annex to the railroad freight house, was transferred to this building on Saturday, October 17, and will be located on the second floor. There will be a private office for the captain of the port, a general office for the clerical force, and suitable space for the pilots, and the admeasurers. The branch offices of the Paymaster and Collector were moved to the building last week, the pay-clerk occupying the office vacated by the former local treasurer, and the Deputy Collector, the former office of the local freight and passenger agent. Other offices in this building will be,

as follows: Quarantine (not yet moved in), office of the designing engineer for the new Cristobal pier, office of the receiving and forwarding agent of the railroad, branch hydrographic office, fortifications, and Panama railroad storehouse for electrical supplies.

Construction of Army Post.

The new Army post on Balboa dumps will be constructed by the Building Division of the Supply Department. As at present planned, there will be four barracks and one headquarters building of simple design, built of concrete. In addition, there will be a residence for the commanding officer, and two 4-family and three 2-family quarters for officers, to be constructed in accordance with the Canal types for permanent buildings. Plans of the quarters for the noncommissioned officers have not yet been decided on.

Stoppage of Night Work at Balboa Shops.

All night work in the boiler shop of the Mechanical Division at Balboa was stopped at 1 a. m., Sunday, October 18, and the force transferred to the day shift. This was the last shop at the plant working a night shift. Hereafter, there will be no more night work at Balboa shops, except in cases of emergency in connection with which overtime has been requested.

Transfer of Stock at Mount Hope Depot.

The work of transferring the active stock from the Mount Hope depot to the permanent storehouse at Balboa has been begun. Only material in usable condition is included in this class, and to determine this, an inspection is made of all items before they are shipped. Material that can be shipped direct to the work, such as water and sewer pipe, and railroad and track equipment, will be retained at Mount Hope. The oil stock, also, will remain where it is for the present, as no provision for taking care of this class of stores at Balboa has yet been made. In future, all new stock material received from the United States will be shipped direct to the Balboa store.

Two Clapets Retired from Service.

Clapets No. 2 and No. 12 have been condemned by the Dredging Division's inspector of marine equipment, on account of defective hulls, and retired from service. These self-propelling barges were a part of the equipment of the second French canal company reclaimed and repaired by forces of the Isthmian Canal Commission, and had been in service since 1906, in the Pacific entrance channel and, for the past six months, in Culebra Cut. No. 2 had been used recently for transporting subsistence and other supplies to the dredging fleet in the Cut, and No. 12 had been used to carry the crews back and forth with the change of shifts.

CANAL CLOSED BY SLIDE.

Movement of 725,000 Cubic Yards in Cut.—Channel Reopened by Dredges.

A large slide on the east bank of Culebra Cut, directly north of Gold Hill, moving between 5 p. m., Wednesday, October 14, and 9 a. m., Thursday, October 15, carried about 725,000 cubic yards of earth and rock into the Canal prism, and blocked the channel for 1,000 feet to the passage of vessels larger than tow-boats, causing the suspension of traffic. This occurred two months, to the day, after the official opening of the Canal to commercial traffic.

The big dredges were working at Cucaracha slide, south of Gold Hill, at the time the slide started, and with commendable foresight on the part of Messrs. Comber and Macfarlane steps were taken to move them northward; but for this action the results secured could not have been accomplished, as the condition of the channel was such that loaded barges could not be passed through the slide. The dredges were worked under triple shift. The 15-yard dipper dredges *Gamboua* and *Paraiso*, and the 5-yard dipper dredge *Mindi*, began excavation at the north side of the slide during the night of October 14-15, while the mass was still in motion. The dipper dredge *Cardenas* was added to the fleet on October 15, and during the 16th an extension of discharge pipe was laid from a point opposite Cucaracha slide, which allowed the pipeline suction dredge No. 86 to take part in the work.

The channel was cleared sufficiently by noon of Tuesday, October 20, to allow the passage during the afternoon of seven vessels, which had been delayed at the south end of the Canal. The vessels had been taken to Pedro Miguel Lock and moored alongside the approach piers and within the lock. The actual passage of the seven through the Cut occupied about four hours; they followed each other at intervals of about half an hour, propelled by their own power, but passing the slide under the control of a tug fore and aft, to hold them to the course. Thirteen vessels were awaiting passage from the Atlantic entrance; nine of them were transferred to the anchorage basin in Gatun Lake, south of Gatun Locks, on October 20, and are being handled through the Cut today.

The slide which blocked the Canal is 2,100 feet long, extending from station No. 1775 to station No. 1796, and broke back about 1,000 feet from the center line of the channel. It occurred in a part of the bank, formerly involved in the east Culebra slide, and is designated as the "New Culebra" slide. The old slide appeared to be dead, and the channel opposite it had been cleared to almost full width and depth. At the present time, no further movement is indicated, but practically all of the 725,000 cubic yards involved in the movement of October 14-15 will have to be dredged from the prism, which may cause further motion. The material is

masses of rock and earth, in about equal proportions.

Following the preliminary survey made on the morning of October 15, after the slide had come to rest, it was estimated that, unless further movements occurred, the channel could be opened in one week. A still later estimate set October 22 as the first day on which vessels could pass the slide. The performance of the dredging forces in clearing the channel in two days less time than was believed to be necessary indicates the fitness of the equipment and the loyal persistence of the personnel.

The Governor was greatly pleased with the results accomplished.

The excavation accomplished by the dredges at the base of the slide, in periods ending at 8 a. m. of each day named, was:

DREDGE.	15th	16th	17th	18th	19th	20th	Total.
Gamboa.....	3,935	5,160	6,175	6,910	7,800	5,775	35,755
Paraiso.....	4,150	6,900	7,625	7,600	6,720	4,975	37,970
Mindi.....	1,845	1,000	2,403	2,709	1,640	2,137	11,734
Cardenas.....		3,027	3,251	2,031	3,210	2,052	13,571
No. 86.....			3,825	5,850	6,250	4,050	20,575
Total.....	9,930	16,087	23,279	25,100	25,620	19,589	119,605

The maximum day's output was 25,620 cubic yards, in the period ending at 8 a. m., October 19, or Sunday, when the dredge and towboat crews appeared for duty, without orders or instructions. The following is a list of the gold employes of the Dredging Division who assisted in securing the results noted:

Name.	Rating.
Edward Davis.....	Supervisor of Dredging

Spanish War Veterans.

Chagres Camp, No. 1, United Spanish War Veterans, will meet in the Las Cascadas lodge hall on Sunday, October 25, at 2 p. m.

L. B. WILLIS, *Adjutant.*

BALBOA, C. Z., October 20, 1914.

Local Relief Measures for War Sufferers in Belgium.

A committee of women of the Canal Zone has been formed, with a representative in each town, for the purpose of soliciting clothing and articles of wearing apparel for men, women, and children of Belgium who have been rendered destitute by the European war and whose need at this time is urgent.

An unoccupied ward in Ancon Hospital has been placed at the disposal of this service by the superintendent as a depot for the receiving, assorting, and packing of articles donated.

Arrangements are being made for the free

handling of the donated relief supplies by the Panama railroad in the Canal Zone, and by the Royal Mail Steam Packet Line to Europe.

It is expected to forward the first consignment on the next Royal Mail steamer sailing on November 3.

Change of Offices of Joint Land Commission.

On and after this date the offices and public session room of the joint commission, appointed in accordance with Articles VI and XV of the Treaty between the United States of America and the Republic of Panama, ratified February 26, 1904, will be located in the National Palace, in the city of Panama.

All persons having claims before the joint commission are hereby informed that the commission is in session daily, and is endeavoring to hear and adjudicate all claims before it as quickly as possible.

By direction of the joint commission.

WILLIAM TAYLOR, *Secretary.*

PANAMA, R. P., October 15, 1914.

Joint Land Commission Calendar.

The following is a calendar of claims set for hearing by the Joint Land Commission, for the week ending October 24, at its offices in the National Palace, Panama:

WEDNESDAY, OCTOBER 21.

Docket No. 487, Eugenio Theophile; No. 423, José Martin; No. 1087, Ernesto Hernandez.

THURSDAY, OCTOBER 22.

Docket No. 1497, Francisco Diaz; No. 1601, Ramon Ruiz; No. 1613, Manuel Sacramento Moran.

FRIDAY, OCTOBER 23.

Docket No. 424, Alexander Schwart; No. 1443, Manuel Estevan Mendieta; No. 435, Andres de Orta.

WILLIAM TAYLOR, *Secretary.*

Probable Case of Suicide.

The body of Alexander Grant, an employe of the Mechanical Division at Paraiso, was found in the brush near that village in the morning of October 9. The deceased had disappeared about five weeks before, and a coroner's jury rendered a verdict that he came to his death on or about September 3, by a gunshot wound in the head, probably self-inflicted during a period of mental aberration. He was born in Karkudy, Scotland, but was a naturalized American citizen, and had been on the Isthmus five years. He was 32 years of age, single, and is survived by his father, James Grant, living at 1018 Segal street, Camden, N. J.

The dispensary department of the admitting office and dispensary at the entrance to Ancon Hospital is being enlarged by the addition of three rooms. The changes will enlarge the consulting room for white patients, and provide separate dressing and toilet rooms for white and colored patients.

Due to the removal of most of the Panama railroad employes to Balboa Heights, the restaurant, formerly conducted in the old Washington Hotel building, was closed on October 15.

The office of the Southern District, Division of Municipal Engineering, located at Ancon, was moved on Thursday, October 15, into a new building erected on the fill back of the Government hotel. The building which contained the former offices, situated near the Ancon pumping station, has been torn down.

The sailing of the steamer *Ancon* has been set for Saturday, October 24, at 3 p. m.

SHORE DIKES ON LIMON BAY.

Experimental Barriers Demonstrate Value of Permanent Ones.

To check erosion of the beach on the south shore of Limon Bay, west of the Canal prism, the construction of three temporary dikes was authorized in 1913. The work was started in August of that year, and was completed within the following month. Dike No. 1 is 650 feet long, and is situated 800 feet west of and parallel to the Canal axis. Dike No. 2 is 450 feet long, and is 1,300 feet west of the Canal. Dike No. 3 is 250 feet in length, and 1,800 feet west of the Canal. These dikes are located about 50 feet inland from the water's edge, extending to the highest point on the beach, and were constructed of a single row of 3-inch sheet piling held in place by a row of ordinary piles, spaced on 13-foot centers, and two stringers. Old 8 by 16-foot trestle material was used for the stringers; one was placed four feet above, and the other at mean sealevel.

A survey was made in September, 1913, shortly after the work of driving the sheet piling from the shore end of the dikes was started, and another was made about six weeks later. These surveys covered the period of driving the sheet piling, and showed that the shore line had been built out about 15 feet during this time. On December 6, 1913, a third survey was made which showed a filling out from the shore line of from 35 to 50 feet from the date of the original survey, and a shoaling of nearby waters of about five-tenths of a foot.

The dikes have diverted the currents enough to show what might be expected from more permanent structures. The 6-foot contour line turns to the north opposite the dikes, and near here indications point to the building up of a bar parallel to the west bank of the Canal. Since the dredges cut through the shore line at Mile Post 4, plus 2,400 feet, in 1908, the beach has receded 1,400 feet on the west bank, and 400 feet on the east bank of the Canal center line. In addition to this, the survey made by the Atlantic Division in 1912, compared with that of the coast and geological survey of 1905, shows a scouring between the beach and the 12-foot contour line of 4,868,000 cubic yards.

The fills in the sea entrance to the Canal in Limon Bay, Mile Posts 4 to 5, during the dry seasons for the past five years, together with the amounts of material excavated during the same period, are summarized below. In view of the large amount of excavation going on over this reach during the years 1909-1913, the fills are somewhat complicated with the regular dredging operations.

In 1909-10, the fill was estimated at 879,385 cubic yards. The excavation during the same period over this reach was 1,094,511 cubic yards; the dredges, therefore, are credited with only 215,126 cubic yards of original excavation for the six months period.

In 1910-11, the fill was placed at 607,622 cubic yards, and the total excavation at 210,817 cubic yards, which showed that the dredges did not keep up with the fill by 396,805 cubic yards. During the norther of December 3-4, 1910, a total of 98,400 cubic yards of silt were deposited in the channel between Mile Posts 4 and 5.

In 1911-12, the fill was estimated at 762,978 cubic yards, and the excavation was 648,143

cubic yards; the dredges during this period fell short 114,835 cubic yards.

The figures for the fill in 1912-13 probably show less than actually occurred, as the pipeline and seagoing suction dredges were at work continuously during the period, and no doubt removed considerable fill material between surveys. The fill was estimated at 187,446 cubic yards, while the excavation amounted to 372,462 cubic yards.

The fill for 1913-14 was 23.3 per cent less than that during 1912-13, and was the least of any previous year, notwithstanding the fact that the weather was as bad, if not worse, than the season before. The amount of fill was placed at 143,683 cubic yards, while the excavation by dredges aggregated only 45,356 cubic yards.

Although the construction of the west breakwater has had some effect on the currents, and consequently has retarded filling to some extent, it has been shown by the temporary barriers that small rock dikes built up above the water line will not only protect the shore from erosion, but that they will deflect the current in the Canal in a longitudinal, instead of a transverse, direction, thereby inducing a tendency to a scouring action, rather than a fill, in the channel.

An estimate for the construction of the permanent dikes has been prepared by the Resident Engineer of the Dredging Division, and work on them has been authorized. They will have a top width of three feet at elevation plus two feet, and their side slopes will be one on one. The lengths of the dikes, and the approximate amount of fill required for each is, as follows:

	Length Feet.	Fill Cu. yds.
Dike No. 1.....	820	2,800
Dike No. 2.....	460	1,500
Dike No. 3.....	275	750
Total.....	1,555	5,050

Rock from Sosa Hill quarry will be used, and it is estimated that it can be dumped in place at a cost of about \$3.50 per cubic yard. It will be transported on cars to Mindi, and there unloaded into barges and hauled to the vicinity of the dikes, where it will be reloaded into Decauville cars and taken to destination. This plan has been decided on in view of the fact that the water is too shoal and generally too rough at this point to use a derrick barge to advantage.

Red Cross Ball on November 2.

A ball will be held at the Hotel Tivoli, on the night of Monday, November 2, under the auspices of the Canal Zone chapter of the Red Cross. Dancing will begin about 9 o'clock, and last until shortly after 12.

Tickets will be sold for \$5 each to men. There will be no charge for ladies. A ticket will entitle the holder and one lady to round trip transportation from any point on the Panama railroad to Balboa Heights on all trains that night, beginning with train No. 7, leaving Colon at 5.05 p. m. The charge of \$5 will include also membership dues in the Canal Zone chapter for the year ending October 31, 1915. An election of officers for the ensuing year will be held during the evening at the Administration Building; new members, as well as old, will be entitled to vote.

The officers of the Red Cross point out that this society is the one large, undenominational, active charitable organization on the Isth-

mus, and is deserving of the support of all. During the year past it has made large disbursements in local charity, and further activities are anticipated, for which additional funds are requisite. In addition to its work on the Isthmus, the society has under advisement the sending of funds to Europe, in response to the great demands caused by the war.

Y. M. C. A. Announcements.

The regular moving picture entertainment at the Corozal clubhouse will be held on Friday evening, October 23.

The Gatun senior gymnasium class will meet on Tuesday and Friday nights.

A pool tournament is to be started shortly at the Pedro Miguel clubhouse, and members interested are requested to enroll.

Two committees are working up the program of an entertainment to be held at the Pedro Miguel clubhouse on the occasion of Hallowe'en. There will be a social time for the children on Friday evening, October 30, from 5 to 8 o'clock, and one for the members of their families on Saturday evening, October 31.

An old-fashioned Hallowe'en entertainment will be held at the Cristobal clubhouse on the evening of October 31. There will be all of the old time Hallowe'en games, together with Jack-o'-Lanterns, etc.

Position Open for Steamshovel Engineer who can Operate Brown Coal Hoist.

The Panama railroad requires the services of a steamshovel engineer who can operate the Brown coal hoist at Cristobal, and, when not so engaged, act as steamshovel engineer or craneman at the coal pile. Preference will be given to applicants who have had experience both as steamshovel and Brown hoist operators, and, in the second place, to steamshovel men who can be trained to operate the Brown hoist, and are willing to perform the duties of craneman when required.

Knights of Columbus.

On account of the celebration of Columbus Day, the regular meeting of Nombre de Dios Assembly was adjourned to Sunday, October 25, at which time the election of officers for the incoming year will be held. Brothers will meet at the lodge hall, Building No. 1, Cristobal at 2 p. m.

THEO. A. AANSTOOS,
Faithful Navigator.

CRISTOBAL, C. Z., October 20, 1914.

The hacienda of Dr. Francisco Prima, located in the Canal Zone, two or three miles east of Colon, between the Escondido and Majagual Rivers, has been purchased by the Government. The property, in addition to building improvements, contains a large number of cacao, rubber, coffee, and fruit trees.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., October 19, 1914.

The following insufficiently addressed letters originating in the United States and its possessions have been received at the office of the Director of Posts, and may be procured upon request of the addressees:
Alback, Fabricio de Mott, C. H.
†Clark, Waldo E. Murphy, Alexander
Casal, Jacinto O'Neal, Mrs. J. C.
*Fahey, M. J. †Patterson, John A.
Fluty, Lee Pfodenbauer, Charles
Foster, Eilreda Puse, D. D.
†Garmerly, Mrs. E. J. Quimby, Peter T.
Healey, Martin Reiman, Ewart
†Hood, Duncan M. Sharr, Frank
†Kreitz, W. Ernest Spence, E. O.
Lyons, Thomas Telletn, Felesphore
McCain, F. H. *Zemmer, Emmitt
* Paper. † Pamphlet. † Catalogue. All others are letters.

OFFICIAL CIRCULARS.

Office Engineer.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., October 13, 1914.

CIRCULAR No. 661-11:

Effective October 13, 1914, Mr. Clayton J. Embree, is appointed Office Engineer, vice Mr. A. B. Nichols, resigned.

GEORGE W. GOETHALS,
Governor.

Instructions to Office Timekeepers, Field Timekeepers, and Foremen, P. R. R.

THE PANAMA CANAL,

ACCOUNTING DEPARTMENT.

BALBOA HEIGHTS, C. Z., October 20, 1914.

Effective November 1, 1914, all timekeeping for the Panama railroad will be handled under the system now in use by The Panama Canal, and the office timekeepers of the Panama railroad will be transferred to the timekeeping bureau of The Panama Canal.

FOUR-DAY PERIOD TIME BOOKS.

The following books are to be used:

First period, 1-4, 9-12, etc.:

Form A-72, a 60-line book;

Form A-74, a 120-line book;

Form A-76, a 3-shift book.

Second period, 5-8, 13-16, etc.:

Form A-73, a 60-line book;

Form A-75, a 120-line book;

Form A-77, a 3-shift book.

The books for gold and silver gangs are the same. The word "Gold" or "Silver" must be written or stamped on all books for gold and silver gangs, respectively.

Timebooks must be kept on the job during each 4-day period and then sent immediately to the timekeeping office.

Entries of time should be made in accordance with the instructions printed in the back of each book.

Field timekeepers and foremen will make no entries in the space under "Pay number."

The name of each employe and his rate of pay will be written on the first line of the double space, the occupation and unit of work below, and the metal check number in the proper column opposite occupation. (Disregard paragraph No. 1 of instructions in back of the timebook.)

When new employes are to be added, the foreman should enter the name, metal check number, occupation and rate of pay in the timebook then on the job, retaining a record of the line and pay numbers, so that the entries of the same names in the other period timebook will correspond with the first.

The 3-shift books are to be used only when expressly authorized by the chief timekeeper.

The labor distribution pages in the back of the timebooks will not be used until further instructions are issued.

The words "Panama Canal" on the front cover of all timebooks should be crossed out and the words "Panama railroad" inserted.

METAL CHECKS.

The present series of metal checks held by employes of the Panama railroad will continue to be used, and new checks may be ordered from the Auditor, Panama Canal, from time to time as needed.

Employes will retain their metal checks until their services are terminated, at which time their time vouchers will be stamped "Take up metal check" in the time office. Metal check will be taken up by the Paymaster.

COUPON BOOKS.

Coupon books will be issued for pay roll deduction from the 7th of the month to the 26th, inclusive. Books may be ordered at any time between the 1st and 24th, requests therefor being entered in the space provided in the timebooks for the purpose.

When the field timekeeper or foreman is entering the time of his men he will ascertain the number of coupon books desired. Opposite employe's name he will show \$2.50, \$5, \$10, etc., (as the case may be) in the first column of page headed "Requests for coupon books," for the first order of books, and in the second column for the second order of the month, etc. The \$2.50 coupon books will be issued to "Silver" employes only, and not more than two of these books to any employe during the month.

Field timekeepers or foremen should not place requests in the timebook for more coupon books than have been earned at the time request is made, taking into account any meal tickets that have been issued to the employe. If not enough time has been earned to cover the entire request the issuing clerk will issue as many books as the time earned will cover and cancel the balance of the request. In cases where this is done the foreman should place request for balance of order in the next period timebook. (Disregard paragraph No. 16 of instructions in the back of timebook.)

Requests for coupon books for employes carried on

time slips should be made on form PC. 145-3 (Request for coupon books.)

The delivery of coupon books will be made, as follows: Orders placed between the 1st and the 4th will be issued on or before the 7th.

Orders placed between the 5th and 8th will be issued on or before the 11th.

Orders placed between the 9th and 12th will be issued on or before the 15th.

Orders placed between the 13th and 16th will be issued on or before the 19th.

Orders placed between the 17th and 20th will be issued on or before the 23d.

Orders placed between the 21st and 24th will be issued on or before the 26th.

When these dates fall on Sundays or holidays, issues will be made on the day following.

All coupon books will be issued in the office of the chief timekeeper and forwarded by registered mail to the field timekeeper or foreman for delivery, who will immediately return to the chief timekeeper his receipt for the books on the duplicate copy of forwarding slip, and will promptly retain all No. 2 coupons after all books are delivered. If for any reason a book cannot be delivered it should be returned after a reasonable length of time for cancellation, and in no case should the No. 2 coupons or undelivered books be held later than noon of the 27th of the month.

The No. 2 coupons must not be torn from books until time of actual delivery, and the name of the person actually making delivery must appear on these coupons as witness.

It is not necessary that the person making delivery of coupon books be bonded.

MEAL TICKETS.

Meal ticket stocks should be handled by bonded employes of the Panama railroad and issued to employes direct, or to foremen and field timekeepers on receipt.

The timebooks should show all tickets issued and report should be rendered not later than the morning of the last day of the month on form A-52 (Daily report of meal tickets issued) covering all deductions for tickets to be made on the pay roll.

The bonded employes of the railroad will be required to render a meal ticket stock report (Form A-118) to the Auditor at the end of each month, accounting for all meal tickets on hand at the end of the previous month, received on requisition during the month or from other sources, together with all tickets issued during the month and all tickets on hand at the end of the month. Requisitions (Form A-43) for meal tickets should be made on the Auditor, after being approved by the head of the department.

TIME VOUCHERS.

Time vouchers issued under the Panama Canal system are somewhat similar to the service vouchers now issued by the Panama railroad. All time vouchers are issued in the office of the chief timekeeper upon requests issued by the heads of divisions, field timekeepers, or foremen. These requests must show in each case the time earned by the employe in the last 4-day period time book that has not been received in the time office. For example, a request is issued for an employe who has worked from the 1st to the 7th of the month whose time has been reported by timebook for the first four days (1st to 4th) should read "Time for period 5th to 7th, 24 hours" if an hourly man, or "Time for period 5th to 7th, three days" if a monthly man and if he has worked this full period of time. But in the case of a monthly man who has not worked the full time for the current period the absent dates must be shown on the time voucher request. The person making the request will be held responsible for the time shown thereon.

The above is necessary for the reason that the time rolls in the office would show time only up to the end of the period preceding that in which the request is made. (In the above case 1st to 4th.)

If the request is made to cover time that has already been turned in to the time office by timebooks only, no time should be shown on the request.

All time voucher requests for silver employes must show the amount to be deducted on account of meal tickets issued to the employe during the current month, but not coupon deductions.

All the time voucher requests must show where the employe desires to be paid, whether at Balboa Heights or Colon pay office. The time voucher will be forwarded to the pay clerk at the proper place for payment.

All gold employes, prior to receiving from the Paymaster of The Panama Canal time vouchers issued either at termination of service, or when going on leave, must deliver to the Paymaster the following:

(a) Twenty-four trip tickets with unused coupons, only on termination of service.

(b) Release from quarters. In case an employe does not occupy Panama Canal quarters, the release must so state.

(c) Property release. All gold employes leaving the

service or entering on leave will be required to secure releases from property.

(d) Metal check. Metal checks will be taken up from employes upon payment of time vouchers issued on account of termination of service. Should an employe fail to surrender his metal check, 50 cents will be deducted.

It will be the duty of the party issuing the time voucher request to advise employes of the above.

IDENTIFICATION CERTIFICATES.

Identification certificates (Form X-143) will be issued only to employes who have lost their metal check and are to receive payment prior to the time that a new check can be issued.

The Paymaster will pay all employes, whether by time voucher or pay receipt, upon metal check identification only, except in the case of a lost check, when payment will be made upon identification by certificate.

CHANGE METAL CHECK NUMBER STAMPS.

These rubber stamps are for use in changing metal check numbers on pay receipts where the employe holds a different number from the one shown on rolls and pay receipt.

They are registered and issued by the Auditor to responsible employes for their personal use only, and the employe to whom they are issued will be held responsible for any changes made where this stamp is used. It is, therefore, very important that proper care be taken to see that no one else has access to it, and that full information is furnished in each case before a check number is changed, particularly as to whether the holder of metal check is actually the same man who earned the money called for by the pay receipt. The foreman or field timekeeper for the gang should vouch for this fact in writing and the person responsible for the stamp should keep a record of each case for future reference.

These stamps will have to be ordered, with approval of head of department, from the Auditor, who will deliver same direct.

DELIVERY OF PAY RECEIPTS.

Pay receipts for the month of October will be delivered and paid in exactly the same manner as in the past, delivery and payment to be made from the Panama railroad pay car on the schedule now in effect.

Pay receipts for the month of November will be forwarded by the Paymaster or the chief timekeeper to the heads of departments or divisions, field clerks, field timekeepers, or foremen, as the case may be, to be delivered by them to the employes, witnessing signatures when delivery is made. Then all that is necessary for the employe to do is to present his pay receipt and metal check on the pay car or at the Paymaster's office, Balboa Heights or Colon, to receive payment.

AUTHORITY TO WITNESS SIGNATURES ON PAY RECEIPTS.

It is not necessary that an employe be bonded to witness signatures on pay receipts, but it is necessary that all employes witnessing such signatures have their own signature registered with the Paymaster. This is done by having the head of the department or division make such request on the Paymaster, forwarding with the request four sample signatures, one on each 3 by 5-inch plain cards. The signatures to appear in the exact center of each card, that is, equally distant from top to bottom and end to end.

DISTRIBUTION OF LABOR.

This work will not be handled in the time books after October 31, but will be handed under the direction of the Auditor by whatever system he may designate, about which you will be instructed at a later date.

A supply of the following forms sufficient for the month of November will be delivered by the chief timekeeper. Future needs of these forms must be anticipated and requisition placed on the Depot Quartermaster, Mount Hope, for such stock of the blanks as you may desire:

Time books—

- Form A-72, 1st period, 60 lines.
- Form A-74, 2d period, 60 lines.
- Form A-74, 1st period, 120 lines.
- Form A-75, 2d period, 120 lines.
- Form A-76, 1st period, 3-shift, (120 lines.)
- Form A-77, 2d period, 3-shift, (120 lines.)
- Form P.C.-145-3. Request for coupon books. (To be used only in connection with time slips. Printed in pads of 100.)
- Form A-25. Daily report of meal tickets issued. (Printed single sheets.)
- Form P.C.-438. Gold time voucher request. (Printed in books of 50.)
- Form P.C.-442. Silver time voucher request. (Printed in books of 100.)
- Form A-118. Stock report of meal tickets. (Printed single sheets.)
- Form A-48. Requisition for meal tickets. (Printed single sheets.)
- Form X-143. Identification certificate. (Printed in books of 30.)

This is sent to you in advance for your information.

The Panama Canal system of timekeeping will be explained to you in person by a representative from the chief timekeeper's office prior to the end of October, and he will at that time explain any point in these instructions that may not be clear to you. He will also supply you with the forms herein referred to

E. W. PALMER,
Chief Timekeeper.

Approved:
C. A. MCLVAINE,
Executive Secretary.

Executive Order.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., September 25, 1914.

CIRCULAR No. 601-28:

POSTAL SAVINGS SYSTEM.

The Executive Order quoted below is published for the information of all concerned.

GEO. W. GOETHALS,
Governor.

To Repeal the Executive Order of September 8, 1911, Establishing the Postal Savings System in the Canal Zone.

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

Section 1. The Executive Order of September 8, 1911, establishing the postal savings system in the Canal Zone, is hereby repealed, *Provided*, that accounts, opened in accordance with that Order, and the regulations established thereunder, shall continue as prescribed in said Order and regulations until they are finally closed by the withdrawal of the deposits.

Section 2. For the accommodation of persons desiring to deposit their savings in the post-offices of the Canal Zone, money orders may be issued in the Canal Zone payable to the purchaser at the office of issue, for which no fee shall be charged.

Section 3. This Order shall take effect from and after October 1, 1914.

WOODROW WILSON,

THE WHITE HOUSE,
September 5, 1914.

Executive Order.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., October 14, 1914.

CIRCULAR No. 601-31:

PAYMENT OF TOLLS AND BILLS FOR UNITED STATES GOVERNMENT VESSELS.

The Executive Order quoted below is published for the information of all concerned.

GEO. W. GOETHALS,
Governor.

By direction of the President, and by virtue of the authority vested in him under The Panama Canal Act, the following regulations relative to payment of tolls and of bills for materials, supplies, repairs, harbor pilotage, towage, and other services furnished by The Panama Canal to vessels operated by the Government of the United States are hereby prescribed:

1. Any former Executive Order requiring the payment of tolls by vessels operated by the Government of the United States before such vessels are permitted to pass through the Panama Canal, or requiring the payment of bills for material, supplies, repairs, harbor pilotage, towage, and other services furnished such vessels by The Panama Canal before clearance papers may be given, is hereby amended to permit the passage of such vessels through the Canal and the issuance of clearance papers on transfer, between the proper officials of the vessel and the proper officials of The Panama Canal, of the necessary papers indicating the service rendered or the work performed. Bills for tolls and other services, or work herein indicated, shall be prepared by The Panama Canal against the department of the United States Government concerned and shall be submitted by the Governor of The Panama Canal to such department through the Secretary of War.

LINDLEY M. GARRISON,
Secretary of War.

WAR DEPARTMENT,
September 29, 1914.

Drawing Nonexpendable Property from Commissaries.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., October 12, 1914.

CIRCULAR No. 656-5:

1. Effective November 1, 1914, items of nonexpendable property such as table linen, kitchen and tableware, cooking utensils, china, glassware, etc., not usually carried in stock in Panama Canal storehouses, may be drawn from local commissaries on foremen's orders approved by heads of departments or divisions, or signed by certain authorized employees. Accountable officials will furnish the Auditor and Chief Quartermaster with

a list of persons authorized to draw such items for their accountability.

2. Foreman's order (Form A-152), properly signed or approved, will be submitted in quadruplicate. Full description of articles must be shown.

3. The commissary storekeeper will deliver the items called for, and will prepare the usual number of copies of invoice. One copy of the invoice will be sent to the department or division ordering the property, and the original and one copy to the commissary accountant, with the daily report of invoices issued. All copies of the foreman's order will be attached to the original invoice.

4. When foremen's orders are received in the Auditor's office, the quadruplicate (white) copy will be transmitted to the proper accountable official and charge made to his property account.

5. The original (yellow) copy will be attached to the original accounts receivable when same is sent to the head of the department or division for signature to the inspection certificate. This copy of foreman's order may be detached and retained by the signing official.

6. The provisions of Paragraph 14 of Circular 656-1 are modified to the extent that the purchasing agent on the Isthmus will not issue invoices to cover items of nonexpendable property drawn from commissary stores on foremen's orders. Purchase vouchers covering such items will be accomplished and approved by the Chief Quartermaster, or by his direction, instead of by the Depot Quartermaster

GEO. W. GOETHALS,
Governor.

Cremation.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., October 9, 1914.

CIRCULAR No. 624-1 (Amending Circular No. 624):

Item (b) of Paragraph 9 of Circular No. 624, is amended to include a charge of \$2 for the cremation of the remains of servants of employees.

GEO. W. GOETHALS,
Governor.

Hospital Rates for Families of Employees Receiving \$50 or Less.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., October 5, 1914.

CIRCULAR No. 618-3 (Amending Circular No. 618-Rev.)

Effective October 1, 1914, a charge of 50 cents per day will be made for ordinary care and treatment in hospital wards, for members of families of employees receiving \$50 or less per month, instead of the former rate of 75 cents for male and \$1 for female, as published in Circular 618-Revised.

GEO. W. GOETHALS,
Governor.

Labor Train Service.

THE PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT.

BALBOA HEIGHTS, C. Z., October 17, 1914.

All concerned—Effective October 19, 1914, the labor train which now leaves Culebra at 5.40 a. m. will be discontinued. The labor train now leaving Culebra at 5.55 a. m. will continue in service as usual.

A labor train will leave Paraiso at 5.40 a. m. for Balboa Heights, and returning, will leave Balboa Heights at 6.25 a. m. for Paraiso.

The labor train which leaves Balboa Heights at 5.20 p. m. will tie up at Paraiso, and the train which leaves Balboa shops at 5.15 p. m. for Culebra will wait at Paraiso, making connections with labor train leaving Balboa Heights at 5.20 p. m.

F. R. BLUNT,
Superintendent, Railroad Transportation.

Use of EB Cars.

THE PANAMA CANAL,
PANAMA RAILROAD COMPANY,

OFFICE, SUPT. OF RAILROAD TRANSPORTATION,

BALBOA HEIGHTS, C. Z., October 19, 1914.

Heads of divisions and departments and all concerned of railroad transportation department—Because of frequent reports to this office that EB cars are being used for other work than that for which they are intended, it will be necessary to take steps to have this practice discontinued at once.

Therefore, effective at once, no cars which are stencilled EB will be moved by the transportation department if loaded with any material other than spoil for the east breakwater work until instructions have been given from this office to do so.

Please take notice and be governed accordingly.

F. R. BLUNT,
Superintendent of Railroad Transportation.

Special Train for Schoolchildren.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

DIVISION OF SCHOOLS.

BALBOA HEIGHTS, C. Z., October 8, 1914.

To the principals and teachers of high school at Balboa,

and white schools at Balboa, Corozal, Pedro Miguel, Paraiso, and Culebra; Effective Monday, October 12, a special train for schoolchildren will be run from Balboa to Empire on Mondays, Tuesdays, Wednesdays, Thursdays, and Fridays, according to the following schedule:

Leave Balboa at 3.10 p. m.
Leave Corozal at 3.16 p. m.
Leave Pedro Miguel at 3.28 p. m.
Leave Paraiso at 3.31 p. m.
Leave Culebra at 3.46 p. m.
Arrive at Empire at 3.50 p. m.

Will you please notify all pupils concerned.

A. R. LANG,
Superintendent of Schools.

Supplies for the Canal.

The following steamers, with supplies for The Panama Canal and the Panama Railroad Company, arrived at the ports of Colon and Cristobal during the week ending October 3:

Panama, September 28, from New York, with 28 boxes paper napkins, one carboy acetic acid, 10 cases printing paper, 10 cases tag board, 1,232 pigs lead, 156 coils manila rope, six cases paint, 20 cases sheet zinc, four cases oil cloth, four cases rubber packing, 25 crates glass, 120 bags bran, one crate water meters, 14 reels wire rope, 45 pieces steel bars, three packages torches, eight bales twine, five packages range parts, two coils wire, 31 kegs bolts, eight bundles rubber hose, six barrels graphite, 10 boxes locks, seven packages stationery material 18 packages miscellaneous hardware, five cases airbrake material, for stock; one package valve parts, 14 cases hardware, one box pipe-fittings, 44 packages electrical material, nine crates slates, one box bolts and nuts, eight packages insulators, one case junction boxes, one case brass tubes, 10 pieces fender chain, for lock erection; one crate slate, four boxes pipe-fittings, one case valves, one case shelf brackets, two reels wire, four boxes screens, four boxes machinery, for Division of Municipal Engineering; two pieces dipper lips, four reels wire rope, 16 pieces steel angles, 140 boiler tubes, 29 packages dredge parts, one dredge dipper, for Dredging Division; one box bolts, eight barrels batteries, 31 cases electrical material, 22 cases condulets, one reel insulated wire, one barrel porcelain knobs, seven cases insulated wire, one box testing cup, one box electrical motor, 31,002 pieces tile, 1,000 pieces bends, for Electrical Division; one box expansion bolts, one box dowel pins, two boxes mechanics' tools, one box hasps, two boxes flue cutters, 35 brake shoes, 20 bundles spring plates, one box motors, one box pliers, one box gloves, one package chain, for Mechanical Division; one box molds, one box printed matter, one box pointers, two packages blueprint paper, for Executive Secretary; one box plate glass, 72 cases electrical machinery, one crate lamp posts, for Division of Fortifications; one case hardware, one box castings, for Division of Terminal Construction; 56 crates conduit pipe, 21 cases electrical material, two boxes telephone material, one box lacquer, one case iron door, one reel cable, 31 packages track material, for Panama Railroad Company; one box chains, one package butts, three boxes brass wire cloth, two cases locks, two barrels liquid paint, for permanent buildings; one box refrigerator, one box books; 13 cases medical supplies, one package garden seeds, for Health Department; and a miscellaneous cargo, the whole consisting of 33,641 packages, weighing approximately 304 tons.

Heredia, September 30, from New Orleans, with 500 kegs white lead, two boxes paint brushes, 10 barrels cup grease, for stock; one box trucks, for depot commissary.

Abangarez, October 1, from New Orleans, with 61 cases tool handles, five kegs nuts and washers, one case glass, for stock; one case glass, for permanent buildings; one box castings, 1,706 pieces (41,330 feet) white oak lumber, 97 pieces (2,019 feet) white oak lumber, for Mechanical Division; five cases paint, for Electrical Division.

Belgian, October 2, from Liverpool, with one case pump fittings, for Dredging Division; three pieces fender chain, for lock erection.

Thelma, October 3, from Brunswick, Ga., with 609 pieces untreated piling, for stock; 411 packages structural steel, for Panama Railroad Company.

LOST—Camera, 3½ by 4½, Ensign, in leather case, between Corozal and Gamboa, Saturday night on train No. 10, leaving Panama at 11.30. Finder please return to or communicate with J. D. Kalar, Corozal, and receive reward.

COMMISSARY DEPARTMENT.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold department of the Cristobal store will open at 2 p. m., on Saturdays and sailing days of Panama railroad vessels.

Cold Storage Prices.

The following retail prices of cold storage provisions will be effective October 22:

Table listing various meats and their prices. Includes sections for FRESH MEATS, CURED AND PICKLED MEATS, DAIRY PRODUCTS, VEGETABLES, and FRUITS. Items include Mutton, Lamb, Veal, Beef, Pork, Bacon, Ham, Butter, Cheese, Milk, Cream, Cauliflower, Apples, etc.

Table listing various goods and their prices. Includes sections for CURED AND PICKLED MEATS, DAIRY PRODUCTS, VEGETABLES, and FRUITS. Items include Ham, Bacon, Butter, Cheese, Milk, Cream, Cauliflower, Apples, etc.

Table listing various household and specialty goods and their prices. Includes sections for CHANGES EFFECTIVE OCTOBER 10, CHANGES EFFECTIVE OCTOBER 11, CHANGES EFFECTIVE OCTOBER 12, CHANGES EFFECTIVE OCT. 15, 1914, and CHANGES EFFECTIVE OCTOBER 21. Items include Basins, Soap, Drapery, Tobacco, etc.

* Indicates advance from preceding list.
**Indicates five cents allowed for return of bottle.
† Indicates reduction from preceding list.
‡ Sold only from commissaries; no orders taken for delivery.
? Not less than 1/2 ham or 1/2 shoulder of fresh pork will be sold.

Price Changes.

The following changes in prices of articles in stock at the commissary stores became effective October 9, 1914:

Table with columns: ARTICLE, PRICE CHANGE (Old, New). Lists items like Barley, Flour, Cocoa, etc. and their price adjustments.

HOWARD—At Ancon Hospital, on Sunday, October 18, George Jr., son of Capt. George Howard of the dredge Caribbean. Age, two years and eight months.

SHIPPING INFORMATION.

Fuel and Supplies.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, per ton, \$5.40; from cars alongside wharf, handled by ship's gear, per ton, \$5.15; use of steam hoist and crane, per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa from the Union Oil Company at the rate of from 1,300 to 1,600 barrels per hour. The present price is \$1.30 per barrel.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock, with a minimum charge of \$3.

All standard lubricants, light and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa.

Subsistence supplies, including a large stock of fresh meats, vegetables, canned groceries, fruits, bakery products, etc., are available for quick delivery at either terminal. Prices are generally lower than the retail prices in the United States, and compare favorably with prices in any port of the world.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

Repairs on vessels may be made to any extent, except where the use of a large dry dock is required, or the turning of the largest crank shafts or longest line shafts.

The Government hospital service is fully equipped for the treatment of medical and surgical cases. The charge for consultation at the dispensaries is \$3; for hospital treatment, in ward, \$3 per day; in private room, \$6 per day. For American seamen, the charge for treatment in ward is \$1 per day.

Application for supplies, or for services, should be made to the captain of the port, Cristobal or Balboa.

Mail, other than registered, and cablegrams for men on ships which will call at the terminal ports, or pass through the Canal, may be addressed in care of the captains of the ports, if desired; or may be addressed to Cristobal or Balboa, general delivery, with the name of the vessel written plainly; or, in case the vessel has a known representative on the Isthmus, in care of such representative.

Rainfall from October 1 to 17, 1914, Inclusive.

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings

on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3.47 p. m.

Sailings of Vessels in Regular Service With the Isthmus.

REGULAR CONNECTIONS WITH PACIFIC PORTS.

The Pacific Mail has sailings about every 10 days between Balboa and San Francisco, with calls at Puntarenas, San Juan del Sur, Corinto, Amapala, La Union, La Libertad, Acajutla, San José de Guatemala, Champico, Ocos, Salina Cruz, Acapulco, Mazatlan, San Blas, and Mazatlan. The company also operates a direct line between Balboa and San Francisco, with sailings about every six weeks; and a Panama-Central America line, between Balboa and Ocos, making one round voyage monthly, and calling at all the ports abovenamed between Balboa and Ocos.

The Luckenbach Steamship Company is operating a 10-day service between New York and San Francisco, calling at East San Pedro both ways. Its vessels handle cargo at Balboa when sufficient business offers.

The American-Hawaiian lines between New York and San Francisco, and New York and Honolulu, discharge and take on cargo at Balboa when sufficient business offers. At present, a vessel of this company passes through the Canal about every third day.

Grace and Company maintain an irregular service between New York and San Francisco, calling at way ports. Sailings are made about every 12 days. A vessel plying between San Francisco and Valparaiso, calling at way ports makes a round voyage about every 10 weeks.

The Peruvian Steamship Company maintains a weekly service between Balboa and Callao, with calls at Guayaquil, Payta, Eten, Pacasmayo, and Salaverry. Every second voyage includes Mollendo.

The South American Steamship Company's vessels sail on alternate Mondays from Balboa for Valparaiso calling at Paita, Eten, Pacasmayo, Salaverry, Callao, Mollendo, Arica, Iquique, Antofagasta, and Coquimbo.

The Pacific Steam Navigation Company has sailings on alternate Mondays for Peru and Chile; every 10 days for Ecuador; and on alternate Mondays for Colombian and Ecuadorian ports.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro, and an additional weekly sailing to Bocas del Toro.

The Royal Mail maintains fortnightly service each way between New York and Southampton, making the following way ports: Antilla, Jamaica, Colon, Cartagena, Puerto Colombia, Puerto Cabello, Trinidad, Barbados, the Azores, and Cherbourg. Its vessels all arrive at Colon on Sundays and sail on Tuesdays.

The Compagnie Générale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Carupano, Trinidad, Martinique, Guadeloupe, and Santander; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Carupano, Trinidad, and Martinique.

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curaçao, Puerto Cabello, and Barcelona.

The Compañía Trasatlantica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curaçao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls en route, the vessels sail from Genoa on the 8th day of each month.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing about every six days, direct; between Colon and New York by the United Fruit Company and the Royal Mail Company, sailings via Kingston weekly and fortnightly, respectively; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone,

Isthmus of Panama.

No communication either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Social and Personal items to be Omitted.

Social, personal, and church news will not be published in future issues of THE CANAL RECORD. This ruling covers the publication of club and lodge notices, either reports of past happenings or announcements of meetings, etc.; advertisements for missing men; marriages, and the activities of the Canal club-houses. Obituary notices, hereafter, will be confined to the name, home address, and date of death.

This change is made in consequence of changes in conditions on the Canal Zone, and the development of the press of Panama to the ability to give satisfactory service in the dissemination of information of this sort, and on account of changes in the scope and purpose of THE CANAL RECORD, following the practical completion of the Canal and its opening to commercial traffic.

New Diesel Engine Vessels Use the Canal.

During the week past, the Canal has been used by two vessels propelled by internal combustion engines, which are the first of their types to have appeared in the local ports. The vessels are the *Kronprinzessin Margareta*, which completed the transit of the Canal on October 21, on the way from the west coast of South America to Sweden, and the *Malakka*, which completed transit on October 26, on the way from Copenhagen, via St Thomas, to San Francisco, with calls at intermediate Pacific ports in Central America and Mexico. The *Kronprinzessin Margareta* is also the first vessel of Swedish register to use the Canal. It took on 3,000 barrels of Diesel engine oil at Balboa before making the transit.

Both of these are new vessels, built in 1914, and both were constructed by the same firm, the Burmeister and Wain Company of Copenhagen. The *Malakka* is above average size, a 4-masted vessel, 410 feet long, 55 feet in the beam, and 30.5 feet deep, with registered gross tonnage of 5,150, and net tonnage of 4,700. The *Kronprinzessin Margareta* is 360.2 feet long by 51.4 feet in the beam, and 22.1 feet deep, and registered at 3,739 gross and 2,244

net tons. Both vessels are propelled by 12-cylinder oil engines, furnished by the builders.

The *Malakka's* cylinders are 24 4/5 inches in diameter, with a stroke of 37 4/5 inches; those of the *Kronprinzessin Margareta* are 21 1/4 inches by 28 3/4 inches. The officers of both vessels expressed considerable satisfaction with the performance of the engines, both on account of fuel economy and reduced labor in operation. They pointed out, also, that by doing away with boilers and utilizing remote spaces for the stowage of fuel, the space ordinarily devoted to the means of propulsion was considerably reduced, allowing a greater cargo space in proportion to gross tonnage; and that the use of oil in place of coal diminished the trouble and expense of keeping the ship clean and in good repair.

Canal Transportation Telephone System.

In order to facilitate the despatch of vessels through the Canal, by insuring prompt and certain communication between the various points of operating control, a special telephone system has been installed, connecting on one line, in series, the offices of the port captains, the control houses at the locks, the Gamboa signal station, the Dredging Division, and the office of the Superintendent of Canal Transportation. Each station has its call signal, in combination of long and short rings, and there is a general signal for the attention of all.

Thus, at one speaking, any of the operating stations can communicate information to all the others. For instance, when a vessel clears from a terminal harbor to make the transit of the Canal, say from Cristobal, the office of the port captain at Cristobal will sound a general call; all the other offices will "Listen in" and the message will be delivered: "Cristobal. Steamship *Pacific* cleared for Gatun Locks at 7.25." The other offices will make note of this movement, and, in addition, the control house at Gatun Locks, as the point immediately concerned, will confirm its understanding of the message by replying: "Gatun. Steamship *Pacific* cleared from Cristobal for Gatun Locks at 7.25." Similar general calls and confirmations will be made from the various points of control as the vessel passes on its way through the Canal.

New Mast at Colon Radio Station.

Authority has been received for the removal of the north mast at the Colon radio station, which was damaged and declared unsafe. Bids for the erection of a new mast will be opened in the office of the Chief Quartermaster, Balboa Heights on Saturday, October 31, at 3 p. m.

Closing Down of Ancon Quarry.

The Ancon quarry plant will be shut down, effective at the close of business, Saturday, October 31. It is probable that the crusher machinery will be left in position for the present.

REVIEW OF CANAL TRAFFIC.

Nearly 600,000 Tons of Cargo Carried Through in First Two Months.

During the period of two months, from August 15 to October 15, that the Canal has been open to traffic, the commercial vessels which have been using it have carried through 583,949 tons of cargo. The traffic has followed fairly well defined trade routes, and the course of the great majority of vessels may be roughly classed in four great groups.

The heaviest traffic has been between the Atlantic and Pacific coasts of the United States. Manufactured goods of great variety and general merchandise are carried from the Atlantic seaboard, principally from New York, and secondarily from Boston, Philadelphia, and New Orleans, to the principal California and Puget Sound ports; also, to Honolulu. On the eastbound voyage, these vessels carry chiefly canned fruits, vegetables, and salmon, lumber, grain, sugar, pineapples, and wine. This trade is restricted to vessels of American registry, and nearly all the American vessels which have used the Canal have been engaged in it. During the period of Canal operation, 24 vessels have passed through eastbound on this route with 151,290 tons, and 25 westbound with 135,214 tons. These passages, 49 in all, have constituted approximately 44 per cent of all the 113 passages through the Canal. The total cargo carried on this route, 286,504 tons, has been almost exactly 50 per cent of all cargo.

A route between the eastern coast of the United States and the west coast of South America has been second in cargo through the Canal. Northbound vessels carry principally nitrates from the fields of Chile, with secondary cargo of raw material products of the western countries of South America, and southbound vessels carry manufactured goods from the United States and Europe. The northbound traffic, passing 13 vessels with 93,139 tons, through the Canal during the two month period, has considerably exceeded the southbound consisting of three vessels with 18,800 tons, and one in ballast, though the latter seems to be getting under way.

There has been a marked, though probably seasonal, traffic from the Pacific ports of the United States and southwest Canada to Europe with grain. Ten vessels, each heavily laden, have gone through eastbound, with 71,560 tons, and eight vessels, all of foreign registry, have gone from the Atlantic to the Pacific in ballast, to return on this route with grain. In addition, one vessel, which went through the Canal with 6,000 tons of manufactured goods, from Antwerp to Tacoma, is to return with grain.

The fourth great route has been from the Atlantic seaboard of the United States to China and Japan, with refined petroleum in bulk and in cases, and other petroleum products. Four vessels have gone through in this

LIST OF VESSELS, EXCLUSIVE OF CANAL EQUIPMENT, USING THE CANAL FROM AUGUST 15 TO OCTOBER 15, 1914.

trade from the Gulf of Mexico, with 24,931 tons, and four from Philadelphia and New York, with 26,570 tons, an aggregate of 51,501 tons. No vessels have gone in the other direction on this route.

Next to the four principal routes just described, the most notable development has been the coal traffic from the middle Atlantic seaboard of the United States to the Pacific coast of North and South America. Five vessels, four from Norfolk, with 22,535 tons, and one from Baltimore, with 6,000 tons, have carried coal to the upper Pacific, and one vessel from Baltimore has carried 6,010 tons to Valparaiso. The total coal carried has been 34,545 tons. None of these vessels have returned through the Canal to this time, but it is understood they will load with Pacific coast products for the eastern United States and for Europe.

The development of a line from Liverpool around South America, with vessels sailing both ways, via the Canal, has been arrested by the European war. The only vessel to have used the Canal in this route was the steamship *Potosi*, which passed through the Canal on September 25, on its way south, along the west coast of South America. It was held in the bay at Balboa, awaiting orders, but sailed on October 14.

The steamship *Desabla*, which passed through the Canal on October 12, in ballast, was on its way from Rio de Janeiro to San Pedro for a cargo of fuel oil.

The military service of the United States has used the Canal for the passage of one Army transport and one Navy collier, both from Pacific to Atlantic.

A list of the vessels which have passed through the Canal, exclusive of vessels used in Canal construction, showing the points of their departures and destinations, and the amount and general nature of their cargoes is published on this page.

Rule of Procedure of Joint Land Commission.

The rule of the Joint Land Commission relative to the preparation of trial dockets and the setting of cases for hearing, follows:

It is ordered by the Joint Land Commission that the trial docket for claims to be heard by the Joint Land Commission shall be made up of claims in accordance with their numerical order on the docket and their date of filing regardless of their location in the Canal Zone. It is further ordered that causes shall be set on each Monday afternoon for the following week, and that the secretary shall immediately cause notice of the setting to be published in the *Star and Herald*, the *Panama Morning Journal*, *THE CANAL RECORD*, and the *Gaceta Oficial*; and shall also mail or deliver copies of the setting to the respective attorneys interested therein.

It is further ordered that all rules or parts of rules in conflict with this rule be, and the same are hereby, repealed, annulled, and set aside.

By direction of the Joint Land Commission.
WILLIAM TAYLOR,

Secretary.

PANAMA, October 24, 1914.

Change in Royal Mail Sailing.

The Royal Mail Steam Packet Company's sailing to New York on November 24 will be taken by the *Magdalena*, and this steamer will also sail on December 15 for England, substituting the *Oruba*, which was announced in the company's itineraries for these dates.

REPATRIATING LABORERS.

Work of the Government in Returning Canal Laborers to their Homes.

In the construction of the Canal, practically all of the laborers employed were brought from foreign countries. When the United States took possession of the Canal property, in May, 1904, the engineers found about 700 laborers in the employ of the second French company. The increase of this force to over 40,000, which was approximately the number of men, exclusive of skilled help, employed by the United States on the Isthmus at the height of operations, required wholesale recruiting, and with the drawing of the work to completion, and the consequent reduction of force, the Government has found it both practical and humane to repatriate numbers of these men who have been thrown out of employment.

From the first, the policy has been to furnish free transportation to their home countries to laborers brought to the Canal work under contract, upon the completion of the period of service for which they contracted. Later, the same accommodation was extended to laborers who had migrated to the Isthmus on their own responsibility, but could show a period of service equal to that stipulated in the contracts. And recently, principally as a police measure for the prevention of vagrancy and the relief of the cities of Colon and Panama, The Panama Canal has been offering free transportation to their home countries to practically all employees now out of work. In connection with this, the Republic of Panama has been requested to enforce strictly its immigration laws aimed at the exclusion of those likely to become public charges, and the enactment of additional legislation in this direction is now under consideration.

The importation of laborers under contract may be summarized, as follows:

class in the years 1906, 1907, and 1908, and his activities so stimulated emigration to the Isthmus that, after he ceased active recruiting, numbers of Spaniards made their way to the Isthmus independently. In the spring of 1910, over 2,000 of these arrived within four months; the excess of arrival of European laborers over the departures in the year 1911 amounted to 4,910.

Of the 11,873 European laborers recruited, the largest number at work at any time was 5,016, in February, 1908, at which time 472 noncontract European laborers were also employed. In February, 1912, there were 1,625 European contract laborers on the work. In the reductions of force, these men have been retained as far as practicable, but the total number of European laborers employed by The Panama Canal and the Panama railroad at present is about 1,200.

The influx of European laborers did not exceed the demand for them, to the extent of requiring repatriation, until September, 1911. A great many of those who had arrived earlier used the Isthmus as a stepping stone to the United States, or to Central and South America; at one time so many of the contract laborers were leaving for employment elsewhere, notably in Brazil, that the Isthmian Canal Commission took steps to check their emigration, and the recruiting of laborers on the Isthmus was forbidden. In September, 1911, a number of Europeans were laid off in the Central Division, and, as no other employment for them could be found, they were repatriated. Several hundred Spanish immigrants who arrived on the Isthmus in October of that year, seeking work, were returned to their country at the expense of the Isthmian Canal Commission. A canvass of the departments and divisions was made to ascertain the probable future requirements of European labor. It was found that no more would be required than were then employed,

on May 16, 1912, and about the same time took approximately 1,100 West Indians. It was estimated that up to February 25, 1912, about 9,000 Europeans had returned to Europe at their own expense.

Since that time nearly all who have returned have gone at the expense of the United States. The total number of European repatriations to date, including the volunteer labor returned in 1911, is estimated at 2,400, of which 102 were sent during the fiscal year 1913, 1,599 in the fiscal year 1914, and about 400 since July 1, 1914. At the rate of \$35 each, the expense of this part of the repatriation has been about \$84,000. In addition, though the cost of transportation to the Isthmus of contract laborers was to be deducted from their pay, numbers of the Europeans jumped their contracts, so that the collections fell short of the disbursements for this purpose by about \$30,000.

WEST INDIAN LABORERS.

The story of the recruiting of laborers in the islands of the West Indies is shown in the table above. Legal restrictions in some of the British islands caused the securing of most of the contract laborers in Barbados and the French islands, but numbers of volunteer laborers migrated to the Isthmus from those islands in which recruiting was abandoned, and a great many of them have been, and are being, repatriated like the contract laborers.

The reduction of force toward the close of 1911, which caused the return of numbers of European laborers to their countries, was followed by an increase in the latter part of 1912. To meet this increase, 1,470 additional laborers were brought from the West Indies under contract. Earlier contracts had agreed on the repatriation of the laborer after 500 days of work, but in this later recruiting it was stipulated, on account of the doubtful length of employment, that the men should be given free return transportation, unless discharged for cause, regardless of the number of days worked.

The large reduction in this class of labor began in the latter part of 1913. Estimates prepared by the heads of departments and divisions in July of that year had placed the probable reduction in the six months after October 1 at 9,659. Preparations were made for wholesale repatriation, and the possibility of using steamships of the Panama railroad for the purpose was considered, while at the same time the various steamship lines out of Colon were invited to make special rates for this traffic. The reduction was not as extensive as anticipated, the railroad vessels were not used, and such repatriation as has been necessary has been effected over the regular steamship lines. Their rates are, as follows: To Jamaica, \$6; to Trinidad, \$11; to Martinique, \$12; to Barbados, \$14; to Santiago de Cuba, \$14.50; to Antilla, \$14.75.

With the diminishing demand for labor, warnings, as before, had been sent out to the various islands, as well as to Spain, and invitations were issued to large employers of labor to recruit from the surplus on the Isthmus. In this case, also, the principal response was from the United Fruit Company, which stated in August, 1913, that it could use 1,000 men immediately at Bocas del Toro, and between 3,000 and 4,000 in Costa Rica, taking about 50 to 75 a week. Of the West Indians subsequently discharged from the

CONTRACT LABORERS BROUGHT TO THE ISTHMUS BY THE ISTHMIAN CANAL COMMISSION.

In the first two years of the American occupation, the unskilled labor was practically all negro. With the expansion of operations, the demand for labor was such that the natural indolence of this class of labor became aggravated by a feeling of independence, and it was decided to import white labor from southern Europe. A recruiting agent in Europe sent to the Isthmus, as shown, 11,873 of this

and it was decided to repatriate those who could not find work.

Warnings against further immigration were sent out, and governmental and corporate employers of this class of labor in neighboring countries were invited to recruit from the surplus in the Canal Zone. The principal response was from the United Fruit Company, which took 230 Spaniards to Puerto Barrios

Canal work, about 2,500 accepted this employment.

In connection with this reduction, it was directed that free transportation should not be given to noncontract laborers discharged from employment at 13 and 16 cents per hour as long as there were places vacant at 10 cents.

These circumstances, in connection with a liberal policy in the treatment of individual applications for passage home, have made large scale repatriation unnecessary until recently; but now that it is obvious the force will not be increased beyond its present number, and will be decreasing, the unemployed are being given free transportation, as a police measure.

Notices have recently been posted, to the effect that The Panama Canal will furnish free transportation to their islands to limited numbers of West Indian former employes. The steamship *Magdalena*, sailing on October 6, carried 145 deck passengers, of whom 140 were traveling on passes furnished by The Panama Canal. This work is still in progress; to date, about 3,400 repatriation passes have been issued by the Government to West Indian exemployes. This number includes 579 in the fiscal year 1913, 707 in the year ending July 1, 1914, and about 2,100 since July 1, 1914. At an average rate of \$12, the cost has approximated \$40,800. This is exclusive of foreign citizens removed from the Canal Zone in the course of its depopulation, and repatriated by the Department of Law.

Notice to Steamship Lines.

1. The attention of the Canal authorities has been called to the fact that several of the firms whose vessels have been using the Panama Canal have seen fit to employ agents on the Isthmus, to take care of the interests of their vessels in regard to the payment of tolls and minor charges.

2. This is not only unnecessary, but frequently results in delays which might otherwise be avoided were their business done direct with The Panama Canal.

3. Shipowners are informed that provision has been made in accordance with Canal regulations, by which deposits to cover tolls can be made with any of the Assistant Treasurers of the United States, who are to be found in larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made cable information is sent to The Panama Canal.

4. In case a vessel should desire to purchase coal or supplies at either terminal port, or contract a bill for pilotage or towage, deposits to cover these expenses can be made in the same way as for tolls.

5. The price of coal at Cristobal is \$5.40 per ton, and at Balboa \$6.40 per ton. Tug service is at the rate of \$15 per hour. The probabilities are that unless a vessel be over 15,000 gross tonnage there will be no charge for tug service; nor will there be any charge for pilotage for a vessel in transit through the Canal unless she takes on or discharges freight or passengers in a terminal port.

6. It is advisable that deposits be made somewhat in excess of the tolls, cost of supplies, and charges for services, so that there will be sufficient funds available to cover bills not anticipated, since all bills are payable in advance before a vessel is allowed to enter the Canal or clear from Canal waters.

7. Vessels that require answers to cables

should prepay them, or else deposit sufficient funds to cover in the same way as for tolls.

GEO. W. GOETHALS,
Governor.

BALBOA HEIGHTS, C. Z.,
October 15, 1914.

New Records in Canal Operations.

In the week from noon, October 20, to noon, October 27, following the resumption of traffic through the Canal after the opening of the channel opposite the New Culebra slide, 17 vessels were put through the Canal from the Pacific to the Atlantic, and 21 from the Atlantic to the Pacific, a total of 38 vessels in seven days. Up to the end of the week, 71 commercial vessels and three launches had passed through the Canal in the 27 days of October. The tolls collected on tonnage in this period amounted to \$329,704.72, as compared with the total of \$369,706.29 collected prior to October 1, in which are included charges for 115 barges towed through the Canal before its formal opening to commercial traffic on August 15.

Panama Railroad Steamship Service Through the Canal.

The Panama Railroad Steamship Line will inaugurate a service through the Panama Canal, between Cristobal and Balboa, and vice versa, with its steamers *Allianca* and *Advance*, beginning with the *Allianca*, arriving at Cristobal on Wednesday, October 28. The *Advance* will arrive at Cristobal on Wednesday, November 11.

These two steamers will, on their arrival from New York, each trip, discharge at Cristobal all Colon and Cristobal cargo, take on board cargo then on hand for which they have room, consigned to Pacific carriers, and proceed through the Canal to Balboa, and there discharge all west coast cargo they have on board.

On the return trip, they will load at Balboa all cargo delivered by Pacific carriers, routed via Panama Railroad Steamship Line to New York, as well as any cargo destined to Atlantic carriers at Colon or Cristobal, for which they have room. After discharging this cargo at Cristobal and taking on board all New York cargo offered at Colon, they will proceed to New York on the regular voyage.

It has also been decided, for the benefit of the public who may desire to make the trip

through the Canal, to carry passengers in either direction on all Panama railroad steamships that pass through the Canal, at the following rates:

Adults	\$6.00
Children under 12 years	3.00
Employes and adult members of families	4.00
Children under 12 years	2.00

The above rates will include meals and berth, when necessary.

Tickets will be on sale at Colon and Panama passenger stations, Pier 11 at Cristobal, and the wharf at Balboa. For further information as to sailing dates, application should be made to receiving and forwarding agents' office at Colon or Balboa.

Pay Roll Deductions of Red Cross Subscriptions. HEADS OF DEPARTMENTS AND DIVISIONS:

A charity ball will be given at the Hotel Tivoli, Ancon, on the evening of November 2, 1914, under the auspices of the Canal Zone Chapter of the American National Red Cross Society, the proceeds of which will be used for Canal Zone relief cases, to help equip and defray the expenses of doctors and nurses ordered and volunteering for duty in the field armies engaged in the present European War, and for the purchase of medical supplies.

This ball has received official sanction, and payments of amounts subscribed by employes for tickets or other purposes in connection with the ball may be made by pay roll deduction if the employe so requests in writing.

GEO. W. GOETHALS,
Governor, The Panama Canal.
President, Panama Railroad Company.
BALBOA HEIGHTS, October 26, 1914.

Names Omitted from List of Dredgemen.

The names of the following should be included in the list of gold employes of the Dredging Division, published in last week's issue, who were engaged in the work of opening the Canal channel at the base of the New Culebra slide:

J. Daly, F. H. Hodges, J. T. Wallace, from the dredge *Paraiso*.
V. Salinas, L. Salling, and J. Wainio, from the dredge *Gamboa*.

Increased Force of Pilots.

Owing to the increased traffic through the Canal, authority has been granted to increase the number of pilots from 18 to 24.

The estates of these deceased employes of the Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against these estates, or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

NEW P. R. R. FREIGHT HOUSE.

Work Begun on Modern Ratproof Structure in City of Panama.

Forces of the bridge and building department of the Panama railroad have begun the erection of a new ratproof freight house on Avenue B, on the site of the old building, which was recently condemned by the health authorities on account of its lack of protection against an invasion by rats. The present structure is 75 by 540 feet in plan; the new building will be 60 feet longer at the north end, making its total length 600 feet. It will be one story in height, with the exception of 40 feet in the center, where there will be a 2-story part as shown in the accompanying sketch, marked B. The walls and floors will be built of reinforced concrete.

In order to continue the use of a part of the present structure while the new one is under construction, dismantling of the old shed and construction of the new is proceeding in sections. Pouring of concrete for the outside or

inch material. There will be 28 roof trusses in the building. Where the walls separate the 2-story part from the shed, purlins will extend from the trusses and be embedded in the wall concrete. The roof covering of the shed will consist of red colored tile from the Paraiso stock pile, the same as used on the Balboa shop buildings.

The floor plan of the shed provides for a depressed track extending practically its entire length. It will be 12 feet wide, with top of rail four feet below floor level, and will be located 42 feet from the street side and 21 feet from the rear. The shed space will be entirely devoted to freight storage, with the exception of two toilets, one for the gold, and the other for silver employes. The front of the 2-story part on the lower floor will be partitioned off into two rooms, each 18½ by 23 feet in plan, one a specie room, and the other a storage room for small freight parcels. Back of these rooms will be a truckway, which will allow communication through the 2-story part from one section of

front of the shed. This wall will be pierced by four arched openings each five feet six inches wide by eight feet four inches high at the top of the arch, and at the top, will be surmounted by a 2-foot parapet with turreted corners. Access to the upper floor will be provided by two stairways, one on the outside platform, and the other on the inside of the building. The estimated cost of the freight house is \$72,000.

New Publications—Bureau of Mines.

The following new publications have been issued by the Bureau of Mines, Department of the Interior:

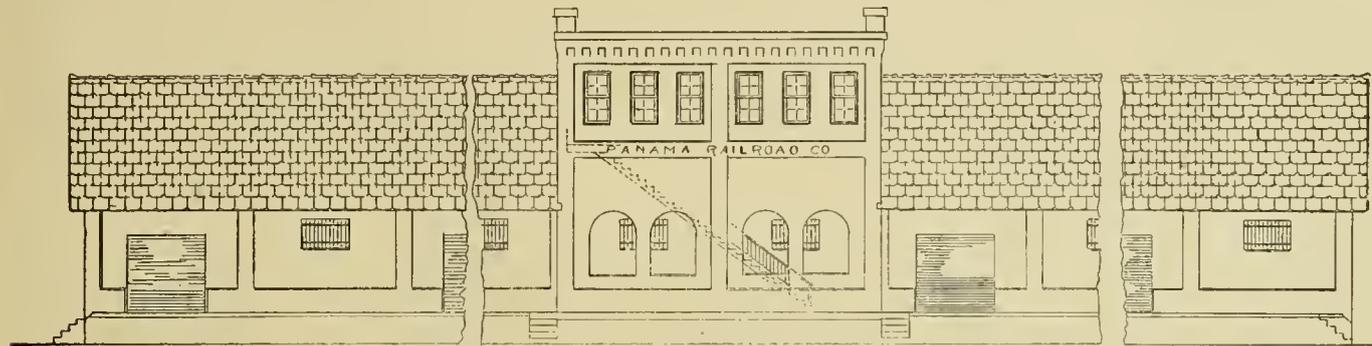

BULLETIN.

Bulletin 38 "The origin of coal," by David White and Reinhardt Thiessen, with a chapter on the formation of coal, by C. A. Davis. 1914, 396 pp., 54 pls.

TECHNICAL PAPERS.

Technical Paper 34 "Experiments with furnaces for a hand-fired tubular boiler," by S. C. Flagg. 1914, 32 pp., four figs.

Technical Paper 63 "Factors governing the combustion of coal in boiler furnaces," a preliminary report,

SKETCH A.—FRONT ELEVATION (SECTIONAL) OF NEW PANAMA RAILROAD FREIGHT HOUSE.

foundation walls of the new building, at the north end as far as the first fire wall, was begun on September 23. These walls will be 20 inches thick at the bottom and 12 inches thick at the floor line, reinforced by one-half and ¾-inch corrugated iron bars. When completed, the space enclosed will be filled in with earth over which there will be laid a concrete floor eight

the shed to the other. The side and end walls will be pierced at regular intervals by iron barred windows, while door openings, 10 by 10 feet in size, will be spaced at every 40 feet along the front or street side.

The 2-story part will have a battlemented front, and will be enclosed by fire walls 15 inches thick, with a reinforced concrete floor

by J. K. Clement, J. C. W. Frazer, and C. E. Augustine. 1914, 44 pp., 26 figs.

Technical Paper 77—Report of the committee on resuscitation from mine gases, by W. B. Cannon, G. W. Crile, Joseph Erlanger, Vandell Henderson, and S. T. Meltzer. 1914, 33 pp., four figs.

Technical Paper 79 "Electric light for use about oil and gas wells," by H. H. Clark. 1914, 8 pp.

MINERS' CIRCULAR.

Miners' Circular 17 "Accidents from falls of rock and ore," by Edwin Higgins. 1914, 15 pp., eight figs.

Note—Only a limited supply of these publications is available for free distribution, and applicants are asked to cooperate in insuring an equitable distribution by selecting publications that are of especial interest. Requests for all papers cannot be granted without satisfactory reason. Publications should be ordered by number and title. Applications should be addressed to the Director of the Bureau of Mines, Washington, D. C.

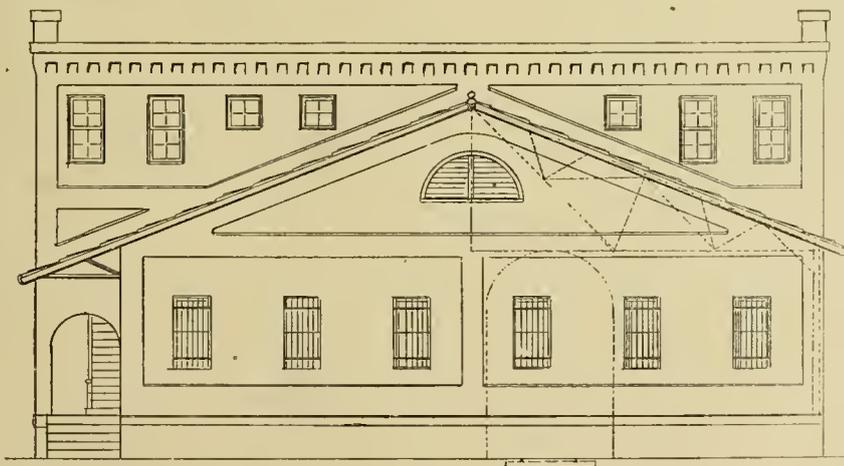

Receipt is acknowledged by THE CANAL RECORD of a copy of MacRae's Blue Book for 1914, published by the MacRae's Blue Book Company of Chicago, Ill. It contains a list of the leading manufacturers of every article used in the construction and maintenance of railways, and has been placed in the library of the new Administration Building, Balboa Heights, for ready reference.

Colon Hospital Rates for Panamanians.

The rates for Panamanian residents of Colon at the Colon Hospital have been fixed at \$2 per day for ward room patients, and \$4 per day for patients occupying private rooms. The minimum charge for operations remains the same as fixed in the approved schedule, published in THE CANAL RECORD of June 10, 1914.

Death.

OLSON, EDITH—Aged six years; daughter of E. J. Olson of Culebra; October 15, 1914.

SKETCH B.—SOUTH END ELEVATION OF PANAMA RAILROAD FREIGHT HOUSE.

inches thick, situated at an elevation of three feet four inches above the street level.

The main outside walls will be 11 inches thick rising to a height of 16 feet from the floor. The roof will be supported by iron trusses, spaced on 20-foot centers, with the top and bottom members of ¾ by 3½ by 6-inch material, and the other truss members of ¾ by 2 by 2½-

and roof. The roof will be nearly flat and will be covered with tar and gravel in accordance with Barrett specifications. The second floor will be partitioned off with 7-foot frame partitions to meet the requirements of the freight agent and his office force. The front wall of the 2-story part will extend out over the 8-foot platform which will be built along the

HOOKWORM CAMPAIGN.

Representative of International Health Commission Organizing Work on Isthmus.

Dr. L. W. Hackett, a representative of the International Health Commission, organized through the efforts of the Rockefeller Foundation, to combat the ravages of the hookworm, has been on the Isthmus for several months preparing a local campaign against the disease. As the result of his labors so far, laboratories, under the newly created Department of Uncinariasis of the National Board of Health, have been established in the city of Panama, at La Chorrera, a village of about 4,000 inhabitants 18 miles from Panama city, and at Bocas del Toro.

The Rockefeller Sanitary Commission was organized in 1909, with the special object of eradicating hookworm disease in the United States. It found more than 2,000,000 people in the Southern States infected with hookworms "Involving vast suffering, partial arrest of physical, mental, and moral growth, great loss of life, and noticeable decrease in economic efficiency over vast regions." The commission treated over 500,000 persons and ascertained that the diagnosis of the disease could be made with ease and certainty, and that it could be readily and easily prevented.

The total number of persons treated in 11 States in 1913 aggregated 186,277, an average of 616 persons a day for every working day in the year. The average number for 1912 was 720. This reduction of 14 per cent in the number of persons treated is significant when it is considered that the number of persons examined in 1913 represents an increase of 60 per cent over 1912. The territory covered in 1913, as a whole, had lighter infection than that covered in 1912; some of the territory has been covered a second time, and the results seem to indicate that the work of the health forces during the past four years accounts, in a measure, for this showing. In 1913, Kentucky led in the number of cases treated, 43,211; North Carolina was second, with 33,840, and Arkansas last, with 4,894 cases. For the 4-year period ending December 31, 1913, a total of 539,107 cases was treated in the United States. The cost to the commission in 1913 was \$195,900, or \$1.05 for each person treated. Microscopical examinations made in 1913 numbered 480,951, the increase of 60 per cent over 1912 being due to three principal reasons; first, a tendency on the part of State and field directors to require microscopical examinations as a basis for treatment; second, improvement in methods and increase of efficiency in making the examinations; and the third and probably the most significant factor, the growing desire on the part of all classes of people to seek examinations regardless of symptoms.

While the campaign in the United States was being waged, the commission began instituting inquiries into the conditions outside, resulting in the discovery that the hookworm disease prevails in a belt of territory encircling the earth for 30 degrees on each side of the equator, inhabited, according to current estimates, by more than a thousand million people. In some nations, it was found that the infection rose to include nearly 90 per cent of the entire population. It was being spread by emigration, and where it is most severe, little or nothing had been done toward its arrest or prevention.

The Rockefeller Foundation acted on the

information thus gained by making preparations to extend to other countries and peoples the work of eradicating the disease as fast as invitations were received, with the intention, so far as practicable, of following up the treatment and cure by the establishment of agencies for the promotion of public sanitation and the spread of knowledge concerning scientific medicine.

With this end in view, the International Health Commission was organized in the fall of 1913. One of the first countries to invite its assistance was the Republic of Panama, but prior to this time, Great Britain had solicited the commission's cooperation in behalf of that country's tropical possessions. There is a French and Dutch colonial service, and an Oriental service under consideration, so

it will be seen that the microscopist with his can of thymol is already plodding on his way around the world, following the equator.

The campaign against hookworm disease in the Republic of Panama has not progressed far enough as yet to furnish a statement of definite results. About a month ago a small laboratory was opened at La Chorrera, where men, women, and children can come and be treated without charge. An effort is being made to bring every inhabitant of this village within the range of the microscope, by the distribution of circulars describing in simple language the ravages of the disease; by house to house visits of investigation and instruction, and by official posters of an authoritative character. The examination and treatment has not, for good reasons, been made com-

LABOR FORCE AND QUARTERS IN SEPTEMBER.

The force report for September 23 shows the actual working force of The Panama Canal on that date to have been 24,227; of the Panama railroad, 3,914, and of contractors, 58, a total effective working force of 28,199. This is a decrease of 883, as compared with the statement of August 26. The gold force on the Canal work, composed almost exclusively of white Americans, was 4,288, divided, as follows: The Panama Canal, 3,806; Panama railroad, 474; contractors, eight, a decrease in the total gold force, as compared with the preceding month of 241. Detailed figures of the total force employed on the Isthmus, by departments or divisions, are given below:

DEPARTMENT OR DIVISION.	SILVER EMPLOYEES*												Total silver.	Total gold.	Grand total.

(1) Includes seven American negroes, and two Panamanians on the gold roll. (2) Includes Sabanas police station, Taboga Island, Naos Island, Culebra Island, and Palo Seco. (3) Includes Miraflores. (4) Includes one Asiatic. (5) Includes 51 Panamanians. (6) Includes Empire, Las Cascadas, and Bas Obispo. (7) Includes Colon Beach and Colon Hospital. (8) Includes 32 East Indians, 13 American citizens, and 78 Panamanians. Gold force of contractors (included above), 59 bachelors.

pulsory, but it is possible to be somewhat inconsistent, as the laboratory is a Government institution, and is clothed with some authority.

Out of the first thousand men, women, and children reporting at La Chorrera laboratory, more than 700, upon examination, were found to be harboring hookworms, and evidenced the accompanying anemia. On the laboratory table at that place there is a bottle containing some 2,000 of these parasites recovered from a boy of 10, who appeared to be only seven, and whose blood made a pale yellow spot on a blotter, registering about 10 per cent of normal richness and color. These 1/2-inch worms, about the size of a basting thread, bite and suck blood, injecting a poison which pervades the system. In adults, they produce paleness, anemia, debility, and indigestion—that "Tired feeling." They keep children from developing, both mentally and physically, but they often do it so gradually that the boy is never really sick, and even the parents do not suspect the presence of the disease. The child is simply a little pale, a little small for his age, a little behind in his studies.

How is the presence of the parasites detected? In bad cases, the appearance alone is indicative of the disease—the waxy pallor, the white lips and tongue, the swollen cheeks, the prominent abdomen, and loss of strength. Often a mere suspicion may be developed into certainty by eliciting from the patient a story of an attack of ground itch or *mazamorra*. The microscopic larvæ of these worms live on the surface of the ground in muddy places, and when a barefooted person steps there, they stick to the feet, and will at once begin to bore their way through the skin, particularly between the toes where dirt usually clings for awhile and the skin is tender. Many hundreds of these minute creatures may enter the body in this way within a short time, and their boring causes intense itching with accompanying inflammation.

Not every one who has had *mazamorra* contains the worms, for the parasite cannot multiply within the body, and will die off within a few years, provided no more gain entrance through the skin. Entire freedom from *mazamorra* may not argue the absence of hookworms, for the larvæ may get into the stomach with the food. The best and surest way to diagnose the disease has been found to be the examination of stools for hookworm eggs. Each worm lays thousands of eggs every day, which may easily be found in the excrement with a microscope. It is a good rule to follow for people living in regions where the hookworm is found to have themselves examined periodically, even if they do not seem to feel any symptoms of the disease.

Infection is spread by allowing human excrement to remain on the surface of the ground. The eggs of the hookworm after being ejected hatch on the ground into minute worms, which can enter other human beings through the skin. It will be seen, therefore, that the treatment of infected persons does not solve the entire problem. They are bound to become reinfected in time if they continue to live utterly careless of personal cleanliness and sanitation. On the other hand, the effect of treatment alone is by no means ephemeral. For example, in the case of an isolated village in Porto Rico, thoroughly treated 10 years ago, where, in 1,000 cases taken at random, the blood averaged only 40 per cent of normal,

this spring it was found that it still remained above 70 per cent.

In the city of Panama, where the streets are paved and all the houses have sewer connections, the disease probably cannot extend. However, as hookworms can live in the human body as long as 10 years, persons coming from the interior within that period may still be infected. This probably explains an incidence of about 20 per cent in Panama city.

The first principles of prevention are summed up in the advice given on the posters "Wear shoes and keep the ground clean." It is necessary to raise the whole sanitary condition of the people to that extent if the disease is to be extirpated. The work of the International Health Commission is undertaken on the assumption that, in the end, the countries interested in a campaign against the disease will assume the burden of responsibility. With that in view, assistance is given by the commission in organizing and bringing into play latent public health forces, leaving the permanence of the work in the hands of the Government.

A laboratory has recently been opened by Dr. Hackett at Bocas del Toro, and it is proposed to establish others from time to time, and to move these laboratories from place to place until, in the end, every accessible group of people in the country will have been visited and examined. At the laboratory maintained by the Department of Uncinariasis in the old Canal building in Panama city, any one may obtain details of the examination and treatment. Any person who desires will be examined and will receive treatment free of charge. No general medical examination will be made, however, and medicines for other diseases will not be dispensed. The Government is ably seconding the work along this line.

Red Cross Finances.

The financial statement of the Canal Zone Chapter, American National Red Cross, for the months of July, August, and September is, as follows:

RECEIPTS.	
Balance on hand July 1, 1914.....	\$3,655.74
Aug. 2. Balance after making necessary purchases and expenditures in case of paroled and deported American woman.....	21.58
Sept. 30 Interest July, August, and September.....	18.29
Total.....	\$3,695.61
DISBURSEMENTS.	
July 15 Relief of American woman.....	10.00

Hotel Aspinwall Launch Service.

The launch *Louise* will sail from the dredge landing at Balboa for the Hotel Aspinwall on Taboga Island at 9.25 a. m., on Monday, Thursday, and Saturday of each week. The time of sailing permits connection to be made with train No. 3, which arrives at Panama from Colon at 9.05 a. m., daily.

JOINT LAND COMMISSION.

Awards.

Award No. 60, October 12, 1914. In the matter of sundry claims—An award is hereby made against the United States, in favor of the persons hereinafter named, in the sum of \$335, United States currency.

This award shall be paid to the respective claimants hereinafter named, in the amounts hereinafter specified, on or before the 12th day of November, 1914, and if payment or tender of payment of any items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum until paid:

Gordon, James, docket No. 395—For all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Gordon may possess or may have possessed on lands of the Panama Railroad Company, designated as Lot 2 on the Harrison-Arosemena map, the sum of thirty dollars (\$30), United States currency.

Julio, Tomas, docket No. 400, for all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Julio may possess or may have possessed on the lands of the Panama Railroad Company, designated as Lot 3 on the Harrison-Arosemena map, the sum of fifty dollars (\$50), United States currency.

Nugent (Nullon), Robert, docket No. 399—For all rights, claims, and other interests in growing crops, fruit trees, house without tax number, and any other buildings and any other improvements which the said Nugent (Nullon) may possess or may have possessed on land designated as Lot 3 on the Harrison-Arosemena map, the sum of one hundred twenty-five dollars (\$125), United States currency.

Robinson, William, docket No. 390—For all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Robinson may possess or may have possessed on lands of the Panama Railroad Company, designated as Lot 3 on the Harrison-Arosemena map, the sum of sixty-five dollars (\$65) United States currency.

Sewell (Snill), Joseph, docket No. 394—For all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Sewell (Snill) may possess or may have possessed on lands of the Panama Railroad Company, designated as Lot 3 on the Harrison-Arosemena map, the sum of sixty-five dollars (\$65), United States currency.

Total, \$335, United States currency.
FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Award No. 61, docket No. 858, October 13, 1914. In the matter of the claim of Joseph Lambre, for property located near Ahorca Lagarto—An award is hereby made against the United States, in favor of the person hereafter named, in the sum of \$100, United States currency.

This award shall be paid to the claimant hereinafter named, in the amount specified, on or before the 13th day of November, 1914, and if payment or tender of payment of this award is not made on or before that date, such award shall thereafter bear interest at the rate of six per centum per annum until paid:

Lambre, Joseph, docket No. 858—For all rights, claims and other interests in growing crops, fruit trees, building, and any other improvements which the said Lambre may possess or may have possessed at or near Ahorca Lagarto, said property being distinct from house tax No. 133, and other improvements near Bohio, for which payment was made to Joseph Lambie in 1910, the sum of \$100, United States currency.

The claim in so far as it relates to property at Red Tank is hereby dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Award No. 62, October 19, 1914. In the matter of sundry claims—An award is hereby made against the United States, in favor of the persons hereinafter named in the sum of \$570, United States currency. This award shall be paid to the respective claimants hereinafter named, in the amounts hereinafter specified, on or before the 19th day of November, 1914, and if payment or tender of payment of any items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum until paid:

Hughes (Huse), Robert, docket No. 1127—For all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Hughes (Huse) may possess or may have possessed at or near Ahorca Lagarto, the sum of \$45, United States currency.

Morgan, Alexander, docket No. 1149—For all rights, claims, and other interests in growing crops, fruit trees, buildings, and any other improvements which the said Morgan may possess or may have possessed on lands of

the Panama Railroad Company, designated as Lot 3 on the Harrison-Arosemena map, the sum of \$150, United States currency.

Walker, David, docket No. 403—For all rights, claims, and other interests in frame house, tax No. 566, and a chicken coop, located on the Bosque Estate at or near Matachin, not covered by award No. 44 of September 22, 1913, the sum of \$250, United States currency.

Williams, Nathaniel, docket No. 1172—For all rights, claims, and other interests in growing crops, fruit trees, house without tax number, and any other buildings, and any other improvements which the said Williams may possess or may have possessed on lands of the Panama Railroad Company designated as Lot 3 on the Harrison-Arosemena map, the sum of \$125, United States currency. Total, \$570, United States currency.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Award No. 63, docket No. 1422, October 21, 1914. In the matter of the claim of Ursula Rodriguez, for property located near Ahorca Lagarto—An award is hereby made against the United States, in favor of the person hereinafter named, in the sum of \$200, United States currency.

This award shall be paid to the claimant hereinafter named, in the amount specified, on or before the 21st day of November, 1914, and if payment or tender of payment of this award is not made on or before that date, such award shall thereafter bear interest at the rate of six per centum per annum until paid.

Rodriguez, Ursula, docket No. 1422, for all rights, claims, and other interests in growing crops, fruit trees, house without tax number and any other buildings and any other improvements which the said Rodriguez may possess or may have possessed at or near Ahorca Lagarto, the sum of \$200, United States currency.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rules of Dismissal.

Rule of dismissal No. 141, October 10, 1914. In the matter of sundry claims—With reference to the claims for improvements of the persons hereinafter named, the evidence before the commission is that previous payments have been made. A careful examination has been made of all cases in which payment has been reported, and the commission has reached the conclusion that the claimants have no property for which an award could be sought from this commission which is not covered by the previous payments hereinafter noted:

Crawford, Thomas, docket No. 391—The property included in this claim was covered by payment of the Panama Railroad Company to the claimant on September 19, 1911, for a "House and miscellaneous fruits and cultivations on land owned by the Panama Railroad Company in the valley of the Chagres River which are situated below contour line of 87 feet above sealevel."

Coney, William, docket No. 392—The property included in this claim was covered by payment of the Panama Railroad Company to the claimant on September 19, 1911, for a "House and miscellaneous fruits and cultivations on land owned by the Panama Railroad Company in the valley of the Chagres River, which are situated below contour line of 87 feet above sealevel."

Clarke, Samuel, docket No. 396—The property included in this claim was covered by payment of the Panama Railroad Company to the claimant on September 19, 1911, for a "House and miscellaneous fruits and cultivations on land owned by the Panama Railroad Company in the valley of the Chagres River, which are situated below contour line of 87 feet above mean sealevel."

Bradley, John (Broley, Llan), docket No. 397—The property included in this claim was covered by payment of the Panama Railroad Company to the claimant on September 19, 1911, for a "House and miscellaneous fruits and cultivations on land owned by the Panama Railroad Company in the valley of the Chagres River, which are situated below contour line of 87 feet above sealevel."

Harrison, David, docket No. 398—The property included in this claim was covered by payment of the Panama Railroad Company to the claimant on September 19, 1911, for a "House, miscellaneous fruits and cultivations on land owned by the Panama Railroad Company in the valley of the Chagres River, which are situated below contour line of 87 feet above sealevel."

Lilly, David, docket No. 402—The property included in this claim was covered by payment of the Panama Railroad Company to the claimant on September 19, 1911, for a "House and miscellaneous fruits and cultivations on land owned by the Panama Railroad Company in the valley of the Chagres River, which are

situated below contour line of 87 feet above sealevel."

Piti (Sesilio), Cecilio, docket No. 1133—The property included in this claim was covered by payment of the Panama Railroad Company to the claimant on November 10, 1910, for "One house, pear, fisva, lime, rubber, and orange trees and coffee bushes on land owned by the Panama Railroad Company in the valley of the Trinidad River, which are situated below a contour line of 87 feet above sealevel."

In view of the payments herein noted, no claims against the United States of America can be recognized by the Joint Land Commission, and these claims are accordingly hereby dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule of dismissal No. 142, docket No. 262, October 10, 1914. In the matter of the claim of Fabian Bayonne, for property located near Matachin—In the case of Fabian Bayonne, docket above shown, an examination of the evidence shows that he entered upon the possession of the lands on which he claims improvements, under a lease from the Isthmian Canal Commission. In a decision in the case of Agusta Dunlop, rendered April 16, 1913, the commission said:

"We have, therefore, reached the conclusion that it is not within the province of the Joint Land Commission to take cognizance of claims arising out of the revocation of revocable leases or licenses issued by the Isthmian Canal Commission. Such claims have no organic relation to the grants contained in the Treaty, nor to the international obligations which the United States has agreed to discharge under the Treaty, and for the adjudication of all such claims the claimants must seek a remedy through the procedure afforded by municipal laws."

In accordance with the foregoing decision, the claim of Fabian Bayonne, above shown, is hereby dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule of dismissal No. 144, docket numbers as shown, October 13, 1914. In the matter of sundry claims—With reference to the claims for improvements of the persons hereinafter named, the evidence before the commission is that previous payments have been made. A careful examination has been made of all cases in which payment has been reported, and the commission has reached the conclusion that the claimants have no property for which an award could be sought from this commission, which is not covered by the previous payments hereinafter noted:

Allen, Robert Samuel (Haly, Robert), docket No. 363—The property included in this claim was covered by payment of the Panama Railroad Company to the claimant on September 19, 1911, for a "House and miscellaneous fruits and cultivations on land owned by the Panama Railroad Company in the valley of the Chagres River, which are situated below a contour line of 87 feet above sealevel."

Orazco, José, docket No. 1091—The property included in this claim was covered by payment of the Panama Railroad Company to the claimant on September 19, 1911, for a "House and miscellaneous fruits and cultivations on land owned by the Panama Railroad Company in the valley of the Chagres River, which are situated below a contour line of 87 feet above sealevel."

Williams, John, docket No. 1035—The property included in this claim was covered by payment of the Panama Railroad Company to the claimant on September 19, 1911, for "Houses and miscellaneous fruits and cultivations on land owned by the Panama Railroad Company in the valley of the Chagres River, which are situated below a contour line of 87 feet above sealevel."

In view of the payments herein noted, no claim against the United States of America can be recognized by the Joint Land Commission, and these claims are accordingly hereby dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule of dismissal No. 145, docket No. 1134, October 17, 1914. In the matter of the claim of William Pitt—With reference to the claim of William Pitt for improvements which were located in the valley of the Chagres River, near Lion Hill, the evidence before the commission is that a previous payment has been made. A careful examination has been made by the commission of all cases in which payments have been reported and the commission has reached the conclusion that the claimant, William Pitt, has no property for which an award could be sought from this commission which is not covered by the previous payment hereinafter noted:

William Pitt, docket No. 1134. The property included in this claim was covered by payment of the Disbursing Officer to the claimant in December, 1911, voucher No. 17739 for "All growing crops and fruit trees, one frame and zinc house, tax No. 174, and all

other improvements in the valley of the Chagres River, which it became necessary to destroy by reason of the Atlantic Division clearing area to be covered by Gatun Lake."

In view of the payment herein noted, no claim against the United States of America can be recognized by the Joint Land Commission, and the claim of William Pitt is accordingly dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule of dismissal No. 143, docket No. 1883, October 12, 1914. In the matter of the claim of Robert Nugent, for property located near Lion Hill—The records of the commission show that in the following instance duplicate claim has been filed with the commission, covering property for which prior claim has already been disposed of, as hereinafter shown:

Robert Nugent, docket No. 1883—This claim, covering improvements on lands near Lion Hill, is a duplicate of docket No. 399, filed by Robert Nullon (Nugent), for which an award was made by the commission under award No. 60.

In view of the facts above referred to, this claim calls for no further action on the part of the commission, and is accordingly dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule of dismissal No. 146, docket No. 1442, October 21, 1914. In the matter of the claim of José Pinillo, for improvements near Tabernilla—The claim of José Pinillo, docket No. 1442, for improvements said to have been located near Tabernilla close to the Frijoles Grande River, is hereby dismissed for the reason that the evidence submitted to the commission does not justify an award being made.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule of dismissal No. 147, docket No. 1434, October 21, 1914. In the matter of the claim of James Palmer, for property near Tabernilla—With reference to the claim of James Palmer for improvements which were located in the Valley of the Chagres River, near Tabernilla, the evidence before the commission is that a previous payment has been made. A careful examination has been made by the commission of all cases in which payments have been reported and the commission has reached the conclusion that the claimant, James Palmer, has no property for which an award could be sought from this commission which is not covered by the previous payment hereinafter noted:

Palmer, James, docket No. 1434—Payment of the Disbursing Officer in January, 1912 to James Palmer and Susan Bell, voucher No. 18567, for the purchase of houses, tax numbers 1281 and 1282, and all other improvements in or near the town of Tabernilla, Canal Zone, which it became necessary to destroy by reason of the work of the Atlantic Division in clearing the land to be covered by the waters of Gatun Lake.

In view of the payment herein noted, no claim against the United States of America can be recognized by the Joint Land Commission, and the claim of James Palmer is accordingly dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule of dismissal No. 148, docket numbers as shown, October 23, 1914. In the matter of sundry claims—With reference to the claims for improvements of the persons hereinafter named, the evidence before the commission is that previous payments have been made. A careful examination has been made of all cases in which payment has been reported, and the commission has reached the conclusion that the claimants have no property for which an award could be sought from this commission which is not covered by the previous payments hereinafter noted:

Villaverde, Heriberto, docket No. 1555, for the settlement of all rights, claim, or interest in all growing crops, fruit trees, buildings, and of all other improvements of every kind, and all other rights claimed in land located on the estate of Mamey Y Culo Seco, east bank, near Frijoles, under award of the Joint Land Commission dated July 3, 1913, voucher No. 25901.

Mondello, Clementina, docket No. 390, for house, tax number 1259, and all other improvements in or near the town of Tabernilla, Canal Zone, which it became necessary to destroy by reason of the work of the Atlantic Division, clearing the land to be covered by the waters of Gatun Lake, payment by the Disbursing Officer under date of January, 1912, voucher No. 1854.

In view of the payments herein noted, no claim against the United States of America can be recognized by the Joint Land Commission, and these claims are accordingly hereby dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

OFFICIAL CIRCULARS.

Landscape Architect's Work.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., October 13, 1914.

CIRCULAR No. 660-22:

Effective November 1, 1914, the work in Balboa under the Landscape Architect will be transferred to the Division of Municipal Engineering.

GEO. W. GOETHALS,
Governor.

Hospital Rates for Families of Employes Receiving Between \$50 and \$100.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., October 16, 1914.

CIRCULAR No. 618-4 (Amending Circular No. 618 Revised):

Effective this date, a charge of \$1 per day will be made for ordinary care and treatment in hospital wards, for members of families of employes receiving more than \$50 and not over \$100 per month, instead of the former rate of \$1.50 for male and \$2.50 for female, as published in Circular No. 618-Revised.

GEO. W. GOETHALS,
Governor.

Pilotage for Vessels Passing Through Canal.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., October 21, 1914.

CIRCULAR No. 681-1 (Amending Circular No. 681):

Effective this date, the regulations concerning charges for pilotage are so far amended that, in future, when vessels enter for the purpose of passing through the Canal, and do not take on or discharge freight or passengers, but do take coal or supplies, they will not be charged for pilotage.

GEO. W. GOETHALS,
Governor.

Clothing Allowance for Employes at Corozal Farm.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., October 21, 1914.

CIRCULAR No. 625-1. (Amending Circular No. 625):

Paragraph 4 of Circular No. 625 is hereby amended to read, as follows:

Employes will be furnished bachelor quarters, and subsistence similar to that now furnished at kitchens and messes of the Supply Department. Those on the farm 20 days or more each month will be paid \$1 with which to purchase clothes or pay for laundry.

GEO. W. GOETHALS,
Governor.

Chagres River Gravel to be used in Place of Chame Sand and Ancon Rock.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., October 24, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

With the closing down of the Chame sand service, effective at once, and the closing down of Ancon quarry, effective October 31, heads of departments and divisions will arrange to use, starting in as soon as practicable, run-of-bank Chagres River gravel to meet their requirements for concrete and for other uses in which sand and broken stone have heretofore been utilized. For work of a special or of an important character, sand and Ancon quarry rock may be used as heretofore. As soon as the new screening outfit has been installed on the Chagres River, it will be possible to deliver Chagres River sand as well as screened gravel.

GEO. W. GOETHALS,
Governor.

Duties of Head of Property and Requisition Bureau.

THE PANAMA CANAL,
OFFICE OF EXECUTIVE SECRETARY.

BALBOA HEIGHTS, C. Z., October 21, 1914.

All concerned:

Effective October 22, 1914, Mr. H. H. Hammer, as head of the Property and Requisition Bureau, Executive Office, is placed in charge of the work of recording and accounting for the property charged to all accountable officials of The Panama Canal and Panama railroad.

The present general system of property accounting will be continued, but the methods of accomplishing the desired ends and the force to perform the work will be under the control of the head of the bureau.

He will also assist and direct those in custody of property in proper methods of caring for the property in their charge.

He will also prepare all work requests and requisitions for the offices in the Administration Building and

be prepared, on demand, to give information concerning same at any time.

C. A. McILVAINE,
Executive Secretary.

Approved:
GEO. W. GOETHALS,
Governor.

Connections for Steamers from Las Cascadas Branch.

THE PANAMA CANAL,
PANAMA RAILROAD COMPANY,

OFFICE, SUPT. OF RAILROAD TRANSPORTATION,
BALBOA HEIGHTS, C. Z., October 22, 1914.

TRANSPORTATION BULLETIN No. 94:

All concerned—Effective at once, it will be necessary for passengers on the Las Cascadas branch who sail on Panama railroad steamers, or other steamers, from Cristobal, to check their baggage the night before date of sailing. And in view of the fact that the train which formerly left Las Cascadas at 10.45 a. m., has been discontinued, passengers will necessarily have to use train No. 31, which leaves Las Cascadas at 7 a. m., connecting at Pedro Miguel with train No. 4, which leaves Panama at 7.10 a. m.

All concerned will please be governed accordingly.

F. R. BLUNT,
Superintendent of Railroad Transportation.

Approved:
C. H. MOTSETT,
Superintendent.

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 308, on Wednesday, November 4, 1914, beginning promptly at 2 p. m., for persons desiring the following classes of licenses: Pilot, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa, at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

By direction of the chairman of the board.
F. M. NIXON,
Recorder, Board of Local Inspectors.

Proposals for Clearing Trails.

THE PANAMA CANAL,
OFFICE OF THE CHIEF QUARTERMASTER.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, until November 25, 1914, at 3 p. m., and then opened for:

Completely cutting to within three inches of the ground all growth and burning all material so cut, over an area of 68 miles of trail 20 feet wide, situated in various parts of the Canal Zone. The general location of this work will be shown on maps in the office of the Assistant Engineer, Division of Fortifications, between 2 and 5 p. m., November 14. This work will be done in January and February, 1915. All bids should be for a lump sum for the entire job.

Bids must be accompanied by cash certified check, or post-office money order for five per cent of the amount bid.

Form of contract and bond, including specifications may be obtained on application to this office.

The Government reserves the right to reject all bids. Bids should be marked "Proposal for clearing trails."

W. R. GROVE,
Chief Quartermaster.

Proposals for Clearing Land Defenses.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until

3 p. m., November 25, 1914, and then opened for:

Cutting to within six inches of the ground all growth and burning all material so cut, over an area of 3,075 acres, more or less, situated near Pedro Miguel, Gatun, and Toro Point. One complete trip, occupying two days, viz., November 16 and 17, will be made over the whole area by a representative of the Division of Fortifications for the purpose of showing bidders the country and conditions. All bids should be in a lump sum for the entire job. This work will be done in January and February, 1915.

Bids must be accompanied by cash, certified check, or post-office money order for five per cent of the amount bid. Form of contract and bond, including specifications, may be obtained upon application to this office. The Government reserves the right to reject all bids. Bids should be marked "Proposals for clearing land defenses."

W. R. GROVE,
Chief Quartermaster.

Proposals for Drilling Holes, Sosa Hill Quarry.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., November 2, 1914, and then opened for:

Furnishing necessary labor for drilling and cleaning out holes ready for emplacement of explosives for blasting, including moving and connecting the drills. The necessary power and equipment will be furnished by The Panama Canal.

Form of contract and bond and complete specifications may be obtained upon application to this office. The Government reserves the right to reject all bids. Bids should be marked "Proposals for drilling holes, Sosa Hill quarry."

W. R. GROVE,
Chief Quartermaster.

Proposals for Removal of North Mast, Colon Radio Station.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, until 3 p. m., October 31, 1914, and then opened for taking down the north mast at the naval radio station, Colon, R. P.

Specifications may be obtained upon application to this office.

The Government reserves the right to reject all bids.

Bids should be marked "Proposal for removal of north mast, Colon radio station."

W. R. GROVE,
Chief Quartermaster.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., October 26, 1914.

The following insufficiently addressed letters originating in the United States and its possessions have been received at the office of the Director of Posts, and may be procured upon request of the addressees.

These containers will be charged to receiving sections by separate debit entry on binder bill on which commodity therein is charged.

When a container is transferred from one section of this depot to another, its value will be transferred to receiving section, or if sold to individuals or companies, invoices will be issued.

Retail commissaries may sell the containers at prices charged to them or return and transfer them to Depot Commissary.

Price Changes.

The following changes in prices of articles in stock at the commissary stores became effective October 23, 1914:

ARTICLE.	PRICE CHANGE.

Telegraph Office in Administration Building.

THE PANAMA CANAL,
 THE PANAMA RAILROAD COMPANY,
 OFFICE OF THE CHIEF DISPATCHER.

BALBOA HEIGHTS, C. Z., October 26, 1914.

CIRCULAR No. 49:

All concerned—Effective October 27, a telegraph office will be installed in the dispatcher's office at the Administration Building, Balboa Heights, telegraph call "MS". All business for Panama railroad officials now being handled through "D" office, and car orders being handled through dispatchers will be handled through this new office.

Commercial messages to and from the city of Panama, and Ancon, will continue to be handled through "D" office. Outgoing commercial business and also incoming for any one in the Administration Building will, of course, be handled through the new office.

The part of my circular No. 46 of October 17, which refers to messages and car orders, is hereby cancelled.

F. S. HIRSCH,
 Chief Dispatcher.

Water Turned Off in Cristobal and Colon.

THE PANAMA CANAL,
 DIVISION OF MUNICIPAL ENGINEERING.

BALBOA HEIGHTS, C. Z., October 20, 1914.

To all concerned—The water will be shut off from Colon and Cristobal from 8 a. m. till noon, on Sunday, November 1.

GEO. M. WELLS,
 Resident Engineer.

Family Quarters.

Applications for married quarters on file on September 30 were, as follows:

DISTRICT.	List	
	No. 1.	No. 2.
Ancon.....	56 (30)	399 (125)
Ancon Hospital.....	3 (3)	6
Corozal.....	4 (3)	149 (35)
Paraiso.....		189 (27)
Gatun.....		125 (3)
Cristobal.....		160 (29)
Total.....	63 (36)	1 028 (219)

NOTE—The figures in parentheses show the number of applicants already occupying regular or nonhouse-keeping family quarters at stations other than those at which applications are filed.

SHIPPING INFORMATION.

Fuel and Supplies.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel may be obtained at Balboa from the Union Oil Company at the rate of from 1,300 to 1,600 barrels per hour. The present price is \$1.30 per barrel.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock, with a minimum charge of \$3.

All standard lubricants, light and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storerooms at Cristobal and Balboa.

Subsistence supplies, including a large stock of fresh meats, vegetables, canned groceries, fruits, bakery products, etc., are available for quick delivery at either terminal. Prices are generally lower than the retail prices in the United States, and compare favorably with prices in any port of the world.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

Repairs to vessels may be made to any extent, except where the use of a large dry dock is required, or the turning of the largest crank shafts or longest line shafts.

The Government hospital service is fully equipped for the treatment of medical and surgical cases. The charge for consultation at the dispensaries is \$3; for hospital treatment, in ward, \$3 per day; in private room, \$6 per day. For American seamen, the charge for treatment in ward is \$1 per day.

Application for supplies, or for services, should be made to the captain of the port, Cristobal or Balboa.

Mail, other than registered, and cablegrams for men on ships which will call at the terminal ports, or pass through the Canal, may be addressed in care of the captains of the ports, if desired; or may be addressed to Cristobal or Balboa, general delivery, with the name of the vessel written plainly; or, in case the vessel has a known representative on the Isthmus in care of such representative.

Tide Predictions.

Panama tide predictions for the next six weeks are given in the following table:

OCTOBER.				
DATE.	Time and height of high and low water.			
Wed., Oct. 28.....	3.8	11.8	3.3	12.1
Thurs., Oct. 29.....	5:12	11:34	17:40

Wed., Dec. 9.....	7:30	14:11	20:18

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Goedetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used in Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47.

Rainfall from October 1 to 24, 1914, Inclusive.

Sailings of Vessels in Regular Service With the Isthmus.

REGULAR CONNECTIONS WITH PACIFIC PORTS.
The Pacific Mail has sailings about every 10 days between Balboa and San Francisco, with calls at Puntarenas, San Juan del Sur, Corinto, Amapala, La Union, La Libertad, Acajutla, San José de Guatemala, Champerico, Ocos Salina Cruz, Acapulco, Manzanillo, San

Bias, and Mazatlan. The company also operates a direct line between Balboa and San Francisco, with sailings about every six weeks; and a Panama-Central America line, between Balboa and Ocos, making one round voyage monthly, and calling at all the ports abovenamed between Balboa and Ocos.

The Luckenbach Steamship Company is operating a 10-day service between New York and San Francisco, calling at East San Pedro both ways. Its vessels handle cargo at Balboa when sufficient business offers.

The American-Hawaiian lines between New York and San Francisco, and New York and Honolulu, discharge and take on cargo at Balboa when sufficient business offers. At present, a vessel of this company passes through the Canal about every third day.

Grace and Company maintain an irregular service between New York and San Francisco, calling at way ports. Sailings are made about every 12 days. A vessel plying between San Francisco and Valparaiso, calling at way ports makes a round voyage about every 10 weeks.

The Peruvian Steamship Company maintains a weekly service between Balboa and Callao, with calls at Guayaquil, Payta, Eten, Pacasmayo, and Salaverry. Every second voyage includes Mollendo.

The South American Steamship Company's vessels sail on alternate Mondays from Balboa for Valparaiso calling at Paíta, Eten, Pacasmayo, Salaverry, Callao, Mollendo, Arica, Iquique, Antofagasta, and Coquimbo.

The Pacific Steam Navigation Company has sailings on alternate Mondays for Peru and Chile; every 10 days for Ecuador; and on alternate Mondays for Colombian and Ecuadorian ports.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro, and an additional weekly sailing to Bocas del Toro.

The Royal Mail maintains fortnightly service each way between New York and Southampton, making the following way ports: Antilla, Jamaica, Colon, Cartagena, Puerto Colombia, Puerto Cabello, Trinidad, Barbados, the Azores, and Cherbourg. Its vessels all arrive at Colon on Sundays and sail on Tuesdays.

The Compagnie Générale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Carupano, Trinidad, Martinique, Guadeloupe, and Santander; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Carupano, Trinidad, and Martinique.

The Italian Steam Navigation Company, "La Vecioce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curaçao, Puerto Cabello, and Barcelona.

The Compañía Trasatlantica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curaçao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls en route, the vessels sail from Genoa on the 8th day of each month.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line; vessels sailing about every six days, direct; between Colon and New York by the United Fruit Company and the Royal Mail Company, sailings via Kingston weekly and fortnightly, respectively; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

MOVEMENTS OF OCEAN VESSELS.

(Week ending at noon October 25.)

THROUGH THE CANAL—ATLANTIC TO PACIFIC.

Table with columns: Date, Vessel, Nationality, Line, From, For, CARGO (Nature, Tons), CANAL TONNAGE (Gross, Net). Lists various vessels like Shimosa, Crown of Toledo, Lord Antrim, etc.

THROUGH THE CANAL—PACIFIC TO ATLANTIC.

Table with columns: Date, Vessel, Nationality, Line, From, For, CARGO (Nature, Tons), CANAL TONNAGE (Gross, Net). Lists various vessels like Kronprinzessin, Margareta, Washingtonian, etc.

EXPECTED ARRIVALS FOR TRANSIT FROM ATLANTIC.

Table with columns: Date, Vessel, Line, From. Lists expected arrivals like City of Naples, Arlington Court, Isabella, etc.

EXPECTED ARRIVALS FOR TRANSIT FROM PACIFIC.

Table with columns: Date, Vessel, Line, From. Lists expected arrivals like George Fenwick, Naka, Aricanian, etc.

PORT OF CRISTOBAL.

Table with columns: Date, Vessels, Line, From (Arrivals) and Date, Vessels, Line, For (Departures). Lists arrivals and departures from Cristobal.

*EXPECTED ARRIVALS.

Table with columns: Date, Vessel, Line, From. Lists expected arrivals like Tagus, Dronning Olga, Centurian, etc.

*EXPECTED DEPARTURES.

Table with columns: Date, Vessel, Line, For. Lists expected departures like Falk, Centurian, Nubian, etc.

*Other than vessels using the Canal, United Fruit Company's regular vessels, and vessels in regular service with the United States.

PORT OF BALBOA.

Table with columns: Date, Vessels, Line, From (Arrivals) and Date, Vessels, Line, For (Departures). Lists arrivals and departures from Balboa.

*EXPECTED ARRIVALS.

Table with columns: Date, Vessel, Line, From. Lists expected arrivals like Manavi, Tricolor, Chile, etc.

*EXPECTED DEPARTURES.

Table with columns: Date, Vessel, Line, For. Lists expected departures like Limari, Mantaro, Pennsylvania, etc.

*Other than vessels using the Canal.

(Continued from Page 99.)

COLON TO NEW ORLEANS.

Table with columns: Sails, Arrives, Vessel, Date. Lists sailing schedules for Colon to New Orleans.

†Will carry mail for Alabama, Arkansas, Louisiana, Mississippi, and Texas.

Irregular services between Cristobal and Gulf ports of the United States, with way calls at Central American and Mexican ports, are maintained by the Leyland and Harrison Lines, sailings about every fortnight, and the Seeborg Line, sailings about every 18 days.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone,

Isthmus of Panama

No communication either for publication or requesting information will receive attention unless signed with the full name and address of the writer.

NOTES OF PROGRESS.

Statement of Canal Tolls to November 1.

Tolls collected on tonnage through the Canal from August 15, the date of its opening, to November 1, amounted to \$735,182.32. To this should be added tolls on freight transported through the Canal prior to August 15 on barges operated by the Panama railroad, which amounted to \$11,610.69, making the grand total of tolls collected to November 1, \$746,793.01. The collections in detail were, as follows:

	Amount.
Prior to August 15.....	\$11,610.69
August 15 to August 31.....	88,232.60
September.....	269,863.00
October.....	377,086.72
Total.....	\$746,793.01

The collections in October show an increase over the previous month of \$107,223.72, or about 40 per cent.

The number of vessels that passed through the Canal northward during October was 40; number southbound, 45, including three launches.

Second Suspension of Canal Traffic.

Further movement at the base of the New Culebraside on Saturday, October 31, caused a second suspension of Canal traffic, which lasted until 2 p. m., Wednesday, November 4. After the clearing of the channel at this point on October 20, the dredges continued their operations there, widening and deepening the channel, but the second movement of the slide was sufficient to overcome the headway which had been made. Material was pushed forward into the channel, and at the same time upward from the bottom. The *Arizonan*, on the way from Pedro Miguel Lock to Gamboa, grounded opposite the slide on October 31, and was pulled off by tugs and returned to Pedro Miguel. All traffic past the slide was suspended, but vessels seeking transit were moored at Pedro Miguel Lock, Gamboa, and in the anchorage basin south of Gatun Locks, in readiness to be put through at the earliest practicable time. Since the resumption of traffic Wednesday afternoon, northbound vessels are being passed from Pedro

Miguel Lock to Gatun Lake; as soon as they are out of the way the transit of southbound vessels is to be resumed.

Award of Contract for Balboa Heights Station.

Contract for furnishing all labor necessary to erect and finish completely the passenger station of the Panama railroad at Balboa Heights, with waiting platforms and two public comfort stations, has been awarded to Eladio Lasso, for \$19,567.35. The contractor agrees to have the work acceptably completed within 140 days after receiving notice to begin work. He has been notified to begin not later than November 15.

Arrival of Lock Entrance Caisson.

The floating lock entrance caisson No. 1 arrived at Balboa on Thursday, October 29, in tow of the tug *Hercules*, from San Francisco. It has since been moored alongside the concrete wharf at Balboa, undergoing repairs and adjustments preliminary to the final test, which is to be made at the south end of Miraflores Locks. The voyage from San Francisco consumed 43 days, during the greater part of which unusually rough weather was encountered; this, in connection with the unusual height of the caisson, as compared to its length, made its towing difficult and hazardous. The seamen stationed aboard the caisson deserted at the first port of call, declaring that they would not risk their lives further, and the voyage was completed without a crew on the tow. The *Hercules* sailed from Balboa on October 31, on its return voyage to San Francisco.

Task Work on New Cristobal Pier.

The employment of laborers on the "Task" plan has been extended to include several features of the work on new pier No. 7 at Cristobal, and a scale of prices for such work has been authorized. The clamping and drifting of the caissons will be performed by a team of five men, three men to do the clamping, and two to do the drifting, at the rate of \$1.50 per section. The work of bolting the caissons will be performed by the same team as the one doing the riveting, which consists of three men. The approved price for riveting is \$1 per section, and for bolting 10 cents per section, making a total cost of this work per section \$1.10. The rate fixed for excavating the 6-foot cylinders is \$1 per lineal foot; for excavating the frustrums below the cylinders the price will be \$2 per cubic yard. This work is to be accomplished by a team of two men. The material to be excavated from the cylinders consists of clay, soft rock, and hard rock; the material in the frustrums below the cylinders is mostly hard rock. The price for unloading cement, in sacks, from box cars has been fixed at 20 cents per 100 sacks, the work to be performed by one man; the work of tying the empty sacks in bundles will be paid for at the rate of 10 cents per bundle of 100, to be handled by one man.

COTTON THROUGH CANAL.

First Cargoes of Southern Staple to Orient.—Saving by This Route.

The steamship *Penrith Castle*, which passed through the Canal on October 22-23, en route from Galveston to Yokohama with a cargo of 3,270 tons of cotton, was the first vessel to use the Canal in this traffic, which will, in all probability, become important. The importation of American cotton into Japan amounted to \$11,326,819 in value, in 1911, and had increased to \$32,573,054 in 1913, which amounts, at 10 cents per pound, to 325,730,540 pounds, or 162,865 tons. It is predicted that the importation in 1914 will be increased, rather than diminished, by the effects of the European war.

By using the Panama Canal, the *Penrith Castle* will save at least 5,280 nautical miles of travel. The distance from Galveston to Yokohama, via the Panama Canal, San Francisco, and the Great Circle, is 9,294 miles; via the Suez Canal and most direct sailing, about 14,575 miles. Rating the vessel's speed at 10 knots, the time saving will approximate 22 days on the outward voyage alone.

The *Penrith Castle* is 361 feet long, 42.6 feet in the beam, with a mean draft of 17.6 feet, and with a net registered tonnage of 2,337, Lloyds' rules, and is propelled by a 3-cylinder, triple expansion engine, with 24, 40, and 67-inch cylinders, and 45-inch stroke. The crew numbers 28 officers, and men. If its operating expenses on this route be rated at \$230 per day, the saving in cost for the outward voyage alone will amount to \$5,060.

The tolls collected, \$1.20 per ton on 3,418 tons, (including 111 tons of deck load) or \$4,101.60, should not be deducted from this saving, as an equivalent amount would have been collected for the use of the Suez route. If the vessel had elected to go by way of the Strait of Magellan, it would have had to travel 5,777 more miles than by the Panama Canal; this amounts to approximately 24½ more days at sea than required, or a cost of \$5,635. Subtracting the amount of Panama Canal tolls from this leaves a balance of \$1,533.40 in favor of the Canal route. The Cape of Good Hope route would have required about 7,700 more miles of travel than this route, or over 32 extra days at sea, which would cost at least \$3,258.40 more than the use of the Canal, on the basis of the figures given above. A second vessel carrying cotton to Japan made the transit of the Canal on October 30. This was the *City of Naples*, en route from Galveston to Yokohama, and carrying a cargo of 4,044 tons of cotton, and 1,000 tons of pig iron.

Work on New Canal Colliers Ahead of Schedule.

The progress report for the month ending September 30, on the new Canal colliers *Achilles* and *Ulysses*, now under construction at the yards of the contractor at Sparrow's Point, Md., shows that the estimated degree

of completion of the *Achilles*, as of that date, under the hull specifications, including equipment and installation of ordnance, was 45.1 per cent, of which 35.4 per cent was represented by work on the vessel, and 9.7 per cent by material on hand. The elapsed time since the date of the contract is 5.6 months; therefore, it is estimated that work on the vessel is 12 months ahead of contract time.

The estimated degree of completion of the *Ulysses*, under the hull specifications, including equipment and installation of ordnance, on September 30, was 50.9 per cent, of which 43.7 per cent represented work on the vessel, and 7.2 per cent material on hand. The elapsed time since the date of the contract is 5.6 months; therefore, it is estimated that the work is 1.8 months ahead of contract time. So far as can be judged at present, the progress made on the machinery is such that the completion of the vessels will not be retarded thereby.

Termination of Service.

All concerned—The following instructions will govern in the preparation of papers incident to terminating the services of employes:

1. Termination of service papers will be prepared in the Personnel Bureau for all divisions, with the exception of the Dredging and Mechanical Divisions, which will handle their personnel papers as formerly, and proper information should be furnished the organization clerks.

2. (a) The proper organization clerk in the Personnel Bureau should be informed of the last day upon which the employe will actually perform service. This date should not be changed unless absolutely necessary, and then only after first notifying the organization clerk, as the papers he prepares are based on the information he receives from the field, and any subsequent change without his knowledge nullifies them.

(b) Terminations should be made effective only at the close of business, except in case of immediate discharge for cause.

3. If the amount of leave due an employe is unknown, it can be ascertained by telephoning the leave clerk in the Personnel Bureau (Telephone 168, Balboa Heights.)

4. (a) If the amount of leave due an employe is five (5) days, or less, report of absence (form FC 484) should be prepared, effective on the next working period after the employe has ceased work, and immediately forwarded to the chief timekeeper, remark being made thereon showing cause for termination of service.

(b) If the amount of leave due an employe is in excess of five (5) days, request for leave should be prepared on form PC 194-4, effective on the next working period after the employe has ceased work, and immediately forwarded to the Personnel Bureau. All information required on this form should be shown.

5. In all cases of termination of service it is necessary that the Personnel Bureau be given the following information:

- Steamship transportation desired.
- Workmanship and conduct ratings.
- Reasons for termination of service.
- Address on Isthmus.
- Address in United States.
- Last period actually worked.
- Is service letter desired?

6. The organization work of the various departments is being handled by the following clerks, and telephone communications

between the field offices and the Personnel Bureau should be made direct with these clerks:

Mr. Graff, Supply Department, Telephone 211.

Mr. Fisher, lock operation, canal transportation, electrical, municipal engineering, fortifications, general construction, Telephone 294.

Mr. Cain, health, accounting, Executive Office, dredging, mechanical, terminal construction, Telephone 280.

Mr. Becker, Panama Railroad Company, Telephone 280. C. A. McILVAINE,

Executive Secretary.

BALBOA HEIGHTS, C. Z., October 20, 1914.

Red Cross Benefit Ball to be Held November 7.

All concerned: It has been decided to hold the Red Cross benefit ball on Saturday evening, November 7, beginning at nine o'clock, as it was found that the date previously adopted, Monday, November 2, is a day held in great veneration by the members of the Catholic Church, and, as the members of this church have given the Red Cross loyal support, it is desired to avoid any action that might in any way be misconstrued.

For the Executive Committee.

C. A. McILVAINE, *Chairman.*

BALBOA HEIGHTS, October 30, 1914.

Inhabitants of Limon Village Receive Considerate Treatment.

The village of Limon, situated on an island in Gatun Lake, forms a part of the area to be taken over by the United States for Canal purposes. There are about 75 people in the village and vicinity living on small islands. Settlement has been made with about 50 of them, not only for their homes, but for their fields and improvements they have on the islands and on the mainland below the 100-foot contour line.

The inhabitants have been advised that they may continue in undisturbed possession of the property until the beginning of the dry season, when an opportunity will be afforded

them of removing the material in their houses to the mainland. In case they desire to locate a new townsite on the mainland, in the same general vicinity, and above the 100-foot contour line, the services of the Canal engineers will be loaned them for the purpose.

Report of Board on New Ancon Hospital.

The board, consisting of Lieut.-Col. G. D. Deshon, Capt. R. E. Wood, and C. M. Hitt, appointed by the Governor to consider a site for the permanent hospital at Ancon, has submitted its report and recommendations, which have been approved. The board found but two available sites, one near the entrance to the present hospital reservation, now occupied by the residence of the hospital superintendent and others on his staff; and the other on the site of the present wards, Nos. 1, 2, 3, 4, and 5. The latter site was recommended as the best for the purpose. The project as recommended calls for five groups of ward buildings erected on the edge of the hill, with a kitchen and dining room, and administration and out-patients buildings in the center of the group. It is planned to have the admitting office and dispensary in a detached building farther down the hill. The board considered that the above would comprise all of the necessary new construction, with the exception of quarters. Later, it might be thought advisable to build a new nurses' home on the site of present wards Nos. 11 and 12. The board further recommended that the construction planned be completed in a period of five years. An inspection has shown that the present buildings will be good for some time to come. No steps can be taken toward carrying out the above recommendations until the money has been appropriated by Congress therefor.

Increased School Accommodations at Culebra.

It has been found necessary to increase the accommodations for white schoolchildren at Culebra by using a part of the upper floor of the old administration building. Since school opened it has been using the rooms on the lower floor of this building, formerly occupied

by the Supply Department, and by the drafting force of the Division of Operation and Maintenance, but due to the unexpectedly large enrollment they have become overcrowded. The enrollment on the opening day of this year was 84, as compared with 10 in June last year. The entire school arrangement at Culebra is temporary, but it will probably have to be continued for the greater part of the present term.

Notice to Employees.

The chiefs of clinic of Ancon Hospital report that many employes and members of their families come to the hospital for office consultations without having first consulted their own district physician. This custom has grown until it constitutes an abuse. Inasmuch as The Panama Canal provides physicians in each district for the express purpose of examining and treating employes and their families who are not in need of hospital care, these physicians should be consulted before applying at the out-patients department of the hospitals, and patients will ordinarily be referred to the chiefs of clinic when, in the opinion of the district physicians this is necessary, by note from the latter physician.

Ordinarily, return transportation will not be issued by the chiefs of clinic, except to those patients who have a proper request from district physicians or appointment card from the clinic. CHAS. F. MASON,

Approved: Chief Health Officer.
GEO. W. GOETHALS,
Governor.

BALBOA HEIGHTS, C. Z., Oct. 30, 1914.

Campaign of Rat Killing at the Wharves.

As part of the precautions against the introduction of plague on the Isthmus, vessels coming to the Canal ports from plague infected ports are being treated in the harbors according to the quarantine regulations set forth in circular No. 626. On docking, they are required to breast off at least six feet from the wharf or pier; to provide all braces and lines with approved ratguards, and to keep their gang planks raised at night. In addition, the forces of the Panama railroad in charge of the wharves are keeping up a campaign for destroying the rats already infesting the wharves. At Balboa, a gang of seven men is engaged regularly in trapping and poisoning rats and destroying their nests, and a smaller force is similarly engaged at Cristobal and Colon. The principal wharf now in use at Balboa, the French steel pier, and the old pile piers at Colon, were built before the development of modern ideas of ratproof construction, and afford many places for hiding and nesting. Although the new terminal wharves were built according to the most advanced practice with respect to rats, it is found that they harbor a small number.

School Boys Employed in Commissaries.

As a part of the industrial training plan, started under the direction of the Supervisor of Industrial Training in the Canal Zone schools, arrangements have been made to employ seven high school boys a part of their time in the commissary stores.

Died.

EVANS—At Ancon Hospital, November 3, Mrs. Mary E. Evans, wife of W. E. Evans of Cristobal.

CANAL WORK IN SEPTEMBER.

Monthly Report of the Governor to the Secretary of War.

BALBOA HEIGHTS, C. Z.,

October 26, 1914.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of September, 1914:

Department of Operation and Maintenance. WORK UNDER ENGINEER OF MAINTENANCE.

Lock construction and maintenance—Five towing locomotives were received, making a total of 35 to the end of the month. The transformer rooms at Miraflores were completed and this completes all transformer rooms for the locks. The mechanical and electrical installation of chain fender machines for all locks is about 97 per cent completed. Twenty-four fender chains have been ordered, of which seven have been installed at Gatun and three at Pedro Miguel.

The floating caisson in tow of the tug *Hercules* left San Francisco on September 16, and is expected to arrive at Balboa during the last week of October.

Sixty-five lockages were made during September at Gatun, 65 at Pedro Miguel, and 63 at Miraflores. There were 54 through commercial lockages consisting of 56 seagoing vessels.

Municipal engineering—In addition to the maintenance work in both the north and south districts, the Division of Municipal Engineering began construction of the permanent fuel oil handling plant at the Atlantic entrance and the preparation of site for the new quarantine station at the Pacific entrance. Construction of the new waterworks for Panama and the southern district was continued. Cast iron pipe was received for the Gamboa-Miraflores pipeline, and several thousand feet of rock trench for the line were excavated.

Meteorology and hydrography—The rainfall for the month of September was generally above the normal, being heaviest over the upper Chagres River basin and along the Atlantic coast, monthly totals ranging from 6.38 at Miraflores, to 28.92 inches at Indio on the upper Chagres. The maximum precipitation recorded in any one day was 3.39 inches at Trinidad on the 16th. The average rainfall over the Chagres River basin figures 33 per cent above normal—15.97 inches against a 14-year average of 12.02 inches.

Division of Terminal Construction.

PACIFIC TERMINALS.

Shops—At Balboa shops, the contractor completed the erection of steel rolling doors. The addition of a paint grinding plant, and of a 10-ton crane to serve the 150-ton riveter was authorized.

Dry dock—Design work on the dry dock and entrance basin was advanced. Construction included excavation of 13,881 cubic yards from the north wall and the completion of excavation at the head wall as far around on the south side as the axis line of the dock. A plant, consisting of four $\frac{1}{2}$ -yard mixers, and locomotive cranes for placing, laid 15,295 cubic yards of concrete. About 900 feet of the south wall has been brought up to elevation -30, and some of the monoliths to elevation -20.5. At elevation -39, the wall was built up in alternate monoliths 60 feet long, each monolith being separated from the adjacent monolith by an open key four feet by four feet, which will be filled later. Expanded metal has been used on the east and west

edges of all these keys to insure watertightness. Foundations were prepared for the north wall of the entrance pier which will form the south wall of the proposed dry dock No. 2. The rock exposed varies from hard andesite to a conglomerate of boulders embedded in rotten rock, which overlies the hard, yellow seamy rock. Preparations were made for putting in rail anchorages, and the mixing plant was made ready for laying of concrete.

Coal pockets—Rock fill was placed around the runway piers in the west area in the coal pocket, and 114 cubic yards of concrete were placed.

Quay wall and pier—Excavation in the quay wall, Section d-e-f, was easier than in previous months, because it was out in the water and free from obstruction. The total amount excavated from cylinders was 537 cubic yards, 80 per cent of which was rock. All of the cylinders in Section e-f were on rock at the end of the month, and 1,771 cubic yards of concrete had been placed as filler. The labor cost for mixing concrete was materially reduced.

The laying of brick on pier No. 1 was retarded by wet weather, but 56,052 square feet were laid and grouted.

Fuel oil plants—High tides retarded the work of placing cylinders for the fuel oil handling plant. In one place, a large part of the false work built to support the 60-foot cylinders was torn out. Rock was encountered in the cylinders at approximately 60 feet below mean sealevel.

Quarries—At Sosa Hill, three shovels were operated, and 53,557 cubic yards were excavated. Of this amount, 37,763 cubic yards consisted of rock.

At Ancon quarry, 47,565 cubic yards of rock were crushed.

ATLANTIC TERMINALS.

East breakwater—The construction of trestle for the east breakwater fill was continued. The dry fill was begun on September 16, and the wet fill on September 22. The total fill in place at the end of the month measured 29,586 cubic yards.

Coaling plant—The filling of caissons under the reloader wharf was begun on September 18. The concrete piers for viaduct posts on the east side, and the additional piers for jack supports for the bridge trucks were completed. The wet fill necessary to bring the area at the south end of the coal storage up to 10 feet above sealevel, and that back of the west bridge track wall, were completed. A lack of caisson material retarded the work. One thousand two hundred and sixty feet of cylinders were borrowed from other parts of the work and placed in use. A concrete cylinder was set under the south end of the unloader wharf on September 4, and at the end of the month was resting on rock, having penetrated 34 feet of coral rock and sand. No difficulty was experienced in sinking the cylinder, the conditions appearing to be more favorable than at Balboa where the material is stiff clay and sand. A task work system for several of the operations connected with the sinking of caissons was approved, and the work will be begun on October 1.

FLOATING CRANES.

At the end of the last month, the jib for the *Ajax* had been completed preparatory to floating it over the lock chamber. It was lowered on September 28 upon the roller supports. The pressure at the head roller was such that

the bottom angles of the lower chord were bent at the line of contact. The work was suspended, and at the end of the month the alterations had not been completed.

During the month, the installation of machinery in the winch house on the crane *Ajax* was completed, except the driving mechanism for the storage drums. All the electrical connections have been made, some, however, are only temporary. Steam was raised in the boilers on the 21st, and the power plant unit and exciter unit were run without load for three days, in order to dry out the generators, after which the main hoist machinery was allowed to run light for eight hours. It is planned to test the luffing mechanism at the beginning of next month, and after operating successfully, the crosshead will be run to the top and the connecting links will be pinned to the same. The crane will then be ready for the attachment of the jib.

On the jib for the *Hercules*, one riveting gang is completing the work, and it is thought that in one week all the riveting on this jib will be finished, when arrangements can be started to prepare the jib for attachment to the crane structure.

LANDSCAPE ARCHITECT.

A general plan was prepared for the terraces in front of and at the sides of the Administration Building at Balboa Heights. The laying of concrete for the carriage turn and other municipal work at Balboa Heights was done.

Dredging Division.

The status of dredging on September 30 was, as follows:

LOCATION.	September excavation. Cu. yds.	Remaining Sept. 30. Cu. yds.
Miraflores Locks to Pacific.	108,189	1,392,357
Miraflores Lake.....	306,434
Culebra Cut.....	376,177	3,662,231
Gatun Lake.....	51,000
Gatun Locks to Atlantic.....	55,621	387,886
Total Canal prism.....	539,987	5,799,908
Balboa terminals.....	282,796
Atlantic terminals.....	337,287
Gravel.....	36,700
Sand.....	16,200
Grand total.....	1,212,970

A new slide developed on the east bank of Culebra Cut allowing the Obispo Diversion to flow into the Canal. About 60,000 cubic yards of rock moved into the prism.

The hydraulic grader surfaced an area of 13,000 square yards of the banks preparatory to sowing them with Bermuda grass.

The destruction of water hyacinths was continued; 15,000 square yards of plants were poisoned and 2,680 square yards were pulled and piled on the bank. The greater part of the work was in the Obispo River, which is choked with lettuce and grass with hyacinths scattered throughout. The whole area is being covered, in order that all the hyacinths may be destroyed.

Mechanical Division.

The general character of the work performed was the same as in the previous months, with a further reduction in volume resulting in a decrease in force of 81 gold roll and 94 silver roll employes. Night shifts were taken off in the machine and blacksmith shops at Balboa, and in the machine shop at Cristobal, but night work was continued in the boiler shops at both places on account of the urgent necessity of supplying caisson cylinders.

Shop orders authorized during the month numbered 841; those left over from previous

months, 431; those completed during September, 812; carried forward into October, 460. The output of the foundry was 220,701 pounds of iron; 83,360 pounds of steel, and 17,035 pounds of brass. Hostling was done on 4,989 pieces of equipment. Shop repairs were made on 1,497 cars, and field repairs on 4,850.

Department of Canal Transportation.

Fifty-two ships passed through the Canal in September, 27 southbound and 35 northbound. Collections for tolls amounted to \$263,220; for pilotage, \$2,835; launch service, \$36.30, or a total of \$266,091.30. From the number of Canal certificates issued and the amount of correspondence with relation to the navigation, it is judged that there will be a decided increase in traffic in the near future. The training of pilots, and of the forces at the locks, has materially reduced the time of transit.

Twenty-one vessels were admeasured, 34 inspected to see that their certificates conform to the rules, and seven were remeasured. Tables appended to this report (*) show the business at the Atlantic and Pacific entrances, and through the Canal, during September. The Auditor is now at work on a statistical statement, which is designed to give in brief form the details of Canal business.

Supply Department.

The force report for the last Wednesday in September showed a total of 28,199 employes of The Panama Canal and Panama Railroad Company, of whom 4,288 were white Americans and 23,911 were laborers. Of the latter, approximately 1,100 were Europeans, and the balance West Indian negroes. The occupants of government quarters numbered 7,223 white Americans, of whom 4,229 were men, 1,489 women, and 1,505 children; 938 Europeans, of whom 832 were men, 35 women, and 71 children; 8,649 West Indians, of whom 5,801 were men, 1,187 women, and 1,661 children. The total force was reduced 684; the force of white Americans 241, and of laborers 443, during the month.

Congestion in family quarters in Ancon and Balboa continued, due to the removal from Culebra and Empire of the administrative offices. Practically all bachelors have been transferred from Culebra, and the quarters formerly occupied by them have been converted into nonhousekeeping quarters for families who are living in specially assigned houses at Empire. Rent is charged for all these quarters, as well as for regular quarters at Culebra especially assigned. The applications for assignment to rented quarters have been far in excess of the number of quarters available.

Buildings—The removal of the administrative forces to the new Administration Building at Balboa Heights was completed during this month. Gatun substation was completed. Work was begun on the medical storehouse at Ancon, and on the dairy farm buildings at Corozal. Plans and specifications were prepared for the new railroad station at Balboa Heights, which is to be constructed by contract.

Material and supplies—The value of material received during the month of September was \$669,832.44. It came forward in 26 steamers, and the total weight of the cargo exclusive of lumber and piling was 14,512 tons.

*The tables alluded to are not printed in the CANAL RECORD, as a table containing similar information was published in its issue of October 28.

Accounting Department.

The cash balance in Canal construction appropriations on September 30, was \$19,992,805.46; in the fortifications appropriations, \$4,883,856.14. The pay rolls for September, exclusive of the Panama railroad and the fortifications, amounted to \$1,119,949.60, and the fortifications roll amounted to \$52,280.42. Payments by the disbursing clerk in Washington amounted to \$1,028,133.59; by the Paymaster on the Isthmus, \$1,601,757.39. Collections on the Isthmus amounted to \$973,432.74, of which \$466,805.27 was repaid to appropriations, \$231,909.23 was trust funds, and \$274,718.24 was covered into the Treasury as miscellaneous receipts. Of the miscellaneous receipts, \$263,220 was collected on account of tolls, as compared with \$98,066.19 in August. Deposits in the amount of \$168,591.01 were made with Assistant Treasurers to be applied in payment of tolls and other charges. Revenues from Canal Zone and miscellaneous funds were \$304,412.14, and disbursements under the same heading amounted to \$355,161.86.

Health Department.

No cases of yellow fever, smallpox, or plague originated on or were brought to the Isthmus during the month. The health of employes continued good. The number of names on the rolls for the preceding month was 40,623. On this basis, the admissions to hospitals and quarters on account of illness, 1,238, gave a rate of 365.70 per thousand, as compared with 367.62 for the preceding month, and 484.12 for the corresponding month last year.

The total number of deaths from all causes was 22; eighteen from disease, or 5.31 per thousand, as compared with 7.30 per thousand for the corresponding month last year. The admission rate to hospitals and death rate for disease for black employes were 144.84 and 5.36 per thousand, respectively, as compared with 366.04 and 5.41 for white employes. The admission rate to hospitals and quarters for malaria was 64.30 per thousand for blacks, as compared with 144.25 for whites. The death rate for Americans was 9.43, as compared with 7.66 for Europeans. The admission rate to hospitals for Europeans for disease was 382.69, and for Americans, 360.85. The admission rate for malaria among Europeans was 130.18; for Americans, 63.68.

On July 31, one case of beriberi was admitted to Santo Tomas Hospital. During the month of August, two more cases were admitted, and in the month of September 16 cases. All were Panamanian adult males. Nine cases were from Chiriqui prison, five from the city of Panama, four from the city of David, and one from the city of Colon. Among the 19 cases there were five deaths. The outbreak is being carefully investigated, and a full report will be made next month.

Executive Department.

Executive Office—Incident to the concentration of administrative forces in the new Administration Building at Balboa Heights, a new system of handling administrative work was instituted in the Executive Office. The plan of each division or department head having a clerical force under his direction was abandoned, and in its place is a system by which the Executive Office does all of the administrative work for all of the departments and divisions whose heads are housed in the new Administration Building. This excludes only the Dredging and Mechanical Divisions,

the Commissary Department, and such small clerical force as must be maintained at various offices in the field. Readjustment to the new conditions had practically been effected at the end of the month. It is already evident that a great volume of work will be handled more expeditiously, and at less cost, under the new system than would have been possible under the old, where inherently there was much duplication of administrative work.

Division of Civil Affairs—Approximately double the normal business of any prior month was done by the customs service. The new customs regulations have been in force and are meeting present requirements, although further simplifications will be possible. Customs inspectors, acting as boarding officers, have begun to take orders for water, coal, commissary supplies, and to transact other miscellaneous business with vessels on behalf of the captains of the ports, and under their direction.

Administration of estates—Thirty-eight estates were settled during the month, with a total value of \$2,981.48, and 42 estates were in course of settlement.

Postal service—Postmasters remitted on account of stamp sales, second-class mail collections, and postage due collections, \$6,115.72. The money order business aggregated \$256,502.20, and the fees on this business amounted to \$1,212.90. Postal savings deposits for the month amounted to \$180,321, and the withdrawals to \$180,474. There was a balance of postal savings funds on hand at the close of the month of \$771,728. On September 8, the Executive Order authorizing the substitution of deposit money orders without fee, instead of postal savings certificates, was signed, and this system became effective October 1. The postal laws and regulations of the United States not locally inapplicable were extended to the Canal Zone on August 14.

THE CANAL RECORD—Arrangements were made for publication in **THE CANAL RECORD** of statistics of traffic through the Canal, and it is planned to devote as much space as possible to shipping news.

Police and Fire Division—Arrests during the month numbered 511, of which 496 were of males and 15 females. Sixty-nine convicts were confined in the penitentiary during the month. The cost of subsisting and guarding them was \$1,304.96, and the value of the labor performed by them was \$1,073. Two fires and one false alarm were reported during the month.

Courts—In the District Court seven civil, 43 criminal, and 23 probate cases were settled; five civil, 47 criminal, and 40 probate cases were filed; 116 cases of all kinds were pending on September 30. In the Magistrates' Courts, 26 civil and 508 criminal cases were tried.

Panama Railroad.

Cargo handled at Colon and Cristobal amounted to approximately 70,755 tons, which includes 12,000 tons of cargo rehandled on account of car shortage and necessary separations of cargo. Approximately 7,000 tons of coal were bunkered into 20 steamers during the month.

At Balboa, approximately 12,000 tons of cargo were handled from 19 ships arriving, and approximately 10,000 tons handled for 21 ships departing.

The preparation of contract drawings for pier No. 7 was continued during the month. Trestle work was continued, and about 60

per cent of the total is in place. Wash drill soundings were continued, 44 per cent of the total soundings required being completed.

Work on the duct line was continued by the telephone and signal forces, and a total of five miles was completed, making the entire line 95 per cent completed.

Respectfully submitted,
GEO. W. GOETHALS,
Governor.

Emigration from the Isthmus Continues.

The report of quarantine operations at the Atlantic and Pacific terminal ports for the month of September shows an excess of emigration over immigration of 1,155 persons, as compared with a net emigration in August of 701. The total net emigration since the exodus first began in July, 1913, has been 17,877 persons, the greater part of whom were laborers returning to their former homes on account of the closing down of Canal work.

The total number of persons embarking at the ports of Cristobal and Colon for foreign ports during September was 3,978, consisting of 1,602 cabin, and 2,376 steerage passengers. The number of persons landing from foreign ports was 1,388 cabin, and 1,169 steerage passengers. The excess of those who embarked over those who landed was 1,421.

The immigration from Europe in the steerage class has almost entirely ceased, due probably to the war, the figures for September constituting a new low record, only five deck passengers having been reported for the month. As usual, Jamaica and the other West India islands contributed a large part of the arrivals in the steerage class, 468, but the number of arrivals was approximately 25 per cent less than for August. Three hundred and eighty-three deck passengers came from the United States, 151 from Colombia, 89 from Costa Rica, and 29 from Cuba. The number of passengers arriving from the United States in steerage in September was unusually large. A total of 231 persons entered the Atlantic ports from Bocas del Toro, and 294 from other coast towns of the republic; the arrivals from Bocas del Toro were about 60 per cent less than in August. Of the arrivals at Cristobal and Colon, 1,684 were men, 617 were women, and 291 were children. The number of persons arriving "In transit," 876, shows a considerable falling off.

The number of persons arriving at the ports of Balboa and Panama from foreign ports during September was 475, consisting of 355 cabin, and 120 steerage passengers. The number of persons embarking at these ports was 209, consisting of 173 cabin, and 36 steerage passengers. The number of those who landed over those who embarked was 266. No quarantinable disease was discovered among the arrivals during the month.

Ninety-three vessels entered at the Atlantic ports, and 47 at the Pacific ports, a total of 140, as compared with 124 for the preceding month.

Joint Land Commission Calendar of Cases.

The following is a calendar of cases set for hearing by the Joint Land Commission, National Palace, Panama, for the week ending November 7:

Wednesday, November 4—Docket No. 1433, Las Cascadas Estates Company, Limited.

WILLIAM TAYLOR, Secretary.

JOINT LAND COMMISSION.

Opinion.

Opinion No. 150, docket No. 1884, October 26, 1914, in the matter of the claim of Antonio Enseñat for property located in Empire—This case came on to be heard on a motion filed herein on behalf of the claimant by his attorneys, which motion was joined in by practically all the attorneys practicing before the commission, to determine the question of the jurisdiction of the commission in claims of this class.

It is admitted by the attorneys for the claimant, Antonio Enseñat, and by the attorneys for the Government of the United States, that the Panama Railroad Company is now, and for more than half a century has been, a duly organized corporation under the laws of the State of New York, and that said railroad company, on or about the first day of July, 1907, owned certain lands in the Canal Zone in fee simple, and on said date was owning and operating a railroad across the Isthmus of Panama, known as the Panama railroad; that on said date the said Panama Railroad Company executed to the claimant a lease for a certain portion of its lands within the Canal Zone for a period of 15 years:

That said contract of lease was in writing and provided for the revocation of said lease by the said Panama Railroad Company, as is set out in Article 10 of said lease, as follows:

"Article 10. Irrespective of and in addition to any other provisions hereof, the lessor company reserves the right, hereby agreed to by the lessee, at any time to rescind and annul this agreement of lease upon 30 days' notice in writing to the lessee and thereupon all the rights of the lessee hereunder, or otherwise, shall come to an end, but in case of such termination the lessee shall be at liberty to remove within 15 days after the expiration of said 30 days any buildings or other improvements which he may have erected upon said land and which can be removed therefrom and shall be entitled to be paid by the lessor company the fair and reasonable value, at that time, of such buildings or other improvements which cannot be removed, and also for the fair and reasonable value of the then unexpired term of this agreement of lease, all such fair and reasonable value to be conclusively determined and be payable in the manner following and in such manner only:

"Each of the parties hereto shall, upon the demand of the other, appoint one arbitrator and the two so nominated shall choose and appoint a third arbitrator, and the arbitrators so constituted shall proceed to fix and determine such fair and reasonable value. If either party within 30 days of such demand fail to appoint an arbitrator, such arbitrator may be appointed by the other party to this lease. The award of such arbitrators, or a majority of them, shall be binding and conclusive upon the parties hereto, and the lessor company shall pay to the lessee and the lessee shall accept from the lessor company the sum so fixed by said arbitrators or the majority thereof, within 30 days after the rendering of the decision in full demand and satisfaction for such buildings or other improvements." It is further admitted that by Act of Congress of the United States, approved August 24, 1912, entitled, "An Act to provide for the opening, maintenance, protection, and operation of the Panama Canal, and the sanitation and government of the Canal Zone," it is provided, in Sections 1 and 3 of said Act, as follows:

"Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, that the zone of land and land under water of the width of 10 miles extending to the distance of five miles on each side of the center line of the route of the Canal now being constructed thereon, which zone begins in the Caribbean Sea three marine miles from mean low water mark and extends to and across the Isthmus of Panama into the Pacific Ocean to the distance of three marine miles from mean low water mark, excluding therefrom the cities of Panama and Colon and their adjacent harbors located within said zone, as excepted in the Treaty with the Republic of Panama dated November 18, 1903, but including all islands within said described zone, and in addition thereto the group of islands in the Bay of Panama named Perico, Naos, Culebra, and Flamenco, and lands and waters outside of said limits above described which are necessary or convenient or from time to time may become necessary or convenient for the construction, maintenance, operation, sanitation, or protection of the said Canal or of any auxiliary canals, lakes, or other works necessary or convenient for the construction, maintenance, operation, sanitation, or protection of said Canal, the use, occupancy, or control whereof were granted to the United States by the Treaty between the United States and the Republic of Panama, the ratifications of which were exchanged on the twenty-sixth day of February, 1904, shall be known and designated as the Canal Zone, and the Canal now being constructed thereon shall hereafter be known and designated as the Panama Canal. The President is authorized by treaty with the Republic of Panama to acquire any additional land or land under water not already granted, or which was excepted from the grant, that he may deem necessary for the operation, maintenance,

sanitation, or protection of the Panama Canal, and to exchange any land or land under water not deemed necessary for such purpose for other land or land under water which may be deemed necessary for such purposes, which additional land or land under water so acquired shall become part of the Canal Zone.

"Section 3. That the President is authorized to declare by Executive Order that all land and land under water within the limits of the Canal Zone is necessary for the construction, maintenance, operation, sanitation, or protection of the Panama Canal, and to extinguish, by agreement when advisable, all claims and titles of adverse claimants and occupants. Upon failure to secure by agreement title to any such parcel of land or land under water the adverse claim or occupancy shall be disposed of and title thereto secured in the United States and compensation therefor fixed and paid in the manner provided in the aforesaid Treaty with the Republic of Panama, or such modification of such Treaty as may hereafter be made."

It is further admitted that in compliance with said Act, the President of the United States of America, on the 5th day of December, 1912, issued his Executive Order, which is in words and figures following:

EXECUTIVE ORDER.

"By virtue of the authority vested in me by the Act of Congress entitled 'An Act to provide for the opening, maintenance, protection, and operation of the Panama Canal, and the sanitation and government of the Canal Zone,' approved August 24, 1912, I hereby declare that all land and land under water within the limits of the Canal Zone are necessary for the construction, maintenance, operation, protection, and sanitation of the Panama Canal, and the Chairman of the Isthmian Canal Commission is hereby directed to take possession, on behalf of the United States, of all such land and land under water; and he may extinguish, by agreement when practicable, all claims and titles of adverse claimants to the occupancy of said land and land under water."

WM. H. TAFT,

THE WHITE HOUSE,
December 5, 1912."

It is further admitted that on the fifth day of June, 1914, the Panama Railroad Company sought to cancel the aforesaid lease held by the claimant, by serving upon him the notice provided in Article 10 of said lease, which notice is, as follows:

"THE PANAMA CANAL Canal Zone LAND OFFICE.

Ancon, June 5, 1914.

A. Enseñat,
Empire.

SIR:

"Your lease for Lot 8, Block 5, village of Empire, is hereby cancelled effective June 30, 1914, as provided by the articles of the lease.

"No further rentals will be collected for periods beyond June 30, 1914, although you will be permitted to continue the occupancy of this lot until September 30, 1914, and on the day after this latter date you will be expected to remove the improvements of all and every kind from the leased property.

Respectfully,

R. S. CARLSON,
Land Agent."

It is contended by the attorneys for the claimant that claimant's right for damages is against the Government of the United States under the Treaty between the United States of America and the Republic of Panama, ratified February 26, 1904, and is, therefore, within the jurisdiction of the Joint Land Commission by reason of the fact that the claimant's lease was terminated by the Government of the United States for Canal purposes.

On the other hand, it is strongly insisted by the attorneys for the United States that said claim grew out of a contract with the Panama Railroad Company, which is a private corporation separate and distinct from the Government of the United States, and that said claim is not within the scope of said Treaty and, therefore, not cognizable by the Joint Land Commission.

Without giving any consideration to the merits of the claim involved, the Joint Land Commission in this instance has limited its consideration solely to the determination of the question of jurisdiction.

The Joint Land Commission recognizes the law to be well established that the commission has only such powers as may be conferred upon it by the Treaty of the high contracting parties, and has no jurisdiction whatever to hear and determine matters not within the provisions of said Treaty.

By Section 3 of the Act of Congress approved August 24, 1912, cited above, the President of the United States is authorized to declare by Executive Order that all land and land under water within the limits of the Canal Zone is necessary for the construction, maintenance, operation, sanitation, or protection of the Panama Canal, and to extinguish, by agreement when advisable, all claims and titles of adverse claimants and occupants, and that upon failure to secure by agreement title to any such parcel of land or land under water, the adverse claim or occupancy shall be disposed of

and title thereto secured in the United States and compensation therefor fixed and paid in the manner provided in the aforesaid Treaty with the Republic of Panama, or such modifications of said Treaty as may hereafter be made.

The President of the United States, on the fifth day of December, 1912, by his Executive Order as hereinabove set out, declared that all land and land under water within the limits of the Canal Zone are necessary for the construction, maintenance, operation, protection, and sanitation of the Panama Canal, and directed the Chairman of the Isthmian Canal Commission to take possession, on behalf of the United States, of all such land and land under water, and to extinguish, by agreement when practicable, all claims and titles of adverse claimants to the occupancy of such land and land under water.

It is a principle of law that when, under a statutory provision, lands shall be taken as shall be by proper authority declared to be requisite for any exercise of the right of eminent domain on the part of a sovereign, the date of such decision is to be considered the date of the appropriation.

By means of said Executive Order of the President of the United States, the United States *co instanti* took possession of all lands and interests in lands within the Canal Zone, and thereby expropriated all such lands and all interests in such lands.

Hence, by said Executive Order of the President of the United States, issued on the fifth day of December, 1912, all rights, interests and title to lands in the Canal Zone then owned by the Panama Railroad Company were extinguished, and the title to said lands vested in the United States, and from the moment of the issuing of said Executive Order the Panama Railroad Company ceased not only to have any interest in the lands it formerly owned in the Canal Zone but also lost all right of control and occupancy of said lands, and also ceased to have any rights whatever under the lease given to the claimant.

By the same Executive Order of the President of the United States, the leasehold of the claimant herein was also expropriated, cancelled, and terminated.

It is provided in Article 2016 of the Civil Code, in force in the Canal Zone, that the right of the lessor over the thing leased having been extinguished through a cause beyond his control, the lease shall expire even before the expiration of the term stipulated for its duration.

Furthermore, the doctrine is established in Article 2018 of said Civil Code, that in cases of expropriation by reason of public utility, if a lease shall have been granted and is still pending at the time of the expropriation, the lessee shall be entitled to damages from the nation making the expropriation.

Hence, the Panama Railroad Company had no power on the fifth day of June, 1914, over the lease which had formerly existed between it and the claimant, and could not, by any act on the part of said railroad company, terminate a leasehold interest, which had already been expropriated by the Executive Order of the President on the fifth day of December, 1912.

If, therefore, by the termination of the lease of the claimant by the expropriation on the part of the United States Government of the lands or things covered thereby, any loss or damage has accrued to the claimant, he can have no right to prosecute an action to recover for his said loss against the Panama Railroad Company. But if such lease with the Panama Railroad Company was cancelled or expropriated by the act of the United States for the sole purpose of the construction, maintenance, operation, sanitation, or protection of the Panama Canal, his remedy for damages, if he has sustained any damages thereby, must be against the Government of the United States.

By Article VI of the Treaty between the United States of America and the Republic of Panama, it was agreed between the high contracting parties that all damages caused to the owners of private land or private property of any kind by reason of the grants contained in said Treaty or by reason of the operations of the United States, its agents or employees, or by reason of the construction, maintenance, operation, sanitation, or protection of the Canal or of the works of sanitation and protection provided for in said Treaty, shall be appraised and settled by a joint commission appointed by the President of the United States and the President of the Republic of Panama, whose decisions as to such damage shall be final, and that no part of the work on said Canal or the Panama railroad or any auxiliary works relating thereto and authorized by the terms of the said Treaty shall be prevented, delayed, or impeded by or pending such proceedings to ascertain such damages.

It, therefore, follows that the Joint Land Commission as provided for in said Article VI of the Treaty between the United States of America and the Republic of Panama, ratified February 26, 1904, is the proper and only tribunal to hear and pass upon claimant's claim for damages.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE
KAGY, S. LEWIS, Commissioners.

OFFICIAL CIRCULARS.

Acting Chief Health Officer.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., October 27, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

Effective October 31, 1914, Maj. Percy M. Ashburn will act as Chief Health Officer during the temporary absence of Lieut.-Col. Charles F. Mason on official business.

GEO. W. GOETHALS,
Governor.

Railway Transportation.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., October 27, 1914.

CIRCULAR NO. 600-23:

1. Effective November 1, 1914, Mr. C. H. Motsett, superintendent of the Panama railroad, will be in charge of all rail transportation, both for the Panama Railroad Company and The Panama Canal.

2. Mr. F. R. Blunt is appointed master of transportation and will perform such duties as may be assigned by the superintendent of the Panama Railroad Company.

3. No transfer of forces need be made as a result of this order.

GEO. W. GOETHALS,
Governor, The Panama Canal.
President, The Panama Railroad Company.

Purchase of Material and Supplies.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., October 23, 1914.

CIRCULAR NO. 690:

1. Effective at once, the Chief Quartermaster is designated as Purchasing Agent on the Isthmus, and all purchases on the Isthmus will be made by him or by his direction.

2. All invoices for material and supplies purchased in the United States will be certified by the Chief Quartermaster, or by direction of the Chief Quartermaster by an employe of the Supply Department designated by him.

3. All items of nonexpendable property purchased either locally or in the United States which are not taken into stock shall be invoiced by the Auditor to the division concerned. (Paragraph 14, circular No. 656-I, is amended accordingly.)

4. Instructions in regard to handling routine papers outlined above will be arranged between the Chief Quartermaster and the Auditor.

GEO. W. GOETHALS,
Governor.

Appraisals of Equipment.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., October 21, 1914.

CIRCULAR NO. 656-6:

The following regulations covering the appraisal of equipment are hereby prescribed:

Equipment in construction service—

1. Equipment in construction service and not permanently transferred to "Operation and maintenance," will be recorded on cards kept in the Auditor's office, their value remaining in construction accounts; such items will not be appraised.

Equipment retired prior to July 1, 1914—

2. Equipment items retired from construction service prior to July 1, 1914, will be eliminated from store inventories and recorded on cards filed in the Auditor's office. Their value will remain in construction accounts until sold or transferred permanently to "Operation and maintenance;" such items will not be appraised.

Equipment retired after July 1, 1914—

3. Equipment items retired from construction service subsequent to July 1, 1914, will be recorded in the Auditor's office on cards sent in by divisions, as required by Paragraph 10 of circular No. 656-1.

Accounting for equipment in obsolete store—

4. All equipment retired from construction service will be recorded and accounted for by the obsolete storehouse. This accounting will be physical only, and a complete record will be kept as to division retiring same, value, length of service, original cost, etc., which data must be shown on all invoices covering its movement or disposition.

Equipment transferred to "Operation and maintenance"—

5. Equipment permanently transferred to "Operation and maintenance," will be appraised at the percentages of the cost of such equipment, as recommended in the surveying officer's memorandum of May 29, and August 25, 1914, it being understood that such appraisal is not set for sale purposes.

Exchange of equipment—

6. Equipment may be turned into the Supply De-

partment in exchange for other retired equipment of like capacity and cost, in better physical condition, without additional financial charge being made therefor, but in the exchange of equipment of the same class but of different capacities and costs, an adjustment of equipment charges will be made. No exchange of equipment will be effected under this authority without approval of the Governor, requests for such exchanges being made direct to the surveying officer.

GEO. W. GOETHALS,
Governor, The Panama Canal.
President, The Panama Railroad Company.

Rates for Miscellaneous Services.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., October 16, 1914.

CIRCULAR No. 692:

The rates quoted below are effective this date, for the following services furnished individuals, companies, and others:

1. For service of a diver, his assistants, and apparatus, for the first four hours or fraction thereof, from time of arrival at point of diving.....\$60.00
- For each succeeding hour or fraction thereof..... 10.00
2. Compressed air, per 1,000 cubic feet.. .12
3. For giving cable notice of deposits with the Treasurer or Assistant Treasurers of the United States to be applied in payment of tolls, material, supplies, and services 5.00

GEO. W. GOETHALS,
Governor.

Employees' 24-trip Tickets.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., October 27, 1914.

CIRCULAR No. 608-2:

Hereafter, no 24-trip tickets will be issued to replace those lost by employees.

GEO. W. GOETHALS,
Governor, The Panama Canal.
President, The Panama Railroad Company.

Occupants of Offices in the new Administration Building.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., October 21, 1914.

It is directed that when offices are vacated for the noon hour and in the evening the doors be closed and locked. Employees or others who may have business in the offices outside of regular working hours, and who are not supplied with keys, can obtain admission to the offices on application to the watchman or janitor. Keys will be supplied to as many of the officials and members of the office force as need them, so far as possible.

The only entrance to the building after 6 p. m. will be through the main doors; all other doors will be locked.

GEO. W. GOETHALS,
Governor.

Task Work on Panama Canal and Panama Railroad.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., October 25, 1914.

TASK WORK BULLETIN No. 1:

EXCAVATION BY DECAUVILLE.

Obispo Diversion—

- Per car (four men to a car).....
- Hauls less than 200 feet..... \$0.09
- Hauls more than 200 feet..... .10

Mount Hope, material, earth and rock.—

- Per car.....
- Hauls up to 150 feet..... .10
- Hauls 150 feet to 300 feet..... .11
- Hauls 450 feet to 700 feet..... .12
- (Minimum a man can earn and hold his job: \$1.50 a day.)

New Administration Building—

- Per car on east side..... .12
- (This rate fixed in view of hard digging and the fact that men were required to sort out the hard rock.)
- Per car on south side..... .10

New Panama waterworks, Miraflores—

- Maximum per car..... .13

Point B, Canal prism—

- Contract for excavating about 112,450 cubic yards at 21½ cents.
- (After removing 103,896 cubic yards at 21½ cents, and 5,096 cubic yards at 31½ cents, the subcontractor signified his inability to complete the contract, claiming that he had lost \$10,000.)

Panama railroad relocation—

- Per car (three men to a car)..... .10
- (Daily output limited to 45 cars.)

Noos Island—

- Per car..... .10
- (15 cars to constitute a day's work—drilling, blasting, and breaking the rock to a size to admit of handling, done by the Fortification Division.)

Cristobal Docks—

- 3-foot caissons (earth and loose rock) per lineal foot..... to .50
- 4-foot caissons (earth and loose rock) per lineal foot..... .50
- 6-foot caissons (earth and loose rock) per lineal foot..... 1.00
- 6-foot caissons (solid rock) per lineal foot..... 2.00
- (40-cent rate experimental—increased to 50 cents.)

Cristobal cooling plant—

- 6-foot caissons (for softer material) per lineal foot..... 1.00
- 6-foot caissons (for hard rock) per lineal foot..... 2.00
- (Three men in a crew, Panama Canal to move hoists and clear holes of water before men begin work in morning.)

Anywhere in Pacific Terminals—

- 6-foot caissons (for softer material and where no shooting is required) per lineal foot..... 1.00
- 6-foot caissons (for harder material) per lineal foot..... 1.50

MAKING CONCRETE BLOCKS.

- Pier 7, Cristobal—two-thirds of two cents each.

RAILS CUT AND BROKEN.

- Pier 7, Cristobal—two-thirds of 20 cents each.

BENDING RODS.

- Pier 7, Cristobal—two-thirds of two cents each.

CUTTING RODS.

- Pier 7, Cristobal—two-thirds of \$0.015 each.

HEADING PILES.

East breakwater—

- Per pile..... .18
- (Tried out on only a portion of the pile heading work.)

DRILLING HOLES IN CONCRETE FOR CABLE HANGERS.

- Noos Island—Per hole..... .05

RIVETING CAISSONS.

- Pier No. 7, Cristobal—Per section..... 1.00
- (Did not include placing, clamping, pinning, or bolting the sections together.)

ASSEMBLING AND RIVETING CAISSONS.

- Cristobal cooling plant—For completed section (18 men required), \$3.99, or seven cents per rivet. (Consisted of clamping, bolting, riveting, and caulking.)

ASSEMBLING SPIRAL REINFORCEMENT.

- Cristobal cooling plant—Per pound..... .0025

FILL.

- Dam at Toro Point—(Material: earth.) Per cubic yard..... .25
- (Eight Decauville cars or four cubic yards for a day's work.)

The above is for general information.

C. A. McFLAINE,
Executive Secretary.

Changes in Hotel Meal Hours.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARtermASTER,
BALBOA HEIGHTS, C. Z., October 29, 1914.

To stewards at Balboa, Ancon, and Cristobal—Please arrange to keep your hotels open until 1.30 p. m., for the noon meal and 7.30 p. m., for the evening meal. The closing hour for Sunday morning breakfast will be 8.30 a. m.

W. R. GROVE,
Chief Quartermaster.

Ordinance Relating to the Maintenance of Sidewalks, Yards, Etc., in the Cities of Panama and Colon.

THE PANAMA CANAL,
HEALTH DEPARTMENT,
OFFICE OF CHIEF HEALTH OFFICER,
BALBOA HEIGHTS, C. Z., October 22, 1914.

By virtue of the authority vested in me by Article VII of the Treaty, between the United States and the Republic of Panama, signed November 18, 1903, and Presidential Decree No. 23 of July 8, 1904, the Sanitary Rules and Regulations for the cities of Panama and Colon in the Republic of Panama, promulgated by Executive Decree No. 14 of March 15, 1913, are hereby amended, effective November 15, 1914, by the addition thereto of the following section:

Section 131. Every owner, tenant, lessee and occupant of any building or lot (whether vacant or occupied) within or near the built-up portions of the city, shall keep and cause to be kept the sidewalk and curbstone in front thereof, clean, in good repair, and free from obstructions and nuisances of every kind, and shall not allow anything in the area or yard, or on or about his premises to become a nuisance, or dangerous or prejudicial to life or health.

Any violation of the provisions of this section shall

be punished by a fine of not less than five balboas nor more than 50 balboas, at the discretion of the Health Officer.

CHAS. F. MASON,
Chief Health Officer.
Approved:
GEO. W. GOETHALS,
Governor.

Ordinance Relating to Contagious and Infectious Diseases in the Cities of Panama and Colon.

THE PANAMA CANAL,
HEALTH DEPARTMENT,
OFFICE OF CHIEF HEALTH OFFICER,
ANCON, C. Z., September 17, 1914.

By virtue of the authority vested in me by Article VII of the Treaty, between the United States and the Republic of Panama, signed November 18, 1903, and Presidential Decree No. 23 of July 8, 1904, Section 22 of the Sanitary Rules and Regulations for the cities of Panama and Colon in the Republic of Panama, promulgated by Executive Decree No. 14 of March 15, 1913, is hereby amended, effective November 15, 1914, to read, as follows:

CONTAGIOUS AND INFECTIOUS DISEASES.

Section 22. The following named diseases and disabilities are hereby made notifiable and the occurrence of cases shall be reported as herein provided:

Group 1—Infectious diseases:

- Actinomycosis.
- Anthrax.
- Chickenpox.
- Cholera, Asiatic (also cholera nostras when Asiatic cholera is present, or its importation threatened.)
- Continued fever lasting seven days.
- Dengue.
- Diphtheria.
- Dysentery.
- (a) Amebic.
- (b) Bacillary.

- Favus.
- German measles.
- Glanders.
- Hookworm disease.
- Leprosy.
- Malaria.
- Measles.
- Meningitis:
- (a) Epidemic cerebrospinal.
- (b) Tuberculous.

- Mumps.
- Ophthalmia neonatorum (conjunctivitis of newborn infants.)
- Paragonimiasis (endemic hemoptysis.)
- Paratyphoid fever.
- Plague.
- Pneumonia (acute.)
- Poliomyelitis (acute infectious.)
- Rabies.
- Scarlet fever.
- Septic sore throat.
- Smallpox.
- Tetanus.
- Trachoma.
- Trichinosis.

- Tuberculosis (all forms, the organ or part affected in each case to be specified.)
- Typhoid fever.
- Typhus fever.
- Whooping cough.
- Yellow fever.
- Relapsing fever.

Group 2—Venereal diseases:

- Gonococcus infection.
- Syphilis.

Group 3—Diseases of unknown origin:

- Pellagra.
- Cancer.

(c) Each and every physician who treats or examines any person suffering from or afflicted with, or suspected to be suffering from or afflicted with, any one of the notifiable diseases shall immediately report such case of notifiable disease in writing to the local Health Officer. Said report shall be forwarded either by mail or by special messenger, and shall give the following information:

1. The date when the report is made.
2. The name of the disease or suspected disease.
3. The name, age, sex, color, occupation, address, and school attended or place of employment of patient.
4. Number of adults and children in the household.
5. Source or probable source of infection or the origin or probable origin of the disease.
6. Name and address of the reporting physician.

Provided, that if the disease is, or is suspected to be, smallpox, the report shall, in addition, show whether the disease is of the mild or virulent type and, whether the patient has ever been successfully vaccinated, and if the patient has been successfully vaccinated, the number of times and dates or approximate dates of such vaccination; and if the disease is, or is suspected to be, cholera,

ed which provide for more than a single wall, except upon permission in writing from the Health Officer, and when double walls are allowed it shall be stipulated in the permit that there shall be at least eight inches of concrete between the walls immediately above the sills of each floor, placed in such manner as to entirely fill all openings.

Section 107. No building shall have a living or bedroom smaller than 10 feet by 10 feet by 10 feet, and each room shall have not less than one window, three feet by five feet, and one door not less than two feet six inches by seven feet, one of which shall open on a yard, street, alley, or patio.

Section 108. In all tenement or lodging houses there shall be an opening over each door and for 12 inches above. This opening may be protected by wire screens or gratings, the gratings not to diminish the ventilating space by more than one-third.

Section 109. All buildings of more than one story shall be provided with a stairway not less than three feet wide for every 12 rooms or major fraction thereof.

Section 110. Balconies may extend to the curb of streets. Balconies that do not extend to the curb shall not exceed five feet in width and shall be supported by brackets of sufficient strength. No balcony shall be less than two feet six inches in width. No passage through a house shall be less than three feet in width.

Section 111. The minimum clear space to be allowed for bath and water closet fixtures, shall be, as follows: Water closets, three feet by four feet; shower baths, three feet by four feet, bath tubs, five feet by six feet.

Section 112. Kitchen space shall be provided for on each floor of tenement house, at the rate of six square feet for each living room thereon.

Section 113. Each building must contain a sufficient number of baths, water closets, and sinks, to comply with plumbing regulations, and they shall be distributed in such manner as to be convenient of access to the occupants of the house.

Section 114. Toilet and baths, wherever possible, shall be confined to one section of the building, and shall have concrete floors, and be well lighted and ventilated. In no case shall a toilet or bathroom open into a kitchen.

Section 115. Attic space must have an opening into it of not less than two feet square and shall be closed by a trap door, which can be opened for the purpose of inspection; under no circumstances shall any article or articles of any nature whatsoever be stored in this attic space.

Section 116. The space or alley way between adjacent buildings shall be graded and cemented in such manner that it will drain to the street gutter. All patios must be cemented, graded, and trapped to sewer where practicable. When it is impracticable to trap the patio to sewer, the patio will be so graded that it will drain all water to the street gutters.

For the purpose of light and ventilation a patio of sufficient size, to be determined by the Health Officer, shall be left unoccupied from ground to sky.

Section 117. The concrete for yards, alleys, and patios shall be not less than three and one-half inches thick with a cement mortar finish of not less than one-half inch thickness.

Section 118. New buildings, or old buildings having been vacated for the purpose of undergoing repair, shall not be occupied until the sanitary and building rules and regulations have been complied with, and a permit in writing to occupy the same has been obtained from the Health Officer.

Section 119. All premises, improved and unimproved, and all open lots and areas, shall be kept clean and free from all rubbish and similar loose material that might serve as a harborage for rats, and all lumber, boxes, barrels, loose iron, and similar material that may be permitted to remain on such premises, and that may be used as a harborage by rats, shall be placed on supports and elevated not less than two feet from the ground, with a clear intervening space beneath to prevent the harboring of rats.

Section 120. All planking and plank walks on and in yards, alleys, alley ways, or other open areas, shall be removed and replaced with concrete, brick, or stone, laid in cement, gravel, or cinders, or the ground level bare.

Approved,
GEO. W. GOETHALS,
Governor.

Ordinance Relating to Garbage in the Cities of Panama and Colon.

THE PANAMA CANAL,
HEALTH DEPARTMENT,
OFFICE OF CHIEF HEALTH OFFICER,
ANCON, C. Z., September 16, 1914.

By virtue of the authority vested in me by Article VII of the Treaty, between the United States and the Republic of Panama, signed November 18, 1903, Section 14 of the Sanitary Rules and Regulations for the cities of Panama and Colon in the Republic of Panama,

promulgated by Presidential Decree No. 14 of March 15, 1913, is hereby amended, effective November 15, 1914, to read, as follows:

GARBAGE.

Section 14. The owner, agent, and occupant of every premises, improved or unimproved, whereon or wherein garbage shall be created, shall provide a metal, watertight container or containers, each with a tight-fitting cover of a pattern approved by the Health Officer, such container or containers to be of such size as to be easily manhandled, and of such number as to receive the garbage accumulations of 24 hours from each such premises and shall place or cause to be placed such container or containers, for the purpose of having their contents removed, on the sidewalks or open alleys in front or rear of said premises, as the times required by the Health Officer.

(a) It shall be unlawful for any owner, agent or occupant of any such premises to have, maintain, or keep any garbage on any premises, except in such garbage containers as are provided for in first paragraph of this section.

(b) Such garbage containers shall be kept tightly covered at all times, except when momentarily opened to receive the garbage or to have the contents therefrom removed, as provided for hereinafter.

(c) When such garbage container is placed on the outside of any premises, it shall be unlawful for any person engaged in the removal of garbage, or for any other person, to remove the cover from such garbage container, except for the purpose of emptying its contents into a duly authorized garbage wagon, or to throw such garbage container on the street or sidewalk, or to injure it in any way so as to make it leak or to bend it or its cover so as to prevent said garbage container from being tightly covered; and all persons engaged in the removal of garbage shall, after emptying said container, replace the cover tightly on said container.

(d) The owner, agent, or occupant of every premises shall keep separate from their garbage, tin cans, broken crockery, hardware, old planks, wooden matter, paper sweepings, and other trash, and place same in a sound substantial vessel or container kept for that purpose, which vessel or container shall be placed on the sidewalk or alley in front or rear of each premises, as provided for in first paragraph of this section, for garbage containers.

(e) The provisions of this regulation shall apply to all public and private markets, as well as all places of business, hotels, restaurants, and all other premises, whether used for business, boarding, or residential purposes.

(f) For the purpose of enforcing these regulations any person living on any premise shall be deemed an occupant, and any person receiving the rent, in whole or in part, of any premises shall be deemed an agent; that on any premises where construction of any kind is in progress, and where employes or workmen eat their dinners or lunches in or about said premises, or scatter lunch or food in or about such premises the contractor or foreman or other person in charge of such workmen shall be deemed an occupant; and that the person in charge of any market, or stall in any market, shall be deemed an occupant.

(g) It shall be unlawful for any person to pick from or disturb the contents of any garbage containers or vessels, or other containers provided for in these regulations.

(h) The contents of such cans must be emptied and removed at least once in each 24 hours, and disposed of in a manner satisfactory to the Health Officer. After the can is emptied it shall be thoroughly cleaned by the owner.

Approved,
GEO. W. GOETHALS,
Governor.

Ordinance Relating to Keeping of Animals and Birds on Premises within the City Limits of Panama and Colon.

THE PANAMA CANAL,
HEALTH DEPARTMENT,
OFFICE OF CHIEF HEALTH OFFICER,
BALBOA HEIGHTS, C. Z., October 1, 1914.

By authority of Article VII of the Canal Treaty of 1903, between the United States and the Republic of Panama, and Presidential Decree No. 23 of July 8, 1904, I hereby establish the following health regulations for the cities of Panama and Colon, to become effective November 15, 1914:

Amending Section 16 of sanitary rules and regulations for the cities of Panama and Colon in the Republic of Panama:

Section 16. It shall be unlawful for any persons, firm, or corporation to have in his or their possession, for sale, at wholesale or retail, or to maintain, keep, or feed, for sale, within the limits of the cities of Panama and Colon, any live hares, rabbits, guinea pigs, apes, monkeys, squirrels, white mice, chickens, turkeys, geese,

ducks, doves, pigeons, parrots, birds, or other fowl, in any building which is not ratproof in the manner now or hereafter provided by law for the ratproofing of buildings, and unless same are kept in a movable or portable coop constructed with a metal, watertight bottom, and metal sides to height of at least 12 inches, the whole surmounted and covered by a metal cage of wire having not more than one-half inch to each mesh, and said coop to be elevated at least two feet from the floor on supports so constructed as to leave clear open space between the bottom of the coop and the floor.

(a) Within the area embraced in the following limits of the city of Panama, to-wit:

Beginning at Chorrillo avenue and the seawall; along Chorrillo avenue to Balboa road; along Balboa road to Ancon avenue; along Ancon avenue to Fourth of July avenue, including the National Institute; along the Canal Zone boundary line to Calle Carlos de Icaza; along Calle Carlos de Icaza to Calle P; along the course of Calle P to the nearest point on the beach; along the beach and seawall to the point of beginning in Chorrillo; and within the area embraced in the following limits of the city of Colon, to-wit:

Beginning at Bottle alley and Second street, along Second street to G street; along G Street to Third street; along Reyes alley to center of Block 18; from center of Block 18 to G street; along G street to Ninth street; along Ninth street to E street; along E street to Zone line; from Zone line on D street, along D street to Boca Grande, along Third street to following shore line of Boca Grande to Zone line; from Zone line and west end of Eleventh street, along the water front, to Third street, including docks; along Third street from water front and Third street to Bottle alley; along Bottle alley from Third street to Second street and Bottle alley, the point of beginning.

It shall be unlawful for any person, firm, or corporation to have, keep, maintain, or feed, for sale, or for private use, in any lot, open area yard, premises, or building, any live hares, rabbits, guinea pigs, apes, monkeys, squirrels, white mice, chickens, turkeys, geese, ducks, doves, pigeons, parrots, birds, or other fowl, unless the same are kept in a movable or portable coop constructed with a watertight bottom and metal sides to a height of at least 12 inches, the whole surmounted and covered by a metal cage of wire having not more than one-half inch to each mesh; and said coop to be elevated at least two feet from the floor on supports so constructed as to leave clear open space between the bottom of the coop and the floor or ground.

(b) All feed for any such live hares, rabbits, guinea pigs, apes, monkeys, squirrels, white mice, chickens, turkeys, geese, ducks, doves, pigeons, parrots, birds, or other fowl, provided for in these regulations, shall be kept in closed metal receptacles so constructed that the contents shall be inaccessible to rats, and no such feed shall be thrown or scattered on any floor area, or open space, but shall be placed only in the coops hereinabove provided for.

CHAS. F. MASON,
Chief Health Officer,
The Panama Canal.

Approved:

GEO. W. GOETHALS,
Governor.

Transfer of P. R. R. Office Timekeeping.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., October 28, 1914.

To all concerned—Effective November 1, 1914, all office timekeeping of the Panama railroad, together with the personnel necessary to handle this work, will be transferred to the timekeeping bureau of the Executive Department, Panama Canal.

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, Panama Railroad Company.

Proposals for Clearing Trails.

THE PANAMA CANAL,
OFFICE OF THE CHIEF QUARTERMASTER.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, until November 25, 1914, at 3 p. m., and then opened for:

Completely cutting to within three inches of the ground all growth and burning all material so cut, over an area of 68 miles of trail 20 feet wide, situated in various parts of the Canal Zone. The general location of this work will be shown on maps in the office of the Assistant Engineer, Division of Fortifications, between 2 and 5 p. m., November 14. This work will be done in January and February, 1915. All bids should be for a lump sum for the entire job.

Bids must be accompanied by cash certified check, or post-office money order for five per cent of the amount bid.

Form of contract and bond, including specifications may be obtained on application to this office.

The Government reserves the right to reject all bids. Bids should be marked "Proposal for clearing trails."

W. R. GROVE,
Chief Quartermaster.

COMMISSARY DEPARTMENT.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m. The gold departments of the Cristobal store will open at 2 p. m., on Saturdays and sailing days of Panama railroad vessels.

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 308, on Wednesday, November 18, 1914, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats

will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

By direction of the chairman of the board,
 F. M. NIXON,
 Recorder, Board of Local Inspectors.

**Proposals for Clearing Land Defenses.
 THE PANAMA CANAL.**

OFFICE OF CHIEF QUARTERMASTER.
 Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., November 25, 1914, and then opened for:

Cutting to within six inches of the ground all growth and burning all material so cut, over an area of 3,075 acres, more or less, situated near Pedro Miguel, Gatun, and Toro Point. One complete trip, occupying two days, viz., November 16 and 17, will be made over the whole area by a representative of the Division of Fortifications for the purpose of showing bidders the country and conditions. All bids should be in a lump sum for the entire job. This work will be done in January and February, 1915.

Bids must be accompanied by cash, certified check, or post-office money order for five per cent of the amount bid. Form of contract and bond, including specifications, may be obtained upon application to this office. The Government reserves the right to reject all bids. Bids should be marked "Proposals for clearing land defenses."

W. R. GROVE,
 Chief Quartermaster.

SHIPPING INFORMATION.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls, or the purchase of supplies, may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

It is advisable that deposits be made somewhat in excess of the anticipated charges, to cover minor charges which may not have been anticipated, such as pilotage and towage. Pilotage is at the rate of \$1 per foot of maximum draft, but is not charged on a vessel which makes the transit of the Canal without taking on or discharging freight or passengers in a terminal port. Tug service, which is at the rate of \$15 per hour, will not be charged on vessels of less than 15,000 gross tonnage.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa from the Union Oil Company at the rate of from 1,300 to 1,600 barrels per hour. The present price is \$1.30 per barrel, reduced to 60° Fahrenheit.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

Repairs to vessels may be made to any extent, except where the use of a large dry dock is required, or the

turning of the largest crank shafts or longest line shafts.

The Government hospital service is fully equipped for the treatment of medical and surgical cases. The charge for consultation at the dispensaries is \$3; for hospital treatment, in ward, \$3 per day; in private room, \$6 per day. For American seamen, the charge for treatment in ward is \$1 per day.

Application for supplies, or for services, should be made to the captain of the port, Cristobal or Balboa.

Mail, other than registered, and cablegrams for men on ships which will call at the terminal ports, or pass through the Canal, may be addressed in care of the captains of the ports, if desired; or may be addressed to Cristobal or Balboa, general delivery, with the name of the vessel written plainly; or, in case the vessel has a known representative on the Isthmus in care of such representative.

Tide Predictions.

Panama tide predictions for the next six weeks are given in the following table:

NOVEMBER.				
DATE.	Time and height of high and low water.			
Wed., Nov. 4.....	4:12	10:31	16:38	22:44

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used in Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.) and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47.

Sailings of Vessels in Regular Service With the Isthmus.

REGULAR CONNECTIONS WITH PACIFIC PORTS.

The Pacific Mail has sailings about every 10 days between Balboa and San Francisco, with calls at Puntarenas, San Juan del Sur, Corinto, Amapala, La Union, La Libertad, Acajutla, San José de Guatemala, Chambericn, Oco-Salina Cruz, Acapulco, Manzanillo, San Blas, and Mazatlan. The company also operates a direct line between Balboa and San Francisco, with sailings about every six weeks; and a Panama-Central America line, between Balboa and Ocos, making one round voyage monthly, and calling at all the ports abovenamed between Balboa and Ocos.

The Luckenbach Steamship Company is operating a 10-day service between New York and San Francisco, calling at East San Pedro both ways. Its vessels handle cargo at Balboa when sufficient business offers.

The American-Hawaiian lines between New York and San Francisco, and New York and Honolulu, discharge and take on cargo at Balboa when sufficient business offers. At present, a vessel of this company passes through the Canal about every third day.

Grace and Company maintain an irregular service between New York and San Francisco, calling at way ports. Sailings are made about every 12 days. A vessel plying between San Francisco and Valparaiso, calling at way ports makes a round voyage about every 10 weeks.

The Peruvian Steamship Company maintains a weekly service between Balboa and Callao, with calls at Guayaquil, Payta, Eten, Pacasmayo, and Salaverry. Every second voyage includes Mollendo.

The South American Steamship Company's vessels sail on alternate Mondays from Balboa for Valparaiso calling at Paíta, Eten, Pacasmayo, Salaverry, Callao, Mollendo, Arica, Iquique, Antofagasta, and Coquimbo.

The Pacific Steam Navigation Company has sailings on alternate Mondays for Peru and Chile; every 10 days for Ecuador; and on alternate Mondays for Colombian and Ecuadorian ports.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro and an additional weekly sailing to Bocas del Toro.

The Royal Mail maintains fortnightly service each way between New York and Southampton, making the following way ports: Antilla, Jamaica, Colon, Cartagena, Puerto Colombia, Puerto Cabello, Trinidad, Barbados, the Azores, and Cherbourg. Its vessels all arrive at Colon on Sundays and sail on Tuesdays.

The Compagnie Générale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Carupano, Trinidad, Martinique, Guadeloupe, and Santander; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Carupano, Trinidad, and Martinique.

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curaçao, Puerto Cabello, and Barcelona.

The Compania Trasatlantica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curaçao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls en route, the vessels sail from Genoa on the 8th day of each month.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line vessels sailing about every six days, direct; between Colon and New York by the United Fruit Company and the Royal Mail Company, sailings via Kingston weekly and fortnightly, respectively; between Cristo-

Irregular services between Cristobal and Gulf ports of the United States, with way calls at Central American and Mexican ports, are maintained by the Leyland and Harrison Lines, sailings about every fortnight, and the Seeberg Line, sailings about every 18 days.	

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employees of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

The "Jamaica" to Take the Place of the "Quito."

The steamship *Jamaica*, which arrived at Cristobal from Trinidad on November 3, and was despatched through the Canal to Balboa on November 5, has been transferred by the Royal Mail Steam Packet Company from its Caribbean service to the service of its affiliated company, the Pacific Steam Navigation Company, along the west coast of South America. The *Jamaica* is to take the place of the *Quito*, which was refused a passenger certificate on its last inspection by the Board of Local Inspectors. The *Jamaica* was built in 1908 at Middlesborough, England, and is a vessel of 1,138 tons gross register, with a length of 220 feet, breadth of 34 feet, and depth of 14.9 feet. The *Quito* was built in 1888, at Birkenhead, and is of 1,089 tons gross register, with a length of 216 feet, breadth of 35.2 feet, and depth of 14.9 feet.

Canal Traffic Moving Normally.

The steamship *Arizonan*, of the American-Hawaiian Line, which was held at Pedro Miguel Lock by the second movement of the New Culebra slide on October 31, sailed for New York on Sunday, November 8, having been held up, on account of its relatively great size, three days after the Canal was open for the transit of the other vessels awaiting passage. It was decided in the interest of safety, to hold the *Arizonan* for an enlarged channel. The channel has since been cleared sufficiently to permit the safe passage of vessels as large as any which have yet come to the Canal, and traffic is now being despatched through without delay.

In connection with delay caused by the slide, a steamship company inquired if claims for demurrage would be considered. The Governor replied that The Panama Canal is not to be held responsible for such delay, and added:

"It may be of interest to state that the original date for the completion of the Canal was January 1, 1915, but that the construction work was so far advanced, though not entirely completed, in August of the current year, that it was decided to offer vessels the privilege of using it before the official opening.

"When this slide occurred it was considered advisable, as a matter of precaution, to give

the dredges and other floating equipment the right-of-way for a few days, to engage in construction work, in preference to the vessels that were waiting transit through the Canal."

In the case of the *Arizonan*, on its way from San Francisco to New York, the Canal will save it approximately 19.8 days at sea, on the basis of a speed of 12 knots, even after a delay of a week in passing through the Canal. The *Arizonan* is a relatively large vessel, 470 feet long by 57.2 feet in the beam, of 8,672 gross and 5,621 net tons, Lloyds' register, and carried, on this voyage, a cargo of 11,780 tons. If its cost at sea be reckoned at \$450 per day, the time saved will be worth \$8,910. Deducting from this the amount of tolls, \$7,891.-20, the net saving amounts to \$1,018.20 in spite of the week's delay.

The "Urubamba" Returns to Service.

The steamship *Urubamba*, of the Peruvian Steamship Company, which was despatched through the Canal from Cristobal on November 8 and arrived at Balboa on November 10, is on its way to the west coast of South America from France, where it has been undergoing repairs, mainly in the installation of new boilers. It has on board a cargo of coal, taken on at Cardiff, and a number of passengers for the west coast, booked through from England. After it has been inspected and granted a new passenger certificate by the Board of Local Inspectors, the vessel will resume its place in the regular service between Balboa and Mollendo, Peru.

Structural Steel for Cristobal Coaling Plant.

Award has been made to the United States Steel Products Company for approximately 9,000,000 pounds of structural steel required in the construction of the unloader and reloader wharves, and the end wharf, at the Cristobal coaling plant, at the price of \$0.01967 per pound. Deliveries are to be made in two parts; the first part comprises the unloader and reloader wharf structures from bent No. 24 to bent No. 40, including the framing to the south of bent No. 40; and the second part, the remainder of the unloader and reloader wharves, and the end wharf. Delivery of the steel for the first part, exclusive of the slabs, is to be completed on or before January 8, 1915; delivery of the slabs for the first part on or before November 24, 1914; delivery of the steel for the second part, exclusive of slabs, on or before March 19, 1915, and delivery of the slabs for the second part on or before February 2, 1915.

Office Change.

The United Fruit Company announces that beginning November 10 all business will be transacted in its new office building in Cristobal, near the fire station.

A contract has been entered into with W. L. Alley for the removal of the north mast at the Colon radio station at the price of \$1,500. Four bids were received in all.

GRAIN THROUGH THE CANAL.

Consigned to Europe—Has Formed Largest Single Item of Cargo.

Grain for Europe, from north Pacific ports of the United States, has so far formed the largest single item of cargo carried through the Canal. In the two months and a half of Canal operation ending November 1, the Canal was used by 17 eastbound vessels in this traffic, and eight vessels have passed through from the Atlantic to the Pacific in ballast, to return with grain. The laden vessels have carried through an aggregate of 122,258 tons of grain, consisting of 72,932 tons of barley and 49,326 tons of wheat. Counting 37 bushels of wheat and 46 of barley to the long ton, the cargo amounted to 1,825,062 bushels of wheat and 3,354,872 bushels of barley, a total of 5,179,934 bushels of grain. In addition to the shipments from United States ports, the *Ocean Monarch* passed through the Canal on October 25 with 6,200 tons (285,200 bushels) of barley from Valparaiso for Falmouth.

The next largest single item of cargo handled through the Canal during the same period was nitrates, principally from Chile. This was carried in 14 vessels, and amounted to 99,126 tons, an average of 7,080 tons to the vessel. That the grain shipments should have exceeded those of nitrates is contrary to the prediction that the latter would form the largest item, but does not disprove that prediction, as applied to any considerable period of normal world business. It appears that the grain traffic is largely seasonal, and has been stimulated recently by an increased demand in Europe, coupled with a heavy crop in the United States, while the traffic in nitrates, which is perennial, has been, during the period under consideration, considerably depressed by business conditions. It is reported that Atlantic ports of the United States have established new records of grain exportations to Europe during this period.

Of the 17 vessels from the United States Pacific ports, 10 cleared from San Francisco, three from Portland, Oregon, two from Tacoma, and two from Seattle. All the vessels, except the *Transvaal*, which is registered in Copenhagen, were of British registry. Ten cleared for ports in Great Britain, including Avonmouth, Cork, Dublin, Leith, Liverpool, London, Queenstown, and Southampton. Five cleared for island ports on the way to Europe, with their final destination subject to further orders, and two cleared for Antwerp.

The distance saved from the ports of departure to those of destination, by the use of the Canal in place of the Magellan route, may be approximated at 5,550 miles. If the average speed of the vessels be rated at 10 knots, the saving in time at sea per vessel has been 23 days. On the basis of a per diem cost of operation at sea of 10 cents per net registered ton (Lloyds' measurement), the average

saving in cost of operation per vessel has been \$309.40 per day, or \$7,116.20. The average tolls paid were on 4,050 tons at \$1.20 per ton, or \$4,860. The average net saving per vessel by use of the Canal has, accordingly, been \$2,256.20.

Details of the traffic are given in the following tabulation:

Date.	Vessel.	From.	For.	CARGO.		NET TONNAGE.	
				Tons.	Nature.	Canal.	Lloyds.
Aug. 22	Daldorch	Tacoma	Limerick	6,000	Wheat	3,857	3,031
Aug. 31	Transaal	San Francisco	Europe	7,082	Barley	3,473	2,769
Sept. 7	Lord Lonsdale	San Francisco	St. Thomas	7,243	Barley	3,642	2,895
Sept. 13	Dundutha	San Francisco	England	5,760	Barley	3,213	2,552
Sept. 23	Candidale	San Francisco	Liverpool	6,450	Barley	4,244	3,826
Sept. 29	Headley	San Francisco	Teneriffe	8,230	Barley	4,573	2,712
Sept. 30	Voluntia	San Francisco	Antwerp	7,973	Barley	4,521	3,546
Oct. 6	Frankmoun	Tacoma	Southampton	7,500	Wheat	4,087	3,241
Oct. 9	Frimley	San Francisco	Antwerp	7,098	Barley	3,868	3,141
Oct. 11	Saxon Monarch	Portland	Great Britain	8,224	Wheat	4,922	3,024

Oct. 23	Dovenry	San Francisco	Madeira	5,818	Barley	3,276	2,482
Oct. 28	Inveric	Portland	Cork	6,513	Wheat	3,812	3,113
Oct. 28	Knight of the Thistle	San Francisco	Leith	9,507	Barley	5,415	4,286
Oct. 29	Queen Adelaide	Portland	Queenstown	7,397	Wheat	4,018	3,196
Total, 17 vessels				122,258		68,853	52,594
Average 17 vessels				7,192		4,050	3,094

IMPROVEMENTS AT LA BOCA.

Monthly Prizes to be Awarded Residents For Cleanest and Best Kept Houses.

The committee, consisting of Maj. P. M. Ashburn, chairman; Dan E. Wright, and Roy R. Watson, appointed to investigate and report on the measures necessary to keep the silver settlement of La Boca in a sanitary condition, has made its report and recommendations, and, in general, the same have been approved. The improvements recommended and approved are, *seriatim*, as follows:

1. Installation of water taps and slop sinks in two large apartment houses, eight in each department, at an approximate total cost of \$800. To cover this expense, the rent will be increased 25 cents a room a month.

2. A shedlike building, with concrete floor, and with benches, tables, and garbage cans installed therein, will be provided near or in the rear of the La Boca silver mess, for the use of the men who pay 27 cents a day for their subsistence. This is estimated to cost \$420, and will be paid for out of the receipts from hotels, messes, and kitchens.

3. Kitchenettes of a neat and uniform pattern will be provided for each house, as well as conveniences for the proper storage of effects. The kitchenettes are urgently needed on account of fire protection, and their manufacture has already been begun. Hearths for the boiling of clothes will be established in each washhouse. It is estimated that 400 kitchenettes and 19 hearths will be required at a probable cost of \$2,095.

4. Rows of wire clotheslines, strung six feet apart on iron piping, will be put up in front and rear of each row of washhouses; more will be added as the necessity becomes apparent. When these lines are up, the stringing of miscellaneous lines will be forbidden, although tenants will be permitted to dry clothes under houses and on the porches in time of rain. The estimated cost of these improvements is \$1,300.

5. Hereafter, the grass will be cut at regular intervals by the Quartermaster's Department, and in order to drive out the growth of Para and other undesirable grasses, Bermuda grass may be introduced. This part of the work will be placed under the supervision of the horticultural expert. The grass cutting

cost has been estimated at \$200 annually.

6. The plaza or park will be planted with grass, shrubs, and trees under the direction of the horticulturist. A general plan will first be submitted for approval.

7. The committee found that lack of civic pride was one of the greatest drawbacks to keeping up the town's appearance, due to

The committee recommended that the residents should be encouraged to keep flowers and plants, either on the porches inside the railings, or in beds outside of the houses. The report states "That the West Indian idea of beauty may be different from ours is here immaterial, the object being to interest the people of La Boca rather than to merely gladden the eyes of persons not living there."

The committee and heads of various departments concerned have been authorized to arrange for carrying the above projects into execution; to formulate all necessary regulations and instructions to make the foregoing recommendations effective, and to advise the inhabitants of La Boca in regard to same, submitting a report from time to time to the Governor for his approval.

Employment of Horticultural Expert.

Mr. Otis W. Barrett, an expert in tropical horticulture, has been employed under a temporary appointment to study local horticultural and agricultural conditions, and to report on same. In addition to supervising the planting and propagation of decorative trees, shrubs, etc., in the permanent towns, he will make a technical study of the best methods and the proper course to pursue in connection with the development work at the Corozal farm, and of the plantations operated by the commissary department at Frijoles and other localities. He will make a special study of the local propagation of citrus fruits.

Collapse of Tower at Colon Radio Station.

While two men, an American named John Thompson, and a West Indian named Oliver Niles, were engaged in removing the north mast at the Colon radio station on Monday afternoon, November 9, the pole broke near the base and fell. The men started to climb down when the pole moved, but both jumped as it gained headway and were killed. They were employes of the contractor who were taking down the mast. The pole fell across a house in the reservation doing some damage.

The estates of these deceased or insane employes of the Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against these estates, or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

EXECUTIVE ORDER

Providing for License Taxes and Fees.

By virtue of the authority vested in me I hereby establish the following Order for the Canal Zone:

Section I. There shall be collected the following taxes for operating, in the streets and roads of the Canal Zone, public vehicles not drawn or propelled by steam, gasoline, electricity, or other motive power:

(a) For each coach, carriage, or other conveyance employed in the transportation of passengers for hire, \$12 per annum.

(b) For each cart, dray, wagon, or other conveyance employed in the transportation of merchandise, \$20 per annum for each 2-wheel vehicle, and \$30 per annum for each 4-wheel vehicle.

The foregoing licenses shall be paid for the fiscal year, provided that the licensee may obtain a license for any period of the fiscal year not less than three months, upon payment of the proportionate tax due for the period for which the license is issued, and, provided further, that if no license taxes are imposed in the Republic of Panama for operating therein the vehicles of the character in this section named, which are duly licensed in the Canal Zone to residents thereof, there shall not be imposed or collected in the Canal Zone any license taxes or charges for operating therein like vehicles when duly licensed in the Republic of Panama to residents thereof.

Section II. The license tax on motor vehicles and motorcycles, required by the ordinance of the Isthmian Canal Commission, dated April 9, 1912, approved by the Secretary of War, May 1, 1912, amendatory of the ordinance of the Isthmian Canal Commission, enacted August 25, 1910, approved by the Secretary of War, October 31, 1910, shall be collected for the fiscal year, provided, however, that the licensee may obtain a license for one or more quarters of a year, upon payment of the proportionate amount of the license tax to cover the period of the license to be issued to him.

The licenses heretofore issued under said ordinances for motor vehicles and motorcycles shall not be affected by this Order, and shall continue to run until the end of the quarter following the expiration of such licenses, and thereafter the owners must obtain licenses for the fiscal year, or fraction thereof, in conformity with this section.

Section III. The following special license taxes shall be collected in the Canal Zone:

(a) For each dance, for which admission is charged, there shall be collected the sum of \$5, provided, however, that this tax shall not apply to any dance given for purposes of charity or benevolence, or the celebration of any public occasion authorized by the Governor.

(b) For operating a hurdy gurdy, street piano, or hand organ, striking machine, view machine, fortune telling device, cane rack, doll rack, or other similar device, of a non-gambling nature, maintained in the open or within an enclosure, where no admission is charged, \$1 per month for each such device.

(c) For the retail sale of soda water, other aerated waters, or ice cream from any fountain or booth, for from any cart or vehicle, there shall be charged and collected a tax of \$2 per month.

(d) For maintaining a merry-go-round for hire, \$10 per month.

(e) For musicians, jugglers, acrobats, trick

riders, fortune tellers, and persons engaged in similar businesses or professions, performing in the public highway, or from house to house, \$1 per month for each person.

(f) For carrying on the business of a peddler, \$2 per month, provided that no license fee shall be required where only articles of food are sold, but the person selling such articles of food may obtain the license upon the condition that he will observe the sanitary regulations of the Canal Zone, and obey the orders of the sanitary officials in the conduct of such business, and a failure to do so shall authorize the Executive Secretary to cancel such license.

(g) For maintaining a shooting gallery, \$5 per quarter of the year.

(h) For the retail sale of tobacco in any form there shall be charged and collected a tax of \$2 per month.

Section IV. Before any person engages in any business or calling, or operates any of the public vehicles mentioned in this Order, he shall obtain a license to do so from the Executive Secretary, or the official acting under his authority, and such license shall not issue until the person applying for the same shall present a receipt from the Collector of The Panama Canal showing that the license tax herein provided for has been duly paid, provided that peddlers of articles of food shall pay no license fee. The license so issued shall authorize the person to conduct the business or calling, or operate the vehicle named therein in the Canal Zone for the period of time mentioned in such license.

The Executive Secretary may refuse to issue a license for any of the purposes hereinbefore mentioned, if the character of the applicant is such as to warrant the belief that the exercise of the privilege granted by the license will not be conducted in an orderly and lawful manner and, provided further, that any license granted pursuant to the foregoing provisions of this Order shall at once become null and void upon conviction of the licensee, in any court of the Canal Zone, of a violation of the law in the exercise of the privilege granted by such license.

Any person who shall engage in any of the occupations above enumerated before obtaining the license provided for in this Order shall be guilty of a misdemeanor, and shall be subject to a fine not exceeding \$25, or imprisonment not exceeding 30 days, or both such fine and imprisonment in the discretion of the court.

Section V. That the ordinance enacted by the Isthmian Canal Commission on June 9, 1908, and approved by the Secretary of War, June 30, 1908, providing for certain taxes and licenses in the Canal Zone, other than for the sale of intoxicating liquors, and the ordinance of the Isthmian Canal Commission of August 5, 1911, approved by the Secretary of War, August 22, 1911, amending Section 7 of the abovementioned ordinance, as well as the ordinance of the Isthmian Canal Commission of October 15, 1912, approved by the Secretary of War, October 26, 1912, further amending said Section 7 of said ordinance of June 9, 1908, are hereby repealed, but licenses heretofore issued under said ordinances shall be effective for the period of time specified in such licenses.

This Order shall take effect from and after this date.

THE WHITE HOUSE,

October 13, 1914.

[No. 2062.]

OFFICIAL CIRCULARS.

Gifts, Presentations, and Solicitations of Contributions.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., October 29, 1914.

CIRCULAR No. 606-1:

1. Section 1784 of the Revised Statutes, published in Paragraph 2 of Circular No. 606,—is hereby republished, as follows:

No officer, clerk, or employe in the United States Government employ shall at any time solicit contributions from other officers, clerks, or employes in the Government service for a gift or present to those in a superior official position; nor shall any such officials or clerical superiors receive any gift or present offered or presented to them as a contribution from persons in Government employ receiving a less salary than themselves; nor shall any officer or clerk make any donation as a gift or present to any official superior. Every person who violates this section shall be summarily discharged from the Government employ. (R.S., Act of February 1, 1870.)

2. Contributions must not be solicited from employes for any gift or presentation of any kind for any one in authority over those from whom contributions are solicited, or for the family of such official or employe, or for the purpose of complimenting such official or employe or his family by celebrations, dinners, or other functions.

3. When employes and officials happen to be fellow-members of a club or other organization, there is, of course, no objection whatever to dinners or other functions at any time, but the objection is to the solicitation of subscriptions from employes in subordinate positions for such purposes as named in Paragraph 2.

4. Any official or employe who violates the prohibition contained in Paragraph 2, or who accepts such a gift or complimentary function from his subordinates for himself or permits his family to accept same shall be liable to summary dismissal.

5. This order takes effect November 1, 1914.

GEO. W. GOETHALS,

Governor, The Panama Canal.

President, The Panama Railroad Company.

Work Requests on Mechanical Division.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., November 2, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

In order to reduce the amount of work to be performed by the Mechanical Division to a minimum, consistent with keeping up current repairs and absolutely necessary work in connection with unfinished construction items, I desire that in the future heads of departments and divisions, in submitting work requests on the Mechanical Division, state specifically the date delivery is actually required.

If the time element will permit and the superintendent of the Mechanical Division is satisfied that the work can be done at as low or lower cost in the United States, including delivery on the Isthmus, the head of the department or division will be so advised and order will be placed in the United States for earliest possible delivery.

If there is any special reason why the work should not be performed in the United States, aside from the element of time, a detailed statement to that effect should appear on the work request and will be given careful consideration by the superintendent of the Mechanical Division.

I desire that you give this matter careful attention and anticipate as much as possible your requirements for mechanical work, so that whenever advisable the order may be placed in the United States.

GEO. W. GOETHALS,

Governor.

Notice to Steamship Lines.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., November 5, 1914.

1. Articles XIII and XIV of the rules for the measurement of vessels for The Panama Canal, set forth what space may be used for carrying coal and other fuel for a vessel's own use without payment of tolls for the space so occupied.

2. The rules are liberal in making ample provision for such space and authorize the owner of the vessel to select either of the two provisions that he may elect as set forth in the rules. Full tolls are levied on loaded vessels and reduced tolls on those in ballast, and in order that there may be no misunderstanding vessels will be considered *in ballast* only when they carry no passengers and do not carry either coal or merchandise of any description in any quantity whatsoever, except bunker coal or other fuel for their own use. In order that they may be entitled to claim the reduced or *ballast rate* the amount

of bunker coal or other fuel must not exceed in volume the allowance specified in The Panama Canal certificate as the deduction for bunker space.

3. In any case in which the amount of coal on board exceeds the deductible allowance the vessel will be charged full tolls.

4. In any case in which coal be carried as a deck load, for the vessel's own consumption, or even though it be within the deductible allowance it will be subject to measurement and charge, the rate depending upon whether or not the vessel be considered in ballast or loaded.

5. If when carrying a deck load of coal for her own use she carries no passengers or freight, and the amount of coal on board be within the deductible allowance, she may be considered in ballast.

6. Vessels that wish to benefit by the reduced or ballast rate of tolls should be very careful not to carry more than the deductible allowance under the rules.

7. On arrival, vessels must have ready a statement of their coal account, to which the master may be required to take oath. In case coal be carried outside of the regular bunkers, both it and that carried in the bunkers should be piled or arranged in a fairly uniform way, so that it may be readily measured.

GEO. W. GOETHALS,
Governor.

Shipments to Mount Hope Depot.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., November 4, 1914.

All concerned—My attention has been called to the act that the provisions of Paragraphs 14 and 15, Circular No. 632, are in many instances not being complied with, inasmuch as many shipments are being received at Mount Hope depot without any notice whatever of shipment being furnished by the consignor, showing status of the shipment, which not only leads to unnecessary work in handling shipments at Mount Hope, but oftentimes causes confusion in making ultimate disposition. The provisions of Paragraph 13 of the same circular are also not being complied with, inasmuch as many shipments are being forwarded improperly loaded and packed.

It is directed that in future the provisions of this circular be strictly complied with. The three paragraphs are quoted herewith for ready reference:

"13. Shipments shall be packed in a manner sufficient to insure goods arriving at destination in good condition. Articles of a fragile nature must be securely boxed, or crated, and other items boxed, crated, bundled, or sacked (according to the nature of the shipment), and each package properly marked showing shipper, destination, and consignee.

"14. Box cars loaded by consignors shall be properly sealed, and cars so loaded must be carded showing shipper, destination, and consignee.

"15. Consignors shall forward an invoice to the consignee at unloading point in time to arrive at destination with the goods. This invoice shall contain particulars of the shipment and shall be used by the consignee for an unloading check. Agents, however, will check items, such as boxes, barrels, etc., as shown on the waybill. Shipment of bulky materials, such as rails, ties, lumber, piling or other material of large size, should be carded, card being placed on car containing material showing exact amount of material on car."

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, Panama Railroad Company.

Monthly Statements of Lubricants and Waste Consumed.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., November 6, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:—The monthly statements of lubricants and waste consumed in the various classes of equipment of The Panama Canal, which have been forwarded by the various departments and divisions to the traveling engineer for compilation, in accordance with the last paragraph of Circular No. 314, of March 24, 1910, may be discontinued in future, as regards all equipment, except locomotives.

It is desired to have these statements forwarded for oil and waste consumed on locomotives until further notice.

GEO. W. GOETHALS,
Governor.

Service Ratings for Silver Employees.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., October 28, 1914.
CIRCULAR No. 604-2:

1. Hereafter, all service slips furnished silver employees upon termination of employment, must show general service as "Excellent," "Very good," "Good," "Mediocre," or "Poor."

2. Whenever it becomes necessary to increase the

silver force, preference will in all cases be given to exemployees holding service slips showing general service as "Excellent," or "Very good."

GEO. W. GOETHALS,
Governor.

Accountable Officials.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,
BALBOA HEIGHTS, C. Z., November 6, 1914.
CIRCULAR No. 74:

Effective November 4, 1914, Mr. Frank Holmes ceased to be an accountable official of the Panama Canal. Any nonexpended property hereafter transferred to the Building Division will be invoiced to Mr. C. A. McIlvaine, Executive Secretary.

Approved: H. A. A. SMITH,
Auditor, Panama Canal.
GEO. W. GOETHALS,
Governor.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,
BALBOA HEIGHTS, C. Z., November 6, 1914.
CIRCULAR No. 75:

Effective at once, Mr. F. R. Blunt ceased to be an accountable official of the Panama Canal and Panama railroad. He will effect a transfer of his accountability to Mr. C. H. Motsett, superintendent of the Panama railroad, who is hereby designated an accountable official of the Panama Canal.

Mr. Motsett will account for all Panama Canal equipment in the service of the Panama railroad.

Approved: H. A. A. SMITH,
Auditor, Panama Canal.
GEO. W. GOETHALS,
Governor.

Requisitions and Related Correspondence.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., November 5, 1914.

Heads of departments and divisions in Balboa Heights Administration Building—The following memorandum from the Chief Quartermaster on improvement in method of making requisitions and method of handling correspondence relating to requisitions is approved and you will be required in future to conform to the methods suggested in Paragraphs 4 and 9:

"1. With reference to the Governor's circular of the 19th instant, relative to the 'Organization of the new Executive Office', there are a few points in connection with the correspondence as now handled in this office that I desire to bring to your attention, not only with the view of eliminating, in so far as practicable, such portion of it as it seems can be dispensed with, but with the idea of bringing forth better results.

"2. A great deal of the correspondence received at this office emanates in the office of the General Purchasing Officer, and pertains to supplies which are ordered to protect requisitions of various divisions, the headquarters of which are now located at the Administration Building.

"3. Heretofore, it has been the practice of this office to refer to the division interested copies of the correspondence received from the General Purchasing Officer with a typewritten memorandum. With the exception of the office of the Engineer of Maintenance, replies are made by memorandums addressed to this office. The Engineer of Maintenance, in replying to any correspondence received from this office and which pertains to supplies ordered on his requisitions, does not reply by memorandum to this office, but prepares a letter addressed to the General Purchasing Officer to be signed by the undersigned.

"4. In view of the instructions contained in the circular above referred to, this office will, in the future, discontinue to refer correspondence to the various divisions by typewritten memorandum, but will use form P. C. 490 and note on the margin of the letter the action required. The divisions in making reply, if it be necessary to refer the subject to the General Purchasing Officer, should, instead of preparing a memorandum addressed to this office, prepare a letter addressed to the General Purchasing Officer to be signed by the undersigned. As all papers pertaining to United States requisitions are filed with the requisitions in this office, it will not be necessary that copies be made for the files of the Executive Office. Copies in duplicate are received from the General Purchasing Officer of all correspondence, and should any division so desire, they can retain the copy which is forwarded from this office. No change will be made in the handling of cablegrams.

"5. The scheme as outlined would result in more prompt action, eliminate considerable paper work, and, in my opinion, be for the best interests of all concerned. This office has heretofore kept a suspense file of all letters referred to other divisions for action, but should the above meet with your approval all papers will, as soon as copies are referred to the division interested, be filed with the requisition under which the supplies were ordered.

"6. In view of the above, I request that you issue the necessary instructions, so that all divisions will,

in the future in so far as practicable, discontinue writing a memorandum to this office on any subject that must be referred to the General Purchasing Officer, and, instead, address their replies to the General Purchasing Officer to be signed by me as Chief Quartermaster. All correspondence addressed to the General Purchasing Officer will be carefully checked by this office, and should it be necessary to make any corrections, the office interested will be duly informed.

"7. Furthermore, a great deal of the correspondence now received from the General Purchasing Officer could be eliminated, should the various divisions in preparing their requisitions furnish a complete description of the supplies required.

"8. It must be understood that, owing to the various classes of equipment and supplies that are required for the use of The Panama Canal, it would materially assist the General Purchasing Officer, in making purchases, if he had complete specifications and description of the article required.

"9. I further request in this connection that you issue a circular addressed to all divisions, with the view of having all requisitions prepared show complete information and description in detail of each and every article required. If practicable, requisitions should give complete specifications using standard specifications when applicable, or catalogue reference, or show previous purchase reference either by W. O. number or circular and class number, so that it will not be necessary for the General Purchasing Officer to refer the subject to the Isthmus for further information or description as to just what is required."

GEO. W. GOETHALS,
Governor.

Organization in Auditor's Office, Accounting Department.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,
BALBOA HEIGHTS, C. Z., November 4, 1914.
CIRCULAR No. 53:

Effective as of November 1, 1914, the following organization will be established for the Auditor's office of the Accounting Department:

1. *Accounting Bureau*—Mr. Ad. Faure, chief accountant, in charge.

This bureau is charged with keeping the accounts of The Panama Canal and the commissary branch of the Supply Department.

1. *General accounts section*—Mr. G. K. Rounsevell in charge. This section is charged with keeping the general books of the Canal.

2. *Costkeeping section*—Mr. C. A. Duff in charge. The work of this section is carried on by the following subdivisions:

A. Supply Department and building construction accounts.

B. Terminal construction.

C. Locks operation, electrical, and Canal transportation.

D. Dredging and general construction.

E. Municipal engineering.

F. Fortifications.

G. Panama railroad cost accounts.

H. Health Department and civil government.

J. Subsistence accounts.

3. *Material and property accounts section*—Mr. L. E. Willson, in charge. This section is charged with keeping accounts with storehouses, making the proper charges for material, supplies, and nonexpended property purchased, issued, or transferred and with auditing the property records. It receives and checks all foremen's orders, invoices for material and supplies issued from storehouses or transferred between storehouses and divisions; receives all bills for material and supplies, purchased in the United States or on the Isthmus, makes the charges therefor against the proper accounts and prepares regular bills against credit customers from invoices sent in from storehouses.

4. *Commissary accounting section*—Mr. Herbert Pearson in charge. This section keeps the accounts for the commissary warehouses, cold storage, manufacturing plants, and for the local commissaries; and prepares monthly bills against credit customers from invoices received from the commissaries.

2. *Auditing Bureau*—Mr. Elwyn Greene, chief examiner, in charge.

This bureau is charged with the duties specified under the various sections of the bureau. In addition to his duties as chief of the auditing bureau, Mr. Greene will act as law clerk and all questions of law relating to the allowance of claims and disbursements of funds will be referred to him. He is also charged with the preparation of contracts on the Isthmus, and with determining that contracts otherwise prepared are in proper form.

1. *Panama Canal cash accounts section*—This section is charged with receiving and registering all bills and with enforcing their collection in due course; with seeing that all amounts received are properly accounted for, both to the office of the Auditor of The Panama Canal and to the accounting officers of the Treasury, and with examining or auditing the accounts of all collecting officers and employes of The Panama Canal

and Canal Zone Government, and with the administrative examination of accounts forwarded to the United States Treasury Department.

2. *Postal accounts section*—This section is charged with auditing the money order, postal savings, and other postal accounts.

3. *Coupon accounts section*—This section is charged with maintaining a stock of commissary and hotel coupon books and meal tickets, auditing the accounts of all employes charged with the receipt, custody, and issue of coupon books and meal tickets, the receipt from hotels and commissaries of all cancelled coupons and tickets, and the counting and proper disposition of same.

4. *Time inspection section*—This section is charged with the duty of checking time of employes, reporting all irregularities therein, and of reporting the misuse of Government material and property.

3. *Claims bureau*—Mr. J. H. Helmer, claim officer, in charge.

This bureau is charged with the detailed handling of claims as indicated under the sections below:

1. *Injury claims section*—This section is charged with investigating all claims arising out of injuries to or deaths of employes of The Panama Canal and the Panama Railroad Company, the conducting of written correspondence in regard thereto, and of all detailed matters connected therewith, including the preparation of pay rolls and other settlements of such claims for action of the Auditor and Governor.

2. *Vouchers section, Panama Canal.*

3. *Accounts payable section, Panama Canal*—The two sections above are charged with the preparation, examination, or audit of all vouchers or accounts payable prior to payment.

4. *Freight claims section, Panama Railroad Company*—This section is charged with handling claims against the Panama Railroad Company, for lost or damaged freight, baggage, or express; also, claims for refunds of tickets. In this section the papers will be prepared in form for final action by the Auditor and the superintendent of the railroad company.

5. *Pay roll section*—This section is charged with the examination, checking, or auditing of all payrolls, including the checking of payments to gold employes against the personnel records and the checking of time books and time rolls against the pay rolls.

4. *Railroad accounts bureau*—Mr. W. H. Kromer, railroad accountant, in charge.

This bureau has general charge of the accounts of the Panama Railroad Company on the Isthmus.

1. *General section*—This section is charged with miscellaneous accounting, auditing, and bookkeeping for the Panama Railroad Company.

2. *Station accounts section*—This section has charge of the accounts of the various station agents and other agents of the Panama Railroad Company.

3. *Ticket accounts section*—This section has charge of the ticket accounts, audits, and reports of the ticket collectors.

5. *General inspection bureau*—Mr. T. H. Chambers, in charge.

This bureau is charged with the inspection of the records and accounts of officers and employes who collect or disburse or have the custody of money or money values, such as hotel and commissary coupon books and meal tickets.

The chief accountant, the chief examiner, the claim officer, and the railroad accountant are each authorized to sign their own names to routine correspondence connected with the work of their respective bureaus. They are authorized to sign the name of the Auditor to routine matters prepared for the Auditor's signature. All correspondence involving matters of policy and all important questions will be prepared for the Auditor's signature. All vouchers, accounts payable, and payrolls, all time vouchers, and settlements made by the injury claims section, and all settlements authorizing payments from Canal Zone funds or from special deposits will be signed by the Auditor.

The chief examiner is authorized to countersign in the name of the Auditor, warrants of the Director of Posts for advances to paymasters, and for payments to the Post-office Department of the United States.

The Auditor may authorize the countersignature of other papers by employes to be designated by him where the volume of such papers makes personal signature impracticable.

Approved: H. A. A. SMITH,
 GEO. W. GOETHALS, Auditor, Panama Canal.
 Governor, Panama Canal.

Master of Transportation and Terminal Trainmaster, P. R. R.

THE PANAMA RAILROAD COMPANY,
 OFFICE OF SUPERINTENDENT,
 BALBOA HEIGHTS, C. Z., November 5, 1914.

CIRCULAR No. 456:

All concerned—Effective November 8, 1914, Mr. S. W. Heald is appointed master of transportation,

Panama railroad and The Panama Canal, vice Mr. F. R. Blunt, resigned.

Mr. W. H. Foster is appointed terminal trainmaster, Panama and Balboa terminals, vice Mr. S. W. Heald, promoted.
 C. H. MOTSEIT,
 Superintendent.

Approved: GEO. W. GOETHALS,
 President.

Commercial Agent, P. R. R. Steamship Lines.

THE PANAMA RAILROAD COMPANY,
 OFFICE OF SUPERINTENDENT,
 BALBOA HEIGHTS, C. Z., November 5, 1914.
 CIRCULAR No. 455:

All concerned—Effective this date, Mr. E. C. Booth is appointed commercial agent on the Isthmus for the Panama Railroad Steamship Line, with office in the receiving and forwarding agency at Colon, reporting direct to this office.
 C. H. MOTSEIT,
 Superintendent.

Approved: GEO. W. GOETHALS,
 President.

Addresses of Employes when Requesting 120-trip Tickets.

THE PANAMA CANAL,
 OFFICE OF EXECUTIVE SECRETARY,
 BALBOA HEIGHTS, C. Z., November 2, 1914.

Heads of departments and divisions in Administration Building, Balboa Heights—For the information of the mailing division, when requesting 120-trip tickets for employes outside of the Administration Building, please state the addresses to which they are to be forwarded.

C. A. MCLVAINE,
 Executive Secretary.

New Form for Request of Transfer of Employes.

THE PANAMA CANAL,
 EXECUTIVE OFFICE,
 BALBOA HEIGHTS, November 7, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

Form P. C. 493, request for transfer of employe, is being printed at Mount Hope, and, in the future, requests for the transfer of employes from one department or division to another must be made on this form before the transfer can be effected. Heads of departments and divisions outside of the Administration Building, Balboa Heights, will make requisition for a supply at once.

C. A. MCLVAINE,
 Executive Secretary.

Tools for Work on New Dry Dock.

THE PANAMA CANAL,
 SUPPLY DEPARTMENT,
 BALBOA HEIGHTS, C. Z., November 7, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

The Division of Terminal Construction, Balboa, will require in the near future, in connection with the steel construction work at the new dry dock, a large number of pneumatic and electric tools, such as pneumatic riveting hammers, pneumatic chipping hammers, electric and air drills, electric and air grinding machines, etc.

It is, therefore, requested that all bad order and serviceable tools of this class that can be released by you be transferred to the storekeeper, Balboa. I would thank you to notify the storekeeper at Balboa by letter of the tools available for transfer.

W. R. GROVE,
 Chief Quartermaster.

Proposals for Backfill, Naos Island.

THE PANAMA CANAL,
 OFFICE OF CHIEF QUARTERMASTER,

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., November 17, 1914, and then opened, for placing 13,000 cubic yards of backfill on Naos Island. The material for the above will be obtained from the Diablo borrow pit. The above quantity to be either increased or decreased at the option of The Panama Canal, within reasonable limits.

Specifications covering this work may be obtained upon application to this office. Plans may be seen in the office of the Assistant Engineer, Fortifications Division, Balboa Heights, C. Z.

Bids must be accompanied by cash, certified check, or post-office money order for five per cent of the amount bid.

Bids should be marked "Proposal for backfill, Naos Island."

The Government reserves the right to reject all bids.
 W. R. GROVE,
 Chief Quartermaster.

Proposals for Clearing Land Defenses.

THE PANAMA CANAL,
 OFFICE OF CHIEF QUARTERMASTER,
 Sealed proposals will be received at the office of the

Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., November 25, 1914, and then opened for:

Cutting to within six inches of the ground all growth and burning all material so cut, over an area of 3,075 acres, more or less, situated near Pedro Miguel, Gatun, and Toro Point. One complete trip, occupying two days, viz., November 16 and 17, will be made over the whole area by a representative of the Division of Fortifications for the purpose of showing bidders the country and conditions. All bids should be in a lump sum for the entire job. This work will be done in January and February, 1915.

Bids must be accompanied by cash, certified check, or post-office money order for five per cent of the amount bid. Form of contract and bond, including specifications, may be obtained upon application to this office. The Government reserves the right to reject all bids. Bids should be marked "Proposals for clearing land defenses."

W. R. GROVE,
 Chief Quartermaster.

SHIPPING INFORMATION.

December Weather Probabilities.

Based on the records at Colon and Ancon for the past seven years, the following weather conditions may be expected to prevail at the Canal entrances during the month of December. Predictions for the month of November were published in THE CANAL RECORD of October 14:

Winds—There will be a considerable increase in the average wind velocity at both Canal entrances with the approach of the dry season. North and northeast winds will prevail on the Atlantic side. The average velocity should be about 12 miles per hour, while the maximum velocity for a 5-minute period may reach 35 or 40 miles per hour.

Northwest winds will prevail over the interior and at the Pacific entrance. The average velocity should be about eight miles per hour, and the maximum velocity may not be expected to exceed 30 miles per hour.

Rain—On the Isthmus the month of December usually marks the transition from rainy season weather to dry season conditions. The dry season occasionally begins as early as the first of December, while in other years rainy season weather continues until the end of the month. The rains tend to linger later in the season along the Atlantic coast than on the Pacific side. The average rainfall for the month is 12 inches at the Atlantic entrance and 4.20 inches on the Pacific side. Twenty-two days with rain may be expected on the Atlantic side, and sixteen on the Pacific. The average number of days with heavy rain (one inch or more), has been four on the Atlantic side and two at the Pacific entrance. About 70 per cent of the total rainfall occurs during the daytime on the Pacific coast and 55 per cent on the Atlantic side.

Fogs—Practically no fogs may be expected at either canal entrance. The average number of days during the month with light or dense fog over the Culebra Cut section of the Canal has been 15. As practically all of these fogs lift or dissipate before 8.30 a. m., they will not affect the navigation of the Canal under present operating conditions.

Temperature—The average air temperature in the shade should be about 80 degrees F. at the Pacific entrance, and 79 degrees F. on the Atlantic side. The extreme maximum may not be expected to rise above 94 degrees F., nor the minimum to fall below 68 degrees F. The mean daily range is approximately eight degrees F. at the Atlantic entrance and 16 degrees F. on the Pacific side.

Barometric pressure—Barometric readings are quite uniform from day to day. Changes in pressure are very slight, except for the regular well marked diurnal fluctuations characteristic of tropical regions. For this reason local barometric readings are of practically no value in forecasting weather conditions. The average sealevel pressure will continue close to 29.85 inches. The maximum reading during the month may not be expected to exceed 30 inches, nor the minimum to fall below 29.65 inches.

Storms—Severe general storms of wide extent seldom visit the Isthmus, although the so-called "Northers" occasionally reach as far south as the Atlantic entrance to the Canal during the period from November to April. These storms are characterized by steady, brisk, northerly winds, ranging in velocity up to 30 or more miles per hour. The winds

alone are of insufficient force materially to affect navigation at the Atlantic entrance, but they are usually accompanied by a heavy sea or swell that may prove troublesome at times outside the breakwater.

Smooth seas and quiet weather may be expected to prevail throughout the month at the Pacific entrance to the Canal.

Tides—Tidal fluctuations need not be considered in navigating the Atlantic entrance to the Canal, as the average tidal range is less than one foot, and the extreme range about two feet.

The average tidal range is about 13 feet at the Pacific entrance, while the maximum range may reach 20 feet.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls, or the purchase of supplies, may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits

*Formerly Ancon.

WEATHER CONDITIONS, CANAL ZONE, OCTOBER, 1914.

Rainfall during the month was above normal over the upper Chagres, Gatun, and Trinidad river basins and along the Atlantic coast, but deficient in the Pacific section. October rainfall was above the station averages at eight stations and deficient at ten stations. The monthly totals ranged from 6.44 inches at Balboa Heights to 26.20 inches at Chillibrillo. The maximum precipitation recorded in one day was 3.99 inches at Colon on the 14th.

The average air temperature, atmospheric pressure and daytime cloudiness were slightly above normal, while the wind movement was generally deficient.

A severe thunderstorm occurred at Colon on the 14th during which the Colon radio station was struck by lightning. On the 19th, during a thundershower, lightning struck the new anemometer and wind vane tower at Balboa Heights.

Night and early morning foginess was of frequent occurrence at the interior stations, but no fogs were observed during the month at either coast station. Of the fogs observed, 57 per cent were dissipated by 6.30 a. m.; 76 per cent by 7.30 a. m., and 98 per cent by 8.30 a. m.

Elevation of Gatun Lake (feet above mean sealevel): Mean for month, 86.01. Maximum, 86.20 on the 2d. Minimum, 85.90 on 5th and 28th. Evaporation from lake surface, 4.233 inches.

The following table summarizes the weather conditions for the month.

STATION.	Pressure (reduced to mean of 24 hours).	Temperature.				Mean relative humidity.	Precipitation.			Wind.					
		Mean.	Maximum.	Date.	Minimum.		Date.	Total inches.	Station average.	Days of .01 inch or more.	Total movement (miles).	Prevailing direction.	Max. velocity in (miles).	Direction.	Date.

*Balboa Heights	29.854	79.7	90	Oct. 14	70	Oct. 1	93	6.44	10.53	20	4,357	N.W.	27	S.	Oct. 7

*Formerly Ancon.

are made, cable information is sent to The Panama Canal.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa from the Union Oil Company at the rate of from 1,300 to 1,600 barrels per hour. The present price is \$1.30 per barrel, reduced to 60° Fahrenheit.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

Tide Predictions.

Panama tide predictions for the next six weeks are given in the following table:

NOVEMBER.

DATE.	Time and height of high and low water.			
	High	Low	High	Low
Wed., Nov. 4	4:12	10:31	16:38	22:44

Fri., Dec. 15	2:1	13:2	2:0	13:5

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Goedetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47.

Sailings of Vessels in Regular Service With the Isthmus.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line vessels sailing about every six days, direct; between Colon and New York by the United Fruit Company and the Royal Mail Company, sailings via Kingston weekly and fortnightly, respectively, between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Mail is despatched both ways by the quickest route. Following are the sailings in the near future:

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of The Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

President's Proclamation of Neutrality.

The President has issued, under date of November 6, a Proclamation of the neutrality of the United States during the present hostilities between Great Britain and Turkey. It contains the same injunctions as the Proclamation of neutrality between Belgium and Germany, issued under date of August 18, and published in THE CANAL RECORD of September 6, 1914.

Decisions as to Measurements and Charges on Vessels Using the Canal.

At a meeting of the Board of Admeasurers held on November 11, the following questions were adjusted:

Question. Shall freight steamers having no special accommodations for passengers, and which do not carry passengers, but have one or two spare staterooms be charged for such space?

Decision. The spare staterooms unless specifically designated for one of the officers of the ship shall be charged for and not deducted from the gross tonnage.

Question. Should regular refrigerators or ice chests secured on deck be entered in the certificates as a part of the regular gross tonnage, or should they be considered as a deck load? Also, should boxes, chests, crates, or pens secured or built on top of deckhouse for ships' stores, or livestock, such as chickens be considered as a deckload the same as if carried on the upper deck, where a cargo load could and would ordinarily be carried?

Decision. In the case of small enclosures, which are evidently for the use of the crew, carrying small livestock, fowls, vegetables, etc., where the volume is insignificant, they should not be measured.

Post-Office Change at Corozal.

The post-office building formerly at Bas Obispo has been moved to Corozal and re-erected on a piece of ground in the rear of the railroad station. It is of one story, 27 by 30 feet in plan, and in rebuilding, no change was made in its exterior appearance. The inside arrangement is slightly different, separate enclosures having been provided for the gold and silver employes. The new office was opened for business on Wednesday, November

11. The old post-office building, situated on the west side of the railroad track, will probably turned over to the Division of Municipal Engineering, for use as an office.

Free Examinations to Determine Existence of Disease.

The Panama Government authorities have been advised that, in order to render all assistance possible to the physicians of the cities of Panama and Colon, in determining and reporting of communicable diseases, arrangements have been made to have the Board of Health laboratory at Ancon Hospital make all examinations for the above purpose free of charge.

Underground Cable for Light and Power Distribution.

A contract has been entered into with the Standard Underground Cable Company of Pittsburgh for the following quantities of underground cable for use in the installation of the light and power distribution system in the permanent Canal villages:

No. 6, single conductor, varnished cambric insulation, lead covered, for 2300 volts, 23,000 feet at \$8.90 per 100 feet.

No. 4, single conductor, arnished cambric insulation, lead covered and armored, for 2300 volts, 15,000 feet at \$14.70 per 100 feet.

No. 6, 3-conductor, varnished cambric insulation, lead covered, for 2300 volts, 7,000 feet at \$23.30 per 100 feet.

No. 4, single conductor, varnished cambric insulation, lead covered, for 2300 volts, 26,500 feet at \$10.10 per 100 feet.

No. 00, 3-conductor, varnished cambric insulation, lead covered, for 2300 volts, 10,670 feet at \$47.50 per 100 feet.

The underground light and power system will comprise a conduit line, together with manholes, which are of two types, a cable pulling manhole, and a subway transformer manhole. The cable pull manholes will contain cables and their splices and taps only. The transformer manholes, in addition to being provided with a subway transformer, will contain cable end bells, a 3-wire primary bus, bus wire supports, subway type cutouts, and cables. The cable end bells and bus wire supports are for use in supporting the 3-wire primary bus, which lies in a horizontal plane. Single phase connections will be made to the bus, and from the bus connections, through subway type cutouts, to the transformer terminals. The system of primary distribution will be 3-phase, delta-connected, 2200 volts, at a frequency of 25 cycles.

Filling and Grading around Gatun Substation.

A pick and shovel crew, using Decauville equipment as a means of transportation, has been engaged in grading around the substation at Gatun. In this work, the hill, upon which the office of the Division Engineer of the old Atlantic Division formerly stood, is supplying the material, which is all earth.

THREE MONTHS' OPERATION.

Over a Million Tons of Cargo Through Canal in First Quarter Year.

During the first three months of commercial operation of the Canal, from August 15 to November 15, the cargo transported through the Canal has amounted to 1,079,521 tons.

During the fiscal year ending June 30, 1914, the Panama railroad carried 643,178 tons of through freight between the two seaboard, and in the preceding fiscal year, 594,040 tons. From this it is seen that between six and seven times as much cargo is passing over the Isthmus now as passed over this route when goods were transhipped by rail. The traffic through the Canal in the first quarter year of its operation has been equal to about 88 per cent of the through traffic over the Isthmus during the preceding two years.

The toll charge on loaded vessels of \$1.20 per net ton, Canal measurement, has been found in this period to be equivalent to a charge of approximately 75 cents on each ton of cargo. The revenue of the Panama railroad from each ton of through freight during the fiscal years 1913 and 1914 was \$3.06. Each through freight train carried an average of 353.21 tons of cargo in the fiscal year 1913, and an average of 302.77 tons in the following year. The average amount of cargo carried on the laden vessels passing through the Canal (in which the 27 vessels which have made the transit in ballast, or are, by nature, not cargo-carriers, are not counted) has been 5,835 tons.

The traffic eastbound through the Canal, or from the Pacific to the Atlantic, and that westbound, or from the Atlantic to the Pacific, are summarized below:

Month	Eastbound		Northbound		Total	
	Ves-sels	Cargo	Ves-sels	Cargo	Ves-sels	Cargo
Aug.	12	57,182	12	49,106	24	106,288
Sept.	30	186,776	27	135,262	57	322,038
Oct.	41	252,288	43	168,069	84	420,357
Nov. 1-15	19	124,834	28	106,004	47	230,838
Total..	102	621,080	110	457,991	212	1,079,521

Over 95 per cent of the traffic may be grouped under these four routes: The United States coastwise trade, the traffic between the Pacific coast of the United States and Europe, the trade of the west coast of South America with the Atlantic seaboard of the United States and with Europe; and traffic from the Atlantic coast of the United States with the Far East.

COASTWISE TRADE.

Eastbound United States coastwise traffic carrying general produce of the Pacific coast to the Atlantic seaboard, has employed the transit of 42 vessels, carrying 250,888 tons of cargo; to this may be added three vessels laden with 14,500 tons of lumber, making an aggregate of 45 vessels with 265,388 tons.

The traffic from the east coast of the United States to the Pacific coast has engaged 43 vessels, carrying 206,482 tons of general

merchandise and manufactures, and seven vessels laden with 34,487 tons of coal, an aggregate of 50 vessels, with 240,969 tons.

The coastwise trade has, accordingly, employed 95 vessels, transporting 506,357 tons of cargo. This is 44.8 per cent of all transits, and 46.9 per cent of all cargo.

UNITED STATES WEST COAST AND EUROPE.

Traffic to Europe from the west coast of the United States has consisted of 19 vessels carrying 136,488 tons of grain, and seven vessels carrying 57,600 tons of general produce, and one vessel with 7,760 tons of gasoline, a total of 27 vessels with 201,848 tons. Traffic from Europe to the west coast of the

more. The aggregate of this outward traffic has been 22 vessels with 150,444 tons of cargo.

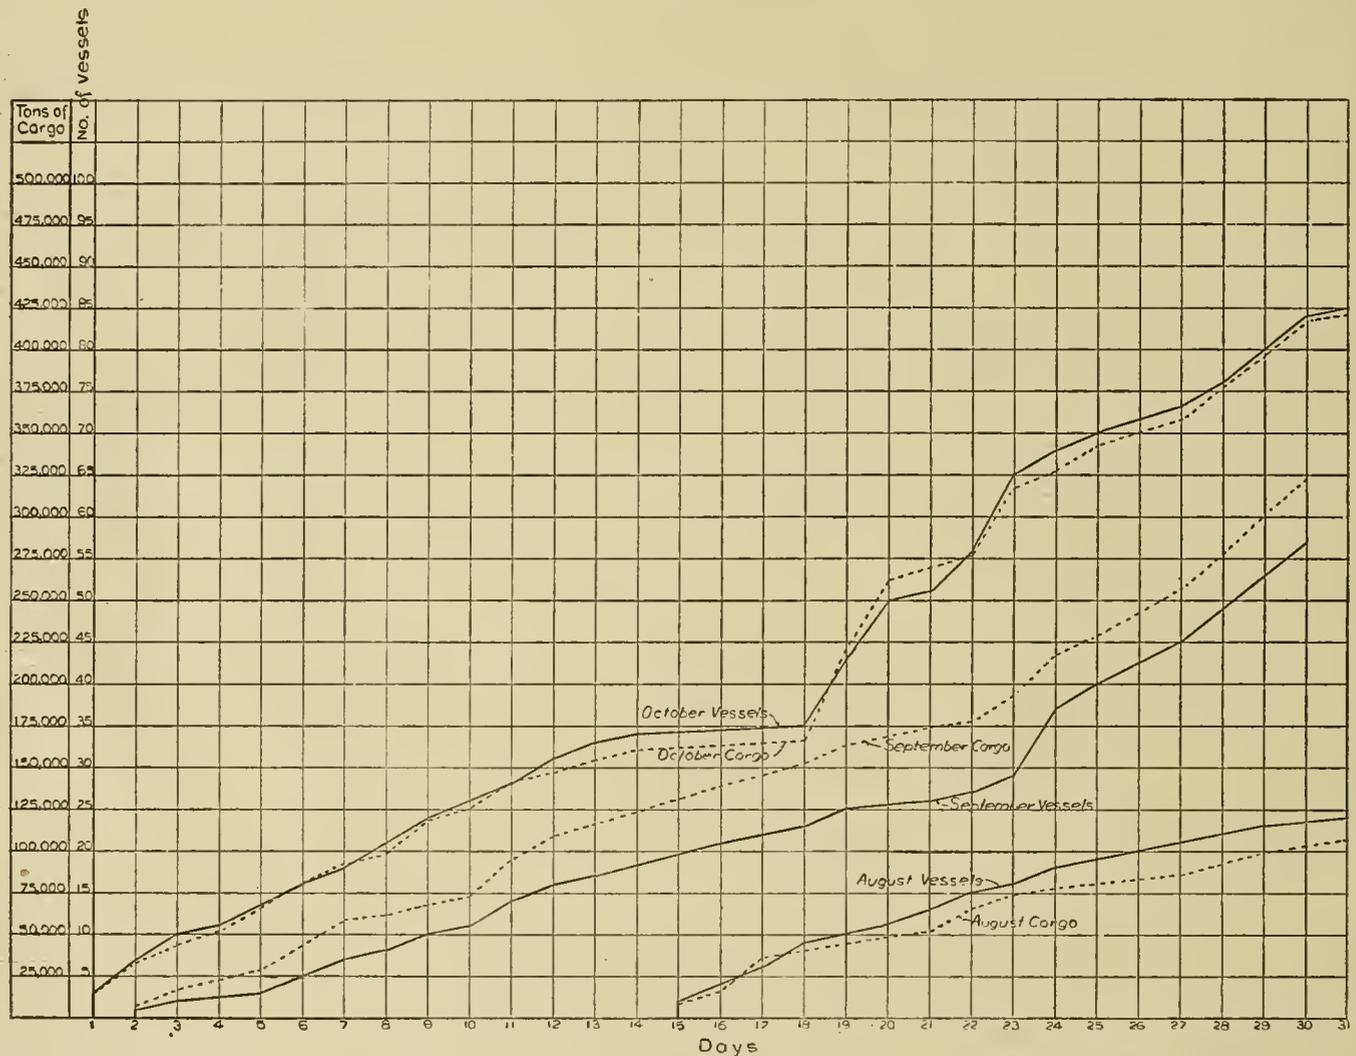

Traffic to the west coast of South America from the United States has consisted of one vessel with 6,010 tons of coal, from Norfolk to Valparaiso; and seven vessels, with 40,746 tons of general manufactures, from New York for distribution between Callao and Valparaiso, an aggregate of eight vessels with 46,756 tons. Traffic to this coast from Europe has consisted of three vessels with 11,350 tons of coal, and two vessels with 5,532 tons of general manufactures, all from Great Britain. The traffic to the west coast of South America has been 13 vessels, with 63,638 tons.

TRANSIT OF VESSELS AND CARGO.

vessels have returned to the Canal, and no cargo has been shipped through direct from the Far East to the United States or to Europe.

MISCELLANEOUS.

Only five loaded vessels have passed through the Canal on routes other than those described above. They have been the *Capella*, carrying 3,400 tons of whale oil from Magdalena Bay to Norway; the *Kingsway* and the *Burcombe*, carrying, respectively, 4,659 and 4,550 tons of coal from Great Britain to Esquimault; the *Bankdale*, with 5,943 tons of coal from Norfolk for Guaymas, Mexico; and the *Wilhelmina*, with six tons of general cargo for the Government of Nicaragua. The

United States has employed three vessels, carrying 14,603 tons of general merchandise and manufactures.

SOUTH AMERICAN WEST COAST.

The traffic from the west coast of South America to the United States and Europe has included 16 vessels carrying 111,846 tons of nitrates, of which the ultimate destination has frequently been determined after the vessels left the Canal; one vessel with 6,200 tons of barley, from Valparaiso for Falmouth; one vessel with 5,278 tons of general produce, from Arica to Liverpool; two vessels with 14,900 tons of iron ore from Cruz Grande to Philadelphia; and two vessels with 12,220 tons of general produce, from Valparaiso to Balti-

TRAFFIC TO THE FAR EAST.

The trade from the Atlantic seaboard of the United States through the Canal to the Far East has been comprised, as follows: To Japan, three vessels with 17,570 tons of refined petroleum and petroleum products, and seven vessels with 25,258 tons of general cargo and 14,817 tons of raw cotton; to China, four vessels with 24,730 tons of refined petroleum; to Australia and New Zealand, three vessels with 22,493 tons of general merchandise, and two vessels with 12,701 tons of refined petroleum.

The total exportation to the Far East through the Canal has amounted to 117,574 tons, carried in 19 vessels. None of these

five vessels carried an aggregate of 18,558 tons of cargo.

SUMMARY.

The traffic over the several routes may be summarized, as follows:

	Ves-	Tons of
	sels.	Cargo.
Coastwise, eastbound.....	45	265,388
Coastwise, westbound.....	50	240,969
U. S. Pacific coast to Europe.....	27	201,848
Europe to U. S. Pacific coast.....	4	21,102
S. America to U. S. and Europe.....	12	150,444
U. S. and Europe to S. America.....	13	63,638
U. S. Atlantic coast to Far East.....	19	117,574
Miscellaneous traffic.....	5	18,558
Vessels without cargo.....	27
Total.....	212	1,079,521

The progress of traffic through the Canal during the three months period is shown

graphically in the accompanying chart. The abscissæ are in all instances the days of the month. The ordinates are the number of vessels, in solid lines, and their aggregate tonnage, in dotted lines.

Increased Emigration in October.

The report of quarantine operations for the month of October show an increased emigration from the Isthmus. The actual number of persons embarking at the terminal ports was 4,287, and the number landing 2,297, an excess of embarkations over debarkations of 1,990, as compared with a net emigration during September of 1,155. The total net emigration since July 1913, when the outward flow first began, is 19,867, an average of over 1,241 a month. These figures include both first and second-class passengers, but the outward travel was for the greater part made up of Canal laborers returning to their native countries on account of the closing down of the Canal work.

The total number of persons embarking at the ports of Colon and Cristobal for foreign ports during October was 3,625, consisting of 1,296 cabin and 2,329 steerage passengers. The number of persons landing from foreign ports was 1,863, consisting of 1,338 cabin and 525 steerage passengers. The excess of those who embarked over those who landed was 1,762. The number of steerage passengers who landed is less than half the total for September, and is considerably less than the total of any previous month for several years. Deck passengers represent the labor class, and the falling off noted above would appear to indicate that the publicity given the fact that opportunity for labor on the Canal is growing less and less, is beginning to have its effect. The inbound first-class passenger traffic on the other hand shows some increase.

Of the classes comprising the October immigration, 27 persons arrived in steerage from Europe, 255 from the West India islands, 103 from Colombia, 42 from Costa Rica, 34 from the United States, and 30 from Cuba. The immigration from the West Indies in the steerage class constitutes a new low record. Of the countries at present furnishing Isthmian immigration, Colombia appears to be the only one that is showing a tendency to increase. A total of 196 persons entered the Atlantic terminal ports from Bocas, and 244 from other coast towns of the Republic. The entries from Bocas show a falling off from September. Of the arrivals at Colon and Cristobal in the steerage class, 1,134 were men, 496 were women, and 220 were children. The number of persons arriving "In transit" was 607, which is less than any previous month for a considerable period.

The number of persons arriving at the ports of Balboa and Panama during October from foreign ports was 434, consisting of 274 cabin and 160 steerage passengers. The number of persons departing for foreign ports was 662, consisting of 559 cabin and 103 steerage passengers. The number of those who embarked over those who landed was 228.

One hundred and fourteen vessels entered the ports of Colon and Cristobal in October, and 62 at Balboa, a total of 176, as compared with a total of 140 for September. No disease of a quarantinable nature arrived at the terminal ports during the month.

The first of the three masts at the Darien radio station was erected to the full height of 600 feet on Wednesday, November 11.

PERMANENT MEDICAL STORE.

Work Begun on a Reinforced Concrete Structure at Ancon.

Work has been begun by forces of the Building Division on a permanent fireproof and dampproof structure, in the vicinity of the laundry plant and commissary at Ancon, for use by the Health Department as a medical storehouse. The building will be of reinforced concrete throughout, with an annex constructed of the same material for the storing of inflammables. The main store will be 49 by 142 feet, and the annex, 12 by 27 feet in plan. An unloading platform, 49 feet long and 10 feet wide, will extend along the east side of the building, paralleling the present railroad track which ends at the commissary. There will also be a wagon platform on the north end, seven by 20 feet in plan.

The foundation will be 16 inches thick, and the main walls, 11 inches thick with 8-inch panels, will rise to a height of 13 feet in the clear. The floor will be 11 inches thick, capable of supporting a weight of 300 pounds to the square foot. To make it damp-proof, the floor will consist of two layers of concrete, a bottom layer, four inches in thick-

opening six feet seven inches wide. The openings in the office will all be screened.

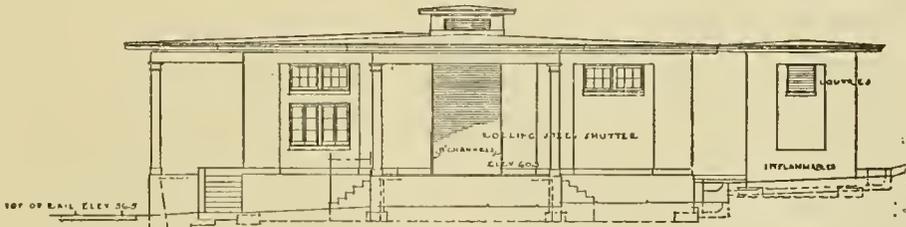

The interior of the building will be divided by wooden partitions into a main storeroom, occupying about two-thirds of the total space, a survey room, a dry room, refrigerator, office, and toilet. The main storeroom will be fitted with two rows of detached double shelving, with adequate aisle space all around. In the survey and dry rooms, the shelving will be against the walls, and will extend from floor to ceiling on all four sides.

The annex for the storage of inflammable materials, situated at the northeast end, will be connected to the main supply room by a covered passageway, slightly depressed.

The platforms will be covered, and the roofs will be supported by concrete columns, 12 inches square, spaced on 16-foot centers, on unloading platform, and 19 feet three inches on wagon platform, all with caps of seven members.

Examination for Levelmen and Transitmen.

An examination for levelmen and transitmen will be held in the drafting room of the new Administration Building on Sunday

NORTH ELEVATION OF MEDICAL STOREHOUSE.

ness, laid over the earth fill, and a top layer seven inches thick, separated from the first by a 5-ply thickness of pitch and felt.

The roof will be constructed of concrete, four inches thick, overlaid first, by a 5-ply thickness of pitch and felt, and second, by a 1½-inch coating of finished cement, making it entirely waterproof. There will be two monitors in the roof, fitted with louvres for ventilation, located, one each about 30 feet from each end of the building. The roof will be entirely surrounded by a 3-foot cornice of a design tending to relieve the otherwise severely plain aspect of the structure. Its construction involves the pouring of concrete for a part of the main walls and the cornice in one operation. The concrete for the walls and cornice will be poured in three sections; the last section will extend from the tops of the windows, and the forms will include both the part of the wall remaining and the cornice.

The windows will be distributed, as follows: Six, three feet high and nine feet 10 inches long, and one, three feet high and six feet seven inches long on the west side; five of the larger and two of the smaller of the sizes above-mentioned on the east side; one, 13 feet one inch by three feet, and two of the smaller size on the south end; and two of the smaller size on the north end. There will also be windows, one on either side of the outside entrance to the office part of the building; and one on the east side located directly below the upper windows at this point. All of the windows, except those mentioned in the preceding sentence, are located well up to the roof. There will be three roller doors, one on the east side, one on the north end, with opening 12 by seven feet six inches, and one opposite the inflammable section, with

morning, December 6, at 9 o'clock. Send all applications to Office Engineer, Room 343, Administration Building, Balboa Heights, C.Z.

O. E. MALSBUY,
A. WILSON, *Committee.*

EXECUTIVE ORDER

Amending Paragraph 49 of the "Rules and Regulations for the Operation and Navigation of the Panama Canal and Approaches Thereto, Including All Waters Under Its Jurisdiction."

By virtue of the authority vested in me under The Panama Canal Act, Paragraph 49 of the "Rules and regulations for the operation and navigation of the Panama Canal and approaches thereto, including all waters under its jurisdiction," promulgated by Executive Order No. 1990, dated July 9, 1914, is hereby amended to read, as follows:

49. No radio tolls, either coast station or forwarding, will be imposed against ships on radiograms transmitted by ships on Canal business. There will be no charge made against The Panama Canal, by Canal Zone land lines or radio stations, for the transmission of radiograms to ships on Canal business.

WOODROW WILSON.

THE WHITE HOUSE,
November 4, 1914.

[No. 2073.]

Ancon Pay Office Closed.

The Ancon pay office will be closed and removed to the new Administration Building, Balboa Heights, at noon on Saturday, November 21, 1914.

BALBOA HEIGHTS, C. Z. JOHN H. MCLEAN,
November 17, 1914. *Paymaster.*

HYDRAULICS OF THE LOCKS.

Observations of Flow of Water during Lockages and of Current Effects.

The phenomena of water pressures and currents in the locks of the Canal have been the subject of special study by Mr. Richard H. Whitehead, formerly testing engineer in connection with the installation of machinery in Pedro Miguel and Miraflores Locks, and now assistant superintendent of the Pacific locks. His observations on the more noteworthy effects were contained in a paper entitled, "Hydraulics of the locks," which he presented before a meeting of the Panama Section of the American Institute of Electrical Engineers. The following is an excerpt from his paper:

Each set of miter gates was built to withstand full hydrostatic pressure, and at the time the locks were watered, this pressure was successively applied to each set. The main operating gates at Pedro Miguel are 79 feet high, their sill is at elevation +13. The maximum elevation of Gatun Lake is +87 feet. If a lock chamber were unwatered, the upper operating gates would be required to withstand a 74-foot head of water. As each miter gate leaf is 65 feet in length the full hydrostatic pressure per leaf would be then 5,550 tons.

In normal operation, the maximum pressure on any set of gates occurs on the lower operating gates of Miraflores upper lock. The sill of these gates is at elevation -18.3. When the water in the lower lock is at low tide, or -10, and the upper lock at Miraflores Lake level, elevation +55, the net pressure per leaf is 5,380 tons, practically equivalent to the maximum as calculated above.

The mechanism for the remote control of the lock gates is not equipped with an interlock to prevent the opening of a set of leaves before equalization of water levels. None is necessary, as the miter gate moving machines are just strong enough to operate the gate after equalization. For example, in the case of a difference of two feet in levels on the two sides of the upper operating gates at Pedro Miguel, there would be 74 feet of water against the upstream side, and 72 feet against the downstream side. This difference would result in a net downstream pressure of 600,000 pounds. With reference to the miter gate moving machine, this pressure may be considered as applied perpendicularly at the center of the leaf or a distance of 32½ feet from the pintle. The perpendicular distance from the pintle to the center line of the strut of the moving machine is 11.5 feet, approximately, when the gate is closed. To open the leaf against a water pressure of 600,000 pounds, the strut would have to exert a pull of about 1,700,000 pounds. The maximum pull the strut can exert on opening a leaf is approximately 1,000,000 pounds, and an attempt to open a leaf under these conditions would stall the motor after compressing the springs in the strut.

On filling or emptying a chamber, the water surges after equalization and back pressure on the gates results. This back pressure varies from six to 12 inches, and causes the gate to open eight inches between miter points, or to the full limit of strut spring compression. It requires 185,000 pounds to compress the springs solid, and a back pressure of a few inches is sufficient to do this. This helps to open the gates, and also gives a positive

signal that equalization has occurred.

In most cases there is a difference in density of the water on the two sides of the operating gates, as with every lockage some salt water is locked up into the fresh water supply, as testified by the increasing salinity of Miraflores Lake. When conditions of equilibrium are established after opening the culvert connecting the chambers on the two sides of the gates the water levels are not the same.

For instance, at the 82-foot gates at the lower end of Miraflores Locks, which are generally kept closed while the culvert to the sea is kept open, the fresh water on the upstream side is from six to eight inches higher than the sea water on the downstream side. This difference depends on the difference of densities and also on the position of the culvert outlet.

Assume the outlet at elevation of bottom of lock, and suppose the relative densities to be as 1.02 : 1.00. The sill of the gate is -50. High tide is +10. With 60 feet of water on the downstream side of the gate there would be $\frac{1.02}{1.00} \times 60$ or 61.2 feet on the upstream side, or a difference in level of 1.2 feet. The total pressure on the gate depends on the density and the square of the head. Consequently, the total pressure per leaf would be 150,000 pounds more on the upstream side than on the downstream side. To avoid this large difference in pressure, a specially constructed culvert outlet was placed at elevation -25, or 25 feet above the sill. This makes the resultant levels for the above condition, 60 feet on the downstream side and (60-25) 1.02 plus 25, or 60.7 feet on the upstream side, and reduces the net pressure to about 24,000 pounds per leaf.

In making lockages at Miraflores, the levels on the two sides of the lower operating gates in the upper chamber differ by one foot when equilibrium is reached between the lower and upper chambers. The net pressure per leaf tending to resist the opening of the leaf for this condition is approximately 100,000 pounds. The gates are always opened when they "Crack" from backpressure before such a condition of equilibrium is reached; otherwise, it would put a severe duty on the miter gate moving machinery and a heavy current would flow from the upper to the lower lock that would be undesirable, as soon as the gates were opened.

The main resistive force to the movement of a miter gate leaf is the difference in water levels on the two sides of the gate caused by movement of the leaf. For instance, the area of the space between the upper guard gate and the upper operating gate is 11,000 square feet. If the upper guard gate is opened two feet, the area is enlarged by about 137 feet. As the minimum immersion of the guard gate is about 40 feet, the volume displaced by this movement amounts to 5,480 cubic feet. This lowers the water on the downstream side about six inches and creates a large resisting force to further outward, upstream movement of the guard gate until the difference in level is relieved by the influx of water through the opening between the leaves and through the auxiliary culvert. Similarly for opening the upper operating gates and using the 900-foot lock. For a 4-foot movement, assuming no influx, the water in the chamber would be lowered two inches and the resistive force would be 50,700 pounds per leaf. It has been found from the duty cycle of the moving ma-

chine that the maximum torque occurs on opening the gate, about 20 seconds after the gate is opened, and on closing about 20 seconds before gate is closed.

On account of the conditions just described, it has been found to be most satisfactory to open one of the leaves from 15 to 20 seconds before the other. This gives about the same opening between leaves as a simultaneous opening, as they join at an angle of 120 degrees, and gives a comparatively light duty to the motors, as only half the water is displaced. In opening four leaves, such as the upper guard and upper operating gates, one of the guard leaves is opened first; five seconds later, the operating leaf on the same side; 15 seconds after this, the other guard leaf; and five seconds after this, the second operating leaf. This method increases the normal time for opening the two gates by 25 seconds, but is much less severe on the operating machinery. For operating the gates in the dry, scarcely any power is required. The effect of eddy currents and backing-up of the water against the gate recess also tend to prevent movement of the gates, but these factors are small compared to those given.

In filling a chamber having an area "A" from an unlimited supply the time till equalization of surfaces is attained is formulated:

$$T = \frac{2A}{C^2} \sqrt{\frac{h}{2g}}$$

where h is the initial head,

This formula applies to either filling or emptying the chambers. The time till equalization occurs is from the commencement of valve opening to the cracking of the gates from back pressure.

The area of each lock culvert, F , is 255 square feet; $\sqrt{2g}$ is 8.04; the area of the chamber, A , is 123,000 square feet. Substituting these values in the above formula, T equals $\frac{\sqrt{h}}{C} \times 120$ seconds; if expressed in minutes, T equals $\frac{2\sqrt{h}}{C}$; if two culverts are used, T equals $\frac{\sqrt{h}}{C}$.

For filling the 900-foot chamber, using the center wall culvert, it takes 20 minutes to fill from elevation 53.8 to elevation 84.9.

For filling the chamber using the side wall culvert, it takes 12.6 minutes to fill from elevation 54.1 to elevation 84.9.

For filling the chamber, using both culverts, it takes 7.9 minutes to fill from elevation 53.9 to elevation 84.8.

Substituting in the formula, the coefficient of discharge, C , is found to be 56 per cent for the center wall culvert; for the side wall culvert, 88 per cent, and for both culverts, together, 70 per cent.

In emptying the chamber, it takes 16.5 minutes to empty from elevation 84.6 to 53.6 using the center wall culvert, and the coefficient of discharge is found to be 67.5 per cent; for the side wall culvert, 15 minutes to empty from 84.8 to 50.8, gives a coefficient of 78; and using both culverts, eight minutes to empty from 84.8 to 53.4, gives a coefficient of 70 per cent.

Using both culverts to fill or empty, the coefficient is 70 per cent, and eight minutes are required to handle nearly four million cubic feet of water. The maximum rate of rise or fall of water in the locks is a little over five feet per minute; the maximum rate of flow is 615,000 cubic feet per minute. Higher rates of rise and fall can be obtained by using intermediate lock sections, but the above is con-

sidered the maximum safe rate at this time for handling vessels.

It was expected that the rate of filling or emptying would decrease with the decrease in difference of levels, or head, faster than has been found to be the actual case. The rate for a long period is almost constant. This is due to the momentum of the water, which retards the flow at the beginning and accelerates it toward the end of the operation. This momentum is the cause of the overrun of levels and the resulting back pressure on the gates, previously referred to.

FRICION LOSSES.

In order to determine friction losses in the valves and culverts, the valves in the east culvert of Pedro Miguel Lock were opened wide, allowing full discharge through the culvert from Culebra Cut, with the surface of water at 84.8 feet, to Miraflores Lake, then at elevation 52 feet. The rate of discharge through the culvert was found to be 7,660 cubic feet per second.

The elevations of the water after equilibrium was reached as obtained at several points were, as follows:

	Feet.
Point (1) Elevation Gatun Lake at Gamboa.....	84.8
Point (2) Elevation Gatun Lake at lock forebay.....	83.9
Point (3) In guard valve shaft.....	76.6
Point (4) In culvert shaft under dam.....	72.1
Point (5) In 350-foot lock.....	63.5
Point (6) In 550-foot lock.....	57.6
Point (7) In Miraflores Lake.....	52.0

The potential heads, or heads above datum 52 are, as follows:

Point (1) Gatun Lake at Gamboa.....	32.8
Point (2) Gatun Lake at lock.....	31.9
Point (3) In guard valve shaft.....	24.6
Point (4) In culvert shaft under dam.....	20.1
Point (5) In 350-foot lock.....	11.5
Point (6) In 550-foot lock.....	5.6

Neglecting currents in the lock sections, the velocities through the culvert at different points obtained by dividing the full discharge by the various cross-sectional areas were, as follows:

	Feet per second.
Through guard valves and screens.....	17.6
Through upper culvert.....	23.0
Through rising stem valves.....	26.6
Through main culvert.....	30.0

The corresponding velocity heads, found from the formula $\frac{V^2}{2g}$ are, as follows:

	Feet.
Through guard gates.....	4.8
Through upper culvert.....	8.2
Through rising stem valves.....	11.0
Through main culvert.....	14.0

The total heads or potential plus velocity heads as obtained by addition are:

Point (1) Gatun initial lake level head at Gamboa.....	32.8
Point (2) Gatun lake at locks.....	31.9
Point (3) Through guard valves and screens.....	24.6
Point (4) Through upper culvert, 20.1 + 8.2.....	28.3
Point (5) Through culvert for 350-foot lock, 11.5 + 14.....	25.5
Point (6) Through culvert for 550-foot lock, 5.6 + 14.....	19.6
Point (7) Outlet.....	14.0

The friction losses for the various culvert sections are obtained by subtraction between above and are, as follows:

	Loss head, Feet.	Per-cent total
Between (1) and (2) Through channel in Culebra Cut.....	0.9	2.7
Between (2) and (3) Through screens intake, and guard valves.....	2.5	7.6
Between (3) and (4) Through 200-foot of upper culvert.....	1.1	3.3
Between (4) and (5) Through rising stem valves Nos. 314 and 315 and connecting culvert.....	2.8	8.6
Between (5) and (6) Through rising stem valve Nos. 320 and 321 and connecting culvert.....	5.9	18.0
Between (6) and (7) Through rising stem valves Nos. 326 and 327, 332, and 333 and connecting culvert.....	5.6	17.0

These values are plotted and it was found

that the total head curve was practically a straight line which changed its slope only with change of culvert cross-sectional area, excepting a sudden drop due to friction of the intake screens. The presence or number of valves had no effect on the friction losses, showing that the friction in the valves is a negligible amount.

The slope of the total head curve for the various culvert cross-sections showed that the friction losses were nearly proportional to the square of the velocity, which approximates the usual assumption.

CURRENTS IN THE LOCKS.

Knowledge of the currents set up during lockage is necessary for the intelligent handling of a vessel in the locks. The locks are filled through openings in the bottom of the chamber. All these openings are of the same size and several are connected to each of the lateral culverts, which lead from the main culverts. It was expected that about the same flow would take place through each opening, but experience shows that the flow through the opening at the end of the lateral culvert is much greater than that through the openings nearer the main culvert. When the side-wall culvert is used for filling, the water rises from the bottom of the lock next to the center wall at a greater rate than along the side wall. This tends to carry a vessel towards the side wall. If there is a quantity of salt water in the chamber when filling begins, the tendency to force the vessel toward the wall, the culvert of which is being used for the filling, is especially great. This reason is that, in addition to the normally more rapid rise along the opposite wall, the fresh water is forced to the top with augmented velocity by the pressure of the denser salt water.

This tendency was distinctly demonstrated during the up-lockage of the *Santa Clara* through the Pacific Locks on June 18. In the lower chamber at Miraflores, when the side wall culvert was being used, the towing locomotives could not hold the vessel away from the side wall. In the upper chamber where the water was comparatively fresh, this trouble was not experienced. At Pedro Miguel, both culverts were used and the vessel remained in the center of the chamber with hardly any effort on the part of the locomotives. All merchant vessels are required to have their sides clear before passage through the Canal, so that they can rub against the lock walls without injury.

In filling a chamber, the surface disturbance of the water is considerable. Several small rowboats have been swamped by it. In emptying, the surface is placid and there is scarcely any tendency to move a vessel. No tendency toward movement of vessels along the axis of the locks has been noted in either filling or emptying.

It has been observed that in all cases where a gate is opened after equalization between water of differing salinity on its two sides, there is a heavy surface current from the fresh to the relatively salty water.

An investigation was made at Miraflores Locks to determine the maximum average current velocity at various depths; in other words, to determine the current velocity for ships of various drafts. Seven telephone poles, of lengths from four to 35 feet, were assembled in Miraflores Lake and weighted, so that they would float in a vertical position, with only a foot or so protruding above the surface. These floats were locked through the

west flight of Miraflores Locks, from Miraflores Lake to the sea, and the effects of the currents noted by plotting the positions of the floats against time.

In all cases, the gates were opened immediately after they cracked from back pressure, and the floats were released at the center of the chamber, on the north side of the opening gates, in a position as near the gates as a vessel would be allowed. The lockage was made when the Pacific was at low tide; the depth of water over the sill of the upper lock and over the sill of the lower lock was 41 feet, on equalization for the respective openings of gates.

Observations were made of the currents set up on opening the upper gates, between Miraflores Lake and the upper level; on opening the operating gates between the upper and lower levels; and on opening the lower gates, between the lower level and the Pacific channel.

On the opening of the upper gates, there was plainly discernible a surface current toward the lower end of the chamber. This current ran to the end of the chamber, when a reverse current was set up; the shorter floats traveled at the rate of this current and reversed with it at the lower end of the chamber. The shorter floats remained in a vertical position, but the longer floats leaned as much as 30 degrees from the vertical, and rose and fell a distance of about three feet. This indicated that the longer floats were affected by a current below in a reverse direction from that of the top current. The shorter floats remained in the center of the chamber until they reached its end, but the floats immersed to a depth greater than 20 feet drifted toward one side or the other during the observations. The maximum velocity was attained by the surface floats, and amounted to 1.2 miles per hour. The 30-foot float had a maximum velocity of only 0.2 mile per hour.

On opening the operating gate between the upper and the lower level of the locks, with the water in the two chambers equalized, the effect on the floats of respective lengths was practically the same as when the gate was opened between the lake and the upper level, except that the floats traveled at a faster rate. The maximum velocity was 2.3 miles for the surface float, and 0.4 for the 30-foot float. This is ascribed to a greater difference in density of water on the two sides of the gate than was the case in locking the floats from the lake to the upper level.

The strongest currents were obtained on opening the lower gates, between the lower level and the sea. Since there was no obstruction to the outward flow of the relatively fresh water, there was, no reverse surge on the surface. There was, however, a steady decrease of speed as the forebay widened. The maximum velocity was 2.80 miles per hour for the surface float and 0.3 mile for the 30-foot float.

In the test at the lower end of the locks, the shorter floats floated down the center of the locks, turning to the west on leaving the forebay. The tendency to float to the west on leaving Miraflores Locks had been observed before in barges and other vessels of light draft, and the path taken by such vessels when allowed to drift free was the same as that of these floats. The two shorter floats remained in a vertical position throughout the operation, but the others had at times an inclination as great as 30 degrees.

No trouble has been experienced due to those fresh salt water currents while the loco-

motives have control. The current from the lower locks to sea makes it somewhat difficult for a vessel to leave the locks in it, as there is a very strong tendency to carry the ship over toward the bank of the canal as soon as the ship is outside the locks.

The vessel can be held until the current subsides in the lock chamber, but this means a delay of 30 minutes. Accordingly, the plan adopted is to bring the vessel up to speed with the locomotives and cast off the lines in the chamber before the ship leaves the locks. The vessel can then pick up sufficient steerage way before leaving the locks to care for itself.

New Publications—Bureau of Mines.

The following new publications have been issued by the Bureau of Mines, Department of the Interior:

BULLETIN.

Bulletin 83—The humidity of mine air, with especial reference to coal mines in Illinois, by R. Y. Williams, 1914. 69 pp., 7 figs.

TECHNICAL PAPERS.

Technical paper 65—A study of the oxidation of coal, by H. C. Porter and O. C. Ralston, 1914. 30 pp., 12 figs.

Technical paper 84—Production of explosives in the United States during the calendar year 1913, by A. H. Fay, 1914. 12 pp.

Technical paper 93—Quarry accidents in the United States during the calendar year 1913, compiled by A. H. Fay, 1914. 66 pp.

MINERS' CIRCULARS.

Miners' circular 16—Hints on coal mine ventilation, by J. J. Rutledge, 1914. 22 pp.

Miners' circular 19—The prevention of accidents from explosives in metal mines, by Edwin Higgins, 1914. 16 pp., 11 figs.

NOTE—Only a limited supply of these publications is available for free distribution, and applicants are asked to cooperate in insuring an equitable distribution by selecting publications that are of especial interest. Requests for all papers cannot be granted without satisfactory reason. Publications should be ordered by number and title. Applications should be addressed to the Director of the Bureau of Mines, Washington, D. C.

Visit of House Committee on Appropriations.

The following members of the House Committee on Appropriations arrived on the Isthmus on the *Ancon* on Saturday, November 14: Representatives John P. Fitzgerald of New York, chairman; Swagar Sherley of Kentucky, William M. Calder of New York, Bryan F.

Mahan of Connecticut, and George White of Ohio. Accompanying the committee were the following: Representatives John J. Casey and A. J. Barchfeld of Pennsylvania, Daniel J. Griffin of New York, Edward W. Saunders of Virginia, and James R. Mann of Illinois.

The members of the committee and their guests were taken through the Canal on Sunday, November 15, on the Panama railroad steamship *Advance*, and on Monday, visits of inspection to various parts of the work were begun. The hearings are being held in the board room at the new Administration Building on Balboa Heights, and began on Wednesday, November 18, at 8 a. m.

Canal Excavation in October.

The following is a detailed statement of Canal excavation during the month of October.

THANKSGIVING.

The President's Proclamation.

By the President of the United States of America. A proclamation:

It has long been the honored custom of our people to turn in the fruitful autumn of the year in praise and thanksgiving to Almighty God for his many blessings and mercies to us as a nation. The year that is now drawing to a close since we last observed our day of national thanksgiving has been, while a year of discipline, because of the mighty forces of war and of change which has disturbed the world, also a year of special blessing for us.

It has been vouchsafed to us to remain at peace, with honor, and in some part to succor the suffering and supply the needs of those who are in want. We have been privileged by our own peace and selfcontrol in some degree to steady the counsels and shape the hopes and purposes of a day of fear and distress. Our people have looked upon their own life as a nation with a deeper comprehension, a fuller realization of their responsibilities, as well as of their blessings, and a keener sense of the moral and practical significance of what their part among the nations of the world may come to be.

The hurtful effects of foreign war in their own industrial and commercial affairs have made them feel the more fully and see the more clearly their mutual interdependence upon one another and has stirred them to a helpful cooperation such as they have seldom practiced before. They have been quickened by a great moral stimulation. Their unmistakable ardor for peace, their earnest pity and disinterested sympathy for those who are suffering, their readiness to help and to think of the needs of others, has revealed them to themselves as well as to the world.

Our crops will feed all who need food; the selfpossession of our people amidst the most serious anxieties and difficulties and the steadiness and resourcefulness of our business men will serve other nations as well as our own.

The business of the country has been supplied with new instrumentalities and the commerce of the world with new channels of trade and intercourse. The Panama Canal has been opened to the commerce of the nations. The two continents of America have been bound in closer ties of friendship. New instrumentalities of international trade have been created which will be also new instrumentalities of acquaintance, intercourse, and mutual service. Never before have the people of the United States been so situated for their own advantage or the advantage of their neighbors, or so equipped to serve themselves and mankind.

Now, therefore, I, Woodrow Wilson, President of the United States of America, do hereby designate Thursday the 26th of November next as a day of thanksgiving and prayer, and invite the people throughout the land to cease from their wonted occupations, and in their several homes and places of worship render thanks to Almighty God.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the City of Washington this 28th day of October in the year of our Lord one thousand nine hundred and fourteen and of the independence of the United States of America the one hundred and thirty-ninth.

By the President: **WOODROW WILSON.**
ROBERT LANSING, Acting Secretary of State.

JOINT LAND COMMISSION.

Awards.

Award No. 64, docket Nos. 425, 426, and 1357, October 29, 1914, in the matter of the claims of James Heath, for property located near Frijoles and Tabernilla—An award is hereby made against the United States, in favor of the person hereinafter named, in the sum of \$100, United States currency.

This award shall be paid to the claimant hereinafter named, in the amount specified, on or before the 29th day of November, 1914, and if payment or the tender of payment of this award is not made on or before that date, such award shall thereafter bear interest at the rate of six per centum per annum until paid.

James Heath, docket Nos. 425, 426, and 1357, for all rights, claims and other interests in growing crops, fruit trees and other improvements which the said Heath may possess or may have possessed on the lands of "Barro Colorado" near the town of old Frijoles, and for all rights, claims, and other interests in growing crops, fruit trees, house tax No. 1199, and any other improvements which the said Heath may possess or may have possessed in or near the town of Tabernilla, the sum of \$100, United States currency.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Award No. 65, docket numbers as noted, October 30, 1914, in the matter of sundry claims—An award is hereby made against the United States, in favor of the persons hereinafter named, in the sum of \$1,950, United States currency.

This award shall be paid to the claimants hereinafter named, in the amounts hereinafter specified, on or before the 30th day of November, 1914, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum until paid.

Martin Rizo, docket No. 748—For all rights, claims, and other interests in growing crops, fruit trees, and other improvements which the said Rizo may possess or may have possessed at a place called "Buringa," near the town of Frijoles, the sum of \$600, United States currency.

Eugenie Theophile, docket No. 487—For all rights, claims, and other interests which the said Theophile may possess or may have possessed in houses tax Nos. 495, 498, 500, and 530, located on the "Bosque estate," the sum of \$1,350, United States currency.

Total, \$1,950, United States currency.
FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Award No. 66, docket numbers as noted, October 31, 1914, in the matter of sundry claims—An award is hereby made against the United States, in favor of the persons hereinafter named, in the sum of \$1,060, United States currency.

This award shall be paid to the claimants hereinafter named, in the amounts hereinafter specified, on or before the first day of December, 1914, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall hereafter bear interest at the rate of six per centum per annum until paid.

Aurora Bernetti, docket No. 523—For all rights, claims, and other interests in growing crops, fruit trees, and other improvements which the said Bernetti may possess or may have possessed near the quebrado El Macho and near Caimito, not covered by payment of the Disbursing Officer in February, 1912, voucher 18972, covering improvements near Caimito and Barbacoas, the sum of \$1,000, United States currency.

Henry Doffees, docket No. 742—For all rights, claims, and other interests in growing crops, fruit trees, and other improvements which the said Doffees may possess or may have possessed near Frijoles and in or near Tabernilla, the sum of \$60, United States currency.

Total, \$1,060, United States currency.
FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Award No. 67, docket No. 443, November 4, 1914, in the matter of the claim of William Kerr for property located near Frijoles—An award is hereby made against the United States, in favor of the person hereinafter named, in the sum of \$265, United States currency.

This award shall be paid to the claimant hereinafter named in the amount specified, on or before the fourth day of December, 1914, and if payment or tender of payment of this award is not made on or before that date, such award shall thereafter bear interest at the rate of six per centum per annum until paid.

William Kerr, docket No. 443—For all rights, claims, and other interests in growing crops, fruit trees, and other improvements which the said Kerr

may possess or may have possessed near Frijoles, the sum of \$265, United States currency.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rules of Dismissal.

Rule of dismissal No. 151, docket numbers as shown, November 5, 1914, in the matter of sundry claims—The following claims for improvements said to have been located at "Aguardiente" are hereby dismissed for the reason that the evidence submitted to the commission does not justify an award being made:

	Docket No.
Branlio and Crescencia Quesada, et al.	1888
Victoria de los Rios de Jimenez	1889
Hortensio de Leon	1890
Tibirsio Carmona	1891

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Opinion.

Opinion No. 149, docket numbers as shown, October 24, 1914, in the matter of the motion of Augustin Bigett, et al, for rehearing by this commission of certain claims certified to a disagreement by the commission of 1913—On September 30, 1914, Messrs. Hinckley, Ganson, and Teran, as counsel for the claimants, filed with the commission a motion for a rehearing by this commission of the claims, as follows:

	Docket No.
Augustin Bigett	912
George Bailey	586 and 1507
Wing Lee Ching	1111
Edward Gordon	1505
I. L. Maduro	1417
Leander Lindor	910
D. W. Ogilvie	36 and 1379
Kam Ling Tai	1658
Francisco de Tomo and A. Fasano	1324
José L. Yu	1256
Marcial Zuleta	502
Juan Maldonado	678
Cayetano Prado	1326

which claims have heretofore been heard by the Joint Land Commission of 1913, and said commission having disagreed in their opinions in said claims, and said claims now, under Article XV of the Treaty between the United States of America and the Republic of Panama, ratified February 26, 1904, being subject to adjudication by an umpire provided for in cases of disagreement.

The commission set this motion for oral argument and discussion in a public session held for that purpose on October 13, 1914, and after giving full consideration to the argument and authorities submitted by the attorneys for both sides, the commission is of the opinion that,

In view of the fact that the claims in question were heard by the commission of 1913 and passed for the decision of an umpire especially provided for in the Treaty, in cases of this kind, this tribunal is without jurisdiction to reopen the same, except by the consent of all the parties in interest. The motion is therefore denied.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 308, on Wednesday, December 2, 1914, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

By direction of the chairman of the board.
F. M. NIXON,
Recorder, Board of Local Inspectors.

OFFICIAL CIRCULARS.

Accountable Officials.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,
BALBOA HEIGHTS, C. Z., November 6, 1914.

CIRCULAR No. 76:
Effective as of November 1, 1914, the accountability for all nonexpendable property in the new Administration Building at Balboa Heights will be transferred to Mr. C. A. McIlvaine, Executive Secretary. Mr. J. F. Warner will be accountable only for stationery stock carried at Balboa Heights store.

H. A. A. SMITH,
Auditor, Panama Canal.
Approved: GEO. W. GOETHALS,
Governor.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,
BALBOA HEIGHTS, C. Z., November 9, 1914.

CIRCULAR No. 77:
Effective at once, Mr. V. C. Dillon is designated an accountable official of The Panama Canal, and as such will account for stock charged to dry dock store.

H. A. A. SMITH,
Auditor, Panama Canal.
Approved: GEO. W. GOETHALS,
Governor.

BALBOA HEIGHTS, C. Z., November 11, 1914.

CIRCULAR No. 79:
Effective at once, Mr. Harry Dundas will cease to be an accountable official of The Panama Canal.

He will effect a transfer of his accountability to Mr. H. F. Sedwick.
H. A. A. SMITH,
Auditor, Panama Canal.

Approved: GEO. W. GOETHALS,
Governor.

Commissary Coupons Good at all Panama Canal Hotels.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,
BALBOA HEIGHTS, C. Z., November 10, 1914.

CIRCULAR No. 78:
To all concerned—Effective at once, commissary coupons will be honored at all Panama Canal hotels. Stewards of line hotels will prepare daily reports in duplicate on form A-209, the original copy to accompany remittance of coupons and the duplicate copy to be attached to form S. D. 5. Com. form No. 7 will be used in connection with form A-209, setting up remittance of coupons according to denominations.

Hotels Tivoli and Aspinwall will continue the use of the present forms, showing remittance of commissary book coupons separate from the hotel book coupons.

H. A. A. SMITH,
Auditor, Panama Canal.
Approved: GEO. W. GOETHALS,
Governor.

Payment for Sick Leave.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., November 9, 1914.

CIRCULAR No. 602-10:
In case payment of any sick leave has been deferred until the employe has completed 10 months' service (as provided in Circular No. 602, Paragraph 1, Rule 26), and the employe's service is terminated prior to completing the 10 months, the employe may be granted such annual leave as he would have been entitled to had no payment been deferred. In other words, the deferred payment will be cancelled, the time it covers will be considered as leave without pay, and any annual leave allowable under the regulations will be granted to the employe.
GEO. W. GOETHALS,
Governor.

Disposition of Surplus and Unserviceable Electric and Pneumatic Hand Tools.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., October 31, 1914.

CIRCULAR No. 631-2:
Surplus and unserviceable electric and pneumatic hand tools will hereafter be shipped to the storekeeper, Supply Department, Balboa, without survey, same to be handled in accordance with Paragraph 16, Circular No. 656-1.
GEO. W. GOETHALS,
Governor, The Panama Canal,
President, The Panama Railroad Company.

Operations at Cement Block Plant.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., November 13, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:
I am in receipt of the following memorandum from

the Constructing Quartermaster:

"The cement block plant at Corozal was closed down on October 17, 1914. The final cost report shows that a total of 1,053,289 blocks have been made at the plant at an average cost of \$0.112 per block. This includes plant charge. Of the plant charge of \$40,000, there remain \$13,000 to be absorbed.

"There are about 250,000 blocks on hand, of which the work on the officers' quarters at Balboa dump will take 70,000."

Department or departments that may find it advantageous to use any or all of the surplus blocks above-mentioned should communicate with the Constructing Quartermaster.

GEO. W. GOETHALS,
Governor.

Termination of Service Forms.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., November 10, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

Letter form P. C.-494, termination of service on account of reduction of force, is in stock and, in the future, employes whose services are to be terminated in this manner, should be notified on this form.

Heads of departments and divisions outside of the Administration Building, Balboa Heights, C. Z., are herewith forwarded sheet of the form, and those residing within the building will advise the personnel bureau of any contemplated reduction of force, giving names and addresses, and notification will be mailed to them accordingly.

C. A. McILVAINE,
Executive Secretary.

Standard Tools for Equipment.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., September 19, 1914.

CIRCULAR NO. 689:

The lists of standard tools for different classes of equipment stated below, are published for the information of all concerned.

GEO. W. GOETHALS,
Governor.

STEAMSHOVELS.

- 1 Axe, chopping, 4½"
- 1 Bar, buggy, 3-foot
- 1 Bar, claw
- 6 Bars, lining
- 1 Bar, slice, fire, 5-foot
- 2 Blocks, snatch, 6"
- 1 Brush, chain, long handle
- 2 Buckets, G. I., 2-gallon
- 1 Cable, ½", 60 feet long
- 1 Can, oil supply, 1-gallon (kerosene)
- 3 Carriers, timber
- 6 Chisels (two flat, two round, two cape)
- 2 Containers, oil, 5-gallon
- 1 Cooler, water, 8-gallon
- 2 Cups, drinking, enamel
- 1 Cutter, gage glass
- 1 Pair frogs, rerailing
- 1 Hacksaw, adjustable, 8" to 12"
- 2 Hammers, B. P., 1½ and 2 pounds
- 6 Hammers, sledge, double face, 8-pound
- 1 Hammer, sledge, double face, 16-pound
- 1 Hoe, fire, 5-foot.
- 50 Feet hose, canvas, 1½"
- 1 Lantern, hand, Dietz
- 2 Oilers, long spout
- 3 Padlocks
- 3 Picks, clay
- 1 Pot, tallow
- 1 Rake, fire, 5-foot.
- 1 Saw, crosscut (two-man), 5-foot
- 1 Saw, hand, crosscut, 26"
- 1 Screwdriver, 12"
- 6 Shovels, round point, short handle, No. 2
- 1 Shovel, scoop, No. 3
- 1 Pair tongs, pickup, rivet.
- 1 Pair tongs, blacksmith's, flat
- 1 Vise, combination, pipe and bench
- 4 Wrenches, monkey, 6", 8", 12", and 18"
- 4 Wrenches, Stillson, 6", 18", 24", and 36"
- 1 Set wrenches, single end, ½" to 2½"

LOCOMOTIVE CRANES, 30-TON AND UNDER.

- 1 Axe, chopping, 4½"
- 1 Bar, pinch, 4-foot
- 1 Bar, slice, fire, 5-foot
- 1 Bucket, G. I., 2-gallon
- 1 Can, oil supply, 1-gallon (kerosene)
- 2 Cans, oil supply, 2-gallon (valve and engine)
- 3 Chisels, (one flat, one round, and one cape)
- 1 Cooler, water, 5-gallon
- 1 Cup, drinking, enamel
- 1 Hammer, B. P., 1½-pound
- 1 Hammer, sledge, double face, 8-pound
- 1 Hoe, fire, 5-foot
- 2 Oilers, long spout

3 Padlocks

- 1 Pot, tallow
- 1 Rake, fire, 5-foot
- 1 Shovel, scoop, No. 3
- 2 Wrenches, monkey, 8" and 15"
- 6 Wrenches, open end (to suit crane)
- 2 Wrenches, Stillson, 6" and 18"

75 AND 100 TON CRANES.

- 1 Bar, slice, fire, 5-foot
- 1 Bar, pinch, 4-foot
- 1 Can, oil supply, 1-gallon (kerosene)
- 3 Cans, oil supply, 2-gallon (valve, engine, and car)
- 3 Chisels, (one flat, one round, and one cape)
- 1 Cooler, water, 8-gallon
- 1 Cup, drinking enamel
- 1 Hammer, B. P., 1½-pound
- 1 Hammer, sledge, double-face, 8-pound
- 1 Hoe, fire, 5-foot
- 2 Oilers, long spout
- 3 Padlocks
- 1 Pot, tallow
- 1 Rake, fire, 5-foot
- 1 Shovel, scoop, No. 3.
- 2 Wrenches, gland, ½" and 1"
- 2 Wrenches, monkey, 8" and 15"
- 2 Wrenches, Stillson, 6" and 18"

UNLOADERS.

- 8 Wrenches, single, open end; one each, ¾", ¾", ¾", 1", 1½", 1½", 1½" and 1½"

New Series of Requisitions, Work Requests, and Requests for Transfer of Equipment.

THE PANAMA CANAL,
OFFICE OF EXECUTIVE SECRETARY,

BALBOA HEIGHTS, C. Z., October 28, 1914.

Heads of departments and divisions in the Administration building—Effective November 1, 1914, the various series of requisitions, work requests, and requests for transfer of equipment now being prepared by the offices of The Panama Canal in the Administration Building will be discontinued.

No change will be made for the present in the preparation of these forms for the different departments of the Panama Railroad Company.

A new series for each of the above forms will be started by the property and requisition bureau for all departments and divisions of The Panama Canal located in the Administration Building.

Each serial number will carry one of the following prefixes to indicate the division to which that particular request pertains.

- A.....Accounting Department.
- B.....Building Division.
- E A.....Executive Office, Administration Building.
- E C.....Executive Office, Division of Civil Affairs.
- E F.....Executive Office, Division of Police and Fire
- E P.....Executive Office, Division of Posts.
- E S.....Executive Office, Division of Schools.
- F.....Division of Fortifications.
- H.....Health Department.
- M E.....Division of Municipal Engineering.
- M and H.....Section of Meteorology and Hydrography.
- O E.....Section of Office Engineer.
- O M.....Department of Operation and Maintenance.

- O M E.... Department of Operation and Maintenance, Electrical Division.
- O M G.... Department of Operation and Maintenance, Gatun Locks.
- O M P.... Department of Operation and Maintenance, Pacific Locks.
- O M T.... Department of Operation and Maintenance, Canal Transportation.
- S..... Supply Department.
- T C..... Division of Terminal Construction.
- T C A.... Division of Terminal Construction, Atlantic breakwater.
- T C B.... Division of Terminal Construction, Balboa terminals.
- T C C.... Division of Terminal Construction, Cristobal coaling plant.
- Z..... Requests from individuals and companies.

On all requisitions covering articles to be purchased in the United States, the serial numbers will be followed by letters "U. S."

All requests for the preparation of these forms should be made to the head of the property and requisition bureau, and the following information must be shown on all requests:

REQUISITIONS.

Items required, alphabetically arranged.
 Storehouse or division from which items are to be secured.
 Point at which delivery is to be made.
 Person to whom delivery is to be made.
 Division account number to be charged.

Items shall be separated by classes as far as possible, in accordance with classification of material revised to October 8, 1914.

WORK REQUESTS.

Division which will perform the work.
 Division for which work is to be performed.
 Division account number to be charged.
 Place at which delivery is to be made.
 Person to whom delivery is to be made.
 Whom to address for additional information.
 Estimated cost of work.
 Description of work to be performed.
 Date delivery is desired.
 If overtime is authorized, so state.
 Any necessary drawings or sketches should accompany request for preparation of form.
 Requests for preparation of work requests which do not show estimated cost, will be returned for this information.

REQUESTS FOR TRANSFER OF EQUIPMENT.

Division from which equipment is to be secured.
 Division desiring equipment.
 Purpose for which additional equipment is desired.
 Point at which delivery is to be made.
 Person to whom delivery is to be made.
 List of equipment desired, giving as complete description as possible.

In the case of the Department of Operation and Maintenance, Division of Terminal Construction, etc., when the work is more or less of a technical nature, and instructions are taken in shorthand, which would require rewriting before sending to property bureau, serial numbers may be secured by telephone from the property bureau, Telephone 171, and the requisite number of copies prepared, as heretofore. In such case one copy must be sent immediately to the property bureau for file.

It is requested that all other employes who have occasion to request any of the above, supply themselves with a quantity of each of the following forms and fill one out in pencil for each request, taking care to give all necessary information: Requisitions, form P.C. 907; work requests, form P.C. 159; requests for transfer of equipment, form P.C. 299.

If the requests are made on the forms provided, and proper care is exercised in making the original request, the work will be greatly expedited.

A supply of these forms may be secured from either the property and requisition bureau, Room 310, or the stationery storeroom in basement.

The following number of copies of these forms will be prepared in each case, which will be distributed as shown below:

REQUISITIONS.

Eleven copies of requisitions to be prepared covering items to be supplied on Isthmus.
 Distribution after signature by head of division—Eight copies to storehouse supplying material; one copy to head of division making request; one copy to property bureau file.
 Five copies of requisitions to be prepared covering items to be purchased in United States.
 Distribution after signature by head of Division—Two copies to United States requisition clerk; one copy to head of division making request; one copy to property bureau file.

In case specifications are attached, two extra copies of the specifications must be furnished for United States requisition clerk. In case blueprints are required, three copies of blueprint and one vandyke must be furnished for United States requisition clerk.

WORK REQUESTS.

Original and 11 copies to be prepared when the

Panama railroad is to perform the work.
 Original and six copies to be prepared when any other division is to perform the work.
 Distribution after signature by head of Division and approval by the Governor—Original and six copies to the Panama railroad when that department performs the work; original and one copy to any other division performing the work; one copy to head of division making request; one copy to Accounting Department; one copy to property bureau file; one copy to record bureau file.

REQUESTS FOR TRANSFER OF EQUIPMENT.

Eight copies to be prepared.
 Disposition after investigation by surveying officer and approval by the Governor—One copy to division supplying equipment; one copy to division making request; one copy to surveying officer; one copy to Accounting Department; one copy to Chief Quartermaster; one copy to Superintendent, Mechanical Division; one copy to property bureau file.
 One copy of all forms will be placed in property bureau file when first prepared.

In all cases where copies are sent to the heads of departments and divisions and it is not desired to keep a desk file for reference, the copy will be returned to the property bureau for file.

It is not intended that the property bureau keep any file in connection with United States requisitions other than a copy of the original requisition.
 A complete file on all matters pertaining to United States requisitions is maintained by the United States requisition clerk, Room 272, Telephone 177, and all inquiries regarding United States purchases should be made there.

Copies of inspection calls, notices of awards, etc., ordinarily sent to heads of divisions which they do not desire to retain may be sent to the property bureau, however, and will be filed there.

Copies of all correspondence relative to requisitions (other than United States purchases), work requests and requests for transfer of equipment should be sent to property bureau for file, with the respective requests, in order that the files may be kept up to date and any information required can be given at any time.
 By direction of the Governor.

C. A. McILVAINE,
 Executive Secretary.

Hearings of House Committee on Appropriations.
THE PANAMA CANAL
OFFICE OF EXECUTIVE SECRETARY.
 BALBOA HEIGHTS, C. Z., November 16, 1914.
HEADS OF DEPARTMENTS AND DIVISIONS:
 The Committee on Appropriations will hold hearings in the board room, Administration Building, Balboa Heights, Wednesday, November 18, 1914, beginning at 8 o'clock a. m.
 By direction of the Governor.
 C. A. McILVAINE,
 Executive Secretary.

Proposals for Carpentry Work in Concrete Quarters, Balboa.
THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER.
 Sealed proposals will be received at the Office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., November 24, 1914, and then opened, for furnishing the necessary labor to complete the interior carpentry work in houses Nos. 739 and 740, Balboa. This work must be finished in accordance with detail drawings which will be furnished the contractor, which drawings will be the same as have been used in finishing the houses previously completed on Balboa Flat. These plans may be seen on application to the architect, Balboa Heights. This work must be equal to that done in the other houses of similar type on Balboa Flat, and must be done to the satisfaction of the Constructing Quartermaster, or his representative.
 Bidders should state the time in which they propose to complete the work.
 Bids must be in a lump sum for the complete work on each of these two houses.
 Bids must be accompanied by certified check, post-office money order, or cash, for five per cent of the amount bid.
 The Government reserves the right to reject all bids.
 Bids should be marked "Proposal for carpentry work, concrete quarters, Balboa." WM. R. GROVE,
 Chief Quartermaster.

Proposals for Clearing Trails.
THE PANAMA CANAL,
OFFICE OF THE CHIEF QUARTERMASTER.
 Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, until November 25, 1914, at 3 p. m., and then opened for:
 Completely cutting to within three inches of the ground all growth and burning all material so cut, over an area of 68 miles of trail 20 feet wide, situated in various parts of the Canal Zone. The general location of this work will be shown on maps in the office of the

Assistant Engineer, Division of Fortifications, between 2 and 5 p. m., November 14. This work will be done in January and February, 1915. All bids should be for a lump sum for the entire job.

Bids must be accompanied by cash certified check, or post-office money order for five per cent of the amount bid.

Form of contract and bond, including specifications may be obtained on application to this office.

The Government reserves the right to reject all bids.
 Bids should be marked "Proposal for clearing trails."
 W. R. GROVE,
 Chief Quartermaster.

Rainfall from November 1 to 14, 1914, Inclusive.

The estates of these deceased employes of the Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against these estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
 Administrator of Estates.

SHIPPING INFORMATION.

Tide Predictions.

Panama tide predictions for the next six weeks are given in the following table:

NOVEMBER.

DATE.	Time and height of high and low water.			
Wed., Nov. 4	4:12	10:31	16:38	22:44
Thurs., Nov. 5	4:41	11:05	17:07	23:1
Fri., Nov. 6	5:13	11:39	17:38	23:51
Sat., Nov. 7	5:45	12:15	18:13	24:28
Sun., Nov. 8	6:21	12:56	18:54	25:1
Mon., Nov. 9	7:04	13:40	19:41	25:58
Tues., Nov. 10	7:54	14:34	20:39	26:48
Wed., Nov. 11	8:58	15:37	21:45	27:41
Thurs., Nov. 12	10:11	16:44	22:54	28:38

DATE.	Time and height of high and low water.			
Sat., Dec. 26	4:54	11:09	17:11	23:25
Sun., Dec. 27	5:55	12:18	18:12	24:17
Mon., Dec. 28	6:56	13:19	19:09	25:1
Tues., Dec. 29	7:40	14:07	19:58	25:58
Wed., Dec. 30	8:24	14:46	20:42	26:48
Thurs., Dec. 31	9:06	15:21	21:24	27:41

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Goedetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.). All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls, or the purchase of supplies may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

It is advisable that deposits be made somewhat in excess of the anticipated charges, to cover minor charges which may not have been anticipated, such as pilotage and towage. Pilotage is at the rate of \$1 per foot of maximum draft, but is not charged on a vessel which makes the transit of the Canal without taking on or discharging freight or passengers in a terminal port. Tug service, which is at the rate of \$15 per hour, will not be charged on vessels of less than 15,000 gross tonnage.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa from the Union Oil Company at the rate of from 1,300 to 1,600 barrels per hour. The present price is \$1.30 per barrel, reduced to 60° Fahrenheit.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa.

Subsistence supplies, including a large stock of fresh meats, vegetables, canned groceries, fruits, bakery products, etc., are available for quick delivery at either terminal. Prices are generally lower than the retail prices in the United States, and compare favorably with prices in any port of the world.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and on advance notice is required. The following are representative charges; for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

Repairs to vessels may be made to any extent, except where the use of a large dry dock is required, or the turning of the largest crank shafts or longest line shafts.

The Government hospital service is fully equipped for the treatment of medical and surgical cases. The charge

for consultation at the dispensaries is \$3; for hospital treatment, in ward, \$3 per day; in private room, \$6 per day. For American seamen, the charge for treatment in ward is \$1 per day.

Application for supplies, or for services, should be made to the captain of the port, Cristobal or Balboa.

Mail, other than registered, and cablegrams for men on ships which will call at the terminal ports, or pass through the Canal, may be addressed in care of the captains of the ports, if desired; or may be addressed to Cristobal or Balboa, general delivery, with the name of the vessel written plainly; or, in case the vessel has a known representative on the Isthmus in care of such representative.

Sailings of Vessels in Regular Service With the Isthmus.

REGULAR CONNECTIONS WITH PACIFIC PORTS.

The Pacific Mail has sailings about every 10 days between Balboa and San Francisco, with calls at Puntarenas, San Juan del Sur, Corinto, Amapala, La Union, La Libertad, Acajutla, San José de Guatemala, Champerico, Ocos, Salina Cruz, Acapulco, Manzanillo, San Blas, and Mazatlan. The company also operates a direct line between Balboa and San Francisco, with sailings about every six weeks; and a Panama-Central America line, between Balboa and Ocos, making one round voyage monthly, and calling at all the ports abovenamed between Balboa and Ocos.

The Luckenbach Steamship Company is operating a 10-day service between New York and San Francisco, calling at East San Pedro both ways. Its vessels handle cargo at Balboa when sufficient business offers.

The American-Hawaiian lines between New York and San Francisco, and New York and Honolulu, discharge and take on cargo at Balboa when sufficient business offers. At present, a vessel of this company passes through the Canal about every third day.

Grace and Company maintain an irregular service between New York and San Francisco, calling at way ports. Sailings are made about every 12 days. A vessel plying between San Francisco and Valparaiso, calling at way ports, makes a round voyage about every 10 weeks.

The Peruvian Steamship Company maintains a weekly service between Balboa and Callao, with calls at Guayaquil, Paíta, Eten, Pacasmayo, and Salaverry. Every second voyage includes Mollendo.

The South American Steamship Company's vessels sail on alternate Mondays from Balboa for Valparaiso calling at Paíta, Eten, Pacasmayo, Salaverry, Callao, Mollendo, Arica, Iquique, Antofagasta, and Coquimbo.

The Pacific Steam Navigation Company has sailings on alternate Mondays for Peru and Chile; every 10 days for Ecuador; and on alternate Mondays for Colombian and Ecuadorian ports.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro, and an additional weekly sailing to Bocas del Toro.

The Royal Mail maintains fortnightly service each way between New York and Southampton, making the following way ports: Antilla, Jamaica, Colon, Cartagena, Puerto Colombia, Puerto Cabello, Trinidad, Barbados, the Azores, and Cherbourg. Its vessels all arrive at Colon on Sundays and sail on Tuesdays.

The Compagnie Générale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Carupano, Trinidad, Martinique, Guadeloupe, and Santander; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Carupano, Trinidad, and Martinique.

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curaçao, Puerto Cabello, and Barcelona.

The Compañía Transatlántica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curaçao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls en route, the vessels sail from Genoa on the 8th day of each month.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing about every six days direct; between Colon and New York by the United Fruit Company and the Royal Mail Company, sailings via Kingston weekly and fortnightly, respectively; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

(Continued on page 132.)

MOVEMENTS OF OCEAN VESSELS.

(Week ending at noon November 15.)

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employees of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Floating Cranes Practically Completed.

The 250-ton floating crane *Ajax*, one of the powerful pair of cranes ordered from Germany as part of the permanent Canal equipment, was placed in service last week, when it removed the remainder of the hull of the steel drill barge *Teredo* from the Canal channel in Culebra Cut, near Gold Hill. The *Teredo* was sunk at the base of Cucaracha slide by a premature explosion of dynamite on July 20. The hulk was later cut in pieces and the smaller pieces were taken out of the channel, but two pieces, weighing about 50 tons each, were too large to be swung out of the water by the floating cranes then in service. They were handled by the *Ajax* without difficulty. One of the pieces had become, by reason of a shift in the channel resulting from recent slide movements, a menace to navigation, and its removal has simplified the handling of vessels through this section.

Both the *Ajax* and its twin, the *Hercules*, were docked in the upper chamber of the east flight at Gatun Locks on November 13, for the purpose of applying one coat of anticorrosive and one coat of antifouling paint to the underwater portions of the hulls. In order to expedite the completion of the *Ajax* for the removal of the *Teredo*, the cast iron counterweights, weighing 80 tons, were placed on the spindle carriage while the crane was in dry dock, by means of a locomotive crane operating from the lock wall. This work was completed on Saturday night, November 14, and the *Ajax* was then towed to Culebra Cut. After removing the *Teredo*, it was tied up at Paraiso for several days, since which it has been transferred to Dock 14, Cristobal, to assist in placing the counterweights on the *Hercules*. On Sunday, November 22, a demonstration of its operation was given at the lower end of Gatun Locks before the Panama section of the American Institute of Electrical Engineers by Mr. Henry Schoellhorn, assistant engineer, who has been in supervision of the construction of the cranes, both in the yards of the contractors in Germany and on the Isthmus.

The contract for furnishing the cranes was awarded to the Deutsche Maschinenfabrik Actiengesellschaft of Duisburg, Ger-

many, on April 29, 1913, and called for delivery within 580 days. The pontoons, with the internal machinery complete and a considerable part of the superstructures in place, were towed over from Emden; that of the *Ajax* left on April 26, 1914, and was 74 days at sea, arriving at Cristobal on July 9, and that of the *Hercules* left on May 30 and arrived on July 23, having been 56 days on the way. Taking everything into consideration, it appears that the contractor will complete both cranes within the specified period. A complete description of the cranes was published in THE CANAL RECORD of May 28, 1913.

Smallest Vessel Through the Canal.

The smallest vessel which has made use of the Canal in commercial service is the Nicaraguan motor schooner *Wilhelmina*, which completed on November 21 a double transit of the Canal. It is 69 feet long, 22 feet in the beam, and has a draft of four feet six inches, and its Canal tonnage is 66 tons gross and 46 net. The *Wilhelmina* arrived at Cristobal from Las Perlas on November 12, entered the Canal on the 13th, and arrived at Balboa on the 15th, carrying six tons of stores for the Nicaraguan government, which were transferred to a vessel of the Pacific Mail line, for delivery at San Juan del Sur. The *Wilhelmina* then loaded with 45 tons of sugar, with which it departed through the Canal for Bluefields on November 20. Three through passengers were aboard.

Branch Hydrographic Offices.

Arrangements have been made to establish branch hydrographic offices in the offices of the captains of the port at Cristobal and Balboa. These will be fitted with a set of drawers to contain the portfolios for the proper arrangement of charts, and a bookcase for bound volumes of nautical literature. A shipment of charts, about 4,200 in all, together with about 60 volumes of navigational books has been forwarded to the Isthmus by the Hydrographic Office at Washington. It comprises all of the publications of that office, except a few that are out of stock and are being reprinted. The list also includes some British Admiralty and Coast Survey charts.

The principal object of the hydrographic offices is to supply nautical information, such as shipping, including sailing routes, sailing directions, currents, weather, charts, aids to navigation, and changes which are constantly taking place. They also keep standard chronometers and barometers for comparisons, and are prepared to offer advice in regard to nautical matters in general. They will also keep a supply of charts on hand for sale.

Purchase of French Scrap.

Contract has been entered into with M. Rovetta of Genoa, Italy, for the purchase of the remaining French scrap left by the Chicago House Wrecking Company, at the price of \$5.25 a ton.

LINES THROUGH THE CANAL.

Regular Services of Vessels Established Between Important Trade Areas.

A considerable part of the traffic through the Canal has been carried by vessels operating in regular services, or lines, between important trade areas, and new lines are being instituted from time to time. Lines between the Pacific coast of the two continents and the Atlantic coast of the United States and Europe, have been developed into district services since the opening of the Canal; the growing traffic from the Atlantic to the Far East has not, so far, developed lines with as distinctly arranged itineraries, presumably on account of the distance of the voyage and the varied extent of the areas served.

In the United States coastwise traffic, six important lines, with approximately regular sailings between the Atlantic and Pacific coasts, have developed, as follows:

The American-Hawaiian Steamship Company has, so far, sent 20 of its vessels for 41 transits of the Canal, in a service from New York, Boston, and Philadelphia to San Pedro, San Francisco, Portland, Puget Sound, and Hawaii. It despatches a vessel each way about every five days. The following of its vessels had used the Canal to November 23: *Pennsylvanian*, four times; *Mexican* and *Montanan*, three times each; *Arizonan*, *Columbian*, *Dakotan*, *Georgian*, *Honolulan*, *Iowan*, *Isthmian*, *Kentuckian*, *Missourian*, *Nebraskan*, *Nevadan*, *Ohioan*, *Texan*, and *Virginian*, twice each; *Alaskan*, *Panaman*, and *Washingtonian*, once each.

The Luckenbach Steamship Company despatches a vessel each way about every 10 days in a service between New York, with Philadelphia recently included, and San Pedro and San Francisco. The company has, so far, sent 13 vessels through the Canal, in a total of 25 transits, as follows: *Carolyn*, *Damara*, *Isabelo*, *Lewis Luckenbach* and *Pleiades*, three times each; *J. L. Luckenbach* and *Lyra*, twice each; *Evelyn*, *Harry Luckenbach*, *S. V. Luckenbach* and *Stanley Dollar*, once each.

Sudden and Chris enson of San Francisco are operating a service with approximately fortnightly sailings between New York and Philadelphia, and San Francisco and Puget Sound. They have employed six vessels so far, the *Henry T. Scott*, *John A. Hooper*, *Lewis K. Thurlow*, *Montoso*, *Neches* and *Peter H. Crowell*, of which the *Montoso* and the *Peter H. Crowell* have been through the Canal twice.

The Atlantic and Pacific Steamship Company, W. R. Grace and Company, general agents, operate the *Santa Cecilia*, *Santa Clara* and *Santa Cruz*, with formerly the *Santa Catalina*, from New York to San Pedro, San Francisco, Portland, and Puget Sound, with sailings about every three weeks. The three first named have passed through the Canal twice in this service; the *Santa Catalina* came

through from Valparaiso to New York and transferred to the coast service, but was burned at the mouth of the Columbia River, after the first voyage out. The first voyage of the *Santa Catalina* was northward from Chile, after which the vessel was assigned to the coastwise routes.

The Boston and Pacific Line has been instituted by the Emery Steamship Company, for service between Boston and Pacific coast ports. The *Atlantic* and *Pacific* of this line have passed through the Canal, westbound, but neither has returned to date. The *Corozal* is expected to arrive from Boston shortly in this service.

The Arrow Line from New York direct to the west coast and return, is being operated by Swain and Hoyt, Incorporated, with the *Camino* and the *Edgar H. Vance*. The *Camino* has been through the Canal both ways; the *Edgar H. Vance* has gone through once, eastbound.

Of the 104 passages through the Canal in the coastwise United States trade made to November 23, vessels employed in the above lines have made an aggregate of 86 transits.

WEST COAST TO EUROPE.

The Harrison-Direct Line maintains approximately a monthly service between the west coast of North America and Great Britain. Vessels of this combination which have used the Canal have been the *Crown of Seville* and *Crown of Toledo* of the Direct Line, Prentice, Serviss, and Henderson, general managers; and the *Candidate*, *Historian*, and *Discoverer* of the Harrison fleet.

The Maple Leaf Line, Houlder, Weir, and Boyd, general managers, operates a service with sailings about every six weeks over a course from England to New York, thence through the Canal to the west coast, up as far as Vancouver, thence down the coast and back to England. The vessels which have passed through the Canal so far in this service have been the *Arna*, *Buenaventura* and *Santa Rosalia*, all of which are registered in the United States.

The East Asiatic Company has established approximately a monthly service between the west coast of the United States and Liverpool, Gothenburg, Copenhagen, and ports of the Scandinavian peninsula. The *Jutlandia*, *Malakka*, *Natal*, and *Transvaal* have been sent through the Canal.

The Johnston Line is developing a service of Diesel engine vessels through the Canal between San Francisco and San Pedro, and Stockholm, Malmo, Gothenburg, and adjacent ports. The *Kronprinzessin Margareta* and the *Kronprinz Gustaf Adolf* have passed through the Canal eastbound, and the former is now on its way back to the Canal.

The Pacific Steam Navigation Company has established a line, with approximately monthly sailings at present, from Liverpool around South America, by way of the Canal. The *Potosi*, *Kenuta*, and *Esmeraldas* have passed through the Canal, southbound, in this service, and the *Bogota* has made the transit northward, on the way from Arica to Liverpool.

UNITED STATES AND SOUTH AMERICA.

The Merchants' Line of the New York and Pacific Steamship Company, W. R. Grace and Company, general agents, operates a fortnightly service between New York and ports of Ecuador, Peru, and Chile. The *Celia*, *Coya*, *Charcas*, and *Chimu* have used the Canal in this service, and the *Santa Catalina* made

a trip north on the route, before being assigned to the coastwise line of the Atlantic and Pacific Steamship Company.

The New York and South America Line operates a service over the same course, with vessels of American registry. The *Foxton Hall*, the *Howick Hall*, and the *Charlton Hall* have made use of the Canal; the *Foxton Hall*

burned at sea, near Watlings Island, several days after clearing from Cristobal. The *Craster Hall* is due at the Canal this week.

The West Coast Line, Wessel, Duval and Company, managers, maintains approximately a monthly service over this route. The *Lord Antrim*, *Copenhagen*, *Bellgrano*, and *Dorothy* have been through the Canal.

DISTRIBUTION OF POWER FOR THE CANAL.

Description of Substations that Transform Energy Generated at the Hydroelectric Station at Gatun Spillway.

In any extended electric power project, there are always four distinct yet interrelated divisions, namely: (1) generating stations; (2) transmission lines; (3) substations; and (4) distributing network.

In connection with the Panama Canal, the main generating station is a hydraulic plant of 6,000-kilowatt capacity, recently completed and now carrying load. The hydroelectric station is located adjacent to the Gatun spillway and receives its energy from water taken from Gatun Lake and discharged

station, located on the east side of Gatun Locks, at the upper level.

The function of the Gatun substation is to transform the electrical energy received at 2,200 volts to energy at 44,000 volts, at which potential it is transmitted by a 47-mile duplicate transmission line to three other large substations and to two small substations. The transmission line parallels the right-of-way of the Panama railroad, and was described in THE CANAL RECORD of July 9, 1913.

One of the large substations is located at

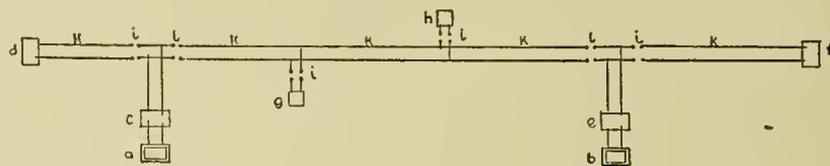

Figure 1.

DIAGRAM OF TRANSMISSION SYSTEM.

into the lower spillway channel. The electrical energy is 3-phase, generated at 25-cycles and 2,200 volts (delta). This station was described in THE CANAL RECORD of July 3, 1912, and May 6, 1914.

The hydroelectric station lies three-fourths of a mile west of Gatun Locks, in about the center of Gatun Dam. The permanent towns, plants, operating points, and administrative headquarters are all on the east side

Miraflores, 37 miles distant from Gatun. Miraflores substation possesses a double function; first, to step-down the electrical energy from 44,000 volts to a usable pressure of 2,200 volts for local distribution to the Miraflores and Pedro Miguel locks; and second, to serve as the interconnecting link between the entire transmission system and a 6,000-kilowatt reserve steam generating station at Miraflores.

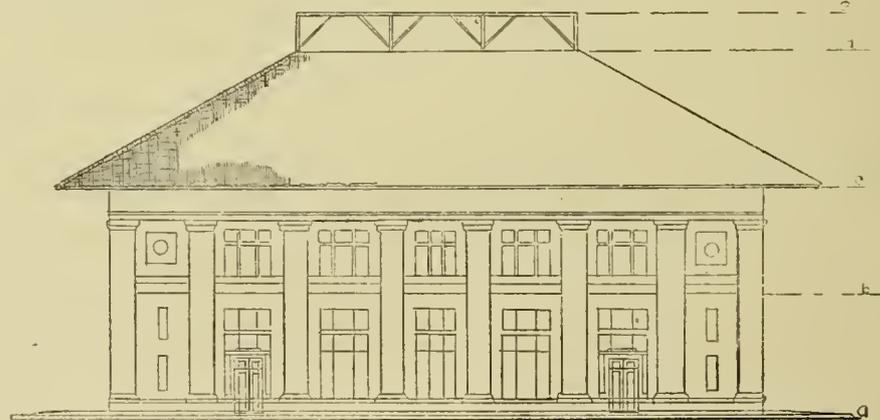

Figure 2.

FRONT ELEVATION, SUBSTATION.

a—Ground floor level. b—Second floor level. c—Eaves. d—Hip. e—Wires.

of the Canal, which is the logical location of the transmission line. It is quite undesirable to cross the Canal with a high voltage overhead transmission line; hence, the first link in the transmission system consists of a duplicate set of 2,200-volt feeders which are run in duplicate duct lines from the hydroelectric station, across Gatun Dam, and under Gatun Locks in tunnels, to the first step-up sub-

The Miraflores steam station is separated from the substation by less than 100 feet, and will be used in event either of failure of the hydroelectric station, or of a heavy draft of water from Gatun Lake in an extraordinary dry season. At such times the normal step-down transformation at Miraflores substation is reversed, and the substation becomes a step-up plant. During the period

of Panama Canal construction, the Miraflores steam station has been operated to furnish power to the Pacific locks, and to the plant at Balboa, Ancon, and Panama.

A similar, though less permanent station, was constructed at Gatun to supply power for the construction activities of the old Atlantic Division. Each station was of 4,500-kilowatt capacity, generating 3-phase energy at 25 cycles and 2,200 volts (delta). Temporarily, the steam station at Gatun is tied into the transmission system by taps into the abovementioned underground feeders which connect the hydroelectric station with the Gatun substation. One 1,500-kilowatt steam unit has recently been moved from the Gatun steam station to the Miraflores steam station, making the latter's total capacity 6,000 kilowatts. Very probably, the steam station at Gatun will be abandoned as an active operating plant within a year or two. Each of the steam generating stations has carried a monthly load ranging from 1,000,000 to 1,600,000 kilowatt-hours.

The 44,000-volt duplicate transmission line extends southward of Miraflores to Balboa and northward of Gatun to Cristobal. At each of the two extremities, there is located a substation to transform the energy received at 44,000 volts to energy at 2,200 volts, which latter voltage is used to distribute the current through underground feeders, to the various permanent plants of the Panama Canal—dry docks, coal handling plants, shops, pumping stations, etc.

There are at present two small substations, one of 1,000-kilowatt capacity at Gamboa to carry the pumping station load, and a second of 400-kilowatt capacity at Darien to supply the load of the radio station. Both of the smaller substations are provided with duplicate transformers, switches, and lightning arresters, tapping into the duplicate transmission lines. At Gamboa, the substation equipment will be installed inside the pumping station itself, while at Darien, a small concrete building has been erected to house the electrical equipment.

An idea of the relative position of the stations and substations, together with the interconnecting transmission line, may be had from the diagram shown in Figure 1. It is to be noted that the transmission line is a simple straight connection between Cristobal and Balboa substations. Gatun and Miraflores substations, although sources of power, are merely taps on the transmission line. These taps on a straightaway line minimize intricate connections at the substations. The greatest of operating facilities is afforded by disconnecting switches placed in the transmission lines on either side of the Gatun and Miraflores substations.

Each of the four large substations are identical in all principal features, except the Cristobal substation, which is of 4,000-kilowatts capacity, whereas the other three are of 6,000-kilowatts capacity, each substation containing three 2,000-kilowatt transformer units, with space for an additional unit without building extension. The Cristobal substation building is identical with the other substations, providing there for two future units. Each substation differs from the others in minor respects only.

In appearance, the substation buildings are rectangular in floor plan, approximately 128 feet long by 74 feet wide. A 20-foot granolithic sidewalk, checkered in squares,

surrounds the entire building. In elevation, there are two main floors with intermediate mezzanines in different parts of the building between the first and second floors. The roof is of the hip type, with overhanging eaves, extending 11 feet outside the wall line. The total height from the ground to the eaves is 45 feet and to hip is 69 feet. The 44,000-volt duplicate lines are brought into the building through porcelain roof bushings. The wires are anchored to braced channel cross pieces, supported upon four center building columns. The building columns pierce the hip of the roof, extending eight feet above the ridge line. The resulting dead-end anchor is of extremely simple construction. In plan, the building, particularly the steel structure, is laid out in simple bays, 18 feet on center, four bays wide by seven bays long. The exterior architecture of the building is of slightly modernized Tuscan style, the general features being indicated in a front elevation (Figure 2.) A first floor plan is shown in Figure 4, a second floor plan in Figure 5, and a transverse section in Figure 3. The interior finish of the building is neat, attractive and sanitary. In general, the interior

opening into the main switchboard room, which latter contains a slate control board. The switchboard room is five bays in length, or 90 feet, by one bay in width, or 18 feet; it contains little beside the main control board and the operator's desk. At either extremity of the main switchboard room, in the two front building corners, are the entrances into the stairways to the second floor. The stairways are of ornamental steel with polished brass railing, divided vertically by a mezzanine floor of reinforced concrete construction and red tile finish. From the right hand stairway, doors at the main floor and at the mezzanine floor, lead to small rooms, which will serve as offices if needed. From the left hand stairway, a door on the mezzanine floor leads to the toilet for gold employes. The toilet for silver employes is directly under that for the gold employes, but has its entrance from a work shop area. Each toilet room is well equipped, containing a shower bath, a wash bowl, a closet, a urinal, and a slop sink, all partitioned with marble slabs.

From the rear, on the center line of building, a large entrance, 11 feet wide by 17 feet high, having sliding doors, admits a perma-

ceilings and walls are finished in smooth plaster, a sanitary cover at the baseboard rounding off into a hard finished cement floor. The floors are checkered in 20-inch squares, and the corners of columns and walls are rounded. Architectural pretense is to be found in a few important rooms, such as the main switchboard room, the staircases, the offices, and the toilets. In such rooms, the floor is finished in 2-inch hexagon tile (red, except in toilet rooms, which are of white tile.) The walls are wainscoted with enamel brick, coved at the base. The floor design is simple, yet artistic, a buff border trailing around the room with the field containing buff spots on 12-inch centers. All windows and doors are of mahogany, carefully designed to exclude water, and screened to bar mosquitoes and other insects. From the front there are two entrances, provided with five feet 10-inch by eight feet 2-inch doors,

opening into the main switchboard room, which latter contains a slate control board. The switchboard room is five bays in length, or 90 feet, by one bay in width, or 18 feet; it contains little beside the main control board and the operator's desk. At either extremity of the main switchboard room, in the two front building corners, are the entrances into the stairways to the second floor. The stairways are of ornamental steel with polished brass railing, divided vertically by a mezzanine floor of reinforced concrete construction and red tile finish. From the right hand stairway, doors at the main floor and at the mezzanine floor, lead to small rooms, which will serve as offices if needed. From the left hand stairway, a door on the mezzanine floor leads to the toilet for gold employes. The toilet for silver employes is directly under that for the gold employes, but has its entrance from a work shop area. Each toilet room is well equipped, containing a shower bath, a wash bowl, a closet, a urinal, and a slop sink, all partitioned with marble slabs.

Electrically, the equipment is designed on the unit plan. There are seven transverse bays to the building. The two outside bays at either end of the building are devoted to transformer units. The adjacent bays are utilized as incoming line units, while the center bay fulfils the combined purpose of a workshop, hoist well, passageway, and track space.

The power units are the three 2,000-kilowatt transformers (2,667 k.v.a. rating). Each transformer is housed in a fireproof compartment, having a rolling steel door in front. The transformer is mounted on trucks, with

a 5-foot gage track set in the concrete foundation underneath. A 6-foot gage transfer track runs in front of the sliding doors and adjacent to the rear wall, the entire length of the building. By means of this transfer track, a transformer unit may be easily taken out of its individual compartment and tracked to the central working space for repairs.

The 2,000-kilowatt transformer is of the oil insulated, self-cooled, radiator type. A transformer of large capacity, although a very efficient machine, liberates considerable heat. For example, assume a 98 per cent efficiency, or a two per cent loss. Two per cent of 2,000 kilowatts is 40 kilowatts, a steady loss which appears as heat in the transformer compartment. Forty kilowatts represents the heat liberated by 1,600 ordinary 25-watt tungsten lamps. The losses in all three 2,000-kilowatt transformers at full load would be sufficient to light all the operating tunnels and machine rooms of the Gatun Locks. It is obvious, therefore, that a circulatory air system must be provided to take care of the heat released.

In the basement, under the rear end of the transformers, adjacent to the longitudinal center line of the building, is an operating tunnel, which extends the entire length of the substation and through the end walls, where inlets are provided for the air. The operating tunnel is approximately six feet wide by eight feet high, and, in addition to serving as an air duct, is used as a passageway for oil pipes and drains. It also connects three basement rooms, which contain the overflow oil tanks and the sump pump. An air outlet from each transformer compartment is obtained through an enclosed duct of approximately 25 square feet in cross-section, running from the transformer compartment to the outside of the

(2) In each transformer compartment, over the five by 6-foot opening into the tunnel. Monel metal wire screens are installed at the tunnel inlets and at the air discharge from each transformer compartment, preventing the ingress of mosquitoes and other tropical insects. At the two ends of the operating tunnel, where the exposed inlet admits rainwater, the floor is not concreted, as elsewhere. At these open places, the station ground-plates, three feet four inches in diameter by $\frac{1}{2}$ -inch thick, are buried in charcoal. A faucet, conveniently located, serves further to moisten the ground and charcoal at fixed intervals.

The transformers are furnished, under contract for all the substation electrical equipment, by the General Electric Company of Schenectady, N. Y. The transformers supplied are the largest yet developed of the radiator type, weighing 24 tons when completely assembled. In outline, the transformer is a huge tank, eight feet one-half-inch in diameter and 11 feet seven and one-half inches high, with eight radiators hung from the four sides, two radiators per side. The core and coils are assembled in a single compact unit, weighing approximately 15½ tons. The core is placed inside the tank, immersed in transil oil. The leads are brought out above, through bushings placed in the cover, which latter contains a manhole to give access to the inside of the tank. The radiators, which appear very much like steam heating radiators, are made of pressed steel, riveted, stayed, and through bolted. There are two tiers of radiators, assembled in plan in a square 12 feet six and three-fourths inches over all. The upper radiator is made up of 66 sections, having a total length of nine feet seven and one-half inches, whereas the lower radiator is composed of 54 sections having a total

essential that the transil oil be free of dirt and moisture, either of which destroy its dielectric qualities. The piping arrangement is such that the oil supply can be pumped, by means of a motor-driven centrifugal pump, directly from either of two duplicate storage tanks, located in the basement, to any one of the transformers. The oil is passed through a filter of the blotter type, which removes moisture and dirt from the oil before the latter is discharged into the transformers. Oil drain pipes are also provided, so that by a hurried operation of a quick-acting valve in case of fire or other accident, the oil in any transformer can be drained either to the storage tanks or to the sewer. Each of the storage tanks has a capacity equal to the oil contained in one transformer, namely, 4,040 gallons.

The second floor of the substations is divided by a partition wall, on the longitudinal center line of the building, into two large rooms, a 44,000-volt room and a 2,200-volt room. The 44,000-volt room is over the transformers, and the 2,200-volt room is over the main switchboard room. The stairways terminate at either end of the 2,200-volt room, and small doors at both ends of the center wall give access to the 44,000-volt room. Directly under the 2,200-volt room is a cable space, eight feet in height. The floor of the cable space is also the ceiling to the switchboard room. This cable gallery serves as a runway (1) For all conduits in which are run the control and instrument wiring and (2) For all feeder cables.

The feeder disconnecting switches are on the second floor, directly over the cable space. The cables, which are 3-conductor, No. 0000, varnished cambric insulated and lead-sheathed, drop from cable bells at the disconnecting switch into the cable space, and are carried along the floor to either end of the area. At each end of the cable space, in the stairway bay, there are two vertical cable shafts, which connect the cable space with large 16 by 16 by seven feet high manholes in the front corners of the buildings. The two manholes are virtually basement rooms under the stairway. The feeder cables are run down the cable shafts into the manhole, and thence out into the underground duct lines. Provision is also made for armored feeders to emerge from the substations from smaller manholes at the rear corners. Each of the smaller manholes is connected to the large manholes by six ducts laid under the first floor, and the larger manholes are interconnected by 16 ducts, four wide by four deep. The manholes are large and roomy, as are the cable shafts, which latter are provided with permanent ladder rungs to render access easy throughout the entire height. The cable space has ample head room, and, although closed from view at the stairways, is, nevertheless, readily accessible for changes in feeder cables.

The path of electrical energy at a step-down substation (reversed at Gatun) is from the incoming lines, which are anchored on the roof through roof insulators, down the center wall to the second floor, where the leads are carried through oil switches (type K-21) to the 44,000-volt bus. This bus consists of three No. 000 bare copper solid wires supported from insulators near the lower chords of the roof trusses in the 44,000-volt room. The bus is sectionalized by means of disconnecting switches located at the roof trusses on the

building, over the transfer track. It is to be noted that the air circulation is perfectly natural in every respect, depending upon the elementary law of physics that heated air rises. In the event of a strong head wind directed against the air discharge from the transformer compartments, the natural circulation may be insufficient to overcome the wind pressure, in which event, it will be a comparatively easy matter to install a forced air system by placing the blowers in the basement tunnel.

Bar iron gratings are installed at several openings, namely: (1) At the tunnel inlet, where the six by 9-foot opening pierces the sidewalk and is protected by the grating, and

length of seven feet 10½ inches. Each radiator section is approximately 12 inches wide by two feet eight inches long. Connections to the tank are made at either end of the radiators by 2-inch galvanized pipe. One end of the radiators connect to the upper level of the tank, where the hot oil is received by the radiators, and the opposite end of the radiator connects to a lower level of the tank, where the cooled oil is discharged into the tank. The transformers are star-connected on the primary side, and the neutral is grounded. The secondary side is delta-connected.

An oiling system is provided to facilitate the handling of the special transil oil in which the transformer coils are immersed. It is

transverse center line of the building. One incoming line and two 2,000-kilowatt transformers are connected to each of the bus sections. The busses are spaced five feet apart, and the tops and interconnections are spaced from three to five feet on center.

Tapped to each incoming line are a bank of aluminum type electrolytic lightning arresters. These arresters are located on the main floor, between the transformer compartments and the central work space. The function of the lightning arresters is to pass lightning or static discharge to ground without harm to the electrical equipment, particularly the large transformers. The arresters are equipped with auxiliary horn gaps mounted on the pipe framework above the arresters. These horn gaps, when discharging lightning, are enveloped in flame and charged gases. Large clearances, above and around the horn gaps, to prevent arcing between phases and to ground, are obtained by an open well, size 11 by 17 feet, through the second floor, where the opening is protected by means of a concrete guard wall, eight feet high, surrounding the well. In the electrical connection used on the 44,000-volt side of the 2,000-kilowatt transformers, three phase arresters and one neutral arrester are used.

Between the lightning arrester taps and the line oil switch, choke coils are placed in each of the three phases. The choke coils are merely air insulated helices, which tend to prevent lightning and static disturbances from penetrating to the equipment, diverting such discharge to the arresters.

From the 44,000-volt busses to the ceiling, primary taps are taken to the transformer oil switches; thence the leads are carried through porcelain floor bushings to the transformers below. Disconnecting switches are installed between the oil switch and the bus, and between the oil switch and the transformer, so as to isolate the switch completely whenever repairs, or renewals of oil, are necessary. The secondary, or 2,200-volt leads, are taken from the rear of the transformer cover to the secondary transformer switches in the 2,200-volt room on the second floor front.

The 2,200-volt busses are in duplicate, and are sectionalized by disconnecting switches into halves. Each feeder and each transformer is provided with a double switch electrically interlocked, for throwing into either of the duplicate busses. All switches, as well as the instrument transformers, are enclosed in individual concrete cells having impregnated asbestos lumber doors to give access to the individual switches. In plan, the 2,200-volt room contains three rows of concrete compartments. The row adjacent to the center wall contains the cells for (1) the K-12 oil switches for the 2,000-kilowatt transformers; (2) duplicate bus-tie switches near either extremity, and (3) duplicate set of bus instrument transformers toward the middle of the structure. The six busses (duplicate 3-phase busses) are set above the K-12 cells, in individual longitudinal compartments, formed in monolithic concrete slabs, shelf fashion, integral with the new wall which comprises the back of the K-12 oil switch cells. The intermediate row of compartments contains the cells for the circuit or feeder switches (K-5 type.) The outside (front) row of compartments contain the cells for potential transformers, current transformers, feeder disconnects, and terminal boards. There are ample passage-

ways between the rows of compartments and between the compartments and the building walls. It is to be noted that the entire substation is sectionalized on the transverse center line of the building, and that the layout is symmetrical and in duplicate, respecting this center line. From the disconnecting switches in the outside compartment, the feeder cables drop below the floor into the cable space described above.

Lightning and static disturbance may be carried into the station through the underground feeders. Such a condition will be relieved by static dischargers, which are connected directly to each of the duplicate 2,200-volt busses. The static dischargers are of the aluminum cell type, very similar in theory and construction to the lightning arresters, and are located in compartments at either extremity of the K-5 oil switches.

All the oil switches (K-5, K-12, and K-21) are remotely controlled from the central control board in the main switchboard room. The potential and current transformers furnish reduced potential and current to energize the instruments, which, also, are all mounted on the control board. In addition to the usual complement of ammeters, wattmeters, voltmeters, and integrating and recording meters, the control board has mounted

transil oil system, and an electric oven to dry the blotters of the oil filter.

For lights and small power purposes around the substation, duplicate 35-kilowatt station transformers (ratio 2,200 to 220/110) are installed. These transformers are star-connected, and are provided with half taps, so that a 220-volt supply for power can be obtained from the outside transformer connections, and a 110-volt supply can be obtained on the middle taps for lighting. The station transformers are located in individual concrete cells, which form a part of the instrument transformer compartments on the second floor.

The cost of the four substations will be approximately \$480,000 for building construction, \$130,000 for contract structural steel erected, \$380,000 for electrical equipment, and \$100,000 for installation of equipment, a total of about \$1,100,000, including all labor and material.

The construction of the buildings was performed by the Supply Department. The installation of the equipment was in charge of the Division of Erection prior to July 15, 1914, when the division was abolished and the work of completing the installation of equipment was transferred to the Electrical Division. The engineering design of the entire transmission system, including the details

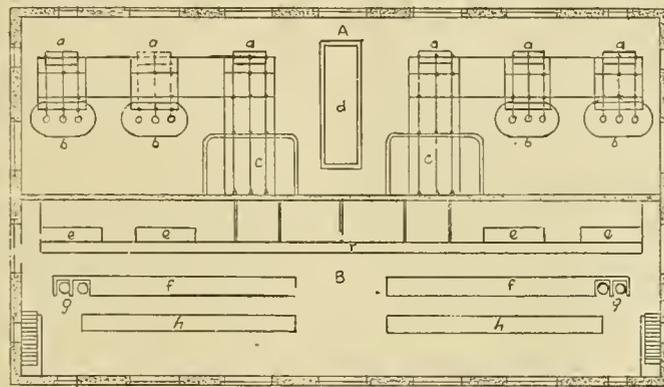

Figure 5.
SECOND FLOOR PLAN.

a—44,000-volt room. b—2,200-volt room. a—Oil switches, (44,000-volt—Type K-21.) b—Floor bushings. c—Lightning arrester wells. d—Hoist well. e—2,200-volt K-12 transformer oil switches. f—2,200-volt K-5 feeder oil switches. g—Static dischargers. h—2,200-volt feeder instrument compartments. i—Bus compartments (2,200 volts.)

upon it duplicate synchronizers and a clock of excellent movement and accuracy. The control board is likewise symmetrical respecting the center line of the building. In the center of the board are two station panels, containing instruments and devices for manipulating a mercury arc rectifier located immediately behind the station panels. The rectifier is used to convert alternating current into unidirectional current, which latter is used to charge a 160-ampere-hour storage battery.

The storage battery consists of 64 lead-plate cells made by the Electric Storage Battery Company, of Philadelphia, placed in a 4-shelved concrete compartment built on the mezzanine floor of a small 17 by 17-foot room, between the main switchboard room and the right hand lightning arresters. The battery supplies the direct current for operating the remote controlled oil switch mechanisms and also for emergency reserve for lighting, in case of failure of the normal alternating current source. Under the battery mezzanine is located the room containing all auxiliary equipment, including a small air compressor to supply air for cleaning and blowing out the equipment, an oil filter press and pump for the

of the substations, is the work of the former Electrical and Mechanical Engineer, Edward Schildhauer, and his assistants. The architectural details of the substation buildings were prepared by the former Canal architect, Mr. Mario Schiavoni.

Inspections, Etc. of Floating Equipment.

The representative of the Board of Local Inspectors, Mr. W. I. Pender, will be at Gamboa from 8 a. m. to 4 p. m. of every day during the week commencing December 7, 1914, for the purpose of receiving applications, making inspections, and issuing licenses and badges, for floating equipment as required by the terms of the Governor's circular No. 683, dated August 11, 1914.

C. W. BARBER,

Chief, Police and Fire Division.

Seismic Disturbance.

A seismic disturbance was recorded at Ancon from 4.40 to 5.02 a. m., on November 18. The maximum amplitude of the record was five millimeters. The epicenter of the disturbance was approximately 600 miles distant from Balboa Heights. Direction unknown.

CANAL WORK IN OCTOBER.

Monthly Report of the Governor to the Secretary of War.

BALBOA HEIGHTS, C. Z.,
November 19, 1914.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of October, 1914:

Department of Operation and Maintenance.

Lock operation and maintenance—Signal arrows were installed at all locks. Three towing locomotives were received, making a total of 38 to the end of the month. Installation of chain fender machines was nearly completed. Twenty-four fender chains have been ordered, of which seven have been installed at Gatun, five at Pedro Miguel, and one at Miraflores. The floating caisson which left San Francisco under tow on September 16 arrived at Balboa on October 29, and preparation for its final acceptance test was made. Work was started on grading the dams and backfill at Pedro Miguel and Miraflores. Ninety-one lockages were made at Gatun, 98 at Pedro Miguel, and 99 at Miraflores.

Municipal engineering—In addition to the maintenance work in both the north and south districts, the Division of Municipal Engineering continued the construction work started during September and initiated work on the permanent water supply for Toro Point, and on preparation of site and the construction of a water and sewer system and roads for the Coast Artillery post at Balboa dump.

Meteorology and hydrography—Rainfall was above normal over the upper Chagres, Gatun and Trinidad river basins and along the Atlantic coast, but deficient in the Pacific section, the monthly totals ranging from 6.44 inches at Balboa Heights to 26.20 inches at Chillibrillo. The maximum precipitation recorded in any one day was 3.99 inches at Colon on the 14th. The estimated average rainfall over the Chagres River basin figures 33 per cent above normal—19.08 inches against a 14-year average of 14.34 inches.

Electrical—The net output of the hydroelectric station was 674,700 kilowatt hours, of Miraflores steam station 2,035,360 kilowatt hours, and of Balboa power plant 4,007 kilowatt hours. The four substations were practically completed. This division performed work in Balboa shops, on new and reconstructed quarters, and on the construction of the transmission line and underground conduit systems.

Division of Terminal Construction.

PACIFIC TERMINALS.

Shops—Award was made for the exhaustor system for the laboratory in building No. 28; that for building No. 8 arrived on the Isthmus, with the exception of the motors.

Dry dock—Design for the dock was advanced. Structural steel reinforcement at the caisson seats was ordered. Concrete work consisted of the usual routine of raising and filling forms; 18,084 cubic yards were placed by locomotive cranes and by hand.

Coal pockets—Backfill was made at the west end. Three hundred and fifty cubic yards of concrete were placed. Erection of the first crane progressed as far as placing a portion of the north cantilever arm.

Quay wall and pier—Difficulty was experienced in keeping the water pumped out of the cylinders for the quay wall, Section d-e-f, and it was necessary to seal one of the

cylinders by placing an earth fill around it. Excavation from the cylinders amounted to 408 cubic yards, the greater portion of which was rock. Concrete filler in the caissons was increased by 1,373 cubic yards. The cost of mixing and placing concrete was about 41 cents per cubic yard. The brick paving on pier No. 1 was finished, 178,435 square feet being laid during October.

Fuel oil plants—Owing to tides and wave action, great difficulty was experienced in keeping water out of the cylinders. Well drills were set up for service as hoisting engines and pumps were installed for the removal of water from the cylinders. Penetration amounted to 23 feet, one cylinder being sunk to boulder foundation.

Quarries—At Sosa Hill, 85,508 cubic yards were excavated; of this amount, 83,356 cubic yards were rock. At Ancon quarry, 49,200 cubic yards of rock were crushed. At the end of the month the crushers were closed down, but the plant is not being dismantled, for it may be found necessary to reopen it.

ATLANTIC TERMINALS.

East breakwater—In the construction of the trestle for the fill 220 untreated piles were driven. The total fill in place at the close of the month measured 149,363 cubic yards.

Coaling plant—The dredge *Marmot* excavated approximately 42,083 cubic yards of material from the area to be occupied by subaqueous coal storage. Caisson work progressed satisfactorily; 1,806 feet of penetration were accomplished. The filling of caissons under the reloader wharf was continued, and 25 caissons were filled up to the base of the bearing plate. Task work for hand excavation at the bottom of the caissons, assembling of spiral reinforcement, and assembling and riveting of caisson sections, begun on October 1, proved quite satisfactory.

FLOATING CRANES.

Ajax—This crane was brought into the middle chamber of Gatun Locks on October 2, where the jib was successfully pinned in place and raised for connection with the spindle carriage. On October 16, the crane was towed back to Dock 13. At the close of the month, the driving mechanism for the storage drums was completed; all wire rope for main blocks, auxiliary hoist and trolley were in place; the first coat of graphite was about completed, and the finishing coat approximately 95 per cent completed; the work of painting the deck was begun, and the final coat was being applied to the outside of the pontoon.

Hercules—At the close of the month, the jib was completed and had been lowered on rollers and painted preparatory to skidding it over the lock chamber; all inside compartments of the pontoon were painted and the first coat on the crane structure was 95 per cent completed. The heavy and more important parts of the machinery were installed. On October 28, steam was raised in the boilers and the engines were turned over. On October 31, the spindle carriage was tried out and found to work satisfactorily.

LANDSCAPE ARCHITECT.

At the Administration Building, grading work was in progress throughout the month; asphaltting of the carriage turns was completed, together with the closing in of the gap in the approach drive, and plans were prepared for the grading of the hill along the front and on the west side of the building.

All data remaining in the field books were

plotted and put into graphic record form preparatory to disbanding the organization and turning the work over to the Division of Municipal Engineering on November 1.

The following dredging was done:

	Cu. yds.
Miraflores Locks to Pacific.....	15,218
Miraflores Lake.....	543,694
Culebra Cut.....	543,694
Gatun Lake.....
Gatun Locks to Atlantic.....
Total Canal prism.....	558,912
Pacific Terminals.....	277,772
Atlantic Terminals.....	442,508
Gravel.....	40,350
Sand.....	14,700
Total.....	775,330

A new slide developed on the east bank of the Canal, opposite Culebra. On October 14, about 727,000 cubic yards of material were carried into the prism and the movement continued throughout the remainder of the month. Excavation from this slide amounted to 65,217 cubic yards of earth and 281,151 cubic yards of rock, and the dredges were worked under a continuous strain to keep the channel open.

The hydraulic grader was engaged in surfacing the banks, cutting a ditch to drain the pond on Cucaracha slide and in sluicing.

The destruction of water hyacinths continued; 37,277 square yards of plants were poisoned and 377 square yards were pulled and piled on the bank. The entire month's work was confined to the Obispo River, with a cruise once a week into Gatun Lake.

Mechanical Division.

The general character of the work in this division was about the same as that for the previous month, with a further reduction in volume resulting in a decrease in force of 74 gold roll and 176 silver roll employees. Night shifts were taken off in all shops, except at Paraiso, where the continuance of night work is necessary on account of urgent repairs to dredging equipment. Work on the caissons for pier No. 7 at Cristobal, the largest job at present in the shops, is within approximately two months of completion.

Shop orders authorized during the month numbered 908; those left over from previous months, 460; those completed during October, 936; carried forward into November, 432. The output of the foundry was 166,057 pounds of iron, 40,915 pounds of steel, and 15,251 pounds of brass. Hostling was done on 5,134 pieces of equipment. Shop repairs were made on 1,499 cars, and field repairs on 6,301.

Division of Canal Transportation.

Eighty-five ships, including one launch, passed through the Canal in October, 45 (one launch) southbound, and 40 northbound. Collections for tolls amounted to \$349,986.48; for pilotage \$3,077, launch service \$81.25, for service of deck hands \$408, service of deputy collector \$10, or a total of \$353,562.73.

Twenty-three vessels were admeasured, 42 inspected to see that their certificates conformed to the rules, and 13 remeasured.

Owing to an increase in traffic over that which was expected, it was found necessary to increase the complement of pilots. Vessels are being started through the Canal with less delay than formerly, due to a reduction in the paper work of the terminal offices, while improvements in communication and the recently established signal station at Empire effect a material saving in the time of transit.

Supply Department.

The force report for the last Wednesday in

October showed a total of 26,759 employees of The Panama Canal and Panama Railroad Company, of whom 4,148 were white Americans and 22,611 were laborers. Of the latter, approximately 711 were Europeans and the remainder West Indian negroes. The total force was reduced 1,440; Americans, 140; laborers, 1,300.

The occupants of Government quarters numbered 7,108 white Americans, of whom 4,087 were men, 1,507 women, and 1,514 children; 8,092 West Indians, of whom 5,258 were men, 1,201 women, and 1,633 children.

Although at the close of the month 21 of the new concrete 4-family houses at Balboa were finished and occupied, a marked congestion in family quarters at Balboa and Ancon continued, and this was increased by the removal of the Panama railroad offices from Colon to Balboa Heights and the consequent desire of the company's employes to procure quarters at the Pacific end.

On October 1, building operations were placed under the direction of Capt. R. E. Wood, who was designated Constructing Quartermaster.

A large stock of supplies was transferred from Mount Hope depot to the Balboa storehouse and on October 20, the main depot was established at the latter point. From this depot all material, except stationery, is now issued, and the storekeeper in charge is held responsible for the upkeep of the stock on the Isthmus. The certification of United States bills and the compilation of stock requisitions were transferred from the Mount Hope depot to the United States Requisition Division at Balboa Heights. The value of material received during the month was \$689,675.71. It came forward in 30 steamers, the total weight of cargo, exclusive of lumber and piling, being 15,075 tons.

Accounting Department.

The cash balance in Canal construction appropriations on October 31 was \$17,829,459.23; in the fortifications appropriations \$4,693,890.47. The pay rolls for October, exclusive of Army quarters, storehouses, fortifications, etc., amounted to \$1,078,800.99, and the fortifications roll amounted to \$56,608.40. Payments by the disbursing clerk in Washington amounted to \$1,163,650.09; by the Paymaster on the Isthmus \$1,553,057.91. Collections on the Isthmus amounted to \$1,053,456.34, of which \$434,001.64 were repaid to appropriations, \$230,622.73 were trust funds, and \$388,831.97 were covered into the Treasury as miscellaneous receipts. Of the miscellaneous receipts, \$349,986.48 were collected on account of tolls, as compared with \$263,220 in September. Deposits in the amount of \$135,173.49 were made with the Assistant Treasurer, to be applied in payment of tolls and other charges. Canal Zone revenue collections and miscellaneous funds received amounted to \$242,832.17, and disbursements under the same heading to \$294,521.77.

Health Department.

No case of yellow fever, smallpox, or plague originated on or was brought to the Isthmus during the month. The health of employes continued good. The number of names on the rolls for the preceding month was 38,416. On this basis, the admissions to hospitals and quarters on account of illness, 1,102, gave a rate of 344.25 per thousand, as compared with 365.70 for the preceding month and 492.80 for the corresponding month of last year. The admission rates to hospitals for all diseases

were: Whites 355.03, blacks 135.40, Europeans 626.79, Americans 293.41. The admission rates for malaria were: Whites 164.43, blacks 58.51, Europeans 343.71, Americans 123.78. Next to malaria, and in the order of their numerical importance, admissions to hospitals were on account of venereal diseases, diseases of the digestive, nervous, and respiratory systems. There were 15 deportations for disease.

The total number of deaths from all causes was 23; 15 from disease, or 4.68 per thousand, as compared with 5.31 per thousand for the preceding month and 5.14 for the corresponding month of last year. The death rates from disease were: Whites 1.87, blacks 5.24, Euro-

peans 10.11, Americans 2.29.

In the cities of Panama and Colon ordinances providing for posting notices for the removal of nuisances or unsafe structures, more effective ratproofing of stables, and forbidding the establishment or maintenance of private hospitals, became effective.

The outbreak of beriberi, reported last month, is subsiding; only two new cases were reported in October. Careful investigation has revealed nothing of special interest. The factors common to all cases were improper diet and bad sanitary surroundings.

Executive Department.

Customs—The volume of business handled at either port exceeded that done in any pre-

LABOR FORCE AND QUARTERS IN OCTOBER.

The force report for October 28 shows the actual working force of The Panama Canal on that date to have been 23,445 of the Panama railroad, 3,274, and of contractors, 40, a total effective working force of 26,759. This is a decrease of 1,440, as compared with the statement of September 23. The gold force on the Canal work, composed almost exclusively of white Americans, was 4,148, divided, as follows: The Panama Canal, 3,694; Panama railroad, 428; contractors, 26, a decrease in the total gold force of 140, as compared with the preceding month. Detailed figures of the total force employed on the Isthmus, by departments or divisions, are given below:

DEPARTMENT OR DIVISION.	SILVER EMPLOYEES*										Total silver.	Total gold.	Grand total.			
	Artisans.					European labor.		Laborers.								
	Monthly.	Special.	22 cents.	18 cents.	15 cents.	12 cents.	Special.	16 cents.	13 cents.	10 cents.				7 cents.	5 cents.	
Operation and Maintenance: office & locks	168		27	143	208	66	1	60	142			2	758	144	902

QUARTERS.

A report of Canal and Panama railroad quarters occupied on October 31, follows:

PLACE.	Gold.			Europeans.			West Indians.		
	Men	Women	Children	Men	Women	Children	Men	Women	Children
Balboa	719	123	123	423	12	16	1,476	461	573
Ancon	812	344	300				596	54	6
Corozal	698	206	237	98			584	48	47
Pedro Miguel	190	101	118	36			230	18	28
Paraiso	261	72	84	116	5	16	312	117	185
Culebra	169	148	136	7	8	15	446	260	338
Gamboa	23	7	9				106	25	24
Gatun	288	179	183	169	5	14	307	48	52
Cristobal	23	327	324	33			1,026	170	380
Toro Point	2						175		
Total	4,087	1,507	1,514	882	30	61	5,258	1,201	1,633

(1) Includes nine American negroes, and two Panamanians on the gold roll. (2) Includes Sabanas police station, Taboga Island, Naos Island, Culebra Island, and Palo Seco. (3) Includes Miraflores. (4) Includes one Asiatic. (5) Includes 41 Panamanians. (6) Includes Empire. (7) Includes Colon Beach and Colon Hospital. (8) Includes 26 East Indians, 13 American citizens, and 78 Panamanians. Gold force of contractors (included above), 72 bachelors.

vious month. A new office for the customs inspectors at Cristobal was erected at the entrance to Docks 8 and 9. This brings the inspectors nearer to their work and should increase the efficiency of the service.

Administration of estates—Thirty-six estates were settled during the month, with a total value of \$1,323.49, and 26 estates were in course of settlement at the close of the month.

Postal service—Postmasters remitted, on account of stamp sales, second-class mail collections and postage due collections, \$6,027.87. The money order business aggregated \$393,883.69, and fees on the business amounted to \$143,660, and the withdrawals to \$158,475. The balance of postal savings funds on hand at the close of the month was \$756,913.

Police and fire—Arrests numbered 502, of which 479 were males. Seventy-one convicts were confined in the penitentiary during the month. The cost of subsisting and guarding them was \$1,912.25, and the value of the labor performed by them was \$1,246. Five fires were reported.

Courts—In the District Court, six civil, 37 criminal and 58 probate cases were settled; seven civil, 30 criminal and 42 probate cases were filed; and 94 cases of all kinds were pending on October 31. In the Magistrates' Courts, 17 civil and 506 criminal cases were tried.

Schools—The Canal Zone schools opened on October 1 with a total enrollment of 1,111 in the white schools, and 1,028 in the colored schools. In the white schools, the net enrollment was 1,062, the average number belonging 1,011.4, and the average daily attendance 991.7; in the colored schools, the net enrollment was 980, the average number belonging 851.4, and the average daily attendance 779.1.

Panama Railroad.

Cargo handled amounted to 66,043 tons, which includes 4,262 tons rehandled, due principally to car shortage. This decrease in tonnage resulted from the monetary situation in Peru, and from a curtailment of the service of English connections due to the presence of German men-of-war off the South American coast. At Balboa agency, 11,436 tons of cargo were handled from 14 ships arriving, and 10,709 tons were handled to 10 ships departing. Twenty-three hundred and eleven tons of coal were bunkered into 14 steamers, in addition to 754 tons sold to the *U. S. S. Denver*. Through service from New York to Balboa was inaugurated by the steamship *Allianca*, which arrived at Cristobal on October 28, and at Balboa on October 30; from this ship 495 tons of transfer cargo were discharged.

The preparation of contract drawings for pier No. 7 was continued. About 71 per cent of the total trestle required was in place at the end of the month. Twenty-nine per cent of the wash drill soundings required were made, making this feature of the work 73 per cent completed.

The erection of the bridge across the French canal was started on October 5 and at the close of the month the bridge was 95 per cent assembled and 70 per cent riveted.

All authorized duct line work was completed.

The main office force, heretofore located at Colon, was transferred to the Balboa Heights Administration Building on October 16. While practically every feature of the

office work retains its identity, administrative charges were considerably reduced and some reduction in force was effected.

Respectfully submitted,
GEO. W. GOETHALS,
Governor.

French Concrete Blocks.

Upon request, a section of one of the old French concrete blocks, in use for many years in protecting the shore line in front of Cristobal from encroachment by the sea, has been cut out and forwarded to the publicity bureau of the Universal Portland Cement Company at Chicago.

The French records show that two separate contracts were entered into covering the manufacture of these blocks, one dated in May, 1884, and the other in April, 1886. The first mentioned contract called for 200 blocks in three different sizes, but it does not appear that any blocks were ever manufactured under it, nor have any blocks been found corresponding to the specified dimensions. The contract of 1886, under which the blocks which exist today were made, contained the following specifications:

Stone to pass through a ring 0.06 of a meter in diameter, and to be washed and screened to eliminate all particles smaller than 0.02 of a meter in diameter; cement mortar to be composed of 800 kilograms of cement to one cubic yard of sand, these materials to be mixed dry upon a wooden platform under a roof. Water is to be added by means of a sprinkling hose, taking care to use only as much as may be necessary to produce a homogeneous mortar, which will stick to the shovel. The concrete shall be composed of two parts of mortar and three of stone. After the mortar is mixed, as specified above, the stone is to be added and mixed with an iron hoe until all of it shall have been completely covered with the mortar. The mixing is to be accomplished without further addition of water, the stone to be carefully watered in the pile at least one hour before using. The resulting concrete is to be dumped into forms and compressed into a compact mass. Repeated ramming is to be carefully avoided.

The material used in the manufacture of these blocks consisted of a French cement, Bohio rock, and Panama Beach sand. Bohio rock is a volcanic agglomerate of rather low specific gravity and of medium hardness, but it is very resistant to weathering. The same stone was used in the construction of Christ Church on Colon Beach. The corner stone of this church was laid in 1865, and the walls are practically as good as when they were first built.

The blocks placed by the French along the Cristobal water front subsequently became badly honeycombed by wave action, and in 1909, it was found necessary to take steps to protect the shore line, either by building a sea wall, or by adding new blocks. The latter method was decided on as the least expensive, and accordingly, about 400 concrete blocks, each containing a cubic yard of material and costing \$4, were made. They were placed in a row along the beach from Cristobal Point to the dividing line between Cristobal and Colon, and were separated by a space of six inches, half filled with concrete; the sea face of each block was slightly higher than on the land side to prevent an inrush of water. When the construction of Dock 9 was determined on, it became necessary to remove some of these blocks, and a quantity of them was afterward utilized to break the force of the waves on the seaward side of the Cristobal mole and in front of the new Hotel Washington.

Contract for Drilling Holes.

J. E. Albrecht has been awarded the contract for drilling holes at Sosa Hill quarry at the rate of 11 cents for each foot of hole drilled. Seven bids, in all, were received.

OFFICIAL CIRCULARS.

Physical Examination for Entry into Service.
THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., November 16, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:
Hereafter, applicants for physical examination at the Ancon dispensary for entry into the service of The Panama Canal or Panama Railroad Company should present themselves at the dispensary during the following office hours: 8 a. m. to 10 a. m., and 12 m. to 1 p. m.

GEO. W. GOETHALS,
Governor.

Seniority of Dipper Dredge Men.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., November 9, 1914.

CIRCULAR No. 605-1:

1. The seniority of masters, operators, cranesmen, and engineers of dipper dredges will be determined from the date they enter the service as such for each position, respectively. Separate seniority lists will be maintained in the Executive Office for

- (a) Masters and operators
- (b) Cranesmen
- (c) Engineers

Revisions of the lists will be published from time to time, as necessary.

2. Dipper dredge engineers will not be promoted to the position of cranesman before having served one year, unless they are experienced cranesmen or unless experienced cranesmen are not available.

3. The senior cranesman or engineer up for promotion to operator or cranesman, respectively, shall be allowed seven days to be tried out in the new position. If, in the opinion of the resident engineer, he is qualified for the position, he shall be promoted immediately after the tryout.

4. The senior man shall in all instances be given preference for promotion to vacancies in the next grade above, if he is qualified for the position or can qualify as provided in the preceding paragraph. In filling the position of chief engineer, the preference will be given to the senior operator (original seniority.)

5. When the force is reduced, the junior man may take the place of the senior man in the grade below, if he is senior and has served in that grade. The rule is subject to the stipulation regarding chief engineer in Paragraph 4.

6. In case of compulsory transfer to some other position temporarily, dipper dredge men will not lose their seniority as such.

7. No operator, cranesman, or engineer shall be promoted under this circular until he shall have first secured from the Board of Local Inspectors the necessary license covering the position proposed.

GEO. W. GOETHALS,
Governor.

Major Wildman Relieved from Duty on the Canal Zone.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., November 18, 1914.

SPECIAL ORDER:

Maj. L. D. Wildman, U. S. A., is hereby relieved from duty on the Canal Zone, effective November 22.

GEO. W. GOETHALS,
Governor.

Form for Request of Transfer of Employee.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., November 19, 1914.

Heads of departments and divisions—Please discontinue the use of form PC. 277, transfer slip, and destroy any supply you may have in stock. In the future, if the records of an employee is desired, it will be furnished by this office upon request.

Form PC. 493, request for transfer of employee, is now in stock, and future requests for the transfer of an employee should be submitted to the Executive Secretary on this form.

C. A. MCVLAINE,
Executive Secretary.

New Form of Cash Sale Slip.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., November 16, 1914.

To all concerned.—A new form of cash sale slip (Form A-219), printed in triplicate and numbered serially, has been provided.

Storekeepers and district quartermasters making sales will complete the form and deliver the original (yellow) to the purchaser, and forward the duplicate (blue) and the triplicate (pink) copies to the Auditor.

Completed copies of this form must show the account which is to receive credit, and, if items are from stock, the class number. When items of non-expendable property are sold, the accountable official will give this form a voucher number, which must be shown on all copies.

Reference to approval appraisal number must be shown in proper column for all sales made from obsolete storehouse, and in cases where the appraisal value is \$100, or greater, a reference to survey request must also be shown in the proper column.

Extra memorandum forms have been provided, and officials making sales will be required to make a sufficient number of these extra memorandum copies for their own files and to answer the needs of the purchasers.

H. A. A. SMITH,
Auditor, The Panama Canal.

Trip Tickets to be Filled Out Before Boarding Train.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., November 23, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

The practice of employees riding the passenger trains between Balboa and Corozal (and to a less degree between Balboa and Pedro Miguel) neglecting to fill out and sign their 120-trip coupons before boarding the train causes unnecessary and annoying delays on the part of conductors and collectors and results in a loss to the Panama railroad of considerable transportation.

You will please bring forcibly to the attention of all employees the following requirements stated in my circular letters of May 11, 1910, and April 24, 1913, respectively.

"In the future 24-trip ticket coupons must be completely filled out, signed, and ready for presentation to the collector when he makes his rounds.

"The holders of 120-trip tickets will, hereafter, be required to fill in on coupons stations between which it is desired to travel and sign their names before entering the train."

The above quoted requirements apply with equal force to 60-trip tickets.

GEO. W. GOETHALS,
Governor.

Books for The Panama Canal Library.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., November 21, 1914.

Heads of departments and divisions—Please forward to the librarian, Balboa Heights, a list of all books belonging to The Panama Canal or Panama Railroad Company which have not been as yet sent to the library, or which you are keeping in your office for ready reference.

It is desired to include in the library index a list and description of all these books, so that if information contained in them is needed, the librarian will know where such books may be found. The list should contain titles, brief description, and brief table of contents of each volume, with building, room number and book case where kept, as follows:

Title.	Class.	Contents.	Building.	Room.	Book Case
.....
.....
.....
.....

GEO. W. GOETHALS,
Governor.

Messengers for Errands Outside of Administration Building.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., November 21, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS IN THE ADMINISTRATION BUILDING:

Officials in the Administration Building are requested not to use station messengers for errands outside of the building requiring more than 10 minutes to perform. If special service of this nature is desired, a messenger will be furnished upon application to the Chief Clerk.

C. A. McILVAINE,
Executive Secretary.

Transmission Line Energized between Miraflores and Balboa.

THE PANAMA CANAL,
DEPT. OF OPERATION AND MAINTENANCE,
BALBOA HEIGHTS, C. Z., November 20, 1914.

Heads of departments and divisions—Both sides of the transmission line between Miraflores and Balboa substations will be put in service at 44,000 volts on Sunday, November 22, 1914. The remaining sections will be energized in the near future and further notice will be given you of the exact dates.

To date there have been several instances of locomotive cranes interfering with these wires. All employees should be notified of the fact that almost certain

loss of life will result from contact with these wires after they are put in service, and that even close approach to them with the boom of a crane or other structure is dangerous in the extreme. Cranes and other equipment or tools should be handled so that a clearance of at least six feet from the wires is maintained.

W. H. ROSE,
Electrical Engineer.

Transmission Line Tests.

THE PANAMA CANAL,
DEPARTMENT OF OPERATION AND MAINTENANCE,
BALBOA HEIGHTS, C. Z., November 24, 1914.

All concerned.—The permanent transmission line on the track-span bridges between Miraflores and Balboa substations, will be undergoing high potential tests on Friday, November 27, and Saturday, November 28. This in advance of putting the line into regular service on Sunday, November 29, in accordance with previous notifications.

During the testing period abovementioned, the line should be considered in all respects as if it were in service at 44,000 volts.

W. H. ROSE,
Electrical Engineer.

Weighmaster's Reports.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,
BALBOA HEIGHTS, C. Z., November 18, 1914

CIRCULAR No. 203:

All concerned—Effective at once, signed copies of weighmaster's reports should be returned to the storekeeper, Balboa, instead of to the Depot Quartermaster, as formerly.

W. R. GROVE,
Chief Quartermaster.

Issuance of Material from Balboa Storehouse.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,
BALBOA HEIGHTS, C. Z., November 16, 1914.

CIRCULAR No. 202-1:

To all concerned—My circular of October 19, making Balboa storehouse the main depot of supplies on the Isthmus, is amended so that requisitions for oils, greases, and coal will also be placed on Balboa storehouse.

Only stationery requisitions will be sent to Mount Hope in the future.

W. R. GROVE,
Chief Quartermaster.

Small Concrete Mixers.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,
BALBOA HEIGHTS, C. Z., November 20, 1914.

CIRCULAR No. 204:

Heads of departments and divisions—Will you kindly advise if you have any small concrete mixers that can be released within the next 10 days.

W. R. GROVE,
Chief Quartermaster.

Proposals for Plastering Houses Nos. 753 and 756, and Balboa Commissary.

THE PANAMA CANAL,
OFFICE OF THE CHIEF QUARTERMAS-TER.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., December 1, 1914, and then opened, for furnishing the necessary labor to do all plastering required to finish houses Nos. 753 and 756, Balboa, and the commissary at Balboa.

Specifications for this work may be obtained upon application to the Constructing Quartermaster, room No. 266, Balboa Heights.

Bids may be submitted for each job or a total for the three jobs.

Bids must be accompanied by \$100.

Bids should be marked "Proposals for plastering Houses 753 and 756, and Balboa commissary."

W. R. GROVE,
Chief Quartermaster.

Proposals for Mixing Concrete for North Entrance Pier at Balboa.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMAS-TER,
BALBOA HEIGHTS, C. Z., November 18, 1914.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until November 27, at 3 p. m., and then opened for furnishing the necessary labor for mixing concrete for the north entrance pier at Balboa.

Specifications and form of contract may be obtained upon application to this office.

Bids must be at a price per batch for this work.

Bids must be accompanied by \$100, U. S. currency. The Government reserves the right to reject all bids. Proposals should be marked: "Proposals for mixing concrete for north entrance pier, Balboa."

W. R. GROVE,
Chief Quartermaster.

Supplies for the Canal.

The following steamers, with supplies for The Panama Canal and Panama Railroad Company, arrived at the ports of Colon and Cristobal during the week ending November 7:

Danube, November 1, from New York, with 25 bars steel, 24 reels cable, for stock; one box brass fittings, for permanent buildings; one box splicing sleeves, for Electrical Division; one box structural material, for Division of Terminal Construction.

Pastores, November 4, from New York, with 22 packages stationery, eight bundles hoes, two cases sheet copper, 12 barrels washers, one keg washers, two cases brushes, three cases stocks and dies, for stock; 75 bundles anchor bolts, 140 snubbing posts, 125 washers, eight pieces molding, one barrel cable terminals, one case copper rods, 43 cases electrical material, two boxes electrical material, for Division of Lock Erection; 15 packages cast iron fittings, for municipal engineering division; four cases electrical material, for Fortifications Division; nine cases electrical material, for Electrical Division; six pieces cable jacks and extras, two cases parts, for Panama Railroad Company.

Carlago, November 4, from New Orleans, with one bale black moss, 46 pieces rough oak, for stock; 1,845 pieces 3 by 9 oak, for Mechanical Division.

Colon, November 4, from New York, with four boxes tool parts, six cases butts, 15 bales burlap, 33 boxes wire cloth, 10 cases valves, three barrels valves, 10 legs nuts, five boxes nuts, six cases bronze rods, one case bronze tubes, 25 boxes lye, 125 cases soap polish, 21 crates ash can covers, 20 coils lead pipe, 10 cases paper towels, two cases chain blocks, four boxes chain hoists, four boxes car seals, two cases willow baskets, for stock; three boxes stationery, for Accounting Division; 14 boxes electrical material, one box charts, 12 packages transformers and parts, six drums transil oil, five cases soldering paste, 12 cases electrical material, one case soapstone, for Electrical Division; one box blueprint paper, three packages stationery, one package seals, 16 cases boxes, tables and lock boxes, one case bulletins, for Executive Secretary; four pieces steel pipe, one package nozzles, two crates pins, eight steel hinges, one plate, five reels cable, for Dredging Division; one box diaphragms, for Canal transportation 31 cases machinery, 15 boxes insulating tape, six cases electrical material, 13 reels copper wire, for Division of Lock Erection; 13 packages medical supplies, e. c., one stock pot, three boxes photo plates, one package books, for Health Department; one magneto, one box blueprint paper, five packages ladder parts, one box valves, one box typewriter parts, 35 cases linoleum, 65 brake beams, five boxes brake shoes, 53 castings, two stencil cutting machines, four barrels Franklin, for Mechanical Division; one box butts, 121 barrels lime, 64 cases elevator material, 20 coils cable, six pieces l-beams, for permanent buildings; 65 bundles lath, 88 steel plates, 44 steel angles, seven bundles steel bars, for Division of Terminal Construction; one box rubber balls, for municipal engineering division; 24 cases electric lamps and globes, for Fortifications Division; two crates signal material, two pieces signal material, 61 pieces steel channels, for Panama Railroad Company; and a miscellaneous cargo, the whole consisting of 1,242 packages weighing approximately 169 tons.

Turriaba, November 5, from New Orleans, with 120 bags of feed, for stock; two velocipedes, for municipal engineering division; 3,667 pieces oak lumber, 279 pieces oak flooring, 190 packages metal louvers, for Mechanical Division; 50 pieces castings, two barrels castings, one box castings, for Dredging Division.

The total value of material received during the month of October was \$639,675.71 distributed, as follows:

Stock	\$276,807.23
Lock erection	74,868.41
Division of terminal construction	72,318.29
Dredging Division	54,230.43
Mechanical Division	44,100.63
Electrical Division	22,746.10
Canal Transportation	13,476.78
Municipal Engineering	46,098.10
Permanent Buildings	11,327.19
Panama Railroad Company	21,750.52
Fortifications	39,820.13
Executive Secretary	3,884.70
Accounting Department	4,633.97
Total, Operation and Maintenance	\$686,662.48
Health Department	3,013.23

Grand total..... \$698,675.71

	1.3	14.5	0.6	15.0

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Goedetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the

soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from Oh (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3.47.

Rainfall from November 1 to 21, 1914, Inclusive.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls, or the purchase of supplies may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

It is advisable that deposits be made somewhat in excess of the anticipated charges, to cover minor charges which may not have been anticipated, such as pilotage and towage. Pilotage is at the rate of \$1 per foot of maximum draft, but is not charged on a vessel which makes the transit of the Canal without taking on or discharging freight or passengers in a terminal port. Tug service, which is at the rate of \$15 per ton, will not be charged on vessels of less than 15,000 gross tonnage.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa from the Union Oil Company at the rate of from 1,300 to 1,600 barrels per hour. The present price is \$1.30 per barrel, reduced to 60° Fahrenheit.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa.

Subsistence supplies, including a large stock of fresh meats, vegetables, canned groceries, fruits, bakery products, etc., are available for quick delivery at either terminal. Prices are generally lower than the retail prices in the United States, and compare favorably with prices in any part of the world.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is bawled quickly, and no advance notice is required. The following are representative charges; for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

Repairs to vessels may be made to any extent, except where the use of a large dry dock is required, or the

turning of the largest crank shafts or longest line shafts.

The Government hospital service is fully equipped for the treatment of medical and surgical cases. The charge for consultation at the dispensaries is \$3; for hospital treatment, in ward, \$3 per day; in private room, \$6 per day. For American seamen, the charge for treatment in ward is \$1 per day.

Application for supplies, or for services, should be made to the captain of the port, Cristobal or Balboa.

Mail, other than registered, and cablegrams for men on ships which will call at the terminal ports, or pass through the Canal, may be addressed in care of the captains of the ports, if desired; or may be addressed to Cristobal or Balboa, general delivery, with the name of the vessel written plainly; or, in case the vessel has a known representative on the Isthmus in care of such representative.

Sailings of Vessels in Regular Service With the Isthmus.

REGULAR CONNECTIONS WITH PACIFIC PORTS.

The Pacific Mail has sailings about every 10 days between Balboa and San Francisco, with calls at Puntarenas, San Juan del Sur, Corinto, Amapala, La Union, La Libertad, Acajutla, San José de Guatemala, Champerico, Ocos, Salina Cruz, Acapulco, Manzanillo, San Blas, and Mazatlan. The company also operates a direct line between Balboa and San Francisco, with sailings about every six weeks; and a Panama-Central America line, between Balboa and Ocos, making one round voyage monthly, and calling at all the ports abovenamed between Balboa and Ocos.

The Luckenbach Steamship Company is operating a 10-day service between New York and San Francisco, calling at East San Pedro both ways. Its vessels handle cargo at Balboa when sufficient business offers.

The American-Hawaiian lines between New York and San Francisco, and New York and Honolulu, discharge and take on cargo at Balboa when sufficient business offers. At present, a vessel of this company passes through the Canal about every third day.

Grace and Company maintain an irregular service between New York and San Francisco, calling at way ports. Sailings are made about every 12 days. A vessel plying between San Francisco and Valparaiso, calling at way ports, makes a round voyage about every 10 weeks.

The Peruvian Steamship Company maintains a weekly service between Balboa and Callao, with calls at Guayaquil, Paíta, Eten, Pacasmayo, and Salaverry. Every second voyage includes Mollendo.

The South American Steamship Company's vessels sail on alternate Mondays from Balboa for Valparaiso calling at Paíta, Eten, Pacasmayo, Salaverry, Callao, Mollendo, Arica, Iquique, Antofagasta, and Coquimbo.

The Pacific Steam Navigation Company has sailings on alternate Mondays for Peru and Chile; every 10 days for Ecuador; and on alternate Mondays for Colombian and Ecuadorian ports.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro, and an additional weekly sailing to Boca del Toro.

The Royal Mail maintains fortnightly service each way between New York and Southampton, making the following way ports: Antilla, Jamaica, Colon, Cartagena, Puerto Colombia, Puerto Cabello, Trinidad, Barbados, the Azores, and Cherbourg. Its vessels all arrive at Colon on Sundays and sail on Tuesdays.

The Compagnie Générale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Carupano, Trinidad, Martinique, Guadeloupe, and Santaoder; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Carupano, Trinidad, and Martinique.

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curacao, Puerto Cabello, and Barcelona.

The Compania Trasatlantica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curacao, Puerto Cabello La Guayra, Ponce, San Juan (Porto Rico), Cayary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls en route, the vessels sail from Genoa on the 8th day of each month.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing about every six days direct; between Colon and New York by the United Fruit Company and the Royal Mail Company, sailings via Kingston weekly and fortnightly, respectively; between Cristobal and

*Will carry mail from the United States.
 †Will carry mail to the United States.
 ‡Will carry mail for Alabama, Arkansas, Louisiana, Mississippi, and Texas.
 Irregular services between Cristobal and Gulf ports of the United States, with way calls at Central American and Mexican ports, are maintained by the Leyland and Harrison Lines, sailings about every fortnight, and the Seeberg Line, sailings about every 18 days.

CANAL

RECORD

Volume VIII.

BALBOA, CANAL ZONE, WEDNESDAY, DECEMBER 2, 1914.

No. 15.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Steamship "Ancon" Out of the Canal Service.

The steamship *Ancon*, operated by the Panama Railroad Steamship Line, has been taken out of the Canal service, and there will be no further sailings of this vessel from New York to Cristobal. Its sister ship, the *Cristobal*, was taken off several months ago, and is now in the United States transport service. These ships were purchased by the Government in 1909 for the express purpose of transporting cement to the Isthmus, but since the lessening of the demand for cement the *Ancon* has been used as a cargo carrier for all classes of supplies.

First Transit of Sailing Vessels Through the Canal.

The Canal was used by sailing vessels for the first time during the past week, when the British schooner *Zeta* and the American yacht *Athene* were put through together, in tow of a tug. The *Athene* is a pleasure boat, 104 feet long by 19 feet six inches in the beam, owned by C. E. Miller of New London, Conn. The *Zeta*, which is 132 feet long by 32 feet in the beam, is owned by Robert Wilcox of Colon, who has employed it during the past two years in trade between Colon and gulf ports of the United States. The *Zeta* was loaded with 600 tons, or 433,600 feet, board measure, of yellow pine lumber, shipped from Gulfport to Balboa, for local sale in the city of Panama. The vessels entered the Canal on November 28, and arrived at Balboa in the afternoon of November 30.

From Portland, Maine, to Portland, Oregon.

The steamship *St. Helens*, which passed through the Canal on November 27-28, is en route from Portland, Maine, to Portland, Ore., by the way of San Francisco, carrying a cargo of 1,517 tons of general manufactured goods. This is the second passage of the *St. Helens* through the Canal, the first having been made on October 23, with 5,200 tons of general produce, including a large quantity of canned fruits, from San Francisco for the North Atlantic seaboard.

The distance from Portland to Portland by rail across the continent is approximately 3,500 statute miles. The distance by water

through the Canal, is 6,121 nautical miles; by the Strait of Magellan, 13,787 miles.

The captain of the *St. Helens* reported on his arrival at Cristobal, that his vessel had been held up and searched by a foreign warship, about 90 miles out from port. The warship had signaled the *St. Helens* to stop, but the signal was not understood, and two shots were fired across its course, upon which the *St. Helens* hove to and submitted to examination, after which it was allowed to proceed.

Removal of Obsolete Floating Equipment from Balboa Harbor.

The time for removing the old hulk *Arica*, belonging to the Pacific Steam Navigation Company, and all other stationary craft of this nature from Balboa harbor, has been extended from January 15 to February 1, 1915. The *Arica* was formerly operated in the west coast service of the company, but became unseaworthy, and has since been used as a machine shop, storehouse, etc., as well as quarters for some of the company's employes. It is now moored near the new oil berth. The use of floating equipment other than the above in Balboa harbor will be permitted under a revocable license, which may be cancelled upon 60 days' notice. The above is in accordance with the general plan of moving all obstructions to navigation from Balboa harbor, owing to the increase in width and demand for space, etc.

Balance of Deposit to be Refunded Immediately.

It has been arranged that when a deposit has been made with The Panama Canal, either direct or through an Assistant Treasurer of the United States, to cover the tolls or other bills of a vessel making the transit of the Canal, the Collector shall forward to the depositor, immediately after the vessel clears, a copy of its bill, a statement of the account, and a draft for the balance due to the depositor.

Should the depositor request, however, that any balance be left to his account, to be applied on future charges, the Collector will be governed accordingly. In such a case he will forward immediately a copy of the vessel's bill and a statement of the account, specifying, of course, the balance to the credit of the depositor.

This arrangement has been made to put the steamship operator's dealings with the Canal on the simplest basis. Except that the Government requires payment in advance, which not all commercial firms do, the transaction is exactly analogous to a purchase in a store; with the delivery of the goods, the patron receives his change, or, if he prefers, may have it credited to his account.

"Colon" to Sail Monday, December 7.

The sailing of the steamer *Colon* from Cristobal, scheduled for Saturday, December 5, has been postponed to 5 p. m., Monday, December 7.

OVER \$1,000,000 IN TOLLS.

Million Dollar Mark Reached on November 18—Cargo to December 1st, 1,297,484 Tons.

The receipts of tolls on vessels making use of the Canal reached and passed the \$1,000,000 mark on November 18, and at the close of business on November 30 the total collections amounted to \$1,135,205.01.

Collection of tolls began in May, 1914, with the starting of a traffic in barges, towed by Canal tugs, which lasted until the opening of the Canal to ocean going vessels on August 15. The following is a summary of the receipt of tolls, by months, to December 1:

Prior to August 15.....	\$11,610.69
August 15 to 31.....	88,401.80
September 1 to 30.....	269,863.00
October 1 to 31.....	378,087.12
November 1 to 30.....	387,242.40

Total..... \$1,135,205.01

The transits of vessels during this period, with the totals of cargo carried, were, with reference to direction, from Pacific to Atlantic, or eastbound, and from Atlantic to Pacific, or westbound, as follows:

Month.	Eastbound.		Westbound.		Total.	
	Ves-sels.	Cargo.	Ves-sels.	Cargo.	Ves-sels.	Cargo.
Aug.....	12	57,182	12	49,106	24	106,288
Sept.....	30	186,776	27	135,262	57	322,038
O. t.....	40	252,288	44	168,060	84	420,357
Nov.....	33	242,291	54	206,510	92	448,801
Total.....	120	738,537	137	558,937	257	1,297,484

Of the total of 257 vessels, 227 were laden and 30 were in ballast, or by nature not cargo-carrying vessels.

As distributed over the principal routes on which the traffic through the Canal is moving, the transits to December 1 may be summarized, as follows:

	No. vessels.	Canal tonnage
Coastwise, eastbound.....	54	320,155
Coastwise, westbound.....	61	282,020
U. S. Pacific coast to Europe.....	34	248,020
Europe to U. S. Pacific coast.....	8	38,318
South America to U. S. and Europe.....	24	166,917
U. S. and Europe to South America.....	15	74,644
U. S. Atlantic coast to Far East.....	24	148,207
Miscellaneous routings.....	7	19,203
Vessels without cargo.....	30
Total.....	257	1,297,484

New Large Vessel for Union Oil Company.

The fleet of the Union Oil Company of California will be increased shortly by the addition of the *Lyman Stewart*, an oil tanker under construction for the company by the Union Iron Works of San Francisco. The vessel, which was launched on October 31, is 426 feet nine inches long by 55 feet four inches in the beam, 31 feet eight inches deep, with draft of 27 feet, and is to be equipped with 16 tanks having an aggregate capacity of 62,000 barrels. It is expected that its engines will develop 3,000 horsepower and propel the vessel at a speed of 11 knots.

The fleet of the company consists at present of 18 steamships and seven sailing ships,

barges, and tugs, a total of 25 oil carriers. Practically all American-owned vessels are equipped with wireless apparatus. Oil is delivered at more than 30 different ports between Alaska, Chile, and the Hawaiian Islands. The names of the ships, ports of call, and carrying capacity of each ship are, as follows:

Name of ship.	Ports of call.	Capacity. (Bbls.)
<i>Pectan</i>	Chile.....	72,000
<i>La Habra</i>	Chile.....	72,000
<i>San Joaquin</i>	Chile.....	72,000
<i>Corletta</i>	Balboa & British Columbia.....	66,000
<i>Elisnore</i>	Balboa & British Columbia.....	66,000
<i>Oberon</i>	Balboa & British Columbia.....	52,000
<i>Trinculo</i>	Balboa & British Columbia.....	52,000
<i>Santa Maria</i>	Hawaii.....	50,000
<i>Santa Rita</i>	Hawaii.....	50,000
<i>Lansing</i>	Oleum, Portland & Seattle.....	48,000
<i>Oleum</i>	Oleum, Portland & Seattle.....	36,000
<i>Argyll</i>	California ports.....	23,000
<i>Washienaw</i>	California ports.....	27,000
<i>Roma</i>	California ports.....	26,000
<i>Coastania</i>	California ports.....	21,000
<i>Fullerton</i>	California ports.....	16,000
<i>Whittier</i>	California ports.....	10,000
Barge <i>Santa Paula</i>	California ports.....	8,000
Barge <i>Wing & Win</i>	San Francisco Bay.....	1,050
Barge <i>No. 9</i>	San Francisco Bay.....	1,250
Barge <i>No. 42</i>	San Francisco Bay.....	1,005
Barge <i>No. 3</i>	San Francisco Bay.....	1,005
Sailing ship, <i>Erskin</i>	Hawaii, Portland, Seattle.....	35,000
Tug, <i>Transit</i>	California coast.....	

Practically all the crude oil is loaded at Port San Luis, California. Due to increased facilities some of the largest ships are being loaded in nine hours. The time required to unload at Balboa is about 36 hours. This time of delivery will probably change when unloading is done at the new berth of The Panama Canal.

Improved Taboga Service.

Beginning December 1, a daily launch service was inaugurated between the Balboa dredge landing and Taboga Island for the purpose of affording employes an opportunity of making more frequent trips to that locality. The schedule is such as will permit employes leaving after the close of the day's work, and returning in the morning in time to resume their duties. The launch *Q*, which was recently converted from a steam launch into a motor boat, has been assigned to this service under the direction of the captain of the port at Balboa; it contains accommodations for 25 passengers and can cover the distance in very fair time. The approved schedule is, as follows:

Week days—Leave Balboa dredge landing every afternoon at 5.30; returning, leave Taboga every morning at 6 o'clock.

Sundays and holidays—Leave Taboga at 6 a. m.; leave Balboa dredge landing for Taboga at 9.30 a. m., and leave Taboga again in the evening at 8 o'clock.

The fares are: For employes, 25 cents gold each way; for nonemployes, 50 cents gold each way; for all children under 12 years of age, 15 cents gold each way.

Flour in Cotton Bags.

A letter has been received from Senator Hoke Smith of Georgia requesting, if practicable, that orders for flour placed for the commissaries stipulate that shipments be made in cotton bags, in order to aid the Southern cotton industry. Heretofore, the flour has been coming largely in bags made of foreign grown jute. The Supply Department has arranged to give this manner of shipment a trial, and if satisfactory, the practice will probably be continued.

CEASES TO BE A COCARRIER.

Panama Railroad Traffic Arrangements with Steamship Companies Annulled.

On Tuesday, November 17, in accordance with a notice issued on August 15, 1914, the Panama Railroad Company ceased to act as a cocarrier in connection with steamship lines operating to the Isthmus. In order, however, to take care of the through freight brought to the Isthmus in vessels that do not use the Canal, the Panama Railroad Steamship Line, beginning with the passage of the *Allianca* on October 30, established a fortnightly service between New York and Balboa. It is expected that this service will take care of all freight of this nature arriving at Balboa bound north, or at Cristobal, bound south, but in case the volume of business warrants, other vessels of the Panama Railroad Steamship Line will be placed in the service.

At the time the United States Government took charge of the work on the Isthmus in May, 1904, the method of operation of through freight business, including the making of rates and their division, was based on a contract between the Panama Railroad Company, and the Pacific Mail Steamship Line, dated June 11, 1902. This contract was for an initial period of three years, and was subject to change only by mutual consent, except that a supplemental contract of the same date provided that if the United States should acquire a majority of the stock of the railroad company, then the traffic agreement could be terminated by either party on six months' notice. The contract was exclusive for all traffic north of Panama on the Pacific coast; it established divisions of the through rates on coastwise traffic of 50 per cent to the Pacific carrier, and 50 per cent to the Panama railroad for the haul from New York to and across the Isthmus, and provided that either party could call on the other to reduce the through rate under the above divisions to a minimum of 40 cents per hundred pounds (or \$8 per net ton), but below this minimum the party calling for a further reduction would have to bear the loss of same.

On January 12, 1905, after the United States Government had acquired both the Canal and railroad properties, notice was given to those concerned that all existing traffic agreements would be terminated at the end of six months, but under later working agreements, also terminable on six months' notice, existing practices were continued, except that all exclusive features that had been in force were annulled, and all regularly established lines were given equal opportunities and privileges to engage in through traffic via the Isthmus. This open door policy was later extended to all lines whether regular or tramp, the only restriction placed on through billing arrangements by the Panama Railroad Company being that all tramp steamships, or lines which had no regular itinerary, were required to prepay at the terminal of the railroad the proportion of the established through rate due the railroad and cocarrier. This policy remained in effect over six years. Under the above arrangement the cocarriers on the Pacific Ocean were allowed 70 per cent of the through rate on coastwise traffic between United States ports on both oceans via the Isthmus.

Effective June 1, 1911, the Secretary of War authorized a new arrangement, providing that where the water haul on the Atlantic

side was performed by ships of the Panama railroad, the division of rates would be 40 per cent to the railroad for the joint rail and steamship service, and 60 per cent to the connecting line. Upon traffic where no part of the water haul was performed by ships of the Panama Railroad Company, the rate for rail transportation across the Isthmus would be 25 per cent of the through rate. This arrangement had the effect of giving the railroad a direct as well as an indirect control over rates across and beyond the Isthmus. It assured equal treatment to all, and required as an imperative condition that such a parity of rates to and via the Isthmus in both directions be established that would effectively prevent discrimination for all classes of traffic by foreign markets and shippers against American markets and shippers. This arrangement continued in effect up to November 17, when the railroad ceased entirely to be a cocarrier.

EXECUTIVE ORDER

Providing for Passage of Vessels through the Canal Prior to Issuance of Tonnage Certificate.

By direction of the President, and by virtue of the authority vested in him under the Panama Canal Act, it is hereby ordered:

1. In any case, prior to October 1, 1915, where it has been impracticable for a vessel to be measured for a Panama Canal tonnage certificate before arrival at the Isthmus, and where to hold such vessel for measurement by the Canal authorities before transit through the Canal would cause undue delay, the Governor of The Panama Canal may, in his discretion, permit such vessel to go through the Canal upon the payment of a sufficient amount to cover tolls on the estimated tonnage of the vessel, with 20 per centum added, such payment to be made, or fully secured, in accordance with the provisions of the Executive Order of April 16, 1914.

2. The tonnage of a vessel desiring to go through the Canal under the circumstances herein indicated shall be estimated by the Governor of The Panama Canal, or by his authority, as closely as practicable and may be based on approximate measurements. The Governor's decision as to the estimated tonnage of a vessel shall be final.

3. A refundment of any excess amount in tolls paid for any vessel under the terms of this Order shall only be made after the vessel has been measured under the rules prescribed for the measurement of vessels for the Panama Canal by the Proclamation of the President, dated November 21, 1913. Such vessel should be measured at the first opportunity practicable after going through the Canal, and a certified copy of its Panama Canal tonnage certificate shall be furnished the Governor, who shall have the right to satisfy himself that the certificate conforms to the measurement rules before authorizing refundment of excess tolls, which refundment may then be made in the manner prescribed by Paragraph 7 of the Executive Order of April 16, 1914.

4. The Governor of The Panama Canal may prescribe such additional regulations as may be necessary and proper to carry out the intent of this Order.

LINDLEY M. GARRISON,
Secretary of War.

WAR DEPARTMENT,
November 16, 1914.

NEW QUARANTINE SITES.

Part of Colon Hospital Grounds Utilized—Balboa Dump Selected on Pacific Side.

Plans for the temporary housing of the quarantine service provide for two reservations as at present, one at Colon and the other on Balboa dump, near the Pacific entrance to the Canal. Existing buildings have been utilized at both places.

At Colon, the new reservation includes the eastern part of the hospital grounds and buildings Nos. 6, 7, 8, 9, 10, 11, 14, 27, 28, and 29, formerly pertaining to the hospital group, have been taken over for quarantine use. The detention ward for cabin passengers is in the old nurses' quarters, building No. 6. This contains 40 rooms, capable of housing 80 people, or a larger number if necessary, and the large reception room formerly used by the nurses has been converted into a dining room. Building No. 7 is occupied by the custodian, and is connected to the detention ward for cabin passengers by a covered passageway. Building No. 8 is the residence of the quarantine officer, No. 9 of the quarantine physician, No. 10 of the health officer of Colon and Cristobal, and No. 11 of the hospital physician. Buildings Nos. 28 and 29 are quarters for the attendants, and the largest house in the group, No. 14, is used as a detention ward for steerage passengers. The ell part of this building has been partitioned off for the use of the women passengers, and a toilet and bathroom installed. The dormitory sections are equipped with standee bunks, and sleeping accommodations have been provided for 350 people. The dining room in this building occupies one end of the main part.

The entire reservation is enclosed by a galvanized iron fence. Another fence extends from building No. 7 to the seawall separating the outdoor space allotted to the cabin passengers from the remainder of the grounds. A third fence, of wire, extends along the beach to prevent the passengers from going in bathing. The beach at this point is particularly dangerous to bathers owing to the hollowing out of the reefs by wave action, and on account of a drowning accident in this locality a short time ago, the authorities considered it best to adopt preventive measures.

All of the buildings in the quarantine group are being thoroughly overhauled, and repaired, repainted and newly screened where necessary.

The permanent site for the quarantine station on the Pacific side will be in front of the wireless station on Balboa dump. The buildings, formerly on Culebra Island, 10 in number, consisting of an office building, a Type 10 residence, detention ward for women steerage passengers, plague laboratory, laundry, two isolation wards, and attendants' quarters have been moved to the new location, and the entire transfer was practically effected by December 1. Grading for the site of the new station, which was begun in September, the installation of water and sewer connections, and the building of a roadway, have all been completed. Water is taken from the main extending from Balboa to Fort Amador. The roadway is about 1,500 feet in length, by 18 feet wide, and connects with the road to the wireless reservation from Balboa.

The present building for cabin passengers accommodates only 72 people. Recommenda-

tion has been made for an increase in its size to take care of approximately 136 people, by adding two rooms length at each end. For quarters for the medical officers, the erection of two 2-family concrete houses, similar to the permanent quarters at Balboa, has been recommended, but neither of the above projects can be undertaken until an appropriation has been made therefor.

In order to make the new station easily accessible to launches and tugs, a boat landing will be provided. This will probably consist of a wooden approach walk, 10 feet wide and about 530 feet long, supported on concrete piles 14 feet above water at mean low tide, a bridge connecting the walk with the landing, and a pontoon of suitable size for the landing. The old landing stage at Balboa, maintained by the Dredging Division, will probably be used for this purpose, as it is to be replaced shortly by a pontoon constructed out of the hull of the old ladder dredge *Badger*.

Automobile Hose Car for Canal Zone Fire Department.

Bids were opened in Washington recently for furnishing an automobile hose car for the Canal Zone Fire Department. There were five bidders in all. The contract was awarded to Geo. C. Hale of Kansas City, at the price of \$4,800, delivery to be made within 90 days from the date of its signature. The specifications for the new machine require its parts to be interchangeable with those on the automobile fire engines now in use on the Zone, and its chassis is included in this stipulation. The motor will be of the 4-cycle, 6-cylinder type. The wheels will be of the special artillery fire department type, made of second growth hickory. The body is to be of steel, reinforced with 1-inch angle iron, with panel not less than 24 inches high, hood to be of the ventilated type, and machine to be provided with hand and seat rails. The car is to be equipped with fire extinguishers, locomotive bell, one 24-foot extension and one 12-foot roof ladder. The words "Canal Zone" are to be lettered on the body of the machine.

Lettering for Designation of Ship's Spaces.

Berthing accommodations for officers and crews on vessels measured for Panama Canal certificates must be designated by lettering, on a plate or otherwise, to show which officer uses each room. Article XI of the "Rules for the measurement of vessels for the Panama Canal" specifies that no space shall be deducted from the gross tonnage unless the use to which it is exclusively devoted has been appropriately designated by official marking. The navigation laws of the United States specify the designations and marking of spaces on vessels, and these have been followed in the rules for Canal measurement. Each room should be designated with the terms appearing on the third page of the certificate, under the heading, "Deductions from gross tonnage," so that the certificate may be readily checked.

Small lettering on plates is all that is necessary, and most vessels have men on board who are capable of doing the marking. Several vessels which have been measured before coming to the Canal have had these designations carved in the woodwork, an elaborate and expensive method, and attention is called to the fact that this method is unnecessarily expensive and may very well be avoided.

ZONE CULTIVATED AREAS.

Horticulturist Barrett Submits Recommendations for Future Improvement.

The report of the horticulturist employed by The Panama Canal on his preliminary investigations at different places in the Canal Zone where special cultivation is in progress carries with it a number of recommendations and suggestions for improvement, in part, as follows:

Balboa.—Planting operations are progressing very well considering the poor quality of the soil and the meagre assortment of plant material. In sodding the lawn areas, either Bermuda or crab grass, and for the beds, more small bulbs for borders, and larger ones for the centers, are recommended. A better selection of crotons, cannas, coleus, caladium, etc., for decorative work is suggested.

Ancon.—The collection of plants is good, but a little more care and color is required.

Corozal.—The visits made to Corozal farm show it to be worthy of a detailed study. The collection of fruits should be increased, especially of the citrus variety, and several more vegetables should be tried. The bananas on the low ground should be transplanted, and Para grass, oto, and acelga planted in their place. The crop conditions on the higher ground is fair, with the exception of the Guinea grass. More varieties of maize and kaffir-corn could be tried to advantage. The construction of a concrete silo at the new dairy, and a compost pit for manure, are recommended.

Empire.—The shipment of the plants at the nursery, of which there are two or three carloads, to Balboa, is recommended.

Juan Mina.—Inspection of the citrus grove in this locality, comprising over 200 orange, and a number of lime trees, showed that the orange trees are in good condition and carry a valuable crop of excellent fruit. Considerable attention in the way of pruning, cleaning, etc., is required. The lime trees are overgrown with jungle to some extent.

Las Guacas.—The upper and lower banana plantations at this point were inspected. The soil of the lower plantation is wet and heavy, but the plants were found to be in excellent condition, and no disease was noted. The upper plantation is more sandy, and should produce high yields if given attention. The revenue at present is about \$300 a month, half from bananas and the rest from plantains. The planting of other varieties of bananas, especially those kinds which are preferred for eating raw, is recommended.

Frijoles.—More space between rows in the pineapple patch is recommended. The avocado nursery was found to be in rather poor condition, and some of the banana plants are diseased. Discontinuance of further planting of these two articles for the present was recommended.

Colon.—The grounds about the Hotel Washington require attention. The weeds should be removed from the lawn on the sea side, and on the south side, the arrangement should be entirely reorganized.

Balboa-Taboga Service.

Launch *Q* makes trips on the following schedule: *Week days*.—Leave Balboa dredge landing at 5.30 p. m., and Taboga at 6 a. m. *Sundays and holidays*.—Leave Taboga at 6 a. m., Balboa dredge landing at 9.30 a. m., and Taboga at 8 p. m. *Fares*.—Employees, 25 cents gold each way; nonemployees, 50 cents gold each way; children under 12 years, 15 cents gold each way.

FIFTH INFANTRY ARRIVES.

Former Employe Quarters at Empire Used to House the Regiment and Its Activities.

The United States transport *Buford* carrying the Fifth Infantry, U. S. A., Col. C. G. Morton, in command, arrived at Cristobal on Wednesday, November 25. The regiment left Plattsburg Barracks, N. Y., in the morning of November 14, and embarked on the *Buford* at Weehawken, N. J., on the evening of the same day. The numerical strength of the regiment at time of embarking was 41 officers and 739 enlisted men; two officers and 16 men of the Medical Corps, and three men of the Quartermaster Corps. Twenty-six ladies and twenty-six children accompanied the regiment. The work of removing the personal effects of the soldiers and the camp equipment and animals from the vessel and loading them into cars was begun at once, and by Saturday November 28, practically all of it had arrived at Empire.

In order to provide for the occupation of Empire by the Army, a large number of alterations in existing buildings was necessary, and this work was performed by the Building Division of The Panama Canal. Regimental headquarters will be in the large building, formerly occupied jointly by the Auditor and the Disbursing Officer of The Panama Canal. The quarters for the commanding officer will be in the house formerly occupied by the Auditor. The married commissioned officers will be housed in the old gold employe quarters in the vicinity of headquarters building. The married noncommissioned officers have been assigned to the French cottages on the hill on the east side of the railroad track. The barracks for the soldiers will be in the bachelor quarters located along the street leading to headquarters building, as well as in buildings in other parts of the settlement, including the old machine shop and storehouse, which have been converted for this purpose. There will be 12 mess halls, one for each company, three on the east side of the railroad track, and the others on the west side. The old district courthouse, a French building, but still in good condition, and the former public market, will be used as guard houses, while the schoolhouse for colored children will be headquarters for the regimental band, with a mess hall and kitchen in connection.

Five of the 4-family Type 14 houses have been converted into quarters for two families, giving each family seven rooms, a bathroom, and kitchen. Seven other houses of this type will be continued to be used for four families, and required only slight alterations. Thirteen of the 2-family Type 7 quarters have been made into 1-family houses, with seven rooms, one bathroom, a kitchen, and dry room in each. The Type 18 bachelor quarters have been divided into four large rooms, two on each floor, the whole accommodating a total of 32 men.

Of the three churches in Empire, St. Mary's Episcopal church and rectory, which is owned by the denomination, will be loaned to the post for religious services; the church of St. Ferdinand is Government property and may be used for services by the Roman Catholics of the post. The parish house adjoining is the property of the congregation, and will probably be acquired by the Army, as it is proposed to use it for the post exchange. The Union church held its meetings in the Government lodge hall, and the building may con-

tinue to be used for the holding of church services and other gatherings. The old Kangaroo lodge building has been converted into a mess hall.

The commissary was reopened on Tuesday, November 24. The space formerly allotted to the display and sale of goods has been reduced, and the room thus gained is used for storage purposes.

The officers of the regiment are:

Col. Charles G. Morton, commanding regiment.

Lieut.-Col. Samson L. Faison, duty with regiment.

Majors—Marcus B. Stokes, commanding First Battalion; Richard C. Croxton, commanding Second Battalion; William A. Phillips, commanding Third Battalion.

Captains—William D. Davis, commanding Company D; Oliver Edwards, commanding Company L; James P. Harbeson, commanding Company K; Milton L. McGrew, commanding Company E; Merch B. Stewart, commanding Co. G; Robert Field, commanding Company M; Robert E. Frith, commanding Company I; James Justice, commanding Company C; Joseph K. Partello, commanding Company B; Benjamin R. Wade, absent on D. S., Fort Leavenworth, Kans.; Fred W. Bugbee, on leave in United States; Herman Glade, absent on D. S. at West Point, N. Y.; Auswell E. Deitsch, commanding Company H; J. Alfred Moss, commanding Company F.

First Lieutenants—Sydney H. Hopson, commanding Company A; John B. Barnes, acting regimental quartermaster; Wilford Twyman, commanding machine gun company; Will D. Wills, duty with company E; Daniel A. Nolan, acting regimental adjutant; Noble J. Wiley, duty with headquarters company; Joseph F. Ware, duty with Company G; Robert E. Boyers, duty with Company K; Ellery Farmer, on leave in United States; Walton Goodwin, duty with Company D; George W. Ederly, duty with Company F; Allan Rutherford, duty with Company M; Alfred H. Erek, duty with Company H; John F. Curry, duty with Company L; Robert E. O'Brien, absent in United States; under orders to join.

Second Lieutenants—Thompson Lawrence, on leave in United States; William E. Larned, duty with Company G; Charles L. Byrne, duty with Company H; William R. Van Sant, duty with Company M; Sumner Waite, assistant to quartermaster; d'Alary Fecht,

duty with Company L; George LeR. Brown, jr., absent in United States; Paul Murray, duty with Company E; John C. P. Bartholf, duty with Company F; Raymond Morris, duty with Company C; Francis H. Forbes, duty with Company A; Thomas G. Lauphler, duty with Company I; Cedric W. Lewis, duty with Company K; Frank W. Milburn, duty with Company B; John W. Hyatt, duty with Company D.

The officers of the medical corps with the regiment are: Maj. Samuel M. Waterhouse and First Lieut. James E. Baylis.

JOINT LAND COMMISSION.

Period of Limitation for Filing of Claims.

On December 27, 1914, there will expire the period during which claims for damages may be filed against the United States in accordance with Articles VI and XV of the Treaty between the United States of America and the Republic of Panama, ratified February 26, 1904, and the subsequent arrangement entered into between the two governments by which the following rule was adopted: "Claims not presented to the commission within six calendar months after it resumes its sessions at Panama, shall be barred unless the commission shall, for exceptional reasons, extend the time three months in a particular case." Subsequent to the adoption of this rule, the effective date of the commencement of the six months period above referred to was changed to June 27, 1914.

By direction of the commission.

WILLIAM TAYLOR, *Secretary.*

PANAMA, R. P., November 30, 1914.

The estates of these deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against their estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

OFFICIAL CIRCULARS.

Observance of Office Hours.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., November 27, 1914.

To employes in Administration Building:

Complaint is made that certain employes leave their offices before 12 at noon and before 5 in the afternoon, in order to secure an advantage in being served in the lunch room or securing seats on the motor busses. This practice must be discontinued.

Attention is again directed to the necessity for punctuality. The office hours are from 8 to 12 and from 2 to 5, and employes are expected to be at their work between those hours.

I desire that every possible consideration be shown to the large number of employes in the building who voluntarily, cheerfully, and habitually work extra hours, but even in such cases permission must be obtained where absence during working hours is necessary or desired.

GEO. W. GOETHALS,
Governor.

Installation of Electric Fans Discontinued.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., November 24, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

The installation of electric fans has been discontinued, and hereafter no fans will be installed unless they are an absolute necessity, and in each case where they are a necessity, full explanation must be given on the work request, which will be approved by me if the facts so warrant.

GEO. W. GOETHALS,
Governor.

Use of Intoxicants by Marine Employes.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., November 13, 1914.

CIRCULAR No. 606-2:

1. Panama Canal pilots, masters, mates, engineers, and all other employes serving under a marine license, must abstain from using or indulging in intoxicating liquors or other stimulants; nor shall any pilot, while in uniform, enter any public bar or place in which liquor is sold, for any purpose whatever.

2. Any violation of this rule will be sufficient cause for dismissal.

GEO. W. GOETHALS,
Governor.

New Pay Car Schedule.

THE PANAMA CANAL,
OFFICE OF THE PAYMASTER,

BALBOA HEIGHTS, C. Z., November 28, 1914.

The following approximate schedule for pay cars for all Panama Canal and Panama railroad employes will be followed beginning with the December payment:

7^h—Commissary silver employes, 1 p. m.
9^h—Forenoon, Colon docks and coal hoist; afternoon, Cristobal docks.

10^h—Forenoon, Margarita, Coco Solo, scrap yards; afternoon, Mount Hope depot, dry dock shops, and coaling station.

12^h—Forenoon, engineering and maintenance-of-way, and duct line gangs in Colon and Mount Hope yards and main line to Gatun.

FROM BALBOA HEIGHTS.

7^h—Afternoon, Balboa docks and Panama yard for Panama railroad employes.

10^h—Leave 6.30 a. m.—Naos Island, 7 to 7.30; Fort Amador to La Boca road, 7.30 to 8.20; east side dry dock, 8.20 to 8.50; foundry, 8.50 to 9; machine, blacksmith, boiler, and other shops, 9.15 to 11; Ancon, back of Hotel Tivoli, 11.15 to 12. Lunch, Balboa flats, 1.30 to 2; Balboa material yard, 2.15 to 2.30; cement shed, 2.35 to 2.40; Corozal, 2.50 to 3.20; Miraflores locks, south end, field office, and north end, 3.30 to 4.30; arrive Balboa Heights, 5.

11^h—Leave 6.30 a. m.—Pedro Miguel, 7 to 7.30; Paraiso shops, 7.35 to 8; pontoon bridge to Las Cascaidas, 8 to 9; Gamboa, 9.40 to 10; Darien, 10.15 to 10.25; Gatun, 11 to 12.30; main line gangs to Darien, 1 to 2; Miraflores hill, 3 to 3.30; Miraflores sub-station, 4 to 4.20; arrive Balboa Heights, 5.

Hereafter, no silver employes will be paid at either pay office between the first and the twelfth of each month, except those having time vouchers on termination of service, and except those employed inside the Administration Building. It is desired that all silver employes with regular pay tickets be paid only from the pay cars between the first and twelfth. Any employe who misses the pay car will be paid at either office after the twelfth.

All foremen, field clerks, and timekeepers are requested to advise silver employes of this notice and tell them

to wait for the pay car, as they will not be paid at the offices during this period.

All outside payments not scheduled above will be made on such dates as best suit all concerned, which dates are agreed upon as soon as possible each month.

Approved: JOHN H. McLEAN,
Paymaster.
GEO. W. GOETHALS,
Governor.

Change in Labor Train Schedule.

THE PANAMA RAILROAD COMPANY,
OFFICE OF CHIEF DISPATCHER.

BALBOA HEIGHTS, C. Z., December 1, 1914.

All concerned.—Effective December 2, 1914, the labor train which at present leaves from the foot of the Administration Building hill at 12.10 p. m., will start from Balboa docks and stop at Balboa Heights station platform instead. Leave Balboa docks at 12.05 p. m., due Balboa Heights station at 12.10 p. m.

F. S. HIRSCH,
Chief Dispatcher.

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 308, on Wednesday, December 16, 1914, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability

to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

By direction of the chairman of the board.

F. M. NIXON,
Recorder, Board of Local Inspectors.

	14.0	1.3	13.4	2.2

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Goedetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it. The time used is Comppolitan Standard, for the

meridian 75° W. The hours of the day are numbered consecutively from Oh (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3.47.

Rainfall from November 1 to 28, 1914, Inclusive.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls, or the purchase of supplies may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa from the Union Oil Company at the rate of from 1,300 to 1,600 barrels per hour. The present price is \$1.30 per barrel, reduced to 60° Fahrenheit.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa.

Subsistence supplies, including a large stock of fresh meats, vegetables, canned groceries, fruits, bakery products, etc., are available for quick delivery at either terminal. Prices are generally lower than the retail prices in the United States, and compare favorably with prices in any port of the world.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges; for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

Repairs to vessels may be made to any extent, except where the use of a large dry dock is required, or the turning of the largest crank shafts or longest line shafts.

The Government hospital service is fully equipped for the treatment of medical and surgical cases. The charge for consultation at the dispensaries is \$3; for hospital treatment, in ward, \$3 per day; in private room, \$6 per day. For American seamen, the charge for treatment in ward is \$1 per day.

Sailings of Vessels in Regular Service With the Isthmus.

REGULAR CONNECTIONS WITH PACIFIC PORTS. Approximately regular services between the Atlantic

and the Pacific seaboard from Boston, New York, Philadelphia, and Baltimore, occasionally Charleston and New Orleans, to San Pedro, San Francisco, Portland, and Puget Sound, and return, are maintained by the American-Hawaiian Steamship Company, with a sailing each way about every five days; the Luckenbach Steamship Company, with a sailing each way about every 10 days; Sudden and Christenson, approximately fortnightly; the Atlantic and Pacific Steamship Company, about every three weeks; and the Boston and Pacific Line, and the Arrow Line, each sending a vessel each way about once a month.

Between the east coast of the United States and the west coast of South America, fortnightly services are maintained by the Merchants' Line and by the New York and South America Line; the West Coast Line has sailings each way about every four weeks.

Between the west coast of the United States, with connections to lower British Columbia and Europe (the following lines are in service: The Harrison-Direct Line, monthly; the Maple Leaf Line, about every six weeks; the East Asiatic Company, monthly, and the Johnson Line, every six or seven weeks.

The Pacific Steam Navigation Company is operating approximately a monthly service around South America from Liverpool, by way of the Canal.

The American-Australian Line has been sending vessels through the Canal about fortnightly from New York to ports in Australia and New Zealand.

The Pacific Mail has sailings about every 10 days between Balboa and San Francisco, with calls at Puntarenas, San Juan del Sur, Corinto, Amanala, La Union, La Libertad, Acapulca, San José de Guatemala, Champerico, Ocos, Salina Cruz, Acapulco, Manzanillo, San Blas, and Mazatlan. The company also operates a direct line between Balboa and San Francisco, with sailings about every six weeks; and a Panama-Central America line, between Balboa and Ocos, making one round voyage monthly, and calling at all the ports abovenamed between Balboa and Ocos.

The Luckenbach Steamship Company is operating a 10-day service between New York and San Francisco, calling at East San Pedro both ways. Its vessels handle cargo at Balboa when sufficient business offers.

The American-Hawaiian lines between New York and San Francisco, and New York and Honolulu, discharge and take on cargo at Balboa when sufficient business offers. At present, a vessel of this company passes through the Canal about every third day.

Grace and Company maintain an irregular service between New York and San Francisco, calling at way ports. Sailings are made about every 12 days. A vessel plying between San Francisco and Valparaiso, calling at way ports, makes a round voyage about every 10 weeks.

The Peruvian Steamship Company maintains a weekly service between Balboa and Callao, with calls at Guayaquil, Paíta, Eten, Pacasmayo, and Salaverry. Every second voyage includes Mollendo.

The South American Steamship Company's vessels sail on alternate Mondays from Balboa for Valparaiso calling at Paíta, Eten, Pacasmayo, Salaverry, Callao, Mollendo, Arica, Iquique, Antofagasta, and Coquimbo.

The Pacific Steam Navigation Company has sailings on alternate Mondays for Peru and Chile; every 10 days for Ecuador; and on alternate Mondays for Colombian and Ecuadorian ports.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro, and an additional weekly sailing to Bocas del Toro.

The Royal Mail maintains fortnightly service each way between New York and Southampton, making the following way ports: Antilla, Jamaica, Colon, Cartagena, Puerto Colombia, Puerto Cabello, Trinidad, Barbados, the Azores, and Cherbourg. Its vessels all arrive at Colon on Sundays and sail on Tuesdays.

The Compagnie Générale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Carupano, Trinidad, Martinique, Guadeloupe, and Santauder; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Carupano, Trinidad, and Martinique.

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curacao, Puerto Cabello, and Barcelona.

The Compania Transatlantica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curacao, Puerto Cabello La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadix, Barcelona, and Marseilles; on the

THE CANAL RECORD,

Balboa, Heights, Canal Zone,

Isthmus of Panama.

NOTES OF PROGRESS.

Change in Panama Railroad Steamship Schedule.

Following the removal of the steamships *Cristobal* and *Ancon* from the service of the Panama Railroad Steamship Line, and the institution of a service through the Canal by vessels of this line, the present sailing list is to be entirely revised. Beginning with the sailing of the *Allianca* from New York on Thursday, December 10, a weekly service will be maintained under these general rules:

A vessel will sail from New York for Cristobal every Thursday at 3 p. m., arriving at Cristobal on the following Wednesday. (Except the *Advance*, which, requiring seven days for the voyage, will sail on Thursday and arrive on Thursday.)

A vessel will sail from Cristobal for New York every Saturday at 3 p. m., and arrive at New York every Friday. (The *Advance* will arrive on Saturday.)

All the vessels of the regular line, the *Advance*, *Allianca*, *Colon*, and *Panama*, will be sent through the Canal to Balboa. Each will spend approximately 10 days at the Isthmus, sailing from Cristobal for New York on the Saturday of the week following arrival at Cristobal from New York.

A list of sailings in the near future, revised in accordance with this program, appears at the bottom of the last page of this issue of THE CANAL RECORD. It should be noted that the sailing date of the *Panama*, from Cristobal on Thursday, December 17, has not been changed and this vessel will leave on the date originally set for it. The regular Saturday sailings from Cristobal will begin with the departure of the *Allianca* on December 26.

Service to Siberia.

The steamships *Chinese Prince* and *Royal Prince*, which entered the Canal on November 17 and December 7, respectively, for south-bound transit, are vessels of the Prince Line, and were dispatched from New York for Vladivostok, the eastern terminus of the Trans-Siberian Railway, with cargoes of general manufactured goods and merchandise.

The *Chinese Prince* carried 6,545 tons of cargo and the *Royal Prince* 7,500 tons.

The distance from New York to Vladivostok, by way of the Panama Canal, San

Francisco, and the Great Circle is 10,100 miles, by way of the Hawaiian and Midway Islands, about 10,450 miles, and by way of the Suez Canal and Hongkong the distance is approximately 13,450 miles. The saving in distance by way of Panama may, accordingly, be placed at 3,000 miles, which means, for 10-knot vessels, a saving of 12½ days at sea.

Chilean Line Operating through the Canal.

The steamship *Limari* of the South American Steamship Company (Compañía Sud Americana de Vapores), the Chilean line, was despatched through the Canal to Cristobal on December 2, following its arrival at Balboa from Valparaiso, and was despatched back to Balboa, on the way to Valparaiso, on December 7. It is stated by the office of the company at Balboa that this is the beginning of a regular fortnightly service between Cristobal and Valparaiso, in which the passenger vessels *Limari*, *Huasco*, *Aysen*, and *Palena* will be employed. The line will connect at Cristobal with Atlantic carriers which do not despatch vessels through the Canal.

Cable Addresses of The Panama Canal.

The cable address of The Panama Canal on the Isthmus is "Isthmian, Balboa Heights." Cable messages concerning the business of steamships with the Canal need no more specific address than the above; upon their receipt in the Executive Office they are immediately transmitted to the department or departments concerned.

The cable address of The Panama Canal in the United States is "Isthmian, Washington," and is sufficient to assure the proper transmission of messages.

The use of "Isthmian" in the cable address of The Panama Canal is a heritage from its corporate predecessor, the Isthmian Canal Commission.

First Whole Cargoes of Sugar from Peru.

The steamships *Atlantic City* and *Nyanza*, which entered the Canal on December 5 for transit to the Atlantic, were both laden with raw sugar, shipped from Eten, Peru, to Great Britain. These are the first shipments through the Canal of whole cargoes of sugar from Peru, where sugar is the principal agricultural product, second only to ores in export value. The *Atlantic City* carried 7,610 tons and the *Nyanza* 5,750 tons.

Abandonment of Cucaracha.

The camp for silver employes at Cucaracha, situated on the east bank of the Canal a little north of Paraiso, will be completely abandoned about January 1, but such buildings as are in an insanitary and unstable condition will be vacated at once. Cucaracha labor camp was established by the French, and the buildings there are mostly all of French construction.

MANIFESTS OF SHIPS' CARGO.

Copies Will Not be Required of Vessels Using Canal Engaged in Through Traffic.

It was originally intended to require vessels in transit through the Canal to furnish complete copies of their manifests, and this was provided for in the customs regulations published in Circular 679. It was found advisable, however, to modify this requirement, and while the matter was under consideration, the local agents of the various steamship companies were invited to submit their recommendations. Mr. D. L. Webster, agent of the Royal Mail Steam Packet Company, Colon, was authorized to present the views of various companies interested, as determined in conference, and, under date of October 22, he addressed a letter to the Governor, from which the following excerpts are taken:

"It is thought by the agents that the rules in force at the Suez Canal should be taken as a guide in dealing with international traffic that will pass through the Panama Canal, quite apart from rules that the authorities may see fit to establish for United States coastwise traffic, which is altogether different. The data furnished on the form C. A. Dept. 175, (subject to the amendments suggested) should be sufficient. The remarks of Messrs. Thos. and Jas. Harrison, Liverpool, addressed to their Colon agents, Messrs. W. Andrews and Company, under date of August 24, 1914, follow, and are very pertinent:

"We understand that the Canal regulations (Circular 679-Customs regulations) require every ship to deposit a detailed manifest of her cargo. Is this the case, and if so, why? No other ship canal in the world requires such a formality, which will involve much extra work in the clearance of a ship. At the Suez Canal, the captain is only questioned as to the general nature of the cargo and the port of discharge."

"By reference to the Executive Order, signed at the White House, Washington, on July 9, 1914, Paragraph 8, it will be seen that the idea was to follow Suez practice, since in respect of cargo the ship is only expected to declare the 'Character of cargo.' This is the broad minded way to regard international traffic, and is the view which prevails in regard to it the world over. Contrary to this, the article under discussion not only calls for a detailed manifest, but imposes a very onerous task on the master or agent by requiring a translation into English if the manifest happens to be written in a foreign language. It must be observed here that the vast majority of steamers using the Canal will not carry pursers or freight clerks. The least possible detail, therefore, should be required from ships using the Canal, and in this connection it should be borne in mind that the Canal tolls are not assessed on the cargo a vessel carries, but on its Canal tonnage."

Because of the objections advanced by the

steamship companies, and for the further reason that the compilation of detailed statistics from manifests would require a large clerical force and involve considerable expense, it has been decided that vessels in transit through the Canal will not be required to furnish copies of their manifests, but that, instead, the practice of the Suez Canal, where the vessel is required to submit only a summary of its cargo, segregating only the most important items, will be followed, which plan is to be incorporated in the revised customs regulations.

Duplicate manifests will still be required for cargo landed in the Canal Zone, excepting cargo discharged for transshipment.

JOINT LAND COMMISSION.

Rule of Dismissal.

In the matter of the claim of the Panama Lottery Company, for cancellation of lottery concession in the Canal Zone, rule of dismissal No. 152, docket No. 1656, December 5, 1914.—The Panama Lottery Company, under date of September 3, 1913, filed with the commission a claim for damages in the sum of seven and one-half millions (\$7,500,000) of dollars, United States currency, which, upon its motion of November 16, 1914, for leave to amend in the amount claimed, was reduced to one million dollars (\$1,000,000), United States currency. The basis of this claim is contained in the following statement submitted by claimant:

"The Panama Lottery Company has a concession embracing the whole Republic of Panama and said concession expires December 31, 1918.

"Notwithstanding, in September, 1904, the Canal Zone authorities deprived this company of doing any business on the Zone, thus taking away from the company the most valuable territory, the business therein being three times as large as Panama and Colon together, and this was done over fourteen (14) years before the expiration, and hence our claim for profits and interest amounting to seven and a half millions of dollars, United States gold."

The status of this claim is governed by the provisions of Article XXI of the Treaty between the United States of America and the Republic of Panama, ratified February 26, 1904. This provision reads, as follows:

"The rights and privileges granted by the Republic of Panama to the United States in the preceding Articles are understood to be free of all anterior debt, liens, trusts, or liabilities, or concessions or privileges to other Governments, corporations, syndicates or individuals, and consequently, if there should arise any claims on account of the present concessions and privileges or otherwise, the claimant shall resort to the Government of the Republic of Panama and not to the United States for any indemnity or compromise which may be required."

In view of the provisions of the Article cited, the commission has reached the conclusion that there is no valid claim against the United States, and the claim is therefore dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Award.

In the matter of the claim of The Las Cascadas Estates Company, Limited, for the property known as Las Cascadas plantation, award No. 63, December 5, 1914, docket No. 1433.—An award is hereby made against the United States, in favor of the claimant hereinafter named, in the sum of \$75,000, United States currency.

This award shall be paid to the claimant hereinafter named, in the amount specified, on or before the 5th day of January, 1915, and if payment or tender of payment of this award is not made on or before that date, such award shall therefor bear interest at the rate of six per centum per annum until paid.

The Las Cascadas Estates Company Limited, docket No. 1433.—For all rights, title, claims and other interests in lands, growing crops, trees of whatever nature, machinery, houses and other buildings, and any and all other improvements which the said The Las Cascadas Estates Company, Limited, or its predecessors in interest, may possess or may have possessed on the lands known as the Las Cascadas plantation situate on the east side of the Panama Canal about three and one-half miles north of Empire, Canal Zone, the sum of \$75,000, United States currency.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Calendar of Claims.

The following is the calendar of claims set for hearing during the week ending December 19.

Tuesday, December 15.—Docket 8, Pioquinto Olivares, et al; Dockets 10 and 11, Camillo Lepel.

Wednesday, December 16.—Docket 13, Mrs. O. E. Grout.

Thursday, December 17.—Enrique Rodríguez Fernández, Docket 30. WILLIAM TAYLOR, Secretary.

Accident to Jib of Floating Crane "Ajax."

The jib of the new floating crane *Ajax* collapsed at about 2.30 p. m. on Monday, December 7, while undergoing tests at Dock 13. The operating house was wrecked by the jib in falling, but no damage was done to the pontoon or to lower part of the superstructure. The only man injured was a West Indian laborer who was at the top of the jib, and jumped on its descent; his hurts were not serious.

Physical Disabilities of Schoolchildren.

The district physicians have been instructed to follow up the cases of all children found defective in the physical examination recently given the pupils in the Canal Zone public schools, by notifying the parents of the defects found and the necessity for treatment. After the expiration of 30 days, the physicians are to advise the Chief Health Officer of the percentage of those previously found defective who reported for treatment, together with the results obtained. With a view of detecting unreported cases of contagious disease in schools, teachers have been requested to inform the district physicians when pupils have been absent two or three days without known cause. In these cases, the physicians will visit the homes of the scholars and take such measures as the circumstances require.

"Advance" To Sail Saturday, December 12.

The sailing of the steamship *Advance* from Cristobal, scheduled for Thursday, December 10, has been postponed to Saturday, December 12, at 3 p. m.

A PROCLAMATION

By the President of the United States of America.
[NEUTRALITY—PANAMA CANAL ZONE.]

Whereas, the United States is neutral in the present war and Whereas the United States exercises sovereignty in the land and waters of the Canal Zone and is authorized by its treaty with Panama of February 26, 1904, to maintain neutrality in the cities of Panama and Colon, and the harbors adjacent to the said cities:

NOW, THEREFORE, I, WOODROW WILSON, President of the United States of America, do hereby declare and proclaim the following rules and regulations governing the use of the Panama Canal by vessels of belligerents and the maintenance of neutrality by the United States in the Canal Zone, which are in addition to the general "Rules and regulations for the operation and navigation of the Panama Canal and approaches thereto, including all waters under its jurisdiction," put into force by Executive Order of July 9, 1914, and I do bring to the attention of all concerned the Protocol of an Agreement between the United States and the Republic of Panama, signed at Washington, October 10, 1914, which protocol is hereunto annexed.

Rule 1. A vessel of war, for the purposes of these rules, is defined, as follows: A public armed vessel, under the command of an officer duly commissioned by the government, whose name appears on the list of officers of the military fleet, and the crew of which are under regular naval discipline, which vessel is qualified by its armament and the character of its personnel to take offensive action against the public or private ships of the enemy.

Rule 2. In order to maintain both the neutrality of the Canal and that of the United States owning and operating it as a government enterprise, the same treatment, except as hereinafter noted, as that given to vessels of war of the belligerents shall be given to every vessel, belligerent or neutral, whether armed or not, that does not fall under the definition of Rule 1, which vessel is employed by a belligerent Power as a transport or fleet auxiliary or in any other way for the direct purpose of prosecuting or aiding hostilities, whether by land or sea; but such treatment shall not be given to a vessel fitted up and used exclusively as a hospital ship.

Rule 3. A vessel of war of a belligerent, or a vessel falling under Rule 2, which is commanded by an officer of the military fleet, shall only be permitted to pass through the Canal after her commanding officer has given written assurance to the authorities of The Panama Canal that the rules and regulations will be faithfully observed.

The authorities of the Panama Canal shall take such steps as may be requisite to insure the observance of the rules and regulations by vessels falling under Rule 2, which are not commanded by an officer of the military fleet.

Rule 4. Vessels of war of a belligerent and vessels falling under Rule 2 shall not revictual nor take any stores in the Canal, except so far as may be strictly necessary; and the transit of such vessels through the Canal shall be effected with the least possible delay in accordance with the Canal regulations in force, and with only such intermission as may result from the necessities of the service.

Prizes shall be in all respects subject to the same rules as vessels of war of the belligerents.

Rule 5. No vessel of war of a belligerent or

Deceased Employees.

Name.	Check No.	Native of	Isthmian residence.	Employed by	Date of death.
Jones, Thomas.....	57492	Barbados.....	La Boca.....	Perm. Buildings.	1914 Dec. 2

The estates of these deceased employees of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against their estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

vessel falling under Rule 2 shall receive fuel or lubricants while within the territorial waters of the Canal Zone, except on the written authorization of the Canal authorities, specifying the amount of fuel and lubricants which may be received.

Rule 6. Before issuing any authorization for the receipt of fuel and lubricants by any vessel of war of a belligerent or vessel falling under Rule 2, the Canal authorities shall obtain a written declaration, duly signed by the officer commanding such vessel, stating the amount of fuel and lubricants already on board.

Rule 7. Supplies will not be furnished by the Government of the United States, either directly, or indirectly through the intervention of a corporation, or otherwise, to vessels of war of a belligerent or vessels falling under Rule 2. If furnished by private contractors, or if taken from vessels under the control of a belligerent, fuel and lubricants may be taken on board vessels of war of a belligerent, or vessels falling under Rule 2, only upon permission of the Canal authorities, and then only in such amounts as will enable them, with the fuel and lubricants already on board, to reach the nearest accessible port, not an enemy port, at which they can obtain supplies necessary for the continuation of the voyage. The amounts of fuel and lubricants so received will be deducted from the amounts otherwise allowed in the ports under the jurisdiction of the United States during any time within a period of three months thereafter. Provisions furnished by contractors may be supplied only upon permission of the Canal authorities, and then only in amount sufficient to bring up their supplies to the peace standard.

Rule 8. No belligerent shall embark or disembark troops, munitions of war, or warlike materials in the Canal, except in case of necessity due to accidental hindrance of the transit. In such cases, the Canal authorities shall be the judge of the necessity, and the transit shall be resumed with all possible dispatch.

Rule 9. Vessels of war of a belligerent and vessels falling under Rule 2 shall not remain in the territorial waters of the Canal Zone under the jurisdiction of the United States longer than 24 hours at any one time, except in case of distress; and in such case, shall depart as soon as possible; but a vessel of war of one belligerent shall not depart within 24 hours from the departure of a vessel of an opposing belligerent.

The 24 hours of this rule shall be construed to be 24 hours in addition to the time necessarily occupied in passing through the Canal.

Rule 10. In the exercise of the exclusive right of the United States to provide for the regulation and management of the Canal, and in order to ensure that the Canal shall be kept free and open on terms of entire equality to vessels of commerce and of war, there shall not be, except by special arrangement, at any one time a greater number of vessels of war of any one nation, including those of the allies of a belligerent nation, than three in either terminal port and its adjacent terminal waters, or than three in transit through the Canal; nor shall the total number of such vessels, at any one time, exceed six in all the territorial waters of the Canal Zone under the jurisdiction of the United States.

Rule 11. When vessels of war or vessels

falling under Rule 2, belonging to or employed by opposing belligerents, are present simultaneously in the waters of the Canal Zone, a period of not less than 24 hours must elapse between the departure of the vessel belonging to or employed by one belligerent and the departure of the vessel belonging to or employed by his adversary.

The order of departure is determined by order of arrival, unless the vessel which arrived first is so circumstanced that an extension of her stay is permissible.

A vessel of war of a belligerent or vessel falling under Rule 2 may not leave the waters of the Canal Zone until 24 hours after the departure of a private vessel flying the flag of the adversary.

Rule 12. A vessel of war of a belligerent or vessel falling under Rule 2 which has left the waters of the Canal Zone, whether she has passed through the Canal or not, shall, if she returns within a period of one week after her departure, lose all privileges of precedence in departure from the Canal Zone, or in passage through the Canal, over vessels flying the flag of her adversaries which may enter those waters after her return and before the expiration of one week subsequent to her previous departure. In any such case, the time of departure of a vessel which has so returned shall be fixed by the Canal authorities, who may in so doing consider the wishes of the commander of a public vessel or of the master of a private vessel of the adversary of the returned vessel, which adversary's vessel is then present within the waters of the Canal Zone.

Rule 13. The repair facilities and docks belonging to the United States and administered by the Canal authorities shall not be used by a vessel of war of a belligerent, or vessels falling under Rule 2, except when necessary in case of actual distress, and then only upon the order of the Canal authorities, and only to the degree necessary to render the vessel seaworthy. Any work authorized shall be done with the least possible delay.

Rule 14. The radio installation of any vessel of a belligerent Power, public or private, or of any vessel falling under Rule 2, shall be used only in connection with Canal business to the exclusion of other business while within the waters of the Canal Zone, including the waters of Colon and Panama harbors.

Rule 15. Air craft of a belligerent Power, public or private, are forbidden to descend or arise within the jurisdiction of the United States at the Canal Zone, or to pass through the air spaces above the lands and waters within said jurisdiction.

Rule 16. For the purpose of these rules the Canal Zone includes the cities of Panama and Colon and the harbors adjacent to the said cities.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the city of Washington this 13th day of November in the year [SEAL] of our Lord one thousand nine hundred and fourteen and of the independence of the United States the one hundred and thirty-ninth.

WOODROW WILSON.

By the President:
W. J. BRYAN, *Secretary of State.*
[No. 1287.]

Protocol of an agreement concluded between Honorable Robert Lansing, Acting

Secretary of State of the United States, and Don Eusebio A. Morales, Envoy Extraordinary and Minister Plenipotentiary of the Republic of Panama, signed the tenth day of October, 1914.

The undersigned, the Acting Secretary of State of the United States of America and the Envoy Extraordinary and Minister Plenipotentiary of the Republic of Panama, in view of the close association of the interests of their respective Governments on the Isthmus of Panama, and to the end that these interests may be conserved and that, when a state of war exists, the neutral obligations of both Governments as neutrals may be maintained, after having conferred on the subject and being duly empowered by their respective Governments, have agreed:

That hospitality extended in the waters of the Republic of Panama to a belligerent vessel of war or a vessel belligerent or neutral, whether armed or not, which is employed by a belligerent power as a transport or fleet auxiliary or in any other way for the direct purpose of prosecuting or aiding hostilities, whether by land or sea, shall serve to deprive such vessel of like hospitality in the Panama Canal Zone for a period of three months, and *vice versa*.

In testimony whereof, the undersigned have signed and sealed the present Protocol in the city of Washington, this 10th day of October, 1914.

ROBERT LANSING [L. S.]
EUSEBIO A. MORALES [L. S.]

Proposals for Plumbing, Barracks "I" and "K", Balboa Dump.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER,

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., December 23, 1914, and then opened for furnishing the necessary labor for installing plumbing in Army Barracks "I" and "K", Balboa Dump, in accordance with drawings of these buildings which may be seen upon application to the Architect, Balboa Heights, C. Z. This work must be done to the satisfaction of the Constructing Quartermaster or his representative. Any further information relative to specifications, etc., may be obtained upon application to the office of the Constructing Quartermaster, Room 266, Balboa Heights.

Separate bid should be submitted for each house, but one bidder may bid on both buildings.

Bidders should state in their proposal the time in which they propose to complete this work.

The Government reserves the right to reject all bids. Bids must be accompanied by \$75.

Bids should be marked "Proposal for plumbing, Barracks "I" and "K," Balboa Dump."

WM. R. GROVE,
Chief Quartermaster.

NEW COROZAL FARM DAIRY.

Model Buildings Now Under Construction to House Hospital Livestock.

The new cow barn, dairy house, and piggery of the Health Department at Corozal farm are under construction by forces of the Building Division. The site selected is on rising ground (elevation 82 feet), about half a mile east of the village. A temporary road has been constructed to it for the transportation of material. This road, which, eventually will be fully improved, leads to a point in front of the dairy house, the first of the group of buildings, thence passes entirely around the cow barn. The road also connects with one leading from the open court where the weigh house is located, which court is formed by the rectangular design of the cow barn. The layout is centrally located in connection with the feed pastures, and provides for buildings of a model nature in respect to conveniences, sanitary precautions, and care of the stock.

COW BARN.

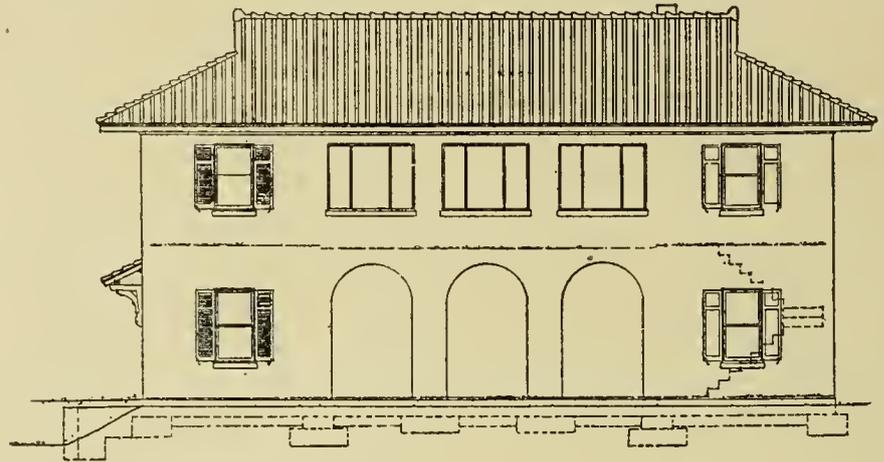

The cow barn is the largest of the group. It is 160 feet long and 121 feet wide, including the open court in the center, and is built entirely of concrete. The roof is six and one-half inches thick, consisting of a bottom layer of concrete four inches thick, a coat of pitch for waterproofing, and a top layer of concrete one and one-half inches thick. It is supported by heavy reinforced concrete beams, spaced 16 feet apart, resting on concrete columns 12 by 16 inches in size. These beams are said to be the longest of their kind installed in any building on the Isthmus—34 feet, with a maximum depth of four feet and a minimum of 30 inches. They support a weight of approximately 75,000 pounds each, and furnish direct support for five longitudinal concrete girders which carry the roof slabs, and which are built into the transverse sections. The floor will be entirely of concrete, with

be made of pipe stanchions, with concrete troughs. The weigh house will be 13 feet square, also of concrete, and will contain the scales and milk container; it is situated in the center of the court, and is reached from both sides of the barn by a covered passageway 10 feet eight inches wide. The west end of the barn will be partitioned off into box stalls, a feed room, and a wagon shed. Each outside corner box stall will be used as a bull pen. The partitions in these spaces will be of concrete to a height of three feet 10 inches,

sink, etc. Food will be transported by means of an overhead carrier in the same manner as in the cow barn.

Coach Tracks in Panama Yard.

For the purpose of providing facilities for the Mechanical Division in the Panama railroad yard for the washing and general cleaning of coaches and testing in the passenger service of the road, a new track layout has recently been completed. In order to make room for these tracks, the old machine shop, engine house,

FRONT VIEW OF DAIRY HOUSE.

with a wood grille above, three feet eight inches high. All exterior openings will be screened with one-half-inch wire mesh. The feed room will be of ratproof construction, with gravity doors leading to the stalls. An overhead feed carrier will be installed.

DAIRY HOUSE.

The dairy house will be two stores in height, 50 by 24 feet in plan, and is to be built of hollow concrete blocks, with roof of red tile. It will be provided with an 8-foot porch having arched openings, as shown in the accompanying sketch. The second floor will be used as a dormitory for the silver help, and will have a wood floor, and be equipped with toilet, shower bath, lockers, etc. The stairway will be on the inside. On the first floor will be a milkroom, ice box, shipping room, boiler room, and sterilizing and packing departments. A shipping platform will also be provided. All partitions will be constructed of concrete blocks.

PIGGERY.

The piggery is a detached concrete building, but in close proximity to the cow barn, 44 by 91 feet over all, with concrete roof supported by single span 39-foot concrete beams, having a maximum depth of two feet 10 inches, and a minimum of one foot three inches. The roof is similar to that on the cow barn. An aisle extends through the center of the building, and on either side are five sties, in addition to one extending clear across one end, which will be used as a fattening pen. Each sty contains a shallow concrete trough, equipped with a movable wooden gate, which can be operated back and forth to prevent the pigs from getting access to the troughs while their food is being put in them. The outside entrances to the sties are also provided with gates. At the end of the piggery nearest the cow barn are rooms for feed, stores, and for butchering; the latter is provided with a scalding tank,

sand house, coal chute, cinder pit, and turntable that formerly stood there had to be removed. The machine shop had been in disuse for some time, while the engine house, sand house, cinder pit, etc., were no longer necessary on account of the improved facilities at Balboa. The turntable was a landmark in the Panama yard having been in continuous existence at the same point for a period of about 60 years.

The new layout provides for tracks spaced on 18-foot centers, giving a total storage space of 2,510 feet. For the crossovers to the main line and other tracks in the yard, two special and two double end crossing frogs were manufactured and installed. The estimated cost of the improvements was \$10,938.43.

Misdirected Letters.

Balboa-Taboga Service.

Launch Q makes trips on the following schedule: *Week days*.—Leave Balboa dredge landing at 5.30 p. m., and Taboga at 6 a. m. *Sundays and holidays*.—Leave Taboga at 6 a. m., Balboa dredge landing at 9.30 a. m., and Taboga at 8 p. m. *Fares*.—Employees, 25 cents gold each way; nonemployees, 50 cents gold each way; children under 12 years, 15 cents gold each way.

LAYOUT OF COROZAL FARM BUILDINGS.

aisles and walks extending the length of the building to give access to the stalls. The latter will be arranged in double rows, two double rows on each side of the court, 26 stalls to a double row, or 104 in all. They will

OFFICIAL CIRCULARS.

**Subscriptions for The Canal Record.
THE PANAMA CANAL.
EXECUTIVE OFFICE.**

BALBOA HEIGHTS, C. Z., December 1, 1914.

After January 1, 1915, a subscription rate will be charged for THE CANAL RECORD of \$1 domestic and \$1.50 foreign, except in the case of Government departments and bureaus, Members of Congress, representatives of foreign governments, public libraries, and employees of The Panama Canal on the gold roll, to whom THE CANAL RECORD will be distributed free. This paper, which is published on the Isthmus, under the direction of the Governor of The Panama Canal, will be continued as a weekly publication, with a normal issue of four pages and an 8-page issue once a month; and it will be used primarily for the publication of Executive Orders, special circulars, official notices and advertisements, shipping news and statistics of Canal traffic. The number of prepared articles will be reduced and personal news will be altogether eliminated.

All subscriptions for THE CANAL RECORD will expire on December 31 of each year. Domestic subscriptions received after the beginning of a year will be charged as from the beginning of the particular quarter in which received, in accordance with the schedule of rates shown below. Foreign subscriptions will be charged as from the beginning of the particular third of the year in which they are received:

SUBSCRIPTION RATES—DOMESTIC.

Subscriptions entered between January 1 and April 1.....	\$1.00
Subscriptions entered between April 1 and July 1.....	.75
Subscriptions entered between July 1 and October 1.....	.50
Subscriptions entered between October 1 and January 1.....	.25

SUBSCRIPTION RATES—FOREIGN.

Subscriptions entered between January 1 and May 1.....	1.50
Subscriptions entered between May 1 and September 1.....	1.00
Subscriptions entered between September 1 and January 1.....	.50

Remittances from the Canal Zone, the Republic of Panama, Columbia, the West Indies (excepting Cuba and Porto Rico), Costa Rica, the West Coast, Argentina, Uruguay, and Paraguay should be forwarded to "THE CANAL RECORD, Balboa Heights, Canal Zone," and should be made payable to the "The Collector, The Panama Canal." The name and address to which THE CANAL RECORD is to be sent should be plainly written. Subscribers in the United States and foreign countries other than those mentioned above should address "The Chief of Office, The Panama Canal, Washington, D. C.," and make their remittances payable to "The Disbursing Clerk, The Panama Canal," Washington, D. C.

The word "Foreign" refers to countries where mail cannot be forwarded under official frank. The word "Domestic" refers to the United States and its possessions, as well as to Canada, Cuba, Mexico, and the Republic of Panama, to which last named foreign countries Government mail can be forwarded under official frank.

Assignment of Quarters for Gold Employees.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., December 3, 1914.

CIRCULAR No. 627-2:

In future in making assignments to family quarters, preference will be given to employes who are:

1. Working and quartered in the district where the assignment is to be made.
2. On the waiting list and working at that station.
3. Quartered in the district, but working elsewhere.
4. On the waiting list, but working at some other station.

Geo. W. Goethals,
Governor.

Vacations.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., December 2, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

The desirability of making up a schedule of leaves of absence for the employes in the various units of the organization is hereby brought to your attention.

The cumulative leave for all employes who were in the service on April 1 will fall due on February 1, 1915, and unless exceptions are authorized, it must be taken within four months after that date or accumulated.

Each employe should be permitted to nominate three dates, as widely separated as he finds convenient, for entering upon his leave. The schedule should then be arranged so that the employes in the same class of

work, who will have to relieve each other, shall be given preference according to seniority as far as possible.

The 4-month period will be extended where it is necessary to do so for the good of the service.

Employes who have completed eight months service, and who may desire to go to the States on leave before February 1, and not take their cumulative leave this coming year, may be granted any balance remaining of their 21 days annual leave, provided they expect to return to duty. If they should resign while on such leave they would only be allowed the usual two days per month.

This rule is adopted for the purpose of encouraging employes to take their leave before February 1, if possible.

Geo. W. Goethals,
Governor.

Addressing of Official Mail.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., December 1, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

My attention has been directed to the practice of addressing official mail to clerks and subordinates in the several bureaus and offices, instead of to the head of the department or division interested. This practice must be discontinued.

All official mail should be addressed to the head of the department, division, or bureau to which the business pertains, and, to facilitate its delivery and handling, routine mail intended for particular individuals may be marked "For Mr.". For example, routine mail or papers relating to property and requisitions now addressed to the several property clerks should be addressed to the property and requisition bureau, Balboa Heights.

It is, therefore, directed that these instructions be brought to the attention of all persons who have occasion to forward official mail to heads of departments, divisions, and bureaus at Balboa Heights.

Geo. W. Goethals,
Governor.

Permits to Military Reservations.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., December 3, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

As all permits to military reservations expire December 31, 1914, it is requested that you submit, by December 15, the names of employes of your department or division whose duties necessitate frequent visits to the reservations.

It is desired to issue extended permits only as above outlined, and names of employes who make but occasional trips to reservations should not be submitted. These should be covered by individual request from head of department or division whenever necessity requires.

Geo. W. Goethals,
Governor.

Family Quarters for Silver Employees.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., November 30, 1914.

CIRCULAR No. 628-1:

Circular No. 628, dated April 1, 1914, providing for rental of quarters to silver employes, is amended by adding at the end of Paragraph 8, the following:

Refund of rental for a fractional part of a month will be made only to employes when the quarters rented are vacated upon transfer or separation from the service.

Geo. W. Goethals,
Governor.

Maximum Rate—Silver Clerks.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., December 2, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

It is intended to establish a maximum rate of \$60 per month for silver clerks. If there are any silver clerks in your organization receiving more than \$60 per month please furnish names and rates of pay.

Geo. W. Goethals,
Governor.

Shipments of Supplies Returned to the United States.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

BALBOA HEIGHTS, C. Z., November 24, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

In order that proper customs declaration and shipment billing can be prepared to cover all shipments of supplies returned to the United States, it is essential

that the following information be furnished this department:

- Serial number of items or packages.
- Value of material.
- Whether freight charges are to be prepaid, or collect.
- Weight of each package.
- Washington order and Canal Zone requisition number under which the material was purchased.
- Date of arrival of the material on the Isthmus.
- All packages should be marked, as follows:
Shipment No.
Panama Railroad Company, New York City,
c/o Assistant Purchasing Agent.

For.....

Shipment number and any information that may be required by the department shipping the material will be furnished by the United States requisition division of this office.

A packing list, in quadruplicate, showing the above information, should be prepared to cover all shipments to be returned to the United States and should be distributed, as follows:

One to office of Chief Quartermaster; one to storekeeper, Balboa; one to inspector, Supply Department, post-office box No. 164, Cristobal; and one to department shipping the material.

All supplies to be returned should be shipped to the inspector, Supply Department, pier No. 11, Cristobal, C. Z.

Approved: Wm. R. Grove,
Chief Quartermaster.

Geo. W. Goethals,
Governor.

Delivery of Personal Mail.

THE PANAMA CANAL,
OFFICE OF EXECUTIVE SECRETARY,

BALBOA HEIGHTS, C. Z., December 1, 1914.

To all employes, Administration Building, Balboa Heights.—Effective today, the delivery to the several offices of personal mail addressed to employes will be discontinued, and all mail for employes who have not provided themselves with lock boxes will be placed in the general delivery case for distribution as is customary in other post-offices.

C. A. McIlvaine,
Executive Secretary.

Inspection Calls.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

BALBOA HEIGHTS, C. Z., November 30, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

In order that all dealers' invoices may be certified for payment with the least possible delay, it is necessary that inspection calls be checked, properly accomplished, and returned to this office immediately on the receipt of the supplies which they cover. It is, therefore, requested that you instruct all employes under your direction, and who are now authorized to sign inspection calls, to give this subject preferred attention.

In order that a complete record can be kept as to the status of all outstanding calls, it is further requested that every employe authorized to sign inspection calls furnish this office on the 15th and 30th day of each month a list showing the calls which they have on hand, with a statement in detail as to the reason the calls cannot be accomplished.

Approved: Wm. R. Grove,
Chief Quartermaster.

Geo. W. Goethals,
Governor.

Proposals for Painting Houses 740, 753 and 756, Balboa.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., December 10, 1914, and then opened for furnishing the necessary labor for painting the interior of Houses 740, 753 and 756, Balboa. This work must be done equal to that in the houses of similar type previously completed at Balboa, and must be satisfactory to the Constructing Quartermaster or his representative.

Separate bids should be submitted for each house, but one bidder may bid on all three houses.

Bids must be accompanied by \$50.

Bidders should state in their proposal the time in which they propose to complete the work.

Any further information may be obtained upon application to the office of the Constructing Quartermaster, Balboa Heights.

The Government reserves the right to reject all bids. Bids should be marked "Proposal for painting houses 740, 753, and 756, Balboa."

Wm. R. Grove,
Chief Quartermaster.

COMMISSARY DEPARTMENT.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 1.3 to 6.30 p. m. The gold departments of the Cristobal store will open at 2 p. m., on Saturdays and sailing days of Panama railroad vessels.

Proposals for Plastering Two-Family and Four-Family Quarters, Balboa Dump.

THE PANAMA CANAL,

OFFICE OF CHIEF QUARTERMASTER,

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., December 19, 1914, and then opened for furnishing necessary labor to do all plastering required to finish two four-family houses and two two-family houses at Balboa dump. One of these houses will be ready for plastering about January 1, 1915, another about January 10, and the other two about January 15.

Specifications for this work may be obtained upon ap-

WEATHER CONDITIONS, CANAL ZONE, NOVEMBER, 1914.

Rainfall for the month was below normal at all stations, except Balboa and Pedro Miguel. The deficiencies were greatest in the central section and over the upper Chagres basin. The monthly totals ranged from six inches at Empire to 19.58 inches at the Gatun River station above Monte Lirio. The maximum precipitation recorded in any one day was 3.77 inches at Colon on the 13th. The estimated average rainfall over the Chagres River basin figures 44 per cent below normal—11.01 inches against a 14-year November average of 19.50 inches.

The average air temperature and atmospheric pressure were slightly above normal, while the wind movement was generally deficient.

The daytime cloudiness was above normal in the Pacific section, but deficient on the Atlantic side. Night and early morning fogs were numerous at the interior stations. Of the fogs observed, 48 per cent were dissipated by 6.30 a. m., 76 per cent by 7.30 a. m., and 98 per cent by 8.30 a. m.

Elevation of Gatun Lake (feet above mean sea level): Mean for the month 86.26; maximum, 86.74 on the 29th; minimum, 85.91 on the 5th. Evaporation from lake surface, 4,180 inches.

The following table summarizes the weather conditions for the month:

STATION.	Pressure (reduced to mean of 24 hourly).	Temperature.					Mean relative humidity.	Precipitation.				Wind.

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it. The time used is Cosmopolitan Standard, for the

meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.). All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15.47 is 3.47.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls, or the purchase of supplies, may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

It is advisable that deposits be made somewhat in excess of the anticipated charges, to cover minor charges which may not have been anticipated, such as pilotage and towage. Pilotage is at the rate of \$1 per foot of maximum draft, but is not charged on a vessel which makes the transit of the Canal without taking on or discharging freight or passengers in a terminal port. Tug service, which is at the rate of \$15 per hour, will not be charged on vessels of less than 15,000 gross tonnage.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa from the Union Oil Company at the rate of from 1,300 to 1,600 barrels per hour. The present price is \$1.30 per barrel, reduced to 60° Fahrenheit.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa.

Subsistence supplies, including a large stock of fresh meats, vegetables, canned groceries, fruits, bakery products, etc., are available for quick delivery at either terminal. Prices are generally lower than the retail prices in the United States, and compare favorably with prices in any part of the world.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges for ship's laundry: Trousers and jackets, five cents each, aprons, caps; sheets, tablecloths, napkins, towels, one cent each.

Sailings of Vessels in Regular Service With the Isthmus.

REGULAR CONNECTIONS THROUGH THE CANAL.

Approximately regular services between the Atlantic and the Pacific seaboard from Boston, New York, Philadelphia, and Baltimore, occasionally Charleston and New Orleans, to San Pedro, San Francisco, Portland, and Puget Sound, and return, are maintained by the American-Hawaiian Steamship Company, with a sailing each way about every five days; the Luckenbach Steamship Company, with a sailing each way about every 10 days; Sudden and Christenson, approximately fortnightly; the Atlantic and Pacific Steamship Company, about every three weeks; and the Boston and Pacific Line, and the Arrow Line, each sending a vessel each way about once a month.

Between the east coast of the United States and the west coast of South America, fortnightly services are maintained by the Merchants' Line and by the New York and South America Line; the West Coast Line has sailings each way about every four weeks.

Between the west coast of the United States, with connections to lower British Columbia and Europe the following lines are in service: The Harrison-Direct Line, monthly; the Maple Leaf Line, about every six weeks; the East Asiatic Company, monthly, and the Johnston Line, every six or seven weeks.

The Pacific Steam Navigation Company is operating approximately a monthly service around South America from Liverpool, by way of the Canal.

The American-Australian Line has been sending ves-

sels through the Canal about fortnightly from New York to ports in Australia and New Zealand.

PACIFIC COAST CONNECTIONS.

The Pacific Mail has sailings about every 10 days between Balboa and San Francisco, with calls at Puntarenas, San Juan del Sur, Corinto, Amapala, La Union, La Libertad, Acapulco, San José de Guatemala, Champerico, Ocos, Salina Cruz, Acapulco, Manzanillo, San Blas, and Mazatlan. The company also operates a direct line between Balboa and San Francisco, with sailings about every six weeks; and a Panama-Central America line, between Balboa and Ocos, making one round voyage monthly, and calling at all the ports above-mentioned between Balboa and Ocos.

The cable address of The Panama Canal on the Isthmus is "Isthmian, Balboa Heights;" in the United States, "Isthmian, Washington".

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C.," for delivery in the United States.

The Peruvian Steamship Company maintains a weekly service between Balboa and Callao, with calls at Guayaquil, Payta, Eten, Pacasmayo, and Salaverry. Every second voyage includes Mollendo.

The South American Steamship Company's vessels call on alternate Mondays from Balboa for Valparaiso, calling at Paíta, Eten, Pacasmayo, Salaverry, Callao, Mollendo, Arica, Iquique, Antofagasta, and Coquimbo.

The Pacific Steam Navigation Company has sailings on alternate Mondays for Peru and Chile; every 10 days for Ecuador; and on alternate Mondays for Colombian and Ecuadorian ports.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro; and an additional weekly sailing to Bocas del Toro.

The Royal Mail maintains fortnightly service each way between New York and Southampton, making the following way ports: Antilla, Jamaica, Colon, Cartagena, Puerto Colombia, Puerto Cabello, Trinidad, Barbados, the Azores, and Cherbourg. Its vessels all arrive at Colon on Sundays and sail on Tuesdays.

The Compagnie Générale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Carupano, Trinidad, Martinique, Guadeloupe, and Santander; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Carupano, Trinidad, and Martinique.

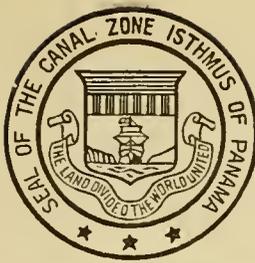

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curaçao, Puerto Cabello, and Barcelona.

The Compañía Transatlántica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curaçao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls en route, the vessels sail from Genoa on the 8th day of each month.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing about every seven days direct; between Colon and New York by the United Fruit Company and the Royal Mail Company, sailings via Kingston weekly and fortnightly, respectively; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employees of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

First Night Lockage at Pacific Locks.

The first night lockage at the Pacific Locks occurred on Monday, December 7, when the *Limari* of the South American Steamship Company (Compañía Sud Americana de Vapores), on authority of the Governor, was passed through Pedro Miguel and Miraflores Locks. The operations in detail were, as follows:

Pedro Miguel Lock.—Arrived at 6.34 p. m.; entered chamber at 6.50; lines on at 6.53; lines off at 7.13; left chamber at 7.15. Time of lockage 25 minutes.

Miraflores Locks.—Arrived at 7.37 p. m.; entered upper chamber at 7.45 p. m.; gates between chambers opened at 8.17; lower gates opened at 8.38; left lower chamber at 8.57. Time of lockage one hour and 12 minutes.

The vessel was held in the lower chamber at Miraflores for 15 minutes, waiting for the currents, consequent upon the mixing of the salt with fresh water, to subside.

Five towing locomotives were used at Pedro Miguel; the sixth was not used, because there were apparently no bits on the starboard side of the steamer amidships. Only four locomotives were employed at Miraflores Locks.

Arrival of Vessels Without Bills of Health.

Since December 5, six British colliers and two British merchant vessels have arrived at Cristobal and Balboa without bills of health or supplemental bills of health. This is a violation of the quarantine regulations, and is punishable by a fine of not to exceed \$500. The *Roddam* and the *Kirwood* arrived at Cristobal on November 28, the former from Newport, England, with a cargo of 4,878 tons of coal, and the latter from Cardiff, Wales, with a cargo of 4,221 tons. They were allowed to proceed through the Canal, but were held at Balboa pending disposition of their cases in the District Court. The captains were fined \$25 in each instance for failure to comply with the quarantine regulations. The merchant vessels *Nyanza* and *Atlantic City* arrived at Balboa from the south, with cargoes of sugar, on December 2 and 4, respectively, without supplemental bills of health, and the *Mallina* arrived at Balboa

from the north on December 5, also, without a bill of health. The captains of the *Nyanza* and *Atlantic City* were each fined \$25, and the captain of the *Mallina* \$50. The *Withernsea*, from Barry, England, via Kingston, with 5,000 tons of coal, arrived at Cristobal on December 8; the *Lena*, from Cardiff, Wales, direct, with 5,600 tons of coal, arrived at the same port on December 10, and the *Boyne*, also from Cardiff direct, with 6,500 tons of coal, on December 11. The captain of the *Withernsea* was fined \$50, and the captains of the *Lena* and *Boyne* \$100 each. All of the six coal vessels were consigned to the British Admiralty.

First Japanese Vessel to Use the Canal.

The steamship *Tokushima Maru* of the Nippon Yusen Kaisha Line, which arrived at Cristobal from Galveston, Texas, on Wednesday, December 9, and went through to Balboa on the following day, is the first Japanese vessel to use the Canal. It was bound for Yokohama, with a cargo of 15,052 bales (4,000 tons) of southern cotton. The vessel has a length of 423 feet, beam 55 feet, and draft, 20.6 feet; and carried a crew of 61. The members of the crew are Japanese, but the captain and chief officers are English. This makes the sixth cargo of cotton transported through the Canal to Japan since August 15.

New Bridge Over French Canal Completed.

The new bridge over the French canal, connecting Teller's Island, on which the Cristobal coaling plant is located, with the mainland, has been completed, and was placed in service at 7 o'clock Monday morning, December 14. This permits abandonment of the pile trestle close by, which had been used for rail transportation to and from the island up to this week.

Quarters for Operating Force, Miraflores Locks.

A Type 18 bachelor quarters, formerly at Culebra, has been moved to a location on the backfill at Miraflores Locks, and will be converted into permanent quarters for the gold lock operating force at that point. The lower floor will be partitioned off into a dining room, recreation room, and four bedrooms. The second floor will have 12 bedrooms, six on a side. There will be a 1-story annex to furnish space for a kitchen and quarters for the silver help, and a 2-story annex to contain the toilets and shower baths.

Abandonment of Cucaracha.

The camp for silver employes at Cucaracha, situated on the east bank of the Canal, a little north of Paraiso, will be completely abandoned about January 1, but such buildings as are in an insanitary and unstable condition will be vacated at once. Cucaracha labor camp was established by the French, and the buildings there are mostly of French construction.

SENDING VESSELS TO CANAL.

Government's Arrangements for Payment of Tolls—Looking After Interests of Owners.

The Government is endeavoring to handle vessels through the Canal with a minimum of delay and of expense to the owners, and has provided a system by which all the owner has to do is to make a deposit covering the vessel's probable Canal expenses. The rest of the business is attended to by the Government, and no further thought or care is imposed on the owner.

The deposit may be made with any Assistant Treasurer of the United States (there is one in every large American port), or bonds may be placed with the Assistant Auditor of The Panama Canal, in Washington, D. C., to secure the payment of drafts, or cash may be paid on the Isthmus to the Collector. The first method is the simplest and the one usually adopted. A foreign owner or agent can direct his local bank, which has connections with United States banks, to have the deposit placed with an Assistant Treasurer, say in New York or San Francisco, and will be put to no more difficulty than an owner in the United States.

Upon the deposit being made in the United States, notice is forwarded immediately to the Canal authorities, who then make all arrangements to give the vessel the most satisfactory despatch through the Canal as soon as it presents itself at either port of entry. Such notice is forwarded by cable when requested, the expense of the cablegram being charged to the depositor.

In whatever way the advance payment is made, it should be ample to cover the estimated tolls, as well as any other expected expenses, such as for fuel, supplies, etc. Whatever balance is due the depositor after the vessel's expenses have been met will be refunded him by check on the Treasurer of the United States directly after the vessel has cleared from the Canal. If the depositor expressly requests it, any balance due him will be left to his credit, to apply on future bills. In any event, an itemized statement of the vessel's expenses is forwarded immediately.

Some owners and agents who may have been unaware of the Government's provisions for handling these matters, have employed local agents to look after their business, or arranged with local banks to pay their bills. It has been pointed out by the Canal authorities that such arrangements are neither necessary nor desirable; that the system provided by the Government is the most expeditious, and that the introduction of a third party in the transaction complicates the situation and is liable to delay the handling of a ship, by interfering with the usual movement of the machinery. It also adds to the owner's minimum expenses the fees charged by representatives. The services have to be performed by the Canal organization in any event, and it is be-

lieved the work can be handled most satisfactorily by dealing direct with the owner and with the master of the vessel.

In requesting the elimination of third parties, the Government does not lessen the protection of the shipowner's interests, though it endeavors to do for the owner all that a local representative could do. The rules for the navigation of the Canal and the cost of any accessory services that may be required are made plain to the master of a vessel as soon as it enters a terminal port. Officers of the Canal inquire as to the vessel's needs, if any, and the port captain sees to it that these needs are met fully, to the extent of the local facilities. The master of the vessel is fully competent to see that his vessel receives no less than it is charged for. All charges are levied according to specific printed schedules and all bills are fully itemized. Receipt of goods or of services is acknowledged by the master before collection is made, and if, in spite of the accurate system employed, a mistake should be made, it would be detected afterward in the careful auditing to which all transactions are subjected, and a refund, if due, would be made to the depositor.

In handling a vessel through the Canal, every precaution is taken to insure its safety. The channel is fully charted and fitted with every requisite aid to navigation, and towing is resorted to whenever the interests of safety make it advisable. If towing is required by some navigational defect of the vessel, or is requested by the vessel, a charge will be made for the service, but if it be needed on account of conditions in Culebra Cut, the Government renders the service without charge. The Government assumes responsibility for the safety of vessels in the locks. If, in spite of the precautions taken, an accident should occur to a vessel in transit, the matter would be investigated on the spot by the Board of Local Inspectors and an accurate report would be made. In such an investigation, the master and crew of the vessel, on board at the time, would be the owner's most competent witnesses, and it has been the policy of the Canal to show them every consideration, and to give the owners the benefit of any doubt.

The Government's endeavor is to handle the Canal business with as great simplicity as possible and with continued satisfaction to those who send vessels through it. The elimination of third parties in the transaction of business with owners has been found to be a step in this direction. It may be noted, in this connection, that the Panama Railroad Company, though closely related to The Panama Canal, is not to be employed as agent for vessels going through the Canal. This is because the employment of the Panama Railroad Company as agent, like the employment of any other agent, complicates the situation, introduces additional correspondence, and accomplishes nothing that could not be done better without it.

Progress on New Canal Colliders.

The progress report for the month ending October 31 on the new Canal colliers *Achilles* and *Ulysses*, now under construction at the yards of the contractor at Sparrow's Point, Md., shows that on the *Achilles*, the elapsed time since the date of the contract was 6.6 months; therefore, it is estimated that the vessel was .8 month ahead of contract time. The elapsed time on the *Ulysses* since the

date of the contract was 6.6 months; therefore, it is estimated that on October 31 the work was 1.3 months ahead of contract time.

Net Emigration from the Isthmus in 16 Months
20,491.

The report of quarantine operations for November shows an excess of emigration over immigration of 537, as compared with a net emigration in October of 1,990, and in September of 1,115. The total net emigration from the Isthmus through the terminal ports since July, 1913, has been 20,491. This figure does not represent a corresponding reduction in the Canal force, for in June, 1913 there were 42,262 employes on the rolls, while on November 25, 1914 there were 26,957, a difference of 16,305. It may be assumed, therefore, that in addition to the 16,305 Canal laborers who have returned to their homes, over 4,000 others have left also. In the work of depopulating the Canal Zone, many of the nonemploye residents moved to the terminal cities, others sought new homes outside the Zone boundary, while a few thousand appear to have left the Isthmus altogether.

The total number of persons embarking at the ports of Cristobal and Colon for foreign ports during November was 2,895, consisting of 1,044 cabin, and 1,851 steerage passengers. The number of persons entering from foreign ports was 2,571, consisting of 1,349 cabin, and 1,222 steerage passengers. The excess of those who embarked over those who landed was 324. There was an increase in the number of steerage passengers entering, and a corresponding decrease on those leaving, as compared with October. The percentage increase in steerage arrivals is almost wholly due to a record emigration from the United States in this class, 768, which constituted nearly one-half of the total. During October, only 34 persons arrived in steerage from the United States. The November increase may be accounted for in part to business conditions which have led men to seek work elsewhere, and also to avoid the hardships of the Northern winter. The steerage immigration from the West India islands remains about stationary, the arrivals totaling 260 for November, as compared with 255 for October. Forty-five steerage passengers came from Europe, 70 from Colombia, 22 from Cuba, and 26 from Costa Rica. A total of 182 entered from Bocas del Toro, and 212 from other coast towns on the Atlantic side of the Isthmus. Of the arrivals at Cristobal and Colon in the steerage class, 1,850 were men, 455 were women, and 205 were children. The number of persons arriving in transit was 715, a slight

increase over October, while the number arriving in transit through the Canal southbound was 133.

The number of persons arriving at the ports of Balboa and Panama from foreign ports during November was 420, consisting of 275 cabin, and 145 steerage passengers. The number of persons departing was 633, consisting of 502 cabin, and 131 steerage passengers. The number of those who embarked over those who landed at these ports was 213. The number of persons arriving from the coast towns on the Pacific side was 1,105; departing, 1,287.

One hundred and twelve vessels entered at the ports of Cristobal and Colon during the month, and 62 at Balboa, a total of 174, as compared with 176 for October. No disease of a quarantinable nature arrived at the terminal ports during the month.

Handbook of General Information.

A handbook, containing sailing directions and general information concerning the Panama Canal, has just been issued. It will be sent free to shippers and others interested in Canal navigation and the prices and charges for services and supplies to vessels.

Gatun Lake at Maximum Level.

Instructions have been given to hold the level of Gatun Lake at between 86.9 and 87.1 feet from now on, in order to obtain the maximum amount of storage for the approaching dry season.

A Useful Book Varnish.

The following ingredients make a varnish that has been found very useful in protecting books from mould and from roaches; Bichloride of mercury two parts; orange shellac 20 parts; oil of turpentine 250 parts, and the balance up to 1,000 parts, 95 per cent ethyl alcohol. The general directions are to mix the above ingredients thoroughly, shake before using, and to apply with a rag.

Vaccination of Schoolchildren.

The district physicians, together with the health officers of Panama and Cristobal-Colon, have been instructed to visit all schools in their respective districts and to vaccinate the pupils who have not had smallpox, or who have not been successfully vaccinated within the past five years. A certificate showing that a child has been successfully vaccinated within the 5-year period, signed by a reputable physician, will be considered as having fulfilled the requirements. A record will be kept and certificates issued to all children and teachers successfully vaccinated during the present visitation.

Deceased Employees.

Name.	Check No.	Native of	Isthmian residence.	Employed by	Date of death.
Holder, Herbert	41622	Barbados	Mount Hope ...	Supply Dept. ...	1914. Dec. 7.
Smith, James	26395	Montserrat	Balboa	Oper. & Mtce.	Dec. 6.

The estates of these deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against their estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

TRIPS TO TABOGA ISLAND.

Hotel Aspinwall Enjoying an Increased Patronage Due to Improved Transportation Service.

Since the inauguration of the daily launch service to Taboga Island on December 1, there has been a marked increase in the travel in that direction. Especially is this so on Saturdays and Sundays, when employes, and in the case of married men, their families, can go over on Saturday night and stay, if they choose, until Monday morning, or go over on Sunday morning, come back that night, or stay until the following morning. The week-ends at the Hotel Aspinwall are becoming more and more popular, and with the appearance of the dry season, it is expected that the number of visitors will still further increase. On Saturday and Sunday, December 12 and 13, there were more guests at the hotel than any previous time since the special launch service was started. The low rates for transportation and the moderate charges for hotel accommodations, combined with the rest and change afforded by a visit to the island, make the trip unusually attractive. To those seeking an absolute rest, or to those convalescing from a spell of sickness, the conditions are almost ideal, and this fact is beginning to be realized more and more.

In former times, when the hotel was operated as a sanitarium, to those of the patients who liked diversion, the days were a little dull. There was nothing to do, but to sit around, read, wait for the meal hours, and to go in bathing when the spirit prompted, while one's movements were naturally restricted to a certain extent. The aim of the present management in its plan to popularize the place is to furnish every reasonable comfort and convenience to its guests, and in addition, to provide suitable forms of diversion. To this end, a croquet ground has been laid out, and the construction of a lawn tennis court is under way, which will be available for the holding of tournaments by Canal Zone clubs, as well as for the use of the individual hotel guests. The hotel is already provided with a poolroom, and a piano has recently been installed in the parlor, so that music for dancing is now available. The management is arranging to procure the services of one, who, in addition to performing other duties about the hotel, will be able to play the piano on dance nights. Other forms of diversion will probably be introduced later, including something for the little folks.

The rates at the hotel, as compared with other resort hotels, are very reasonable. Fifty cents is the charge for breakfast, and 75 cents each for luncheon and dinner, with a rate of \$2 by the day. A special rate has recently been authorized whereby patrons who go over on the afternoon boat can obtain dinner, lodging, and breakfast for \$1.50, and another arrangement has been placed in effect whereby employes can have their bills deducted from their pay at the end of the month, if so desired. The bedrooms at the hotel are airy and clean, and added privacy has been secured by enclosing the veranda space pertaining to each room on the second floor with wire partitions. This permits occupants of various rooms to carry on conversations when seated on the porch, but eliminates the constant passing back and forth in front of the rooms. The dinner at the hotel on Sunday evening, December 13, as shown by the menu

given below, may be considered as typical of the meals now served at the hotel:

MENU.		
Celery		Pickles
Consomme Royale		
Breaded Fish,	Tartare Sauce,	Julienne Potatoes
Roast Stuffed Chicken		
Duchesse Potatoes		Creamed Carrots
Asparagus		Steamed Rice
TO ORDER		
Eggs and Plain Omelettes		
Sirloin Steaks		
COLD		
York Ham		Roast Lamb
Papaya Salad		
Strawberry Ice Cream and Cakes		
Fruit		
Crackers and Cheese		
Tea	Coffee	Cocoa

The natural beauty of the island is always a sterling attraction; its quaint village with crooked cobble stone streets perched on the hillside; its sand beaches and almost perfect bathing; its fruits, embracing nearly every variety common to the tropic, and particularly its pineapples, known far and wide, which may be seen growing in patches on the steep hill slopes; its tamarind grove, said to be the largest of its kind in the country, located on the beach path to La Restinga, the little suburb to the main village, opposite Morro Island; its pure spring water, and its conch and coral specimens, all afford abundant opportunities for lovers of nature, and for pleasure and curiosity seekers.

Transfer Values of Canal Buildings.

A committee, consisting of Maj. B. T. Clayton, Capt. R. E. Wood, and Capt. L. Parker, appointed to consider the general question of transfer values in connection with the taking over of Panama Canal buildings by the military forces of the United States, has submitted its report and recommendations. The committee was of the opinion that, although there is in some cases considerable difference in the value of buildings on account of local conditions, a general depreciation percentage basis would be the best, and, therefore, recommended that the following percentages of original cost govern in the transfer of such buildings:

Portable buildings.....	10 per cent of original cost.
French buildings.....	25 per cent of original cost.
American buildings.....	50 per cent of original cost.

Drawing Money Orders on European Countries.

The United States Post-office Department has advised the Director of Posts of the Canal Zone that money orders in small sums, not to aggregate more than \$100 in favor of one payee, can be drawn, as usual, for payment in European countries, excepting only Austria, Belgium, and Portugal, and that it is immaterial whether the remittance represented by the order is personal or commercial. This supersedes instructions contained in the Director of Posts' circular of August 6, 1914.

Employes Shipping Household Goods to New York.

Officials of the Panama Railroad Steamship Line have noticed that, during the past few months, some employes of The Panama Canal and the Panama Railroad Company on the Isthmus have been forwarding their shipments of household goods under consignment to customs brokers in New York City.

When boxes of household goods are shipped under the certificate of the Canal Zone customs service that they are exempt from custom charges in the United States, and the freight

has been paid from Cristobal to New York, there is no difficulty about securing their release on the pier at New York, and employes will do well in such cases to consign shipments to themselves and avoid the unnecessary expense and trouble of dealing with customs brokers.

Danger of Contracting Malaria.

The Health Department calls attention to the fact that a considerable proportion of the malarial infection lately encountered in Americans has been contracted during evenings spent at pleasure resorts, especially in the suburbs of Panama.

All persons are warned that it is not safe to spend evenings in the open and urged to abstain from doing so. In case necessity, or the search for pleasure leads one to so expose himself, quinine should be taken thereafter.

Resorts in the neighborhood of marshes or of new construction work are the most dangerous.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., December 14, 1914.

The following insufficiently addressed letters originating in the United States and its possessions have been received at the office of the Director of Posts, and may be procured upon request of the addressees:

Bern J. W. F.	DeBarrons, D.

ROCK AND SAND OPERATIONS.

Review of Work Performed at Ancon Quarry and Punta Chame—Future Supply.

The Ancon quarry plant was closed down on Saturday night, October 31, but the machinery, with the exception of the screens, will be left in position for use in case it becomes necessary to renew operations at some later date. The plant is equipped with one No. 12 primary, and four No. 6 secondary, McCully crushers, and has a normal capacity of from 2,500 to 3,000 cubic yards of crushed rock per day. The plant started work on February 8, 1910, and has, therefore, been in operation, with the exception of temporary interruptions from breakdowns, for about four years and eight months. The plant has supplied the greater part of the crushed rock used in the concrete work at Pedro Miguel and Miraflores Locks, and Miraflores Spillway; and, in addition, has furnished rock and screenings for the miscellaneous requirements of all departments and divisions, the Panama railroad, Canal contractors, and private individuals and companies. Concrete construction at Pedro Miguel Lock was begun in September, 1909, and until the Ancon quarry plant was ready for operation, crushed rock was obtained from the Rio Grande quarry, which was closed down after the Ancon crushers were in a position to supply the material.

On August 8, 1910, there was a record day's output at the Ancon plant, consisting of 3,330 cubic yards in eight hours and 35 minutes, an average of 391 cubic yards per crusher hour. On December 1, 1910, owing to an increased demand for rock, for the 12-hour shift then in force, was substituted two 8-hour shifts, which arrangement continued for several months. With the completion of lock construction at the Pacific end, the demand lessened, and it has been possible to accumulate a considerable amount of rock and screenings in storage, although the requirements of the new work around Balboa have been large.

The output of the plant from the beginning of operations up to and including October 31, 1914, by years, is as follows:

	Cubic yards.
1910.....	175,174
1911.....	855,824
1912.....	839,279
1913.....	638,301
1914.....	532,793
July 1 to October 31, 1914.....	184,090
Total.....	3,245,466

The amount of crushed rock and screenings in storage on October 31 was approximately, as follows:

	Cubic yards.
No. 1 rock.....	111,356
No. 2 rock.....	15,400
Screenings.....	11,176
Total.....	137,932

The dredging of sand at Punta Chame was discontinued on October 20. The equipment employed in this service consisted of the ladder dredge *Gopher* and six barges. The sand beds at Punta Chame, about 23 miles from Balboa docks, were first opened in September, 1909. Up to February, 1910, when the first of the three special unloading cranes at the Balboa sand dock was placed in operation, sand was unloaded from barges by means of a locomotive crane equipped with a clamshell bucket. With the installation of the three unloading cranes, the output was greatly augmented. Upon the completion of lock masonry work at Pedro Miguel, the demand for sand lessened, and it was possible to ac-

cumulate a considerable amount in storage, south of Miraflores Locks. The sand service was entirely suspended for several months in 1913 and 1914. When gravel operations were started up at Gamboa, one of the unloading cranes at Balboa was removed to that point, and subsequently a second one. It is possible that the third crane will also be established there later.

The amount of sand supplied from the beds at Punta Chame during the years of operation is shown in the following table:

	Cubic yards.
1910.....	235,869
1911.....	494,841
1912.....	564,837
1913.....	445,658
1914.....	199,319
July 1 to October 31, 1914.....	67,075
Total.....	2,007,590

Punta Chame sand, like Ancon rock, has been supplied to all departments and divisions, and a considerable quantity was used in the construction of Gatun Locks, supplementing the supply from Nombre de Dios.

With the discontinuance of the above rock and sand supply, future requirements will be met, as far as possible, by using Chagres River gravel. A gravel screening plant has been installed, on a barge, and is designed to separate the gravel into two grades. In addition, sand will be supplied by screening through a 1/4-inch mesh. The screening plant, which has a capacity of about 500 cubic yards a day, was placed in regular operation this week; on Tuesday about 400 cubic yards were screened and on Wednesday about 500 cubic yards. At present, only the sand is being screened from the gravel. This gives three different classes of material the run of gravel from the stock pile, which contains about 70,000 cubic yards, the coarse screened gravel, and the sand.

Proposals for Clearing Margarita Island.

**THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER.**

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., December 22, 1914, and then opened for clearing the entire area of Margarita Island of all growth, with the exception of coconut trees, to within three inches of the ground and burning all material so cut; work to be begun within five days after signing contract and completed within 30 days thereafter. Bids must be for a lump sum for the entire job.

Bids must be accompanied by cash, post-office money order, or certified check for five per cent of the amount bid.

Form of contract and bond may be obtained upon application to this office.

Bids should be marked "Proposal for clearing Margarita Island."

WM. R. GROVE,
Chief Quartermaster.

Proposals for Plastering Two-Family and Four-Family Quarters, Balboa Dump.

**THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER.**

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., December 19, 1914, and then opened for furnishing necessary labor to do all plastering required to finish two four-family houses and two two-family houses at Balboa dump. One of these houses will be ready for plastering about January 1, 1915, another about January 10, and the other two about January 15.

Specifications for this work may be obtained upon application to the Constructing Quartermaster, Room 256, Balboa Heights.

Bids may be submitted for each house or a total for the four houses.

Bids must be accompanied by \$100.

The Government reserves the right to reject all bids. Bids should be marked "Proposal for plastering two-family and four-family quarters, Balboa Dump."

WM. R. GROVE,
Chief Quartermaster.

OFFICIAL CIRCULARS.

Accountable Official.

**THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,
BALBOA HEIGHTS, C. Z., December 11, 1914.**

CIRCULAR No. 80:

Effective January 1, 1915, Mr. X. D. Holt is designated an accountable official of The Panama Canal, and as such will account for the stock charged to Paraiso store. Nonexpendable property in use at Paraiso store will be accounted for by the district quartermaster at Paraiso.

H. A. A. SMITH,
Auditor, Panama Canal.

Approved:

GEO. W. GOETHALS,
Governor.

Customs Regulations.

**THE PANAMA CANAL,
EXECUTIVE OFFICE,**

BALBOA HEIGHTS, C. Z., November 21, 1914.

CIRCULAR No. 679 (Revised):

Article 1. There is hereby established a Bureau of Customs for The Panama Canal which shall be charged with the following duties:

(a) The entry and clearance of vessels at the ports of the Canal Zone.

(b) The custody of goods, wares, and merchandise introduced into the Canal Zone, pending the release thereof on presentation of evidence in due form that said goods, wares, and merchandise are entitled to free entry, or that the import duties due to the Republic of Panama have been paid, or that payment has been waived.

(c) The enforcement of the immigration laws and regulations of the Canal Zone, except as this duty is assigned by law or Executive Order to the Chief Quarantine Officer.

(d) The certification of invoices covering shipments from the Canal Zone to the United States.

(e) Such services to seamen as are commonly rendered by shipping commissioners in American ports, or by American consuls in foreign ports.

Article 2. The Executive Secretary of The Panama Canal shall be charged with the supervision of the Customs Service. The captains of the ports of the Canal Zone shall be, *ex officio*, officers of the Customs Service for the purpose of entering and clearing vessels. There shall be employed such inspectors and other subordinate officers as may be necessary to carry on the work of the bureau as determined by competent authority. Employees of The Panama Canal or the Panama Railroad Company on the Isthmus, whose duties relate to vessels using the Panama Canal and its terminal ports, or to cargo discharged in the Canal Zone, may be appointed customs officers for special and defined purposes, and they shall discharge their duties as such without additional compensation.

Article 3. Subject to the direction of the Executive Secretary, and except as otherwise provided for in these regulations, inspectors of customs shall perform the duties heretofore performed by deputy collectors or customs in the Canal Zone.

Article 4. Vessels may enter either at the port of Balboa, or at the port of Cristobal. A vessel arriving for passage through the Canal, with through clearance from port of departure for port of final destination, which does not stop at either terminal port, will not be required to enter or clear. A vessel that stops at either or both terminal ports will be required to enter, and clearance will be issued from the last port at which the vessel stops. In no case will a vessel be required to clear from Balboa to Cristobal or *vice versa*.

Article 5. When a vessel arrives at the port of Balboa, or the port of Cristobal, or at the Panama Canal in transit, the master thereof shall furnish to the boarding officer representing the Bureau of Customs, or if no customs officer shall come aboard, to the captain of the port, on a blank form which will be furnished him for that purpose, a report of arrival, which shall include such statistical data relating to the vessel, its cargo and passengers, as may be required by the various departments of The Panama Canal.

Article 6. If cargo is to be discharged in the Canal Zone there shall also be furnished to the boarding officer a full manifest of such cargo, in writing, signed by the master and specifying the marks, kinds, and quantities thereof, the port or ports where the cargo was shipped, the different port to which it is consigned or intended to be entered and the names of the consignees. Any form of manifest in substantial compliance with these requirements will be accepted, and it may be in English or in the language of the nation to which the vessel belongs. If in a foreign language other than Spanish, the master or agent of the vessel must furnish a translation. If the regular manifest does not substantially comply with the requirements, then a statement shall be furnished for statistical purposes containing the in-

formation specified. This article shall not apply to cargo landed in the Canal Zone for immediate transshipment.

Article 7. An additional copy of the manifest must be furnished by the master or agent of the vessel for each port in the Canal Zone at which cargo is discharged; provided, that in lieu of a copy of the complete manifest there may be furnished at the option of the master or agent a copy of only such portions of the manifest as relate to the cargo to be so discharged.

Article 8. There shall also be furnished to the boarding officer the clearance issued to the vessel at the last port of call, a copy of the passenger list, which shall distinguish between passengers in transit and passengers to be landed in the Canal Zone, a copy of the crew list, list of sea stores, and certificate of discharge from quarantine; provided, that in the case of vessels in transit through the Canal which do not take on or discharge freight or passengers or ship or discharge seamen in the Canal Zone, the exhibition of these documents when required by a customs officer will be sufficient and copies need not be furnished.

Article 9. The master shall certify under oath that the manifest, passenger list, and other documents delivered by him to the boarding officer are complete and true.

Article 10. No vessel shall be permitted to enter until the master or agent shall produce a certificate of discharge from quarantine.

Article 11. Before an entry is made of a vessel of the United States, the register and articles must be produced to the customs officers, and these documents may be retained until a clearance is granted.

Article 12. It is not necessary for the captain or master of any vessel of war or public vessel owned or chartered by a foreign government to report and enter on arrival at the Panama Canal, at either of the terminal ports, unless engaged in the transportation of merchandise in the way of trade, but such vessel shall be subject to the quarantine regulations and to the regulations relative to the payment of tolls and of bills for material, supplies, repairs, harbor pilotage, towage, wharfage, and other services furnished to vessels by The Panama Canal; and such public or chartered vessels, other than men-of-war, may be required to certify as to the number of passengers or troops on board, and the character and kind of cargo, when requested by the Canal authorities to do so.

Article 13. The Bureau of Customs shall have exclusive control over all goods, wares, and merchandise, including passengers' baggage and packages of every kind and nature introduced into the Canal Zone, pending the release thereof on presentation of evidence in due form that such goods, wares, and merchandise are entitled to free entry, or that the import duties due to the Republic of Panama have been paid, or that payment has been waived. No such goods, wares, or merchandise shall be released for delivery to consignees or for reexport, except upon the order of a customs officer.

Article 14. A copy of the manifest of cargo landed at any point in the Canal Zone shall be delivered by the Bureau of Customs to the customs authorities of the Republic of Panama.

Article 15. The master of a vessel clearing from any port of the Canal Zone shall be required to furnish to the Bureau of Customs a manifest of all goods, wares, and merchandise, including packages of every kind and description, accepted for shipment from the Canal Zone in said vessels, showing the kinds, quantities, and destination thereof, and also a list of all passengers embarked in the Canal Zone; or if no cargo has been accepted for shipment and no passengers have embarked, a statement to that effect. But with the consent of the Bureau of Customs, previously obtained, these documents may be furnished through an agency on the Isthmus within 48 hours after the clearance of the vessel. The manifests, passenger lists, and statements submitted in compliance with this article shall be subscribed and sworn to by the master or agent of the vessel. This article shall not apply to vessels in transit through the Canal which do not take on passengers or cargo in the Canal Zone, nor to cargo or passengers transhipped from connecting lines or other vessels.

Article 16. Vessels leaving the port of Balboa, or the port of Cristobal, shall be cleared by the port captain, except as provided in Article 4.

Article 17. The captain of the port will not issue a clearance until he has ascertained:

(a) That the documents and statistical data in regard to cargo and passengers, as required by these and other regulations governing the use of the Panama Canal, have been furnished by the master of the vessel, or that satisfactory arrangements have been made to furnish same through an agency on the Isthmus.

(b) That all tolls, and bills for materials, supplies, repairs, harbor pilotage, towage, or wharfage, furnished to vessels by The Panama Canal, or by the Panama Railroad Company, have been paid, or that their payment has been secured.

(c) That the vessel has complied with the quarantine and immigration laws and regulations of the Canal Zone.

(d) That the laws and regulations governing the shipment and discharge of seamen, and for the protection of seamen, have been complied with.

Article 18. The Executive Secretary charged with the supervision of the Customs Service of the Canal Zone shall, in person, or through such assistants as he may designate, perform the duties of a shipping commissioner, and he shall render such services to American seamen as are commonly rendered by shipping commissioners in the United States, and by American consuls abroad. In the performance of these duties he shall be governed by the Navigation Laws of the United States and by the United States Consular Regulations, insofar as they are applicable.

Article 19. Questions which may arise in the administration of the Customs Service of the Canal Zone, which are not specifically provided for in these regulations, shall be decided in accordance with the Customs Regulations of the United States insofar as the latter regulations are not locally inapplicable.

GEO. W. GOETHALS,

Governor.

Material Salvaged from Garbage Dumps.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., December 7, 1914.

CIRCULAR No. 631-3:

1. The Health Department recovers from the garbage dumps at Colon and Panama, quite a number of oil, wine and other classes of barrels, some galvanized iron roofing, bottles, etc.

2. In future, all this salvaged material for which any department or division of The Panama Canal or the Panama railroad may have use, will be turned over to such department or division at such prices as the Health Department would be offered, for same by private parties in the open market.

3. Orders should be placed with the Health Department for such items as can be utilized in the work of The Panama Canal or the Panama railroad, and salvage not required for work on the Canal or railroad will be sold by the Health Department to the best possible advantage.

GEO. W. GOETHALS,

Governor.

Tags Torn Off Bad Order Cars.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., December 10, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

The attention of this office has been directed to the fact that tags are being removed from bad order cars, and that such cars are placed in service without authority from the Mechanical Division.

As this practice is a very dangerous one and is liable to result in serious accidents, heads of departments and divisions are requested to instruct their employes not to remove bad order tags from cars without proper authority from the Mechanical Division, nor to place in service any cars from which such tags have been removed without proper authority.

GEO. W. GOETHALS,

Governor.

Lock Permits.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., December 11, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

All lock permits expire on or before December 31, 1914. Please submit, not later than December 20, the names of all employes whose duties require them to frequently visit or cross the locks. The names of employes whose duties take them to the locks only occasionally should not be submitted, as permits for such employes will be issued upon request from the head of the department or division in each individual case.

GEO. W. GOETHALS,

Governor.

Local Notice to Mariners.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., December 10, 1914.

During the continuance of the obstruction in Culebra Cut the northbound range lights in the Gatun Lake section will be lighted.

GEO. W. GOETHALS,

Governor.

Addressing of Letters for Balboa Heights.

THE PANAMA CANAL,
OFFICE OF EXECUTIVE SECRETARY,

BALBOA HEIGHTS, C. Z., December 5, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

The Director of Posts has advised me that a great

many letters for Balboa Heights are delayed because of improper address. Mail for departments and divisions formerly at Ancon, Culebra, Cristobal, and Empire, continues to be improperly addressed to the old stations, instead of Balboa Heights. Part of this trouble is due to the use of obsolete envelopes bearing printed addresses. A large amount of mail for Balboa Heights is improperly addressed to Balboa. Please bring this to the attention of employes who are delinquent in this respect.

C. A. McILVAINE,

Executive Secretary.

Preparation of Papers for Termination of Service.

THE PANAMA CANAL,
OFFICE OF EXECUTIVE SECRETARY,
BALBOA HEIGHTS, C. Z., December 9, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

Herewith a supply of leaflets outlining instructions to govern in the preparation of papers incident to terminating the service of employes.

In order to facilitate the handling of personnel papers, please see to it that your outside offices, foremen, and field clerks are made acquainted with these instructions, in order that the proper cooperation may be obtained.

C. A. McILVAINE,

Executive Secretary.

Charges for Interments.

THE PANAMA CANAL,
OFFICE OF CHIEF HEALTH OFFICER,
BALBOA HEIGHTS, C. Z., December 11, 1914.

CIRCULAR No. 62:

To all concerned.—Effective at once, with the approval of the Governor, the charges for interments is increased from \$2 to \$3.

CHAS. F. MASON,

Chief Health Officer.

Rates at Hotel Aspinwall for Supper, Lodging, and Breakfast.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER,
BALBOA HEIGHTS, C. Z., December 9, 1914.

A rate of \$1.50 for supper, lodging and breakfast at the Hotel Aspinwall has been authorized. The daily rate will remain the same and this rate of \$1.50 is intended to apply to patrons who come over on the afternoon boat, stay over night, and return the next morning.

Wm. R. GROVE,

Chief Quartermaster.

Checking Colon Baggage on Boat Tickets.

THE PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,
BALBOA HEIGHTS, C. Z., November 30, 1914.

To all concerned.—Effective at once, employes holding tickets purchased for passage through the Canal will be allowed to check the usual allowance of baggage by rail from Panama to Colon upon presentation of such tickets. Should they also present steamship transportation, their baggage can be checked to the dock as has been customary in the past.

C. H. MOISETT,

Superintendent.

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 308, on Wednesday, December 30, 1914, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

By direction of the chairman of the board.

F. M. NIXON,

Recorder, Board of Local Inspectors.

COMMISSARY DEPARTMENT.

Christmas Fruit Cakes.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

CRISTOBAL, C. Z., December 10, 1914.

To COMMISSARY STOREKEEPERS:

One dollar fruit cakes for Christmas will be ready for sale on and after December 20, 1914.

Please advertise this fact at once, and begin taking orders for delivery on and after that date, so as to be able to phone this office approximately what your requirements will be. Your first order should be phoned to this office on December 19, 1914.

By direction of the Chief Quartermaster.

BENJ. L. JACOBSON,
Depot Commissary.

Sale of German Binoculars.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

CRISTOBAL, C. Z., December 11, 1914.

To COMMISSARY STOREKEEPERS:

The Panama Canal has turned over to this depot to be sold to whomever desires to purchase them, a surplus stock of German binoculars in leather cases supplied by the C. P. Goetz American Optical Company of New York City, of which six are still on hand in the wholesale hardware section.

These glasses are priced at \$16.25, and are described, as follows:

"Plain lens (not prismatic), independent adjustable eye piece in each barrel; no in-and-out motion of inner barrel; carrying eye piece to be adjustable for space between eyes; to magnify six times."

Please bring this circular to the attention of your customers and advise them that they can secure glasses through you or by sending money order, payable to the commissary cashier, to this office direct.

BENJ. L. JACOBSON,
Depot Commissary.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m., on Saturdays and sailing days of Panama railroad vessels.

Cold Storage Prices.

The following retail prices of cold storage provisions will be effective December 17:

FRESH MEATS.

No changes in prices of fresh meats since last week.

Proposals for Plumbing, Barracks "I" and "K", Balboa Dump.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER,

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., December 23, 1914, and then opened for furnishing the necessary labor for installing plumbing in Army Barracks "I" and "K," Balboa Dump, in accordance with drawings of these buildings which may be seen upon application to the Architect, Balboa Heights, C. Z. This work must be done to the satisfaction of the Constructing Quartermaster or his representative. Any further information relative to specifications, etc., may be obtained upon application to the office of the Constructing Quartermaster, Room 266, Balboa Heights.

Separate bid should be submitted for each house, but one bidder may bid on both buildings.

Bidders should state in their proposal the time in which they propose to complete this work.

The Government reserves the right to reject all bids. Bids must be accompanied by \$75.

Bids should be marked "Proposal for plumbing, Barracks "I" and "K," Balboa Dump."

WM. R. GROVE,
Chief Quartermaster.

Proposals for Carpentry Work, Houses 753 and 756, Balboa.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., December 21, 1914, and then opened for furnishing the necessary labor to complete the interior carpentry work in houses Nos. 753 and 756, Balboa. This work must be finished in accordance with detail drawings which will be furnished the contractor, which drawings will be the same as have been used in finishing the houses previously completed at Balboa of the same type. These drawings may be seen upon application to the Architect, Balboa Heights. The work must be equal to that done in the other houses on Balboa Flat and must be done to the satisfaction of the Constructing Quartermaster or his representative.

Bidders should state the time in which they propose to complete the work.

Separate bid must be submitted for each house, but one bidder may bid on both houses.

Bids must be accompanied by \$50.

The Government reserves the right to reject all bids. Bids should be marked "Proposal for carpentry work, Houses 753 and 756, Balboa."

WM. R. GROVE,
Chief Quartermaster.

SHIPPING INFORMATION.

January Weather Probabilities.

Based on the records at Colon and Ancon for the past seven years, the following weather conditions may be expected to prevail at the canal entrances during the month of January: Predictions for the month of December were published in THE CANAL RECORD of November 11.

Winds.—January is normally a dry season month. Fresh northerly trade winds will prevail. There will be an increase in the average wind velocity on both coasts, compared with December conditions. The average hourly velocity on the Atlantic side should be about 14 miles per hour. North and northeast winds will prevail. The maximum velocity may not be expected to exceed 35 miles per hour.

The prevailing winds at the Pacific entrance will be from the northwest. The average wind velocity should be about nine miles per hour, and the maximum velocity may not be expected to exceed 30 miles per hour.

Rain.—Although January is normally a dry season month, occasional light showers may be expected. Rainfall during the month is usually heavier on the Atlantic side than at the Pacific entrance. The average January rainfall has been 3.97 inches at the Atlantic entrance, and 0.95 inches on the Pacific side.

Sixteen days with rain may be expected on the Atlantic side and seven on the Pacific. The average number of days with heavy rain (one inch or more) has been one on the Atlantic side, while no heavy rains may be expected at the Pacific entrance to the Canal.

Fogs.—No fogs may be expected during the month at either Canal entrance. The average number of nights with fog over the Culebra Cut section of the Canal has been eight. Most of these fogs are light, and as practically all of them lift or dissipate before 8.30 a. m., they will not affect the navigation of the Canal under present operating conditions.

Temperature.—There is little change in average air temperature on the Isthmus from month to month. The average temperature in the shade should be about 80 degrees Fahrenheit on both coasts. The extreme maximum may not be expected to rise above 93 degrees Fahrenheit, nor the minimum to fall below 63 degrees Fahrenheit. The mean daily range is approximately seven degrees Fahrenheit at the Atlantic entrance, and 18 degrees Fahrenheit on the Pacific side.

Barometric pressure.—Barometric readings on the Isthmus are almost uniform from day to day. Changes in pressure are very slight, except for the regular well marked diurnal fluctuations characteristic of tropical regions. For this reason local barometric readings are practically valueless in forecasting weather conditions. As a rule, barometric readings run slightly higher in the dry season than during the rainy season months.

The average sealevel pressure should be about 29.88 inches. The maximum reading during the month may not be expected to exceed 30.04 inches, nor the minimum to fall below 29.70 inches.

Storms.—No severe general storms may be expected during the month, although the so-called "Northerners" occasionally reach as far south as the Atlantic entrance to the Canal during the period from November to April. These storms are characterized by steady, brisk, northerly winds ranging in

velocity up to 30 miles or more per hour. The winds alone are of insufficient force to constitute a hindrance to navigation at the Atlantic entrance, but they are usually accompanied by a heavy sea that may prove troublesome at times outside the breakwater.

Fair weather may be expected at the Pacific entrance to the Canal, with smooth to moderate seas.

Tides.—Tidal fluctuations need not be considered in navigating the Atlantic entrance to the Canal, as the average tidal range is less than one foot, and the extreme range approximately two feet.

The average tidal range at the Pacific entrance is about 13 feet, while the maximum range may reach 20 feet. Panama tide predictions for the next six weeks are given below.

Tide Predictions.

Panama tide predictions for the next six weeks are given in the following table:

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 15° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.). All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15 47 is 3.47.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls, or the purchase of supplies, may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

It is advisable that deposits be made somewhat in excess of the anticipated charges, to cover minor charges which may not have been anticipated, such as pilotage and towage. Pilotage is at the rate of \$1 per foot of maximum draft, but is not charged on a vessel which makes the transit of the Canal without taking on or discharging freight or passengers in a terminal port. Tug service, which is at the rate of \$15 per hour, will not be charged on vessels of less than 15,000 gross tonnage.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone,

Isthmus of Panama.

NOTES OF PROGRESS.

Lock Entrance Caisson Accepted.

The lock entrance caisson, which arrived from the yards of the contractor, the Union Iron Works of San Francisco, in tow of the tug *Hercules*, on October 29, has been accepted on the part of The Panama Canal. Structurally and mechanically it was found to be in accordance with the specifications; there were, however, some features of the electrical system that required correcting.

The caisson was placed in position against the sill at the lower end of the east lock at Miraflores on the morning of December 7, and fitted satisfactorily; the leakage, with the sill dry and with a full head on the outside of the caisson, was negligible. The leakage in the lock pit, principally due to cylinder valves from the twin lock chamber, which was in use during the time of the test, exceeded anticipations, but this trouble can be easily remedied.

Of the four pumps with which the caisson is equipped, three draw directly from the sump and are available only until the water reaches one foot above the lock floor, at which level the miter sill of the gate acts as a dam to keep the water in the chamber. The fourth pump is provided with an extension suction going into the lock chamber to remove the last foot of water. The performance of the pumps was regarded as satisfactory.

The contractor has given bond of \$10,000 that the bitumastic covering on the caisson will stand for five years.

Permanent Wrecking Organization.

The operation of the new floating cranes *Ajax* and *Hercules* will be placed under the jurisdiction of the Mechanical Division, in conjunction with the railroad wrecking outfit, and the whole will constitute a general wrecking organization with the following positions: One wreckmaster; an assistant to the wreckmaster, who will ordinarily be in direct charge of the railroad wrecking outfit, but will also act as substitute on derricks during the absence of the wreckmaster, or in charge of the second derrick when both are in use; one engineer; two electricians, and six laborers, the

latter to work as oilers and firemen when the derricks are in service.

As soon as the floating derricks have been turned over to The Panama Canal, one of them will probably be stationed at Gamboa, and the other at Paraiso. The derrick at Paraiso will facilitate hoisting spuds and other heavy weights of the dredging equipment in the Cut. In case a slide or a saucer vessel should obstruct the Cut, the derrick stationed at Gamboa would be manned to meet any emergency north of that point. So long as the Canal is open, either or both derricks may be used at any point, but as a matter of economy only the one at Paraiso (which will doubtless be transferred to Balboa when work in the Cut ceases) will be fully manned. The other will have only a sufficient crew for keeping it in good condition.

Sodding and Planting.

In connection with landscape work in the permanent towns, it is planned to have the forces of the Division of Municipal Engineering do the necessary grading, complete the top soil and sodding, and to perform a limited amount of planting around public buildings and quarters, along streets, and in park areas. Following this, the maintenance work will be turned over to the Supply Department to be handled by forces of the district quartermasters. In line with this plan, the horticulturist, Mr. Otis W. Barrett, was transferred from the Division of Municipal Engineering to the Supply Department on December 15. The municipal engineering forces are now at work sodding the areas around the Administration Building. Crab grass, obtained from Las Sabanas, is being used. This species does not grow upward, but spreads over the ground forming a perfect mat. A good example of sodding with this grass is found in Mount Hope cemetery.

Manganese Steel Dippers in Use on Dredges "Gamboa" and "Paraiso."

Two manganese steel dippers of 10 cubic yards capacity and weighing 37,627 pounds each, for use on the big dipper dredges *Gamboa* and *Paraiso*, were received a short time ago. These dippers were manufactured by the Edgar Allen American Manganese Steel Company of Chicago, for the contractor, the Bucyrus Company of Milwaukee; are known as the Missabe type, and are said to be the largest ever produced from manganese steel. This metal is used throughout, with the exception of the bolts, nuts, and rivets. The overall dimensions of the dippers are 10½ by 9 by 9 feet; the lips are three and one-fourth inches thick underneath the teeth, one and one-half inches thick between the teeth, and three and one-fourth inches thick at the bottom band; the backs are one and one-fourth inches thick at the sides, and three and one-fourth inches thick at the bottom bands.

The body of the dipper consists of only two

pieces, the front and back castings, and the whole contains but few rivets, as compared with a dipper of the built-up type. The lip joints at the sides are designed to give rigidity to the dipper and to relieve the rivets from strain. The strain is still further decreased by shoulders or offsets. The bail brackets are attached to the front casting at an angle conforming to the line of the pull on the bail, which throws the strain of the pull directly on the front casting.

The contract price for the two dippers was \$9,240, plus transportation, which amounted to \$739.78. Two 10-cubic yard dippers of the built-up type cost, delivered at Colon, \$9,600. The manganese dippers are now in constant use by the Dredging Division and so far have given satisfaction.

New Services Operating via The Panama Canal.

The Pacific Coast lumber-carrying firm of Swayne and Hoyt, organized in 1863, with headquarters at San Francisco, is operating a service through the Canal on an irregular schedule. It has six vessels in its service, the *Alvarado*, built in 1913, having a length of 240 feet, gross tonnage of 1,383, lumber carrying capacity of 1,200,000 board feet, and accommodations for 46 passengers; the *Camino*, built in 1911, having a length of 291 feet, gross tonnage of 3,303, lumber carrying capacity of 2,500,000 board feet, and accommodations for 87 passengers; the *Navajo*, built in 1911, having a length of 253 feet, gross tonnage of 2,755, lumber carrying capacity of 1,700,000 board feet, and accommodations for 30 passengers; the *Paraiso*, built in 1912, having a length of 214 feet, gross tonnage of 1,383, lumber carrying capacity of 1,200,000 board feet, and accommodations for 46 passengers; the *Yellowstone*, purchased from W. S. Spaulding and Company, built in 1907, having a length of 188 feet, gross tonnage of 767, and a lumber carrying capacity of 800,000 board feet; the *Edgar H. Vance*, a chartered vessel, built in 1913, having a length of 290 feet, gross tonnage of 2,521, and a lumber carrying capacity of 2,200,000 board feet. Of these vessels, the *Camino* and *Edgar H. Vance* have so far used the Canal, plying between Californian ports to ports in eastern United States. The *Camino* was recently chartered by the San Francisco Chamber of Commerce as that city's relief ship for the Belgian sufferers, and is scheduled to leave for Rotterdam via the Canal, some time this month.

The Isthmian Steamship Company, of San Francisco (the Maple Leaf Route), will hereafter operate its ships in conjunction with those of the Hall line, owned by the United States Steel Products Company. The Isthmian Company formerly operated its vessels from New York and Savannah to British Columbia ports via the Strait of Magellan, making stops at South American ports; en

route. All the voyages formerly made on that route will now be made through the Canal to ports in the United Kingdom and the Continent, usually Swansea and Avonmouth, England, and Dunkirk, France. The ships of the Isthmian Steamship Company's fleet are the *Santa Rosalia*, *Buenaventura*, *Kentra*, and *San Francisco*; the vessels of the United Steel Products Company are the *Charlton Hall*, *Craster Hall*, *Crofton Hall*, and the *Ilcewick Hall*. Of these ships, the *Santa Rosalia*, and *Buenaventura*, and all of the Hall boats mentioned have used the Canal at least once. The United Steel Products Company is able to operate with practically full cargoes each way, carrying foodstuffs on the outward bound voyage and loading with nitrates, copper, etc., at Chilean ports for the return trip.

New Schedule for Dispatching Mail.

In view of the changes in sailings of the Panama railroad steamers, and of the inauguration of a weekly service to New York, via Havana, by the United Fruit Company, dispatches of mail to the United States will be made hereafter by the Cristobal post-office, as follows:

On Thursdays, mail will be dispatched to New Orleans, for all States, by the United Fruit Company's steamers sailing direct. This mail is due to arrive in New Orleans on the following Tuesday.

On Saturdays, mail will be dispatched to New York, for all States, by the Panama railroad steamships, due to arrive in New York on the following Friday, with the exception of the *Advance*, which is not scheduled to arrive until the following Saturday.

On Mondays, mail will be dispatched to New York, for all States, with the exception of Louisiana, Mississippi, Arkansas, and Texas, by the United Fruit Company's steamships sailing via Havana. This mail is due to arrive in New York on the following Monday. Mail for the four States above-mentioned will be held for Thursday's New Orleans dispatch. A direct dispatch to Havana will also be made by the Monday steamers.

The United Fruit Company sailings on Monday, January 11, February 8, March 8, and April 5, have been set for 10 a. m., and the ships are not due in New York until Tuesday of the following week; therefore, dispatches of mail on these dates will be confined to the New England States, New York, Pennsylvania, Delaware, District of Columbia, Maryland, Virginia, West Virginia, New Jersey, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, Minnesota, the Dakotas, Iowa, Montana, Wyoming, Idaho, Washington, Oregon, and Northern California. Mail for the States not listed above will go by way of New Orleans.

Lease of Lots in the Canal Zone.

Effective January 1, 1915, an annual ground rental will be charged for all lots leased to individuals and companies in the Canal Zone, including employes of The Panama Canal and the Panama Railroad Company. The only exception made to this rule will be in the case of lots assigned to church societies. A committee, consisting of Judge Frank Feuille, Maj. Wm. R. Grove, and Mr. Geo. M. Wells, has been appointed to submit its recommendation as to the rental to be charged when applications for lots are received and approved. The rentals are to cover cost of street improvements, outside lighting, fire protection,

etc., and must be sufficient to reimburse The Panama Canal for any outlay connected with the occupancy of lots that may be leased. The committee has only one application before it at the present time, that of the Masonic order, which has applied for the lease of Lot C at Ancon.

Contract for Lumber.

A contract was entered into with W. R. Grace and Company on November 23, 1914, for the following quantities of lumber:

500,000 board feet of Douglas fir ceiling lumber at \$19.40 per thousand feet.

200,000 board feet of Douglas fir siding lumber at \$19.60 per thousand feet.

Two spud timbers for dredges, 32 inches in diameter and 65 feet long, fashioned from Oregon fir, at \$380 each.

Royal Mail Discontinues its New York Service Temporarily.

The Royal Mail Steam Packet Company announces that its service to New York has been discontinued temporarily. This also cancels sailings to Kingston, Jamaica, and Antilla, Cuba. The sailings from Colon to England, via Cartagena, Puerto Colombia, Trinidad, and Barbados, will be continued as at present. The *Danube* sailing from Colon on Tuesday, December 22 is making the last trip to Jamaica until further notice. The next sailings for London will be, as follows: *Essequibo*, December 29; *Danube*, January 5; *Tagus*, January 19; *Trent*, February 2.

Steamship "Falk" Goes on a Reef.

The steamship *Falk* of the Seeborg Line, operating out of gulf ports, went aground near Halandis Cays off the mouth of the Rio Diablo on the San Blas coast of Panama, on Tuesday, December 15. The vessel left Cristobal for Puerto Colombia on December 3, and was returning light to Cristobal to load there and at a Central American port, for New Orleans. The Canal tug *Porto Bello* and the United States Navy tug *Potomac* went to its assistance, but owing to the heavy sea running, and to the vessel's hard and fast condition on the reef, they were unable to be of use. A wrecking tug has been sent out from Jamaica to pull the *Falk* off. The agents of the vessel on the Isthmus are The Panama Agencies.

No More Assignments to Quarters at Culebra.

No more assignments to quarters will be made at Culebra, as it is expected that the Twenty-ninth Infantry will be stationed at that point as soon as the settlement can be vacated by Canal employes and the buildings

made ready for the troops. In the plan of moving the employes out of the village and finding quarters for them elsewhere, it is proposed to install plumbing in several of the houses recently reerected at La Boca and use them for gold quarters until such time as the situation becomes less congested. According to present plans, the Twenty-ninth Infantry will be sent to the Isthmus some time during March, 1915.

Steamshovel Work at Sosa Hill on 8-Hour Basis.

Effective Monday, December 21, the four steamshovels working at Sosa Hill were placed on an 8-hour basis, which arrangement will probably continue until the completion of the trestle at the east breakwater.

Two Towers at Darien Radio Station Completed.

The second of the three 600-foot towers for the Darien radio station was completed to its full height on Saturday, December 19. The third tower is now up about 100 feet, and will probably be finished about February 1.

Hotel Aspinwall Notes.

Due to the fact that, under the revised Panama-Balboa train schedule, the train for Balboa docks does not reach there until 9.40 a. m., the launch announced to sail at 9.40 sharp, will not leave hereafter until the train arrives, unless it is unusually late. Passengers for the launch can either take this train at the Panama and Balboa stations, or take the Ancon street cars, which go through to the docks without change.

Heretofore, getting ashore from the launch at the hotel has been dependent on the local boatmen, who make a charge of 20 cents, silver, for the transfer. In order to relieve guests of this extra charge, the hotel management now operates its own boat service.

The prospects are that the hotel will be well filled for the holidays. A number of reservations have been made in advance.

Shipping Information.

The Government hospital service is fully equipped for the treatment of medical and surgical cases. The charge for consultation at the dispensaries is \$3; for hospital treatment, in ward, \$3 per day; in private room, \$6 per day. For American seamen, the charge for treatment in ward is \$1 per day.

Application for supplies, or for services, should be made to the captain of the port, Cristobal or Balboa. Mail, other than registered, and cablegrams for men on ships which will call at the terminal ports, or pass through the Canal, may be addressed in care of the captains of the ports, if desired; or may be addressed to Cristobal or Balboa, general delivery, with the name of the vessel written plainly; or, in case the vessel has a known representative on the Isthmus in care of such representative.

Deceased Employes.

Name.	Check No.	Native of	Isthmian residence.	Employed by	Date of death.
Harvey, Clifford.....	24775	Jamaica.....	Colon.....	Dredging Div.....	1914. Dec. 13.
Jordan, Wilfre I.....	8509	Barbados.....	Colon.....	Panama R. R.....	Dec. 15.

Morgan, James.....	23064	Jamaica.....	Lirio.....	Dredging Div.....	Dec. 17.
Stewart, Robert.....	15314	Jamaica.....	Colon.....	Panama R. R.....	Dec. 16.

The estates of these deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against their estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

OIL LICENSE TO TERMINATE.

Contract By Which Union Oil Company Has Supplied Fuel Oil to Canal Ends December 31.

The Panama Canal has served notice on the Union Oil Company of its desire to terminate, on December 31, 1914, the revocable license under which the oil company has been operating its pumping plant and oil pipe lines on the Isthmus. As a result of bids recently received from eleven oil companies, for deliveries of fuel oil during 1915, recommendations for award of contract have been forwarded to the Washington Office, and it is expected that a shipment of two 60,000-barrel cargoes, one for each terminal, will be delivered on the Isthmus between January 10 and 25. A short time ago one of the two new oil tanks erected by The Panama Canal at the Pacific end was leased to the Union Oil Company on condition that it was to be emptied and returned upon request. The oil company has been asked to empty this tank on or before December 31; to fill all of the Canal tanks on the Isthmus to their capacity under the present agreement by that time, and to quote a price on any oil that might be required pending the arrival of the Canal shipment, same to be covered by a special open market contract.

The revocable license, under which the Union Oil Company constructed, and has since operated and maintained a pipe line and appurtenances across the Isthmus in the Canal Zone, was given by the President on January 10, 1906. It provided that the company should pay into the treasury of the Canal Zone, the sum of \$500 a month for the support of the public schools, and to furnish to the Isthmian Canal Commission and Panama railroad such crude oil as might be required at the rate of 90 cents a barrel. On April 1 1909, this license was amended by doing away with the monthly payment of \$500, by exempting the company from all forms of taxation in the Canal Zone during the life of the agreement, by fixing the price of oil at \$1.10 a barrel, instead of 90 cents, and by limiting the takings to 60,000 barrels a month. The consumption of oil so increased

that, on February 17, 1911, it was found necessary to enter into a supplemental agreement providing for an increase in the monthly consumption to 100,000 barrels. This agreement further provided for a distillation test to determine the water content. An extension of this agreement was authorized on April 1, 1913, and again on July 1, 1914 to continue until the end of the present year.

The first deliveries of oil by the company were made in August, 1906, but the pipe line across the Isthmus was not completed and in operation until November, 1907. The smallest takings in any one year was in 1908—154,817 barrels—and the heaviest in 1912—913,723 barrels.

The Union Oil Company plans to continue storage of oils on the Isthmus under a new revocable license, in the same manner as other oil companies who have been granted revocable licenses for tank sites at the Canal terminals. The transisthmian pipe line of the company will be taken up.

Sale of Cruces Schoolhouse.

The old schoolhouse at Cruces on the Chagres, the only remaining building in the place when Gatun Lake was allowed to rise to the 85-foot level, causing abandonment of this historic village, has been sold to Marcelino Murgues for \$25. It was built by the Canal Zone Government during the latter part of 1910, and consisted of a 1-story frame building, 36 feet long by 24 feet wide, divided into a class room 24 by 28 feet, and a living room for the teacher eight by 24 feet. At the time the schoolhouse was erected, a census showed the number of children of school age in the town to be 51.

Reduced Price of Fuel Oil to Steamships.

The Balboa agency of the Union Oil Company of California announces that fuel oil delivered on steamships at Balboa, reduced to a temperature of 60 degrees Fahrenheit, will be sold at \$1.25 per barrel until further notice. The company expects to be in a position to supply ships with Diesel engine oil at Balboa after January 15, 1915.

SWINGING PONTOON BRIDGE.

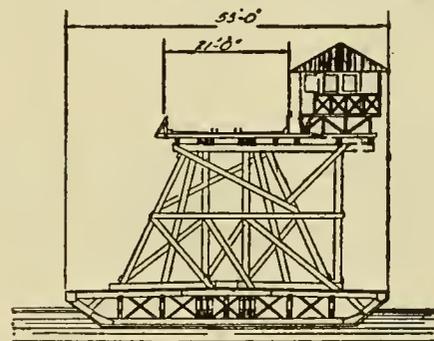

Construction and Mode of Operation of Bridge Across Culebra Cut at Paraiso.

The pontoon bridge at Paraiso, over which the railroad crosses the Canal, is similar to bridges which have been used successfully for many years in crossing the upper Mississippi River. The details of its construction were worked out for local conditions by Canal engineers, who were assisted greatly in the preparation of the design by plans of the Prairie du Chien, Wis.—North McGregor, Ia., pontoon bridge, furnished by Mr. C. F. Loweth, chief engineer of the Chicago, Milwaukee, and St. Paul Railway Company.

In order to afford a clear channel of 300 feet at the crossing, which is the minimum proposed width of the Canal, the abutments for the approaches to the bridge were set in recesses dug back from the original sides of the Cut. Another recess was dug in the east bank of the Canal, south of the abutment, to contain the barge, clear of the Canal channel, when it is in the open position.

The movement of the pontoon is like that of a simple gate or door, describing a quarter of a circle. Its pivot, or hinge, is at the north corner of its east end. The closed position is when the barge lies directly across the Canal, and opening is effected by swinging it to the south on its pivot.

The general assembly of the bridge is shown in the accompanying sketch of its longitudinal elevation. The pontoon is 378 feet long, 55 feet wide, and six feet three inches

SECTIONAL VIEW OF PONTOON BRIDGE.

deep at the center line. It was built of heavy timbers, with transverse frames, spaced every 24 inches, of four by 12-inch floor and rake timbers and deck beams four by 10 inches. At intervals of 14 feet there are trussed frames, consisting of three ordinary frames bolted together and braced with steel rods. The bents of the trestle rest on these special frames.

Six longitudinal bulkheads of eight by 16-inch timbers extend the length of the pontoon. A pumping system was provided for the removal of bilge water. The deck, of three by 10-inch timbers, and the sheathing, of four by 10-inch timbers, were calked and pitched. The deck is to be covered with an asphalt coating.

The trestle bents, spaced 14 feet apart, consist of a sill of 12 by 14-inch timber, 40 feet long, and six 12 by 12-inch posts, surmounted by caps 18 feet long and 12 by 14 inches in section. The outer and intermediate posts are heavily battered, in order to distribute the weight over the width of the barge, and ample transverse bracing is provided.

The trestle is designed, in addition to its primary service, to act as a stiffening truss

for the pontoon, in conjunction with a longitudinal chord of heavy timbers at the bottom of the barge. The track stringers, of which there are three on either side, two 10 by 16, and one eight by 16 inches in section, are fitted with splice plates, to form a continuous chord. Additional longitudinal stiffness in the pontoon was provided by horizontal girts, and bracing of timber.

The base of the rails on the approach piers is at 113.5 feet above sealevel, and the trestle was built to give a moderate upward gradient from the piers at high lake levels. The base of the rails on the trestle is four feet higher than the piers, or at 117.5 feet when the water in the Cut is at the 87-foot level and there is no live load on the barge. The passage of a train sinks the barge from six to nine inches.

The devices for effecting rail connection between the trestle and the piers were made a part of the trestle. They consist, at each end, of an apron hinged near the end of the trestle, and extending to rest on the shoulder of the pier. Each apron is made of two spare girders for the lock gates, is 65 feet long, and weighs, equipped complete with the track, about 150,000 pounds. When the bridge is to be opened, the aprons are raised clear of the abutments. They are held up until the bridge has been swung to closed position, when they are lowered to rest again on the piers.

OPERATING MECHANISMS.

The raising and lowering of the hinged aprons is done by means of a heavy toggle-joint device. The mechanism is attached to the under side of the apron. When the apron

joint is locked by transverse bars, passing through holes in the base casings and the hinged section. When the bridge is to be opened, the bars are withdrawn and the hinged casting is swung up, clear of the approach, by a counterweight. The movements of the counterweights and locking bars at both ends of the trestle are actuated simultaneously by a single lever in the control house, connecting through signal pipe.

The entire pontoon is swung on its pivot by means of a wildcat and chain. The wildcat is situated at the outer, or west, end of the pontoon, and by drawing the chain over its toothed wheel, causes the end of the pontoon to follow the line of the chain. The chain extends from a point about 50 feet north of the west abutment to one about 350 feet south of the abutment on the east bank, thus roughly subtending the arc described by the swinging of the outer end of the barge. The chain is carried to the barge through chocks, under idlers, over the wildcat wheel, and off of the barge through similar idlers and chocks. It is 800 feet long, consequently, as motion of the barge can be effected only by tension on the chain on the side toward which the barge is swinging, there is always plenty of loose chain on the lee side; this lies on the bottom of the Cut and offers no interference with ships. The chain is fastened to the banks through springs, which take up the shock at the time of starting or stopping. The 1-inch chain has links approximately five inches in length, and was made up of various lengths of chain in stock, the wildcat being especially designed to work with varying lengths of links.

than in the center, exposing a convex surface toward the vertical pipe.

When the bridge is closed it is locked at its outer end by means of an adaptation of the ordinary car coupling. The part of the coupler on the barge is as usual, but the part fixed to the west abutment is a vertical casting, 10 feet long, which can thus be engaged by the other while the water in the Cut is at any ordinary level. An air baffle has been provided at the outer end of the barge to take up the shock at the time the barge comes to rest against the coupler.

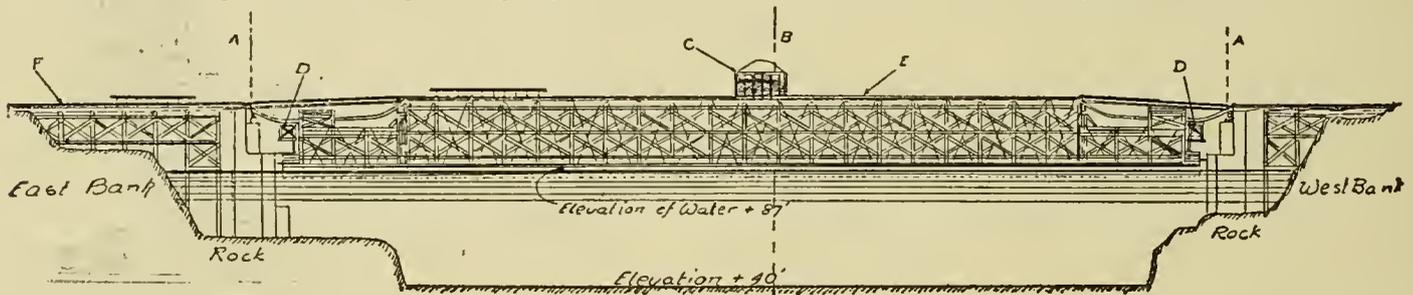

The operations of the motors for swinging the pontoon and raising the aprons are controlled from the operator's house, on the north side of the trestle, near the center. The operator also controls, by manual levers, the signals and derails governing the approaches.

Awards for Plastering Houses.

Bids for plastering houses Nos. 753 and 755, new permanent quarters at Balboa, and the Balboa commissary, were opened in the office of the Chief Quartermaster on Tuesday, December 1. Five proposals were received. That of Messrs. McCall and Sullivan for \$2,180 was the lowest on the quarters, and award of the work has been made to them. No award for plastering the commissary was made.

Stenographer and Typewriter Examination.

An examination will be held for the position of stenographer and typewriter, The Panama Canal Service, in Room 303, Administration Building, Balboa Heights, probably on Sunday, January 31, 1915.

SIDE VIEW OF PONTOON BRIDGE.

KEY—A—Center of apron girder bearing. B—Canal axis. C—Operating house. D—Mechanism for lifting apron. E—Elevation at base of rail + 117.25 feet. F—Elevation at base of rail + 113.5 feet.

is resting on the abutment, in its closed-bridge position, and it is desired to raise it, the toggle mechanism is drawn to its contracted position. Timber blocking is then built up from the deck to the base of the toggle, and a pull being then applied to the knuckle of the toggle causes the device to straighten. The resultant thrust pushes down on the blocking and upward on the apron, causing the latter to rise. Consideration is now being given to a plan by which the blocking now built up by hand under the lifting mechanism will be replaced by hydraulic jacks. The knuckle is moved through the instrumentality of a 7-horse power motor driving a worm, worm wheel, pinion, and spur gears. The motors for the two aprons were originally samples for the operation of the cylindrical valves in the lock wall culverts.

When the apron is lowered to the abutment, the rail connection is secured against lateral or vertical motion. This is effected by a rail section casting, hinged on the apron end and fitting against the rails in diagonal scarf-joints. The whole is made secure in heavy fixed castings. In closed position, the

The wildcat wheel is 24 inches in diameter. It is driven by a worm and worm wheel direct-connected to a 50-horsepower motor, which was originally submitted as a sample for use with the Stoney gate valves of the lock culverts, the worm and wheel being spare parts for the emergency dams. The arrangement is capable of swinging the bridge from open to closed position, or the other way, in about eight minutes. The tension on the chain when the barge is being swung against the maximum wind pressure is about 20,000 pounds.

The pontoon is hinged, at its southeast corner, to the east abutment by a vertical steel pipe, 18 inches in diameter, set in the concrete of the abutment, and enclosed by a steel hinge, with a bronze bushing, attached rigidly to the barge. The fit is loose enough to allow free vertical motion with the fluctuations of the water surface. The horizontal twisting on the hinge, liable to result from the effects of waves on the barge, is cared for by giving the inner face of the bushing a toric surface; that is, by making the diameter of the enclosing hinge greater at top and bottom

Application forms may be procured from the secretary of the local board and must be filed out and filed with this board not later than January 8, 1915.

An examination for the position of clerk, The Panama Canal Service, will be held in the near future, the exact date to be published in a later issue of THE CANAL RECORD.

Application forms for the clerk examination may be procured at once and filed with this board as soon as completed.

ISLTHIAN CIVIL SERVICE BOARD.

BALBOA HEIGHTS, C. Z.,

December 21, 1914.

Work of Abandoning Ancon Hospital Farm Begun.

The removal of the pigs belonging to Ancon Hospital, from the stock farm on the hospital reservation, to the new piggery at Corozal was effected last week, which is the first step taken in abandoning the Ancon location. The work of removing the dairy cattle will probably take place some time in January.

A bicycle parcel delivery service has been started at the Ancon commissary.

CANAL WORK IN NOVEMBER.

Monthly Report of the Governor to the Secretary of War.

BALBOA HEIGHTS, C. Z., December 16, 1914.
The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of November, 1914:

Department of Operation and Maintenance.

Lock Operation and Maintenance—Two towing locomotives were received, making a total of 40 to the end of the month. This completes the order for lock equipment of this class. The installation of chain fender machines at all locks was completed. Of the 24 fender chains ordered, 20 have been received; all chains at Gatun, seven at Pedro Miguel and two at Miraflores have been installed. The floating caisson is undergoing final test at Miraflores. The work of grading the dams and backfill at Pedro Miguel and Miraflores was continued. Eighty-nine lockages were made at Gatun, 86 at Pedro Miguel, and 85 at Miraflores.

Electrical—The net output of the Gatun hydroelectric station was 619,200 kilowatt hours; of the Miraflores steam station 1,811,620 kilowatt hours, and of the Balboa power plant 3,563 kilowatt hours. The Balboa and Miraflores substations were completed, tested, and put into service. The Gatun and Cristobal substations were practically completed. Work was continued on the construction of the underground conduit systems and on new and reconstructed quarters. The east side of the 44,000-volt transmission line between Miraflores and Balboa substations was put into service.

Municipal engineering—In addition to maintenance work in the northern and southern districts, work was in progress on the installation of water and sewer systems and the construction of a water supply system for the military reservation at Toro Point; installation of a sewer system for the quarantine reservation at Balboa dump; construction of the Atlantic and Pacific terminal oil handling plants, and the construction of a sea wall for the Panama Railroad Company at Folks River. All landscape work in connection with Balboa townsite and Balboa Heights was turned over to this division on November 1.

Meteorology and hydrography—Rainfall was below normal at all stations, except Balboa and Pedro Miguel. The deficiencies were greatest in the central section and over the upper Chagres basin. The monthly totals ranged from six inches at Empire to 19.58 inches at the station on the Gatun River above Monte Lirio. The maximum precipitation recorded in any one day was 3.77 inches at Colon on the 13th. The estimated average rainfall over the Chagres River basin figures 44 per cent below normal, or 11.01 inches against a 14-year November average of 19.50 inches. Slight seismic disturbances were recorded at Balboa Heights on November 18 and 24; they were of insufficient intensity to be felt locally and no damage resulted from them.

Division of Terminal Construction.

PACIFIC TERMINALS.

Shops—Work requests were prepared for the manufacture and erection of partitions in Building 28, and for the changing of lights in Building 4 to prevent crane interference.

Dry dock—The design of all portions of the

dock not previously approved was decided upon. Contractor's drawings for the girders supporting the track around the dock for the 50-ton crane and for the deck beams over the suction chamber were completed, and requisition was made for the fabrication of this material in the United States. A total of 10,027 cubic yards of concrete was placed.

Balboa coaling plant—Two hundred and eighty-two cubic yards of concrete were placed in the berm crane track supports and 43 cubic yards were placed for the viaduct basin running along the south rail of the berm crane, making a total of 325 cubic yards for the month.

Quay wall and pier—Excavation from the cylinders amounted to 288 cubic yards, the greater portion of which was rock. Concrete filler in the caissons was increased by 677 cubic yards. Eleven cubic yards were placed in the substructure for anchoring beams and 1,352 cubic yards in the reinforced concrete floor slab. Work on pier No. 1 was confined chiefly to painting bollards and general cleaning up.

Fuel oil plant—Excavation progressed slowly, due chiefly to the fact that the mud has been scraped off the bottom at this site, allowing water to percolate through the layer of sand surrounding the caissons and making it extremely difficult to seal the caissons at the bottom. Four of the six caissons were placed on rock.

Sosa Hill quarry—Excavation totaled 92,690 cubic yards, all of which was classified as rock.

ATLANTIC TERMINALS.

East breakwater—In the construction of the trestle for the fill 183 untreated piles were driven. The total fill in place at the close of the month was 240,687 cubic yards.

Coaling plant—Dredging was completed to elevation -28 in the area to be occupied by subaqueous coal storage. The filling of pipe piles and forms for viaduct posts in loops at the south end of the plant was commenced. Concrete pedestals were set on bridge track wall for steel tees under the stocking and reclaiming bridge tracks. At the end of the month only 19 caissons remained to be filled to complete the foundations for the southern 500 feet of the reloader wharf.

FLOATING CRANES.

The *Ajax* and *Hercules* were dry docked in the upper chamber of the east flight at Gatun Locks, where the underwater portion of the hulls was cleaned and painted.

Ajax—After the dry docking was completed the cast iron counterweights were placed upon the spindle carriage, in order to prepare the crane for immediate service in raising the drill barge *Teredo*, sunken several months ago in Culebra Cut. After completing this work satisfactorily the crane was returned to the contractor on November 24, and during the remainder of the month work consisted of doing various small jobs and making adjustments. At the close of the month the crane had not yet been offered for test.

Hercules—This crane was brought to Gatun Locks on November 4 for attachment of the jib. The jib was completely assembled on the crane structure by November 8 and, after the dry docking referred to above, the crane was returned to dock No. 13, where the wire ropes for both main blocks were put in place and all parts of the test load were received.

Division of Terminal Construction.

Ninety-five vessels passed through the Canal

in November, 57 southbound and 38 northbound. Collections for tolls amounted to \$349,382.15; for pilotage \$2,208; for launch service \$67.50; for service of deck hands, etc., \$444.90, or a total of \$352,102.55.

Fifteen vessels were measured and 60 inspected to see that their certificates conform to the rules.

Several of the slides which developed during October continued during the month but, with the exception of a few days, it was possible to maintain a channel of sufficient width and depth through the Culebra Cut for the accommodation of Canal traffic.

Dredging Division.

The total dredge excavation for the month, including earth, rock, sand, and gravel, was 1,173,722 cubic yards, as follows:

	Cu. yds.
Pacific entrance	61,944
Pacific terminals (inner harbor)	288,472
Culebra slide	5,930
New Culebra slide	484,697
Empire slide	490
Balboa (P. R. R. steel wharf)	1,207
Atlantic entrance	13,424
Cristobal coaling plant	30,039
Breakwater, Limon Bay	30,366
Cristobal approach channel	168,183
Cnagres river gravel	50,950
Other plant excavation	58,020

Total 1,173,722

The destruction of water hyacinths continued; 19,200 square yards of plants were poisoned and 2,450 square yards were pulled and piled on the bank. No new slides developed during the month.

Mechanical Division.

The general character of the work in this division was about the same as that for the previous month, with a further reduction in volume resulting in a net decrease in force of 38 gold roll and 198 silver roll employees.

Shop orders authorized during the month numbered 678; those left over from the previous month, 432; those completed during November, 726; carried forward into December, 384. The output of the foundry was 117,302 pounds of iron, 37,024 pounds of steel, and 4,503 pounds of brass. Hostling was done on 5,330 pieces of equipment. Shop repairs were made on 1,235 cars, and field repairs on 5,434.

With the consent of the contractor, the floating crane *Ajax* was taken to Culebra Cut and there removed the sunken portion of the rock drill barge *Teredo*. During the time the *Ajax* was under the supervision of this division, its machinery functioned very satisfactorily.

Building Division.

The Building Division was created on October 1, 1914, as a part of the organization of the Department of Operation and Maintenance, and is in charge of Captain R. E. Wood as Constructing Quartermaster. This division is charged with all work of construction and repair of buildings of The Panama Canal and the Panama Railroad Company, exclusive of minor repairs costing less than \$50, as well as all building construction for the United States Army.

The principal operations of this division during the month were, as follows: Construction work on the Colon radio station was completed, and the substation at Cristobal was completed and turned over to the Electrical Division. The work of alteration and conversion of buildings at Empire for the use of the Fifth Infantry was completed during the month, before the arrival of that regiment. The first of a group of buildings for the Corozal dairy farm was completed.

At Balboa, four 4-family houses and four 2-family houses were completed, making a total of twenty-four 4-family and four 2-family houses completed out of the original twenty-eight 4-family and nine 2-family houses authorized. The shops office building and the electrical substation at Balboa were completed during the month and turned over to their respective departments. The police station at Balboa was also completed.

Supply Department.

The force report for the last Wednesday in November showed a total of 26,220 employes of The Panama Canal and Panama Railroad Company, of whom 3,940 were white Americans and 22,280 were laborers. Of the latter, approximately 480 were Europeans and the remainder West Indian negroes. The total force was reduced 482; Americans 175, laborers 307.

The occupants of Government quarters numbered 6,967 white Americans, of whom 3,904 were men, 1,548 women and 1,515 children; 8,140 West Indians, of whom 5,203 were men, 1,256 women and 1,681 children.

The value of the material received during the month was \$769,383.61. It came forward in 25 steamers; the total weight of the cargo, exclusive of lumber and piles, was 17,921 tons. Some of the principal items were: 3,065,125 board feet of lumber for stock and the Mechanical Division, 36,795 linear feet of piles, and 122,000 bags of Portland cement.

Health Department.

General—No case of yellow fever, smallpox, or plague originated on or was introduced to the Isthmus during the month. Forty-four deaths occurred in the Canal Zone. The death rate for disease for the Canal Zone, based upon a population of 36,977, was 12.66 per thousand, as compared with 13.85 for the preceding month and 15.82 for the corresponding month of last year.

Employes—The health of employes continued good. The number of names on the pay rolls for the preceding month was 37,172. On this basis the admission to hospitals and quarters on account of illness, 926, gave a rate of 298.93 per thousand, as compared with 344.23 for the preceding month, and 479.84 for the corresponding month of last year. The admission rates to hospitals for all diseases were: White 308.39, blacks 114.98, Europeans 509.49, Americans 260.53. The admission rates for malaria were: Whites 166.70, blacks 83.02, Europeans 119.24, Americans 177.99. The total number of deaths from all causes was 14. Of these, five died from disease, or 1.61 per thousand, as compared with 4.68 for the preceding month, and 4.89 for the corresponding month of last year. Of the deaths from disease, two were whites, three blacks, one European, and one American.

Accounting Department.

The cash balance in Canal Construction appropriations on November 30 was \$16,032,585.49; in the fortification appropriations \$4,512,816.08. The pay rolls for November, exclusive of Army quarters, storehouses, fortifications, etc., amounted to \$964,227.66, and the fortification roll amounted to \$113,790.56. Payments by the disbursing clerk in Washington amounted to \$856,863.60; by the Paymaster on the Isthmus, \$1,792,137.02. Collections on the Isthmus amounted to \$999,679.11, of which \$459,905.40 were repaid to appropriations, \$188,256.38 were trust funds, and \$351,518.33 were covered into the Treasury as miscellaneous receipts. Of

the miscellaneous receipts, \$349,382.15 were collected on account of tolls, as compared with \$349,986.48 for October. Deposits in the amount of \$139,151.35 were made with the Assistant Treasurer, to be applied in payment of tolls and other charges. Canal Zone revenue collections and miscellaneous funds received amounted to \$225,041.17, and disbursements under the same heading amounted to \$267,796.62.

Executive Department.

Customs service—The work of revision of the customs regulations was completed and the new regulations were published as Circular No. 679, Revised, under date of November 21, 1914.

Administration of estates—During the month of November, 18 estates were received and 11 settled. The total cash received in estates during the month amounted to \$1,089,15, and the total value of estates closed during the month was \$619.95. On November 30, there were 33 estates in course of settlement.

Licenses and taxes—Three hundred and thirty-nine licenses were issued during November. Of this number, 14 were for automobiles and motorcycles, 14 for bicycles, 27 for hunting and the keeping or carrying of firearms, and 284 for the peddling of foodstuffs.

Postal service—Postmasters remitted on account of stamp sales, second-class collections, and postage due collections, \$5,886.17. The money order business aggregated \$355,885.69, and the fees collected thereon amounted to \$1,868.71. Of the total value of money orders issued \$124,697 represent the value of deposit orders issued without fee. Deposit orders to the value of \$59,692 were paid and postal savings certificates to the value of \$81,208 were paid. The balance of postal savings deposits on hand, represented by the unpaid certificates and deposit money orders, aggregated \$740,710, as compared with \$756,913 at the close of the previous month. The new post-office building at Corozal was completed and occupied during the month.

Police and fire division—Three hundred and fifty-six arrests were made during the month. Of these, 340 were males and 16 females, a decrease from the previous month of 139 and seven, respectively. Sixty-three convicts were confined in the penitentiary at the close of the month. Nine persons were deported; of this number, six were convicts who had completed their sentences in the penitentiary. Five fires occurred during the month. The damage to Panama Canal property was less than \$25.

Courts—In the District Court, one civil and eight probate cases were settled; five civil, 20 probate, and 28 criminal cases were filed, and 138 cases of all kinds were pending on November 30. In the Magistrates' Courts, 30 civil and 360 criminal cases were tried.

Schools—The total enrollment in the Canal Zone schools for the month was 1,357 in the white schools and 1,127 in the colored schools. In the white schools the net enrollment was 1,090, the average number belonging 1,113.4, and the average daily attendance 1,084.6. In the colored schools the net enrollment was 2,162, the average number belonging 2,054.6, and the average daily attendance 1,900.2.

Panama Railroad.

Cargo handled at the Colon and Balboa agencies aggregated 84,163 tons, which includes 2,230 tons transfer cargo transported through the Canal by steamers of the Panama

Railroad Steamship Company. Effective November 17, 1914, the agreement between the Panama Railroad Company and connecting lines under which the railroad acts as a co-carrier was terminated, causing the movement of freight to be diverted through the Canal.

Work on the transisthmian duct line was continued. The duct work, transformer houses, etc., for the Electrical Division in the townsites of Colon, Cristobal, and Mount Hope was 90 per cent completed at the close of the month. Terminal connections for the transisthmian duplex cable were completed at Colon, Gatun, Pedro Miguel, and Balboa exchange and cables placed in service across the Isthmus for through trunks and for all lines between Balboa and Pedro Miguel. The signal cable has been spliced and connected between Colon and Gatun, work on this section being 90 per cent completed on November 30. The status of the entire signal cable was 31 per cent complete at the close of the month.

Plans and specifications for the steel required in the floor system of the Cristobal terminal docks were approved and requisition submitted. One hundred and eighty-six linear feet of trestle were driven during the month, making the total driven to the close of the month 3,811 linear feet, or 76 per cent of the amount required. During the month, 3,085 linear feet of steel cylinders were placed, making 10,010 feet to the end of the month, or 46 per cent completed. One thousand ninety-five cubic yards of spoil were removed from caissons, making the total at the end of the month 1,311 cubic yards, or eight per cent of the total yardage for the pier.

On November 30, the bridge across the French canal was 99 per cent assembled and 100 per cent riveted.

Respectfully submitted,

H. F. HODGES,
Acting Governor.

Inspection of the "Chitre".

At the request of the owners, the National Navigation Company of Panama, a board, consisting of Messrs. C. W. Chaddock and R. B. Sanford, measurers, and W. I. Pender, deputy inspector, was appointed to inspect the condition of the hull, machinery, including boilers, and other parts of the coast steamer *Chitre*.

Visits to Palo Seco.

The practice of making visits to the Palo Seco leper colony has assumed such proportions as to constitute an inconvenience and somewhat of a menace to the public health. For these reasons, the Chief Health Officer has made a regulation to the effect that no one will be permitted to visit the colony unless it is on official business, or unless the person has a signed permit from the Health Office.

Family Quarters.

Applications for married quarters on file on November 30, were, as follows:

DISTRICT.	List No. 1.	List No. 2.
Ancon	41 (19)	359 (119)
Ancon Hospital	4 (4)	6
Corozal	8 (5)	141 (37)
Cristobal		184 (32)
Gatun		85 (2)
Paraiso		139 (29)
Total	53 (28)	914 (219)

NOTE—The figures in parentheses show the number of applicants already occupying regular or nonhouse-keeping family quarters at stations other than those at which applications are filed.

SITE FOR PANAMA STABLES.

Amended Sanitary Regulations Provide for Segregation of All New Erections.

A tract of land situated between the Chinese and Catholic cemeteries, fronting the old road to Balboa, has been assigned for the erection of stables in the plan to segregate all new stables in Panama city in restricted areas. The site was formerly known as the Huerta de Sandoval, and was acquired by the Panama Railroad Company from the Panama Government for the above purpose. It has a maximum length of 368 feet, and a maximum width of 550 feet. The tract will be divided into lots, each having a width of 50 feet, but with varying depths owing to the fact that the site is wider at one end than it is at the other.

Work has been begun by the railroad forces in bringing the ground to grade; this is being done by scrapers and wheelbarrows, and enough material is found in the higher spots to fill in the low sections. Following this, the Division of Municipal Engineering will install the necessary drains, together with sewer and water connections, and will also build a 40-foot roadway to be surfaced with concrete, extending from the Balboa road entirely through the center of the tract. The construction of all stables is to be done by the lessees of lots.

The following amendments have been made to the building regulations for the cities of Panama and Colon with reference to the construction and maintenance of stables:

Section 94. Stables shall be built in accordance with plans and specifications approved by the Health Office, and a permit must be secured before work can be commenced. Stables shall have water and sewer connections and good ventilation. The stalls shall be approximately 10 feet long, five feet six inches wide, and 10 feet high at entrance. All buildings now or hereafter to be constructed and used for stabling horses, mules, cows, and other animals shall be constructed, as follows:

Walls—The foundation walls of such buildings shall be constructed of concrete, brick, or stone laid in cement mortar, and shall not be less than six inches thick, and shall extend into and below the surface of the surrounding ground not less than two feet, and shall extend above the ground a sufficient height, as to be not less than one foot above the floor level. All openings in such foundation walls shall be covered with metal gratings having openings not greater than one-half inch between the gratings.

Floors—The floors of stables and stalls shall be of concrete not less than three inches thick of cement or stone laid in cement mortar in such way as to prevent ingress or egress of rats, and such floor to have a slope of one-eighth inch per foot to the gutter drains hereafter provided for.

Stalls—The floors of stalls may be of planking fitted either tightly to the concrete floor or elevated not less than one-half inch from the stall floor, and so constructed as to be easily removable. Such removable planking shall be raised at least once a week and the said planking and the concrete floor beneath thoroughly cleaned.

When two rows of stalls are constructed with a space between, this entire area shall be concreted.

Gutters—Semicircular or V-shaped gutter drains shall be constructed in such stables in such manner that a gutter shall be placed, so as to receive all liquid matter from each stall and each of these gutters to connect with the public sewer, or with a main gutter of the same construction, which, in turn, shall be connected with the public sewer. All openings from drains into sewers shall be protected by a metal grating having openings not more than one-half of an inch between the gratings.

Manure—All manure from each stable shall be removed therefrom at least once in 24 hours, and disposed of as the Health Office may direct. All manure so removed shall be placed in wagons so protected as to render said manure inaccessible to flies.

Mangers—Each manger shall be constructed, so as to have a slope of two inches toward the bottom; shall be covered with tin or zinc, and shall be at least 18 inches deep to avoid spilling of food.

Feed bins—All feed bins shall be constructed of concrete, stone, or metal, or wood, and if constructed of wood shall be lined or covered with metal, and the whole so constructed as to prevent the ingress or egress of rats. All grain, malt, and other animal foods, except hay

stored or kept in any stable must be kept in such feed bins. Said feed bins must be kept closed at all times, except when momentarily opened to take feed therefrom, or when same are being filled. No feed shall be scattered about such bin or stable, and all such feed found or in the stalls shall be removed daily. No food-stuffs intended for or susceptible of human consumption shall be kept or stored in any stable or any other place where animals are kept.

Each stable must be provided with a cemented area of sufficient size upon which carriages and animals are washed. This area shall be properly concreted and trapped to sewer.

Section 95. Cow stables shall be used for no other purpose than for the keeping of cows. All manure shall be removed twice daily, and no manure shall be removed during the milking or within one hour prior thereto. No stagnant water, hog pen, privy, or cesspool shall be maintained within 100 feet of the cow stables.

Section 96. Hereafter, no building shall be constructed or used for stabling purposes, except in certain restricted areas to be designated by the local Health Officer in the permit for same.

Section 96. Any person, firm, association, or corporation failing to comply with any of the conditions of Sections 94, 95, and 96 of these regulations shall be punished by a fine of not less than 25 balboas, nor more than 100 balboas.

Restaurant for Shop Employees.

The old office building of the Mechanical Division at Balboa will be fitted up as a restaurant on the order of the lunch room in the basement of the Administration Building, Balboa Heights, where the shop employees can obtain their noonday lunch. Under the new schedule of working hours, the shop employees have but one hour at noon, and this time has been found insufficient to permit them to take their meals at the East Balboa hotel.

LABOR FORCE AND QUARTERS IN NOVEMBER.

The force report of November 25 shows the actual working force of The Panama Canal on that date to have been 23,113; of the Panama railroad 3,164, and of contractors 57, a total effective working force of 26,277. This is a decrease of 432, as compared with the statement of October 28. The gold force on the Canal, composed almost exclusively of white Americans, was 3,973, divided, as follows: The Panama Canal 3,566; Panama railroad 374; contractors 33, a decrease in the total gold force of 175, as compared with the preceding month. Detailed figures of the total force employed on the Isthmus, by departments and divisions, follow:

(1) Includes eight American negroes, and two Panamanians on the gold roll. (2) Includes Sabanas police station, Taboga Island, Naos Island, Culebra Island, and Palo Seco. (3) Includes Miraflores. (4) Includes one Asiatic. (5) Includes 41 Panamanians. (6) Includes Empire, Las Cascadas and Bas Obispo. (7) Includes Colon Beach and Colon Hospital. (8) Includes 26 East Indians, 15 American citizens, and 61 Panamanians. Gold force of contractors (included above), 86 bachelors.

JOINT LAND COMMISSION.

Awards.

Award No. 69, docket Nos. 90 and 90-A, December 17, 1914—In the matter of the claim of Ora Miller, for property situated in the Canal Zone at the junction of Fourth of July avenue, the Balboa road and B Street of the city of Panama and opposite the Chorrillo district of the city of Panama, formerly a part of the Los Positos estate—This claim is for land expropriated by the Government of the United States, the property expropriated being well situated for building purposes for residence and business properties. It lies immediately across the street from the residence and business district of Chorrillo in Panama city. It is agreed by the Government and the claimant that claimant owned in fee simple at the time of the expropriation the 1,884 square meters of land in question. A number of witnesses were introduced by the claimant, who placed the value of the land at from six to ten dollars per square meter at the time of the expropriation of said property. The Government introduced some uncertified excerpts from deeds for lands in the vicinity of this property, showing the consideration stated therein, from the year 1883 up to 1907. No witnesses were introduced on behalf of the Government relative to the value of the land expropriated.

The property in question was not expropriated by the Government of the United States until the year 1912. Counsel for the Government insist that the value of the property should be fixed under Article VI of the Treaty between the United States and the Republic of Panama according to its value at the date of the Treaty, but under the ruling of Justice McReynolds, then Attorney General of the United States, dated at Washington, D. C., October 13, 1913, which the commission regards as resting upon principles of equity and justice, we hold that the rule insisted on does not apply, but that the value should be fixed as on the date of the expropriation of the lands in question.

The property was inspected personally by the members of the Joint Land Commission. After an examination of the premises and a consideration of all the evidence introduced relative to the claim, the commission has reached the conclusion that the sum of \$8,557.97, United States currency, should be awarded to the claimant for the said property.

An award is therefore made against the United States of America, in favor of Ora Miller, for the sum of \$8,557.97, United States currency, for all his right, title and interest in and to the aforesaid property. This award shall be paid to the aforesaid claimant, in the amount specified, on or before the 17th day of January, 1915, and if the payment or tender of payment is not made on or before that date, the said award shall thereafter bear interest at the rate of six percentum per annum until paid.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, *Commissioners*.

Award No. 70, docket No. 2, December 17, 1914—In the matter of the claim of Encarnación Rangel, for the property called Naranjal.—This claim is for land, buildings, fruit trees and improvements expropriated by the Government of the United States, the property expropriated being situated in the district of Empire, near the city of Empire, Canal Zone, the property being known as Naranjal. The original claim is for 159,866.7 hectares. The Government survey of the property, as shown by Government's Exhibit Q, shows that the entire tract comprises 156.8 hectares.

Near the northern limits of the property is a wire fence extending from the Rio Mandinga on the west to the Rio San José on the east, as shown by said Exhibit Q, and the area of the tract of land claimed by Rangel is bounded on the north by the old San José trail, and the area of the tract between the old San José trail and the said wire fence comprises 32.9 hectares. This property is claimed by John MacGregor.

The southern boundary of the land is the Quebrada del Muerto, or del Credo, and the Chorrera trail. There are two Chorrera trails, the old Chorrera trail and the new Chorrera trail, and the title of the claimant to the tract of land between the old Chorrera trail and the new Chorrera trail is disputed.

The commission, after making a personal inspection of the premises and considering all the evidence introduced in the case, finds:

That the claimant, Encarnación Rangel, is the owner of a good and sufficient title to all of the lands described in the original claim, except the 32.9 hectares between the wire fence and the old San José trail, on the north of said tract, as shown by said Exhibit Q, and also except the area of 10.3 hectares of land between the old Chorrera trail and the new Chorrera trail, as shown on said Exhibit Q, and that the lands owned by the said Rangel comprise the 113.6 hectares between the wire fence on the north, the Quebrada de la Cal or de San José on the east, the line of the old Chorrera trail and the Quebrada

del Muerto or del Credo on the south, and the Rio Mandinga on the west.

The commission further finds that the lands, and improvements thereon, so owned by the said Rangel, are worth the sum of \$8,694.25, United States currency.

The commission further finds that the claim should be dismissed, without prejudice, as to the area of 32.9 hectares between the wire fence as shown on said exhibit Q, and the old San José trail as shown on said Exhibit, and as to the area of 10.3 hectares between the old Chorrera trail and the present or new Chorrera trail, and that the award to be made herein should be made in its entirety to the said Encarnación Rangel.

An award is therefore made against the United States of America in favor of Encarnación Rangel, for the sum of \$8,694.25, United States currency, for all the right, title, and interest of the said Encarnación Rangel in and to the lands so herein found to be owned by him, and all improvements of every kind and nature situated thereon. This award shall be paid to the aforesaid claimant, in the amount specified, on or before the 17th day of January, 1915, and if payment or tender of payment is not made on or before that date, this award shall thereafter bear interest at the rate of six percentum per annum until paid.

The claim of the said Encarnación Rangel to the said 32.9 hectares in the northern portion of said lands, claimed by him, between the said wire fence and the said old San José trail, and the 10.3 hectares of land comprised in the tract between the old Chorrera trail and the new Chorrera trail, is hereby dismissed, without prejudice, to the lawful owners thereof.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, *Commissioners*.

Rule of Dismissal.

Rule of dismissal No. 154, docket No. 30, December 17, 1914—In the matter of the claim of Enrique Rodriguez Fernandez, for property located near Pedro Miguel—In the case of Enrique Rodriguez Fernandez, docket number above shown, an examination of the claim and of the documents submitted shows that whatever rights claimant had in the property in question arose under a lease from the Isthmian Canal Commission.

In a decision in the case of Agusta Dunlop, rendered April 16, 1913, the commission said:

"We have, therefore, reached the conclusion that it is not within the province of the Joint Land Commission to take cognizance of claims arising out of the revocation of revocable leases or licenses issued by the Isthmian Canal Commission. Such claims have no organic relation to the grants contained in the Treaty, nor to the international obligations which the United States has agreed to discharge under the Treaty, and for the adjudication of all such claims the claimants must seek a remedy through the procedure afforded by municipal laws."

In accordance with the foregoing decision, the claim of Enrique Rodriguez Fernandez, above shown, is hereby dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, *Commissioners*.

Rule.

Rule No. 153, docket No. 1433, December 16, 1914—In the matter of the claim of The Las Cascadas Estates Company, Ltd., for the property known as Las Cascadas plantation.—The Joint Land Commission having heretofore heard the above claim and having on the fifth day of December, 1914, made an award in the usual form to the claimant in the sum of \$75,000, Messrs. Fenille and Williams, attorneys for the Government, on the tenth day of December, 1914, five days after said award had been made, filed their written request with the commission that a specific finding be submitted by the commission as to the title and extent of the land found by the commission to be owned by the said claimant and for which said award had been made, and also requested the commission to state any other facts leading up to said award.

The commission is of the opinion that it is not obliged to furnish to any of the parties, either to the Government or to the claimant, the reasons on which its decisions are based; nevertheless, owing to the fact that it may be of importance to counsel for the Government in the defence against other claims to know what lands, or the title to what lands, the commission adjudicated in the claimant, the commission makes the following special finding in connection therewith:

The commission arrived at the conclusion that the Las Cascadas Estates Company, Limited, at the time of the expropriation, held by good and valid title all the lands included within their fences and bounded on the north and east by the lands claimed by Martina Cajar, shown to be 570.56 acres, on the map furnished by the United States and introduced by counsel for the Government as Government's Exhibit C in the hearing of this cause.

Inasmuch as the commission is unable to see how any further explanation of the grounds upon which the finding was made can now be of material interest to either party, the commission declines to go into any further details concerning its findings.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, *Commissioners*.

OFFICIAL CIRCULARS.

Appointments.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., December 16, 1914.
CIRCULAR No. 661-12:

ACTING GOVERNOR—ENGINEER OF MAINTENANCE,
Effective December 17, 1914, Col. Harry F. Hodges, U. S. A., Engineer of Maintenance, will act as Governor of The Panama Canal during the absence of the Governor on leave. By order of the Secretary of War, Colonel Hodges will be relieved from Panama Canal duty effective January 1, 1915, upon which date, Lieut.-Col. Chester Harding, U. S. A., will be appointed Engineer of Maintenance and will act as Governor during the remaining period of the Governor's absence.

GEO. W. GOETHALS,
Governor.

Engineer of Maintenance.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., December 17, 1914.
All concerned—Effective this date, Lieut.-Col. Chester Harding, U. S. A., will perform the duties and exercise the authority of Engineer of Maintenance, under his title of Assistant to the Governor, pending his appointment as Engineer of Maintenance to become effective January 1, 1915.

H. F. HODGES,
Acting Governor.

Colonel Hodges Relieved from Duty with The Panama Canal.

20. Col. Harry F. Hodges, Corps of Engineers, is relieved from duty with The Panama Canal, to take effect January 1, 1915, and will then repair to this city, take station, and report to the Chief of Engineers for duty.

The travel directed is necessary in the military service. (2234744 A. G. O.)

By order of the Secretary of War.

H. L. SCOTT,
Brigadier General, Chief of Staff.

Official:
H. P. McCAIN,
The Adjutant General.

Command of Canal Zone Military Forces.
HEADQUARTERS, COAST DEFENSE OF PANAMA,
CRISTOBAL, C. Z., December 10, 1914.

GENERAL ORDERS
No. 7.

Pursuant to cabled instructions from the Commanding General, Eastern Department, dated December 15, 1914, the undersigned hereby assumes command of all United States troops, excepting officers and enlisted men on duty with The Panama Canal Government, within the limits of the Panama Canal Zone.

A. CRONKHITE,
Colonel, Coast Artillery Corps.

Reduction of Force on Silver Roll.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., December 10, 1914.
CIRCULAR No. 604-3:

When a reduction of force on the silver roll is necessary citizens of the United States and of Panama will, if their services are satisfactory, be retained in preference to aliens.

GEO. W. GOETHALS,
Governor.

Notice to Steamship Lines.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., December 10, 1914.

1. Vessels using the Panama Canal are towed through the locks. Ordinarily, six locomotives will be used, two forward for towing and steadying the vessel in the lock chambers, two amidships for towing and afterward for checking the vessel's headway, and two aft for steadying her and checking her headway.

2. The average rise and fall in each lock chamber is about 30 feet; hence, when a vessel is at the lowest level, the lead through the ship's chocks to the locomotives on the lock walls is often very sharp, and unless the chocks be closed the line will have a tendency to slip out and damage the rail and other light construction equipment in its vicinity. Experience has demonstrated the fact that most of the chocks and bits are too light in construction, and that the chocks in particular should not only be made heavier and stronger, so

that their jaws may stand a vertical strain, but that they should be of a permanently closed pattern and not be made with open jaws.

3. In cases where open-jawed chocks are installed, they should at once be replaced by closed ones, or be fitted with an appliance for closing them, taking care that the appliance itself will stand a heavy vertical strain in case the line slips from under the jaws.

4. With some minor modifications, there are three general designs of chocks which are usually fastened on ocean steamers: (1) Heavy cast iron open-jawed, secured on deck or to the upper edge of the side plating; (2) the same as (1), but with rollers in each end; and (3) oval closed chocks let into the side plating for leads to covered and well decks.

5. The latter (3) gives very satisfactory results, but the former (1) and (2) are liable to cause damage on the chock both in the vertical and horizontal lead of the line, due to change in level of the water, and to a retarding position or *vice versa*, and should be replaced as recommended in Paragraph 3.

6. In many cases the bits have been found to be too light in construction or poorly secured. They should be sufficiently strong to withstand the strain of a 1 1/2-inch (diameter) wire line with a pull of 50,000 pounds, and be firmly riveted to the decks, and, if necessary where the decks is of wood or light plating, they should have an under deck plate, or be secured between two deck frames.

7. It has been noted that some vessels have light iron cleats riveted to the inside of the side plating or to the deck plates in lieu of bits. This is very unsatisfactory, as almost invariably they will not stand the strain, owing to their light construction or insecure fastening; they should be replaced by bits.

8. In the installation of chocks and bits for Panama Canal towing attention should be given to placing the several sets in convenient and accessible places, and that in each set there should be but a short distance between the chock and its accompanying bits.

9. In some cases suitable bits have been installed, but there were no convenient or accessible chocks; hence, the bit of the tow rope has a tendency to slip off the bits, and, if the lead be under the rail, end ladders carrying it away. In such cases chocks should be installed at once.

10. While The Panama Canal assumes the liability for any damage to vessels during lockage, for which it may be responsible, yet it will not do so when vessels are not fitted with the proper appliances for Canal towing, and when damage may result in consequence thereof; hence, steps should be taken immediately to remedy any defects herebefore mentioned.

11. A vessel which presents herself for transit through the Canal, which is in compliance with these recommendations, and which is thoroughly and strongly so equipped for towing, will not only have her passage through the several locks greatly facilitated, but will avoid the annoyance and expense due to possible damage to chocks, bits, rail, and other light equipment, for which The Panama Canal will not assume responsibility.

12. The Canal pilot will always examine each vessel's towing appliances before she enters the locks, and will not only call attention to any defects, but will gladly offer advice and suggestions toward remedying any that may be found, and at the same time will furnish the master or captain with a brief notice in reference to such alterations as in his opinion should be made before the vessel next transits the Canal.

GEO. W. GOETHALS,
Governor.

Rates of Pay, Silver Roll.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., December 15, 1914.

CIRCULAR No. 666-1:

Circular No. 665, Revised is hereby amended to include the following ratings:

Lockman.....\$75
Lockman.....30

GEO. W. GOETHALS,
Governor.

Notice to Mariners.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., December 10, 1914.

CIRCULAR No. 643-9:

COLON-CRISTOBAL HAAROR.

1. The 17-foot spot, Linao Bay, Colon-Cristobal harbor, Panama, Canal Zone, about half way between the end of Cristobal mole and Toro Point light, as shown on U. S. C. and G. S. chart No. 950, still remains, but the harbor in its vicinity, with the exception of a small circle with a radius of about 150 yards, has been dredged to the normal depths of the surrounding waters, with a least depth of 30 feet. This shoal was

Inadvertently omitted from Isthmian Canal Commission chart No. 1 of the Panama Canal.

2. Upon the completion of the east breakwater it is the intention to remove this shoal to normal depths. Until its removal the shoal will be marked by a buoy painted red and black in horizontal stripes.

GEO. W. GOETHALS,
Governor.

Accounting for Cement Bags and Other Containers
THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., December 10 1914.

CIRCULAR No. 656-7 (Superseding Circular No 656-3):
1. The provisions of Circular 656-3, dated July 20, 1914 are amended, as follows:

CEMENT BAGS.

2. When cement in bags is delivered to a division or to the Panama Railroad Company, the bags will be covered by a separate invoice or foreman's order.

3. The value of the bags will be charged to the equipment account of the division and accounted for on the property records.

4. When empty cement bags are turned in to the Supply Department for return to contractor, carload lots will be billed by the division to the inspector, Supply Department, Cristobal, and less than carload lots will be delivered to the nearest storekeeper or quartermaster, except that at Cristobal less than carload lots may also be delivered to the inspector. Bundles will be securely tied and tagged, showing the name of division. Divisions turning in bags will at once notify the consignee of shipment or delivery and will forward invoice based on the field count. Invoices will be accomplished by the receiving official who will return one copy to the division, and seal the original and one copy to the Auditor for credit to property accounts. Bags turned in to line storehouses will be charged to stock account, Class 19. The inspector is authorized to accomplish invoices for cement bags; such invoices will be charged to "Cement bags in transit." When bags, which have been turned into line storehouses, are forwarded to Cristobal for shipment to the United States, an invoice showing divisions from which bags were received will be sent to the inspector who will accomplish and return one copy to the storekeeper or district quartermaster and send the original and one copy to the Auditor for credit to the proper stock account and charge to "Cement bags in transit."

5. When a shipment is forwarded to the United States, the invoices furnished the inspector will be the basis of the Isthmus count. A statement of each shipment, showing divisions returning bags and giving details as to invoices included in same, will be furnished the Auditor.

6. The inspector will see that bundles are tagged with name of division, and will report all cases of carelessness on the part of divisions in this respect to the Chief Quartermaster.

7. The General Purchasing Officer will furnish the Auditor a statement of the output of each steamer, showing the names of all divisions, the bags received, accepted, and rejected. The Auditor will credit "Cement bags in transit" on the basis of the General Purchasing Officer's report, and will notify the divisions of the rejections and shortages, which will be charged to divisions accounts.

8. In the case of the Panama Railroad Company or contractors, the Auditor will notify them of bags accepted for their account, for which the Auditor will prepare a voucher upon receipt of bill.

OIL DRUMS AND OTHER EMPTY CONTAINERS RETURNABLE TO CONTRACTORS.

9. Where the contractor charges for containers, for which credit will be allowed when returned, the Balboa storekeeper will invoice against various divisions financially for such containers as may be issued or transferred. Separate invoices will be issued to cover such containers. When divisions return containers, they will be invoiced in the same manner as other material returned to store. Carload lots will be shipped direct to the inspector, Pier 11, Cristobal, and less than carload lots will be consigned to the storekeeper, oil house, Mount Hope. When, in any case, it is impracticable to ship drums to Cristobal or Mount Hope, they may be turned in to line stores and invoiced to the receiving storekeeper.

10. Where the contractor furnishes containers without charge, under a contract providing that The Panama Canal shall make payment for those not returned, the Balboa storekeeper will accept a charge for the containers received, at the rate payable for those not returned, as fixed in the contract, and the Auditor will credit the amount on his books to the contractor. When shipment in such containers is made by a storekeeper to other storekeepers or divisions, containers will be invoiced at the contract rate charged in case of failure to return. When empty, the containers will be returned to the storekeeper at the same value. When containers are returned to the contractor, the Auditor

will credit Balboa store and charge the contractor's account for their value.

11. The storekeeper, Balboa, will forward to the Auditor at the end of each month a statement showing the number, kind and value of containers returned, the name of contractor, and the order number. The Auditor will credit the storekeeper for such containers.

GEO. W. GOETHALS,
Governor.

Transmission Line Between Miraflores and Gatun Energized.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., December 21, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

Both sides of the transisthmian transmission line between Gatun and Miraflores substations will be put in service at 44,000 volts, beginning at 12 noon on December 22. All employees should be notified of the fact that almost certain loss of life will result from contact with or close approach to these wires after they are put in service. Cranes or other equipment or tools should be handled so that a clearance of at least six feet from the wires is maintained.

H. F. HODGES,
Acting Governor.

Steam Engineers.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., December 19, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

Hereafter, no silver roll employe will be employed as steam engineer on locomotive cranes, spreaders, unloaders, truckshiffters, or pile drivers, except in emergency, or in case no gold roll employe is available.

H. F. HODGES,
Acting Governor.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., December 21, 1914.

The following insufficiently addressed letters originating in the United States and its possessions have been received at the office of the Director of Posts, and may be procured upon request of the addressee:

Balboa-Taboga Service.

Launch Q makes trips on the following schedule: *Week days.*—Leave Balboa dredge landing at 5.30 p. m., and Taboga at 6 a. m. *Sundays and holidays.*—Leave Taboga at 6 a. m., Balboa dredge landing at 9.40 a. m., and Taboga at 8 p. m. *Fares.*—Employees, 25 cents gold each way; nonemployees, 50 cents gold each way; children under 12 years, 15 cents gold each way.

COMMISSARY DEPARTMENT.

Trial of New Selling System.

A system of selling without the use of sale slips has been tried out in some of the commissaries, which has considerably reduced the selling expense and enables salesmen to make quicker sales and deliveries than was possible under the old system. It is intended to establish the system in other commissaries as soon as practicable.

Rules for Sale of Ice.

The following rules in connection with the sale of ice are published for the information and guidance of all concerned:

Remittance will be received only in amounts sufficient to cover the current month's requirements.

No stops or starts will be made after receipt of the 10 o'clock a. m. mail for the succeeding waybill (two days thereafter.)

No changes will be made in the current month's waybill after the 27th of each month.

Remittances received after the 4 o'clock p. m. mail is received on the 27th of each month, will not be credited for the first waybill in the succeeding month.

Ice accounts run from the first of one month to the end of that month. No ice accounts will run from the middle of one month to the middle of the next month. Midmonth changes on ice accounts will be made only in case of persons going on vacations, leaving the service, or returning from leave. In such cases, the necessary information must be shown on the card in the space provided for "Remarks."

Ice will not be shipped unless sufficient funds are on hand to cover amount desired up to and including the end of the month, and balances remaining from previous ice accounts will not be applied on a succeeding month's account until sufficient additional funds are received to cover the entire month.

Proposals for Furnishing the Commissary Branch With Beef Cattle.

THE PANAMA CANAL.
OFFICE OF CHIEF QUARTERMASTER.

Sealed proposals will be received at the office of the Depot Commissary, Cristobal, C. Z., until 4 p. m., January 11, 1915, and then opened, for furnishing the commissary branch with 200 head of beef cattle.

Specifications may be obtained upon application to the Depot Commissary, Cristobal, C. Z.

The Government reserves the right to reject all bids, or to accept any bid in part.

Bids should be marked "Proposal for furnishing beef cattle, to be opened January 11, 1915."

WM. R. GROVE,
Chief Quartermaster.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m., on Saturdays and sailing days or Panama railroad vessels.

Cold Storage Prices.

The following retail prices of cold storage provisions will be effective December 24:

FRESH MEATS.		Price.
Mutton—Stewing, per pound.....		10
Shoulder, trimmed, per pound.....		16

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it. The time used is Cosmopolitan Standard, for the

meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.). All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15.47 is 3.47.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls, or the purchase of supplies, may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

It is advisable that deposits be made somewhat in excess of the anticipated charges, to cover minor charges which may not have been anticipated, such as pilotage and towage. Pilotage is at the rate of \$1 per foot of maximum draft, but is not charged on a vessel which makes the transit of the Canal without taking on or discharging freight or passengers in a terminal port. Tug service, which is at the rate of \$15 per hour, will not be charged on vessels of less than 15,000 gross tonnage.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa from the Union Oil Company at the rate of from 1,300 to 1,600 barrels per hour. The present price is \$1.25 per barrel, reduced to 60° Fahrenheit.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges for ship's laundry: Trousers and jackets, five cents each, aprons, caps; sheets, tablecloths, napkins, towels, one cent each.

Repairs to vessels may be made to any extent, except where the use of a large dry dock is required, or the turning of the largest crank shafts or longest line shafts.

All standard lubricants, light and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa.

Subsistence stores, including a large stock of fresh meats, vegetables, canned groceries, fruits, bakery products, etc., are available for quick delivery at either terminal. Prices are generally lower than the retail prices in the United States, and compare favorably with prices in any part of the world.

The cable address of The Panama Canal on the Isthmus is "Isthmian, Balboa Heights;" in the United States, "Isthmian, Washington".

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C.," for delivery in the United States.

Sailings of Vessels in Regular Service With the Isthmus.

REGULAR CONNECTIONS THROUGH THE CANAL.

Approximately regular services between the Atlantic and the Pacific seaboard from Boston, New York, Philadelphia, and Baltimore, occasionally Charleston and New Orleans, to San Pedro, San Francisco, Portland, and Puget Sound, and return, are maintained by the American-Hawaiian Steamship Company, with a sailing each way about every five days; the Luckenbach Steamship Company, with a sailing each way about every 10 days; Sudden and Christenson, approximately fortnightly; the Atlantic and Pacific Steamship Company, about every three weeks; and the Boston and Pacific Line, and the Arrow Line, each sending a vessel each way about once a month.

Between the east coast of the United States and the west coast of South America, fortnightly services are maintained by the Merchants' Line and by the New

York and South America Line; the West Coast Line has sailings each way about every four weeks.

Between the west coast of the United States, with connections to lower British Columbia and Europe the following lines are in service: The Harrison-Direct Line, monthly; the Maple Leaf Line, about every six weeks; the East Asiatic Company, monthly, and the Johnson Line, every six or seven weeks.

The Pacific Steam Navigation Company is operating approximately a monthly service around South America from Liverpool, by way of the Canal.

The American-Australian Line has been sending vessels through the Canal about fortnightly from New York to ports in Australia and New Zealand.

PACIFIC COAST CONNECTIONS.

The Pacific Mail has sailings about every 10 days between Balboa and San Francisco, with calls at Puntarenas, San Juan del Sur, Corinto, Amapala, La Union, La Libertad, Acapulco, San José de Guatimala, Champerico, Ocos, Salina Cruz, Acapulco, Manzanillo, San Blas, and Mazatlan. The company also operates a direct line between Balboa and San Francisco, with sailings about every six weeks; and a Panama-Central America line, between Balboa and Ocos, making one round voyage monthly, and calling at all the ports abovenamed between Balboa and Ocos.

The Peruvian Steamship Company maintains a weekly service between Balboa and Callao, with calls at Guayaquil, Paíta, Eten, Pacasmayo, and Salaverry. Every second voyage includes Mollendo.

The South American Steamship Company's vessels sail on alternate Mondays from Balboa for Valparaiso, calling at Paíta, Eten, Pacasmayo, Salaverry, Callao, Mollendo, Arica, Iquique, Antofagasta, and Coquimbo.

The Pacific Steam Navigation Company has sailings on alternate Mondays for Peru and Chile; every 10 days for Ecuador; and on alternate Mondays for Colombian and Ecuadorian ports.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro; and an additional weekly sailing to Bocas del Toro.

The Royal Mail Steam Packet Company maintains approximately a fortnightly service between Colon and England, via Cartagena, Puerto Colombia, Trinidad, and Barbados. Its service to New York, via Kingston, has been temporarily discontinued.

The Compagnie Générale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Carupano, Trinidad, Martinique, Guadeloupe, and Santander; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Carupano, Trinidad, and Martinique.

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curacao, Puerto Cabello, and Barcelona.

The Compañía Trasatlantica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curacao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls en route, the vessels sail from Genoa on the 8th day of each month.

Regular service is maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing about every seven days, direct; between Colon and New York by the United Fruit Company twice a week, one sailing via Port Limon and Havana, and the other via Kingston; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. Extra copies and back numbers can be obtained from the news stands of the Panama Railroad Company for five cents each.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Completion of Miraflores-Gamboa Water Pipe Line.

The laying of the water pipe line, connecting the new pumping plant on the bank of the Chagres River at Gamboa with the purification plant on Miraflores Hill, was completed on Tuesday, December 29. The digging of the trench to receive the pipe was performed by contract, and the contractor finished with his work on Friday, December 18. The installation of the pipe, and the work of covering it was done by forces of the Division of Municipal Engineering. The line was completed well within the estimated time; the best day's record was approximately 2,000 feet of pipe, equal to about 165 12-foot lengths. The 22 gate valves boxes have been complete, and a few of the valves have been installed, but not all of them are on the Isthmus. The purification plant at Miraflores is well toward completion, and water was turned in for the first time, as a trial, a few days ago. The No. 1 gravel is in place, and work is progressing on the No. 2 gravel.

Chronometers for Furnishing Ships with Standard Time.

The United States Navy collier *Caesar*, which arrived at Cristobal on December 23, brought two chronometers for use of The Panama Canal. They will be placed in the offices of the captains of the port, and will be used in furnishing ships passing through the Canal with standard time for the 75th meridian W.

Movements of U. S. Naval Vessels.

The United States Navy collier *Caesar* arrived at Cristobal on Monday, December 28, on its way to San Francisco, with Government exhibits for the Panama-Pacific Exposition. Upon discharging its cargo, it will return, via the Canal, to the Atlantic coast.

The United States cruiser *Tacoma*, until recently at Santo Domingo, arrived at Cristobal on December 20, having been ordered here for patrol duty in connection with the enforcement of neutrality regulations in Canal Zone waters.

The United States transport *Buford*, which brought the Fifth Infantry to the Isthmus,

and then went on to San Francisco, for the purpose of transporting the Thirtieth Infantry stationed at the Presidio, to Philadelphia, is due at Balboa about January 10, and at Philadelphia about January 19. The Thirtieth will be stationed at Plattsburg Barracks, N. Y., the post made vacant by the departure of the Fifth. It is expected that Brig. Gen. Clarence R. Edwards, who is to command the Panama garrison, will arrive on the *Buford*.

Change in Hat Check System.

The present hat check system in use on the Panama railroad will be discontinued on January 1, and a new one will be installed in its place. The new checks will be numbered one to 31 inclusive, the numbers signifying the dates on which they are to be used. The same color of check will be used for an entire month, but for each succeeding month, a new color scheme will be prepared, and instructions concerning the use of same issued in advance. The gatemen at the terminal stations will be charged with the custody and issuance of the hat checks, and instead of destroying them after they have been taken up, as heretofore, conductors and collectors have been notified that they are to be turned back again to the gatemen.

Another P. R. R. Landmark to be Removed.

A 2-story frame building, known as the engineers' quarters, situated on North avenue, at the south end of the Panama railroad yard, will be torn down. This is one of the few landmarks left of the railroad at the Panama terminal, the others consisting of the old American wharf, and a 2-story frame building, situated in the yard, near the freight house, occupied in the '80s by the sectionmaster, later, by the unmarried clerks, and more recently converted into married quarters for two families. The building to be dismantled is one of two erected in that locality shortly after the tearing down of the first station ever erected by the railroad company in Panama, which occurred in 1885. The other building, which was a 1-story mamposteria structure, with red tile roof, used by the railroad agent for an office, was demolished about the year 1890. In the rear of this building there formerly existed a flower garden, said by one who was here at the time to have been extremely well arranged. The engineers' quarters originally stood farther back from the street, and a little to one side of its present location. By 1907, the building had fallen into a bad state of repair, and during that year was moved to the present site and placed in a habitable condition. Its rooms, however, were ceiled, which made it accessible to rats, and, therefore, a menace to health. Within recent years, it has been used altogether as quarters for unmarried employes of the railroad. These employes have recently been assigned to quarters above the new station.

CANAL OFFICE BUILDING.

Description of the Structure that Houses Administrative Offices of The Panama Canal.

The purpose of the Administration Building is to concentrate the offices of the several departments of The Panama Canal under one roof for the sake of efficiency and economy, and the convenience of the general public which has business with the Canal.

The plan, which has the form of the letter E, was arrived at after a process of elimination, in which many other schemes were considered and discarded. It has as its basis the fact that beyond a certain width of building, the intensity of light decreases to an extent which makes the central portion unfit for use. With this in view, the present wings and main building were laid out and their width fixed. On account of the very large amount of floor space required, it would have made too long a building to have put it end to end in one line, so the E form was decided on.

The location of the building on a natural toe of the northwestern slope of Ancon Hill is well fitted to the purpose and character of an edifice which is to guard and direct the interests and operation of the Canal, overlooking, as it does, what will be the first permanent town of the Zone.

Actual work of excavating, filling, and leveling of the site was commenced in March, 1913, by forces of the former Fifth Division, Department of Construction and Engineering, and on completion of the grading, the concrete foundation piers were laid, so that the United States Steel Products Company was able to start the erection of the steel skeleton on June 18, 1913. During the setting of the foundations, final working drawings were being made, and as the work progressed, the necessary details were laid out.

The entire building was planned without any definite knowledge of what offices were to occupy it, how much space they would require, or how they were to be correlated. No such building had ever been required on the Zone up to this time; therefore, there was no precedent on which to base the new building. The original floor plans showed each floor as two rooms separated by the rotunda and central wing. Just before the new organization went into effect on April 1, 1914, it became better known what departments were to be housed at Balboa, and about this time drawings were made showing the building cut up into smaller offices, but too late to prevent the many irregularities apparent in the present layout as shown in the accompanying plates.

The design of the exterior of the building adapts the Renaissance of the Fifteenth Century in Italy to modern building conditions and materials; and to local requirements.

The front and outer sides of the wings are characterized by a basement story about five feet above the ground, and a 2-storied colonnade of square columns, supporting the

third story wall and the eaves of the roof.

In the large wall area over the front entrance, at the third story level, a decorative inscription, flanked by two cartouches, has been placed. The letters are sunk in a V section and are 10 inches high; the cartouches bear the letters U. S. and C. Z. in monogram.

On account of the intensity of the sun in the middle of the day, porches were necessary to protect the rooms from direct rays, and extra large and numerous windows were required to obtain proper natural ventilation, to prevent stagnation of the humid air of the wet season. The overhang of the eaves of the roof takes the place of a porch for the third or top story, which allows of bringing the latter out over the porches below, thereby increasing the area of the third floor by the width of the porch. Porches were omitted on the court sides as a matter of economy. Besides serving the above purposes, the porches or galleries serve as corridors for public communication to and between the various offices.

The front of the building is considered as the one which faces the Canal and the town of Balboa, in which all the public buildings, shops, and, in fact, all the important buildings of the Zone are located. On account of the precipitous grades of the terrace on this side, roads were impossible, and for this reason, the carriage entrance was placed at the rear where vehicles could approach it at an ordinary grade.

THE TERRACES.

The building is surrounded on all sides by wide concrete paved terraces, set off at the front by panels of lawn running longitudinally, and bounded by concrete balustrades at the outer edge. The center of the court side is taken up by a large circular panel of lawn sloping easily away from the building, around which, roads lead up to the *porte cochere*, and to the wagon doors of the Paymaster's and Collector's offices in the wings. The latter roads are four feet above the main court level at the ends of the wings, making necessary a low retaining wall, which is crowned by a balustrade. On the center line of the ends of the wings, a short flight of steps leads from this upper level down to the main court; concrete sidewalks connect all the entrances of the building with the main highways and with the steps leading down to the railroad station.

The paved terrace at the front of the building is 50 feet wide to the center of the balustrade; the southeast side is 16 feet wide, and the northwest side is 12 feet wide; all are bounded by the type balustrade. The latter is constructed of pre-cast base mouldings, pedestals, balusters, and cap mouldings, all reinforced and cast in plaster moulds. They were set up, hooked together with steel, and grouted in, after which all joints and defects were pointed up. The balusters are four and one-half inches square, with plain small caps and bases; there will be approximately 1,000 of them used. The same type balustrade will also be used on the ramp retaining walls at the foot of the main front steps. At intervals, cast iron lamp standards will be placed on the pedestals of the balustrade.

FLAGSTAFF.

On the broad terrace of the southwest, or town front, of the Administration Building, a reinforced concrete flagstaff has been constructed, on the main axis of the building and

59 feet away from it. Its position at the head of the spacious flight of steps from the terrace to the main townsite gives it added prominence, and it can be seen from a considerable distance. The top of the pole is 70 feet above the terrace level; the foundation extends 12 feet below it and rests on natural soil. It is 16-sided, and has a diameter of eight and one-half inches at the top and 17 inches where it joins the ornamental base.

It is reinforced longitudinally by eight square bars, which are one and one-half inches in diameter at the base, graduate down to three-fourths of an inch at the top, and are welded together at intervals to form continuous rods from top to bottom. The welds are staggered, so that they do not all come at the same elevation. Horizontal reinforcement is obtained by the use of hoops of $\frac{3}{4}$ -inch square bars spaced every four inches. The concrete was a 1:1:2 mixture, using Chame sand and Ancon rock; and about two cubic yards were used for that part of the pole above ground, excluding the spreading base members.

The pole was cast horizontally on the ground in wood forms, which had to be constantly adjusted to keep the pole in alignment, due to the settling of the fill on which the forms were set up, and to blasting in the neighborhood. Eighteen days after pouring, it was erected; stresses were developed during the erection much greater than would be caused by a hurricane of 100 miles per hour velocity.

The lower 10 feet of the pole consists of a spreading octagonal base of flutes and plain mouldings, with a seat and platform at the bottom. These members were all pre-cast and set up after the pole was erected. They are about three inches thick and heavily reinforced with mesh. The pole itself received a thin coat of stucco after erection to true up the arrises and to remove all form marks.

To the top of the pole is secured a very heavy, cast brass pulleyless block, through a groove in which slides the flag halyard, and through the center a 1-inch brass rod projects three feet, carrying a 12-inch copper ball, double gold leafed. The center of this ball is about 167 feet above sea level. At the base, the halyard passes through the cap moulding and is secured to a cast brass cleat directly below it.

THE MAIN OUTSIDE STAIRS.

On the center line of the building, starting at the flagstaff, a broad concrete stair leads from the main terrace to the Prado below, where it gives on to the plaza at the foot of hill. It is 40 feet wide at the main portion, dividing into two smaller parts where it meets the semicircular base of the flagstaff; at the bottom inclined ramps, normal to the main stair, carry the traffic off to either side of the plaza. A retaining wall, crowned by a balustrade, carries the two ramps from the lowest platform of the main stair down to the plaza level.

The stair has four flights and two ramps. The semicircular flights at the top are 20 feet wide and have 18 steps each, while the three main flights have 30 steps each, and are 40 feet wide. The proportion of rise to tread is six inches to 13½ inches, each tread having a wash of one-fourth of an inch.

Each platform is drained by a cement gutter, under a concrete grille, through the cheek wall, 21 feet six inches wide, on either side of the steps to the earth terraces on either side.

Electric lighting standards of cast iron will be placed at each side of all the landings and on the lower ramp walls.

DETAILS OF THE BUILDING.

Common in the States, but unique for the Zone, is the basement under the entire structure, made possible by the high location and good drainage of the site, and the solid construction of the masonry walls and floor. It adds an extra floor, or 25 per cent of the total floor area of the building, at a great saving in cost.

The plan of this building, as has been stated, has the form of an E, the main building being 326 feet eight inches front by 55 feet eight inches wide, with two large end wings 122 feet seven inches long by 55 feet eight inches wide, and a smaller center wing 32 feet six inches long by 43 feet wide.

From the finished basement floor to the finished first floor is nine feet six inches. The first floor is exactly 100 feet above mean sea level, and about five feet above the surrounding grade, when finished. From the first to the second floor is 15 feet, and from the second to the third is 14 feet six inches. The third story is 13 feet seven inches clear.

The entire central wing is devoted to service and circulation, no office space occupying any portion. The dominant feature is the central rotunda, running up through the entire building, and encircled by a continuous corridor, off which other corridors lead to the offices and other rooms. It is entered on the first floor from the front, or town side, through the wide porch which overlooks the town, and on the rear, or court side, through the *porte cochere*, or carriage entrance. In that portion of the wing which projects beyond the main building, are the main stairway, the stair hall adjoining the rotunda, the elevator, toilets, the watchman's room and storerooms, the stair to the photographer's studio just under the roof, and the mail chute.

The building is entered from the front and the *porte cochere* through double sliding doors constructed of mahogany, with perforated panels, behind which are glass sash, hinged for cleaning. During the day, these doors are pushed back out of the way, and only the screen doors are used. The vestibule within leads, by an enclosed stair, down to the basement and on either side up a few steps to the main stair hall and rotunda. The floor of the rotunda is of marble and mosaic, the field being of white Italian marble mosaic in $\frac{3}{4}$ -inch squares, laid in the so-called fish scale pattern, radiating in concentric units from the red Numidian marble disc in the center. At the walls, a border of pink Tennessee marble, six inches wide, forms a stop for the mosaic and a transition from the latter to the vertical base of Verde Antique marble, six inches high, which skirts the wall and forms a plinth for the eight columns flanking the four openings on the main axes. The shafts, bases, and caps of these columns are cut from three blocks of Pavanazzo (Italian) marble, polished to a gloss to bring out the color and veining. Throughout the central wing, all marble work, where it has a vertical exposure, *i. e.*, where it is not used as a flooring material, has had the surface polished.

The floors of the entrance vestibule, the main stair hall, stair platforms, and the corridor around the rotunda, have floors of material similar to the rotunda, *i. e.*, marble mosaic

field, pink Tennessee border, and Verde Antique base.

Above the marble base, the walls of the rotunda are of hard cement plaster, with a moulded base and rusticated courses up to the under side of the cornice at the second story floor level. From this point upward, the walls, string courses, balconies, window architraves, cornice, and dome are of plaster of paris (lime plaster.)

On the first floor, the rotunda is pierced by eight openings, four main rectangular doorways, flanked by the marble columns mentioned above, and four smaller round-headed openings centering on the niches in the opposite wall of the rotunda corridor. At the second floor, there is a window over each of the large openings below, protected by a small balustrade. In the panels between these windows, will be four paintings in oil, completely filling them and depicting various phases of construction work and progress in the building of the Canal; below these, the continuous frieze, about three feet high, will contain another canvas showing, on a smaller scale, other characteristic scenes along the line of the Canal during construction days.

The subjects of the four paintings in the large upper panels are "The building of a lock gate," "Construction of a lock," "Construction of Gatun Dam," and "The digging of Culebra Cut."

The main stair treads and risers are of Tennessee marble, the stringer or cheek piece of Verde Antique, and the balusters, base, and handrail composing the railing, of mahogany, all turns being made continuous without newels or other breaks. At the walls, a Verde Antique cheek piece and cement wainscot follow the rake of the stair.

The building is constructed as follows: Mass concrete foundations resting on a bed of decomposed rhyolite, steel skeleton, reinforced stone concrete floor arches, four inches thick, and reinforced sawdust concrete roof arches of the same thickness. All stairs throughout are of reinforced concrete construction.

The curtain walls are of concrete blocks and the spandrels of poured concrete; the roof cover is hard burned clay tile, dark red in color, and of the Spanish S pattern, fastened to the sawdust concrete slab with hardened copper nails.

Floors throughout the office portion are of edge-grained yellow pine, fastened to redwood sleepers, imbedded in cinder concrete. Floors of corridors and porches are of red Ruabon quarry tile, six inches by six inches, with joints, door saddles, and wall base of cement.

The walls and ceilings are lime plastered, except the walls of the rotunda and main stair hall, as before stated, and the wainscot of the corridors and Board Room, which are of white cement plaster. All exterior wall surfaces are plastered in cement stucco, float finished.

The doors, frames, sash and trim throughout are of solid mahogany, rubbed finish, with solid brass hardware.

The marble work of the rotunda and stair hall is as mentioned above.

The toilet rooms are finished with white tile wainscot and floor, and pink Tennessee marble partitions, nickel plated brass fittings, and mahogany doors.

Three fire and burglarproof money vaults are installed, and two fireproof storage vaults have been constructed in the basement. The building is equipped with a passenger elevator,

a vacuum cleaner system connected to a vacuum pump of 6-sweeper capacity, a complete system of fire lines with six risers and outlets on each floor, all outlets having 75 feet of 2½-inch linen hose attached; also, an automatic fire alarm system, watchmen's clocks, a system of selfwinding clocks, and a mail chute.

General service rooms and apparatus have been concentrated in the two angles formed by the wings and the main building on all floors. Here are located the service stairs enclosed in a concrete well, toilets for men, janitor's closet containing slop sink, and closet containing the panel board which controls the lighting of the nearby rooms. In a conspicuous place on the outer or exposed wall is a fire alarm of the contact type, while to an outlet provided in the wood base, the portable hose of the vacuum cleaner system can be attached and carried into any of the adjacent rooms or halls. On the wall is also an annunciator box, with two colored messengers in attendance to answer buzzer calls from nearby offices.

The elevator car is five by seven feet, and is of mahogany with walls and ceiling paneled and finished to match the woodwork of the building. It has a speed of 125 feet per minute, a travel of 39 feet, and has nine separate safety devices. While it is essentially a passenger elevator, it can lift freight weighing up to 2,500 pounds.

Enclosing the shaft on the three principal floors is a cast and wrought bronze screen, with two doors, one fixed and the other sliding, and above these a stationary transom grille. For the removal of bulky freight, the entire lower portion, including both doors and the transom bar carrying same, have been hinged at one side, so that by releasing a bolt the full width of the car can be had at the doorway. The doors have been backed with glass to prevent persons from meeting with accidents, and to prevent tampering with the latches.

The two cash or money vaults in the Paymaster's office together with the one in the Collector's office, are of the most modern construction, and are burglar and fireproof. They rest on a bed of steel rails interlocked and connected to form a solid steel floor, the whole being grouted in with cement after erection. The side walls and roof are constructed in the same manner as the floor.

The vault proper is a steel box entered through a single outer door, vestibule, and two inner doors. The floor, walls, ceiling, and vestibule are of laminated construction, three distinct layers of specially treated steel plates forming the shell.

The main or outside door is five inches thick and weighs about four tons. It is built up of five separate plates of various kinds of steel, the outer one being capable of resisting the oxy-acetylene torch, while the others are designed to be drillproof. The edges of the door are tongued and grooved, ground to a perfect fit, and have a fibre packing, so that no tool can be forced into the joint between the door and its jamb when closed. As a further preventive of such a contingency, a pressure system has been installed on the outer face of the door, which forces the door to a dead fit, making it impossible to get even a knife blade or liquid explosives into the joint.

Running around the four sides of the back of the door is a series of very heavy steel bolts, which lock the door into position when closed. These are actuated by a mechanism controlled from the front of the door and connected to a time clock on the back, which can be set, so

that only at a given time can the door be opened, and then only by operating the combination. The inner door is in two leaves and of lighter construction. During the day, when the vault is in use, both inner and outer doors remain open, so a day gate has been placed between the two, completely filling the opening and preventing any intrusion. It is of steel bars, forming a grille, and is operated by a key. Each vault has a fixed electric light in the ceiling, a portable hand lamp, and an electric fan.

The basement of the building is devoted principally to the storage of records, files, supplies, and general articles not in constant use. For this purpose two large fireproof vaults have been built, one for the use of the Accounting Department, and one for general fireproof storage. Both have steel doors.

In addition to the above, the Meteorological and Hydrographic Section has been assigned to a large room in the northwest corner, in which two sets of Bosch-Omori seismographs have been set up for the recording of earth tremors and quakes. Each set has two separate instruments, one recording north-south, and the other east-west vibrations. One set is adjusted for heavy and violent shocks, while the other, more delicate, is sensitive to the lightest tremor. All the instruments rest on solid concrete foundations, which carry down to bedrock, and are insulated from the building by an air space where they pass through the floor.

The southwest corner is occupied by the blueprint room in which the larger part of all the blueprinting on the Isthmus is done. Both artificial and natural lighting is used, and special tanks and equipment have been installed for this work. In one corner of the room a small metal dumbwaiter connects it with the main drafting room on the third floor, expediting the ordering and delivery of blueprints. The capacity of the plant is about 1,250 square feet per day, and prints can be made as wide as 42 inches, and of any length.

Adjoining the blueprint room and occupying the larger part of Wing A (southwest wing), is the general record and storage room of the Accounting Department, which has a large fireproof vault, as well as the open room, for the filing of records. For facility in the handling of papers, documents, etc., a book lift has been installed connecting this room with the main offices of the department on the floor above. This part of the basement also contains a room in which a Hressograph has been installed, together with accessory equipment.

At the further extremity of this wing, the telephone section occupies two rooms, which have direct access to the outside of the building, via the stairs which lead to the first story porch. One is used as a storage battery room, and the other as a workroom. From the latter, a large cable runway runs to the Balboa Heights exchange on the third floor.

The portion of the basement under the main building is occupied by the general files, and under the rotunda, a large fireproof vault houses the more valuable records.

Under the main stair hall in the central wing, are located the elevator shaft and its electrically driven machinery, the transformer for converting 2200-volt, single phase, 25-cycle to 110-volt, 3-wire, for use in light and power, and the vacuum cleaner pump.

A small printing plant for local use in the building, such as lettering drawings, printing

small blank forms, etc., a room for stationery and other expendable supplies, and a large lunch room occupy the greater part of Wing B. A toilet for blacks adjoins the service stair in the corner.

On the first floor, the north half of the main building is given over to the office of the chief timekeeper. A small vault has been provided in the space made by one of the rotunda cutoffs.

In the north wing, the claims bureau of the Accounting Department, and the Paymaster's office, require all the available space. In the latter office, there are two money vaults, described elsewhere, and pay windows opening on the porch where lines can form. Money is delivered by wagon at a special door facing the court and approached by a road.

Opening off the rotunda on the first floor, in the south half of the main building, is the Balboa Heights post-office, a branch of the Zone postal system, located in the building to expedite the dispatching and delivery of official mail. It also handles money orders, registration of mail, and postal savings accounts. In the public lobby, a bulletin board for the posting of general notices has been placed on the wall adjoining the writing desk. Three hundred and twelve metal and glass keyless lock boxes of the most modern construction have been installed in the place left for them in the dividing partition. For the safekeeping of stamps and cash, a small vault has been provided in the corner, formed by the rotunda and the walls of the rectangle enclosing the latter.

Occupying the remainder and larger part of the south half of the main building and the south wing, as well, is the accounting bureau of the Accounting Department, and at the end of the wing the Collector has his offices, with a money vault opening off one corner of the wing.

On the second floor, a central corridor opens off the rotunda and runs through the main building to the end of the north wing. On either side are ranged the offices of the heads of the various departments, the Governor having two rooms in the northwest corner. Convenient to him are the Engineer of Maintenance, Engineer of Terminal Construction, Executive Secretary, the heads of the Electrical Division, Municipal Engineering, the cable office, and the Correspondence Bureau.

On the opposite side of the rotunda the Chief Clerk of The Panama Canal, and the Record Room, occupy the main building. The south wing is divided by a corridor similar to the north wing and grouped along it are the offices of the Chief Quartermaster, Supply Department inspectors, Chief Health Officer, Chief Quarantine Officer, Section of Meteorology and Hydrography, United States Requisition Division, Constructing Quartermaster, and Surveying Officer.

The northern half of the third floor is divided into offices, separated by a corridor, similar to the floor below. Opening off the corridor are the Board Room, with its ante-room for committee meetings, the offices of the Division of Civil Affairs, Posts, and Customs, and THE CANAL RECORD, Designing Engineer of Terminal Construction, Superintendent of Schools, Superintendent of Clubs and Playgrounds, section of surveys, the library, official photographer, and the Panama railroad, the latter occupying the four offices at the end of the wing.

Occupying almost the entire southern por-

tion of the building on the third floor, is the main drafting room in charge of the Office Engineer. Here are concentrated the drafting forces of most of the departments, including the Department of Operation and Maintenance, Electrical Division, Municipal Engineering, Terminal Construction, permanent shops, fortifications, and permanent buildings. At the end of the room in the wing, the Assistant Engineer of fortifications has a private office.

In the central wing over the main stair, and just under the roof, is the studio of the official photographer, reached by a spiral iron stair in a small room opening off the upper landing of the main stair behind the elevator. It is equipped with a developing room, printing room, dry room and a large studio, with overhead light.

TELEPHONE AND OTHER FACILITIES.

At the end of the south wing on this floor, and disconnected from the rest of the building, except by stairs on the porch at the end of the wing, is the Balboa Heights telephone exchange switchboard. It consists of three sections of the Western Electric Company's relay type switchboard No. 1-N. The central energy is furnished by eleven cells of Electric Storage Battery Company's Type A.E. battery of 160-ampere hour capacity; the charging sets consist of a mercury arc rectifier and the necessary switchboard apparatus.

The main switchboard has nine operating positions, of which seven are equipped at the present time; 10-pair multiple cords are used, and the board is arranged for lamp signaling. This gives 840 multiple lines, 40 incoming trunks, 40 outgoing trunks, and 40 for local pay stations. The maximum total which may be connected to this switchboard will be 2,800 multiple lines, and eventually all telephone business within the territory between Panama, Balboa, and Corozal will be handled on this switchboard. The present telephone exchanges at Corozal and Ancon will be eliminated within the next few weeks.

The telephone exchange is equipped with a chief operator's desk, which allows the best of supervision, and in the apparatus room, a wire chief's desk has been located, with all necessary apparatus for making tests on any of the telephone, telegraph, or special circuits.

A "P. E. X." board of the Western Electric Company's Type 101 has also been installed in

the telephone exchange to take care of the telephone business from the Governor and various heads of departments. This board at the present time is completely filled up, and has in use 20 lines and 20 trunks connected to the main switchboard.

A 40-drop annunciator has been installed on the desk of the chief correspondence clerk, and six annunciators for messenger service are distributed through the building, with the drops located at the end of each wing on all three of the main floors.

Glass break fire alarm boxes are installed, two on each floor and two in the basement.

Eight synchronized clocks are installed in various parts of the building, and operated from a master clock in the telephone exchange.

The chief dispatcher's office of the Panama railroad has been located on the third floor of Wing B, and the master clock controlling all clocks on the Panama railroad is located in that office.

Such a varied collection of functions has seldom before been assembled under one roof, and the building is probably unique and not liable to be duplicated until some undertaking as great in magnitude as the Canal is to be consummated.

Hotel Aspinwall Notes.

A large number of Canal employes spent Christmas Day at the Hotel Aspinwall on Taboga Island; by night every room was taken. Some returned in the evening, but the majority stayed over Saturday and Sunday. The launch Q was inadequate to transport the visitors, and the launch *Navy No. 1* was used as an auxiliary. The Q left on its regular trip about 9.30 a. m., on Christmas Day, and the *Navy No. 1* half an hour later, both filled to their capacity. The *Navy No. 1* left Taboga at 3.30 o'clock in the afternoon, left the dredge landing at Balboa, with several more passengers, at 6 p. m., and it and the Q left again for Balboa at 8 o'clock the same evening.

The launch *Navy No. 1* will be used as an auxiliary in the transportation service between Balboa dredge landing and the hotel. It will leave the landing on Mondays, Thursdays, and Saturdays after the arrival of the 9.40

Deceased Employes.

Clarence Holder.....	47451	Barbados.....	Panama.....	Panama R. R....	1914.
Cyrus Jones, alias Geo. Powell	13234	Jamaica.....	Colon.....		Dec. 21.

Insane Employes.

Name.	Check No.	Native of	Is'hmian residence.	Employed by	Date of commitment.
Albert Sears.....	33822	Barbados.....		Mun. Eng. Div..	Dec. 23.

The estates of these deceased and insane employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against their estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

a. m. train. The launch Q will continue to run on its present schedule.

A special rate of \$1.75 per day will be made employes and members of their families, providing their stay at the hotel extends to two consecutive weeks. A number of employes expect to spend a portion of their annual leave at Taboga, and the above rate will operate as an additional inducement.

The building of a modified form of "Shoot the chute," in front of the hotel to one side of the stone steps leading to the boat landing, is under consideration. The plan is to give the chute a steep slant, and to keep a stream of water playing into it, so that a person will keep going when once started off.

New Baptist Church and Parsonage at Balboa.

The Southern Baptist Mission Board, represented on the Isthmus by Rev. J. L. Wise, has been assigned a lot in the rear of the Administration Building at Balboa Heights, on the road which turns at this point and goes around the hill, and will begin the erection of a reinforced concrete church thereon some time in January. The board was originally assigned a lot in the Balboa townsite, but it proved to be too small for the plans. The site of the parsonage is to one side of the site for the proposed church. This will be a 2-story frame building, and the materials formerly in the 1-story Baptist parsonage at Empire will be utilized as far as possible. The upper floor will be used as living rooms by the minister and his family, and on the first floor will be the kitchen, dining room, minister's study, etc. Work on the parsonage was begun a few days ago.

OFFICIAL CIRCULARS.

Storage of Automobiles and Motorcycles.

THE PANAMA CANAL, EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., December 10, 1914.

CIRCULAR No. 693:

Employes of The Panama Canal or the Panama Railroad Company, who wish to keep or store automobiles or motorcycles under or near Government buildings will be governed by the following regulations:

1. Automobiles:
 - (a) Not to be housed under buildings used as quarters, nor in wooden buildings located within 100 feet of other wooden buildings.
 - (b) In sheds or garages built of frame materials, for the storage of automobiles, and located within townsites, the maximum quantity of gasoline authorized for storage therein should be limited to 100 gallons.
2. Motorcycles:

Employes occupying Government quarters and owning motorcycles, who desire to house same underneath quarters, may be permitted to do so, provided:

 - (a) That the number of machines so housed shall not exceed one for each family occupying the building.
 - (b) That the height of the lower floor above the ground where machines are stored be not less than five feet.
 - (c) That the underneath part of the floor directly over the place where the machine is to be housed, be sheathed with roofing iron or other suitable metal sheathing.
 - (d) That a metal-lined box be provided for the storage of gasoline, lubricating oil, waste, etc. The amount of gasoline for each machine stored, not to exceed five gallons.
 - (e) When sheds or garages are to be built for motorcycles, they should be located and maintained under conditions similar to those prescribed above for automobiles.
3. Locations of garages, as well as housing facilities underneath buildings, must be approved by the district quartermaster and a representative of the Police and Fire Division.

GEO. W. GOETHALS, Governor.

Employment—Physical Examination.

THE PANAMA CANAL, EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., December 22, 1914.

CIRCULAR No. 693-6:

Circular 693-1 is amended, as follows:
1. Physical examinations of persons employed on the Isthmus for service on the gold roll will be conducted at Colon Hospital, as well as at Ancon Hospital gate. Applicants for positions at the northern end of the Canal will report for examination at Colon Hospital, unless it is necessary for them to come to Balboa Heights before employment, in which event they will report at Ancon Hospital gate.

2. No special hours are set for examination. Examining physicians will give prior consideration to sick people, in case both sick people and candidates for examination are awaiting attention. The best hours at Ancon are: 8 to 10 a. m.; 12 to 1 p. m.

H. F. HODGES, Acting Governor.

Clerks, Silver Roll.

THE PANAMA CANAL, EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., December 22, 1914.

CIRCULAR No. 666-2:

Effective January 1, 1915, the maximum rate for clerk on the silver roll will be \$60 a month. All clerks on the silver roll receiving more than this amount will be reduced.

H. F. HODGES, Acting Governor.

P. R. R. Annual Passes.

THE PANAMA RAILROAD COMPANY, OFFICE OF SUPERINTENDENT.

BALBOA HEIGHTS, C. Z., December 22, 1914.

All concerned—Please be advised that Panama railroad annual passes issued for the year ending December 31, 1914, will be honored on all passenger trains of the Panama railroad, after date of expiration until further notice.

C. H. MOSETT, Superintendent.

Special Train Service.

PANAMA RAILROAD COMPANY, OFFICE OF SUPERINTENDENT.

BALBOA HEIGHTS, C. Z., December 26, 1914.

To all concerned—In response to numerous requests it has been decided to operate special train service between Las Cascadas and Panama on New Year's Eve, maintaining schedules of Nos. 52 and 53; also, on New Year's night, maintaining schedules of Nos. 54 and 55.

There will also be special trains run from Panama and Colon, leaving 11.30 p. m., New Year's night, maintaining schedules of Nos. 9 and 10.

C. H. MOSETT, Superintendent.

Stenciling of Dump Cars.

THE PANAMA RAILROAD COMPANY.

OFFICE OF THE MASTER OF TRANSPORTATION, BALBOA HEIGHTS, C. Z., December 21, 1914.

All concerned—The following dump cars have been light weighed and stenciled:

"FOR COAL SERVICE ONLY:"

5898, 5766, 5798, 5893, 5688, 5781, 5710, 5887, 5707, 5740, 5765, 5677, 5771, 5690, 5676, 5662, 5821, 5664, 5542, 5610, 5754, 5748, 5571.

We will also stencil an additional 25 cars, in order to make an even hundred in this service.

All departments and divisions are respectfully requested to discontinue using cars stenciled as above for any other service.

A great many of these cars have been used recently for gravel, sand, and ball shipments, which necessitates additional expense of cleaning cars before same can be used for coal shipments.

Please be advised accordingly.

S. W. HEALD, Master of Transportation.

Prices for Decauville Equipment.

THE PANAMA CANAL, OFFICE OF SURVEYING OFFICER, BALBOA HEIGHTS, C. Z., December 23, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:

The Acting Governor has approved recommendation that the following prices will govern in accounting for Decauville equipment, effective as of April 1, 1914:

Bodies, each.....	\$ 3.00
Trucks, each.....	12.00
Cars, complete, each.....	15.00
Switches, single, each.....	2.00
Switches, double, each.....	4.00
Track, per foot.....	.10
Turntables, each.....	4.00
Frogs, single, each.....	3.00
Frogs, double, each.....	4.00

CHARLES L. PARKER, Surveying Officer.

Proposals for Earth Fill, Balboa Townsite.

THE PANAMA CANAL, OFFICE OF CHIEF QUARTERMAS-TER.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., January 2, 1915, and then opened for placing approximately 75,000 cubic yards of fill in certain low areas in Balboa townsite and railroad yard indicated on Division of Municipal Engineering Drawing No. 5,117, as Areas A, B, and C.

Bids must be at a price per cubic yard for the entire work.

Form of proposal, contract, and specifications, including blueprint of drawing No. 5,117 may be obtained upon written application to the office of the Chief Quartermaster. Any further information may be obtained upon application to Mr. Geo. M. Wells, Resident Engineer, Balboa Heights, C. Z.

Bids must be accompanied by post-office money order, certified check, or cash for 15 per cent of the amount bid.

Bids should be marked "Proposals for earth fill, Balboa townsite" and addressed to Maj. Wm. R. Grove, Chief Quartermaster, Balboa Heights, C. Z.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., December 28, 1914.

The following insufficiently addressed letters originating in the United States and its possessions have been received at the office of the Director of Posts, and may be procured upon request of the addressees.

- *Blackwood, Mrs. Fred W. Johnson, C. H. Jr.
- Boyce, Joseph
- Brown, William
- Burk, Chappie
- Campbell, Lieut Robt. A.
- *Cavanrough, M. C.
- Dillipil, Mrs. Clarence
- Dowell, Mrs. M. P.

COMMISSARY DEPARTMENT.

Native Meat.

By reference to the cold storage list printed below, it will be noted that native beef has been added to the stock carried by the Commissary Department. A number of reductions in the price of imported beef have also been made.

Proposals for Furnishing the Commissary Branch With Beef Cattle.

THE PANAMA CANAL.
OFFICE OF CHIEF QUARTERMASTER,

Sealed proposals will be received at the office of the Depot Commissary, Cristobal, C. Z., until 4 p. m., January 11, 1915, and then opened, for furnishing the commissary branch with 200 head of beef cattle.

Specifications may be obtained upon application to the Depot Commissary, Cristobal, C. Z.

The Government reserves the right to reject all bids, or to accept any bid in part.

Bids should be marked "Proposal for furnishing beef cattle, to be opened January 11, 1915."

WM. R. GROVE,
Chief Quartermaster.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m., on Saturdays and sailing days or Panama railroad vessels.

Cold Storage Prices.

The following retail prices of cold storage provisions will be effective December 31:

	Price.
FRESH MEATS.	
Mutton—Stewing, per pound.....	†9
Shoulder, trimmed, per pound.....	†12
Leg (8 to 10 pounds), per pound.....	†19
Short cut, chops, per pound.....	†23
Shoulder, chops, per pound.....	†14
Lamb—Stewing, per pound.....	†12
Shoulder, trimmed, per pound.....	†15
Leg (5 to 8 pounds), per pound.....	†24
Chops, per pound.....	†29
Chops, shoulder, per pound.....	†18
Veal—Stewing, per pound.....	†12
Shoulder, for roasting (not under 4 pounds), per pound.....	†15
Chops, shoulder, per pound.....	†20
Chops, per pound.....	†30
Loin, for roasting, per pound.....	†30
Cutlets, per pound.....	†36
Beef—Suet, per pound.....	†33
Soup, per pound.....	†7
Soup, bones, per pound.....	†2
Stew, per pound.....	†11
Plate, per pound.....	†12
Cornd, No. 1, per pound.....	†18
Cornd, No. 2, per pound.....	†15
Chuck roast, 3 lbs. and over, special, per pound.....	†12
Chuck roast, native (3 lbs. and over), per pound.....	†11
Rib roast, second cut (not under 3 1/2 pounds), special, per pound.....	†16
Rib roast, second cut (not under 3 1/2 pounds), choice, per pound.....	24
Rib roast, 2d cut, native (3 1/2 pounds and over), per pound.....	†15

Tenderloin, Western, choice, per pound.....	46
Tenderloin, Western, native, per lb.....	†33
Pork—Hams, fresh, per pound.....	†23
Shoulders, fresh, per pound.....	†19
Loin, chop, or roast, per pound.....	†18
Pigs' feet, fresh, each.....	8
Pigs' head, fresh, whole.....	†8
1/2 head.....	†42
Sausage, home made, per pound.....	†23
MISCELLANEOUS.	
Brains, calves' per pound.....	19
Kidneys, beef, per pound.....	13
Livers—Beef, per pound.....	13
Calf, each.....	65
half, each.....	33
Oysters, fresh, per pkt.....	†33
Steak—Hamburger, package.....	17
Hamburger, 20-pound containers, per pound.....	14
Sausage—Bologna, per pound.....	†13
Frankfurter, per pound.....	†13
Lieberwurst, per pound.....	†11
Pork, per pound.....	†17
Sweetbread, beef, per pound.....	23
Eggs, fresh, per dozen.....	†54
per 1/2 dozen.....	†27
Bluefish, per pound.....	10
Halibut, fresh, per pound.....	9
Salmon, per pound.....	6
Yeast, per pound.....	31
per cake.....	2
POULTRY AND GAME.	
Chickens—Fancy, roasting, milk fed, per pound.....	25
Chickens—Fancy, roasting, corn fed, per pound.....	24
Fowls, per pound.....	24
Fowls, light, per pound.....	21
Ducks, Western, per pound.....	25
Capons, per pound.....	30
Broilers, milk fed, per pound.....	25
Broilers, corn fed, per pound.....	21
Turkeys, per pound.....	26
Squabs, each.....	30
Partridges, per pair.....	1.30
Grouse, per pair.....	1.30
Pheasants, per pair.....	1.30
CURED AND PICKLED MEATS.	
Ham—Real York and Cumberland, per pound.....	43
Genuine Westphalia, per pound.....	50
Sugar cured, whole, per pound.....	†20
Half, per pound.....	†22
Sliced, per pound.....	†28
Hocks, per pound.....	10
Butt end, per pound.....	12
Whole, boiled, per pound.....	30
Half boiled, per pound.....	32
Sliced, boiled, per pound.....	38
Hocks, boiled, per pound.....	10
Bacon—Breakfast, sliced, per pound.....	33
Whole piece, per pound.....	32
Ham, lunch, per pound.....	40
Pork, salt, family, per pound.....	14
Ox tongues, each.....	1.42
Pigs' feet, per pound.....	7
Tongues, per pound.....	22
DAIRY PRODUCTS.	
Butter—Creamery, special, per pound.....	43
Sheffield Farms, extra fancy, per lb.....	54
Cheese—Philadelphia cream, cake.....	41
Roquefort, per pound.....	21
Young America, per pound.....	30
Swiss, per pound.....	90
Edam, each.....	29
Edam, tin.....	38
Farmesan, per pound.....	26
Gouda, per pound.....	9
Snappy, per cake.....	9
Milk, Sheffield Farms, per quart.....	†15
Fermillac, bottle.....	†25
Ice cream, quart.....	125
1/2-gallon.....	150
Cream, Sheffield Farms, quart.....	†33
pint.....	†19
1/2 pint.....	†12
VEGETABLES.	
Cauliflower, per pound.....	16
Beets, per pound.....	2 1/2
Brussels sprouts, per pound.....	†20
Celery, per head.....	5
Cabbage, per pound.....	2 1/2
Carrots, per pound.....	2 1/2
Cucumbers, per pound.....	8
Cucumbers, hothouse per pound.....	16
Lettuce, per pound.....	7
Onions, per pound.....	2 1/2
Parsnips, per pound.....	3 1/2
Peppers, per pound.....	†16
Potatoes, white, per pound.....	2
sweet, American, per pound.....	2
sweet, tropical, per pound.....	2
Yams, tropical, per pound.....	2
Turriips, per pound.....	2
Tomatoes, per pound.....	8

	Price.
Squash, per pound.....	2 1/2
FRUITS.	
Apples, fancy, per pound.....	†6
Cranberries, fresh, per pound.....	6
Grapes, per pound.....	14
Grape fruit—American, each.....	5
Tropical, each.....	3 1/2

Limes, per 100.....	40
Oranges—American, each.....	2 1/2
Tropical, per dozen.....	9
Coconuts, each.....	5
Bananas, per bunch.....	38
Bananas, each.....	5
Apples, evaporated, per pound.....	16
Apricots, evaporated, per pound.....	23
Pears, evaporated, per pound.....	23
Tangerines, each.....	1 1/2

* Indicates advance from preceding list.
**Indicates five cents allowed for return of bottle.
† Indicates reduction from preceding list.
‡ Sold only from commissaries, no orders taken for delivery.
§ Not less than 1/2 ham or 1/2 shoulder of fresh pork will be sold.

Models of Western Dump Cars for Exhibition Purposes.

A model of a Western dump car of the type used in the construction of the Canal, has been received on the Isthmus, for exhibition in connection with other Canal equipment at the Panama National Exposition. It was contributed by the manufacturers, the Western Wheeled Scrapper Company of Aurora, Ill. A similar model has been prepared by the manufacturers for the Canal exhibit at the Panama-Pacific Exposition in San Francisco.

Steamship "Freda" Returns for Repairs.

The Seeberg Line steamer *Freda*, which left Cristobal for Puerto Colombia on December 23, returned on December 28, with a broken propeller. It was dry docked on December 30, at Cristobal, for the necessary repairs.

Notaries Public.

The following are notaries public in the Canal Zone, as of January 1, 1915:

ANCON.	
Boyd, Oscar S.....	Division of Municipal Engineering
Goolsby, E. M.....	Clerk, District Court
Ohlson, Elmer F.....	Ancon Hospital Office
Williams, Charles R.....	Attorney, P. R. R.
BALBOA HEIGHTS.	
Barber, Chas. W.....	Police and Fire Division
Donnelly, John W.....	Accounting Department
Hamlin, Frank T.....	Property and Requisition Bureau
Hammer, H. H.....	Property and Requisition Bureau
Helmer, Joseph H.....	Claim Officer
Jackson, J. J.....	Supply Department
Luedtke, C. L.....	Correspondence Bureau
McNiel, Jacob R.....	Accounting Department
Morris, Evan J.....	Correspondence Bureau
Nixon, Fred M.....	Property and Requisition Bureau
Parker, C. L.....	Surveying Officer
Stephens, Fred H.....	Office of Surveying Officer
Wang, F. H.....	Post-Office
BALBOA.	
Hunter, Abel A.....	Post-Office
Hyde, W. H.....	Port Captain's Office
Kalir, John D.....	Port Captain's Office
Lindsay, C. T.....	Panama Railroad Company
Pender, W. I.....	Port Captain's Office

	2.5	12.2	3.4

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings

on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15.47 i 3.47.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls, or the purchase of supplies, may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa from the Union Oil Company at the rate of from 1,300 to 1,600 barrels per hour. The present price is \$1.25 per barrel, reduced to 60° Fahrenheit.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges for ship's laundry: Trousers and jackets, five cents each, aprons, caps; sheets, tablecloths, napkins, towels, one cent each.

Repairs to vessels may be made to any extent, except where the use of a large dry dock is required, or the turning of the largest crank shafts or longest line shafts.

Mail Dispatches.

Following is the schedule of the dispatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans, for all States. Due at New Orleans the following Tuesday.

Every Saturday to New York, for all States. Due at New York the following Friday, with the exception of the *Advance*, which is due there on a Saturday.

*Every Monday to New York, for all States, except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.

Train No. 6, leaving Panama at 11 a. m., connects with the above dispatches.

*NOTE—The sailings on Monday, January 11, February 8, March 8, and April 5 will not land mail in New York until Tuesday of the following week; hence, dispatches on those dates will only be for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and Northern California. Dispatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7.10 a. m., connects with the dispatches for the four sailings mentioned above.

Sailings of Vessels in Regular Service With the Isthmus.

REGULAR CONNECTIONS THROUGH THE CANAL.

Approximately regular services between the Atlantic and the Pacific seaboard from Boston, New York, Philadelphia, and Baltimore, occasionally Charleston and New Orleans, to San Pedro, San Francisco, Portland, and Puget Sound, and return, are maintained by the American-Hawaiian Steamship Company, with a sailing each way about every five days; the Luckenbach Steamship Company, with a sailing each way about every 10 days; Sudden and Christensen, approximately

fortnightly; the Atlantic and Pacific Steamship Company, about every three weeks; and the Boston and Pacific Line, and the Arrow Line, each sailing a vessel each way about once a month.

PACIFIC COAST CONNECTIONS.

The Pacific Mail has sailings about every 10 days between Balboa and San Francisco, with calls at Puntarenas, San Juan del Sur, Corinto, Amapala, La Union, La Libertad, Acajutla, San José de Guatemala, Champerico, Ocos, Salina Cruz, Acapulco, Manzanillo, San Blas, and Mazatlan. The company also operates a direct line between Balboa and San Francisco, with sailings about every six weeks; and a Panama-Central America line, between Balboa and Ocos, making one round voyage monthly, and calling at all the ports abovenamed between Balboa and Ocos.

The Peruvian Steamship Company maintains a weekly service between Balboa and Callao, with calls at Guayaquil, Paita, Eten, Pacasmayo, and Salaverry. Every second voyage includes Mollendo.

The South American Steamship Company's vessels sail on alternate Mondays from Balboa for Valparaiso, calling at Paita, Eten, Pacasmayo, Salaverry, Callao, Mollendo, Arica, Iquique, Antofagasta, and Coquimbo.

The Pacific Steam Navigation Company has sailings on alternate Mondays for Peru and Chile; every 10 days for Ecuador; and on alternate Mondays for Colombian and Ecuadorian ports.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro; and an additional weekly sailing to Bocas del Toro.

The Royal Mail Steam Packet Company maintains approximately a fortnightly service between Colon and England, via Cartagena, Puerto Colombia, Trinidad, and Barbados. Its service to New York, via Kingston, has been temporarily discontinued.

The Compagnie Générale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Carupano, Trinidad, Martinique, Guadeloupe, and Santander; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Carupano, Trinidad, and Martinique.

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curaçao, Puerto Cabello, and Barcelona.

The Compañía Trasatlántica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curaçao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls en route, the vessels sail from Genoa on the 8th day of each month.

Regular services maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing about every seven days, direct; between Colon and New York by the United Fruit Company twice a week, one sailing via Port Limon and Havana, and the other via Kingston; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

MOVEMENTS OF OCEAN VESSELS.

(Week ending at noon December 27.)

THROUGH THE CANAL—ATLANTIC TO PACIFIC.

Table with columns: Date, Vessel, Nationality, Line, From, For, Cargo (Nature, Tons), Canal Tonnage (Gross, Net). Rows include vessels like Indrakuals, Montosa, Belgiano, Georgian, Luckness, Director, Windber, and Colon.

*Including 500 tons of coal and 1,000 tons of coke.

THROUGH THE CANAL—PACIFIC TO ATLANTIC.

Table with columns: Date, Vessel, Nationality, Line, From, For, Cargo (Nature, Tons), Canal Tonnage (Gross, Net). Rows include vessels like Earl of Elgin, Strathorne, Allianca, Nevanan, Onito, Cape Finisterre, Pacific, Camino, Cardigan, John A. Hooper, Carolyn, and Atholl.

* For orders. †2,200,000 board feet.

*ARRIVALS AND EXPECTED ARRIVALS FROM ATLANTIC.

Table with columns: Date, Vessels, Line, From. Lists arrivals from Atlantic for dates Dec 28 to Dec 31.

*ARRIVALS AND EXPECTED ARRIVALS FROM PACIFIC.

Table with columns: Date, Vessel, Line, From. Lists arrivals from Pacific for dates Dec 28 to Jan 15.

*Vessels which will pass through the Canal.

PORT OF CRISTOBAL

*ARRIVALS.

Table with columns: Date, Vessel, Line, From. Lists arrivals at Port of Cristobal for dates Dec 23 to Dec 28.

*DEPARTURES.

Table with columns: Date, Vessel, Line, To. Lists departures from Port of Cristobal for dates Dec 21 to Dec 26.

*EXPECTED ARRIVALS.

Table with columns: Date, Vessel, Line, From. Lists expected arrivals for dates Dec 27 to Dec 30.

*EXPECTED DEPARTURES.

Table with columns: Date, Vessel, Line, To. Lists expected departures for dates Dec 28 to Jan 3.

*Other than vessels passing through the Canal, United Fruit Company's regular vessels, and vessels in regular service to the United States.

PORT OF BALBOA.

*ARRIVALS.

Table with columns: Date, Vessel, Line, From. Lists arrivals at Port of Balboa for Dec 24.

*DEPARTURES.

Table with columns: Date, Vessel, Line, To. Lists departures from Port of Balboa for Dec 21 to Dec 24.

*EXPECTED ARRIVALS.

Table with columns: Date, Vessel, Line, From. Lists expected arrivals for Dec 30 and Jan 2.

*EXPECTED DEPARTURES.

Table with columns: Date, Vessel, Line, To. Lists expected departures for Jan 2.

*Other than vessels using the Canal.

NEW ORLEANS TO CRISTOBAL-COLON.

Table with columns: Destination, Date, Day, Month. Lists routes from New Orleans to Cristobal-Colon.

CRISTOBAL-COLON TO NEW ORLEANS.

Table with columns: Destination, Date, Day, Month. Lists routes from Cristobal-Colon to New Orleans.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. To others, the subscription rate will be \$1, United States currency, per annum, in the United States and its possessions; Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Suggestions Invited From Users of the Canal.

Any pertinent expressions of opinion or suggestions from the masters of ships, the owners, or from any one else who has had to do with the passage of vessels through the Panama Canal, will be welcome. It is probable that among the masters of the several hundred ships that have used the Canal to date, there will be some who have formed ideas of their own concerning details in the operating methods now in effect, which, to their mind, might be improved upon. It is likewise probable that some of these ideas have been reduced to writing and communicated to the vessels' owners. Some of these opinions may be of merit and worthy of careful consideration by those in charge of the operating end of the Canal. It is on this account, as well as by reason of the desire on the part of the Canal authorities to cooperate in every reasonable way with the masters and owners in the passing of ships through the Canal, that the above invitation is extended. In some cases, an exchange of views on a given subject may result, which will be of mutual benefit. An epitome of such suggestions as are of particular value will be published from time to time.

Selection of New Townsite for Village of Limon.

A new townsite for the village of Limon in the Gatun River valley, up the river from Monte Lirio, was selected on December 17. Among the members of the party that went to the locality for this purpose were Mr. Ricardo Bermudez, governor of the province of Colon, Mr. Juan C. Marcelli, inspector of public works of the district of Colon, Mr. Narciso Navas, administrator of public lands, Mr. Ottorino Lorenzoni, official surveyor, and Mr. O. E. Malsbury, assistant engineer of surveys of The Panama Canal. The site selected is on a high neck of land between Quebrada Palenque and Quebrada Chinilla Chica; it extends beyond the 100-foot contour along Gatun Lake toward Santa Rita Mountain, and is entirely outside of the Canal Zone.

The representative of the Land Department of The Panama Canal, while making settle-

ments with the inhabitants, ascertained that a number of them owned cultivations on a peninsula near the island on which the present village is located, which peninsula, although outside the 10-mile limit of the Canal Zone, will come under the jurisdiction of the United States, for the reason that it is inaccessible, except by crossing the waters of Gatun Lake or lands of the Zone. In making settlements with the people having cultivations on this peninsula, they were advised that they would be given the necessary time in which to gather the crops from their last plantings, or until October 1, 1915, by which date they will have had time to harvest all their crops. In order to assure the owners of these small cultivations that they will not be disturbed, a letter of permission was given each planter to occupy the ground and gather his crop until October of next year.

Award for Motor Busses.

Award for the four motor busses for use in passenger transportation around Balboa and Ancon has been made to the Kelly-Springfield Motor Truck Company of Springfield, Ohio, delivery to be made in New York City within 75 days from the signing of the contract. The extreme length of each car will be 20 feet 10 inches, extreme width 72 inches, extreme height nine feet 10 inches, wheel base 144 inches, and width of tread 59 inches. Each car will have seating capacity for 20 passengers.

Boathouse at Cristobal Piers.

The construction of a boat house in connection with the landing for small boats at the head of the slip between Piers 1 and 2, for the use of the captain of the port at Cristobal, has been authorized at an estimated cost of \$1,970. Material recovered from the old dock structures in Colon, recently demolished, will be utilized as far as possible. It was originally intended to have the boat landing at Cristobal, between Piers 8 and 9, but when the office of the captain of the port was moved to the old offices of the Panama railroad in Colon, the new location was found to be more satisfactory. The boathouse will be 40 by 70 feet in plan, and will contain six slips, a workshop, where minor repairs to boats can be made, and a store room for keeping spare gear, lubricating oils, quarantine equipment, etc.

Panama Railroad Steamship Line Relinquishes Pier No. 52, New York City.

Pier 52, formerly leased by the Panama Railroad Steamship Company in New York City for the storage of ocean freight, has been given up. The company had two piers leased in New York, Nos. 52 and 67, but owing to its ceasing to be a cocarrier with other steamship lines, with a consequent decrease in ocean freights, No. 52 was no longer needed.

PRISONSHIP THROUGH CANAL

Historic Relic of the Australian Penal Colony Days on Its Way to San Francisco.

The old English convict ship *Success*, now owned by D. A. Smith of Philadelphia, arrived at Cristobal at 2 p. m., on Thursday, December 31, in tow of the American steamship *Cricket* of the Linderman Steamship Company. It is on its way to San Francisco to be exhibited at the Panama-Pacific Exposition, and started through the Canal on New Year's Day. The *Success* was launched at Moulmein, near Rangoon, Burmah, in the year 1790, and is the last of the prison ships used by England in the forefront of the nineteenth century in the transportation of convicts to the penal settlements in Australia. It is of the barkentine class, 135 feet long, 29 feet in the beam, with a tonnage of 380, and is constructed entirely of Indian teak, the resistance of which to decay is well known. It was first used as a trading ship between England and India, and carried its own guns as indicated by the port-holes, breeching rings, bolts, and other fittings which still remain intact. In one of its early voyages, the vessel successfully resisted an attack made by the heavily armed French picaroon *La Rosa*, in the Bay of Bengal. The shot marks received during this engagement may still be seen in the hull close to the water line.

The *Success* became a prison ship in 1802 and continued to transport convicts to Australia and Tasmania for the next 50 years. In 1852, when the vessel was at Port Williamstown, Australia, news of the gold discoveries was received, and the ship was deserted by officers and crew. Following this period, it became a stationary floating prison, and was remodeled to meet the requirements which remained unchanged to this day. In 1857, it was abandoned as a prison hulk, owing to public indignation at crimes that had been committed on board, and turned into a prison for refractory seamen. In that year, however, all of the hulks in Port Williamstown harbor were ordered removed, and from 1860 to 1863, that of the *Success* was used as a prison for women. In 1869, it was transferred to the Sir Harry Smith reformatory for boys and used as a dormitory for the more refractory of the inmates. Later, for several years it was moored in an out-of-the-way place in the Saltwater River, and used as a storehouse for explosives. Finally, all of the prison hulks were ordered sold on condition that they were to be broken up. Through a clerical error, this condition was omitted in the terms of sale of the *Success*; hence, it was spared from the fate of the other four. For a time the vessel was on exhibition at Sydney, New South Wales, but public sentiment became aroused against it on account of its prison history that several unsuccessful attempts were made to destroy the boat. It was scuttled one night, however, and sunk in the bottom of Sydney

harbor, where it remained for five years, when it was raised and again placed on exhibition; afterward, it was taken to England, and in 1912, was placed in the Glasson Dock to be prepared for its voyage across the Atlantic. The vessel, in tow of the *Cricketer*, left Balboa for San Francisco on Sunday, January 3.

First Month's Prizes Awarded for Care of Houses at La Boca.

The committee on improvements at La Boca inspected the town at various times during the month of December and has awarded prizes to the following houses:

Prize of \$5 for the best kept and neatest one-story building, without plumbing, to house No. 582.

Prize of \$5 for the best kept and neatest one-story house, with plumbing, to house No. 592.

Prize of \$5 for the best kept and neatest two-story house, without plumbing, to house No. 635.

Prize of \$5 for the best kept and neatest two-story house, with plumbing, to house No. 581.

Prize of 16 2/3 per cent rent reduction for the best kept and neatest house, with unscreened porches, to house No. 653.

The improvement in the appearance of the town and the care of the houses was not as great during the first month of operation of the committee's supervision as had been anticipated and desired, but it is hoped that progress will be accelerated during January.

Earth Fill at Balboa Townsite.

Bids for placing approximately 75,000 cubic yards of earth fill in certain sections of the Balboa townsite were opened in the office of the Chief Quartermaster at Balboa Heights on Saturday, January 2. Several proposals were received, the lowest being that of William Bodette, whose offer was 30 cents a cubic yard. The contract has not yet been awarded. The terms call for the excavation, transportation, and placing of material to desired lines and grades; and provides for an increase in the above amount by 20 per cent, if necessary. Approximately 45,000 cubic yards are to be placed in the flat between the concrete quarters and the railroad tracks to an average

depth of about 18 inches. Between 9,000 and 12,000 cubic yards will be required on the low ground in the vicinity of the new Balboa railroad station, with a fill varying from six inches to four feet, and the remainder in a portion of the area formerly occupied by the Panama railroad as a storage yard. The material is to be obtained from the borrow pit at Diablo Hill, and must be free of rock above three feet in size.

The contractor will be allowed the use of the existing railroad tracks of the Panama railroad and The Panama Canal between Corozal and Panama, and will be permitted to extend for his own use such of these tracks as may be necessary for the advantageous handling of his rolling equipment. He will be required to employ train crews qualified to operate on the main line of the Panama Railroad Company, as required by the rules of that company. Train movements will be subject to all rules and regulations obtaining in similar movements of the rolling equipment of the Panama railroad, and such trains will be given similar rights-of-way as are afforded trains of the railroad and the Canal.

The Panama Canal will furnish the contractor free of charge such railroad equipment as may be available for use in this work, and will supply him with such tools and miscellaneous equipment as may be required, at price book prices, plus 15 per cent. This only applies, however, to such tools and equipment as have been used, but these will be placed in good condition prior to issuance. They may be returned to the Canal, upon successful completion of the contract, on the basis of 80 per cent of the price charged for same.

Docks 13 and 14 to be Used as Temporary Oil Docks.

It has been decided to use docks Nos. 13 and 14, Cristobal, temporarily, in discharging oil cargoes and delivering oil to vessels. This will require a deepening of the berths alongside these docks to 30 feet. The suction dredge *Caribbean* has been assigned to this work.

The launch *Patrol* stationed at Cristobal, and the launch *Pioneer* at Balboa, have been transferred to the Dredging Division, together with their crews.

NEW BALBOA COMMISSARY.

Second and Largest of the Permanent Type to be Erected.

The new Balboa commissary, situated near the intersection of Balboa Prado with the old Balboa road, will be the largest building of its kind in the Canal Zone, and is the second commissary of the permanent type to be erected, that at Ancon being the first. It is of two stories, 122 feet four inches by 73 feet eight inches in plan, with a total floor space of 23,944 square feet, exclusive of the unloading platform, and is constructed of hollow concrete blocks and poured concrete. It is practically fireproof, the only destructible materials used in its construction and furnishing being the door and window trimmings, some of the doors, and the counters and shelving. Work on the structure was begun on September 16, 1914, and on January 1, 1915, it was about 75 per cent completed.

Front elevation—The front faces toward the east, and contains the two main entrances, setting back four feet, so as to form vestibules five feet four inches by four feet in size, and seven plate glass display windows, each five feet four inches by six feet six inches in size, one located on each side of the two main entrances, and the other three in the center of the building, the latter separated by 8 by 10-inch square columns. These windows are all trimmed in mahogany, are covered over with a roof of metal lath and plaster, and have window seats, one foot four inches above the floor and four feet wide, allowing adequate space for the showing of goods. A terrace 63 feet six inches long by five feet one inch in width, provided with heavy concrete balustrades, eight inches wide and one foot four inches high, extends clear across the front and from this two sets of eight steps each lead down to the ground. Electric conduit has been placed in the top rail of this balustrade for future use.

On the second floor in front, there will be three window openings, each 10 feet 10 inches by five feet 10 inches, and panel work in plaster in which will be lettering denoting that one side of the building is for silver, and the other for gold employees; the silver entrance, as designed, will be on the side nearest to the Balboa road, and the gold entrance on the side nearest the townsite.

South elevation, Sosa Hill side—The lower floor on this side will be provided with 10 window openings, 10 feet 10 inches by five feet 10 inches, with sills eight feet seven inches above the floor, allowing clearance for the interior shelving; one window opening, five feet four inches by seven feet one inch, with a transom above, three feet four inches by five feet one inch; one window opening, five feet four inches by five feet 10 inches, and one door opening, five by seven feet, fitted with a set of double doors. This door opening has a sidelight, two feet five inches in size, on each side, and double transoms above both sidelights and door, making the total dimensions of this opening, 10 feet 10 inches by 14 feet five inches.

On the second floor on this side, there are eight window openings, 10 feet 10 inches by four feet seven inches, with sills eight feet five inches above the second floor level, and one window opening, five feet four inches by five feet 10 inches.

Rear elevation, west side—On the lower floor on this side, there will be one window opening

Deceased Employees.

Insane Employees.

Name.	Check No.	Native of	Isthmian residence.	Employed by	Date of commitment.
Marino Rodriguez		Nicaragua	La Boca		Dec. 28, 1914.

The estates of these deceased and insane employees of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against their estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

10 feet 10 inches by four feet seven inches, located eight feet above the floor; one window opening, five feet four inches by four feet seven inches, in the men's toilet; one door opening, 10 by eight feet, fitted with a roller steel door, leading from the unloading platform into the first floor store room, and two door openings, each three feet by seven feet six inches, leading into the double toilet for men.

On the second floor, there will be three window openings, 10 feet 10 inches by four feet

concrete platform extending into the ice chamber, and above this is a 3-foot door, which opens into the same chamber.

In the second story on this side, there are eight window openings, 10 feet 10 inches by four feet seven inches, located eight feet five inches above the second floor level, and one window opening, five feet four inches by five feet 10 inches. All window openings in the building will be glass paned.

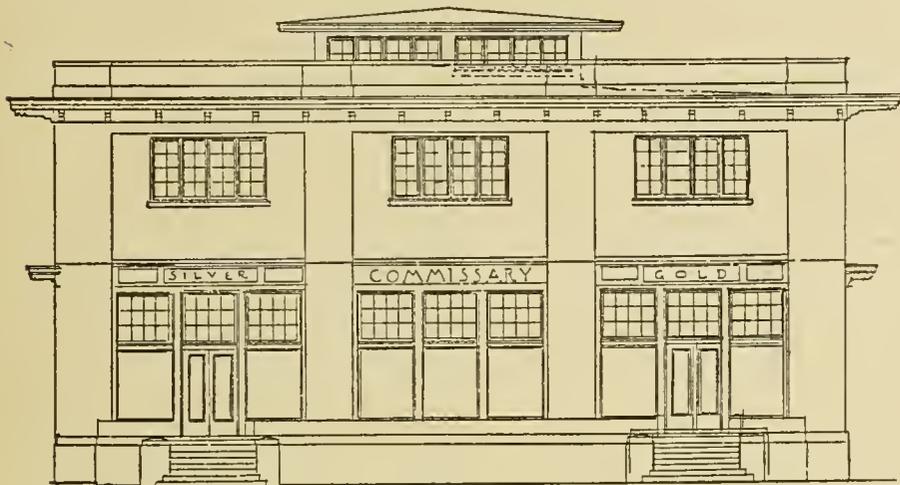

Main roof—The main roof is constructed of 5½-inch concrete slabs carried on beams, 10 by

CANAL RECORD of September 2, 1914. The roof of the monitor, which rises to a height of six feet three inches above the main roof, and is composed of 4½-inch concrete slabs, overlaid with Barrett specification roofing material and a cement finish, rests on beams approximately 10 by 20 inches in plan, with a cornice extending out three feet eight inches.

Second floor—The second floor is composed of 7½-inch concrete slabs, with a cement fill in the store room, four inches thick, making a total thickness of floor at this point of 11½ inches. The entire floor rests on concrete beams running crosswise of the building; they are 12 by 27 inches in plan, are spaced on 15-foot centers, and are supported on the inside of the commissary by a row of round columns, 17 inches in diameter, running through the center, and in the main walls, on square concrete columns, 16 by 16 inches in plan. The floor in the store room will have a cement finish; behind all counters there will be a wood floor, and in the space for customers, there will be a 6 by 6-inch red tile floor, spaced one inch between. The counters will be set in concrete bases, five and one-half inches high from the floor, thereby complying with sanitary requirements. Near the front end, there is a space, 24 by 31 feet in size, encircled by a mahogany-trimmed balustrade, for use as an office, and for the stairways to this floor. The principal divisions on the second floor are the sales-room, which will be devoted to dry goods, notions, etc., and the store room.

Office floor—This floor is 10 feet six inches above the first floor, and rests on two beams, 12 by 24 inches in plan, and two beams, 12 by 16 inches in plan, the latter running lengthwise of the building and extending out under the main staircase, where they rest on square concrete columns, 12 by 12 inches in plan. This floor is reached by a double staircase, which turns and goes up to the second floor, and also by an iron spiral stairway in the rear of the office part, for the use of employes.

First floor—This floor is similar in construction to the second floor. It rests on concrete

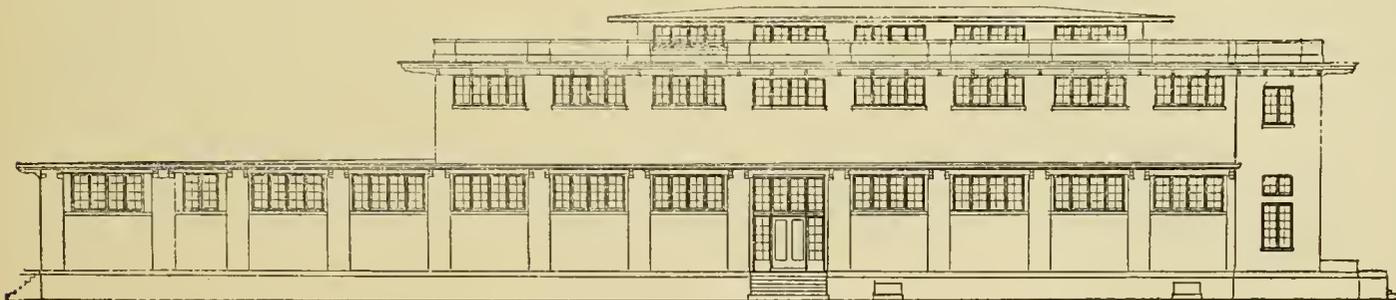

FRONT ELEVATION.

seven inches, located seven feet above the second-story floor level.

North elevation, Balboa side—On the lower floor on this side, there will be five window openings, 10 feet 10 inches by five feet 10 inches; one window opening, 10 feet 10 inches by four feet seven inches; one window opening, five feet four inches by four feet seven inches; one window opening, five feet four inches by seven feet one inch; one transom opening, five feet four inches by three feet

23 inches in plan, spaced on 15-foot centers, resting on two rows of round columns, 14 inches in diameter, running through the center of the building. In the main walls, these beams rest on square reinforced columns, 12 by 12 inches in plan. The roof extends out over the main walls for a distance of six feet four inches clear around the main part. In line with the building walls, there is a parapet wall three feet seven inches high, composed of concrete blocks. A cornice, three feet six

ELEVATION ON SOSA HILL SIDE.

four inches; two openings, fitted with sliding doors, each five feet four inches by eight feet two inches, into the vestibule of the refrigerator, with two transoms above, each five feet four inches by two feet 10 inches; one door opening, eight by 10 feet, fitted with steel roller doors, from store room to unloading platform; one door opening, five feet three inches by eight feet, fitted with roller door, from platform to elevator; one door opening, eight feet by three feet eight inches, from the refrigerator into the refrigerator vestibule, and one side entrance door, three feet six inches by seven feet, from which a flight of narrow steps leads to the ground level. Over the door leading from the refrigerator into the vestibule is a

inches wide, consisting of brackets and panel work of poured concrete, with cantilever reinforcing, projects out from the second-story level, around the building, including the unloading platform, to within 12 feet six inches of the front end. The roof is constructed with a pitch of ½-inch to the foot, to furnish sufficient fall to drain rain water into the eight 4-inch leaders connected with the sewer.

Monitor—For light and ventilation, a monitor, 24 by 75 feet in plan, has been built in the center of the main roof. It is provided with 14 casemates, 10 feet 10 inches by three feet four inches in size, to be opened and closed by a sash operating device similar to the one used in Ancon commissary, described in THE

beams, 12 by 37 inches in plan, spaced on 15-foot centers, which, in turn, rest on foundation piers sunk to depths varying from 10 to 36 feet.

Interior arrangement of first floor—The first floor is provided with a store room, a room for the sale of ice cream and cold storage supplies, a refrigerator, and a salesroom. The store-room in the rear is 55 by 73 feet in size, inside measurement, has a cement finished floor, and is equipped with 3-foot shelving. On the south side of the building is a room, 30 by 35 feet in size, for the sale of ice cream and cold storage articles to silver employes, and opposite it is the refrigerator, 24 by 30 feet in size. Between the two last mentioned rooms

is a hallway, 12 feet wide, provided with suitable door openings, leading from the main salesroom into the store room. A concrete staircase has been placed between the refrigerator and the elevator shaft, which leads to the second-story store room.

The elevator is of the plunger type, and will be provided with a car six feet four inches by six feet in size; it will have a rise of 16 feet one inch, and will be used for carrying freight only. It will operate between the first and second-story store rooms; the shaft will be enclosed within 8-inch poured concrete walls.

In the refrigerator, two beams, resting on 8 by 8-inch square concrete columns, run through the center, forming the support for the floor of the ice chamber, which consists of 6-inch concrete slabs, having a pitch of one inch toward the drain, and covered with 1½-inch wood grading. The ice chamber walls are provided with six inches of air space, while the walls of the refrigerator are composed of six inches of poured concrete, lined with a 4-inch thickness of cork, with a 2-inch air space between. The floor of the refrigerator is of solid concrete, with a 4½-inch layer of cement on top. A concrete counter, with a marble top will extend out from the front of the refrigerator, which will also contain four glass windows for display of cold storage supplies. The refrigerator is divided into three compartments, a workroom, 10 feet 10 inches by 24 feet, a vegetable and dairy room, 13 feet eight and one-half inches by 10 feet six inches, and a meat chamber, 10 feet six inches by 13 feet eight inches; all have solid partitions between.

In the main salesroom on the first floor, the counters and shelving are so arranged as to form a natural division between the gold and silver sides. The cigar and candy counter will be placed in front of the main staircase, near the front entrances, and underneath the staircase are two small rooms for the storage of a reserve stock of goods sold at this counter.

Unloading platform—The unloading platform furnishes ample facilities for the loading and unloading of goods; it extends along the rear of the building for a distance of 54 feet six inches, and a width of 27 feet, then turns and extends directly back of the commissary for a distance of 52 feet one inch, and with a width of 16 feet four inches. On the north, or Balboa side, the platform has a length of 104 feet, and narrows in width to 11 feet six inches; the end toward the front on this side has been built to form a vestibule, 26 feet by 11 feet six inches, for the refrigerator. The roof of the platform is supported by concrete columns, 12 by 12 inches in plan, spaced on 26-foot centers, and is composed of 5½-inch concrete slabs, reinforced with wire cloth. To form sufficient fall for rainwater a cinder concrete fill has been placed on the roof, 12 inches thick at high points and about one inch thick where the 4-inch drains, 13 in number, are located. This cinder fill is, in turn, covered with Barrett specification roofing material, and cement finish. The total available space on the unloading platform amounts to 2,844 square feet.

Sunday Evening Dinner Concerts at Hotel Washington.

The Hotel Washington is planning to have an orchestra play at dinner on Sunday evenings, and will commence January 10. Although the *a la carte* menu has been discontinued, one can still get planked steaks or other special dishes by ordering in advance. All

kinds of sandwiches, soft drinks, ice cream, cakes, and tea can be had at any time during the day up to 10 p. m. Arrangements may be made for special dinners, lunches, weddings, ball suppers, etc., at reasonable rates.

The prices for meals are, as follows: Employees, all meals *table d'hote*, 75 cents; non-employees, breakfast, 75 cents; lunch, \$1; dinner, \$1. All prices are in United States currency.

United States Civil Service Examination, Panama Canal Service (Male.)

The United States Civil Service Commission announces an open competitive examination for clerk, for men only, on February 14, 1915, at Balboa Heights, C. Z. From the register of eligibles resulting from this examination appointments will be made to fill positions of shop checker in the Mechanical Division, Panama Canal, at salaries ranging from \$1,200 to \$1,500 a year, and vacancies as they may occur in positions requiring similar qualifications, unless it is found to be in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

The examination will consist of the following subjects, which will have the relative weights indicated:

SUBJECTS.	Weights.
1. Spelling—(20 words of average difficulty in common use).....	10
2. Arithmetic—including the four fundamental rules of addition, subtraction, multiplication, and division, common and decimal fractions, compound numbers relating to weights and measures, and percentage, including simple interest).....	20
3. Letter writing—(a letter of not less than 125 words on some subject of general interest. Competitors may select either of two subjects given).....	20
4. Penmanship—(the legibility, rapidity, neatness, and general appearance of the competitor's handwriting in the subject of copying from plain copy).....	15
5. Copying from plain copy—(a simple test in copying accurately, in the competitor's handwriting, a few printed lines containing tabular matter).....	15
6. Time—(consumed in examination)...	20
Total.....	100

In rating the element of time a credit of 70 will be given if the basis subjects of the examination are completed in four and one-half hours, which is the maximum time allowed. For each interval of five minutes less than the maximum time a credit of one in addition to 70 will be given. For completing the examination in two hours, or less, the maximum rating of 100 will be given. No credit will be given for time unless the average percentage on the remaining subjects is at least 70.

Each applicant will be required to attain eligibility on one or more of the following optional subjects:

1. Typewriting, including the typewriting tests of the examination for typewriter. The tests are copying and spacing, copying from rough draft, copying from plain copy, and time, and will be given weights of 4, 3, 2, and 6, respectively. Time not to exceed one hour and ten minutes.

2. Bookkeeping (embracing tests in journalizing and preparation of balance sheet in mercantile transactions.) Time not to exceed two hours.

3. General business training and experience. Rated on statements in application and corroborative evidence. Special consideration will be given to railroad experience and experience in Government offices.

4. Timekeeping training and experience. Rated on statements in application and corroborative evidence. Applicants for this optional should be quick and accurate at figures, and have had at least one year's experience in timekeeping and pay roll work, preferably on construction and engineering work where the time of a large number of men is kept. Experience with gang foreman in keeping the time of a small number of men is not considered sufficient.

Statements as to training and experience are accepted, subject to verification.

Applicants should state in answer to Question 1 of application form 1312 in which of the optional subjects they desire to qualify.

Applicants must have reached their twentieth, but not their forty-fifth birthday on the date of the examination, except that applicants who apply for the optional subject of timekeeping experience must not be over 40 years of age.

Applicants must be in sound physical condition.

Each applicant will be required to submit to the examiner on the day of the examination an unmounted photograph of himself taken within two years. An applicant who fails to present such photograph will not be admitted to the examination. Tintypes will not be accepted.

This examination is open to all men who are citizens of the United States and who meet the requirements.

Persons who meet the requirements and desire this examination should at once apply to the Secretary of the Civil Service Board, Balboa Heights, Canal Zone, for application form 1312. No application will be accepted unless properly executed, including the medical certificate, and filed with the Secretary of the Civil Service Board at Balboa Heights in time to arrange for the examination of the applicant. The county officer's certificate in the application form need not be executed. The exact title of the examination as given at the head of this announcement should be stated in the application form.

Issued December 19, 1914.

NOTE—Any employe without civil service status, whose duties are more or less of a clerical nature, although not rated as clerk, will be expected to take this examination for his own protection, in the event that any question should be raised in the future regarding his status.

Steamship "Falk" Floated.

The steamship *Falk* of the Seaberg Line, which went on the reef at Hallelujah Cays, near the mouth of the Rio Diablo, on the San Blas coast of Panama, on December 15, was pulled off by the wrecking tug *Nemesis* and returned to Cristobal on January 1. The *Nemesis* was dry docked on Monday, January 4, for light repairs.

Died.

GREEN, JAMES—At Ancon Hospital on December 17, naturalized American, age 32, unmarried, employed by The Panama Canal at various times between April 1, 1907 and August 20, 1914. Former home at Rochester, N. Y. where interment will take place.

OFFICIAL CIRCULARS.

Charge for Pangas or Whaleboats Without Motive Power.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., December 31, 1914.
CIRCULAR No. 636-3:
Effective January 1, 1915, in all vessels and companies will be charged \$1 per hour or fraction thereof, for use of pangas or whaleboats without motive power.

H. F. HODGES,
Acting Governor.

Annual Leave at Termination of Service.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., December 31, 1914.
CIRCULAR No. 632-11:
It is ruled that annual leave due an employe at termination of service may be commuted into a cash payment at the option of the Governor.

H. F. HODGES,
Acting Governor.

Use of Board Room in Administration Building.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,
BALBOA HEIGHTS, C. Z., December 30, 1914.
All concerned—Boards, committees, or others who desire to use the Board Room should consult the custodian of the building, phone No. 235, to make sure the room is not engaged for the time wanted, and so that the room may be opened and prepared for use when wanted.

C. A. McILVAINE,
Executive Secretary.

Retirement of Panama Railroad Brass Checks.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,
BALBOA HEIGHTS, C. Z., January 2, 1915.
To all concerned—All Panama railroad brass checks will be immediately retired and Panama Canal checks issued in lieu thereof. Panama Canal checks Nos. 15001 to 20000 will be immediately issued to or reserved for future issue to Panama railroad gold employes, and Panama Canal checks Nos. 80001 to 100000 for Panama railroad silver employes. All time books for Panama railroad employes for the month of January, 1915, should show both the old and the new check number for each employe. If an employe is absent for any cause during the whole month of January, both the old and new metal check numbers will be entered on the books for the month in which the employe returns to work. Employes will be allowed to retain their old brass checks until their pay checks for the month of December are presented to the Paymaster when all old brass checks will be retained by him. All timekeepers will immediately forward to the Auditor all unissued Panama railroad checks.

A sufficient number of the new series of brass checks will be sent from the Auditor's office direct to the timekeepers, storekeepers, or foremen in charge, to supply all employes now carried on their rolls and for future issue to new employes. Checks 80001 to 86000 will be issued for use of the Balboa agency, and 86001 to 92000 for use of the Colon agency. The old Panama railroad checks are not to be honored for any purpose after January 15, 1915.

H. A. A. SMITH,
Auditor, Panama Canal.

Captain of Port's Office at Balboa to Move.

THE PANAMA CANAL,
OFFICE OF CAPTAIN OF THE PORT,
BALBOA, C. Z., January 4, 1915.
To all concerned—Please be advised that on Sunday, January 10, the office of the captain of the port, Balboa, will be moved to building No. 23, new office building near the concrete dock and Mechanical Division buildings. The offices will be located on the second floor of this building.

H. V. BUTLER,
Captain of the Port.

Cash Sales.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMAS-
TER,
BALBOA HEIGHTS, C. Z., December 30, 1914.
To depot quartermaster and all district quartermasters: Effective January 1, the work in connection with cash sales handled in this office will be transferred to the storekeeper at Balboa. You will obtain your supply of cash sale slips from him, sending him copies of each completed slip.

No surplus, second-hand, or obsolete items will be sold unless prices have been approved by the Governor, through the Chief Quartermaster. Employes can purchase material direct from the

nearest district quartermaster or storehouse without securing authority from the Chief Quartermaster.

All correspondence with reference to sales of equipment and scrap will be handled, as heretofore, through this office.

WM. R. GROVE,
Chief Quartermaster.

Car Distribution.

THE PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,
BALBOA HEIGHTS, C. Z., December 22, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS:
It will be necessary to revise the distribution of cars to the several divisions and departments, effective January 1, 1915, for the three ensuing months, and you are requested to advise me at your early convenience the requirements of your department, showing the total number of each class of car you will require for the three months of January, February, and March, 1915.

For your information, I am attaching herewith a copy of car distribution statement covering this equipment for the quarter ending December 31, 1914.

C. H. MOTTETT,
Superintendent.

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 333, on Wednesday, January 13, 1915, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Tuesday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

By direction of the chairman of the board.
F. M. NIXON,
Recorder, Board of Local Inspectors.

New Publications-Bureau of Mines.

The following new publications have been issued by the Bureau of Mines, Department of the Interior:

BULLETINS.

Bulletin 76—United States coals available for export trade, by Van H. Manning. 1914. 13 pp.

Bulletin 77—The electric furnace in metallurgical work, by D. A. Lyon, R. M. Keecey, and J. F. Cullen. 1914. 216 pp., 56 figs.

TECHNICAL PAPERS.

Technical paper 76—Note on the sampling and analysis of coal, by A. C. Fiedler. 1914. 59 pp., 6 figs.

Technical paper 94—Metal mine accidents in the United States during the calendar year 1913, compiled by A. H. Fay. 1914.

Note—Only a limited supply of these publications is available for free distribution, and applicants are asked to cooperate in insuring an equitable distribution by selecting publications that are of especial interest. Requests for all papers cannot be granted without satisfactory reason. Publications should be ordered by number and title. Applications should be addressed to the Director of the Bureau of Mines, Washington, D. C.

COMMISSARY DEPARTMENT.

Proposals for Furnishing the Commissary Branch With Beef Cattle.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER,

Sealed proposals will be received at the office of the Depot Commissary, Cristobal, C. Z., until 4 p. m., January 11, 1915, and then opened, for furnishing the commissary branch with 200 head of beef cattle.

Specifications may be obtained upon application to the Depot Commissary, Cristobal, C. Z.

The Government reserves the right to reject all bids, or to accept any bid in part.

Bids should be marked "Proposal for furnishing beef cattle, to be opened January 11, 1915."

WM. R. GROVE,
Chief Quart. Master.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The goll departments of the Cristobal store will open at 7 p. m., on Saturdays and sailing days of Panama railroad vessels.

	15.1	0.3	15.3

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Goetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the

soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from Oh (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls, or the purchase of supplies, may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

It is advisable that deposits be made somewhat in excess of the anticipated charges, to cover minor charges which may not have been anticipated, such as pilotage and towage. Pilotage is at the rate of \$1 per foot of maximum draft, but is not charged on a vessel which makes the transit of the Canal without taking on or discharging freight or passengers in a terminal port. Tug service, which is at the rate of \$15 per hour, will not be charged on vessels of less than 15,000 gross tonnage.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa from the Union Oil Company at the rate of from 1,300 to 1,600 barrels per hour. The present price is \$1.25 per barrel, reduced to 60° Fahrenheit.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa. Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

Repairs to vessels may be made to any extent, except where the use of a large dry dock is required, or the turning of the largest crank shafts or longest line shafts.

The cable address of The Panama Canal on the Isthmus is "Isthmian, Balboa Heights;" in the United States, "Isthmian, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C.," for delivery in the United States.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans, for all States. Due at New Orleans the following Tuesday.

Every Saturday to New York, for all States. Due at New York the following Friday, with the exception of the Advance, which is due there on a Saturday.

*Every Monday to New York, for all States, except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*Note—The sailings on Monday, January 11, February 8, March 8, and April 5 will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will only be for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minn-

esota, Montana, Wyoming, Idaho, Washington, Oregon, and Northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7.10 a. m., connects with the despatches for the four sailings mentioned above.

Sailings of Vessels in Regular Service With the Isthmus.

PACIFIC COAST CONNECTIONS.

The Pacific Mail has sailings about every 10 days between Balboa and San Francisco, with calls at Punta Arenas, San Juan del Sur, Corinto, Amapala, La Union, La Libertad, Acapulco, San José de Guatemala, Champerico, Ocos, Salina Cruz, Acapulco, Manzanillo, San Blas, and Mazatlan. The company also operates a direct line between Balboa and San Francisco, with sailings about every six weeks; and a Panama-Central America line, between Balboa and Ocos, making one round voyage monthly, and calling at all the ports abovenamed between Balboa and Ocos.

The Luckenbach Steamship Company is operating a 10-day service between New York and San Francisco, calling at East San Pedro both ways. Its vessels handle cargo at Balboa when sufficient business offers.

The American-Hawaiian lines between New York and San Francisco, and New York and Honolulu discharge and take on cargo at Balboa when sufficient business offers. At present, a vessel of this company passes through the Canal about every third day.

Greece and Company maintain an irregular service between New York and San Francisco, calling at way ports. Sailings are made about every 12 days. A vessel plying between San Francisco and Valparaiso, calling at way ports, makes a round voyage about every 10 weeks.

The Peruvian Steamship Company maintains a weekly service between Balboa and Callao, with calls at Guayaquil, Paita, Eten, Pacasmayo, and Salaverry. Every second voyage includes Mollendo.

The South American Steamship Company's vessels sail on alternate Mondays from Balboa for Valparaiso calling at Paita, Eten, Pacasmayo, Salaverry, Callao, Mollendo, Arica, Iquique, Antofagasta, and Coquimbo.

The Pacific Steam Navigation Company has sailings on alternate Mondays for Peru and Chile; every 10 days for Ecuador; and on alternate Mondays for Colombian and Ecuadorian ports.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro, and an additional weekly sailing to Bocas del Toro.

The Royal Mail Steam Packet Company maintains approximately a fortnightly service between Colon and England, via Cartagena, Puerto Colombia, Trinidad, and Barbados. Its service to New York via Kingston has been temporarily discontinued.

The Compagnie Générale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Curacao, Trinidad, Martinique, Guadeloupe, and St. Antoin; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Curacao, Trinidad, and St. Antoin.

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curacao, Puerto Cabello, and Barcelona.

The Compania Transatlantica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curacao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls en route, the vessels sail from Genoa on or about the 8th day of each month.

Regular service is maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing about every six days, direct; between Cristobal and New York by the United Fruit Company, sailings about twice a week; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

	Sails.	Arrives.
Santa Marta.....	U. F. C., Dec. 30	Jan. 6
Panama.....	P. R. R., Dec. 31	Jan. 6
Pastores.....	U. F. C., Jan. 2	Jan. 10

MOVEMENTS OF OCEAN VESSELS.

(Week ending at noon January 3.)

THROUGH THE CANAL—ATLANTIC TO PACIFIC.

Table with columns: Date, Vessel, Nationality, Line, From, For, CARGO (Nature, Tons), CANAL TONNAGE (Gross, Net). Includes vessels like Caesar, Hawaiian, Koserik, Kusama, Cricket, Success, Virginian, Advance.

*13,400 bales, amounting to 7,102,000 pounds. †Barkentine, convict ship, in tow of the steamship Cricket.

THROUGH THE CANAL—PACIFIC TO ATLANTIC.

Table with columns: Date, Vessel, Nationality, Line, From, For, CARGO (Nature, Tons), CANAL TONNAGE (Gross, Net). Includes vessels like Santa Cruz, Mina Brea, Palena, Colon, Mexican, Pennsylvania, Strathalbyn, Cathay, J. L. Luckenbach.

*For orders.

*ARRIVALS AND EXPECTED ARRIVALS FROM ATLANTIC.

Table with columns: Date, Vessels, Line, From. Lists arrivals from Atlantic including Gen. Jno M Schofield, Damara, Procus, Ardannah, Francis Hanify, English Monarch, Saint Ursula, Charl on Hall, City of Carinh, Nairnshire, Rhodesia, Strathallan, Lya, Bauxton, Panama, Panaman.

*ARRIVALS AND EXPECTED ARRIVALS FROM PACIFIC.

Table with columns: Date, Vessel, Line, From. Lists arrivals from Pacific including J. L. Luckenbach, Boukdale, Evelyn, Olson & Mahony, August, Dakton, Ohioan, Craigina, Craiser Hall, Arna.

*Vessels which will pass through the Canal

PORT OF CRISTOBAL.

Table with columns: Date, Vessel, Line, From, Date, Vessel, Line, To. Divided into Arrivals and Departures. Includes vessels like Puer o Rico, Bologna, Falk, Nemesis, Dacia, Danube, Nionian, Wegadesk, Nar, Puerto Rico, Ocland, Freda, Bologna.

*EXPECTED ARRIVALS.

Table with columns: Date, Vessel, Line, From. Includes Legaspi, Cia Trasatlantica, Barcelona.

*EXPECTED DEPARTURES.

Table with columns: Date, Vessel, Line, To. Includes Berlin, Dicator, Danube, Legaspi, West India S.S. Co, Harrison Line, R. M. S. P. Co, Cia Trasatlantica, Barcelona.

*Other than vessels passing through the Canal, United Fruit Company's regular vessels, and vessels in regular service to the United States.

PORT OF BALBOA.

Table with columns: Date, Vessel, Line, From, Date, Vessel, Line, To. Divided into Arrivals and Departures. Includes Chile, Pachitea, Manavi, Chile, Peru, Pacific Steam Nav. Co, Pacific Mail S.S. Co, Callao, San Francisco.

*EXPECTED ARRIVALS.

Table with columns: Date, Vessel, Line, From. Includes Pennsylvania, Pacific Mail S.S. Co, San Francisco.

*EXPECTED DEPARTURES.

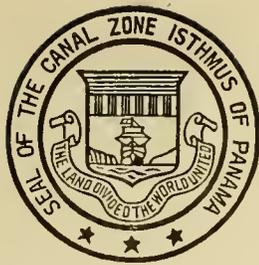

Table with columns: Date, Vessel, Line, To. Includes Pachitea, Manavi, Peruvian S.S. Co, Pacific Steam Nav. Co, Callao, Guayaquil.

*Other than vessels using the Canal.

(Continued from page 195.)

Large table with columns: Vessel, Line, Date, From, Date, Vessel, Line, Date, To. Lists various vessels and their schedules, including Santa Marta, Panama, Pastores, Zacapa, Allianca, Calamarez, Carrillo, Colon, Tenadores, Almirante, Advance, Metapan, Zacapa, Cartago, Turrialba, Heredia, Abangarez, Parismina, Atenas.

CANAL

RECORD

Volume VIII.

BALBOA, CANAL ZONE, WEDNESDAY, JANUARY 13, 1915.

No. 21.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. To others, the subscription rate will be \$1, United States currency, per annum, in the United States and its possessions; Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications.

THE CANAL RECORD,

Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

First Large Cargo of Diesel Engine Oil.

The Union Oil Company's tank steamer *Cordelia* is due to arrive at Balboa from California about January 14, with a cargo of 37,000 barrels of Diesel engine oil for local storage. Forces of The Panama Canal are engaged in laying a 6-inch pipe line from the Pacific terminal handling plant to oil crib No. 1, for the express purpose of handling Diesel engine oil, and if completed in time, it will be used in discharging the cargo of the *Cordelia*; if not, the Union Oil Company has been authorized to deliver the oil through its own 8-inch pipe line.

La Veloce to Build an Office at Cristobal.

Alot on the water front at Cristobal, situated a little to the west of the partly constructed office building of the Hamburg-American Line, has been let to the Italian Steam Navigation Company (La Veloce), under a revocable license, for the construction of a 2-story building, the first floor to be used for offices in connection with the company's local steamship business, and the second, as quarters for the resident manager and his assistants.

Sale of the Steamer "Chitre."

The steamer *Chitre* of the National Navigation Company of Panama has been sold to the Panama Government for use as a patrol boat along the San Blas coast. The vessel was built for the Panama Timber Company, in 1911, by Edwards and Company, Limited, of Millwall, England, and was brought to the Isthmus knocked down. It was originally christened the *Lillian*, but upon its sale to the Panama Steamship Company, shortly after that company was organized, its name was changed to *Chitre*, from a seaport town and port of call of the steamship line in Los Santos province. The Panama Steamship Company was recently consolidated with the National Navigation Company, and upon the consummation of the arrangement, the *Chitre* was retired from the coastal service. At the request of the owners, a board, consisting of Messrs. W. I. Pender, R. B. Sanford, and C. W. Craddock, made an inspection of the machinery

in the vessel a few weeks ago, and found it to be in fairly good condition, although a general overhauling was recommended. It was passed through the Canal this week and will be placed in dry dock at Cristobal, in order that a thorough inspection may be made of the hull at the same time the machinery is being overhauled. The *Chitre* is an iron twin screw steamer, with a length of 93 feet, moulded breadth of 21 feet, depth of seven feet, and loaded draft of five feet. Its boiler is of the Scotch marine type, with a diameter of 10 feet three inches, and length of nine feet three inches. It has a Canal tonnage of 241 gross.

Malaria Infection—Unprotected Localities.

COL. CHESTER HARDING,

Acting Governor, Building.

SIR: Although our malaria rate among employes is lower than for the corresponding month of any previous year, there is still danger of contracting this disease, unless reasonable care is taken against exposing oneself at night in unprotected localities. A large proportion of the cases which have occurred recently among white employes are directly traceable to such exposure. A recent sad and unexpected death among our female employes was almost certainly due to just such a cause. I, therefore, recommend that this letter be published in THE CANAL RECORD, for the information of, and as a warning to, all employes. Respectfully,

CHAS. F. MASON,

Chief Health Officer.

Balboa Heights, C. Z.

January 11, 1915.

Union Oil Company to Supply Fuel Oil until Canal Shipments Arrive.

The Union Oil Company has agreed to supply The Panama Canal with fuel oil after the expiration of its present contract on December 31, 1914, in any quantity that may be desired, until such time as the permanent oil handling plants are in operation, and the first cargoes of fuel oil have been received by the Canal under the 1915 contract. The price will be the same, \$1.10 a barrel. It is estimated that approximately 27,500 barrels of oil will be required from the 1st to the 15th of January, when the first shipment is expected. The quality of the oil, the conditions governing tests, etc., called for in the existing agreement, will apply to any purchases under this arrangement.

Christian Science Society to Buy Old Ancon Court Building.

The Ancon Christian Science Society has applied for the purchase of the old Circuit Court building at Ancon, together with a lease of the ground on which it stands. The committee on church sites has taken favorable action on the society's application, and has recommended that a price be fixed for the building by the Chief Quartermaster and Surveying Officer.

CANAL TRAFFIC IN DECEMBER.

Ninety-Nine Vessels Made the Transit and over \$403,000 were Collected in Tolls.

The receipts from Canal tolls for the month of December, 1914, aggregated \$411,895.44, an increase of \$24,653.04, as compared with November, the previous high month. Following is a summary of toll collections, by months or periods, up to January 1, 1915:

PERIOD.	Amount.
Period to August 15, 1914.....	\$ 11,610.69
August 15 to August 31.....	84,401.80
September 1 to September 30.....	269,863.00
October 1 to October 31.....	378,089.12
November 1 to November 30.....	387,242.40
December 1 to December 31.....	411,895.44
Total.....	\$1,547,100.45

The aggregate of cargo tonnage for December, 446,415 tons, shows a slight decrease, but these figures do not include two lumber cargoes amounting to 5,232,236 board feet, the cargo tonnage of which is not stated. The transits of vessels through the Canal up to January 1, 1915, together with the totals of cargo carried, eastbound and westbound, were, as follows:

Month	Eastbound.		Westbound.		Total.	
	Ves-sels	Cargo.	Ves-sels	Cargo.	Ves-sels	Cargo.
Aug....	12	57,182	12	49,106	24	106,288
Sept....	30	186,776	27	135,262	57	322,038
Oct....	40	252,288	44	163,069	84	420,357
Nov....	38	242,291	54	206,510	92	448,801
Dec....	57	261,650	42	184,735	99	446,415
Total.	177	1,000,217	179	743,682	356	1,743,899

Eastbound traffic refers to vessels going from the Pacific to the Atlantic; westbound, to vessels going from Atlantic to the Pacific.

Of the total of 356 vessels, 319 were laden, and 36 were in ballast or not cargo carriers.

As distributed over the principal routes on which the traffic through the Canal is moving, the transits to January 1, 1915 may be summarized, as follows:

ROUTE.	No. V'sls.	Cargo Tonnage.
Coastwise, eastbound.....	74	399,450
Coastwise, westbound.....	81	353,230
U. S. Pacific coast to Europe.....	51	351,880
Europe to U. S. Pacific coast.....	10	45,732
South America to U. S. and Europe.....	37	230,942
U. S. and Europe to South America.....	21	104,828
U. S. Atlantic coast to Far East.....	36	224,134
Far East to U. S. Atlantic coast.....	2	14,500
Miscellaneous routings.....	8	19,203
Vessels without cargo.....	36	
Totals.....	356	1,743,899

The month of December marked the passage of vessels from the Far East to the Atlantic coast of the United States for the first time. There were two, one the *Indradeo* from China and Japan, and the other the *Atchell*, from Hongkong, both for New York.

Among the principal items of cargo that were carried through the Canal in December were 91,560 tons of wheat, barley, and flour; 14,350 tons of coal and coke, 28,350 tons of nitrates, 26,903 tons of sugar, 14,600 tons of

oil and benzine, 15,556 tons of cotton, 7,300 tons of iron ore, and 5,232,236 board feet of lumber.

Office of Captain of the Port at Balboa Moved.

The office of the captain of the port at Balboa was moved on Sunday, January 10, from the Panama railroad building at the steel pier, to the second floor of the new shops office structure of the Mechanical Division. The quarters at the new location are much more commodious; the captain of the port has his private office on one side of the hall in a part of the building looking toward the Canal, with a room in front, where the assistant captain of the port, the harbor master, and the despatch clerk are stationed. On the other side of the hall is the general office, containing the desk of the chief clerk and his assistants, as well as those of the deputy inspector of customs, the deputy steamship inspector, the deputy revenue collector, a representative of the Supply Department, and a field office of the Dredging Division. Adjoining this, is an office for the admeasurers, and an office and rest room for the pilots.

Award for Metal Furniture.

An award has been made to the General Fireproofing Company of Youngstown, Ohio, for furnishing 80 steel cabinet filing cases for the blueprint vault in the drafting room on the third floor of the Administration Building, and a quantity of adjustable steel shelving for use in storing books in the library and time rolls in the basement, at a total price of \$3,093.10.

Sixty-four of the 80 cabinets for the blueprint vault are for use in filing tracings, when rolled up on wooden sticks, which are usually about three-fourths of an inch in diameter and 36 inches long. Each of these cabinets will be made up of five compartments, having a clear space of 37 inches between the front and rear, capable of containing 100 tracings, when rolled up in the manner above indicated. Each compartment is equipped with shelves, which must be able to support a load of 60 pounds to the square foot without noticeable deflection, and has a pressed steel swing door in front.

Of the remaining cabinets, 12 are for use in filing miscellaneous sketches and tracings. They will contain five drawers each, with inside dimensions of three feet four inches by 20 inches, and are to be three inches deep. They are to slide back and forth on roller bearings,

and are to be equipped with heavy brass handles. Each drawer will be provided with a metal guard to prevent the contents from being torn or otherwise injured. The remaining four filing cases will contain 15 drawers each, and in construction, will be similar to the above cabinets, except that each drawer will be 12 inches wide and 24 inches deep.

For the time roll section and library, the following shelving has been ordered: One stack six shelves high, 21 inches deep, and in four sections; three stacks six shelves high, 21 inches deep, and in three sections each; one stack six shelves high, 21 inches deep, and in eight sections; four stacks five shelves high, 30 inches deep, and in seven sections each, and four stacks six shelves high and 21 inches deep, and in eight sections each. All sections will be 36 inches in length, and the shelves must be able to support a weight of 300 pounds to the square foot.

Up to the present time, the use of metal furniture in the Canal offices on the Isthmus has not been entirely satisfactory, owing to its tendency to rust. In order to obviate this condition in the above order, it has been stipulated that all steel and iron be either electro or hot galvanized, and all small parts to be made of bronze or brass. All exterior surfaces will have an olive green shade.

Sunday Evening Dinners at Hotel Washington.

The Sunday evening dinner concerts at the Hotel Washington have been discontinued, though the Sunday evening dinners will continue to be a special feature. On the Saturday evenings on which there are no Washington Cotillon Club dances at the hotel there will be music provided during the dinner and evening. The first of these will be January 23.

"Navy No. 1" to Replace the "Q" in Hotel Aspinwall Sunday Service.

Hereafter, the launch *Navy No. 1* will replace the *Q* on the Saturday evening and Sunday service to Taboga, and the Aspinwall management hope to be able to prevent a repetition of the troubles of January 9.

Board of Admeasurers' Decisions on Exemptions.

At the meeting of the Board of Admeasurers, held January 8, it was decided that a carpenter shop on board vessel, provided it is used as such and so designated, will be entitled to deduction and will not be charged tolls. Vessels with fumigating plants will likewise be entitled to a deduction for the space so occupied.

LIGHT AND POWER SERVICE.

New Transmission System and Substations Complete—East Line in Operation.

The month of December marked the completion by the Electrical Division of all construction work in connection with the transisthmian transmission line, and the four principal substations at Cristobal, Gatun, Miraflores, and Balboa. The Miraflores and Balboa substations and the transmission line connecting them were energized on November 29, and placed in service two days later. The energizing of the east transmission line between Miraflores and Gatun was delayed until the Panama railroad could remove its overhead telephone, telegraph, and signal wires, but on December 23 this line was tested out, and the generators at the Miraflores power plant and the Gatun hydroelectric station were operated in parallel for a short time. On December 28, the load at Miraflores was transferred to the hydroelectric station, and the east line placed in permanent service. The placing of the west line in service will be effected as soon as the Panama railroad completes the removal of its overhead work. No special difficulties were experienced in placing the substations and the various parts of the transmission line in operation.

Until both sides of the duplicate transmission line are in service, steam will be kept up in five of the boilers at the old plant at Miraflores, so as to take care of any interruptions that may occur, and two generators are kept running for the purpose of power factor correction, as well as to be ready for instant service in case of peak loads or emergencies. Practically all current for the power and lighting service of the Canal is now supplied by the generating plant at Gatun Spillway, and sent over the transmission line to the various substations, where it is transformed for distribution as required. The steam plant at Miraflores assists the hydroelectric station at times of peak loads, which occasionally exceed the capacity of the turbines in the hydro station.

The permanent feeders between the Gatun substation and the hydroelectric station have been completed and placed in service, and three permanent outgoing feeders at Cristobal, eleven at Gatun, one at Miraflores, and six at Balboa have been completed and the load transferred from the former temporary feeders. The work of changing the steam generator control and excitation from the steam plant to the new substation at Miraflores has been begun. The temporary 11,000-volt substation at Balboa, which had been in service for about a year, has been dismantled; the feeders from it have been transferred to the new substation, while the transformer, switchboard, and other equipment have been installed in a box car as a portable substation for use in connection with the relay pumps at Coco Solo Point.

In order to give a clearance of at least 10 feet between the transmission line wires and the ground, a considerable amount of earth and rock excavation had to be made in cuts along the Panama railroad right-of-way between Gatun and Miraflores. This work was begun in October, and completed in December; it involved the removal of about 5,800 cubic yards of material, of which 3,900 cubic yards were rock, and 1,900 cubic yards earth.

Barge 28, assigned to the gravel service at Gamboa, sank in the Chagres River on December 28.

The estates of these deceased employees of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against their estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

JOINT LAND COMMISSION.

Rules of Dismissal.

Rule of dismissal No. 155, docket numbers as shown, December 22, 1914.—In the matter of sundry claims—The United States in its answer to the following claims stated that payment has been made for the improvements covered by such claims. At a public session held this date the claimants appeared in person and informed the commission that they have received payment in full. These claims are, therefore, dismissed on account of previous payment: Docket No. 93, Cisto Carrill (Sixto Carrilla), paid March 9, 1914; docket No. 94, Lorenzo Nedrano (Medrano), paid March 7, 1914; Docket No. 92, Manuel Valleta (Ballestre), paid March 2, 1914.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule of dismissal No. 157, docket No. 89, December 24, 1914.—In the matter of the claim of Victoria de los Rios, viuda de Jimenez, for the lands of Aguardientito—Under date of April 1, 1913, Victoria de los Rios, vda. de Jimenez, filed with the commission a claim for an interest claimed by her in the lands of Aguardientito, and for certain improvements thereon. On August 1, 1914, by motion of the claimant through her attorney, Valentine E. Bruno, the claim was consolidated with the claim of Hortensio de Leon et al, as amended, docket No. 27-1.

This latter claim was subsequently dismissed under the commission's rule of dismissal No. 140, which specified only docket No. 27-1.

This formal rule, therefore, entered dismissing the claim of Victoria de los Rios, vda. de Jimenez, docket No. 89, for the reasons specified in rule of dismissal No. 140 above referred to.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule of dismissal No. 159, December 31, 1914.—In the matter of sundry claims—With reference to the claims for improvements of the persons hereinafter named, the evidence before the commission is that they have made settlement with the United States for their houses and other improvements. The names of such persons, their docket numbers, the tax numbers, where stated, of the houses included in the settlements, and their location follow:

Dkt No.	Name.	You. No.	Tax No.	Locality.

175	Hernandez, Regino.....	3507	Escoval.
666	Hylton, Joseph.....	3344	453	Matachín.
1733	Jimenez, Inocencio.....	1037	Quebrajo, Inglesa.
1785	McPherson, Daniel.....	3218	Bohio.
208	Prima, Francois, and Marie Roland.....	2863	Majagual.
1594	Quiro, José de la Cruz.....	1661	1576	Cerro Calderon.
1698	Ramos, José.....	3510	Cienega.
1150	Segura, Valentin.....	17751	Palo Horquetu.

In view of the agreements before noted, these claims call for no further action by this commission, and they are accordingly dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule of dismissal No. 161, docket numbers as shown, January 7, 1915.—In the matter of sundry claims—In the following claims, an examination of the claims and of the documents submitted shows that whatever rights the claimants had in the properties in question arose under leases from the Isthmian Canal Commission: Mrs. St. Louis Andre..... Docket No. 98
Felipe Gomez..... Docket No. 105
Bernard Joseph..... Docket No. 107

In a decision in the case of Agusta Dunlop, rendered April 16, 1913, the commission said:

"We have, therefore, reached the conclusion that it is not within the province of the Joint Land Commission to take cognizance of claims arising out of the revocation of revocable leases or licenses issued by the Isthmian Canal Commission. Such

claims have no organic relation to the grants contained in the Treaty, nor to the international obligations which the United States has agreed to discharge under the Treaty, and for the adjudication of all such claims the claimants must seek a remedy through the procedure afforded by municipal laws."

In accordance with the foregoing decision, the claims of the above claimants are hereby dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule of dismissal No. 162, January 7, 1915, docket numbers as shown.—In the matter of sundry claims—With reference to the claims for improvements of the persons hereinafter named, the evidence before the commission is that they have made settlement with the United States for their houses and other improvements. The names of such persons, their docket numbers, their tax numbers, where stated, of the houses included in the settlements, and their location follow:

Dkt No.	Name.	You. No.	Tax No.	Locality.
106	Cabeza, Pantaleon.....	La Tula
111	Francis, Richard.....	3413	3323	Gold Hill Valley
109	Johnson, Alexander.....	332	Gold Hill Valley
110	Juliano, Florentino.....	331	Gold Hill Valley
112	Williams, Richard.....	611	313	Gold Hill Valley

In view of the agreements before noted, these claims call for no further action by this commission, and they are accordingly dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule No. 162, docket No. 5, January 8, 1915.—In the matter of the claim of Laurent Requebat for property of Chagrecito—This case has previously been heard by the commission, but in view of the fact that there are certain features of the case upon which the commission has not been thoroughly informed it is hereby ordered that this case be set for further public hearing at 9 a. m., Monday, January 18, 1915, and that the parties have the right to submit, if they so desire, further evidence and citations of authorities on the following questions:

1. What relations, if any, existed between the claimant and the United States Government prior to the entering into of the lease between the claimant and the United States Government.

2. What effect did the entering into the lease between the United States Government and the claimant have upon any rights which the claimants may have acquired prior thereto.

3. How long or for what period of time did the lease between the claimant and the United States Government remain in force, and how much, if any, rent was paid by the claimant to the United States.

4. Was there any agreement between the United States and the claimant that notice would be given to the claimant of the time that the United States desired to use and occupy the premises covered by claimant's lease.

5. What was the number and value of the rubber trees claimed by claimant at the time they were alleged to have been cut down and destroyed by the Government.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

WEATHER CONDITIONS, CANAL ZONE, DECEMBER, 1914.

Normal conditions of rainfall distribution across the Isthmus were reversed during the month of December the average monthly rainfall being higher in the Pacific section than in either the central or Atlantic sections.

Rainfall for the month was generally below normal, except along the Pacific coast. The deficiencies were greatest in the Atlantic section, amounting to nearly 50 per cent of the normal December rainfall. Monthly totals ranged from 2.25 inches at Alhajuella to 10.39 inches at the Caño station on Gatun lake. The maximum precipitation recorded in any one day was 2.22 inches at Colon on the 12th.

Average air temperatures on both coasts were the highest of record for the month of December. The relative humidity and daytime cloudiness were slightly above normal, while the atmospheric pressure and wind movement were deficient at both stations.

No fogs were observed during the month at either coast station, but night and early morning fogs were numerous at the interior stations. Of the fogs observed, 65 per cent were dissipated by 6.30 a. m., 93 per cent by 7.30 a. m., and 100 per cent by 8.30 a. m.

Elevations of Gatun Lake, (Feet above mean sealevel)—Mean for month, 86.87; maximum, 87.07 on the 24th; minimum, 86.65 on the 4th. Evaporation from lake, surface 5.933 inches.

Rules.

Rule No. 156, docket No. 1976, December 24, 1914.—In the matter of the claim of Gerardo Ortega for the lands of Barro Colorado Arriba—Under date of October 11, 1914, Gerardo Ortega, through his attorneys Fabrega and Arias, filed with the commission his claim for the lands known as Barro Colorado Arriba.

Subsequently, on November 16, 1914, the claimant filed with the commission a motion for permission to withdraw this claim without prejudice. The motion of the claimant was granted and this formal rule dismissing the claim is entered, in order that it may be properly stricken from the trial docket.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

BALBOA RAILROAD STATION.

Single Umbrella Shed with Main Building and Comfort Stations the Principal Features.

Located at a point convenient to the new Administration Building, to the east side of the main line tracks, is the new umbrella type station building for the town of Balboa. It follows parallel to the tracks and is 507 feet long, its center being coincident with the center line of the road which swings down from Balboa Heights into what will eventually be Station Plaza, an open place of the full length of the station. The original plans contemplated a corresponding umbrella shed on the west side of the tracks, but owing to the uncertain bearing power of the hydraulic

inches in level between the north and south ends of the track in the length of the station. This necessitated making the platforms and roofs parallel to the grade of the tracks, but the floors of the buildings are kept horizontal. In addition, the north end, for a distance of 137 feet, will be curved to follow the spiral curve of the track, which starts at a point 115 feet from the center line of the building. The front edge of the roof however, will run through in a straight line, as the departure of the curve is only a foot at the end of the station.

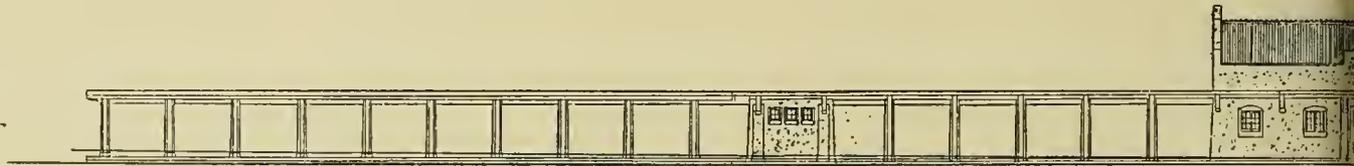

The roof of the sheds are composed of a 4½-inch slab of reinforced concrete covered by a waterproofing member of 5-ply tar and paper, and a 1½-inch layer of concrete to protect the

wainscot, and framed in with wood mouldings.

In the erection of the station, plans and specifications were prepared in the office of the Chief Quartermaster, and bids were invited from contractors for the labor only, The Panama Canal furnishing all material, except the rough material, such as concrete forms, etc. Under this method, Mr. Eladio Lasso of Panama, was awarded the contract and started work on November 15, 1914; he is to complete it within 140 days, not including any additional time which may be allowed him for delays.

Joint Land Commission Calendar.

The following is a calendar of claims set for hearing for the week ending January 16, 1915:

ELEVATION

fill on that side this shed was abandoned as impracticable.

The plan shows a single umbrella shed at either end for a distance of 130 feet, the center portion of 247 feet being of double width and containing the three buildings, i. e., the main building at the center, and the comfort stations for first and second-class passengers at the ends of the central portion, besides the waiting platforms of double width between the buildings. The center, or main building, will project above the umbrella roof of the sheds, but the comfort stations will be all below the shed roof.

In the main building the space is occupied by the station agent's office, a freight and

latter. Reinforced concrete cantilever beams, with an eccentric overhang of 14 feet on the front and six feet six inches on the rear, 12 inches wide on the face, support the roof, in bays of 13 feet each, of which there are 39 in all. The roof panels are 14 by 13 feet and have no intermediate beams, giving a clear unobstructed ceiling. The columns are octagonal, and are 11 feet six inches high, a continuous longitudinal beam, one foot two inches high by 12 inches wide, connecting them all at the top.

The main building takes in five bays of the double width platform, and is 65 feet long by 28 feet wide, with a projecting bay window on the track side for the sale of tickets and for

Monday, January 11—Docket 104, Joaquin García Soto.

Tuesday, January 12—Docket 84, Geo. B. Jones and F. E. Frink.

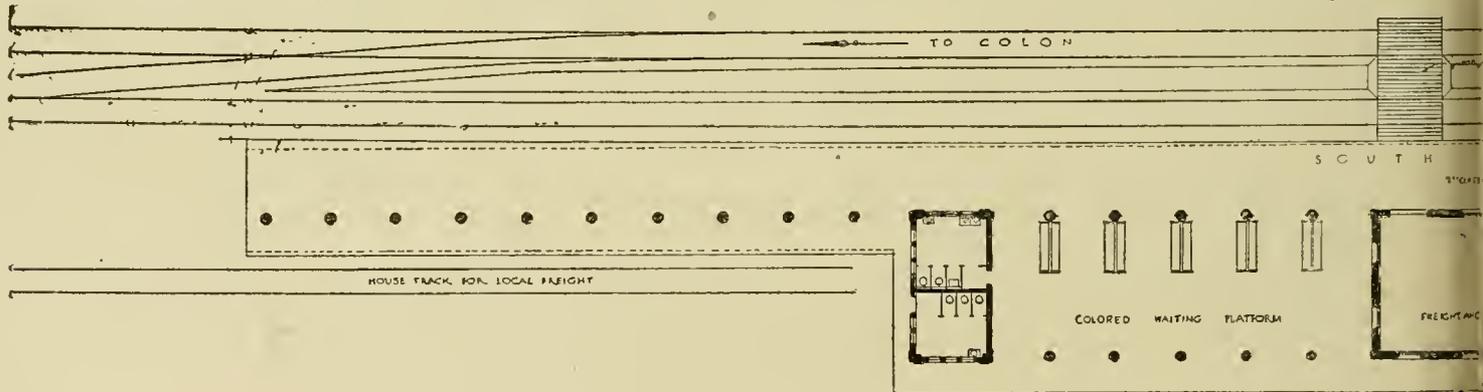

Wednesday, January 13—Docket 127, Pachita Salusada Pinel; Docket 144, Geronimo Gutierrez (Gutierrez); Docket 228, Enrique Rivera; Docket 229, Josefa Maria Alvear, Docket 235, Wigram Pierce Newsam.

Thursday, January 14—Docket 236, Guillermo Nelson and Delia Nelson de Boy.

Friday, January 15—Docket 257, Ashby 11. Bethancourt.

The following is a calendar of claims set for hearing for the week ending January 23:

Monday, January 18—Docket 258, August-

GENERAL PLAN

baggage room, and a barber shop, the latter facing the first-class waiting platform. In the comfort stations, conveniences will be installed for both sexes.

The arrangement of the plaza facing the station calls, in part, for a roadway adjoining the main portion of the station, so that vehicles can drive up to and discharge passengers on the platform under partial cover of the sheds, similar to the arrangement now in use at the Panama station.

Two telephone pay station booths will be installed for the use of first-class passengers.

CONSTRUCTION.

Owing to the existence of a grade of 0.45 per cent in the tracks in front of the building, there is a difference of about two feet six

the telegraph instruments. Hollow concrete blocks from the Corozal plant are used for the walls of all the buildings, and will be stuccoed with cement plaster outside and white plaster inside. The station agent's room will have a wood floor and base, the freight room a concrete floor, and the barber shop a tile floor with a tile wainscot four feet high. Cabinets, mirrors, lavatories, and a hot water heater will be provided in the latter room.

The roof is of wood construction, covered with red tile, similar to the adjacent buildings, and with a cornice of wood. The millwork throughout is of cypress.

The comfort stations will have tile floors, high tile wainscots, marble partitions, and wood doors. Mirrors will be set into the

tin and Manuel de Jesus Rodriguez.

Tuesday, January 19—Docket 259, Juan Gris.

Wednesday, January 20—Dockets 273 and 274, Adolphus del Valle; Docket 275, José Cullen; Docket 295, Narciso Garay, for Hurtado family.

Thursday, January 21—Docket 296, Hurtado family and Josefina and Arturo Miller.

Friday, January 22—Docket 297, Victoriano Pierre; Docket 299, Francisco Campos; Docket 301, Julian Alvarez; Docket 302, José F. Gutierrez; Docket 319, Manuel Gonzalez; Docket 321, Cristo Teodoro; Docket 325, Augustino Baldecchi; Docket 326, William Reid; Docket 327, Alexander McLean; Docket 336, José Maria Lasso.

WILLIAM TAYLOR, Secretary.

NEW ASYLUM FOR INSANE.

Permanent Institution Will be Located Back of Corozal Village.

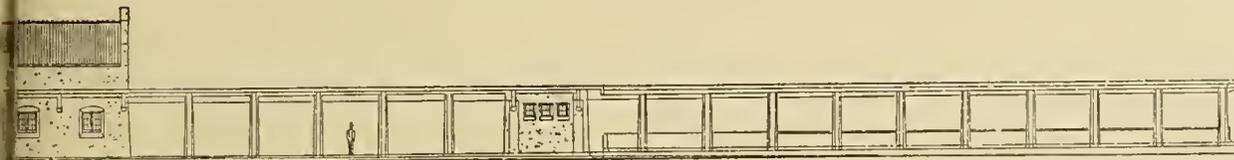

A new site for the insane asylum buildings now in the Ancon Hospital district, has been laid out at Corozal on the road, recently built, extending east from the village to the dairy farm. A group of 21 buildings has been planned, including two to be used as quarters for colored employes all, except the latter, to be reconstructed from existing houses in Corozal, as follows: Seven Type 18 two-story bachelor quarters, one Type 5 two-story bachelor quarters, three Type 1 two-story two-family houses, seven Type 17 cottages, and an undetermined type. The work of tearing down some of these quarters, removing the lumber

room, linen room, dry room, office for female nurses, office for male nurses, two examining rooms, and a waiting room; on the upper floor will be operating and dressing rooms. The main office will be a reconstructed Type 17 house, and will consist of offices for physicians, farm manager, and clerk; a laboratory, a room for files, a store room, and toilets. Two cottages will be made into wards for tubercular insane, and two other cottages will serve as additional quarters for nurses. The type not yet agreed upon will serve as a chapel and amusement hall.

The buildings on the north side of the road will set back from it 50 feet; on the south side 20 feet. It is expected that most of the new layout will be completed and ready for oc-

the Mount Hope labor train, effective the morning of the 8th inst.:

SOUTHWARD.		a. m.
Leave north of Fifth street	6.44
Leave commissary	6.48
Leave water tank, Cristobal roundhouse	6.51

Leave dry dock	5.05
Leave point opposite water tank	5.08
Leave commissary	5.12

BALBOA HEIGHTS.

to the new location, and recreation of the buildings has already been begun by forces of the Constructing Quartermaster.

The buildings will occupy both sides of the road, but the larger number, including all of the wards for the insane, will be on the north side, the wards for the insane to be enclosed, as they are now, in a suitable wire protected fence. Although existing buildings are to be used, extensive alterations will have to be made, especially in their interiors, to meet the requirements. Two of the Type 18 bachelor quarters will be converted into wards with reinforced rooms, where the more violent of the insane will be kept; four more of this type will be used as wards for the mildly insane,

occupancy some time in March, when it is proposed to transfer the male section of the present institution, while the female patients will be retained at Ancon until such time buildings for their accommodation are completed. The present buildings at Ancon, when vacated, will probably be converted into quarters for employes.

Failure to Report Cases of Infectious and Contagious Diseases.

Recent instances of parents having failed to report the occurrence of infectious and contagious diseases, including malaria, in the persons of their children make it seem advisable to the Health Department to call attention to the Executive Order of October 14, 1911,

Arrive south of Fifth street..... 5.15

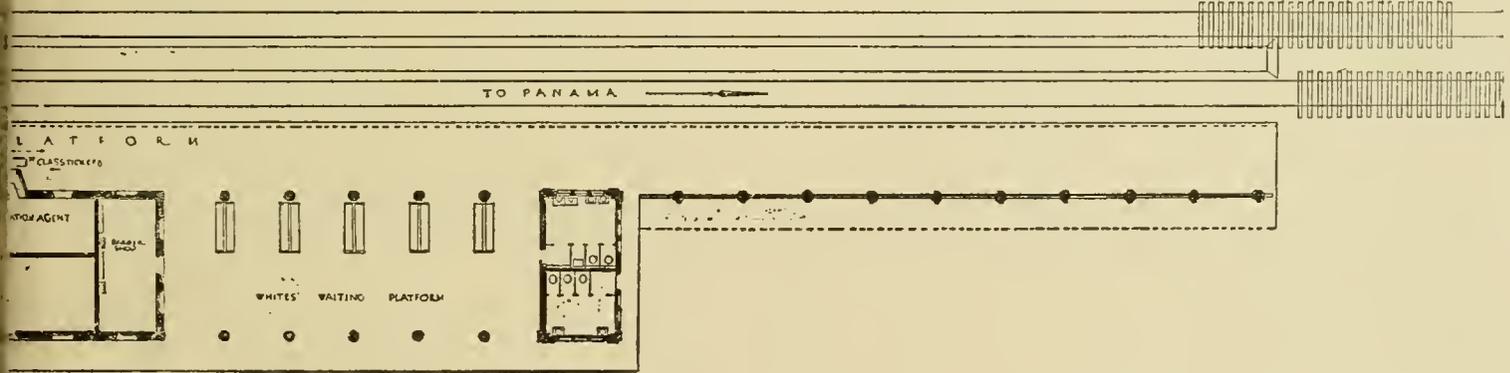

E. S. WAID,
Terminal Trainmaster.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., January 11, 1915.

The following insufficiently addressed letters originating in the United States and its possessions have been received at the office of the Director of Posts, and may be procured upon request of the addressees:

Alfaro, Mrs. R. J. (pkg.)	Millington, S. F.
Arthur, Elizabeth	Moe, Einar
Auld, Mrs. George	Morgan, Mrs.
Christopher, Thaddius	Morton, Frank
*Corrigan, Mrs. P. F.	Mulligan, J. E. (pkg.)
Crodner, G. F.	Murphy, T.
Emerson, Mae	Norris, Chas. W.
Emery, O. M. Sergt.	L. J. Nugent, B. (2)
Emery, Mrs. Louis J. (2)	O'Hara, J. S. *

ON AND TRACKS.

and one will be made into a combined dining room and kitchen. Two of the Type 1 two-family quarters will be used for observation wards, one for male, and the other for female patients, the lower floor of each for whites, and the upper for colored. The lower floor of another of the two-family quarters will be converted into a laundry, and a ward for hydrotherapeutic treatments, with two dressing rooms, and the upper floor into a sewing room and storage for materials. These, with two cottages as quarters for the nurses, comprise all of the buildings to be erected on the north side of the road.

On the south side, there will be the main building, reconstructed from Type 5 quarters, with the lower floor divided into a clothes

which provides a penalty for such failure. In case of continued non-compliance with these instructions, the Health Department will be obliged to seek an infliction of the penalty.

Colored School at Mount Hope Closed.

The school for colored children at Mount Hope was discontinued on December 31, as the ground on which the building stood is in the oil tank reservation. The children, 14 in number, formerly attending school at this point, have been transferred to the school for colored children at Cristobal on the Mount Hope road.

New Mount Hope Labor Train Schedule.

THE PANAMA CANAL,
OFFICE OF TERMINAL TRAINMASTER,
COLON, R. P., January 6, 1915.

To all concerned—Following will be the schedule of

Emery, Master Louis	Parker, O. M. (pkg.)

OFFICIAL CIRCULARS.

Annual Leave.

THE PANAMA CANAL,
 EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., January 4, 1915.

CIRCULAR No. 602-12:

1. If any annual leave granted an employe under the rules is sufficient to complete or extend beyond 10 months of his service year, he may be granted his cumulative leave also without reporting for duty from the annual leave.

2. If, after entering on leave, an employe's service is terminated, the amount of leave will be determined by Circular No. 602-8, and the leave will be commuted to a cash payment.

CHESTER HARDING,
 Acting Governor.

Steam Engineers.

THE PANAMA CANAL,
 EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., January 4, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Referring to the circular letter of December 19, 1914, relative to steam engineers on locomotive cranes, spreaders, unloaders, trackshifters, or pile drivers being gold roll men, the question has been raised whether it is the intention to replace aliens as fast as citizens of the United States competent to discharge these duties can be found. This question is answered in the affirmative, and heads of departments and divisions should make arrangements to place American citizens in these positions, provided the latter are competent to discharge the duties, giving special preference to competent steam engineers slated for discharge on account of reduction of force.

CHESTER HARDING,
 Acting Governor.

Sale of Material.

THE PANAMA CANAL,
 EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., January 4, 1915.

CIRCULAR No. 630-3:

Effective at once, the following surcharge will be added on material sold from regular stock of the Supply Department to individuals and companies:

Fifteen per cent—To those entitled to cost prices as defined in Circular No. 659-1 of August 1, 1914, on material and supplies sold from storehouses.

Twenty-five per cent—To all other parties, on material and supplies sold from storehouses.

Fifty per cent—On explosives sold to those entitled to cost prices.

One hundred per cent—On explosives sold to all others. Packing, crating, handling, and shipping charges extra.

CHESTER HARDING,
 Acting Governor.

Launch Tickets for Taboga.

THE PANAMA CANAL,
 SUPPLY DEPARTMENT,

BALBOA HEIGHTS, C. Z., January 11, 1915.

To all *holi stewards and district quartermasters*—In the future launch tickets for trips between Balboa and Taboga will be sold at the following places only: Balboa dredge landing and Hotel Aspinwall, Taboga. Please have this circular posted on your bulletin boards.

F. H. SMITH,
 Assistant Chief Quartermaster.

Proposals for Sale of Second-Hand Doors, Blinds, Sash, and Railing.

THE PANAMA CANAL,
 OFFICE OF CHIEF QUARTERMASTER

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., January 29, 1915, and then opened for the purchase of any or all of a miscellaneous lot of second-hand doors, blinds, sash, and railing now stored at the dry dock store, Cristobal, C. Z. This material may be examined and full information obtained upon application to the storekeeper, dry dock store, Cristobal.

Proposals must be accompanied by certified check, postoffice money order, or cash for five per cent of the amount bid.

The Government reserves the right to reject any or all bids.

Bids should be marked "Proposals for purchase of doors, blinds, sash, and railing" and addressed to the Chief Quartermaster, Balboa Heights, C. Z.

Died.

MCGOWAN, ANNA—At Ancon Hospital on Wednesday, January 6, aged 24 years. Employed by the Panama Railroad Company. Residence on the Ist. I. I. Ancon.

SHIPPING INFORMATION.

February Weather Probabilities.

Based on the records at Colon and Ancon for the past seven and eight years, respectively, the following weather conditions may be expected to prevail at the Canal entrances during the month of February:

Winds—Fresh northerly dry season winds will continue throughout the month. There should be a slight increase in wind movement, as compared with January conditions. The average hourly velocity on the Atlantic side should be about 15 miles per hour. North and northeast winds will prevail. The maximum velocity may not be expected to exceed 35 miles per hour.

The prevailing winds on the Pacific side and over the interior will be from the northwest. The average velocity will be about 10 miles per hour, and the maximum velocity may not be expected to exceed 30 miles per hour.

Rain—Although February is one of the dry season months, occasional light showers may be expected, but no heavy rains are likely to occur during the month at either Canal entrance. The average February rainfall has been 1.47 inches at the Atlantic entrance, and 0.76 inch on the Pacific side.

Fogs—No fogs may be expected at either Canal entrance, although night and early morning fogs may occasionally form over the Culebra Cut section of the Canal where the average number of foggy nights during the month has been five. Most of these fogs are light, and, as practically all of them clear away before 8.30 a. m., they will not affect the navigation of the Canal under present operating conditions.

Temperature—Average air temperatures on the Isthmus change very little from month to month. The monthly mean shade temperature should be about 80° Fahrenheit on both coasts. On the Pacific side, the extreme maximum may not be expected to rise above 91° Fahrenheit, nor the minimum to fall below 65° Fahrenheit, while at the Atlantic entrance temperatures may not be expected to rise above 90° Fahrenheit, nor to fall below 70° Fahrenheit. The mean daily range in temperature is much greater on the Pacific side than at the Atlantic entrance, and greater in the dry season than in the rainy season. The February mean daily range is about seven degrees Fahrenheit on the Atlantic side, and 19° Fahrenheit at the Pacific entrance.

Barometric pressure—Barometric readings on the Isthmus are very uniform from day to day. Changes in pressure are slight, except for the regular well-marked diurnal fluctuations characteristic of tropic regions. For this reason, local barometric readings are of practically no value in forecasting weather conditions. The average February sealevel pressure should be about 29.89 inches. The maximum reading during the month may not be expected to exceed 30.05 inches, nor the minimum to fall below 29.70 inches.

Storms—No severe general storms may be expected during the month at either Canal entrance. Fair weather will prevail on both coasts, although the fresh northerly trade winds that blow on the Atlantic coast may at times produce a heavy swell and rough sea outside the breakwater. Fair weather, with smooth to moderate seas, may be expected at the Pacific entrance to the Canal.

Tides—Tidal fluctuations need not be considered in navigating the Atlantic entrance

to the Canal, as the average tidal range is less than one foot and the maximum range approximately two feet.

The average tidal range at the Pacific entrance is about 13 feet, while the maximum range may reach 20 feet. Panama (Balboa) tide predictions are given below:

	4 3	10 5	5 2	11 0
Wed., Feb. 24.....	5:10	11:27	17:35	23:47
	4 6	10 3	5 4	10 9

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Goedetic Charts for this region, and which is 8.0 feet below mean tide level. To find

the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47.

Fuel and Supplies.

Deposits to cover tolls, or the purchase of supplies, may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

It is advisable that deposits be made somewhat in excess of the anticipated charges, to cover minor charges which may not have been anticipated, such as pilotage and towage. Pilotage is at the rate of \$1 per foot of maximum draft, but is not charged on a vessel which makes the transit of the Canal without taking on or discharging freight or passengers in a terminal port. Tug service, which is at the rate of \$15 per hour, will not be charged on vessels of less than 15,000 gross tonnage.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa from the Union Oil Company at the rate of from 1,300 to 1,600 barrels per hour. The present price is \$1.25 per barrel, reduced to 60° Fahrenheit.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light and heavy hardware cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa. Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

Repairs to vessels may be made to any extent, except where the use of a large dry dock is required, or the turning of the largest crank shafts or longest line shafts.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans, for all States. Due at New Orleans the following Tuesday.

Every Saturday to New York, for all States. Due at New York the following Friday, with the exception of the *Advance*, which is due there on a Saturday.

*Every Monday to New York, for all States, except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.

*NOTE—The sailings on Monday, February 8, March 8, and April 5 will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will only be for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina South Carolina, Ohio, Indiana, Illinois, Michigan Wisconsin, North Dakota, South Dakota, Iowa, Minn

Sailings of Vessels in Regular Service With the Isthmus.

Regular service is maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing about every six days, direct; between Cristobal and New York by the United Fruit Company, sailings about twice a week; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

PORT OF BALBOA.

*ARRIVALS

*DEPARTURES

Table with columns: Date, Vessel, Line, From, Date, Vessel, Line, To. Rows include Pennsylvania and St. Helens.

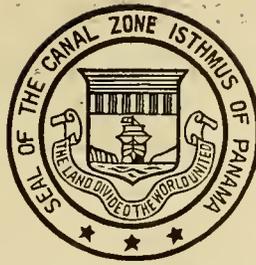

*EXPECTED ARRIVALS

*EXPECTED DEPARTURES.

Table with columns: Date, Vessel, Line, From, Date, Vessel, Line, To. Rows include Ecuador, Guatemala, and San José.

(Continued from page 203.)

Large table listing vessel movements between various ports including Tenadores, Almirante, Advance, Metapan, Santa Marta, Panama, Pastores, Alianca, Calamares, Carrillo, Colon, and others, with columns for Date, Vessel, Line, From, To.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. To others, the subscription rate will be \$1, United States currency, per annum, in the United States and its possessions; Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications,

THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Ships Using Canal for the First Time.

A number of vessels used the Canal for the first time during the past week. Among these were the *Rhodesia* of the East Asiatic Steamship Company, from Danish and Swedish ports, via St. Thomas, for San Francisco, with a general cargo consisting in part of 213 tons of canned fish, 520 tons manure, 17 tons of safety matches, 277 tons of paper, 375 tons wood pulp, 203 tons flint pebbles, and 400 tons of exhibits for the Exposition; the *Baron Driesen* of the Northern Steamship Company, Limited, from Savannah, Ga., for Vladivostok, via Honolulu, with a general cargo, consisting largely of cotton and nitrates; the *Hesperos* of the Bruusgaard Kiosterud Dampskibs Akties, from St. Johns, N. B., via Norfolk, Va., for New Zealand, with 7,533 tons of wheat; the *Pedro Christopherson* of the Johnson Line, from Tocopilla, Chile, for Gothenburg, Sweden, with nitrates; the *Kazembe* of the Ellerman and Bucknell Lines, from New York for Vladivostok, with a general cargo for Siberian, Japanese, and Chinese ports; the *St Athalkan* of the Strathallan Steamship Company, the *St Athlline* of the Strathblane Steamship Company, the *Atna* of the African-Australian Line, in ballast, and the *Acajulla* of the Salvador Railway Company. The latter ship carried a considerable quantity of coffee, and from now on for several months, this article will probably form a considerable item in cargo shipments via the Canal. The *Baron Driesen* is the first ship sailing under the Russian flag to pass through the Canal.

Las Cascadas Plantation Operated by Supply Department.

The Las Cascadas plantation, acquired by the United States from the former owners through expropriation proceedings, has been turned over to the Supply Department under the direct supervision of the Chief Quartermaster. The plantation has an area of about 570 acres, and contains from 20,000 to 30,000 cacao trees, in addition to a number of rubber and coffee trees. The rubber and coffee are not regarded as a very tangible asset, but the cacao is being gathered as it matures,

4,284 pounds of green cacao having been collected during the month of December. It is shipped to New York for sale at the best price obtainable, which, due to the small European takings, is just now unusually low. Experiments are being made to determine the practicability of manufacturing chocolate and cocoa in the plant of the Depot Commissary at Cristobal.

A small force of employes is on duty at the plantation burning brush and attending to other details of its upkeep. A definite policy with reference to the maintenance of the plantation, together with the farms at Frijoles and other points, is now under consideration.

Extra Sailing of the "Ancon."

The steamship *Ancon*, which was withdrawn a short time ago from the Panama Railroad Steamship Line's New York-Cristobal service, is due to arrive at Cristobal the latter part of this week with a full cargo of cement for The Panama Canal. Inability to secure tonnage on other vessels, and the pressing need for the replenishment of the stock of cement on the Isthmus made the extra trip of the *Ancon* necessary. It is being operated on this run as a tramp steamer, and will not carry passengers either way.

Award for Native Beef Cattle.

Award has been tendered to F. E. Parraga of Colon for supplying 200 head of beef cattle at the price of \$35 per head, c. i. f., Colon. Under the specifications, the contractor agrees to supply healthy steers between two and six years of age, and of a weight between 900 and 1,400 pounds. Wild, lame, diseased, poorly nourished, or badly bruised animals will not be accepted. Before delivery is made the cattle are to be inspected by a representative of the Supply Department. The contractor has been requested to make bond in the sum of \$500 to insure compliance with the contract requirements.

Charging Storage Batteries for Employees.

The Electrical Division has received numerous requests from employes owning motorcycles, etc., to have their storage batteries charged at Cristobal, Gatun, and Balboa substations. In order to accommodate these employes, it has been decided to allow this work to be done under the following regulations:

Employes will submit application to the Electrical Engineer on Form 350-2, giving their name, license number of their machine, post-office address and substation (Cristobal, Gatun, or Balboa) at which they desire the charges to be made, and upon receipt of approved copy, which will be returned to the applicant, will place a security deposit of \$2 with the Collector. When the deposit has been received, a receipted copy of Form 350-2 will be returned to the applicant, and the substation at which charges are to be made

will be furnished with the name and license number of the employe. When leaving batteries at a substation to be charged, employes must see that they are tagged, showing the owner's name, license number, and charging current.

The cost of each charge will be 50 cents and bills will be rendered, based on monthly reports from the various substations. The security deposit remaining to the employe's credit will be refunded upon written notice that service is no longer desired.

Contract for Fuel Oil.

A contract was entered into with the Standard Oil Company of San Francisco on December 16 for approximately 450,000 barrels of fuel oil, the estimated requirements for The Panama Canal during the ensuing year. This oil is to be delivered at Balboa, as follows: In approximately 30,000-barrel lots at \$1.03 per barrel; in approximately 60,000-barrel lots at 92 cents a barrel, and in approximately 100,000-barrel lots at 88 cents a barrel. The Panama Canal may require delivery in any of the lots specified above.

Headquarters, United States Troops on Isthmus.

The headquarters of the United States troops in the Panama Canal Zone have been temporarily located on the second floor of the old administration building at Ancon. The post-office address of the Commanding General and Staff is Ancon, C. Z., and the Commanding General's telephone number is 256.

School Consolidation.

Effective February 15, the schools at Culbra and Las Cascadas will be discontinued, and a consolidated school will be established at Empire for the pupils of the first eight grades in the three settlements mentioned. This arrangement is in accordance with the permanent plan for school facilities at these points, and will require fewer teachers and will give better school advantages. The Canal Zone Government will bear the expense of the teachers and school supplies, but the regiments now stationed at Las Cascadas and Empire will be called upon to provide means of conveyance in carrying the children back and forth from school. The hours and other arrangements will conform to the wishes and convenience of those interested as far as possible.

Final Report of Women's War Relief Work.

Mrs. Katherine Barber, chairman of the women's war relief committee of the Canal Zone, has submitted her final report. It shows that the total cash received and disbursed was \$1,023.48, and the number of articles received and forwarded 8,293. The shipments from the Isthmus, two in number, were consigned to the London agency of the American National Red Cross Society; the first went forward on the Royal Mail steamer *Danube*, sailing November 3, 1914, and the

second, on the Royal Mail steamer *Tagus*, sailing November 17, 1914. The balance of cash on hand, amounting to \$351.23, was sent to Mrs. Leonard Wood, Governor's Island, New York, to be used in making purchases in the United States. This shipment was sent from New York City to London direct consigned in the same manner as the foregoing. A cash balance of \$170.75 accrued from contributions after this draft was mailed to New York, and acting on the suggestion of Mrs. Leonard Wood, the money was forwarded to the United States to be expended in the purchase of surgical instruments, dressings, etc. The expense in connection with the work of the committee only aggregated \$5.68, leaving the balance for the purpose in hand.

Red Cross Finances.

The financial statement of the Canal Zone Chapter, American National Red Cross, from October 1 to December 31, 1914, is, as follows:

RECEIPTS.	
Balance on hand October 1, 1914.	\$351.61
Oct. 8 Advance refunded	10.00
Oct. 27 Advance refunded	25.00
29 Donation of unexpended balance of the La Boca library reading room	23.70
Nov. 23 Donation, Broadway Theatre, Colon	75.00
Dec. 12 Donation, Ladies Missionary Auxiliary, Union Church	10.00
Proceeds of ball	1,407.87
Interest on deposit: October, \$5.98; November, \$6.75; December, \$6.38	19.11
Total receipts	\$5,152.49
DISBURSEMENTS.	
Oct. 8 Relief stranded American	25.00
15 Relief stranded American woman and child	10.00
22 Relief stranded American	50.00
23 Stamps, expense of ball	15.00
33 Relief stranded American	8.00
Nov. 1 Stamps	20.00
1 Relief cured leper	1.00
7 Star and Herald, advertising ball	10.00
19 Relief stranded American	2.50
23 Mount Hope printing plant bill, expense of ball	25.00
Relief two stranded Americans	16.38
25 Relief American woman and children	7.00
28 European relief fund	100.00
30 Commissary supplies furnished, ball expense	1,000.00
Dec. 1 Relief stranded American	1.92
4 Relief Spanish woman	15.00
9 Mount Hope printing plant	68.59
Treasurer, National Red Cross, 188 memberships	94.00
Relief stranded American	20.00
18 Hotel Tivoli, expense of ball	88.70
21 Electrical Division, expense of ball	29.54
24 Relief of stranded American	20.00
30 Relief of American woman	15.00
31 Relief of stranded American	35.00
Total	\$1,692.63
Dec. 31 Balance on hand	3,459.86
	\$5,152.49

T. L. CLEAR, Treasurer.

Approved: C. A. McILVAINE, Chairman.

Master of Steamship "Limari" Fined.

Two charges were filed against Capt. A. Selmar, master of the South American Steamship Company's steamer *Limari*, one for leaving the port of Balboa on December 8, without a pilot, and the other for leaving Balboa after sunset on the same date without proper permission. The case was tried in the District Court at Ancon on Saturday, December 16. The defendant was found guilty and fined \$100 on the charge of having left without a pilot, but sentence was suspended in the other case.

The purchase of a new pony Whitlock printing press, and a Hickok ruling machine, has been authorized for The Panama Canal printing plant at Mount Hope. The cylinder press equipment at this plant at present con-

sists of a pony Whitlock, formerly used by the Panama railroad, and two Babcock machines, a No. 5 and a No. 6 Optimus.

Reduced Rates for Army and Navy Men on U. F. Company's Lines.

The resident manager of the United Fruit Company has been advised from the home office that officers and enlisted men of the United States Army and Navy, stationed on

the Isthmus, together with their families, will be granted reduced rates for transportation on the company's steamships sailing to and from the Isthmus, under the same conditions as apply to employes of The Panama Canal.

The cable address of The Panama Canal on the Isthmus is "Isthmian, Balboa Heights;" in the United States, "Isthmian, Washington."

POLICE CENSUS OF THE ZONE.

Shows a Decrease in Population of 6,546 in Six Months.

A house-to-house canvass of the inhabitants of the Canal Zone was made by the Police and Fire Division between December 22, 1914, and January 1, 1915. The results, as printed below, show a total population of 31,160, as compared with a count of 37,706, similarly made between June 16 and 30, 1914, and with another count of 45,296, made between January 31 and February 10, 1914. The different canvasses show a steady de-

crease in the number of Zone inhabitants, with a concentration, particularly noticeable in the last count, near the Pacific entrance. Of the total, as shown by the last canvass, 7,395 were white male Americans, of whom 3,719 were employes of The Panama Canal or Panama railroad. The American women and children numbered 1,578 and 1,576, respectively. Of the others, there were 12,779 men, including 10,517 employes, 3,086 women, and 4,026 children. Employes residing outside of the Canal Zone were not included in the count. The figures in detail are, as follows:

An analysis of the above in so far as it relates to the loss or gain by sections, between the last canvass and the one of June 16-30, is given below:

SECTION.	June 16 -30	Dec. 22 -Jan. 1	Gain	Loss
Vicinity of Pacific entrance.....	7,660	9,180	1,520	
Las Sabanas.....	608	784	176	
Corozal and vicinity	2,415	1,878		537
Pedro Miguel and vi- cinity.....	888	780		108
Paraiso and vicinity	2,601	2,805	204	
Culebra and vicinity	3,153	2,184		969
Empire to and inc. Bas Obispo.....	5,611	1,112		4,499
East side Canal— Paraiso to Gatun.	978	708		270
Gatun and vicinity.....	5,157	3,090		2,067
Cristobal and vi- cinity.....	6,388	4,846		1,542
Military reservations	2,247	3,793	1,546	
Total.....	37,706	31,160	3,446	9,992
Net loss.....				6,546

The greatest population that the Canal Zone has had at any one time since the American occupation was that shown by the census of 1912—61,279. Since then there has been a steady decrease, which will probably continue until the population is reduced to actual employes of The Panama Canal and the Panama railroad on the permanent basis, and persons in the military service of the United States. As the work of depopulating the Zone has progressed, the inhabitants either removed to the terminal cities, or left the Isthmus altogether. The net emigration from the Isthmus between July 1, 1913 and January 1, 1915 amounts to 21,732. This, with the present population of the Zone—31,160, accounts

for 52,838 of the number of Zone inhabitants in 1912—61,279. The remainder may be said to represent, at least in part, the increase in population in the terminal cities. The changes in population in the Zone and in the cities of Panama and Colon, as shown by the various censuses and canvasses made since 1903 are, as follows:

PERIOD.	Canal Zone	Panama	Colon
1904.....	9,742	20,262	7,214
1908.....	50,003		
1911.....		37,705	17,748
1912.....	61,279		
1914 (1).....	45,296	60,000	27,831
1914 (2).....	37,706		
1914 (3).....	31,160		

The present population of the Canal Zone and the cities of Panama and Colon, based upon the above figures, is about 120,000.

Sale of Notarial Seals.

The following recommendation relative to the sale of notarial seals, made by the Chief Quartermaster, has been approved:

"The notarial seals used by the notaries public in the Zone are the property of The Panama Canal. We have received a number of requests for the purchase of these seals, and, inasmuch, as they cannot be used by any one else, and have practically no scrap value, it is recommended that a blanket price of 50 cents each be placed on these seals, to be sold to the holder at the expiration of his commission, or upon termination of his service, if he so desires."

JOINT LAND COMMISSION.

Awards.

Award No. 71, docket No. 8, January 8, 1915—In the matter of the claim of Pío Quinto Olivares, et al, for the lands known as Palos Diferentes.—An award is hereby made against the United States, in favor of the person hereinafter named, and in the amounts hereinafter specified, in the total sum of \$4,707.72, United States currency, for all rights, title, claims, and all interests of whatever nature they may have possessed or now possess in that portion of the lands of Palos Diferentes, situate in the Canal Zone, west of Empire, along the Canal Zone boundary, as is more specifically shown on Isthmian Canal Commission map No. 3812, submitted in evidence by the attorneys for the United States at the trial of this claim.

To Pío Quinto Olivares, undivided one-fourth interest, \$1,176.93; to Rafaela Olivares, undivided one-fourth interest, \$1,176.93; to Julia Olivares, undivided one-fourth interest, \$1,176.93; to Pío Quinto Olivares, as guardian of Hezekiah Mosquero, and Rojilio Mosquero, minor heirs of Gertrudis Olivares de Mosquero, deceased, undivided one-fourth interest, \$1,176.93. Total, \$4,707.72.

This award shall be paid to the claimants herein named, in the amounts specified, on or before the 8th day of February, 1915, and if payment or tender of payment of this award is not made on or before that date, such award shall thereafter bear interest at the rate of six per centum per annum until paid.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Award No. 72, docket No. 13, January 8, 1915—In the matter of the claim of Mrs. O. B. Grout, for land and improvements at Puerto Escondido, Canal Zone.—Under date of March 27, 1913, the claimant, Mrs. O. P. Grout, filed with the commission her claim for damages for certain land and improvements thereon, located at Puerto Escondido. Subsequently, there were filed with the commission intervening claims, as to the land only, by the following:

- Doc. No. Claimant.
1543 Catalina V. de Cowan, Carlota Cowan de Irisarri, and Rita Cowan.
2673 Desire Lamiralle and Apostol Trivolich.
2884 Sabina Recuero de Quinzada.
3063 Romano Emiliani.
3088 Romano Emiliani.
3113 Alexis Stonewall Mendez, on behalf of himself and as the surviving partner of the unliquidated co-partnership of Mendez and Cowan.

At the public hearing of the claim, the claimant in person and by her attorney, requested, in view of the filing of these several intervening claims as to the title of the land, that her claim at that time be heard as to the improvements only, and that her claim as to the land be taken up at a later date when her claim for the land and the claims of all the intervenors may be consolidated and heard together. All parties consented to this arrangement, in which the commission concurred and agreed to announce a date for the hearing later. The hearing was, therefore, proceeded with on the basis of improvements only; and an award is hereby made against the United States, in favor of Mrs. O. B. Grout, in the sum of \$2,000, United States currency, for all rights, claims, and other interests in growing crops, fruit trees, buildings, machinery, and all other improvements which the said Mrs. Grout may possess or may have possessed at Puerto Escondido, Canal Zone.

This award shall be paid to the aforesaid claimant, in the amount specified, on or before the 8th day of February, 1915, and if payment or tender of payment is not made on or before that date, this award shall thereafter bear interest at the rate of six per centum per annum until paid.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Supplemental Opinion.

Supplemental opinion No. 164, on motion to reconsider, docket No. 1884, December 21, 1914—In the matter of the claim of Antonio Enseñat, for property located in Empire—On the 28th day of October, 1914, Messrs. Feuille and Williams, attorneys for the United States, filed their motion asking a reconsideration of the decision of the Joint Land Commission, holding that the claim of Antonio Enseñat is within the jurisdiction of said commission under and by virtue of the Treaty between the Government of the United States and the Government of the Republic of Panama, ratified on the 26th day of February, 1904.

In this motion many reasons are set forth why that decision should be set aside or modified, but, upon the hearing of said motion it was conceded by the attorneys for the Government of the United States that a single question is presented, and that all other alleged causes for modification of the original opinion are waived and withdrawn.

The only question, therefore, now before the com-

mission is, whether the Panama Railroad Company's lands have been expropriated by the United States, and, if so, when did the act of expropriation take place, and whether such act of expropriation terminated the lease of the claimant with said railroad company.

In the original opinion the commission held that the Executive Order issued by the President of the United States on the 5th day of December, 1912, as fully set out in the opinion, expropriated the lands of the Panama Railroad Company, and the lease then existing between said company and the claimant was thereby terminated or expropriated.

Counsel for the United States in an able and ingenious argument, with many citations of authorities, challenge the ruling in the original opinion on the ground that the Executive Order of the President did not amount to an actual taking, but simply empowered the Chairman of the Isthmian Canal Commission to take possession of any part or parcel of land within the Canal Zone at will, and that expropriation did not occur until the Chairman had performed some affirmative act toward taking such possession, or had actually taken physical possession of such lands.

Messrs. Hinckley and Ganson, Oscar Teran and Harrold Arias, in a strong and able argument, citing numerous authorities, sought to sustain the original opinion of the commission.

Upon request of the commission, the attorneys on both sides later submitted very able and exhaustive briefs with numerous additional authorities from text writers and decisions of the many courts of the United States.

To discuss all these authorities would extend this supplemental opinion beyond our desire. We may state, however, that the decisions cited by both sides are based upon the statutes of the various States of the Union and upon Acts of Congress, all of which laws were framed for particular purposes and in language quite dissimilar, and most of them bearing only a slight degree of analogy, to the case in hand.

As this decision must rest upon the provision of the Treaty between the high contracting parties and the Act of Congress, approved August 24, 1912, and the President's Executive Order above referred to, but little help can be derived from many of the decisions cited. However, two of these cases are in point and for them the commission is under obligations to counsel.

In the case of *Benedict vs. City of New York, et al*, Federal Reporter, Volume 98, Page 789, which was a condemnation proceeding by the city of New York, in which the question arose as to when the lands were actually taken by the city, on Page 792, the learned judge, in pronouncing the opinion, uses the following language:

"The lands were taken when the commissioners of appraisal filed their oaths of office. They were taken at that time, because, by the terms of Section 10 the city then acquired the right to occupy them in perpetuity, subject, of course, to a condemnation proceeding. Until then the purpose to appropriate them was merely a tentative one, and the proceeding might never culminate in an actual appropriation. Until then there was no statutory act indicative of a final intention by the city to acquire lands."

From the language of this opinion it appears that to constitute an actual taking by a sovereign of lands under the right of eminent domain, there must be first a law prescribing the manner of taking, and, second, there must be a statutory act indicating a final intention to acquire the lands.

In the case of *Delafield vs. City of Pittsburgh*, Federal Reporter, Volume 109, Page 577, likewise a proceeding in condemnation by a city under a statute, the court says:

"The ordinance here declares and enacts that 'The said city does hereby elect and resolve to take, use, and appropriate the said real estate and land for the purpose aforesaid.' In terms, it is a present appropriation under the statute of 1887. * * * To all intents and purposes the ordinance amounts to an actual appropriation. It derives the proprietor of his beneficial ownership."

In this case, the same necessary requirements to constitute a present taking under the law of eminent domain are apparent, as in the first case cited. Here, there was first a law prescribing the mode of taking, and, second, an act, in conformity to a statute indicative of a final intention to acquire the land.

It will be observed that no actual, physical, or tangible possession is necessary to a taking by the sovereign, but it is the acquired right of the sovereign to occupy immediately in perpetuity the lands desired, that constitutes the actual taking under the authorities cited.

In the first case, we find the declaration by the court that the lands were taken when the commissioners of appraisal filed their oaths of office. They were taken at that time, because by the terms of Section 10 the city then acquired the right to occupy them in perpetuity.

In the second case cited, the court says that the ordinance of the city declaring the election and resolution to take, use, and appropriate certain real estate for specific purposes is in terms a present taking; that to

all intents and purposes the ordinance amounts to an actual appropriation and derives the proprietor of his beneficial ownership.

Justice McReynolds, while Attorney General of the United States, in an opinion rendered January 22, 1913, in the case of *Encarnación Rangil, et al*, for injunction involving the title to land in the District of Empire, within the Canal Zone, after quoting said Section 3 of The Panama Canal Act and the said Executive Order of the President, as quoted in the original opinion, says:

"This declaration of the President, issued under authority of an Act of Congress, undoubtedly fixes the law for the Judiciary of the Canal Zone, to the extent of making it unnecessary to consider whether the particular land in question was needed for the maintenance, etc., of the Canal, or not. It amounts to a condemnation of all the lands in the Canal Zone under the power of eminent domain."

By said Act of Congress, approved August 24, 1912, the power of appropriating all the lands and lands under water within the Canal Zone was conferred upon the President of the United States, and the manner of acquiring said lands was prescribed.

By said Executive Order of the President of December 5, 1912, there was a statutory act not only indicating a final intention by the Government of acquiring these lands, but there appeared a final order peremptorily directing the Chairman of the Isthmian Canal Commission to take such lands.

All the essential requirements under the authorities cited to an actual taking of the lands of the Panama Railroad Company by the Government of the United States on the 5th day of December, 1912, then existed, and, therefore, said lands were then and thereby expropriated.

It will hardly be contended that, after the issuing of the President's Executive Order, the owner of private lands within the Canal Zone had the power to convey such lands at will, with the right to the grantee to hold and occupy such land in perpetuity. Hence, if that right was taken away from the owner of such private land, then his proprietary right, his absolute ownership, was taken from him, his title to the land was extinguished, expropriated, and to him remained nothing more than a claim for the value of the land taken.

Lewis on Eminent Domain, Volume 1, Third Edition, Section 65, Page 56, says:

"It may be laid down as a general proposition, based upon the nature of property itself, that, whenever the lawful rights of an individual to the possession, use, or enjoyment of his land are in any degree abridged or destroyed by reason of the exercise of the power of eminent domain, his property is *protanto*, taken, and he is entitled to compensation."

Hence, we must conclude that the land of the Panama Railroad Company occupied by Mr. Enseñat was expropriated, actually taken, by the Government of the United States at the time the President issued the Executive Order of December 5, 1912, as stated in the original opinion.

If it is true that by the Executive Order of the President of December 5, 1912, the title and right to occupy, of the lessor, the Panama Railroad Company, was taken away and appropriated by the United States, it must follow that the same Executive Order of the President terminated the lease of the claimant. That doctrine is declared in Article 2016 of the Civil Code of the Canal Zone, which reads, as follows:

"The right of the lessor over the thing leased having been extinguished through a cause beyond his control, the lease shall expire, even before the expiration of the term stipulated for its duration."

The lands being expropriated by the United States, the leasehold of claimant was accordingly terminated thereby, as provided by Article 2016 cited above. His claim for damages, if he has sustained any thereby, must be against the United States as the expropriating government.

The doctrine of the liability of the expropriator to the lessee, is elementary, as well as statutory.

In the American and English Encyclopedia of Law, Volume 10, Page 1,194, Subdivision F, we read:

"Tenants and lessees are entitled to such compensation as will correspond to their interest in the leased premises when part or all of the tract has been taken, and payment to the landlord, where a tenant is in possession, does not discharge the liability of the expropriator to the tenant."

The commission being of the opinion that the original decision is sustained by the weight of the authorities, and is correct, it adheres thereto and overrules the motion to reconsider.

OFFICIAL CIRCULARS.

Acting Auditor.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., January 13, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Effective January 14, 1915, Mr. Ad. Faure will act as Auditor, The Panama Canal, during the absence from the Isthmus of Mr. H. A. A. Smith.

CHESTER HARDING,
Acting Governor.

Acting Chief, Police and Fire Division.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., January 18, 1915.

To all concerned—During the absence on leave, beginning today, of Capt. C. W. Barber, U. S. A., Capt. H. D. Mitchell, U. S. A., will act as Chief, Police and Fire Division.

CHESTER HARDING,
Acting Governor.

Rules Concerning Care and Operation of Locomotive Cranes, Etc.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., January 12, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

The rules contained in the pamphlet for the care and operation of locomotive cranes, spreaders, unbolers, trackshifters, and piledrivers, is published for the information and guidance of all concerned. It is desired that a copy of this pamphlet be placed in the hands of every one who may have use for it in connection with his work.

A small supply is sent you herewith and additional copies will be furnished upon application to this office. Any copies for which you have no use, should be returned to the Executive office.

CHESTER HARDING,
Acting Governor.

Use of Chagres River Washed Gravel.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., January 15, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

The attention of all concerned is directed to the desirability of using Chagres River washed gravel, from which the sand has been separated by screening, in lieu of Ancon rock, in all cases where it is practicable to do so; and it is requested that steps be taken to substitute Chagres River gravel for Ancon rock at once. All orders for this gravel should be placed with the Panama railroad, the same as for the Chagres River sand and run-of-bank gravel.

CHESTER HARDING,
Acting Governor.

Surplus White Oak Lumber at Balboa Store.

THE PANAMA CANAL,
SUPPLY DEPARTMENT.

BALBOA HEIGHTS, C. Z., January 16, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

We have on hand at the Balboa storehouse approximately 500,000 feet, B. M., of white oak lumber, three by nine inches by 10 feet 3/4 inches, which was ordered for use in repairs to Liggerwood cars in the breakwater service. Due to the fact that considerably fewer cars are being used in this service than was originally anticipated, a large quantity of this material is considered surplus.

It is requested that departments and divisions requisition this material wherever it is practicable to use it.

WM. R. GROVE,
Chief Quartermaster.

Surveying Instruments.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., January 6, 1915.

CIRCULAR No. 631-4:

1. *Stock of instruments.*—Engineers' transits and levels will not, in future, be turned over to the Supply Department for any purpose, except on approved survey. A stock of serviceable instruments will be maintained at the Administration Building, under the custody of the Assistant Engineer of Surveys, and when additional instruments are desired, form P. C. 299 will be submitted in the usual manner, showing instrument to be transferred from the Executive Secretary, who will be the accountable official for this stock.

2. *Surplus or unserviceable instruments.*—When instruments become surplus or unserviceable, they will be shipped to the instrument repair shop, with letter of advice to the Superintendent of the Mechanical Division, with copy to the Surveying Officer and Assistant Engineer of Surveys, giving reason for sending

Instrument to shops. On receipt of such instruments at the instrument repair shop, the Superintendent of the Mechanical Division will make report to the division sending instrument in, with copy to the Surveying Officer and Assistant Engineer of Surveys, showing condition, cost of repairs; also, recommendation as to disposition, and on receipt of this report, the Surveying Officer will make final recommendation as to disposition, after conferring with the division to whom assigned, and the Assistant Engineer of Surveys.

CHESTER HARDING,
Acting Governor.

Price of Chagres River Sand and Gravel.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., January 16, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Effective January 1, 1915, sand, wash gravel, and run-of-bank gravel procured from the Gamboa plant will be priced at 65 cents per cubic yard.

CHESTER HARDING,
Acting Governor.

Cost of Loading Ancon Rock, Etc.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., January 13, 1915.

Effective January 1, 1915, the various departments and divisions will be charged with the cost of loading Ancon rock, screenings, and Chame sand, in addition to the invoiced price of the material.

CHESTER HARDING,
Acting Governor.

Supplement No. 3 to List of Nonexpendable Property Published with Circular No. 655-1.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,

BALBOA HEIGHTS, C. Z., December 30, 1914.

HEADS OF DEPARTMENTS AND DIVISIONS AND ACCOUNTABLE OFFICIALS:

The following changes and additions to the list of nonexpendable property, and instructions, are published for guidance of all concerned:

CHANGES.

- Page 1. B173, carvas; add "Except money."
- Page 2. Bars, parallel; add E
- Page 3. Belts, lineman's safety, straps for; eliminate, carry as "Straps, safety, lineman's"
- Page 7. Cases, drinking cup; eliminate, carry as "Holders, drinking cup"
- Page 13. Dishes, platinum; add E
- Page 15. Gasometers for oxygen and acetylene; add E
- Page 25. Old-man; eliminate, carry as "Posts, drilling"
- Page 28. Racks, coat and hat; add E
- Page 28. Racks, hat stand; eliminate, carry as "Stands, coat and hat rack"
- Page 29. Racks, stationery; eliminate, carry as "Cases, stationery"
- Page 29. Registers, time and punch, automatic; add E
- Page 35. Traps, animal; add "Except rat traps"
- Pages 37-38. An item of property is nonexpendable whether it is from American or old French stock. The heading "Old French nonexpendable property" should be eliminated and items shown in proper order.

ADDITIONS.

- Apparel, wearing
- E Attachments, tapping
- Bags, punching
- Belts, cartridge
- Blowpipes
- Boxes, pastry
- Boxes, mitre
- Breakers, ice
- Buckets, agate, enamel and fibre
- E Buckets, crane
- Buttons, pilot's
- Cans, waste
- E Carts, hose
- E Cases, desk, stationery
- Chains, tire, automobile
- E Compasses, beam
- Corers and peelers
- Curtains, bath, rubber
- Devices, cap, pilot's
- Flashlights, electric, pocket
- E Furnaces, galvanizing

- Stands, inkwell
- Stands, music
- E Steelyards
- Straps, haversack
- Targets, range rod
- Tongs, timber and tie
- Tools, corner
- Tools, knurling
- E Torches, cutting, oxy acetylene
- E Trestles, drafting board
- E Trucks, baggage, barrow, burro, platform, under-slung, and wagon
- E Trucks, concrete block handling
- Tubes, stomach (veterinary)
- Twisters, police, chain
- Weights (standard test sets)
- Wigs

ITEMS TO BE CONSIDERED EXPENDABLE.

- Alpargatos
- Animals, purchased for laboratory experiments
- Annunciators
- Apparatus, alum mixing, for filtering plants
- Apparatus, hypochlorite dosing, for filtering plants
- Awnings
- Bags, money
- Balls, tennis
- Baptels, except those returnable to contractors
- Bells, school
- Bells, fog
- Bells, slip
- Benches, barrack
- Binders, blueprint
- Binders, loose-leaf, for records
- Bits, for Star drills
- Blackboards, sectional
- Boards, bulletin
- Boxes, dynamite, cap
- Brackets, fire hose
- Ceils, bug counting
- Dusters, leather
- Gauges, watt-hour
- Gauges, pressure recording
- Hames, harness
- Locks, mail pouch
- Machines, towing
- Racks, newspaper
- Shades, window
- Shields, crasing
- Signs
- Tripods for surveyor's instruments
- Tubes, X-ray
- Tables, filter operating
- Tubes, blueprint

INSTRUCTIONS FOR ACCOUNTABLE OFFICIALS.

When items, which have previously been considered expendable, are listed as nonexpendable, accountable officials will make a complete and correct count of all such items in their custody, charge same to the proper responsible official, and prepare invoices covering items to be taken up on the property records. The numbers of accounts to receive credit will be shown on all copies, and the signed original and one copy forwarded to the Auditor.

Except when specifically authorized to do so, storekeepers will in no case sign foremen's orders for other officials.

A new form (A-221) of "Certificate of charges on pay roll covering property lost, destroyed, or damaged through neglect or carelessness of responsible person" is now carried in stock. When a charge is to be divided among several persons, a list of such persons showing metal check and pay numbers may be attached to this form, instead of preparing separate certificates for each person.

Officials who are accountable for Panama railroad, commissary, Canal Zone Government, or Y. M. C. A. property must maintain a separate record of such prop-

erty. This property was not paid for from Panama Canal funds and cannot be included in Panama Canal records. Any invoices covering transfer of any property of these classes must bear some notation to indicate its ownership.

Approved: H. A. A. SMITH,
Auditor, Panama Canal.
CHESTER HARDING,
Acting Governor.

Forwarding Data Concerning Aids to Navigation, Etc.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., January 5, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

In future, when data concerning changes in aids to navigation, hydrography, sailing directions, etc., are prepared and forwarded to the Hydrographic Office, duplicates will be forwarded to the Coast and Geodetic Survey Office at the same time.

CHESTER HARDING,
Acting Governor.

Revision of Labor Train Schedule.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., January 11, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

It is desired to revise the labor train schedule with a view to eliminating some of the trains. As a preliminary to further discussion of the question, please advise the superintendent of the Panama railroad what labor trains are necessary for your work.

C. A. McILVAINE,
Executive Secretary.

Rendition of Bills.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,

BALBOA HEIGHTS, C. Z., January 14, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

In rendering bills against other departments of the United States Government, settlement for which is to be made by transfer of appropriations, they should be prepared against the proper department and not against the individual officer making the request or ordering the material. For instance, bills rendered against the Quartermaster of the Coast Artillery Corps should be headed, as follows:

"War Department,
C/o Quartermaster, C. A. C.,
Cristobal, C. Z."

Bills rendered for supplies or services furnished Lieutenant Crenshaw, who is in charge of Radio Station, should read:

"Navy Department,
C/o Lieut. Crenshaw,
Radio Station,
Larien, C. Z."

This same rule should also be observed in billing against the Republic of Panama and the Panama Railroad Company.

Please see that bills are so rendered in the future.

AD. FAULKE,
Acting Auditor.

Closing of New Gatun Station.

PANAMA RAILROAD COMPANY,
OFFICE OF THE MASTER OF TRANSPORTATION,
BALBOA HEIGHTS, C. Z., January 18, 1914.

NOTICE NO. 7:

All concerned—Effective with the close of business, Saturday, January 30, 1915, New Gatun station will be closed and passenger trains will cease making stops at that station.

Please be governed accordingly.

Approved: S. W. HEALD,
C. H. MOISETT, Master of Transportation.
Superintendent.

Appointment of Quartermaster, U. S. Troops on the Isthmus.

HEADQUARTERS, UNITED STATES TROOPS,
PANAMA CANAL ZONE,

GENERAL ORDERS

No. 2.

Pursuant to telegraphic authority from the Commanding General, Eastern Department, dated January 9, 1915, Maj. Bertram T. Clayton, Quartermaster Corps, is appointed and announced as Quartermaster of the United States troops, Panama Canal Zone.

He will proceed to Ancon and there take station. The travel directed is necessary in the military service.

By order of Brigadier General Edwards,
JOSEPH A. MARMON,
First Lieutenant, 25th Infantry, A. D. C.,
Acting Adjutant.

COMMISSARY DEPARTMENT.

Correction of Item in Price Book.

THE PANAMA CANAL,
SUPPLY DEPARTMENT.

CRISTOBAL, C. Z., January 15, 1915.

To all concerned—Referring to price change No. 615, effective January 16:

Item of "Pants, white duck," given on Page 202 of Price Book, S.N. 9997, should read "Suit, white duck".

BENJ. L. JACOBSON,
Depot Commissary.

Commissary Hours.

Pumps, ladies, G. M., pr.	2.65
Pumps, ladies, white canvas, pr.	2.15

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 303, on Wednesday, January 27, 1915, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day

of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

By direction of the chairman of the board.

F. M. NIXON,
Recorder, Board of Local Inspectors.

Sale of Cattle at Hospital Farm.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

BALBOA HEIGHTS, C. Z., January 13, 1915.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., January 26, 1915, and then opened, for the purchase of a lot of 31 cows and two bulls. These animals may be seen upon application to the superintendent, hospital farm, Corozal, C. Z. Bids must be for the entire lot of animals, but delivery may be taken of four or five at a time, at intervals to be determined upon between the successful bidder and the superintendent, Ancon Hospital, payment to be made to the superintendent, Ancon Hospital, for each lot of cattle as delivered.

Bids must be accompanied by certified check, cash, or post-office money order for five per cent of the amount bid, which will be returned upon rejection of bid. In the case of the successful bidder, the five per cent deposit will be held and applied as the last five per cent remaining due on the purchase price.

The Government reserves the right to accept or reject any or all bids. Bids should be marked "Proposal for purchase of cattle, hospital farm" and addressed to the Chief Quartermaster, Balboa Heights, Canal Zone.

W. R. GROVE,
Chief Quartermaster.

Rainfall from January 1 to 16 1915, Inclusive.

Wed., March 3.....	4:41	10:52	17:01	23:18
	15.9	-0.8	16.7	-1.0

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean

low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls, or the purchase of supplies, may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

It is advisable that deposits be made somewhat in excess of the anticipated charges, to cover minor charges which may not have been anticipated, such as pilotage and towage. Pilotage is at the rate of \$1 per foot of maximum draft, but is not charged on a vessel which makes the transit of the Canal without taking on or discharging freight or passengers in a terminal port. Tug service, which is at the rate of \$15 per hour, will not be charged on vessels of less than 15,000 gross tonnage.

Mail, other than registered, and cablegrams for men on ships which will call at the terminal ports, or pass through the Canal, may be addressed in care of the captains of the ports, if desired, or may be addressed to Cristobal or Balboa, general delivery, with the name of the vessel written plainly; or, in case the vessel has a known representative on the Isthmus in care of such representative.

Laundry is handled quickly, and no advance notice is required. The following are representative charges for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans, for all States. Due at New Orleans the following Tuesday.

Every Saturday to New York, for all States. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

*Every Monday to New York, for all States, except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*NOTE.—The sailings on February 8, March 8, and April 5 will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will only be for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and Northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7:10 a. m., connects with the despatches for the four sailings mentioned above.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., January 18, 1915.

The following insufficiently addressed letters originating in the United States and its possessions have been received at the office of the Director of Posts, and may be procured upon request of the addressees:
