The estates of these deceased and insane employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against their estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. To others, the subscription rate will be \$1, United States currency, per annum, in the United States and its possessions: Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

New Railroad Station at Corozal.

A new railroad station at Corozal has been authorized, to be located probably a little north of the present train shed, between it and the commissary. In design it will resemble the station now under construction at Balboa, although the main building, containing the ticket office, etc., will have a roof continuous with the platform roof, instead of projecting above as it does in the Balboa station. The Corozal structure will be 185 feet long, including the waiting platform, and 35 feet wide. The main part will be 42 feet long, and 20 feet wide. In addition, there will be an uncovered concrete platform extending for a distance of 200 feet at the south end of the station for the use of first-class passengers. Toilets will be provided, one at each end of the station. The estimated cost of the improvements is \$10,000.

New Medical Storehouse at Ancon Occupied.

The new reinforced concrete medical storehouse at Ancon has been completed and turned over to the Health Department. The stock of supplies in the storehouse at Colon Hospital has been transferred to the new location, and will be consolidated with the stock kept hitherto at Ancon Hospital, so that, in future, all issues will be made, as required, from this storehouse. The new building contains a large general stock room, equipped with ample shelving; a dry room, to be provided with an electric heater, for the storage of surgical instruments and other articles that are subject to deterioration from dampness; a survey room, where material and supplies no longer useful will be held pending action by the Surveying Officer; a built-in refrigerator for the storing of such drugs as must be kept at a low temperature, and an office. Detached from the main building is an annex, where alcohol, ether, collodion, and other highly inflammable materials are to be stored. The force at the new storehouse consists of four employes on the gold roll and five on the silver roll, with the former medical storekeeper at Colon Hospital, Mr. John J. Moran, in charge. The storehouse at Colon, a large

2-story wooden building, is being dismantled, and will be taken to Balboa, where it will be reerected for use of the Quartermaster's Department, as a mattress factory, furniture repair shop, etc.

New P. R. R. Time Table.

A new passenger train time table will go into effect on the Panama railroad on Sunday, January 31. The new schedule provides for night trains out of Panama and Colon on Saturdays and Sundays. The Saturday night train out of Panama will leave at 11.30, and out of Colon at 11.35; the Sunday night train out of Panama will leave at 9.25, and out of Colon at 9.30. The leaving time of the day passenger trains out of either terminal remains unchanged, with the exception of No. 7, which will leave Colon at 5.10 p. m., instead of 5.05 as at present. Important changes have been made tending to an improvement in the service on the Las Cascadas branch. The Gatun shuttle train will be discontinued, and the station at New Gatun will be closed.

Lockage of Small Boats.

The lock pilots, through the lock superintendents, have been authorized to make an examination and report their recommendations, before any small boat with passengers is allowed to enter the lock chambers, and if, in their opinion, there is any danger, the passengers should be directed to disembark, while the boat is being locked through. In this connection it might be well to call attention to the fact that the Canal regulations prescribe that whether with or without passengers, if there is liability of danger, a small boat can be refused lockage.

Swimming at Pedro Miguel Lock.

An area in Miraflores Lake, immediately east of the east wing wall at the south end of Pedro Miguel Lock, has been set aside for the use of the swimmers in Pedro Miguel village. The water in this locality varies in depth from six to 10 feet, is not greatly affected by the lock currents within the limits that will ordinarily be used by swimmers, and is entirely out of the way of Canal traffic. A float will be installed for the convenience of the swimmers, which will be equipped with lights, so that at night its position may be located by any one passing the point in launches or other small craft.

Shipping Notes.

The steamship *Kroonland* of the International Mercantile Marine Company is due at Cristobal about February 1, and will pass through the Canal, as part of the itinerary of its cruise, if conditions are favorable at that time. The *Kroonland* draws 30 feet of water, and will be the largest vessel to transit the Canal to date.

The steamship *Great Northern* of the Great

Northern Steamship Company is reported to have left Philadelphia on January 27, and is due at the Isthmus about February 3. This vessel carries both passengers and freight and begins a new regular monthly service between the east and the west coasts of the United States.

Among the vessels making the transit of the Canal during the past week was the *John Ena*, a four masted barkentine, having a length of 313 feet, beam 48 feet, and draft 22 feet, owned by the A. P. Lontgen Company of Philadelphia. It is bound from Philadelphia for Kobe, Japan, with a cargo of 11,686 cases of refined petroleum, and 306 barrels of wax. It made the passage of the Canal on January 22, in tow of Canal tugs in relays. It carries a crew of 31 men.

The steamship *Capac* of the New York and Pacific Steamship Company made the transit of the Canal from Balboa to Cristobal on January 21. This vessel, when it arrives at its port of destination, New York, will have entirely circumnavigated South America on this trip. It came through the Strait of Magellan, discharging cargo on the way down the east coast of South America, and picked up a return cargo of ores, etc., at Tocopilla, Antofagasta, Caleta Buena, and other Chilean ports.

As showing the diversity of cargo moving from the west to the east coast of the United States through the Canal, that of the steamer *Santa Clara*, which was locked through on January 22, is interesting. It included 250 tons of fish, 6,000 cases of apples, 3,000 cases of celery, 3,000,000 feet of lumber, 600 tons of lead, 900 tons copper and scrap copper, 50 tons old rubber, 50 tons scrap metal, 40 tons empty bottles, 600 tons oil cake, etc.

Operation of Gamboa Sand and Gravel Plant.

The committee, consisting of H. D. Hinman for the Division of Terminal Construction, W. G. Comber, Resident Engineer of the Dredging Division, and C. H. Motsett, Superintendent of the Panama railroad, appointed to look into the Chagres River sand and gravel service, has submitted its report and recommendations.

It was found that the plant operated by the Dredging Division at Gamboa produces one cubic yard of sand for every two cubic yards of washed gravel, and that the barges are now able to deliver to the unloading cranes from 500 to 1,000 cubic yards of washed sand a day, depending upon conditions. The committee believed that this amount will be ample for Canal purposes, but until a sufficient quantity has been accumulated in storage, it was recommended that no sales of sand be made to individuals and companies. The quantity of sand now produced is con-

sidered excellent, and there is but little mud in it.

It was recommended that the present handling methods be continued, *i. e.*, the Dredging Division to excavate the sand and gravel and deliver it alongside the wharf at Gamboa, and the Panama railroad to attend to the unloading and make all deliveries as required. It was further recommended that departments and divisions notify the Panama railroad of their requirements at least two days in advance, and that the railroad, in turn, convey this information to the Dredging Division. It was agreed that the output of sand should be kept at as high a figure as possible, in order that a surplus may be accumulated in the storage pile near Miraflores Locks.

It was further recommended that run-of-bank gravel be used wherever possible, in order to hold the sand requirements to a maximum of 600 cubic yards a day, and that Chagres River sand be used only in the construction of buildings already designed, in cases where the design was based on the assumption that rock and sand concrete was to be used, and that future buildings should be designed with a view to using run-of-bank gravel concrete.

It was recommended that no plans be made at the present time for resuming sand dredging at Punta Chame, and that the amount of this sand still in storage, about 3,000 cubic yards, be conserved, issues to be made only when absolutely necessary, with no sales whatever to outside parties. Owing to the present light demand for washed gravel, it was suggested that departments and divisions, now using Ancon rock with sand, substitute washed gravel for the rock.

The report of the committee was adopted, and its recommendations approved.

Regulations Governing Visits to Generating Stations and Substations.

On account of the danger to human life involved in exposed electrical apparatus at high potentials in the generating stations and substations of the Electrical Division, entrance into these stations and substations by all persons, except officials of The Panama Canal and employes of the Electrical Division, is hereby forbidden, unless prior permission is obtained from the office of the Electrical Engineer. In all cases, whether employes of the Electrical Division or other persons who have obtained permission are involved, the switchboard operator on duty must be consulted immediately upon entering the building, and before any inspecting or sightseeing is attempted. Except in the case of employes of the Electrical Division, who are thoroughly familiar with the equipment, visitors will not be allowed to enter any room containing high tension apparatus (2200 volts or over), unless accompanied by a switchboard operator or other employe who is thoroughly familiar with the equipment. Umbrellas, walking sticks, and similar articles must be deposited with the operator on duty upon entering the building.

W. H. ROSE,
Electrical Engineer.

BALBOA HEIGHTS, C. Z.,
January 15, 1915.

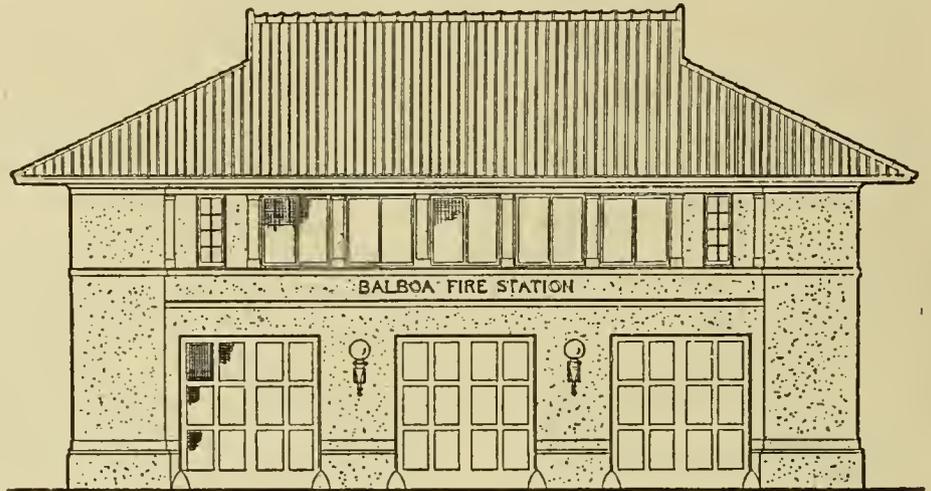

The residents of Majagua, a native town in the Canal Zone, east of Mount Hope, have been given an additional extension of time of 30 days, or until February 13, in which to vacate the village.

BALBOA FIRE STATION.

New Permanent Structure Completed—Was Occupied on January 11.

Situated on the west side of Balboa Plaza and conveniently located in the permanent townsite, is the new Balboa fire station, the only reinforced concrete structure of its kind in the Canal Zone. It is designed in harmony

with a loggia above on the second floor, seven feet by 29 feet six inches, forming a veranda for the second-story dormitory. The first floor ceiling is 12 feet nine inches high in the clear, and is planned to accommodate three automobile fire engines and two horses, if necessary. A concrete stair connects with the second story, and two brass poles pro-

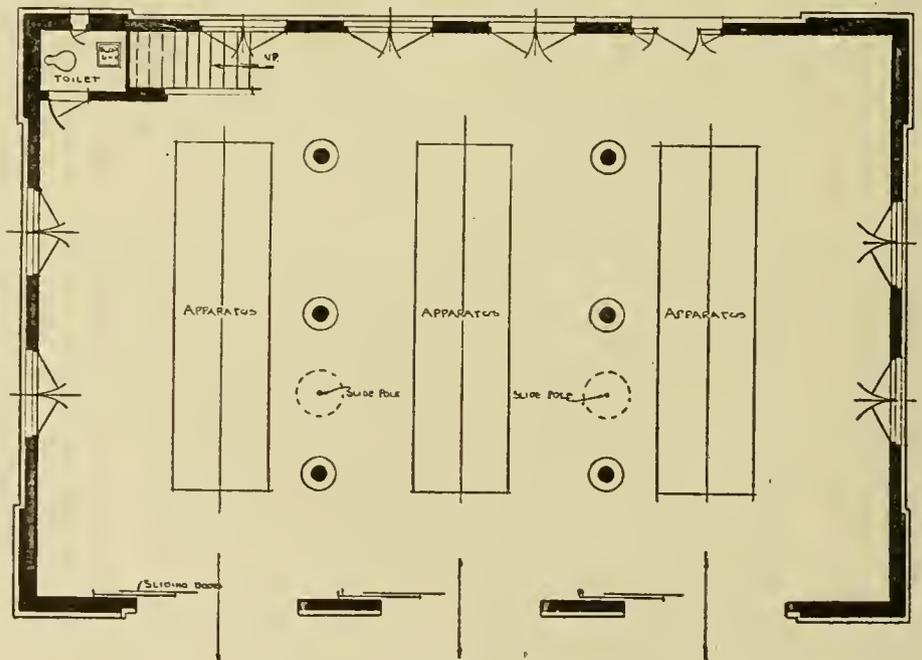

FRONT ELEVATION, NEW BALBOA FIRE STATION.

with the surrounding buildings, such as the Administration Building, and the concrete quarters on the nearby Prado.

The building is two stories high, 37 feet eight inches by 55 feet eight inches in plan, and has a total area of 2,096 square feet. It is constructed of hollow 8-inch cement blocks, with stucco finish, and poured concrete beams and floor slabs five inches thick. The roof is constructed of wood rafters, supporting Spanish tile, laid on sheathing, with a moulded

vide means for rapid descent for the firemen when called out. There are six 12-inch round columns in the center, with moulded caps and wheel guards, to support the second floor beams.

On the second floor there is a reading room 19 feet six inches by 23 feet six inches in size, and a dormitory 29 feet six inches by 27 feet six inches, furnishing sleeping accommodations for 12 men. Off from the veranda, in front of the building, is the chief's dormitory, and

FIRST FLOOR PLAN, BALBOA FIRE STATION.

wood cornice and paneled soffit; the millwork throughout the building is of cypress, with a mahogany finish in the interior of the building.

The façade faces Balboa Plaza, and has three large openings for the fire apparatus,

a storage and battery room, each seven feet six inches by 11 feet. There is a locker room, 10 feet one inch by 13 feet, in the rear of the second floor; also, a toilet and showers, accessible from both the reading room and dormitory.

The new station was put in service at 9.30 a. m., on Monday, January 11, with a captain, lieutenant, and five men in charge; also, a wireman and lineman. At present the equipment consists of a 90-horse-power Webb motor combination pump and hose car with a very complete equipment of tools for fire fighting.

In February, a 90-horsepower hose car is expected and its installation will necessitate an addition of five men to the force at this station.

The building is equipped with the latest devices of electric fire alarm system. A battery room contains a generating plant, storage

batteries, repair parts, etc. A switchboard and repeater is also being installed. Alarm gongs have been placed in the lavatory, the dormitory, and apparatus floor. Wires have been placed underground in the duct lines. A total of 30 noninterfering street fire alarm boxes will be distributed in the district extending from the Balboa docks to Corozal; also, numerous auxiliary boxes are placed in important buildings. In addition, telephones are placed on each floor. A very complete system of lighting with wall plugs and switches has also been installed.

Government Farms.

The Reclamation Service at Washington, D. C., announces the opening to entry of a number of desirable farm units in several western states. Employees in the Canal Zone who contemplate an early return to the United States may obtain full information by writing the Statistician.

Attractive opportunities are offered for small colonies on several projects. The land is acquired under the homestead laws and 20 years' time is granted in which to make payment for water rights.

Nos. 3, 5, 7, 9, and 11 connect at Pedro Miguel Junction with Nos. 32, 34, 40, 52, and 54, respectively, for Las Cascadas branch. No. 8 connects with No. 38 at Pedro Miguel Junction for Las Cascadas branch. Nos. 31, 33, 37, 39, and 53 from Las Cascadas branch connect at Pedro Miguel Junction with Nos. 4, 6, 8, 7, and 12. Passengers using main line trains destined for stations on Las Cascadas branch will change cars at Pedro Miguel Junction. No. 4 will stop at commissary crossing, Cristobal, daily, except Saturdays and Sundays.

C. A. C. POST BUILDINGS.

Group of 15, Including Headquarters, under Erection on Balboa Dump.

Fifteen buildings are under construction on Balboa dump by forces of the Constructing Quartermaster, for use of the Coast Artillery Corps. They are, as follows:

Headquarters building.

One 1-family field officer's dwelling.

Three 2-family quarters for married commissioned captains.

Two 4-family quarters for married or unmarried commissioned lieutenants.

Three 4-family quarters for noncommissioned officers.

Four barracks for privates.

One stable.

These buildings are all constructed of reinforced concrete columns and beams. All exterior walls are composed of hollow blocks, and stuccoed, except the barracks and stable, which are of poured concrete, with rubble surface. All roofs are of red Spanish tile, except the stable, which has a flat concrete slab roof. About one-half of the floor construction is wooden joists, the remainder concrete slabs. Interior partitions are generally 2 by 4-inch studs, metal lathed and plastered, although hollow blocks, poured concrete, and a special form of 4-inch partition, consisting

and may be utilized for storage, trunk space, and dry closet, contains eight principal rooms on the first and second floors. Opening off from the 10 foot wide central stair hall on the first floor, and running entirely through the house from front to rear, is the living room on the left and the dining room on the right. The living room, occupying the entire left end of the house, is as large as the combined dining room, kitchen, pantry, and entry, which balance it on the left. Openings, 12 feet wide, without doors, from the hall into the living room, and from the hall into the dining room, practically make one room of nearly all the first floor. On the second floor are five bedrooms opening off the hall, two fully equipped bathrooms, and several individual closets. One bedroom and bath are *en suite*.

The noncommissioned officers' quarters, 30 feet six inches by 75 feet six inches in plan, which are sectioned to themselves, contain no basement or servants' quarters. On the single floor of each are a living room, dining room, two bedrooms, kitchen, bathroom, and one general closet.

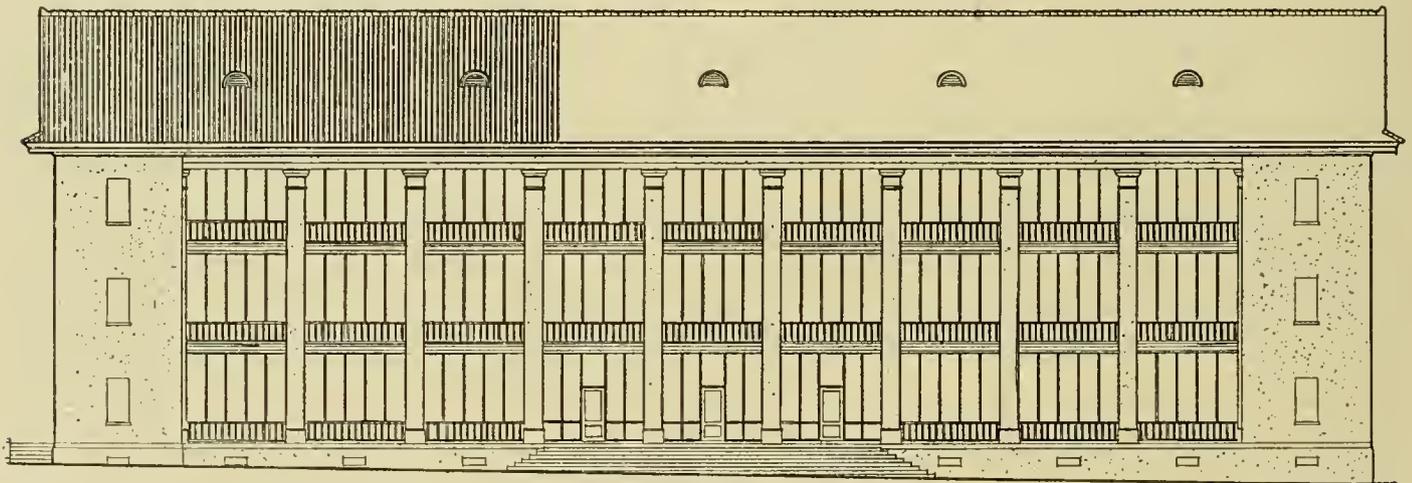

BARRACKS.

The barracks, 66 feet six inches by 126 feet in plan, with a wing in the rear, 22 by 27 feet in plan, are two stories high, with 2-story porches running the length of the building

the first floor the post exchange and lunch room occupy one end of the building, and a separate side entrance has been arranged for this unit. All other rooms on the first floor, *i. e.*, general stores, guard room, prisoners space, dispensary group, band mess, and various minor accessory rooms will be reached from the porches. Continuous stairs at either end of each porch from the first to the third floors provide ample and convenient access to the several floors. On the second floor the reading and amusement rooms occupy one end of the building, and the band dormitory the other, while in the intervening portion will be the general offices of the post, *i. e.*, Quartermaster, Quartermaster's clerks, Fort Commander, Artillery Engineer and Ordnance Officer and clerks, Sergeant Major, file room, Adjutant, Commanding Officer, and a Summary and General Court. The principal feature of the third floor will be the assembly hall, with a capacity for seating 600 people comfortably. This hall will be provided with an operator's booth for moving pictures, and a spacious stage with dressing rooms and toilet adjoining. A large band practice room, and several noncommissioned officers' rooms will occupy the remainder of this floor.

STABLE.

The stable contains harness room, feed

FRONT ELEVATION, HEADQUARTERS BUILDING, COAST ARTILLERY CORPS.

of plaster on expanded metal, stiffened with 1-inch channels, also occur.

QUARTERS FOR COMMISSIONED AND NON-COMMISSIONED OFFICERS.

All of the quarters are of the type of design of the permanent quarters at Balboa, the 4-family commissioned officers' quarters, 36 by 90 feet in plan, having been built from the same plans as the quarters on Balboa Prado. The 2-family captains' quarters, 35 feet four inches by 65 feet in plan, are similar to the 2-family type on Balboa Heights, but with an additional length of 12 feet, which provides two additional bedrooms, making four in all, for each of the two families.

The Field Officer's individual dwelling, 37 feet six inches by 45 feet in plan, is similar in design to the two and 4-family commissioned officers' quarters, with high basement, where, as in all the types above mentioned, the servants are quartered, but it is distinguished from them by having dormers, and the ends of the house are gabled instead of hipped. The dwelling, besides the high basement and the unfinished attic, which is reached by a stair

both front and back. The ground floor contains, on one end, the kitchen, its store room, and a dormitory for three cooks; and on the other end, extending the whole width of the building, is the dry room. Between these are located a dormitory for 12 men, a large store room and office, a room for a noncommissioned officer, and one for the first sergeant. The toilet and baths, and a barber shop and tailor shop, are located in a wing separated from the building by the rear porch. The second story is one large dormitory accommodating about 100 men in one room. The toilets are in the second story of the wing in the rear, opening on the back porch.

HEADQUARTERS BUILDING.

The Headquarters Building, whose center line is coincident with the center of the Parade, will be a 3-story structure, 177 feet long and 60 feet wide, with porches extending along the entire length of the building, front and rear. In the rear, a 3-story extension, 17 by 20 feet, provides space for a barber shop and toilet rooms on the first floor, and toilets and showers on the second and third floors. On

room, and stalls for 20 horses, but it is planned so that an extension can be built to it doubling its capacity.

Hotel Aspinwall Notes.

An index of the increasing popularity of the Hotel Aspinwall at Taboga is shown by the fact that during the month of December the meals served there aggregated 1,590, while in January, up to the 20th of the month, the number had reached 2,531. It is estimated that by the end of the month fully 3,000 meals will have been served. Reservations for rooms at the hotel are being received steadily from employees who expect to take their annual leave in February.

Arrangements are under way whereby guests at the hotel can have their laundry attended to at Ancon, and forwarded to them without any effort on their part, further than to deposit a commissary book at the laundry from which the cost of laundering only will be deducted. Those making a stay of a week or more at the hotel will find this a decided convenience.

CANAL WORK IN DECEMBER.

Monthly Report of the Acting Governor to the Secretary of War.

BALBOA HEIGHTS, C. Z., January 18, 1915.
The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of December, 1914:

Department of Operation and Maintenance.

Lock operation and maintenance—All fender chains required have been received, excepting a section for Miraflores Locks, and the installation of all chains, with the exception of six at Miraflores, has been completed. The floating caisson underwent final tests satisfactorily and was accepted. Practically all of the material required for the telephone systems at the locks was received during the month. The work of grading dams and backfill at Pedro Miguel and Miraflores was continued. One hundred lockages were made at Gatun, 103 at Pedro Miguel, and 101 at Miraflores. The first night lockage was accomplished on December 7 at Pedro Miguel and Miraflores Locks.

Electrical—The output of the power plants was, as follows:

Gatun hydroelectric station, 619,200 kilowatt hours; Miraflores steam station, 1,984,795 kilowatt hours; Balboa power plant, 3,839 kilowatt hours. The output of the Balboa air compressor plant was 272,340,755 cubic feet of free air compressed to 105 pounds. The Gatun and Cristobal substations were completed, tested, and put in service; and all electrical load hitherto carried by the Miraflores steam station was transferred to the Gatun hydroelectric station. The entire transmission line from Cristobal to Balboa, with the exception of the west side between Gatun and Miraflores, was placed in service. Electrical construction work on the substation for the high power naval radio station at Darien, and for the substation at Gamboa for the new permanent pumping plant of the Division of Municipal Engineering, was commenced. Work on underground conduit systems, and in various new buildings, was continued during the month.

Municipal engineering—In addition to the work incident to maintenance, operation, and repairs, work was in progress on the following items of construction: New water supply for Toro Point; seawall for the Panama railroad at Folks River; Atlantic and Pacific fuel oil handling plants, with oil pipe lines; 300,000-gallon concrete reservoir at Gatun; water and sewer systems, and roads, for the Coast Artillery post on Balboa dump; locks repair shop and office building at Miraflores Locks; concrete arch bridge leading to Miraflores spillway wall, and work in connection with the Balboa townsite. The work around the Administration Building was continued, and included the grading of the hill, sodding the grounds, and the construction of the concrete steps on the south side of the building. Construction work on the new Panama waterworks was continued. The excavation of the Gamboa-Miraflores pipe line trench was finished by the contractor, and the installation of valves on the main was in progress.

Meteorology and hydrography—Rainfall was below normal, except on the Pacific side. The deficiencies were greatest in the Atlantic section, where the rainfall amounted to only about 50 per cent of the December normal.

Monthly totals range from 2.25 inches at Alhajucla to 10.39 inches at Caño station on Gatun Lake. The maximum precipitation recorded in any one day was 2.22 inches at Colon on December 12. The estimated rainfall over the Chagres River basin figures 42 per cent below normal—5.65 inches against a 14-year average of 9.80 inches. This estimated average is probably low, as heavy rains fell far up the watershed, producing freshets in the river at times when only light rainfall was recorded at any of the stations in the Canal Zone or vicinity. The total yield for Gatun Lake was 29 per cent below the 7-year December normal; Alhajucla was 24 per cent and Gatun Lake watershed 31 per cent below the 25-year December normal.

Division of Terminal Construction.

PACIFIC TERMINALS.

Shops—Work performed in connection with the construction of the permanent shops included that in connection with the dry kilns in building No. 10, and a temporary roadway around building No. 10, to gain access to the office building.

Dry dock—Hand excavation was employed at the north wall of the dry dock, and 3,783 cubic yards of rock were excavated from the site. As a result of changes made in the concrete mixing plant the yardage of concrete placed per day was materially increased, a total of 15,250 cubic yards being placed during the month.

Coaling plant—The fill supporting the wall along the west end of the coal pocket was practically completed and work was commenced on the excavation for the supporting piers for the berm crane runways. A total of 373 cubic yards of concrete was placed for berm crane piers, tracks, walls, etc.

Quay wall and pier—One thousand and sixty-five lineal feet of piling were driven for the construction of trestle and for supporting caissons. One hundred and six caissons have been started, 17 remaining to be placed. Work progressed satisfactorily on the construction of the superstructure, which consists of steel beams and girders with reinforced concrete slabs. In this work, 587,158 pounds of fixed steel, reinforcing rails, and girders were placed; and 661 cubic yards of concrete and 1,472 square yards of paving bricks were placed in the floor. The work performed on Pier No. 1 included painting and cleaning up the remainder of the exposed fixed iron.

Fuel oil plant—Construction work on the oil berth progressed satisfactorily. Nine caissons have been started, five of which were sunk to rock during the month. Work was handicapped somewhat on account of the leakage of water. The work of connecting up the oil and water landings was performed by the Division of Municipal Engineering.

Sosa Hill quarry—Excavation amounted to 79,598 cubic yards, all of which were classified as rock.

ATLANTIC TERMINALS.

East breakwater—In the construction of the trestle for the fill 50,298 lineal feet of piles were driven; the double trestle was extended 798 feet, and 1,596 lineal feet of track were laid. The total fill in place at the close of the month was 348,868 cubic yards.

Coaling plant—Difficulty was experienced on account of the settlement of parts of the unloader wharf trestle, necessitating the driving of a few additional bents of piles to insure safety of the trestle. The filling of caissons for the south 500 feet of the reloader wharf was

practically completed, and 26 caissons on the unloader side were filled, leaving 28 caissons remaining to complete the south 500 feet of wharf.

Floating cranes—The *Ajax* was offered for test on December 1. During the test the back portion of the jib collapsed, wrecking the jib. The *Hercules* was offered for test on December 10, but test was refused until the cause of failure of the *Ajax* has been determined and any doubtful member suitably reinforced.

Division of Canal Transportation.

Ninety-nine vessels passed through the Canal in December; 57 northbound and 42 southbound. Collections for tolls amounted to \$398,111.49; for pilotage \$2,452; for tug services \$150; for launch service \$103.50; for service of deck hands, etc. \$984; and for miscellaneous (maps, charts, etc.) \$48.80, or a total of \$401,848.79.

Eighteen vessels were measured and 81 inspected to see that their certificates conformed to the rules.

The new signal station opposite Empire was completed. The new mooring stations at Empire and Gamboa were completed and put in service.

Dredging Division.

The total dredge excavation for the month, including earth, rock, gravel and sand, was 1,227,675 cubic yards, as follows:

	Cu. Yds.
Miraflores locks to the sea.....	75,205
Balboa inner harbor.....	331,636
Culebra Cut.....	514,932
Sea to Gatun Locks.....	118,800
Approach channel.....	37,800
Inner harbor, Cristobal.....	68,400
Chagres River gravel and sand.....	27,600
Breakwater, Limon Bay.....	32,411
Breakwater harbor, Limon Bay.....	20,891
Total.....	1,227,675

The hydraulic grader was engaged during the month in grading the Canal banks and digging draining ditches.

The destruction of water hyacinths progressed; 22,556 square yards of plants were poisoned, and 1,080 square yards pulled and piled on the bank. No new beds were discovered during the month.

Mechanical Division.

In general, the character of the work of the division was about the same as that for the previous month. A further reduction in the volume of work resulted in a net decrease of 12 gold roll employees.

Shop orders authorized during the month numbered 867; those left over from the previous month 384; those completed during the month 843, and those carried forward into January 408. The output of the foundry was 108,283 pounds of iron, 52,564 pounds of steel, and 6,493 pounds of brass. Hostling was done on 5,495 pieces of equipment. Shop repairs were made on 1,449 cars, and field repairs on 6,153.

The operation of the floating cranes *Ajax* and *Hercules* was assigned to the division, and a tentative organization, based on a combined wrecking organization for the entire work, was approved.

The work of placing the fuel oil plants in operation, and of operating them until such time as it is deemed desirable to turn them over to the Supply Department, was assigned to the division.

Building Division.

The principal operations of this division during the month were, as follows: The last of the 28 four-family and seven of the nine 2-family houses at Balboa were completed. The

plastering and carpentry work in the two remaining 2-family houses was let by contract. The new fire station at Balboa was completed, with the exception of some of the hardware, which has not been received on the Isthmus. Work was begun during the month on the Balboa oil storehouse, and the locks office building at Miraflores. The removal of buildings for the insane asylum at Corozal was begun during the month. The removal of the buildings on Culebra Island, formerly used as a quarantine station, was completed, and the buildings are now in the process of erection, to serve the same purpose, on Balboa dump. Satisfactory progress was made on the buildings for the Army near Fort Amador, and the remodeling and repair of buildings at Culebra was begun during the month.

Supply Department.

The force report for the last Wednesday in December showed a total of 25,171 employes of The Panama Canal and Panama railroad, of whom 3,701 were white Americans, and 21,470 were laborers. Of the latter, approximately 422 were Europeans and the remainder West Indian negroes. The total force was reduced 1,022; Americans 217, laborers 805.

The occupants of Government quarters numbered 6,966 white Americans, of whom 3,863 were men, 1,547 women, and 1,556 children; 8,436 West Indians, of whom 5,518 were men, 1,236 women, and 1,682 children.

The value of material received during the month was \$563,283.17. It came forward in 32 steamers; the total weight of the cargo, exclusive of lumber and piles, was 10,048 tons. Some of the principal items were 1,711,299 feet, B. M., lumber for stock and the Mechanical Division, 61,615 lineal feet of piles, and 133,905 bags of Portland cement.

Health Department.

General—No case of yellow fever, smallpox or plague originated on or was brought to the Isthmus during the month. Forty-six deaths occurred in the Canal Zone. The death rate for disease for the Canal Zone, based upon a population of 36,862, was 12.37, as compared with 12.66 for the preceding month, and 15.05 for the corresponding month of last year.

Employes—The health of employes continued good during the month. The number of names on the rolls for the preceding month was 36,224. On this basis, the admissions to hospitals and quarters, 1,000, gave a rate of 331.27 per thousand, as compared with 298.93 for the preceding month, and 494.71 for the corresponding month of last year. The admission rates to hospitals for all diseases were: Whites 359.15, blacks 171.93, Europeans 424.47, Americans 270.32. The admission rates to hospitals and quarters for malaria were: Whites 171.96, blacks 41.03, Europeans 206.50, Americans 163.87. The total number of deaths from all causes was 19. Of these, 11 died from disease, or 3.64 per thousand, as compared with 1.61 for the preceding month, and 5.24 for the corresponding month of last year. There were no deaths from disease among white employes.

Accounting Department.

The cash balance in Canal construction appropriations on December 31 was \$15,101,903.22; in the fortification appropriations \$4,135,283.08. The pay rolls for December, exclusive of Army quarters, storehouses, fortifications, etc., amounted to \$950,098.56,

and the fortification roll amounted to \$61,758.52. Payments by the Disbursing Clerk in Washington amounted to \$1,040,458.51; by the Paymaster on the Isthmus \$1,400,691.74. Collections on the Isthmus amounted to \$1,043,316.13, of which \$458,181.96 were repaid to appropriations, \$186,550.91 were trust funds, and \$398,583.26 were covered into the Treasury as miscellaneous receipts. Of the miscellaneous receipts, \$398,111.49 were collected on account of tolls, as compared with \$349,382.15 for November. Deposits in the amount of \$132,329.30 were made with the Assistant Treasurer, to be applied in the payment of tolls and other charges. Canal Zone revenue collections and miscellaneous funds received amounted to \$210,460.29, and disbursements under the same heading to \$311,587.16.

Executive Department.

DIVISION OF CIVIL AFFAIRS.

Customs service—At the port of Balboa, 76 vessels entered and 79 cleared; at Cristobal, 114 vessels entered and 109 cleared.

Administration of estates—During the month of December, 14 estates were received and 26 were settled. The total cash received in estates during the month amounted to \$401.35; the total value of estates closed during the month was \$2,011.96. On December 31, there were 27 estates in course of settlement.

Licenses and taxes—Two hundred and ninety-three licenses were issued during December. Of this number, 33 were for automobiles and motorcycles, 15 for bicycles, 25 for hunting and keeping or carrying firearms, and 220 for peddling foodstuffs.

Postal service—Postmasters remitted on account of stamp sales, second-class collections, and postage due collections \$9,175.41. The money order business aggregated \$337,812.43. The fees collected thereon amounted to \$1,259.25. Of the total value of money orders issued, \$103,005 represents the value of deposit orders issued without fee. Deposit orders to the value of \$67,895, and postal savings certificates to the value of \$78,024 were paid. Balance of postal savings deposits on hand, represented by the unpaid certificates and deposit money orders, aggregated \$697,796, as compared with \$740,710 at the close of the previous month. The rental of lock boxes for the quarter beginning January 1, 1915 yielded \$965.50, and there is every indication that the annual revenue from this

source will be not less than \$4,000.

POLICE AND FIRE DIVISION.

Three hundred and eighty-four arrests were made during the month. Of these, 365 were males and 19 were females. Sixty-two convicts were confined in the penitentiary at the close of the month. Eleven persons were deported. Of this number, eight were convicts who had completed their sentences in the penitentiary.

Nine fires occurred during the month. The damage to Panama Canal and Panama railroad property was \$86.

COURTS.

In the District Court eight civil, 33 probate and 59 criminal cases were settled; 10 civil, 35 probate, and 27 criminal cases were filed; and 110 cases of all kinds were pending at the end of the month. In the Magistrates' courts 32 civil and 369 criminal cases were tried.

DIVISION OF SCHOOLS.

The total enrollment of the Canal Zone schools for the month was 1,321 for the white schools and 1,148 for the colored schools. In the white schools the net enrollment was 1,165, the average number belonging 1,015, and the average daily attendance 985.7; in the colored schools the net enrollment was 1,092, the average number belonging 892, and the average daily attendance 768.2.

Panama Railroad.

Cargo handled at the Colon and Balboa agencies aggregated 128,988 tons, 12,297 tons of which represent shipments made through the Canal in steamers of the Panama Railroad Steamship Line, as follows:

	Tons.
From New York to Balboa	2,089
From Colon to Balboa	1,895
Total	3,984
From Balboa to New York	5,607
From Balboa to Colon	2,706
Total	8,313
Grand total	12,297

Trestle work on the new terminal dock at Cristobal was 85 per cent completed; steel cylinders 49 per cent completed; excavation in cylinders 20 per cent completed and five per cent of the total amount of concrete required was placed in the cylinders.

The bridge across the French canal was completed and put in service on December 16.

Respectfully,

CHESTER HARDING,
Acting Governor.

Deceased Employes.

George Downes	50759	Barbados	Colon	Mechanical Div..	Jan. 16, 1915.

The estates of these deceased and insane employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against their estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

JOINT LAND COMMISSION.

Awards.

Award No. 73, docket Nos. 84 and 84-1, January 13, 1915—In the matter of the claim of Geo. B. Jones and F. E. Frink, for property located near Las Cascadas—On April 1, 1913, Geo. B. Jones filed with the commission a claim in the amount of \$12,400, United States currency, covering some 100 hectares of land, more or less, said to be located midway between Las Cascadas and Empire, Canal Zone, abutting the public highway, and known as the James Nelson Farm, and certain improvements thereon.

Subsequently, on June 22, 1914, there was filed with the commission through Messrs. Fairman, MacIntyre, and Enderton, claimants' attorneys, an amended statement of claim, naming Geo. B. Jones and F. E. Frink as joint claimants, which claim was assigned docket No. 84-1. This claim came on for public hearing before the commission on January 12, 1915, and from the evidence adduced at the hearing the commission is of the opinion that the claimants are without title to the land in question, and that portion of the claim is, therefore, dismissed without prejudice to the rightful owners thereof. As to the improvements which were on said lands, however, an award is hereby made against the United States, in favor of Geo. B. Jones and F. E. Frink, for all right, title, and interest which the said Geo. B. Jones and F. E. Frink may now possess or may have possessed in all fruit trees, growing crops, buildings, and all other improvements of whatever nature on the land described in the aforesaid claim, said to have been known as the James Nelson Farm, in the amount of \$1,743, United States currency.

This award shall be paid to the aforesaid claimants, in the amount specified, on or before the 13th day of February, 1915, and if payment or tender of payment is not made on or before that date, this award shall thereafter bear interest at the rate of six per centum per annum until paid.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, *Commissioners.*

Rules of Dismissal.

Rule of dismissal No. 163, docket No. 143, January 8, 1915—In the matter of the claim of Marius Ceran, for property known as Pita Rita.—The claim of Marius Ceran filed with the commission April 10, 1913, for damages to the extent of \$50,000 covering property known as Pita Rita, said to contain 1,000 hectares, and to be in its entirety an alluvial gold mine, about two hectares, however, said to have been cultivated in bananas, rubber, and annual crops, is hereby dismissed for the reason that the evidence submitted does not justify an award being made.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, *Commissioners.*

Rule of dismissal No. 165, docket No. 64—In the matter of the claim of Domingo Matos.—With reference to the claim of Domingo Matos the evidence before the commission is that the United States has made settlement with this claimant for his houses and other improvements located at Cerro Sierpe and Salt Valley.

In view of the settlement made, this claim calls for no further action by this commission, and it is accordingly dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, *Commissioners.*

Rule of dismissal No. 165, docket numbers as shown, January 13, 1915—In the matter of sundry claims.—With reference to the following claims the evidence before the commission is that they have made settlement with the United States:

<i>Claimant.</i>	<i>Docket No.</i>
Alvear, Josefa Maria (Alvarez Josefa Maria Diez)	229
Maucay (Moncoca) Serrada	1,342
Pinel, Pachito (Francisca) Salasala	127
Kibera, Enrique	229

In view of the above settlements no further action is necessary by this commission, and the foregoing claims are therefore dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, *Commissioners.*

Rules.

Rule No. 158, docket No. 1095, January 2, 1915—In the matter of the claim of Anibal Moran for property located in Gorgona—Rule in correction of typographical error in tax number in rule of dismissal already announced.

Under rule of dismissal No. 82 of September 16, 1913, the claim of Anibal Moran, docket No. 1095, for house tax No. 875, in Topaca (Gorgona), was dismissed.

The tax number in said rule of dismissal was erroneously shown, and said rule of dismissal, in so far as relates to said claim of Anibal Moran, docket No.

1095, is hereby amended to read tax No. 876.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, *Commissioners.*

Rule No. 167, docket No. 1,734, January 14, 1915—In the matter of the claim of Mrs. Paula Julio C., for property at Las Cascadas—Under date of June 6, 1914, Mrs. Paula Julio C. filed with the commission her claim for damages said to have been caused by the United States, or its agents, to certain property at Las Cascadas.

Subsequently, on December 14, 1914, the claimant, by letter of that date, requested that her claim be dismissed for the reason that she had effected settlement with the representatives of the United States Government for all her property within the Canal Zone.

The request of the claimant was granted and this formal rule dismissing the claim is entered, in order that it may be properly stricken from the trial docket.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, *Commissioners.*

Rule No. 169, docket No. 2523, January 14, 1915—In the matter of the claim of Henry Seymour, for property at Empire.—Under date of November 9, 1914, Henry Seymour filed with the commission his claim for damages said to have been caused by the United States, or its agents, to certain property at Empire.

Subsequently, on December 18, 1914, the claimant, by letter of that date, requested that this claim be dismissed.

The request of the claimant was granted, and this formal rule dismissing the claim is entered, in order that it may be properly stricken from the trial docket.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, *Commissioners.*

Rule 169, docket No. 1939, January 14, 1915—In the matter of the claim of J. L. Flowers, for property at Empire.—Under date of October 24, 1914, J. L. Flowers filed with the commission his claim for damages said to have been caused by the United States, or its agents, to certain property at Empire.

Subsequently, on December 22, 1914, the claimant, by letter of that date, requested that his claim be dismissed.

The request of the claimant was granted, and this formal rule dismissing the claim is entered, in order that it may be properly stricken from the trial docket.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, *Commissioners.*

OFFICIAL CIRCULARS.

Promotion.

THE PANAMA CANAL, EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., January 19, 1915. CIRCULAR No. 603-7:

1. The Executive Order of December 28, 1914, amends Civil Service Rule XI, Paragraph 2, by the addition of the following clause:

(f) No employe shall be promoted during probation, except upon approval of the Commission previously obtained.

2. This order applies to all appointments under The Panama Canal made through original certification by the Civil Service Commission. The first six months' service is considered the probationary period. This order does not apply to transfers from other departments in the classified service, or to reemployments, provided the probationary period had been completed under the previous service.

CHESTER HARDING, Acting Governor.

Gangwayman.

THE PANAMA CANAL, EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., January 15, 1915. CIRCULAR No. 666-3:

The rate of 15 cents per hour for "Gangwayman," Panama railroad, is hereby established.

CHESTER HARDING, Acting Governor.

Ordinance Relating to Vaccination.

THE PANAMA CANAL, BOARD OF HEALTH OF THE CANAL ZONE.

Be it ordained by the Board of Health of the Canal Zone:

Section 1. Every person living in the Canal Zone who has not been successfully vaccinated within five years, or who has not had an attack of smallpox (which facts shall be determined by the Chief Health Officer) shall submit to vaccination to the satisfaction of that officer, unless, in his opinion, the person is not a fit subject for vaccination; and it shall be the duty of every person having the care, custody, or control of any minor or other individual over three months of age, to cause such minor or other individual to be promptly and effectively vaccinated. Certificates of successful vaccination will be issued by the Chief Health Officer, or by other persons designated by him. Vaccination will be done gratis.

Section 2. Any person failing or refusing to comply with the provisions of this ordinance shall be deemed guilty of a misdemeanor.

Section 3. This ordinance shall take effect 30 days from and after its approval by the Governor of The Panama Canal.

The foregoing ordinance was duly adopted at a meeting of the Board of Health of the Canal Zone held at Balboa Heights, C. Z., on the 25th day of December, 1914.

P. M. ASHBURN, Secretary of the Board of Health.

Approved on the 16th day of January, 1915.

CHESTER HARDING, Acting Governor, Panama Canal.

Forwarding Applications for Leave of Absence.

THE PANAMA CANAL, OFFICE OF EXECUTIVE SECRETARY.

All concerned—It is requested that as far as possible, applications for leave of absence be forwarded to this office from 20 to 30 days before effective date of leave desired. Applications for leave should not, however, be forwarded more than 30 days prior to effective date of leave.

C. A. McILVAINE, Executive Secretary.

Discontinuing Shuttle Trains 21 and 22.

THE PANAMA RAILROAD COMPANY, OFFICE OF SUPERINTENDENT,

BALBOA HEIGHTS, C. Z., January 21, 1915.

All concerned—I have to advise for your information that, effective with the new time table on January 31, 1915, shuttle trains Nos. 21 and 22 will be discontinued.

C. H. MOISEWITZ, Superintendent.

Federal Income Tax.

Notice to all concerned—The Auditor, Panama Canal, Balboa Heights, has received copies of Form 1040-Revised, on which all employes of The Panama Canal and Panama railroad having a net income of \$3,000, or over, for the year 1914, shall make their return to the Collector of Internal Revenue at Baltimore, Maryland.

A copy of this form will be mailed to any individual

requesting the same, which must be filed out and filed with the Collector at Baltimore, Md., on or before March 1, 1915.

The penalty for failure to have this return in the hands of the Collector of Internal Revenue on or before March 1, 1915, is \$20 to \$1,000.

AD. FAURE,
Acting Auditor, Panama Canal.

Judge Advocate, U. S. Troops, Panama Canal Zone.
HEADQUARTERS, UNITED STATES TROOPS,
PANAMA CANAL ZONE,
ANCON, C. Z., January 21, 1915.

GENERAL ORDERS
No. 3.

1. Major Herbert A. White, Judge Advocate, having reported, is announced as Judge Advocate, United States Troops, Panama Canal Zone, with station at Ancon, C. Z.

2. Major Herbert A. White, Judge Advocate, is appointed and announced as Acting Adjutant, United States Troops, Panama Canal Zone.

By command of Brigadier General Edwards:
JOSEPH A. MARMON,
First Lieut., 25th Infantry, A. D. C.,
Acting Adjutant.

Official:

JOSEPH A. MARMON,
First Lieut., 25th Infantry, A. D. C.,
Acting Adjutant.

Proposals for Moving Houses—Corozal.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., February 2, 1915, and then opened, for moving intact, one Type 18, one Type 5, one Type 1, and three Type 17 houses at Corozal. Details of locations and further information may be obtained upon application to the office of the Constructing Quartermaster, Room 263, Balboa Heights.

Separate bids must be submitted covering each house, but one bidder may bid on all houses.

Bids must be accompanied by cash, certified check, or post-office money order for five per cent of the amount bid.

Bids should be marked "Proposal for moving houses, Corozal," and addressed to the Chief Quartermaster, Balboa Heights, C. Z.

Stages of the Chagres River, Gatun Lake, and Miraflores Lake.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., January 25, 1915.

The following insufficiently addressed letters originating in the United States and its possessions have been received at the office of the Director of Posts, and may be procured upon request of the addressee:

Downing, J. S.	Morrissey, Captain Wm.
Fellows, E.	Perce, W. T.
File, Mrs. T. L.	Sargent, C. C.
Fisher, Allen D.	Thomas, Luther
Fox, Alvin	Wentworth, Fred P.
Grouzis, George	Wilson, Mrs. E. W.

*McLachland, Lieut. J. D.

* Package.

Forces of the Division of Terminal Construction will take over the work of drilling holes at Sosa Hill quarry after January 31. This work was let to a private contractor several weeks ago, but it has been found more economical to perform it with the Canal force.

COMMISSARY DEPARTMENT.

Monthly Inventory.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER,
BALBOA HEIGHTS, C. Z., January 25, 1915.
All concerned—The usual monthly inventory of the Commissary Department will be taken on Sunday, January 31, 1915. The commissaries will be open for business at 10 a. m. on Monday, February 1.

An audited inventory will be taken of Ancon, Corozal, and Cristobal commissaries. Only the grocery and cold storage departments of these commissaries will be open at 10 a. m., on Monday, February 1, the other departments remaining closed until inventory is completed.

WM. R. GROVE,
Chief Quartermaster.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m., on Saturdays and sailing days of Panama railroad vessels.

Proposals for Plastering Army Buildings on Balboa Dump.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., February 13, 1915, and then opened, for furnishing the necessary labor to completely finish the plastering in the Headquarters Building, one noncommissioned officers' quarters, and the Field Officer's house, now being erected on Balboa dump for the United States Army.

Separate bids must be submitted for each building, but one bidder may bid on all three houses. Specifications may be obtained upon application to Room 263, Balboa Heights.

Bids must be accompanied by cash, certified check, or post-office money order for five per cent of the amount bid.

The Government reserves the right to reject any or all bids.

Bids should be marked "Proposal for plastering Army buildings on Balboa dump," and addressed to the Chief Quartermaster, Balboa Heights, C. Z.

SHIPPING INFORMATION.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans, for all States. Due at New Orleans the following Tuesday.

Every Saturday to New York, for all States. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

*Every Monday to New York, for all States, except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.

Tram No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*NOTE.—The sailings on February 8, March 8, and April 5 will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will only be for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and Northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7.10 a. m., connects with the despatches for the four sailings mentioned above.

Tide Predictions.

Panama tide predictions for the next five weeks are given in the following table:

JANUARY.				
DATE.	Time and height of high and low water.			
Wed., Jan. 27.....	0:35	6:59	13:31	19:19
	11:4	3:9	11:0	4:6
Thurs., Jan. 28.....	1:37	7:53	14:22	20:12
	11:9	3:2	11:8	4:0
Fri., Jan. 29.....	2:27	8:41	15:05	20:55
	12:6	2:4	12:7	3:1
Sat., Jan. 30.....	3:09	9:23	15:43	21:41
	13:4	1:5	13:6	2:2
Sun., Jan. 31.....	3:48	10:03	16:18	22:22
	14:2	0:7	14:5	1:3

FEBRUARY				
DATE.	Time and height of high and low water.			
Mon., Feb. 1.....	4:26	10:40	16:52	23:02
	14:9	0:0	15:3	0:6

	13:4	1:5	14:0	1:7

MARCH.

DATE.	Time and height of high and low water.			
Mon., March 1.....	3:24	9:35	15:48	21:57
	14:4	0:5	15:1	0:5
Tues., March 2.....	4:03	10:14	16:24	22:36
	15:3	-0:3	16:1	-0:4
Wed., March 3.....	4:41	10:52	17:01	23:18
	15:9	-0:8	16:7	-1:0

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.). All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls, or the purchase of supplies, may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

It is advisable that deposits be made somewhat in excess of the anticipated charges, to cover minor charges which may not have been anticipated, such as pilotage and towage. Pilotage is at the rate of \$1 per foot of maximum draft, but is not charged on a vessel which makes the transit of the Canal without taking on or discharging freight or passengers in a terminal port. Tug service, which is at the rate of \$15 per hour, will not be charged on vessels of less than 15,000 gross tonnage.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa from the Union Oil Company at the rate of from 1,300 to 1,600 barrels per hour. The present price is \$1 25 per barrel, reduced to 60° Fahrenheit.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

The Government hospital service is fully equipped for the treatment of medical and surgical cases. The charge for consultation at the dispensaries is \$3; for hospital treatment, in ward, \$3 per day; in private room, \$6 per day. For American seamen, the charge for treatment in ward is \$1 per day.

Application for supplies, or for services, should be made to the captain of the port, Cristobal or Balboa.

Mail, other than registered, and cablegrams for men on ships which will call at the terminal ports, or pass through the Canal, may be addressed in care of the captains of the ports, if desired, or may be addressed to Cristobal or Balboa, general delivery, with the name of the vessel written plainly; or, in case the vessel has a known representative on the Isthmus in care of such representative.

The cable address of The Panama Canal on the Isth-

mus is "Isthmian, Balboa Heights," in the United States, "Isthmian, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C.," for delivery in the United States.

Sailings of Vessels in Regular Service With the Isthmus.

REGULAR CONNECTIONS THROUGH THE CANAL.

Approximately regular services between the Atlantic and the Pacific seaboard from Boston, New York, Philadelphia, and Baltimore, occasionally Charleston and New Orleans, to San Pedro, San Francisco, Portland, and Puget Sound, and return, are maintained by the American-Hawaiian Steamship Company, with a sailing each way about every five days; the Luckenbach Steamship Company, with a sailing each way about every 10 days; Sudden and Christenson, approximately fortnightly; the Atlantic and Pacific Steamship Company, about every three weeks; and the Boston and Pacific Line, and the Arrow Line, each sending a vessel each way about once a month.

Between the east coast of the United States and the west coast of South America, fortnightly services are maintained by the Merchants' Line and by the New York and South America Line; the West Coast Line has sailings each way about every four weeks.

Between the west coast of the United States, with connections to lower British Columbia and Europe, the following lines are in service: The Harrison-Direct Line, monthly; the Maple Leaf Line, about every six weeks; the East Asiatic Company, monthly, and the Johnson Line, every six or seven weeks.

The Pacific Steam Navigation Company is operating approximately a monthly service around South America from Liverpool, by way of the Canal.

The American-Australian Line has been sending vessels through the Canal about fortnightly from New York to ports in Australia and New Zealand.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro, and an additional weekly sailing to Bocas del Toro.

The Royal Mail Steam Packet Company maintains approximately a fortnightly service between Colon and England, via Cartagena, Puerto Colombia, Trinidad, and Barbados. Its service to New York, via Kingston, has been temporarily discontinued.

The Compagnie Générale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Carupano, Trinidad, Martinique, Guadeloupe, and Santander; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Carupano, Trinidad, and Santander.

The Italian Steam Navigation Company, "La Veduggia," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curaçao, Puerto Cabello, and Barcelona.

The Compañía Trasatlantica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curaçao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls en route, the vessel sails from Genoa on the 8th day of each month.

Regular service is maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing about every six days, direct; between Cristobal and New York by the United Fruit Company sailings about twice a week; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

MOVEMENTS OF OCEAN VESSELS.

(Week ending at noon January 24)

THROUGH THE CANAL—ATLANTIC TO PACIFIC.

Table with columns: Date, Vessel, Nationality, Line, From, For, Carco (Nature, Tons), Canal Tonnage (Gross, Net). Lists various vessels like Limori, Acajulla, Proteus, Honolulu, Pacific, Kentuckian, etc.

*For orders. †Discharge cargo at Cristobal and Balboa. ‡Collier.

THROUGH THE CANAL—PACIFIC TO ATLANTIC.

Table with columns: Date, Vessel, Nationality, Line, From, For, Carco (Nature, Tons), Canal Tonnage (Gross, Net). Lists vessels like Lo Habra, Washington, Auchencrag, etc.

* Came from New York by way of the Strait of Magellan.

*ARRIVALS AND EXPECTED ARRIVALS FROM ATLANTIC.

Table with columns: Date, Vessel, Line, From. Lists arrivals from Atlantic like Lompoc, Aoyune, Pionia, etc.

ARRIVALS AND EXPECTED ARRIVALS FROM PACIFIC.

Table with columns: Date, Vessel, Line, From. Lists arrivals from Pacific like Oliver J. Olson, Copenhagen, St. Leonards, etc.

PORT OF CRISTOBAL.

*ARRIVALS.

Table with columns: Date, Vessel, Line, From. Lists arrivals at Cristobal like Alexandrian, Aucon.

*DEPARTURES.

Table with columns: Date, Vessel, Line, To. Lists departures from Cristobal like Tagus, Venozuela, Alexandrian.

*EXPECTED ARRIVALS.

Table with columns: Date, Vessel, Line, From. Lists expected arrivals like Dronning Olga, Haiti, Chiswick, etc.

*EXPECTED DEPARTURES.

Table with columns: Date, Vessel, Line, To. Lists expected departures like Haiti, Trent, Savoia.

*Other than vessels passing through the Canal, United Fruit Company's regular vessels, and vessels in regular service to the United States.

PORT OF BALBOA.

*ARRIVALS.

Table with columns: Date, Vessel, Line, From. Lists arrivals at Balboa like San Jose, Cordelia, Baja California.

*DEPARTURES.

Table with columns: Date, Vessel, Line, To. Lists departures from Balboa like Montoro, Quilque, Guat. mela, etc.

*EXPECTED ARRIVALS.

Table with columns: Date, Vessel, Line, From. Lists expected arrivals like Newport, Pachitea.

*EXPECTED DEPARTURES.

Table with columns: Date, Vessel, Line, To. Lists expected departures like San Jose.

(Continued from page 221.)

CRISTOBAL-COLON TO NEW YORK.

Table with columns: Vessel, Line, Date, Day. Lists vessels like Carrillo, Colon, Almirante, etc.

Table with columns: Vessel, Line, Date, Day. Lists vessels like Abangarez, Parismina, Atenas, etc.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the roll. To others, the subscription rate will be \$1. United States currency, per annum, in the United States and its possessions, Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Darien Station Receiving Messages from Wide Area.

Since the recent completion of the second of the three 600-foot steel towers for the high power radio station at Darien, temporary receiving antennae have been rigged between these towers and receiving tests are being conducted. Messages are received from Arlington, near Washington, D. C., and from San Francisco without difficulty.

No messages have been transmitted from the Darien station. The transmitting apparatus and power plant have been installed complete, but the substation through which the power is to be supplied with electricity from the 44,000-volt transisthmian line has not been completed.

Night Pilot Service at Atlantic Entrance.

On account of the increased traffic through the Canal and to assure the safety of vessels approaching the Atlantic entrance at night, a special pilot has been detailed by the captain of the port of Cristobal to be on duty all through the night, and a night signalman has been stationed in the lookout tower on top of the Hotel Washington. Upon the approach of a vessel at night, the night pilot is summoned and goes out in his launch beyond the breakwaters to bring the vessel through to the quiet anchorage inside the breakwaters. This is especially desirable at this season of the year, when the heavy seas may be dangerous to vessels anchored outside the breakwaters.

In addition to bringing vessels in at night, the night pilot is of service to vessels going out from the Atlantic entrance after six in the evening, either from Gatun Locks or after having taken on supplies at Cristobal.

First Cargo of Oil for New Handling Plants.

The first cargo of fuel oil to be supplied to The Panama Canal under the 1915 contract with the Standard Oil Company of California arrived at Balboa on January 12. It contained 59,979 barrels. The oil was pumped into the Government fuel oil storage tanks Nos. 3 and 4 and is being delivered by the new Government handling plant to the Pana-

ma Canal tanks as far north as Paraiso.

Award of contract for supplying oil to the Government plant at the Atlantic entrance to the Canal has not been made.

"Kroonland" Is Largest Vessel Through the Canal.

The passenger steamship *Kroonland*, which passed through the Canal from the Atlantic to the Pacific on Tuesday, February 2, is the largest vessel to have used the Canal to date, and is the one which has paid the most tolls. The *Kroonland* is 560 feet long between perpendiculars by 60.2 feet in the beam and, at the time of passage through the Canal, was drawing 29.2 feet of water. Her gross tonnage, in Canal measurement, is 13,075 and her net tonnage 8,233; her tolls were, accordingly, \$9,879.60.

The *Kroonland*, which belongs to the Red Star Line of the International Mercantile Marine and flies the American flag, is under charter for a tour around South America with a party of business men, and their families, from the United States. She carries 270 through passengers, in addition to eight local passengers who disembarked at Colon, but no cargo. The cruise started from New York and touched at Havana and Kingston, on the way to Colon; the next port of call after leaving the Canal will be Callao, beyond which the vessel will proceed down the west coast of South America, through the Strait of Magellan, and up the east coast, with stops at important ports.

Great Northern Carries 560 Passengers Through Canal.

Five hundred and sixty passengers, bound from Philadelphia to San Francisco, by way of San Diego and Los Angeles, were taken through the Canal on the steamship *Great Northern*, which arrived at Colon at 7 a. m., Tuesday, February 2, and began the passage of the Canal at 12.25 p. m. of the same day. In addition, the vessel is carrying a crew of 239 men and a cargo of 1,269 tons of general merchandise.

The *Great Northern* was recently completed at the yards of William Cramp and Sons, Philadelphia, and this is her maiden voyage. She belongs to the Great Northern Pacific Steamship Company and is to be operated in coastwise service between San Francisco and Portland, Ore., with way stops at Astoria. The vessel is 509 feet long between perpendiculars, 63 feet in the beam, and has a Canal tonnage of 10,863 tons and 6,435 tons net.

Diesel Engine Oil for Sale at Balboa.

The Union Oil Company, with offices at Balboa, received 37,000 barrels of Diesel engine fuel oil at its Balboa storage plant on January 23. The shipment arrived on the steamship *Cordelia* and came from the refinery at Oleum, California. It is available for sale to vessels at the rate of 45 shillings per ton of seven barrels. Deliveries can be made as fast as 2,000 barrels an hour.

SAILING SHIPS USE CANAL.

New Route Offers Advantages to Them as Well as to Steam Vessels.

Prior to the opening of the Canal, it was widely assumed that the new route would not be used by sailing vessels. Following this assumption, there has been very little discussion of the relations of the Canal to sailing traffic.

Since the opening of the Canal it has been used by four sailing vessels, one of which has passed through it twice. Two of the vessels, the prison ship *Success* and the pleasure yacht *Athene*, were not engaged in commercial service. The schooner *Zeta* and the barkentine *John Ena* passed through laden, and may be regarded as typical of this traffic. A fifth sailing vessel, the barkentine *Dirigo*, of about the size of the *John Ena*, arrived at Colon on Tuesday, February 2, and is now on its way through the Canal.

The *Zeta* is a wooden 3-masted schooner, 132 feet long, 32 feet in the beam, and 12 feet deep. She is registered at 335 net tons, Lloyd's measurement, and at 313 net tons, Canal measurement. Her expenses in transiting the Canal were: Tolls, \$520.80; tug service, \$150; total, \$670.80. The vessel was carrying 600 tons of lumber, her expenses in passing through the Canal amounted to \$1.118 per ton of cargo.

The *John Ena* is a 4-masted steel barkentine, 313 feet long, 48 feet in the beam, and 25 deep. The registered net tonnage of this vessel is 2,706; the Canal measurement rates it at 2,609 net tons. Expenses for going through the Canal were: Tolls, \$3,130.80; tug service, \$302.15; total, \$3,432.95. On a cargo of 4,400 tons, of petroleum and wax, the total expenses prorate at 78 cents per ton.

To date, under conditions of average loading, the tolls on laden steam vessels have been equivalent to approximately 75 cents per ton of cargo carried.

From the foregoing instances it is seen that sailing vessels can be handled through the Canal economically, as far as the actual passage of the Canal is concerned. A factor of greater importance, admitting of less certainty in its determination, is the relative time which it will take a sailing vessel to reach the Isthmus, and its ultimate destination, in comparison with the passage over the longer alternative routes, around the Horn or the Cape of Good Hope.

On the Atlantic side, according to sailing directions, the time of transit of an average sailing vessel between New York and the Isthmus may be approximated at 20 days. The time from the English Channel to the Isthmus is reckoned as 30 days for a yearly average; the homeward voyage to Europe is taken at 40 days. Limon Bay is easily accessible to sailing vessels at all times of the year, and vessels may generally expect a fair wind for entering.

On the Pacific side, vessels may generally expect a fair wind off shore on departing from the Isthmus, light from May to November, and somewhat stronger from December to April. Vessels entering the Gulf of Panama will almost invariably encounter head winds, often very light, and find difficulty in beating up to the Canal. Off shore on the Pacific side the regular trades may not be expected until several hundred miles off shore. Sailing directions should be freely consulted by all sailing masters, particularly in regard to the wind and currents on the Pacific side. If due notice be given, tugs may be obtained from the Canal authorities.

The average time of a sailing vessel from Panama to San Francisco is considered to be between 37 and 40 days; for the return, about 31 days from April to October, and 26 days from October to April.

Accordingly, the time of transit of a vessel from New York to San Francisco may be reckoned generally at 60 days, including a day in the Canal. The return trip should consume about 57 days in the winter months, and 62 in the summer season. The generally accepted average time for sailing vessels to go from New York to San Francisco, around Cape Horn, is 140 days; the return voyage requires from 110 to 115 days. On this basis, the normal time for a round trip between the two ports by way of the Canal may be rated at 120 days; by way of the Horn, about 250 days.

The extent to which sailing vessels will use the Canal will be dependent on many conditions in the shipping world, but it appears that under normal conditions the Canal route is favorable to them. For instance, on the voyage from New York to San Francisco, under average conditions a vessel might be expected to save 80 days at sea. Shipowners state that a vessel of 2,000 tons net may be operated at sea at a cost of \$75 per day. The charges for passing such a vessel through the Canal would approximate \$2,700. If these charges be subtracted from the saving of 80 days at sea, at \$75 per day, or \$6,000, the net saving to the operator would be \$3,300.

In the case of such a vessel, the saving of 36 days at sea would cover its Canal expenses. Between this period and the normal expectation of saving by way of the Canal, 80 days, is a leeway of 44 days. That is, if the operator used the Canal and then had his vessel arrive 44 days late, as compared to the normal voyage over the route, he would still "break even." If the vessel arrived 30 days late over the normal time, he would be benefited to the extent of 14 days at sea which, at \$75 per day, is equivalent to \$1,050.

Ships Passing Through the Canal "In Quarantine."

The following circular letter has been issued by the Chief Quarantine Officer to the masters of steamships and the agents of steamship companies:

"Your attention is invited to the following with reference to ships passing through the Panama Canal 'In quarantine':

"Permission for passage through 'In quarantine' shall only be granted with the approval of the Chief Health Officer. A quarantine officer, and one or more quarantine guards, when in the judgment of the Chief Quarantine Officer such will be sufficient, shall board the vessel for passage through 'In quarantine', and accompany it through the Canal. Their

duty shall be to prevent unauthorized communication, and see to the proper execution of the prescribed sanitary and quarantine regulations during the passage of the Canal.

"The charge against each ship passing through the Canal 'In quarantine' is authorized at the rate of \$40 for the services of each quarantine guard, and \$50 for the services of each quarantine officer.

"The revised quarantine laws and regulations are now being printed, and your office will be advised as to its provisions in due time."

Joint Land Commission Calendar.

The following is a calendar of cases set for hearing during the week ending February 6, 1915:

Monday, February 1—Docket 341, Venado Plantations Company.

WILLIAM TAYLOR, Secretary.

On recommendation of the Health Officer of Colon-Cristobal, a trial will be made of

oiling the streets in one or two blocks in the city of Colon, as a substitute for street sprinkling.

Stages of the Chagres River, Gatun Lake, and Miraflores Lake.

Maximum heights of the Chagres River, Gatun and Miraflores Lakes for the week ending midnight, Saturday, January 30, 1915. All heights are in feet above mean sea level:

The estates of these deceased and insane employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against their estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 329, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

EXECUTIVE ORDERS.

Conditions of Employment.

By virtue of the authority vested in me, it is hereby ordered:

1. Pursuant to the provision contained in Paragraph 17 of the Executive Order of February 2, 1914, fixing the conditions of employment governing employes of The Panama Canal and the Panama Railroad Company on the Isthmus of Panama, a charge will be made for rent, fuel, and electric current on and after March 1, 1915.

RENT.

2. Rental will be based on a percentage of the value of the quarters occupied, the rate per centum to be the same for all quarters, and the value of the quarters to be appraised by the Governor of The Panama Canal. The amount to be collected should be sufficient to defray the cost of maintenance of the quarters and grounds, maintenance and renewal of furniture, collection and disposal of garbage, and, for bachelor quarters, janitor service. No charge will be made for water.

FUEL.

3. Fuel will be sold to employes at cost delivered at quarters.

ELECTRIC CURRENT.

4. The charge for electric current will be based on the cost of the current delivered to the quarters. When practicable, the current used will be measured by meters; otherwise a charge will be made for each lamp or other device installed.

5. Where employes for the good of the service are required to live in certain designated quarters, one-half the rental will be remitted.

6. When an officer of the Army or Navy is detailed for duty with The Panama Canal, and the amount of extra compensation of the position he occupies over and above his official salary as an officer of the Army or Navy is not sufficient to cover his rent, he will not be charged for rent, but will receive no extra compensation.

7. The Governor of The Panama Canal is charged with the duty of issuing such instructions as may be necessary to carry out this Order and to fix and change from time to time, if necessary, the rates and charges herein outlined, subject to the general instructions provided.

8. The free use of quarters, free fuel, and free electric current are not, under the conditions of employment now governing, a vested or contract right of employes but revocable privileges, which it has been considered advisable to continue until the permanent force was organized. The revocation of these privileges shall not be made the basis for increasing salaries or wages or otherwise increasing compensation.

WOODROW WILSON.

THE WHITE HOUSE,
January 15, 1915.
[No. 2120.]

Amending the Civil Service Rules.

Section 2 of Rule X is hereby revoked and the following promulgated in lieu thereof:

2. No person appointed without competitive examination to a position classified at the time of such appointment, and no person serving in an unclassified position, or in a position named in Schedule A or Schedule B, not appointed by competitive examination or by transfer or promotion from a competitive position,

shall be transferred to a competitive position except as hereinafter provided in this rule and in Schedule A.

This amendment is promulgated upon the recommendation of the Civil Service Commission to make a definite prohibition upon the transfer of a person appointed through noncompetitive examination under Schedule B, and to indicate that there are exceptions from the general provisions of the section in other sections of the rules.

Section 12 of Rule X is hereby revoked and the following promulgated in lieu thereof:

12. A citizen of the United States in the service of The Panama Canal on or before January 1, 1915, in an excepted position other than that of clerk paying not more than \$75 in gold per month may be transferred without examination to a position in the competitive classified service, provide:

(a) This section shall not apply to a person appointed to a competitive position in accordance with the civil service rules, his transfer to be governed by the general provisions of the rules.

(b) This section shall not apply to a person appointed without examination to perform the duties of clerk of any grade, bookkeeper, stenographer, typewriter, surgeon, physician, trained nurse, or draftsman.

(c) He must have rendered at least two years' service in a position above the grade of mere unskilled laborer in the service of The Panama Canal or of the Panama railroad by transfer from the Canal.

(d) He may be transferred to a position of no higher grade requiring similar qualifications or to a position of a lower grade for which he is qualified.

(e) He must be specially recommended by the Governor of The Panama Canal by reason of efficient service and satisfactory conduct.

(f) If separated from the service the requisition for transfer must be made within three years from the date of separation, and if he has been separated more than one year evidence of continuing good character and efficiency may be required.

This order is promulgated upon the recommendation of the Secretary of War, the Governor of The Panama Canal, and the Civil Service Commission. It supersedes the Executive Order of February 18, 1913, relating to the transfer of artisans from the service of The Panama Canal, which, by Executive Order of June 15, 1914, was included in Section 12 of Rule X.

The effect of this Order is to confer eligibility for transfer, subject to proper restrictions, upon employes of The Panama Canal who have rendered two years' satisfactory service in excepted positions and who have not had full opportunity for examination. Employes appointed through competitive examination and artisans only have been eligible for transfer, the force of engineers, foremen, trainmen, and other persons not regarded as artisans, not being eligible.

WOODROW WILSON.

THE WHITE HOUSE,
January 19, 1915.
[No. 2121.]

Amending Sections 1 and 2 of the Executive Order of April 15, 1913, Entitled "An Execu-

ive Order to Provide Maritime Quarantine Regulations for the Canal Zone and the Harbors of the Cities of Panama and Colon, Republic of Panama."

By virtue of the authority vested in me, I hereby establish the following Order for the Canal Zone:

I. That the first paragraph of Section I of the above mentioned Executive Order is hereby amended to read, as follows:

BILLS OF HEALTH.

"Section I—Masters of vessels clearing from any foreign port or from any port in the possessions or other dependencies of the United States for a port in the Canal Zone or for the ports of Panama or Colon, Republic of Panama, or for passage through the Panama Canal, must obtain an original bill of health in duplicate from the officer or officers authorized by the quarantine laws and regulations of the United States to sign such certificates for vessels entering the ports of the United States. The following form is prescribed for such bills of health:"

11. That the first paragraph of Section 2, of the above mentioned Executive Order is hereby amended to read, as follows:

"Section 2—Vessels clearing from any foreign port or from any port in the possessions or other dependencies of the United States for a port in the Canal Zone or for the ports of Panama or Colon, Republic of Panama, or for passage through the Panama Canal, and entering or calling at intermediate ports, must procure at all said ports a supplemental bill of health in duplicate from the officer or officers authorized by the quarantine laws and regulations of the United States to sign such certificates for vessels entering the ports of the United States. If a quarantinable disease has appeared on board the vessel after leaving the original port of departure, or other circumstances presumably render the vessel infected, the supplemental bill of health should be withheld until such sanitary measures have been taken as are necessary. The following form is prescribed for supplemental bills of health:"

111. This amendment shall take effect from and after the date upon which the Panama Canal is officially and formally opened for use and operation, by Proclamation of the President of the United States.

WOODROW WILSON.

THE WHITE HOUSE,
January 11, 1915.
[No 2118.]

Popular Excursion Through the Canal.

An excursion through the Canal on the steamship *Panama* is offered by the Panama Railroad Company on Sunday, February 7, at a round trip fare of \$3 for adults and \$1.50 for children under 12 years of age.

Special train connections, leaving Panama at 6.40 a. m. and Las Cascadas at 6.25 a. m., will convey the passengers to Pier 11, Cristobal, from which the *Panama* will sail directly after arrival of train. The vessel will reach Balboa in time for dinner at the Hotel Tivoli.

The fare includes all transportation, by rail and water, and lunch at noon on the steamer.

CANAL MEDAL LIST.

Below is a list of American employes of The Panama Canal and Panama Railroad Company who have completed two years of continuous service on the Isthmus during the 12 months ending December 31, 1914, and are in consequence entitled to a Canal medal. The date shown opposite each name is that from which medal service is computed.

The list is now published in order that it may be carefully checked by those interested. Any omissions, errors in spelling of names, or in the dates from which service is reckoned, should be promptly reported to the Executive Office for correction.

The heads of divisions are requested to check carefully their lists of American employes on the silver roll, and to report any omissions on the lists to the Executive Office.

The bar lists for both Panama Canal and Panama railroad employes will appear in a later issue.

OFFICIAL CIRCULARS.

Charge for Pumping Oil.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., January 23, 1915.

CIRCULAR No. 694:

Effective this date, a charge of four cents per barrel will be made individuals and companies, for pumping oil through the plants of The Panama Canal at Balboa and Cristobal.

CHESTER HARDING,
Acting Governor.

Acting Paymaster.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., January 26, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Mr. Robert W. Glaw has been appointed Paymaster, The Panama Canal, effective February 1, 1915, to serve during the absence on leave from the Isthmus of Mr. John H. McLean.

CHESTER HARDING,
Acting Governor.

Commissary Books for Silver Employees.

THE PANAMA CANAL,
OFFICE OF EXECUTIVE SECRETARY,

BALBOA HEIGHTS, C. Z., January 25, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Your attention is invited to Circular No. 663-1, Paragraph 17, which reads, as follows:

"Commissary books of all denominations will be sold to silver employees for cash. Application will be made to foremen for an authorization card, form No. P.C.-478, which authorizes the sale of commissary books to the value of \$15. The foreman will complete the card, sign the same, and forward it to the time office for validation with the time books. The roll keeper will check the cards to ascertain if the applicants are employees, after which they will be validated by the issuing clerk and returned to the foreman for delivery."

It has been reported by the Auditor that the instructions contained in the above are not being complied with, resulting in much inconvenience to the employees. Please see that the instructions are complied with. No cards will be honored unless properly validated.

By direction of the Acting Governor.

C. A. McILVAINE,
Executive Secretary.

Gamboa Labor Train Not to Carry Employees After January 30.

PANAMA RAILROAD COMPANY,
OFFICE OF THE MASTER OF TRANSPORTATION,

BALBOA HEIGHTS, C. Z., January 26, 1915.

TRANSPORTATION PULLETIN No. 139:

All concerned—With the close of business Saturday, January 30, 1915, the Gamboa labor train, which leaves Panama at 5.45 a. m., will be discontinued as far as the handling of laborers is concerned and will tie up at Balboa on arrival at terminal.

Heads of divisions whose men have been using this train will please be governed accordingly.

S. W. HEALD,
Master of Transportation.

Oil Drums.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

BALBOA HEIGHTS, C. Z., January 25, 1915.

Heads of departments and divisions—The Supply Department desires to close no several old contracts for oils, etc., and in order to do so, all drums must be returned to the contractors at the earliest practicable date.

In order to know the exact status of the drums now on the Isthmus, you will have a inventory taken as of February 1, 1915, showing all drums on hand in your department or division.

The inventory should show, when practicable, not only the total number of drums on hand, but the C. Z. requisition number which is stenciled on each drum. Also as to whether drums are full or empty.

Such empty drums as are now on hand should be delivered at the earliest practicable date, as follows:

Pacific side, to storekeeper, Balboa.
Atlantic side, to oil house, Mount Hope depot (advising storekeeper, Balboa, of such shipments).

Approved:
CHESTER HARDING,
Acting Governor.

Wm. R. GROVE,
Chief Quartermaster.

COMMISSARY DEPARTMENT.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m. The gold departments of the Cristobal store will open at 2 p. m. on Saturdays.

Hats, felt, Army, ea.	1.30

For sale to pilots only:

Covers for pilot caps, ea.	.29
----------------------------	-----

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 303, on Wednesday, February 10, 1915, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

For the benefit of applicants residing in Gatun and Cristobal or Colon, examinations for licenses as navigators of motor boats, and as chauffeurs, will be held at the office of the captain of the port of Cristobal on Friday, February 12, 1915, beginning at 9 a. m. Applicants should be provided with motor boats or automobiles for the demonstration test.

By direction of the chairman of the board.

F. M. NIXON,
Recorder, Board of Local Inspectors.

SHIPPING INFORMATION.

Tide Predictions.

Panama tide predictions for the next five weeks are given in the following table:

FEBRUARY.

	2.7	12.0	3.8

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used in Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3.47.

Mail Dispatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans, for all States. Due at New Orleans the following Tuesday.

Every Saturday to New York, for all states. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.*

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*NOTE.—The sailings on February 8, March 8, and April 5 will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will only be for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7.10 a. m., connects with the despatches for the three sailings mentioned above.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls, or the purchase of supplies, may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

It is advisable that deposits be made somewhat in excess of the anticipated charges, to cover minor charges which may not have been anticipated, such as pilotage and towage. Pilotage is at the rate of \$1 per foot of maximum draft, but is not charged on a vessel which makes the transit of the Canal without taking on or discharging freight or passengers in a terminal port. Tug service, which is at the rate of \$15 per hour, will not be charged on vessels of less than 15,000 gross tonnage.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa from the Union Oil Company at the rate of from 1,300 to 1,600 barrels per hour. The present price is \$1.25 per barrel, reduced to 60° Fahrenheit. Diesel engine oil is for sale by the same company.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa. Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

Repairs to vessels may be made to any extent, except where the use of a large dry dock is required, or the turning of the largest crank shafts or longest line shafts.

The Government hospital service is fully equipped for the treatment of medical and surgical cases. The charge for consultation at the dispensaries is \$3; for hospital treatment, in ward, \$3 per day; in private room, \$6 per day. For American seamen, the charge for treatment in ward is \$1 per day; for foreign seamen, \$1.50 per day.

The cable address of The Panama Canal on the Isthmus is "Isthmian, Balboa Heights;" in the United States, "Isthmian, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C.," for delivery in the United States.

Sailings of Vessels in Regular Service With the Isthmus.

REGULAR CONNECTIONS THROUGH THE CANAL.

Approximately regular services between the Atlantic and the Pacific seaboard from Boston, New York, Philadelphia, and Baltimore, occasionally Charleston and New Orleans, to San Pedro, San Francisco, Portland, and Puget Sound, and return, are maintained by the American-Hawaiian Steamship Company, with a sailing each way about every five days; the Luckenbach Steamship Company, with a sailing each way about every 10 days; Sudden and Christenson, approximately fortnightly; the Atlantic and Pacific Steamship Company, about every three weeks; and the Boston and Pacific Line, and the Arrow Line, each sending a vessel each way about once a month.

Between the east coast of the United States and the west coast of South America, fortnightly services are maintained by the Merchants' Line and by the New York and South America Line; the West Coast Line has sailings each way about every four weeks.

Between the west coast of the United States, with connections to lower British Columbia, and Europe the following lines are in service: The Harrison-Direct Line, monthly; the Maple Leaf Line, about every six weeks; the East Asiatic Company, monthly, and the Johnson Line, every six or seven weeks.

The Pacific Steam Navigation Company is operating approximately a monthly service around South America from Liverpool, by way of the Canal.

The American-Australian Line has been sending vessels through the Canal about fortnightly from New York to ports in Australia and New Zealand.

PACIFIC COAST CONNECTIONS.

The Pacific Mail has sailings about every 10 days between Balboa and San Francisco, with calls at Puntarenas, San Juan del Sur, Corinto, Amara, La Union, La Libertad, Acapulco, San José de Guatemala, Champerico, Ocos, Salina Cruz, Acapulco, Manzanillo, San Blas, and Mazatlan. The company also operates a direct line between Balboa and San Francisco, with sailings about every six weeks; and a Panama-Central America line, between Balboa and Ocos, making one round voyage monthly, and calling at all the ports abovenamed between Balboa and Ocos.

Grace and Company maintain a service with a vessel plying between San Francisco and Valparaiso, calling at way ports. It makes a round voyage about every 10 weeks.

The Peruvian Steamship Company maintains a weekly service between Balboa and Callao, with calls at Guayaquil, Payta, Eten, Pacasmayo, and Salaverry. Every second voyage includes Mollendo.

The South American Steamship Company's vessels sail on alternate Mondays from Balboa for Valparaiso, calling at Paíta, Eten, Pacasmayo, Salaverry, Callao, Mollendo, Arica, Iquique, Antofagasta, and Coquimbo.

The Pacific Steam Navigation Company has sailings on alternate Mondays for Peru and Chile; every 10 days for Ecuador; and on alternate Mondays for Colombian and Ecuadorian ports.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro, and an additional weekly sailing to Bocas del Toro.

The Royal Mail maintains fortnightly service between Colon and Southampton, making the following way ports: Cartagena, Puerto Colombia, Puerto Cabello, Trinidad, Barbados, the Azores, and Cherbourg. Its vessels all arrive at Colon on Sundays and sail on Tuesdays.

The Compagnie Generale Transatlantique operates a line, with 28-day sailing, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Carupano, Trinidad, Martinique, Guadeloupe, and Santander; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Carupano, Trinidad, and Martinique.

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curacao, Puerto Cabello, and Barcelona.

The Compañía Trasatlantica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curacao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Caliz, Barcelona, and Marseille; on the return voyage, with the same calls en route, the vessels sail from Genoa on the 8th day of each month.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing every Saturday direct from Cristobal, and every Thursday from New York; between Colon and New York by the United Fruit Company, via Kingston, weekly; between Cristobal and New Orleans

CANAL

RECORD

Volume VIII.

BALBOA, CANAL ZONE, WEDNESDAY, FEBRUARY 10, 1915.

No. 25.

The Canal Record

Official publication of The Panama Canal

The Canal Record is published weekly free of charge, one copy each, to all employees of The Panama Canal and Panama Railroad Company whose names are on the roll. To others, the subscription rate will be \$1, United States currency, per annum, in the United States and its possessions; Canal, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone,

Isthmus of Panama.

NOTES OF PROGRESS.

Over \$2,000,000 in Tolls.

The collection of tolls on vessels using the Canal, which aggregated \$1,965,137.57 at the close of business on January 31, reached and passed the \$2,000,000 mark on February 2. On February 15 the Canal will have been opened six months.

Severe Norther in Limon Bay.

The most severe "norther" of recent years visited Limon Bay between the evening of Monday, February 8, and the morning of Wednesday, February 10. The heavy seas did considerable damage, of which the most important was the carrying away on Tuesday, of over 4,000 feet of trestle for the east breakwater which is being constructed from Coco Solo Point toward the Canal channel. Two piledrivers and a train of 21 Lidgerwood flat cars and their unloader were lost.

The damage done to the trestle and tracks during Monday night was such that on Tuesday every effort was made to bring to land the rolling stock on the trestle, to save it if the trestle should go out. During the afternoon, a portion of trestle between the cars and the shore gave way, leaving a force of 69 men marooned. They were rescued with considerable difficulty, by the dredge *Caribbean* and the tug *Potomac* of the United States Navy, using their lifeboats.

Two East Indian laborers, Auba Singh and Luran Singh, were drowned on Monday night by the capsizing of the boat in which they were at work alongside the east breakwater.

The 4-masted schooner *Blanche E. Pendleton*, chartered by the Seeborg Steamship Company, was swept on a reef near Coco Solo Point, at which place she had been discharging a cargo of piles for the breakwater construction. Nother large vessels were injured. Throughout the greater part of the duration of the norther, heavy rain fell at Colon and vicinity.

The "Chitre" Exempted from Tolls.

The Panama government's steamship *Chitre*, which passed through the Canal on January 11, was exempted from the payment

of tolls, and is the only vessel to have gone through the Canal free. The exemption was made in conformance with Article XIX of the Treaty between the United States and the Republic of Panama, signed November 19, 1903. The Article provides, in part:

"The Government of the Republic of Panama shall have the right to transport over the Canal its vessels and its troops and munitions of war in such vessels at all times without paying charges of any kind."

The *Chitre* is 93 feet long by 21 feet in the beam and has a net Canal tonnage of 55. As it went through in ballast, the exemption saved the Republic of Panama \$40.32.

Formal Opening of Canal Postponed.

Official advice has been received from the Washington office of The Panama Canal that the President has directed that the formal opening of the Canal will be postponed, probably until sometime after the first of July, 1915.

Preparation of Rates for Rent, Current, and Fuel.

Pursuant to the recent Executive Order directing that charges be made for rent, fuel, and electric current for Canal quarters after March 1, the Acting Governor has appointed a committee, consisting of the Engineer of Terminal Construction, the Chief Quartermaster, and the Constructing Quartermaster, to prepare data upon which the charges may be based and to submit its report and recommendations about February 15.

The committee has been directed to place a valuation on all buildings of The Panama Canal occupied as quarters and to estimate the cost of maintenance of buildings and grounds, of repairing and renewing furniture, of disposing of garbage, and of janitor service for bachelors' quarters; to determine the method of charging for electric current and fuel; and to list the classes of employes, such as nurses, policemen, firemen, etc., who are required to occupy designated quarters for the good of the service and will be charged one-half of the regular rental.

Special Rate for Hauling Motorcycles.

For the benefit of motorcyclists, especially clubs which wish to make runs on both sides of the Isthmus, the Panama Railroad Company has authorized a special charge of \$1 for the transfer of a motorcycle between any two points of the line, with the provision that when a club wishes to ship a number of motorcycles at the same time notice shall be given 24 hours in advance. This allows the carriage of a motorcycle on a passenger train at considerably less than the regular express charges for equal weight.

Ward treatment of American seamen in The Panama Canal hospitals will be increased from \$1 to \$1.50 per day, effective July 1, 1915.

CANAL TRAFFIC IN JANUARY.

Cargo Passed 2,000,000-ton Mark—Analysis of Traffic by Routes.

Ninety-eight vessels passed through the Canal during the month of January, carrying a total of 448,957 tons of cargo. This was the first month since the opening of the Canal in which a gain in the number of vessels has not taken place, as 99 vessels went through the Canal during December. The quantity of cargo carried, however, leads all preceding months, though it is greater by only 156 tons than that carried through in November. Six of the 98 vessels did not carry cargo. The total cargo to February 1 was 2,192,856 tons.

Forty-four of the vessels were bound from the Atlantic to the Pacific, or westward, and 54 were bound eastward, from the Pacific to the Atlantic. Vessels passing in each direction, and cargo carried are shown for the months of operation in this table:

Month	Eastbound		Westbound		Total	
	Vessels	Cargo	Vessels	Cargo	Vessels	Cargo
Aug.	12	57,182	12	49,106	24	106,288
Sept.	30	186,776	27	135,262	57	322,038
Oct.	40	252,288	44	168,067	84	420,357
Nov.	33	242,291	54	206,510	92	448,801
Dec.	57	261,630	42	184,735	99	446,415
Jan.	54	240,875	44	203,032	98	448,957
Total	330	1,241,002	223	957,761	454	2,192,856

As distributed over the principal routes of trade over which the vessels using the Canal travel, the traffic for the month may be summarized, as follows:

Route	No. Vessels	Cargo tonnage.
Coastwise, eastbound	15	69,878
Coastwise, westbound	21	102,630
U. S. Pacific coast to Europe	11	67,302
Europe to U. S. Pacific coast	4	6,494
South America to U. S. and Europe	23	112,695
U. S. and Europe to South America	6	3,275
U. S. Atlantic coast to Far East	7	34,194
Far East to U. S. Atlantic coast	1	1,000
Miscellaneous routings	5	4,509
Vessels without cargo	6	0
Total	93	448,957

The distribution of traffic over these routes since the opening of the Canal, to February 1, has been:

Route	No. Vessels	Cargo tonnage.
Coastwise, eastbound	89	461,328
Coastwise, westbound	102	455,830
U. S. Pacific coast to Europe	62	419,182
Europe to U. S. Pacific coast	14	52,226
South America to U. S. and Europe	60	343,637
U. S. and Europe to South America	27	123,043
U. S. Atlantic coast to Far East	43	263,538
Far East to U. S. Atlantic coast	2	14,500
Miscellaneous routings	13	60,572
Vessels without cargo	42	0
Total	454	2,192,856

"Miscellaneous routings" for January included the *Hesperus*, carrying 7,533 tons of wheat from St. Johns, N. B., to New Zealand; the United States Navy colliers *Proteus* and *Nereus*, carrying 10,577 and 10,470 tons, respectively, of coal and coke from Norfolk to

Honolulu; and the commercial vessels *Protesilaus* and *Braunton*, carrying coal to undeclared destinations.

The net tonnage of vessels passing through the Canal during the month aggregated 356,120 tons. Tolls collected amounted to \$419,037.12, which is greater than the collections for any month previous. The collection of tolls to February 1 has been, as follows:

Period.	Amount.
Period to August 15, 1914.....	\$ 11,670.67
August 15 to August 31.....	84,401.80
September 1 to September 30.....	269,633.09
October 1 to October 31.....	378,089.12
November 1 to November 30.....	3,724,240.40
December 1 to December 31.....	419,037.12
January 1 to January 31, 1915.....	419,037.12
Total.....	\$1,966,737.57

Civil Service Examinations.

Examinations for the following-named positions are scheduled to be held, probably on March 28, 1915 (date to be left blank on application), at the Administration Building, Balboa Heights, C. Z.: Aid, Coast and Geodetic Survey; Assistant, Philippine service; Assistant Inspector of boilers and Assistant Inspector of hulls, Steamboat Inspection service; Copyist Topographic Draftsman, Departmental service; Junior Engineer Draftsman, Engineer Department at large; Topographic Draftsman, Departmental service; Forest Assistant, Forest service; Junior Chemist, Departmental service; Land law clerk; Local Inspector of boilers, Local Inspector of hulls, Steamboat Inspection service; Matron, Indian service; Pharmacist, Public Health service; Physician, all services except Panama Canal and Philippine services; Surveyor, Philippine service; Telegraph operator; Veterinarian, all services.

Application should be filed by March 5, 1915.

An examination for Guard, U. S. Penitentiary service, will be held, probably on March 21, 1915 (date to be left blank on application), at the same place as above. Applications should be filed for the examination of guard by February 26, 1915.

ISTHMIAN CIVIL SERVICE BOARD.

Increase in Emigration in December.

Emigration from the Isthmus during December showed a considerable increase over the previous month, according to the records of the quarantine service. The total net emigration was 1,328, as compared with 537 for November, which brings the total net emigration through the terminal ports, since July 1, 1913, to 21,732, a number nearly equivalent to the silver force employed on the Canal at the present time, and over one-half of the total number of employes in the service in June, 1913.

The total number of persons embarking at the ports of Colon and Cristobal for foreign ports during December was 3,107, consisting of 1,164 cabin, and 1,943 steerage passengers. The total number of persons entering from foreign ports was 1,824, consisting of 1,312 cabin, and 482 steerage passengers. The excess of those who embarked over those who landed was 1,283. The number of steerage passengers landed was the lowest since the present exodus began, and the number of departures in this class was, considering the total, unusually large. The steerage arrivals from the United States, which rose to the high figure of 763 in November, decreased in December to the normal total of 37. From

Jamaica and the other West India islands the steerage arrivals totaled 235. Some increase may be expected in the steerage arrivals from this section in January, as it has been the custom by a part of the West Indian population to visit their former homes during the holiday season, returning to the Isthmus afterward. This custom, however, was not observed to the same extent as in previous years, when money was more plentiful. Only 15 persons arrived from Europe in steerage; Colombia furnished the largest number outside of the West India islands, 118; Cuba, 17, and Costa Rica 39, while 206 arrived from Bozas del Toro, and 241 from other towns on the Atlantic coast of the republic. Of the arrivals at Colon and Cristobal in this class, 1,223 were men, 417 were women, and 235 were children. The total number of persons

arriving in transit was 827, a small increase over November, but much less than in December for several years previous.

The number of persons arriving at the ports of Balboa and Panama from foreign ports in December was 535, consisting of 384 cabin, and 152 steerage passengers. The number of persons departing was 631, consisting of 531 cabin, and 100 steerage passengers. The excess of those who embarked over those who landed was 45. The number of persons arriving from the coast towns on the Pacific side was 1,069; departing, 1,911.

One hundred and six vessels arrived at the ports of Cristobal and Colon during December, and 62 at Balboa, a total of 163, as compared with a total of 174 for November. No disease of a quarantinable nature arrived at the terminal ports during the month.

LABOR FORCE AND QUARTERS IN DECEMBER.

The force report of December 23, 1914 shows the actual working force of The Panama Canal on that date to have been 21,599, of the Panama railroad 13,662, and of contractors 84, a total effective working force of 25,255. This is a decrease of 1,022, as compared with the statement of November 25. The gold force on the Canal, composed almost exclusively of white Americans, was 3,756, divided, as follows: The Panama Canal 3,333; Panama railroad 368, contractors 55, a decrease in the total gold force of 217, as compared with the preceding month. Detailed figures of the total force employed on the Isthmus, by departments and divisions, follow:

DEPARTMENT OR DIVISION	SILVER EMPLOYES*										Total silver.	Total gold.	Grand total.		
	Artisans.					Laborers.									
	Monthly.	Special.	22 cents.	18 cents.	15 cents.	12 cents.	Special.	Euro-pean 16 cents.	13 cents.	10 cents.				7 cents.	5 cents.
Operation and Maintenance office & locks	88	...	27	155	215	57	7	1	58	233	1	3	872	178	1,050
Terminal Construct'n	533	...	4	193	523	132	123	159	497	554	6	24	2,801	323	3,124

(8) Includes 16 East Indians, 15 American citizens, and 9 Panamanians. Gold force of contractors (included above), 87 bachelors.

ACT OF CONGRESS.

An Act to authorize the Government Exhibit Board for the Panama-Pacific International Exposition to install any part or parts of the Government exhibit at the said exposition either in the exhibit palaces of the Panama-Pacific International Exposition Company or in the Government building at said exposition.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Government Exhibit Board, created by the sundry civil Act approved June 23, 1913, is hereby authorized to install, display, and maintain any part or parts of the exhibit of the United States Government at the Panama-Pacific International Exposition in the exhibit palaces provided by the Panama-Pacific International Exposition Company or in the Government building provided for in the sundry civil Act approved August 1, 1914, as the said Government Exhibit Board may determine.

Approved, January 11, 1915.

Joint Land Commission Calendar.

The following is a calendar of cases set for hearing for the weeks ending February 20 and 27:

Monday, February 15—Docket 295, Hurtado family; Wednesday, February 17, Docket 297, Victorino Fierro; Docket 299, Francisco Canpos; Docket 302, José F. Gutiérrez; Docket 319, Manuel Gonzalez; Thursday, February 18, Docket 321, Crisó Teodoro; Docket 426, William Reed; Docket 327, Alexander McLean; Docket 336, José Maria Lasso; Friday, February 19, Docket 257, Asby H. Bethancourt; docket 259, Juan Gris; Monday, February 22, Docket 403, John McGregor; Thursday, February 25, Docket 340, Wm. Keyes; Docket 401, Manuel Jacome; Docket 407, Peter Modis (Moore); Docket 429, Antonio Rodríguez; Docket 436, Santana Melendez; Docket 447, Daniel Barela; Docket 433, José Monte; Docket 441, Juan R. Rodríguez.

WILLIAM TAYLOR, Secretary.

Second Month's Prizes Awarded for Care of Houses at La Boca.

The committee on improvements at La Boca has announced the following distribution of prizes for the best kept houses in the La Boca silver settlement for the month of January:

Prize of \$5 for the best kept and neatest one-story building, without plumbing, to house No. 582.

Prize of \$5 for the best kept and neatest one-story house, with plumbing, to house No. 607.

Prize of \$5 for the best kept and neatest two-story house, without plumbing, to house No. 635.

Prize of \$5 for the best kept and neatest two-story house, with plumbing, to house No. 581.

Prize of 16 2/3 per cent rent reduction for the best kept and neatest house, with unscreened porches, to house No. 653.

Houses Nos. 582, 635, 581, and 653 also won the prizes for the month of December. There was an improvement in the general conditions over the previous month, and it was somewhat difficult for the inspectors to arrive at a decision in making the awards, as the conditions in a number of the houses were about equal. In February, it is planned to make more frequent inspections, and from

the report of each, obtain an average on which to base the awards.

Canal Excavation in December.

The following is a detailed statement of Canal excavation during the month of December:

ATLANTIC SECTION.			
LOCALITY.	"Work" excavation.	"Plant" excavation.	Total.
Dry excavation—	Cu. Yds.	Cu. Yds.	Cu. Yds.

Wilson, Charles	54363	Jamaica	Cristobal	Supply Dept.	Feb. 3, 1915.
Wilson, Leonard	23141	St. Vincent	Panamá	Dredging Div.	Feb. 4, 1915.

Insane Employees.

Name.	Check No.	Native of	Isthmian Residence	Employed by	Date of commitment
Semper, John E.	37231	Montserrat	Culebra	Supply Dept.	Feb. 3, 1915.

The estates of these deceased and insane employees of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against their estates or any information which might lead to the tracing of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a rotary public or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates

Task Rates for Sosa Hill Drilling.

The following task rates have been adopted for the drilling in the Sosa Hill quarry: Four cents per lineal foot for the men operating drills, and three cents per lineal foot for the helpers on drills. The men on the drills and the helpers may be employed on mucking at the rate of 10 cents an hour when there is no drilling or their services are required elsewhere.

Rainfall from January 1 to 31, 1915, Inclusive.

CANAL SERVICE BAR LIST.

Supplementing the Canal service medal list, published last week, there are presented below lists of American employes of The Panama Canal and Panama Railroad Company who are entitled to first, second, third, and fourth service bars, the same having been earned during the 12 months ending December 31, 1914. The date shown opposite each name is that from which bar service is computed.

The list is now published in order that it may be carefully checked by those interested. Any omissions, errors in spelling of names, or in the dates from which service is reckoned, should be promptly reported to the Executive Office for correction.

The heads of divisions are requested to check carefully their lists of American employes on the silver roll, and, if the names of any such employes are omitted on the attached list, to report the same to the Executive Office.

FIRST SERVICE BARS. 1912-1914.		Name.	Service began.	Name.	Service began.	Name.	Service began.	Name.	Service began.

OFFICIAL CIRCULARS.

Surcharge at Balboa Shops.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., February 4, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Effective February 1, 1915, the surcharge to be added by Balboa shops to direct labor charges is increased from 55 to 60 per cent.

CHESTER HARDING,
Acting Governor.

Rates for Charging Storage Batteries.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., January 22, 1915.

CIRCULAR No. 676-2:

1. The following rates are established for charging small storage batteries for gasoline launches, motorcycles, automobiles, etc., for Departments and Divisions of The Panama Canal, employes, and individuals and companies:

(a) For departments and divisions of The Panama Canal and employes, 50 cents per charge.

(b) For individuals and companies, \$1 per charge.

2. The Electrical Division will prepare the necessary facilities for charging batteries at Cristobal, Gatun, and Balboa substations. Batteries left at any of these stations for charging should be tagged with the name of the owner, license number of launch, motorcycle, or automobile in the case of employes, and individuals and companies, and with the charging current required. Employes desiring this service should submit application on form P.C. 353-2, in order that the necessary approval may be obtained, and required deposit of \$2 made with the Collector. Individuals and companies should submit application on form P.C. 437, and a deposit to be fixed by the Auditor of The Panama Canal will be made with the Collector after notification that the application has been approved. The application should contain information as to the approximate number of charges that will be required per month, in order that the amount of the deposit may be fixed. Monthly bills will be rendered in all cases. When service is no longer desired, written notification should be sent to the Electrical Engineer and deposit or remaining balance thereof will be refunded. Departments and divisions should issue a blanket work request on the Electrical Division to cover this service for each fiscal year, unless such blanket work request covering small electrical jobs has already been issued.

CHESTER HARDING,
Acting Governor.

Reimbursement for Lodging.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., January 23, 1915.

CIRCULAR No. 638-1:

1. Reimbursement to employes of The Panama Canal and the Panama Railroad Company for lodging at the Tivoli and Washington hotels, made necessary by official business, will be limited to the employes' rate for the lowest priced rooms available.

2. Claim for reimbursement at a higher rate will be allowed only when accompanied by a certificate of the manager that on the date on which room was furnished no lower priced room was available.

CHESTER HARDING,
Acting Governor.

Telephone Installation, Removal, Changes, and Rental.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., January 5, 1915.

CIRCULAR No. 650-1:

Circular No. 650 is hereby amended, as follows:

1. The subscriber for telephones of Class A and Class B shall pay for installation and all changes of telephone, and in the event the subscriber moves or wishes to discontinue such service for any reason he shall notify the Superintendent of Telephones and Signals in writing.

2. Charge for rental shall begin with date of installation, and shall continue until written notice to remove telephone is received by the Superintendent of Telephones and Signals.

3. No deduction shall be made for vacation periods.

4. Requests for installation or change of telephone will be made to the Superintendent of Telephones and Signals, who will advise estimated cost. Subscriber will then signify his approval for work to proceed.

CHESTER HARDING,
Acting Governor.

Disbursement of Funds.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., February 4, 1915.

CIRCULAR No. 695:

1. Effective February 1, 1915, Panama railroad pay receipts will only be cashed by the paymaster at Balboa Heights and his representative at Cristobal (Colo.), and by station agents from Corozal to Mount Hope inclusive.

2. Effective March 1, 1915, Panama railroad pay receipts will only be cashed by the paymaster at Balboa Heights and his representative at Cristobal (Colo.).

3. The commissary cashier at Cristobal is authorized to redeem hotel and commissary books only in connection with refunds of deposits.

4. All Panama railroad station agents are authorized to redeem mileage books and tickets when accompanied by proper authority from the railroad agent.

5. Agents may pay accounts payable when especially requested to do so by the paymaster.

CHESTER HARDING,
Acting Governor.

Stock of White Paint, Flat, At Balboa Storehouse.

THE PANAMA CANAL,
STORE DEPARTMENT,

BALBOA HEIGHTS, C. Z., February 8, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

There is on hand at the Balboa storehouse about 1,400 gallons of white paint, flat. This material was left over from the construction of the permanent quarters and can be used on interior work by adding white zinc and oil to give it body.

It is requested that whenever practicable, departments and divisions requiring white paint call for this material on their requisitions and this stock is reduced.

W. R. GROVE,
Chief Quartermaster.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., February 8, 1915.

Wed., March 10	4:27	10:44	17:00
	2 7	12 0	3 8

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Goedetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used in Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47.

Mail Dispatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office.

Every Thursday to New Orleans, for all States. Due at New Orleans the following Tuesday.

Every Saturday to New York, for all states. Due at New York the following Friday, with the exception of the Advance, which is due there on Saturday.

Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls, or the purchase of supplies, may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

It is advisable that deposits be made somewhat in excess of the anticipated charges, to cover minor charges which may not have been anticipated, such as pilotage and towage. Pilotage is at the rate of \$1 per foot of maximum draft, but is not charged on a vessel which makes the transit of the Canal without taking on or discharging freight or passengers in a terminal port. Tug service, which is at the rate of \$15 per hour, will not be charged on vessels of less than 15,000 gross tonnage.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

The Government hospital service is fully equipped for the treatment of medical and surgical cases. The charge for consultation at the dispensaries is \$3; for hospital treatment, in ward, \$3 per day; in private room, \$6 per day. For American seamen, the charge for treatment in ward is \$1 per day; for foreign seamen, \$1.50 per day.

Application for supplies, or for services, should be made to the captain of the port, Cristobal or Balboa. Mail, other than registered, and cablegrams for men on ships which will call at the terminal ports, or pass through the Canal, may be addressed in care of the captains of the ports, if desired; or may be addressed to Cristobal or Balboa, general delivery, with the name of the vessel written plainly; or, in case the vessel has a known representative on the Isthmus, in care of such representative.

The cable address of The Panama Canal on the Isthmus is "Isthmian, Balboa Heights;" in the United States, "Isthmian, Washington."
Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus and "The Panama Canal, Washington D. C.," for delivery in the United States.

Sailings of Vessels in Regular Service With the Isthmus.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro, and an additional weekly sailing to Bocas del Toro.

The Royal Mail maintains fortnightly service between Colon and Southampton, making the following way ports: Cartagena, Puerto Colombia, Puerto Cabello, Trinidad, Barbados, the Azores, and Cherbourg. Its vessels all arrive at Colon on Sundays and sail on Tuesdays.

The Compagnie Generale Transatlantique operates a line, with 28-day sailing, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Carupano, Trinidad, Martinique, Guadeloupe, and Santander; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Carupano, Trinidad, and Martique.

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curacao, Puerto Cabello, and Barcelona.

The Compaña Trasatlantica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curacao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls en route, the vessels sail from Genoa on the 8th day of each month.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing every Saturday direct from Cristobal, and every Thursday from New York; between Colon and New York by the United Fruit Company, via

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the roll. To others, the subscription rate will be \$1, United States currency, per annum, in the United States and its possessions; Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone.

Isthmus of Panama.

NOTES OF PROGRESS.

Smallpox on the "Panama."

A case of smallpox was discovered on the Isthmus on Wednesday, February 10, in the person of one of the wireless operators on the steamship *Panama* of the Panama Railroad Steamship Line. Both operators were taken at once to the quarantine station at Balboa for isolation, the crew of the vessel were vaccinated, and general instructions were issued that all others who had been aboard the vessel since its departure from New York should report to district physicians for examination and possible vaccination. The vessel was fumigated, and sailed on its regular trip to New York on Saturday, February 13, taking the wireless operators of the steamship *Allianca*, which is in port. The case of smallpox did not originate on the Isthmus and no secondary cases have developed.

Grounding of "Blanche D. Pendleton."

The Board of Local Inspectors has begun an investigation of the grounding of the schooner *Blanche D. Pendleton* in Limon Bay on February 9, during the norther which was blowing on that and the following day, and of the damage sustained by the vessel.

The "Penrith Castle" Returns.

The steamship *Penrith Castle*, which passed through the Canal on February 10, on the way from Seattle to Liverpool, was returning from the Far East. On October 22-23 this vessel went through the Canal on the way from Galveston to Yokohama with a cargo of 3,270 tons of cotton, which was the first shipload of that staple to be sent through the Canal. From the Far East, she returned to Seattle, where she loaded with the following cargo, to be taken to Liverpool: 4,139 tons of wheat, 1,158 tons of lumber, 31 tons of canned salmon, 17 tons of grass seed, and 16 tons of brass scrap, a total of 5,361 tons.

It was estimated at the time that the *Penrith Castle* first passed through the Canal that the net saving to the owners by use of the Canal between Galveston and Yokohama was, at the rate of \$230 per day expense at sea, \$5,060. On the same basis, her saving of

approximately 23 days at sea between Seattle and Liverpool will mean a net economy of about \$1,188, after payment of tolls.

Notice to Mariners.

The following notice concerning the east breakwater, Colon harbor, has been issued by the Governor, as circular No. 613-11, under date of February 12, 1915:

"1. The seaward end of the trestle which was used in the construction of the east breakwater was carried away by heavy seas on February 9, 1915, and the two white lights, in a vertical line, which marked its seaward (western) end, were lost with it.

"2. Until the trestle can be reconstructed, these lights will be discontinued, but the gas buoy, showing a flashing white light, which was moored off the seaward end of the trestle, and which was moved from time to time as the trestle was extended, will remain in its present position, namely, in the prolongation of the axis of the east breakwater to seaward, and about 3,220 feet to the eastward of the seaward end of the west breakwater.

"3. Vessels are warned that the wreckage of the trestle, and parts of the uncompleted breakwater, most of which are submerged, are a danger to navigation, and they should not attempt to pass inshore to the eastward of the gas buoy, but keep between it and the end of the west breakwater."

Double Meal Service on United Fruit Company's Vessels.

The United Fruit Company has established a system on the vessels of its New York, Jamaica, Puerto Colombia service, which sail from Cristobal on Thursdays, by which passengers are given the choice between *à la carte* and *table d'hôte* meal service. It is the intention of the company to maintain this double service until May 1, after which the steamers of its New York division will be operated with the *à la carte* restaurant service exclusively.

The fare from Colon to New York with meals is \$75, \$80, and \$85 per berth in a room without bath, according to location. For those using the *à la carte* service there is a reduction of \$17.50 from the rate with meals. To Panama Canal employes the rate with meals is \$56.25, with assignment to minimum priced rooms; without meals, \$43.15.

Checking Baggage from Panama the Night before Sailing.

For the convenience of employes, the baggage room of the Panama railroad station at Panama is kept open until 11 p. m., on days preceding sailings of Panama railroad vessels from Cristobal; that is, under the present schedule, the baggage room is open every Friday night, in connection with the regular

Saturday sailing. This is done so that those sailing may the more conveniently check their baggage through to New York and be done with it, and not have to bother with it on the day of sailing. It also expedites the handling of baggage and results in generally more satisfactory conditions than those likely to ensue if the checking of baggage is deferred to the last moment.

Americans Injured in Fight in Panama.

In a fight between United States soldiers, off duty, American civilians, and Panamanian policemen in the restricted district of the city of Panama on the night of February 13-14, about 25 soldiers and 25 civilian Americans and approximately as many Panamanians were wounded, and one Panamanian was killed. The soldiers were without arms. Twenty-three soldiers were removed to Ancon Hospital, two of them with serious injuries.

Immediately following the row, a patrol of American soldiers was placed in the district to prevent further outbreaks, and Panamanian and American officials began a joint investigation. This is still in progress. The American Minister is representing the interests of the United States. The American military authorities are making an investigation of all soldiers who were in any way connected with the affair and the Judge Advocate is cooperating with the American Minister.

Transfer to Civil Service in the United States.

In connection with Executive Order No. 2121, "Amending the Civil Service Rules," published in THE CANAL RECORD of February 3, by which the privilege of transfer to the classified service in the United States is extended to certain classes of employes of The Panama Canal not previously eligible to transfer, the Chief of the Washington Office has advised:

"As employes can now arrange for their transfer while still in the service, it would seem that the first move for an employe to make in attempting to secure a transfer would be to obtain from the Governor the recommendation required as to efficient service and satisfactory conduct. This recommendation could then be used by him in making application for transfer as evidence of his eligibility and of his satisfactory service on the Isthmus."

Special Train Service, Washington's Birthday.

In view of next Monday, February 22 (Washington's birthday) being a National holiday, thus bringing Sunday and a holiday together, for the benefit of those desiring to spend the week end at either end of the line, likewise those residing along the line and on the Atlantic side desiring to spend a short vacation at Taboga Island, the Panama

Railroad Company will operate a special passenger train service on that night, maintaining schedules of Sunday night trains Nos. 11, 12, and 54; No. 11 leaving Colon at 9.30 p. m., arriving at Panama at 11.15 p. m.; No. 12 leaving Panama at 9.25 p. m., arriving at Colon at 11.10 p. m.; No. 54 leaving Panama at 10.40 p. m., arriving at Las Cascadas at 11.29 p. m.

This extra service will also give those residing on the Las Cascadas line an opportunity to spend the evening in Panama, returning from Panama at 10.40 p. m.

C. H. MOTSETT,
Superintendent.

Examination for Levelmen and Transitmen.

On Sunday morning, March 14, 1915, at 9 o'clock, an examination for levelmen and transitmen will be held in the board room of the Administration Building, Balboa Heights, C. Z. A written and oral examination will be given between the hours of 9 a. m. and 1 p. m., the examination to test the applicant's qualifications for promotion from the position of "Rodman" to that of "Levelman" or from the position of "Levelman" to that of "Transitman."

All applicants for the examination should notify the Office Engineer, Balboa Heights, C. Z., on or before 12 m., March 10, 1915.

C. J. EMBREE, O. E. MALSBURY, A. W. WILSON, *Committee.*

Civil Service Examinations.

Examinations for the following-named positions are scheduled to be held, probably on April 18, 1915 (date to be left blank on application), at the Administration Building, Balboa Heights, C. Z.: Agricultural Inspector, Philippine service; Aid, Lighthouse service; Assistant Observer, Weather Bureau; Cadet Engineer, Cadet Officer, Lighthouse service; Civil Engineer and Draftsman; Copyist Ship Draftsman and Ship Draftsman, Navy Department; Mechanical Draftsman and Topographic Draftsman, Panama Canal service; Engineer, Indian service; Scientific Assistant, Department of Agriculture; Trained Nurse, Indian service; Wireman, Departmental service.

Applications should be filed by March 25, 1915.

An examination for Stenographer and Typewriter, Panama Canal service, is scheduled to be held, probably on April 25, 1915 (date to be left blank on application) at the same place as above. Applications should be filed by April 2, 1915.

ISTHMIAN CIVIL SERVICE BOARD.

Quarantine Work in January.

The net emigration from the Isthmus to foreign ports during the month of January was 804, as compared with 537 in November and 1,328 in January. This brings the total net emigration from the Isthmus since July 1, 1913, to 22,536.

During the month, a total of 1,626 persons arrived from coast towns in launches and small sailing craft, and 1,902 sailed for coast towns.

Further details of emigration and immigration and of the quarantine work connected therewith are presented in this consolidated report of quarantine transactions at the ports of Balboa-Panama and Colon-Cristobal during the month;

The estates of the abovenamed deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against their estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

ACT OF CONGRESS.

An Act for the coinage of certain gold and silver coins in commemoration of the Panama-Pacific International Exposition, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Treasury shall cause to be coined at the United States mint at San Francisco not exceeding 3,000 gold coins of the denomination of \$50 each, 10,000 gold coins of the denomination of \$2.50 each, 25,000 gold coins of the denomination of \$1 each, and not exceeding 200,000 silver coins of the denomination of 50 cents each, all of legal weight and fineness; said coins to be struck in commemoration of the Panama-Pacific International Exposition. The words, devices, and designs upon said coins shall be determined and prescribed by the Secretary of the Treasury, and all provisions of law relative to the coinage and legal tender value of all other gold and silver coins shall be applicable to the coins issued under and in accordance with the provisions of this Act; and one-half of the issue of \$50 gold coins herein authorized shall be similar in shape to the octagonal \$50 gold pieces issued in California in 1851; and the entire issue of said \$50, \$2.50, and \$1 coins herein authorized shall be sold and delivered by the Secretary of the Treasury to the Panama-Pacific International Exposition Company at par, under rules and regulations and in amounts to be prescribed by him. The coinage shall be executed as soon as may be and the delivery of said coins to begin not later than the day of the opening of the exposition. Said 50-cent coins herein authorized shall be issued only upon the request of the Panama-Pacific International Exposition Company, and shall be delivered to it by the Secretary of the Treasury, at par, during the period when said Panama-Pacific International Exposition shall be officially open.

SEC. 2. That medals and diplomas, with appropriate devices, emblems, and inscriptions commemorative of said Panama-Pacific International Exposition and of the awards to be made to the exhibitors thereat, shall be prepared by the Secretary of the Treasury at the United States mint at Philadelphia and the Bureau of Engraving and Printing, said medals and diplomas to be delivered to said Panama-Pacific International Exposition Company subject to the provisions of Section 52 of the coinage Act of 1873 and upon payment of the cost of the material composing said medals or diplomas.

SEC. 3. That the 50-cent silver coins herein authorized may, in the discretion of the Secretary of the Treasury, be coined or finished and issued from the machinery to be installed as a part of the exhibit of the United States mint at said exposition, and for the purpose of maintaining the exhibit as an educative working exhibit at all times the coins so minted may be remelted and reminted. All of said 50-cent silver coins herein authorized not issued to and at the request of said Panama-Pacific International Exposition, whether the same are coined as a part of said working exhibit or coined at the mint in San Francisco, shall be remelted upon the official closing of said exposition. All provisions hereof in regard to the coinage, finishing, or issue of said 50-cent silver coins from machinery installed as

a part of the said exhibit shall be coined, finished, and issued under such regulations as the Secretary of the Treasury may prescribe, and the Secretary of the Treasury shall cause to be prepared a suitable souvenir medal (of such metal or composition of metals as he may prescribe), to be struck off by the machinery in said mint exhibit, and all of said medals shall be delivered to said Panama-Pacific International Exposition Company upon payment of the cost of the material composing the same, and all other souvenirs which may be coined, stamped, printed, or otherwise issued from any portion of the United States Government exhibit shall be delivered to said exposition company upon payment of the cost of the material composing said souvenirs, and said souvenir medals and other souvenirs shall be delivered to said Panama-Pacific International Exposition Company subject to such regulations as to disposition thereof as the Government exhibit board may prescribe. All provisions, whether penal or otherwise, of the laws prohibiting the counterfeiting or imitating of coins or securities of the United States shall apply to the medals, diplomas, and souvenirs provided for under Sections 2 and 3 of this Act.

SEC. 4. That the Secretary of the Treasury is hereby authorized to obtain suitable designs for the coins and medals herein authorized, and the sum of \$5,000, or so much thereof as may be necessary, is hereby appropriated, out of any money in the Treasury not otherwise appropriated, to defray the cost of said designs: *Provided*, That the Panama-Pacific International Exposition Company shall reimburse the Treasury Department for the amount thus expended.

Approved, January 16, 1915.

Notice to Mariners.

The following changes in some of the aids to navigation of the Canal have been directed, and their authorization was published in Circular No. 643-10:

BEACONS AND RANGE LIGHTS MARKING CANAL CHANNEL.

On or about February 15, 1915, the beacons marking the channel of Chagres Crossing, Culebra Cut, and the northern end of Balboa Reach and Miraflores Approach are to be established in pairs, one on each side of the channel, opposite each other.

This will require the establishment of certain new beacons, and changes in the position and numbering of others, as follows:

CHAGRES CROSSING.

Beacon No. 27. To be removed from its present position and established directly opposite beacon No. 28. Characteristic of the light to remain the same as at present, white flashing.

Beacon No. 29. To be established on the north side of the channel, about halfway between the Gamboa railroad station and front range light No. 25. Characteristic, white flashing.

Beacon No. 30. To be established on the south side of the channel, opposite beacon No. 29, at the turn at the entrance to Chagres Crossing near the point where the charts show gas buoy No. 90, which buoy has been discontinued. Characteristic, red flashing.

CULEBRA CUT.

All lights in Culebra Cut are fixed red on the west side, white on the east side.

The beacons will be changed, as follows:

Beacon No. 1. No change.

Beacon No. 2. No change.

Beacon No. 3. To be established opposite beacon No. 4.

Beacon No. 4. No change.

Beacon No. 5. Was formerly No. 3.

Beacon No. 6. No change.

Beacon No. 7. Was formerly No. 5.

Beacon No. 8. No change.

Beacon No. 9. Was formerly No. 7. Position to be changed to opposite beacon No. 10.

Beacon No. 10. No change.

Beacon No. 11. To be established opposite beacon No. 12.

Beacon No. 12. No change.

Beacon No. 13. Was formerly No. 9.

Beacon No. 14. No change.

Beacon No. 15. Was formerly No. 11.

Beacon No. 16. Position to be changed to opposite beacon No. 15.

Beacon No. 17. Was formerly No. 13.

Beacon No. 18. To be established opposite beacon No. 17.

Beacon No. 19. Was formerly No. 15.

Beacon No. 20. Was formerly No. 18.

Beacon No. 21. Was formerly No. 17. Position to be changed to opposite beacon No. 22.

Beacon No. 22. Was formerly No. 20.

Beacon No. 23. To be established opposite beacon No. 24.

Beacon No. 24. Was formerly No. 22.

Beacon No. 25. Was formerly No. 19.

Beacon No. 26. Was formerly No. 24.

Beacon No. 27. Was formerly No. 21.

Beacon No. 28. Was formerly No. 26. Position to be changed to opposite beacon No. 27.

Beacon No. 29. Was formerly No. 23.

Beacon No. 30. To be established opposite beacon No. 29.

Beacon No. 31. Was formerly No. 25.

Beacon No. 32. Was formerly No. 28.

Beacon No. 33. Was formerly No. 27.

Beacon No. 34. To be established opposite beacon No. 33.

Beacon No. 35. Was formerly No. 29.

Beacon No. 36. Was formerly No. 30.

Beacon No. 37. Was formerly No. 31.

Position to be changed to opposite beacon No. 38.

Beacon No. 38. Was formerly No. 32.

BALBOA REACH AND MIRAFLORES APPROACH.

Beacon No. 10. To be established opposite beacon No. 8. Characteristic, fixed white.

Beacon No. 12. To be established opposite beacon No. 11. Characteristic, fixed red.

Front range light, northbound, Balboa Reach, number to be changed from 12 to 13.

Rear range light, northbound, Balboa Reach, number to be changed from 13 to 14.

No change will be made in the characteristics of these range lights.

Laundry of Patrons at Hotel Aspinwall.

Hereafter guests of the Hotel Aspinwall may leave their laundry at the hotel for delivery to the Ancon laundry. The charge will be entered on hotel bill and collected at the hotel. Employees will be charged the laundry rate. Nonemployees will be charged rates posted in the office of the hotel.

RAINFALL AND LAKES, 1914.

Summary of Weather and Conditions in Canal Lakes.

The rainfall for the year 1914 along the Canal was lower throughout, except at Colon, than the average annual rainfall during the years of record. The distribution of the rainfall during the year, and its comparison with that of 1913 and with the annual average, are shown in the accompanying chart. At Juan Mina and El Vigia, points off from the line of the Canal but indicative of areas contributing to the Chagres River, the precipitation was also slightly above the annual average. At all other stations the fall was deficient.

The annual totals ranged from 64.48 inches at Balboa Heights to 132.7 inches at Colon. The dry season rainfall amounted to but six per cent of the annual total over the Pacific section; four per cent in the central section, and seven per cent in the Atlantic section.

March was the month of least rainfall in all sections. The rainiest months were: October in the Atlantic section, and that part of the central section north of the Chagres River; May in the southern part of the central section and northern part of the Pacific section; and November on the extreme Pacific coast.

The maximum 24-hour rainfall recorded during the year was 6.85 inches, at Gatun on August 12 and 13, most of which fell between the hours of 2 and 4 p. m. on August 12.

The minimum elevation of Gatun Lake during the year was 84.13 feet above sealevel, on January 6; the maximum was 87.07, from December 24 to 27; and the yearly mean was 85.26 feet.

The total rainfall and runoff over the watershed of Gatun Lake for the calendar year

1914, is shown in the following table:

	Mean Area sq. mi.	Rainfall inches	Runoff inches	Percentage runoff
Lake surface.....	164	92.08	92.03	100.00
Land area.....	1,156	101.76	56.09	55.19
Total watershed...	1,320	100.54	69.55	69.24

Further details of the hydrology of the lake for the year are summarized in this table:

	Million cubic ft.	Second feet.
Gatun spillway, waste.....	139,285	4416.7
Gatun spillway, leakage.....	574	18.2
Gatun Locks, lockage and tests....	2,501	79.3
Gatun Locks, leakage.....	151	4.8
Gatun hydroelectric plant.....	3,634	114.3
* Miguel Lock, lockage and tests....	2,631	85.0
* Pedro Miguel Lock, leakage.....	104	3.3
* Pumping at Cucaracha Slide.....	265	8.4
Brazos Brook reservoir.....	203	6.6
Pumping at Pedro Miguel.....	189	6.0
(a) Total outflow.....	149,562	4742.6
(b) Storage increase.....	12,154	385.4
(c) Net yield (a and b).....	161,716	5128.0
(d) Evaporation on lake (62.89'').....	23,970	769.1
(e) Total yield (c and d).....	185,686	5888.1
(f) Rainfall on lake (92.06'').....	35,040	1111.1
(g) Yield from land area (e and f)....	150,646	4777.0

*Into Miraflores Lake.

For Miraflores Lake, situated near the southern end of the Canal and draining a watershed situated almost entirely in the Pacific section, the minimum elevation was 32.49 feet above sealevel, on April 13; the maximum level was 54.40 feet, on November 16; and the yearly mean was 52.21. Rainfall

and runoff over its watershed were, as follows:

	Mean Area sq. mi.	Rainfall inches	Runoff inches	Percentage runoff.
Lake surface.....	1.51	70.27	70.27	100.00
Land area.....	36.99	69.81	22.81	32.80
Total watershed.....	38.50	69.80	24.82	35.60

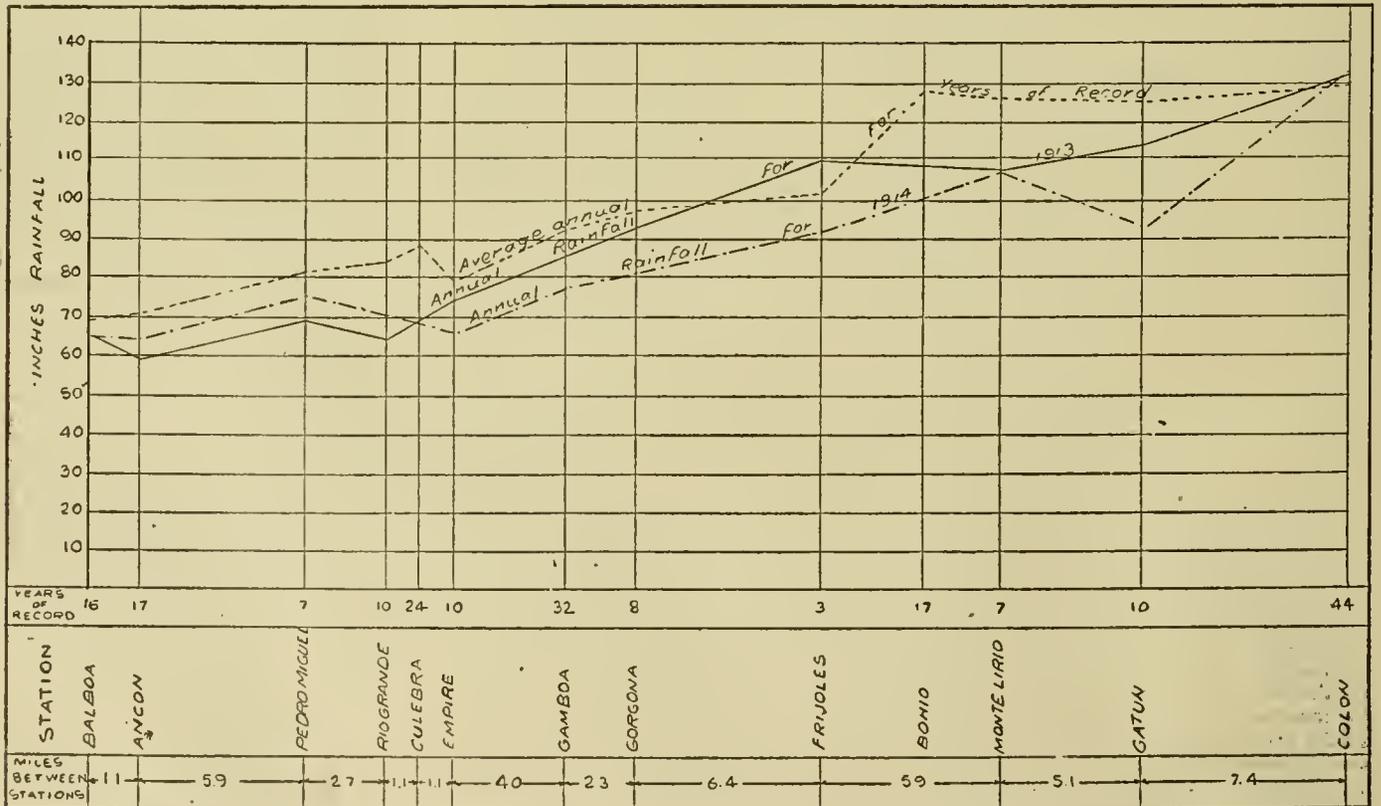

Further details of the hydrology of Miraflores Lake during the year are given below:

	Million cubic feet	Second feet
Miraflores spillway, waste.....	1,710.8	54.22
Miraflores spillway, leakage.....	544.7	17.27
Miraflores Locks, lockage and tests....	2,167.2	68.72
Miraflores Locks, leakage.....	135.7	4.31
Miraflores filter plant.....	259.9	8.24
Miraflores power plant.....	293.8	9.31
(a) Total outflow.....	5,112.1	162.10
(*) Total inflow from Gatun L.....	3,241.6	102.79
(b) Storage.....	153.5	4.86
(c) Net yield ((a, *, and b).....	2,025.8	64.23
(d) Evaporation, lake (57.67'').....	198.2	6.28
(e) Total yield (c and d).....	2,227.6	70.64
(f) Rainfall on lake (70.27'').....	252.1	8.00
(g) Yield from land area (e-f).....	1,975.5	62.64

Average air temperatures along the Canal for the year were slightly above normal. The relative humidity and daytime cloudiness were practically normal, while the wind movement for the year was generally above the average. Climatological data for the Atlantic and Pacific stations of Colon and Balboa are given below:

STATION.	Pressure (reduced to mean of 24 hourly.)	Temperature.					Mean relative humidity.	Precipitation.			Wind.			Date.	
		Mean.	Maximum.	Date.	Minimum.	Date.		Total inches.	Station average.	Days of .01 inch or more.	Total movement (miles).	Prevailing direction.	Max. velocity in (miles.)		Direction.
Colon.....	29.856	80.8	91	Oct. 4	72	May 7	86	132.70	129.43	239	90,030	N	35	N. E.	Mar. 10

*Formerly Ancon.

OFFICIAL CIRCULARS.

Shipments of Surveyed Material to Balboa Shops.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., February 11, 1915.
HEADS OF DEPARTMENTS AND DIVISIONS:

The superintendent of the Mechanical Division states that his division has experienced considerable difficulty in connection with surveyed material sent to Balboa shops, some of which is scrap, some for repairs, and some sent in for mechanical inspection and recommendation regarding disposition, without any notice whatever being given with reference to the disposition to be made of same.

It is requested that previous instructions covering the matter of furnishing shipping advices on all shipments be more strictly complied with in future, and that the Mechanical Division be furnished complete information by shippers regarding approved disposition of shipments being made to them.

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, Panama Railroad Co.

Chief of Police and Fire Division.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., February 5, 1915.

CIRCULAR No. 661-13:

Effective this date, Capt. Harry D. Mitchell, U. S. A., is appointed Chief of the Police and Fire Division, vice Capt. Charles W. Barber, U. S. A., relieved from duty with The Panama Canal.

CHESTER HARDING,
Acting Governor.

Sale of Public Property to Officials.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., February 6, 1915.

CIRCULAR No. 630-4:

Public property which has been condemned, or the sale price of which has been reduced as the result of a survey or inspection, will not be purchased by any official who was responsible therefor at the time of the condemnation or reduction in price, nor by any official who bore any part in any such condemnation or reduction.

CHESTER HARDING,
Acting Governor, The Panama Canal,
Second Vice President, Panama Railroad Company.

Correction in Pamphlet.

THE PANAMA CANAL,
OFFICE OF EXECUTIVE SECRETARY,

BALBOA HEIGHTS, C. Z., February 9, 1915.

To all concerned—The word "lever," appearing in the first line of Paragraph 49, page 15, of the pamphlet entitled "Rules for the Care and Operation of Locomotive Cranes, Spreaders, Unloaders, Trackshifters, and Piledrivers," should be corrected to read "cables."

C. A. McILVAINE,
Executive Secretary.

Gang Passes.

THE PANAMA RAILROAD COMPANY,

OFFICE OF THE MASTER OF TRANSPORTATION,

BALBOA HEIGHTS, C. Z., February 8, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Foremen and subforemen in charge of gangs traveling on gang passes are again causing us a great deal of inconvenience on account of allowing their men to string out through all of the second-class coaches and not being on hand to identify such men when required by the collectors.

Men riding on gang passes should ride in the rear second-class coach and should be accompanied by their foreman or subforeman, who will identify the men upon request of the collector. These instructions were issued sometime ago but same are not being complied with and it naturally results in loss of revenue to the Panama railroad, as laborers who are not entitled to free transportation simply state that they are traveling on gang passes and in most cases it is impossible to get men in charge to leave their seats to identify their men. Will you kindly issue the necessary instructions?

S. W. HEALD,
Master of Transportation.

District Dentist at Pedro Miguel.

The office of district dentist at Pedro Miguel, which has been vacant since the removal of Dr. Mitten to Balboa, has been filled by the appointment of Dr. R. G. Norfleet, who is now ready to receive patients.

CHAS. F. MASON,
Chief Health Officer.

Proposals for the Building, Erecting, and Removing of Forms for the Construction of the Concrete Decking for Wharves at the Pacific Terminals.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., February 20, 1915, and then opened, for furnishing the materials and performing the necessary labor in connection with building, erecting, and removing forms for the emplacement of concrete in the floors of Wharf D-E and 750 feet of the coal unloader wharf.

Bids may be submitted for either one or both of the wharves, and should be made, in either case, for a lump sum. In addition to this lump sum bid, bidders shall state the unit price per square foot of floor surface to cover any increases or decreases in quantities of areas of wharves as shown in the contract drawings.

Specifications and proposals may be obtained upon application to the Engineer of Terminal Construction, Balboa Heights, and contract plans may be looked over at his office or at the construction office at Balboa terminals.

Bids must be accompanied by bond or certified check for one thousand (\$1,000) dollars.

The Panama Canal reserves the right to reject any and all bids.

Bids should be marked "Proposal for building, erecting, and removing forms for wharves at the Pacific terminals", and addressed to the Chief Quartermaster, Balboa Heights, C. Z.

Federal Income Tax.

Notice to all concerned—The Auditor, Panama Canal, Balboa Heights, has received copies of Form 1040-Revised, on which all employes of The Panama Canal and Panama railroad having a net income of \$3,000, or over, for the year 1914, shall make their return to the Collector of Internal Revenue at Baltimore, Maryland.

A copy of this form will be mailed to any individual requesting the same, which must be filled out and filed with the Collector at Baltimore, Md., on or before March 1, 1915.

The penalty for failure to have this return in the hands of the Collector of Internal Revenue on or before March 1, 1915, is \$20 to \$1,000.

AD. FAURE,
Acting Auditor, Panama Canal.

Rainfall from February 1 to 13, 1915, Inclusive.

Ames Gordon	1771	1038	10-26-14
Pascual Canavaggio	1938	1226, 1180,	
		748	12-29-14
Julio Casimir (Jules)	2424	912	4-6-14

In view of the above settlements, no further action is necessary by the commission, and the foregoing claims are therefore dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 303, on Wednesday, February 24, 1915, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

For the benefit of applicants residing in Gatun and Cristobal or Colon, examinations for licenses as navigators of motor boats, and as chauffeurs, will be held at the office of the captain of the port of Cristobal on Friday, February 26, 1915, beginning at 9 a. m. Applicants should be provided with motor boats or automobiles for the demonstration test.

By direction of the chairman of the board,
F. M. NIXON,
Recorder, Board of Local Inspectors.

COMMISSARY DEPARTMENT.

Size of Loaf Reduced.

Owing to the high price of flour, it has become necessary to reduce the size of a loaf of bread. Effective February 16 and as long as the present price of flour continues, only 15½ ounces of dough, instead of 18 ounces of dough, will be used.

BENJ. L. JACOBSON,
Depot Commissary.

CRISTOBAL, C. Z., February 16, 1915.

Elastic Cotton Belts and Buckles.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

CRISTOBAL, C. Z., February 12, 1915.

BULLETIN No. 54:

To all storekeepers—Men's cotton elastic belts, stock number 9132, shown on page 188 of price Look No. 9, have heretofore been sold in boxes containing two belts and one buckle. Effective at once, one belt and one buckle will be handled as stock number 9132, price 26 cents. The extra belt, without buckle, will be carried under stock number 11582 and sold for 11 cents each.

If you have in stock any boxes containing two belts and one buckle, separate them and take adjustment accordingly.

BENJ. L. JACOBSON,
Depot Commissary.

Small Stock of Dress Shirts.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

CRISTOBAL, C. Z., February 12, 1915.

BULLETIN No. 57:

To commissary storekeepers—We have received a small stock of thousand-plaited dress shirts, stock numbers 11583 and 11584.

The stock is not large enough to distribute to all stores.

Orders will be filled by wholesale dry goods section, for delivery the following morning.

BENJ. L. JACOBSON,
Depot Commissary.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m. on Saturdays.

Cold Storage Prices.

The following retail prices of cold storage provisions will be effective February 18, 1915:

FRESH MEATS.

Prices of fresh meats are same as those published last week.

SHIPPING INFORMATION.

March Weather Probabilities.

Based on the records at Colon and Ancon for the past seven and eight years, respectively, the following weather conditions may be expected to prevail at the Canal entrances during the month of March:

Winds—Fresh northerly dry season winds will continue throughout the month and there should be a slight increase in wind movement, compared with the February conditions. North and northeast winds will prevail at the Atlantic entrance to the Canal and an average hourly velocity of about 15 miles an hour may be expected. A maximum velocity of more than 36 miles an hour is not likely to occur.

The prevailing winds over the interior and on the Pacific side will be from the northwest. An average hourly velocity of about 11 miles can be expected. Probabilities of a maximum wind velocity of more than 30 miles are slight.

Rain—No heavy rains are likely to occur during the month though light showers may be expected at both Atlantic and Pacific entrances. The average March rainfall on the Atlantic side has been 1.63 inches, and 0.71 inches on the Pacific side. The average number of days on which 0.01 inch of rain fell has been 15 and two, respectively.

Fogs—No fogs are likely to occur at either Canal entrance, although night and early morning fogs may occasionally form over the Culebra Cut section of the Canal. The average number of foggy nights at this place has been four, though most of these have been light and practically all of them have cleared away before 8.30 a. m. They will not affect the navigation of the Canal under present operating conditions.

Temperature—An average air temperature of 80° Fahrenheit in the shade may be expected on the Atlantic side, while an average temperature of 82° Fahrenheit will probably occur at the Pacific entrance. The temperature is not likely to rise above 88° Fahrenheit, nor fall below 67° Fahrenheit at the Atlantic entrance, but a maximum temperature of 96° Fahrenheit and a minimum temperature of 65° Fahrenheit may occur at the Pacific entrance. The mean daily range in temperature is much greater on the Pacific than on the Atlantic side, the March mean daily range being seven degrees and 20 degrees, respectively.

Barometric pressure—Except for the well-marked diurnal change which is characteristic of tropical regions, changes in barometric pressure on the Isthmus are very slight and of practically no value in forecasting weather conditions. The average March sealevel pressure is 29.88 inches. A maximum pressure of over 30.03 inches and a minimum of less than 29.73 inches are not likely to occur at either Canal entrance.

Storms—Fair weather may be expected at both coasts and probabilities of any severe general storms are extremely remote although a rough sea and heavy swell may at times be produced outside the breakwater, at Colon, by the fresh northerly trade winds. Smooth to moderate seas may be expected at the Pacific entrance to the Canal.

Tides—Owing to the fact that the average tidal range is less than one foot and the maximum range approximately two feet, tidal fluctuations need not be considered in navigating the Atlantic entrance to the Canal.

The average tidal range at the Pacific entrance is about 13 feet, while a maximum range of 20 feet may occur. Panama (Balboa) tide predictions for the next five weeks are given below:

Tide Predictions.

Panama tide predictions for the next five weeks are given in the following table:

FEBRUARY.

	4.1	10.8	5.1	11.0

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used in Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans for all States. Due at New Orleans the following Tuesday.

Every Saturday to New York, for all states. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

*Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*NOTE—The sailings on Monday, March 8 and April 5, will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7:10 a. m., connects with the despatches for the two sailings mentioned above.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls, or the purchase of supplies may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

It is advisable that deposits be made somewhat in excess of the anticipated charges, to cover minor charges which may not have been anticipated, such as pilotage and towage. Pilotage is at the rate of \$1 per foot of maximum draft, but is not charged on a vessel which makes the transit of the Canal without taking on or discharging freight or passengers in a terminal port. Tug service, which is at the rate of \$15 per hour, will not be charged on vessels of less than 15,000 gross tonnage.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40, use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa from the Union Oil Company at the rate of from 1,300 to 1,600 barrels per hour. The present price is \$1.75 per barrel, reduced to 60° Fahrenheit. Diesel engine oil is for sale by the same company, at 45 shillings per ton of seven barrels.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels

may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

Repairs to vessels may be made to any extent, except where the use of a large dry dock is required, or the turning of the largest crank shafts or longest line shafts.

The Government hospital service is fully equipped for the treatment of medical and surgical cases. The charge for consultation at the dispensaries is \$3; for hospital treatment, in ward, \$3 per day; in private room, \$6 per day. For American seamen, the charge for treatment in ward is \$1 per day; for foreign seamen, \$1.50 per day.

Subsistence supplies, including a large stock of fresh meats, vegetables, canned groceries, fruits, bakery products, etc., are available for quick delivery at either terminal. Prices are generally lower than the retail prices in the United States, and compare favorably with prices in any part of the world.

The cable address of The Panama Canal on the Isthmus is "Isthmian, Balboa Heights;" in the United States, "Isthmian, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C.," for delivery in the United States.

Sailings of Vessels in Regular Service With the Isthmus.

REGULAR CONNECTIONS THROUGH THE CANAL.

Approximately regular services between the Atlantic and the Pacific seaboard from Boston, New York, Philadelphia, and Baltimore, occasionally Charleston and New Orleans, to San Pedro, San Francisco, Portland, and Puget Sound, and return, are maintained by the American-Hawaiian Steamship Company, with a sailing each way about every five days; the Luckenbach Steamship Company, with a sailing each way about every 10 days; Sudden and Christensen, approximately fortnightly; the Atlantic and Pacific Steamship Company, about every three weeks; and the Boston and Pacific Line, and the Arrow Line, each sending a vessel each way about once a month.

Between the east coast of the United States and the west coast of South America, fortnightly services are maintained by the Merchants' Line and by the New York and South America Line; the West Coast Line has sailings each way about every four weeks.

Between the west coast of the United States, with connections to lower British Columbia, and Europe the following lines are in service: The Harrison-Direct Line, monthly; the Maple Leaf Line, about every six weeks; the East Asiatic Company, monthly, and the Johnson Line, every six or seven weeks.

The Pacific Steam Navigation Company is operating approximately a monthly service around South America from Liverpool, by way of the Canal.

The American-Australian Line has been sending vessels through the Canal about fortnightly from New York to ports in Australia and New Zealand.

PACIFIC COAST CONNECTIONS.

The Pacific Mail has sailings about every 10 days between Balboa and San Francisco, with calls at Puntarenas, San Juan del Sur, Corinto, Amapala, La Union, La Libertad, Acajutla, San José de Guatemala, Champerico, Ocos, Salina Cruz, Acapulco, Manzanillo, San Blas, and Mazatlan. The company also operates a direct line between Balboa and San Francisco, with sailings about every six weeks; and a Panama-Central America line, between Balboa and Ocos, making one round voyage monthly, and calling at all the ports abovementioned between Balboa and Ocos.

Grace & Company maintain a service with a vessel plying between San Francisco and Valparaiso, calling at way ports. It makes a round voyage about every 10 weeks.

The Peruvian Steamship Company maintains a weekly service between Balboa and Callao, with calls at Guayaquil, Payta, Eten, Pacasmayo, and Salaverry. Every second voyage includes Mollendo.

The South American Steamship Company's vessels sail on alternate Mondays from Balboa for Valparaiso, calling at Paita, Eten, Paoasmayo, Salaverry, Callao, Mollendo, Arica, Iquique, Antofagasta, and Coquimbo.

The Pacific Steam Navigation Company has sailings on alternate Mondays for Peru and Chile; every 10 (Continued on page 246.)

(Continued from page 245.)

days for Ecuador; and on alternate Mondays for Colombian and Ecuadorian ports.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro, and an additional weekly sailing to Bocas del Toro.

The Royal Mail maintains fortnightly service between Colon and Southampton, making the following way ports: Antilla, Jamaica, Cartagena, Puerto Colombia, Puerto Cabello, Trinidad, Barbados, the Azores, and Cherbourg. Its vessels all arrive at Colon on Sundays and sail on Tuesdays.

The Compagnie Generale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Carupano, Trinidad, Martinique, Guadeloupe, and Santander; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Carupano, Trinidad, and Martinique.

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, be-

tween Colon and Genoa, calling at Puerto Colombia, Curacao, Puerto Cabello, and Barcelona.

The Compania Trasatlantica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curacao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls en route, the vessels sail from Genoa on the 8th day of each month.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing every Saturday, direct from Cristobal; and every Thursday, direct from New York; between Colon and New York by the United Fruit Company, sailings via Kingston weekly and via Havana weekly; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

The Canal Record

Official publication of The Panama Canal.
The Canal Record is published weekly free of charge, one copy each, to all employees of The Panama Canal and Panama Railroad Company whose names are on the general roll. To others, the subscription rate will be \$1, United States currency, per annum, in the United States and its possessions; Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Heavy Canal Traffic Last Week.

Thirty-three vessels passed through the Canal during the week ending at noon on Sunday February 21. Of these, 13 were bound from the Atlantic to the Pacific, and 20 from the Pacific to the Atlantic. Details of the traffic are given on the last page of this issue of THE CANAL RECORD.

None of the vessels was delayed in the Canal, and 33 vessels is a new record for the weekly period, under conditions of normal operation. The number has been exceeded once, when 36 vessels were passed through the Canal, in the week ending October 27; a great many of these vessels, however, had been held from the preceding week, during which six vessels went through, on account of a slide in Culebra Cut. The highest record for unobstructed traffic previous to last week, was the week ending December 6, when 23 vessels made the transit. During three other weekly periods, those ending December 12, January 17, and February 7, the number of vessels handled through during the week was 27.

West Coast Service of Japanese Vessels.

The principal Japanese steamship company, the Toyo Kisen Kaisha, will begin a regular service of calls at the port of Balboa, in connection with its South American service, with the steamship *Kiyo Maru*, due at Balboa on Wednesday, March 3. The service will be bi-monthly for the present.

This arrangement is in connection with an extension of the former itinerary of the company's South American service, which ran from Coronel, Chile, up the west coast as far as Callao, thence to China and Japan by way of Honolulu, and return. Hereafter, the vessels will continue up the coast as far as Los Angeles, California, thence to Honolulu and the Far East. The homeward bound itinerary is to be: Coronel, Valparaiso, Callao, Balboa, Salina Cruz, Manzanillo, Los Angeles, Honolulu, Yokohama, Kobe, Moji, and Hongkong. The outward bound vessels will call at the same ports in reverse order. It is planned to use four vessels in the service for the present, all of them fitted to carry passengers. The

Kiyo Maru is a double-screw steamship of 9,287 tons gross register, and 477 feet in length.

Now Called the "Marine Division"

The name of the Division of Canal Transportation has been changed to "Marine Division," and the title of the Superintendent of Transportation has been changed to "Marine Superintendent."

The change of names was not accompanied by any change in the organization or duties of the division. It is simply an alteration of nomenclature made in the interests of conciseness.

The Marine Division is in charge of the actual handling of vessels through the Canal. It includes in its organization the offices of the captains of the ports of Cristobal and Balboa, the admeasurers of vessels, the Canal pilots, the forces for the operation and maintenance of signals and other aids to navigation, and the Board of Local Inspectors.

The "Cristobal" and the "Ancon" Making Special Trips.

The steamship *Ancon* of the Panama Railroad Steamship Line sailed for the Canal Zone on Friday, February 19, from New York with 9,600 tons of coal for the Canal plants.

The steamship *Cristobal* of the same line arrived at Cristobal on February 17, on an extra trip with cement for The Panama Canal and the Panama Railroad Company.

Twenty-ninth Infantry Ordered to the Canal Zone.

The Twenty-ninth Infantry, United States Army, is to sail for the Canal Zone from New York City on Wednesday, March 17, on the transport *Buford*. Upon arrival on the Isthmus the regiment will be stationed at Camp Gaillard at Culebra.

Accommodations for Eight More Families.

On account of economies in the operations of the Building Division, and the presence of a considerable quantity of surplus material, it has been found practicable to build one additional 4-family concrete house and two additional 2-family concrete houses at Balboa, without exceeding the expenditures allowed for the previously authorized houses. The Constructing Quartermaster has recommended that the three additional houses be built and his suggestion has been approved.

Demonstration of Methods of Artificial Respiration.

In connection with the February meeting of the Panama section of the American Institute of Electrical Engineers, which will be held at the Canal Clubhouse at Balboa on Sunday, February 23, beginning at 9 a. m., a representative of the Health Department will give a demonstration of approved methods of artificial respiration. The general public is invited to attend this demonstration.

HEAVY FEBRUARY RAINFALL

Unusual Dry Season Precipitation Accompanied Recent Norther—Other Records.

In the two days beginning about noon, February 9, during which the most severe norther of recent years was blowing on the Atlantic side of the Isthmus, there was an unusual fall of rain all over the Isthmus. The least precipitation during the period recorded at any of the stations was .51 inch, at Miraflores; from this it ranged to 11.29 inches, at Brazos Brook.

New records for dry season rainfall in two days were established at all stations on the Atlantic side, and at all stations except Miraflores and Pedro Miguel, the two days' precipitation was in excess of the average for the entire month of February.

The precipitations at Colon were 1.46 inches on the 9th, 7.12 inches on the 10th, and 1.69 inches on the 11th. These records are from midnight to midnight, but the rainfall began between 10 and 11 in the morning of the 9th and ended before 9 a. m. on the 11th.

The fall of 7.12 inches at Colon on the 10th exceeded the maximum precipitation within 24 hours during the year 1914, which was 6.85 inches, at Gatun, on August 12-13.

All over the Isthmus the precipitation prior to the 9th was light, which is the usual dry season condition. The rainfall from the 9th to the 11th, inclusive, at the various stations is given herewith, in comparison with previous maximum falls for the entire month of February and with the station averages for February for the years of record:

STATION.	Rainfall from 9 to 11 of February, 1915, inclusive.	Maximum February rainfall, years of record.	Station average for years of record.	Years of record.
Balboa.....	1.04	3.22 (1911)	.51	15
Balboa Heights...	1.17	2.90 (1902)	.76	16
Miraflores.....	.51	2.49 (1913)	1.52	6
Pedro Miguel.....	.65	3.25 (1902)	.79	7
Kio Grand.....	1.59	2.83 (1902)	.61	10
Culebra.....	2.01	2.45 (1902)	.55	24
*Camacho.....	1.88	2.16 (1902)	.71	8
Empire.....	2.36	1.51 (1902)	.54	9
Gambou.....	2.33	4.53 (1889)	.82	29
*Juan Mina.....	3.23	1.39 (1911)	.90	4
Alvajuela.....	2.26	3.71 (1902)	.71	13
*El Viga.....	2.01	4.88 (1902)	2.03	6
Frijoles.....	3.04	3.03 (1913)	2.46	3
*Trinidad.....	7.18	5.97 (1910)	2.46	7
*Monte Lirio.....	5.80	8.93 (1910)	3.69	7
Gatun.....	9.95	4.12 (1902)	2.32	10
*Brazos Brook.....	11.29	4.21 (1913)	2.37	8
Colon.....	10.37	6.49 (1892)	1.47	45

* Standard gage at starred stations; readings taken at 5 p. m. Automatic register at unstarred stations; rainfall midnight to midnight.

WINDS.

The following table gives the average hourly wind movement, prevailing direction, and maximum velocities at the different stations for the period from the 9th to the 11th of February, 1915, inclusive, and the average

February wind movement for the years of record:

STATION.	Av. monthly wind movement Feb. 9 to 11, 1915, inclusive.	Av. hourly wind movement for month of Feb.	Prevailing direction.	Maximum velocity Feb. 9 to 11, 1915, inclusive.		
				Miles.	Direction.	Date.
Balboa Heights.	10.4	9.7	N	23	N	11 9
Pedro Miguel.	5.0	7.2	NW	15	W	9
Gamboa.	6.0	7.5	N	23	NE	9
Gatun.	7.4	11.5	N	24	NW	9
Colon.	18.4	15.0	N	33	N	9

The highest velocity that the wind had ever attained at Colon during the month of February since wind records were established at this place (record from 1908 to 1914, inclusive) was 36 miles, from the northeast on February 14, 1910.

TEMPERATURE.

The following table shows the maximum, minimum, and mean temperatures in degrees Fahrenheit for the 9th, 10th, and 11th of February, 1915, at Balboa Heights and Colon, together with the February average for the years of record:

BALBOA HEIGHTS.				
Date.	Max.	Min.	Mean.	Average.
Feb. 9.	85	72	78
Feb. 10.	79	72	76	(81)
Feb. 11.	87	72	80

COLON.				
Date.	Max.	Min.	Mean.	Average.
Feb. 9.	83	73	78
Feb. 10.	78	72	75	(79)
Feb. 11.	84	72	78

CHAGRES RIVER AND GATUN LAKE.

The river started to rise at 11 p. m., on the 9th, from elevation 92.25, and reached its maximum, 110.10, at 9.30 a. m., on the 11th. The most peculiar feature of the freshet was the number of crests reached in the 48 hours; five distinct crests were recorded, ranging in height from the first, at elevation 94.85, to the fifth, at elevation 100.10. As to the number of crests, this rise compares most closely to the freshet of November 27-29, 1912, when three crests were recorded. The November freshet was much larger, however, having a maximum momentary discharge of 54,000 cubic feet per second. The maximum momentary discharge of this freshet was 20,800 cubic feet per second; the maximum discharge for 12 hours was 17,679 cubic feet per second and 9,134 cubic feet per second for the 48 hours.

Since records have been kept at Alhajuella,

one other freshet of importance has been reported during the month of February; it occurred February 12-13, 1911.

It was a much larger rise, with only one crest, and having a maximum momentary discharge of 38,500 cubic feet per second.

The rainfall at Alhajuella and Vigia compares rather closely for these two rises, that of 1915 being a little larger.

The elevation of Gatun Lake was 87.10 feet when the rise began and had there been no other source of supply the amount which passed Alhajuella in these 48 hours, 1,578,355,200 cubic feet, would have been sufficient to raise the lake to 87.46.

So much other water was coming into the lake during the period that the spillway had to be operated far in excess of the calculations made at Alhajuella. During these 48 hours, the spillway gate operations totaled one gate for 110 hours and 14 minutes at 13,200 cubic feet per second, or an aggregate of 8,209,000,000 cubic feet. This shows that about five times the amount of water passing Alhajuella was let out through the spillway. The elevation of the lake at the end of this 48-hour period was 86.95.

ATMOSPHERIC PRESSURE.

Very little change in atmospheric pressure occurred during the presence of the storm, with the exception of the well marked diurnal change which is a characteristic of tropical regions, and no change in barometric pressure indicated its approach. There was, however, a slight fall of the barometer for a few days after the storm had passed. Ordinarily, these storms or "northers" are accompanied or followed by a considerable rise in pressure, but no marked pressure change precedes or indicates their approach.

NORTHERS.

The only storms of wide extent that visit the Isthmus are the so-called "northers" that occasionally reach as far south as Colon, during the period from November to April—the season of the northerly trade winds. They are occasioned by an anti-cyclonic or high pressure area over the Gulf and West Indies, there being a strong steady blow from this region of high barometric pressure toward the equatorial belt of low pressure. The principal damage to shipping interests results from the heavy swell and high waves that accompany the storms, and not from any extremely high maximum wind velocities.

The following table gives a list of "northers," the date of occurrence, and direction of

the wind, together with remarks as to the damage done by the storms:

NORTHERS FROM FRENCH RECORDS.				
Year.	Month.	Direction of wind.	Vessels wrecked.	Remarks.
1857	November	N.N.W.	7	Much damage to wharves.
1861	October 22	N	3
1865	October	S.W.	Lasted 6 hours; damage, \$300,000.
1872	February	N.N.W.	5	Wharves damaged.
1873	Jan. 18-19	N.N.W.	6	Wharves 5 and 6 partly destroyed; 2 vessels damaged at wharves.
1878	December 8	N.N.W.	4	Royal Mail str. <i>Para</i> resisted with 2 anchors and 90 fathoms of chain, under strong steam.
1879	Nov. 21-24	N.	4	Wharves 4 and 6 damaged.

The following table gives other "northers" of which we have knowledge, together with dates and remarks:

Year	Month.	Remarks.
1885	Dec. 2 to 6	14 vessels sail to have been stranded.
1905	Jan. 26 to 27	No damage reported.
1906	December. ...	Five days duration, last week in December.

In the following table are listed those storms in which the wind averaged 18 or more miles an hour for a period of at least 21 hours, with a maximum velocity exceeding 26 miles an hour. This information is taken from Cristobal and Colon records from December, 1907, to February, 1915:

DATES.	Maximum Wind Velocity.
December 25, 1907 to Dec. 23, 1907.	23 miles—N.E.
Dec. 31, 1907 to Jan. 3, 1908.	27 miles—N.E.
Jan. 14, 1908 to Jan. 15, 1908.	31 miles—N.E.
Feb. 2, 1908 to Feb. 4, 1908.	23 miles—N.E.
Feb. 20, 1908 to Feb. 22, 1908.	31 miles—N.E.
Mar. 6, 1908 to Mar. 12, 1908.	29 miles—N.E.
April 4, 1908 to April 10, 1908.	32 miles—N.E.
Jan. 8, 1909 to Jan. 9, 1909.	31 miles—N.
Jan. 31, 1909 to Feb. 1, 1909.	32 miles—N.
Feb. 17, 1909 to Feb. 18, 1909.	28 miles—N.
Jan. 16, 1910 to Jan. 19, 1910.	27 miles—N.
Jan. 30, 1910 to Jan. 31, 1910.	31 miles—N.
Feb. 13, 1910 to Feb. 15, 1910.	36 miles—N.W.
December 3, 1910.	33 miles—N.
Feb. 10, 1911 to Feb. 18, 1911.	27 miles—N.E.
Feb. 21, 1911 to Feb. 24, 1911.	30 miles—N.
March 6, 1911 to March 7, 1911.	26 miles—N.E.
Apr. 14, 1911 to April 17, 1911.	28 miles—N.
Nov. 30, 1911 to Dec. 2, 1911.	34 miles—N.E.
Dec. 23, 1911 to Dec. 31, 1911.	34 miles—N.E.
Jan. 5, 1912 to Jan. 6, 1912.	32 miles—N.E.
Jan. 21, 1912 to Jan. 25, 1912.	27 miles—N.
Feb. 27, 1912 to March 5, 1912.	33 miles—N.E.
March 14, 1912 to March 21, 1912.	23 miles—N.E.
April 23, 1912 to April 27, 1912.	33 miles—N.E.
Nov. 18, 1912 to Nov. 20, 1912.	33 miles—N.W.
Feb. 10, 1913 to Feb. 12, 1913.	32 miles—N.E.
March 7, 1913 to March 9, 1913.	31 miles—N.E.
March 17, 1913 to March 19, 1913.	36 miles—N.E.
March 23, 1913 to March 24, 1913.	31 miles—N.
Dec. 27, 1913 to Dec. 28, 1913.	32 miles—N.E.
Feb. 6, 1914 to Feb. 10, 1914.	28 miles—N.E.
Feb. 15, 1914 to Feb. 18, 1914.	28 miles—N.E.
March 8, 1914 to March 14, 1914.	35 miles—N.E.
March 23, 1914 to March 28, 1914.	23 miles—N.
April 22, 1914 to April 23, 1914.	29 miles—N.
Feb. 9, 1915 to Feb. 11, 1915.	37 miles—N.

The storms listed above cannot all be considered as "northers" in the true sense of the word, although they are all a direct result of the interchange of air which takes place between an area of high barometric pressure over the Gulf and West Indies and the equatorial belt of low atmospheric pressure.

The steamer *Tongking*, through the Canal on February 18, was taking a cargo of fuel-oil from California to Denmark. Preceding this voyage, she had delivered sesame seed at San Francisco from Shanghai.

Deceased Employees.

Name.	Check No.	Native of	Isthmian Residence	Employed by	Date of death

The estates of the abovenamed deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against their estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

CANAL WORK IN JANUARY.

Monthly Report of the Governor to the Secretary of War.

BALBOA HEIGHTS, C. Z., February 17, 1915.
The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of January, 1915:

Department of Operation and Maintenance.

Lock operation and maintenance—All fender chains have been received, and their installation is complete with the exception of four at Miraflores Locks. Telephone systems were completed at Gatun and Pedro Miguel Locks, and 85 per cent completed at Miraflores Locks. The work of grading the dams and backfill at Pedro Miguel and Miraflores Locks continued. Ninety-eight lockages were made at Gatun, 98 at Pedro Miguel, and 97 at Miraflores.

Electrical Division—The output of the power plants was: Gatun hydroelectric station, 3,143,630 kilowatt hours; Miraflores steam station, 83,110 kilowatt hours; Balboa power plant, 2,228 kilowatt hours.

The output of the Balboa air compressor plant was 207,096,712 cubic feet of free air compressed to 105 pounds.

The west side of the transmission line between Gatun and Miraflores was put in service. Electric construction work on the substation at Darien for the high power naval radio station, and for the substation at Gamboa for the new permanent pumping plant of the Municipal Engineering Division progressed favorably. Work on the underground conduit systems in the Ancon-Balboa district, at Gatun, and in the Cristobal district, and on various new buildings, continued during the month.

Municipal Engineering Division—In addition to the work incident to maintenance, operation, and repairs, work was in progress on the following items of construction: Water supply system for Toro Point; construction of Atlantic and Pacific fuel oil handling plants and the installation of oil pipe lines; 300,000-gallon concrete reservoir at Gatun; water and sewer lines and roads for the Coast Artillery post on Balboa dump; locks repair shop and office buildings at Miraflores and Pedro Miguel; concrete arch bridge from Miraflores purification plant to the spillway; Balboa townsite; new Panama waterworks; installation of pumps, etc., at the Gamboa pumping station; and the completion of installation of valves, fittings, and pipe connections on the Miraflores-Gamboa pipe line.

Meteorology and hydrography—Rainfall was below normal everywhere excepting at Juan Mina, Frijoles, Balboa, and Balboa Heights. At the latter two points the rainfall was double the January normal. Monthly totals ranged from 3.63 inches at Frijoles to 0.39 inches at El Vigia. The maximum precipitation recorded in any one day was 1.70 inches, at Balboa on January 6. The estimated rainfall over the Chagres River basin figures 35 per cent below the average, or 2.51 inches against a 14-year average of 3.84 inches. Gatun Lake remained practically stationary at plus 86.93 during the month.

Light seismic disturbances were recorded on the 13th, 23rd, and 28th of the month. No damage resulted from any of the tremors.

Division of Terminal Construction.

PACIFIC TERMINALS.

Shops—Work performed in connection with

the construction of the permanent shops included that in connection with the dry kilns in building No. 10, a temporary roadway to give access to the office building, and various other small finishing-up jobs.

Dry dock—Hand excavation was employed, and 5,786 cubic yards of material were removed. There were placed during the month 18,638 cubic yards of concrete, 14,496 cubic yards of which were mass concrete, and 4,142 cubic yards reinforced.

Coaling plant—All berm crane piers were completed to elevation 7.6, which is as far as this work could be carried until the steel decking has been erected; 423.5 tons of structural steel were erected on the berm cranes.

Quay wall and pier—Two caissons were sunk to rock and 10 were filled with concrete, making 101 caissons filled to date. Six panels of floor slab were poured. The total penetration amounted to 221 lineal feet. The total excavation in cylinders was 235 cubic yards. Tracks for both sides of pier No. 1 were laid to connect with the Panama railroad tracks.

Fuel oil plant—Three caissons were filled with concrete on crib No. 1, and the forms were built and reinforcement placed in the bracers for the four adjacent caissons. All of the caissons for the crib are now in place with the exception of two bracing caissons at the back side, and six caissons have been filled with concrete, 311 cubic yards being poured.

Sosa Hill Quarry—Four steamshovels excavated 82,542 cubic yards, all of which were classified as rock.

ATLANTIC TERMINALS.

East breakwater—In the construction of trestle, 5,840 lineal feet of piling were driven; the double trestle was extended 96 feet; and 384 lineal feet of track were laid. The total fill in place at the end of the month was 440,812 cubic yards.

Coaling plant—About 500 feet of trestle on the east side was removed to make way for erection of wharf deck steel. The filling of caissons under the south 500 feet of unloader wharf was completed and filling of caissons for the north section of wharf was begun. The caisson sinking under the north section of the unloader wharf was 50 per cent completed. About 390 feet of permanent bridge track were laid on the east wall and 150 lineal feet on the west.

Floating cranes—The wrecked jib of the crane *Ajax* was dismantled, and a new jib was ordered by cable, and will be manufactured at the home works of the contractor. The reinforcement of the jib of the crane *Hercules* was completed and the crane was offered for test on January 27. At the end of the month the tests had not been completed.

Division of Canal Transportation.

Ninety-eight vessels passed through the Canal in January, 51 northbound and 47 southbound. Collections for tolls amounted to \$376,810.88; for pilotage, \$3,074; for tug service, \$770.90; for launch service, \$60; for services of deck hands, etc., \$843; or a total of \$381,553.73.

Eighteen vessels were measured and 77 inspected to see whether their certificates conform to the rules.

Dredging Division.

The total excavation for the month, in-

cluding earth, rock, gravel, and sand, was 1,229,709 cubic yards, as follows:

	Cu. Yds.
Miraflores Locks to the sea.....	3,251.4
Balboa inner harbor.....	286,742
Culebra Cut.....	613,193
Sea to Gatun Locks.....	219,584
Approach channel, Cristobal.....	7,429
Inner harbor, Cristobal.....	9,425
Chagres River gravel and sand.....	32,000
Breakwater, Limon Bay.....	24,700
Breakwater harbor, Limon Bay.....	5,125

Total..... 1,229,709

The hydraulic grader was engaged during the month in digging drainage ditches and in washing down the sills on the east bank of the Canal opposite Culebra.

The destruction of water hyacinths continued, 3,350 square yards of plants being poisoned, and 1,500 square yards pulled up.

Mechanical Division.

An increasing volume of work in this division necessitated a net increase of 17 men on the gold roll force, and 51 on the silver roll force.

Shop orders authorized during the month numbered 988; those left over from the previous month, 403; those completed during the month, 859, and those carried forward into February, 537. The output of the foundry was 82,326 pounds of iron, 27,250 pounds of steel, and 13,653 pounds of brass. Hasting was done on 5,442 pieces of equipment, and shop and field repairs were made on 7,746 cars.

The fuel oil plant at Balboa was placed in partial operation by this division during the month.

Building Division.

Work completed during the month included the last of the two-family houses at Balboa; the medical storehouse at Ancon, and the commissary at Ancon, and the commissary warehouse at Cristobal. Work practically completed included the fire station, motor bus house, and the foundations for the oil house at Balboa. Work was begun on the Balboa dispensary on January 2. The removal of buildings for the insane asylum at Corozal continued, 10 of the 17 houses being under roof at the end of the month. The work for the Army at Culebra was over 50 per cent completed at the end of the month.

Supply Department.

The force report for the half-month ended January 20 showed a total of 24,564 employees of The Panama Canal and Panama Railroad Company, of whom 3,701 were white Americans and 20,863 were laborers. Of the latter, approximately 405 were Europeans and the remainder West Indian negroes. The total force was reduced 402; Americans 43, laborers 359.

The occupants of Government quarters numbered 7,090 white Americans, of whom 3,805 were men, 1,591 women, and 1,694 children; 8,598 West Indians, of whom 5,615 were men, 1,256 women, and 1,727 children.

The value of material received during the month was \$452,525.20. It came forward in 33 steamers; the total weight of the cargo, exclusive of lumber and piles, was 17,530 tons. Some of the principal items were 1,875,750 feet, board measure, of lumber for stock and the Mechanical Division, 1,593 piles, 197,066 bags of Portland cement, and 1,163 untreated cross ties.

Health Department.

General—No case of yellow fever, smallpox, or plague originated on or was brought to the Isthmus during the month. Thirty-nine

deaths occurred in the Canal Zone. The death rate for disease for the Canal Zone, based on a population of 31,480, was 13.72 per thousand, as compared with 12.37 for the preceding month and 16.34 for the corresponding month of last year.

Employes—The health of employes continued good. The number of names on the rolls for the preceding month was 35,618. On this basis, the admissions to hospitals and quarters, 988, gave a rate of 332.87 per thousand, as compared with 331.27 for the preceding month and 519.62 for the corresponding month of last year. The admission rates to hospitals for disease were: Whites, 379.36; blacks, 127.75; Europeans, 651.65; Americans, 229.79. The admission rates to hospitals and quarters for malaria were: Whites, 132.16; blacks, 44.93; Europeans, 190.73; Americans, 121.50. The total number of deaths from all causes was 17. Of these, 13 died from disease, or 4.38 per thousand, as compared with 3.64 for the preceding month and 4.87 for the corresponding month of last year.

Accountant Department.

The cash balance in Canal construction appropriations on January 31 was \$12,534,325.96; in the fortification appropriations, \$3,799,511.78. The pay rolls for January, exclusive of Army quarters, storehouses, fortifications, etc., amounted to \$924,351.84, the fortification roll to \$42,703.45, and the Army quarters and barracks roll to \$31,712.10. Payments by the Disbursing Clerk in Washington amounted to \$1,215,442.94, and by the Paymaster on the Isthmus, \$1,404,596.92. The latter also paid \$219,640.27 to the Panama Railroad Company on account of collections for commissary books. Collections on the Isthmus amounted to \$1,305,794.40, of which \$651,955.23 were repaid to appropriations, \$265,736.51 were trust funds, and \$385,102.66 were covered into the Treasury as miscellaneous receipts. Of the miscellaneous receipts, \$376,810.83 were collected on account of tolls, as compared with \$398,111.49 for December. Deposits in the amount of \$125,826.57 were made with the Assistant Treasurer to be applied in payment of tolls and other charges. Canal Zone revenue collections and miscellaneous funds received amounted to \$217,652.69, and disbursements under the same heading were \$327,083.07.

Executive Department.

DIVISION OF CIVIL AFFAIRS.

Customs and licenses—One hundred and seventy-eight licenses of all kinds were issued during the month. Thirteen estates were settled, having a total value of \$735.20. At the port of Balboa 84 vessels entered and 84 cleared; and at Cristobal 111 vessels entered and 110 cleared.

Postal se vice—Postmasters remitted on account of stamp sales, second class mail collections, postage due collections, and box rent receipts, \$5,588.90. The money orders issued aggregated \$311,174.26. The fees collected thereon amounted to \$983.84. Of the total value of money orders issued, \$120,800 represents the value of deposit orders issued without fees. Deposit orders to the value of \$65,520 and postal savings certificates to the value of \$44,669 were paid. Balance of postal savings deposits on hand at the end of the month, represented by the unpaid certificates and deposit money orders, aggregated \$708,467, as compared with \$697,796 at the close of the previous month.

POLICE AND FIRE DIVISION.

Three hundred and seventy-six arrests were made during the month. Of these, 341 were males and 35 females. Forty-eight convicts were confined in the penitentiary at the close of the month. Eleven persons were deported. Of this number, eight were convicts who had completed their sentences in the penitentiary.

Fifteen fires occurred during the month. The damage to Panama Canal and Panama railroad property amounted to \$82.50.

COURTS.

In the District Court, 10 civil, 31 probate, and 30 criminal cases were settled; 14 civil, 22 probate, and 24 criminal cases were filed, and 110 cases of all kinds were pending at the close of the month. In the magistrates' courts, 34 civil and 365 criminal cases were tried.

DIVISION OF SCHOOLS.

The total enrollment in the Canal Zone schools for the month was 1,437 for the white schools, and 1,322 for the colored schools. In the white schools the net enrollment was 1,074; the average number belonging, 981.8, and the average daily attendance, 946.6; in the colored schools the net enrollment was 1,250, the average number belonging, 905.7, and average daily attendance, 795.6.

Panama Railroad.

Cargo handled at the Colon and Balboa agencies aggregated 135,791 tons, 15,443 tons of which were handled through the Canal in steamers of the Panama Railroad Steamship Line, as follows: From New York to Balboa, 2,408 tons; from Colon to Balboa, 3,423 tons; total, 5,831 tons; from Balboa to New York, 5,313 tons; from Balboa to Colon, 4,299 tons; total, 9,612 tons; grand total, 15,443 tons.

Trestle work on the new terminal dock was 94 per cent completed; steel cylinders, 53 per cent completed; excavation in cylinders, 25 per cent completed, and 13 per cent of the total amount of concrete required was placed in the cylinders. A contract was entered into with the United States Steel Products Company for the delivery and erection of material for the steel floor of the dock.

Respectfully,

GEO. W. GOETHALS,

Governor.

Cement Coating to Protect Steel in Sea Water.

An experiment was concluded recently which was designed to show something of the degree of protection afforded steel against the effects of sea water by coating the steel with cement. Two steel plates which had been coated with the mortar and immersed for three years near the dry dock at Mount Hope were examined carefully and photographed. The plates were each six by 14 inches by half an inch thick, and had been cleaned by a sand blast before coating. One plate was coated with cement mortar one inch thick on one side and 1½ inches thick on the other. The other plate was coated ½-inch on both sides.

Examination showed, with respect to the 1½-inch coating, that practically the entire surface beneath had rusted, rather lightly, with a uniformly distributed coat. Under the 1-inch coating the degree of rusting was practically the same as under the 1½-inch coating. Beneath the ½-inch coating the rust was appreciably heavier and deeper than for either the 1-inch or 1½-inch coating, and in places the characteristic lamination of advanced rusting had begun to appear.

The conclusions drawn from the experiment were that the ½-inch coating was not as effective as either of the others; that the 1-inch did as well as the 1½-inch; and that none of the coatings afforded sufficient protection to steel to dispel apprehension as to the permanence of structures dependent on such protection, but that the life of such structures would be very considerably prolonged by coating with cement only half an inch thick.

New Post Named "Camp Gaillard."

By order of the Adjutant General the new Army post at Culebra, to be occupied by the Twenty-ninth Infantry, has been named "Camp Gaillard," in honor of the late Lieutenant David DuB. Gaillard, Corps of Engineers.

Lieutenant Colonel Gaillard was a member of the Isthmian Canal Commission from the early part of 1907 until his death, on December 5, 1913. From July 1, 1903, until July, 1912, when he was compelled to leave the Isthmus on account of ill health, he was the head of the Central Division, in charge of the excavation of Culebra Cut.

WEATHER CONDITIONS, CANAL ZONE, JANUARY, 1914.

Rainfall for the month of January was below normal everywhere except at Juan Mina, Frijoles, and along the extreme Pacific coast. On the Pacific coast, the rainfall for the month was double the average amount. Monthly totals ranged from 7.63 inches at Frijoles to 0.39 inches at El Vigia. The maximum precipitation recorded in any one day was 4.70 inches, at Balboa on the 6th. The estimated rainfall over the Chagres River basin figures 35 per cent below the average, or 2.51 inches against a 14-year average of 3.84 inches.

Average air temperatures at both coast stations were the highest of record for the month of January, the daily excess being approximately 1° F., on the Pacific coast and 2° F., on the Atlantic coast. The relative humidity was above normal, while the atmospheric pressure and diurnal cloudiness were slightly below the average. The wind movement was slightly above normal on the Pacific coast and slightly below normal on the Atlantic coast.

No fogs were observed during the month at either coast station. The average number of nights with fog at interior stations was five. Of the fogs observed, 26 per cent were dissipated by 6.30 a. m., 83 per cent by 7.30 a. m., and all fogs lifted or were dissipated by 9 a. m.

Elevations of Gatun Lake (feet above mean sealevel): Mean for month, 86.98; maximum, 87.06, on January 1; minimum, 86.90, on January 19; evaporation from lake surface, 6,398 inches.

Following is a summary of the month's conditions, as recorded at the Atlantic and Pacific entrances to the Canal:

STATION.	Pressure (reduced to mean of 24 hourly.)	Temperature.					Mean relative humidity.	Precipitation.				Wind.			Date.
		Mean.	Maximum.	Date.	Minimum.	Date.		Total inches.	Station average.	Days of .01 inch or more.	Total movement (miles).	Prevailing direction.	Max. velocity in (miles.)	Direction.

OFFICIAL CIRCULARS.

Charges for Rent, Fuel, and Electric Current.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., February 24, 1915.

CIRCULAR NO. 627-3:

1. In conformity with the President's order of January 15, 1915, employes of The Panama Canal and Panama Railroad Company on the Isthmus of Panama will be charged for rent, fuel, and electric current on and after March 1, 1915.

RENT.

2. The charge for rent is based upon the value of the quarters occupied, as directed in the order referred to, which has been published as Circular No. 601-37. The valuation of the quarters is based upon the size and location of the apartments, class of construction, and such extra facilities as hot-water installations, bath tubs, laundry tubs, etc., with a percentage of increase for two-family houses and cottages.

3. The general rule adopted is to fix a value for the floor space contained in each apartment, the floor space in the rooms being considered two times as valuable as porch floor space. If the rooms are in a two-family house 10 per cent is added to this value; if in a cottage or one-family house 33 1/3 per cent is added to this value, except that this rule is not applied to certain French one-family houses which are not especially desirable for quarters. A fixed charge of \$2 is added to all apartments to cover the collection of garbage, furniture renewals, etc., and this charge is doubled for the larger houses of the official type. A charge of 50 cents per month is added for houses containing hot-water installations and laundry tubs. Some slight variations from the figures thus obtained have been made to cover desirable or undesirable features of the various quarters. The charge for garbage collection, janitor service, and cleaning materials for bachelor quarters has been figured at cost.

4. The figures thus obtained fix the rental for type-14, four-family houses at approximately \$6 per month per apartment; for type-17 cottages, approximately \$10 per month; bachelor quarters figure up approximately \$4 to \$6 for each room per month, about half of which is for janitor service. The rental for family quarters increases according to the size of the house and the facilities afforded, up to \$50 per month for the official-type houses. A complete schedule of rents for each house occupied by gold employes will be published in THE CANAL RECORD.

5. Policemen, firemen, and nurses, who are required for the good of the service to live in police stations, fire houses, and nurses' quarters, respectively, will be charged one-half of the regular rates. Policemen and firemen who pay rent for family quarters and are required to sleep at their stations will not be charged rent for their station quarters.

6. Employes occupying gold quarters will be notified within a few days by the district quartermasters of the amount to be charged for rent and as soon as possible of the amount to be charged for electric current. Employes may also obtain this information from the table to be published in THE CANAL RECORD. Employes will be expected to pay their rent and electric light bills promptly after the initial notice without further monthly notice where the bills are for the same amounts each month. Remittances should be made to the Collector of The Panama Canal, preferably by postal money order, or by paying cash at the Collector's office in the Administration Building at Balboa Heights or the deputy collector's office in the old Panama railroad office building at Colon. If bills are not paid by the close of business on the 15th of the month, a penalty of \$1 will be charged and the assignment to quarters may be canceled if circumstances are such as to warrant such action.

7. When quarters are vacated a refund for the fractional part of the month will be made to the employe of one-thirtieth of the amount paid for rental and electric current for each day remaining in the month. Refunds will be made by the Collector or deputy collector upon presentation of the receipt for the amount paid, together with a release from the quarters signed by the district quartermaster. Refunds will not be made for fuel, but employes may dispose of any fuel on hand to other employes if desired.

8. Rent and light charges will begin on the day the quarters are accepted, and the charge for the fraction of a month will be one-thirtieth of the regular rate for each day remaining in the month.

9. Full rental and electric-light bills will be charged for family quarters during any period that they are not occupied by the employe to whom they are assigned. During such absence, not to exceed the time which is authorized for retention of quarters, the employe may sublet his quarters to any other gold employe but will not be permitted to charge more than the established rates for such occupancy plus not to exceed 25 per cent

if the sublessee is permitted to use the personal property and household utensils of the employe by whom the quarters are regularly occupied.

FUEL.

10. Coal will be sold by the commissaries at 30 cents per 100 pounds, delivered to the quarters in sacks, to be paid for by coupons the same as other commodities sold by the commissaries. Kindling wood will be sold in the same way, at 10 cents per sack.

ELECTRIC CURRENT.

11. The occupants of bachelor quarters will be charged 50 cents per month each for electric lights.

12. The occupants of family quarters containing four 16-candle power equivalents or less will be charged at the rate of 25 cents per month per equivalent, with a minimum charge of 50 cents per month.

13. The occupants of family quarters containing over four 16-candle power equivalents will be charged according to the following formula: \$1 plus 6 cents each for the total number of 16-candle power equivalents.

14. Electric appliances, such as irons, heaters, etc., will be charged for in addition to lighting at the present established rates.

NONEMPLOYEES.

15. A surcharge will be added to the schedule of rentals provided herein for quarters occupied by others than employes of The Panama Canal or Panama Railroad Company.

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, Panama Railroad Company.

The schedule of rents referred to in the above circular, is published as a supplement to this issue of THE CANAL RECORD for distribution on the Isthmus only.

Act of Congress.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., February 12, 1915.

CIRCULAR NO. 600-13:

The extracts from an Act of Congress quoted below are published for the information of all concerned.

GEO. W. GOETHALS,
Governor.

AN ACT making appropriations to supply urgent deficiencies in appropriations for the fiscal year 1915 and prior years, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, to supply urgent deficiencies in appropriations for the fiscal year 1915 and prior years, and for other purposes, namely:

* * * * *

DEPARTMENT OF STATE.

Payment to Panama: To enable the Secretary of State to pay to the Government of Panama the third annual payment, due on February 26, 1915, from the Government of the United States to the Government of Panama under Article 14 of the Treaty of November 18, 1903, \$250,000.

* * * * *

PANAMA CANAL.

The balances of the appropriations heretofore made under the heading "Fortifications, Panama Canal," are hereby consolidated so as to constitute one fund in the Treasury, to be disbursed and accounted for under the appropriation title of "Panama fortifications" for the object specified in the several appropriation Acts and in accordance with such allotments as may be authorized by the Secretary of War.

Approved, January 25, 1915.

Efficiency Report for Gold Employes.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., February 15, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Now that the force is becoming permanently established it is deemed advisable to rate the efficiency of each gold employe annually, about the first of the year. An efficiency report, Form PC. 375, has been prepared and is directed that as soon as possible one copy of this report be forwarded to this office to be filed with the personnel record of each gold employe.

The blank should first be given to the employe, who will fill out the record of training and experience on the last page of the report, and the employe will then give the blank to whatever superior is designated by the head of the division to report on his efficiency, and his superior will render the report required on page 1 of the blank.

The head of the division will furnish the information

required on page 2 of the form and will then have the report forwarded to this office for record.

Some of the information called for is doubtless already on file in this office, but it is directed that none of the blanks be left unfiled on that account.

Owing to delay in receiving these blanks from the printer, they were not ready to send out at the beginning of the year and it is directed that these reports be furnished as soon as possible. A supply of the forms may be obtained by telephoning the storekeeper in this building, telephone No. 170.

GEO. W. GOETHALS,
Governor.

Invoicing of Property for Fuel Oil Handling Plants.

THE PANAMA CANAL,
OFFICE OF THE AUDITOR,
BALBOA HEIGHTS, C. Z., February 16, 1915.

CIRCULAR NO. 81:

Effective at once, nonexpendable property drawn from storehouses, or transferred from divisions, for use in the construction or operation of Panama Canal fuel oil handling plants will be invoiced to the Superintendent of the Mechanical Division.

Mr. F. C. Nichols will cease to be an accountable official of The Panama Canal upon effecting a transfer of his accountability to Mr. D. C. Nutting.

H. A. A. SMITH,
Auditor, Panama Canal.
Approved: GEO. W. GOETHALS,
Governor.

Marking and Painting Hand and Push Cars.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., February 11, 1915.

CIRCULAR NO. 665-1:

1. The standard color for hand and push cars in the service of the several departments and divisions of The Panama Canal will be box car red, while yellow will be the standard color for hand and push cars in service of the Panama railroad, as heretofore.

2. As a distinguishing mark, the several departments and divisions will use the white diamond with initial showing division to which assigned, as well as numbering same.

3. Cars painted other than directed by this circular will be changed to standard colors as soon as practicable.

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, the Panama Railroad Company.

Proposals for Earth Fill, Margarita Island.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., March 1, 1915, and then opened, for placing approximately 200,000 cubic yards of fill on certain low areas on Margarita Island indicated on a map in the office of the Fortification Division, Balboa Heights. Bids must be at a price per cubic yard for the entire work. Form of proposal, contract, and specifications may be obtained upon written application to the office of the Chief Quartermaster. Any further information may be obtained upon application to Lieut. A. H. Acher, Assistant Engineer, Fortification Division. Anyone desiring to visit the location will meet Lieutenant Acher at the Panama railroad station at Colon at 2 p. m., on Thursday, February 25, and will be taken to the island. Bids must be accompanied by post-office money order, certified check, or cash, for 15 per cent of the amount bid. The Panama Canal reserves the right to reject any or all bids. Bids should be marked "Proposal for earth fill, Margarita Island," and addressed to the Chief Quartermaster, Balboa Heights, C. Z.

Cars Loaded with Waste Material.

THE PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,
BALBOA HEIGHTS, C. Z., February 11, 1915.

CIRCULAR NO. 25:

Heads of departments—When cars are loaded with waste material, scrap lumber, etc., which are to be switched to the dump at Balboa for burning or to be wasted, they should be tagged, showing the division loading same and the disposition required, in order that the department for whom this waste material is handled may be billed for its proportion of the labor charges necessary to handle this work.

Will you please see that this office is notified of all shipments of this kind so that we may arrange for its disposition.

The above is in accordance with instructions from the Acting Governor.

C. H. MOTSETT,
Superintendent.

COMMISSARY DEPARTMENT.

Notice to Patrons.

Commissary patrons are informed that milk and cream are bottled under ideal conditions at the Cristobal depot each afternoon, for sale in retail Commissaries on the following day. The date on which it is bottled is stamped on the bottle cap and patrons are requested to decline any bottle which bears a date earlier than that of the previous day.

The demand for "choice beef" having fallen off to a negligible quantity, this expensive quality will not be kept in retail commissaries on and after March 1, 1915. A quantity of "choice beef" will be kept on hand in the cold storage plant at Cristobal and all orders placed with retail commissaries before 11 a. m., will be shipped from Cristobal for delivery the following morning.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m. The gold departments of the Cristobal store will open at 2 p. m. on Saturdays.

Cold Storage Prices.

The following retail prices of cold storage provisions will be effective February 25, 1915:

MISCELLANEOUS.	Price.
Brains, calves', per pound	12
Kidneys, beef, per pound	10
Livers—Beef, per pound	11
Calf, each	65
half, each	33
Oysters, fresh, per pkt	30
Steak—Hamburger, package	17
Hamburger, 20-pound containers, per pound	14
Sausage—Bologna, per pound	13
Frankfurter, per pound	13
Frankfurter, imported, tin	14
Lieberwurst, per pound	10
Pork, per pound	17
Sweetbread, beef, per pound	10
Eggs, fresh, per dozen	13
per 1/2 dozen	17
Bluefish, per pound	15
Halibut, fresh, per pound	76
Salmon, per pound	6
Yeast, per pound	31
per cake	2

CURED AND PICKLED MEATS.

Ham—Real York and Cumberland, per pound	43
Genuine Westphalia, per pound	50
Sugar cured, whole, per pound	20
Half, per pound	22
Sliced, per pound	28
Butt end, per pound	12
Whole, boiled, per pound	30
Half, boiled, per pound	32
Sliced, boiled, per pound	38
Hocks, boiled, per pound	10
Bacon—Breakfast, sliced, per pound	29
Whole piece, per pound	28
Ham, lunch, per pound	40
Pork, salt, family, per pound	14
Ox tongues (3 to 5 pounds), per pound	24
Pigs' feet, per pound	7
Tongues, per pound	22

POULTRY AND GAME.

Chickens—Fancy, roasting, milk fed, per pound	29

Tropical, per dozen	12
Coconuts, each	5
Bananas, per bunch	38
Bananas, each	1/2
Apples, evaporated, per pound	11
Apricots, evaporated, per pound	13
Pears, evaporated, per pound	23
Tangerines, each	1 1/2
Pineapples, Cuban, each	7
Figs, dried, per pound	17

* Indicates advance from preceding list.
 **Indicates five cents allowed for return of bottle.
 † Indicates reduction from preceding list.
 ‡ Sold only from commissaries; no orders taken for delivery.
 § Not less than 1/2 lam or 1/2 shoulder of fresh pork will be sold.

Changes in Commissary Price Book.

THE PANAMA CANAL, SUPPLY DEPARTMENT, CRISTOBAL, C. Z., February 15, 1915.

BULLETIN No. 61:
 To all concerned—The following changes and corrections are to be made in price book No. 9:
 Page 10—Toffee, Corona, large size, 13 cents to five cents.
 Page 23—Salmon bellies, per pound, 16 cents to 13 cents.
 Above two items to be eliminated after present stock is exhausted.
 Page 46—Gherkins, sour, 14 oz. bottle at 24 cents. Correct to read 18-ounce bottle.
 Page 47—Spanish olives, Queen, in two or 10-gallon kegs; may be retailed by the quart at 34 cents.
 Page 57—Franco-American soups, pints, 16 cents to 10 cents. Franco-American soups, quarts, 27 cents to 15 cents. These two items to be eliminated after present stock is exhausted.
 Page 59—Paprika, C. & B.; eliminate C. & B.
 Page 84—Add powder puffs, stock number 7731, each 29 cents. See price change No. 620.
 Page 91—Eliminate oil cloth, stock number 5972.
 Page 111—Eliminate suiting, worsted, stock number 11233.
 Page 118—Eliminate napkins, sanitary, stock numbers 8767 and 8763. These items are correct on page 103.
 Page 137—Change price of suiting, stock number 11233, to \$1.85 per yard. See elimination on page 111.
 Page 144—Eliminate corsets, stock number 9453.
 Page 157—Eliminate Clarke's thread, stock number 2486.
 Page 181—Envelopes, stock number 9383, should read per package at six cents instead of per box.
 Page 195—Shirts, Geysers & Boxmoor, stock numbers 11583 and 11584; change to read shirts, white dress, thousand plaited.
 Page 206—Rubber heels, tan, stock number 21191. Correct to read 1 per pair, instead of each.
 Page 266—Bakers, stove, stock numbers 25373 and 25374. Correct to read cookers, stove.
 Page 271—Pastry boards, stock number 28311. Correct to read stock number 28331.
 Page 306—Hooks, porcelain, stock number 26532. Correct to read hooks, towel.
 Page 308—Adl bed castors, stock number 35134, each three cents.

Additions to Stock.

Linen, damask, 72", yd.	86
Shirts, thousand-plaited dress, ea.	1.70
Shirts, thousand-plaited dress, ea.	2.85
Heels, rubber, tan, ea.	.27
Knives, boy scout, ea.	1.00
Caviar, tin	.40

Hose, men's, lisle, tan, pr.	.23
Boilers, milk, aluminum, 1-qt., ea.	1.55
Covers for sauce pans, aluminum, 9 1/2", ea.	.56

Price Changes.

The following changes in prices of articles in stock at the commissary stores became effective February 20, 1915:

ARTICLE.	PRICE CHANGE.	
	Old.	New.
Walnuts, lb.	.23	.19
Caviar, tin	.20	.22
Macaroni, lb.	.07	.08
Vermicelli, lb.	.07	.03
Sugar, granulated, sk.	.32	.28
Hair tonic, bot.	.37	.42
Burlap, yd.	.18	.11
Needles, mitrailieuse, case	.07	.09
Ties, bow, ea.	.20	.24
Pants, Palm Beach, pr.	2.30	2.35
Basins, wash, ea.	.26	.23
Cages, bird, ea.	.95	1.15
Fitchers, water, ea.	.34	.31

Misdirected Letters.

BALBOA HEIGHTS, C. Z., February 23, 1915.
 The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts, and may be procured upon request of the addressee:
 Cutler, Ralph Metzger, Miss Elsie
 Hyatt, Capt. J. Thompson, Mrs. Jas. A. (2)
 Kenyon, Doctor Villano, Gughelmo
 King, Mrs. Russell Wilson Wilson, Capt. Charles.

LETTERS UNCALLED FOR, FEBRUARY 16.

Bailey, S. T.	Levine, Philip
Coke, Frank	Lindle, Willie Burr
Colley, David	McNelly, Charles J.
Bonitto, Clifford	Mamad, Borlio Alli
Cyrus, Cornelius	Meninger, Mrs. Cliff
Dunford, Rupert A.	Merrill, Dr. Albert S.
Dyer, James L.	Patterson, C.
Edwards, Shelby	Reisner, Waldo A.
Engelbrecht, Geo. J. T.	Schoenberg, Mrs.
Everett, Dwight W.	Smith, Wm. F.
Hansen, Carl Y.	Thernis, Rubin
Higgins, Edw. J.	Tully, Peter
Horan, J. C.	Vernon, Charlotte
Howell, Walter H.	Wheatcroft, W. P.
Isley, Mrs. C. J.	Williams, Hurbert A.
Judson, Major	Wilson, Harlan
Lauterbach, Leonhard	Wilson, W. C. (2)

Family Quarters.

Application for married quarters on file on January 31, were as follows:

DISTRICT.	List	
	No. 1.	No. 2.
Ancon	20 (9)	350 (117)
Ancon Hospital	2 (1)	5
Corozal	2	125 (35)
Paraíso		178 (21)
Gatun		43 (6)
Cristobal		117 (25)
Total	24 (10)	818 (204)

NOTE—The figures in parentheses show the number of applicants already occupying regular or non-house-keeping family quarters at stations other than those at which applications are filed.

Stages of the Chagres River, Gatun Lake, and Miraflores Lake.

	15.5	-0.3	16.6	-1.2

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used in Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans for all States. Due at New Orleans the following Tuesday.

Every Saturday to New York, for all states. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

*Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*NOTE—The sailings on Monday, March 8, and April 5, will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7.10 a. m., connects with the despatches for the two sailings mentioned above.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls, or the purchase of supplies may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

It is advisable that deposits be made somewhat in excess of the anticipated charges, to cover minor charges which may not have been anticipated, such as pilotage and towage. Pilotage is at the rate of \$1 per foot of maximum draft, but is not charged on a vessel which makes the transit of the Canal without taking on or discharging freight or passengers in a terminal port. Tug service, which is at the rate of \$15 per hour, will not be charged on vessels of less than 15,000 gross tonnage.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa from the Union Oil Company at the rate of from 1,300 to 1,600 barrels per hour. The present price is \$1.75 per barrel, reduced to 60° Fahrenheit. Diesel engine oil is for sale by the same company, at 45 shillings per ton or seven barrels.

The cable address of The Panama Canal on the Isthmus is "Isthmian, Balboa Heights;" in the United States, "Isthmian, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C.," for delivery in the United States.

Sailings of Vessels in Regular Service With the Isthmus.

REGULAR CONNECTIONS THROUGH THE CANAL

Approximately regular services between the Atlantic and the Pacific seaboard from Boston, New York, Philadelphia, and Baltimore, occasionally Charleston and New Orleans, to San Pedro, San Francisco, Portland, and Puget Sound, and return, are maintained by the American-Hawaiian Steamship Company, with a sailing each way about every five days; the Luckenbach Steamship Company, with a sailing each way about every 10 days; Sudden and Christenson, approximately fortnightly; the Atlantic and Pacific Steamship Company, about every three weeks; and the Boston and Pacific Line, and the Arrow Line, each sending a vessel each way about once a month.

Between the east coast of the United States and the west coast of South America, fortnightly services are maintained by the Merchants' Line and by the New York and South America Line; the West Coast Line has sailings each way about every four weeks.

Between the west coast of the United States, with connections to lower British Columbia, and Europe the following lines are in service: The Harrison-Direct Line, monthly; the Maple Leaf Line, about every six weeks; the East Asiatic Company, monthly, and the Johnson Line, every six or seven weeks.

The Pacific Steam Navigation Company is operating approximately a monthly service around South America from Liverpool, by way of the Canal.

The American-Australian Line has been sending vessels through the Canal about fortnightly from New York to ports in Australia and New Zealand.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro, and an additional weekly sailing to Bocas del Toro.

The Royal Mail maintains fortnightly service between Colon and Southampton, making the following way ports: Antilla, Jamaica, Cartagena, Puerto Colombia, Puerto Cabello, Trinidad, Barbados, the Azores, and Cherbourg. Its vessels all arrive at Colon on Sundays and sail on Tuesdays.

The Compagnie Generale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Curacao, Trinidad, Martinique, Guadeloupe, and Santander; and another line, with sailings, every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Curacao, Trinidad, and Martinique.

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curacao, Puerto Cabello, and Barcelona.

The Compania Transatlantica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curacao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls en route, the vessels sail from Genoa on the 8th day of each month.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing every Saturday, direct from Cristobal; and every Thursday, direct from New York; between Colon and New York by the United Fruit Company,

(Continued on page 254.)

MOVEMENTS OF OCEAN VESSELS.

(Week ending at noon February 21.)

THROUGH THE CANAL—ATLANTIC TO PACIFIC.

Table with columns: Date, Vessel, Nationality, Line, From, For, Cargo (Nature, Tons), Canal Tonnage (Gross, Net). Lists various vessels and their movements from Atlantic to Pacific.

(a) 3,900 tons structural steel, 1,200 tons machinery, 1,000 tons railroad material, 500 tons textiles, 400 tons wire fencing, etc. (b) Including 1,500 tons structural steel, 1,500 tons railroad rails. (c) 3,188 tons steel rails, from Pensacola, and 11,574 bales (2,763 tons) cotton, from Galveston.

THROUGH THE CANAL—PACIFIC TO ATLANTIC.

Table with columns: Date, Vessel, Nationality, Line, From, For, Cargo (Nature, Tons), Canal Tonnage (Gross, Net). Lists various vessels and their movements from Pacific to Atlantic.

(a) 5,500 tons nitrates, 1,550 tons copper ore. (b) 11,144 tons sugar, 15,116 cases pineapples. (c) 1,969,000 feet lumber. (d) Including 407 tons beans. (e) 653 tons for Cristobal. (f) 5,225 tons nitrates, 113 tons copper ore, 663 tons silver ore.

*ARRIVALS AND EXPECTED ARRIVALS FROM ATLANTIC.

Table with columns: Date, Vessel, Line, From. Lists arrivals and expected arrivals from the Atlantic.

CANAL

RECORD

Volume VIII.

BALBOA, CANAL ZONE, WEDNESDAY, MARCH 3, 1915.

No. 28.

The Canal Record

Official publication of The Panama Canal.
The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. To others, the subscription rate will be \$1, United States currency, per annum, in the United States and its possessions; Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Charges for Fuel Oil at Balboa.

The Panama Canal is ready to make deliveries of fuel oil to vessels at Balboa and Cristobal, and has established a rate of \$1.25 per barrel of 42 gallons for fuel oil sold by it to vessels alongside the cribs. There is no wharfage charge for vessels taking oil at the crib, just as there is no charge against vessels using the other docks solely for the purpose of taking on coal or other supplies furnished by the Canal.

Vessels delivering oil at the crib, however, will be subject to the regular wharfage charges of 15 cents per foot of length, measured over all, for each day or fraction thereof, for steam and motor vessels; or for sailing vessels, five, 10, or 15 cents per foot for vessels up to 100 feet in length, up to 200, and over 200 feet in length, respectively.

The charge for pumping oil from the crib to tanks, or from tanks to crib, is four cents per barrel of 42 gallons. There is, however, no charge for the pumping of oil sold to vessels by The Panama Canal. In the case of such deliveries to vessels at the crib, the only regular charge is the \$1.25 per barrel for the oil. If the ship should require extra men for handling lines, etc., at the crib, there would be an extra charge covering such expense.

The same conditions and rates will apply on fuel oil handling and sales at both Balboa and Cristobal.

Progress on New Radio Stations at Canal Entrances.

An antenna has been strung between the new steel masts of the Colon radio station and a series of receiving tests has been in progress. All of the equipment of the plant is ready for use and the towers are completed with the exception of the final riveting. It is expected to have the new plant in full operation upon the receipt of the new spreaders, specially designed of monel metal.

For the Balboa station, the erection of the first of the two steel towers was begun on February 17. These towers will be like those at Colon, self-supporting, 300 feet high, and set 600 feet apart. The apparatus for the Balboa station has been installed complete

and is ready for use upon the completion of the towers and antenna.

Upon the completion of the new plants, the old equipment in use at the respective stations will be dismantled. Parts of it have been found available for use in the new plants.

The Canal Route for Cruising Yachts.

Inquiry has been received from the International Society of Travel and Adventure, San Francisco, as to the cost of taking small pleasure yachts, of from 10 to 40 tons burden, through the Canal, and as to the possibility of reducing the cost by lashing a number of small craft together for towing. The society has been advised that tolls will be charged according to the rules for the measurement of vessels for the Panama Canal; that motor-driven small craft will not need to be towed, and that it is entirely practicable to lash a number of small craft together for towing and thus reduce the towage, the cost of tug service being thus divided among a number of vessels.

Several cruising yachts, including both steam and sailing vessels, have passed through the Canal and it is probable that this will become a favorite route for cruises, on account of the many attractions which it offers.

Commemorative Postage Stamps.

Postage stamps of a special issue, commemorative of the opening of the Panama Canal, were placed on sale at the Canal Zone post-offices on Monday, March 1. These stamps are part of the special 1915 issue of the Republic of Panama. In accordance with the Executive Order of December 3, 1904, the government of Panama furnishes the stamps for the Canal Zone postal service and receives for them 40 per cent of the face value. The government of Panama ordered and placed on sale eight kinds of stamps, aggregating 7,500,000 pieces, of which the Canal Zone postal service requested an issue of 350,000 surcharged "Canal Zone". These 350,000 stamps, consisting of 100,000 each of one, two, and five-cent stamps, and 50,000 10-cent stamps, have been distributed among the Canal Zone post-offices in proportion to their stamp sales for the month of January, 1915. Steps have been taken to prevent collectors from purchasing more than 100 stamps of each variety and to see that every one is given an equal chance to buy them.

The stamps are about three and one-half centimeters in length by two and one-half in width. The one-cent stamps are green and the design shows a relief map of the Panama Canal. The two-cent stamps are red, with a picture of Balboa "taking possession" of the Pacific Ocean. The five-cent stamps, blue, bear a picture of Gatun Locks, looking upward from the north end and showing the three levels. The 10-cent stamps, which are orange, show Culebra Cut near the Empire suspension bridge, after the water had been let into the Cut but before the bridge had been removed.

FIRST HALF YEAR OF CANAL.

Analysis of Traffic during First Six Months of Commercial Operation.

The first six months of commercial operation of the Canal were completed at the close of business on February 14, 1915, the Canal having been opened to commercial traffic on August 15, 1914.

Four hundred and ninety-six vessels, other than Canal vessels and launches, etc., which are not counted, passed through the Canal during the period. They carried a total of 2,367,244 tons of cargo. Their distribution over the most important routes followed by vessels using the Canal to this time is summarized herewith:

Route.	No. Vessels.	Cargo tonnage.
U. S. coastwise, eastbound.....	97	499,439
U. S. coastwise, westbound.....	109	493,272
U. S. Pacific coast to Europe.....	66	444,855
Europe to U. S. Pacific coast.....	16	59,516
South America to U. S. and Europe	69	378,386
U. S. and Europe to South America	31	128,922
U. S. Atlantic coast to Far East...	48	287,782
Far East to U. S. Atlantic coast...	2	14,500
Miscellaneous routings.....	13	60,572
Vessels without cargo.....	45
Totals.....	496	2,367,244

As between passages eastbound, or from the Pacific to the Atlantic, and westbound, from the Atlantic to the Pacific, the traffic was as follows:

M'th	Eastbound.		Westbound.		Total.	
	Ves-sels.	Cargo.	Ves-sels.	Cargo.	Ves-sels.	Cargo.
Aug..	12	57,182	12	49,106	24	106,288
Sept..	30	186,776	27	135,262	57	322,038
Oct..	40	252,288	44	168,069	84	420,357
Nov..	38	242,291	54	206,510	92	448,801
Dec..	57	261,680	42	178,235	99	439,915
Jan..	51	240,875	44	208,082	98	448,957
Feb..	21	99,533	21	81,355	42	180,888
T'tl..	252	1,340,625	244	1,026,610	496	2,367,244

Slightly over 41 per cent of the cargo handled has been in movement between ports of the United States, in what is classified as United States coastwise trade. Over 21 per cent of all the cargo has been in movement between the Pacific coast of North America, principally the United States, and Europe; and approximately an equal proportion (21 per cent) has been moving on the route between the west coast of South America and the seaports on the Atlantic seaboard of the United States and Europe. Traffic between the Atlantic seaboard and the Far East has amounted to over 12 per cent of the whole. All together, the foregoing routes have been used for the transit of all but approximately two and one-half per cent of all cargo sent through the Canal.

The six principal commodities shipped through the Canal have been, in order of their tonnage: Grain, nitrates, coal, refined petroleum products, lumber, and cotton. The six commodities together have amounted to approximately one-third of all goods shipped through.

Grain shipments have amounted to 303,124 tons, of which all but 13,733 tons were shipped from the west coast of the United States and Canada. Of the other 13,733 tons, 6,200 tons were barley shipped from Valparaiso to Great Britain and 7,533 tons were wheat shipped from St. Johns, New Brunswick, to New Zealand.

The grain shipments from the west coast of North America consisted of 155,246 tons of wheat (5,744,000 bushels) and 134,145 tons of barley (6,170,000 bushels), a total of approximately 11,914,000 bushels.

Nitrates, shipped from the west coast of South America to various ports in the United States and Europe, amounted to 204,441 tons.

Coal, all moving to the Pacific, amounted to 151,745 tons. Of this quantity, 83,031 tons were shipped from the Atlantic seaboard of the United States, and 68,664 tons from the United Kingdom.

Refined petroleum and other products amounted to 102,456 tons, of which 87,857 tons were shipped from the Atlantic seaboard of the United States to China, Japan, and Korea, and 14,599 tons were shipped from Talara, Peru, to Great Britain.

Shipments of lumber have amounted to 56,078 tons. All but 600 tons (shipped from Gulfport to Panama) were from the west coast of North America. Of the 55,478 tons shipped from the west coast, all but 6,891 tons (from Nanaimo, British Columbia) were shipped from Pacific ports of the United States.

Raw cotton shipments have amounted to 38,239 tons, enroute from the Atlantic seaboard of the United States to the Far East. Over 70 per cent of the cotton passing through the Canal has been consigned to Japan.

TOLLS.

The tolls levied during the six months' period amounted to \$2,126,832.00. Adding to this the \$11,610.69 of tolls collected on barges prior to August 15, the total levy to February 15, 1915, is \$2,138,442.69, distributed as follows:

Period.	Amount.
Period to August 15, 1914.....	\$ 11,610.69
August 15 to August 31.....	84,401.80
September 1 to September 30.....	269,863.00
October 1 to October 31.....	278,089.12
November 1 to November 30.....	387,242.40
December 1 to December 31.....	411,895.44
January 1 to January 31, 1915.....	419,037.12
February 1 to February 14, inclusive.....	172,305.12
Total.....	2,138,442.69

A Correction.

In the compilation of the report of traffic through the Canal in the month of December, the error was made of counting twice one shipment of 6,500 tons of general merchandise from New York to Melbourne, passing through the Canal on the British steamship *Trafalgar*, December 6. The figures for westbound cargo during December should accordingly be corrected to read 178,235 tons (instead of 184,735). The corrected figure for the total cargo handled through the Canal during December is 439,915 tons.

Contract for Fuel Oil at Atlantic Entrance.

Contract for supplying fuel oil to the tanks of The Panama Canal at the Atlantic entrance has been awarded to the Union Oil Company of California, at a rate of 95 cents per barrel. The company has already 117,000 barrels in its tanks on the Isthmus, which it will transfer to the Canal tanks as needed.

LABOR FORCE AND QUARTERS IN JANUARY.

The force report of January 20, 1915, shows the actual working force of The Panama Canal on that date to have been 20,926; of the Panama railroad, 3,638; and of contractors, 289, a total effective working force of 24,853. This is a decrease of 402, as compared with the statement of December 23, 1914.

The gold force on the Isthmus, composed almost exclusively of white Americans, was 3,713, a decrease of 43, as compared with the preceding month. The gold force of 3,713 was divided as follows: The Panama Canal, 3,334; the Panama railroad, 367; contractors, 12. Detailed figures of the total force employed on the Isthmus, by departments and divisions, follow:

DEPARTMENT OR DIVISION.	SILVER EMPLOYES*											Total silver.	Total gold.	Grand total.		
	Artisans.					Laborers.					Total silver.				Total gold.	Grand total.

The estates of the abovenamed deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against their estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

EXECUTIVE ORDER.

Establishing Regulations Governing the Accounting to the Treasury of the United States for Panama Canal Collections (Section 5 of the Act of August 1, 1914, Public No. 161, P. 79.)

By virtue of the authority vested in me, under Section 5 of the Act of August 1, 1914, I hereby prescribe the following regulations governing accounting to the Treasury of the United States for moneys received on account of the Panama Canal by the collecting officers:—

1. The Collector of The Panama Canal shall render his accounts monthly to the Auditor for the War Department for all moneys received by him, or placed to his official credit from whatsoever source received, or in whatsoever manner placed to his official credit on account of the United States (Panama Canal). These accounts, however, need not include revenues of the Canal Zone Government, money order funds, postal saving bank funds, clubhouse funds, moneys of the Panama Railroad Company, or similar moneys or funds for which the United States can not be held to be a trustee. Said accounts shall be rendered in such detail and be accompanied by such papers, records, and copies thereof relating to such collections as are hereinafter specified and upon forms to be approved by the Comptroller of the Treasury in accordance with these regulations.

2. The Collector shall give bond to the United States, to be filed with the Secretary of the Treasury, in such sum as may be fixed by the Governor of The Panama Canal, conditioned for the faithful performance of his duties of collecting and disbursing all public moneys and honestly accounting without fraud or delay for the same, including moneys of the United States embraced in any special deposit account to be submitted to the Auditor for the War Department.

3. The monthly accounts current of the Collector, under both his regular account and such special deposit account as he may be authorized by law to keep, rendered on forms prescribed by the Comptroller of the Treasury for that purpose, shall be accompanied by a schedule of the amounts received by him, which accounts shall be so stated as to show the date each amount was received by him directly, or from his deputies, or from other receiving agents; the number of the Collector's receipt issued therefor, the person from whom received, the source from which received, and, in proper columns, the amounts collected for tolls, the amount to be covered into the Treasury as miscellaneous receipts, and the amount to be credited to appropriations, and in case of his special deposit account, a schedule of the amount of refunds or repayments made.

4. The schedule showing the details as provided in Section 3 above, shall be accompanied by signed copies of all formal bills, registered as such in the office of the Auditor of The Panama Canal, on which collection is made, and, where practicable in the judgment of the Governor of The Panama Canal and it can be done without an increase in the clerical force, signed copies of receipts, where there has been no formal bill, will be transmitted to the Auditor for the War Department, together with such other supporting papers as are deemed necessary by the Governor. In addition to the requirements of this section and Sections 3, 5, 6, and 7 hereof, the examination and inspection provided for in Section 8 hereof, shall be made, and the re-

port of the persons designated thereunder shall be filed with the accounts of the Collector transmitted to the Auditor for the War Department as a part of the record to support such accounts for the period covered by such report. The facts stated in this report shall be certified to by the persons designated to make the inspection and examination. Such inspection and examination shall be made at as early a date as practicable after the expiration of the period which it is to cover, and the report of the persons designated to make it shall be promptly filed. A signed copy of this report shall be furnished to and filed by the Auditor of The Panama Canal and preserved as a part of the files of his office and one copy shall be furnished to the Comptroller of the Treasury for his files.

5. Immediately following each item of receipt from the deputy collectors or other receiving agents, there shall be scheduled a list of all items collected by them on formal bills, in the same manner as if paid to the Collector direct, and all other collections not covered by formal bills, shall be segregated into items according to the source from which derived, such as hospital service, water rental, etc. Sales slips, memorandum bills for hotel and hospital services, water rentals, rentals for quarters, electric current, coral services, and bills of like character, and other papers relating thereto need not accompany the Collector's account, except in special cases where it would be necessary that they should accompany the account in order to make a complete explanation of the collection.

6. The Auditor of The Panama Canal shall prepare and forward with the Collector's account, a consolidated statement showing the total amount received by the Collector, classified according to the sources from which derived with as much detail as practicable, whether from sales of material, repairs, rentals, hotel or hospital service, towage, pilotage, etc., and shall specify the amount to be credited to each appropriation or to miscellaneous receipts, and the amount that should appear in the special deposit account.

7. The Auditor of The Panama Canal will certify to the correctness of the statements above referred to, and, in addition, will certify that he has examined the records and accounts of all officers and agents who have collected moneys for The Panama Canal, and that the statements include all funds received by the Collector from the persons and sources indicated, and that, so far as shown by the records of the Auditor's office, the Collector's account is a full, true, and complete account of all public moneys which came into the possession of the Collector during the period covered by the account, and that the special deposit account of the Collector contains a true, correct, and complete account of all moneys received by the Collector or placed to his official credit in his special deposit account, which does not appear in his regular account.

8. As a part of the detail required by these regulations, two competent persons, one from the office of the Auditor for the War Department designated by the Auditor, and one from the office of the Comptroller of the Treasury designated by the Comptroller, shall be detailed semiannually at such time as may be designated by the Comptroller, but not oftener than once in six months, to proceed to the Canal Zone and examine the records and accounts of the collections of

The Panama Canal for the six months just prior to such examination, in such detail as may be necessary to enable them to verify the correctness of the collections not supported by collection vouchers in detail for such period, as stated in the schedule of collections submitted by the Collector with his accounts. They shall also make such other investigations as the Comptroller may direct. Such persons shall make a report in triplicate, and certify and file the same as provided in Section 4 hereof. If such persons disagree each shall make and file in the same manner as provided for the joint report in Section 4 hereof a separate report as to the items upon which they disagree. Such persons shall be given free access to all records and papers pertaining to the accounts under examination. Such persons shall be furnished free transportation going to and returning from the Isthmus, including meals while on the steamer, and shall be paid a per diem of four (\$4.00) dollars from the day of sailing from the United States until return thereto, both dates inclusive, in lieu of subsistence and all other expenses. Such expenses shall be paid out of any appropriation for The Panama Canal that may be designated by the Governor, and which is applicable therefor.

9. The Collector shall, within 20 days after the close of each month, forward to the Auditor of The Panama Canal for administrative examination, his special deposit and regular accounts for such month. The Auditor for The Panama Canal shall give such accounts an administrative examination, and transmit them to the Auditor for the War Department within 20 days from the date of their receipt from the Collector.

10. The gross proceeds of all collections which the Panama Canal Act and Section 3 of the Act of August 1, 1914, or any other Act, authorize to be credited to appropriations, shall be so credited by the Collector and deposited in the Treasury to the credit of the proper appropriation or transferred to the Paymaster of The Panama Canal to be taken up in the Paymaster's accounts for disbursement.

11. At the close of each fiscal year, the Auditor of The Panama Canal shall determine, as nearly as may be practicable from a profit and loss account to be stated by him, the net profits for such fiscal year, and direct that there shall be covered into the Treasury from the proper appropriation to "Miscellaneous Receipts," a sum equal to the net profits shown by such account, and said account shall be transmitted to the Auditor for the War Department for examination and file.

12. The facts necessary to support such transactions as are not shown by collection vouchers in detail, shall be verified by the certificate of an administrative officer having personal knowledge of such transaction where this is practicable. The certificate above required may be so made, however, that one certificate will cover a number of items of collections of the same class, involving different transactions, such as the collections from the Tivoli Hotel, or the sales in stores, etc., as shown in Section 5 hereof, covering a period of time to be stated in such certificate.

13. The Governor of The Panama Canal shall prescribe such administrative regulations as he deems necessary to efficiently carry these regulations into full force and effect.

THE WHITE HOUSE, WOODROW WILSON.

February 4, 1915.

[No. 2135.]

NEW STREET LIGHTING SYSTEM

Plans Adopted for Illumination of Permanent Towns of the Canal Zone.

Permanent street lighting systems are to be installed in the permanent towns of the Canal Zone, namely Cristobal, Gatun, Pedro Miguel, Balboa, and Ancon. The lights will be supported on ornamental cast iron posts of the type used for street and park lighting in Washington, D. C., which were originally designed by the late Frank Millett, member of the Fine Arts Commission, and the transmission of current will be made through underground cable.

The posts will be spaced approximately 175 feet apart and each will bear a single lamp of about 200 candlepower, enclosed in a spherical polycased or Alba globe, 14 inches in diameter. The lamps will be of the recently developed nitrogen-filled type, using a concentrated coil of metal filament. Approximately the same lights and globes, on the same spacing, are now in service in a part of Balboa Heights, near the Governor's house, where the Electrical Division has been conducting experiments as to their efficiency and the most desirable spacing for them.

The lamps will be connected in series, like the usual practice with arclights, and will be used on a current of 6.6 amperes. They will be supplied from the nearest substations of the transisthmian transmission system through constant-current transformers and the usual switchboard control apparatus. There will be one circuit each at Cristobal, Gatun, and Pedro Miguel, where approximately 65,55, and 36 lights, respectively, will be used; and four separate circuits for the Ancon-Balboa district, in which a total of about 350 lights will be installed. The underground transmission will be made through a lead-sheathed, bandsteel armored cable of No. 6 copper, Brown and Sharpe gage.

The mounting height of the lamps will be 10 feet three inches, from the ground line to the center of the globe. The posts, rising approximately 10 feet above the ground, are to be of a slender, graceful type, in which utility is paramount, through combined with pleasing lines. Their diameter through the base is six inches, contracting to a diameter of three inches just below the capital; and the surface of the posts is relieved from severity by vertical fluting between base and capital. The capital is a simple series of concentric annulets, in which the globe will rest as in a cup.

In addition to the regular street lights of the type described, two ornamental posts of classic design will be mounted in front of the Administration Building at Balboa Heights, one on each side of the main entrance to the building. These posts will mount five lights each, four at the ends of arms extending at right angles from the column, and a larger light at the top of the column, surmounting the four smaller lights.

At selected locations in the various towns, combination fire alarm and lighting posts will be installed. These will be similar in form to the regular street lighting posts, except that at an elevation of about five and a half feet above the ground the width of the post is expanded sufficiently to allow the inseting of a fire alarm box. The globes on these posts will be marked with red to advertise the presence of the fire alarm boxes.

The necessary material for these systems

has been ordered from the United States, and first deliveries are expected within 10 days. The requisition calls for an aggregate of 619 posts, 120,000 feet of armored cable, and 31,000 feet of unarmored cable, which, with the miscellaneous material, lamps, shades, etc., will cost approximately \$46,000. This amount does not include the ornamental posts for the front of the Administration Building, which will cost about \$700 each.

Increase of Force at Balboa Shops.

On account of increased work at Balboa shops, the force has been increased by the following, requisitioned from the United States: Twenty machinists (marine), 10 boilermakers, 10 car repairers (wood), five car repairers (steel), six riveters, five shipwrights, and one diver, a total of 57 gold employes. This increase has been made necessary by the great amount of repair work needed on railroad and dredging equipment, which, in turn, has resulted from the retirement of a considerable part of the equipment and the consequent heavier service required of that still in use.

The force of the Mechanical Division on February 1, and not including the new men mentioned above, was 2,477, distributed as follows:

Balboa shops.....	556	970
Dry dock shops.....	96	344
Paraiso shops.....	105	231
Cristobal roundhouse.....	11	40
Miscellaneous.....	32	92
Total.....	800	1,677

The force employed by the Mechanical Division on June 30, 1914, was 942 gold and 2,452 silver employes; on July 1, 1913, it was 974 gold and 2,360 silver. In other words, it has decreased about 25 per cent from the requirements of the two years past.

Tungsten Filament Lamps.

The Electrical Division advises that tungsten filament lamps which have apparently burned out can often be reclaimed for a considerable period of further usefulness by gently tapping the lamp while it is in the socket with the current turned on. This will frequently cause the broken end of the filament to come into contact and unite with an unbroken section.

Publication Received.

Receipt is acknowledged by THE CANAL RECORD of a copy of a "Handbook of the Navigation Laws of the United States," printed and published at San Francisco by Walter MacArthur, and containing "sections and acts applicable to shipment and discharge of seamen, qualifications of licensed officers, manning scale, etc."

The steamship *Cristobal* of the Panama Railroad Steamship Line, which arrived at Cristobal from New York, on February 17, on a special trip with cement for The Panama Canal and the Panama Railroad Company, was sent through the Canal to Balboa in ballast on February 24, to load with cargo to New York.

The engineering and drafting office of the Division of Terminal Construction in the old Pacific Division office building at Corozal, has been directed to be in readiness to transfer to the Administration Building at Balboa Heights on 10 days' notice.

Water from the Chagres River.

The pumps of the new permanent pumping station on the south bank of the Chagres River, near the Gamboa bridge, were placed in operation on February 22, and since that date all of the water supply for the Canal villages on the Pacific slope of the continental divide, except Paraiso, and for the city of Panama has been taken from the Chagres. The filtration plant at Miraflores is not in operation and the water is treated with a solution of hypochlorite of lime for the destruction of bacilli, as has been done with the water taken from Miraflores Lake and Culebra Cut. The pumping station at Miraflores has been closed. The water descends to the purification plant by gravity from the crest of the continental divide, and its distribution to Corozal and Miraflores is made under the same force. Water for Ancon, Balboa Heights, and Panama is pumped into the local distribution system at the pumping station No. 3, near the Balboa railroad station.

Week End Rates at the Hotel Washington.

For employes desiring to spend the week end in Colon, the following rates have been made at the Hotel Washington, for rooms taken any time on Saturday and released on Sunday: For one person, room with private bath, \$2.25; room with shower, \$1.75; for two persons, 25 cents more than the charge for one person. These rates are for Government employes only. The hotel management will not assure reservations unless made in advance. Telephone reservations should be made at least 24 hours in advance of arrival.

There is music with dancing during dinner on the second, fourth, and fifth Saturdays of each month. On the first and third Saturdays there are dances of the Washington Cotillion Club.

Third Month's Awards of Prizes for Care of Houses at La Boca.

The committee on improvements at La Boca has announced the following distribution of prizes for the best kept houses in the silver settlement at La Boca during the month of February:

Class.	Prize	Won by
One-story house with plumbing...	\$5.00	No. 607
One-story house without plumbing...	5.00	No. 598
Two-story house with plumbing...	5.00	No. 621
Two-story house without plumbing...	5.00	No. 635
House with unscreened porches...	1/6 off rent	No. 636

Examination for Levelmen and Transitmen.

On Sunday morning, March 14, 1915, at 9 o'clock, an examination for levelmen and transitmen will be held in the board room of the Administration Building, Balboa Heights, C. Z. A written and oral examination will be given between the hours of 9 a. m. and 1 p. m., the examination to test the applicant's qualifications for promotion from the position of "Rodman" to that of "Levelman" or from the position of "Levelman" to that of "Transitman."

All applicants for the examination should notify the Office Engineer, Balboa Heights, C. Z., on or before 12 m., March 10, 1915.

C. J. EMBREE, O. E. MALSURRY, A. W. WILSON, *Committee.*

General Vaccination in Canal Zone.

The Chief Health Officer has ordered a general vaccination of all persons in the Canal

Zone who have not had smallpox or been successfully vaccinated within five years.

The Health Department states that it has now a very good and pure lymph of its own manufacture.

The district physician at Ancon announces that nonemployees in Ancon district should apply for vaccination between 8 and 10 a. m., on any day except Sundays and holidays. Employees may apply at any hour that the dispensary is open, that is, from 8 to 10 a. m., from 12 noon to 1 p. m., and from 4 to 6 p. m.

No Extension of Time for Filing Claims before the Joint Land Commission.

In reply to the request of the Minister of Panama in Washington that an extension of 60 days be made to the six months' period, expiring December 27, 1914, agreed upon as the limit for filing claims before the Joint Land Commission, the Department of State advised him that in view of Rule 3, under which the Joint Land Commission has already the power to extend the time for the filing of claims three months in particular cases, it considers that the extension asked for is unnecessary.

Law of Panama Penalizing the Transfer of Commissary Coupons to Nonemployees of the United States, and Sale of Official Railway Transportation.

The following law of the Republic of Panama, penalizing the sale or transfer, within the Republic, of Canal commissary coupons to others than employees of the United States, and the sale or transfer of Panama railroad transportation issued in favor of officials and employees of the government of Panama, is published for the information and guidance of all concerned.

According to Article 9, the law is to become effective 10 days after its promulgation. Promulgation was effected by publication in the *Official Gazette* of Panama of February 5, 1915, No. 2172.

Making Additions to the Police Code. Act 21 of 1915. (January 19.)

THE NATIONAL ASSEMBLY OF PANAMA DECREES:

Article 1. Any person who, in territory under the control of the Panamanian authorities, shall sell, give away, or convey, in any form, for a consideration or gratuitously, coupons or tickets for making purchases in the commissaries of the Panama railroad or of the Isthmian Canal Commission, or goods coming therefrom, to a person not employed in the service of one or the other, shall pay to the proper municipal treasury a fine of 25 balboas for the first offense and in case of repetition shall be punished by a double fine or detention of from 10 to 30 days.

A person shall incur like penalties, who, not being employed in the service of the Panama Railroad Company or of the Isthmian Canal Commission, shall, in territory under Panamanian jurisdiction, buy, acquire, or accept, whether for a consideration or as a gratuity, the coupons or goods referred to.

Article 2. Any person who, not being employed in the service of the Panama railroad or of the Isthmian Canal Commission, shall bring into the Republic articles or commodities coming from the commissaries of those corporations, shall lose such articles or commodities, which shall be confiscated from him in favor of the National Treasury, and shall incur, according to the individual case, the same penalties provided for in the preceding section.

Article 3. Any merchant, owner, or manager of a commercial establishment where there are found on sale, either displayed or hidden, articles coming from the commissaries of the Panama Railroad Company or of the Isthmian Canal Commission, shall lose such articles, which shall be confiscated from him in favor of the district and he shall pay into the treasury of the same a fine of 50 balboas for the first offense. In case of repetition the fine shall be double and the individual responsible for the misdemeanor shall be liable in addition to detention of from 20 to 60 days.

Article 4. The functionaries invested with authority and jurisdiction, the employees of the National customs service, the internal revenue inspectors, the chief, employees, and agents of police who may find in any establishment articles or com-

modities coming from the commissaries of the Panama railroad or of the Isthmian Canal Commission, are under obligation to confiscate them immediately and place them at the disposal of the alcalde of the district, who, as soon as judgment is given as provided for by this law, shall deliver them to the municipal treasurer for sale with the usual legal formalities.

The articles so confiscated and turned over to the municipal treasurers for sale shall be previously marked so that they may be distinguished from others like them.

Article 5. When, through information from any private individual or public employe, articles mentioned in the preceding section are confiscated, 50 per cent of the proceeds of the sale shall be given to the informer.

Article 6. Every person who may sell, give, or convey in any manner, as compensation or gratuitously, a railroad pass made out in his favor in accordance with the contract concluded with the Panama Railroad Company, July 5, 1867, shall pay to the treasury of the proper district a fine of 25 balboas for the first offense. In case of repetition he shall incur a double fine and detention of from 10 to 30 days and shall lose whatever employment he may have.

When by virtue of the authority herein provided a person is condemned to lose the position he is filling, the functionary who imposes the penalty shall proceed immediately to dismiss the guilty party from the service, if he legally may; if not, he shall immediately report his sentence to the one who is legally competent, who shall immediately order his dismissal as decreed.

Article 7. Every person who may use or try to use or acquire or accept as a compensation or as a gratuity, a railroad pass issued in favor of another person in accordance with the contract before cited, shall incur, according to the circumstances of the case, the same penalties which are provided in the preceding section.

Article 8. The alcalde of the district shall impose the penalties provided for in this law through the procedure of police court hearings established by the code in regard to the matter; but the governor of the province may also impose them, following the same procedure.

Article 9. This law shall be published widely in Spanish, English, Italian, Greek, and Chinese and shall become effective 10 days after its promulgation.

Given at Panama, January 16, 1915.

CIRO L. URRILA,

President.

J. M. FERNANDEZ,

Secretary.

Republic of Panama, National Executive Power, Panama, January 19, 1915.

Let it be published and carried out.

BELISARIO PORRAS,

JUAN B. SOSA,

Secretary of Government and Justice.

OFFICIAL CIRCULARS.

Marine Division.

THE PANAMA CANAL,

EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., February 20, 1915.

CIRCULAR No. 660-24:

Effective this date, the name of the Division of Canal Transportation is changed to Marine Division, and the title of Superintendent to Marine Superintendent.

GEO. W. GOETHALS,

Governor.

Applications for Leave of Absence.

THE PANAMA CANAL,

EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., February 25, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

The following notice was published in THE CANAL RECORD of January 27:

"All concerned—It is requested that as far as possible, applications for leave of absence be forwarded to this office from 20 to 30 days before effective date of leave desired. Applications for leave should not, however, be forwarded more than 30 days prior to effective date of leave."

Instances have been noted where employes have been allowed to absent themselves for one or more days before the commencement of the leave of absence, as granted on the daily leave order. This must not be done. If a day off is desired prior to sailing, this day should be included in the request for leave of absence.

Other instances have been noted where employes have been allowed to enter upon a leave of absence in excess of five days before the request has reached this office and the leave authorized upon the daily leave order. It is desired that this practice be discontinued. If it is necessary or desirable that an employe enter upon leave before an application can be forwarded to this office and acted upon, the matter can be taken up by telephone and the leave authorized.

You are instructed to direct those in authority under

you to handle requests for leave of absence through the regular channels, and to be governed by the regulations covering the same.

GEO. W. GOETHALS,
Governor.

Bachelors Living at Corozal and Working at Balboa Heights.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., February 25, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Bachelors occupying quarters at Corozal and working at Balboa Heights, who are now being furnished transportation between residence and official station at the expense of The Panama Canal, will be required to file application for quarters in the Ancon-Balboa district, and on assignment such employes will be expected to transfer their quarters, or, if they elect to continue residence at Corozal, no further transportation will be issued.

GEO. W. GOETHALS,
Governor.

Request for Half-rate Mileage Books or Employee's Reduced Rate Tickets for Trip through the Canal.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., February 17, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

There is sent to you today a copy of form PC-495, "Request for half-rate mileage books or employee's reduced rate tickets for trip through Canal." This is a combination form, to be used either for requesting half-rate mileage books, or reduced tickets for a trip through the Canal on one of the vessels of the Panama Railroad Steamship Line. This form supersedes form 319 ("Request for half-rate mileage"), and a supply of same may be obtained upon requisition to the storekeeper, Administration Building, Balboa Heights.

C. A. MCLIVAIN,
Executive Secretary

Prompt Release of Coal Cars Requested.

THE PANAMA RAILROAD COMPANY,

OFFICE OF SUPERINTENDENT,

BALBOA HEIGHTS, C. Z., February 20, 1915.

CIRCULAR No. 31:

Heads of all departments—This is to call your attention to the fact that during the next few weeks we will receive several colliers from the United States, including the steamship *Ancon*, which ship alone will carry approximately 10,000 tons of coal.

In the past we have been handicapped in the handling of colliers owing to shortage in coal cars, and as it will be necessary to handle these boats with prompt despatch, your cooperation is requested, so that all cars under load with coal may be promptly released and turned back to R. W. Bergin, receiving and forwarding agent, Cristobal.

Will you kindly instruct your forces accordingly?

C. H. MOISETT,
Superintendent.

Proposals for the Construction of a Steel and Concrete Pier at the Quarantine Station at Balboa.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., March 17, 1915, and then opened, for the construction of a landing pier 569 feet long, in front of the quarantine station at Balboa; all material entering into the permanent structure being furnished by The Panama Canal, and the contractor furnishing all labor, and material for temporary construction work. Bids should be submitted in the form of a lump sum bid. Specifications, form of contract, and proposal may be obtained upon written application to the Chief Quartermaster, Balboa Heights, and contract plans may be examined at the construction office of Balboa terminals. Bids must be accompanied by bond, certified check, post-office money order, or cash for \$1,000. The Panama Canal reserves the right to reject any or all bids. Bids should be marked "Proposal for construction of pier at quarantine station, Balboa," and addressed to the Chief Quartermaster, Balboa Heights, C. Z.

Prices of Scrap Turned into Supply Department.

THE PANAMA CANAL,

SUPPLY DEPARTMENT,

BALBOA HEIGHTS, C. Z., February 19, 1915.

To all concerned—Circular No. 11-1, issued by the Chief Quartermaster under date of August 19, 1914, is hereby amended so that the price allowed for scrap rubber turned in to the Supply Department will be one-half cent per pound instead of one cent. This will become effective at once.

W. R. GROVE,
Chief Quartermaster.

COMMISSARY DEPARTMENT.

Coal and Kindling Wood.

Effective March 1, 1915 and until further orders, coal and kindling wood will be sold by commissaries as follows:

- Coal—at 30 cents per 100-pound bag.
- Kindling wood—at 10 cents per bag.

Orders for fuel will be accepted at commissaries and by commissary solicitors.

Higher Grade of Fresh Cream.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

CRISTOBAL, C. Z., February 27, 1915.

Commissaries will hereafter handle a higher grade of fresh cream with a consequent increase in price. The new grade is 30 per cent cream, equal to the best grade available in the New York market.

BENJ. L. JACOBSON,
Depot Commissary.

Price Changes.

The following changes in prices of articles in stock at the commissary stores became effective March 1, 1915:

ARTICLE.	PRICE CHANGE.

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 303, on Wednesday, March 10, 1915, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m.; and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

For the benefit of applicants residing in Gatun and Cristobal or Colon, examinations for licenses as navigators of motor boats, and as chauffeurs, will be held at the office of the captain of the port of Cristobal on Friday, March 12, 1915, beginning at 9 a. m. Applicants should be provided with motor boats or automobiles for the demonstration test.

By direction of the chairman of the board,
 F. M. NIXON,
 Recorder, Board of Local Inspectors.

	15.5	-0.3	16.6	-1.2

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used in Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3.47.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans for all States. Due at New Orleans on the following Tuesday.

Every Saturday to New York, for all states. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

*Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*NOTE—The sailings on Monday, March 8, and April 5, will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho,

Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7.10 a. m., connects with the despatches for the two sailings mentioned above.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., March 1, 1915.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts, and may be procured upon request of the addressees:

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges. Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls or the purchase of supplies may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

It is advisable that deposits be made somewhat in excess of the anticipated charges, to cover minor charges which may not have been anticipated, such as pilotage and towage. Pilotage is at the rate of \$1 per foot of maximum draft, but is not charged on a vessel which makes the transit of the Canal without taking on or discharging freight or passengers in a terminal port. Tug service, which is at the rate of \$15 per hour, will not be charged on vessels of less than 15,000 gross tonnage.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Cristobal or Balboa from plants of The Panama Canal. The present price is \$1.25 per barrel, reduced to 60° Fahrenheit.

Diesel engine oil is for sale by the Union Oil Company, at 45 shillings per ton of seven barrels.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock, with a minimum charge of \$3. Vessels may take up from the fresh water sections of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light, and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa. Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges

for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

Repairs to vessels may be made to any extent, except where the use of a large dry dock is required, or the turning of the largest crank shafts or longest line shafts.

The Government hospital service is fully equipped for the treatment of medical and surgical cases. The charge for consultation at the dispensaries is \$3; for hospital treatment, in ward, \$3 per day; in private room, \$6 per day. For American seamen, the charge for treatment is ward is \$1 per day; for foreign seamen, \$1.50 per day.

Subsistence supplies, including a large stock of fresh meats, vegetables, canned groceries, fruits, bakery products, etc., are available for quick delivery at either terminal. Prices are generally lower than the retail prices in the United States, and compare favorably with prices in any part of the world.

Application for supplies, or for services, should be made to the captain of the port, Cristobal or Balboa.

Mail, other than registered, and cablegrams for men on ships which will call at the terminal ports, or pass through the Canal, may be addressed in care of the captains of the ports, if desired; or may be addressed to Cristobal or Balboa, general delivery, with the name of the vessel written plainly; or, in case the vessel has a known representative on the Isthmus, in care of such representative.

The cable address of The Panama Canal, on the Isthmus, is "Isthmian, Balboa Heights;" in the United States, "Isthmian, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C.," for delivery in the United States.

Sailings of Vessels in Regular Service with the Isthmus.

REGULAR CONNECTIONS THROUGH THE CANAL.

Approximately regular services between the Atlantic and the Pacific seaboard from Boston, New York, Philadelphia, and Baltimore, occasionally Charleston and New Orleans, to San Pedro, San Francisco, Portland, and Puget Sound, and return, are maintained by the American-Hawaiian Steamship Company, with a sailing each way about every five days; the Luckenbach Steamship Company, with a sailing each way about every 10 days; Sudden and Christenson, approximately fortnightly; the Atlantic and Pacific Steamship Company, about every three weeks; and the Boston and Pacific Line, and the Arrow Line, each sending a vessel each way about once a month.

Between the east coast of the United States and the west coast of South America, fortnightly services are maintained by the Merchants' Line and by the New York and South America Line; the West Coast Line has sailings each way about every four weeks.

Between the west coast of the United States, with connections to lower British Columbia, and Europe the following lines are in service: The Harrison-Direct Line, monthly; the Maple Leaf Line, about every six weeks; the East Asiatic Company, monthly, and the Johnson Line, every six or seven weeks.

The Pacific Steam Navigation Company is operating approximately a monthly service around South America from Liverpool, by way of the Canal.

The American-Australian Line has been sending vessels through the Canal about fortnightly from New York to ports in Australia and New Zealand.

PACIFIC COAST CONNECTIONS.

The Pacific Mail has sailings about every 10 days between Balboa and San Francisco, with calls at Puntarenas, San Juan del Sur, Corinto, Amapala, La Union, La Libertad, Acajutla, San José de Guatemala, Champerico, Ocos, Salina Cruz, Acapulco, Manzanillo, San Blas, and Mazatlan. The company also operates a direct line between Balboa and San Francisco, with sailings about every six weeks; and a Panama-Central American line, between Balboa and Ocos, making one round voyage monthly, and calling at all the ports abovenamed between Balboa and Ocos.

Grace & Company maintain a service with a vessel plying between San Francisco and Valparaiso, calling at way ports. It makes a round voyage about every 10 weeks.

The Peruvian Steamship Company maintains a weekly service between Balboa and Callao, with calls at Guayaquil, Payta, Eten, Pacasmayo, and Salaverry. Every second voyage includes Mollendo.

The South American Steamship Company's vessels sail on alternate Mondays from Balboa to Valparaiso, calling at Paíta, Eten, Pacasmayo, Salaverry, Callao, Mollendo, Arica, Iquique, Antofagasta, and Coquimbo.

The Pacific Steam Navigation Company has sailings on alternate Mondays for Peru and Chile; every 10 days for Ecuador; and on alternate Mondays for Colombian and Ecuadorian ports.

The Toyo Kisen Kaisha operates a bimonthly service between Hongkong and Coronel, Chile, calling at the

(Continued from page 261.)

principal ports on the west coast between Los Angeles and Coronel.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro, and an additional weekly sailing to Bocas del Toro.

The Royal Mail Steam Packet Company maintains a fortnightly service between Colon and the United Kingdom, making the following way ports: Cartagena, Puerto Colombia, Trinidad, and Barbados. These Royal Mail vessels arrive in Colon on Saturdays and sail on Tuesdays.

The Compagnie Generale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Carupano, Trinidad, Martinique, Guadeloupe, and Santander; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Carupano, Trinidad, and Martinique.

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, be-

tween Colon and Genoa, calling at Puerto Colombia, Curacao, Puerto Cabello, and Barcelona

The Compania Trasatlantica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curacao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls enroute, the vessels sail from Genoa on the 8th day of each month

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing every Saturday, direct from Cristobal; and every Thursday, direct from New York; between Colon and New York by the United Fruit Company, sailing via Kingston weekly and via Havana weekly; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

NEW YORK TO CRISTOBAL-COLON.		Sails.		Arrives.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. To others, the subscription rate will be \$1, United States currency, per annum, in the United States and its possessions; Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone,

Isthmus of Panama.

NOTES OF PROGRESS.

Traffic Suspended on Account of Slide.

A movement of the slide on the east bank of Culebra directly north of Gold Hill on Thursday, March 4, made it necessary to close the channel to traffic, in order to allow the dredging equipment full access to the obstruction. Vessels seeking passage through the Canal have been taken as far as Pedro Miguel Lock on the south side of the slide, and as far as Gatun Locks, Gamboa, or the mooring station opposite Empire, on the north side. The dredging fleet is concentrating its efforts on the obstruction, and has succeeded in clearing the way for most of the vessels by Wednesday afternoon, March 10.

Sailing Vessel Towed from San Francisco.

The first sailing vessel to come to the Canal from the Pacific Ocean is the *Springbank*, a Norwegian four-masted steel schooner, which arrived in the outer bay at Balboa on March 4, in tow of the American steamship *General Hubbard*. This is also the first vessel to come in under tow from the Pacific; the old prison ship *Success* arrived from Philadelphia on December 31 in tow of the steamship *Cricket*, bound for San Francisco.

The *General Hubbard* and the *Springbank* left San Francisco on February 6 and two days out they ran into a hurricane, with heavy seas and wind from the northeastward blowing about 100 miles an hour, according to the report of the master of the *General Hubbard*. This passed within 48 hours and the remainder of the voyage was made without incident. The *Springbank* was towed with a steel cable 140 fathoms long.

The *General Hubbard* called at the port of Los Angeles, leaving the *Springbank* outside. Upon resuming the tow, they made the voyage from Los Angeles to Balboa in 19 days and 19 hours, which is at the rate of about 150 miles per day. Without a tow, the *General Hubbard* could have made this part of the voyage in between 13½ and 14 days.

After entering the Caribbean Sea, the *Springbank* will proceed under sail to Denmark with a cargo of barley. The *General Hubbard* is bound for New Orleans, with a cargo of 2,200 tons of general produce.

The *Springbank* is 282 feet long, 43 feet in the beam, and has a draft of 22½ feet; her gross Canal tonnage is 2,463, and the net Canal tonnage, 2,252. The *General Hubbard*, chartered by Sudden and Christenson of San Francisco, is 258 feet long, 42 feet in the beam, and has a draft of 15½ feet. The gross and net Canal tonnage are 2,176 and 1,405 tons, respectively.

Another Pleasure Yacht through the Canal.

The sixth American cruising yacht to travel the Canal route is the steam yacht *Noma*, which arrived at Cristobal on Friday March 5, on her way from Jacksonville, by way of Kingston, to San Diego, by way of Acapulco. The *Noma* belongs to Vincent Astor of New York City, and is 262 feet long by 28 feet in the beam, and has a gross Canal tonnage of 811 and net tonnage of 425; she is carrying seven through passengers and a crew of 44.

Changes in United Fruit Company's Schedule.

Effective March 1, a change was effected in the New Orleans schedule of the United Fruit Company steamers, by which the steamers *Abangarez*, *Atenas*, and *Turrialba* are to be placed in the New Orleans-Havana-Colon-Bocas del Toro run, and the steamships *Cartago*, *Heredia*, and *Parismina* on the direct Colon-Limon-Bocas del Toro run.

The dates and hours of departures and arrivals of the vessels at the respective ports will be the same as the old schedule, the only change being in the ships.

Three Great Types of Vessels Together in Canal.

Among the vessels tied up at the upper approach wall of Pedro Miguel Lock, on Saturday, March 6, awaiting passage past the slide north of Gold Hill, the four-masted schooner *Springbank*, the steamship *General Hubbard*, and the Diesel engine ship *Fionia* were moored near together. Each of these may be said to represent an epoch in navigation. The use of sails for propelling vessels was developed at least as many years before the beginning of the Christian era as the adaptation of steam was after that event. The latter may be said to date its commercial practicability from the beginning of the nineteenth century, which is just about 100 years before the development of the Diesel engine.

The steamship *Panama* of the Panama Railroad Steamship Line started through the Canal from the Atlantic entrance on Sunday, March 7, but on account of the slide in Culebra Cut was turned back to Cristobal after reaching Gamboa. The *Panama* will sail from Cristobal on her regular trip to New York on Saturday, March 13.

The mineplanter *General J. M. Schofield*, Lieut. Geo. M. Peek, Coast Artillery Corps, commanding, sailed from Cristobal for Cuba Wednesday, March 10, after lying a week in Gatun Lake for the effect on barnacles.

NOTICE TO STEAMSHIP LINES.

Governor Points Out Satisfactory System of Handling Ships' Business.

1. In order to avoid needless delays to vessels transiting the Canal or using its terminal ports, to hasten the delivery to ships of coal and other supplies, to effect a more speedy adjustment of all accounts, to enable shipping interests to avoid the payment of agents' fees and commissions for which an adequate return is seldom received; in short, to facilitate all business transacted between The Canal and its users, the following information is published:

2. Commercial vessels which enter Canal waters may be divided into three general classes: (a) Those which come for the sole purpose of passing through the Canal and which do not take on or discharge freight or passengers, but may take on coal or supplies; (b) those which pass through the Canal and also use a terminal port to take on or discharge freight or passengers; and (c) those which do not pass through the Canal, but take on or discharge freight or passengers in a terminal port. A vessel falling under either class "b" or class "c" requires an agent on the Isthmus to handle its business, but one falling under class "a" does not.

3. Immediately upon arrival at a terminal port, a vessel is boarded by a pilot and by quarantine and boarding officers. Mail and cablegrams are then delivered, orders for coal and supplies taken and arrangements made for their delivery, and any other business which it is desired be transacted in connection with the ship's transit through the Canal is attended to. If advance information has been received, coal or whatever supplies may be needed are in readiness when the ship arrives, they can be taken on board and, in event tolls and other charges have been covered by an advance deposit and a tonnage certificate has been obtained, the vessel may proceed at once through the Canal, without the master leaving his ship or signing a paper. If, however, an agent must be consulted, either for the payment of tolls or the transaction of other ship's business, the vessel will probably be required to anchor until arrangements and settlements can be effected. Doing business through an agent on the Isthmus never facilitates a vessel's passage through the Canal.

4. Isthmian agents for steamships are dependent upon The Canal for all information concerning the arrival of, departure from, and movements of vessels in Canal waters; for practically all equipment such as tugs, lighters, etc., for the transportation and delivery of coal and supplies; and, while provisions and supplies can be purchased from local dealers, when furnished to shipping through local agents they are in a large majority of cases actually bought from and delivered by the Panama railroad. The Panama railroad is practically the only concern on the Isthmus

which handles coal in any quantity; it also has a large refrigerating plant, a laundry, and a commissary department which does a very extensive general merchandising business with shipping, and, being closely identified with The Panama Canal, is in a position to render service to shipping with the least possible delay. Being under Government control, it is the policy of both The Panama Canal and the Panama railroad to keep at a minimum all charges against vessels and to sell coal and supplies at only a slight advance over purchase prices plus the cost of transportation and handling.

5. The interests of The Panama Canal and Panama Railroad Company are closely interwoven; the business of both is under one head; both employ the same Auditor and the same Collector, and the duties of many other officials on the Isthmus pertain to both. All payments to The Canal must be made by advance deposit or in cash, but a single deposit may be utilized to cover both Canal and railroad charges; adjustments are effected on the Isthmus and settlements made and bills rendered accordingly.

6. The most satisfactory way of prepaying tolls and other charges is by deposit with an Assistant Treasurer of the United States in New York, San Francisco, or other American seaport, who should be requested to immediately cable the Isthmus, giving the amount of the deposit, the ship for which it is made, and the name of the depositor. The cost of this cable service is \$5 and the amount is charged against the deposit. It is recommended that the deposit be slightly more than sufficient to cover tolls and other charges, so that in case the latter exceed the amount anticipated the vessel need not be delayed. It is also well to make the deposit several days in advance of the vessel's expected arrival in Canal waters, in order that she may not be held pending receipt of notice of deposit. In every case, as soon as the ship has passed through the Canal the total amount chargeable against the vessel is deducted from the amount of the deposit and any unexpended balance is remitted to the depositor, together with a statement of the account; a copy of this account is also furnished to the vessel before she leaves Canal waters. A shipping firm having offices in a port where there is an Assistant Treasurer can make its deposits direct, while those whose offices are elsewhere, or in foreign countries, can remit through their bankers or through other shipping agencies.

7. In connection with the close relationship existing on the Isthmus between The Panama Canal and the Panama Railroad Company in consequence of which the latter furnishes coal, provisions, supplies, etc., to shipping, it also operates the transthmanian railroad and a steamship line to and from New York, with its head office at 24 State Street, New York City, to which correspondence in relation to its affairs should be addressed. It acts as agent for vessels under classes "b" and "c", for the transaction of all business, for which a regular fee is charged; it also makes advances, through its New York office, to cover tolls and other charges against vessels under classes "a" and "b," for which it charges a commission but no fee. With this end in view, it at all times maintains on the Isthmus, in the hands of the Collector of The Panama Canal, ample funds to liquidate such charges. A foreign shipping firm can make deposit through the Panama Railroad Com-

pany in New York, or transact other business, in the same manner as it would through any other shipping firm, and this is very satisfactory to The Panama Canal officials.

8. Some shipowners have placed the payment of tolls and other charges in the hands of bankers on the Isthmus. This has in some cases caused delays which could have been avoided had the payments been made as recommended and been in the hands of the Collector of The Panama Canal who, from the very nature of his duties, is always in close touch with the movements of vessels. If advance deposits are made direct with an Assistant Treasurer of the United States, either directly or through the Panama Railroad Company in New York, the settlement of all bills will be directly in the hands of the Collector at the Canal, to whom it must eventually come if handled through a banking house or other agent on the Isthmus. It can be readily seen that where all advance information and all business connected with a vessel transiting the Canal are in the hands of one organization, all matters affecting the ship can be handled far more efficiently, simply, and quickly than where outside interests must be consulted.

9. Every effort has been made to simplify and systemize the methods of transacting all business in relation to shipping that uses the Canal, and it has been demonstrated by actual operating experience that it can be more efficiently and expeditiously handled by the Canal officials themselves than through local agents or banking firms, to say nothing of the saving to shipping of fees and commissions charged by outside parties, since The Canal charges neither the one nor the other on any business transacted directly with it.

10. After making deposit or arranging for the payment of a vessel's tolls and other charges, all communications bearing on her transit through the Canal, other movements, the purchase of coal and supplies, or any other matter affecting her while in Canal waters, should be addressed to the Marine Superintendent, The Panama Canal, Balboa Heights, Canal Zone. The cable address of The Panama Canal has been changed from "Isthmian, Balboa Heights" to "PANCANAL, PANAMA," though either will reach the Canal authorities.

GEO. W. GOETHALS, *Governor.*

BALBOA HEIGHTS, C. Z., February 19, 1915.

Quarantine Work in February.

The net emigration from the Isthmus to foreign ports during the month of February, 1915, was 1,561, as compared with 804 in

January and 1,328 in December. This brings the total exodus since July 1, 1913, to 24,097.

In this connection, it may be noted that the force engaged in work on the Canal and railroad on July 30, 1913, was 42,484; this force had diminished to 24,853 on January 20, 1915, a net decrease of 17,631. This is 6,466 less than the total net emigration from the Isthmus during the period.

Further details of the movements of persons through the ports are given in the following consolidated report of quarantine transactions at the ports of Balboa-Panama and Cristobal-Colon for the month of February:

Number of vessels inspected and passed . . .	141
Number of vessels held in quarantine . . .	8
Total	149
Number of vessels fumigated on arrival . .	7
Number of vessels fumigated on departure	2
Total	9
Number of crew examined	9,332
Number of passengers examined (including 468 U. S. troops)	4,300
Total	13,632
Number of persons vaccinated at ports of arrival because of compulsory vaccination law	440
Number of persons vaccinated at ports of departure or en route because of compulsory vaccination law	1,073
Total	1,513
Number of persons held in quarantine at the detention houses to complete period of incubation of yellow fever and plague	216
Number of persons held in quarantine on board vessels to complete period of incubation of yellow fever and plague	951
Total	1,167
Number of persons landed from foreign ports:	
Cabin	1,794
Steerage	617
Total	2,411
Number of persons embarked for foreign ports:	
Cabin	2,856
Steerage	1,116
Total	3,972
Number of persons arriving from coast towns on small launches and sailing craft	2,267
Number of persons sailing for coast towns on small launches and sailing craft	1,036
Apparent increase for month from coast towns	1,231
Apparent decrease for month from foreign ports:	
Cabin	1,062
Steerage	499
Total	1,561
Number of immigrants recommended for deportation	9
Number of bills of health issued or vised . .	101
Total number of persons landed	4,678
Less number for Pacific ports	178
Total number of persons sailing	5,008
Total apparent decrease for month	508

Obituary.

Harry W. Nollman of New York City, employed in the Record Bureau, was drowned in the Chagres River above Alhajuella on March 2.

The estates of the abovenamed deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against their estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

THE EAST ASIATIC LINE.

Movements of Vessels of Important Danish Company through Canal.

The motorship *Fionia* of the East Asiatic Company (Aktieselskab Det Ostasiatike Kompagni of Copenhagen), held at Pedro Miguel Lock on account of the slide in Culebra Cut last week, was making the thirteenth transit of vessels of this line through the Canal. With this trip, the *Fionia*, the *Transvaal*, and the *Jutlandia* will have been through the Canal twice; other vessels of the line using the Canal have been, in the order of their coming, the *Malakka*, *Natal*, *Cathay*, *Rhodesia*, *Pangan*, *Siam*, and *Tongking*. This is 10 vessels of the company's fleet of 24.

The *Fionia* and the *Jutlandia* in returning through the Canal were completing trips between Copenhagen and the west coast of the United States, as they had previously come out from Denmark with cargoes of general merchandise for the west coast. The *Transvaal* passed through the Canal both times from the Pacific to the Atlantic. Its first trip was on August 31, enroute from San Francisco to Europe with 7,082 tons of barley; after this was discharged the *Transvaal* loaded with general cargo for the Atlantic coast of lower South America, delivered it, and proceeded through the Strait of Magellan to the west coast. There it loaded with nitrates and general produce, aggregating 6,700 tons, with which it passed through the Canal on February 28, enroute for Copenhagen via St. Thomas, Danish West Indies.

Of the 13 transits, six have been from the Atlantic to the Pacific and seven eastbound. The westbound vessels carried principally manufactured goods, salt, perfumes, liquors, etc.; the aggregate cargo was 17,988 tons. This was carried in vessels having an aggregate net Canal tonnage of 24,642; the toll charge of \$1.20 per net ton was, accordingly, equivalent to approximately \$1.64 per ton of cargo carried.

The seven westbound vessels, aggregating 27,169 net Canal tons, carried 45,760 tons of cargo. The toll charges were, accordingly, equivalent to slightly over 71 cents per ton of cargo carried. The cargo was principally grains, dried and canned fruits, canned fish, and other foodstuffs. One of the eastbound vessels, the *Tongking*, carried 7,250 tons of sesame seed from Shanghai to Aarhus; this vessel had come by way of San Francisco to take on a supply of oil for its Diesel engines. The *Malakka*, which went through from the Atlantic to the Pacific, to return with foodstuffs from the west coast of North America, was wrecked on the return voyage off the coast of Mexico, while laden with wheat.

Ten of the company's 24 vessels are propelled by internal combustion engines. In this group are included the newer vessels and the *Pangan*, converted after use as a steamship to a motorship.

Report of Grounding of the "Blanche D. Pendleton."

Following its investigation of the grounding of the schooner *Blanche D. Pendleton* near Coco Solo Point during the "norther" on February 9, the Board of Local Inspectors has reported as its opinion that the responsibility rests with the master of the schooner.

From the testimony adduced it would seem that when a tug was sent to his assistance sometime during the forenoon, there was a hull, in which the wind and sea showed signs of

moderating, and a tow was refused. At the same time he requested additional ground tackle from shore, but before it could be received, the wind freshened, and the sea increased to such an extent that he signaled for a tug with a view of finding a more sheltered berth. Owing to the heavy sea, the constricted space in which he was moored, and the fact that the water was full of timber piling and timbers from the demolished breakwater, the line to the tug parted and the schooner drifted ashore. She is lying in an easy position awaiting instructions from her owners as to floating her and salvaging the cargo.

Payment of Rent and Charges for Electricity.

Rental and electric light charges are payable at the Collector's office in the Administration Building, Balboa Heights, or the deputy collector's office in the old Panama railroad office building at Colon.

Collectors will not call at houses to collect these charges. If payment is made by mail it is preferred that postal money orders be used.

Employees have been notified by the district quartermasters of the amount payable for rent. They can also obtain the same information from the table published as a supplement to THE CANAL RECORD of February 24, 1915.

The collector and his deputies have been furnished lists showing the amounts due from employes for electric current, except in cases where the charge is based upon meter readings, in which cases, only, bills will be rendered.

Suggestions for Library.

Since the establishment of the Canal library in the Administration Building many new and useful catalogues and publications have been obtained. In order that the collection may be more complete, however, officials and employes are invited to suggest catalogues or publications of interest to the work which should be procured.

To Supervise Tests at Darien Radio Station.

Dr. L. W. Austin, head of the Naval radio experimental laboratory at the Bureau of Standards in Washington, D. C., arrived on the Isthmus on Thursday, March 4, on duty with the Navy Department in connection with the receiving and sending tests to be conducted at the new Darien high power radio station. He will be stationed on the Isthmus for about two months. Dr. Austin, who is the president of the American Society of Radio Engineers, has recently aided in the development of a system of receiving circuits which has placed the United States practice considerably in advance of other countries in this part of wireless telegraphy.

Timber Wharf Burned.

The greater part of the superstructure of the mining wharf at Naos Island was destroyed by fire during the late afternoon of Monday, March 9. At the same time the fire consumed about 30,000 feet of lumber on the wharf. The creosoted piles of the structure were considerably damaged but most of them are still serviceable. The wharf was 240 feet long by 40 feet wide and its floor stood at 18 feet above mean sealevel.

Rates at Hotel Aspinwall.

The following are the present rates at the Hotel Aspinwall, on Taboga Island (American plan): Employes, dinner, lodging, and breakfast, \$1.50; per day, employes \$2.00; nonemployes, \$2.50; servants, and children under 12 years of age, \$1.00; employes staying two weeks or longer, \$1.75. The launch service is as follows:

Week days.—Leave Balboa dredge landing at 5.30 p. m., and Taboga at 6 a. m. *Sundays and holidays.*—Leave Taboga at 6 a. m., Balboa dredge landing at 9.40 a. m. and 5.30 p. m.; leave Taboga at 7.15 p. m. *Fares.*—Employes, 25 cents gold each way; nonemployes, 50 cents gold each way. children under 12 years, 15 cents gold each way.

WEATHER CONDITIONS, CANAL ZONE, FEBRUARY, 1915.

Rainfall for the month of February was above normal everywhere except at Miraflores. On the Pacific coast the rainfall for the month was triple the average amount, and on the Atlantic coast the rainfall was seven times greater than the average amount. Monthly totals ranged from 14.32 inches at Brazos Brook to 1.17 inches at Miraflores. The maximum precipitation recorded in any one day was 7.12 inches at Colon on the 10th.

The mean temperature at both coast stations was above normal, the daily excess being approximately 1° F. on the Pacific coast and 2° F. on the Atlantic coast. The relative humidity was above normal at both coasts; while the atmospheric pressure was slightly below the average. The daytime cloudiness was above the average at both coast stations.

The wind movement was slightly below the normal at the Pacific coast and slightly above at the Atlantic coast.

No fogs were observed during the month at either coast station. The average number of nights with fogs at interior stations was four. All fogs were dissipated by 9.30 a. m.

Elevations of Gatun lake (feet above mean sealevel): Mean for month, 86.98; maximum, 87.20 on the 10th; minimum, 86.88 on the 11th and 27th; evaporation from lake surface, 5.43 inches.

Following is a summary of conditions at the Atlantic station of Colon and the Pacific station at Balboa Heights:

STATIONS.	Pressure (reduced to mean of 24 hourly.)	Temperature.					Mean relative humidity.	Precipitation.			Wind.			Date.	
		Mean.	Maximum.	Date.	Minimum.	Date.		Total inches.	Station average.	Days of .01 inch or more.	Total movement (miles.)	Prevailing direction.	Max velocity in (miles)		Direction.

OFFICIAL CIRCULARS.

Regarding the Reporting of Contagious and Infectious Diseases.
Ordinance No. 1.THE PANAMA CANAL,
BOARD OF HEALTH OF THE CANAL ZONE.

(Supplementing Section 10 of Act 9 of September 2, 1904, as amended by Executive Order of October 14, 1911.)

Be it ordained by the Board of Health of the Canal Zone:

Section 1. Each and every physician who treats or examines any person suffering from or afflicted with, or suspected to be suffering from or afflicted with, any one of the notifiable diseases, shall immediately report such case of notifiable disease in writing to the local health officer. Said reports shall be forwarded either by mail or by special messenger and shall give the following information:

1. The date when the report is made.
2. The name of the disease or suspected disease.
3. The name, age, sex, color, occupation, address, and school attended or place of employment of patient.
4. Number of adults and of children in the household.
5. Source or probable source of infection or the origin or probable origin of the disease.
6. Name and address of the reporting physician.

Provided: That if the disease is, or is suspected to be, smallpox, the report shall, in addition, show whether the disease is of the mild or virulent type and whether the patient has ever been successfully vaccinated, and, if the patient has been successfully vaccinated, the number of times and dates or approximate dates of such vaccination; and if the disease is, or is suspected to be, cholera, diphtheria, plague, scarlet fever, smallpox, or yellow fever, the physician shall, in addition to the written report, give immediate notice of the case to the local health officer in the most expeditious manner available; and if the disease is, or is suspected to be, typhoid fever, scarlet fever, or diphtheria, the report shall also show whether the patient has been, or any member of the household in which the patient resides is, engaged or employed in the handling of milk for sale or preliminary to sale.

Sec. 2. The requirements of the preceding paragraph shall be applicable to physicians attending patients ill with any of the notifiable diseases in hospitals, asylums, or other institutions, public or private: *Provided,* That the superintendent or other person in charge of any such hospital, asylum, or other institution in which the sick are cared for may report in the place of the attending physician or physicians the cases of notifiable diseases and disabilities occurring in or admitted to said hospital, asylum, or other institution in the same manner as that prescribed for physicians.

Sec. 3. Whenever the eyes of an infant under two weeks of age become reddened, inflamed, or swollen, or contain an unnatural discharge, and no physician is in attendance, an immediate report of the existence of the case shall be made to the local health officer by the midwife, nurse, attendant, or other person in charge of the patient.

Sec. 4. Teachers or other persons employed in, or in charge of, public or private schools, including Sunday schools, shall report immediately to the local health officer each and every known or suspected case of a notifiable disease in persons attending or employed in their respective schools.

Sec. 5. The written reports of cases of the notifiable diseases required by this ordinance of physicians shall be made upon blanks supplied for the purpose, through the local health officer, by the Health Department.

Sec. 6. Local health officers shall, within seven days after the receipt by them of reports of cases of notifiable disease, forward by mail to the Chief Health Officer the original written reports made by physicians, after first having transcribed the information given in the respective reports in a book or other form of record for the permanent files of the local health office. On each report thus forwarded the local health officer shall state whether the case to which the report pertains was visited or otherwise investigated by a representative of the local health office and whether measures were taken to prevent the spread of the diseases or the occurrence of additional cases.

Sec. 7. For the purposes of this ordinance district physicians are to be considered local health officers.

The foregoing ordinance was duly adopted at a meeting of the Board of Health of the Canal Zone held at Balboa Heights, Canal Zone, on the 21st day of December, 1914.

P. M. ASHBURN,
Secretary of the Board of Health.

Approved on the 27th day of February, 1915:

GEO. W. GOETHALS,
Governor, The Panama Canal.Relating to the Registration of Births and Deaths.
Ordinance No. 2.THE PANAMA CANAL,
BOARD OF HEALTH OF THE CANAL ZONE.*Be it ordained by the Board of Health of the Canal Zone:*

Section 1. The body of any person whose death occurs in the Canal Zone, or which shall be found dead therein, shall not be interred, deposited in a vault or tomb, cremated, or otherwise disposed of, or be temporarily held pending further disposition more than 24 hours after death, unless a permit for burial, removal, or other disposition thereof shall have been properly issued by the local health officer. And no such burial or removal permit shall be issued by any health officer until, wherever practicable, a complete and satisfactory certificate of death has been filed with him as hereinafter provided; *Provided,* That when a dead body is transported from outside the Canal Zone into the Canal Zone for burial, and the admission of the body into the Canal Zone is otherwise permissible, the transit or removal permit, issued in accordance with the law and health regulations of the place where the death occurred, shall be accepted by the local health officer of the district into which the body has been transported for burial or other disposition, as a basis upon which he may issue a local burial permit; he shall note upon the face of the burial permit the fact that it was a body shipped in for interment, and give the actual place of death.

Sec. 2. A stillborn child shall be registered as a birth and also as a death, and separate certificates of both the birth and the death shall be filed with the local health officer, in the usual form and manner, the certificate of birth to contain in place of the name of the child the word "stillbirth;" *Provided,* That a certificate of birth and a certificate of death shall not be required for a child that has not advanced to the fifth month of uterogestation. The medical certificate of the cause of death shall be signed by the attending physician, if any, and shall state the cause of death as "stillborn," with the cause of the stillbirth, if known, whether a premature birth, and if born prematurely, the period of uterogestation, in months, if known; and a burial or removal permit of the prescribed form shall be required. Midwives shall not sign certificates of death for stillborn children; but such cases, and stillbirths occurring without attendance of either physician or midwife, shall be treated as deaths without medical attendance, as provided for in Section 4 of this ordinance.

Sec. 3. The certificate of death shall contain the following items, which are hereby declared necessary for the legal, social, and sanitary purposes subserved by registration records:

- (1) Place of death, including country, district, city, or village. If in a city, the street and house number; if in a hospital or other institution, the name of the same to be given instead of the street and house number.
- (2) Full name of decedent. If an unnamed child, the surname preceded by "Unnamed."
- (3) Sex.
- (4) Color or race, as white, black, mestizo (or other negro descent), Indian, Chinese, Japanese, or other.
- (5) Conjugal condition, as single, married, widowed, or divorced.
- (6) Date of birth, including the year, month, and day.
- (7) Age in years, months, and days. If less than one day, the hours or minutes.
- (8) Occupation. The occupation to be reported of any person, male or female, who had any remunerative employment, with the statement of (a) trade, profession, or particular kind of work; (b) general nature of industry, business, or establishment in which employed (or employer).
- (9) Birthplace; at least United States, Canal Zone, Panama, or foreign country, if known.
- (10) Name of father.
- (11) Birthplace of father; at least United States, Canal Zone, Panama, or foreign country, if known.
- (12) Maiden name of mother.
- (13) Birthplace of mother; at least United States, Canal Zone, Panama, or foreign country, if known.
- (14) Signature and address of informant.
- (15) Official signature of health officer, with the date when certificate was filed, and registered number.
- (16) Date of death, year, month, and day.
- (17) Certification as to medical attendance on decedent, fact and time of death, time last seen alive, and the cause of death, with contributory (secondary) cause of complication, if any, and duration of each, and whether attributed to dangerous or insanitary conditions of employment; signature and address of physician or official making the medical certificate.
- (18) Length of residence (for inmates of hospitals and other institutions; transients, or recent residents) at place of death and in the city, together with the place where disease was contracted, if not at place of death, and former or usual residence.
- (19) Place of burial or removal; date of burial.

(20) Signature and address of undertaker or person acting as such.

The personal and statistical particulars (items 1 to 13) shall be authenticated by the signature of the informant, who may be any competent person acquainted with the facts.

The statement of facts relating to the disposition of the body shall be signed by the undertaker or person acting as such.

The medical certificate shall be made and signed by the physician, if any, last in attendance on the deceased, who shall specify the time in attendance, the time he last saw the deceased alive, and the hour of the day at which death occurred. And he shall further state the cause of death, so as to show the course of disease or sequence of causes resulting in the death, giving first the name of the disease causing death (primary cause), and the contributory (secondary) cause, if any, and the duration of each. Indefinite and unsatisfactory terms, denoting only symptoms of disease or conditions resulting from disease, will not be held sufficient for the issuance of a burial or removal permit; and any certificate containing only such terms as defined by the health officer shall be returned to the physician or person making the medical certificate for correction and more definite statement. Causes of death which may be the result of either disease or violence shall be carefully defined; and if from violence, the means of injury shall be stated and whether (probably) accidental, suicidal, or homicidal. And for deaths in hospitals, institutions, or of nonresidents the physician shall supply the information required under this head (item 18), if he is able to do so, and may state where, in his opinion, the disease was contracted.

Sec. 4. In case of any death occurring without medical attendance it shall be the duty of the undertaker to notify the local health officer of such death, and refer the case to him for immediate investigation and certification; *Provided,* That if the health officer has reason to believe that the death may have been due to unlawful act or neglect he shall then refer the case to the official authorized to investigate crimes for his investigation and certification, and such official shall make the certificate of death required for a burial permit, and shall state in the certificate the name of the disease causing death, or if from external causes, (1) the means of death and (2) whether (probably) accidental, suicidal, or homicidal, and shall in any case furnish such information as may be required by the health officer in order to properly classify the death.

Sec. 5. The undertaker or person acting as undertaker shall file the certificate of death with the local health officer of the place in which the death occurred and obtain a burial or removal permit prior to any disposition of the body. He shall obtain the required personal and statistical particulars from the person best qualified to supply them, over the signature and address of his informant. He shall then present the certificate to the attending physician, if any, or to the official authorized to investigate crimes, as directed by the local health officer, for the medical certificate of the cause of death and other particulars necessary to complete the record, as specified in Sections 3 and 4, and he shall then state the facts required relative to the date and place of burial or removal, over his signature and with his address, and present the completed certificate to the local health officer in order to obtain a permit for burial, removal, or other disposition of the body. The undertaker shall deliver the burial permit to the person in charge of the place of burial before interring or otherwise disposing of the body, or shall attach the removal permit to the box containing the corpse, when shipped by any transportation company, said permit to accompany the corpse to its destination, where it shall be delivered to the person in charge of the place of burial.

Sec. 6. Every person, firm, or corporation selling a casket shall keep a record showing the name of the purchaser, purchaser's post-office address, name of deceased, date of death, and place of death of deceased, which record shall be open to inspection of the health officer at all times. On the first day of each month the person, firm, or corporation selling caskets shall report to the health officer each sale for the preceding month, on a blank provided for that purpose: *Provided, however,* That no person, firm, or corporation selling caskets to dealers or undertakers only shall be required to keep such record, nor shall such report be required from undertakers when they have direct charge of the disposition of a dead body.

Sec. 7. If the interment or other disposition of the body is to be made within the Canal Zone, the wording of the burial or removal permit may be limited to a statement by the health officer, and over his signature, that a satisfactory certificate of death having been filed with him, as required by Health Department regulations, permission is granted to inter, remove, or dispose otherwise of the body, stating the name, age, sex, cause of death, and other necessary details upon the form prescribed by the Chief Health Officer.

Sec. 8. No person in charge of any premises on which interments are made shall inter or permit the interment or other disposition of any body unless it is accompanied by a burial, removal, or transit permit, as herein provided. And such person shall endorse upon the permit the date of interment, over his signature, and shall return all permits so endorsed to the local health officer of his district within five days from the date of interment, or within the time fixed by the local health officer. He shall keep a record of all bodies interred or otherwise disposed of on the premises under his charge, in each case stating the name of each deceased person, place of death, date of burial or disposal, and name and address of the undertaker; which record shall at all times be open to official inspection: *Provided*, That the undertaker, or person acting as such, when burying a body in a cemetery or burial ground having no person in charge, shall sign the burial or removal permit, giving the date of burial, and shall write across the face of the permit the words "No person in charge," and file the burial or removal permit within five days with the local health officer.

Sec. 9. The birth of each and every child born in the Canal Zone shall be registered as hereinafter provided.

Sec. 9a. Within five days after the date of each birth there shall be filed with the local health officer of the district in which the birth occurred a certificate of such birth, which certificate shall be upon the form adopted by the Chief Health Officer.

In each case where a physician, midwife, or person acting as midwife was in attendance upon the birth it shall be the duty of such physician, midwife, or person acting as midwife to file in accordance herewith the certificate herein contemplated.

In each case where there was no physician, midwife, or person acting as midwife in attendance upon the birth, it shall be duty of the father or mother of the child, the householder or owner of the premises where the birth occurred, or the manager or superintendent of the institution where the birth occurred, each in the order named, within five days after the date of such birth, to report to the local health officer the fact of such birth. In such case and in case the physician, midwife, or person acting as midwife, in attendance upon the birth is unable, by diligent inquiry, to obtain any item or items of information contemplated in Section 10 of this ordinance, it shall then be the duty of the local health officer to secure from the person so reporting, or from any other person having the required knowledge, such information as will enable him to prepare the certificate of birth herein contemplated, and it shall be the duty of the person reporting the birth, or who may be interrogated in relation thereto, to answer correctly and to the best of his knowledge all questions put to him by the local health officer which may be calculated to elicit any information needed to make a complete record of the birth as contemplated by said Section 10, and it shall be the duty of the informant as to any statement made in accordance herewith to verify such statement by his signature, when requested so to do by the local health officers.

Sec. 10. The certificate of birth shall contain the following items, which are hereby declared necessary for the legal, social, and sanitary purposes subserved by registration records:

- (1) Place of birth, including country, province, municipal district, city, or village. If in a city, barrio, street, and house number; if in a hospital or other institution, the name of the same to be given, instead of the street and house number.
- (2) Full name of child. If the child dies without a name, before the certificate is filed, enter the words "Died unnamed." If the living child has not yet been named at the date of filing certificate of birth, the space for "Full name of child" is to be left blank, to be filled out subsequently by a supplemental report, as hereinafter provided.
- (3) Sex of child.
- (4) Whether a twin, triplet, or other plural birth. A separate certificate shall be required for each child in case of plural births.
- (5) For plural births, number of each child in order of birth.
- (6) Whether legitimate or illegitimate. (This question may be omitted if desired, or provision may be made so that the identity of parents will not be disclosed.)
- (7) Date of birth, including year, month, and day.
- (8) Full name of father.
- (9) Residence of father.
- (10) Color or race of father.
- (11) Age of father at last birthday, in years.
- (12) Birthplace of father; at least United States, Canal Zone, Panama, or foreign country, if known.
- (13) Occupation of father. The occupation to be reported if engaged in any remunerative employment, with the statement of (a) trade, profession, or particular kind of work; (b) general nature of industry, business, or establishment in which employed (or employer).

- (14) Maiden name of mother.
- (15) Residence of mother.
- (16) Color or race of mother.
- (17) Age of mother at last birthday, in years.
- (18) Birthplace of mother; at least United States Canal Zone, Panama, or foreign country, if known.
- (19) Occupation of mother. The occupation to be reported if engaged in any remunerative employment, with the statement of (a) trade, profession, or particular kind of work; (b) general nature of industry, business, or establishment in which employed (or employer).
- (20) Number of children born to this mother, including present birth.
- (21) Number of children of this mother living.
- (22) The certification of attending physician or midwife as to attendance at birth, including statement of year, month, day (as given in item 7), and hour of birth, and whether the child was born alive or stillborn. This certification shall be signed by the attending physician, or midwife, with date of signature, and address; if there is not physician or midwife in attendance, then by the father or mother of the child, householder, owner of the premises, or manager or superintendent of the institution where the birth occurred, or other competent person whose duty it shall be to notify the local health officer of such birth, as required by Section 9 of this regulation.
- (23) Exact date of filing in office of local health officer, attested by his official signature, and registered number of birth, as hereinafter provided.

Sec. 11. When any certificate of birth of a living child is presented without the statement of the given name, then the local health officer shall make out and deliver to the parents of the child a special blank for the supplemental report of the given name of the child, which shall be filled out as directed, and returned to the local health officer as soon as the child shall have been named.

Sec. 12. Every physician, midwife, and undertaker shall, without delay, register his or her name, address, and occupation with the local health officer of the district in which he or she resides, or may hereafter establish a residence; and shall thereupon be supplied by the local health officer with a copy of this regulation.

Sec. 13. All physicians, midwives, informants, or undertakers, and all other persons having knowledge of the facts, are hereby required to supply, upon a form provided by the health officer or upon the original certificate, such information as they may possess regarding any birth or death upon demand of the health officer, in person, by mail, or through the local sanitary inspector: *Provided*, That no certificate of birth or death, after its acceptance for registration by the local health officer, and no other record made in pursuance of this act, shall be altered or changed in any respect otherwise than by amendments properly dated, signed, and witnessed.

Sec. 14. Each local health officer shall supply blank forms of certificates to such persons as require them. Each local health officer shall carefully examine each certificate of birth or death when presented for record in order to ascertain whether or not it has been made out in accordance with the provisions of these regulations and the instructions of the Chief Health Officer; and if any certificate of death is incomplete or unsatisfactory, it shall be his duty to call attention to the defects in the return, and to withhold the burial or removal permit until such defects are corrected. All certificates, either of birth or of death, shall be written legibly, in durable black ink, and no certificate shall be held to be complete and correct that does not supply all of the items of information called for therein, or satisfactorily account for their omission. If the certificate of death is properly executed and complete, he shall then issue a burial or removal permit to the undertaker; *Provided*, That in case the death occurred from some disease which is held by these regulations to be infectious, contagious, or communicable and dangerous to the public health, no permit for the removal or other disposition of the body shall be issued by the health officer, except under such conditions as may be prescribed by the Chief Health Officer. If a certificate of birth is incomplete, the local health officer shall immediately notify the informant and require him to supply the missing items of information if they can be obtained. He shall number consecutively the certificates of birth and death, in two separate series, beginning with number one for the first birth and the first death in each calendar year, and sign his name as health officer in attest of the date of filing in his office. He shall also make a complete and accurate copy of each birth and each death certificate registered by him in a record book supplied by the Chief Health Officer, to be preserved permanently in his office as the local record, in such manner as directed by the Chief Health Officer. And he shall, on the first day of each month, transmit to the Chief Health Officer all original certificates registered by him for the preceding month. And if no births or no deaths occurred in any month, he shall, on the

first day of the following month, report that fact to the Chief Health Officer, on a card provided for such purpose.

Sec. 15. The Chief Health Officer shall, upon request, supply to any applicant a certified copy of the record of any birth or death registered under provisions of this regulation.

Sec. 16. Any person, who for himself or as an officer, agent, or employe of any other person, or of any corporation or partnership (a) shall inter, cremate, or otherwise finally dispose of the dead body of a human being, or permit the same to be done, or shall remove said body from the district in which the death occurred or the body was found without the authority of a burial or removal permit issued by the health officer of the district in which the death occurred or in which the body was found; or (b) shall refuse or fail to furnish correctly any information in his possession, or shall furnish false information affecting any certificate or record required by this act; or (c) shall wilfully alter, otherwise than is provided by Section 13 of this regulation, or shall falsify any certificate of birth or death, or any record established by this regulations; or (d) being required by this regulation to fill out a certificate of birth or death and file the same with the local health officer, or deliver it, upon request, to any person charged with the duty of filing the same, shall fail, neglect, or refuse to perform such duty in the manner required by this regulation and by the instructions and direction of the Chief Health Officer, shall be deemed guilty of a misdemeanor and upon conviction thereof shall be punished by a fine not exceeding \$25, or by imprisonment in jail not exceeding 30 days, or by both such fine and imprisonment in the discretion of the court.

Sec. 17. For the purposes of this ordinance, district physicians shall be considered local health officers and district sanitary inspectors shall be considered undertakers; for deaths and births occurring in hospitals, asylums, or other institutions in which the sick and disabled are cared for, the superintendent or other person in charge shall be considered the local health officer.

The foregoing ordinance was duly adopted at a meeting of the Board of Health of the Canal Zone held at Balboa Heights, Canal Zone, on the 21st day of December, 1914.

P. M. ASHBURN,
Secretary of the Board of Health.

Approved on the 27th day of February, 1915:

GEO. W. GOETHALS,
Governor, The Panama Canal.

Relating to the Practise of Midwifery.
Ordinance No. 3.

THE PANAMA CANAL,
BOARD OF HEALTH OF THE CANAL ZONE.

Be it ordained by the Board of Health of the Canal Zone:

Section 1. No license to practice midwifery within the Canal Zone will be granted unless an application therefor, made on printed form issued by the Chief Health Officer, has been filed with the local health officer. This application must be certified to by two regularly licensed and registered physicians, and by one reputable and responsible layman (preferably a clergyman or priest).

Sec. 2. The applicant must be 21 years of age or over, and of good moral character. She must be able to read and write. She must be clean and constantly show evidences, in general appearances, of habits of cleanliness. She must have attended, under the instruction of a licensed and registered physician, at least 20 cases of labor and have had the care of at least 20 mothers and new-born infants during the lying-in period (10 days), except that midwives licensed before the adoption of this ordinance may be excused from this requirement in the discretion of the local health officer.

Sec. 3. The Board of Health may issue a license to practice midwifery, within 30 days after an application for such permit has been filed, provided the applicant is considered competent to care for women in normal labor. This license will allow the holder to act as midwife for one year from the date of issuance and must be renewed at the end of that time. The Board of Health may at any time revoke said license.

Sec. 4. No license will be granted to an applicant who has been convicted of criminal practice or of practicing medicine illegally, and any such conviction will be sufficient cause for the revocation of a license.

Sec. 5. Before a license is given to an applicant she must appear in person at the local health office and register her name and address. She will also receive and receipt for a copy of the rules and regulations governing the practice of midwifery which have been adopted by the Chief Health Officer. These rules and regulations must be explicitly followed.

Sec. 6. For the purposes of this ordinance, district physicians shall be considered local health officers.

The foregoing ordinance was duly adopted at a meeting of the Board of Health of the Canal Zone

held at Balboa Heights, Canal Zone, on the 21st day of December, 1914.

P. M. ASHBURN, Secretary of the Board of Health. Approved on the 27th day of February, 1915: GEO. W. GOETHALS, Governor, The Panama Canal.

Relating to the Maintenance of Premises, Buildings, Stables, Etc. Ordinance No. 4.

THE PANAMA CANAL, BOARD OF HEALTH OF THE CANAL ZONE. Be it ordained by the Board of Health of the Canal Zone:

Section 1. All premises, improved and unimproved, and all open lots and areas, shall be kept clean and free from all rubbish and similar loose material that might serve as a harborage for rats, and all lumber, boxes, barrels, loose iron, and similar material that may be permitted to remain on such premises, and that may be used as a harborage by rats, shall be placed on supports and elevated not less than two feet from the ground, with a clear intervening space beneath to prevent the harboring of rats.

Sec. 2. All manure from stables shall be removed therefrom at least once in 24 hours and disposed of as the Chief Health Officer may direct. All manure so removed shall be placed in wagons so protected as to render said manure inaccessible to flies, as far as practicable.

Sec. 3. All grain, malt, and other animal food, except hay, stored or kept in any stable must be kept in permanently constructed feed bins of concrete, metal, or wood lined with metal so as to be rat proof. Said feed bins must be kept closed at all times except when momentarily opened to take food therefrom, or when same are being filled. No feed shall be scattered about such bin or stable and all such feed found on the floor or in the stalls of said stables shall be removed daily. No foodstuffs intended for or susceptible of human consumption shall be kept or stored in any stable or any other place where animals are kept.

Sec. 4. Cow stables shall be used for no other purpose than for keeping of cows. All manure shall be removed twice daily, and no manure shall be moved during the milking or within one hour prior thereto.

The foregoing ordinance was duly adopted at a meeting of the Board of Health of the Canal Zone held at Balboa Heights, Canal Zone, on the 28th day of December, 1914.

P. M. ASHBURN, Secretary of the Board of Health. Approved on the 27th day of February, 1915: GEO. W. GOETHALS, Governor, The Panama Canal.

Rent for Special Quarters.

THE PANAMA CANAL, EXECUTIVE OFFICE, BALBOA HEIGHTS, C. Z., February 26, 1915.

CIRCULAR NO. 627-4: 1. Paragraph 5 of the Executive Order of January 19, 1915, states:

"Where employes for the good of the service are required to live in certain designated quarters, one-half of the rental will be remitted."

2. This paragraph does not apply to employes for whom special quarters have been constructed so that they may be convenient to their work; but applies only to employes who are required to live in designated quarters so that they will be within reach in sudden emergencies of fire, riot, disorder, or other public calamity.

GEO. W. GOETHALS, Governor.

Accountable Official.

THE PANAMA CANAL, OFFICE OF THE AUDITOR, BALBOA HEIGHTS, C. Z., March 1, 1915.

CIRCULAR NO. 82:

Effective at once, Mr. F. M. M. Richardson is designated an accountable official, and as such will account for all nonexpendable property paid for from Y. M. C. A. funds or hereafter purchased from the Bureau of Clubs and Playgrounds funds. Officials now carrying such property on their accountability will transfer same to Mr. Richardson by not later than March 20, 1915.

H. A. A. SMITH, Auditor, The Panama Canal. Approved: GEO. W. GOETHALS, Governor.

Employes Temporarily Assigned to Higher Grade.

THE PANAMA CANAL, EXECUTIVE OFFICE, BALBOA HEIGHTS, C. Z., February 27, 1915.

To all concerned—There appears to be a misunderstanding on the part of employes as to the regulations

governing cases where one employe is temporarily assigned to perform the duties of a man in a higher grade, particularly in reference to such employe's being paid the higher rate of pay while so performing such duties.

For the information of all concerned, attention is invited to the following. Circular No. 603, Paragraph 16, (d) and (e), dated April 1, 1914, reads:

"(d) An employe temporarily assigned to perform the duties of a man in a higher grade who is absent on vacation leave with pay, or on sick leave with pay, shall not be allowed the salary of the higher position, except that an artisan on an hourly basis, temporarily performing the duties of a foreman, may be transferred to the monthly basis with foreman's pay to avoid excessive overtime.

"(e) When an employe is absent without pay for more than 30 days, the substitute assigned to perform his duties may be paid the usual entrance salary of the position during such temporary assignment."

Paragraph (e) above is rendered null and void by Section 12 of the Sundry Civil Appropriation Act of August 1, 1914 (Circular 603-4), reading as follows:

"Sec. 12. That it shall not be lawful hereafter to pay to any person employed in the service of the United States under any general or lump sum appropriation, any sum additional to the regular compensation received for or attached to any employment held prior to an appointment or designation as acting for or instead of an occupant of any other office or employment. This provision shall not be construed as prohibiting regular and permanent appointments by promotion from lower to higher grades of employment."

That section expressly prohibits the payment of the regular salary of a position of higher grade to an employe of a lower grade temporarily assigned to the duties of the higher position, except where the amount of overtime likely to be required of hourly men serving temporarily in supervisory capacities would make the total pay at hourly rates greater than the monthly pay, in which case the regular monthly salary of the position may be allowed.

GEO. W. GOETHALS, Governor.

Changes in Organization of Accounting Department.

THE PANAMA CANAL, OFFICE OF THE AUDITOR,

BALBOA HEIGHTS, C. Z., March 3, 1915. To all concerned—The following changes in the organization of the Accounting Department are announced, effective March 4, 1915:

Mr. T. H. Chambers, in charge of general inspection work, is transferred to the Collector's office.

Mr. Herbert Pearson, commissary accountant, is placed in charge of the general inspection section.

Mr. J. R. DeGrummond is assigned to duty as commissary accounting inspector.

Mr. L. E. Willson, in charge of the material and property accounting section, is temporarily placed in charge of the commissary accounts as acting commissary accountant.

Mr. C. A. Hanson is appointed assistant to the acting commissary accountant.

Mr. Max Herz is temporarily placed in charge of the material and property accounting section.

H. A. A. SMITH, Auditor, The Panama Canal.

Card Passes for Year 1915.

THE PANAMA RAILROAD COMPANY, OFFICE OF SUPERINTENDENT, BALBOA HEIGHTS, C. Z., March 2, 1915.

CIRCULAR NO. 466: To all concerned—Card passes for 1914 will expire after March 5, and 1915 card passes will be honored effective March 6.

C. H. MOTSETT, Superintendent.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., March 8, 1915.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts, and may be procured upon request of the addressee:

(Continued from page 269.)

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curacao, Puerto Cabello, and Barcelona.

The Compañia Trasatlantica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curacao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls enroute, the vessels sail from Genoa on the 8th day of each month.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing every Saturday, direct from Cristobal; and every Thursday, direct from New York; between Colon and New York by the United Fruit Company, sailing via Kingston weekly and via Havana weekly; between Cristobal and New Orleans by the United

Fruit Company, two vessels a week each way. Following are the sailings in the near future:

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. To others, the subscription rate will be \$1, United States currency, per annum, in the United States and its possessions; Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

First French Vessel Through Canal.

The first French vessel to make use of the Canal is the merchant ship *Saint Andre*, which entered the Canal on the morning of Tuesday, March 16, in passage from Tahiti to Glasgow with a cargo of 6,800 tons of ores. The *Saint Andre* is a steel freight steamship, 398 feet long by 50 feet in the beam, and was built at St. Nazaire, in 1912, for La Compagnie Navale de L'Océanie (Maritime Company of Oceania), which has since operated the vessel principally in Pacific trade.

No official recognition was taken of the passage of the vessel, just as none has been taken of the first vessels of other foreign nations making use of the Canal, but at points along the way individuals gave indications of their appreciation of the nation which performed so important work in the building of the Canal.

The concession to build a canal across the Isthmus was granted to the first French company in May, 1876, by the government of Colombia. On January 10, 1881, ground was broken at the Pacific entrance by Ferdinand de Lesseps, and regular excavation was begun near Empire in January of the next year. Work in that section has been carried on continually since then; with the exception of five years, in which activities were halted by financial difficulties. The idea of building a seallevel canal was abandoned in 1887, and the less expensive plan of a lake and lock construction adopted, but in February, 1889, the first company went into the hands of a receiver. A second company took charge and began heavy excavation in Culebra Cut in 1894. It continued operations until the American occupation, May 4, 1904.

The line of the proposed French canal was much the same as that of the present Canal, and a considerable part of the French work has been of value to the American forces. Of their total excavation of 78,146,960 cubic yards, 29,908,000 cubic yards were useful to the present Canal project. Other important features of the French work were their surveys, borings, hydrographic records, the erection of Ancon and Colon hospitals, of Gor-

gona (Bas Matachin) shops, Paraiso shops, the Mount Hope shops and dry dock, the establishment of residential villages at points all along the line, including Cristobal, Bohio, Tabernilla, San Pablo, Gorgona, Matachin, Bas Obispo, Las Cascadas, Empire, Culebra, Paraiso, and La Boca, and the assembly of a great deal of railroad and excavating equipment, much of which is in service today. *U.*

The French spent close to \$250,000,000 on the Isthmus and lost about 6,283 lives in their attempts to build the Canal. Hundreds of the men who lost their lives in the French service are buried in the cemeteries on the Isthmus, where since have gone to join them hundreds who continued their work under the American flag. The French regime, 1881 to May 4, 1904, and the American, from the latter date to the present, have lost approximately equal numbers of employes by death.

Sales of Bunker Coal to Vessels.

During the month of February 56 vessels were supplied with 17,672½ tons of coal by the Panama railroad at Colon. Of these, all but six were vessels which passed through the Canal. The sales at Balboa were only to vessels not using the Canal, and amounted approximately to 3,000 tons. The preponderance of sales on the Atlantic side is due to the fact that coal is sold for \$1 less per ton there than at Balboa.

Coal sales to vessels at Cristobal during January amounted to 13,391½ tons. In December, 1914, they were 18,000½ tons. The average monthly sales to vessels at both terminals since the opening of the Canal have approximated 17,100 tons.

The stock of coal regularly kept on the Isthmus is 75,000 tons, any proportion of which is available for sale to vessels. The monthly inportations will be increased as the consumption increases, but the surplus stock on the Isthmus assures that the needs of vessels will always be met.

New Tug for the Canal on Its Way.

The tug *Tavernilla*, one of two harbor tugs for which contract was let by The Panama Canal to the Staten Island Shipbuilding Company, in June of last year, sailed from the contractor's yards at Port Richmond, N. Y., for Cristobal on Monday, March 15. It is expected to arrive by next Wednesday. The second tug, the *Gorgona*, has been launched, with its hull cemented and tested, and is now being fitted with machinery. The condenser has been installed, tested, and accepted.

Passage through Slide Opened as Expected.

The blocking of the Canal channel just north of Gold Hill, which had caused the suspension of traffic, was cut through to sufficient width and depth in the afternoon of Wednesday, March 10, to allow the resumption of traffic, and vessels have since been going through the Canal without delay.

FUEL OIL FOR VESSELS.

Ample Facilities for Supplying Oil to Shipping at Both Canal Terminals.

The arrangements for furnishing fuel oil to vessels at the two entrances to the Canal have been brought to a state which is ample for the present demands, and will be extended as occasion arises. Oil is sold by both the Government and private corporations.

By the end of this month the storage capacity for fuel oil at Balboa, which is the principal point of loading, will be 220,000 barrels, and 37,000 barrels of Diesel engine oil. The fuel oil is held in two 42,000-barrel tanks belonging to The Panama Canal, three 37,000-barrel tanks of the Union Oil Company of California, and one 25,000-barrel tank of the Panama Agencies Company. The Diesel engine oil is handled at present by the Union Oil Company, using a 37,000-barrel storage tank; this company is also selling fuel oil. The Roxana Petroleum Company expects to complete two 55,000-barrel tanks within the next three months.

All of the above tanks are connected with the Government oil crib, through the handling plant of The Panama Canal. The depth of water along the crib is 45 feet at mean mean tide. Plans have been approved for the building of two additional cribs as soon as the necessity for them develops. Under the present arrangement, fuel oil can be delivered to vessels at any rate up to approximately 2,000 barrels per hour.

The fuel oil storage capacity at Cristobal at present is 195,600 barrels, using two 42,000-barrel tanks of The Panama Canal and three 37,000-barrel tanks belonging to the Union Oil Company of California. Diesel engine oil is not sold at the Atlantic entrance at this time. The Union Oil Company has withdrawn from the oil business at the Atlantic terminal and is arranging to dispose of its tanks on that side of the Isthmus to one of the several companies which expect to engage in the business of supplying fuel oil to shipping at the Atlantic entrance.

These tanks are connected with the new handling plant of The Panama Canal. Oil is delivered at Docks 13 and 14, which have 30 feet of water alongside. It is expected to extend the delivery pipe ultimately to either dock No. 10 at Cristobal or to the permanent coaling plant, across the French canal. Several of the companies which have leased lots in the Mount Hope tank farm expect to erect oil tanks during 1915.

The price of fuel oil sold by The Panama Canal at either Balboa or Cristobal is \$1.25 per barrel of 42 gallons. It is sold as dry oil at the local temperature; that is, without any reduction in the gross volume on account of the temperature's being above 60° Fahrenheit, though the entire amount of water which the oil is shown by analysis to contain is subtracted from the gross volume before the bill is rendered. The prices made by the

several corporations may be obtained on application to the respective corporations.

The oil now sold by The Panama Canal is American oil of excellent grade, the technical characteristics required by the specifications being as follows: Flash point, 150° F.; fire test, above 220° F.; gravity at 60° F., not less than 16 nor more than 24 degrees Baumé; sulphur content, not more than 2.33 per cent; water content, not more than two per cent; fixed carbon, not more than six per cent; asphaltum, 40 to 60 per cent; British thermal units per pound of dry oil, 18,500 to 19,000.

Pleasure Yacht Makes Part of Canal Passage.

The yacht *Wayfarer*, belonging to A. J. Vanderbilt of New York, visited the Canal last week, but did not make a complete

passage from ocean to ocean. It entered from the Atlantic side on March 12 and went as far as Pedro Miguel, but then returned to the Atlantic, and sailed for Port Limon on Tuesday, March 16. The *Wayfarer* was formerly christened the *Warrior*.

Notice to Mariners—Buoys Discontinued at Pacific Entrance.

Black spar buoys Nos. 17 and 19, Pacific entrance, on the west side of the dredged channel, abreast of Beacons Nos. 17 and 19, respectively, will be discontinued on and after March 15, 1915.

GEO. W. GOETHALS,
Governor.

BALBOA HEIGHTS, C. Z.,
March 9, 1915.

LABOR FORCE AND QUARTERS IN FEBRUARY.

The force report of February 24, 1915, shows the actual working force of The Panama Canal on that date to have been 20,111; of the Panama railroad, 2,978; and of contractors, 356, a total effective working force of 23,445. This is a decrease of 1,408 from the force on January 20, which was 24,853.

The gold force on the Isthmus, composed almost exclusively of white Americans, was 3,494, a decrease of 219, as compared with the preceding month. The gold force for February was divided as follows: The Panama Canal, 3,088; the Panama railroad, 377; contractors, 29, a total of 3,494. Detailed figures of the total force employed on the Isthmus, by departments and divisions, follow:

DEPARTMENT OR DIVISION.	SILVER EMPLOYES*										Total silver.	Total gold.	Grand total.

Total	3,730	1,581	1,649	626	24	63	5,601	1,302	1,750

(1) Includes 94 Colombians and Panamanians. (2) Includes 13 American negroes, 25 Asiatics, and three Panamanians on the gold roll. (3) Includes Sabanas police station, Taboga Island, Naos Island, Culebra Island, and Palo Seco. (4) Includes Miraflores. (5) Includes one Asiatic. (6) Includes 50 Panamanians. (7) Includes Empire, Las Cascadas, and Bas Obispo. (8) Includes Colon Beach and Colon Hospital. (9) Includes 35 East Indians, 10 American citizens, and 107 Panamanians. Gold force of contractors (included above), occupying Government quarters, 110 bachelors.

WORK ON EAST BREAKWATER.

New Approach Trestle Being Driven with Salvaged Timbers—Plans Remain the Same.

Work was begun last week by forces of the Division of Terminal Construction in driving a new trestle for the construction of the East Breakwater in Limon Bay, to replace the sections of trestle carried away by heavy seas on February 9.

The plan of construction has not been substantially changed from that in effect at the time of the norther, with the exception that the replaced part of the approach trestle is to be made single instead of double track. The approved project provides that the breakwater as completed shall be a detached mole, with its outer end 2,000 feet from the outer end of the west breakwater. The length of the east breakwater is to be 5,400 feet. This makes the proposed inner end of the mole lie about 5,925 feet from the shore at Coco Solo. The construction involves therefore the two features of the approach trestle, extending from land to the site of the breakwater proper, and the trestle and fill of heavy material which shall form the breakwater itself.

At the time of the occurrence of the norther the approach trestle had been completed to its full length, approximately 5,900 feet, and from its outer end the trestle for the breakwater proper had been built a distance of 3,700 feet, leaving 1,700 feet to be built. In advance of the driving of the trestle, fill had been placed along most of the line, from sea-going and pipeline suction dredges, to render the trestle more stable. At a point slightly over 1,600 feet from shore a relay station had been installed alongside the trestle, to boost the discharge of the pipeline dredge, and at the extreme end of the approach trestle a second relay station was under construction. For the protection of these stations, the regular fill had been augmented there by dump rock, which formed a mound extending several feet above sealevel.

The heavy seas of the norther swept away entirely the 4,200-foot section of approach trestle, between the fills of heavy material at the relay stations. From the land to the first station the trestle held firm, being somewhat in the lee of Margarita Point, and strengthened at its outer end by heavy fill. The superstructure of the first relay station was swept away but the pumps and motors, anchored to the platform by heavy bolts, were saved. Only the platform of the second relay station had been built; this held firm and was the place of refuge of the 69 men who were marooned on the breakwater proper when the outer part of the approach trestle was swept away.

A considerable amount of heavy fill had been dumped on the breakwater, beyond the second relay station, reaching, in general, to an elevation of about 14 feet below the surface of the water. This fill served to stabilize the trestle, and saved it from being swept away completely, like the parts of the approach trestle not protected by heavy fill. For a distance of 2,100 feet beyond the second relay station, that is, for the first 2,100 feet of the breakwater proper, the trestle still retains the decking, with the exception of five stringers. The damage in this section consisted principally in twisting the trestle out of alignment; the track on the sea side of the breakwater was forced over against the track on the harbor side. Beyond this section, for

a distance of 1,600 feet, to the outer end of the trestle as built at that time, all the superstructure, stringers, caps, ties, and rails, were swept away, leaving only the piles standing. It can not be determined at this time of how much value these piles will be in the reconstruction of the trestle, as they are considerably out of alignment.

The washing away of the trestle at the outer end of construction on the breakwater proper carried away the handcar on which were mounted the acetylene lights used to indicate the end of the trestle, and two pile-drivers, one in use on each track of the double trestle. The disappearance of the lights, during the night of February 8, was the first indication that the trestle was giving way. The piledrivers had been drawn back from the ends of the trestles, as was customary, for safety at the close of work on the 8th. By morning of February 9 parts of the approach trestle had so given way that in spite of reinforcement and shimming it was impossible to bring the rolling stock to land. The men on the breakwater proper made every effort to reinforce the trestle beneath the piledrivers but in spite of this the trestle gave way and both piledrivers disappeared within 10 minutes of each other, in the afternoon of the 9th. From the divers' report it appears practicable to salvage piledriver No. 103, which is resting on firm fill, but No. 104 has sunk so deep in soft fill as to make a very difficult job of raising. In addition to the piledrivers, a train of 21 Lidgerwood flat cars, with the unloader and plow, went into the sea from the approach trestle. It was customary to leave one train on this section at the close of work at night, to make room in the yards on land and to have the train available for operations the first thing in the morning. The giving way of trestle immediately beyond the first relay station during the night of February 8 made it impossible to bring this train to land on the 9th.

In the absence of the regular piledrivers use is being made of Panama railroad piledriver No. 1. This, however, is not equipped with as long leads as are desirable for this kind of work. It is now at work just beyond the first relay station, reconstructing the approach trestle beyond that point. This trestle is to be built single track, following the line of the former sea track of the double trestle.

The piles and squared timbers being used are some of those reclaimed from the shore after the washing out of the trestle. Each bent of the new trestle uses four piles; the two in the center are creosoted, while those flanking them on each side, and driven on a batter, are untreated except for a coating with carbolineum.

A force of approximately 150 men is engaged in the reclamation of timbers swept

ashore. It is believed that 90 per cent of the timbers removed from the trestles have been beached along Colon Beach and in Manzanillo Bay at the mouth of Folks River. Many have drifted a considerable distance inland. In the reclamation along part of Colon Beach it has been practicable to use a locomotive crane, equipped with a long cable, dragging the piles from the shore to the track in front of the radio station and loading them on flat cars to be hauled to Coko Solo. At other points the piles are gathered by crews in small boats and assembled in rafts, to be towed to Coko Solo by the gasoline tug *Coko Solo*. It is estimated that about a third of the squared timbers lost can be used again. Many of these were used in the construction of the west breakwater, from Toro Point. Of the piling, a large part, including creosoted piling, can be used, mostly with splicing, in the reconstruction of the approach trestle, and the trestle of the breakwater proper.

In connection with the reconstruction, fill is being placed in the gap between the relay station sites, by the seagoing suction dredge *Caribbean* and by clapsnet handling spoil from ladder dredge *No. 1*, excavating at the new coaling station at Cristobal. This fill is intended to increase the stability of the trestle and to allow the use of shorter piles. Where the piles will not reach to bed rock it is proposed to increase the skin friction by affixing to each pile a heavy timber collar or ruff, made fast to the pile by means of iron bolts.

EFFECTS ON OTHER BREAKWATERS.

An inspection of the completed west breakwater in Limon Bay, extending from Toro Point, shows that it was damaged in five places, to the extent of exposing one or more piles of the construction trestle, since heavily armored with hard rock. The seas broke over the breakwater repeatedly, but it is estimated that all damage done could be repaired by the use of 500 cubic yards of rock.

The mole at the Cristobal piers, extending about half a mile in length and affording additional protection to the docks in its lee, was severely battered and it is believed it would have been washed out except for the prompt and continued efforts of forces of the Panama railroad in reinforcing it. In the afternoon of February 9, when the mole was reported in danger, trains of rock were procured from the yards at Coko Solo and elsewhere and dumped along the sea side of the mole. Three gangs, comprising about 75 men, continued this work on the 9th, 10th, 11th, and 12th, during all of which time high seas were running. Men were knocked down repeatedly by the waves breaking over the mole, and one of the two tracks on top of it was swept away. About 12,000 cubic yards of rock were dumped, and the mole is now considered to be in better condition than it was prior to the norther.

SUCCESSFUL VACCINATIONS.

District Physicians Securing Good Results with Lymph Made at Ancon Laboratory.

In the general vaccination of residents of the Isthmus now in progress, the physicians of the Health Department have been attaining unusually good results, with a high percentage of "takes" and practically no very sore arms or legs. For instance, the district physician at Ancon reported that among 191 children of the Ancon school who were vaccinated, not one developed a sore arm or leg and only two lost time on account of fever. He expresses his opinion that trouble with vaccinations is due principally to lack of cleanliness on the part of either the physician or, later, of the patient. Those who are vaccinated at the Ancon dispensary are instructed to protect the abrasion from infection and to report every few days for inspection. Prior to vaccination, the skin is cleaned carefully with medicated soap and water, followed by alcohol. Then the abrasion is covered with a dressing. If later there should be signs of infection, the vaccination is disinfected and dressed as often as may be required.

A large part of the success of the vaccinations has been due to the use of a high grade lymph prepared in the laboratory of the Board of Health at Ancon. This lymph has not only been found to be highly efficacious with respect to the proportion of successful inoculations, but is known to be pure, as every stage of its preparation is performed in the Board of Health laboratory and nothing is taken on faith. It has been tested and checked at every point.

On account of the difficulty of keeping a virulent vaccine in the tropics, the laboratory staff began about three months ago the making of vaccine on the premises. Original lymph for the inoculation of calves was obtained from the health department of New York City. The calves are procured from the herd of Ancon Hospital, which is in healthy condition; but in addition the history of each calf is gone into, and the calf is subjected to isolation and careful examination before it is accepted for inoculation. It is placed in a screened room, with a sawdust floor, and inspected thoroughly, with especial care for diseases of the skin. Its temperature is taken daily for a week.

The calf being found acceptable, it is placed on an operating table constructed for the purpose and strapped down. The hair is then shaved from its abdomen, and frequently also from the inside of the thigh, where there is a flat surface of clean and tender skin. After a thorough cleansing, these parts are vaccinated with stock lymph, saved from the preceding calf. Vaccination is effected by making linear incisions, from 10 inches to a foot long, spaced about a quarter of an inch apart, and inoculating the cuts with a lance. The incisions are made the depth of the skin, barely drawing blood; anesthesia is used when the protests of the calf are of sufficient vigor to warrant it.

Following vaccination, the calf is kept in a screened room and inspected daily. On or about the fifth day the calf is placed on the operating table and, after cleansing, the scabs and lymph over and within the incisions are scraped away with a curette. This product is bottled and placed on ice, and within a short time is placed in a mixture of saline solution and glycerine and thoroughly triturated.

Deceased Employees.

Name.	Check No.	Native of	Isthmian Residence	Employed by	Date of death
Thompson, Samuel.	20475	Barbados	Colon Hospital	Health Dept.	Mar. 4, 1915.

The estate of the abovenamed deceased employe of The Panama Canal or the Panama Railroad Company is now in process of settlement, and any claims against the estate or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. This name will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

(See Notes" Vol. 58-59-60-61-62-63-64-65-66-67-68-69-70-71-72-73-74-75-76-77-78-79-80-81-82-83-84-85-86-87-88-89-90-91-92-93-94-95-96-97-98-99-100)

ted, for the disintegration of the epithelial cells into a uniform, homogeneous pulp. Portions of this fluid are then mixed with glycerine, in dilutions of one-tenth, one-twentieth, and one-fortieth strength, and each solution is tested for its efficacy by inoculations. These tests make for economy in the manufacture of vaccine points and also serve to assure the efficacy of the virus sent out from the laboratory.

The virus is bottled and kept on ice. The glycerine with which the virus is in suspension has the effect of destroying any outside germs which might have entered the mixture, while preserving the cowpox germ. From time to time cultures are made from the solution to determine its condition.

The vaccine lances, or "points," which the district physicians use in vaccinating are made up at the laboratory in batches calculated to meet the demand, while at the same time assuring that only fresh points are sent out. Each lance, a little sliver of ivory, sterilized, is inserted in a small cup or cap of glass, which is half-filled with vaccine virus by means of a medicine dropper, and cap and lance are then dipped in paraffine, which seals the virus within the cup and prevents later contamination. The completed lances are put up in boxes of 100 for distribution to physicians.

The laboratory has been making from 5,000 to 7,000 lances from the pulp taken off each calf. The calves are used but once. Each calf, each vaccination, and each batch of pulp are numbered, and a close record of every step is kept. This is to provide against the introduction of extraneous diseases and afford a means of checking promptly any variation from the normal.

Besides being generally more satisfactory than the imported vaccine points, those made at the laboratory represent a distinct saving of money to the Health Department. While imported points have cost approximately 10 cents each, the laboratory has been making them for \$.014 each.

The new 36-foot, 45-horsepower gasoline launch for the section of Meteorology and Hydrography has been accepted and christened *Priscilla*.

Stages of the Chagres River, Gatun Lake, and Miraflores Lake.

Family Quarters.

Applications for married quarters in file on February 28, 1915, were as follows:

DISTRICT.	List No. 1.	List No. 2.
Ancon.....	20 (9)	356 (107)
Ancon Hospital.....	2 (1)	7
Corozal.....	1	120 (32)
Paraiso.....		176 (9)
Gatun.....		37 (6)
Cristobal.....	1 (1)	125 (27)
Total.....	24 (11)	821 (181)

NOTE—The figures in parentheses show the number of applicants already occupying regular or nonhouse-keeping family quarters at stations other than those at which applications are filed.

OFFICIAL CIRCULARS.

Quarters for Gold Employes.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., March 12, 1915.

CIRCULAR No. 627-5.

1. Effective April 15, 1915, Circular No. 627, dated April 1, 1914, and Circular No. 627-2, dated December 3, 1914, will be canceled and the following rules will govern the assignment of family quarters to gold employes:

APPLICATIONS.

2. Applications for original assignment or transfer within a district will be placed on file on one list according to the date of employe's last entrance into the service, irrespective of salary.

3. A list showing all applications on file for each district will be posted in the office of the district quartermaster and will be open to inspection.

4. An employe may, at the request of the head of his department, file an application for family quarters at or transfer his application to a point other than that at which he is employed.

ASSIGNMENTS.

5. When a house is to be assigned, it will be offered in the following order:

(a) To applicants on waiting list of longest continuous service, who are filling positions which will be retained in the permanent organization of The Panama Canal or Panama railroad in the district in which the house is located.

(b) To other applicants according to length of service.

6. Service being equal, the employe drawing the highest salary will be offered the assignment.

7. Employes will be required to accept or reject tender of quarters within five days from the date of tender.

SPECIAL HOUSES.

8. All houses on which the rental is fixed at \$25 or more per month and all houses or apartments necessary for firemen, policemen, nurses or others requiring special assignment, will be considered as special houses, and assignment thereto will be made by the Chief Quartermaster, with the approval of the Governor.

HOLDING QUARTERS.

9. Family quarters may be held for 90 days during the absence of an employe to whom they are assigned or his family, or both simultaneously, provided that this privilege shall not be granted for more than one period of 90 days in any service year. If vacated a second time during the service year, either by the employe, his family, or both simultaneously, quarters will be held not more than 30 days. The two periods can not be taken advantage of continuously or allowed to lap each other, either through absence of both employe and family at the same time or of either separately. The two periods must be regarded as entirely separate and distinct, and the quarters must be reoccupied both by the employe and his family after the first period of absence before they can be vacated, without forfeiture, for the second period of absence.

10. A new form of application will be gotten out, which will have to be filled out by all applicants, old and new, showing last date of entry into service, department, whether in permanent position or not, place of work, and highest rate of rental applicant is willing to pay. This application must be approved by the head of the department and certified by the Executive Secretary as to the employe's personnel record.

GEO. W. GOETHALS,
Governor.

Sales Agent.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER,
BALBOA HEIGHTS, C. Z., March 1, 1915.

To all concerned—Effective this date, Mr. C. H. Mann is appointed Sales Agent and will have charge of all sales of obsolete and surplus material and equipment, etc., for the Supply Department.

The position of Depot Quartermaster is hereby abolished.

Approved: WM. R. GROVE,
Chief Quartermaster.
GEO. W. GOETHALS,
Governor.

Sanitary Rules for Construction of Buildings in Canal Zone.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., March 2, 1915.

CIRCULAR No. 696:

1. The following rules proposed by the Chief Health Officer, in order to secure rat-proof buildings as a

protection against plague, will be used as a guide in all future construction in the Canal Zone:

2. For the purpose of rat-proofing, all buildings, outhouses, and other superstructures, except stables, shall be divided into two classes, to wit: Class A and Class B; and the same shall be rat-proofed in the manner following, to wit:

3. *Class A*—All buildings, outhouses, and other superstructures of Class A shall have concrete floors, and such floor shall rest, without any intervening space between, upon the ground or upon filling to be approved by the Chief Health Officer; said floor shall extend, and be hermetically sealed, to walls surrounding said floor, which walls shall be made of concrete, stone, or brick laid in cement mortar, and each wall to be not less than six inches thick, and shall extend into and below the surface of the surrounding ground at least two feet, except where such foundation walls are built upon solid rock, and shall extend not less than one foot above the surface of said floor. If it is desired to place a wooden floor over the concrete floor, sleepers not less than two inches by two inches shall be embedded in the concrete with the upper surface flush with the top of same. Over these sleepers the wood floor must be nailed, and there shall be no free space between the wood and the concrete.

4. *Class B*—All buildings, outhouses, and other superstructures of Class B shall be set upon pillars, so that there shall be a clear space of not less than three feet between the ground and the sills of any house, except in buildings erected as in Class A. In case the building is located on sloping ground, the sills of the building at the end nearest the ground must be not less than 18 inches above the ground level. When the space between the sills and ground is more than three feet and not less than six feet, and is properly concreted, it may be utilized for such purposes as may be approved by the Chief Health Officer, with this exception: No refuse or material of any kind shall be stored or allowed to remain in the space beneath the house.

5. Every slaughterhouse, abattoir, market, bakery, rendering plant, candy factory, ice cream manufactory, hotel kitchen, restaurant kitchen, warehouse where grain or cereals are stored, milk depot where milk is received or stored for distribution or sale, or where milk is converted into cream, cheese, or other products, dairy, building wherein poultry, game, animals, or birds are stored or kept for sale, or sold, and other buildings wherein foodstuffs are manufactured or prepared, shall be rat-proofed in the manner provided for hereinabove as Class A. In the event that the Canal authorities shall grant permits or licenses to persons or enterprises to carry on any of the activities mentioned in this paragraph, including produce and commission houses, hide stores, and the like, they shall be required to comply with the provisions of this paragraph. All other buildings, residences, outhouses, and superstructures, except stables, not hereinabove specified as Class A, shall be rat-proofed in the manner provided hereinabove as Class B; provided, that in plague-infected areas, or where, from any cause, a building or outhouse, or other superstructure is, or may become, in his opinion, a menace or dangerous to public health, the Chief Health Officer may require any such building, outhouse, or other superstructure, hereinabove required to be rat-proofed as a building of Class B, to be rat-proofed as a building of Class A, provided that the owner of any building, residence, or superstructure in Class B may rat-proof same as provided in Class A if he so elects.

6. All wall space, accidental and unnecessary spaces and holes, ventilators, and other openings other than doors and windows in every building, outhouse, and other superstructure in the Canal Zone shall be closed with cement or screened, with wire having not more than one-half inch mesh, as the case may require, in such manner as to prevent the ingress or egress of rats: Provided, That in all buildings, outhouses, and other superstructures of Class A, and in all stables, where there are any spaces in walls between the wall proper and the covering on same, or in ceilings, between the ceiling and floor or other ceiling covering above, said spaces shall be eliminated by the removal of said covering, or so closed as to prevent the ingress or egress of rats, and the whole, as determined and in such manner as shall be approved by the Chief Health Officer.

7. There shall be no frame buildings erected which provide for more than a single wall, except upon permission in writing from the Chief Health Officer, and when double walls are allowed it shall be stipulated in the permit that there shall be at least eight inches of concrete between the walls immediately above the sills of each floor, placed in such manner as to entirely fill all openings.

8. Attic space must have an opening into it of not less than two feet square and shall be closed by a trap door, which can be opened for the purpose of inspection; under no circumstances shall any article or articles of any nature whatsoever be stored in the attic space.

GEO. W. GOETHALS,
Governor, The Panama Canal.

Sanitary Rules for the Construction of Stables in Canal Zone.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., March 2, 1914.

CIRCULAR No. 696-1:

1. Stables shall have water and sewer connections, and good ventilation. The stalls shall be approximately 10 feet long, five feet six inches wide, and 10 feet high at entrance. The buildings shall be constructed as follows:

WALLS.

2. The foundation walls shall be constructed of concrete, brick, or stone, laid in cement mortar, and shall be not less than six inches thick, and shall extend into and below the surface of the surrounding ground not less than two feet.

FLOORS.

3. The floors of stables and stalls shall, unless specifically excepted in writing, be of concrete not less than three inches thick, upon which shall be laid a dressing not less than one-half inch thick of cement or stone, laid in cement mortar in such way as to prevent ingress or egress of rats, and such floors to have a slope of one-eighth inch per foot to the gutter drains hereinafter provided for.

STALLS.

4. The floors of stalls may be of planking, fitting either tightly to the concrete floor or elevated not more than one-half inch from the stall floor, and so constructed as to be easily removable. Such removable planking shall be raised at least once a week and the said planking and the concrete floor beneath thoroughly cleaned.

GUTTERS.

5. Semicircular or V-shaped gutter drains shall be constructed in such stables in such manner that a gutter shall be placed so as to receive all liquid matter from each stall, and each of these gutters to connect with the public sewer or with a main gutter of the same construction, which in turn shall be connected with the public sewer. All openings from drains into sewers shall be protected by a metal grating having openings not more than one-half inch between the gratings.

MANGERS.

6. Each manger shall be constructed so as to have a slope of two inches toward the bottom, shall be covered with tin or zinc, and shall be at least 18 inches deep, to avoid spilling of food.

FEED BINS.

7. All feed bins shall be constructed of concrete, stone, metal, or wood, and if constructed of wood shall be lined or covered with metal, and the whole so constructed as to prevent the ingress or egress of rats.

WASHING PLATFORM.

8. Each stable must be provided with a cemented area of sufficient size upon which carriages and animals are washed. This area shall be properly graded and trapped to sewer.

GEO. W. GOETHALS,
Governor, The Panama Canal.

Annual Leave.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., March 1, 1915.

To all concerned—Some employes and persons in supervisory positions appear not to understand the regulations relative to annual leave.

Annual leave when taken alone (i. e., not with cumulative leave) must be entered upon within the service year, or forfeited.

When taken with cumulative leave, annual leave may be entered upon at any time within two months after the close of the service year.

For the good of the service (not for the convenience or profit of an employe) the Governor, upon recommendation of the head of a department or division, may extend the time in which annual leave may be taken in conjunction with cumulative leave.

Under no circumstances may annual leave (unless taken with cumulative leave) be entered upon after the close of the service year.

GEO. W. GOETHALS,
Governor.

Barges for Handling Coal.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., March 11, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

The Panama railroad is in urgent need of three barges, suitable for handling 200 tons of coal each, to replace three barges now in its service which have been condemned.

It is requested that information be furnished the Surveying Officer with as little delay as practicable, as to whether or not any barges can be released at this time in order to handle coal for the Panama railroad. Information should also be furnished as to number of barges on hand and in what service same are now being

used, which could be used to advantage by the Panama Railroad in case it should be considered necessary for the good of the service to transfer same for coal service.
 GEO. W. GOETHALS,
Governor.

Release from Quarters.

THE PANAMA CANAL,
 OFFICE OF THE AUDITOR,
 BALBOA HEIGHTS, C. Z., March 13, 1915.
 TO DISTRICT QUARTERMASTERS AND OTHER CONCERNED:
 Hereafter in issuing release from quarters as required by Circular 675-1 as amended by Circular 675-2, such release should be given—"Subject to payment of rent"—unless the party to whom the release is given shall present to the district quartermaster a receipt showing the payment of rent up to the date of the release from quarters, and in such case notation should be made on the release that—"Rent has been paid to"
 H. A. A. SMITH,
Auditor, Panama Canal.

Distribution of Cars.

THE PANAMA RAILROAD,
 OFFICE OF SUPERINTENDENT,
 BALBOA HEIGHTS, C. Z., February 9, 1915.
 HEADS OF DEPARTMENTS AND DIVISIONS:

It is necessary to revise the distribution of cars to the several divisions and departments, effective April 1, 1915, for the three ensuing months, and you are requested to advise me at your early convenience the requirements of your department, showing the total number of each class of car you will require for the three months of April, May, and June, 1915.
 For your information I am appending hereto a copy of the car distribution statement covering this equipment for the quarter ending March 31, 1915.*
 C. H. MOTSETT,
Superintendent.

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 303, on Wednesday, March 24, 1915, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boat, will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m.; and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

For the benefit of applicants residing in Gatun and Cristobal or Colon, examinations for licenses as navigators of motor boats, and as chauffeurs, will be held at the office of the captain of the port of Cristobal on

Friday, March 26, 1915, beginning at 9 a. m. Applicants should be provided with motor boats or automobiles for the demonstration test.
 By direction of the chairman of the board.
 F. M. NIXON,
Recorder, Board of Local Inspectors.

Bidders for Landing Pier, Quarantine Station, Balboa.

The attention of prospective bidders for the construction of a steel and concrete pier at the quarantine station, Balboa, is called to the fact that supplement No. 1 has been issued which changes the provisions under the heading "Plant" on the third page of the specifications so as to provide that bidders must state the number of items of equipment they will require, and the length of time they will require such equipment. This supplement gives a list of equipment which may be available under this paragraph and also provides that if any repairs are necessary on any of this equipment to put it in working order, the cost of repairs shall be charged to the contractor and the contractor will be required to pay for all running repairs. Copy of this supplement may be obtained upon application to the office of the Chief Quartermaster, Balboa Heights.
 WM. R. GROVE,
Chief Quartermaster.

SHIPPING INFORMATION.

April Weather Probabilities.

The following weather conditions may be expected to prevail at the Canal entrances during the month of April. Predictions are based on the records at Colon and Ancon for the past seven and eight years, respectively.

Winds—Fresh northerly dry season winds will continue during the month, although there will be a decrease in the wind movement with the approach of the rainy season and as compared with the March conditions. North and northeast winds will prevail at the Atlantic entrance to the Canal, with an average hourly velocity of about 13 miles an hour. A maximum velocity of more than 33 miles an hour is not likely to occur.

Over the interior and on the Pacific side the prevailing winds will blow from the northwest, with an average hourly velocity of about nine miles an hour. The maximum velocity is not likely to exceed 26 miles an hour.

Rain—Occasional showers may be expected at both the Atlantic and Pacific entrances and as much as one inch of rain may fall in one day, although April is a dry season month. The average April rainfall on the Atlantic side has been 4.05 inches, and 2.72 inches on the Pacific side. The average number of days on which .01 inch of rain fell has been 16 and eight, respectively.

Fogs—No fogs are likely to occur at the Pacific entrance to the Canal, and the average number of fogs at the Atlantic entrance during the month of April has been only one. Night and early morning fogs may be expected over the Culebra Cut section of the Canal, but under present operating conditions they will not affect navigation. The average number of nights with fog at Culebra has been 11, although most of them lifted or were dissipated by 8.30 a. m.

Temperature—An average shade temperature of 81° F. will probably occur at the Atlantic entrance and an average temperature of 82° F. may be expected at the Pacific entrance. On the Atlantic side the temperature is not likely to rise above 90° F., or fall below 72° F., but a maximum of 97° F. and a minimum of 64° F. may occur at the Pacific entrance. The mean daily range in temperature during the month of April is much greater at the Pacific than at the Atlantic entrance to the Canal, being 18° and 7° F., respectively, for the years of record.

Barometric pressure—Changes in barometric pressure on the Isthmus are very slight, except for the well-marked diurnal change which is a characteristic of tropical regions, and of little value in forecasting weather conditions. The average April sealevel pressure is 29.86 inches. A maximum air pressure of more than 29.99 inches or a minimum of less than 29.73 inches is not likely to occur at either entrance of the Canal.

Storms—Severe general storms of wide extent are not likely to occur at either Canal entrance, although a rough sea and heavy swell may at times be produced outside the breakwater at Colon by the fresh northerly trade winds or by the so-called "northers" that occasionally reach as far south as the Atlantic entrance to the Canal. Occasional thunderstorms may be expected at both Canal entrances. Generally fair weather with smooth to moderate seas can be expected at the Pacific entrance.

Tides—The average tidal range at Colon is less than one foot and the maximum range is approximately two feet. Owing to this fact, tidal fluctuations need not be considered in navigating the Atlantic entrance to the Canal.

At the Pacific entrance the average tidal range is about 13 feet, while a maximum range of 20 feet may occur.

Panama (Balboa) tide predictions are given below:

Tide Predictions.

Panama tide predictions for the next five weeks are given in the following table:

MARCH.

Wed., April 21	2:00	7:59	14:22	20:07
	3.0	11.9	4.2	11.9

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3.47.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans for all States. Due at New Orleans on the following Tuesday.

Every Saturday to New York, for all states. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

*Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.

Train No. 6, leaving Panama, at 11 a. m., connects with the above despatches.

*NOTE—The sailing on Monday, April 5, will not land mail in New York until Tuesday of the following week; hence, despatches on that date will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7.10 a. m., connects with the despatches for this sailing.

Fuel and Supplies.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Cristobal or Balboa from plants of The Panama Canal, or from the private corporations which have tanks at the terminals. The present price for fuel oil supplied by The Panama Canal is \$1.25 per barrel of 42 gallons.

Diesel engine oil is for sale by the Union Oil Company, at 45 shillings per ton of seven barrels. This company also handles fuel oil.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock, with a minimum charge of \$3. Vessels may take up from the fresh water sections of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light, and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

Repairs to vessels may be made to any extent, except where the use of a large dry dock is required, or the turning of the largest crank shafts or longest line shafts.

Application for supplies, or for services, should be made to the captain of the port, Cristobal or Balboa.

The cable address of The Panama Canal, on the Isthmus, is "Panacanal, Panama;" in the United States, "Panacanal, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C." for delivery in the United States.

Sailings of Vessels in Regular Service with the Isthmus.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing every Saturday, direct from Cristobal; and every Thursday, direct from New York; between Colon and New York by the United Fruit Company, sailing via Kingston weekly and via Havana weekly; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

Sails.	Arrives.
NEW YORK TO CRISTOBAL-COLON.	
Carrillo	U. F. C., Mar. 10
Colon	P. R. R., Mar. 11

(Continued on page 278.)

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. To others, the subscription rate will be \$1, United States currency, per annum, in the United States and its possessions; Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications,
THE CANAL RECORD
Balboa Heights, Canal Zone,
Isthmus of Panama

NOTES OF PROGRESS.

Record in Placing Concrete.

In the construction of the north entrance pier at Balboa, which is connected with the north wall of dry dock No. 1, a gang of men operating a ½-yard Austin cube mixer, equipped with an elevator and movable chutes, mixed and placed 540 batches of concrete on March 9. In place, the 540 batches measured 275.5 cubic yards and this was placed in seven hours and 15 minutes actual working time. During the eight hours work, there were the following delays: Broken chute, 10 minutes; repairs to mixer, 20 minutes; moving mixer ahead, 15 minutes; total delays, 45 minutes.

The labor cost, including supervision, was \$39.91, which makes a unit labor cost for mixing and placing of \$0.1448 per cubic yard. All the material was wheeled in wheelbarrows from a point about 100 feet from the mixer. The average run per hour, actual working time, was 36.33 cubic yards.

Inquiring for Material for Ataksan Railway.

Inquiry has been received from Lieut. Frederick Mears, on behalf of the Alaska Railway Commission, if The Panama Canal can transfer to the commission a French ladder dredge, tugs and barges or clapets to serve the same, four 201-class locomotives, four locomotive cranes, 60 12-yard dump cars, two steamshovels, and two piledrivers complete. The reply was that the material other than the dredge, tugs, barges, clapets, and locomotive cranes could be supplied, but that none of the former could be spared for several months.

Assortment of Cargo on One Vessel.

As an example of the great variety of goods carried in the westbound United States coast-wise trade, it is interesting to note some of the items in the cargo of 4,500 tons carried by the *Peter H. Crowell* through the Canal March 10, on the way from New York to Los Angeles and San Francisco. Among the items listed by the master on the partial cargo declaration form supplied by The Panama Canal were: Battery cells, caustic soda, olives, chemicals, earthenware, glassware, lard, liquors, struc-

tural steel, machinery, refined petroleum, vegetable oils, paint, paper and paperware, pianos, rubber goods, salt, soap, stamped ware, textiles, tobacco, wooden ware, marble, starch, and thread; and the declaration was finished with "Balance, 1,189 tons, small lots of various articles."

Exposition Tours of United Fruit Company.

In connection with the sale of tickets by rail and steamer lines through New York and New Orleans to San Francisco or San Diego on account of the Panama-Pacific International Exposition, the United Fruit Company is selling reduced rate tickets for a variety of tours and side trips to Panama and through the Spanish Main. The tours start from New York and end at New Orleans and range in price from \$54 to \$134.70, according to extent and duration. The company's prospectus remarks, "a trip through the Panama Canal acts as a fitting prelude to the expositions; perhaps in no other way can the purpose and meaning of these commemorative expositions be so well understood."

Italian Exhibits for San Francisco.

Nine hundred tons of material for the exhibit of the Italian Government at the Panama-Pacific International Exposition were taken through the Canal in the steamship *Vega*, entering March 19.

A Shipment from the Far East.

The steamship *Indra*, passing through the Canal on March 13, was the fifth vessel to make the Canal transit in direct routing from the Far East to the Atlantic coast of the United States. Most of the 16 vessels which have made the outward voyage over this route have subsequently taken various tramp assignments; some have returned through the Canal with grain from the west coast of north America for Europe. The cargo of the *Indra*, loaded at Shanghai, Hongkong, Kobe, Yokohama, and Manila, for discharge at New York, includes beans, rice, copra, manufactured goods, copper and tin ingots, vegetable and cotton seed oils, manganese, skins and hides, tea, cotton, hemp, silk waste, wool, curios, mattings and rattans, bamboo, vegetable tallow, and antimony.

Miraflores Purification Plant in Service.

The new filtration plant at Miraflores, the largest and most complete purification plant, in Central America, was placed in service on Sunday, March 14. All water supplied to the Canal villages south of Paraiso, and the city of Panama, is now purified at this plant, after being pumped from the Chagres River at Gamboa.

The water passes first through a process of aeration, followed by coagulation, sedimentation, and filtration, after which it is treated with an injection of hypochlorite of lime for sterilization.

NEW RULE FOR TOLL CHARGES.

Amount Collectible Limited on Basis of Net United States Registry.

1. In accordance with a recent decision of the Attorney General of the United States, no Panama Canal tolls may be demanded or collected which aggregate more than \$1.25 per ton or be less than 75 cents per ton, upon the net registered tonnage as measured under the statutes of the United States, upon any vessel of commerce or other vessel such as Army and Navy transports, colliers, hospital ships, and supply ships, which may be classified for the payment of tolls upon the same basis of measurement as commercial vessels.

2. The tolls, however, for the abovementioned vessels, when carrying cargo or passengers, shall still be reckoned upon their net tonnage as obtained by the Panama Canal rules of measurement, including deck loads, at \$1.20 per net ton; provided, that if the sum obtained by multiplying the net tonnage thus obtained by the Canal rules of measurement by \$1.20 exceeds the sum obtained by multiplying the net registered tonnage, as obtained by the United States statutes, by \$1.25, the excess is uncollectible.

3. In accordance with the same decision, vessels included under paragraph 1 can not be charged less than 75 cents per net registered ton as obtained by the United States statutes; hence, when they are in ballast and do not carry cargo or passengers, the tolls shall be reckoned upon their net tonnage as obtained by the Panama Canal rules of measurement, at 72 cents per net ton; provided, that if the sum obtained by multiplying the Panama Canal net tonnage by 72 cents, be less than that obtained by multiplying their United States registered net tonnage, or its equivalent, by 75 cents, the larger sum shall be collected.

4. Referring to the Proclamation of the President dated November 13, 1912, fixing Panama Canal rates, to the decision of the Attorney General in reference thereto, and subject to the conditions set forth in the foregoing paragraphs, Nos. 1, 2, and 3, the rates of toll for vessels using the Panama Canal will be as follows:

Rule 1—On merchant vessels carrying passengers or cargo, \$1.20 per net vessel ton—each 100 cubic feet—of actual earning capacity.

Rule 2—On vessels in ballast without passengers or cargo, 72 cents per net vessel ton—each 100 cubic feet—of actual earning capacity.

Rule 3—Upon naval vessels, other than transports, colliers, hospital ships, and supply ships, 50 cents per displacement ton.

Rule 4—Upon Army and Navy transports, colliers, hospital ships, and supply ships, \$1.20 per net ton, the vessel to be measured by the same rules as are employed in determining the net tonnage of

merchant vessels, under the Panama Canal rules of measurement.

5. From the foregoing it will be seen that before the proper tolls can be levied, it will be necessary for the admessurers at the Canal to know both (a) the net registered tonnage, or the equivalent thereof, of every vessel using it, domestic and foreign, in accordance with the *United States statutes* for estimating net registered tonnage, and (b) the *Panama Canal net tonnage*, as shown on her Panama Canal certificate of measurement. The official papers carried by a United States commercial vessel, in the form of her register or enrollment, will give (a) her net registered tonnage, and in her case no further steps will be necessary; but every foreign vessel, and every domestic vessel such as transports, colliers, supply and hospital ships, should obtain (a) a certificate from any official who may be authorized to issue it, specifying her net tonnage in accordance with the United States statutes; otherwise, she will of necessity be delayed in Canal waters pending remeasurement for this purpose.

6. Steps have been taken to authorize the measurers, both in the United States and abroad, now authorized to issue Panama Canal certificates, to further issue (a) certificates of net registered tonnage in accordance with United States statutes, and an application should be made at once by every such vessel holding a Panama Canal certificate to the measurer who issued her original certificate for the additional one required. In event the original measurer has not sufficient data at hand to enable him to issue the required certificate, advantage should be taken of the first opportunity to have the ship remeasured by anyone authorized to do so and a new certificate obtained. It follows, however, that the original measurer for her Panama Canal certificate can, from the data then obtained, since much of it is common to both, issue her second certificate with less trouble and delay than anyone else.

7. In future, when vessels are measured for Panama Canal certificates, either in the United States or abroad, the measurers should be requested to enter and certify on such certificates the (a) net registered tonnage in accordance with the United States statutes, in addition to the data already required for Panama Canal measurements.

8. The general effect of this change will probably be toward a small reduction in tolls in the majority of cases; in no case will the tolls be increased, but until the new measurement required (a) has been officially obtained, full deposits on the old basis (b) should be continued, and in the same manner as formerly.

9. No other change is made in the collection of tolls, and all previous regulations in relation thereto will remain the same.

10. All claims for differences arising under the Attorney General's decision should be addressed to The Governor, The Panama Canal, Balboa Heights, Canal Zone.

GEO. W. GOETHALS,

Governor.

BALBOA HEIGHTS, C. Z., March 15, 1915.

Launch Connections for Taboga.

The dredge landing at Balboa docks used by the launch for Taboga has been reopened, and in the future guests for the Hotel Aspinwall can take either the labor train or the street cars direct to the docks.

CANAL TRAFFIC IN FEBRUARY.

Actual Tonnage Less than in Preceding Months, but Proportion is Same.

Ninety-one seagoing vessels passed through the Canal during the month of February, carrying a total of 424,606 tons of cargo.

This was less cargo than had passed through the Canal during any month since October, 1914, but the daily proportion of cargo for the 28-day month of February was practically the same as the daily average transit during the months of November, December, and January. In February, the daily average was 15,164½ tons.

Four vessels passed through in ballast. For the others, the average cargo was slightly over 4,880 tons. The distribution of the vessels over the principal routes was as follows:

Route.	No. Vessels.	Cargo tonnage.
Coastwise, eastbound.....	19	92,281
Coastwise, westbound.....	13	64,498
U. S. Pacific coast to Europe.....	14	92,658
Europe to U. S. Pacific coast.....	3	8,720
South America to U. S. and Europe.....	17	80,634
U. S. and Europe to South America.....	3	8,535
U. S. Atlantic coast to Far East.....	11	67,560
Far East to U. S. Atlantic coast.....	1	7,000
Central American, eastbound.....	2	2,046
Central American, westbound.....	3	674
Vessels without cargo.....	4
Total.....	92	424,606

The total cargo carried through the Canal to March 1, 1915, was 2,610,962 tons. Its distribution over the principal routes was:

Route.	No. Vessels.	Cargo tonnage.
Coastwise, eastbound.....	108	552,609
Coastwise, westbound.....	115	520,328
U. S. Pacific coast to Europe.....	76	511,840
Europe to U. S. Pacific coast.....	17	60,946
South America to U. S. and Europe.....	77	424,271
U. S. and Europe to S. America.....	30	131,578
U. S. Atlantic coast to Far East.....	54	324,598
Far East to U. S. Atlantic coast.....	3	21,500
Central American, eastbound.....	2	2,046
Central American, westbound.....	3	674
Miscellaneous routings.....	13	60,572
Vessels without cargo.....	46
Total.....	546	2,610,962

The total traffic in the American coastwise trade, through the Canal, has been 1,072,937 tons of cargo, which is slightly over 41 per cent of all the traffic through the Canal. The exchanges between the northern Pacific coast and Europe, totalling 572,786 tons, have been slightly less than 22 per cent of all traffic. Cargo to and from the west coast of South America has amounted to 555,849 tons, over half as much as the total United States coastwise trade, and over 21 per cent of the grand total. The total trade between the Atlantic coast of the United States and the Far East,

including Japan, China, Siberia, the Philippines, and Australia and New Zealand, has been 346,098 tons, over 13 per cent of all the traffic. The foregoing principal routes have been used for approximately 97 per cent of all the commercial traffic.

Of the four vessels passing through the Canal in ballast, all were bound from the Atlantic to the Pacific. Of the 92 vessels making the transit, 39 were bound from the Atlantic to the Pacific or westbound, and 53 from the Pacific, to the Atlantic, or eastbound. The division between eastbound and westbound vessels for the time of the commercial operation of the Canal has been 284 eastbound and 261 westbound vessels. Their distribution, with cargo, by months, is given below:

M'th.	Eastbound.		Westbound.		Total.	
	Ves-sels.	Cargo.	Ves-sels.	Cargo.	Ves-sels.	Cargo.
Aug.....	12	57,182	12	49,106	24	106,288
Sept..	30	186,776	27	135,262	57	322,038
Oct....	40	252,288	44	168,069	84	420,357
Nov....	38	242,291	54	206,510	92	448,801
Dec....	57	261,680	42	178,235	99	349,915
Jan....	54	240,875	44	208,082	98	448,957
Feb....	53	274,619	39	149,987	92	424,606
Total..	284	1,515,711	262	1,095,251	546	2,610,962

The tolls levied during the month of February amounted to \$403,219.16, bringing the total amount of tolls levied on barges and vessels passing through the Canal to \$2,365,358.73. This has been distributed as follows:

Period.	Amount.
Prior to August 15, 1914.....	11,610.69
August 15 to August 31.....	84,401.80
September 1 to September 30.....	269,863.00
October 1 to October 31.....	378,089.12
November 1 to November 30.....	387,242.40
December 1 to December 31.....	411,895.44
January 1 to January 31, 1915.....	419,037.12
February 1 to February 28.....	403,219.16
Total.....	2,365,358.73

Twelve vessels, other than those which passed through the Canal, entered the port of Balboa during February; those entering the port of Cristobal without passing through the Canal numbered 51.

Rent Payments Not to Be Sent Under Official Frank.

To all concerned—The Collector has received a number of remittances in payment of rent, light, and fuel bills enclosed in official business envelopes. This is not official business as defined by the Postal Laws and Regulations and postage must be paid on all such letters.

JOHN K. BAXTER,

Director of Posts.

BALBOA HEIGHTS, C. Z., March 19, 1915.

The estates of the abovenamed deceased employees of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against the estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other monies due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published

JOHN K. BAXTER,

Administrator of Estates.

CANAL WORK IN FEBRUARY.

Monthly Report of the Governor to the Secretary of War.

BALBOA HEIGHTS, C. Z., March 20, 1915.
The Honorable the Secretary of War,
 Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of February, 1915:

Department of Operation and Maintenance.

Lock operation and maintenance—The status of the fender chain work remained unchanged during February. The installation of the telephone system at Miraflores Locks was completed during the month, which completed the installation of the telephone systems at all locks. The work of grading dams and back fill at Miraflores and Pedro Miguel progressed satisfactorily.

The following lockages were made during the month:

Gatun, 93 lockages, 102 vessels; Pedro Miguel, 91 lockages, 106 vessels; Miraflores, 92 lockages, 107 vessels.

ELECTRICAL DIVISION.

The output of the power plants was: Gatun hydroelectric station, 2,785,830 kilowatt-hours; Miraflores steam station, 85,050 kilowatt-hours; Balboa power plant, 2,256 kilowatt-hours; total output, 2,873,136 kilowatt-hours.

The output of the Balboa air compressor plant was 129,438,628 cubic feet of free air, compressed to 105 pounds.

The electrical work at the substation at Gamboa for the new permanent pumping plant of the Municipal Engineering Division was completed and the substation was put in service during the month. Construction work on the substation at Darien for the high power naval radio station progressed satisfactorily during the month. Construction work was carried on in connection with the installation of underground conduit systems in the Ancon, Balboa, and Cristobal districts; the electrification of the dry dock shops at Mount Hope; the construction of barracks, quarters, headquarters buildings, etc., at Fort Grant; the construction of various buildings at Balboa, and the new freight house in Panama City. The painting of the track-span bridges of the 44,000-volt transmission line was practically completed during the month.

MUNICIPAL ENGINEERING DIVISION.

In addition to the work incident to maintenance, operation, and repairs, work was in progress on the following items of construction: Atlantic and Pacific fuel oil handling plants; improvements around Ancon commissary and construction of drains in Ancon; grading around quarters at Coast Artillery post, Balboa dump, and installation of water and sewer system and street pavement for the post; connections to water mains at Naos Island; re-surfacing and oiling of roads for the Canal Zone Government and Health Department; road construction and other improvements in the townsite of Balboa; construction of a concrete reservoir for water supply at Gatun; construction work on lock office buildings at Miraflores and Pedro Miguel; purification plant at Miraflores, and other parts of the new Panama waterworks. Pumping stations Nos. 1 and 3, at Gamboa and Balboa, respectively, were placed in operation on February 22, 1915. Water for the settlements at the southern end of the Panama Canal

and for Panama City is now furnished from the Chagres River at Gamboa.

METEOROLOGY AND HYDROGRAPHY.

The rainfall was above normal at all points except at Miraflores. On the Pacific coast the rainfall was triple the average amount, and on the Atlantic coast it was seven times the average amount. The monthly totals ranged from 14.32 inches at Brazos Brook to 1.17 inches at Miraflores. The maximum precipitation recorded in any one day was 7.12 inches at Colon on February 10, 1915. The estimated rainfall over the Chagres River basin figures 29 per cent above the average, or 6.05 inches against a 14-year average of 2.08 inches. The discharge at Alhajuela was 67 per cent above the 26-year February normal.

The elevation of Gatun Lake varied from 87.20 feet on the 10th, to 86.88 feet on the 11th and 27th, averaging 86.98 feet.

Division of Terminal Construction.

PACIFIC TERMINALS.

Shops.—The steel work for the crane extension at the north end of the machine shop aisle in building No. 1 was erected complete and riveted during the month. The riveting for the steelwork for the exhaust system collector in building No. 14 was completed.

Dry dock.—Hand excavation in connection with the work of preparing foundation was continued and amounted to 5,790 cubic yards. The material, consisting of rock, is used largely in the walls. Fourteen thousand three hundred and thirty-five cubic yards of concrete were placed. Of this amount 4,809 cubic yards were classed as reinforced concrete. One hundred twenty-three thousand six hundred and forty pounds of reinforcing steel and 18,118 pounds of fixed steel were placed. All steel for the dry dock crane has arrived on the Isthmus.

Coaling plant.—The floor in the west area was brought to grade. The steel work for the berm crane runways was erected, but was not riveted up at the close of the month. Work was begun on the floor of the unloader wharf and steelwork was erected between stations 5 and 10. Fifty-two lineal feet of trestle for the reloader wharf was built.

Quay wall and pier.—Steel for the two gangways for quay wall ij-mn, arrived on the Isthmus. The steel decking for section e-f was completed and two bays of d-e were erected and riveted. The amount of steel placed in quay wall was 238,530 pounds.

Fuel oil plant.—An 8-inch oil line connection between oil crib No. 1 and the oil handling plant, for Diesel engine oil, was installed. Work was begun on the forms for the bracing under the future floor of crib No. 1, and the remaining concrete to be placed in the caissons was put in; 181 cubic yards of concrete were placed as filler for the caissons and 73 cubic yards were placed in the braces.

Sosa Hill Quarry.—Rock excavation amounted to 38,834 cubic yards. Owing to the partial collapse of the east breakwater in the storm, rock filling there was discontinued on the 9th and the operations at the quarry reduced to that extent. The rock excavated was used for the Cristobal mole and for the Naos Island dock approach.

ATLANTIC TERMINALS.

East breakwater.—A heavy sea made up shortly after midnight on Monday night, February 8, 1915, increasing rapidly, and at 2.45 a. m. bents 596, 597, and 598 lost the caps, stringers, and decking, throwing the

lighthouse into the sea, and taking out all of the piles on the harbor side of bent 568. At 1.50 p. m. a train of 21 cars, with unloader, gradually went down with the trestle, and at about 4.35 a further section of the trestle went down, carrying with it two piledrivers. All of the wreckage will be salvaged.

Coaling plant.—All piledriving is now complete, except that for fender system. The sealing with concrete of the caissons under the north section of unloader wharf was begun. One thousand two hundred and thirty-one cubic yards of coral were excavated on west side of coal pocket. The driving of caissons is about 80 per cent completed and excavation about 65 per cent completed for north section of unloader wharf.

Floating cranes.—The work of repairing the crane *Ajax* is being held up, pending the receipt of material. No further tests were made of the crane *Hercules*. On February 18, 1915, the use of this crane was placed at the disposal of The Panama Canal in connection with certain repair work to the dredges in Culebra Cut. At the close of the month the crane was still in the service of The Panama Canal.

Marine Division.

Effective February 20, 1915, the name of the Division of Canal Transportation was changed to Marine Division and the title of Superintendent to Marine Superintendent.

Ninety-six vessels passed through the Canal in February, 53 northbound and 43 (including four launches) southbound. Collections for tolls amounted to \$403,219.16 and for pilotage to \$2,754.

Fourteen vessels were measured and 81 were inspected to see whether their certificates conform to the rules.

Dredging Division.

The total excavation for the month, including earth, rock, gravel, and sand, was 1,142,448 cubic yards, as follows:

	Cu. Yds.
Miraflores Locks to the sea.....	7,003
Balboa inner harbor.....	200,816
Culebra Cut.....	589,153
Gatun Locks to the sea.....	238,264
Approach channel.....	21,331
Shelter cove at Toro Point.....	37,349
Breakwater, Limon Bay.....	7,207
Chagres River gravel and sand.....	38,000
For Municipal Division at Balboa.....	3,325
Total.....	1,142,448

The hydraulic grader was engaged during the month in furnishing steam and water to the power drills and in washing down loose material on the north toe of Gold Hill. Work was started on the system of ditches for draining the Obispo Diversion into the Canal. The work of exterminating water hyacinths continued during the month.

Mechanical Division.

The increasing volume of work in this division necessitated the addition to the force of two clerks, one machinist, and six shipwrights, who were requisitioned from the United States.

Shop orders authorized during the month numbered 727, those left over from the previous month being 537, those completed during the month numbering 810, and those carried forward into March numbered 454. The output of the foundry was 114,640 pounds of iron, 57,495 pounds of steel, and 17,502 pounds of brass. Hostling was done on 4,792 pieces of equipment, and shop and field repairs were made on 6,720 cars.

The oil handling plant at Balboa was in operation during the month and handled

99,139.63 barrels of oil. The oil plant at Mount Hope was turned over on February 25, and was used in making delivery of oil from storage tanks of the Union Oil Company to the oil tanks of the Government on that date.

Building Division.

The following buildings were completed during the month: The medical storehouse at Ancon; the dairy buildings at Corozal; the motor bus-house at Balboa Heights; the conversion of three of the insane asylum buildings at Ancon into family quarters, and at Fort Amador two 4-family houses for officers were completed and turned over to the military authorities. Work on the remaining officers' quarters and army barracks progressed satisfactorily. The commissary building at Balboa is practically completed, with the exception of painting and the installation of shelving, counters, etc.

Supply Department.

The force report for the half month ending Wednesday, February 24, showed a total of 23,089 employees of The Panama Canal and Panama Railroad Company, of whom 3,465 were white Americans and 19,624 were laborers. Of the latter, approximately 259 were Europeans and the remainder West Indian negroes. The total force was reduced 1,408; Americans 219, laborers 1,189.

The occupants of Government quarters numbered 6,960 white Americans, of whom 3,730 were men, 1,581 women, and 1,649 children; 8,653 West Indians, of whom 5,601 were men, 1,302 women, and 1,750 children.

The value of material received during the month was \$433,802.52. It came forward in 26 steamers; the total weight of the cargo, exclusive of lumber and piles, was 14,867 tons. Some of the principal items were: 144,191 feet B. M. of lumber for stock, 223 piles, and 197,819 bags of Portland cement, etc.

Health Department.

General.—One case of smallpox occurred on the steamship *Panama* which arrived at Cristobal on February 3. The patient was taken sick on the 7th and removed from the ship on the 10th. The disease was contracted prior to his arrival on the Isthmus. No other cases have occurred. With this exception, no cases of yellow fever, smallpox, or plague have originated on or were brought to the Isthmus during the month. The death rate for disease for the Canal Zone, based upon a population of 31,948, was 5.63 per thousand, as compared with 13.72 for the preceding month and 13.86 for the corresponding month of last year.

Employes.—The health of employes continued good. The number of names on the pay rolls for the preceding month was 34,266. On this basis the admissions to hospitals and quarters, 840, gave a rate of 294.17 per thousand, as compared with 332.87 for the preceding month and 437.70 for the corresponding month of last year. The admission rates to hospitals for all diseases were: Whites, 329.22; blacks, 109.73, Europeans, 819.11, Americans, 258.22. The admission rates for malaria to hospitals and quarters, were: Whites, 137.39; blacks, 34.01; Europeans, 368.60; Americans, 103.88. The total number of deaths from all causes was 19. Of these, nine died from disease, or 3.15 per thousand, as compared with 4.38 for the preceding month, and 5.34 for the corresponding month of last year. Of the deaths from disease, one was an American and the other eight were blacks.

Accounting Department.

The cash balance in Canal construction appropriations on February 28, 1915, was \$10,756,154.34, and in the fortification appropriations, \$3,624,558.04. The payrolls for February, exclusive of Army quarters, storehouses, fortifications, etc., amounted to \$881,497.92, and the fortification roll amounted to \$43,334.37. Payments by the Disbursing Clerk in Washington amounted to \$984,295.81; by the Paymaster on the Isthmus, \$1,385,473.60. Collections on the Isthmus amounted to \$1,226,319.70, of which \$532,590.19 were repaid to appropriations, \$283,481.29 were commissary collections and other trust funds, and \$410,248.22 were covered into the Treasury as miscellaneous receipts. Of the miscellaneous receipts, \$403,219.16 were collected on account of tolls, as compared with \$376,810.88 for January. Deposits in the amount of \$237,821.30 were made with the Assistant Treasurer, to be applied in payment of tolls and other charges against vessels using the Canal. Canal Zone revenue collections and miscellaneous funds received, amounted to \$198,978.40, and the disbursements under the same heading amounted to \$482,063.13.

Executive Department.

DIVISION OF CIVIL AFFAIRS.

One hundred and forty-two licenses of all kinds were issued during the month. Twenty-four estates were settled, having a total value of \$734.44. At the port of Balboa, 77 vessels entered and 77 cleared; and at Cristobal, 119 vessels entered and 125 cleared.

Postal service.—Postmasters remitted on account of stamp sales, second-class mail collections, postage due collections, and box rent receipts, \$5,640.96. The money orders issued aggregated \$316,797. The fees collected thereon amounted to \$1,023.37. Of the total value of money orders issued, \$112,275 represents the value of deposit orders issued without fee. Deposit orders to the value of \$82,585 and postal savings certificates to the value of \$41,556 were paid. Balance of postal savings deposits on hand at the end of the month, represented by the unpaid certificates and deposit money orders, aggregated \$696,601, as compared with \$708,467 at the close of the previous month.

POLICE AND FIRE DIVISION.

Three hundred and thirty-one arrests were made during the month. Of these, 309 were males and 22 females. Fifty-seven convicts were confined in the penitentiary at the close of the month. Five persons were deported, all of whom were convicts who had completed their sentences in the penitentiary.

Twelve fires occurred during the month. The damage to Panama Canal and Panama railroad property amounted to \$25.

COURTS.

In the District Court, 10 civil, 27 probate, and 15 criminal cases were settled; 11 civil, 22 probate, and 20 criminal cases were filed, and 100 cases of all kinds were pending at the close of the month. In the magistrates' courts, 35 civil and 313 criminal cases were tried.

DIVISION OF SCHOOLS.

The total enrollment in the Canal Zone schools for the month was 1,552 for the white schools, and 1,382 for the colored schools. In the white schools the net enrollment was 1,101, the average number belonging, 1,033.9, and the average daily attendance, 990.1; in the colored schools the net enrollment was

1,304, the average number belonging, 879.1, and the average daily attendance, 718.1.

Panama Railroad.

Cargo handled at the Colon and Balboa agencies aggregated 116,892 tons, of which 17,883 tons were handled through the Canal in steamers of the Panama Railroad Steamship Line, as follows: from New York to Balboa 2,848 tons; from Colon to Balboa, 1,929 tons; total, 4,777 tons. From Balboa to New York, 10,777; from Balboa to Colon, 2,329; total 13,106 tons. Grand total, 17,883 tons.

Trestle work on the new terminal dock at Cristobal was completed; steel cylinders 57 per cent completed, excavation in cylinders, 35 per cent completed, and 23 per cent of the total amount of concrete required was placed in cylinders. Eighteen caissons were completed during the month, making a total to date of 51, or 24 per cent of the number required. The dredging work at pier No. 10 was completed and the driving of fender piles and fitting up of string pieces was started.

Respectfully,

GEO. W. GOETHALS,
Governor.

EXECUTIVE ORDER

Relative to the Production, Importation, Compounding, Dealing in, Dispensing, Selling, Distributing, or Giving away Opium or Coca Leaves, their Salts, Derivatives, or Preparations in the Canal Zone, under the Act of Congress approved December 17, 1914.

WHEREAS, the Act of Congress, approved December 17, 1914 (Public No. 223), is made specifically applicable in the Canal Zone, but further provides that

"The President is authorized and directed to issue such executive orders as will carry into effect in the Canal Zone the intent and purpose of this Act by providing for the registration and imposition of a special tax upon all persons in the Canal Zone who produce, import, compound, deal in, dispense, sell, distribute, or give away opium or coca leaves, their salts, derivatives, or preparations;" and

WHEREAS, the Auditor of The Panama Canal and the Collector of The Panama Canal perform in the Canal Zone corresponding duties in connection with the revenues of the Canal Zone as are performed in the United States by the Commissioner of Internal Revenue and the collectors of internal revenue, respectively;

NOW, THEREFORE, by virtue of the authority conferred upon me by the above quoted provisions of the said Act of Congress, it is hereby ordered:

SECTION 1. That in enforcing the provisions of the Act of Congress approved December 17, 1914, entitled, "An Act to provide for the registration of, with collectors of internal revenue, and to impose a special tax upon all persons who produce, import, manufacture, compound, deal in, dispense, sell, distribute, or give away opium or coca leaves, their salts, derivatives, or preparations, and for other purposes," the Auditor of The Panama Canal shall perform in the Canal Zone administrative duties like unto those the Commissioner of Internal Revenue is required to perform outside of the Canal Zone, and the Collector of The Panama Canal shall perform duties in the Canal Zone like unto those the collectors of internal revenue are required to perform in districts outside of the Canal Zone.

SEC. 2. That on and after the first day of March, 1915, no person shall produce, import, manufacture, compound, deal in, dispense, sell, distribute, or give away in the Canal Zone opium or coca leaves, their salts, derivatives, or preparations, unless he shall have complied with the provisions of the Act of Congress approved December 17, 1914, in the manner provided for in this Executive Order.

SEC. 3. That every person who by the terms of said Act would be required, if located outside of Porto Rico, the Philippine Islands, or the Canal Zone, to register with the collector of internal revenue of his district, his name or style, place of business and place or places where such business is to be carried on, shall register the like information with the Collector of The Panama Canal on forms to be prescribed by the Auditor of The Panama Canal. At the time of such registry and on or before the first day of July annually thereafter, every person who produces, imports, manufactures, compounds, deals in, dispenses, sells, distributes, or gives away any of the aforesaid drugs shall pay to the Collector of The Panama Canal a special tax at the rate of one dollar per annum, *Provided*, However, that any person who would not be required, if located outside of the Canal Zone, to register or pay a special tax shall not be required to register or pay the special tax as herein provided.

SEC. 4. That the Auditor of The Panama Canal, with the approval of the Governor of The Panama Canal, shall cause suitable order forms and blanks to be prepared and placed in the hands of the Collector of The Panama Canal for sale by such Collector to persons who shall have registered and paid the special tax as required by said Act and this Executive Order. The price to be paid for such order forms and blanks shall be one dollar per hundred, and the Collector of The Panama Canal shall be subject to the same limitation as to sales of said order forms and blanks as collectors of internal revenue in districts outside of the Canal Zone. The Collector shall account monthly to the Auditor of The Panama Canal for the special taxes collected by him and for all monies received by him from the sale of blanks, or for any other purpose under the provisions of said Act. The Auditor of The Panama Canal, with the approval of the Governor of The Panama Canal, shall provide such regulations as may be necessary to carry into full force and effect the provisions of this Executive Order. In providing such regulations the form of regulations prescribed by the Internal Revenue Commissioner and approved by the Secretary of the Treasury shall be followed so far as they can be made applicable to conditions in the Canal Zone.

SEC. 5. That the Auditor of The Panama Canal, with the approval of the Governor of The Panama Canal, shall have the right to make such inspection and take such action as may be necessary to enforce the provisions of the Act of December 17, 1914, under this Executive Order.

SEC. 6. That any person who violates or fails to comply with any of the requirements of said Act in the manner provided for in this Executive Order, in the Canal Zone, shall be subject to such penalties as are provided for in said Act. **WOODROW WILSON.**

THE WHITE HOUSE, March 1, 1915.

[No. 2142.]

OFFICIAL CIRCULARS.

Use of Bad Order Lidgerwood Cars.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., March 16, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

My attention has been invited to the fact that Lidgerwood cars which have been surveyed and ordered scrapped, or held in reserve, have not been immediately retired from service. I consider such practice dangerous and especially so on main line work, as these cars have been retired from service for the reason that they are unfit for service in their present condition, being in need of excessive repair which conditions do not warrant being made. Under no circumstances, therefore, should these cars be used for any purpose, either yard or main line work, and the practice of storing on them retired machinery or parts, bad order dump cars, etc., will also be discontinued, for the reason that good order cars are available. Should circumstances at any time warrant the use of cars requiring heavy repairs, the Panama railroad will arrange with the Mechanical Division to have same put in a safe operating condition, but they must not be returned to service without proper inspection and approval for service by the Mechanical Division.

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, Panama Railroad Company.

Quarters for Gold Employees.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., March 19, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Referring to paragraph 9 of Circular No. 627-5, "Quarters for Gold Employees":

While the effective date of the above circular is April 15, 1915, quarters now vacant or which may become vacant between this date and April 15 through the absence of the employe or his family, or both, will, upon written application from the employe, and with the approval of this office, be held for a period of 90 days, provided such quarters have not been previously vacated during the current service year.

GEO. W. GOETHALS,
Governor.

Pay Car Schedule.

THE PANAMA CANAL,
OFFICE OF PAYMASTER,

BALBOA HEIGHTS, C. Z., March 16, 1915.

The following approximate schedule for pay cars for all Panama Canal and Panama railroad employes will be followed, beginning with the April payment:

From Colon—

- 7th—Commissary silver employes, 1 p. m.
- 9th—Forenoon—Margarita, Coco Solo, scrap yards, Afternoon—Mount Hope depot, dry dock shops, and coaling station.
- 10th—Forenoon—Colon docks and coal hoist, Afternoon—Cristobal docks.
- 12th—Forenoon—Engineering and maintenance of way and duct line gangs in Colon and Mount Hope yards and main line to Gatun.

From Balboa Heights—

- 8th—Afternoon—Balboa docks and Panama yards, for Panama railroad employes.
- 10th—Forenoon—Leave 6.30; Naos Island, 7 to 7.30; Fort Amador to LaBoca road, 7.30 to 8.20; LaBoca road, 8.20 to 9.15; Balboa flats (old commissary), 9.15 to 9.25; east side dry dock, 9.30 to 10; Balboa material yard, 10.05 to 10.20; cement shed, 10.25 to 10.45; Ancon, back of Tivoli, 11 to 12. Afternoon—Balboa shops, 1 to 2.30; Corozal, 2.50 to 3.20; Miraflores Locks, south end, field office, and north end, 3.30 to 4.30; arrive Balboa Heights, 5.
- 11th—Forenoon—Leave 6.30; Pedro Miguel, 7 to 7.50, Las Cascadas to pontoon bridge, 8.10 to 8.50; Paraiso shops, 8.50 to 9.25; main line gangs, Pedro Miguel to Gamboa, 9.30 to 10.10; Darien, 10.25 to 10.35. Afternoon—Gatun, 11.10 a. m. to 12.30 p. m.; main line gangs to Darien, 1 to 2; Miraflores hill, 3 to 3.30; Miraflores substation, 4 to 4.20; arrive Balboa Heights, 5.

Silver employes will not be paid at either pay office between the first and twelfth of each month, except those having time vouchers on termination of service and except those employed inside the Administration Building. It is desired that all silver employes with regular pay tickets be paid only from the pay cars between the fifth and twelfth. Any employe who misses the pay car will be paid at either office after the twelfth.

All foremen, field clerks, and timekeepers are requested to advise silver employes of this notice and tell them to wait for the pay car as they will not be paid at the offices during this period.

All outside payments not scheduled above will be made on such dates as best suit all concerned, which dates are agreed upon as soon as possible each month.

R. W. GLAW,
Paymaster.

Approved:

GEO. W. GOETHALS,
Governor.

Purchasing Reduced Rate Tickets for Trip through Canal.

THE PANAMA CANAL,
OFFICE OF EXECUTIVE SECRETARY,
BALBOA HEIGHTS, C. Z., March 17, 1915.

To all concerned—Effective April 1, 1915, it will be necessary for employes to present form PC-495, properly signed and validated, in order to purchase a reduced rate ticket for a trip through the Canal. No reduced rate tickets will thereafter be sold to employes who merely show their brass checks.

C. A. MCLVAINA,
Executive Secretary.

Proposals for Taking Down Steel Tower Tank at Gatun.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., April 1, 1915, and then opened, for taking down the 400,000-gallon steel tower tank at Gatun, and completely dismantling the tower, tank, and all pipe connections above the ground, and delivering all parts on an area immediately in front of the Gatun railroad station.

Specifications, form of contract, and proposal may be obtained upon written application to the Chief Quartermaster, Balboa Heights. General drawings of the tank may be examined at the office of the Resident Engineer, Division of Municipal Engineering, Balboa Heights, and further information at the site of the tank may be obtained upon application to Mr. E. H. Chandler, office at Cristobal, phone 57 Colon.

Bids must be accompanied by cash, certified check, or bond for 15 per cent of the amount bid.

The Panama Canal reserves the right to reject any or all bids.

Proposals should be marked "Proposal for taking down steel tower tank at Gatun" and addressed to the Chief Quartermaster, Balboa Heights, C. Z.

Sale of Transits and Levels.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

BALBOA HEIGHTS, C. Z., March 12, 1915.

Sealed bids will be received at the office of the storekeeper, Supply Department, Balboa, C. Z., until 2 o'clock p. m., April 7, 1915, when they will be opened in the presence of attending bidders, for any or all of 12 transits and 10 levels now on hand at Balboa storehouse. These instruments may be seen on any working day between the hours of 7 to 11 a. m. and 12 to 4 p. m. on application to this office. The right is reserved to reject any or all bids or any combination of bids. Bids must be sealed and plainly marked "Proposal to purchase transits and levels," addressed to the Storekeeper, Supply Department, Balboa, Canal Zone.

R. K. MORRIS,
Storekeeper, Supply Department.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., March 22, 1915.

The following insufficiently addressed letters, originating in the United States or its possessions, have been received at the office of the Director of Posts, and may be procured upon request of the addressee:

COMMISSARY DEPARTMENT.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.; with the exception that the Balboa store's afternoon hours are from 2.30 to 6.

The gold departments of the Cristobal store will open at 2 p. m., on Saturdays.

Cold Storage Prices.

The following retail prices of cold storage provisions will be effective March 25, 1915:

FRESH MEATS.		Price
Mutton—Stewing, per pound		9
Shoulder, trimmed, per pound		12
Leg (8 to 10 pounds), per pound		19
Short cut, chops, per pound		23
Shoulder, chops, per pound		14
Lamb—Stewing, per pound		12
Shoulder, trimmed, per pound		15
Leg (5 to 8 pounds), per pound		24
Chops, per pound		29
Chops, shoulder, per pound		18
Veal—Stewing, per pound		12
Shoulder, for roasting (not under 4 lbs.), per pound		15
Chops, shoulder, per pound		20
Chops, per pound		30
Loin, for roasting, per pound		30
Cutlets, per pound		36
Beef—Suet, per pound, special		3 1/2
Soup, per pound, special		7
Soup, per pound, native		5
Soup, bones, per pound, special		2 1/2
Stew, per pound, special		11
Stew, per pound, native		8
Plate, per pound, special		12
Plate, per pound, native		8
Corned, No. 1, per pound		8

JOINT LAND COMMISSION.

Notice of Awards.

In the matter of sundry claims, Award No. 74, docket numbers as shown, March 17, 1915—An award is hereby made against the United States, in favor of the persons hereinafter named, in the sum of \$2,071 United States currency.

This award shall be paid to the claimants hereinafter named, in the amounts hereinafter specified, on or before the 17th day of April, 1915, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum until paid:

Francisco Campos, docket No. 299—For all rights, claims, and other interests in growing crops, fruit trees, and other improvements which the said Campos may possess or may have possessed in the lands of Cardenas y La Ramona, not covered by payment of the disbursing officer, made in 1908, of \$750 U. S. currency, the sum of \$1,600 U. S. currency.

Victorino Fierro, docket No. 297—For all rights, claims, and other interests in growing crops, fruit trees, and other improvements which the said Fierro may possess or may have possessed on the lands of Cardenas y La Ramona, the sum of \$150 U. S. currency.

Manuel Gonzalez and Augusto Espinosa, docket No. 319—For all rights, claims, and other interests in growing crops, fruit trees, and other improvements which the said Gonzalez and Espinosa may possess or may have possessed upon the lands of Cardenas y La Ramona, the sum of \$171 U. S. currency.

Irene de Leon and Esteban Lasso, docket No. 336—For all rights, claims, and other interests in growing crops, fruit trees, and other improvements which Esteban and José Maria Lasso may possess or may have possessed on the lands of Cardenas y La Ramona, Irene de Leon being the mother and sole heir of said José Maria Lasso, now deceased, the sum of \$150 U. S. currency.
 Total, \$2,071 U. S. currency.

JORGE E. BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule of Dismissal.

In the matter of sundry claims, rule of dismissal No. 175, docket numbers as shown, March 16, 1915—With reference to the following claims, the evidence before the Commission is that settlement therefor has been made by the United States:

Claimant.	D't.	No.	Tax Nos.	Date of payment.
Alvarez, Julian	301	131 & P-74.		11-24-13
Baldecchi, Augusto	325	C-2025 & C-		12-30-13
Gutierrez, José F.	302	129 and G-		12-23-13
				2007.
Reed, William	326	C-2004		11-16-13

In view of the above settlements, no further action is necessary by the Commission, and the foregoing claims are therefore dismissed.

JORGE E. BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Stages of the Chagres River, Gatun Lake, and Miraflores Lake.

Maximum heights of the Chagres River, Gatun and Miraflores Lakes for the week ending midnight, Saturday, March 20, 1915:

	14.4	0.7	15.8	-0.5

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0½ (midnight) to 23½ (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47 p. m.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans for all States. Due at New Orleans on the following Tuesday.

Every Saturday to New York, for all States. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

*Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*NOTE—The sailing on Monday, April 5, will not land mail in New York until Tuesday of the following week; hence, despatches on that date will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7:10 a. m., connects with the despatches for this sailing.

Fuel and Supplies.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in hunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Cristobal or Balboa from plants of The Panama Canal, or from the private corporations which have tanks at the terminals. The present price for fuel oil supplied by The Panama Canal is \$1.25 per barrel of 42 gallons. The prices made by the corporations may be obtained on application to them.

Diesel engine oil is for sale by the Union Oil Company, at 45 shillings per ton of seven barrels. This company also handles fuel oil.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock, with a minimum charge of \$3. Vessels may take up from the fresh water sections of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light, and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa.

The cable address of The Panama Canal, on the Isthmus, is "Panacan, Panama," in the United States, "Panacan, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C." for delivery in the United States.

Sailings of Vessels in Regular Service with the Isthmus.

REGULAR CONNECTIONS THROUGH THE CANAL. Approximately regular services between the Atlantic and the Pacific seaboard from Boston, New York, Philadelphia, and Baltimore, occasionally Charleston and New Orleans, to San Pedro, San Francisco, Portland, and Puget Sound, and return, are maintained at the American-Hawaiian Steamship Company, with a

sailing each way about every five days; the Luckenbach Steamship Company, with a sailing each way about every 10 days; Sudden and Christensen, approximately fortnightly; the Atlantic and Pacific Steamship Company, about every three weeks; and the Boston and Pacific Line, and the Arrow Line, each sending a vessel each way about once a month.

Between the east coast of the United States and the west coast of South America, fortnightly services are maintained by the Merchants' Line and by the New York and South America Line; the West Coast Line has sailings each way about every four weeks.

Between the west coast of the United States, with connections to lower British Columbia, and Europe the following lines are in service: The Harrison-Direct Line, monthly; the Maple Leaf Line, about every six weeks; the East Asiatic Company, monthly, and the Johnson Line, every six or seven weeks.

The Pacific Steam Navigation Company is operating approximately a fortnightly service between the west coast of South America and Liverpool, by way of the Canal, with either direct vessels or connections at Colon with vessels of the Royal Mail Steam Packet Company.

The American-Australian Line has been sending vessels through the Canal about fortnightly from New York to ports in Australia and New Zealand.

PACIFIC COAST CONNECTIONS.

The Pacific Mail has sailings about every 10 days between Balboa and San Francisco, with calls at Puatrenas, San Juan del Sur, Corinto, Amapala, La Union, La Libertad, Acajutla, San José de Guatemala, Champerico, Ocos, Salina Cruz, Acapulco, Manzanillo, San Blas, and Mazatlan. The company also operates a direct line between Balboa and San Francisco, with sailings about every six weeks; and a Panama-Central American line, between Balboa and Ocos, making one round voyage monthly, and calling at all the ports abovenamed between Balboa and Ocos.

Grace & Company maintain a service with a vessel plying between San Francisco and Valparaiso, calling at way ports. It makes a round voyage about every 10 weeks.

The Peruvian Steamship Company maintains a weekly service between Balboa and Callao, with calls at Guayaquil, Payta, Eten, Pacasmayo, and Salaverry. Every second voyage includes Mollendo.

The South American Steamship Company's vessels sail on alternate Mondays from Balboa to Valparaiso, calling at Paíta, Eten, Pacasmayo, Salaverry, Callao, Mollendo, Arica, Iquique, Antofagasta, and Coquimbo.

The Pacific Steam Navigation Company has sailings on alternate Mondays for Peru and Chile; every 10 days for Ecuador; and on alternate Mondays for Colombian and Ecuadorian ports.

The Toyo Kisen Kasha operates a bimonthly service between Hongkong and Coronel, Chile, calling at the principal ports on the west coast between Los Angeles and Coronel.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways, between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro, and an additional weekly sailing to Bocas del Toro.

The Royal Mail Steam Packet Company maintains a fortnightly service between Colon and the United Kingdom, making the following way ports: Cartagena, Puerto Colombia, Trinidad, and Barbados. The Royal Mail vessels arrive in Colon on Saturdays and sail on Tuesdays.

The Compagnie Generale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Curapano, Trinidad, Martinique, Guadeloupe, and Santander; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Curapano and Trinidad.

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curacao, Puerto Cabello, and Barcelona.

The Compañia Trasatlantica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curacao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls enroute, the vessels sail from Genoa on the 8th day of each month.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing every Saturday, direct from Cristobal; and every Thursday, direct from New York; between Colon and New York by the United Fruit Company, sailing via Kingston weekly and via Havana weekly; between Cristobal and New Orleans by the United

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. To others, the subscription rate will be \$1, United States currency, per annum, in the United States and its possessions; Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

New Form of Canal Certificate.

Pursuant to the modifications in the rules for collecting tolls on vessels passing through the Canal, a supply of a new form of Panama Canal tonnage certificate, with corrections and additions to the present form, has been ordered through the Washington office of the Canal. Twenty-five hundred copies are to be sent to the Isthmus as soon as practicable, and further distribution will be made from Washington to those persons in the United States and abroad who are authorized to measure vessels for the Canal. Pending the issuance of the new forms, a supplemental form for the old certificate is being distributed, for use in supplying additional information so that the net United States registry of the vessel may be determined, and tolls may not exceed an amount equivalent to that produced by multiplying the net United States tonnage by \$1.25.

Arrival of the "Northern Pacific."

The passenger steamship *Northern Pacific*, a sister ship of the *Great Northern* which passed through the Canal on February 2, arrived at Cristobal in the afternoon of Tuesday, March 30, and started through the Canal in the morning of March 31. The vessel is on the way from Philadelphia to San Francisco with 367 passengers, and is on her maiden voyage, as was also the *Great Northern* in making the transit of the Canal. The two ships are to be used in a coastwise service between Portland, Ore., and San Francisco.

Disposing of Obsolete and Retired Equipment.

In the sale of obsolete and required equipment formerly used in the Canal and Panama railroad construction work, the disposal of a No. 8 rock crusher to the France Stone Company, for \$800, and of three barges to A. Levingston for \$4,000, were among the more important transactions in February. Delivery was made of three of 11 Marion steam-shovels sold in January to the France Stone Company for a total of \$30,000.

Publications of The Panama Canal.

The Panama Canal has issued the following publications, which will be supplied free to interested parties making application for them:

"Official Handbook of the Panama Canal" (fourth edition, 1913), a manual of popular information about the Canal and its construction prepared primarily for the layman. Paper, five by nine inches, 61 pages, with map inserts.

"Rules and Regulations Governing the Operation and Navigation of the Panama Canal," the Executive Order of July 9, 1914, setting forth the general rules governing the transit of vessels through the Canal; of primary interest to owners, agents, and masters of vessels; previously published as Governor's circular No. 604-17; paper, library size, 5 $\frac{3}{4}$ by nine inches, 37 pages.

Various circulars, and notices to steamship lines, covering details of business with The Panama Canal.

A second edition of "Sailing Directions and General Information," designed primarily for the use and information of mariners making the Canal but containing a great deal of matter of value to shipowners and agents, is now in preparation.

Requests for any of the above should be addressed to The Panama Canal, Balboa Heights, Canal Zone.

Locks Guards Assisting in Enforcement of Quarantine Regulations.

In order better to protect the Canal against infection from the ships permitted to make the transit "in quarantine," the infantry guards stationed at the several locks are co-operating with the sanitary officers in enforcing strict compliance with the regulations covering the transit of such vessels. Copies of the special regulations for passage in quarantine have been furnished the military headquarters at the locks, and all sentries are advised that ships passing through the Canal in quarantine may be known by the fact that they fly the yellow quarantine flag. They are further instructed that no one be allowed to enter or leave such a ship, or take cargo on or off of it, without written authority from the quarantine officer or quarantine guard on board; that when such a ship is tied up to the lock walls, all lines leading to the shore must be provided with rat-guards, the ship must be breasted off at least six feet from the lock walls, and the gangplank is to be kept raised at all times; and that any infringement of the regulations should be reported immediately to the quarantine officer or quarantine guard on board and to the proper military authorities.

Rent May Be Paid On Pay Car.

To employes—Hereafter, payment of rental and charges for electric current may be made to representatives of the Collector upon the pay car.

H. A. A. SMITH,
Auditor, The Panama Canal.
BALBOA HEIGHTS, C. Z., March 31, 1915.

NEW YORK OMITTS RESTRICTION

Completeness of Quarantine at Canal Assures Protection against Plague.

On account of the satisfactory quarantine practices observed by The Panama Canal, the health officer of the port of New York issued an order on March 15 exempting vessels touching at Balboa from fumigation on arrival at New York.

Prior to that time the quarantine authorities at New York had required fumigation of vessels which stopped at Balboa on the way through the Canal, from whatever port of original or later sailing, in the belief that such vessels might have become contaminated with plague-infected rats off ships coming from plague ports in South America. This fumigation always caused delay to vessels at New York and the chief health officer of that port, desiring to minimize interference with commerce, addressed an inquiry to the Chief Health Officer of The Panama Canal regarding the practices at Balboa, with a view to determining the necessity for fumigation of vessels from the Canal.

In reply the Chief Health Officer stated that great care is taken to prevent infection of the Canal ports or of shipping in them by ships arriving from the infected ports of South America; that, in his opinion, there is no likelihood of infection occurring in such manner, and that there had not been a case of human or rat plague on the Isthmus since 1905, except one or two human cases taken off at quarantine. He enclosed a copy of the quarantine regulations in force, pointed out the legal steps taken to enforce observance of them, and concluded with these paragraphs:

"Our requirements concerning hides, grain, etc., are considered so severe that it may be said that these articles have ceased to come from plague-infected places.

"The wharves at Balboa are either modern, all reinforced concrete without harboring places for rats, or, in one instance, a combination of concrete, steel, and wood. Rat catching is constantly carried on on all wharves and all rats obtained (27 caught and two found dead in February) are examined for plague, so that we can state that rats are not numerous on any of our wharves, and that no rat plague exists. The Board of Health laboratory examines 800 to 900 rats and mice per month; no infected animal has been found in 10 years, so we may say there is no rat plague on the Isthmus.

"Should any condition arise that is considered apt to endanger other ports, such as the discovery of rat plague, the local occurrence of human plague, or any necessary weakening of our quarantine regulations, notice would be sent out from here."

It was upon the receipt of the foregoing explanations that the health officer of New York issued his order of exemption. The officials of the Canal quarantine service regard this action as additional vindication of their policies, and point out to steamship agents and masters who occasionally protest against the strictness of the regulations that the faithful observance of the regulations is after all a simple social safeguard, without which they would ultimately be put to greater inconvenience and expense than are necessitated by present practices.

Employees Desiring Work on Alaskan Railway.

The following statement is published at the request of Mr. H. P. Warren, a representative of the Alaskan Engineering Commission, at present on the Isthmus. Mr. Warren's address is the Hotel Tivoli, Ancon.

The following information may be of interest to men who desire to secure employment on the Government railway work in Alaska:

The route of the railway is not yet fixed, the decision resting with the President.

The work during the first year will be comparatively small as it will require time to open up the line, get in equipment, etc., and the appropriation is limited.

The scale of wages for clerks, skilled mechanics, foremen, etc., will be somewhat lower than has prevailed on the Isthmus, conforming to the pay of men in similar positions on the railroads of western Canada. The labor will doubtless be white Americans.

The present intention is to do both contract and force account work.

The Alaskan Commission does not purpose to furnish married quarters for employes. It is possible to rent houses on the coast towns where living conditions are good for a new country. There are very few places along the line of the railroad where houses exist at present. Where necessary, the Commission will furnish temporary living quarters for men employed on the work. Boarding facilities will also be furnished where necessary.

As far as possible, work will be continued throughout the year, but it is impossible, at present, to estimate what proportion can be so handled.

Those who wish to secure work on this railroad should send on application to the Alaskan Engineering Commission, Bureau of Mines Building, Washington, D. C., where it will receive consideration when positions are open. It is not necessary to be a civil service man to secure an appointment.

Employes must pay their way to Seattle; thence to Alaska transportation will be furnished.

The undersigned is not in any sense a recruiting agent but will be glad, of course, to answer questions he can consistently concerning the work.

H. P. WARREN.

The American steamship *Crofton Hall*, which passed through the Canal on January 12 on its way from Valparaiso to New York in the west coast service of the New York and South America Line, has been placed in passenger service between New York and Buenos Aires, calling at Montevideo. This is said to be the first vessel to enter the regular River Plate passenger service under the American flag.

PUBLIC STABLE IN PANAMA.

To Be Erected by Panama Railroad Company as Sanitary Measure.

Final instructions have been issued for the construction by the Panama Railroad Company of a public stable in the city of Panama which shall afford accommodations for the animals now housed in various private stables in the city. This has been done for sanitary purposes. It is believed that the death rate in the city, especially of children, has been considerably augmented by the transmission of diseases by flies; and it has been pointed out that the stables as at present conducted are prolific breeding places for rats, the principal carriers of plague. In the event that plague should enter the Isthmus one of the first steps in protection would be the demolition of the private stables. It has been decided to eliminate this menace before the grave necessity arises.

The plans adopted call for the construction of a modern, sanitary stable of 250 stalls on the lot of land lying between the municipal and Chinese cemeteries, on the road leading to Balboa. The stalls will be rented for \$2.50 United States currency per month. This site was selected and work was begun there early in March, but final decision on the matter was held up on account of various objections. On March 16 the Governor appointed a committee, consisting of the Chief Health Officer, the Special Attorney, the Superintendent of the Panama railroad, and the Executive Secretary, to consider the situation and recommend a policy. The committee submitted its report, on which final action was based, on March 22. The report stated, in part:

"The committee held its first meeting on the afternoon of March 18, as directed, and spent the time in making an inspection of practically all of the stables in Panama city. We found an almost continuous chain of stables from the point where the street from Ancon Hospital joins Central Avenue, extending in a southerly direction to the ocean at the edge of the Coco Grove district, these stables bordering the outskirts of the city.

"We also found stables in the heart of the city, one being in the ruins of an old church, a stone's throw from Cathedral Plaza; another, next door to the Union Club; quite a number in the Guachapali district near Calidonia road; and a further number directly on the Calidonia road.

"The first stable that we visited is being torn down by the owner, and will be converted into an automobile garage. Real estate in that

vicinity is very valuable, and the owner will suffer no loss by tearing out the old stable, but will, in fact, be benefited. A striking instance of the wisdom of the sanitary regulations with respect to the construction of stables was pointed out at this place, there being a small concrete platform about 10 feet wide and 15 feet long, under which the rats had burrowed to build their nests. It was an ideal place for them as they were snug and dry under this concrete, and when it was torn out 98 rats were killed in that one place. If the concrete had been carried down at the edges two feet below the surface, as required by the present regulations, the rats would not have nested there as they do not burrow that deep into the ground.

"Ninety per cent of the stables we visited were in an exceedingly dilapidated condition, being built of old second-hand lumber and galvanized iron, being surrounded by or in close proximity to tenement houses, stores, and shops of various kinds, so that even though it were possible to keep rats from nesting on the actual stable premises, it is not possible to keep them from nesting in the adjoining buildings and using the stables for feeding grounds. We found grain scattered about the stalls and mangers in practically all the stables, and where this condition exists, with breeding places for rats in the vicinity, the rats are bound to be found in large numbers.

"Most of the stable owners apparently make an effort to keep the stalls swept, and the stables appear to be cleaned of manure every day, but it is impossible to prevent small quantities of manure accumulating between the rough stones and imperfect concrete stable floors, many of which are in very bad condition, and it is in these small accumulations of dirt and filth that the flies deposit their eggs, and it is from this source that the pest of flies in Panama city originates.

"We found in many of the stables, horses and mules suffering from running sores, and others apparently sick from other causes. Primitive remedies were usually applied, but the animals needed the care of a veterinarian.

"The stables are in most part constructed on land, which, if the stables were all removed, would be very valuable for tenement house sites, and in view of the present congestion in the city of Panama it would seem that the owners of these sites would be financially benefited if they would remove their stables and use this valuable territory for apartment houses or stores.

"We visited the site of the proposed new stables to be built by the Panama Railroad Company and found that a large amount of

The estates of the abovenamed deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against the estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published

JOHN K. BAXTER,
Administrator of Estates.

work has already been done on this site, and that it is an ideal site for stables, being dry, well drained, and removed from the residential section of Panama.

"We also visited the municipal stables of the Government of Panama out on the Calidonia road and found them in excellent condition. It was a relief to see well kept and clean stables after visiting the dirty, dilapidated, rat-infested and fly-breeding stables in the other sections of the city.

"The municipal stables are constructed in accordance with sanitary regulations, and are satisfactory in their present site, and do not offer the menace to health that the other stables offer.

"This concluded our inspection for the afternoon.

"The committee held its second and final meeting on the afternoon of March 20 and discussed the various features of this stable question. The committee gave consideration to the letter of the Secretary of Foreign Relations of Panama, dated March 6, protesting against the construction of stables on the tract adjoining the cemeteries in Panama because of the fact that remains of certain distinguished citizens of Panama, who are held in great veneration, rest there. The committee fully appreciates the sentiment expressed by the Honorable Secretary, but can not believe that the construction of stables in that vicinity can be or should be construed as indicating any lack of veneration or respect for the memory of the distinguished men referred to.

"If it were intended to establish saloons or disreputable resorts of any kind on this tract, the protest would have more force, but the purpose is altruistic, and the Panama Railroad Company is investing large sums of money in this improvement solely to better the health conditions of Panama and not in any sense as a commercial enterprise. The stables will be clean, sanitary, well built, well laid out, and there will be nothing objectionable in their establishment there so far as the committee can foresee. It is not surprising to the committee, after visiting the stables in Panama City, that there should be some misconception in the minds of the citizens of Panama regarding the thought of having stables near the cemeteries, but the stables to be constructed will not be of the class with which many of the residents of Panama are familiar.

"Furthermore, the committee noticed in its inspection tour that a large stable of the dilapidated class, generally described above, is situated on the opposite side of the same cemetery, and, in fact, the wall of the cemetery is used as a part of the construction of the sheds used for this purpose. Across the street from this stable and touching another cemetery is the "red light district" of Panama, the most disreputable, troublesome, and immoral part of the city, this district having been set aside by the authorities of Panama.

"It therefore seems to the committee that the protest of the Government of Panama with respect to the construction of model stables on the tract referred to is, in view of the above facts, without force, and the committee recommends that the construction of the stables proceed as originally planned.

"The question of the number of stalls which ought to be constructed at once was given consideration, and the committee is of the opinion that about 250 stalls should be built

immediately, and that a charge should be made of \$2.50 U. S. currency per month per stall, which will include the use of the stall, the use of feed bins and lockers, shelter for coaches, the advice of a veterinarian, the free use of water for the animals and for washing carriages, and the removal of litter from the stalls. It is planned to build a warehouse, where supplies may be purchased if desired, and to afford whatever facilities may be required by the owners of horses and carriages. It is thought that it will be preferable to rent these stores or warehouses to merchants, who may conduct their business with the owners of the horses and carriages, rather than to have them operated by the Panama Railroad Company.

"There are a few stables in the city of Panama which are constructed on unimproved sites, and these stables should be immediately removed, as they do not comply with either the old or new sanitary regulations, and the committee recommends approval of the program of the Health Department in this respect.

"The other stables which are on improved sites are in practically all cases of so poor construction, and fail in so many important respects to comply with the regulations of the Health Department respecting the construction of stables, that it will be necessary for the owners to make very extensive repairs and alterations, which in most cases will be more difficult than it would be to build entirely new stables in a new location.

"Furthermore, the Chief Health Officer informs the committee that while such reconstruction of old stables will be permitted by the Health Department, the Health Department will not guarantee that in case of an outbreak of plague or other menace to the public health, these stables will be permitted to continue operations in their present locations. In fact the first step the Health Department would take in such an event would be to order the immediate abandonment of these stables, and the destruction of any parts of them which might be suspected of harboring rats.

"It furthermore appears to the committee that in view, first, of the value for other purposes of land occupied by stables, second, the cost of reconstructing these old stables to comply with the recent regulations, and third, the insecure tenure of these locations in case the protection of the public health should require their abandonment, that it would be most unwise and hazardous for the stable owners to reconstruct the old stables, rather than to rebuild in the areas set aside for that purpose.

"The committee recognizes the fact that doubtless a number of these stable owners are comparatively poor men to whom it would be somewhat of a hardship to build new stables, although if the stable owners also own the land upon which they are constructed there would be no hardship whatever because of the greater value of the land for other purposes.

"It is to meet this possible hardship that the Panama railroad stables are being constructed, with the hope that in view of the great advantages offered and the reasonable charge to be made, the owners of horses and coaches will eventually abandon their present stables and move into the new.

"To this end the Health Department has not been insisting upon the reconstruction of these old stables, and will not insist upon this action

until the new Panama railroad stables are ready for occupancy, and approval of the above program is respectfully recommended.

"It was brought to the attention of the committee that modern sanitary regulations in Porto Rico and Cuba absolutely prohibit the stabling of horses, mules, or other domestic animals within the residential parts of the cities, and it seems most regrettable that the authorities of Panama do not stand ready to assist the Health Department more in this most important matter.

CONCLUSION.

"The program recommended by the committee, therefore, is as follows:

"(1) The immediate removal of stables which do not comply with the old sanitary regulations which prohibit the continuance of such stables on unimproved streets.

"(2) The immediate construction of about 250 stalls by the Panama Railroad Company on the Huerta-Sandoval tract as originally planned.

"(3) The temporary withholding of the enforcement of the regulations respecting the construction of stables until accommodations are ready in the Panama railroad stables."

Improved Telephone Service.

The Canal telephone system has been improved in excess of expectations by the use of the recently installed cable system over the Isthmus, and it is stated by those in charge of the telephones that the number of calls over the lines has increased at least 30 per cent in the last three months, on account of the greater ease in securing long distance connections and the improved clarity of transmission.

The switchboards and trunks have been so arranged as to eliminate half of the former number of exchanges. The exchanges at Corozal, Panama, Balboa, Balboa shops, and Mount Hope were done away with, and business is now handled through the main line exchanges of Cristobal, Gatun, Pedro Miguel, Empire, and Balboa, with private branch exchanges ("P. B. X." boards) at the Washington and Tivoli hotels, Paraiso shops, and the Governor's office. The rearrangements have made it possible to carry on a long distance transmission with no more trouble than is ordinarily experienced in putting a local call through one exchange in the United States. The transmission cables, equipped with Dr. Pupin's loading coils, have improved the audibility of the instruments, and possess a marked freedom from cross-talk.

It is proposed ultimately to eliminate the exchange at Empire, and to make the Empire service part of a system of "P. B. X." boards, connected with the Canal trunks, which will include Toro Point, Margarita Point, Las Cascadas, Empire, Culebra, Balboa headquarters building, and Naos Island.

Twenty-ninth Infantry Arrives.

The Twenty-ninth Regiment of Infantry, United States Army, arrived at Cristobal on the transport *Buford* on Thursday, March 25, and is now stationed at Camp Gaillard, Culebra. The regiment had sailed from New York City on March 17. It consists of 41 officers and 869 men; before sailing for the Isthmus it had been divided into three detachments, stationed at Buffalo, Port Oswego, and Governor's Island.

DECORATIONS IN ROTUNDA.

Paintings in Administration Building of Scenes in Canal Construction.

The decorative paintings for the Administration Building at Balboa Heights, comprising the only ornamentation in the building, have been installed in the rotunda. They were executed by Mr. W. B. Van Ingen, assisted by Mr. C. T. Berry and Mr. Ira Remsen. Mr. Van Ingen is an artist of considerable reputation, and has done similar work for various buildings in the United States, including the Congressional Library at Washington, the mint at Philadelphia, and the court room in one of the public buildings of Indianapolis.

The contract with Mr. Van Ingen was entered into in March, 1914, and called for the decoration of approximately 1,000 square feet of surface in the rotunda, at a price of \$25 per foot. It was specified that the paintings were to represent various phases of the construction of the Canal. Most of the work is reproduced from sketches made by the artist before the contract was entered into. The finished area is about 958 square feet.

There are five paintings, consisting of four panels and a frieze. The panels represent Culebra Cut at Gold Hill, construction of the Spillway in Gatun Dam, construction of a lock gate, and construction of a lock at Miraflores. The frieze is a panorama of operations in the digging of Culebra Cut, and consists of spaces in the foreground, showing construction work, including dynamite gangs, steamshovels, transportation of spoil, and illustrations of types of machines used, alternating with spaces showing the opposite bank of the Cut. Although there is a wealth of detail in the paintings, they are perhaps most impressive for their massive scale, which purports to represent the spirit of the work here in construction days.

In order to attain a desirable setting, the white walls of the rotunda surrounding the paintings were tinted and a soft light is thrown on the pictures by a circle of electric lamps concealed in the dome. The artists' work has received favorable comment, and the rotunda has been visited by numbers of residents of the Canal Zone and tourists.

PROVISIONAL CERTIFICATES

Of American Registry to Be Issued to Vessels Abroad.

It has been recommended that the Captain of the Port of Cristobal and the Captain of the Port of Balboa be authorized to issue provisional certificates of American registry to foreign-built vessels, in accordance with the following Act of Congress (Public—No. 321—63d Congress), "To provide for provisional certificates of registry of vessels abroad, and for other purposes," approved March 4, 1915:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That consular officers of the United States and such other persons as may from time to time be designated by the President for the purpose are hereby authorized to issue provisional certificates of registry to vessels abroad which have been purchased by citizens of the United States, including corporations, as defined in Section 4132, Revised Statutes, as amended by the Panama Canal Act and the Act of August 18, 1914.

(a) Such a provisional certificate shall entitle the vessel to the privileges of a vessel of the United States in trade with foreign countries or with the Philippine Islands and the islands of Guam and Tutuila until the expiration of six months from its date or until 10 days after the vessel's arrival at a port of the United States, whichever first happens, and no longer. On arrival at a port of the United States the vessel shall become subject to the laws relating to officers, inspection, and measurement, as amended by the Act of August 18, 1914.

(b) The Secretary of Commerce shall prescribe the conditions in accordance with which such provisional certificates shall be issued and the manner in which they shall be surrendered in exchange for certificates of registry at ports of the United States.

(c) The form of such provisional certificate shall be prescribed by the Commissioner of Navigation and shall include the name of the ship and of the master, time and place of purchase and names of purchasers, and the best particulars respecting her tonnage, build, description, and inspection of survey which the consular officer is able to obtain.

(d) Copies of such provisional certificates shall be forwarded as soon as practicable by the issuing officer to the Commissioner of Navigation.

SEC. 2. That Section 4165 of the Revised Statutes and Section 10 of the Act of March 3, 1897, entitled "An Act to amend the laws relating to navigation," are hereby repealed.

SEC. 3. That this Act shall take effect 60 days after date of its passage.

OFFICIAL CIRCULARS.

Transfer from Excepted Positions to Competitive Classified Service.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., March 10, 1915.

CIRCULAR No. 603-8:

1. An Executive Order of January 19, 1915 (see Panama Canal circular No. 601-38), provides as follows:

"A citizen of the United States in the service of The Panama Canal on or before January 1, 1915, in an excepted position other than that of clerk paying not more than \$75 in gold per month, may be transferred without examination to a position in the competitive classified service, provided:

"(a) This section shall not apply to a person appointed to a competitive position in accordance with the civil service rules, his transfer to be governed by the general provisions of the rules.

"(b) This section shall not apply to a person appointed without examination to perform the duties of clerk of any grade, bookkeeper, stenographer, typewriter, surgeon, physician, trained nurse, or draftsman.

"(c) He must have rendered at least two years' service in a position above the grade of unskilled laborer in the service of The Panama Canal or of the Panama railroad by transfer from the Canal.

"(d) He may be transferred to a position of no higher grade requiring similar qualifications or to a position of a lower grade for which he is qualified.

"(e) He must be specially recommended by the Governor of The Panama Canal by reason of efficient service and satisfactory conduct.

"(f) If separated from the service the requisition for transfer must be made within three years from the date of separation, and if he has been separated more than one year evidence of continuing good character and efficiency may be required. *

"The effect of this order is to confer eligibility for transfer, subject to proper restrictions, upon employees of The Panama Canal who have rendered two years' satisfactory service in excepted positions and who have not had full opportunity for examination. * * *

2. This order confers eligibility for transfer. It does not provide a position for anyone nor even place persons eligible upon a preferential basis. The burden of procuring a position into which to transfer will rest with the person desiring to secure a transfer.

3. The successive steps should be as follows:

(a) Make application for the Governor's recommendation, which, when given, will be forwarded by The Panama Canal to the Civil Service Commission, Washington, D. C., and the applicant will be notified of such action.

(b) Find a vacant position in the competitive classified service; the department to which transfer is desired will request the approval of such transfer by the Civil Service Commission.

4. After the Governor has forwarded his recommendation to the Civil Service Commission no further action will be taken by The Panama Canal, except as the Civil Service Commission may request further information. The interpretation of the provisions of the Executive Order is entirely outside of the functions of The Panama Canal.

5. Application for the Governor's recommendation for transfer should be made, by persons residing on the Isthmus, to "The Governor, The Panama Canal, Balboa Heights"; by persons not resident on the Isthmus to "The Chief of Office, The Panama Canal, Washington, D. C.," Application should be in writing and the applicant's name and position held, or last held, should be clearly stated.

6. Persons whose workmanship or conduct is rated below "good" will not be recommended for transfer.

7. Persons who have been separated from the service for more than one year must furnish certificates by two qualified persons (preferably employers, or official superiors) showing that workmanship and conduct have continued satisfactory.

8. The interpretation of section (d) is in the hands of the Civil Service Commission, to which recommendations, and in doubtful cases full explanations, will be made by the Governor of The Panama Canal.

GEO. W. GOETHALS,
Governor.

Numbering and Marking Hand and Push Cars.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., March 22, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

In connection with circular No. 665-1, dated February 11, 1914, particularly paragraph 2 covering numbering and marking of hand and push cars, the following procedure will govern:

All hand cars, whether the property of The Panama Canal or Panama Railroad Company, will be

numbered in one series from 1 upwards, and all push cars from 1,000 upwards.

Cars repaired at shops will be properly numbered and painted. New cars will be painted and numbered by the Supply Department before issue.

The Auditor will assign all numbers and maintain a record of same.

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, Panama Railroad Company.

Leave Regulations—Sundays and Holidays.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., March 20, 1915.
CIRCULAR No. 602-13:

Paragraph 8 of Circular No. 602 is amended to read as follows:

In all cases where a Sunday or holiday falls within a leave of absence, so that the employee is on leave both prior and subsequent to such day, the Sunday or holiday shall be counted as one day of leave (except, that if the employee worked half of the day preceding and half of the day following a Sunday or holiday, the Sunday or holiday shall not be charged against his leave). If an employee enters upon, or returns from, a leave of absence on a Sunday or holiday, or on the day following a Sunday or holiday, the Sunday or holiday shall not be considered a part of his leave if the employee worked the full day preceding, in case of entry on leave, or the full day following, in case of return from leave.

GEO. W. GOETHALS,
Governor.

Acting Chief Health Officer.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., March 26, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

During the absence on leave of Col. Chas. F. Mason, effective the 27th instant, Major Percy M. Ashburn is designated as Acting Chief Health Officer.

GEO. W. GOETHALS,
Governor, The Panama Canal.

Requests for First Aid Supplies.

THE PANAMA CANAL,
HEALTH DEPARTMENT,
BALBOA HEIGHTS, C. Z., March 22, 1915.

CIRCULAR No. 76:

To all accountable officials—Emergency or first aid supplies intended to be secured from and charged against the Health Department should be applied for in letter or memorandum form addressed to this office, accompanied by a brief explanation showing where same are to be used. As far as practicable, however, when the stock of the dispensary or hospital nearest you will permit, supplies of this character should be obtained from the physician in charge. Original packages of bandages, cotton, gauze, etc., which your district physician may be unable to conveniently furnish you should be applied for by letter or memorandum as above indicated.

Supplies called for on requisitions against the medical storehouse, Ancon, will be charged against the divisions submitting same. First aid supplies furnished the Panama Railroad Company will be charged to that division as heretofore.

CHAS. F. MASON,
Chief Health Officer.

"Advance" to Sail a Day Earlier.

THE PANAMA RAILROAD,
OFFICE OF SUPERINTENDENT,
BALBOA HEIGHTS, C. Z., March 27, 1915.

CIRCULAR No. 38:

All concerned—The sailing date of the steamer *Advance* has been changed from Saturday, April 3, to Friday, April 2, at 3 p. m., from Pier 11, Cristobal.

C. H. MOSETT,
Superintendent.

Shipments of Empty Oil Drums.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER,
BALBOA HEIGHTS, C. Z., March 20, 1915.

All concerned—Considerable difficulty is being experienced in identifying oil drum shipments on account of many cars containing drums being sent to the oil house at Mount Hope and the storehouse at Balboa without tags or papers to cover, which is contrary to existing instructions. It is impossible to hold these cars under load until consignor can be located, and if drums are unloaded and placed with other drums, confusion results.

It is therefore requested that all cars containing empty drums for return to stock be tagged properly, showing contents, consignor, and consignee, and that transfer papers be forwarded promptly.

WM. R. GROVE,
Chief Quartermaster.

Transfer of Radio Headquarters.

OFFICE OF RADIO OFFICER, CANAL ZONE,
NAVAL RADIO STATION, DARIEN, C. Z.,
March 25, 1915.

To all departments—You are advised that on Thursday, March 25, 1915, the office of the Radio Officer of the Canal Zone was moved from the Colon radio station to the Darien radio station. It is requested that all correspondence, bills, and other matter to be handled through this office be addressed to the Radio Officer, Canal Zone, Naval Radio Station, Darien, C. Z.

R. S. CRENSHAW,
Radio Officer, Canal Zone.

Changes in White Schools.

THE PANAMA CANAL,
DIVISION OF SCHOOLS,
BALBOA HEIGHTS, C. Z., March 23, 1915.

To all concerned—The following changes in the white schools will be made, effective Monday, April 5, 1915:

Grades I and II at Corozal will be combined and placed in charge of Miss Mosteller.

Miss Edmonds will be transferred from Corozal to Grade V and part of IV at the Balboa school.

Miss Schield will be transferred from Gatun to Grades I and II at the Cristobal school.

Grades I, II, and III at Gatun will be combined and placed in charge of Mrs. Dechlem.

Grades IV and V at Gatun will be combined and placed in charge of Miss Stone.

Grade VII will be offered at Gatun and combined with Grade VI in charge of Miss Cobban. Pupils now living at Gatun or other stations along the line and attending Grade VII at Cristobal who will take up Grade VII at Gatun should forward their railroad passes to this office.

A. R. LANG,
Superintendent of Schools.

Examinations by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 303, on Wednesday, April 1, 1915, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

For the benefit of applicants residing in Gatun and Cristobal or Colon, examinations for licenses as navigators of motor boats, and as chauffeurs, will be held at the office of the captain of the port of Cristobal on Friday, April 9, 1915, beginning at 9 a. m. Applicants should be provided with motor boats or automobiles for the demonstration test.

By direction of the chairman of the board.

F. M. NIXON,
Recorder, Board of Local Inspectors.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., March 29, 1915.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts, and may be procured upon request of the addressees:

Cole, Lieut. Henry C.	Maxwell, D. J.
Conway, Capt. James H.	(2) Roscoe, M. P.
Deane, R. E. (paper)	Rose, L. E.
Demmy, J. L.	Smith, George
Hilliard, J. C.	Thompson, A.
McMonigle, Elmer	

COMMISSARY DEPARTMENT.

Charge Accounts at Commissaries for Messes.

THE PANAMA CANAL, SUPPLY DEPARTMENT, BALBOA HEIGHTS, C. Z., March 24, 1915.

To all concerned—Arrangements have been made whereby messes operated by Canal employes and Army officers may be granted charge accounts at the commissaries where they purchase their supplies; this privilege to be extended upon the condition that the mess deposits with the Auditor of The Panama Canal cash sufficient to cover the estimated purchases of the mess for one month. Bills for supplies furnished under such charge accounts will be submitted on the 16th and last of each month and must be paid within 10 days after bill is rendered, under penalty of cancellation of the privilege. Messes desiring to avail themselves of this privilege should arrange to make deposit with the Auditor and upon advice from him that such deposit has been made, this office will issue authority to the commissary to make sales accordingly.

Each mess, upon being given a charge account, will be required to designate a responsible member of the club who will be authorized to order supplies for the mess and against whom bills will be rendered.

WM. R. GROVE, Chief Quartermaster.

Closing of Commissaries to Take Quarterly Inventory.

THE PANAMA CANAL, SUPPLY DEPARTMENT, BALBOA HEIGHTS, C. Z., March 22, 1915.

All concerned—The following stores will be closed to take the quarterly inventory on Wednesday, March 31, and Thursday, April 1:

The cold storage and grocery departments will be opened as usual on April 1:

Table with 3 columns: Store Name, Location, Status. Includes Cristobal, Gatun, Las Cascadas, Empire, Culebra, Paraiso, Pedro Miguel, Corozal, Ancon, Balboa, La Boca.

The following stores will be closed on March 31, only: Toro Point, Camp Bierd, Gamboa, and Naos Island.

Detailed instructions governing the taking of the last quarterly inventory will be observed in taking this inventory.

WM. R. GROVE, Chief Quartermaster.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m. but the Balboa store is open from 2.30 to 6 p. m.

The gold departments of the Cristobal store will open at 2 p. m., on Saturdays and sailing days of Panama railroad vessels.

Cold Storage Prices.

The following retail prices of cold storage provisions will be effective April 1, 1915:

Table of FRESH MEATS with columns for item name and Price. Includes Mutton, Lamb, Veal, Beef, Soup, Tongue, Plate, Corned, Chuck roast, Rib roast, Porterhouse, Steak, Pork, Sausage, Sweetbread, Eggs, Bluefish, Halibut, Salmon, Yeast, Chickens, Fowls, Ducks, Capons, Broilers, Turkeys, Squabs, Geese, Grouse, Mallard ducks, Beets, Cabbage, Carrots, Celery, Lettuce, Onions, Parsley, Parsnips, Plantains, Peppers, Potatoes, Spinach, Turnips, Tomatoes, Squash, Yams, Apples, Cranberries, Grape fruit, Lemons.

Table of Additions to Stock with columns for item name and Price. Includes Pettijohn breakfast food, Lace, Foundation silk, Crepe, Sheer linen, Linen, Waists, Madras, Shrunken wools, Linen, Velle, Ribbon, Heels, Drainers, Men's coat hangers, Mouse traps.

Proposals for Plastering 20 Concrete Houses, Balboa Dump and Balboa Flat.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., April 7, 1915, and then opened, for furnishing the necessary labor to completely finish the plastering in 10 concrete houses on Balboa dump and 10 concrete houses on Balboa flat. Bids must be at a price per square yard and one bidder may submit bid on all or part of the buildings. In case bid is submitted for all of the houses, it must be accompanied by cash, certified check, or post-office money order for \$2,000. In case bid is submitted for part of the houses only, it must be accompanied by deposit of five per cent of the total amount bid. Specifications and all necessary information may be obtained upon application to the office of the Constructing Quartermaster, Room 268, Balboa Heights, C. Z. The Panama Canal reserves the right to accept or reject any or all bids or any part of any bid in its discretion.

Proposals should be marked "Proposal for plastering concrete houses, Balboa dump and Balboa flat," and addressed to the Chief Quartermaster, Balboa Heights, C. Z.

Proposals for Plumbing Two Four-Family Concrete Houses, Balboa Dump.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., April 10, 1915, and then opened, for furnishing the necessary labor to completely finish the plumbing in two four-family concrete houses which are now being erected on Balboa dump. Separate bid should be submitted for each house but one bidder may bid on both houses. Bidders should state in their proposal the time in which they propose to complete each house. Specifications and further information may be obtained upon application to the office of the Constructing Quartermaster, Room 268, Balboa Heights, C. Z.

Bids must be accompanied by certified check, post-office money order, or cash, in the sum of \$100. The Panama Canal reserves the right to accept or reject any or all bids.

Bids should be marked "Proposal for plumbing two four-family houses, Balboa dump," and addressed to the Chief Quartermaster, Balboa Heights, C. Z.

	0.6	14.1	2.2	13.5

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used in Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47 p. m.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans for all States. Due at New Orleans on the following Tuesday,

Every Saturday to New York for all States. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

*Every Monday to New York for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*NOTE—The sailing on Monday, April 5, will not land mail in New York until Tuesday of the following week; hence despatches on that date will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7:10 a. m., connects with the despatches for the sailing on April 5.

Rainfall from March 1 to 27, 1915, Inclusive.

Fuel and Supplies.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Cristobal or Balboa from plants of The Panama Canal, or from the private corporations which have tanks at the terminals. The present price for fuel oil supplied by The Panama Canal is \$1.25 per barrel of 42 gallons. The prices made by the corporations may be obtained on application to them.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock, with a minimum charge of \$3. Vessels may take up from the fresh water sections of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

Subsistence supplies, including a large stock of fresh meats, vegetables, canned groceries, fruits, bakery products, etc., are available for quick delivery at either terminal. Prices are generally lower than the retail prices in the United States, and compare favorably with prices in any part of the world.

The cable address of The Panama Canal, on the Isthmus, is "Panacanal, Balboa Heights;" in the United States, "Panacanal, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C.," for delivery in the United States.

Sailings of Vessels in Regular Service with the Isthmus.

REGULAR CONNECTIONS THROUGH THE CANAL.

Approximately regular services between the Atlantic and the Pacific seaboard from Boston, New York, Philadelphia, and Baltimore, occasionally Charleston and New Orleans, to San Pedro, San Francisco, Portland, and Puget Sound, and return, are maintained by the American-Hawaiian Steamship Company, with a sailing each way about every five days; the Luckenbach Steamship Company, with a sailing each way about every 10 days; Sudden and Christenson, approximately fortnightly; the Atlantic and Pacific Steamship Company, about every three weeks; and the Boston and Pacific Line, and the Arrow Line, each sending a vessel each way about once a month.

Between the east coast of the United States and the west coast of South America, fortnightly services are maintained by the Merchants' Line and by the New York and South America Line; the West Coast Line has sailings each way about every four weeks.

Between the west coast of the United States, with connections to lower British Columbia, and Europe the following lines are in service: The Harrison-Direct Line, monthly; the Maple Leaf Line, about every six weeks; the East Asiatic Company, monthly, and the Johnson Line, every six or seven weeks.

The Pacific Steam Navigation Company is operating approximately a fortnightly service between the west coast of South America and Liverpool, by way of the Canal, with either direct vessels or connections at Colon with vessels of the Royal Mail Steam Packet Company.

The American-Australian Line has been sending vessels through the Canal about fortnightly from New York to ports in Australia and New Zealand.

PACIFIC COAST CONNECTIONS.

The Pacific Mail has sailings about every 10 days between Balboa and San Francisco, with calls at Puntarenas, San Juan del Sur, Corinto, Amalpa, La Union, La Libertad, Acajutla, San José de Guatemala, Champerico, Ocos, Salina Cruz, Acapulco, Manzanillo, San Blas, and Mazatlan. The company also operates a direct line between Balboa and San Francisco, with sailings about every six weeks; and a Panama-Central American Line, between Balboa and Ocos, making one round voyage monthly, and calling at all the ports abovenamed between Balboa and Ocos.

Grace & Company maintain a service with a vessel plying between San Francisco and Valparaiso, calling at way ports. It makes a round voyage about every 10 weeks.

The Peruvian Steamship Company maintains a weekly service between Balboa and Callao, with calls at Guayaquil, Paíta, Eten, Pacasmayo, and Salaverry. Every second voyage includes Mollendo.

The South American Steamship Company's vessels sail on alternate Mondays from Balboa to Valparaiso, calling at Paíta, Eten, Pacasmayo, Salaverry, Callao, Mollendo, Arica, Iquique, Antofagasta, and Coquimbo.

The Pacific Steam Navigation Company has sailings on alternate Mondays for Peru and Chile; every 10 days for Ecuador; and on alternate Mondays for Colombian and Ecuadorian ports.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro, and an additional weekly sailing to Bocas del Toro.

The Royal Mail maintains fortnightly service between Colon and Southampton, making the following way ports: Antilla, Jamaica, Cartagena, Puerto Colombia, Puerto Cabello, Trinidad, Barbados, the Azores and Cherbourg. Its vessels all arrive at Colon on Sundays and sail on Tuesdays.

The Compagnie Generale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Carupano, Trinidad, Martinique, Guadeloupe, and Santander and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Carupano and Trinidad.

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curacao, Puerto Cabello, Tenerife, and Barcelona.

The Compañía Transatlantica de Barcelona sends a vessel from Colon to Genoa on the 12th day of each month, calling at Puerto Colombia, Curacao, Puerto Cabello, La Guayra, Ponce, San Juan (Porto Rico), Canary Islands, Cadiz, Barcelona, and Marseilles; on the return voyage, with the same calls enroute, the vessels sail from Genoa on the 8th day of each month.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. To others, the subscription rate will be \$1. United States currency, per annum, in the United States and its possessions; Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone,

Isthmus of Panama.

NOTES OF PROGRESS.

Severe Norther In Limon Bay.

The second norther of the dry season just coming to a close blew into Colon Harbor on Saturday, April 3, and continued until evening of Monday, April 5. The high winds and heavy seas swept the surveying yacht *Carnegie* from her anchorage in the outer harbor and carried her aground, but she was pulled off by the seagoing suction dredge *Caribbean*. No other considerable damage was done to shipping.

Further damage was done to the trestle of the East Breakwater in Limon Bay, which had been badly damaged by the norther of February 8-10, 1915. In the first storm, a section of trestle 4,200 feet long, lying beyond fill for a relay station 1,600 feet from shore, and extending to the site of the proposed breakwater proper, had been entirely swept away; beyond the outer end of this section, for a distance of 2,100 feet, the trestle still retained the decking but for 1,600 feet beyond that, only the piles had been left. The storm of April 3 added to this damage by sweeping the decking off of all but about 160 feet of the 2,100-foot section which had retained its decking; washing out numbers of piles in the bents in this section; and doing further damage to those piles still standing in the outer 1,600-foot section of the breakwater proper. It also washed away about 364 feet of single-track trestle which had been built in the gap between the first relay station and the breakwater proper, in the reconstruction of trestle, and tore the decking off about 300 feet at the outer end of the double-track trestle. Between this point and one about 1,100 feet from shore, the trestle was considerably damaged, but from the 1,100-foot point to shore it remains intact.

The West Breakwater, extending from Toro Point, was damaged slightly by the waves, some of the armor rock being swept from place. The mole at the new Cristobal pier suffered considerably from undermining, and construction forces are now dumping heavy rock on the sea side to repair the damage.

The Chief Hydrographer reports this to

have been the most severe and intense storm in Limon Bay since the American occupation. The wind blew as high as 46 miles per hour.

Freshet on the Chagres River.

Following heavy rainfall above Alhajuela, the Chagres River started rising at Alhajuela at 4 p. m., on Saturday, April 3, from elevation 91.60, and in five hours reached its crest at elevation 102.35 feet. The discharge at this elevation was 27,050 cubic feet per second.

The river fell to elevation 96.00 feet, when a second rise started, which attained a crest at elevation 102.0 in the morning of the 4th. The river retained that elevation for an hour; its discharge was 26,000 cubic feet per second or a total of 93,600,000 cubic feet for that hour.

The river fell very slowly, reaching a height of 94.0 at midnight of the 5th. The mean discharge of the freshet for a 56-hour period was 12,215 cubic feet per second, or a little less than the discharge of one spillway gate. Owing to the excessive rains over the lake watershed the Gatun Spillway was operated extensively during this rise, five gates being open part of the time, effecting a maximum discharge of 64,015 cubic feet per second.

Floating Cranes to be Fitted with Salvaging Pumps.

The two new 250-ton floating cranes *Ajax* and *Hercules* are to be fitted upon with pumping systems to increase their effectiveness in the salvaging of stranded or sunken vessels. In addition to the installation of a steam-driven pump with an 8-inch suction for pumping out the hold of the pontoon of the crane, and for service in case of fire, each is to be provided with an electrically driven centrifugal pump with 6-inch suction, a similar pump with 10-inch suction, and one with 12-inch suction; and also a steamdriven duplex pump, 16 by 22 by 18 inches.

All of the pumps required for this work are now available in the store of retired equipment, but it will be necessary to purchase two 125-horsepower motors, one 85-horsepower motor, and two 40-horsepower motors. In all, the total expenditure for the installation is to be about \$5,000.

The need of such equipment was shown in the recent efforts to pump out the stranded *Blanche E. Pendleton* in Limon Bay with equipment from the dredging fleet. It is believed that upon the completion of the cranes with this auxiliary equipment, they will form a salvaging outfit fully capable of meeting any ordinary demands.

Panama Canal Flag.

A blue flag bearing the letters "P. C." in white has been authorized for the Marine Division equipment. It will be flown at the bows of launches when on official duty and on dress occasions, and at the foremasthead of tugs on duty.

STATUS OF CANAL PORTS

Politically American but Foreign with Respect to Trade and Immigration—Local Regulations.

The ports of Cristobal and Balboa at the terminals of the Canal though situated in the Canal Zone, over which the United States has, according to the decision of the Supreme Court of the United States, "sovereignty and proprietorship," are foreign ports with respect to trade and immigration.

This was established by an Act of Congress approved March 2, 1905, which provided "That all laws affecting imports of articles, goods, wares, and merchandise, and entry of persons into the United States from foreign countries shall apply to articles, goods, wares, and merchandise, and persons coming from the Canal Zone, Isthmus of Panama, and seeking entry into any State or Territory of the United States or the District of Columbia."

These ports are excluded by that Act from the coastwise trade of the United States. They could become coastwise ports only by another act of Congress, extending such status to them; and in view of the international relations of the Canal, such an act is not likely to be passed.

From the foregoing it follows that vessels coming through the Canal in the United States coastwise trade are not allowed to take on additional cargo at either of the terminals. Such vessels, having cleared under the regulations governing the coastwise trade, if allowed to take additional cargo at the Canal would be engaging in coastwise and foreign trade on the same voyage, which is contrary to the law of the United States. Coastwise vessels passing through the Canal are in a status of being "sealed" with respect to cargo. Individual exceptions to this rule have been made recently, by special agreement of authorities in Washington, to the extent of allowing coastwise vessels to discharge at the Canal cargo consigned to the United States Government. This is held to involve no possibility of frauds on the import customs of the United States. Such possibility in other cases has been the primary basis for the distinction between coastwise and foreign trade.

Politically the Canal ports are American and all general matters of government such as, for instance, the maintenance of neutrality are under the same rules as apply to United States ports. More specific matters of administration are carried out under separate local rulings, based fundamentally on practices in the United States but modified to meet local conditions.

The administration of the Canal ports with respect to the entrance and clearance of vessels involves the two primary matters of quarantine regulations and customs regulations. The detailed duties of the Health Department and the Bureau of Customs have been set forth in circulars, previously pub-

lished in THE CANAL RECORD and otherwise circulated among shipping interests.

The quarantine regulations, while designed fully to protect the sanitation of the Canal and its terminal ports, require nothing that is extraordinary or beyond the advanced practices of enlightened countries. The Bureau of Customs is charged with the entry and clearance of vessels at the ports of the Canal Zone; the enforcement of the laws applying to importations into the Canal Zone, and of the immigration laws, except as these are a part of the quarantine regulations; the certification of invoices covering shipments from the Canal Zone to the United States; and the performance of such services to seamen as are commonly rendered by shipping commissioners in American ports, or by American consuls in foreign ports.

Vessels using the Canal, with through clearance from port of departure for port of final destination, which is the case with the majority of the vessels using the route, and not stopping at either terminal port, are not required to enter or clear. A vessel that stops at either or both terminal ports will be required to enter, and clearance will be issued from the last port at which the vessel stops. Coming alongside a Canal wharf for taking on fuel or supplies, without transfer of cargo, is not regarded as "stopping" in the sense of this provision. Passengers are allowed to land and reembark without further restrictions than those imposed by the quarantine and customs regulations on all immigrants, transient or permanent. In other words, as the Canal is regarded primarily as a means of shortening transit, nothing is required, further than for the protection of the public health and interest, that may occasion delay to vessels.

Notice to Mariners.

For the benefit of mariners making the Canal, attention is called to the fact that the following notices to mariners, originally issued by The Panama Canal, have been included in the volumes of "Notices to Mariners," Nos. 1 to 52, inclusive, published by the Hydrographic Office at Washington under the authority of the Secretary of the Navy:

	Page.	Para-graph.
Almirante Bay, Cape Toro Light, characteristic.....	802	2625
Canal Zone:		
Balboa—		
Anchorage limits.....	689	2256
Dumping grounds, buoys to be established.....	1092	3536
Canal open to commerce.....	857	2797
Colon Harbor—		
Coco Solo Point, East Breakwater construction, lights and buoy established.....	1061	3440
Gas buoy discontinued.....	1090	3530
Panama Canal approach, gas buoys temporarily established.....	7	24
West Breakwater Light established, light buoy discontinued.....	1062	3441
West Breakwater—		
Lights destroyed.....	777	2539
Lagarto, reef reported to northward.....	1111	3599
Limon Bay—		
Cristobal Harbor, buoys established, directions.....	1062	3442
Shoal, caution.....	1228	3992
Panama Canal, information concerning payment of tolls and other charges.....	1154	3745
Panama Canal, new chart.....	1111	3600

Such local notices to mariners are published as issued in THE CANAL RECORD, and are included in the volume of "Sailing Directions and General Information," also published by The Panama Canal.

DISTANCES SAVED BY CANAL.

New York and San Francisco Nearer by Three-fifths of Former Distance.—Other Striking Instances.

From Colon, on the Atlantic side of the Isthmus of Panama, to Balboa, on the Pacific side, the distance by water, around South America, is 10,500 nautical miles. Through the Canal that distance is reduced to less than 44 miles.

The difference in length of these routes, 10,456 miles, represents the maximum distance that can be saved to a vessel by use of the Canal. This maximum is more interesting geographically than commercially because vessels bound for the Pacific coast by way of the Strait of Magellan would not skirt the entire Atlantic coast of South America, but would strike across the Caribbean, if from the United States, or the central Atlantic, if from Europe, and proceed by the most direct route consistent with commercial advantage. But the saving is not purely hypothetical. The tug *Reliance*, once employed in the Atlantic entrance of the Canal, was transferred to the Pacific entrance by way of Magellan. The voyage required 126 days, and the *Reliance* has since several times made the transit from ocean to ocean in one day, in passing back and forth between Colon and Balboa by way of the Canal.

What counts in the commercial value of the Canal is not the distance that could be saved but the distances that are saved, by vessels substituting the Canal route for the earlier 'round-the-continent route in regular trade. Following are some of the savings on great trade routes, between important areas:

The great United States Atlantic port of New York, for instance, is nearer to the great Pacific port of San Francisco, through the use of the Canal, by 7,873 nautical miles. The distance of 13,135 miles by Magellan has been reduced to 5,262 miles by the Canal. The water distance between these ports is two-fifths what it used to be. Compared in terms of the overland route between these cities, it is about as if a man who wished to travel from New York to San Francisco were magically transported in an instant to Denver, Colorado, there to begin his railroad trip. Three-fifths of the way would be saved before he started.

So far in the use of the Canal, over 40 per cent of the vessels which have passed through it have been engaged in the coastwise trade of the United States—each of them saving about 7,800 miles on each trip. If their average speed be taken at 10 knots, they have averaged

a saving of over a month at sea on each voyage from coast to coast. Where formerly the round trip of a 10-knot vessel required about 55 days actually steaming, the time at sea for the same trip for the same vessel is now reduced to about 22 days.

The next heaviest traffic through the Canal is between the Pacific coast of the United States and Europe. The Canal makes San Francisco nearer to Liverpool by 5,666 miles, a saving of two-fifths of the old journey by Magellan. The distance between San Francisco and Gibraltar has been reduced from 12,571 miles to 7,621 miles, a saving of 4,950 miles or 39 per cent of the former distance.

From San Francisco to Buenos Aires, via Valparaiso and Magellan, is approximately 7,610 miles; which is shorter than the route through the Canal, by which the distance is 8,941 miles. To Rio Janeiro, the distance via Magellan is 8,609 miles; by the Canal, 7,885 miles. To Pernambuco, on the eastern promontory of South America, the distance via Magellan is 9,748 miles; via the Canal, 6,746 miles. To Para, the distances via Magellan and via the Canal are 10,852 and 5,642 miles, respectively.

From San Francisco to Freetown, on the west coast of middle Africa, the distance by the most practicable former route, using the Strait of Magellan, is 11,380 miles. Through the Canal and by way of the island of Barbados, the distance is 7,277 miles.

With reference to the trade between the Atlantic coast of the United States and the west coast of South America, New York is nearer to Valparaiso by 3,717 miles by virtue of the Canal; to Iquique, one of the great nitrate ports, by 4,139 miles, and to Guayaquil by 7,405 miles. From New York to Guayaquil the present distance of 2,765 miles is approximately 27 per cent of the former distance, 10,270 miles.

As to the Far East, New York is nearer to Yokohama by 3,768 miles than formerly by way of the Suez Canal, but the latter route is 18 miles shorter than the Panama route for vessels plying between New York and Hongkong. New York is 41 miles nearer Manila by Panama than by Suez, and 3,932 miles nearer Sydney by Panama. New York is now, by virtue of the Panama Canal, nearer than Liverpool to Yokohama by 1,880 miles, and nearer than Liverpool to Sydney by 2,424 miles.

The foregoing are typical instances of the changes of routes effected by the opening of the Canal. Detailed tabulations of distances are given in the tables on the opposite page.

ENGINEER SERVICE TRANSFERS.

Further Information Concerning Transfer of Canal Employees to United States.

In line with the several amendments to the Civil Service rules by Executive Order, designed to facilitate the transfer of Panama Canal employees to the classified service in the United States, previously published in THE CANAL RECORD, the following is published for the information of all who may be desirous of transferring to the Engineer Department at Large:

WAR DEPARTMENT,

OFFICE OF THE CHIEF OF ENGINEERS,

CIRCULAR No. 4: *Washington, February 25, 1915.*

1. The following regulations governing transfers from the Panama Canal Service to the Engineer Department at Large are published for the information and guidance of the Corps of Engineers.

By Executive Order of January 19, 1915, section 12 of Rule X was amended to read as follows:

12. A citizen of the United States in the service of the Panama Canal on or before January 1, 1915, in an excepted position other than that of clerk paying not more than \$75 in gold per month may be transferred without examination to a position in the competitive classified service, provided:

(a) This section shall not apply to a person appointed to a competitive position in accordance with the civil service rules, his transfer to be governed by the general provisions of the rules.

(b) This section shall not apply to a person appointed without examination to perform the duties of a clerk of any grade, bookkeeper, stenographer, typewriter, surgeon, physician, trained nurse, or draftsman.

(c) He must have rendered at least two years' service in a position above the grade of mere unskilled laborer in the service of The Panama Canal or the Panama railroad by transfer from the Canal.

(d) He may be transferred to a position of no higher grade requiring similar qualifications, or to a position of a lower grade for which he is qualified.

(e) He must be specially recommended by the Governor of the Panama Canal by reason of efficient service and satisfactory conduct.

(f) If separated from the service the requisition for transfer must be made within three years from the date of separation, and if he has been separated more than one year evidence of continuing good character and efficiency may be required.

The foregoing supersedes the proviso in paragraph 12 of Civil Service Rule X, respecting transfers from the Isthmian Canal Service.

2. The designations affected by the foregoing Executive Order include the following: Blacksmith, boiler-maker, cable splicer, calker, carpenter, car-repairer, cranesman, drillrunner or drillman, engineman (which includes all steam engineers not requiring a license from the Office of the Steamboat Inspection Service), engineers, foreman of all the mechanical trades, ironworker, leverman, telephone or telegraph linemen, machinist, master of dredge (not seagoing), mate, operator, painter, pipe-fitter, riveter, trainman, and wireman and certain other persons holding positions excepted from examination.

3. For the purpose of facilitating the transfer of employees affected by this order the following instructions are published for their guidance in making application for transfer.

Application should be made direct to the employing officer of the district where employment is desired, in which the applicant should state the designation under which his service was rendered on the Isthmus, the length of service and salary received, qualifications and experience other than on the Isthmus, salary expected, age, and any other facts tending to show fitness for the position for which application is made. Address The District Engineer Officer.

 Lieut. Col., Corps of Engineers.

Fighting between Panamanians and American Soldiers.

As a result of a series of disturbances which took place in Colon between American soldiers and police and citizens of Colon, on Friday afternoon, April 2, one American soldier, Corporal Maurice Langdon, of the 21st Company of Coast Artillery, was shot and mortally wounded, three other American soldiers received bullet wounds, eight soldiers were slightly injured by flying missiles, and seven Panamanian policemen and two Panamanian civilians were injured by being struck with stones or other missiles. A first fight started at the corner of 10th and Cash Streets, at about 5 p. m., and a second fight occurred on 11th Street and Hudson Lane at about 5.20, during which Corporal Langdon, who was in charge of a patrol squad, was killed. One of the wounded American soldiers was shot while standing on the rear platform of a special train, by a Panamanian policeman who was standing in a vacant lot in the vicinity.

Colonel Chamberlain, Inspector-General of General Wood's staff, is conducting the investigation for the American military authorities, in which Panama is represented by Dr. Galindo. Captain Fulton is representing the American military authorities in the investigation being conducted by the Panamanian Government, under Governor Arcia of Colon. Captain Mitchell, Chief of Police, is investigating on behalf of The Panama Canal.

NEW BUILDINGS AUTHORIZED.

New Type of Bachelor Quarters, 120 Family Apartments, and Permanent Hospital Buildings.

In addition to extensive construction of quarters and service buildings and municipal improvements for the Army posts on the Canal Zone, a recently adopted building program authorizes the expenditure of \$60,000 for bachelor quarters for Canal employees, \$375,000 for family quarters for Canal employees, \$150,000 for one unit ward group in Ancon Hospital, and \$177,000 for a new hospital at Colon. The amount appropriated for quarters for the Army on the Canal Zone is \$1,290,000.

The bachelor quarters will be of concrete and of a different type from any previously built on the Canal Zone. The plans are now in the state of preliminary sketches, and it has not been determined if the quarters are to be built in one house of three stories or two houses of two stories. They are to be situated near the Sosa Hill end of Balboa Prado.

The family quarters are to be erected in the Balboa district and will provide for 120 families. There will be 10 four-family concrete houses, at an estimated cost of \$190,000; 10 four-family frame houses, to cost \$50,000; 15 two-family frame houses, to cost \$60,000; and 10 one-family frame houses, to cost \$25,000. The concrete quarters will be erected in the new townsite of Balboa, alongside the concrete quarters already constructed, and the frame houses will be built at Balboa Heights, East Balboa, and on the road toward the Balboa radio station.

The one unit ward group to be constructed at Ancon Hospital will consist of two two-story ward buildings, connected by a central administrative and general service building, also two stories high. The ward buildings will be about 137 feet long by 43 feet wide, and the central part will have plan dimensions of approximately 89 feet by 30 feet. The wards will accommodate a total of 116 ward patients, in addition to those in private rooms, and allow to each bed 100 square feet of floor space. This group will occupy approximately the site of the present wards Nos. 1, 2, 3, and 4, on the hillside overlooking Wards 11 and 12 and the Catholic chapel. The buildings will be of concrete and will be the first of the permanent buildings in which the hospital is ultimately to be installed.

The construction at Colon Hospital will be a single concrete group, consisting of four buildings, connected by arcades. An administration building will be flanked on right and left by wards, and a kitchen and general service building will be located in the rear of the central part. The entire group will be about 338 feet long. It will be situated on the site now occupied by buildings Nos. 17 and 19. Wards A to I, opposite this site and built over the water along the shore of the ocean, will be torn down. Wards H and J, also over the water, will be used as nurses' quarters. The detailed plans for this construction have not been prepared.

Quarters for Silver Employees near Pacific Locks.

The Chief Quartermaster, the Constructing Quartermaster, and the Resident Engineer of the Division of Municipal Engineering have been appointed a committee to investigate and report upon the number of quarters required for silver employees in the vicinity of Pedro Miguel and Miraflores.

OFFICIAL CIRCULARS.

Rules Governing Rented Quarters.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., March 20, 1915.

CIRCULAR NO. 627-6:

1. Circular No. 627-1, dated July 17, 1914, is hereby canceled and the following rules will govern the assignment and handling of quarters on a rental basis:

2. When family quarters are assigned an employe he will be given nine weeks from date stated in tender in which to occupy the quarters, but this does not apply in case of transfer.

3. Services of employes discharged or resigned, securing immediate employment in some other department or division, are considered continuous as far as quarters are concerned, and they may hold quarters or have their applications remain on the list as of original date. Cases of this nature arising, however, should be referred to the Chief Quartermaster.

4. Whenever by reason of temporary decrease of work, or other cause, employes have been furloughed without pay for a period not exceeding 30 days, they will retain the rights of quarters during that time.

5. When an employe's services are terminated he will be expected to vacate quarters within two weeks from the date of termination of service.

6. Receipts for rent will be given on prescribed forms, and must be shown on demand to the properly authorized representatives of The Panama Canal.

7. The allowance of furniture for regular family quarters will be as follows:

- | | | |
|------------------|-------------------|-----------------|
| 1 range | 2 center tables | 1 kitchen table |
| 1 double bed | 3 wicker rockers | 1 dining table |
| 2 kitchen chairs | 1 refrigerator | 1 sideboard |
| 6 dining chairs | 1 double mattress | 1 dresser |
| 1 chiffonier | | |

In houses for which the rental is \$25, or more, per month the following additional articles are authorized:

- | | | |
|-----------------|-----------------|----------------------|
| 3 dining chairs | 1 parlor desk | 1 parlor wicker |
| 1 chiffonier | 1 porch swing | 1 rocker |
| 2 towel racks | 1 serving table | 1 Morris chair |
| 2 parlor chairs | 1 dresser | 1 porch double seat. |

Employes occupying nonhousekeeping quarters will be given such furniture as may be available but in no case more than is provided above for regular family quarters.

8. The issue of beds, mattresses, and one dresser in excess of this allowance is authorized to families with children. Employes moving from one house to another in the same district will be permitted to take with them, at their own expense, if they so desire, beds, mattresses, and refrigerators.

9. When an employe living in married quarters desires to use his own furniture exclusively, a reduction of \$2 per month will be made in the rent. No reduction will be made unless all Panama Canal furniture, including refrigerators, but excepting stoves, is released.

10. Applications for transfers of quarters within a district must be filed in writing with the district quartermaster, and the rules governing original assignment will be applied to transfers within a district. Applications for transfer from without a district will be placed on the assignment list according to date of employe's last entrance into service.

11. A bachelor quartered elsewhere than in the immediate vicinity of his work will not be entitled to a reduction in rent, but may be granted free transportation between his quarters and official station if no labor train is available and if no quarters are available in the district in which he works.

12. An employe whose duties require him to be quartered at more than one town shall pay rent only for the quarters in the town considered his headquarters, and when this can not be determined, he shall pay only the higher rental. When family quarters are occupied in such a case, the rate for the family quarters will govern.

13. An employe occupying bachelor quarters in the immediate vicinity of his work and holding an assignment to family quarters elsewhere, solely for his convenience and at his request, will be charged full rental for both quarters. Such employes, however, will hereafter be given a weekly round-trip pass to visit their families, if they so desire.

14. An employe, who is regularly assigned to family quarters at his place of work will not be required to pay rent for bachelor quarters while awaiting assignment to family quarters at a new station to which he is permanently transferred. If transferred temporarily for the good of the service no additional rental will be charged for the quarters occupied temporarily.

15. The wife constitutes the family of an employe, and no consideration can be given applications for family quarters for occupancy by other members of a family than the wife except from widows or widowers having dependent children residing with them; unless there are no other applicants on file.

16. A widow without children can hold quarters after

death of husband until arrangements can be made for her departure.

17. When employes with dependent relatives, other than widows and widowers with dependent children, are assigned family quarters as a concession, they will not be permitted to transfer to other quarters except in the absence of other applicants entitled to the quarters.

18. Family quarters may, with the approval of the Chief Quartermaster, be assigned to bachelors with dependent relatives if there are no other applications on file for the quarters. Houses coming under the special class, as provided in circular No. 627-5, may be assigned to bachelors by the direction of the Governor.

19. Exchange of quarters will be permitted only when the rights of no other employe will be interfered with.

20. All living quarters distinctly and definitely within hospital grounds shall be regarded as for the use of hospital tenants, doctors, nurses, etc., but the assignment of same shall remain under the jurisdiction of the Chief Quartermaster.

21. Applicants for hospital quarters can not place applications for quarters outside of hospital grounds.

22. No alterations or additions will be made to any house by the occupant without the approval of the Chief Quartermaster, and then only at his own expense.

23. Aliens, whether employed in the United States or on the Isthmus, will not be entitled to gold family quarters until all applicants have been assigned.

GEO. W. GOETHALS,
Governor.

Charges for Electric Current.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., March 15, 1915.

CIRCULAR NO. 676-3 (Superseding Cir. No. 676):

For the information of all concerned the following schedule of charges for electric current supplied by The Panama Canal is published:

FOR METERED SERVICE.

1. To departments and divisions of The Panama Canal and to the Panama railroad the charge shall be the actual cost to the Electrical Division for the district concerned, as determined from month to month by the Cost Accountant.

2. To other departments and bureaus of the United States Government the charge shall be the actual cost to The Panama Canal for all districts, as determined from month to month by the Cost Accountant.

3. To employes of The Panama Canal and the Panama railroad, religious institutions, and to social and fraternal organizations of employes in the Canal Zone, the charge shall be an arbitrary rate that shall be adjusted from time to time to approximate as closely as practicable to the actual cost to The Panama Canal, as determined by the Cost Accountant. For the present this rate shall be two cents per kilowatt-hour.

4. To individuals (nonemployes) and companies in the Canal Zone the charge shall be eight cents per kilowatt-hour, except when a different rate is established by special authority of the Governor.

FLAT RATES.

5. To departments and divisions of The Panama Canal and the Panama railroad, other departments and bureaus of the United States Government, employes of The Panama Canal and the Panama railroad for their personal use, religious and charitable institutions, and to social and fraternal organizations of employes in the Canal Zone, the charge for unmetered lighting service shall be \$1 plus 6 times the number of 16-candlepower equivalents, in cents per month, and for electrical appliances other than lights, such as stoves, irons, toasters, water heaters, etc., rates to be fixed from time to time by the Electrical Engineer with the approval of the Governor, dependent upon the cost of production of power, and the current consumption and probable number of hours of use of the appliance.

6. To individuals (nonemployes) and companies in the Canal Zone, and to employes of The Panama Canal and the Panama railroad for commercial use, the charge for unmetered lighting service shall be 75 cents per month per 16-candlepower equivalent, and for electrical appliances other than lights, rates to be fixed from time to time by the Electrical Engineer with the approval of the Governor, dependent upon the cost of production of power and the current consumption and probable number of hours of use of the appliance.

7. Circular No. 676 is hereby revoked.

GEO. W. GOETHALS,
Governor.

Transfer of Telephone and Signal Department from Panama Railroad to Electrical Division.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., March 26, 1915.

CIRCULAR NO. 660-25:

1. Effective April 1, 1915, all work in connection

with the construction, operation, and maintenance of telephone lines, the construction and maintenance of telegraph lines, and the construction and maintenance of railway signals and appurtenances thereto, heretofore performed by the Telephone and Signal Department under the Panama Railroad Company, will be consolidated with the Electrical Division under The Panama Canal.

2. All work to be done for the Panama Railroad Company by the Electrical Division of The Panama Canal on account of the construction, operation, and maintenance of telephones, telegraph, and railway signals, will be billed on monthly accounts to the Panama Railroad Company.

3. All the forces of the above organization will be transferred, effective on that date.

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, the Panama Railroad Company.

In Charge of Work at Coco Solo.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., March 29, 1915.

To all concerned—Effective March 31, and until Supervisor C. C. Suedeker returns from leave, General Foreman Arman Smith will be in local charge of all outside work, and Mr. M. J. Driscoll will be in charge of all office work at Coco Solo, connected with the East Breakwater, both reporting to me.

H. H. ROUSSEAU,
Engineer of Terminal Construction.

Bunker Coal Ordered but Not Taken.

THE PANAMA RAILROAD,
OFFICE OF SUPERINTENDENT,

BALBOA HEIGHTS, C. Z., March 30, 1915.

CIRCULAR NO. 40:

All concerned—Effective May 1, 1915, a charge will be made to reimburse the Panama Railroad Company for the expense of handling any bunker coal ordered but not taken by steamers, at the rate of 25 cents per ton when cars are switched and 50 cents per ton when delivered in lighters.

Approved: C. H. MOTSETT,
Superintendent.

GEO. W. GOETHALS,
President.

Accountable Official.

THE PANAMA CANAL,
OFFICE OF THE AUDITOR,

BALBOA HEIGHTS, C. Z., March 31, 1915.

CIRCULAR NO. 86:

Effective April 1, 1915, Capt. W. H. Rose, an accountable official of The Panama Canal, is also designated an accountable official of the Panama railroad, and as such will account for all nonexpendable property heretofore in the service of the Division of Telephones and Signals of the Panama railroad.

Approved: H. A. A. SMITH,
Auditor, The Panama Canal.

GEO. W. GOETHALS,
Governor.

Act of Congress.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., March 22, 1915.

CIRCULAR NO. 600-15:

PUNTA MALA AND BONA ISLAND LIGHTS.
The extracts from an Act of Congress quoted below are published for the information of all concerned.

GEO. W. GOETHALS,
Governor.

AN ACT to authorize aids to navigation and other works in the Lighthouse Service, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of Commerce is hereby authorized to establish, provide, or improve the following aids to navigation and other works in the Lighthouse Service, under the Department of Commerce, in accordance with the respective limits of costs hereinafter respectively set forth, which shall in no case be exceeded.

* * * * *

PANAMA CANAL.

Two lights on the Pacific coast, necessary as aids to navigation near the Pacific entrance to the Panama Canal, at a total cost not exceeding \$48,000; one of them at Punta Mala, the other at Bona Island.

And for the construction of these two aids the Secretary of Commerce may, by satisfactory arrangement with the Governor of The Panama Canal, have them constructed and maintained through the Panama Canal force.

* * * * *

Approved, March 3, 1915.

Act of Congress.

THE PANAMA CANAL, EXECUTIVE OFFICE, BALBOA HEIGHTS, C. Z., March 24, 1915. CIRCULAR No. 600-20: RELIEF AND PROTECTION OF AMERICAN SEAMEN—EXPOSITION IN PANAMA. The extracts from an Act of Congress quoted below are published for the information of all concerned. GEO. W. GOETHALS, Governor.

AN ACT making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1915. Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums be, and they are hereby, severally appropriated, in full compensation for the Diplomatic and Consular Service for the fiscal year ending June 30, 1916, out of any money in the Treasury not otherwise appropriated, for the objects hereinafter expressed, namely:

RELIEF AND PROTECTION OF AMERICAN SEAMEN.

Relief and protection of American seamen in foreign countries, and shipwrecked American seamen in the Territory of Alaska, in the Hawaiian Islands, Porto Rico, the Panama Canal Zone, and the Philippine Islands, \$20,000.

EXPOSITION IN CITY OF PANAMA.

That the President be, and he is hereby, authorized to accept an invitation extended by the Government of Panama to the Government of the United States to participate in an exposition to be held in the city of Panama; and the sum of \$25,000 be, and the same is hereby, appropriated, out of any money in the Treasury not otherwise appropriated, to enable suitable participation in said exposition by this country, for an appropriate exhibit of the arts, industries, manufactures, products of the soil, mines, and waters of the United States, and, as far as practicable, of the functions of the General Government, and an exhibit of such other articles as the President may direct, including an exhibit relating to the Panama Canal.

Approved, March 4, 1915.

Act of Congress.

THE PANAMA CANAL, EXECUTIVE OFFICE, BALBOA HEIGHTS, C. Z., March 22, 1914. CIRCULAR No. 600-16: FUNDS FOR MARINE BARRACKS REAPPROPRIATED—RADIO STATIONS. The extracts from an Act of Congress quoted below are published for the information of all concerned. GEO. W. GOETHALS, Governor.

AN ACT making appropriations for the naval service for the fiscal year ending June 30, 1916, and for other purposes. Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums be, and they are hereby, appropriated, to be paid out of any money in the Treasury not otherwise appropriated, for the naval service of the Government for the year ending June 30, 1916, and for other purposes:

PUBLIC WORKS, BUREAU OF YARDS AND DOCKS.

That the appropriation of \$400,000 for erection on the Isthmus of Panama of barracks, quarters, and other buildings for accommodation of marines, contained in the Act of March 4, 1913, is hereby reappropriated, and \$200,000 thereof made available for the erection of marine barracks at Mare Island, California, and \$200,000 thereof made available for the erection of marine barracks at Norfolk, Virginia.

BUREAU OF STEAM ENGINEERING.

High-power radio stations: Toward the purchase and preparation of necessary sites, purchase and erection of towers and buildings, and the purchase and installation of machinery and apparatus of high-power radio stations (cost not to exceed \$1,500,000), to be located as follows: One in the Isthmian Canal Zone, one on the California coast, one in the Hawaiian Islands, one in America Samoa, one on the island of Guam, and one in the Philippine Islands, \$400,000, to be available until expended.

Approved, March 3, 1915.

Act of Congress.

THE PANAMA CANAL, EXECUTIVE OFFICE, BALBOA HEIGHTS, C. Z., March 24, 1915. CIRCULAR No. 600-19: The extracts from an Act of Congress quoted below are published for the information of all concerned. GEO. W. GOETHALS, Governor.

AN ACT making appropriations for the support of the Army for the fiscal year ending June 30, 1916. Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums be, and they are hereby, appropriated, out of any money in the Treasury not otherwise appropriated, for the support of the Army for the year ending June 30, 1916.

Provided further, That on and after October 1, 1915, no officer or enlisted man of the Army shall, except upon his own request, be required to serve in a single tour of duty for more than two years in the Philippine Islands, nor more than three years in the Panama Canal Zone, except in case of insurrection or of actual or threatened hostilities.

HOSPITAL CARE, CANAL ZONE GARRISONS: For paying The Panama Canal such reasonable charges, exclusive of subsistence, as may be approved by the Secretary of War for caring in its hospitals for officers, enlisted men, military prisoners, and civilian employees of the Army admitted thereto upon the request of proper military authority: Provided, That the subsistence of the said patients, except commissioned officers and acting dental surgeons, shall be paid to said hospitals out of the appropriation for subsistence of the Army at the rates provided therein for commutation of rations for enlisted patients in general hospitals, \$45,000.

Approved, March 4, 1915.

COMMISSARY DEPARTMENT.

Commissary Hours.

The commissary stores are open during the following hours: From 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m., but the Balboa store is open from 2.30 to 6 p. m. The gold departments of the Cristobal store will open at 2 p. m. on Saturdays and other sailing days of Panama railroad vessels.

Cold Storage Prices.

The following retail prices of cold storage provisions will be effective April 8, 1915:

Table with columns: FRESH MEATS, MISCELLANEOUS, POULTRY AND GAME. Lists items like Pork, Beef, Chicken, etc. with prices.

CURED AND PICKLED MEATS. Price.

Table listing cured and pickled meats like Butter, Cheese, Cream, etc. with prices.

Table listing vegetables like Beets, Cabbage, Carrots, Celery, etc. with prices.

Table listing fruits like Apples, Cranberries, Grape fruit, Lemons, etc. with prices.

* Indicates advance from preceding list. **Indicates five cents allowed for return of bottle. † Indicates reduction from preceding list. ‡ Sold only from commissaries, no orders taken for delivery. § Not less than 1/2 ham or 1/2 shoulder of fresh pork will be sold.

Price Changes.

The following changes in prices of articles in stock at the commissary stores became effective April 5, 1915:

Table with columns: ARTICLE, PRICE CHANGE (Old, New). Lists items like Triscuit, Tea, Soap, etc. with price changes.

Additions to Stock.

Table listing additions to stock like Biscuits, Vagex Cubas, Curtain, etc. with prices.

JOINT LAND COMMISSION.

Rule of Dismissal.

In the matter of sundry claims, rule of dismissal No. 176, docket numbers as shown, March 23, 1915.—With reference to the following claims, the evidence before the Commission is that settlement therefor has been made by the United States:

Claimant	Dkt No.	Tax Nos.	Date of Payment
Angel de Castro.....	1916	1409	1-25-15
Tong Chong.....	1930	724	1-16-15
Manuel Sosa.....	1947	1382, 1383, 1395, 1396, 1435, 1436, 1437.	1-18-15
Manuela C. Angulo...	1950	1372	1-26-15
Felix Moreno.....	1950	1610, 1212	1-12-15
Concepción Rodriguez.	2533	907	2-15-15
Dr. Julio Arjona A....	2665	1-27-15
Mrs. Julia de Cochez..	2802	1211	2-18-15
Chee Yip.....	2885	745, 744	1-19-15
Joseph Peterson.....	3546	522	10-30-14

In view of the above settlements, no further action is necessary by the Commission, and the foregoing claims are therefore dismissed.

JORGE E. BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Notice.

Following is a calendar of claims set for hearing for the week ending April 10: Tuesday, April 6—Dockets 10 and 11, Camille Lepel; docket 404, Manuel Jacome; docket 407, Peter Modis (Moore). The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used in Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from Oh (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47 p. m.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans for all States. Due at New Orleans on the following Tuesday.

Every Saturday to New York for all States. Due at New York the following Friday, with the exception of the Advance, which is due there on Saturday.

*Every Monday to New York for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*NOTE—The sailing on Monday, May 3, will not land mail in New York until Tuesday of the following week; hence despatches on that date will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7.10 a. m., connects with the despatches for the sailing on May 3.

Stages of the Chagres River, Gatun Lake, and Mirafleres Lake.

Maximum heights of the Chagres River, Gatun, and Mirafleres Lakes for the week ending midnight, Saturday, April 3, 1915:

Fuel and Supplies.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Cristobal or Balboa from plants of The Panama Canal, or from the private corporations which have tanks at the terminals. The present price for fuel oil supplied by The Panama Canal is \$1.25 per barrel of 42 gallons. The prices made by the corporations may be obtained on application to them.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock, with a minimum charge of \$3. Vessels may take up from the fresh water sections of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa.

(Continued from page 301.)

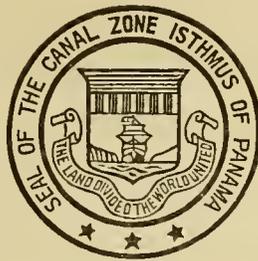

The cable address of The Panama Canal, on the Isthmus, is "Pancanal, Balboa Heights;" in the United States, "Pancanal, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C." for delivery in the United States.

Sallings of Vessels in Regular Service with the Isthmus.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing every Saturday, direct from Cristobal, and every Thursday, direct from New York; between Colon and New York by the United Fruit Company, sailing via Kingston weekly and via Havana weekly; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. To others, the subscription rate will be \$1, United States currency, per annum, in the United States and its possessions; Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Charges on Deck Loads.

The recent ruling that tolls on vessels using the Canal shall not exceed the equivalent of \$1.25 per net United States register ton makes no modification in the procedure of measurement and levy of tolls, except by this limit on the total amount chargeable. The net Canal tonnage (cargo-carrying capacity in tons of 100 cubic feet) is still the basis of charge, at \$1.20 per Canal ton, and deck loads are still charged for in addition at the rate of \$1.20 per 100 cubic feet. But if the sum of these charges exceeds the product obtained by multiplying the net United States tonnage by \$1.25, the difference is not collectible.

The limitation as to maximum charge may result in allowing deck loads to go through practically without charge. For example, a vessel having a net Canal tonnage of 1,000 and carrying cargo in the hold alone would be assessed at \$1,000 times \$1.20, or \$1,200. Suppose her net United States tonnage to be 980; the product of this by \$1.25 is \$1,225, so the regularly levied Canal tolls, amounting to \$1,200, would be collected.

If the same vessel were carrying deck load, say 200 tons, the levy would be at \$1.20 per ton on 1,000 plus 200, or \$1,440. But as this is in excess of the product of 980 by \$1.25, or \$1,225, only the latter amount may be collected. In other words, whether the vessel carries deck load or not, the total charges may not exceed \$1.25 per net United States ton.

The ruling may be summarized in this way: Whichever of these two products—
(Panama Canal net tonnage + deck load) × \$1.20, or
(United States net tonnage) × \$1.25,
is the less, will be collected.

Increasing Service to the Far East.

The Commonwealth and Dominion Line, Ltd., is developing an extensive service from New York to the Far East and Australia and New Zealand through the Canal with vessels which were formerly operated around the Cape of Good Hope.

Four subsidiary lines are being used by the Commonwealth and Dominion Line in this service. They are the Indra Line, the Star Line, the Port Line, and the Tyser Line,

each of which has its own fleet. The Indra Line operates between New York and the Far East, and the three other lines between New York and Australia and New Zealand. Vessels of the Indra Line and the Star Line have already passed through the Canal, and one of the Port Line, the *Port Curtis*, is now on the way, due to arrive at Cristobal on April 20.

The fleet of the Indra Line, which is also known as the American-Australian Line, consists of the *Hawkes Bay*, *Indrabarah*, and *Indralemo*; that of the Star Line of the *Star of Australia*, *Star of England*, *Star of India*, *Star of Scotland*, and *Star of Victoria*; that of the Port Line of the *Port Albany*, *Port Augusta*, *Port Curtis*, *Port Hunter*, *Port Kemble*, *Port Lincoln*, *Port Macquarie*, *Port Phillip*, and *Port Pirie*; and that of the Tyser Line of the *Makarini*, *Marere*, *Mimiro*, *Muritai*, *Nerehana*, *Niwaru*, and *Whakarua*.

New Timetable for Panama Railroad.

Passenger train timetable No. 22 for the Panama railroad, which will go into effect at 12.01 a. m., Sunday, April 18, is published on page 305 in this issue of THE CANAL RECORD.

The new timetable makes no changes in the main line trains, between Colon and Panama. The Panama-Las Cascadas shuttle service is continued as before except for these two changes: From Panama, the train leaving at 10.40 p. m., heretofore operated on Sunday only, will be extended to run daily except Saturday; and from Las Cascadas, one new train is added, to leave Las Cas Cascadas at 11.40 p. m. daily except Saturday, arriving at Panama at 12.30 in the morning.

The addition of the 10.40 p. m. daily train has been made for the personal convenience of the Army and Canal forces stationed between Las Cascadas and Panama, and with the idea of making this additional service self-supporting, it has been ruled that complimentary transportation will not be accepted on this train (No. 42). This ruling prohibits the use of card passes or complimentary trip passes on this train.

New Coastwise Passenger Service through the Canal.

The passenger steamship *Kroonland*, which passed through the Canal on February 2 on a tour around South America with a party of business men, and is the largest ship to have used the Canal to date, is to be operated with her sister ship, the *Finland*, in a regular coastwise passenger service between New York and San Francisco, via Los Angeles and San Diego. This service is scheduled to begin with the sailing of the *Finland* from New York on May 1. Sailings are to be made each way every 21 to 25 days. The scheduled time at sea on each trip is 16 days, which, allowing eight hours for the transit of the Canal, means traveling about 335 miles a day, a speed of approximately 14 knots.

RECEIPTS AND EXPENSES.

Toll Earnings Have Not Equalled Cost of Operation and Maintenance.

Up to March 1, 1915, the earnings of tolls on vessels using the Canal fell short of meeting the expenses of operation and maintenance of the Canal by \$261,098.09.

From the beginning of the present fiscal year, on July 1, 1914, to March 1, 1915, a period of eight months, the total expenditure attributed to operation and maintenance was \$2,595,613.33. The total earnings of tolls in the period were \$2,334,515.24. In other words, on a business requiring the expenditure of \$2,595,613.33 the Government has lost approximately 10 per cent.

Detailed analysis of the receipts and expenditures for the months of January and February, 1915, and for the entire 8-month period, are given in the table below. For the purposes of general information, it may be stated here that operation and maintenance include all the diversified expenditures necessary for keeping the Canal open and in order, and the work of handling vessels through; and to such expenditures have been added a prorated part of the expenses of the civil government, of the sanitary work, and of general administration. These three latter items have amounted to \$574,570.82 during the period. Over a third of the total overhead expense of The Panama Canal is assigned to operation and maintenance.

Operation and maintenance proper are summarized under the following heads: Admeasurement of vessels, local inspection, aids to navigation, pilotage, damages to vessels, maintenance of transportation tracks, Gatun Locks, Gatun Spillway, Gatun Dam, Pedro Miguel Lock, Pedro Miguel Dam, Miraflores Locks, Miraflores East Dam and Spillway, Miraflores West Dam, dredging, and maintenance of Gatun Lake, Gatun-Mindi Levee, and Naos Island Breakwater. The total cost of the work in Culebra Cut attributed to operation and maintenance is \$1,012,695.39. This includes the work north of Gold Hill, where the channel was once opened, but not the work at Cucaracha slide, which has been considered construction work, as the channel was not clear on July 1.

It will be noted that the Canal was opened to oceangoing vessels on August 15, 1914, a month and a half after the beginning of the fiscal year. Toll collections prior to August 15 amounted to \$11,610.69. However, until August 15 a part of the charges since attributed to operation and maintenance were charged to construction. The total cost of operation and maintenance for the months of July, August, and September was \$595,225. The table given below is designed to show, as accurately as they may be distributed, the actual cost of maintaining and operating the Canal during the 8-month period. This period includes the first six months of commer-

cial operation, as well as a month and a half prior to the opening, and half a month following the completion of six months' commercial operation, which fell on February 15, 1915.

Tolls earned during March, 1915, amounted to \$560,784.96. The cost of operation and maintenance has not been summarized, but it is estimated that it will be approximately \$425,000. This would carry the total for nine months to about \$3,020,000, as against toll earnings of \$2,894,300.20, and reduce the loss to approximately \$125,000 or \$130,000, about four per cent of the expenditure for operation and maintenance.

Detailed summary of the various items of expenditure included under operation and maintenance, for January and February, and the aggregate for the eight months to March 1, is given in the following table:

ITEMS.	Month of February, 1915	Month of January, 1915	Total since July 1, 1914
Civil Government, proportion.....	20,164.53	21,412.95	152,365.30
Health Department, proportion.....	19,128.60	24,243.53	163,237.49
Administration, proportion.....	81,146.00	90,590.64	574,570.82

MAGNETIC SURVEY OF EARTH

Yacht "Carnegie" Passes through the Canal on Work of Value to Navigators.

The yacht *Carnegie*, which is engaged in a magnetic survey of the oceans, sailed from Balboa on Monday, April 12, after passing through the Canal from the Atlantic Ocean. The next port will be Honolulu, but the later course of the cruise will be mostly through the south Pacific, followed by circumnavigation of the south pole as far down in the antarctic regions as the ice will allow.

The *Carnegie* is owned by the Carnegie Institution of Washington, D. C., and operated by the Department of Terrestrial Magnetism of that foundation. The department is conducting a magnetic survey of the earth, begun in 1904 and now about three-fourths completed. This is carried out on land and sea simultaneously. The land parties, in some 40 expeditions, have traveled over 800,000

miles, making observations at about 3,000 stations, in 107 countries and island groups but mostly in Africa, Asia, and Australia, where the least surveying of the sort had been done; and the ships of the Institution have been over all the oceans, between latitudes about 50° north and 50° south, traveling over 175,000 miles, with observations every 100 to 200 miles. By the time the survey is completed the parties will have traveled an aggregate distance equivalent to 50 times around the world.

The observations taken by the staff of the *Carnegie* embrace the three magnetic elements, familiar to navigators—the magnetic declination, or "variation of the compass," the horizontal dip, and the intensity of the magnetic field. In addition studies are made of atmospheric electricity and various magnetic conditions, especially as these differ from conditions predicated by previous surveys or by theories.

The work is international and data are furnished to various governmental hydrographic offices for the correction of the charts published by them. Those of value and importance to mariners are available for their use within from two to four months from time of observation. It is not unusual for the *Carnegie* to afford corrections as great as 2° to the charted magnetic variation, even after taking into consideration the periodic and secular changes. From the time of the first magnetic survey, by Halley in 1698, to the present, no such comprehensive scheme of accurate surveying has been undertaken, and many areas visited by the *Carnegie* have practically not been surveyed before. Last summer, for instance, the vessel went as far north as 79° 52.3', in the eastern Atlantic, and recorded facts not previously known. At one point the dip observed was as high as 81.3°, and the value of the horizontal intensity was .081 c. g. s. unit.

In addition to the immediate practical value of the work to mariners, the data collected will be of service in the effort to determine the causes of magnetic phenomena, especially of diurnal variation of the compass, and magnetic and electric storms; and in the project of establishing a kind of worldwide magnetic datum from which it may be possible to reckon changes ahead.

Accuracy is the keynote of the work of the *Carnegie*. The vessel is nonmagnetic, being built throughout of wood, with locust spikes, and sheathed below the water line with copper plating; and all the fixtures are of nonmagnetic material. Oil lights are used; all the stoves, and even the auxiliary engine, are of copper; the 1,400-pound anchors are of bronze. Such few items of magnetic substances as can not be dispensed with, like the tin cans for food, are stowed far aft and below where their influence is negligible. The instruments have been made with extreme care. Time is taken from the mean of the readings of six chronometers. Every observation is made by two separate methods, and each of these is conducted by two observers; at every station a total of 400 readings is taken for each phenomenon.

The vessel is 155½ feet long over all, or 20 feet longer than the Canal tug *Reliance*. The length at load water line is 128 feet four inches, and the beam is 33 feet, with a draft of 13½ feet. The crew consists of 23, including six scientists. The vessel is frequently at sea for several months at a time.

Removing Part of Old "American Wharf" in Panama.

Forces of the Panama Railroad Company began on Monday, April 12, the removal of the outermost 100 feet of the old "American wharf," belonging to the company, in the harbor of Panama. This is done to save the section from falling down. This timber structure and the "English wharf" to the north of it are relics of the early days of the railroad and formed the Pacific terminal until the erection of the steel wharf at Balboa in 1899, alongside the channel dredged by the French canal forces. Cargo was transferred to and from vessels in lighters. The American wharf is 795 feet long and 68 feet wide, and the English wharf is 300 feet long by 47 feet wide.

Deceased Employees.

Wood, Joseph.....	U. S. A.....	Cristobal.....	C. J. Alberts, contractor.	April 5.

The estates of the abovenamed deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against the estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

IMMIGRATION AND EMIGRATION

For First Time In 20 Months Immigration to Isthmus Exceeds Emigration.

Immigration to the Isthmus exceeded emigration from it during the month of March, 1915. This is the first time that such has occurred since June, 1913, when there began an exodus of Canal employes released by the approaching completion of the work, and of others who had lived on the Isthmus during the heyday of the construction period. The progress of the exodus, amounting to almost 25,000 people, is shown by the following summary of net emigration by months, taken from the monthly reports of the quarantine officers:

MONTH.	No. each month.	Total since July 1, 1913.
July, 1913.....	1,129	1,129
August.....	1,844	2,973
September.....	2,485	5,458
October.....	2,430	7,888
November.....	2,037	9,925
December.....	1,970	11,895
1914		
January.....	1,382	13,277
February.....	292	13,569
March.....	397	13,966
April.....	1,417	15,383
May.....	626	16,009
June.....	283	16,292
July.....	405	16,697
August.....	701	17,398
September.....	1,155	18,553
October.....	1,990	20,543
November.....	537	21,080
December.....	1,328	22,408
1915		
January.....	804	23,212
February.....	1,561	24,773

The net emigration for the 20 months has averaged 1,223.65 per month, or about 40 persons each day.

The excess of immigration over emigration during March, 1915, is due to the arrival of 1,471 American soldiers. Counting them, the excess was 654; without them, there would have been an excess of emigration over immigration amounting to 817 persons.

In this connection, it is noted that the force at work on the Canal and Panama railroad, including the forces of contractors, on June 25, 1913, was 42,262; and the force on February 24, 1915, was 23,445 men. This is a decrease of 18,817 in 20 months, an average of 940.85 per month, or about 31 per day.

March was a busy month for the Canal quarantine officials. Two hundred and thirteen vessels were inspected, as compared with 149 during the preceding month, and 18,169 persons were examined, as compared with 13,632 in February and 14,119 in January. Further details of the movements of persons through the ports are given in the following consolidated report of quarantine operations at the ports of Balboa-Panama and Cristobal-Colon for the month of March:

Number of vessels inspected and passed	205
Number of vessels held at quarantine	8
Total	213
Number of vessels fumigated on arrival	7
Number of vessels fumigated on departure	2
Total	9
Number of crew examined	12,155
Number of passengers examined (including 1,471 U. S. troops)	6,014
Total	18,169
Number of persons vaccinated at ports of arrival because of compulsory vaccination law	569
Number of persons vaccinated at ports of departure or enroute because of compulsory vaccination law	1,410
Total	1,979

Number of persons held in quarantine at the detention houses to complete period of incubation of yellow fever and plague	379
Number of persons held in quarantine on board vessels to complete period of incubation of yellow fever and plague	1,085
Total	1,464
Number of persons landed from foreign ports:	
Cabin	2,258
Steerage	2,132
Total	4,390
Number of persons embarked for foreign ports:	
Cabin	2,070
Steerage	1,666
Total	3,756
Number of persons arriving from coast towns on small launches and sailing craft	1,875
Number of persons sailing for coast towns on small launches and sailing craft	2,485
Apparent decrease for month from coast towns	610
Apparent decrease for month from foreign ports:	
Cabin (increase)	188
Steerage (decrease)	534
Total	346
Number of immigrants recommended for deportation	11
Number of bills of health issued of viséed	213
Total number of persons landed	6,265
Less number for Pacific ports	191
Total number of persons sailing	6,221
Total apparent decrease for month	147

New Quarantine Landing at Balboa.

In connection with the new quarantine station at Balboa, a permanent landing for passengers is being constructed on the southern side of Balboa dump. It will be floating landing, using a steel pontoon anchored in 22 feet of water and connected to the shore by a trestle. The trestle is to be 569 feet long by 11 feet wide at the deck, and the floor is to be 14.5 feet above mean sealevel. At the sea end will be a 90-foot steel bridge gangway, hinged to the trestle and resting at its outer end on the floating pontoon. This gangway will be exactly like the one in use at the small boat landing at Dock 17 in Balboa Harbor. The

supports of the trestle will be bents spaced from 21 to 24 feet apart and consisting each of two 14-inch pipe piles, driven on a batter of one on 12 and filled with reinforced concrete. In each span the piles will be connected by a heavy brace at mean sealevel and by a cap of reinforced concrete, two feet four inches wide by four feet deep. Three well braced tower bents of 10-foot spans will be erected at equal intervals for securing greater rigidity. The floor will be a 6-inch reinforced concrete slab, resting on two I-beam stringers enclosed in concrete, and a suitable railing will be erected along the sides.

The construction of the approach was let by contract, award being made to Mr. A. P. Cray. Work was begun last week and it is expected that the landing will be finished in June.

Old Pacific Division Office Building Abandoned.

The section of the drafting force of the Division of Terminal Construction which had been occupying the old Pacific Division office building at Corozal, moved last week into the general drafting room in the Administration Building at Balboa Heights. The abandoned office building will be turned over to the Army.

This move marks the ultimate step in the dissolution of the three great construction divisions, the Atlantic, Central, and Pacific, which were formed on July 1, 1908, to handle the task of excavating the Canal channel, building the dams, and placing the concrete for the locks and spillways. The Central Division was abolished on October 10, 1913, the day of the blowing up of the Gamboa dike. The Pacific division was abolished on December 12, 1912, its remaining work being taken over by a newly created Fifth Division, which lasted until February 1, 1914, on which date it and the Atlantic Division were abolished. The Central Division office building was abandoned in November, 1913, and the Atlantic Division building was abandoned in September, 1914.

WEATHER CONDITIONS, CANAL ZONE, MARCH, 1915.

The rainfall for the month was below the average at all stations except Camacho, Juan Mina, Frijoles, and Colon. Monthly totals ranged from zero at Balboa to 1.71 inches at Colon. The maximum amount of rainfall recorded on any one day was 0.83 inches, at Camacho reservoir on the 20th.

The estimated rainfall over the Chagres River basin was 36 per cent below the average, or 1.02 inches against a 14-year average of 1.60 inches.

The average air temperature on both coasts was above normal, the daily excess being approximately one degree Fahrenheit on the Pacific coast and two degrees Fahrenheit on the Atlantic coast. The average temperature at Colon was the highest on record for the month of March. The atmospheric pressure and wind movement were below the average, while the relative humidity and daytime cloudiness were above normal at both coast stations.

No fogs were observed during the month at either coast station and only a few were observed at interior stations, all of which were dissipated before 7.30 a. m.

Elevations of Gatun Lake in feet above mean sealevel:

Mean for the month, 86.82; maximum, 86.98, on the 8th; minimum, 86.60, on the 31st; evaporation from the lake surface, 6,698 inches.

Conditions at the entrances to the Canal may be summarized as follows:

STATIONS.	Press're (reduced to mean of 24 hourly.)	Temperature.				Mean relative humidity.	Precipitation.			Wind.

OFFICIAL CIRCULARS.

Rental of Quarters o Nonemployees.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., March 25, 1915.

CIRCULAR No. 627-7:

1. As provided in paragraph 15 of Circular No. 627-3, dated February 24, 1915, the following surcharges will be added to the regular schedule of rentals when quarters are rented to other than employes of The Panama Canal and Panama Railroad Company:

(a) Contractors and their employes, officers and enlisted men of the Army, Navy, and Marine Corps, officers and employes of other branches of the United States Government:

Bachelor quarters..... 50 per cent.
Family quarters..... 80 per cent.

(b) Outside parties who have no connection with The Panama Canal or Panama railroad:

Bachelor quarters..... 125 per cent.
Family quarters..... 250 per cent.

3. No charge will be made for electric current in quarters when the above surcharges are added to the rental.

4. The above surcharges will be remitted when quarters are rented to officers and enlisted men of the Army, Navy, and Marine Corps or other branches of the United States Government, and the repairs to the buildings occupied are made by the interests occupying same, but charge will be made for electric current in such cases. No surcharge will be added to the rental of quarters which may be assigned to ministers or representatives of charitable organizations, but charge will be made for electric current in such quarters.

5. This circular will not give any of the above-mentioned classes of nonemployees any rights to assignments to quarters. Bachelor quarters, if available, may be rented to any of the above classes, except that assignments under (b) will only be made with the approval of the Chief Quartermaster. Assignments of family quarters to any nonemployee will only be made with the approval of the Governor.

6. It is directed that when contracts are made, in connection with which it is probable the contractor will desire to rent quarters, the contract will carry provision that quarters, if available, will be rented at the rates provided. It is also directed that when bids are asked for covering service or the furnishing of supplies in connection with which it is probable the contractor will desire to rent quarters, bidders will be advised that a reasonable number of bachelor quarters can be rented but that family quarters will not be available.

7. The above will apply to both silver and gold quarters.

GEO. W. GOETHALS,
Governor.

Rates for Floating Cranes.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., March 30, 1915.

CIRCULAR No. 686-4:

1. A rate of \$20 an hour will be charged departments and divisions of The Panama Canal and Panama railroad, or other branches of the United States Government, for services of the floating cranes *Ajax* and *Hercules*.

2. This rates applies to each of the floating cranes and includes only their regular crew. Any additional force, as well as all towing and similar charges, will be extra at the usual rates.

3. Rates for services for others will be furnished upon application to the Superintendent of the Mechanical Division.

GEO. W. GOETHALS,
Governor.

Placing Cars for Delivery.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 8, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

It too frequently happens that cars are picked up from yards and placed for delivery without records being turned in to the terminal trainmaster by the conductors performing the service. There are also frequent cases where delivery is denied by the particular department for which the material is intended, thus bringing about difficulties in the adjustment of bills.

A great deal of this has been charged to conductors of work trains in the exclusive service of some particular department or division, removing cars from the yard without the knowledge of the terminal forces and placing cars for delivery without turning in a record to cover.

Commencing at once, field superintendents or foremen of the various departments or divisions, when detailing a work train crew in their service to pick up a car or cars from any part of the terminal, must give the conductor an order in writing properly indicating the de-

partment or division for which the service is to be performed, and signed by the field superintendent or foreman issuing the order. Conductors of work trains before removing such cars must present this order to the yard office for their approval and record, and in addition will turn in at the close of each day's service switching list, form AI-385, showing a full and complete record of all cars moved or handled, viz: Car number, contents, where from, where to, time placed, and whom for. Conductors engaged in yard or roustabout service, both Panama railroad and Panama Canal, will likewise make record and turn in at the close of each day's service, a complete list of all cars moved from any part of the terminal and later placed for delivery.

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, the Panama Railroad Company.

New Form of Application for Quarters.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 6, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

There is being forwarded to you under separate cover, a supply of form 1694-1 combination application for family and bachelor quarters.*

You will please instruct each employe in your department or division, who now has on file an application for family quarters, to fill out this form in duplicate, and after completion by head of division, forward the original to the district quartermaster concerned and a copy to this office.

Heads of divisions in answering questions 9 and 10 will please be as explicit as possible.

By direction of the Governor.

C. A. MCVILVAINE,
Executive Secretary.

*Following is the form of application blank:
Application for Family Quarters.
Bachelor

1. Name.....	Date.....
2. Are you married now?.....	P. O. Address.....

9. How long will his employment last?.....
10. Is his position in permanent organization?.....
Signature.....
Head of Division.

EXECUTIVE OFFICE.

11. The service record of this employe as given above is correct.

Signature.....
Chief Clerk, Executive Office.

Executive Order.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 7, 1915.

CIRCULAR No. 601-42:

REINSTATEMENT OF DR. EDWARD P. BEVERLEY.

The Executive Order quoted below is published for the information of all concerned.

GEO. W. GOETHALS,
Governor.

The year limit upon eligibility for reinstatement is hereby waived to permit the reinstatement of Dr. Edward P. Beverley as a physician in The Panama Canal service.

Dr. Beverley's reinstatement by Executive Order is recommended by Gen. Geo. W. Goethals, Governor of The Panama Canal. Dr. Beverley entered the service on July 6, 1904; served through the period when tropical diseases were prevalent, and by his efficient service was successively promoted until he held one of the highest positions therein at the close of his service, December 15, 1913, being rated as "excellent" in both conduct and character of work. Necessity for a change of climate required his resignation, but he has recovered from the effects of his long residence in the tropics and desires to return to work on the Isthmus.

The Civil Service Commission concurs in recommending this order.

WOODROW WILSON.

THE WHITE HOUSE,
March 23, 1915.

Danger to Railroad Employes at Corozal.

PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,

BALBOA HEIGHTS, C. Z., April 3, 1915.

TRANSPORTATION BULLETIN No. 160:

All concerned—Attention is called to the fact that the new passenger station at Corozal will not clear a man on the side of cars on the east side of the north-bound main track; likewise on connection south end of commissary siding.

Employes are warned to refrain from placing themselves on the east side of cars while passing or working in the vicinity of this station on the northbound main.

C. H. MOTSETT,
Superintendent.

No Complimentary Transportation on Train No. 42.

PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,

BALBOA HEIGHTS, C. Z., April 8, 1915.

All concerned—No complimentary transportation, either in the form of card passes or trip passes will be accepted for transportation on train No. 42 which will leave Panama 10.40 p. m. daily, except Saturday, on new timetable No. 22, which becomes effective Sunday, April 18, 1915.

C. H. MOTSETT,
Superintendent.

Magistrate for District of Cristobal.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 6, 1915.

To all concerned—Effective April 10, 1915, and during the absence on leave of Judge John W. Thompson, Mr. E. W. Bucklin will perform the duties of magistrate for the District of Cristobal.

GEO. W. GOETHALS,
Governor.

Deputy Collector.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., March 18, 1915.

CIRCULAR No. 661-15:

1. Mr. Elwood P. Sine is hereby appointed Deputy Collector of The Panama Canal, and Acting Collector of The Panama Canal during such periods as he may be designated by the Governor of The Panama Canal to perform the duties of the office of Collector during the Collector's absence or disability.

2. Before entering upon his duties as Acting Collector he will give two bonds in the sum of \$100,000 each, such bonds to contain the same conditions as the bonds given by the Collector.

GEO. W. GOETHALS,
Governor.

Rates of Pay—Silver Roll.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 6, 1915.

CIRCULAR No. 666-4:

REEMPLOYMENT.

1. Paragraph 4 of Circular No. 666 (Rev.) reads: If a silver employe is discharged for unsatisfactory service or misconduct, with no objections to reemployment, he may be reemployed only at a lower rate of pay than that previously received and may not be promoted to his old rate under six months; if he quits voluntarily, with no objections to reemployment, he may be reemployed only at a lower rate of pay than previously received and may not be promoted to his old rate under two months.

2. The above rule is modified to the extent that if a silver employe quits voluntarily after having given five days notice, he may be reemployed at the same rate previously received, or at the entrance rate of any position for which he is qualified, even though such entrance rate be higher than his old rate.

GEO. W. GOETHALS,
Governor.

Subsistence for Employes on Floating Equipment of Dredging Division.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 5, 1915.

CIRCULAR No. 680-1:

Circular No. 680 is hereby amended by eliminating paragraph (b) of section 4, and substituting therefor the following:

(b) The Dredging Division will, before the time slips for employes on the "Extra list" are forwarded to the Chief Timekeeper, indicate thereon whether subsistence was or was not furnished to each man carried on such time slip.

GEO. W. GOETHALS,
Governor.

COMMISSARY DEPARTMENT.

Sale of New Furniture.

A sale of new furniture is in progress at the Camp Bierd commissary, Cristobal.

This furniture has been greatly reduced in order that the stock may be closed out. It will be delivered to any point along the line after purchase. Arrangements can be made with the Camp Bierd commissary storekeeper for inspection on Sundays. Call phone Colon No. 155-B.

Commissary Hours.

The commissary stores at Las Cascadas, Empire, and Culebra are open from 7.30 to 11.30 a. m., and 1.30 to 5.30 p. m.

The commissary store at Balboa is open from 8 a. m. to 12.30 p. m., and 2.30 to 6 p. m.

All other commissary stores are open from 8 a. m. to 12.30 p. m., and 3 p. m., to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m. on Saturdays and other sailing days of Panama railroad vessels.

JOINT LAND COMMISSION.

Notice of Awards.

In the matter of the claim of Juan Gris for property located at Maton Island, award No. 76, docket No. 259, March 31, 1915—The claim of Juan Gris, in the sum of \$120,533.45, United States currency, for the Island of Maton, situated at the Atlantic entrance of the Canal, and for certain improvements thereon, which was filed with the Commission on April 16, 1913, and came on for public hearing on March 17, 1915, is denied in so far as title to the land in question is concerned.

As to the improvements claimed, however, an award is hereby made against the United States in favor of the said Juan Gris, in the sum of \$400, United States currency, for all rights, claims, and other interests in any and all growing crops, trees, and buildings of whatever nature, and any other improvements which the said Gris may possess or may have possessed on the Island of Maton (also known as Mindi Island).

This award shall be paid to said claimant, in the amount specified, on or before the first day of May, 1915, and if payment or tender of payment of such award is not made on or before that date, such award shall thereafter bear interest at the rate of six per centum per annum until paid.

JORGE E. BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

In the matter of the claim of Ashby H. Bethancourt for property located at Maton Island, award No. 75, docket No. 257, March 31, 1915—In the matter of the claim of Ashby H. Bethancourt, filed April 16, 1913, for damages in the sum of \$3,000 to certain coconut trees on the Island of Maton, also known as Mindi Island, which came on for hearing before the Joint Land Commission on March 17, 1915, an award is hereby made against the United States in the sum of \$200, United States currency, for all rights, claims, and other interests in coconut trees and any other improvements of whatever nature which the said Bethancourt may possess or may have possessed in the Island of Maton or Mindi.

This award shall be paid to said claimant, in the amount specified, on or before the first day of May, 1915, and if payment or tender of payment of such award is not made on or before that date, such award shall thereafter bear interest at the rate of six per centum per annum until paid.

JORGE E. BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 303, on Wednesday, April 21, 1915, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filing out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

For the benefit of applicants residing in Gatun and Cristobal or Colon, examinations for licenses as navigators of motor boats, and as chauffeurs, will be held at the office of the captain of the port of Cristobal on Friday, April 23, 1915, beginning at 9 a. m. Applicants should be provided with motor boats or automobiles for the demonstration test.

By direction of the chairman of the board.

F. M. NIXON,
Recorder, Board of Local Inspectors.

SHIPPING INFORMATION.

May Weather Probabilities.

The following weather conditions may be expected to prevail at the Canal entrances during the month of May, 1915. Predictions are based on the records at Ancon and Colon for the past seven and eight years, respectively.

Winds—With the beginning of the rainy season there will be a marked decrease in the wind movement on both coasts. Northerly winds will prevail at the Atlantic entrance to the Canal, although variable winds may be expected with the change of the season. An average hourly velocity of about eight miles an hour may be expected and a maximum velocity of 36 miles an hour may occur during a thunder squall.

Over the interior and on the Pacific coast the prevailing direction of the wind will be from the northwest, with an average hourly movement of about six miles an hour. The maximum wind velocity is not likely to be above 27 miles an hour.

Rain—On the Isthmus the month of May marks the transition from dry season weather to rainy season conditions. Heavy showers can be expected at both coast stations and over the interior. The station averages at Ancon and Colon are 8.81 inches and 12.77 inches, respectively, while the average number of rainy days (one on which 0.01 inch or more of rain is measured) is 20 and 23 for the abovenamed stations. The average number of days in May on which the rainfall equalled or exceeded one inch (1.00) has been three at the Pacific entrance and six at the Atlantic entrance to the Canal.

Fogs—No fogs are likely to occur on the Pacific coast and few fogs, if any, may be expected at the Atlantic entrance. Over the Culebra Cut section of the Canal night and early morning fogs are likely to occur quite frequently, but under the present operating conditions they will not affect navigation. The average number of nights with fog at Culebra for the month of May has been 22, 65 per cent of which have been light. Practically all of the fogs may be expected to lift or become dissipated by 8.30 a. m.

Temperature—An average shade air temperature of 81° Fahrenheit may be expected at both Atlantic and Pacific entrances. On the Atlantic coast the temperature is not likely to rise above 91° Fahrenheit or fall below 71° Fahrenheit, while on the Pacific coast the maximum air temperature is not likely to exceed 96° Fahrenheit, or the minimum fall lower than 69° Fahrenheit. The mean daily range in temperature will probably be about 9° Fahrenheit at the Atlantic entrance and about 15° Fahrenheit at the Pacific entrance.

Barometric pressure—Except for the well marked diurnal change, changes in atmospheric pressure on the Isthmus are very slight and of little value in forecasting weather conditions. The average May sealevel pressure is 29.85 inches. A maximum atmospheric pressure of more than 29.97 inches, or a minimum pressure of less than 29.71 inches, is not likely to occur at either entrance to the Canal.

Storms—Thunder squalls may be expected during the month at both Canal entrances. During these storms comparatively high wind velocities may be attained, but the storms are of too short duration to cause a rough sea. The average numbers of days with thunderstorms on the Atlantic and Pacific coasts are

13 and 16, respectively. Generally cloudy weather can be expected during the month of May over both coasts.

Tides—Owing to the fact that the average tidal range at Colon is less than one foot, and the maximum range approximately two feet, tidal fluctuations need not be considered in navigating the Atlantic entrance to the Canal.

At the Pacific entrance the average tidal range is about 13 feet, although a maximum range of 20 feet may occur.

Tide Predictions.

Panama tide predictions for the next five weeks are given in the following table:

APRIL.				
DATE.	Time and height of high and low water.			
Wed., April 14.....	3:54	9:50	16:06	22:12

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used in Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from Oh (midnight) to 23h (11 p. m.). All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47 p. m.

Stages of the Chagres River, Gatun Lake, and Miraflores Lake.

Maximum heights of the Chagres River, Gatun, and Miraflores Lakes for the week ending midnight, Saturday, April 10, 1915:

Misdirected Letters.

BALBOA HEIGHTS, C. Z., April 12, 1914.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts and may be procured upon request of the addressees:

Ahlfont, A. G. Johnston, Francis M.
 Barth, Miss Minnie Jones, Arthur
 Birkland, O. Luuwall, Miss Eva
 Black, B. A. McLeod, Jimmie
 Bowie, William R. Marshall, John
 Browne, Mrs. R. Crawford Melhope, G. E.
 Caldwell, J. G. Melbourne, Victor
 Clement, James R. O'Connell, Mrs. H. C.
 Coke, Frank Parsons, F. E.
 Cubic, John Pender, B. D.
 DeLeon, H. G. Pfisterer, Capt. A.
 Dennis, J. C. (2) Price, Thos. J.
 Dew, Michael Purrington, Frank
 Donahue, Arthur Salveson, William
 Doying, W. A. E. Senhouse, Joseph
 Forbes, Sherman Grey Smith, Freeman W.
 Fulton, J. M. Spruance, Fred Davis
 Glenester, Miss Catherine Spurling, Walter E.
 Harwood, Mr. and Mrs. R. Sutton, James R.
 Jacques, Alvin B. Viall, Mr and Mrs. H. H.
 Jenkins, Elvis L. Willett, Mrs. A.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans for all States. Due at New Orleans on the following Tuesday.

Every Saturday to New York for all States. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

*Every Monday to New York for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.

(Continued from page 309.)

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*NOTE—The sailing on Monday, May 3, will not land mail in New York until Tuesday of the following week; hence despatches on that date will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7.10 a. m., connects with the despatches for the sailing on May 3.

Fuel and Supplies.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 600 and 750 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1, at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Cristobal or Balboa from plants of The Panama Canal, or from the private corporations which have tanks at the terminals. The present price for fuel oil supplied by The Panama Canal is \$1.25 per barrel of 42 gallons. The prices made by

the corporations may be obtained on application to them.

Application for supplies, or for services, should be made to the Captain of the Port, Cristobal or Balboa. Mail, other than registered, and cablegrams for men on ships which will call at the terminal ports, or pass through the Canal, may be addressed in care of the captains of the ports, if desired; or may be addressed to Cristobal or Balboa, general delivery, with the name of the vessel written plainly; or, in case the vessel has a known representative on the Isthmus, in care of such representative.

The cable address of The Panama Canal, on the Isthmus, is "Pan canal, Balboa Heights;" in the United States, "Pan canal, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C." for delivery in the United States.

Sailings of Vessels in Regular Service with the Isthmus.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing every Saturday, direct from Cristobal, and every Thursday, direct from New York; between Colon and New York by the United Fruit Company, sailing via Kingston weekly and via Havana weekly; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

Sails, Arrives.

NEW YORK TO CRISTOBAL-COLON.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. To others, the subscription rate will be \$1. United States currency, per annum, in the United States and its possessions; Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Increasing Coaling Facilities.

The new Canal collier *Ulysses*, built by the Maryland Steel Company, of Sparrows Point, Md., under a contract entered into in March, 1914, has been undergoing acceptance tests and is expected to arrive at Colon in service by the end of this month. The vessel's sister ship, the *Achilles*, was launched on February 6 and will probably also be completed well in advance of the contract time of 16 months. Both will be used in regular service to the Isthmus, carrying each about 12,000 tons of coal per trip, in addition to the bunker coal required for a round voyage between Norfolk and Colon.

In anticipation of the coming of the new colliers, the channel at the Brown hoist wharf, at the entrance to the Mount Hope dry dock, and part of the French canal opposite the dry dock slip are being dredged to greater width, to allow the handling of the new vessels with entire security. Projects looking to increased speed in handling and rehandling coal at this wharf and the adjoining Dock 14 are under consideration by the authorities.

In step with the increasing purchases of coal by vessels using the Canal, and pending the readiness of the large permanent coal handling plant at Cristobal for partial use, probably in September or October, the facilities for handling coal to vessels from lighters are being extended at both Cristobal and Balboa. Three more barges of 500 tons capacity each are now being placed in order for transfer to the Cristobal service from the Dredging Division, and one barge of 300 tons capacity is to be added to the equipment at Balboa. This will give an immediate capacity of 2,600 tons on the water at Cristobal and 1,100 tons at Balboa, in addition to the facilities for supplying from cranes and cars on the wharves. One of the barges transferred to the Cristobal service is to be equipped with a boiler and 3-drum hoisting engine complete and with a boom capable of handling a 2½ or 3-ton clamshell bucket. A second barge is to be equipped with generator sets, central mast, and two booms for the suspension of two Demayo coal conveyors having a capacity

of delivering 75 tons per hour each. The equipment will enable the two barges not only to discharge from their own bottoms but also to unload other barges lying alongside as well.

Further facilities will be provided by the purchase, recently authorized, of six 500-ton self-contained barges of a type used by the Navy. Four of these will be added to the fleet at Cristobal and two to that at Balboa.

Coal supplied to vessels at Balboa during the month of March amounted to 4,568 tons; at Cristobal, to 20,261 tons. Deliveries in February were about 3,000, and 17,672½ tons, respectively.

First Whole Cargo of Zinc through the Canal.

The steamship *Sydic*, passing through the Canal from the Pacific to the Atlantic on April 12, carried the first whole cargo of zinc ore or concentrate through the Canal. This shipment consisted of 6,502½ tons of concentrate, or ore reduced by calcination, shipped from Port Pirie, Australia, for Galveston.

Recovering Piledrivers in Limon Bay.

Lines have been placed by the Mechanical Division's diver about piledrivers Nos. 103 and No. 104, lost off the East Breakwater in Limon Bay during the norther of February 9, and the floating crane *Hercules* will probably be used during the coming week to raise them. The crane will not be used in rough water because of the difficulty in turning it; but it is pointed out that there is no danger of its tipping over, by virtue of its wide pontoon and the construction which has placed its center of gravity about 14 feet above the water line, and made its metacentric height approximately 60 feet.

Sightseeing Passenger Service through the Canal.

The steamers of the Panama Railroad Steamship Line, sailing through the Canal every week, are carrying adults through the Canal for \$6, and children under 12 years of age at half-rate. Panama Canal and Panama railroad employes, and their families, are given a one-third reduction from the rates for nonemployes. The fares include meals aboard the ship and berth when necessary.

On their trips through the Canal, the ships are all scheduled to sail at 7 in the morning and arrive at the opposite terminal port at about 5.30 in the afternoon. Ships sail from Cristobal every Saturday or Sunday, and from Balboa every Wednesday or Thursday. The exact day of sailing in any week may be ascertained by telephoning to the receiving and forwarding agent at Cristobal or Balboa or the office of the Superintendent of the Panama railroad.

The steamship *Leonidas* of the United States Navy, employed in coast survey work by the Hydrographic Office, arrived at Cristobal on Monday, April 19, after a survey of the Mosquito Coast.

CANAL TRAFFIC ANALYZED.

From Masters' Declarations of Cargo—Origin and Destination of Principal Items in February.

An analysis of the traffic through the Canal during the month of February, based on the cargo declarations furnished to The Panama Canal by the masters of vessels making the transit, is published herewith. Similar analyses are to be prepared for the successive months and published regularly in THE CANAL RECORD.

The summary is not compiled directly from the ships' manifests, and accordingly entire accuracy can not be assured. Under the customs regulations originally adopted for the transit of vessels through the Canal, every vessel was required to furnish a copy of the manifest, which shows the nature, quantity, port of origin, and destination of all items of cargo. Various steamships companies protested against this as an onerous exaction, and the ruling was waived with respect to through vessels. In lieu of furnishing a copy of the manifest, each master was to make out a cargo declaration on a form furnished by The Panama Canal, showing kinds and quantities of cargo carried, and points of origin and destination. The form names 90 of the commodities likely to be carried through the Canal and has spaces for other items if they occur.

Each form bears these instructions: "A copy of this form will be handed to the master of each vessel arriving at Balboa or Cristobal for passage through the Canal. It should be filled in while the vessel is in transit and delivered to the pilot at the opposite terminal port. Accurate information is desired concerning cargo that is important on account of its tonnage or value, but it is not expected that small and unimportant items of cargo will be entered separately on the list. State quantity in tons of 2,240 pounds if possible, but if other unit of measurement is used, indicate clearly what it is."

During the month of February the declarations embraced shipments of 65 different commodities, as shown in the tabulation below. A check on their completeness and accuracy is given by comparison with the previously published summary of traffic in February (see THE CANAL RECORD of March 24, 1915), in which the cargo is summarized from the total cargo on each ship, taken from the manifest by the boarding officer. The sum of the parts, taken from masters' declarations, approaches within one per cent of the sum of the totals, as given by the manifests. The relatively slight discrepancy between the two might be accounted for by the omission, from the cargo declarations, of "small and unimportant items of cargo," of which it is not expected that they "will be entered separately on the list."

In the tabulation below, the items are divided between Atlantic-to-Pacific and Pa-

cific-to-Atlantic. Of the 65 items, 14 had an aggregate tonnage of over 5,000 each. They were barley, coal, flour, "general cargo," iron ore, iron and steel manufactured goods, machinery, railroad material, nitrates, refined petroleum, seed, sugar, and wheat. These 14 items amounted to 384,005 tons, 91 per cent of all cargo passing through during the month.

All of the barley, 33,076 tons, was shipped from San Francisco; and all went to Great Britain except 5,249 tons to Copenhagen, and 2,500 tons to Rotterdam.

Coal was in two cargoes, 3,214 tons from Glasgow and 1,828 tons from Norfolk, both to San Francisco.

Of flour, four tons were shipped from the United States to Central American ports on the Pacific, and 9,328 tons, in two cargoes, from Pacific ports of the United States to Rotterdam.

"General cargo" is an expression covering a multitude of omissions of explicit information. In the westbound traffic, 61,993 tons were so classed. Of this, 36,559 tons were shipped in the coastwise trade of the United States, from New York and Philadelphia to San Diego, Los Angeles, San Francisco, and Puget Sound. Forty tons were shipped from Europe to the United States; 3,976 tons from Europe and the United States to South America; 3,220 tons from New York to Australia and New Zealand; and 11,139 tons from New York to Vladivostok. In the eastbound traffic, 54,027 tons were handled in the coastwise trade of the United States; 4,971 tons from South America to Europe; 1,562 tons from South America to New York. From Japan and China, 365 tons were carried to Denmark, and 2,275 tons to New York.

Iron ore consisted of 19,850 tons, from Cruz Grande to Philadelphia.

Lumber consisted of 5,600 tons from Raymond, Wash., to New York; 130 tons from Punta Arenas to New York; and 1,158 tons from Tacoma and Seattle to Liverpool.

Manufactured goods of iron and steel amounting to 19,968 tons were distributed as follows: Five hundred and six tons from Europe to South and Central America; 10,500 tons from New York to the Far East; and 9,022 tons in the coastwise trade of the United States.

Machinery included 464 tons from Chile to New York; 2,732 tons from Lubeck to South America; nine tons from Europe to Central America; 86 tons from Glasgow to San Francisco; 1,200 tons from New York to Australia; and 670 tons from New York and Philadelphia to California.

Railroad material consisted of 181 tons from Denmark to South America; 600 tons from New York to Honolulu; 2,500 tons from New York to Australia; 1,200 tons from New York to Yokohama; and 3,188 tons from Pensacola to Straits Settlements.

The 48,076 tons of nitrates shipped from Antofagasta, Calita Buena, Mejillones, and Tocopilla were distributed as follows: To Europe, 28,350 tons; to the United States, 19,726 tons.

Refined petroleum amounted to 26,343 tons, all from the United States, distributed as follows: Eleven thousand five hundred and five tons to Japan; 9,200 tons to Shanghai; 5,500 tons to the Philippines; 122 tons to San Francisco; and 16 tons to Central America.

Seed amounted to 6,088 tons; 21 from Liverpool to Seattle; 17 from Seattle to Liverpool; 50 from Los Angeles to Galveston; and 6,000 (sesame seed) from Shanghai to Aarhus.

Sixty-two tons of sugar were handled in the Central American local trade, westbound; the eastbound traffic consisted of 32,805 tons. Of this, 28,644 tons came from Hawaii to New York; 3,000 tons from Yokohama to New York; 1,141 tons from Peru to New York; and 20 tons from Central American ports to Colon, for transshipment to Europe.

Wheat amounted to 37,416 tons, all from Portland, Oreg., Seattle, and Tacoma; 17,827 tons were consigned to England, 12,196 tons to Capetown, and 7,393 tons to Algiers and Marseilles.

A summary of the traffic in all the 65 commodities named during the month is given herewith:

Labor Trains Discontinued on West Side of Canal.

Labor train service on the west side of the Canal was discontinued on April 12. The former service between Balboa and Culebra now ends at Paraiso, but the schedule of trains on the Balboa-Paraiso section is the same as before.

LIGHTS IN BAY OF PANAMA.

Additional Aids at Punta Mala and Bona and Taboguilla Islands.

In conformance with the Act of Congress, approved on March 3, authorizing the construction of additional "lights on the Pacific coast, necessary as aids to navigation near the Pacific entrance to the Panama Canal," preparations are being made for the quick erection of a light at Punta Mala, at the entrance to the Bay of Panama, one on Bona Island, and one on Taboguilla Island, along the approach to the Canal.

For the inclusion of these important new lights, the sailing directions for making the Canal from the Pacific have been revised. The following notice to mariners, published as Circular No. 643-13, contains the most recent information.

GENERAL INFORMATION AND SAILING DIRECTIONS, PACIFIC APPROACH, PANAMA CANAL.

Lights to be established.—Lights discontinued.—Anticipating the revised edition of "Sailing Directions and General Information Relating to the Panama Canal," soon to be issued, the establishment of new lights, and the discontinuance of others, the following extracts and advance information in relation thereto are published:

General directions for vessels from northern ports.—Vessels bound for the Panama Canal from the north Pacific ports, will make Montuosa Island, from which they will lay a course to pass Jicarita Island, which is immediately to the southwest of and near Jicarón Island, and from thence pass not less than 5 miles to the southward of Mariato Point, which is the western cape of the large peninsula to the westward of the Gulf of Panama, of which Cape Mala is the eastern point.

The whole coast between Mariato Point and Cape Mala should be given a berth of at least 5 miles, as it is none too well surveyed, and the charts show indications of possible dangers inside of these limits, particularly between Mariato Point and Morro Puercos.

Currents.—Between Jicarón Island and Cape Mala, the currents are strong and variable, and not very well known, hence vessels should make due allowance for any apparent error in reckoning, and allow a wide safety margin in laying their courses. Along the shores, particularly in the vicinity of the capes and headlands, strong tide rips are frequently noticed.

Morro Puercos.—Morro Puercos is 27 miles east of Mariato Point; it is a lofty headland forming the termination of the range of high coast land.

Dangers.—About 4 miles westward of the point and one mile offshore, there is a reef above water, with a 3-fathom patch outside of it.

There is a 5-fathom spot $3\frac{1}{2}$ miles S. 75° E. from Morro Puercos, which should be given a good wide berth.

Between Morro Puercos and Cape Mala, a distance of 30 miles, the coast recedes to the northward and well outside of a line joining the two points lie the North and South Frailes.

In the vicinity of Bona Island soundings of 20 fathoms may be obtained, and from there to Taboguilla Island it shoals gradually to 15 fathoms, and from there to the Canal entrance to about 7 fathoms; and, if at night or during a heavy rain or thick weather, if there be any doubt about a vessel's position, she should anchor and wait for it to clear.

There is deep water close to Bona, Urava, and Taboguilla Islands, with no outlying dangers, and if they be given a berth of 2 miles, it insures safety. There is a submerged rock with about 3 feet of water over it at low water, just to seaward of a tangent joining the eastern sides of Taboguilla and Urava Islands, about half-way between them. With this exception there is no danger of any kind.

North and South Frailes.—There are two low, barren, flat-topped islets, of which the southern lies $11\frac{1}{2}$ miles S. 49° W. from Cape Mala, and the northern $2\frac{1}{2}$ miles inshore, N. 28° W., from the southern. A reef extends about 200 yards off the northwest point of the southern islet, but with this exception they are steep-to and clear of outlying dangers. Although a good mark for Cape Mala in clear weather, at night or in thick or cloudy weather, they are dangerous, so that after passing Morro Puercos, a course should be laid to pass at least 5 miles outside of South Fraile, and from thence to a point not less than 5 miles off Cape Mala.

Red sector.—The Frailes will be covered by the south-westerly red sector from Cape Mala Light, when it shall have been completed.

General direction for vessels from southern ports.—Vessels from South American ports should make Cape Mala after the light shall have been established.

Gulf of Panama.—The Gulf of Panama lies to the southward of and in the right formed by the curvature

of the Isthmus of the same name, between Piñas Point on the east and Cape Mala on the west, the distance between them being about 105 miles; from the entrance to the head of the bay, where the ports of Balboa and Panama are situated, it is about 90 miles.

Soundings—Soundings of 1,000 fathoms or more extend to within 5 miles of the entrance, and to the coasts outside, but immediately upon entering the gulf it shoals rapidly to less than 100 fathoms, and then more or less gradually until the head of the bay is reached.

Currents—There is a current of variable strength, but fairly constant in direction, setting to the westward across the head of Panama Bay, and thence to the southward between Taboga Island and the mainland. This current, when combined with the ebb tide, has a velocity of from 1 to 2 knots at the time of spring ebbs between and to the westward of Taboga and Otoque Islands. It reduces the velocity of the flood current and its strength is less over the same area. Between Taboga and Otoque Islands the tidal currents, both flood and ebb, vary greatly in direction at different stages of the tide, and cross currents, flowing east or west, are frequently encountered near the shores of the islands and in the vicinity of Valladolid Rock.

In the vicinity of Chame Point, tide rips have been observed. Between Cape Mala and Bona Island vessels are frequently set out of their course by the currents and in thick weather it would be better to lay a course to pass 5 miles east of the latter. With a steady south-east wind, the current is westerly, and vessels should be more particular to set a course to keep well clear of Bona Island.

General directions for all vessels—After passing Cape Mala, vessels should lay a course to pass 5 miles to the eastward of Bona Island, as this will ordinarily be sufficient to counteract any westerly set due to current in the Gulf of Panama, but even with this allowance, vessels will sometimes find themselves well to the westward of a line joining Cape Mala and Bona Island. But there is ample water to pass within ½ mile of Bona Island, if so desired. The distance between these points is 70 miles. From Bona Island to Taboguilla, a distance of 15 miles, the course should be laid to pass 2 miles to the eastward of the latter, then round it, keeping it about 2 miles in the port beam until its north end bears SW., from which point the entrance lighted buoys of the Canal will bear about NW. distant 4 miles.

Caution—Bona and Taboguilla Islands should invariably be left to the westward for vessels approaching or leaving the Canal, for while a channel exists inshore of Bona and Taboga Islands, it is more or less obstructed, and a vessel would have to change course repeatedly, and pass close to several dangers which are avoided by keeping in the open water to the eastward of the several groups of islands; besides which, there is no distance saved by going inside.

Lights discontinued—During the construction period small lantern lights were maintained on Chame Point, Melones Island, Commission Rock buoy, Tortolita Island, and Changarmi Island, to mark the inshore channel for the use of small Canal craft, but these have all been discontinued.

Lights established, west shore, Gulf of Panama—The Republic of Panama has recently established a number of small lights on the western shore of the Gulf of Panama, from Mensabé, which is about 25 miles to the northwestward of Cape Mala, to the city of Panama, for the use of small steamers and vessels engaged in the local coastwise trade, but they should not be depended upon by large seagoing vessels using the Panama Canal. But should a vessel be set inshore to the westward, out of her course, between Cape Mala and Bona Island, they might act as a warning, particularly when coupled with soundings under 20 fathoms, to immediately change course to the eastward.

Their situation and characteristics are as follows:

Mensabé Light, No. 10—About 25 miles to the northwestward of Cape Mala, about halfway between Iguana Island and Villa Island, on the north side of the entrance to Mensabé, on the edge of the reef; red, flashing; light 0.3 seconds, eclipsed 2.7 seconds, visible 9 miles.

Chitre Light, No. 9—Between Lisa and Estero Point, on the south bank of Rio la Villa; white, flashing; light 0.3 seconds, eclipsed 2.7 seconds, visible 10 miles.

Agua Dulce Dolphin Light, No. 7—On Banco Negro, about 2 miles off the mouth of Rio Dulce; pile structure, flashing, white; light 0.3 seconds, eclipsed 2.7 seconds, visible 10 miles.

Agua Dulce Light, No. 8—In the mouth of Rio Dulce, north bank; flashing, white, with green sectors; light 0.3 seconds, eclipsed 2.7 seconds, visible 5 miles.

Puerto Pasada Light, No. 6—In the mouth of Estero Viejo; white, flashing; light 0.3 seconds, eclipsed 2.7 seconds, visible 5 miles.

Anton Point Light, No. 5—On Anton (or Antoine) Point; flashing, white; light 0.3 seconds, eclipsed 0.7 seconds, visible 5 miles.

San Carlos Light, No. 4—Immediately to the northward of Calabaza Point, entrance Rio Mata Ahogada, north bank; flashing, white; light 0.3 seconds, eclipsed 0.7 seconds, visible 5 miles.

Taboga Island Light, No. 3—At the northern point of the western side of Taboga Island, visible from Naos Island (N. 20° E. approximately) through west to cover Valladolid Rock (S. 10° W. approximately), obscured through remainder of arc to the eastward; flashing, green; light 0.3 seconds, eclipsed 2.7 seconds, visible 9 miles.

Gas Buoy, No. 1—Painted black, replaces the red nun buoy which marked Knocker Rock, west side of Panama Harbor, with S. E. bastion, Panama City, bearing 280° (W. by N.) distant about ¼ mile; flashing, white; light 0.3 seconds, eclipsed 2.7 seconds.

Lights to be established—In addition to the lights already in operation above mentioned, and those that mark the dredged channel on the Pacific side of the Canal, it is proposed to establish additional ones at Cape Mala, Bona Island, and Taboguilla island at the eastern entrance to and in the Gulf and Bay of Panama; it is hoped that they will be completed by July, 1915. The following characteristics are proposed for these lights; all bearings are true:

Cape Mala Light (recommended)—First order, flashing, white, with two red sectors; light 5 seconds, eclipsed 15 seconds, at an elevation of 140 feet, visible 18 miles, through the following arcs and with the following colors:

Visible from 340° (N. 20° W.) to 245° (S. 65° W.) through East.

Red sector from 340° (N. 20° W.) to 20° (N. 20° E.).

White sector from 20° (N. 20° E.) to 215° (S. 35° W.).

Red sector from 215° (S. 35° W.) to 245° (S. 65° W.).

Obscured from 245° (S. 65° W.) to 340° (N. 20° W.) through West.

The structure will be a skeleton steel tower, with battens on two sides, all painted white, so that it may be used as a daymark.

Caution—The red sector to the northward covers Iguana Island and reef, and vessels standing to the southward leaving the Canal, which find themselves in it should immediately change course to the eastward until the light shows white.

The red sector to southwestward covers North and South Fraile Rocks which are distant about 12 miles from Cape Mala, and vessels bound for the Canal which find themselves in this red sector should immediately change course to southeast until the light shows white. This light will be the principal fix for vessels entering or leaving the Gulf of Panama.

The approximate position of the light will be Latitude 7° 27' 30" N.; Longitude 79° 59' 30" W.

Cape Mala—Cape Mala is the southeast point of Los Santos Province, Republic of Panama, at the western entrance to the Gulf of Panama, about 90 miles from the entrance to the Canal; the land in its immediate vicinity is low, sloping up very gradually toward the higher land in the interior, but has no distinctive marks or features that would assist in recognizing it. There are low cliffs along the water front, with outlying ledges, over which the sea breaks at times; there is deep water close inshore, but it is recommended that vessels approach the coast in this vicinity not closer than 5 miles.

Bona Island Light (recommended)—Third order, flashing, white; light 3 seconds, eclipsed 10 seconds, at an elevation of 700 feet, visible 15 miles through the following arc:

Visible from 350° (N. 10° W.) to 250° (S. 60° W.) through East.

Obscured from 250° (S. 60° W.) to 350° (N. 10° W.) through West.

The structure will be a low white skeleton steel tower, about 15 feet high, inconspicuous as a daymark, on the highest point of Bona Island.

The principal object of the light will be to enable a vessel to fix her position after passing Cape Mala, when bound for the Canal.

The course from Cape Mala leads to the eastward of and past Bona Island, and around Taboguilla, but vessels are sometimes set inshore to the westward between Cape Mala and Bona Island, hence the necessity

for the light to have a full arc to the southward and westward.

It will also be of use to vessels bound to the southward, after having left the Canal and rounded Taboguilla, when it should be plainly visible.

The approximate position of the light will be Latitude 8° 34' 30" N.; Longitude 79° 35' 30" W.

Caution—On account of the great height of this light, it may sometimes be invisible on account of the mist or haze.

Bona Island—Bona Island is on the western side of Panama Bay, about 20 miles from the entrance of the Canal, and 70 miles from Cape Mala; it is the most southern of the Otoque group. It is a small round island, about ½ mile in diameter, with a single peak 685 feet high; it is wooded, and both the island itself and the shore line are very steep and precipitous. There are two conspicuous islands immediately to the southward of Bona Island, and connected with it at low water, 145 and 175 feet high, respectively. The most southern one of the two is the highest, and its top is covered with green brush and vegetation, but its sides are white, while the northernmost is white all over.

Bona and Otoque Islands are blended and appear as one when approaching from the southward or northward.

Taboguilla Island light (recommended)—Fourth order, flashing, white, with red sector; light 2 seconds, eclipsed 5 seconds, at an elevation of about 200 feet, visible 12 miles through the following arcs, and with the following colors:

Visible from 0° (N) to 220° (S. 40° W.) through East.

White sector from 0° (N) to 180° (S) through East.

Red sector from 180° (S.) to 220° (S. 40° W.).

Obscured from 220° (S. 40° W.) to 360° (N.) through West.

The structure will be a low white skeleton steel tower, about 15 feet high, inconspicuous as a daymark, on the top of the small haystack-shaped island on the central eastern side of Taboguilla Island, and which apparently joins it when viewed from a distance, but is really separated from it by a smaller rock, between the two. The principal use of the light will be to note the turning point around Taboguilla Island when leaving or approaching the Canal.

The red sector will cover Farallon Rock, and the submerged rock that lies about halfway between Taboguilla and Urava Islands, on a tangent joining their eastern sides.

Caution—Vessels approaching from the southward, after passing Bona Island, should they find themselves in the red sector, should immediately change course to the eastward until the light shows white.

The approximate position of the light will be Latitude 8° 48' 30" N.; Longitude 79° 30' 30" W.

Taboguilla Island—Taboguilla Island is 5 miles to the southward of the entrance to the Canal, and is a very important landmark; it is about one mile long and ½ mile wide, narrowing to a point at its northeastern end. It rises to a peak at a height of 610 feet; it is more or less precipitous around its shore line, and is generally wooded. Its northwestern side is fringed with a reef, which extends about ¼ mile offshore at its widest point.

Approaching from the southward, the rock on which the light is situated appears as a low rounded haystack-shaped island, touching its eastern side. From this point the island rises to its highest point towards its eastern end, then slopes irregularly to its southwest point, off which there are three small islands, connected to the main island by a ledge.

The two most western of these islands are about the same size and are haystack shaped, covered with brush.

Directions, anchorage—After rounding Taboguilla Island at a distance of about two miles, when it bears 220° (S.W. ½ S.), the group of islands, including Flamen-co, Naos, and others, will be roughly in range with Ancon Hill bearing 330° (NW. by N.), and if this latter course be followed until San José Rock bears north, distant about ½ mile, a good convenient anchorage will be found in 8 fathoms, soft bottom, off the entrance to the Canal.

Deceased Employees.

Name.	Check No.	Native of	Isthmian Residence	Employed by	Date of death
Gibbs, Francis	32012	Jamaica	Panama	Municipal Eng.	April 9, 1915.

The estate of the abovenamed deceased employe of The Panama Canal or the Panama Railroad Company is now in process of settlement, and any claims against the estate or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. This name will be published
JOHN K. BAXTER, Administrator of Estates.

HEALTH CONDITIONS IN 1914

Figures Show Improvements.—Summary for Canal Zone, Panama, and Colon.

Copies of the report of the Department of Health of The Panama Canal for the calendar year of 1914, published by the Government Printing Office in Washington, were received on the Isthmus last week and a partial distribution has been made to various departments of the organization. Outside parties desiring copies may make application to the Chief Health Officer, Balboa Heights, Canal Zone, setting forth the interest which prompts them to make the request.

A section on the vital statistics of employes of the Government, more than half of whom are living in Panama City, is of general interest. Stating that the health of employes during 1914 was better than in any previous year, the report sets forth that the total admission rate to hospitals for 1914 was 244.49, compared with 351.10 for 1913, and for disease alone 182.57, as compared with 246.91 for 1913.

The total death rate for 1914 was 7.04, as against 8.35 for 1913; and the death rate for disease 4.40, as compared with 5.24 for 1913. The noneffective rate for 1914 was 12.22, compared with 15.97 for 1913.

The changes in the regulations governing sick leave and admission to hospitals, which became effective soon after the reorganization, no doubt had some influence in reducing the admission and noneffective rates, but the fact that the death rate has also fallen decidedly shows that other factors are more important.

With regard to malaria, the death rate has been reduced more than 50 per cent since 1913 (0.16 in 1914, 0.37 in 1913), and the admission rate to hospitals more than 15 per cent (65 in 1914, 76 in 1913). The constantly noneffective rate, hospitals and quarters, which was computed only in the last five months of 1914, was 1.51. This good showing in malaria is attributed in part to the measure requiring patients discharged from the hospital to continue the use of quinine for at least a month and to report to district physicians.

The death rate from pneumonia had increased from 0.83 in 1913 to 0.95 in 1914; all the deaths but one were among the black employes. The increase in the disease is probably due to unusual prevalence of measles and the overcrowded conditions in which the people live in Panama.

The five diseases causing the highest number of hospital admissions, with their rates, were as follows:

Disease.	Admissions.	Rate.
Malaria	2,884	65.06
Veneral diseases	1,001	22.58
Acute bronchitis	197	4.44
Mumps	122	2.75
Pneumonia	120	2.71

The five diseases causing the highest number of deaths and their rates were as follows:

Disease.	Deaths.	Rate.
Pneumonia	42	.95
Tuberculosis	40	.90
Nephritis	22	.50
Heart, organic disease of	16	.36
Malaria	7	.16

There were no deaths among Americans from malaria, dysentery, or typhoid fever during the year.

In the latter half of the year a periodic physical examination, including urine and

feces, has been made of all food handlers in the kitchens, mess rooms, and commissaries of The Panama Canal, with the result that one typhoid carrier and a number of cases of contagious diseases were detected and eliminated.

With respect to the conditions in the Canal Zone and the cities of Panama and Colon, the report states that with an average population of 46,379 in the Canal Zone there was a total of 710 deaths during the year; of these, 614 deaths were from disease, giving a rate of 13.24 per thousand, as compared with 14.43 for the year 1913. The death rate from tuberculosis was 1.5; the percentage of all deaths was 10. The death rate is augmented by the enormous infantile death rate among the negroes, due to ignorance and indifference on the part of mothers.

The birth rate, based on the last five months of the year, was 19. The infant mortality, based on the same period, was for white children under one year of age 29 per 1,000, and for colored children 347, with a general average of 252. Of the total deaths from disease, based on the last eight months of the year, the percentage under five years of age was 42.

In New York City during the year 1914 the number of deaths under one year per 1,000 births has been reported as 94. It is said that seven years ago the number of such deaths was 144 to the 1,000; and that 20 years ago the rate was 208 per 1,000.

COLON.

The average number of inhabitants for the year was 23,265, among whom there were 590 deaths; of these, 563 were from disease, giving a rate of 24.20 per 1,000 as compared with 22.74 for the year 1913. The death rates for malaria and dysentery were 0.86 and 0.17, respectively. The death rate for tuberculosis was 3.69, 14 per cent of the entire deaths from all causes.

The birth rate, based on the last five months of the year, was 48.60. The infant mortality for the same period was 194.

Of the total deaths from disease, based on the last eight months of the year, the percentage under five years of age was 43.

PANAMA CITY.

The average population of the city for the year was 53,948, among whom there was a total of 1,863 deaths; of these, 1,772 deaths were from disease, giving a rate of 32.85 per 1,000, as compared with 30.21 for the preceding year. The death rates for malaria and dysentery were 1.91 and 0.69, respectively.

The birth rate, based on the last five months of the year, was 54.52. The infant mortality for the same period was 272.

Of the total deaths from disease, based on the last eight months of the year, the percentage under five years of age was 50.

The high death rate in Panama is due to several causes. It will be noted that 50 per cent of the deaths occurred in children under five years of age; they were due principally to gastrointestinal diseases, the result of ignorance and indifference on the part of mothers. Another factor of importance is the serious overcrowding in the tenement districts, the result of the rapid increase in the population of the city without a corresponding growth in housing facilities. In taking the sanitary census, it was a frequent occurrence to find six or more persons sleeping in one unventilated room, 10 by 10 feet. Tuberculosis gave a death rate of 4.26 and 12 per cent of the total deaths.

There was a small outbreak of beriberi beginning on July 21, with one case; two more cases were reported in August, and 16 in September; in October there were two; November, four; and December, two; about half of the cases were from Chiriqui prison, the remainder were scattered, and a number were brought in from outside localities.

Out of 27 cases of typhoid fever which occurred in Panama, 20 were in the months of February to August, inclusive; nearly three-fourths of all the cases in the Zone and Colon occurred in these same months, and were traceable to sewage-polluted oysters obtained in Panama.

Low Record for Malaria.

The malarial incidence among employes living in the Canal Zone, outside of Cristobal and Toro Point, was lower for the week ending April 17, than for any other week in the history of the Canal, being but six-hundredths of one per cent (.0006).

Renumbering Houses in Ancon-Balboa District.

The houses in the Ancon-Balboa quartermaster's district are being renumbered for the purpose of obtaining greater simplicity in the handling of business, principally by having the number indicate the subdistrict in which the house is located. The various areas are being numbered according to the following scheme:

- 1 to 100—Balboa shops reservation.
- 101 to 200—Balboa Heights (upper). (170 to 200—Army reservation.)
- 201 to 300—Hospital reservation.
- 301 to 400—Upper Ancon, in vicinity of old Administration Building and post-office.
- 401 to 500—Lower Ancon, in vicinity of Hotel Tivoli and Ancon hotel.
- 501 to 600—Bishop's Hollow to Big Tree (lower road.)
- 601 to 700—Balboa Heights (lower).
- 701 to 800—Balboa flats.
- 801 to 900—East Balboa.
- 901 to 1100—La Boca.

Rates of Passenger Transportation for Army.

The Panama Railroad Company has authorized the following rates for passenger transportation for the Army forces stationed on the Canal Zone: Individuals and small parties, 2½ cents per mile per person; train consisting of locomotive, baggage car, and one coach, for a day of eight hours or fraction thereof, \$42; each additional car, \$10; each additional hour, not exceeding four, \$5. On Sundays and holidays, the charge for ordinary train will be increased to \$60, and \$7.50 for each additional hour, with \$10 for each additional car. The various commanding officers will issue regular transportation requests for this service, including that of the half-rate for individuals.

Family Quarters.

Applications for married quarters on file on March 31, 1915, were as follows:

DISTRICT.	List No. 1.	List No. 2.
Ancon	26 (12)	360 (92)
Ancon Hospital	1 (1)	7
Corozal		110 (23)
Paraiso		180 (9)
Gatun		38 (8)
Cristobal		119 (17)
Total	27 (13)	814 (149)

NOTE—The figures in parentheses show the number of applicants already occupying regular or nonhouse-keeping family quarters at stations other than those at which applications are filed.

OFFICIAL CIRCULARS.

Use of Official Business Penalty Envelopes.

THE PANAMA CANAL,
EXECUTIVE OFFICE.

BALBOA HEIGHTS, C. Z., April 8, 1915.

CIRCULAR No. 697:

1. The use of official business envelopes for the transmittal of mail free of postage, under the provisions of Section 496 of the United States Postal Laws and Regulations, is restricted to matters relating exclusively to the official business of the Government, and the covers of all such matter must bear both the official business and penalty stamp. The following paragraphs of Section 496 of the Regulations are quoted herewith:

Paragraph No. 5—* * * Any Department or officer authorized to use the penalty envelopes may inclose them with return address to any person or persons from or through whom official information is desired, the same to be used only to cover such official information, and indorsements relating thereto: * * *

Paragraph No. 7—Whoever shall make use of any official envelope, label, or indorsement authorized by law, to avoid the payment of postage or registry fee on his private letter, packet, package, or other matter in the mail, shall be fined not more than three hundred dollars.

2. Persons writing to officials and departments concerning their private business with the Government, even though they are themselves Government officials or employes, may not use the penalty envelope to transmit their correspondence. Officers desiring official information from or through persons not officers may furnish penalty envelopes or labels to cover the same only with return address printed or written thereon.

3. This information is given on account of the frequent misuse of official business envelopes by employes of The Panama Canal.

GEO. W. GOETHALS,
Governor.

All Accommodations Reserved on "Panama" Sailing May 8.

THE PANAMA CANAL,
OFFICE OF EXECUTIVE SECRETARY,
BALBOA HEIGHTS, C. Z., April 14, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

All accommodations having been reserved on the steamship *Panama*, scheduled to sail from Cristobal on May 8, 1915, no further requests for this sailing should be submitted.

C. A. McILVAINE,
Executive Secretary.

Shipments to Balboa District.

PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,
BALBOA HEIGHTS, C. Z., April 13, 1915.

CIRCULAR No. 48:

To all concerned—Since the opening of the new passenger station at Balboa Heights, a great many shipments intended for Balboa Docks, Balboa Shops, and Balboa Terminal are being simply marked "Balboa," and unloaded at Balboa Heights station. This necessitates a reloading and reshipment to destination. All way bills covering such shipments should read "Balboa Heights," "Balboa Docks," or "Balboa Terminal," and all articles tagged accordingly.

Will you please instruct your forces accordingly?

C. H. MOTSETT,
Superintendent.

Nonexpendable Property.

THE PANAMA CANAL,
OFFICE OF THE AUDITOR,
BALBOA HEIGHTS, C. Z., April 10, 1915.

[Supplement No. 4 to list published with Circular No. 656-1.]

HEADS OF DEPARTMENTS AND DIVISIONS AND ACCOUNTABLE OFFICIALS:

The following changes and additions to the list of nonexpendable property, and instructions are published for guidance of all concerned:

Changes—

- Page 5. Brushes, counter duster; eliminate.
- Page 6. Buttons, brass, fire department; eliminate.
- Page 6. Buttons, brass, Zone police; eliminate.
- Page 6. Caps, uniforms; eliminate.
- Page 8. Chevrons, police insignia; eliminate.
- Page 9. Coolers, water; "26th century" carry as "Stands" or "Bodies."
- Page 17. Helmets, police; eliminate.
- Page 36. Urns, coffee; add E.

Additions—

- Balls, signal
- Bodies, fibre, for "20th Century" cooler
- E Boxes, coupon
- Cans, milk
- Clamps, lifting

Items to be considered expendable—

- Bandsaws
- Bowling alleys
- Brushes, floor sweeping
- Lamps, station
- Lamps, street
- Oilers, typewriter
- Plates, colony counting
- Polishers, bowling alley

Instructions for accountable officials—

Form A-278 has been printed and, effective at once, this form only shall be used for the record of distribution of division property, with the understanding that records now kept on form PC 726-Rev. need not be rewritten. The new form should be substituted in such files as additional sheets are required.

Form PC-401, field property record, has been revised and printed in quadruplicate, being now carried in stock under form A-300. This revised form will be used instead of form PC-401, as required in circular No. 656-2.

When an accountable official's record is cleared by invoice to other officials and audited, the file of cards and vouchers will be transferred to the Auditor's office. Property transferred from one division to another, for which the same official is accountable, should be covered by regular transfer vouchers.

H. A. A. SMITH,
Auditor, The Panama Canal.
Approved: GEO. W. GOETHALS,
Governor.

Charges for Electric Current.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 5, 1915.

CIRCULAR No. 676-4 (Superseding circular No. 676-3):
For the information of all concerned the following schedule of charges for electric current supplied by The Panama Canal is published:

FOR METERED SERVICE.

1. To departments and divisions of The Panama Canal and to the Panama railroad the charge shall be the actual cost to the Electrical Division for the district concerned as determined from month to month by the Cost Accountant.

2. To other departments and bureaus of the United States Government the charge shall be the actual average cost to The Panama Canal for all districts, as determined from month to month by the Cost Accountant.

3. To employes of The Panama Canal and the Panama railroad, religious institutions, and to social and fraternal organizations of employes in the Canal Zone, the charge shall be an arbitrary rate that shall be adjusted from time to time to approximate as closely as practicable to the actual cost to The Panama Canal as determined by the Cost Accountant. For the present this rate shall be two cents per kilowatt-hour.

4. To individuals (nonemployes) and companies in the Canal Zone and to employes of The Panama Canal and Panama railroad for commercial use, the charge shall be eight cents per kilowatt-hour, except when a different rate is established by special authority of the Governor.

FLAT RATES.

5. To departments and divisions of The Panama Canal and the Panama railroad, other departments and bureaus of the United States Government, employes of The Panama Canal and the Panama railroad for their personal use, religious and charitable institutions, and to social and fraternal organizations of employes in the Canal Zone, the charge for unmetered lighting service shall be \$1 plus 6 times the number of 16-candlepower equivalents, in cents per month, for five or more equivalents. For less than five equivalents the charge shall 25 cents per month per equivalent, with a minimum charge of 50 cents per month. Employes who occupy bachelor apartments shall pay the minimum charge; for electrical appliances other than lights, such as stoves, irons, toasters, water heaters, etc., charges shall be fixed from time to time by the Electrical Engineer with the approval of the Governor, dependent upon

the cost of production of power, and the current consumption and probable number of hours of use of the appliance.

6. To individuals (nonemployes) and companies in the Canal Zone, and to employes of The Panama Canal and the Panama railroad for commercial use, the charge for unmetered lighting service shall be 75 cents per month per 16-candlepower equivalent, and for electrical appliances other than lights, rates to be fixed from time to time by the Electrical Engineer with the approval of the Governor, dependent upon the cost of production of power and the current consumption and probable number of hours of use of the appliance.

BILLS AND PENALTIES.

7. Charges for flat rate electric service are payable on or before the 15th of the month in which the current is supplied. The charges for metered service are payable on or before the 15th of the month following rendition of the service. A penalty of 25 per cent will be added if bills are not paid when due. No deposit to secure the payment of electric current bills will hereafter be required of employes of The Panama Canal or the Panama railroad. Deposits to secure the payment of bills will be required in sums to be fixed by the Auditor from religious institutions, social and fraternal organizations of employes, and from individuals and companies.

8. Circular 676-3 is hereby revoked.

GEO. W. GOETHALS,
Governor.

Approved Projects Uncompleted on March 31, 1915.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 16, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

1. Please forward to this office, in triplicate, on or before April 24, 1915, a list of approved projects uncompleted on March 31, 1915, giving in parallel columns the following information in regard thereto:

1. Project number.
2. Nature of project.
3. Original estimated cost.
4. Cost to March 31, 1915.
5. Cost to complete work after March 31, 1915.
 - (a) Labor.
 - (b) Material, supplies, and equipment.
 - (c) Other charges.

2. In addition, you are requested to furnish each project a statement classifying the cost of the work to be completed after March 31, in accordance with the following classification:

1. Labor directly employed.
2. Local contract work.
3. Miscellaneous material and supplies.
4. Material and equipment to be ordered on special division requisitions, itemized.
5. Structural steel.
6. Lumber.
7. Cement.
8. Building materials and supplies.
9. Explosives.
10. Coal.
11. Ice.
12. Fuel oil.
13. Subsistence supplies.
14. Incidental expenses, classified by main items.
15. Charges from other divisions:
 - (a) Shop charges.
 - (b) Power.
 - (c) Water.
 - (d) Dredging.
 - (e) Tug service.
 - (f) Utility service, Supply Department.
 - (g) Railroad transportation, other than P. R. R. freight.
 - (h) Rock.
 - (i) Sand and gravel.

3. The appropriations for the completion of the Panama Canal have been made so that they are immediately available. Allotments for the work will be based upon information given in the statements called for above, and will be made from the present appropriations for the construction of the Panama Canal and Panama Canal fortifications, as well as from appropriations for these purposes made for the next fiscal year.

4. Construction divisions should make complete estimates of the cost of work that remains. The operating and maintaining divisions will submit estimates of the expenses to be incurred by them for each project, dividing same between the items listed in paragraph 2 as far as may be practicable.

GEO. W. GOETHALS,
Governor.

Legal Notice.

United States of America } In the District Court
Canal Zone. } Division of Balboa.
Estate of José Alvarez, deceased; Petition for Escheat.
Notice is hereby given that at 9 o'clock a. m., of the 15th day of May, 1915, in the court house at Ancon,

there will be an inquisition into the estate of José Alvarez, who died intestate about the 24th day of October, 1910, possessed of improvements on lands located near Tabernilla, C. Z., for which improvements the Joint Land Commission, in 1913, made an award of \$175 and ordered that the same be paid in the Court of the Canal Zone, pursuant to a petition filed by John K. Baxter, Administrator of Estates, praying that the said sum be escheated in accordance with Sections 779, 780, and 781 of the Code of Civil Procedure of the Canal Zone, at which time and place all persons claiming the said estate, or any interest therein, may appear and be heard before the Court.

E. M. GOOLSBY,
Clerk.

Customs Sale.

Sealed bids will be received at the office of the Chief of the Division of Civil Affairs, Balboa Heights, until 5 p. m., April 30, 1915, and then opened, for the purchase of the following merchandise:

Four Panama hats *ex* steamship *Huasco*, seized at Cristobal, December 19, 1914; eight quart bottles of Slater's V. O. blended Scotch whiskey *ex* steamship *San Juan*, remaining unclaimed at Balboa since October 1, 1913.

Merchandise may be inspected upon application at Room 320, Administration Building, Balboa Heights. Bids should be marked "Bid for the purchase of sized or unclaimed merchandise," and addressed to the Chief of the Division of Civil Affairs, Balboa Heights. Purchasers will be required to pay the import duties to the Republic of Panama. The right to reject any and all bids is reserved.

JOINT LAND COMMISSION.

Notice of Awards.

In the matter of *sundry claims*, award No. 77, docket numbers as noted, April 12, 1905—An award is hereby made against the United States, in favor of the persons hereinafter named, in the sum of \$978, United States currency.

This award shall be paid to the claimants hereinafter named, in the amounts specified hereinafter, on or before the 12th day of May, 1915, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum until paid:

Manuel Jacome, docket No. 404—For all rights, claims, and other interests in growing crops, fruit trees, and other improvements which the said Jacome may possess or may have possessed on the lands of Peñas Blancas and Vamos Vamos, the sum of \$843.

Antonio Rodriguez, docket No. 429—For all rights, claims, and other interests in growing crops, fruit trees, and other improvements which the said Rodriguez may possess or may have possessed on the lands of Buena Vista or near the town of Frijoles, not covered by payment in 1911 of \$86 to one Antonio Rodriguez for property in the Trinidad valley, the sum of \$75.

Petra Padilla, docket No. 446—For all rights, claims, and other interests in growing crops, fruit trees, and other improvements which the said Padilla may possess or may have possessed near Bohio, the sum of \$60.

Total, \$978, United States currency.

JORGE BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, *Commissioners.*

Rule of Dismissal.

In the matter of *sundry claims*, rule of dismissal No. 177, docket numbers as shown, April 12, 1915—With reference to the following claims, the evidence before the Commission is that settlement therefor has been made by the United States:

Claimant.	Docket No.	Tax No.	Date of Payment.
Barela, Daniel	437	796 & 814	7-13-14
Gutiérrez, Sabina	1880, 2554	1775	3-22-15
Leon, Antonio de	452	C-33	10-27-14
Leon, Juan José de	457		5-19-11
Leonard, John	1453		12-19-14
Monte, José	438	3, 5 & 7	1-22-12
Valle, Doroteo	453		4-17-11

In view of the above settlements, no further action is necessary by the Commission, and the foregoing claims are therefore dismissed.

JORGE BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, *Commissioners.*

Launch Service to Taboga.

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign before the height, in which case subtract it.

The time used in Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.). All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47 p. m.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans for all States. Due at New Orleans on the following Tuesday,

Every Saturday to New York for all States. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday*.

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*NOTE.—The sailings on Monday, May 3, will not land mail in New York until Tuesday of the following week; hence, despatches on that date will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4 leaving Panama at 7.10 a. m., connects with the despatch for the sailing on May 3.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., April 19, 1915.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts and may be procured upon request of the addressees: Calvit, Mr. and Mrs. S. E. Miller, Capt. Wm. H. Campbell, John A. Corbin, Fitz Cutler, Harry Ensminger, Mrs. Lucia Flynn, Frank D. Hermeeter, William Hess, Mrs. J. A. Hines, John A. Holder, T. J. B. Junger, William Malatesta, Frank *Melborune, Victor *Papers.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their

interests in regard to the payment of tolls and minor charges.

Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 450 and 550 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Cristobal or Balboa from the tanks of The Panama Canal or from the private corporations which have tanks at the terminals at the rate of from 1,500 to 2,000 barrels per hour. The present price from The Panama Canal is \$1.25 per barrel; prices made by the corporations may be obtained from them.

Diesel engine oil is for sale by several companies, at approximately 45 shillings per ton of seven barrels.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light, and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly, and no advance notice is required. The following are representative charges for ship's laundry: Trousers and jackets, five cents each; aprons, caps, sheets, tablecloths, napkins, towels, one cent each.

Repairs to vessels may be made to any extent, except turning of the largest crank shafts or longest line shafts, or work requiring dry docking of large vessels.

The Government hospital service is fully equipped for the treatment of medical and surgical cases. The charge for consultation at the dispensaries is \$3; for hospital treatment, in ward, \$3 per day; in private room, \$6 per day. For American seamen, the charge for treatment in ward is \$1 per day; for foreign seamen, \$1.50 per day.

Application for supplies, or for services, should be made to the captain of the port, Cristobal or Balboa.

Mail, other than registered, and cablegrams for men on ships which will call at the terminal ports, or pass through the Canal, may be addressed in care of the captains of the ports, if desired; or may be addressed to Cristobal or Balboa, general delivery, with the name of the vessel written plainly; or, in case the vessel has a known representative on the Isthmus, in care of such representative.

The cable address of The Panama Canal, on the Isthmus, is "Pan canal, Balboa Heights;" in the United States, "Pan canal, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C.," for delivery in the United States.

Sailings of Vessels in Regular Service with the Isthmus.

REGULAR CONNECTIONS WITH CARIBBEAN AND EUROPEAN PORTS.

The United Fruit Company's lines maintain weekly connections, both ways between Cristobal and the following ports: Kingston, Havana, Cartagena, Puerto Colombia, Santa Marta, Port Limon, and Bocas del Toro, and an additional weekly sailing to Bocas del Toro.

The Royal Mail maintains fortnightly service between Colon and Southampton, making the following way ports: Antilla, Jamaica, Cartagena, Puerto Colombia, Puerto Cabello, Trinidad, Barbados, the Azores, and Cherbourg. Its vessels all arrive at Colon on Sunday and sail on Tuesdays.

The Compagnie Generale Transatlantique operates a line, with 28-day sailings, between Colon and Bordeaux, calling at Puerto Colombia, Puerto Cabello, La Guayra, Carupano, Trinidad, Martinique, Guadeoupe, and Santander; and another line, with sailings every 28 days, between Colon and Saint Nazaire, with calls at all the above ports, except Carupano, Trinidad, and Martinique.

The Italian Steam Navigation Company, "La Veloce," maintains a line, with sailings every 28 days, between Colon and Genoa, calling at Puerto Colombia, Curacao, Puerto Cabello, and Barcelona.

The Compania Transatlantica de Barcelona sends a vessels from Colon to Genoa on the 12th day of each

CANAL

RECORD

Volume VIII.

BALBOA, CANAL ZONE, WEDNESDAY, APRIL 28, 1915.

No. 36.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. To others, the subscription rate will be \$1, United States currency, per annum, in the United States and its possessions; Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address all Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Arrival of Canal Collier "Ulysses".

The Panama Canal collier *Ulysses* arrived at Cristobal on Tuesday, April 27, with 12,100 tons of coal for the Canal plants, having sailed from Norfolk for Cristobal on Wednesday, April 21.

Pipeline suction dredge *No. 4* has been engaged in the entrance to the dry dock slip, excavating to greater depth alongside the coaling wharf beneath the Brown steam hoist, and making the berth ready for the *Ulysses*. Further excavation is to be done later in the French Canal, widening the channel and providing a turning basin. The spoil from the excavation is being utilized in making a fill in swamp land at Mount Hope, opposite the printing plant. The floating crane *Hercules* is to be used on April 29 for removing from the coal berth the wreck of an old "hand clapet" sunk about five years ago, which had not interfered with the navigation of vessels prior to the coming of the *Ulysses*.

Second New Canal Tug Arrives.

The new Canal tug *Gorgona* arrived at Cristobal on Tuesday, April 27, from Port Richmond, N. Y. The *Gorgona* is a sister ship of the *Tavernilla*, which arrived on March 23. Both were built for the Canal service by the Staten Island Shipbuilding Company, under a contract let in June, 1914.

Sailing Vessel from Portland for Great Britain.

The sailing vessel *Birtha* arrived at Balboa in the forenoon of Sunday, April 25, from Portland, Oreg., for transit of the Canal on the way to Falmouth. She is carrying a cargo of 2,246 tons of wheat. The *Birtha* was met about 12 miles down the bay by a tug and taken in tow for passage through the Canal, which was completed on Tuesday, April 27.

Direct Forwarding of Parcels Post Packages.

The Division of Posts has arranged to forward direct from Balboa, through Ancon exchange post-office, ordinary and registered parcels post packages to the countries of Bolivia, Chile, Colombia, Ecuador, and Peru. Parcels for the Atlantic coast of Colombia

will be despatched by way of the Cristobal exchange office.

Before this arrangement was made, parcels post packages for the west coast of South America were despatched by way of the New York exchange office, which resulted in considerable delay and increased cost of transportation.

Heavy Traffic by American-Hawaiian Vessels.

The steamship *Isthmian* of the American-Hawaiian Steamship Line passed through the Canal in ballast on April 17, bound from Charleston to Tocopilla for a cargo of nitrates, with which she will return to the United States. This is the first time that a vessel of the American-Hawaiian Line has gone through the Canal without cargo.

From the opening of the Canal, on August 15, to April 1, vessels of the American-Hawaiian Line had made 94 transits of the Canal, carrying an aggregate of 699,342 tons of cargo. This was an average of 7,440 tons of cargo per vessel. In this trade, 45 vessels passed from the Atlantic to the Pacific with 325,530 tons, and 49 from the Pacific to the Atlantic, with 373,812 tons. All of the westbound vessels were engaged in United States coastwise trade, and all but three of the eastbound were in the coastwise trade; these three were carrying Chilean nitrates to the United States, and their total cargo amounted to 23,599 tons.

The line is the largest single user of the Canal. Its vessels carried over one-fifth of the 3,246,019 tons of cargo which had passed through the Canal to April 1.

The first vessel of the line to enter the Canal was the *Pennsylvanian*, on August 16. The *Pennsylvanian* has passed through the Canal six times. The other vessels of the line which have been through the Canal are, in order of their coming, the *Missourian*, *Arizona*, *Kentuckian*, *Mexican*, *Montanan*, *Nebraskan*, *Virginian*, *Texan*, *Honolulan*, *Columbian*, *Iowan*, *Georgian*, *Dakotan*, *Nevadan*, *Isthmian*, *Alaskan*, *Washingtonian*, *Ohioan*, *Oregonian*, *Panaman*, all of which arrived for the first time before November 1; the *Hawaiian*, arriving on December 3, the *Minnesotan* on March 20, and the *American* on April 17.

Vessels of the line which had been through the Canal six times up to April 1 are the *Pennsylvanian* and the *Montanan*; five times, *Kentuckian*, *Arizona*, *Honolulan*, *Mexican*, *Columbian*, *Iowan*, *Georgian*, *Panaman*; four times, *Texan*, *Virginian*, *Alaskan*, *Dakotan*, *Ohioan*, *Oregonian*; three times, *Nebraskan*, *Nevadan*, *Isthmian*, *Washingtonian*, *Hawaiian*; twice, *Missourian*; once, *Minnesotan*.

Sixty-eight Degree Gasoline.

The Supply Department storekeepers at Balboa, Paraiso, and the dry dock at Cristobal have been authorized to issue 68° gasoline for use with all high-speed gasoline engines without requiring special authorization in each case.

CANAL TRAFFIC IN MARCH.

Exceeds Previous Months in Number of Vessels, Amount of Cargo, and Tolls.

The traffic through the Canal during the month of March was considerably greater than for any preceding month. A total of 136 seagoing vessels passed through the Canal, carrying an aggregate of approximately 635,057 tons of cargo. This is between one-third and two-fifths more vessels than had used the Canal in any preceding month, and 186,100 more tons of cargo than had passed through in a previous month, exceeding previous records by over 40 per cent.

The tolls levied during the month of March amounted to \$606,316.56, bringing the total amount of tolls levied on barges and vessels passing through the Canal to \$2,971,675.29. This has been distributed as follows:

Period.	Amount.
Prior to August 15, 1914	\$ 11,610.69
August 15 to August 31	84,401.80
September 1 to September 30	269,863.00
October 1 to October 31	378,089.12
November 1 to November 30	387,242.40
December 1 to December 31	411,895.44
January 1 to January 31, 1915	419,037.12
February 1 to February 28	403,219.16
March 1 to March 31	606,316.56
Total	2,971,675.29

The total traffic eastbound, or from Pacific to Atlantic, and westbound, from Atlantic to Pacific, are given herewith, in comparison with the movements during previous months:

M'th.	Eastbound.		Westbound.		Total.	
	Ves-sels.	Cargo.	Ves-sels.	Cargo.	Ves-sels.	Cargo.
Aug.	12	57,182	12	49,106	24	106,288
Sept.	30	186,776	27	135,262	57	322,038
Oct.	40	252,288	44	168,069	84	420,357
Nov.	38	242,291	54	206,510	92	448,801
Dec.	57	261,680	42	178,235	99	349,915
Jan.	54	240,875	44	208,082	98	448,957
Feb.	53	274,619	39	149,987	92	424,606
Mar.	80	417,610	56	217,447	136	635,057
T'tl.	364	1,933,321	318	1,312,698	682	3,246,019

Of the 80 eastbound vessels in March, four passed through in ballast. Of the 56 westbound vessels, six were in ballast. For the 126 vessels carrying cargo, the loading was approximately 5,040 tons per vessel, as compared with 4,880 tons in February. The average daily transit of cargo during March was 20,485.7 tons, as compared with 15,164.5 tons in February.

As distributed over the principal trade routes, the shipments were as follows:

Route.	No. Vessels.	Cargo tonnage.
Coastwise, eastbound	29	98,312
Coastwise, westbound	17	96,544
U. S. Pacific coast to Europe	12	109,148
Europe to U. S. Pacific coast	4	7,097
United States to South America	9	53,506
South America to United States	17	100,705
Europe to South and Central Am	9	4,572
So. and Cen. America to Europe	12	66,790
United States to Far East	8	48,499
Far East to United States	3	23,600
Miscellaneous traffic	6	26,274
Vessels without cargo	10	
Total	136	635,057

Cargo declarations by the masters of

vessels listed 88 commodities. Distribution of principal commodities was as follows:

Barley amounted to 28,152 tons, shipped to Europe, of which 1,070 tons came from Chile and the remainder, 27,082 tons, from San Francisco. Copenhagen received 14,400 tons, Bergen, 2,361, Liverpool 1,020, and the remainder was shipped subject to later orders.

Coal from Atlantic to Pacific amounted to 31,882 tons; 9,066 tons went from the United States to South America; 11,801 tons from the Atlantic coast to the Pacific coast of the United States; and 11,015 went through from Great Britain to the Pacific Ocean, destination uncertain; 6,300 tons went from Pacific to Atlantic in naval colliers.

Copper included 1,000 tons from Yokohama to New York, 3,400 tons from Tacoma to New York, 2,400 tons from Rosalia to Swansea, and 633 tons from south Pacific ports, of which 533 tons went to Europe and 100 tons to New York.

In the goods classified as general cargo, 108,194 tons passed from the Atlantic to the Pacific, principally from the United States in coastwise trade, and to the Far East and South America. The eastbound general cargo amounted to 74,852 tons, principally general produce of the west coast, shipped to the United States and to Europe.

Lumber amounted to 31,538 tons, of which 212 tons were shipped to the west coast of South America, and 31,326 tons from the west coast of North America. Of this, 9,408 tons went to Great Britain, 75 tons to Copenhagen, and the balance to the United States.

Iron and steel manufactured goods, principally structural material, amounted to 20,884 tons. Two thousand three hundred and ten tons were shipped from the Pacific coast to New York; the remainder, with the exception of 138 tons from Europe, was shipped from the Atlantic seaboard of the United States; 8,557 tons to South America, 9,079 tons to the west coast of the United States, and 800 tons to New Zealand and Australia.

Railroad material to the amount of 350 tons was shipped from Liverpool to San Francisco; 13,960 tons were shipped from New York, 9,040 tons of which went to South America, 2,920 tons to Japan, and 2,000 tons to Wellington.

The 111,025 tons of nitrates shipped from the west coast of South America through the Canal consisted of 31,838 tons to Europe and 79,187 tons to the United States.

Oats included 50 tons from New York to Australia; 6,723 tons from Talcahuano to England, and 389 tons, from United States to England.

Two hundred and seventy tons of crude oil were shipped down the west coast of South America (14 tons from Liverpool and 256 tons from New York), and 5,516 tons were shipped from Peru to Norway, and 228 tons from San Francisco to Stockholm.

Refined petroleum was shipped in small quantities, amounting in all to 729 tons, to the west coast; 3,600 tons to Japan; but the principal movement was to New York, with 5,408 tons from Junin, and 11,803 tons from San Francisco.

Sugar amounted to 44,697 tons, of which 76 tons went to the west coast; 34,117 tons from the Hawaiian Islands to the Atlantic coast of the United States; 7,883 tons from South America to Europe; and 2,621 tons from South America to New York.

Tin to the amount of 6,758 tons was shipped from New York, all but five tons of which, consigned to Talcahuano, were for Los Angeles and San Francisco; unworked tin amount-

ing to 250 tons was shipped from Singapore to New York, and 1,650 tons were shipped from South America to Liverpool.

Detailed analysis of the traffic follows:

Commodity	Atlantic to Pacific	Pacific to Atlantic	Total	Remarks.
	Tons.	Tons.	Tons.	
Alcohol	10		10	New York to Australia.
Apples		230	230	146 tons, Hawaiian Islands to orders.
Asphalt		30	30	San Francisco to Great Britain.
Balsam		5	5	Central America to New York and Sweden.
Bark		120	120	90 tons, Salaverry to New York; 30 tons, Valparaiso to Europe.
Barley		28,152	28,152	See introduction.
Beans		369	369	309 tons from San Francisco to Boston.
Beans, lima		414	414	200 tons, Singapore to New York; 209 tons, Los Angeles to Charleston.
Beans, vanilla		14	14	San Francisco to Copenhagen.
Books	5		5	New York to New Zealand and Australia.
Bran		500	500	Penco to Copenhagen.
Bristles		100	100	Shanghai to New York.
Cakes, cotton seed oil		800	800	Valparaiso to Copenhagen.
Candy	5		5	New York to New Zealand and Australia.
Cacao		1,875	1,875	South Pacific ports to New York and Europe.
Canned goods	1,194	3,127	4,321	Mostly North Pacific ports New York and Europe.
Cement	3,928		3,928	New York to North and South Pacific ports.
Chemicals	1,032	1,009	2,041	New York to Pacific ports; Chile to Europe.
Chrome		6,100	6,100	Tahiti to Glasgow.
Coal	31,882	6,300	38,182	See introduction.
Cocoa leaves		16	16	Salaverry to Colon.
Coconut cake		100	100	San Francisco to New York.
Coffee	814	5,081	5,895	Between S. America and N. Y. and Europe.
Coke	979		979	Norfolk to Gatico.
Copper		7,433	7,433	See introduction.
Copper ore		1,640	1,640	Salaverry to New York.
Copra		1,300	1,300	Manila to New York (600); Tahiti to Glasgow (700.)
Cotton	214	263	477	225 tons from Los Angeles to Liverpool.
Electrical supplies	91		91	New York to North Pacific ports.
Explosives	141		141	New York (25) Gotenburg (116), to North Pacific ports.
Flour	737	3,458	4,195	3,258, west coast to Europe.
Fruit, dried		5,457	5,457	San Francisco to Europe.
Gasoline	99	9,680	9,779	9,680 tons, San Francisco to London.
General cargo	108,194	74,852	183,046	See introduction.
Ginger, dry		100	100	Hongkong to New York.
Guano		15	15	Mejillones to Genoa.
Hay		2	2	Tacoma to London.
Hemp		500	500	Manila to New York.
Gums and copal		500	500	Singapore to New York.
Iodine		16	16	Salaverry to New York.
Iron	3,391		3,991	New York and Gotenburg (110) to San Francisco and Orient (1,840.)
Iron ore		7,300	7,300	Cruz Grande to Philadelphia.
Ivory nuts		15	15	Tumaco to Colon.
Lead		700	700	San Francisco to New York.
Leather	40	61	101	New York to Australia; South America to Europe.
Liquors	98		98	New York (77) and Colon to Pacific ports.
Live stock		1 horse		Salaverry to New York.
Lumber	212	31,326	31,538	See introduction.
Manufactured goods:				
Iron and steel	18,574	2,310	20,884	See introduction.
Machinery	2,506		2,506	New York to Pacific ports and Orient.
Railroad material	14,310		14,310	See introduction.
Textiles	1,587		1,587	New York (976) and Europe (621) to Pacific.
Miscellaneous	2,959		2,959	New York to North Pacific ports and Australia.
Milk, evaporated	69		69	New York to Valparaiso.
Naphtha	1,500	2,774	4,274	Philadelphia to Japan; Peru to Norway.
Nitrates		111,025	111,025	See introduction.
Nutmegs		100	100	Singapore to New York.
Oats	50	7,112	7,162	See introduction.
Oil, crude	270	5,774	6,014	See introduction.
Oil, lubricating	180		180	New York to Chile, Peru, Australia, and New Zealand.
Oils, vegetable	309	1,200	1,509	1,200 tons, Manila to New York.
Paint	153		153	New York and Virginia to Pacific ports.
Panama hats		75	75	South Pacific ports to New York.
Pepper		100	100	Singapore to New York.
Petroleum, refined	4,329	17,011	21,340	See introduction.
Rice	25		25	New York to Ecuador.
Roofing	300		300	New York to New Zealand and Australia.
Rubber	38	231	269	Pacific ports to N. York (105) and Europe (123)
Salt	22		22	New York to San Francisco.
Seed		68	68	Salaverry to New York.
Silver		7	7	South Pacific ports to Liverpool.
Silver ore		72	72	South Pacific ports to New York.
Skins and hides		433	433	Manila (100) and Pacific ports to New York (232) and Europe (201.)
Soap	26		26	New York to Chile (21) and Australia (5).
Sugar	76	44,621	44,697	See introduction.
Tallow		315	315	North Pacific ports to New York and London.
Tea	2	200	202	Liverpool to Callao; Shanghai to New York.
Textiles, miscellaneous	1,812	302	2,114	New York to Vladivostok; Manila to New York.
Tin	6,758	1,900	8,658	
Tobacco	190		190	New York and Colon to Pacific ports and Australia.
Wax	250	6	256	New York to New Zealand and Australia; Valparaiso to Liverpool.
Whalebone		10	10	Seattle to Christiania.
Wheat		15,751	15,751	Oregon and Washington to Great Britain.
Wines	26	2,621	2,647	2,621 tons, San Francisco to New York.
Wire	1,624		1,624	New York to Japan, New Zealand and Australia.
Wire fencing	5,670		5,670	New York to Vladivostok.
Wood, hard	165	75	240	New York to South Pacific ports, New Zealand, Australia; San Francisco to Copenhagen.
Wool	1	4,587	4,588	4,291, Melbourne to Boston.

CANAL WORK IN MARCH.

Monthly Report of the Governor to the Secretary of War.

BALBOA HEIGHTS, C. Z., April 19, 1915.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of March, 1915:

Department of Operation and Maintenance.

Lock operation and maintenance—Delivery of material for the chain fenders was completed; the status of their erection remained unchanged throughout the month. The grading of dams and backfill and the planting of grass at the Pacific locks progressed satisfactorily.

The following lockages were made during the month: *Gatun*—139 lockages, 147 vessels; *Pedro Miguel*—132 lockages, 138 vessels; *Miraflores*—132 lockages, 138 vessels.

Electrical Division—The output of the power plants was: Gatun hydroelectric station, 2,606,620 kilowatt-hours; Miraflores steam station, 20,350 kilowatt-hours; Balboa steam station, 3,039 kilowatt-hours.

The output of the Balboa air compressor plant was 172,927,179 cubic feet of free air compressed to 105 pounds.

The electrical work at the Darien substation for the new high power Naval radio station was completed and the station put in service. Construction work was carried on in connection with the installation of the underground conduit system and street lighting systems in the Ancon, Balboa, Gatun, and Cristobal districts; the electrification of the dry dock shops at Mount Hope; the construction of barracks, the headquarters buildings, etc., at Fort Grant; the construction of the new commissary, dispensary, and railroad station at Balboa, of the new Panama railroad freight house in Panama City, and of the new commissary warehouse at Cristobal. The usual operation and maintenance work in connection with electric power and air compressor plants, substations, and transmission lines and the Balboa handling cranes was carried on.

Municipal Engineering Division—In addition to work incident to maintenance, operation, and repairs, work was in progress on the following items of construction: Building a fire wall around the fuel oil tanks at Mount Hope; constructing a concrete reservoir at Gatun; clearing site and installing water and sewer systems for staff headquarters at Balboa Heights; construction of roadways and of water and sewer systems for the Army post on Balboa dump; construction of roads, sidewalks, and parking at Ancon commissary; construction of water and sewer systems and paving street in the stable area of Panama City, and the construction of roads and streets and the making of fill at Balboa. Work on the extension of the Miraflores spillway wall was practically completed. Work was continued on the new Panama waterworks, and the entire system, including the purification plant, was placed in service on March 14.

Meteorology and hydrography—The rainfall was below normal at all stations except Camacho, Juan Mina, Frijoles, and Colon. The monthly totals ranged from a zero at Balboa to 1.71 inches at Colon. The maximum precipitation recorded in any one day was .83 inches, at Camacho on March 20. The estimated rainfall over the Chagres

River basin was 36 per cent below the average, or 1.02 inches against a 14-year average of 1.60 inches. The discharge at Alhajuella was 26 per cent above the 26-year March normal. The elevation of Gatun Lake varied from 86.98 feet on the 8th to 86.60 feet on the 31st of the month, averaging 86.82 feet. Two seismic disturbances were recorded at Balboa Heights, one on the 14th and the other on the 23rd, but no damage resulted from them.

Division of Terminal Construction.

PACIFIC TERMINALS.

Shops—Crane rail erection for building No. 1 was completed, with the exception of placing the 100-pound rails on the girders. The steel for building No. 30, including the potash vat and amounting to 20,628 pounds, was erected and riveted. Practically all discharge and main suction piping for the planing mill exhaust system was completed during the month, and all piping erected has had permanent supports applied. The motors for the blowers have been wired, but the test runs have not been held.

Dry dock—Hand excavation in connection with the work of preparing foundation was continued and amounted to 4,849 cubic yards. Twenty thousand and twenty-one cubic yards of concrete were placed. Of this amount 1,322 cubic yards were classified as reinforced concrete. Two hundred and forty-five thousand one hundred and sixty-five pounds of reinforcing steel, and 22,960 pounds of fixed steel were placed.

Coaling plant—The excavation of the floor of the coal pocket was completed, as well as all the riprapping that can at this time be put in place. Work was begun on the division wall between the west high area and the subaqueous area. At the coal handling plant the berm crane erection consisted of erecting the four booms on the south side of each crane and miscellaneous riveting and connections were made. At the unloader wharf, the rock fill behind the piers of the wharf was put in place, and 2,253 cubic yards of fill placed. There were 1,737 cubic yards of concrete placed in the buttresses and 210 cubic yards of concrete were placed in the floor slab. At the reloader wharf, 263 lineal feet of trestle was built and a large number of supporting piles were driven around caissons. There were sixteen 6-foot cylinders and eight 8-foot cylinders started in March, making a total of 42 caissons started to date. During the month six caissons were sunk to rock. In all 622 lineal feet of caissons were sunk by orange peel excavation, which made a total for both orange peel and hand work of 792 lineal feet of penetration for the month.

Quay wall and pier—The placing of steel and concrete in the floor of section e-f was completed, and the brick pavement likewise put in place. Fender piles were driven nearly the whole length of the section. On section d-e there was a total penetration of 155 lineal feet made in excavating caissons and seven caissons were started during the month, two of which were sunk to rock. The anchorages behind section e-f were put in place as far along the wharf as there was material in which to place them. On pier No. 1 excavation was continued along the north side of the pier, and six anchors were put in place and connected.

Sosa Hill Quarry—The total excavation for the month amounted to 9,430 cubic yards, 4,456 cubic yards of which was rock.

The rock so excavated was used in and around the yards and docks at Balboa.

Fuel oil plant—Work continued on oil crib No. 1, and is progressing satisfactorily. The batter caissons behind the crib were put in place.

Quarantine boat landing—Contract was let to Mr. A. P. Cray to perform the work of putting in this landing, and work was started thereon on March 26.

ATLANTIC TERMINALS.

East Breakwater—Repairs were made on the old double-track trestle between bents 83 and 100 and new single track trestle begun at bent 100 and driven to bent 133, a total distance of 364 lineal feet. A crossover 194 feet long was made on the old double-track trestle at bents 88 to 100. On the old trestle 272 feet of track was laid. Nine thousand two hundred and twenty lineal feet of piling was driven in the trestle. The dredge *Caribbean* and scows dumped dredged material along the axis of the trestle ahead of the driving and the fill has been brought up to approximately -25 feet for a distance of 500 feet.

Coaling plant—The filling of caissons under the north section of the reloader wharf was continued and about 70 per cent completed. The concreting of girders and the floor slab on the unloader wharf was begun at bent 34 on March 17 and at the end of the month 190 lineal feet of wharf had been completely concreted. One thousand eight hundred and seventy-nine cubic yards of coral were excavated by orange peel bucket and used for back-filling transformer house and south end of reloader wharf. The dredge *Marmot* removed approximately 14,192 cubic yards of coral rock from the entrance basin and slip on the west side of the reloader wharf, and dredge No. 4 approximately 6,650 cubic yards from the same place. Work was started on the bolting of permanent track on the wharves, and progressed satisfactorily. The erection, riveting, and painting of two stocking and reclaiming bridges was completed.

Marine Division.

One hundred and thirty-eight vessels, including launches, passed through the Canal in March, 82 northbound and 57 southbound. Of this number 57 vessels were of American registry and 54 of British registry.

Seventeen vessels were measured and 61 were inspected to see whether their certificates conform to the rules. Collections for tolls amounted to \$606,316.56.

Dredging Division.

The total excavation for the month, including earth, rock, gravel, and sand, was 1,329,361 cubic yards, as follows:

	Cu. Yds.
Miraflores Locks to the sea.....	13,139
Balboa inner harbor.....	187,984
Culebra Cut.....	670,891
Gatun Locks to the sea.....	199,521
Approach channel (Cristobal).....	15,045
Shelter cove, Toro Point.....	125,929
Breakwater, Limon Bay.....	500
Chagres River, gravel and sand.....	49,900
Approach to coal slip, Cristobal.....	20,990
Cristobal coaling station.....	20,842
Colon inner harbor.....	24,620
Total.....	1,329,361

The hydraulic grader was engaged from March 1 to 15, inclusive, sluicing slide north of Gold Hill and in furnishing steam for rock drills. The work of exterminating the water hyacinths continued during the month, as did the work on the system of ditches for draining for the Obispo Diversion, and progressed satisfactorily.

Mechanical Division.

Shop orders authorized during the month number 935, an increase of nearly 200 over last month, those left over from the previous month being 454, those completed during the month numbering 857, and those carried forward into April numbering 532. The output of the foundry was 114,402 pounds of iron, 77,568 pounds of steel, and 17,825 pounds of brass. Hostling was done on 4,260 pieces of equipment, and shop and field repairs were made on 6,823 cars. In addition to this 1,120 light repair jobs were done on equipment, and 13 cases of extended repairs.

The oil handling plant at Balboa handled 137,275.69 barrels of oil. The 6-inch line for handling Diesel oil was completed, and will be used for all future deliveries of this oil. Forty-three thousand two hundred sixteen and sixty-five hundredths barrels of Diesel oil were handled for individuals and companies during the month.

The final acceptance tests of the floating crane *Hercules* were completed on March 29, and the crane was turned over to this division on March 30.

Building Division.

The following buildings were completed during the month: Locks office building, at Gatun; Balboa dispensary; Balboa commissary; Balboa oil house, and all of the officers' houses at Fort Amador, with the exception of that of the field officer, the completion of which is delayed awaiting the receipt of material. At the Corozal Insane Asylum, with the exception of two of the 19 buildings, the work was practically completed. Work on the conversion of six more of the old Ancon asylum buildings, and on the new railroad station at Corozal, was commenced and is proceeding satisfactorily. At Fort Amador work was started on two field officers' houses, three 2-family houses, two 4-family houses, and three 4-family noncommissioned officers' houses. The headquarters building at Fort Amador is progressing.

The Corozal block plant resumed operation and 32,049 blocks were manufactured during the month, at a lower cost than any heretofore attained.

Supply Department.

The force report for the half-month ending Wednesday, March 24, showed a total of 23,414 employes of The Panama Canal and Panama Railroad Company, of whom 3,393 were white Americans and 20,021 were laborers. Of the latter approximately 265 were Europeans and the remainder West Indian negroes. The labor force was increased 398, and there was a reduction of 69 made in the number of American employes, leaving a net increase of 329.

The occupants of Government quarters numbered 6,819 white Americans, of whom 3,647 were men, 1,546 women and 1,626 children; 7,415 West Indians, of whom 4,460 were men, 1,259 women and 1,696 children.

The value of material received during the month was \$751,834.29. It came forward in 36 steamers. The total weight of the cargo, exclusive of lumber and piles, was 12,306 tons. Some of the principal items were: Two hundred and ninety-eight thousand and fifty-three feet, board measure, of lumber for stock, Mechanical Division, and fortifications; 1,008 pieces of piling; 191,730 bags of Portland cement; 1,963 bundles corrugated iron; 11,250 pieces sewer pipe, etc.

Health Department.

General—No case of yellow fever, smallpox,

or plague originated on or was brought to the Isthmus during the month. Twenty-five deaths occurred in the Canal Zone. The death rate for disease for the Canal Zone, based upon a population of 33,519, was 8.23 per thousand, as compared with 5.63 per thousand for the preceding month and 15.01 per thousand for the corresponding month of last year.

Employes—The health of employes continued good. The number of names on the pay rolls for the preceding month was 34,218. On this basis the admission to hospitals and quarters, 892, gave a rate of 312.82 per thousand, as compared with 294.17 for the preceding month and 653.92 for the corresponding month of last year. The admission rates to hospitals for all diseases were: White, 411.96; blacks, 69.22; Europeans, 1,463.28; and Americans, 327.72. The admission rates for malaria to hospitals and quarters were: Whites, 133.05; blacks, 32.98; Europeans, 474.58; and Americans, 106.44. The total number of deaths from all causes was 18. Of these 14 died from disease, or 4.91 per thousand as compared with 3.15 for the preceding month and 6.19 for the corresponding month of last year. No American died from disease during the month.

Accounting Department.

The cash balance in Canal construction appropriations on March 31, 1915, was \$9,414,606.41, and in the fortifications appropriations, \$3,429,570.05. The payrolls for March, exclusive of Army quarters, storehouses, fortifications, etc., amounted to \$926,903.05 and the fortification roll amounted to \$82,294.03. Payments by the Disbursing Clerk in Washington amounted to \$857,928.18, and by the Paymaster on the Isthmus, \$1,516,008.63. Collections on the Isthmus amounted to \$1,384,469.53, of which \$507,441.30 were repaid to appropriations, \$214,330.28 were commissary collections and other trust funds, and \$636,697.95 were covered into the Treasury as miscellaneous receipts. Of the miscellaneous receipts \$606,316.56 were collected on account of tolls, as compared with \$403,219.16 for February. Deposits in the amount of \$263,267.68 were made with the Assistant Treasurer, to be applied in payment of tolls and other charges against vessels using the Canal. Canal Zone revenue collections and miscellaneous funds received, amounted to \$198,636.19, and the disbursements under the same heading amounted to \$290,994.18.

Executive Department.**DIVISION OF CIVIL AFFAIRS.**

One hundred and eighty-six licenses of all kinds were issued during the month. Thirty-six estates were settled, having a total value of \$1,081.51. At the port of Balboa 116 vessels entered and 116 cleared, and at the port of Cristobal 138 vessels entered and 136 cleared. On account of the continued increase in the number of vessels calling at these ports, and the extra work incident thereto, the appointment of one additional customs inspector has been authorized.

Postal service—Postmasters remitted on account of stamp sales, second class mail collections, postage due collections, and box rent receipts, \$8,484.90. The money orders issued aggregated \$343,076.15. The fees collected thereon amounted to \$1,132.45. Of the total value of money orders issued, \$121,535 represents the value of deposit money orders issued without fee. Deposit orders to the value of

\$118,220 and postal savings certificates to the value of \$75,222 were paid. Balance of postal savings deposits on hand at the end of the month, represented by the unpaid certificates and deposit money orders, aggregated \$624,694, as compared with \$696,601 at the close of the previous month.

POLICE AND FIRE DIVISION.

Four hundred and ten arrests were made during the month. Of these 387 were males and 23 females. Sixty convicts were confined in the penitentiary at the close of the month. Ten persons were deported, seven of whom were convicts who had completed their sentences in the penitentiary, and three of whom were prisoners who had served terms in jail.

Twenty-four fires occurred during the month. The damage to The Panama Canal and Panama railroad property amounted to \$397.55, and the damage to United States Army property amounted to \$27,500. This last mentioned damage was caused by a fire of unknown origin, which occurred on March 8, 1915, in the mining dock at Fort Grant.

COURTS.

In the District Court, six civil, 40 probate and 24 criminal cases were settled; five civil, 39 probate, and 23 criminal cases were filed and 97 cases of all kinds were pending at the close of the month. In the magistrates' courts, 30 civil and 411 criminal cases were tried.

DIVISION OF SCHOOLS.

The total enrollment in the Canal Zone schools for the month was 1,605 for the white schools and 1,495 for the colored schools. In the white schools the net enrollment was 1,114, the average number belonging 959.9, and the average daily attendance 925.7. In the colored schools the net enrollment was 1,353, the average number belonging 863.6, and the average daily attendance 751.1.

Panama Railroad.

Cargo handled at the Colon and Balboa agencies aggregated 131,501 tons, of which 17,252 tons were handled through the Canal in steamers of the Panama Railroad Steamship Line, as follows: From New York to Balboa, 2,408 tons; from Colon to Balboa, 1,516 tons; total, 3,924 tons. From Balboa to New York, 10,680 tons; from Balboa to Colon, 2,648 tons; total, 13,328 tons; grand total, 17,252 tons.

One thousand nine hundred and seventy lineal feet of steel cylinders were driven for pier No. 7 at Cristobal, making this item 63 per cent complete; excavation in cylinders 50 per cent complete, and 35.5 per cent of the total amount of concrete required was placed in cylinders. Thirty caissons were completed during the month, making a total of 38.2 per cent of the total number required. The driving of fender piles at pier No. 10 and the fitting up of stringer pieces was completed on March 10, and this pier has since been available for the berthing of ships.

Respectfully,

GEO. W. GOETHALS,
Governor.

Obituary.

Joseph Wood, of 7436 Monroe Avenue, Chicago, Ill., an employe of C. J. Alberts, Canal contractor, and formerly living at Cristobal, died at Ancon Hospital on April 5.

C. J. Snapp, an employe of the Panama Railroad Company, living at Ancon, died at Ancon on April 6.

EXECUTIVE ORDER.

Designating Officials in Certain Localities to Issue Provisional Certificates of Registry to Certain Vessels.

In pursuance of the authority conferred upon the President of the United States by the Act of March 4, 1915, entitled, "An Act to provide for provisional certificates of registry of vessels abroad, and for other purposes," the Collector of Customs of the Philippine Islands, the Captains of the Ports of Cristobal and Balboa, Canal Zone, and the Governor of Guam, are designated for the purpose of issuing provisional certificates of registry to vessels abroad which have been purchased by citizens of the United States, including corporations, as defined in section forty-one hundred and thirty-two, Revised Statutes, as amended by the Panaman Canal Act and the Act of August eighteenth, nineteen hundred and fourteen.

WOODROW WILSON.

THE WHITE HOUSE,
April 7, 1915.

[No. 2164.]

Order No. 2164 is being published locally as Panama Canal circular No. 601-43.

The Act of Congress in pursuance of which the Order was issued was published in THE CANAL RECORD of March 24, 1915.

Residents of Balboa District Sending Baggage over Panama Railroad.

Residents of the Balboa district who ship baggage over the Panama railroad should give explicit instructions to the quartermaster, or anyone else handling the baggage, whether it shall be delivered at the station in Panama or that at Balboa Heights. If baggage is sent to the Balboa Heights station for shipment to a steamer, it should be checked from that station in the afternoon of the day before sailing. This will insure the proper delivery of the baggage at the dock. Baggage sent to the station in Panama for a vessel sailing Saturday may be checked at night, as the baggage room of the Panama station is kept open until 11 p. m., on Friday nights.

Completion of Filling in Balboa District.

The filling in the vicinity of Balboa and Ancon by Contractor H. A. Pearce was practically completed in the morning of Wednesday, April 28. The areas in which spoil has been dumped include the old Panama railroad yards "A" and "B" at Balboa, the part of the Balboa towasite lying between the Prado and yard "A," a fill in low ground between the old main line of the Panama railroad and the Corundú River, west of Panama City; and a fill in low ground between the present main line of the railroad and the municipal yard near the model house. In all, about

125,000 cubic yards of earth have been placed, all of which was excavated by the contractor at Diablo.

Misdirected Letters.

* Paper.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 303, on Wednesday, May 5, 1915, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

For the benefit of applicants residing in Gatun and Cristobal or Colon, examinations for licenses as navigators of motor boats, and as chauffeurs, will be held at the office of the captain of the port of Cristobal on Friday, May 7, 1915, beginning at 9 a. m. Applicants should be provided with motor boats or automobiles for the demonstration test.

By direction of the chairman of the board.
F. M. NIXON,
Recorder, Board of Local Inspectors.

OFFICIAL CIRCULARS

Harbor Charges.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 19, 1915.

CIRCULAR No. 698:

1. A minimum charge of \$25 will hereafter be made against vessels using the mooring buoys, Balboa Harbor. The charge for the first day of 24 hours will be \$25, and \$10 for each subsequent day or portion thereof.

2. No vessel will be permitted to handle cargo at one of these berths when a regular wharf berth is available.

3. When a vessel is placed at the mooring buoys solely for the convenience of the Canal authorities, for measurement or other purposes, no charge will be imposed.

GEO. W. GOETHALS,
Governor.

Accounting for Cement Bags and Other Containers.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 19, 1915.

CIRCULAR No. 656-8:

Paragraph 9 of Circular No. 656-7 is hereby amended to read as follows:

9. When the contractor charges for containers, for which credit will be allowed when returned, the Balboa storekeeper will invoice against various divisions financially for such containers as may be issued or transferred. Separate invoices will be issued to cover such containers. When divisions return containers, they will be invoiced in the same manner as other material returned to store. Division returning such containers will invoice and ship same to the Storekeeper, Balboa.

GEO. W. GOETHALS,
Governor.

Acting Magistrate for Balboa.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., March 13, 1915.

To all concerned—Effective April 10, 1915, and during the absence on leave of Judge Samuel E. Blackburn, Mr. F. G. Swanson will perform the duties of magistrate for the subdivision of Balboa.

GEO. W. GOETHALS,
Governor.

Acting Executive Secretary.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 23, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Effective April 24, during the absence on leave of Mr. C. A. McIlvaine, Mr. W. P. Copeland will be acting Executive Secretary. Mr. John O. Collins will be acting chief clerk.

GEO. W. GOETHALS,
Governor.

Acting Office Engineer.

DEPARTMENT OF OPERATION AND MAINTENANCE,
BALBOA HEIGHTS, C. Z., April 23, 1915.

To all concerned—Effective Saturday, April 24, and until the return from leave of absence of Mr. C. J. Embree, office engineer, Mr. T. C. Morris will assume charge of the drafting room and perform the duties attached to the position of office engineer.

CHESTER HARDING,
Engineer of Maintenance.

Approved:
GEO. W. GOETHALS,
Governor.

Accountable Official.

THE PANAMA CANAL,
OFFICE OF THE AUDITOR,

BALBOA HEIGHTS, C. Z., April 23, 1915.

CIRCULAR No. 88:

Effective May 1, 1915, Lieut. C. Garlington is designated an accountable official of The Panama Canal, vice Lieut. A. H. Acher.

H. A. A. SMITH,
Auditor, The Panama Canal.
GEO. W. GOETHALS,
Governor.

Accommodations on Panama Railroad Vessels.

THE PANAMA CANAL,
OFFICE OF EXECUTIVE SECRETARY,

BALBOA HEIGHTS, C. Z., April 23, 1915.

To all concerned—All available accommodations having been assigned on the steamship *Advance*, scheduled to sail on May 1, and on the steamship

Deceased Employees.

Name.	Check No.	Native of	Isthmian Residence	Employed by	Date of death
Snapp, C. J.	308	United States	Ancon	Panama R. R.	April 6, 1915.

The estate of the abovenamed deceased employe of The Panama Canal or the Panama Railroad Company is now in process of settlement, and any claims against the estate or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. This name will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

Colon, scheduled to sail on May 22, no further requests for passage on these vessels should be submitted.

A limited number of berths are still available on the steamship *Allionco*, scheduled to sail on May 15. By direction of the Governor.

C. A. McILVAINE,
Executive Secretary.

In Charge of Gatun Locks.

THE PANAMA CANAL,
DEPT. OF OPERATION AND MAINTENANCE,
BALBOA HEIGHTS, C. Z., April 21, 1915.

To all concerned—Effective Saturday, April 24, Mr. T. W. McFarlane, mechanical supervisor, Gatun Locks, will assume temporary charge of the operation and maintenance of Gatun Locks.

CHESTER HARDING,
Engineer of Maintenance.
Approved: GEO. W. GOETHALS,
Governor.

Acting Superintendent of Northern District of Division of Municipal Engineering.

THE PANAMA CANAL,
DIVISION OF MUNICIPAL ENGINEERING,
BALBOA HEIGHTS, C. Z., April 24, 1915.

To all concerned—Mr. W. F. Ashton will act as superintendent of the northern district, Division of Municipal Engineering, during the absence of Mr. E. H. Chandler on leave, effective April 24, 1915.

GEO. M. WELLS,
Resident Engineer.

Nonexpendable Property for Commissary Branch.

THE PANAMA CANAL,
OFFICE OF THE AUDITOR,
BALBOA HEIGHTS, C. Z., April 23, 1915.

CIRCULAR No. 89:
To all concerned—Effective May 1, 1915, all nonexpendable property required for use by the commissary

branch of the Supply Department will be drawn on foreman's order only (form A-152). Retail commissary storekeepers, and such other employes of the commissary branch as may be designated by the Depot Commissary, are authorized to draw nonexpendable property either from their own stock or from regular Supply Department storehouses. In no case shall any nonexpendable property be put into use unless it shall have been covered by foreman's order.

When at item of property is drawn from commissary stock, the issuing storekeeper will cover same by regular invoice (form Com. 5), showing charge to "Accounting." The usual copies of invoice, together with original, duplicate, and quadruplicate copies of foreman's order, will be forwarded to the commissary accountant in support of regular daily credit sheet. The chief accountant will forward the proper copy of foreman's order to the accountable official.

When property is drawn from regular Supply Department storehouses, the original, duplicate, triplicate, and quadruplicate copies of foreman's order will be delivered to the issuing storekeeper, who will handle in the same manner as foreman's orders signed by Panama Canal employes are handled.

The handling of property records will thereafter be in strict accordance with Circular No. 656-2. Copies of circular No. 656-1, and 656-2, together with list of nonexpendable property and supplements thereto, are attached for information of all concerned.

H. A. A. SMITH,
Auditor, The Panama Canal.

In Charge of Lighthouse Work.

THE PANAMA CANAL,
MARINE DIVISION,
BALBOA HEIGHTS, C. Z., April 10, 1915.

All concerned—Pilots John G. Fels and Frederick Kariger have exchanged duties, and Capt. Kariger is now in charge of the lighthouse subdivision.

HUGH RODMAN,
Marine Superintendent.

Legal Notice.

United States of America } In the District Court
Canal Zone. } Division of Balboa.

Estate of José Alvarez, deceased; Petition for Escheat.

Notice is hereby given that at 9 o'clock a. m., of the 15th day of May, 1915, in the court house at Ancon, there will be an inquisition into the estate of José Alvarez, who died intestate about the 24th day of October, 1910, possessed of improvements on lands located near Tabernilla, C. Z., for which improvements the Joint Laod Commission, in 1913, made an award of \$175 and ordered that the same be paid in the Court of the Canal Zone, pursuant to a petition filed by John K. Baxter, Administrator of Estates, praying that the said sum be escheated in accordance with Sections 779, 780, and 781 of the Code of Civil Procedure of the Canal Zone, at which time and place all persons claiming the said estate, or any interest therein, may appear and be heard before the Court.

E. M. GOOLSBY,
Clerk.

JOINT LAND COMMISSION.

Notice of Award.

In the matter of sundry claims, award No. 79, docket numbers as noted, April 21, 1915—An award is hereby made against the United States, in favor of the persons hereinafter named, in the sum of \$150, United States currency.

This award shall be paid to the claimants hereinafter named, in the amounts hereinafter specified, on or before the 21st day of May, 1915, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum until paid.

Juan Barboza (Balboza) and Antonio Fontelo, dockets Nos. 627 and 628—For all rights, claims, and other interests in growing crops, fruit trees, and other improvements which the said Barboza (Balboza) and Fontelo may possess or may have possessed near Matachico and near Gorgona, the sum of \$80, United States currency.

Cenon Cortes, docket No. 345—For all rights, claims, and other interests in growing crops, fruit trees, and other improvements which the said Cortes may possess or may have possessed on Tabernilla lands near Frioles, the sum of \$70, United States currency.

Total, \$150, United States currency.
JORGE BOYO, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Launch Service to Taboga.

Week days—Leave Balboa dredge landing at 5.50 p. m., and Taboga at 6 a. m. *Sundays and holidays*—Leave Taboga at 6 a. m. Balboa dredge landing at 9.40 a. m. and 5.30 p. m.; leave Taboga at 7.15 p. m. *Fares*—Employes, 25 cents gold each way; nonemployes, 50 cents gold each way, children under 12 years, 15 cents gold each way.

Supplement to Coach Tariff—Fort Amador, Ancon, Panama, and Balboa.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., April 21, 1915.

Pursuant to the authority in me vested by law, the tariff of rates for the transportation of passengers for hire by means of cabs, coaches, or other horse-driven vehicles, established by order of the Head of the Department of Civil Administration, under date of April 20, 1911, is hereby supplemented by the addition thereto of the following rates:

Between	Any point in		Rates (Panaman Silver.)			
			Number of persons			
			One	Two	Three	Four
Balboa Heights*	City of Panama	One way... .50	.90	1.36	1.70	
		Round trip .90	1.60	2.30	3.00	
Balboa Heights*	Ancon	One way... .40	.70	1.00	1.30	
		Round trip .70	1.20	1.80	2.40	
Balboa Heights	Balboa	One way... .20	.40	.60	.80	
		Round trip .40	.75	1.00	1.20

		Round trip 1.60	2.00	2.50	3.20	
Ancon	Fort Amador	One way... 1.00	1.60	2.00	2.50	
		Round trip 1.60	2.00	2.50	3.20	
Zone line at Chorrillo	Fort Amador	One way... .80	1.20	1.60	2.40	
		Round trip 1.40	1.80	2.20	3.00	
Balboa	Fort Amador	One way... .40	.80	1.00	1.20	
		Round trip .80	1.20	1.40	1.60	
Balboa	Ancon via lower Balboa Heights road	One way... .60	1.00	1.50	1.80	
		Round trip 1.00	1.40	2.00	2.40	

*Between Balboa Heights and Panama, and Balboa Heights and Ancon, via Ancon Hospital road, or to points on the two high levels of Balboa Heights, add 20 cents silver for one passenger and 30 cents silver for two or more passengers.

GEO. W. GOETHALS,
Governor.

Supplementary Rent Schedule No. 2.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER,
BALBOA HEIGHTS, C. Z., April 5, 1915.

To all concerned—The following changes and additions have been made to the rent schedule published March 1, 1915, and will become effective March 1, 1915, except for buildings occupied by the Coast Artillery Corps, for which the changes will become effective on date of occupancy:

GOLD QUARTERS.
Decreases.

District.	Kind.	Building No.	Apartment or room No.	From	To
Gatun	Family	208, type 17		\$10.00	\$8.00

Increase.

Cristobal	Bachelor	83*		4.00	4.25
Do	do	84*		4.00	4.25

Additions.

Balboa	Family	1, quarantine sta			\$10.00
Do	do	2, quarantine sta			20.00
Do	Bachelor	Room over quarantine station.			2.13
Do	do	Quarters occupied by silver attendant at quarantine sta			1.00
Cristobal	Buildings occupied by Coast Artillery Corps	1**			42.00
Do	do	2**			48.00
Do	do	54**, type 3			32.00

*Per room.
*Per man.

**This corrects an error made in publishing the original schedule of rentals, as the rate of all type-18 houses was fixed at \$4.25 per room.

**As the Coast Artillery Corps will make repairs to these buildings, no surcharge will be added to the rates. The supplementary rent schedule published under date of March 26 will be given No. 1 and all other lists of changes and additions will be numbered serially as published.

Approved: GEO. W. GOETHALS,
Governor.

WM. R. GROVE,
Chief Quartermaster.

COMMISSARY DEPARTMENT.

Commissary Hours.

The commissary stores at Las Cascadas, Empire, and Culebra are open from 7.30 to 11.30 a. m., and 1.30 to 5.30 p. m.

The commissary store at Balboa is open from 8 a. m. to 12.30 p. m., and 2.30 to 6 p. m.

All other commissary stores are open from 8 a. m. to 12.30 p. m., and 3 p. m., to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m. on Saturdays and other sailing days of Panama railroad vessels.

JUNE.

DATE.	Time and height of high and low water.			
	6:05	12:15	18:20
Tues., June 1.....	15.8	0.4	15.6
Wed., June 2.....	0:41	6:57	13:08	19:13
-0.5	15.2	1.1	14.7	

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from Oh (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3.47 p. m.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans for all States. Due at New Orleans on the following Tuesday.

Every Saturday to New York for all States. Due at New York the following Friday, with the exception of the Advance, which is due there on Saturday.

Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday*.

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*NOTE.—The sailings on Monday, May 3 and 31, will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4 leaving Panama at 7.10 a. m. connects with the despatches for the sailings on May 3 and May 31.

Rainfall from April 1 to 24, 1915, Inclusive.

Sailings of Vessels in Regular Service with the Isthmus.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing every Saturday, direct from Cristobal; and every Thursday, direct from New York; between Colon and New York by the United Fruit Company, sailing via Kingston weekly and via Havana weekly; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

THROUGH THE CANAL—ATLANTIC TO PACIFIC.

Table with columns: Date Entered, Vessel, Nationality, Line, From, For, CARGO (Nature, Tons), CANAL TONNAGE (Gross, Net). Lists arrivals from April 19 to April 25.

THROUGH THE CANAL—PACIFIC TO ATLANTIC.

Table with columns: Date, Vessel, Nationality, Line, From, For, CARGO (Nature, Tons), CANAL TONNAGE (Gross, Net). Lists arrivals from April 19 to April 26.

*ARRIVALS AND EXPECTED ARRIVALS FROM ATLANTIC.

Table with columns: Date, Vessel, Line, From. Lists arrivals from April 23 to April 25.

*ARRIVALS AND EXPECTED ARRIVALS FROM PACIFIC.

Table with columns: Date, Vessel, Line, From. Lists arrivals from April 24 to April 24.

PORT OF CRISTOBAL.

*ARRIVALS.

Table with columns: Date, Vessel, Line, From. Lists arrivals from April 19 to April 24.

*DEPARTURES.

Table with columns: Date, Vessel, Line, To. Lists departures from April 20 to April 24.

*EXPECTED ARRIVALS.

Table with columns: Date, Vessel, Line, From. Lists expected arrivals from April 26 to April 27.

*EXPECTED DEPARTURES.

Table with columns: Date, Vessel, Line, To. Lists expected departures from April 27 to April 30.

*Other than vessels which passed through the Canal, United Fruit Company's vessels, and vessels in regular service to the United States.

PORT OF BALBOA.

*ARRIVALS.

Table with columns: Date, Vessel, Line, From. Lists arrivals from April 20 to April 24.

*DEPARTURES.

Table with columns: Date, Vessel, Line, To. Lists departures from April 19 to April 25.

*EXPECTED ARRIVALS.

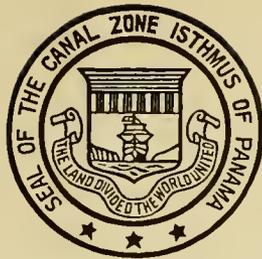

Table with columns: Date, Vessel, Line, From. Lists expected arrivals from April 24 to April 24.

*EXPECTED DEPARTURES.

Table with columns: Date, Vessel, Line, To. Lists expected departures from April 24 to April 24.

*Other than vessels passing through the Canal.

Summary table with columns: Vessel, Line, Date, Location. Lists various vessels and their schedules for May.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. To others, the subscription rate will be \$1, United States currency, per annum, in the United States and its possessions; Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50, United States currency, per annum, in all other countries.

Address at Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone,

Isthmus of Panama.

NOTES OF PROGRESS.

Cargo by Canal and Rail.

The cargo handled through the Canal during the month of March, 635,057 tons, is 98.7 per cent of the through freight hauled over the Panama railroad during the 12 months ending June 30, 1914, and is about 40,000 tons more than the through freight handled by the railroad during the fiscal year before that. It will be recalled that the Panama railroad was supposed to have the heaviest traffic per mile of all of the railroads in the world, prior to the opening of the Canal.

The through freight trains of the Panama railroad are made up of 18 or 20 cars and haul about 350 tons of freight per trip. To have handled the March cargo by rail would have necessitated 1,814 trains, or 58.5 trains on each of the 31 days. This would have meant despatching a through train each way about every 48 minutes; or at any given point, a train would have been passing every 25 minutes.

With the trains averaging 800 feet in length, 1,814 of them would have been 275 miles long, more than enough to form five parallel trains extending from Panama to Colon.

A comparison in terms of maximum railway traffic is afforded by the test trip made last year, from Baltimore to Philadelphia by a locomotive declared at the time of building to be the largest and most powerful in existence, and generally termed "three locomotives in one." Over relatively easy grades this locomotive hauled 55 carloads of coal, a total of 4,012 tons, said to have been the heaviest train ever pulled over the track by one locomotive. It would have required 158 of such 4,000-ton trains to handle the Canal cargo for March. In comparison with the loading of the maximum train, the average loading of cargo-carrying vessels through the Canal in March was 5,040 tons.

New Collier Discharging Cargo.

The new Canal collier *Ulysses*, which arrived from Norfolk on April 27, moved from the bay to the coal wharf near the entrance to the Mount Hope dry dock on Saturday, May 1. The Brown steam hoist has since been engaged in discharging the cargo.

The removal of a sunken "hand clapet" from the slip at the coaling wharf to make room for the *Ulysses*, was accomplished on Friday, April 30, by forces of the Dredging Division, without the use of the floating crane *Hercules*, previously contemplated. Barge No. 27 was lowered by pumping water into the hold and cables were made fast to slings around the clapet. The barge was then pumped out, and in rising, lifted the wreck so that it could be towed to sea by the tugs *Porto Bello* and *Tavernilla* and clapet No. 4.

Recovering Piledrivers.

The floating crane *Hercules* was towed out to the site of the East Breakwater in Limon Bay, in the forenoon of Wednesday, May 5, to begin the lifting of the two piledrivers lost off the breakwater trestle on February 9, during a norther. Slings had previously been placed around the piledrivers by forces of the Dredging Division.

Highway Bridge Removed.

The iron girder and concrete bridge crossing a former estuary of the Pacific Ocean about midway between the commissary building and the Canal hotel at Balboa has been removed and the space beneath it filled in for the completion of a continuous macadam and asphalt concrete highway over the place formerly bridged. The estuary had been filled in above and below the bridge, so that the latter had survived its usefulness. The girders in the bridge were relics of the Barboas bridge on the old Panama railroad.

Decreasing Operating Accidents.

By increasing the thoroughness of investigation and of discipline in cases of operating accidents on the Panama railroad, the transportation department has been able to reduce considerably the number of accidents. There were 57 train accidents in December, 1914, 47 in January, 1915, 25 in February, and 17 in March. The damage done in the respective months was \$636.33 in December, \$1,803.17 in January, \$338.41 in February, and \$373.69 in March. It was necessary to use the wrecker once each in December, January, and February, and not at all in March. Discipline, consisting of suspension, reprimand, or warning, and discharge in one instance, was administered in 12 cases in December, six in January, three in February, and one in March. Of the 146 accidents in the four months, two occurred on passenger trains; they were scraping an improperly placed baggage truck on a station platform, and the breaking of a "go ahead" eccentric strap on one of the locomotives.

During the period the daily movement of trains included three main line passenger trains each way, six passenger trains each way in the Panama-Las Cascadas shuttle service, a fast freight in each direction over the main line, and about 25 extra trains, in each

direction, including motor cars and Panama Canal work trains; in all, about 70 trains daily, traveling an aggregate of approximately 1,500 miles. For the movement of these trains, it requires daily about 70 telegraphic train orders, though none are required between Panama and Pedro Miguel between 6.30 a. m. and 6 p. m. If the average number of cars per train be taken at 10, the 17 accidents in the month of March occurred at the rate of about one to every 24,700 miles of car movement.

Starting a "City Beautiful" Movement.

In connection with the landscape work being done in the permanent towns of the Canal Zone the horticulturist supervising the work is endeavoring to secure the cooperation of all residents in beautifying the towns by means of plants, shrubs, and trees. He points out that no place in the world offers better opportunities for this purpose, as the climate of perennial summer allows plants a continuous development to more and more attractive forms. Tasteful planting, he states, and proper community care, will relieve the glistering newness of the new concrete town of Balboa, gradually conceal its angularity, and eventually transform it into a beautiful dwelling place, delightful to live in.

As the first step in this movement, the Supply Department has recently begun the propagation and distribution of a large variety of ornamental plants. These will be furnished free, in reasonable limits, to householders for outdoor planting, while those for indoor use will be furnished at a nominal price.

The Supply Department is preparing to put out a greater variety of decorative material than is now in evidence, and to use plants of finer quality than heretofore. The extent of this tendency will be limited, however, by the response of the people and the care taken of the plants. It is not anticipated that the householders will have any work to do in caring for the outdoor plants; their cooperation will be of most service in protecting the plants from destruction or abuse, at the hands of children.

Payment of Rent and Electric Current Charges.

To all concerned—Attention is invited to paragraph 6 of circular No. 627-3 which provides that payments for rent and electric current are to be made monthly by all employes without further notice than that originally sent to such employes by the district quartermasters. Monthly bills will be rendered but owing to frequent changes of quarters it will be impossible to place them in the hands of every person who should receive a bill. The failure to receive a bill will therefore not excuse an employe from payment of rent and electric light charges within the period required for the payment of such bills. In all cases where bills are received such bills must be presented to the Collector for receipt when payment is made.

LABOR FORCE AND QUARTERS IN MARCH.

The force report of March 24, 1915, shows the actual working force of The Panama Canal on that date to have been 20,144; of the Panama railroad, 3,270; and of contractors, 360, a total effective working force of 23,774. This is an increase of 329 from the force on February 24, which was 23,445, but is 1,079 less than the force employed on January 20, which was 24,853.

The gold force on the Isthmus, composed almost exclusively of white Americans, was 3,425, a decrease of 69, as compared with the preceding month. The gold force for February was divided as follows: The Panama Canal, 3,034; the Panama railroad, 359; contractors, 32, a total of 3,425. Detailed figures of the total force employed on the Isthmus, by departments and divisions, follow:

DEPARTMENT OR DIVISION	SILVER EMPLOYEES*											Total silver.	Total gold	Grand total	
	Monthly.	Artisans.					Laborers.

Taylor, James	50991	Barbados	Colon	Term. Cons.	May 1, 1915

The estates of the abovenamed deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against these estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

If bills are not paid before the close of business on the 25th of each month, a penalty of \$1 will be added to the rent, and 25 per cent penalty added to electric light bill.

Where occupants of Panama Canal quarters are transferred from one house to another having a different rental value, refunds will not be made unless necessary by reason of the employe leaving the service, but credit will be given on the succeeding month's bill.

It is requested that bills be paid as rendered and that any claim for adjustment of overcharge be made in a letter addressed to the Auditor. If overcharge has been made adjustment will be made on the succeeding month's bill.

Payment of both gold and silver rental may be made on the pay car from Corozal to Gatun, inclusive, except that payment of gold rental will not be received on the pay car unless accompanied by the bill rendered. A deputy collector will be at the Mechanical Division shops at Balboa at 4 p. m. on May 10 and at 11 a. m. on the 11th to receive payment of rent.

H. A. A. SMITH,
Auditor, The Panama Canal.

BALBOA HEIGHTS, C. Z., April 28, 1915.

New Taboga Launch Schedule.

The Hotel Aspinwall launch service has been revised according to the following schedule:

Leave Balboa dredge landing—Daily, except Thursday at 5.30 p. m.;
Monday, Thursday, Saturday, and Sunday, 9.40 a. m.

Leave Taboga—Daily, except Friday at 7 a. m. (On Mondays, and days following holidays, one hour earlier);
Monday, Thursday, and Saturday at 1.30 p. m.;

Sunday at 7.15 p. m.

The 9.40 a. m. trips from Balboa await the arrival of Panama railroad trains. Trunks delivered to dredge landing will be carried on these trips.

Attention is called especially to the omission of the evening trip to Taboga on Thursday, and to the fact that on many days there are two trips each way.

Handling of Baggage for Taboga.

Persons going to Taboga who desire to have their baggage delivered at the Hotel Aspinwall on the day of their arrival by the evening boat should see that it is delivered at the dredge landing at Balboa by two o'clock. Residents of Panama and the Ancon-Balboa district should have their baggage delivered at the Panama railroad station at Panama or Balboa Heights by 1 o'clock in the afternoon, for delivery at the dock by the Balboa shuttle train leaving Panama at 1.40 p. m. Persons living along the line of the Panama railroad should check baggage in time for connection with this train. Baggage may be forwarded from main line stations on trains leaving Colon at either 7.10 or 11.05 a. m. From the Las Cascadas branch line, baggage should be forwarded not later than on the train leaving Las Cascadas at 10.40 a. m.

Patrons of the Hotel Aspinwall may have their baggage checked to "Taboga" from station of origin. It will then be handled through to the hotel without the necessity of further attention on the part of the passenger.

THE HOOKWORM CAMPAIGN.

Seven Months of Field Work in Panama Show Prevalence of Disease.

The International Health Commission, invited last year by the Republic of Panama to undertake a campaign against uncinariasis or hookworm disease (familiarily known as tropical anemia), completed seven months of active work on April 1, 1915. Analysis of the results of the work in this period shows a great amount of the disease existing in the interior of the Republic, and the damage it is doing to the people in general.

Dr. L. W. Hackett, director of the Department of Uncinariasis of the health department of the Republic of Panama, has prepared for THE CANAL RECORD the following summary of the work:

"Of 9,810 people examined, 5,875 or 60 per cent were infected. The incidence of the disease in the several districts varies indirectly with the efficiency of the sanitation, although in the interior the sanitation is at best of the most elementary character. Thus Panama is lowest, with 34 per cent infected of those examined, most of the cases being imported from the interior or residing in Juan Diaz and other extramunicipal localities. Bocas del Toro is next with 35 per cent infected, the island being of coral formation unfavorable to the spread of the hookworm and having at hand the ocean, into which the law requires sewage to be dumped. Taboga and Bastimentos are also islands with a rudimentary system of sewage disposal by individuals into the ocean, and not more than 60 per cent of the inhabitants are infected. Percents in the other districts run much higher, culminating in Arraiján with 85 per cent of the entire population badly infected with hookworms. Children always suffer more than adults and in three districts over 90 per cent of the children under 16 years of age are victims of uncinariasis.

"Of the 5,875 people found harboring the hookworm, 5,215 were treated. The remainder could not be found after examination, or refused the medicine, or were refused treatment for medical reasons. But 2,370 people received two, three, or four treatments each.

"An examination of the blood of persons taken at random in the various localities shows an average for the country of 59 per cent of the normal amount of hemoglobin per individual. In other words, the average person is so anemic as to be 41 per cent below standard. Naturally he can do but 59 per cent as much work as a well person of his age,

although he may walk or sit about and not consider himself sick.

"Eleven thousand people were visited in their homes; lectures were given to 2,268 school children, and public lectures illustrated with stereopticon reached 1,237 people. About 5,000 educative pamphlets were distributed to those who could read.

"The fact that 75 per cent of all children of school age in the interior (and in many towns, over 90 per cent) are infected, means that the growing generation of Panamanians is being stunted to an alarming degree both physically and mentally. If a man can do only 60 per cent of a man's work on 60 per cent blood, so an anemic child will do only 60 per cent as well in school as a normal pupil. The expensive school system of which the people are so proud is being half wasted because of a complete disregard of natural, fundamental hygiene and entire absence of the most elementary sanitary equipment. Every school should have toilet facilities of an efficient and durable kind both to safeguard the lives and health of the children, and to serve as an instructive example to the community, particularly that growing and educable portion of the community upon which the future prosperity and reputation of the country depends."

A summary of the conditions disclosed and the work conducted in the first seven months is given in the accompanying table*.

ORDER.

The Panama Railroad Company has advised the War Department that special steamship rates between New York and the Isthmus will be granted by that company (the rates depending upon the circumstances under which the travel is made) to the following classes of persons:

1. Civilians going to the Canal Zone on orders or returning at their own expense when on leave.
2. Enlisted men stationed in the Canal Zone traveling on orders or on leave.
3. Commissioned officers stationed in the Canal Zone traveling on orders or on leave.
4. Commissioned officers *not* stationed in the Canal Zone desiring to visit the Isthmus on leave for their own pleasure.
5. Families of each of the above four classes.

In order to secure a special rate the following procedure should be adhered to:

The first two classes should make written

application for a special rate, forwarding the same to their official superior or commanding officer for approval, after which the application should be sent direct to the Panama Railroad Company, 24 State Street, New York City; or in lieu thereof present to the Panama Railroad Company such authority covering their return transportation as they may have secured on the Isthmus.

The third class should apply direct to the Panama Railroad Company in New York, sending with the request a copy of their orders directing them to proceed to the Isthmus, or any other official paper covering the same which they may have.

The fourth class should write direct to the Panama Railroad Company, in New York, giving their full name, military rank, branch of service to which assigned, and inclosing a copy of their leave order, if practicable.

The fifth class should follow the same respective procedures as given above for classes one, two, three, and four, the request for transportation coming from the head of the family desiring same, through the channels as above given; such request to be accompanied by a certificate stating that the party or parties for whom transportation is desired is a *permanent* member or members of the family of the four classes above referred to, habitually residing with him and having no other home. In cases where transportation is desired for the families of noncommissioned officers and enlisted men, the certificate should be approved by the immediate commanding officer of the organization to which the noncommissioned officer or enlisted man is attached.

Each request for transportation should contain the following data: Date of sailing from New York; date of sailing from Cristobal where return passage is desired; full names and family relationship of all persons involved; ages of minors; object of the journey; and address where mail and sailing instructions should be sent so as to insure prompt delivery. Requests for reservations should be made as far in advance of the sailing date selected as possible. Full sailing instructions will be sent in reply by the Panama Railroad Company, New York.

When transportation is official at the expense of the War Department, the passage should be prepaid and the passenger will be reimbursed in his expense account.

LINDLEY M. GARRISON,
Secretary of War.

Washington, D. C., February 12, 1915.

LARGE FIRE IN COLON.

One Third of City Wiped Out in Blaze Covering Twenty-two Blocks.

Four hundred and thirty buildings in an area covering 22 blocks, about 19½ acres of buildings, or a third of the city of Colon, were completely destroyed on Friday, April 30, in the most destructive fire which has occurred on the Isthmus since the American occupation. The value of the property destroyed is estimated at approximately \$3,000,000, United States currency. Of this, about \$2,150,000 represents the loss in buildings and \$850,000 the loss in contents of buildings.

Five people were killed, eight injured so seriously as to be confined to Colon Hospital, and about 20 injured to the extent of requiring dispensary treatment. About 7,500 people were rendered homeless, losing at the same time nearly all of their personal property, though the buildings themselves belong in most cases to absentee landlords. As compared with the Colon fire of March 23, 1911, the latter caused the destruction of 10 blocks of buildings and the death of two people.

The fire broke out at about 2.50 p. m. in a fruit store in what was known as the "Wagner building," at the northwest corner of Eighth and Bolivar Streets, two blocks directly east, along Eighth Street, from the main entrance to the Panama railroad passenger station. An alarm was turned in at 3.10 p. m., apparently about 20 minutes after the fire started, and although the Colon and Cristobal fire departments responded promptly the entire building was in flames at the time the engines reached the scene. The fire made rapid progress through the inflammable construction all around and forced its way to the south and west under a stiff breeze. It extended west to Front street and east to "D" Street, on the one axis, and south to Seventh Street and North to Fourteenth Street on the other.

The fire departments from Panama City, Balboa, and Gatun went to the assistance of the Colon and Cristobal departments on special trains, and the Canal tugs *Porto Bello* and *Tavernilla*, which are equipped for service

as fire boats, pumped water through lines of hose led across the piers and into the fire area. Members of the police departments of Panama and the Canal Zone, soldiers of the Coast Artillery Corps stationed near the Atlantic entrance to the Canal, and numerous civilians joined with the firemen in fighting the fire and moving goods from threatened buildings. Canal employes organized a gang to dynamite buildings. Twelve buildings were destroyed by dynamite, and their reduction was of considerable help in checking the course of the fire. The fire was brought under control at about 9 p. m.

Of the 215 city lots included in the burned area, 132 belonged to the Panama Railroad Company, being leased to individuals for the erection of buildings. Other loss to the United States was in damage to the Panama railroad passenger station, to the concrete apartment house at the corner of Front and Eleventh Streets, and to the Masonic building on the south side of Eleventh Street, in rear of the Cristobal commissary; aggregating about \$10,000; and damage and loss of goods moved from the Cristobal commissary, about \$12,000. The concrete apartment house served as a fire wall in preventing the passage of the fire to Cristobal. As it was, the commissary was scorched at the northeast corner and vigilant work was necessary to keep it from burning. Sparks falling in Cristobal caused numerous small fires, quickly extinguished by watchful householders.

A patrol of the city was established during the course of the fire by companies of the Coast Artillery Corps, cooperating with the local police, for the prevention of looting and the general establishment of order. The Canal Zone chapter of the American National Red Cross began relief work on Saturday. The sum of \$3,000 from the local treasury was placed at the immediate disposal of a local committee, operating from Cristobal, and subscription lists are circulating in the Canal Zone. With the assistance of The Panama Canal and the Army, most of the homeless have been housed in some 400 tents, and 400 railroad cars, and distribution of rations has been established.

Wind Movements at Colon During Fire.

The fire at Colon on April 30 afforded interesting records of the way a large fire generates a local wind, tending to strengthen the force of the flames. The hydrographic station at Colon is situated on the old Panama railroad office building, several hundred yards from the fire, and the Section of Hydrography and Meteorology states that the peculiar variation of the wind in the afternoon of April 30, during the progress of the fire, was due in large part to the fire. The heated air, rising, set up local currents recorded as wind. The rates and directions of movement in the period from noon to midnight were as follows:

Hour.	Miles per hour.
12 to 1	7 NW.
1 to 2	7 NW.
2 to 3	9 NW.
3 to 4	10 N.
4 to 5	15 N.
5 to 6	15 N.
6 to 7	13 N.
7 to 8	12 N.
8 to 9	12 N.
9 to 10	9 NE.
10 to 11	5 NE.
11 to 12	3 NE.

The maximum rate was 17 miles, from the north, at 4.40 p. m. The fire was in progress from about 3 to 9 p. m., and burning strongest between 4 and 6 p. m. The change of direction of the wind is also regarded as showing the influence of the fire.

Benefit Entertainments.

A benefit ball for the relief of the fire sufferers in Colon will be held at the Casino, in Panama City, on Sunday, May 9, under the auspices of the Century, Tivoli, Union, and University Clubs.

Benefit performances have been arranged by the managers of several theatres in Colon and Panama.

The gate receipts at the four ball games to be played on Sunday, May 9, by the teams of the Canal league will be turned over to the Red Cross.

The Cristobal Council, Knights of Columbus, has donated \$100 to the relief fund.

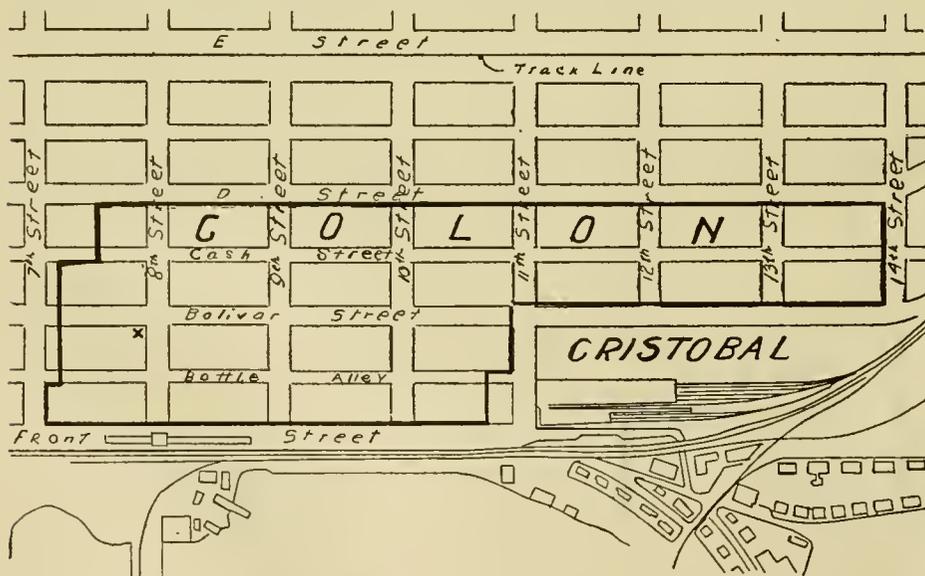

Red Cross Finances.

The financial statement of the Canal Zone Chapter, American National Red Cross, from January 1 to March 31, 1915, is as follows:

RECEIPTS.	
Jan. 1	Balance on hand January 1, 1915. . . \$3,459.86
	Sale Red Cross Seals. 220.81
	Proceeds of ball (additional). 180.00
	Donations. 10.00
	Refund of printing bill. 16.94
	Membership dues. 5.00
	Interest on deposit: Jan., 5.79.
	Feb., 5.66.
	Mar., 6.48. 17.93
	Total receipts. \$3,910.54
DISBURSEMENTS.	
Jan. 4	Relief of Spanish woman and children. \$20.00

OFFICIAL CIRCULARS.

Acting Governor.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 30, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Effective May 1 and during my absence from the Isthmus, Lieut.-Col. Chester Harding will act as Governor of The Panama Canal.

GEO. W. GOETHALS,
Governor.

Witnesses before the Joint Land Commission.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 21, 1915.

CIRCULAR No. 699:

1. Persons who are not employes of The Panama Canal or Panama Railroad Company, or who are not otherwise paid by the United States, when called as witnesses to testify for the United States before the Joint Land Commission will be allowed a witness fee of \$1.50 for each day's attendance, and in addition will be reimbursed for actual necessary expenses incurred in going to, attendance upon, and return from the sessions of the Commission.

2. Payment will be made by voucher, upon which the expenses for which reimbursement is claimed must be itemized in detail.

3. The attorney for the United States will certify to the place from which the witness was called and as to his attendance upon the sessions of the Commission.

GEO. W. GOETHALS,
Governor.

Division of Municipal Engineering—Building Division.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 24, 1915.

CIRCULAR No. 600-26:

The following changes in organization will take effect May 10, 1915:

1. The construction of all buildings and like structures now being performed by the Division of Municipal Engineering, will be transferred to the Building Division.

2. Mr. Geo. M. Wells will be relieved from duty as head of the Division of Municipal Engineering and assigned to duty as Resident Engineer in charge of the Building Division, vice Capt. R. E. Wood, U. S. A., resigned.

3. Mr. D. E. Wright will assume charge of the Division of Municipal Engineering as Municipal Engineer, reporting to the Engineer of Maintenance, vice Mr. Geo. M. Wells, relieved.

GEO. W. GOETHALS,
Governor.

Silver Roll Employments and Changes.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 27, 1915.

CIRCULAR No. 666-5:

1. Effective May 1, 1915, all employments, changes in ratings, transfers, and terminations of American citizens, or aliens who receive more than \$75 a month or 40 cents an hour, on the silver roll, should be reported in the same manner and on the same forms as is being done in all cases of persons employed on the gold roll, excepting that no medical certificate is required in connection with a person employed on the silver roll.

2. As the above classes of employes are entitled to leave privileges, it is necessary that this information be furnished in all cases as promptly as possible in order that the proper entries may be made on the records.

GEO. W. GOETHALS,
Governor.

Salaries Determined.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 28, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

The salaries of all positions will be determined by the book of estimates for 1916, and no increases in pay will be authorized beyond the salaries indicated therein. Where increases in salary have been authorized subsequent to the submission and approval of the 1916 estimates, such increases will cease on June 30, 1915.

GEO. W. GOETHALS,
Governor.

Temporary Employment.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 23, 1915.

CIRCULAR No. 603-9:

Temporary employment may be made to fill positions

of employes on leave without pay for 15 days or more.

GEO. W. GOETHALS,

Governor.

Acting Marine Superintendent.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., May 1, 1915.

To all concerned—Effective this date, during the temporary absence of Capt. Hugh Rodman in the United States, Com. H. V. Butler will act as Marine Superintendent.

CHESTER HAROING,
Acting Governor.

Legal Notice.

United States of America } In the District Court
Canal Zone. } Division of Balboa.

Estate of José Alvarez, deceased; Petition for Escheat.

Notice is hereby given that at 9 o'clock a. m., of the 15th day of May, 1915, in the court house at Ancon, there will be an inquisition into the estate of José Alvarez, who died intestate about the 24th day of October, 1910, possessed of improvements on lands located near Tabernilla, C. Z., for which improvements the Joint Land Commission, in 1913, made an award of \$175 and ordered that the same be paid in the Court of the Canal Zone, pursuant to a petition filed by John K. Baxter, Administrator of Estates, praying that the said sum be escheated in accordance with Sections 779, 780, and 781 of the Code of Civil Procedure of the Canal Zone, at which time and place all persons claiming the said estate, or any interest therein, may appear and be heard before the Court.

E. M. GOOLSBY,
Clerk.

Act of Congress.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., March 22, 1915.

CIRCULAR No. 600-17:

RECOGNITION OF SERVICES OF CERTAIN CANAL OFFICIALS.
The Act of Congress quoted below is published for the information of all concerned

GEO. W. GOETHALS,
Governor.

AN ACT to provide for recognizing the services of certain officers of the Army, Navy, and Public Health Service for their services in connection with construction of the Panama Canal, to extend to certain of such officers the thanks of Congress, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the thanks of Congress are hereby extended to the following officers of the Army and Navy of the United States, who, as members of the late Isthmian Canal Commission, have rendered distinguished service in constructing the Panama Canal, to wit: Col. George W. Goethals, chairman and chief engineer; Brig. Gen. William C. Gorgas, sanitary expert; Col. H. F. Hodges,

Lieut. Col. William L. Sibert, and Com. H. H. Rousseau.

Sec. 2. That the President is hereby authorized, by and with the advice and consent of the Senate, to advance in rank Col. George W. Goethals to the grade of major general of the line, United States Army; Brig. Gen. William C. Gorgas to the rank of major general in the Medical Department, United States Army; Col. H. F. Hodges and Lieut. Col. William L. Sibert to the grade of brigadier general of the line, United States Army; and Com. H. H. Rousseau to the grade of rear admiral of the lower Nine, United States Navy.

Sec. 3. That such officers of the Army and Navy as were detailed for duty with the Isthmian Canal Commission on the Isthmus of Panama for more than three years, and who shall not have been advanced in rank by any other provisions of this bill, shall be advanced one grade in rank upon retirement: *Provided*, That any officer of the Army or Navy now on the retired list with similar service shall be immediately advanced one grade in rank on the retired list of the Army or Navy.

Sec. 4. That the President is further authorized, by and with the advice and consent of the Senate, to appoint such officers of the Public Health Service as were detailed for duty with the Isthmian Canal Commission on the Isthmus of Panama for more than three years to the grade next above that at present held by such officers.

Sec. 5. That the numbers in such grades provided for in sections two and four of this Act, except where vacancies occurring in any grade by the provisions of this Act can be filled by such officers in a lower grade as are entitled to the benefits of this Act, shall be temporarily increased during the time such offices may be held: *Provided*, That the officer who may be advanced and appointed major general in the Medical Department, United States Army, shall thereupon become the head of such department, and the operation of so much of section 26 of the Act of February 2, 1901, as limits the term of office of the head of the Medical Department, United States Army, shall be suspended during the incumbency of the head of the department who may be appointed under this Act: *Provided*, That whenever the head of the Medical Department appointed under the provisions of this Act shall become separated from the active list of the Army, by retirement or otherwise, the extra office or grade to which he shall have been so advanced or appointed shall cease and determine, and thereafter the rank of the head of the Medical Department, United States Army, shall be that of a brigadier general: *Provided further*, That nothing in this Act shall operate to interfere with or retard the promotion to which any officer would be entitled under existing law: *And provided further*, That the officers advanced to higher grades under this Act shall be junior to the officers who now rank them under existing law when these officers have reached the same grade.

Sec. 6. That at any time after the passage of this Act any officer of the Army or Navy to be benefited by the provisions of this Act may, on his own application, be retired by the President at 75 per centum of the pay of the rank upon which he is retired.

Approved, March 4, 1915.

Supplement to Coach Tariff—Fort Amador, Ancon, Panama, and Balboa.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 21, 1915.

Pursuant to the authority in me vested by law, the tariff of rates for the transportation of passengers for hire by means of cabs, coaches, or other horse-driven vehicles, established by order of the Head of the Department of Civil Administration, under date of April 20, 1911, is hereby supplemented by the addition thereto of the following rates:

Between	Any point in	Rates (Panaman Silver.)				
		Number of persons				
		One	Two	Three	Four	
Balboa Heights*	City of Panama	One way...	.50	.90	1.30	1.70
		Round trip	.90	1.60	2.30	3.00
Balboa Heights*	Ancon	One way...	.40	.70	1.00	1.30
		Round trip	.70	1.20	1.80	2.40
Balboa Heights	Balboa	One way...	.20	.40	.60	.80
		Round trip	.40	.75	1.00	1.20
Balboa Heights	Fort Amador	One way...	.50	.80	1.10	1.40
		Round trip	.80	1.50	1.80	2.00
City of Panama	Fort Amador	One way...	1.00	1.60	2.00	2.50
		Round trip	1.60	2.00	2.50	3.20
Ancon	Fort Amador	One way...	1.00	1.60	2.00	2.50
		Round trip	1.60	2.00	2.50	3.20
Zone line at Chorrillo	Fort Amador	One way...	.80	1.20	1.60	2.40
		Round trip	1.40	1.80	2.20	3.00
Balboa	Fort Amador	One way...	.40	.80	1.00	1.20
		Round trip	.80	1.20	1.40	1.60
Balboa	Ancon via lower Balboa Heights road	One way...	.60	1.00	1.50	1.80
		Round trip	1.00	1.40	2.00	2.40

*Between Balboa Heights and Panama, and Balboa Heights and Ancon, via Ancon Hospital road, or to points on the two high levels of Balboa Heights, add 20 cents silver for one passenger and 30 cents silver for two or more passengers.

GEO. W. GOETHALS,
Governor.

JOINT LAND COMMISSION.

Notice of Award.

In the matter of the claim of Gumerinda Villareal, award No. 78, docket No. 454, April 19, 1915—An award is hereby made against the United States, in favor of the person hereinafter named, in the sum of \$300, United States currency.

This award shall be paid to the claimant hereinafter named, in the amount specified, on or before the 19th day of May, 1915, and if payment or tender of payment of this award is not made on or before that date, such award shall thereafter bear interest at the rate of six per centum per annum until paid.

Gumerinda Villareal, docket No. 454—For all rights, claims, and other interests which the said Villareal may possess or may have possessed in growing crops, fruit trees, and other improvements at nor near La Ceiba, the sum of \$300, United States currency.

JORGE BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

In the matter of the claim of Joaquin Garcia Soto, for the property known as Tortola Island, award No. 80, docket No. 104, April 26, 1915—An award is hereby made against the United States, in favor of the heirs of Joaquin Garcia Soto, in the sum of \$1,500, United States currency.

This award shall be paid to the heirs of Joaquin Garcia Soto, in the amount specified, on or before the 26th day of May, 1915, and if payment or tender of payment of this award is not made on or before that date, such award shall thereafter bear interest at the rate of six per centum per annum until paid.

For all rights, claims, and other interests which the said Joaquin Garcia Soto and his heirs may possess or may have possessed in and to the island of Tortola, located at the Pacific entrance of the Panama Canal, between the islands of Naos and Taboga and within the limits of the Canal Zone, together with all rights, claims, and other interests which the said Joaquin Garcia Soto and his heirs may possess or may have possessed in and to any growing crops, fruit trees, and other improvements located on said island of Tortola, the sum of \$1,500.

JORGE BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

In the matter of the claim of Francisco Martinez Herrera and Luis Alcina Quisal for property located near Corozal, award No. 81, docket No. 499, April 19, 1915—

An award is hereby made against the United States, in favor of the persons hereinafter named, in the sum of \$600, United States currency.

This award shall be paid to the persons hereinafter named, in the amount specified, on or before the 19th day of May, 1915, and if payment or tender of payment of this award is not made on or before that date, such award shall thereafter bear interest at the rate of six per centum per annum until paid.

Francisco Martinez Herrera and Luis Alcina y Quisal, docket No. 399—For all rights, claims, and other interests which the said Francisco Herrera Martinez and Luis Alcina y Quisal may possess or may have possessed in and to house tax No. 3151, and crops, fruit trees, and any other improvements near Corozal, Canal Zone, the sum of \$600.

JORGE BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule of Dismissal.

In the matter of sundry claims, rule of dismissal No. 178, docket numbers as shown, April 19, 1915—With reference to the following claims, the evidence before the Commission is that settlement therefor has been made by the United States:

Claimant.	D'kt. No.	Tox No.	Payment.
Martin Barsallo.....	477 & 478	9-30-14
Francisco Cañizales...	527	C-154	3-39-15
Peter Modis (Moore)...	407	10-09

In view of the above settlements, no further action is necessary by the Commission, and the foregoing claims are therefore dismissed.

JORGE E. BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

In the matter of the claim of Emanuel Affection, rule of dismissal No. 180, docket No. 624, April 23, 1915—The claim of Emanuel Affection, docket number above shown, came on for hearing before the Commission on April 20, 1915. There was no appearance on the part of the claimant, but the evidence submitted to the Commission at this hearing showed that the claimant Emanuel Affection is not the true and lawful owner of the property in question and has no interest therein; and his claim for damages said to have been caused thereto is hereby dismissed.

JORGE BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

COMMISSARY DEPARTMENT.

Reduced Prices of Groceries

A general reduction of prices of general groceries becomes effective on Thursday, May 6. The new prices are set forth in the list published as a supplement to this issue of THE CANAL RECORD.

Balboa Store Moving on Monday.

The Balboa commissary will be closed all day on Monday, May 10, and will be re-opened for business in the new concrete building on Tuesday morning, May 11.

Commissary Hours.

The commissary stores at Las Cascadas, Empire, and Culebra are open from 7.30 to 11.30 a. m., and 1.30 to 5.30 p. m.

The commissary store at Balboa is open from 8 a. m. to 12.30 p. m., and 2.30 to 6 p. m.

All other commissary stores are open from 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m. on Saturdays and other sailing days of Panama railroad vessels.

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3.47 p. m.

The cable address of The Panama Canal, on the Isthmus, is "Pan canal, Balboa Heights;" in the United States, "Pan canal, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa

Heights, Canal Zone," for delivery on the Isthmus and "The Panama Canal, Washington, D. C." for delivery in the United States.

Misdirected Letters.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts and may be procured upon request of the addressee:

Mall Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans for all States Due at New Orleans on the following Tuesday.

Every Saturday to New York for all States. Due at New York the following Friday, with the exception of the Advance, which is due there on Saturday.

Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday*.

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*NOTE.—The sailings on Monday, May 31, will not land mail in New York until Tuesday o the following week; hence, despatches on those dates will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Colum-

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly free of charge, one copy each, to all employes of The Panama Canal and Panama Railroad Company whose names are on the gold roll. To others, the subscription rate will be \$1, United States currency, per annum, in the United States and its possessions; Canada, Cuba, Mexico, and the Republic of Panama, and \$1.50 United States currency, per annum, in all other countries.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

The "Cristobal" to Return to Passenger Service.

The steamship *Cristobal* of the Panama Railroad Steamship Line, which has been making tramp runs between New York and the Isthmus in freight service since retirement from passenger service in August, 1914, is to be returned to passenger service, as set forth in the circular notice from the Acting Governor of The Panama Canal, published on page 339. The congestion in passenger traffic which necessitates the use of the *Cristobal* for its relief is regarded as temporary and due to the fact that numbers of employes are taking their leaves, prior to the expiration of the leave period.

Both Piledrivers Recovered from Limon Bay.

Piledriver No. 103, one of the two lost off of the trestle of the East Breakwater during the norther of February 9, was recovered on Wednesday, May 5, by forces of the Dredging Division and is now undergoing repairs, preparatory to its return to service in the construction of the breakwater trestle. The men started work at five o'clock in the morning and by 5 p. m. had landed the piledriver at Dock 14. It was lifted by means of the floating crane *Hercules* and, on account of the choppy sea running at the time, towed to the dock under water, which prevented the possibility of its damaging the hull of the *Hercules*, as might have happened if it had been attempted to raise the piledriver out of water and swing it aboard the crane or on a barge. The piledriver was found to have been damaged only slightly and it was hauled on its own trucks from Dock 14 to Coco Solo, where it is being repaired. The steam hammer had fallen away from the leads and was not recovered but it will be located by the diver and raised.

The other driver, No. 104, was raised two feet on Friday, May 7, but the slings gave way and a second effort was necessary. This was made on Tuesday, May 11, when the piledriver was recovered and brought to Dock 14. Since falling from the trestle it had been three-fourths buried in the coral sand fill through which the trestle was being driven, and submerged 40 feet below the surface of

the water. Its recovery was at first not thought practicable, but was effected by the skillful and persistent work of the men in charge of the superintendent of dredging. No. 104 was damaged worse than No. 103, but may be fitted for service at considerably less expense than the purchase of a new piledriver would involve.

Distances to Seattle by the Canal.

Inquiry has been received as to why the port of Seattle was omitted from the ports listed in an article showing some of the reductions in distances effected by The Panama Canal, published in THE CANAL RECORD of April 7, 1915.

In the preparation of the tables of distances, the distances saved at sea were the primary consideration, and accordingly the several important ports on Puget Sound were represented, as a group, by Port Townsend because it is nearest the sea. Vessels bound for Seattle or Tacoma pass Port Townsend; reductions of distances to Port Townsend are equivalent to reductions of distances to the ports farther inland on Puget Sound.

Seattle is 38 miles inland from Port Townsend. By the Canal, Seattle is 6,070 nautical miles from New York, which is 7,873 miles less than by the Straits of Magellan, 13,943 miles. The new course is slightly over two-fifths of the former. From Seattle to New Orleans is now 5,491 miles, three-eighths of the old route. From Seattle to Liverpool by way of Magellan is a distance of 14,310 nautical miles; this is reduced by the use of the Canal to 8,644 miles. The foregoing are representative distances and of the greatest importance in the relation of the Canal to Seattle, as practically all of the ships from that port which have passed through the Canal have been bound for Atlantic ports of the United States, in the coastwise trade, or for Europe. It is stated by the Seattle Chamber of Commerce that three-fourths of the salmon pack for 1914, one of the important items of export from Seattle, has been despatched to Atlantic ports through the Canal.

New Records in Mixing and Placing Concrete.

Further records for the mixing and placing of concrete with half-yard mixers were made by the forces of the Division of Terminal Construction on the south wall of dry dock No. 1 at Balboa on April 19.

The regular mixer battery on the south wall consists of four half-yard mixers, working in units of two. One of the mixers in one of the units was closed down and the two crews of the unit fed the other mixer. During the 8-hour day, the double-crew mixer mixed approximately 321.94 cubic yards of concrete, as calculated on this basis: The total place measurement of the output of the three mixers was 655 cubic yards, mixed in 1,005 batches. Each batch averaged, accordingly, .6517 cubic yards. Of the 1,005 batches, the

double-crew mixer mixed 494, which, on the basis of the average for all batches, may be taken to mean 321.94 cubic yards.

The time charged to this mixer was as follows:

	Hours.	Cost.
1 foreman.....	4	\$2.71
1 subforeman.....	8	2.00
1 mixer runner.....	8	1.04
1 mixer helper.....	8	1.04
1 lever man.....	8	1.04
1 man cleaning runway.....	8	1.04
2 men carrying cement to hoppers.....	*8	2.08
2 men wheeling cement.....	*8	2.08
2 men in cement car.....	*8	2.08
18 men handling wheelbarrows.....	*8	18.72
1 helper on wheelbarrows.....	8	1.04
Total labor cost.....		\$34.87

*8 hours for each man.

During the 8-hour period 30 minutes were lost while the chutes for the mixed concrete were being washed, and one hour and 15 minutes were lost in waiting for forms. The actual working time was, accordingly, six hours and 15 minutes. The half-yard mixer, therefore, made a record of mixing 321.94 cubic yards of concrete in six hours and 15 minutes, at a cost of \$34.87, or \$.108 per cubic yard.

The yardage of gravel used is about the same as the yardage of concrete mixed. The 18 men trundling the wheelbarrows handled, therefore, in the six hours and 15 minutes about 321 cubic yards of gravel, an average of 17.8 yards per man. This is equivalent to 2.85 cubic yards, or about 76.9 cubic feet per hour. As the gravel as handled at the dry dock weighs about 115 pounds to the cubic foot, each man was handling about 8,840 pounds, or 4.44 tons, per hour of working time, which is an average of over 147 pounds per minute.

Starting New Coastwise Passenger Service.

The steamship *Finland* of the Panama Pacific Line arrived at Cristobal on Friday, May 7, and made the transit of the Canal the same day, on her way from New York to San Francisco on the first voyage of a proposed regular coastwise passenger and freight service in which the *Finland* is to be engaged with her sister ship, the *Kroonland*, with sailings each way about every three weeks. The eastbound service will be started with the return of the *Finland*, scheduled to sail from San Francisco on May 26.

On this voyage the *Finland* carried a total of 431 passengers, consisting of four local and 427 through passengers, the latter made up of 342 cabin, and 85 intermediate passengers. Her crew numbers 284. The cargo amounted to about 5,000 tons and included a great variety, among the larger items of which were table sauce, beans, milk, beer, nuts, grape juice, animal food, machinery, horse shoes, wire goods, wired glass, petroleum tar oil, tin plates, soap, tobacco, whiskey, dry goods, drugs, floor tiles, and barbed wire, and a shipment of United States mail, discharged at Cristobal for the Canal Zone.

Quarantine Activities in April.

Emigration from the Isthmus to foreign ports during the month of April exceeded immigration by 1,770 persons. This brings the net emigration since July 1, 1913, to 25,889; during the 22 months, there has been only one month, March, 1915, in which immigration exceeded emigration.

A summary of the movements of people through the ports and of the activities of the quarantine officers at the ports of Balboa-Panama and Cristobal-Colon during the month of April, is given in this consolidated report:

Number of vessels inspected and passed	172	
Number of vessels held in quarantine	13	
Total		185
Number of vessels fumigated on arrival	9	
Number of vessels fumigated on departure	2	
Total		11
Number of crew examined	11,032	
Number of passengers examined (including 133 U. S. troops)	3,605	
Total		14,637
Number of persons vaccinated at ports of arrival because of compulsory vaccination law	481	
Number of persons vaccinated at ports of departure or enroute because of compulsory vaccination law	657	
Total		1,138
Number of persons held in quarantine at the detention houses to complete period of incubation of yellow fever and plague	360	
Number of persons held in quarantine on board vessels to complete period of incubation of yellow fever and plague	1,448	
Total		1,808
Number of persons landed from foreign ports:		
Cabin	1,575	
Steerage	981	
Total		2,556
Number of persons embarked for foreign ports:		
Cabin	2,886	
Steerage	1,440	
Total		4,326
Number of persons arrived from coast towns on small launches and sailing craft	2,799	
Number of persons sailing for coast towns on small launches and sailing craft	1,726	
Apparent increase for month from coast towns	1,073	
Apparent decrease for month from foreign ports:		
Cabin (decrease)	1,311	
Steerage (decrease)	459	
Total		1,770
Number of immigrants recommended for deportation	11	
Number of bills of health issued or viséed	193	
Total number of persons landed	5,355	
Less number for Pacific ports	214	5,141
Total number of persons sailing		6,052
Total apparent decrease for month		911

Cargo of Creosote.

The steamship *H. C. Henry*, passing through the Canal on April 20, carried a cargo of 5,000 tons of creosote, shipped at London and Middlesboro for discharge at lumber yards at Seattle and along the Columbia River. This is the first whole cargo of this preservative to have passed through the Canal.

The "Ulysses" Sails for Norfolk.

The new Canal collier *Ulysses* completed on Sunday, May 9, the discharge of the cargo of coal brought to the Isthmus on her maiden voyage, and sailed the same day for Norfolk. The *Ulysses* is being operated by the Panama Railroad Steamship Line.

RECEIPTS AND EXPENSES.

Toll Earnings in March Exceed Cost of Operation and Maintenance, Reducing Deficit.

Earnings of tolls during the month of March were greater than the cost of operation and maintenance of the Canal by \$137,509.65.

This gain reduced the deficit in the account, running from the beginning of the fiscal year, on July 1, 1914, to \$123,588.45. The total cost of operation and maintenance during the 9-month period of the fiscal year which has elapsed has been \$3,018,888.65. The loss of \$123,588.45 represents a loss of 4.09 per cent on the total outlay, not counting anything for interest on the investment or depreciation of the plant.

The basis of the distribution of costs in determining what should be charged to operation and maintenance was explained in THE CANAL RECORD of April 14, 1915, prefacing a

report on the account to March 1. It was stated there that the charges for operation and maintenance include all the diversified expenditures necessary for keeping the Canal open and in order, and the work of handling vessels through; with the addition to such expenditures of a prorated part (approximately 35 per cent) of the overhead expenses of The Panama Canal organization.

The deficit, amounting to \$123,588.45 on April 1, was further reduced during the month of April. The exact figures on the cost of operation and maintenance during the month of April are not available yet, but it is known that the collections of tolls were in excess of the expenses.

Detailed summary of the various items of expenditure included under operation and maintenance for March and February, and the aggregate for the nine months ending April 1, is given in the following table:

ITEMS.	Month of March, 1915	Month of February, 1915	Total since July 1, 1914
Civil Government, proportion	\$19,944.39	\$20,164.53	\$172,309.69
Health Department, proportion	20,243.87	19,128.60	183,481.36
Administration, proportion	83,397.24	81,146.00	657,968.06
Operation and maintenance:			
Admeasurement of vessels	1,008.16	957.16	7,616.07
Local inspection	373.49	380.66	2,840.85
Aids to navigation	4,777.69	4,856.27	35,915.38
Pilotage	6,752.18	7,075.80	42,000.28

Excess of tolls earned over expenses	\$137,509.64		
Expenses in excess of tolls earned		\$24,096.30	\$123,588.45

FIRE ON "PENNSYLVANIAN."

Blaze Started from Broken Oil Pipe—Extinguished After 50 Hours' Fighting.

Within less than two hours of clearing the Canal, enroute from New York to San Francisco, in the evening of Tuesday, May 4, the *Pennsylvanian* of the American-Hawaiian Line caught fire and was compelled to return to Balboa. The fire burned for about 70 hours but was finally extinguished with only superficial damage to the ship.

The fire broke out at 8.20 p. m., starting from a broken union in a fuel oil pipe leading to the boilers. The oil fell to the floor from the break and was ignited from the burners under the boilers. Efforts were made by the crew to extinguish the blaze by means of patent extinguishers and sand but it was necessary to start the fire pump before the blaze could be put out. In the meantime the excessive heat against the forward fire room bulkhead had ignited cargo resting against the bulkhead on the 'tween deck of the No. 3 hold. It was from this point that the fire spread.

After the fire in the fire room had been put out the smoke of burning wood gave notice of the cargo afire in the No. 3 hold. The hatches were taken off but in the dense smoke it was impossible to locate the extent of the blaze and it was decided to try to smother the fire with steam. The hatches were sealed and steam was turned into the hold from the vents. This required more steam, however, than was immediately available and as the heating of the deck plates continued, the *Pennsylvanian* started back to Balboa at 10.25 p. m. The steam pressure had been

Panama Canal, the fire was put out in the afternoon of Friday, May 7. Over 40 men had been overcome from time to time, and physicians of The Panama Canal were at hand continuously to care for them. There were no fatalities.

At one time it seemed advisable to scuttle the vessel, principally on account of danger of interior explosions. She would have been taken to Culebra Island and sunk, to be pumped out and raised, after the fire was extinguished. While this procedure was under advisement by the master of the vessel and the local representative of the American-Hawaiian Steamship Company and the agent of Lloyd's, the fire department succeeded in extinguishing the fire. The water pumped in had caused the ship to list nine degrees to the port side, but when this was pumped out the vessel righted herself.

The damage to the ship is regarded as superficial, principally in paint scaled off by the heat, some buckling of plates, and in the holes cut in the plates, which can be repaired very easily. The damage to the cargo has yet to be determined by average adjusters.

As will be seen from the accompanying cargo sketch of the *Pennsylvanian*, the damage to the cargo was principally forward of the engine room, in No. 3 and No. 2 holds. However, the steam used in the smothering attempts in the forward holds passed aft through inside alleyways as far as the No. 4 bulkhead, and did considerable damage to the cargo in the No. 4 hold on the shelter deck. Cargo below the shelter deck of No. 4 hold was not damaged, and the No. 4 bulkhead protected the cargo in No. 5 and No. 6 holds, which was not damaged. The practically

The master of the *Pennsylvanian* expressed himself as feeling that he had come out luckily from a situation which at first seemed most serious. He had only words of praise for the way in which he had been assisted by the Canal force, and said that in no way could his vessel have received better treatment. At the same time he stated that the officers and crew of the ship acted admirably throughout. The original blaze in the fire room was very strong, and the proximity of the deep fuel oil tank made coping with it a matter of considerable danger.

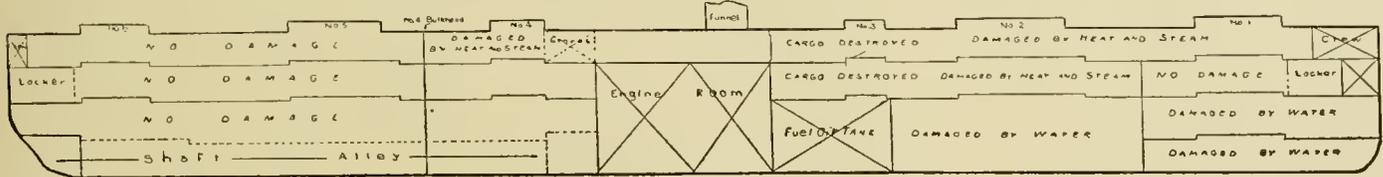

Cargo on the "Pennsylvanian."

The total cargo on the *Pennsylvanian* was 6,800 tons of general merchandise, of remarkable variety. Among the debris unloaded on the wharf were glassware, plumbing material, chairs, rope, disinfectant, sewing machines, soap, rubber shoes, toys, kitchen utensils, fruit jar rings, tools, underwear, beans, rifles, patent medicines, salad dressing, paint, stationery, flour, electrical material, and many other things.

Records of the "Pennsylvanian."

The *Pennsylvanian* of the American-Hawaiian Line is a fast ocean freight vessel, 408 feet long by 54 feet in the beam, of 6,649 gross and 4,054 net tons, United States registry, built at Sparrows Point, Maryland, in 1913, and equipped with refrigerating apparatus. She was among the first vessels to make the transit of the Canal, having entered on August 15, 1914, the day of the opening to commercial traffic, and has been through the Canal seven times.

Up to the time of the trip of the *Great*

CARGO SKETCH OF *Pennsylvanian* SHOWING DISTRIBUTION OF DAMAGE.

so lowered by the use of steam against the fire that movement was slow and it was not until 2.25 a. m., Wednesday, that the vessel cast anchor in the outer harbor.

Word of the fire had been sent to the Canal authorities by radio, requesting extra men to break out the cargo. These were sent but investigation showed they could not extinguish the fire, and the *Pennsylvanian* was brought into the inner harbor and moored alongside the quay wall, about opposite the Port Captain's office, at 5.30 p. m. Forces of the Canal Zone Fire Department were waiting on the wharf and immediately took charge.

The firemen fought the fire with hose and water until about midnight, when it was decided to try smothering again. At 7 a. m., Thursday, the hatches were removed and it was found that the steam had not extinguished the fire, so the use of hose was resumed. On account of the heat, smoke, and fumes it was difficult to locate the fire and to approach close to it, and various efforts were made to reach it from above, by cutting holes in the deck plates, in which the oxy-acetylene process was employed. After nearly two days of continuous work by the Canal Zone firemen, forces of the Coast Artillery Corps stationed at Fort Grant, and various employes of The

complete damaging of cargo was confined to the No. 4 hold shelter deck, where heat and steam were very severe, and to the No. 3 hold shelter and 'tween decks. The cargo in the No. 2 hold, shelter and 'tween decks, was damaged by heat and steam. The hold below was flooded by water which overflowed the hatch copings of the 'tween deck. In the No. 1 hold, heat and steam did some damage on the shelter deck, but the 'tween deck was protected by a bulkhead, separating this from the No. 2 hold, and its cargo escaped damage. The cargo below was damaged by water which came down the scuppers. In all, about half the cargo escaped damage, and of the damaged half about one-fifth appeared to have been badly damaged.

Much of the damaged cargo was unloaded on the wharf, along with a considerable quantity which was not badly damaged. On Tuesday the discharge of cargo was discontinued, it having been decided to carry all except that badly damaged to San Francisco, and to leave the other here for appraisal by a Lloyd's surveyor, to come from New York. Work of reloading in the forward holds was begun on Tuesday, and it is expected that the *Pennsylvanian* will sail for San Francisco on Thursday or Friday of this week.

Northern, a new passenger steamship, the *Pennsylvanian* held the record for the quickest voyage from Philadelphia to San Francisco, done in 14 days, 17 hours and 25 minutes, through the Canal. The distance of 5,130 miles was covered at an average speed of 14.51 knots. On the voyage the *Pennsylvanian* burned 3,977 barrels of fuel oil, or .77 of a barrel to the mile. As the oil costs the company about 80 cents per barrel, the fuel cost of the vessel was approximately 60 cents a mile.

Swimming Proficiency of Zone Children.

That the American children reared on the Isthmus have attained a proficiency in swimming considerably above the average for children in the United States is an opinion recently expressed by the Superintendent of Clubs and Playgrounds. It is said that there is not an American child in Cristobal over six years of age that can not swim; and it is believed that the proportion of swimmers among the children is almost as great in the other Canal villages, excepting Ancon and Balboa, from which access to swimming places is relatively difficult. The proficiency among the girls is almost as great as among the boys. The development of swimming on the Isthmus is attributed principally to the continuous warm weather, the accessibility of the water, and the lack of other outdoor sports.

DIRECTORY FOR PANAMA.

List of Principal Officials of Republic, and of Representatives of Foreign Countries in Panama.

The following is a directory of the principal officials of the Republic of Panama, and of the diplomatic and consular representatives of foreign countries accredited in Panama on May 3, 1915. The headquarters of the national government are in the city of Panama, which is the address of all the officials of the government listed here except those specifically designated as officials of other provinces or municipalities, and those connected with the embassy at Washington. The addresses of the consular and diplomatic officers are indicated separately.

President—Dr. Belisario Porras.
First Vice-president—Rodolfo Cbiari.
Second Vice-president—Ramon M. Valdés.
Third Vice-president—Aristides Arjona.

Departments of National Government.

Secretary of Government and Justice—Juan B. Sosa.

EXECUTIVE ORDER.

Changing the Name of Culebra Cut.

It is hereby ordered that the portion of the Panamá Canal through the continental divide heretofore known as "Culebra Cut" shall hereafter be named "Gaillard Cut" in honor of the late Lieut.-Col. D. D. Gaillard, Corps of Engineers, United States Army.

As a member of the Isthmian Canal Commission from March 16, 1907, to December 5, 1913, Lieutenant Colonel Gaillard was in charge of the work in Culebra Cut until its virtual completion, being compelled to abandon his duties in July, 1913, through an illness which culminated in his death on December 5, 1913. His period of Panama Canal service included the years of most active construction work. He brought to the service trained ability of the highest class, untiring zeal, and unswerving devotion to duty.

I deem it a fitting recognition of Lieutenant Colonel Gaillard's service to the country to re-name in his honor the scene of his life's triumph.

WOODROW WILSON

THE WHITE HOUSE,

April 17, 1915.

[No. 2185.]

Executive Order No. 2185 is being published locally as Canal circular No. 601-44.

Relief Work in Colon.

The Canal and Red Cross forces have continued the work of relieving the victims of the fire which burned 22 blocks in the city of Colon on April 30. Rations are supplied to women and children but the men who are able to work have been made to support themselves, since the third day. The Panama Canal and the Panama Railroad Company have made employment available to all, at the docks or in the work of clearing away the wreckage. About 1,000 rations have been issued daily, from the Red Cross relief station in the Cristobal commissary. The total number issued during the first week, ending May 8, was 8,161. A card index system is used in keeping tab on the issues.

Tracks have been laid up Bottle Alley and Cash Street and forces of the railroad are engaged in hauling away the remains of the burned houses, consisting principally of corrugated iron roofing.

The Acting Governor has appointed a committee consisting of the Special Attorney, the Engineer of Termina' Construction, and the Superintendent of the Panama railroad, to confer with the Panamanian authorities as to procedure governing reconstruction in the burned area.

Penalty for Non-Payment of Rent and Electric Current Charges by the 15th of Each Month.

In last week's issue of THE CANAL RECORD it was stated that penalties would be added to rent and electric bills if they were not paid before the close of business on "the 25th of each month." The date should have been printed as the 15th, and not the 25th. Occupants of Government quarters will please be guided accordingly.

Announcement has been made of a race from New York to San Francisco, through the Canal, by seagoing motor boats, to start from Sandy Hook early in October.

OFFICIAL CIRCULARS.

Report of Absences.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., May 6, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Your attention is directed to Circular No. 602-9, "Report of Absences," issued under date of July 13, 1914. The failure of foremen and others in supervisory capacities to see that report of absence on PC, form No. 484 is forwarded to the timekeeping bureau immediately upon the return of an employe to work, has in numerous instances resulted in payment for time absent being delayed one month. This is particularly the case where an employe returns from a leave of absence at or near the close of a month and the report of absence is received after the rolls for the month are closed.

Foremen and others whose duty it is to see that reports of absences are forwarded to the timekeeping bureau must see that this is done and they will be held personally responsible for unnecessary delays.

CHESTER HARDING,
Acting Governor.

All Accommodations on "Advance" Taken.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., May 7, 1915.

To all concerned—No further accommodations on the steamship *Advance*, scheduled to sail from Cristobal on May 29, 1915, are available.

W. P. COPELAND,
Acting Executive Secretary.

Freight Arrangements for Balboa Heights.

THE PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,

BALBOA HEIGHTS, C. Z., May 4, 1915.

CIRCULAR No. 62:

To all concerned—Balboa Heights station is now open as a freight station for the handling of less than car-load shipments.

In the absence of way-freight train service at this point, a triweekly service from outlying points will be inaugurated by operating an exclusive car for Balboa Heights on the way freight south, out of Colon every Monday, Wednesday, and Friday; likewise on the Las Cascadas branch.

The local agent at Colon will load all freight for Balboa Heights and Balboa Heights only, in a car by itself every Tuesday, Thursday, and Saturday for forwarding on the way-freight the following morning.

In the absence of freight and no car made up for Balboa Heights, he will so notify the yardmaster, who in turn, will see that the way-freight is given an empty box car for the picking up of Balboa Heights freight along the line.

Conductors will be particular to see that only freight for Balboa Heights is loaded into this car.

The chief dispatcher will see that the branch local has an empty box car each Monday, Wednesday, and Friday.

Upon arrival at Balboa yard, the yardmaster will see that cars are promptly placed on the house track, south end of station, for unloading.

On outbound shipments from Balboa Heights, agent will load in a car for the Panama freight station as often as is necessary, where shipments will be transferred to proper cars, made up and forwarded from that station.

C. H. MOTSETT,
Superintendent.

Acting Receiving and Forwarding Agent, Colon-Cristobal.

THE PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,

BALBOA HEIGHTS, C. Z., May 3, 1915.

CIRCULAR No. 61:

To all concerned—Effective May 6, and during the absence of Mr. R. W. Bergin on leave, Mr. R. B. Walker will act as receiving and forwarding agent, Colon-Cristobal.

C. H. MOTSETT,
Superintendent.

Approved:
CHESTER HARDING,
Second Vice-president.

Acting Receiving and Forwarding Agent, Balboa.

THE PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,

BALBOA HEIGHTS, C. Z., May 4, 1915.

CIRCULAR No. 65:

To all concerned—Effective May 3, Mr. C. T. Lindsay will act as receiving and forwarding agent at Balboa, vice Mr. Walker, temporarily transferred to Colon.

This cancels my Circular No. 60 of May 3.

C. H. MOTSETT,
Superintendent.

Approved:
CHESTER HARDING,
Second Vice-president.

Acting Superintendent of Stables at Colon.

THE PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,

BALBOA HEIGHTS, C. Z., May 3, 1915.

CIRCULAR No. 59:

To all concerned—Effective May 8, and during the absence of Mr. X. W. Culbertson, on leave, Mr. W. E. Tragsdorf will be acting superintendent of the Panama railroad stables at Colon.

C. H. MOTSETT,
Superintendent.

Approved:
CHESTER HARDING,
Second Vice-President.

Weights of Cars of Gravel.

PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,

BALBOA HEIGHTS, C. Z., May 1, 1915.

CIRCULAR No. 59:

To all concerned—In weighing cars loaded with run-of-bank gravel from Gamboa, it has been ascertained that the large Western dumps average 58½ tons and the small Western dumps average 41 tons.

Hereafter, when securing cars at Gamboa for single and double trains, figure your tonnage according to the above mentioned weights.

All previous instructions in regard to the weights of these cars are hereby cancelled.

C. H. MOTSETT,
Superintendent.

Accountable Official.

THE PANAMA CANAL,
OFFICE OF THE AUDITOR,

BALBOA HEIGHTS, C. Z., May 6, 1915.

CIRCULAR No. 91:

Effective May 10, 1915, Mr. D. E. Wright is designated an accountable official of The Panama Canal, and as such will account for all nonexpendable property in the service of the Division of Municipal Engineering.

H. A. A. SMITH,
Auditor, The Panama Canal.

Approved:
CHESTER HARDING,
Acting Governor.

Accountable Official.

THE PANAMA CANAL,
OFFICE OF THE AUDITOR,

BALBOA HEIGHTS, C. Z., May 8, 1915.

CIRCULAR No. 92:

Effective May 10, 1915, Mr. Geo. M. Wells is relieved of his accountability for nonexpendable property of the Division of Municipal Engineering, and will assume the accountability for all nonexpendable property of the Building Division, relieving Mr. C. A. McIlvaine, the present accountable official for that division.

H. A. A. SMITH,
Auditor, The Panama Canal.

Approved:
CHESTER HARDING,
Acting Governor.

Half-Rate Tickets for the Military.

THE PANAMA RAILROAD COMPANY,
OFFICE OF THE ACCOUNTANT,

BALBOA HEIGHTS, C. Z., May 5, 1915.

To all station agents—On May 6, 1915, we will put on sale special round trip card tickets marked across face, in large red letters, "U. S."

These tickets are to be sold to United States officers, soldiers, and sailors in uniform, at half regular tariff, without any further authority other than the uniform. These tickets will be honored for passage only when presented by passenger in uniform.

Officers, soldiers, and sailors and their wives, in civilian's clothes, will have to present the usual half-rate request to get the benefit of the reduced rate.

Agents, when honoring a half-rate request, will issue a full-rate ticket, form AI 576 or 576-F, reporting same accordingly, attaching to their monthly report the rate authorities covering.

Agents at points were no U. S. card tickets are on sale will use half-rate simplex tickets, form AI 576-D (the same as used for children) for soldiers and sailors in uniform.

Agents will use form AI 576-A when request is made by soldiers and sailors in uniform for one-way ticket.

Conductors and collectors will honor tickets form AI 576-A and AI 576-D, when presented by passengers in uniform, or by children.

J. H. GERRING,
Acting Railroad Accountant.

Listing of Nonexpendable Accessories of Equipment.

THE PANAMA CANAL,
OFFICE OF THE AUDITOR,

BALBOA HEIGHTS, C. Z., April 24, 1915.

CIRCULAR No. 90:

To all concerned—Effective at once, inspectors signing inspection calls for equipment, the price of which includes nonexpendable tools or other accessories, will list these on both the original and duplicate calls, or attach a list thereof to the calls. Full description of such items and estimated value for each item, where actual values are not obtainable, must be furnished. The price at which equipment of this character will be taken into account will be that shown on the call, less the value of such tools or accessories included in the purchase price.

H. A. A. SMITH,
Auditor, The Panama Canal.

Acting Superintendent in Building Division.

THE PANAMA CANAL,
OFFICE OF CONSTRUCTING QUARTERMASTER,

BALBOA HEIGHTS, C. Z., May 5, 1915.

To all concerned—Effective this date, Mr. A. M. Bradford is appointed acting superintendent of the northern district of the Building Division, with headquarters at Cristobal, Canal Zone.

R. E. WOOD,
Constructing Quartermaster

Superintendent of Gatun Locks.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 29, 1915.

CIRCULAR No. 661-15:

Effective May 1, 1915, Capt. Theodore H. Dillon, U. S. A., is appointed superintendent of Gatun Locks, vice Capt. Wm. F. Endress, U. S. A., relieved from duty with The Panama Canal.

GEO. W. GOETHALS,
Governor.

Assistant Engineer, Fortification Division.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., April 30, 1915.

CIRCULAR No. 661-16:

Effective May 6, 1915, First Lieut. Creswell Garlington, U. S. A., assistant engineer, will be placed in charge of fortification work on the Isthmus, vice First Lieut. Albert H. Acher, U. S. A., relieved from duty.

GEO. W. GOETHALS,
Governor.

The "Cristobal" to Return to Passenger Service.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., May 7, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

In order to relieve the congestion on Panama railroad vessels, it has been decided to fit out the steamship *Cristobal* for passenger service, beginning with the sailing from New York on May 14.

If it is decided not to send the *Cristobal* through to Balboa on this trip, she will sail from Cristobal on or about May 30. In any event, applications for leave may be submitted effective on the sailing date of the steamship *Cristobal*, and if it is found impracticable to despatch the vessel prior to June 1, such leaves will be extended accordingly.

CHESTER HARDING,
Acting Governor.

Acting Collector.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., May 1, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Effective May 1, 1915, and during the absence on leave of Mr. T. L. Clear, Collector, Mr. Elwood P. Sine is designated as Acting Collector of The Panama Canal.

CHESTER HARDING,
Acting Governor.

Proposal for Painting Shavings Exhaust System at Buildings Nos. 8 and 14, Balboa Shops.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., May 19, 1915, and then opened, for furnishing the necessary labor to paint the shavings exhaust system at buildings Nos. 8 and 14, Balboa shops. Specifications and all necessary information may be obtained at this office. Plans of the system may be seen at the office of the assistant engineer, Pacific terminals, Balboa. Bids must be on the basis of a lump sum price. Bids must be accompanied by a deposit of 15 per cent of the total bid. The Panama Canal reserves the right to reject any or all bids.

JOINT LAND COMMISSION.

Rules of Dismissal.

In the matter of the claims of Camille Lepel, rule of dismissal No. 181, docket Nos. 10 and 11, April 28, 1915—The claims of Camille Lepel, dockets Nos. 10 and 11, covering two houses said to be located in the Empire district on lot No. 25, Empire village, and lot No. 16, Camacho village, are hereby dismissed, as the evidence before the Commission is that said Camille Lepel is not the true and lawful owner of the property in question.

FEDERICO BOYD, NICHOLAS CORNET, LEVI M. KAGY, S. Lewis, Commissioners.

In the matter of sundry claims, rule of dismissal No. 179, docket numbers as shown, April 23, 1915—With reference to the following claims, the evidence before the Commission is that settlement therefor has been made by the United States:

Claimant.	Docket No.	Tax No.	Date of Pym't.
Adolphus Delvalle (Del-valley).....	750 & 273	634 345	3-6-15
José Mercedes Olmedo...	753	629	1-30-15
Rev. P. José Valk.....	752 & 3500	637	

In view of the above settlements, no further action is necessary by the Commission, and the foregoing claims are therefore dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI M. KAGY S. LEWIS, Commissioners.

In the matter of sundry claims, rule of dismissal No. 182, docket numbers as shown, April 29, 1915—With reference to the following claims, the records of the Commission show that in each case written advice received by the Commission from the claimant or claimants or the authorized attorney therefor states that settlement has been made by the United States or by the Panama Railroad Company and asks that said claim be withdrawn:

Claimant.	Dkt. No.	Date of Advice.
Alice Louise Harmon.....	2642	2-8-15
Agustin Rodriguez and Manuel de Jesus Rodriguez, co-owners with Hilario Rodriguez or his successors.	258	2-4-15
José Solís.....	1769	3-4-15
José Solís & Company.....	1770	3-4-15

The requests of the claimants have been granted, and this formal rule dismissing the claims is entered in order that they may be properly stricken from the trial docket.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

In the matter of the claim of Nicholas Yazas, rule of dismissal No. 183, docket No. 774, April 29, 1915—With reference to the claim of Nicholas Yazas (Ayarza), docket No. 774, the evidence before the Commission is that all of the property mentioned in this claim was covered by the Commission's award No. 37 of September 20, 1913, in favor of Nicholas Ayarza, and that Nicholas Ayarza named in award No. 37 is the same person as Nicholas Yazas named in claim docket No. 774.

In view of the above facts, the claim of Nicholas Yazas, docket No. 774, is hereby dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Joint Land Commission Calendar.

Following is a calendar of claims set for hearing for the week ending May 22: *Monday, May 17*—Docket 539 (remainder), Zoraida Cabeza; docket 769, Elena Arguelles. *Tuesday, May 18*—Docket 340, Wm. Keyes; docket 1913, Manuel Leones (argument on motions). *Wednesday, May 19*—Docket 740, Gabriel Jolly. *Thursday, May 20*—Docket 760, Ezequiel Ortega; docket 828, Isee Sing; docket 829, S. L. Abbot. *Friday, May 21*—Docket 830, Francisco Alarcon; docket 831, Uriah Smith; docket 833, Estwick King; docket 834, Edw. Mattise; docket 832, A. D. Primus.

WILLIAM TAYLOR, Secretary.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 303, on Wednesday, May 19, 1915, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same. The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding

the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

For the benefit of applicants residing in Gatun and Cristobal or Colon, examinations for licenses as navigators of motor boats, and as chauffeurs, will be held at the office of the captain of the port of Cristobal on Friday, May 21, 1915, beginning at 9 a. m. Applicants should be provided with motor boats or automobiles for the demonstration test.

By direction of the chairman of the board.

F. M. NIXON,

Recorder, Board of Local Inspectors.

Legal Notice.

United States of America } In the District Court
Canal Zone. } Division of Balboa.

Estate of José Alvarez, deceased, Petition for Escheat.

Notice is hereby given that at 9 o'clock a. m., of the 15th day of May, 1915, in the court house at Ancon, there will be an inquisition into the estate of José Alvarez, who died intestate about the 24th day of October, 1910, possessed of improvements on land located near Tabernilla, C. Z., for which improvements the Joint Land Commission, in 1913, made an award of \$175 and ordered that the same be paid in the Court of the Canal Zone, pursuant to a petition filed by John K. Baxter, Administrator of Estates, praying that the said sum be escheated in accordance with Sections 779, 780, and 781 of the Code of Civil Procedure of the Canal Zone, at which time and place all persons claiming the said estate, or any interest therein, may appear and be heard before the Court.

E. M. GOOLSBY, Clerk.

COMMISSARY DEPARTMENT.

New Commissary Store Opened at Balboa.

The opening of the new concrete commissary store at Balboa on Tuesday, May 11, was made something of an event in the community. A considerable number of patrons came to inspect the building and were shown about by the manager. The landscape gardener had provided floral decorations for the occasion. The Depot Commissary delivered a short talk to the employes of the store.

The Balboa commissary is now the largest and best equipped on the Isthmus. It will use regularly over 100 employes.

Commissary Hours.

The commissary stores at Las Cascadas, Empire, and Culebra are open from 7.30 to 11.30 a. m., and 1.30 to 5.30 p. m.

The commissary store at Balboa is open from 8 a. m. to 12.30 p. m., and 2.30 to 6 p. m.

All other commissary stores are open from 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m. on Saturdays and other sailing days of Panama railroad vessels.

Cold Storage Prices.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly. The subscription rate is \$1 per year in the United States and its possessions, and in Canada, Cuba, Mexico, and Panama (domestic postage), and \$1.50 in other countries (foreign postage). The paper is furnished free to United States Government departments, representatives of foreign governments, public libraries, and employees of The Panama Canal and the Panama Railroad Company whose names are on the gold roll.

All subscriptions expire on December 31. Domestic subscriptions are accordingly charged as beginning from the first of the quarter of the year in which received. Remittances should be made to pay only to December 31, on this basis: Sent between April 1 and July 1, 75 cents; July 1 to October 1, 50 cents; October 1 to January 1, 25 cents. For foreign subscriptions the year is divided into thirds: Between January 1 and May 1, \$1.50; May 1 to September 1, \$1; September 1 to January 1, 50 cents.

Remittances for subscriptions may be forwarded to The Panama Canal, Washington, D. C., or to The Canal Record at the address given below.

Address all Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone,

Isthmus of Panama.

NOTES OF PROGRESS.

Three Battleships to Pass through the Canal.

The United States battleships *Missouri*, *Ohio*, and *Wisconsin* are to arrive at Cristobal on June 16, to pass through the Canal on their way to San Francisco. They will have on board about 680 midshipmen from the United States Naval Academy at Annapolis, comprising the first, second, and third classes at the Academy, who will be on the regular summer practice cruise.

Rear Admiral William F. Fullam, U. S. Navy, Superintendent of the Naval Academy, is in command of this squadron and flies his flag on the *Missouri*.

The following is the itinerary of the cruise: Leave Annapolis June 6; leave Guantanamo June 13; arrive Cristobal June 16, leave Balboa June 20; arrive Magdalena Bay June 30, leave July 1; arrive San Diego July 3, leave July 6; arrive San Francisco July 8, leave July 22; arrive Los Angeles July 24, leave July 26; arrive Balboa August 7, leave Cristobal August 10; arrive Hampton Roads August 17, and Annapolis August 30.

Damaged Cargo Off the "Pennsylvanian."

Twenty carloads of salable goods selected from the damaged cargo of the American-Hawaiian Line steamship *Pennsylvanian*, which was on fire at Balboa from May 5 to May 7, inclusive, have been moved from the quay wall alongside which the vessel moored, to the old American wharf in Panama harbor, and will be offered at auction in an average adjusters' sale. Ten other cars were loaded with remains of ruined goods, to be dumped. The sale is in charge of Mr. Kemp, of the firm of Koehler and Kemp, average adjusters, who conducted the sale of cargo off the steamship *Newport* of the Pacific Mail Steamship

Company, which sank alongside a wharf at Balboa on August 17, 1912. Mr. Kemp arrived on the Isthmus on Sunday, May 9, and is staying at the Hotel Tivoli; he states that the sale is to begin within a short time, as soon as the goods can be disposed properly for exhibition.

Fined for Violation of Quarantine Regulations.

The District Court, sitting at Cristobal on May 15, imposed a fine of \$25 on the master of one of the vessels of the Pacific Steam Navigation Company plying between Cristobal and the west coast of South America, for violation of the quarantine regulations. An additional sentence of 30 days in jail was suspended on condition of strict compliance with the regulations hereafter.

The specific violation consisted of not having the vessel breasted off at least six feet from the wharf at which the vessel was moored. This requirement is insisted on for the purpose of preventing the passage to land, or to other ships, of rats and is very important in the case of vessels coming from plague ports. This vessel had come from Guayaquil and other Ecuadorian ports, and had been allowed to make the transit of the Canal in quarantine, after completing the six-day period of incubation in the outer harbor at Balboa. From November 1 to January 31, there were 310 new cases of plague, and 119 deaths from it, reported from Guayaquil, and its prevalence is reason for strict insistence on sanitary precautions.

Copies of the quarantine regulations have been furnished to the local agents of this and other companies making use of the Canal and its terminal ports, and the specific precautions to be observed by the vessels are set forth in writing for each one. A summary of the recent additions to the quarantine regulations is published in this issue of THE CANAL RECORD, page 345.

Passage of a Walrus Hunter.

The Norwegian whaling vessel *Kil*, bound from Yokohama to Sandefjord and passing through the Canal on May 11, was the second sea hunting outfit to make the homeward voyage through the Canal, laden with the spoils of the season. The first was the whaling fleet consisting of the *Capella I* and tenders *Hidalgo*, *Juarez*, and *Morelos*, which cleared for the same port on September 28, bound from Magdalena Bay. The *Kil* has aboard 140 tons of walrus skins and hides and 70 tons of walrus oil, taken in the Arctic Ocean, to the north of the Aleutian Islands, and 75 tons of fish oil, 28 tons of rice, and about \$1,750 worth of curios loaded at Yokohama. By using the Panama Canal, the *Kil* saves about 1,800 miles at sea over the next shortest route between Yokohama and Norway, which is through the Suez Canal. The *Kil* is 162 feet long by 28 feet in the beam and was drawing 11½ feet at the time of passing through the

Canal. She took 90 tons of coal at Colon and cleared for Norfolk.

Passage of the Motorship "Panama."

The motorship *Panama*, which passed through the Canal on May 7, is the most recent addition to the fleet of the East Asiatic Company and was named in honor of the Canal, of which the East Asiatic Company is one of the important users. The *Panama* is a handsome vessel and the largest of the motorships which have used the Canal. Her length of 427 feet, beam of 55 feet, and draft, at time of passage, of 27 feet four inches, are above the average for the steam vessels which have been through the Canal. The gross Canal tonnage of the vessel is 7,021 and the net Canal tonnage 5,267. The total number in the crew is 37.

The *Panama* is on her maiden voyage to the Far East, the center of the East Asiatic Company's work. She is enroute from Port Arthur, Texas, to Amoy, China, with 214 barrels of wax and 228,291 cases of refined petroleum, a total cargo of 8,494 tons.

Cuban Sugar for British Columbia.

The steamship *John A. Hooper*, passing through the Canal on May 4, carried a cargo of 19,500 bags of sugar from the province of Matanzas, Cuba, consigned to Vancouver, British Columbia, via Port Angeles. Matanzas is the principal sugar-producing province of the island, and the port of Matanzas, formerly a pirates' refuge, is second to Havana in commercial importance.

Special Reservations in the Canal Zone.

Construction work on the new Naval radio stations at Darien, Balboa, and Colon, is practically completed. At Darien the aerial mat was hoisted in April, and tests of the radio equipment furnished by the Federal Telegraph Company are now in progress. The station is in regular communication with Arlington, Va., and has received messages from other distant points. At Colon and Balboa, which are secondary stations, the antennæ are swung from the new 300-foot towers and the radio equipment is practically completed. The last wooden mast of the old Colon station will be taken down in the near future. These stations will be operated by the Navy Department, the operating force consisting of enlisted men of the Navy under the command of a commissioned officer.

The land on which the Darien and Balboa stations are located has been set aside by Executive Order for radio and other naval purposes under the control of the Secretary of the Navy, but these areas as well as all other areas and reservations for naval and military purposes in the Canal Zone are, in conformity with the Panama Canal Act, subject to the civil jurisdiction of the Governor of the Canal Zone. All sanitary and building regulations and all other laws of the Canal

Zone apply with equal force to all portions of the Canal Zone, including all military or naval reservations embraced therein.

The Colon radio station is located on land of the Panama railroad. The Panama railroad holds this land in Colon under a qualified title of ownership which gives the company a leasehold estate therein to the end of the company's concession in 1966, at which time ownership will revert to the United States by virtue of the Canal treaty.

Dutch Royal Mail Sends Vessel through the Canal.

The steamship *Agamemnon* of the Dutch Royal Mail entered the Canal on Monday, April 17, enroute from Amsterdam to Guayaquil, in ballast. This is the first vessel of this line to have gone through the Canal, though the company has an active service between Holland and the Caribbean, with frequent calls at Colon. Like other vessels of this line which have been plying through the war zone, the *Agamemnon* bears the ship's name and port of registry in large letters, legible at several miles distance, on both sides, amidships, thus, AGAMEMNON—AMSTERDAM.

Corrected Statement of Tolls Levied and Collected.

The deposits made with the Collector for payment of tolls on vessels using the Canal have been carried in a special account, and payments are made therefrom as the vessels use the Canal. While the money was available at the time of transit, in some cases actual transfer of funds was not made in the month in which the vessels passed through the Canal. Up to the end of March this resulted in an apparent discrepancy between the levy of tolls and the actual collections, month for month. In addition, several vessels belonging to the United States Government were assessed for tolls but allowed to proceed without actually paying them, the transfer of funds being a matter for inter-departmental adjustment.

In publishing the figures for tolls, those showing actual collections have been used for some months, and for others the figures have been for tolls levied during the month. In addition, refunds have been made, to the extent of \$11,551.20, after final decision was reached in regard to what constitutes a vessel "in ballast," or on account of errors in the first bills. A total of \$56,238 is still due The Panama Canal from other departments of the United States Government. With all these adjustments taken into consideration, the net collections of tolls up to April 1, 1915, were \$2,853,680.88, and the net earnings \$2,909,918.88, the difference, \$56,238, being the amount still charged against other departments of the United States Government, as shown in this summary:

Month.	Originally Levied.	Corrected Amount.	Amount Collected.	Refunded.	Balance due from U. S.
May, 1914.....	\$7,146.12

Net collections.....		\$2,853,680.88	\$2,853,680.88		

LABOR FORCE AND QUARTERS IN APRIL.

The force report of April 21, 1915, shows the actual working force of The Panama Canal on that date to have been 21,505; of the Panama railroad, 2,936; and of contractors, 374, a total effective working force of 24,815. This is an increase of 1,041 from the force on March 24, which was 23,774, and is 1,370 more than the force employed on February 24 (numbering 23,345), but is 38 less than the force employed on January 20, which was 24,853.

The gold force on the Isthmus, composed almost exclusively of white Americans, was 3,361, a decrease of 64 from the previous month, and a decrease of 133 as compared with the report for February 24, and a decrease of 352 since January 20. The gold force for April, 3,361, was divided as follows: The Panama Canal, 3,173; the Panama Railroad Company, 151; contractors, 37. The heavy decrease in the gold force of the railroad, from 359 on March 24, is due principally to the transfer of the Department of Telephones, Telegraphs, and Signals to the Electrical Division of The Panama Canal. Detailed figures of the Canal force employed on the Isthmus, by departments and divisions, follow:

DEPARTMENT OR DIVISION	SILVER EMPLOYES*											Total silver.	Total gold.	Grand total.

(1) Includes Taboga Island, Naos Island, and Palo Seco. (2) Includes 19 Asiatics. (3) Includes 12 American negroes, 67 Colombians and Panamanians, and two Panamanians on the gold roll. (4) Includes Miraflores. (5) Includes one Asiatic. (6) Includes Empire, Las Cascadas, and Bas Obispo. (7) Includes Colon Beach and Colon Hospital. (8) Includes 33 East Indians, 13 American citizens, and 62 Panamanians. Gold force of contractors, included above, occupying quarters, 48 bachelors.

Over \$3,000,000 in Tolls.

Tolls collected during April for the use of the Canal by vessels amounted to \$448,764.74. This makes the total net collection of tolls from the beginning of tolls collection, in May, 1914, up to May 1, 1915, amount to \$3,302,445.62.

The Italian steamship *Vega*, which carried 900 tons of material for the exhibit of the Italian Government at San Francisco through the Canal on March 19, returned on May 7 from San Francisco and passed through the Canal in ballast, on her way to Galveston.

QUARANTINE REGULATIONS.

Recently Issued Circular Contains Changes and Additions.

The quarantine rules and regulations governing the entry of vessels at the ports of Cristobal and Balboa, and Colon and Panama, at the ends of the Canal, set forth in circular No. 626, dated May 1, 1914, have been reissued, with changes and additions, in the form of circular No. 626-1.

With the exception of the changes hereinafter noted, the provisions remain the same. It is accordingly deemed more satisfactory to publish here the changes rather than the new circular in full. Those wishing complete copies of the new circular may obtain same by addressing The Panama Canal, Balboa Heights, Canal Zone, with request for circular No. 626-1, "Quarantine Rules and Regulations."

Sections 29 to 32 of the original circular have been struck out and the following sections, numbered from 29 to 33, inclusive, substituted for them:

29. Vessels entering the port for the purpose of passing through the Canal without discharge of cargo or disembarking passengers at the ports of Balboa or Cristobal, or the ports of Panama or Colon in the Republic of Panama, will be given pratique to proceed without detention provided special regulations prescribed for observation in foreign ports have been carried out and no disease of a quarantinable nature has occurred during the voyage.

Such vessels from ports infected with quarantinable disease, arriving within the period of incubation of such disease or diseases, shall be passed through the Canal "in quarantine."

30. Vessels entering the port for the purpose of passing through the Canal without discharge of cargo or disembarking passengers at the ports of Balboa or Cristobal or the ports of Panama or Colon in the Republic of Panama, arriving from ports infected with quarantinable disease and in which the special regulations prescribed for observation in foreign ports have not been carried out, may be passed through the Canal "in quarantine" after necessary measures of disinfection, etc., have been taken. Such vessels, however, as have not completed the quarantine period since leaving the last infected port, in addition to disinfection, may be detained in quarantine a sufficient length of time to cover the period of incubation of the disease in question before being allowed passage through the Canal.

31. Passengers or crews on vessels falling under the heading (29 and 30) who disembark at the ports of Balboa or Cristobal, or the ports of Panama or Colon in the Republic of Panama, will be held under observation in quarantine a sufficient number of days to complete the period of incubation of the disease against which quarantine is directed.

32. Vessels entering the port for passage through the Canal that have on board cases of quarantinable disease, or that have had such during the voyage, may be allowed to proceed to the port of destination after the measures provided by the quarantine regulations have been

carried out. In such cases the vessel should proceed through the Canal "in quarantine."

33. In case of vessels coming under Section 32, a statement of the nature of the disease removed at quarantine and the measures of disinfection carried out, shall be communicated to the Health Officer of the next port to which the vessel is going; a sealed letter attached to the bill of health and forming a part of the ship's papers, should be addressed to the Health Officer of the port of destination, and the pratique granted the vessel shall have a notation of the facts entered thereon.

The following are new sections in the revised regulations, not included in the original circular, containing special regulations for passage through the Panama Canal "in quarantine:"

34. Permission for passage through the Canal in quarantine shall only be granted with the approval of the Chief Health Officer.

35. A quarantine officer and one or more sanitary guards, or one or more sanitary guards when in the judgment of the Chief Quarantine Officer such will be sufficient, shall board the vessel for passage in quarantine and accompany her through the Canal. Their duty shall be to prevent unauthorized communication and see to the proper execution of the prescribed sanitary and quarantine regulations, during the passage through the Canal.

36. All embarkations, landings, and transshipments of passengers or cargo are forbidden during the passage through the Canal between the terminal ports.

37. Vessels passing through "in quarantine" shall make the trip from port to port without putting into dock. In case of being compelled to put into dock, the necessary operations shall be performed by the personnel on board, all communication with the employes of The Panama Canal being avoided.

38. When ships are conveyed through the Canal "in quarantine," the trip shall be made in the daytime only, when practicable.

39. If it is necessary to stop in the Canal, the vessel should anchor in Gatun Lake, not less than 200 meters from the

shore. If it is absolutely necessary to tie up at a wharf or at the lock walls, special precautions as prescribed by the Chief Quarantine Officer shall be taken to prevent the passage of persons or things to or from the vessel.

40. Vessels passing through "in quarantine" are forbidden to approach the wharves or piers in the terminal ports.

41. When it is absolutely necessary for vessels passing through "in quarantine" to take on coal in the terminal ports, the coaling shall be done under the supervision of the quarantine authorities. If the coaling is done at night the place where the coaling is done should be brilliantly illuminated by electric lights.

42. The pilots, quarantine officers, sanitary guards, or other agents of The Panama Canal, will be subject to provisions under the heading "General Requirements at Quarantine."

43. War vessels passing through "in quarantine" may not be required to take on board quarantine officer and sanitary guards provided certificate is issued by the senior medical officer on board and countersigned by the commanding officer, that the quarantine regulations have been and will be complied with.

Nevertheless the quarantine authorities shall have the right to place their agents on board whenever they deem it necessary.

The insertion of the foregoing additional sections increases the number of sections in the circular from 124 to 135. Up to Section 29 there is no change; from 29 to 43, changes are as given above; the remainder of the circular is unchanged, other than advancing the section numbers 11 points.

Lacking Required Bill of Health.

The British steamship *Durley Chine*, belonging to the Canadian Government, and arriving at Cristobal on Monday, May 17, on her way from Halifax to Vancouver, was found not to have the required bill of health. After examination, the vessel was allowed to proceed through the canal in quarantine, and her master was summoned to appear before the District Court for violation of the quarantine regulations. The case is to come before the court on Wednesday, May 19.

The estates of the abovenamed deceased and insane employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against the estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

DRY SEASON RAINFALL.

Above Normal at Nearly All Stations—New Records for 24-Hour Precipitation.

The rainfall during the dry season, now drawn to a close, has been such that the season was at several periods like the wet season; and a daily rainfall exceeding usual wet season precipitation for equal time was twice recorded. The precipitation was generally above normal over the area of the Canal Zone.

On the Pacific coast the rainfall was almost double the average amount, while on the Atlantic side it was approximately 50 per cent above the normal dry season amount. Conditions were nearer the normal over the central section, the rainfall at Culebra being slightly below the average, but above at both Gamboa and Alhajuela.

Two storms or so-called "northers," during the periods from February 9 to 11, inclusive, and from April 3 to 5, inclusive, influenced the total amount of rainfall to a great extent, the fall during these periods being general over the Isthmus, though greater on the Atlantic coast than over the other sections. These were the northers of which the accompanying high seas on the Atlantic side did damage to the breakwaters in Limon Bay, protecting Colon harbor and the Atlantic entrance to the Canal.

On April 3 the precipitation at Gatun was 7.64 inches, and a fall of 7.94 inches of rain in 24 hours occurred at Colon on February 10th. This exceeded the maximum 24-hour precipitation during the wet season of 1914, which was 6.85 inches, at Gatun, on August 12-13.

This record for heavy fall within 24 hours has never been exceeded, even during the wet season, at Balboa, Balboa Heights, Culebra, or Gamboa during the years of recorded measurement. The fall at Balboa and Balboa Heights has been recorded for 17 years; at Culebra, 25 years, and at Gamboa, 30 years. The highest precipitation during 24 consecutive hours on record on the Isthmus is 10.86 inches, at Porto Bello.

The subjoined table presents the accumulated rainfall at selected stations and for the whole Canal Zone during the dry season of 1915 (December, 1914, to April, 1915, inclusive) compared with the normal rainfall during the same period, and the fall during the dry seasons of 1910 and 1912. The dry seasons of 1910 and 1912 represent extreme conditions, 1910 for relative wetness and 1912 for unusual dryness, and the data for these extreme seasons are given for the sake of comparison.

It may be noted that the totals include the five months from December to April, inclusive. The dry season frequently begins in December, and for this reason the rainfall for this month is included in all totals.

	Normal dry season rainfall, Dec. to Apr. inclusive.	Years of record.	Dry season 1915-Dec. 1914 to April 1915 inclusive.	Per cent of normal.	Dry season 1910-Dec. 1909 to April 1910 inclusive.	Per cent of normal.	Dry season 1912-Dec. 1911 to April 1912 inclusive.	Per cent of normal.

Passenger Steamship Connections from Balboa to San Francisco.

Passenger steamship connections from Balboa to San Francisco, thence to other ports on the north Pacific coast, are afforded at present by the Pacific Mail Steamship Company, the Johnson Line, the Panama Pacific Line, and the coastal service of W. R. Grace and Company.

The Pacific Mail has sailings about every 10 days for San Francisco, with calls enroute at Puntarenas, San Juan del Sur, Corinto, Amalpa, La Union, La Libertad, Acajutla, San José de Guatemala, Champerico, Ocos, Salina Cruz, Acapulco, Manzanillo, San Blas, and Mazatlan. This trip requires about 26 days.

The Johnson Line of Swedish vessels, operating through the Canal between Europe and the north Pacific coast of the United States, sends a vessel through the Canal to San Francisco about every two months. The trip from Balboa is made in approximately 12 days. The next sailing in this service will be that of the *Margaret*, leaving Balboa about May 26.

The Panama Pacific Line operates the *Finland* and the *Kroonland* on trips from New York to San Francisco, and return, with a vessel each way about every three weeks. The voyage from Balboa to San Francisco is made in about nine days. The next sailing from Balboa will be that of the *Kroonland*, about May 28.

Grace and Company maintain an irregular service with a vessel plying between San Francisco and Valparaiso, with calls at Balboa and other way ports. The vessel makes a round voyage about every 10 weeks. The next date of sailing can not be given at this time, and those interested should inquire of the agent.

The northward sailings of the South American service of the Toyo Kisen Kaisha, calling at Balboa, go only as far as Manzanillo, before veering off across the Pacific to Honolulu and the Far East. The southward sailings call at Los Angeles and proceed down the coast as far as Coronel, calling at Balboa.

The Pacific Mail Steamship Company makes a minimum rate of \$85 for carrying Canal employes to San Francisco as first class passengers. The local office of W. R. Grace and Company states that the Grace Line, the Johnson Line, and the Toyo Kisen Kaisha, for all of which W. R. Grace and Company are agents, will make approximately the same prices as the Pacific Mail for equal voyages, but that specific rates for sailings may be had on application. The Panama Pacific Line offers to carry first class passengers from Balboa to San Francisco for four-fifths of the charge for similar accommodations from New York to San Francisco. The minimum first-class rate from New York to San Francisco on this line is \$125, which would make the minimum from Balboa to San Francisco \$100. The Isthmian agents for

the Panama Pacific Line are W. Andrews and Company, Colon. The executive office has taken up with the several lines the matter of special rates for Canal employes.

Revised Rates on United Fruit Company's New York Division.

As stated in THE CANAL RECORD of February 17, all of the steamers of the United Fruit Company's line plying between Colon and New York are to be operated exclusively on the *a la carte* system of meal service after May 1. This went into effect with the sailing of the *Carillo* from New York on Wednesday, May 5.

Under this plan, fares cover transportation and stateroom accommodations only, meals being charged for extra. The company has accordingly discontinued its flat rate of \$56.25 between Colon and New York, including meals, for employes of The Panama Canal and Panama Railroad Company. For the former reduced rate it has substituted a reduction of 25 per cent from the minimum tariff for Canal employes and their families, for rooms without bath. If accommodations are desired in rooms with bath or in a suite, the difference between the minimum tariff fare and fare for rooms desired will be charged.

The minimum tariff fare on the *Almirante*, *Carillo*, *Santa Marta*, and *Zacapa*, is \$57.50, which makes the fare for Canal employes \$43.15 in minimum priced accommodations. The tariff minimum on the *Calamares*, *Pastores*, *Tenadores*, and *Metapan* is \$65, which makes the fare for Canal employes \$48.75 in minimum priced accommodations.

Passengers Coming on the "Cristobal".

The steamship *Cristobal* of the Panama Railroad Steamship Line reentered passenger service with her sailing from New York on Friday, May 14, at 6 p. m. She is carrying 129 passengers, including 75 enlisted men, and 3,020 tons of cargo and is due to arrive at Cristobal on May 21.

New Coach Rates in Effect.

The new and additional coach rates between points in Ancon, Balboa, Fort Amador, and the city of Panama, approved by the Governor and published in THE CANAL RECORD of April 28 and May 5, have been adopted by the municipality of Panama and promulgated by the alcalde of the city as decree No. 32, dated April 29, 1915.

Rent Collections in March and April.

Collections of rent on quarters occupied by employes of The Panama Canal and Panama Railroad Company on the Isthmus during the month of March amounted to \$23,088.22.

During April the collections amounted to \$21,610.41.

Family Quarters.

Applications for married quarters on file on April 30, 1915, were as follows:

STATIONS.	Number of applications.
Ancon.....	269 (108)
Corozal.....	48 (2)
Paraiso.....	121
Gatun.....	11 (3)
Cristobal.....	77 (32)
Total.....	526 (145)

NOTE—The figures in parentheses show the number of applicants already occupying regular or non-house-keeping family quarters at stations other than those at which applications are filed.

OFFICIAL CIRCULARS.

Assignment of Gold Family Quarters.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., May 12, 1915.
CIRCULAR No. 627-8:
Circular No. 627-5, dated March 12, 1915, is amended as follows:

1. An applicant on the waiting list for family quarters, when he becomes eligible for assignment, will be given an opportunity to refuse three separate and distinct tenders. If he does not accept the third tender, his application will be cancelled and he will not be allowed to file a new application for similar quarters for a period of 10 days.
2. When an employe forfeits family quarters through failure to occupy them within the time limit, he will not be allowed to file a new application for a period of 10 days.

CHESTER HARDING,
Acting Governor.

Acting Auditor.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., May 15, 1915.
HEADS OF DEPARTMENTS AND DIVISIONS:
Effective May 17, Mr. Ad. Faure will act as Auditor of The Panama Canal during the absence of Mr. H. A. A. Smith from the Isthmus.

CHESTER HARDING,
Acting Governor.

Designing of Buildings.

THE PANAMA CANAL,
BUILDING DIVISION,
BALBOA HEIGHTS, C. Z., May 10, 1915.
To all concerned—Effective at once the design of all buildings and like structures now being handled under the direction of the architect will be divided into two sections.

Architect Hiltt will continue in charge of the direction of all studies, architectural designs and plans, and all details exclusive of reinforced concrete work. Mr. T. C. Morris, acting office engineer, will have charge of all engineering designs, including the detail of same, covering reinforced concrete footings, columns, slabs, and all members requiring analysis. This work shall be carried along in collaboration with Architect Hiltt.

GEO. M. WELLS,
Resident Engineer.

Approved:
CHESTER HARDING,
Acting Governor.

Accountable Official.

THE PANAMA CANAL,
OFFICE OF THE AUDITOR,
BALBOA HEIGHTS, C. Z., May 1, 1915.
CIRCULAR No. 93:
Effective May 1, 1915, Capt. Theodore H. Dillon is designated an accountable official of The Panama Canal, vice Mr. T. W. McFarlane.

H. A. A. SMITH,
Auditor, The Panama Canal.
Approved:
CHESTER HARDING,
Acting Governor.

Stander Bunks on the "Colon."

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., May 12, 1915.
HEADS OF DEPARTMENTS AND DIVISIONS:
Arrangements have been made to place 75 stander bunks on the steamship *Colon*, sailing Saturday, May 22, for the accommodation of male first-class passengers. Employes wishing to take advantage of such accommodations should submit their applications promptly.
W. P. COPELAND,
Acting Executive Secretary.

Superintendent of Municipal Work.

THE PANAMA CANAL,
DIVISION OF MUNICIPAL ENGINEERING,
BALBOA HEIGHTS, C. Z., May 10, 1915.
To all concerned—Mr. W. J. Spalding is appointed superintendent of the southern district of the Municipal Division, effective May 10, 1915, and will have local charge under the Municipal Engineer of the work of the Municipal Division in the city of Panama and in the Canal Zone south of Darien. The operation of the purification plant at Miraflores continues under the supervision of Mr. Geo. C. Bunker, physiologist.
DAN E. WRIGHT,
Municipal Engineer.
Approved:
CHESTER HARDING,
Acting Governor.

Act of Congress.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., March 22, 1915.
CIRCULAR No. 600-18:
HOSPITAL CARE FOR GARRISONS.
The extracts from an Act of Congress quoted below are published for the information of all concerned.
GEO. W. GOETHALS,
Governor.

AN ACT making appropriations to supply deficiencies in appropriations for the fiscal year 1915, and for prior years, and for other purposes.
Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, to supply deficiencies in appropriations for the fiscal year 1915 and for prior years, and for other purposes, namely:

*	*	*	*	*	*	*	*
WAR DEPARTMENT.							
*	*	*	*	*	*	*	*
MEDICAL DEPARTMENT.							

Hospital care, Canal Zone garrisons: For paying The Panama Canal such reasonable charges, exclusive of subsistence, as may be approved by the Secretary of War for caring in its hospitals for officers, enlisted men, military prisoners, and civilian employes of the Army admitted thereto upon the request of proper military authority, \$4,000: *Provided*, That the subsistence of the said patients, except commissioned officers and acting dental surgeons, shall be paid to said hospitals out of the appropriations for subsistence of the Army at the rates provided therein for commutation of rations for enlisted patients in general hospitals. *Provided further*, That of this sum \$2,000 shall be available to pay The Canal for similar services rendered during the month of June, 1914.

Approved, March 4, 1915.

JOINT LAND COMMISSION.

Notices of Awards.

In the matter of the claim of Narciso Garay, attorney-in-fact for the Hurtado family, for property designated as "Cardenas y la Ramona," award No. 82, docket No. 295, May 3, 1915—The claim of the Hurtado family, represented by Narciso Garay as attorney-in-fact, docket No. 295, for the estate of Cardenas and La Ramona, came before the Commission for public hearing on February 17, 1915, the hearing being concluded on March 4.

At the time this claim was filed, the extent of the properties claimed was not given by the claimants. At the hearing, the attorneys for the United States introduced two maps, Nos. 3840 and 3841, showing the properties claimed by the Hurtado family as consisting of some 796 hectares, which was accepted by the claimants. During the hearing of this claim, it developed that there were adverse claims of other private parties as to the ownership of certain portions of the land claimed by the Hurtado family.

Plea to the jurisdiction of the Commission to pass upon such conflicting claims of private parties was filed by counsel for the Schubert family, one of the adverse claimants to the property under adjudication; and the Commission, after considerable discussion of this question, agreed that it should not pass upon the adverse claims of private parties to the same property, and that the rights of such adverse claimants should be determined before a court of competent jurisdiction or by private agreement between the parties before appearing before the Commission for the adjudication of their respective rights in the premises. Under this rule, which the Commission announced it would follow in its proceedings, an agreement was reached between Mr. Narciso Garay, the attorney-in-fact for the Hurtado family, and Dr. Daniel Ballen, attorney-in-fact for Mr. John J. Gibbons, one of the adverse claimants to a portion of the land claimed by the Hurtado family, that the area of this disputed tract enclosed in the following boundaries be ascertained by the Commission and divided in equal parts between the said two parties, the Hurtado family and John J. Gibbons:

"Starting from the point where the Cruces road crosses the Cardenas River and then following the Cruces road in a general northerly direction as far as the point where it crosses the Dominica Creek, and thence downstream as far as the point where it crosses a certain straight imaginary line drawn from the point of beginning to the top of Dominica Hill, and thence from the said point of intersection in a general southeasterly direction in a straight line to the starting point."

By consent of all the parties, the Commission designated Mr. B. B. Alexander, a civil engineer in the employ of The Panama Canal, to determine the area of the tract of land described above, who later reported to the Commission that it contains 108.5 hectares.

There was also an adverse claim made by the Schubert family to a tract of land bounded as follows, a portion of which land is also claimed by the United States and the Panama Railroad Company:

"Beginning at the summit of Corozal Hill and running in a straight line to the point at which the Asiento Viejo Creek crosses the Cruces road, thence in a general northerly direction along the Cruces road to the point at which the Cruces road crosses the Cardenas River, thence in a general westerly direction downstream of the Cardenas River on the left bank thereof to the point of juncture of the Cardenas River and the Rio Grande River, thence in a straight line from the point last mentioned to the summit of Corozal Hill, the point of beginning; excluding therefrom the tract of land comprised within the line running from the point of juncture of the Cardenas and Rio Grande Rivers to the summit of Corozal Hill and the Cardenas River at a point from said juncture of the two lines last mentioned to the point on said river and line where the old line of the Panama Railroad Company crosses both river and line, said to have been purchased by the old French canal company from the Hurtado family in 1883."

By consent of all the parties, the Commission designated Mr. B. B. Alexander to determine also the area of the tract of land above described, who reported that the area of this tract is 364 hectares, exclusive of the tract specially excepted above in the last part of the description, which contains three hectares. The Commission will make no award for damages in the matter of the 364 hectares of land above described until after the parties shall have settled the question as to what rights if any they or each of them may have therein, either before a court of competent jurisdiction or by agreement, as they may see fit.

An award is hereby made against the United States in favor of José Marcelino Hurtado, Manuel José Hurtado, Amalia Hurtado de Bidwell, Carmen Hurtado de Hurtado, and Manuela Hurtado de Santa Maria, in the sum of \$32,100, United States currency, for all their right, title, interest, and claims to that portion of the estate of Cardenas situated within the following boundaries and to which no adverse claim of title has been made either by the United States or by private parties:

"Starting at junction of Cameron and Dominica, going upstream to the Cruces trail, thence along the Cruces trail to the crossing of the Cardenas River, thence down the Cardenas to a point which is 5,675 feet from the old line of the Panama railroad in the direction N. 36° 10' E. from a point on the railroad 172 feet north of the north end of old bridge No. 62 (over Cardenas River), thence N. 54° 58' W. for 950 feet, thence S. 56° 50' W. for 1,275 feet, thence S. 86° 25' W. for 4,750 feet to a point 100 feet from the center line of the Panama railroad in a line at right angles to it, thence paralleling said railroad 100 feet to north, around a 1° 55' 55" curve for 550 feet, thence along a line N. 4° 53' W. to the junction of the Cameron and Dominica Rivers, the point of beginning."

It being understood that there is deducted from the above all claims to the 54.25 hectares ceded by the Hurtado family to Mr. John J. Gibbons in accordance with the agreement above referred to, and damages for said 54.25 hectares will be awarded to Mr. John J. Gibbons when his claim, docket No. 1365, for the lands of "Guayabal" comes on for hearing in regular order.

The payment of this award to the Hurtado family as above named, or tender of payment thereof, shall be made on or before the 3rd day of June, 1915, and if payment or tender of payment of this award is not made on or before that date, such award shall thereafter bear interest at the rate of six per centum per annum until paid.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, *Commissioners.*

Joint Land Commission Calendar.

Following is a calendar of claims set for hearing in the week ending May 29:

Monday, May 24—Argument on motion of J. H. Stilson, by C. P. Fairman, to set aside order of the Commission denying motion for reconsideration of his claim for lands of Barro Colorado Abajo, docket No. 447; same, for motion of Columbian Fruit Company, docket 448; docket 835, Wm. Douglas; docket 836, Geo. Lewis.

Tuesday, May 25—Docket 837, Mrs. R. Maitland; docket 838, Rebecca Jackson; docket 839, C. A. Baquie; docket 840, Wm. Morris.

Wednesday, May 26—Docket 841, Ezequiel Carmichael; docket 842, Uriah Scott; docket 851, Antonio Baldeo; docket 852, Manuela Geo. de Iglesia.

Thursday, May 27—Docket 854, Clarence McMackin; docket 855, Antolino Garcia; docket 866, Gumercinda Iglesias; docket 867, Abraham Johnson.

Friday, May 28—Docket 873, Jas. Osborne; docket 877, Mrs. Ann Williams; docket 879, Loice Lochel; dockets 880 and 1595, Juan (Aparicio) Aparicio.

WILLIAM TAYLOR,
Secretary.

COMMISSARY DEPARTMENT.

Commissary Hours.

The commissary stores at Las Cascadas, Empire, and Culebra are open from 7.30 to 11.30 a. m., and 1.30 to 5.30 p. m.
 The commissary store at Balboa is open from 8 a. m. to 12.30 p. m., and 2.30 to 6 p. m.
 All other commissary stores are open from 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.
 The gold departments of the Cristobal store will open at 2 p. m. on Saturdays and other sailing days of Panama railroad vessels.

Cold Storage Prices.

The following is a list of retail prices of cold storage provisions which will be effective May 20, 1915:

FRESH MEATS.	
	Price.
Mutton—Stewing, per pound	9
Shoulder, trimmed, per pound	12
Leg (8 to 10 pounds), per pound	19
Short cut, chops, per pound	23
Shoulder, chops, per pound	14
Lamb—Stewing, per pound	12
Shoulder, trimmed, per pound	15
Leg (5 to 8 pounds), per pound	24
Chops, per pound	29
Chops, shoulder, per pound	18
Veal—Stewing, per pound	12
Shoulder, for roasting (not under 4 lbs.), per pound	15
Chops, shoulder, per pound	20
Chops, per pound	30
Loin for roasting, per pound	30
Cutlets, per pound	36

The prices of fresh beef have not changed since their publication in THE CANAL RECORD of May 12.

MISCELLANEOUS.

Brains, calves', per pound	10
Calves' head, each	80
Kidneys, beef, per pound	11
Livers—Beef, per pound	*10
Calf, each	70
half, each	35
Steak—Hamburger, package	17
Hamburger, 20-pound containers, per pound	14
Sausage—Bologna, per pound	11
Frankfurter, per pound	11
Frankfurter, imported, tin	14
Lieberwurst, per pound	10
Pork, per pound	*14
Sweetbread, beef, per pound	20
Eggs, fresh, per dozen	29
per 1/2 dozen	15
Bluefish, per pound	10
Halibut, fresh, per pound	15
Salmon, per pound	15
Yeast, per pound	31
per cake	2
Pate de foies gras, per jar	50

CURED AND PICKLED MEATS.

Beef—Corned, No. 1, per pound	18
No. 2, per pound	15
Ham—Real York and Cumberland, per pound	43
Genuine Westphalia, per pound	50
Minceed, "Bologna style," per pound	13
Sugar cured, boneless, whole, per pound	*21
Sugar cured, whole, per pound	18
Half, per pound	20
Sliced, per pound	24
Hocks, per pound	10
Butt end, per pound	12
Whole, boiled, per pound	25
Half, boiled, per pound	27
Sliced, boiled, per pound	33
Hocks, boiled, per pound	10
Shoulders, sugar cured, whole shoulder, per pound	14
Bacon—Breakfast, sliced, per pound	26
Whole piece, per pound	25
Strips, whole, per lb.	19
Sliced, jar	*30
Ham, lunch, per pound	40
Pork, salt, family, per pound	14
Ox tongues, whole, 3 to 5 lbs., per pound	24
Pigs' feet, per pound	*8
Tongues, per pound	22

POULTRY AND GAME.

Chickens—Fancy, roasting, milk fed, per pound	27
Chickens—Fancy, roasting, corn fed, per pound	25
Fowls, per pound	24
Fowls, light, per pound	21
Ducks, Western, per pound	22
Capons, per pound	32
Broilers, milk fed, per pound	32
Broilers, corn fed, per pound	28
Turkeys, per pound	28
Squabs, each	40
Geese, per pound	19
Grouse, each	1.00
Mallard ducks, 2 to 2 1/2 pounds, each	2.35
Pheasants, each	1.35

DAIRY PRODUCTS.

Butter—Creamery, special, per pound	*43
Sheffield Farms, extra fancy, per lb.	58
Cheese—Philadelphia cream, cake	9
Roquefort, per pound	41
Young America, per pound	22

	Price.
Swiss, per pound	30
Edam, each	90
Edam, tin	29
Parmesan, per pound	38
Gouda, per pound	26
Snappy, per cake	9
Milk, Sheffield Farms, per quart	**15
Fermeilac, bottle	**25
Ice cream, quart	125
1/2-gallon	150
Cream, 30 per cent, quart	**45
pint	**23
1/2 pint	**12

VEGETABLES.

Beets, per pound	2
Cabbage, per pound	13
Carrots, per pound	2 1/2
Celery, per head	6
Lettuce, per pound	*16
Onions, per pound	4
Parsley, per pound	12
Parsnips, per pound	4
Peppers, green, per pound	12
Plantains, per dozen	15
Potatoes, white, per pound	7
Rhubarb, per pound	1 1/2
Turnips, per pound	*3
Tomatoes, per pound	*12
Yams, tropical, per pound	2

FRUITS.

Apples, per pound	5
Grape fruit—Select, each	5
Tropical, each	3 1/2
Lemons, per dozen	*11
Limes, per 100	75
Oranges—Select, each	2
Tropical, per dozen	12
Coconuts, each	4
Bananas, per bunch	38
Bananas, each	1 1/2
Apples, evaporated, per pound	12
Pears, evaporated, per pound	13
Pineapples, each	10
Figs, dried, 12-oz. package	14
Figs, dried, 5-oz. package	5
Raisins, seedless, package	10
table, cluster, per pound	20
Prunes, stewing, per pound	12
Aligator pears, tropical, each	5

* Indicates advance from preceding list.
 **Indicates five cents allowed for return of bottle.
 † Indicates reduction from preceding list.
 ‡ Sold only from commissaries, no orders taken for delivery.
 § Not less than 1/2 ham or 1/2 shoulder of fresh pork will be sold.

Price Changes.

The following changes in prices of articles in stock at the commissary stores became effective May 15, 1915:

ARTICLE.	PRICE CHANGE.	
	Old.	New.
Cigars, Brevas, No. 2, Havana, ea.	.07	.09

Shoes, men's, pr	3.75	4.25

Sale of Corrugated Floor-tyle.

THE PANAMA CANAL,

OFFICE OF CHIEF QUARTERMASTER,

BALBOA HEIGHTS, C. Z., May 17, 1915.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m. May 27, 1915, and then opened for the purchase of any or all of a lot of Floor-tyle, approximately 11,680 lineal feet, now stored at Mount Hope depot. This material may be examined and full information obtained upon application to the Sales Agent, Mount Hope, C. Z.

Proposals must be accompanied by certified check, post-office money order, or cash, for five per cent of the amount bid.

The Panama Canal reserves the right to reject any or all bids.
 Bids should be marked "Proposals for purchase of corrugated Floor-tyle" and addressed to the Chief Quartermaster, Balboa Heights, C. Z.

WM. K. GROVE,
 Chief Quartermaster.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., May 17, 1915.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts and may be procured upon request of the addressee:

SHIPPING INFORMATION.

June Weather Probabilities.

The following weather conditions may be expected to prevail at the Canal entrances during the month of June, 1915. The probabilities are based on the records at Colon and Ancon for the past seven and eight years, respectively.

Winds—Light variable winds will prevail over the Atlantic coast, southeast predominating. The average hourly velocity will be about seven miles an hour, although during rain or thunder squalls a velocity of from 26 to 30 miles an hour may be expected.

On the Pacific coast and over the interior, light northwest winds will prevail with a considerable percentage of variable wind, and an average hourly velocity of about six miles an hour. Here too, during occasional rain squalls, the maximum wind velocity may be as high as 30 miles an hour, but these storms are invariably of short duration.

Rain—Rainy season conditions will continue during the month of June and heavy showers may be expected on both coasts, and over the interior. The average rainfall at the Atlantic entrance to the Canal for June is 13.38 inches and at the Pacific entrance, 8.10 inches, averages being for a period of 44 and 17 years, respectively. The average number of rainy days (a "rainy day" being one on which 0.01 inch or more of rain is measured), is 24 on the Atlantic coast and 20 on the Pacific side, while the average number of days on which the rainfall equals or exceeds one inch (1.00) is five and two, respectively.

Fogs—No fogs are likely to occur over the Pacific coast, and at the Atlantic entrance to the Canal only two fogs have been observed during the month of June during the past seven years. Night and early morning fogs will be numerous over the interior. The average number of nights with light or dense fog over the Gaillard Cut section of the Canal is 21. All fogs can be expected to lift or become dissipated by 8.30 a. m., and under the present operating conditions they will not constitute a hindrance to the navigation of the Canal.

Temperature—The average shade air temperature will be approximately 80° Fahrenheit at both the Atlantic and Pacific entrances to the Canal. The maximum temperature is not likely to be over 95°, or the minimum temperature lower than 70°. The mean daily range in temperature is greater on the Pacific coast than on the Atlantic coast, and will probably be about 10° F., and 9° F., for the respective sides.

Barometric pressure—Fluctuations in atmospheric pressure are so slight, except for the well-marked diurnal change, and local barometric readings so uniform from day to day, that they are of little value in forecasting weather conditions on the Isthmus. The average sealevel pressure for the month of June should be about 29.84 inches. The maximum reading for the month may not be expected to exceed 29.94 inches, or the minimum to be less than 29.71 inches, at either Canal entrance.

Storms—Local rain and thunder storms are very frequent during the month of June. The average number of days on which thunder storms have occurred is 18 on the Pacific coast and 17 on the Atlantic side. During these thunder squalls comparatively high wind velocities may be attained, but these storms are of too short duration to cause a

rough sea. Generally cloudy weather, with smooth to moderate seas, can be expected at both Canal entrances.

Tides—No consideration need be given to tidal fluctuations in navigating the Atlantic entrance to the Canal, as the average tidal range at Colon is less than one foot, and the maximum range approximately two feet.

An average tidal range of about 13 feet may be expected at the Pacific entrance and a maximum range of 20 feet sometimes occurs during spring tides.

Panama (Balboa) tide predictions are given below:

Tide Predictions.

Panama (Balboa) tide predictions for the next five weeks are given in the following table:

MAY.

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region,

and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47 p. m.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans for all States. Due at New Orleans on the following Tuesday.

Every Saturday to New York, for all States. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.*

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*NOTE.—The sailings on Monday, May 31, and June 27, will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4 leaving Panama at 7.10 a. m., connects with the despatches for the two sailings mentioned above.

Fuel and Supplies.

Firms sending their vessels to the Canal do not need to employ agents on the Isthmus to take care of their interests in regard to the payment of tolls and minor charges.

Delays and expense may be avoided by doing business direct with The Panama Canal. The Canal organization has been developed to handle vessels with all possible despatch, and to attend to their wants fully in the matter of supplies, fuel, water, repairs, etc., to the extent of the available facilities.

Deposits to cover tolls or the purchase of supplies may be made with any of the Assistant Treasurers of the United States, who are to be found at the larger seaports, or with the Assistant Auditor of The Panama Canal at Washington, D. C. As soon as these deposits are made, cable information is sent to The Panama Canal.

It is advisable that deposits be made somewhat in excess of the anticipated charges, to cover minor charges which may not have been anticipated, such as pilotage and towage. Pilotage is at the rate of \$1 per foot of maximum draft, but is not charged on a vessel which makes the transit of the Canal without taking on or discharging freight or passengers in a terminal port. Tug service, which is at the rate of \$15 per hour, will not be charged on vessels of less than 15,000 gross tonnage.

It has been arranged that when a deposit has been made with The Panama Canal, either direct or through an Assistant Treasurer of the United States, to cover the tolls or other bills of a vessel making the transit of the Canal, the Collector shall forward to the depositor immediately after the vessel clears, a copy of its bill, a statement of the account, and a draft for the balance due to the depositor.

Should the depositor request, however, that any balance be left to his account, to be applied on future charges, the Collector will be governed accordingly. In such a case he will forward immediately a copy of the vessel's bill and a statement of the account, specifying, of course, the balance to the credit of the depositor.

This arrangement has been made to put the steamship operator's dealings with the Canal on the simplest basis. Except that the Government requires payment in advance, which not all commercial firms do, the transaction is exactly analogous to a purchase in a store; with the delivery of the goods, the patron receives his change, or, if he prefers, may have it credited to his account.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 400 and 650 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa or Cristobal from plants of The Panama Canal or from private corporations. The present price from the Canal is \$1.25 per barrel.

(Continued on page 350.)

(Continued from page 349.)

Diesel engine oil is for sale by several companies, at approximately 45 shillings per ton of seven barrels.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light, and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa.

The cable address of The Panama Canal, on the Isthmus, is "Panacan, Panama;" in the United States, "Panacan, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C." for delivery in the United States.

CANAL

RECORD

Volume VIII.

BALBOA, CANAL ZONE, WEDNESDAY, MAY 26, 1915.

No. 40.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly. The subscription rate is \$1 per year in the United States and its possessions, and in Canada, Cuba, Mexico, and Panama (domestic postage), and \$1.50 in other countries (foreign postage). The paper is furnished free to United States Government departments, representatives of foreign governments, public libraries, and employes of The Panama Canal and the Panama Railroad Company whose names are on the gold roll.

All subscriptions expire on December 31. Domestic subscriptions are accordingly charged as beginning from the first of the quarter of the year in which received. Remittances should be made to pay only to December 31, on this basis: Sent between April 1 and July 1, 75 cents; July 1 to October 1, 50 cents; October 1 to January 1, 25 cents. For foreign subscriptions the year is divided into thirds: Between January 1 and May 1, \$1.50; May 1 to September 1, \$1; September 1 to January 1, 50 cents.

Remittances for subscriptions may be forwarded to The Panama Canal, Washington, D. C., or to The Canal Record at the address given below.

Address all Communications,
THE CANAL RECORD,
 Balboa Heights, Canal Zone,
 Isthmus of Panama.

NOTES OF PROGRESS.

Collier "Ulysses" Again in Port.

The Canal collier *Ulysses* arrived at Cristobal on Tuesday, May 25, with 12,000 tons of coal, having sailed from Norfolk on May 19. This is the second voyage of the *Ulysses*. On the first, the vessel cleared from Norfolk on April 21 and arrived at Cristobal on April 27; she cleared from Cristobal on May 9, and thus began the return trip within 10 days after departure, and was back at Cristobal again in slightly over two weeks.

The "Hesperos" Calls at Balboa for Coal.

The Norwegian steamship *Hesperos* arrived at Balboa in the afternoon of Monday, May 17, and sailed on May 19, on her way from Mejillones to San Francisco. The call at Balboa was for the purpose of taking on 450 tons of coal, and some commissary supplies. The *Hesperos*, which is operating under a 6-year charter to the E. I. Dupont de Nemours Company, powder makers, is carrying 8,028 tons of nitrates. The distance from Mejillones to Balboa is about 2,200 miles, and that from Balboa to San Francisco about 3,277 miles, the total route of the *Hesperos* being thus approximately 5,477 miles, or about 707 miles more than the direct sailing from Mejillones to San Francisco.

Piles Driven for New Quarantine Landing.

The driving of the pipe piles for the trestle of the new quarantine landing at Balboa was completed on Thursday, May 20, after 12 days of driving. The work of cutting off the tops of the piles to even elevation was immediately begun, using an oxy-acetylene torch, and finished on May 21. The torch was able to cut some of the pipes, 14 inches in diameter and $\frac{3}{8}$ -inch in thickness, in four minutes. The

placing of reinforcement for the concrete in the casings was begun on May 22.

In driving the pipe it was necessary to fill them with concrete for about two feet above the bottom of the cap, to weight the hollow piles to the sinking point. In order to give them the required batter, the piles were driven through a guide frame, built of timber and ballasted, which was sunk at the point of driving. After it was placed in approximate position movable guides were adjusted for exact regulation. This frame, 24 feet high by 20 feet long and 12 feet wide, was handled from place to place by derrick barge No. 156, which also operated a steam hammer to drive the piles.

"Cristobal" Will Sail Next Wednesday.

The steamship *Cristobal* of the Panama Railroad Steamship Line, recently returned to passenger service, will make her first sailing from the Canal Zone with passengers on Wednesday, June 2, sailing from Dock 9 at Cristobal at 3 p. m. She can accommodate 76 first-class passengers, and 52 in the steerage.

Shipment from British Guiana through the Canal.

The steamship *Student* of the Harrison Line, which arrived at Cristobal on Sunday, May 23, from Liverpool, via Trinidad, and entered the Canal the same day on the way to Los Angeles, is carrying, in a cargo of about 4,000 tons, 1,906 tons of refined emerara sugar from British Guiana for discharge at Los Angeles, San Francisco, Seattle, and Vancouver. This is the largest single shipment of a product of northeast South America which has passed through the Canal.

Train Service on May 31.

To all concerned—Monday, May 31, being observed as a legal holiday, trains Nos. 11 and 12, scheduled to run on Sundays only, will run on that day. Otherwise the regular week-day schedule will be in effect.

C. H. MOTSETT,

Superintendent, Panama Railroad.

BALBOA HEIGHTS, C. Z., May 26, 1915.

Special Launch Service for Decoration Day Holiday.

In connection with the Decoration Day holiday, to be observed on Monday, May 31, the regular schedule of launches to Balboa will be supplemented on Saturday, May 29, by a boat leaving the dredge landing at Balboa at 1.30 p. m., with which passengers coming on the noon train may connect, and a boat leaving the dredge landing at 7.30 p. m., to take persons from the evening train.

The following is the regular schedule, in addition to which the special launches will be operated:

Leave Balboa dredge landing—Daily, except Thursday, at 5.30 p. m.; Monday, Thursday, Saturday, and Sunday, at 9.40 a. m.

Leave Taboga—Daily, except Friday, at 7 a. m. (On Mondays and days following holidays, one hour earlier); Monday, Thursday, and Saturday at 1.30 p. m.; Sunday at 7.15 p. m. The 9.40 a. m. trips from Balboa await the arrival of Panama railroad trains.

CANAL TRAFFIC IN APRIL.

Exceeds Previous Months' Excepting March.—
 Summary of Movements.

Traffic through the Canal during the month of April was not as great as during the preceding month. In April 119 oceangoing vessels passed through the Canal, carrying an aggregate of 522,841 tons of cargo. In March 136 vessels carried 635,057 tons. The average daily transit of cargo during April was 17,428 tons, as compared with 20,485.7 tons in March.

The traffic in April, however, exceeded that in all preceding months except March. Summaries of the traffic eastbound, or from Pacific to the Atlantic, and westbound, from Atlantic to Pacific, are given herewith, in comparison with the movements during previous months:

Month	Eastbound.		Westbound.		Total.	
	Ves-sels.	Cargo.	Ves-sels.	Cargo.	Ves-sels.	Cargo.
Aug...	12	57,182	12	49,106	24	106,288
Sept...	30	186,776	27	135,262	57	322,038
Oct...	40	252,288	44	168,069	84	420,357
Nov...	38	242,291	54	206,510	92	448,801
Dec...	57	261,680	42	177,235	99	438,915
Jan...	54	240,875	44	208,082	98	448,957
Feb...	53	274,619	39	149,987	92	424,606
Mar...	80	417,610	56	217,447	136	635,057
April...	60	285,457	59	237,384	119	522,841
Total	424	2,218,778	377	1,550,082	801	3,768,860

Thirteen of the vessels passing through the Canal in April were in ballast. The average loading for the 106 vessels carrying cargo was 4,932 $\frac{1}{2}$ tons.

To May 1st, 70 vessels, not including launches, which are not included in these summaries, had passed through the Canal without cargo, and 731 had carried cargo through the Canal.

The numbers of laden and ballast vessels using the Canal each month since its opening to commercial traffic on August 15, 1914, the average amount of cargo in each of the laden vessels each month, and the average daily transit of cargo are given in this table:

	Bal-last	Lad-en	Average loading	Daily movement
August	4	20	5,314.4	6,643.0
September	8	49	6,572.2	10,734.6
October	12	72	5,838.3	13,559.9
November	7	85	5,280.0	14,960.0
December	6	91	4,724.3	14,190.8
January	6	92	4,879.9	14,482.5
February	4	88	4,825.1	15,164.5
March	10	126	5,040.1	20,485.7
April	13	106	4,932.5	17,428.0

The average loading for all of the 731 laden vessels which have made use of the Canal, up to May 1, 1915, has been 5,155 $\frac{1}{2}$ tons.

The tolls earned during the month of April amounted to \$142,415.49. The levy by months has been:

Prior to July 1, 1914	\$14,618.68
July	7,598.40
August	88,401.80
September	268,208.64
October	375,787.44
November	381,533.28
December	410,043.60
January, 1915	419,037.12
February	385,904.96
March	560,784.96
April	442,415.49

Total 3,352,334.37

Tolls collected in April amounted to \$420,-884.69, making the total collections to May 1, less refunds, amount to \$3,274,565.57.

The cargo was carried over five principal routes, as follows:

Route.	Tons of Cargo.	
Coastwise, eastbound	80,660	
Coastwise, westbound	121,064	
Total		201,724
U. S. Pacific coast to Europe	40,556	
Europe to United States	14,038	
Total		54,594
South America to Europe	54,541	
Europe to South America	6,477	
Total		61,018
South America to United States	88,262	
United States to South America	28,993	
Total		117,255
United States to Far East	61,512	
Far East to United States	16,438	
Total		77,950
Miscellaneous westbound	5,300	
Miscellaneous eastbound	5,000	
Total		10,300
Grand total		522,841

The miscellaneous westbound routing was that of the *Llandudno*, carrying 5,300 tons of coal from Cardiff to unknown destination in the Pacific Ocean. The eastbound cargo not classified on the five principal routes consisted of 5,000 tons of lumber, shipped on the *Thor* from Astoria to Quebec.

Cargo declarations made by the masters of vessels passing through the Canal during April listed 111 commodities; of these, 20 were carried through the Canal in both directions. Distribution of the principal commodities was as follows:

Cacao amounted to 6,537 tons, of which 91 tons were shipped from the Atlantic to the Pacific coast of the United States, and 6,446 tons originated on the west coast of South America, for shipment to Europe and the United States.

Canned fish included 50 tons from Christiania to Chile, 50 tons from Guayaquil to Europe, and 5,544 tons from Vancouver, Seattle, Portland, Astoria, and San Francisco, shipped to London and New York, the latter port receiving 1,000 tons.

Coal shipments amounted to 14,716 tons: 1,000 tons from Norfolk to Peru and Chile, 1,821 from Baltimore to Seattle, 6,595 from Newport News to San Francisco, and 5,300 tons from Cardiff to the Pacific Ocean. No coke was shipped through the Canal during the month.

Copper amounting to 1,213 tons was shipped from Seattle, 13 tons to London and 1,200 tons to New York; 5,766 tons were shipped from various ports on the west coast of South America, for Europe and the United States.

One thousand tons of flour passed through the Canal from New York, 200 tons consigned to Cruz Grande, 200 to Sydney, and 600 to United States ports; and 14,407 tons were shipped from Seattle and Tacoma to Europe.

Gasoline shipments amounted to 6,462 tons; 600 tons were from New York for Dalney and Tien Tsin, and 177 tons from New York for the west coast of South America; while a single eastbound shipment of 5,685 tons, on the *Luz Blanca*, was in transit from Talara to London.

Goods classified as general cargo amounted to 167,385 tons, of which 118,556 tons were shipped from the Atlantic to the Pacific, and 48,829 tons eastward. In the westward traffic, 68,271 tons were in the United States coast-

wise trade; 22,515 tons were shipped from New York to South and Central America; 23,873 tons were from New York for the Far East, and 3,893 tons from Europe for the west coast of the United States. In the eastward movement, 27,438 tons were in the American coastwise trade; 402 tons from the Far East for New York; 5,963 tons from Portland for Avonmouth; 6,482 tons from South America for Europe; and 8,544 tons from South America for New York.

Iron shipments amounted to 6,987 tons; 4,262 tons from New York to the American west coast; 1,800 tons from New York to Tien Tsin and Shanghai; 800 tons from New York to New Zealand and Australia; 80 tons from Liverpool to Callao; and 35 tons from Christiania to San Francisco.

Lumber amounted to 27,160 tons, shipped from the west coast of the United States and Canada; 5,010 tons went to England, 5,000 tons to Quebec, and the remainder to Atlantic ports of the United States.

Manufactured goods of iron and steel amounted to 30,234 tons, of which all but 44 tons were shipped from the Atlantic to the Pacific; 147 tons were shipped from Liverpool to South America, and 30,043 tons were shipped from Atlantic ports of the United States; of this quantity, 10,600 tons went to the Far East, 6,788 tons to South America, and the remainder to ports of the United States.

Nitrates amounted to 68,277 tons, of which 250 tons were shipped from Christiania to San Francisco, and 68,027 tons from the west coast of South America, 21,576 tons to Europe and 46,451 tons to the United States.

Of refined petroleum, 4,502 tons were shipped from Portsmouth to Los Angeles, and 22,297 tons from the Atlantic seaboard of the United States to Honolulu and the Far East; and 307 tons were carried by the *Luz Blanca* from Talara to London.

Shipments of skins and hides amounted to 4,572 tons, of which 800 tons were shipped from Shanghai to New York, and the remainder from the west coast of South America to the United States and Europe, excepting 60 tons from San Francisco to New York.

Sugar amounted to 32,668 tons; 1,001 tons from South America and 31,687 tons from the Hawaiian Islands, all consigned to New York.

Tin to the amount of 3,655 tons was shipped from New York, 1,400 tons to Tien Tsin, 40 tons to South America, and 2,215 tons to Los Angeles and San Francisco; unworked tin amounting to 717 tons was shipped from Chile to Europe and 200 tons were shipped from San Francisco to New York.

Wool amounted to 4,665 tons; 882 tons were from Chile for Europe; and 33 from San Francisco, 850 from Shanghai, and 3,000 tons from Brisbane were consigned to New York.

Detailed summary of the traffic follows:

Commodity	Atlantic to Pacific.	Pacific to Atlantic.	Total.	Remarks.
	Tons.	Tons.		
Alcohol		4	4	San Francisco to London.
Algarovilla		100	100	Valparaiso to Liverpool.
Antimony		120	120	Chile to Liverpool.
Apples		246	246	Hilo to Philadelphia.
Asphalt	85		85	New York to north Pacific ports.
Balsam		1	1	Balboa to New York.
Bismuth		59	59	Antofagasta to Liverpool.
Bathtubs	125		125	New York to Portland and Seattle.
Beans		50	50	San Francisco to New York.
Beans, lima		30	30	San Francisco to New York.
Beans, vanilla		3	3	San Francisco to London.
Borax		654	654	Chile to Liverpool.
Brass		35	35	Tacoma to Liverpool.
Cacao	91	6,446	6,537	See introduction.
Cakes, cotton seed oil		450	450	Callao to Liverpool.
Canned goods:				
Fish	50	5,594	5,644	See introduction.
Fruit		3,520	3,520	Honolulu and San Francisco to New York and London.
Miscellaneous	182	20	202	Between north Pacific ports and New York and Europe.
Cassia		100	100	Hongkong to New York.
Cement	2,110		2,110	North Atlantic to Pacific ports.
Chemicals	1,090	25	1,115	Between New York and San Francisco and Los Angeles.
Clay, fire	30		30	Liverpool to Callao.
Coal	14,716		14,716	See introduction.
Coca leaves		5	5	Salavery to Cristobal.
Coconuts		10	10	Tumaco to Colon.
Coffee	79	2,617	2,696	New York to north Pacific; south Pacific to New York.
Coin, silver	1		1	Liverpool to Panama.
Copper		9,136	9,136	See introduction.
Copper ore		836	836	Peru and Chile to New York and Liverpool.
Copra		900	900	Manila to New York.
Corn	100		100	New Orleans to Central American ports.
Corn meal	45		45	New York to San Francisco and Los Angeles.
Cotton	1,026	947	1,973	1,060 New York to Vladivostok; 879, south Pacific to Europe.
Creosote	5,000		5,000	London to Seattle.
Earthenware	78		78	New York to San Francisco and south Pacific ports.
Explosives	2,699	23	2,722	New York to north Pacific ports and Vladivostok.
Flour	1,000	14,407	15,407	See introduction.
Fruit, dried		200	200	San Francisco to Europe.
Garlic		35	35	Valparaiso to Cristobal.
Gasoline	777	5,685	6,462	See introduction.
General cargo	118,556	48,829	167,385	See introduction.
Glassware	54		54	New York to San Francisco.
Grease		15	15	San Francisco to London.
Hay		550	550	Valparaiso to Cristobal.
Hemp		784	784	Manila to New York.
Honey		56	56	San Francisco to London.
Hops		10	10	San Francisco to London.
Horns and hoofs		1	1	Callao to New York.
Indigo		1	1	Guayaquil to Cristobal.
Iodine		597	597	Valparaiso to Cristobal.
Iron	6,987		6,987	See introduction.
Iron ore		14,704	14,704	Cruz Grande to Philadelphia.
Ivory nuts		405	405	Tumaco to Cristobal.
Jute	5		5	Liverpool to Callao.

Zone boundary in Ancon; improvements in Balboa townsite; roads, walks, and grading at the Panama waterworks plant, Miraflores, and the extension of the Miraflores powerhouse for the Electrical Division.

Meteorology and hydrography—The rainfall was above normal at all stations except Miraflores and Pedro Miguel. The monthly totals ranged from 2.39 inches at Pedro Miguel to 15.90 inches at Gatun. The maximum precipitation recorded in any one day was 7.64 inches, at Gatun on April 3. The estimated rainfall over the Chagres River basin was 115 per cent above the average, or 9.98 inches against a 14-year average of 4.65 inches. The discharge at Alhajuela was 104 per cent above the 26-year April normal. The elevation of Gatun Lake varied from 86.89 feet on the 3rd to 86.37 feet on the 24th of the month, averaging 86.46 feet.

Division of Terminal Construction.
PACIFIC TERMINALS.

Shops—Building No. 30 was completed during the month, with the exception of placing the heating coil in the potash vat, and making the connection to the mixer for cutting compounds. Crane rails in buildings Nos. 1, 2, 3, 4, and 12 were levelled up, and in building No. 2 tie rods were placed between the girders of the runway extensions in order to correct the span, which was too great.

Dry dock—The proposals for the pumping plant and the flooding and sluice valves were canvassed during the month and the award made on each. The receipt of proposal drawings permitted work to proceed on drawings for the masonry of the pump well proper. The structural framing for the combined compressor and pump house was proceeded with, together with the necessary substructure. Hand excavation in connection with the work of preparing the foundations continued during the month and amounted to 4,920 cubic yards; 13,552 cubic yards of mass concrete, and 4,161 cubic yards of reinforced concrete were placed during the month. There were embedded in concrete 119,910 pounds of reinforcing steel and 40,016 pounds of anchorage rails; 83,240 pounds of fixed steel were placed, consisting of bolts, nuts, gates, anchors, etc. Work was started on the bases for the big pumps back of the suction wall.

Entrance pier—Excavation continued during the month for the foundation for the wharf along the south side of the entrance pier. The drilling of holes, grouting and placing anchor rails for the foundations was well under way, 59,200 pounds of rail having been placed. During the month a total of 614 cubic yards of concrete was placed, 576 cubic yards of which were mass and 38 cubic yards reinforced.

Coaling plant—In the coal pocket 676 cubic yards of concrete were placed, 85 of which were classified as reinforced, and 39,035 pounds of reinforcing steel were placed. Ten tons of steel were erected in the construction of the berm cranes. At the unloader wharf an incline was completed and backfill placed for a loading track, in anticipation of cutting in a steamshovel to excavate a part of the earth and rock for the emplacement of concrete for the buttresses, and in making this incline 1,816 cubic yards of fill were placed. One thousand seven hundred and seven cubic yards of concrete were placed in the floor slab of the unloader wharf and curtain walls, practically all of which was reinforced; 324.03 tons of structural steel were placed for the decking and aligned and riveted. This completes the erec-

CANAL WORK IN APRIL.

Monthly Report of the Acting Governor to the Secretary of War.

BALBOA HEIGHTS, C. Z., May 15, 1915.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of April, 1915:

Department of Operation and Maintenance.

Lock operation and maintenance.—The installation of chain fender apparatus for all locks, except the hanging of two chains at Miraflores, was completed. The grading of dams and backfill and the planting of grass at the Pacific locks progressed satisfactorily, and at the close of the month this work was practically completed at Pedro Miguel. The new air compressor plant for Pedro Miguel Lock was put into service. The construction of buildings for permanent repair shops at both the Atlantic and Pacific locks was completed. The following lockages were made during the month: *Gatun*—115 lockages, 122 vessels; *Pedro Miguel*—120 lockages, 127 vessels; *Miraflores*—120 lockages, 127 vessels.

Electrical Division—Construction work was in progress on the underground conduit systems and street lighting systems in the Ancon-Balboa, Gatun, and Cristobal districts; bar-

racks and quarters at Fort Grant; concrete quarters, dispensary, commissary, and oil house at Balboa; and the buildings of the new insane asylum at Corozal. The usual operation and maintenance work in connection with electric power and air compressor plants, substations, transmission lines, and the cargo-handling cranes was carried on.

On April 1 the construction, operation, and maintenance of the telephone system and the railway signal system, and the construction and maintenance of the telegraph systems were transferred from the Panama railroad to the Electrical Division of The Panama Canal. On the same date the construction, operation, and maintenance of the fire alarm system were transferred from the Division of Police and Fire to the Electrical Division.

Municipal Engineering Division—In addition to work incident to maintenance, operation, and repairs, work was in progress on the following items of construction: The concrete reservoir at Gatun; repair shop and office building at Pedro Miguel Lock; parking in front of Ancon commissary; water and sewer systems, roads, walks, and grading for the Army post at Balboa dump; water and sewer connections and grading for the Army at Balboa Heights and Corozal; water and sewer systems and roads for quarters on Cemetery Ridge, Balboa; road paralleling the Canal

tion of the steel decking to station 2 plus 50. At the reloader wharf 12 caissons were started during the month, making a total to date of 54. Earth excavation in cylinders amounted to 581 cubic yards by orange peel bucket and 69 yards by task and day labor, and in addition there were 872 cubic yards of earth and 1,504 cubic yards of rock excavated from the reloader wharf by steamshovels. Two hundred forty-three lineal feet of construction trestle was built to be used in working the fourth or "D" row of caissons.

Quay wall and pier—Rock amounting to 8,104 cubic yards was placed in the backfill for quay wall d-e-f. Excavation was carried on in six caissons, 207 cubic yards of material being removed. Concrete placed in caissons amounted to 447 cubic yards. On quay wall i-j-m-n two anchors for holding the pontoon were placed. At pier No. 1, additional anchor rods were placed from girders 30 to 34, the weight of the material used being 31,218 pounds.

Sosa Hill Quarry—There were excavated from Sosa Hill quarry during the month by steamshovels 1,898 cubic yards of earth and 34,110 cubic yards of rock. Of this material 14,623 cubic yards were used as shops fill, 12,136 cubic yards were sent to the Cristobal mole, and the remainder was used in miscellaneous filling and by other divisions.

Fuel oil plant—Oil crib No. 1 was completed. Twenty-eight cubic yards of concrete were placed in caissons and 146 cubic yards in the floor slab. For the dolphins 48 piles were driven, the total length being 3,515 lineal feet.

Quarantine boat landing—The work of the contractor progressed rather slowly during the month, and at the close of the month it is estimated but five per cent of the landing was completed. The landing was assembled by this division, 12½ tons of steel being used in its erection.

ATLANTIC TERMINALS.

East Breakwater—On the night of April 3, a norther blew up along the Atlantic coast, and continued to April 5. The following damage was done to the breakwater trestle: The two lights on the shore section of the trestle were thrown overboard and lost. The old double-track trestle from bents 1 to 69 is in good condition, except that one pile was broken out of bent 60, sea track. From bent 70 to bent 82, 15 piles were broken out on the sea track, and four piles on the harbor track. In this section, the caps were displaced from the piles, but the decking remained intact on the caps. Bent No. 82 was the last one on which there was a cap. There were two piles standing in each of bents 83 and 84. There was one pile standing in each of bents 98, 99, 100, 110, and 111. There were five piles standing in the foundation of relay station No. 1. Before this norther, the old double-track trestle was intact to bent No. 100. New single-track trestle had been driven and decked to bent No. 125 and three piles had been driven in bent No. 126.

As to the outside section of the trestle, the decking remained on bents 359 to 368, approximately. This is at station 0 to 1 plus 50 "C." From bent 369 to 579 there were approximately 250 piles standing. In no place were the piles standing in more than six consecutive bents. Relay station No. 2 was partially wrecked. In all, 15,627 lineal feet of piling were driven during the month, and 32,885 cubic yards of dredged material were dumped by scows along the axis of the breakwater ahead of the pile driving. Dredge No. 4

center line of the trestle and 5,174 cubic yards into the pile yard fill.

Coaling plant—Caisson foundation work generally is progressing satisfactorily although considerable difficulty is experienced at the north end of the unloader wharf, but the more difficult work is now nearly finished. All but 11 cylinders under the unloader wharf have been entirely completed.

Fuel oil plants—During the month the erection of one of the three 55,000-barrel fuel oil tanks to be erected by the Huastica Petroleum Company at Mount Hope was commenced.

Marine Division.

One hundred and twenty-three vessels, including four launches, passed through the Canal in April, 61 (with one launch) north-bound, and 62 (with three launches) south-bound. Of this number 54 vessels were of American register and 49 of British register. Collections of tolls amounted to \$420,884.69.

Twenty-one vessels were measured and 88 were inspected to see whether their certificates conform to the rules.

Dredging Division.

The total excavation for the month, including earth, rock, and gravel, was 1,092,637 cubic yards. Of this total, 28,357 cubic yards were removed between the Pacific entrance and Miraflores Locks, 154,809 cubic yards from Balboa inner harbor, 635,717 cubic yards from the Gaillard Cut, and 30,561 cubic yards from Gatun Locks to the Atlantic entrance. The hydraulic grader was engaged in sluicing at Balboa harbor and the north side of Gold Hill and in cutting one of the Obispo Diversion ditches. Extermination of water hyacinths was confined to the vicinity of old Gorgona. The entire waters of the Trinidad valley have been covered, but no trace of these plants has been found there.

Mechanical Division.

Shop orders authorized during the month numbered 887, a decrease of 48 from the previous month, those left over from March being 532, those completed during the month numbering 927, and those carried forward into May numbering 492. The output of the foundry was 107,467 pounds of iron, 59,995 pounds of steel, and 8,731 pounds of brass. Hoisting was done on 4,199 pieces of equipment, and shop and field repairs were made on 7,855 cars. In addition, 1,123 light repair jobs were done on equipment, and six cases of extended repairs.

The fuel oil handling plant at Balboa handled 174,566.08 barrels and the fuel oil plant at Mount Hope handled 10,455.77 barrels of oil during the month.

Building Division.

Construction work was in progress on the following buildings: Bath house at Hotel Washington in Colon; Panama railroad station, farm superintendent's house, insane asylum ward buildings, and superintendent's house, and three mess halls and temporary stables for the Army, at Corozal; combined office, storehouse, and mattress factory at Acon; 4-family and 2-family concrete houses and 2-family frame houses at Balboa; and headquarters building at Fort Amador. The field officer's house and the last of the first four barracks at Fort Amador were completed. In addition, the construction of two 4-family concrete houses and four 4-family frame houses at Balboa was let out by contract. The Corozal block plant turned out 53,000 blocks.

Supply Department.

The force report for the half month ending

Wednesday, April 21, showed a total of 24,441 employes of The Panama Canal and Panama Railroad Company, of whom 3,324 were white Americans and 21,117 were laborers. Of the latter, approximately 388 were Europeans and the remainder West Indian negroes. There was an increase of 1,105 laborers, and a decrease of 64 Americans, making a net increase of 1,041.

The occupants of Government quarters numbered 6,788 white Americans, of whom 3,603 were men, 1,550 women, and 1,635 children; 7,300 West Indians, of whom 4,156 were men, 1,265 women, and 1,679 children.

The value of material received during the month was \$668,581.85. It came forward in 31 steamers; the total weight of the cargo, exclusive of lumber and piles, was 15,379 tons. Some of the principal items were 1,075,050 feet, board measure, of lumber for stock, and 179,715 bags of Portland cement.

Health Department.

General.—No case of yellow fever, smallpox, or plague originated on or was brought to the Isthmus during the month. Eighteen deaths occurred in the Canal Zone. The death rate for disease for the Canal Zone, based upon a population of 33,652, was 5.71 per thousand, as compared with 8.23 per thousand for the preceding month and 11.10 per thousand for the corresponding month of last year.

Employes.—The health of employes continued good. The number of names on the payrolls for the preceding month was 34,125. On this basis the admission to hospitals and quarters, 802, gave a rate of 282.02 per thousand, as compared with 312.82 for the preceding month and 350.59 for the corresponding month of last year. The admission rates to hospitals for all diseases were: White, 240.84; blacks, 96.44; Europeans, 439.49; and Americans, 211.52. The admission rates for malaria to hospitals and quarters were: Whites, 51.61; blacks, 24.62; Europeans, 171.97; and Americans, 33.84. The total number of deaths from all causes was eight. Of these five died from disease, or 1.76 per thousand, as compared with 4.91 for the preceding month and 5.53 for the corresponding month of last year. Two Americans died from disease during the month.

Accounting Department.

The cash balance in Canal construction appropriations on April 30, 1915, was \$24,686,640.87, and in the fortifications appropriations \$5,831,621.29. The payrolls for April, exclusive of Army quarters, storehouses, fortifications, etc., amounted to \$947,924.16 and the fortification roll amounted to \$73,389.47. Payments by the Disbursing Clerk in Washington amounted to \$728,397.38, and by the Paymaster on the Isthmus, \$1,607,600.80. Collections on the Isthmus amounted to \$991,780.91, of which \$328,841.42 was repaid to the appropriations, \$200,668.74 was commissary collections and other trust funds, and \$462,270.75 was miscellaneous receipts to be covered into the Treasury. Of the miscellaneous receipts \$420,884.69 as collected on account of tolls, as compared with \$606,316.56 for March. Deposits in the amount of \$279,297.87 were made with the Assistant Treasurer, to be applied in payment of tolls and other charges against vessels using the Canal. Canal Zone revenue collections and miscellaneous funds received, amounted to \$177,874.40, and the disbursements under the same heading amounted to \$286,365.96.

Executive Department.

DIVISION OF CIVIL AFFAIRS.

One hundred and ninety-one licenses of all

kinds were issued during the month. Sixteen estates were settled, having a total value of \$961.87. At the port of Balboa 90 vessels entered and 93 cleared, and at the port of Cristobal 135 vessels entered and 130 cleared.

Postal service.—Postmasters remitted on account of stamp sales, second class mail collections, postage due collections, and box rent receipts, \$8,037.10. The money orders issued aggregated \$308,188.26. The fees collected thereon amounted to \$1,096.81. Of the total value of money orders issued, \$96,020 represents the value of deposit money orders issued without fee. Deposit orders to the value of \$102,325 and postal savings certificates to the value of \$59,098 were paid. The balance of postal savings deposits on hand at the end of the month, represented by the unpaid certificates and deposit money orders, aggregated \$559,291, as compared with \$624,694 at the close of the previous month.

POLICE AND FIRE DIVISION.

Four hundred and twenty-four arrests were made during the month. Of these 394 were males and 30 females. Fifty-eight convicts were confined in the penitentiary at the close of the month. Ten persons were deported, four of whom were convicts who had completed their sentences in the penitentiary, and six of whom were prisoners who had served terms in jail.

Twenty-three fires occurred during the month. The damage to The Panama Canal and Panama railroad property amounted to \$22,527.40, approximately \$22,000.00 of which was caused by the conflagration which occurred in Colon on April 30, 1915. No fire damage resulted during the month to United States Army property or private property on the Canal Zone.

COURTS.

In the District Court, five civil, 18 probate, and 29 criminal cases were settled; five civil, 20 probate, and 30 criminal cases were filed, and 100 cases of all kinds were pending at the close of the month. In the magistrates' courts, 10 civil and 425 criminal cases were tried.

DIVISION OF SCHOOLS.

The total enrollment in the Canal Zone schools for the month was 1,722 for the white schools and 1,575 for the colored schools. In the white schools the net enrollment was 1,128 and the average number belonging 921.7, and the average daily attendance 888.7. In the colored schools the net enrollment was 1,399, the average number belonging 833.4, and the average daily attendance, 692.8.

Panama Railroad.

The cargo handled at the Colon and Balboa agencies aggregated 162,539 tons, of which 21,917 tons were handled through the Canal in steamers of the Panama Railroad Steamship Line, as follows:

From New York to Balboa, 2,336 tons; from Colon to Balboa, 2,723, tons; total, 5,059 tons. From Balboa to New York, 11,871.5 tons; from Balboa to Colon, 4,986.5 tons; total 16,858 tons; grand total, 21,917 tons.

The work on the terminal docks at Cristobal continued satisfactorily during the month. One thousand four hundred fifty-five lineal feet of steel cylinders were driven for dock No. 7, making this item 69 per cent complete. Excavation in cylinders was 61 per cent complete, and concrete in cylinders 50 per cent

complete. Twenty-eight caissons were completed during the month, making this item 51.4 per cent complete. The sail loft, pier

No. 8, was completed during the month.

Respectfully,
CHESTER HARDING, Acting Governor.

Supplementary Rent Schedule No. 3.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER,
BALBOA HEIGHTS, C. Z. May 11, 1915.

To all concerned—The following changes and additions to the rent schedule are hereby promulgated, and will become effective as follows, unless otherwise specifically mentioned: Decreases and additional rates will become effective March 1, 1915, and increases will become effective June 1, 1915.

Decreases.

†This rate is per man while used as bachelor quarters; when used as married quarters the old rate of \$8.25 will apply.

‡Effective date of occupancy.

Miscellaneous.

Effective May 1, 1915, an amount equal to the rent of quarters occupied by officers of the Army and Navy assigned to duty with The Panama Canal, as well as the cost of fuel and oil furnished them, will, where such officers receive no extra compensation from The Panama Canal or not sufficient to cover the cost or same, be charged directly against the department or division in which they are employed.

Instead of fixing a monthly rental on buildings used by religious and fraternal organizations, Y. M. C. A.'s, etc., based on the factors applied to quarters, the cost of all repairs and alterations to these buildings, as well as the cost of repairs and renewals of furniture, will be charged against the organization or organizations using the same, prorated according to the assignment of the building. Collection of garbage, care of grounds, and janitor service, which are fixed factors, will be charged for at a flat monthly rate, divided on the same basis as repairs to the buildings, no surcharge to be added in either case.

WM. R. GROVE,
Chief Quartermaster.

Approved:
CHESTER HARDING,
Acting Governor.

OFFICIAL CIRCULARS.

Material and Shop Work for the Government of Panama.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., May 21, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

This office is in receipt of a letter from the Secretary of Foreign Relations of the Republic of Panama, dated May 16, 1915, requesting that no work of any kind should be performed for the Government of Panama in the shops of The Panama Canal, nor is any material to be furnished to that Government, without express authority in writing from the office of the Secretary of Foreign Relations. You will please be governed accordingly.

CHESTER HARDING,
Acting Governor.

Acting Engineer of Docks.

PANAMA RAILROAD COMPANY,
OFFICE OF PRESIDENT,

BALBOA HEIGHTS, C. Z., May 24, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Effective May 24, 1915, and during the absence on leave of Mr. T. B. Mönniche, Engineer of Docks, Mr. Starr Truscott is designated as Acting Engineer of Docks.

CHESTER HARDING,
Second Vice-president.

Sale of Second-hand Doors, Blinds, Sash, and Railing.

THE PANAMA CANAL,
OFFICE OF CHIEF QUARTERMASTER,
BALBOA HEIGHTS, C. Z., May 5, 1915.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 3 p. m., May 27, 1915, and then opened, for the purchase of any or all of a miscellaneous lot of second-hand doors, blinds, sash, and railing now stored at the dry dock store, Cristobal, C. Z. This material may be examined and full information obtained upon application to the storekeeper, dry dock store, Cristobal.

Proposals must be accompanied by certified check, post-office money order, or cash, for five per cent of the amount bid.

The Panama Canal reserves the right to reject any or all bids.

Bids should be marked "Proposals for purchase of doors, blinds, sash, and railing" and addressed to the Chief Quartermaster, Balboa Heights, C. Z.

WM. R. GROVE,
Chief Quartermaster.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 303, on Wednesday, June 2, 1915, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

For the benefit of applicants residing in Gatun and Cristobal or Colon, examinations for licenses as navigators of motor boats, and as chauffeurs, will be held at the office of the captain of the port of Cristobal on Friday, June 4, 1915, beginning at 9 a. m. Applicants should be provided with motor boats or automobiles for the demonstration test.

By direction of the chairman of the board,

F. M. NIXON,
Recorder, Board of Local Inspectors.

COMMISSARY DEPARTMENT.

Inventory Only at Cristobal.

The usual monthly inventories will not be taken at the close of business this month at any of the retail commissaries except Cristobal. An audited inventory will be taken at that commissary on June 2 and June 3. The commissary will be closed all day on June 2. Grocery and cold storage departments will be open to the trade not later than 10 a. m., June 3, and other departments will be opened as soon as possible thereafter.

Sale of Articles in Case Lots.

To commissary storekeepers—In order to prevent abuse of commissary privileges by the purchase of any article or articles in unusual quantities, effective at once it is directed that no sales of goods in case lots or original containers be made to any individuals except where specific authority is given from the office of the Chief Quartermaster or from this office.

The above, of course, is not intended to cover the sale of supplies to hotels, Army organizations, etc.

Please call the attention of all salesmen to this bulletin and impress upon them the necessity for seeing that its provisions are lived up to.

BENJ. L. JACOBSON,
Depot Commissary.

CRISTOBAL, C. Z., May 19, 1915.

Commissary Hours.

The commissary stores at Las Cascadas, Empire, and Culebra are open from 7.30 to 11.30 a. m., and 1.30 to 5.30 p. m.

The commissary store at Balboa is open from 8 a. m. to 12.30 p. m., and 2.30 to 6 p. m.

All other commissary stores are open from 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m. on Saturdays and other sailing days of Panama railroad vessels.

Cold Storage Prices.

The following is a list of retail prices of cold storage provisions which will be effective May 27, 1915.

The prices will be increased by 10 per cent in cases of sales to foreign naval vessels and to commercial ships, and by 20 per cent for sales to yachts.

FRESH MEATS.

	16:0	0:1	16:0	-1:0
Wed., June 30.....	5:54	12:01	18:08
	15:9	0:3	15:5

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.
 The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from Oh (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47 p. m.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:
 Every Thursday to New Orleans for all States. Due at New Orleans on the following Tuesday.
 Every Saturday to New York, for all States. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.*

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*NOTE.—The sailings on Monday, May 31, and June 27, will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4 leaving Panama at 7.10 a. m., connects with the despatches for the two sailings mentioned above.

Rainfall from May 1 to 22, 1915, Inclusive.

*EXPECTED ARRIVALS.

*EXPECTED DEPARTURES.

*Other than vessels passing through the Canal.

(Continued from page 357.)

Diesel engine oil is for sale by several companies, at approximately 45 shillings per ton of seven barrels.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light, and heavy hardware, cordage, and miscellaneous ship chandery supplies are sold from the storehouses at Cristobal and Balboa.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

The cable address of The Panama Canal, on the Isthmus, is "Pan canal, Panama;" in the United States, "Pan canal, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C." for delivery in the United States.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly. The subscription rate is \$1 per year in the United States and its possessions, and in Canada, Cuba, Mexico, and Panama (domestic postage), and \$1.50 in other countries (foreign postage). The paper is furnished free to United States Government departments, representatives of foreign governments, public libraries, and employes of The Panama Canal and the Panama Railroad Company whose names are on the gold roll.

All subscriptions expire on December 31. Domestic subscriptions are accordingly charged as beginning from the first of the quarter of the year in which received. Remittances should be made to pay only to December 31, on this basis: Sent between April 1 and July 1, 75 cents; July 1 to October 1, 50 cents; October 1 to January 1, 25 cents. For foreign subscriptions the year is divided into thirds: Between January 1 and May 1, \$1.50; May 1 to September 1, \$1; September 1 to January 1, 50 cents.

Remittances for subscriptions may be forwarded to The Panama Canal, Washington, D. C., or to The Canal Record at the address given below.

Address all Communications,

Isthmus of Panama.

NOTES OF PROGRESS

New Jib for the "Ajax" on its Way.

The greater part of the material for the new jib for the floating crane *Ajax*, to supplant the original jib which failed under test on December 7, will arrive from Germany by way of New York on board the steamship *Ancon* of the Panama Railroad Steamship Line, due at Cristobal in about 10 days. The new jib is practically identical in construction with the first, except that several of the members have been reinforced according to recommendations made after investigation of the failure of the original jib. It is about 143 feet long overall by 39 feet deep and 32 feet wide at the pivot end, contains approximately 307 members, and weighs about 170 tons.

Directly after the failure of the first jib the local superintendent for the contractor, the Deutsche Maschinenfabrik Actiengesellschaft of Duisburg, Germany, cabled a report of the failure and the construction of the new jib was begun. It was completed in about four months, approximately the middle of April, and the greater part was shipped on May 8 from Rotterdam to New York on the steamship *Cornelius* of the Holland America Line. By courtesy in response to the representations of the Department of State it was agreed by representatives of the several warring nations in Europe that there should be no interference with the completion and transportation of the jib, if it were shipped from a port of a neutral country in a vessel of neutral registry.

The forces of the contractor on the Isthmus are making ready to assemble the new jib quickly and hasten the completion of the *Ajax*. The *Hercules*, mate of the *Ajax*, has

been engaged in active service. After recovering the piledrivers sunk off the East Breakwater trestle, the crane was used to remove a broken concrete pier, weighing about 100 tons, at Pier 7 in Cristobal. On Friday, May 28, it lifted the Gatun Spillway caisson, weighing about 120 tons, from the waters of Gatun Lake to the upper west wing wall of Gatun Locks, to allow its overhauling and painting in the dry. The caisson is 49½ feet long by 22½ feet high by five feet 9½ inches through. The *Hercules* is now stationed at Paraiso.

Nautical Training Ships Visiting Canal.

The New York State nautical training ship *Newport* arrived at Cristobal on May 26 from the West Indies, and after taking on 75 tons of coal, and commissary supplies, passed through the Canal, clearing for Honolulu on May 30. The *Newport* is a gunboat of the United States Navy, loaned to and operated by the Public Marine School of New York for training young men to become officers in the merchant marine; on this cruise she is carrying a crew of 142. She is a vessel of 1,010 tons displacement, with a length of 168 feet on the load water line.

The Massachusetts nautical training ship *Ranger*, also a Navy gunboat, has left Boston for a cruise to San Juan in Porto Rico, St. Thomas, and Colon, and is due to arrive at Colon about June 30. It is not planned to take the *Ranger* through the Canal, but her crew will be given opportunity to inspect it.

Storm in the Bay of Panama.

A brisk wind and rain storm visited the Bay of Panama in the afternoon of May 26, raising a wind which blew at times as high as 47 miles an hour. The sea in the outer harbor at Balboa was unusually choppy, making it unsafe for the pilot launches, and reports from the lower bay tell of the capsizing of launches and other small boats belonging to citizens of Panama, with the loss of several lives. Fairly heavy rainfall accompanied the storm, all over the Isthmus, and wind velocity of around 20 miles an hour was recorded at all stations, excepting that at Balboa Heights, which showed a maximum of 47 miles. The highest previous wind recorded at this station in May during the seven years of record was 27 miles, in 1910. The highest wind which has been recorded on the Isthmus was one which reached a maximum of 59 miles an hour at Ancon on July 10, 1909.

Dredging Operations in the Cut.

Following recent improvements in the slide situation in the Cut, Sunday work on the slides was discontinued on May 9. Operations are now carried on daily. The 15-yard dipper dredges *Gamboa* and *Paraiso*, the ladder dredge *Corozal*, the pipeline suction dredge *No. 86*, and the seagoing suction dredge *Culebra* are working 24 hours a day, with three shifts; and

two of the three smaller dipper dredges, the *Cardenas*, *Chagres*, and *Mindi* are working 16 hours daily, the third of the dipper dredges being retired in rotation temporarily for repairs. The last delaying obstruction to the channel occurred early in March, prior to which Sunday work had been kept up for about four months. The channel has now a minimum depth of about 30 feet, and minimum width of about 150 feet. The limiting channel is now at the base of Cucaracha slide.

The *Gamboa*, *Paraiso*, and *No. 86* are now working at Cucaracha slide; the *Corozal* and one small dipper dredge are at the base of the new Culebra slide, and the other small dipper dredge is at the old Culebra slide, on the west bank of the Cut. The seagoing dredge *Culebra* is ranging between Paraiso and Empire, removing daily about 6,000 cubic yards of light material which has silted in the channel.

Work is suspended at 2 o'clock each afternoon to give the right of way to vessels passing through the Canal, and resumed immediately after the vessels have passed through the slide section. The vessels in transit are brought to the upper approach wall of Pedro Miguel Lock, on the south, or to the passing station opposite Empire, on the north, and moored, prior to 2 o'clock; and when the dredging fleet has made way, they are despatched past the slides quickly. Surveys of the channel opposite the slides are made each day, so that conditions are known to those in charge and vessels are handled with corresponding certainty.

The "Culebra" Beached for Minor Repairs.

The seagoing suction dredge *Culebra*, which has been working in the Cut, was taken to Naos Island last week and beached at high tide so that minor exterior repairs, principally to the sand-excluding device, could be made while the water was below mean tide. The work was completed between Thursday and Friday afternoons and the *Culebra* was returned to the Cut Friday evening, May 28, the fires having been kept up all the time. The beaching was resorted to as quicker and cheaper than dry docking.

Special Train for "Kroonland" Passengers.

During the passage of the passenger steamship *Kroonland* of the Panama Pacific Line through the Canal on Friday, May 28, on the way from New York to San Francisco, the vessel was tied up at the upper end of Pedro Miguel Lock long enough to allow her passengers to disembark and board a special train which took them into Panama City. The *Kroonland* continued through the Canal to Balboa, where she moored at the concrete wharf in the inner harbor, sailing the next morning at about 7 o'clock. The vessel carried 383 through and four local passengers, and 4,200 tons of general cargo,

FLOATING CRANE "AJAX."

Investigation of Cause of Failure of Jib During Acceptance Tests.

Investigation has been made of the failure of the jib of the floating crane *Ajax* on December 7, 1914. The history of the purchase of the *Ajax* and the *Hercules* and description of them have been published in THE CANAL RECORD. A diagram of the side elevation of one of the cranes, published in connection with a description in THE CANAL RECORD of

hook load is carried by a bearing at the top of the fixed tower, and the overturning moment of the weights and loads is resisted by a horizontal force at the top of the fixed tower, and an equal but opposite horizontal force at the foot of the tower. The construction of the pontoon is such as to make it an efficient box girder for carrying the stresses.

The testing of the *Ajax* began on December 3. By the terms of the contract, the contractor was responsible for the conduct of the tests. The proposed capacities for the main

The crane withstood successfully the 100-ton normal load test. The hoisting speed, luffing speed, and slowing speed were measured and the contract requirements were met.

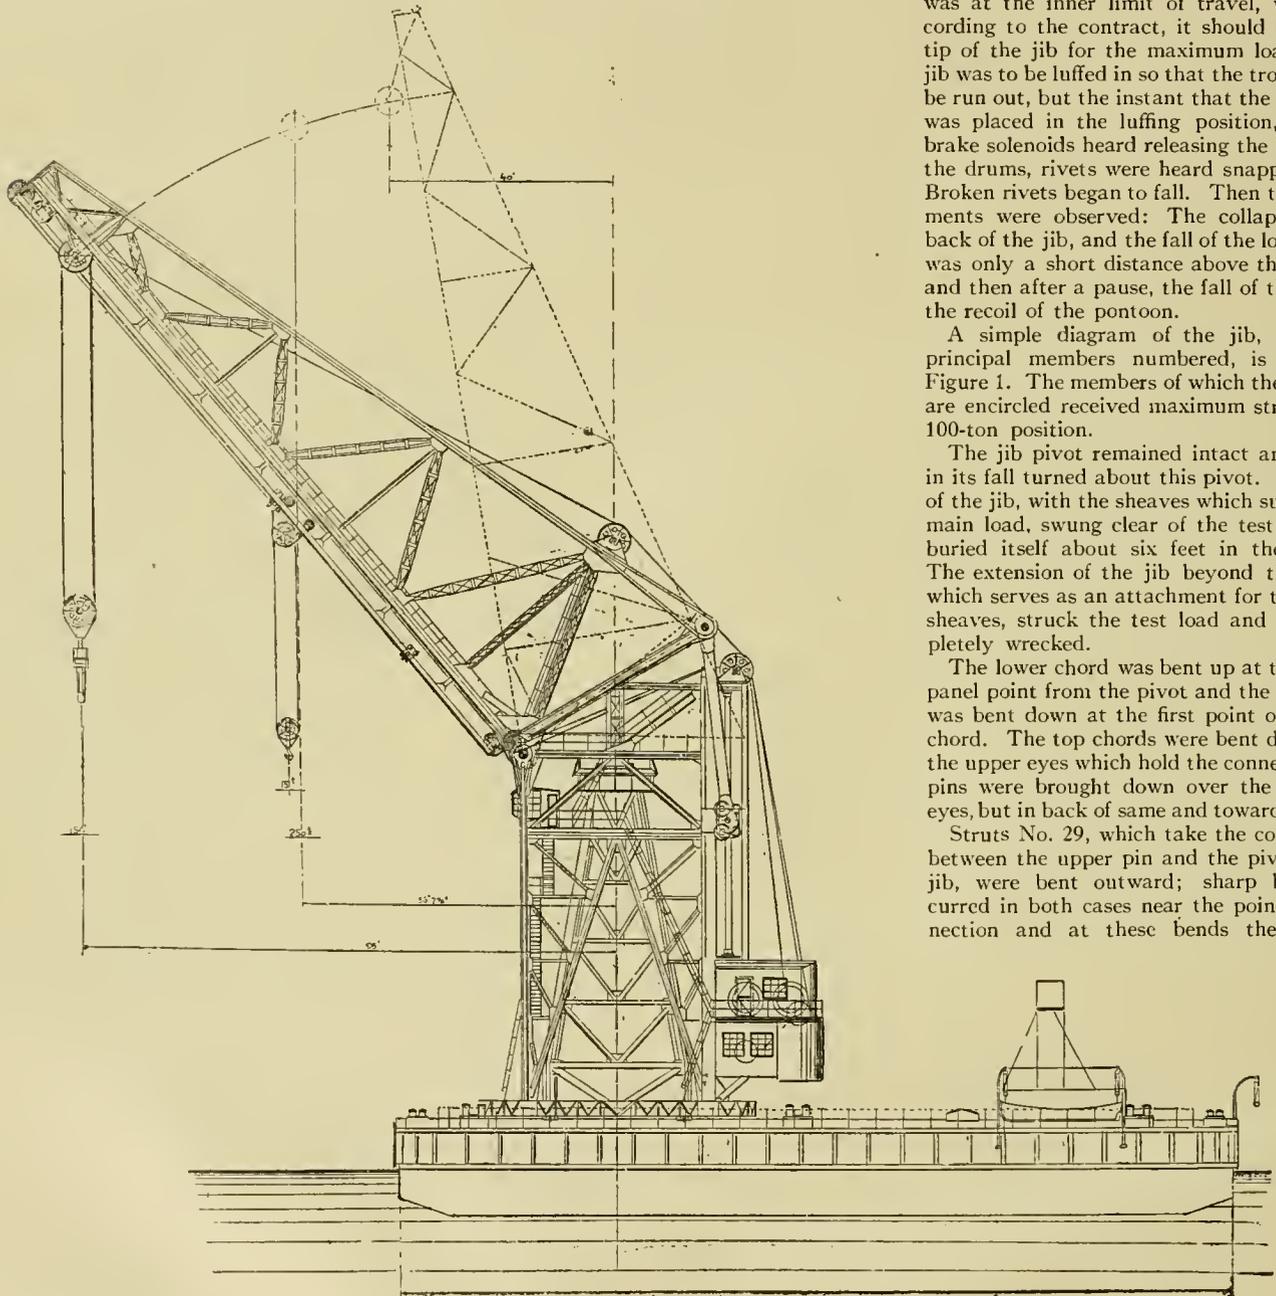

On December 7 the test load was increased by 20 per cent, as specified by the contract for the overload tests. The 120-ton load was hoisted clear of the wharf and luffed slowly out to the 100-ton reach, that is, to a reach of 81 feet from the face of the fender. No sign of distress was noted in any member. It was noted that the auxiliary hoist trolley was at the inner limit of travel, when, according to the contract, it should be at the tip of the jib for the maximum loads. The jib was to be luffed in so that the trolley could be run out, but the instant that the controller was placed in the luffing position, and the brake solenoids heard releasing the brakes on the drums, rivets were heard snapping aloft. Broken rivets began to fall. Then two movements were observed: The collapse of the back of the jib, and the fall of the load, which was only a short distance above the ground; and then after a pause, the fall of the jib and the recoil of the pontoon.

A simple diagram of the jib, with the principal members numbered, is shown in Figure 1. The members of which the numbers are encircled received maximum stress in the 100-ton position.

The jib pivot remained intact and the jib in its fall turned about this pivot. The head of the jib, with the sheaves which support the main load, swung clear of the test load and buried itself about six feet in the ground. The extension of the jib beyond this point, which serves as an attachment for the trolley sheaves, struck the test load and was completely wrecked.

The lower chord was bent up at the second panel point from the pivot and the top chord was bent down at the first point on the top chord. The top chords were bent down until the upper eyes which hold the connecting link pins were brought down over the jib pivot eyes, but in back of same and towards the left.

Struts No. 29, which take the compression between the upper pin and the pivot on the jib, were bent outward; sharp bends occurred in both cases near the points of connection and at these bends the built-up

SIDE ELEVATION OF FLOATING CRANES "AJAX" AND "HERCULES."

May 28, 1913, is reproduced herewith for convenient reference. As will be seen, the crane consists essentially of a pontoon carrying a fixed tower surrounded by a revolving frame structure which carries the jib. The pontoon is 150 feet long by 88 feet wide, the tower rises 66 feet from the deck to the jib pivot, and the jib is 143 feet long. When elevated to the highest angle, the jib outriggers reach 206 feet above the deck. The entire weight of the superstructure and the

hoist were, for long tons:

	100 Tons.	150 Tons.	250 Tons.
Loaded reach over end.....	81.0 feet.	59.3 feet.	21.4 feet.
Loaded reach over side.....	82.4 feet.	63.6 feet.	24.2 feet.

The time of hoisting main loads was to be as follows:

Tons.	Per minute.
250.....	3 feet 6 inches
125.....	7 feet
62½.....	14 feet

channels forming the cross-section of the strut were crushed together. The sharp bend at the upper connection consisted of a bend in both directions; at the lower connection the strut was doubled upon itself.

Strut No. 27 on the right side broke clear of the upper chord at the connection and was not crushed; on the left side the connection held at top and bottom but the strut was crushed.

Members Nos. 23 and 21 were bent inward.

The portal which ties the upper chord together at the first panel point and supports the guide sheaves for the main hoist remained in place. The connecting links from jib to cross-head were badly twisted.

The spindle carriage track was sprung outward, the spindles with it; but the spindles suffered no injury.

The main hoist blocks and the equalizer bar were injured, the latter especially, but the block sheaves were intact. Of the ten upper sheaves at the head of the jib, only two were broken. The ladders, walks, railing, etc., were bent and the trolley track was badly twisted and bent. The jaws of the revolving superstructure which form the jib pivot were twisted and the outer cover plate was ripped. The inner part of the trolley track penetrated the operator's cab and injured the controllers and instruments. The hoisting cable was kinked in places and rendered unfit for use.

INVESTIGATION OF THE CAUSE.

The jib is a framed structure consisting of two trusses, each as shown in Figure 1. The lower chords of the trusses are connected by cross bracing, but the plane of the upper chords is devoid of cross bracing, except for a portal at the first panel point from the inner end. There are cross frames in the planes of members 4, 11, 17, and 23. Cross bracing in the plane of the upper chords was purposely omitted to secure flexibility, the idea being that while the jib is symmetrically loaded,

The consensus of authoritative opinion from the viewpoint of The Panama Canal is that member No. 29 was the first member to fail, and that this failure was due, not to deficiency in sectional area, but to insufficient provision of laticing, batten plates, etc., to tie the two parts of the member together. Paragraph No. 116 of the specifications refers to compression members and reads as follows:

"In compression members the metal shall be disposed as far as practicable from the axis. No compression members shall have a length exceeding 40 diameters, nor a value of L/R exceeding 100 for main members, nor 120 for wind bracing. Lattice bars, stay plates, diaphragms, etc., together with rivets, shall be generously used to insure the mutual support of the various parts forming the cross section."

This member consists of two halves, each half being built up of a plate and two angles, two additional plates being added for a portion of the length of the member. Each individual half is relatively weak as regards transverse stiffness, the end batten plates are short, and the laticing consists of 2 1/2" by 2 1/2" by 3/8" angles at about 45° inclination, with one 3/4" rivet at each end. The laticing was in most cases not bent, but the rivets were in many cases sheared off. An inspection of the rivets showed that they were sheared almost as neatly as if by a shearing machine.

The steel was apparently of excellent quality, this being evidenced by the bending which it withstood without fracture. All of the rivet holes in the jib were either sub-

ma Canal with the results shown in the following table:

Samples Marked	Elastic limit per sq. inch in lbs.	Ultimate stress per sq. inch in lbs.	Elongation per cent in 8 inches.
1 Angle...	32,600	50,400	30.0
2 Angle...	33,000	50,600	28.8
3 Flat...	32,950	49,570	27.4
4 Flat...	31,830	49,100	29.2
5 Web...	35,020	54,600	31.4
6 Web...	35,570	54,180	30.2

The fractures were in every case "fine silky." The material was also subjected to cold bending and quench bending tests, which showed that the material conformed to the contract requirements in this respect.

It will be noted that the ultimate tensile strengths developed by tests on the Isthmus were less than those shown by the tests in Germany. The reason for this disagreement has not yet been ascertained.

Table No. 1, following, shows the computed stresses in member No. 29 in the "100-ton" position; first as estimated by the contractor for 100-ton suspended load, second as computed by The Panama Canal for 100-ton suspended load, and third as computed by The Panama Canal for 122.5-ton test suspended load. The reason for the differences between the first two estimates is that the contractor estimated on the basis of a pontoon inclination of 5°, while the estimate made by The Panama Canal is on the basis of the inclination existing at the time the crane was tested. Similarly, actual conditions have been used in estimating the stress at the time of failure, i. e., actual inclination and reach, actual wind, and dead load of trolley at inboard end of jib. The results are expressed in metric tons of 2,204.5 pounds.

TABLE NO. 1
Stresses in Member No. 29 in Metric Tons of 2,204.5 Pounds in the 100-ton Position.

	1.	2.	3.
	Condition A.	Condition A.	Condition B.
As estimated by contractor with 100 tons suspended load, 120 foot radius, 5° inclination 10-lb. wind.	As estimated by Panama Canal with 100 tons suspended load, and reach, inclination, and wind obtaining at the time of test.	As estimated by Panama Canal with 122.5 tons suspended load, and reach, inclination, and wind obtaining at the time of test.	
Dead load..	76.3	73.0	67.0
Live load..	174.0	171.6	196.0
Wind.....	4.1	0	.3
Total...	254.4	244.6	263.3

From the study of the elements of member No. 29 considered as a whole, and setting forth the permissible and actual unit stresses theoretically existing, it was seen that the area at the middle of the member is about 30 per cent in excess of that at the ends, and that the unit stresses at the middle are well within the specified limits, while at the ends the unit stresses in condition "A" exceed the permissible limits by about 1,800 pounds per square inch. It is to be noted here that the original specifications gave two sets of permissible unit stresses, one set known as condition "A," being for loads within the rated capacity with wind not exceeding 10 pounds per square foot, the other set, known as condition "B," being for the crane under conditions of test load with wind pressure assumed at five pounds per square foot, and for the unloaded crane with wind pressure at 40 pounds per square foot. Since the test loads were but

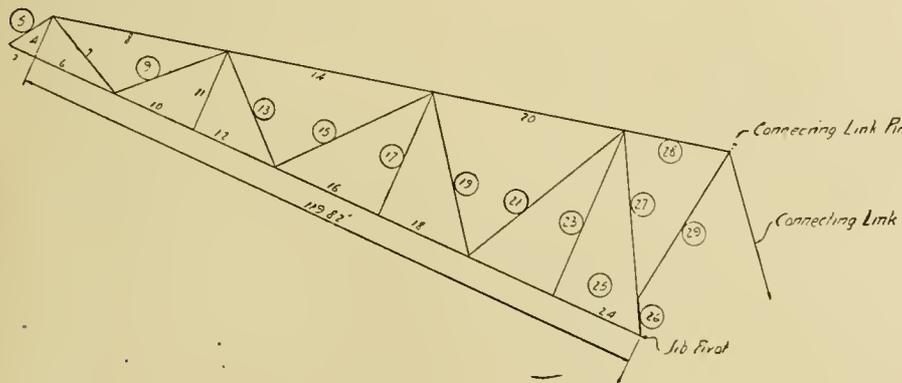

FIGURE 1.—SIMPLE DIAGRAM OF JIB OF THE "AJAX."

equal tension in the connecting links is assured. If the jib were a rigid structure and the alignment not perfect, a condition could be conceived in which one truss and one connecting link would be forced to carry an excessive percentage of the whole load. There is no cross bracing in the plane of member No. 29, due to the necessity of allowing that portion of the jib to pass on either side of the girder which supports the "bell," or revolving structure below the jib, which carries the winch house, operator's cab, etc.

The point at which the connecting links act, the intersection of members Nos. 28 and 29, is therefore not braced against lateral stresses, bracing, although desirable, not being thought necessary by the designer. The pivots of the jib are provided with spherical bearings to enable them to adjust themselves should both pins not be on the same axis. The designer of the crane frankly endeavored to keep down the weight of the jib without exceeding the specified unit stresses, since the weight of this portion of the crane affects the whole structure.

punched and reamed or drilled in the solid, and the question of workmanship evidently did not enter into the failure. The material was inspected in Germany and the mill tests on material later worked into member No. 29 gave the following results:

SECTION.	Ultimate strength per sq. in.	Elongation in 8 inches.	Elongation per cent.	Cold bending. Quench bending.
Plate.....	59,000	10.4	30	Good
Angle.....	55,000	10.3	29	Good
Flat.....	54,000	10.1	27	Good

The requirements for the structural steel were as follows:

Ultimate tensile strength in the direction of rolling, between 52,500 pounds per square inch and 62,500 pounds per square inch, with a minimum elongation of 20 per cent.

COLD AND QUENCH BENDING TEST.

To be bent in the direction of rolling 180° around a diameter equal to the thickness of the test piece, without sign of fracture on the outside of the bent portion.

Six specimens cut from the member No. 29 were tested at the Balboa shops of The Pana-

20 per cent in excess of the capacity loads, while the permissible unit stresses were nearly 30 per cent in excess of the working unit stresses, the contractor did not consider it necessary to make complete calculations for condition "B," confining these calculations to cases where wind pressure was the determining feature.

Each half of member No. 29 was further investigated as regards its strength, considered as a short column of length represented by the distance between ends of lattice bars, with the result that the maximum value of L/R is 58.7 for the end sections and 42.8 for the middle section; these values are in each case less than for the member considered as a whole, and therefore the member is theoretically safe.

It is conceivable that, due to the unstayed condition of the intersection of member No. 29 with member No. 28, a component of the dead weight could cause bending stresses at the foot of No. 29, due to the longitudinal inclination of the pontoon which existed at the time of failure. This inclination was, however, but slight, not exceeding about two per cent, and since the dead load at the point in question is but 8.2 tons the additional stress at the bottom of member No. 21 can not be large, especially when the action of the portal in member No. 28 and the bracing in the plane of member No. 23 are taken into account.

It appears, therefore, that the theoretical stress existing in member No. 29 at the time of failure implied a factor of safety of at least two, figured on the elastic limit of the material. No evidence was found pointing to local defects in material or workmanship. There was a crunching sound heard at the jib pins during the tests preceding the one in which failure occurred, but examination of these pins after the collapse showed that they were unscored and that the crunching probably arose from the movement of the jib on the spherical bearing surrounding the jib pin, which does not affect the force necessary to luff in the jib.

An excessive stress could have been caused if the main hoist drums had not been free to move, but immediately after the accident the magnetic brakes on the main drums were examined and found free.

Since member No. 29 failed just as the jib commenced to be luffed in, which luffing-in was necessary because the dead load of the trolley was not at the upper end of the jib, and the existing inclination would be exceeded with the trolley run out without luffing the jib in, it is very possible that vibrations were set up in member No. 29, which is one of the two members meeting at the point where the luffing-in pull is applied, with the result that the rivets connecting the two halves of member No. 29, already near their limit of resistance, were finally sheared, causing member No. 29 to consist of two weak halves, with the result that they bowed outward. This action once started would continue, member No. 28 would commence to bend, and the collapse of the entire inboard end of the jib is then inevitable.

The opinion that the collapse of the jib was due to initial failure of member No. 29 and that this initial failure was due to insufficient provision of latticing, battens, etc., is based on the foregoing facts, which may be summarized as follows:

First: There is no indication of faulty material or workmanship at any point of the jib.

Second: There are no indications that

either during manufacture, erection, or use the crane suffered damage or was subjected to loads beyond its capacity.

Third: The hoisting drums were free and no defect could be found in the luffing machinery by running the spindle carriage up and down after the wreck had been cleared away.

Fourth: Rivets snapped and fell just prior to the collapse of the jib. An examination of the wrecked jib showed that the rivets connecting the two halves of member No. 29 were sheared, while the maximum unit stress in member No. 29 was well within the elastic limit. Similar shearing of rivets was not observed in other members.

OPERATIONS SUBSEQUENT TO FAILURE OF THE "AJAX".

The contractor did not share the opinion of The Panama Canal that the failure was due to insufficient lattice bars, batten plates, etc., and he expressed such confidence in his design that on December 10, 1914, he offered to subject the *Hercules* to exactly the same conditions as those under which the jib of the *Ajax* collapsed, but in view of the circumstances The Panama Canal was unwilling to permit this to be done without reinforcing certain members of the jib. This point of view was also taken by the underwriters.

The reinforcement of the jib of the *Hercules* was completed January 27, 1915; this reinforcement was executed in accordance with drawings made by The Panama Canal and was confined to members 27, 28, and 29. Member No. 27 was given additional tie plates; in member No. 28 the internal system of latticing was replaced by an internal diaphragm plate; in member No. 29 the latticing on one side was replaced by a continuous cover plate, on the other side the 2½" angle latticing was replaced by 6" by 3½" angle latticing with four rivets at each end instead of one, and additional diaphragms and batten plates were provided. The contractor ordered a complete new jib for the *Ajax* to be fabricated in Germany, incorporating substantially the reinforcement above described for the *Hercules* plus minor additions to other members, to make the details conform more nearly to American practice.

After the completion of the reinforcement of the jib of the *Hercules*, the crane was in the service of The Panama Canal for about one month prior to acceptance tests. These acceptance tests were completed March 27, 1915, without mishap. The crane met the contract requirements fully as regards capacity, reach, and speed of all motions.

Notice to Mariners.

The master of the steamship *Orissa* reports, May 17, 1915, that the steamship *Craster Hall* sighted early in May, while in latitude 28° 15' South, longitude 71° 37' West, a derelict, which apparently was a large lighter, bottom up.

CHESTER HARDING,
Acting Governor.

BALBOA HEIGHTS, C. Z., May 24, 1915.

Reduced Rate to San Francisco.

The Panama Agencies Company has advised that a special rate of \$85 will be made to Canal employes for first-class passenger accommodations between Balboa and San Francisco on vessels of W. R. Grace and Company's lines. The regular fare on these vessels is \$120.

EXECUTIVE ORDER.

Sale of Surplus Material and Equipment.

The Sundry Civil Act approved March 3, 1915, contains the following clause:

" * * * expenses incurred in assembling, sorting, storing, repairing, and selling material, machinery and equipment heretofore or hereafter purchased or acquired for the construction of the Panama Canal, which are unserviceable or no longer needed, to be reimbursed from the proceeds of such sales."

There is no clause in this Act as there was in former similar acts specifying the manner in which the above mentioned items might be sold.

Under the general authority of the President to issue regulations for the government of the Panama Canal and by his direction, it is therefore ordered that the regulations relative to the sale of material enumerated above as heretofore laid down by the President for the fiscal year ending June 30, 1915, shall remain in force until further ordered.

LINDLEY M. GARRISON,
Secretary of War.

WAR DEPARTMENT,
Washington, D. C.,
May 12, 1915.

The foregoing Executive Order is being published locally as Canal circular No. 601-45.

Rent Order Suspended.

The President signed on May 25 an Executive Order directing that the Order of January 15, 1915, No. 2120, "Conditions of Employment," authorizing the collection of charges for rent, fuel, and electric current from employes occupying Government quarters on the Isthmus, be modified by suspending from operation so much as relates to rent, fuel, and lights during the period of actual construction of the Panama Canal, but not later than June 30, 1916.

Governing Assignments to Quarters in Ancon-Balboa District.

Following the decision to assign no more quarters at Corozal to employes and to turn the town over to the Army forces, as had been done at Las Cascadas, Empire, and Culebra, the Canal forces now stationed in Corozal are to be transferred to the Ancon-Balboa district as rapidly as quarters there are available. New quarters for 120 families are under construction or authorized for construction at Balboa; 187 families are quartered at Corozal. After June 1, quarters will not be assigned in the Ancon-Balboa district except to families transferred from Corozal. It is estimated that four or five months will be required for the transferring.

Inspection of Goods to be Shipped to the United States.

The attention of employes is called to the fact that goods intended for shipment to the United States can be inspected on the Isthmus only when they consist exclusively of household effects used for one year or longer, or articles of American manufacture, forwarded by freight. Personal belongings of foreign manufacture which can not properly be classified as household effects are not subject to inspection on the Isthmus, nor is anything carried as baggage subject to local inspection. All baggage must be inspected on the dock at

the port of arrival. Owing to general ignorance with regard to these restrictions, customs inspectors have frequently been required to make unnecessary trips to points on the line.

Inspections can not be made in the evening or on Sunday, and an employe applying for an inspection must either be present in person, taking time off for the purpose, or be represented by some member of his immediate family.

Until further notice inspections in the Ancon-Balboa district will be made only on Tuesdays, Thursdays, and Saturdays and at points on the line south of Gamboa only on Mondays, Wednesdays, and Fridays.

Holiday Patronage of Hotel Aspinwall.

One hundred and thirty-five people, mostly Canal employes and their families, were registered at the Hotel Aspinwall, Taboga, on Sun-

day, May 30. Excepting the register on March 13, which was the same number, 135, this was the greatest number of house guests at the hotel during the present calendar year. During the Decoration Day period the quartering of patrons was so arranged that it was not necessary to use the music room and the billiard room as dormitories.

Motor Omnibus Service through Ancon-Balboa District.

It is expected to place four motor omnibuses, recently purchased in the United States, in service between Ancon and Balboa about the latter part of this week. The cars have been undergoing modifications at Balboa shops to fit them to local conditions, and are now almost ready for use. Detailed schedule of service has not been planned, as it is expected to develop a running plan according to the demands of the traffic. The present

idea is to keep the cars circulating on a route extending from the Ancon Hospital gate to the Hotel Tivoli, thence to Balboa station by way of Bishop's Hollow, thence to Balboa and the docks, and then back to Ancon by way of Balboa Heights and through the hospital grounds. In addition to maintaining a service over this route in which a car will pass a given point about every 20 minutes it is expected to provide special service for meeting passenger trains. The operation is in charge of the Panama Railroad Company. The fare will be 10 cents gold for any distance.

Special Train Service for Opera in Panama.

For the accommodation of persons residing on the Las Cascadas branch of the Panama railroad, and at main line points south of Pedro Miguel, who desire to attend the operas being sung at the National Theatre, Panama, every Sunday, Tuesday, Thursday, and Saturday for the next three weeks, it has been decided to furnish the following train service, beginning Saturday, May 29:

On the above days train No. 42 for Las Cascadas, now leaving Panama at 10.40 p. m., daily except Saturday, will be set back to leave at 12.40 a. m. each night, and operate on the schedule of Saturday night train No. 52, leaving Panama at 12.40 a. m.

For the benefit of those residing at Colon, Gatun, and other main line points desiring to attend the Saturday night performances, train No. 10, scheduled to leave Panama at 11.30 p. m. Saturday nights, will be set back to leave at 12 o'clock midnight, or running 30 minutes late.

Obsolete and Retired Equipment.

A complete revised catalogue of all obsolete and retired equipment which was formerly in the service of the Canal and now is available for sale has been issued and is ready for distribution. This catalogue gives brief but inclusive descriptions of the various items and shows the original value, estimated cost of repairs, crating, handling, etc., and price free alongside ship, Colon or Balboa. It is believed that this will greatly facilitate the disposal of this equipment by furnishing prospective purchasers full information as to what equipment is available and its condition, etc. Copies of the catalogue may be obtained by those having interest in such equipment on application to the Chief Quartermaster, Balboa Heights, Canal Zone.

Breaking a Boat Channel through the Dying Jungle.

A 400-cubic yard barge, heavily loaded with rock from the Cut, was used for breaking a channel through inundated brush and dead trees between the Canal and a landing for motor boats on the edge of Gatun Lake at Darien, on Friday, May 28. The barge was pushed through the greater part of the distance of several hundred feet by the tug *Reliance*, after which the place of the *Reliance* was taken by the tender *De Lesseps*, which has a draft of only six feet, for clearing away the shallow parts. The boats succeeded in breaking up a floating island which blocked the way and clearing a channel to a minimum depth of about nine feet in less than an hour, after which the barge was dumped in one of the deeper parts. A floating pile driver was sent through the channel on Tuesday, June 1, to drive piles for the erection of a boathouse at the landing.

Deceased Employes.

Name.	Check No.	Native of	Isthmian Residence	Employed by	Date of death
Cole, A.	61971	Barbados	Corozal	Oper. and Main.	May 16, 1915.
Hinds, Joseph	62300	Barbados	Colon	Panama Canal.	May 10, 1915.

Jackson, Walter, alias Brown	23113	Jamaica	Paraíso	Dredging Div.	May 29, 1915.

The estates of the abovenamed deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against the estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

WEATHER CONDITIONS, CANAL ZONE, APRIL, 1915.

The rainfall for the month was above the station averages at all stations except Miraflores and Pedro Miguel. Almost three times the normal amount of rain fell over the Atlantic coast, while over the Pacific section, considered as a whole, conditions were nearer the normal, Balboa Heights being the only station with a marked excess. The rainfall there was almost double the average amount. Over the central section the excess of rainfall increased as the Atlantic coast was approached, the total at Culebra being only slightly above the average, but more than double the normal amount fell at both Frijoles and Monte Lirio. Monthly totals ranged from 2.39 inches at Pedro Miguel, to 15.90 inches, at Gatun. The maximum amount of precipitation recorded on any one day was 7.64 inches, at Gatun on the 3rd. Rainfall in excess of four inches occurred at Frijoles, Monte Lirio, Gatun, Brazos Brook, and Colon on April 3, and heavy showers occurred generally throughout the Zone on the 4th and 23rd of the month.

The estimated rainfall over the Chagres basin was 115 per cent above the average, or 9.98 inches against a 14-year average of 4.65 inches.

The average air temperature was below the normal on the Pacific coast and above the normal on the Atlantic side, the daily deficiency and excess being approximately one degree Fahrenheit. The atmospheric pressure was slightly below normal, while the relative humidity and daytime cloudiness were above normal at both coast stations. The wind movement was slightly below the average at Colon, and slightly above the average at Balboa Heights.

The only fogs observed during the month occurred at Alhajuela on April 24th and 25th, both of which were dissipated by 7.30 a. m.

Elevations of Gatun Lake, in feet above mean sealevel, were as follows: Mean for the month, 86.46; maximum, 86.89, on the 3rd; minimum, 86.37, on the 24th; evaporation from the lake surface, 5.781 inches.

The following is a summary of climatological conditions during the month of April:

STATIONS.	Press re (reduced to mean of 24 hours).	Temperature.					Mean relative humidity.	Precipitation			Wind.				
		Mean.	Maximum.	Date.	Minimum.	Date.		Total inches.	Station average.	Days of .01 inch or more.	Total movement (miles).	Prevailing direction.	Max. velocity in miles.	Direction.	Date.

OFFICIAL CIRCULARS.

Personal Injuries to Employees.

THE PANAMA CANAL, EXECUTIVE OFFICE, BALBOA HEIGHTS, C. Z., May 29, 1915.

To all concerned—It has been reported to me that foremen and other persons in a supervisory capacity with The Panama Canal and Panama Railroad Company have become negligent in making reports of personal injuries to employes.

Paragraph 6 of Circular No. 668 of April 1, 1914, reads as follows:

"Immediately after an injury to an employe resulting in his probable disability comes to the knowledge of a foreman or other person charged with the making of reports, it shall be the duty of such foreman or other person to make a report, at once, upon form A-18, to the Claim Officer. If any officer of The Panama Canal shall witness any injury to a man on the work, he shall ascertain immediately the facts connected therewith and make a report as provided above. In order to enforce compliance with the provisions of these regulations as to the rendition of reports of accidents, the Auditor of The Panama Canal will report to the Governor the failure of any officer to render reports as required."

Heads of departments and divisions are directed to bring to the attention of their subordinates the fact that a strict compliance with the regulations governing injury reports will be required of them.

CHESTER HARDING, Acting Governor.

Monthly Reports.

THE PANAMA CANAL, EXECUTIVE OFFICE, BALBOA HEIGHTS, C. Z., May 25, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

The attention of heads of departments and divisions is again directed to the previous instructions issued from this office that monthly reports should be submitted not later than the 10th day of each month. It is realized that the delay in their transmittal is due in some cases to the delay in the receipt of necessary data from heads of other divisions and departments, and it is accordingly requested that suitable instructions be issued to the end that the monthly reports of heads of departments and divisions may be received in this office on or before the 10th of the month.

CHESTER HARDING, Acting Governor.

Steamboat Inspection Service—Fees for Inspection.

THE PANAMA CANAL, EXECUTIVE OFFICE, BALBOA HEIGHTS, C. Z., May 15, 1915

CIRCULAR No. 644-2:

Circular 644-1 is amended to read as follows: Paragraph 30 of Circular 644 is modified by inserting after the words "or which may hereafter be, allowed by law;" the words,

For each row or sail boat, or panga equipped with detachable motor.....\$1.

CHESTER HARDING, Acting Governor.

Suspension of Charges for Rent, Fuel, and Lights.

THE PANAMA CANAL, EXECUTIVE OFFICE, BALBOA HEIGHTS, C. Z., May 27, 1915.

To all concerned—The following cablegram received from the Washington office of The Panama Canal, under date of May 26, 1915, is quoted below for the information and guidance of all concerned:

"Referring to our cable of the seventeenth instant; Executive Order suspending rent, fuel, and lights, signed by the President, May twenty-fifth."

W. P. COPELAND, Acting Executive Secretary.

Joint Land Commission Calendar.

Following is a calendar of claims set for hearing during the week ending June 12: Monday, June 7—Docket 837, Mrs. E. Maitland; docket 838, Rebecca Jackson; docket 839, C. A. Bacquie; docket 840, Wm. Morris. Tuesday, June 8—Docket 841, Ezequiel Carmichael; docket 842, Uriah Scott; docket 851, Antonio Baldeo; docket 852, Manuel George de Iglesias. Wednesday, June 9—Docket 854, Clarence McMackin; docket 855, Antonio Garcia; docket 866, Gumercinda Iglesias; docket 867, Abraham Johnson. Thursday, June 10—Docket 873, Joseph Osborne; docket 877, Mrs. Ann Williams; docket 879, Loice Loebel; docket 880, Juan Apericio (Aparicio); docket 1595, Juan Aparicio (Aparicio); Friday, June 11—Docket 1662, Juana Miranda.

WILLIAM TAYLOR, Secretary.

COMMISSARY DEPARTMENT.

Sale of Shoes and Odds and Ends.

A sale of shoes and odds and ends will commence at the Cristobal commissary at 9.30 a. m., Monday, June 7, 1915.

How to Wash Palm Beach Suits.

The attention of commissary patrons is invited to the following washing instructions for Palm Beach clothes, given out by the Palm Beach mill:

"Every yard of Palm Beach cloth that leaves Palm Beach suit manufacturers is cold water shrunk, but in spite of that further shrinkage is possible if these garments are not washed correctly.

"The only correct way to wash a Palm Beach suit is with a neutral naphthalene soap, free from destructive alkali, and with cold or luke warm water.

"Hot water should never be used."

Commissary Hours.

The commissary stores at Las Cascadas, Empire, and Culebra are open from 7.30 to 11.30 a. m., and 1.30 to 5.30 p. m.

The commissary store at Balboa is open from 8 a. m. to 12.30 p. m., and 2.30 to 6 p. m.

All other commissary stores are open from 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m. on Saturdays and other sailing days of Panama railroad vessels.

Cold Storage Prices.

The charges published below will be increased by 10 per cent in case of sales to commercial ships and foreign naval vessels, and by 20 per cent for yachts.

The following is a list of retail prices of cold storage provisions which will be effective June 3, 1915:

FRESH MEATS.

Table listing prices for various meats including Mutton, Lamb, Veal, Beef, Pork, and Bacon, with sub-items like Stewing, Shoulder, Leg, etc., and their corresponding prices per pound.

Table listing prices for various food items including Sirloin, Porterhouse, Sausage, Ham, Butter, and Cheese, with sub-items like choice cut, native, etc., and their corresponding prices per pound.

	Price.
Parmesan, per pound	38
Gouda, per pound	26
Snappy, per cake	9
Milk, Sheffield Farms, per quart	**15
Fermillac, bottle	**25
Ice cream, quart	125
1/2-gallon	150
Cream, 30 per cent, quart	**45
1/2-pint	**23
1/4-pint	**12

VEGETABLES.	
Beans, string, per pound	9
Beets, per pound	2
Cabbage, per pound	*4
Carrots, per pound	2 1/2
Celery, per head	15
Lettuce, per pound	16
Onions, per pound	4
Spring, per pound	4
Parsley, per pound	17
Parsnips, per pound	*3 1/2
Peppers, green, per pound	12
Plantains, per dozen	15
Potatoes, white, per pound	2
New, per pound	5
Sweet, per pound	2
Rhubarb, per pound	4
Turnips, per pound	3
Tomatoes, per pound	10
Yams, Lucea, per pound	3

FRUITS.	
Apples, per pound	6
Grape fruit—Select, each	5
Tropical, each	3 1/2
Lemons, per dozen	*15
Limes, per 100	75
Oranges—Select, each	2
Tropical, per dozen	12
Coconuts, each	4
Bananas, per bunch	38
Bananas, each	1/2
Apples, evaporated, per pound	12
Apricots, evaporated, per pound	13
Pears, evaporated, per pound	23
Pineapples, each	8
Figs, dried, 12-oz. packages	14
Figs, dried, 5-oz. packages	5
Raisins, seedless, package	11
table, cluster, per pound	20
Currants, cleaned, package	12
Prunes, stewing, per pound	12
Alligator pears, tropical, each	5

* Indicates advance from preceding list.
 **Indicates five cents allowed for return of bottle.
 † Indicates reduction from preceding list.
 ‡ Sold only from commissaries, no orders taken for delivery.
 § Not less than 1/2 ham or 1/2 shoulders of fresh pork will be sold.

Price Changes.

The following is a list of changes in prices which became effective May 29:

ARTICLE.	PRICE CHANGE.	
	Old.	New.

	4.5	11.8	3.7	0:00

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47 p. m.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:
 Every Thursday to New Orleans for all States. Due at New Orleans on the following Tuesday.

Every Saturday to New York, for all States. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.*

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

*NOTE.—The sailings on Monday, June 28, and July 26, will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4 leaving Panama at 7:10 a. m., connects with the despatches for the two sailings mentioned above.

Stages of the Chagres River, Gatun Lake, and Miraflores Lake.

Maximum heights of the Chagres River, Gatun and Miraflores Lakes for the week ending midnight, Saturday, May 29, 1915:

DAY AND DATE.	STATIONS.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., June 1, 1915.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts and may be procured upon request of the addressee:

Barton, Elliott*	Mann, Dr. Chas. C. (2)
Borcerine, Sra. Felicitas C.	Mayer, Mrs. Frank
Brown, Lieut. Carey H.*	Miranda, José
Cotter, John H.	Murphy, Thomas A.
Dowell, Paul H.	Nelly, C. J. M.
Doying, W. A. E.	Rowe, Mrs. C.
Falk, Capt. Harry	Rowe, Gilbert
Hallinan, Thos.	Rudder, Mrs. Sam*
Hennessy, Walter	Stark, John
Jones, Simon B.	Walker, J. Abner
Kopald, Charles	Ware, Wm.
Lether, Lieut. W. R.	Whitaker, William
McClellan, Fred	Woolnough, Mrs. A.
McFarlane, S. R. W.	Writer Company.

* Paper.

Fuel and Supplies.

Fuel oil may be obtained at Balboa or Cristobal from plants of The Panama Canal or from private corporations. The present price from the Canal is \$1.25 per barrel. Prices from the corporations may be obtained on application to them.

Diesel engine oil is for sale by several companies, at approximately 45 shillings per ton of seven barrels.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

The cable address of The Panama Canal, on the Isthmus, is "Panacanal, Panama;" in the United States, "Panacanal, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C.," for delivery in the United States.

Sailings of Vessels in Regular Service with the Isthmus.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing every Saturday, direct from Cristobal; and every Thursday, direct from New York; between Colon and New York by the United Fruit Company, sailings, via Kingston weekly and via Havana weekly; between Cristobal and New Orleans by the United

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly. The subscription rate is \$1 per year in the United States and its possessions, and in Canada, Cuba, Mexico, and Panama (domestic postage), and \$1.50 in other countries (foreign postage). The paper is furnished free to United States Government departments, representatives of foreign governments, public libraries, and employes of The Panama Canal and the Panama Railroad Company whose names are on the gold roll.

All subscriptions expire on December 31. Domestic subscriptions are accordingly charged as beginning from the first of the quarter of the year in which received. Remittances should be made to pay only to December 31, on this basis: Sent between April 1 and July 1, 75 cents; July 1 to October 1, 50 cents; October 1 to January 1, 25 cents. For foreign subscriptions the year is divided into thirds: Between January 1 and May 1, \$1.50; May 1 to September 1, \$1; September 1 to January 1, 50 cents.

Remittances for subscriptions may be forwarded to The Panama Canal, Washington, D. C., or to The Canal Record at the address given below.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Darien Radio Station Handling Government Messages.

The handling of Government messages between the Canal Zone and Washington, D. C., by way of Arlington, Va., was begun by the high-power Naval radio station at Darien on Saturday, April 5. This marks the working establishment of direct radio communication between the headquarters of the National Government and the Canal Zone, and is an important step in the establishment of a series of high-power stations by which messages may be relayed to vessels over almost all the central and north Atlantic, and over the Pacific north of latitude 30° South. The transmission of messages through the Darien station will be confined to official business, primarily that of the Navy, the Army, and the Department of State.

Governing Lockages at Gatun.

The following procedure has been adopted to govern the lockages of ships at Gatun, and the working force at Gatun has been so arranged that vessels will be locked on arrival, with exceptions noted below, beginning at 8 a. m., preferably with southbound ships, *i. e.*, those bound from the Atlantic to the Pacific.

Northbound ships arriving in the afternoon will be locked as they arrive, and the pilots will maintain their sequence in the channel, except that a faster vessel is permitted to pass a slower in Gatun Lake, if safety allows, and thereby change her sequence number. If the vessel whose sequence entitles her to enter the locks first does not get under way within 15 minutes of receiving the arrow signal on the approach wall to advance for lockage, the next ship on turn may proceed and the first will lose one turn.

If there are a number of northbound ships in any afternoon, and more desire to dock at Cristobal than berths are available for, the one or ones which need not be locked down in the afternoon will anchor in the basin in Gatun Lake, to proceed to Cristobal early the next morning. But if the ships are bound for sea or to available docks, all will be locked down in the evening of arrival at Gatun Locks.

By a readjustment of the locks force, operations are carried on till 11 p. m. The new arrangement assures prompt despatching and with the coaling operations carried on at Cristobal by night it is possible for vessels to reach Gatun, northbound, at 7 in the evening, lock down, coal at Cristobal, and put to sea before day.

Mustering Passengers and Crew for Quarantine Inspection.

Vessels entering the ports at the terminals of the Canal, or entering the Canal for transit, and especially passenger vessels, will secure *pratique* more promptly by having the crew and passengers mustered for inspection by the time the quarantine officer comes aboard. Cabin passengers are to be assembled in the main saloon, steerage passengers in a suitable place on the main deck, and the crew by departments, such as deck department, engine room department, etc. The process of mustering the passengers and crew is in all cases to be carried out by the ship's officers, so that, with the lists furnished by the purser, the quarantine officer may make prompt inspection.

No appreciable difficulty in this respect has occurred with the freighters using the Canal, but it has happened that on passenger vessels, especially large ships carrying numbers of excursionists and sightseers, many of whom appeared unfamiliar with the customary practices in marine travel, considerable delay has occurred in bringing all of the passengers together as required. Failure to do so has caused several hours of delay, and if such occurred on a vessel arriving at a port of entry relatively late in the day the loss of time in this manner might delay the transit of the vessel to the next day.

Argentine Training Ship to Visit the Canal.

The Argentine naval training school frigate *Presidente Sarmiento* is due to arrive at Balboa on July 1 on a practice cruise, and to pass through the Canal on the way to Havana. The schedule allows stopping two days at Balboa, passing through the Canal on July 3, lying at Colon two days, and sailing for Havana on July 6. The Canal authorities will make arrangements by which the personnel will have opportunity to inspect the Canal.

Submarines C-2, C-3, and C-5 of the flotilla of five stationed in Isthmian waters are in dry dock at Cristobal for a general overhauling.

LIGHTHOUSE EXPEDITION.

Force Despatched from Balboa for Establishment of Light at Cape Mala.

An expedition for the erection of the new light on Cape Mala at the western point of the Gulf of Panama left Balboa on Thursday afternoon, June 3, equipped with all requisite supplies and under orders to complete the light and start it burning. It is anticipated that about a month will be required for the fulfillment of the mission.

Description of the Cape Mala, Bona Island, and Taboguilla Island lights, all provided for in the same Congressional appropriation, and the revised sailing directions governing the passage through the Gulf from the Pacific Ocean to be put in effect by the establishment of the new lights, were published in THE CANAL RECORD of April 21, 1915, and otherwise distributed as a notice to mariners, in Canal circular No. 643-13. The Cape Mala light will mark the entrance to the Gulf of Panama, around the point which has come to be called "Bad Cape" (*Punta Mala*) and is to be the largest as well as the most important of the new aids to navigation.

Cape Mala is situated about 95 miles from Balboa, and the expedition for the erection of the light was transported down the bay in a barge in tow of the tug *Cocoli*, the voyage requiring 10 hours. The force on the expedition consists of five white men, including three erectors from the works of the contractor, the American Gasaccumulator Company, of Philadelphia, and 32 silver employes, including a cook and waiters loaned by the Supply Department. Food supplies were taken sufficient for a month, and the Health Department furnished such simple remedies as quinine, cathartics, aspirin, and iodine, as well as a schedule of sanitary observances, to safeguard the health of the men.

The work of the expedition will be the erection on the concrete foundations of the 100-foot tower and light complete, and the erection of a tank house for the storage of gas containers, and a cottage to quarter the keeper of the light. The tower and lamp were assembled complete at the works of the contractor prior to shipment, and all the parts numbered, so that the erection at Cape Mala will be a relatively simple task of reassembling. The houses, which are to be erected by the Building Division of The Panama Canal, had both been completely erected at Balboa, and then dismantled in sections for shipment. A liberal supply of extra lumber, spare bolts, nails, etc., was taken. The lists of tools and supplies had been checked carefully by the several divisions concerned, and every measure taken to make the expedition self-contained, to assure the satisfactory completion of the light without delay.

The erection of the light on Cape Mala will meet a need which has been felt for many years. Since the middle of the last century,

at the time of the California gold rush, when traffic through the Gulf of Panama was greatly stimulated, complaints and recommendations have been made by mariners in the hope of having a light established at this point, and experienced navigators of the west coast have emphasized the need.

The light is very necessary in order that mariners may find their position when making the Gulf of Panama, from either the northward or the southward, since the coast in the vicinity of Cape Mala is low, difficult to see, and devoid of any distinguishing features; besides which, there are dangerous outlying reefs and varying currents, which sometimes reach a velocity of 1½ knots an hour.

When once a vessel has found her position off Cape Mala, the light, in conjunction with the Bona Island and Taboguilla Island lights, which will be established at about the same time, will so simplify navigation of the Gulf that a vessel should find her way up to the entrance to the Canal as easily, almost, as into any port in the world. Coupled with the fact that vessels may find a good anchorage anywhere after passing Bona Island, and that there is rarely, if ever, any seriously heavy weather in this vicinity, navigation will be rendered extremely simple and with the usual precautions can be accomplished in perfect safety.

The original scheme for the aids to navigation in the Gulf contemplated the establishment of a light on a high point in the Pearl Islands, but since the opening of the Canal it has been demonstrated that there is no need of one there. Ships would rarely, if ever, go so far out of the course and even if they should the islands are high and easily visible, with no outlying dangers on the southwesterly side.

The following matter concerning the characteristics of the Cape Mala light is quoted from the "Sailing Directions":

Cape Mala Light—First order, flashing, white, with two red sectors; light 5 seconds, eclipsed 15 seconds, at an elevation of 140 feet, visible 18 miles, through the following arcs and with the following colors:

Visible from 340° (N. 20° W.) to 245° (S. 65° W.) through East.

MAP SHOWING SITUATION OF CAPE MALA. ("X" mark indicates Fraile Rocks.)

Red sector from 340° (N. 20° W.) to 20° (N. 20° E.).

White sector from 20° (N. 20° E.) to 215° (S. 35° W.).

Red sector from 215° (S. 35° W.) to 245° (S. 65° W.).

Obscured from 245° (S. 65° W.) to 320° (N. 20° W.) through West.

The structure will be a skeleton steel tower, with battens on two sides, all painted white, so that it may be used as a day mark.

Caution—The red sector to the northward covers Iguana Island and reef, and vessels standing to the southward leaving the Canal, which find themselves in it should immediately change course to the eastward until the light shows white.

The red sector to southwestward covers North and South Fraile Rocks which are distant about 12 miles from Cape Mala, and vessels bound for the Canal which find themselves in this red sector should immediately change course to southeast until the light shows white. This light will be the principal fix for vessels entering or leaving the Gulf of Panama.

The approximate position of the light will be Latitude 7° 27' 30" N.; Longitude 79° 59' 30" W.

Proclamation of Neutrality between Italy and Austria-Hungary.

The President of the United States issued on May 24 a proclamation of the neutrality of the United States and the territories under its jurisdiction in the war between Italy and Austria-Hungary. The provisions and injunctions are similar to those embodied in the proclamation of neutrality between Belgium and Germany, issued on August 18, 1914, and published in THE CANAL RECORD of September 9, 1914. The date from and after which "no ship of war or privateer of any belligerent shall be permitted to make use of any port, harbor, roadstead or other waters within the jurisdiction of the United States as a station or place of resort for any warlike purpose or for the purpose of obtaining any facilities of warlike equipment" was established by the Italy-Austria-Hungary Proclamation as May 25, 1915.

FIRE AREA CLEARED UP.

Panama Railroad Has Removed Debris.—Preparations for Rebuilding.

The clearing up of the debris on the 19 acres of lots in Colon devastated by fire on April 30 was completed last week by the forces of the Panama Railroad Company. The cost of this work was as follows:

Labor, section and extra gangs.....	\$4,545.25
Engine service.....	581.50
Team service.....	101.50
Total.....	\$5,228.25

This amount is to be prorated among the 214 occupied lots in the burned area and the items collected from the lessees.

The government of Panama has issued a decree requiring that all new buildings erected in any part of Colon, including the burned area, be of concrete or other nonflammable material, and one building permit under the new conditions, for the rehabilitation of a partly destroyed concrete building, has been issued. The Panama Railroad Company is preparing new leases to govern construction on its lots, as set forth in this circular letter from the Land Agent to the lessees, issued on Monday, June 7:

THE PANAMA RAILROAD COMPANY,
OFFICE OF LAND AGENT,
ANCON, C. Z., June 7, 1915.

To lessees of Panama railroad lots in the burned area of Colon—We are in receipt of advice from the Panama Government authorities that a decree is to be issued requiring that new buildings to be erected in the area which was destroyed by fire on April 30, 1915, be constructed of concrete or other nonflammable material. Permits for the construction of such buildings will be issued immediately by the authorities in Colon upon request.

In view of the fact that approximately two-thirds of all Panama railroad leases to lots in the burned area will expire within the next six or seven years, and as the Panama Government will not permit the reconstruction of wooden buildings, the Panama Railroad Company is disposed to issue new leases for a period of 25 years to those lessees who are desirous of releasing their present contracts. These new leases will be dated July 1, 1915, for 25 years and will provide in article 3, that the lessee will commence construction within a period of one year and will finish such construction within a period of two years from date of lease. A new article, numbered 10, will be included in this new lease, which will provide that at any time prior to the expiration of the lease period should the Government of the United States, The Panama Canal, or the Panama Railroad Company have need for the leased lot, the lessor company shall have a right to terminate the lease upon one year's notice in writing, upon the payment at that time of the fair and reasonable value of any or all buildings or other improvements that the lessee has constructed upon the property. Value of the improvements will be determined by arbitration, each party to the contract appointing one arbitrator, and the two so nominated shall select a third party.

Although the Panama Railroad Company is willing to issue new leases as above indicated, nevertheless lessees will be permitted to construct under the terms of their old leases with the exception of the class of building to be placed on the premises, which naturally will have to conform to the requirements of the decree to be issued by the Panama Government authorities.

The Panama Railroad Company will furnish gravel for concrete buildings to be constructed in this burned area for a period of one year at cost price.

Will you kindly advise me as soon as possible what action you expect to take in connection with your property in this area?

R. S. CARLSON,
Land Agent.

Approved:
C. H. MOTSETT,
Superintendent.

Red Cross Statement.

The following financial statement of the Canal Zone chapter of the American National Red Cross shows receipts and expenditures between April 1 and June 4, 1915. It includes numerous contributions for the relief of victims of the fire in Colon on April 30, but not the greater part of the disbursements in this work, as bills for the principal

performances have not been presented to date. Up to May 19, the expenditure in connection with the fire amounted to \$1,531.65, according to the chairman of the local committee, and by this time the amount has reached approximately \$2,000. This is the statement to June 4:

RECEIPTS.	
Balance on hand April 1, 1915	\$3,546.34
April 16, Reimbursement by National Red Cross account amount advanced Louis de la Pena	100.00
April 30, Proceeds of ball—additional	25.00
SUBSCRIPTIONS AND DONATIONS FOR RELIEF OF COLON FIRE SUFFERERS.	
May 1, General Geo. W. Goethals	20.00
May 3, Cristobal Union Sunday School	25.00
May 4, Red Cross Nurse, No. 3988	1.00

Extending the Thanks of Panama.

The following is a translation of a letter sent to the American Minister in Panama by the Secretary of Foreign Affairs of Panama, expressing appreciation of the help given by the various American organizations and individuals in connection with the fire at Colon on April 30:

I have the honor to acknowledge the receipt of the very gracious and courteous note from Your Excellency, F. O. No. 175, of the 1st instant, by means of which you have had the kindness to express personally and officially to the Government of Panama and to the undersigned your feelings and sympathy for the tremendous disaster of which the city of Colon has been the victim.

Such expressions of feeling as those contained in the letter to which I have the honor to answer are particularly worthy of appreciation and serve as consolation and solace in those works which naturally follow a catastrophe such as occurred recently, and therefore, I present to Your Excellency in the name of my Government, and from myself personally, the most sincere expressions of gratitude.

I take this opportunity to herewith express our gratitude to the authorities of the Government of Your Excellency, to whom I beg to transmit it, and especially to Colonel Cronkrite, Major Cole, Captains Carpenter, Fulton, Maybach, and Hawes, the fire department of Cristobal, and to the members of the Red Cross, and all those compatriots of Your Excellency who distinguished themselves by their self-denying efforts on the occasion of this so unfortunate event.

I take this opportunity to express to Your Excellency the expressions of my highest and most distinguished consideration and personal esteem.

(Signed) E. T. LEFEBRE.

The estates of the abovenamed deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against the estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

BOUNDARY CONVENTION.

Changes in Lines between the Canal Zone and the Republic of Panama.

The new boundary convention between the United States and the Republic of Panama has effected a trade of territory between the Canal Zone and Panama for the benefit of both countries. The negotiations consummated by the convention had been under way for about four years. The convention was made on September 2, 1914, the exchange of the ratifications by the two governments was made on February 11, 1915, and the delivery of possession of the exchanged areas was made on May 1.

The principal change was in the reversion of the Sabanas district to Panama, and the extension of the municipality of Panama to reach the former outer boundary of the Canal Zone, five miles from the Canal, thus removing the area of Canal Zone jurisdiction which had separated the capital of the country from the remainder of the Republic. The city is no longer shut off between the Canal Zone and the sea, and has now room for indefinite expansion to the northeast. This was a point strongly desired by officials of Panama, for both "sentimental" and commercial reasons. It adds about six and a half square miles of territory to the city.

Another change with respect to the city of Panama was a movement of the line slightly to the eastward between Fourth of July Street and De Lesseps Park, to make the boundary line conform to the property line, and bring into the Canal Zone a few buildings belonging to the United States which formerly lay in Panama. From the northwest corner of De Lesseps Park, near the Tivoli Hotel, the line was changed to follow the north curb line of the park to a point near Calidonia Bridge, thence across the railroad on a line parallel with the bridge to the eastern line of the railroad right-of-way, and thence along that line northerly to the Curundu River. The old line ran almost due north in front of the Tivoli Hotel and cut off a part of the Santa Cruz district of the city of Panama. The new line puts all the Santa Cruz district in the city, but extends the Canal Zone to take in the buildings in front of the Tivoli Hotel, between it and the Panama railroad, and known as "Pueblo Nuevo".

In the lines between the city of Colon and the Canal Zone, alterations were made in the limits of Colon harbor, so that all of the new terminal construction along the mole extending to the northward of Cristobal, and all of the water area in front of Toro Point in Limon Bay, in the lee of the breakwater, will lie within the Canal Zone. Another change was made to enlarge the area formerly occupied by the Panama railroad lighthouse, at the northwest corner of Manzanillo Island, near the Washington Hotel. The lighthouse site was included in the Canal Zone by the Davis boundary agreement of 1904, and continues in the Zone under the new convention, with the increased area on which Battery Morgan is situated.

In addition to the changes in the lines between the Canal Zone and the cities, the convention establishes the boundaries of all lands in the Gatun Lake area up to the 100-foot contour, all islands in the lake, and all peninsulas to which access can be gained only across the waters of the lake or from land in the Canal Zone, which had heretofore been taken

by the United States, under articles II and III of the Canal Treaty. The rights of the respective governments under the Canal Treaty are in no wise impaired by the boundary convention.

The President's proclamation of the new convention, in which the new bounds are described precisely, has been published as Canal circular No. 601-41, and is as follows:

Whereas a Convention between the United States of America and the Republic of Panama defining the boundary line of the Panama Canal Zone, was concluded and signed by their respective plenipotentiaries at the city of Panama on the second day of September, one thousand nine hundred and fourteen, the original of which Convention, being in the English and Spanish languages,* is word for word as follows:

BOUNDARY CONVENTION.

Whereas, Gen. George W. Davis, then Governor of the Canal Zone, on behalf of the United States of America, and Messrs. Tomás Arias and Ramón Valdés Lopez, then Secretary of Foreign Affairs and Attorney General, respectively, of the Republic of Panama, acting on behalf of that Republic, entered into an agreement on the 15th day of June, 1904, by the terms of which the Republic of Panama delivered over to the United States of America, the use, occupation, and control in perpetuity of the zone of land ten miles in width described and mentioned in articles II and III of the Canal Treaty between the United States of America and the Republic of Panama, dated November 18, 1903, and the boundary lines of said zone, as well as those of the cities of Panama and Colon and their adjacent harbors, were subsequently located upon the ground and monumented:

And, whereas, the President of the Republic of Panama, by decree number 46 of May 17, 1912, delivered over to the United States the use, occupation, and control of the areas of land to be covered by the waters of Lake Gatun and all that part of the shores of the lake up to an elevation of one hundred feet above sealevel, in conformity with articles II and III of said Canal Treaty:

And, whereas, since the promulgation of said decree of May 17, 1912, the United States, in conformity with the said articles of said Treaty, have taken over the use, occupation, and control of the islands in said Lake Gatun and the peninsulas bordering on said lake to which there is no access except from said lake or from lands within the jurisdiction of the Canal Zone:

Now, therefore, the Government of the United States, and the Republic of Panama being desirous to establish permanently the boundary lines of the above-mentioned lands and waters so taken over by the United States, to that end have resolved to enter into the following agreement, for which purpose the President of the United States of America has commissioned His Excellency William Jennings Price, Envoy Extraordinary and Minister Plenipotentiary of the United States to the Government of Panama, and the President of the Republic of Panama has commissioned His Excellency Ernesto T. Lefevre, Secretary of State in the office of Foreign Affairs of the Republic of Panama, who, having exchanged their respective full powers, have entered into the following boundary convention:

I.

It is agreed that the boundary lines of the zone of and of ten miles in width described in article II of the said Canal Treaty shall remain as defined and established by the agreement of June the 15th, 1904, above mentioned, and subsequently located on the ground and monumented as shown by exhibit "A" accompanying this Convention, with the modifications hereinafter set out in respect to the cities of Panama and Colon and their adjacent harbors.

II.

In conformity with articles II and III of said Treaty the rights of the United States to the use, occupation, and control of the areas to be covered by the waters of Gatun Lake and all that part of the shores of the lake up to an elevation of one hundred feet above mean sealevel, and the islands in said lake, is hereby recognized, and in like manner the right of the United States to the use, occupation, and control of the peninsulas bordering on said lake to which there is no access except over lands of the Canal Zone or from the waters of Gatun Lake, is hereby recognized.

The one hundred feet contour line above referred to, as well as the peninsulas above mentioned, shall be conveniently monumented and marked upon the ground by the United States, with the intervention of a representative or representatives of the Republic of Panama designated for that purpose, and sketched upon a special map.

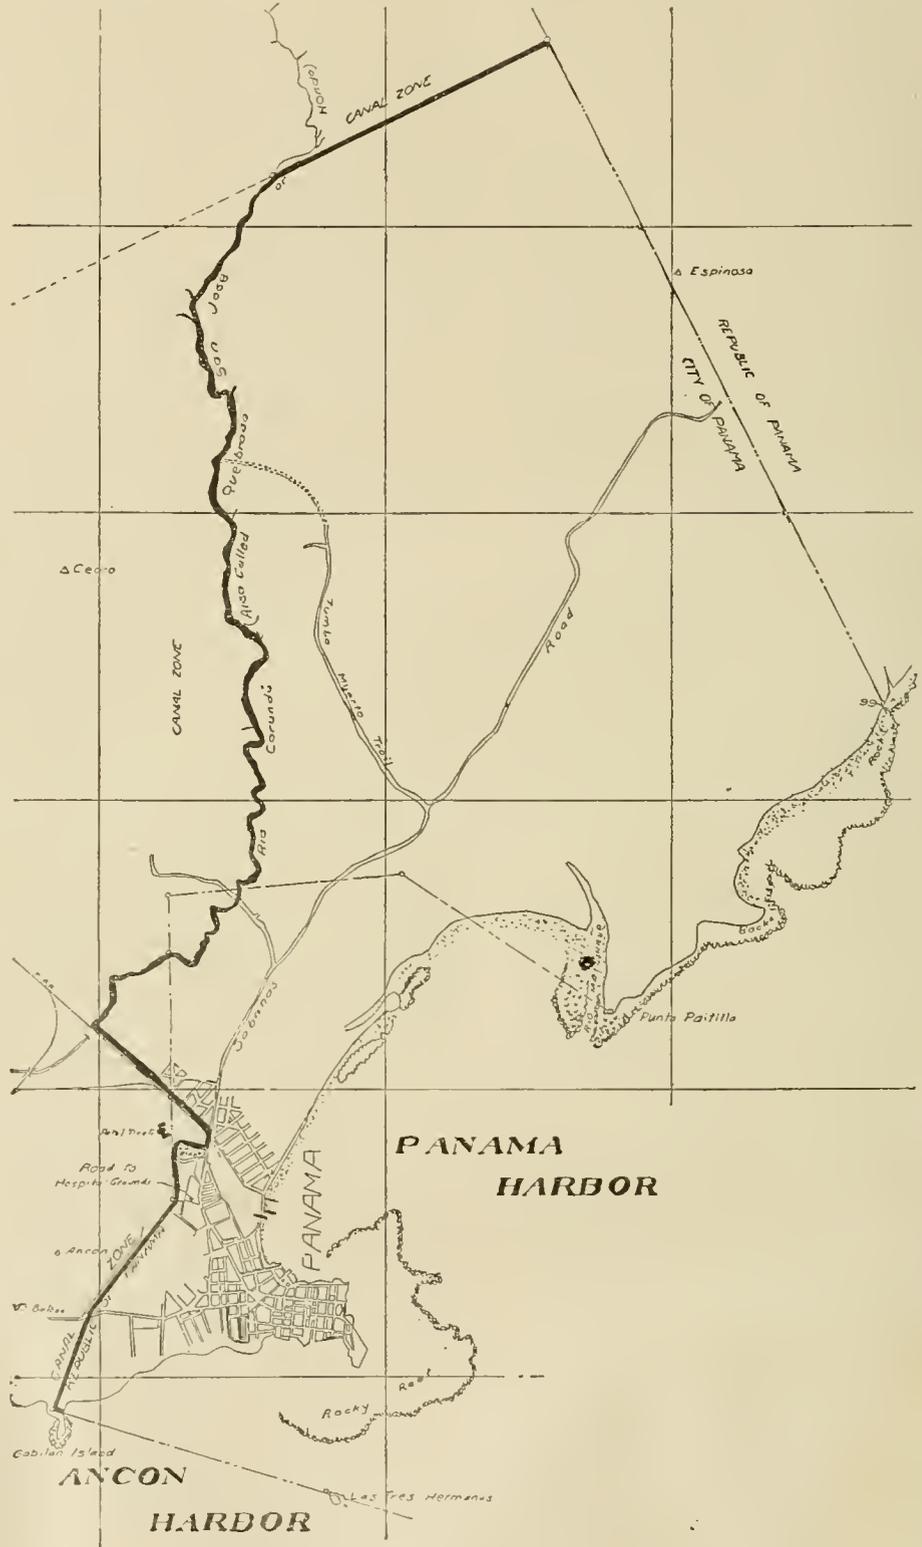

*The original proclamation also contains the Spanish version, which has been omitted from this reprint.

III.

It is agreed that the permanent boundary line between the City of Panama and the Canal Zone shall be as follows:

Beginning at a concrete monument located above high water mark on the shore of Panama Bay, south of the Balboa Road in the slope of the headland called

on the map) the boundary line runs north twenty degrees and two minutes east (N. 20° 2' E.) six hundred and thirty-three and seven-tenths (633.7) meters to a concrete monument (marked "B" on the map) located at the intersection of the easterly line of the Zone boundary road, and the northerly line of the road leading from Panama to Balboa; thence north thirty-six

MAP SHOWING NEW BOUNDARIES OF THE CITY OF PANAMA.

Heavy line shows new boundary between Canal Zone and city. Broken line running north from Tivoli Hotel, then easterly to Punta Paitilla, shows the old boundary. Broken line in upper right corner, between "City of Panama" and "Republic of Panama," represents the former outer line of the Canal Zone.

"Punta Mala," and north thirty-two degrees and thirty minutes west (N. 32° 30' W.) and one hundred and fifty (150) meters from about the center of an island called "Gavilan."

From the above concrete monument (marked "A"

degrees and forty-two minutes east (N. 36° 42' E.) nine hundred and sixty-six and eighty-five hundredths (966.85) meters to a concrete monument (marked "C" on the map) on the northerly side of the road leading to Ancon Hospital grounds; thence north three degrees

and nineteen minutes east (N. 3° 19' E.) one hundred and forty-eight and forty-six one-hundredths (148.46) meters to an iron rail property monument; thence north eight degrees and fourteen minutes and forty seconds west (N. 8° 14' 40" W.) one hundred and fifty-one and thirty-three one-hundredths meters (151.33) to a point; thence north thirty-seven degrees and forty-five minutes east (N. 37° 45' E.) fourteen and thirty-three one-hundredths meters to a point in the road on the present boundary line; thence along said present boundary north no degrees and forty-seven minutes west (N. 0° 47' W.) sixty-six and forty-four one-hundredths meters (66.44) to a point; thence north seventy-six degrees and fifty-nine minutes east (N. 76° 59' E.) forty-two and forty-five one-hundredths (42.45) meters to a point; thence south seventy-two degrees and eleven minutes east (S. 72° 11' E.) one hundred and fifty-nine and twenty-seven one-hundredths (159.27) meters to a point near Calidonia Bridge; thence north three degrees and eight minutes east (N. 3° 8' E.) crossing the Panama Railroad Company's tracks, seventy-seven and three-tenths (77.3) meters to a point twelve and two-tenths (12.2) meters from the center line of the main track of the said Panama Railroad; thence parallel to the said railroad in a north-westerly direction, two hundred and ninety and five-tenths (290.5) meters to a point on the present boundary line; thence north forty-nine degrees, thirteen minutes and ten seconds west (N. 49° 13' 10" W.) one hundred and sixty-five and thirty-seven one-hundredths (165.37) meters to an iron rail monument, twelve and three-tenths meters from the center of the main line track of the Panama Railroad; thence north forty-six degrees, thirty-nine minutes and thirty seconds west (N. 46° 39' 30" W.) two hundred and twenty and four one-hundredths (220.04) meters to a Panama Railroad Boundary monument twenty-two and one-tenth (22.1) meters from the center line of Panama Railroad main track; thence north forty-nine degrees and fourteen minutes west (N. 49° 14' W.) and parallel with the Panama Railroad track two hundred and ninety and thirty-six one-hundredths (290.36) meters to Rio Curundu; thence following the course of Rio Curundu upstream to a point (marked "E" on the map) where the said Rio Curundu is intersected by a straight line drawn through the point of intersection on the canal axis (marked "Cocoli" on the map) perpendicular to that part of the Canal axis of A. D. 1906 which extends in a straight line south-easterly from the said point marked "Cocoli" to the point of intersection (marked "Bay" on the map) the former point of intersection being situated between Miraflores and Corozal, and the latter point in Ancon Harbor; thence from "E" north sixty-three degrees and thirty minutes east (N. 63° 30' E.) two thousand and eight and six-tenths (2,008.6) meters to a concrete monument (marked "F" on the map) on the present boundary between the Canal Zone and the Republic of Panama; thence along this boundary south twenty-six degrees and thirty-four minutes east (S. 26° 34' E.) about four thousand seven hundred and forty-four and five-tenths (4,744.5) meters to monument No. 99 and thence continuing on this line to the shore of Panama Bay at low water mark; thence following the mean low water line around the shore of Panama Bay to a point on the boundary line between Panama Harbor and Ancon Harbor; thence north seventy-two degrees, fourteen minutes west (N. 72° 14' W.) to a monument "A," the point of beginning, except that the entire area of the middle island on the map called Las Tres Hermanas shall be under the jurisdiction of the United States of America.

Points "A," "B" and "C," above referred to, are the same points mentioned in the original agreement between the Government of the Republic of Panama and the Canal Zone Government, dated June 15, 1904.

All bearings in this description and on the map mentioned above are referred to true meridian and all coordinates are in accordance with the Panama-Colon Datum.

The Government of Panama agrees that the portion of the roadway now existing between the Ancon Post Office and the Tivoli Dispensary and connecting the Tivoli Road with the roads leading to Balboa and the Ancon Hospital grounds, which will fall within Panamanian jurisdiction as a result of the boundary lines established in accordance with the foregoing description, will be kept open and of the same grade as same now is and will be maintained in good serviceable condition by the said Government of Panama so that it will afford a free, uninterrupted and unobstructed permanent public thoroughfare, unless in the future provided otherwise by the mutual agreement of the chief executive authorities of the Republic of Panama and the Panama Canal.

IV.

It is agreed that the harbor of the City of Panama shall include the maritime waters in front of the City of Panama lying to the north and east of a line beginning at a concrete monument set on "Punta Mala" marked "A" on the map already referred to in this Convention,

and running south seventy-two degrees and fourteen minutes east (S. 72° 14' E.) through the middle island of the three islands known as "Las Tres Hermanas," but excluding the said middle island, and extending three marine miles from mean low water mark at Punta Mala; and that the harbor of Ancon shall include the waters lying south and west of said line, but including the said middle island which shall be deemed to be within the harbor of Ancon. The said middle island hereby included within the harbor of Ancon is situated about south twelve degrees, thirty minutes west (S. 12° 30' W.) eight hundred and fifty-six (856) meters from the point of Las Bovedas and lies in latitude north eight degrees, fifty-six minutes (N. 8° 56') plus one thousand and fifty-eight and eighty-eight hundredths (1,058.88) meters and longitude west seventy-nine degrees, thirty-two minutes (W. 79° 32') plus three hundred forty-two and six-tenths (342.6) meters, the datum of said latitude and longitude being what is generally known as the Panama-Colon Datum. All bearings are referred to true meridian.

The foregoing description of the City of Panama and Panama Harbor conform to the accompanying blue print marked exhibit "B."

V.

It is agreed that the permanent boundary line between the City of Colon and the Canal Zone shall be as follows:

Beginning at a point on the western shore of Boca Chica (sometimes called Folks River) marked "A" on the map, and fifty (50) meters to the eastward of the center line of the main line of track of the Panama Railroad; thence northward and northwestward, always parallel with said railroad track, and at a uniform distance of fifty (50) meters from the center line thereof to the center of Bolivar Street (sometimes called "C" street), said point being marked "B" on the map; thence northerly along the center line of said Bolivar Street, to the center line of Eleventh Street, this point of intersection being marked "C" on the map; thence westerly along the center line of Eleventh Street, a distance of one hundred sixty-two and fifty-three hundredths (162.53) meters to a cross on the sea wall along Limon Bay, said point being marked "D" on the map; thence north seventy-eight degrees, thirty minutes and thirty seconds west (N. 78° 30' 30" W.) to the shore of Limon Bay at mean low water mark; thence following the mean low water line around the shore on the northerly, easterly, southerly, and westerly direction to the point of beginning, except that at the site of the old Colon lighthouse a detour is made, as shown on the map, to exclude an area of land to be used as the site for a United States battery, which site shall be deemed to be within the Canal Zone.

The site for a United States battery above mentioned, which is to be included within the jurisdiction of the Canal Zone, is described as follows:

The initial point is a tack in a stake on Colon point, situated with reference to certain prominent points as follows: South forty-one degrees, six minutes east (S. 41° 6' E.) twenty-five and twenty-two one-hundredths (25.22) feet from the southwest interior corner of the upper pavement of the swimming pool; south eleven degrees, thirty-seven minutes west (S. 11° 37' W.) one hundred twenty-seven and sixty-eight one-hundredths (127.68) feet from a cross mark on a bolt set in a concrete base thirteen and nine-tenths (13.9) feet to the northeast of the center of the northeastern edge of the swimming pool; south thirty-five degrees, eighteen minutes west (S. 35° 18' W.) two hundred sixty-six and seventy-five one-hundredths (266.75) feet from the northwestern corner of the Hotel Washington; and north sixty-eight degrees, twenty-nine minutes west (N. 68° 29' W.) five hundred forty-three and ninety-five one-hundredths (543.95) feet from the cross mark on a rail set in a concrete base at a point where the south building line of Second Street intersects the center line of Bottle Alley; from this initial point south forty-three degrees, no minutes west (S. 43° 00' W.) two hundred fifty-eight and five-tenths (258.5) feet to a point; thence north forty-seven degrees, no minutes west (N. 47° 00' W.) ninety and sixty-four one-hundredths (90.64) feet to a point; thence by a curve to the right with a radius of fifty-six and eighty-six one-hundredths (56.86) feet and a central angle of forty-five degrees, no minutes (45° 00'), forty-four and sixty-six one-hundredths (44.66) feet to a point; thence by a curve to the right with a radius of ninety-one (91) feet and a central angle of forty-five degrees, no minutes (45° 00'), seventy-one and forty-seven one-hundredths (71.47) feet to a point; thence north forty-three degrees, no minutes east (N. 43° 00' E.), one hundred seventy-seven and five-tenths (177.5) feet to a point; thence south forty-seven degrees, no minutes east (S. 47° 00' E.), one hundred fifty-seven and five-tenths (157.5) feet to the point of beginning, containing ninety-one one-hundredths (0.91) acres, more or less. All bearings are referred to true meridian (Panama-Colon Datum).

VI.

The harbor of Colon shall consist of those maritime

waters lying to the westward of the City of Colon and bounded as follows:

The southerly boundary of the harbor of Colon is in a line running north seventy-eight degrees, thirty minutes and thirty seconds west (N. 78° 30' 30" W.), which begins at a cross cut in the concrete sea wall on the easterly side of Limon Bay and on the center line of Eleventh Street, Colon, produced westerly. This point is marked "D" on the map designated exhibit "C." Beginning at mean low water mark on Limon Bay on the above-described line the boundary runs northerly westerly along said line to a point in Limon Bay marked "E" on the map, and located three hundred and thirty (330) meters east of the center line of the Panama Canal; thence turning to the right and running in a northerly direction the line runs parallel with the above mentioned center line and at a distance of three hundred and thirty (330) meters easterly therefrom until it meets an imaginary straight line drawn through the lighthouse on Toro Point having a bearing of south seventy-eight degrees and thirty minutes and thirty seconds east (S. 78° 30' 30" E.), this intersection point being marked "F" on the map; thence turning to the right and running along the above-mentioned line south seventy-eight degrees, thirty minutes and thirty seconds east (S. 78° 30' 30" E.) to a point on the boundary of the above-mentioned site for the United States battery; thence turning to the right and running along the said boundary line of said site to the mean low water line of Limon Bay; thence turning to the right and running along said water line in a generally southerly direction to the point of beginning at the foot of Eleventh Street.

All bearings in this description and on the plan mentioned above are referred to true meridian (Panama-Colon Datum).

The foregoing description of the City of Colon and Colon Harbor conform to the accompanying blue print marked exhibit "C."

VII.

It is agreed that the Republic of Panama shall have an easement over and through the waters of the Canal Zone in and about Limon and Manzanillo bays to the end that vessels trading with the City of Colon may have access to and exit from the harbor of Colon, subject to the police laws and quarantine and sanitary rules and regulations of the United States and of the Canal Zone established for said waters.

The United States also agrees that small vessels may land at the east wall which extends along the shore to the south of the foot of Ninth Street and recently constructed by the Panama Railroad Company in the harbor of Colon free of any wharfage or landing charges that might otherwise accrue to the said company under the terms of its concessions from the Government of Colombia; and the United States further agrees that it will construct and maintain a landing pier in a small cove on the southerly side of Manzanillo Island in the northwesterly portion of the arm of the sea known as Boca Chica (sometimes called Folks River), to be used as a shelter harbor for small coasting boats of the Republic of Panama, without any wharfage or other landing charges.

VIII.

Inasmuch as the highway known as the "Sabanas Road" will come entirely within the bounds of the City of Panama under this agreement the authorities of the Canal Zone are hereby relieved of the duty to repair and maintain such road, or any part of it, and the same shall be done hereafter by the authorities of the Republic at their cost and expense.

IX.

It is agreed that the Republic of Panama will not construct nor allow the construction of any railway across the Sabanas or other territory hereby transferred to that Republic without a mutually satisfactory agreement having been previously arrived at between the two governments; and this shall be without prejudice to any right the United States may have to object to such railway projection under any of the provisions of the Canal Treaty of November 18, 1903.

X.

The contracting parties hereby agree that this Convention shall not diminish, exhaust, or alter any rights acquired by them heretofore in conformity with the Canal Treaty of November 18, 1903, and it is further expressly agreed that the United States, in the exercise of the rights granted to it under articles II and III of the said Canal Treaty and subject to article VI of said Treaty, may enter upon and use, occupy, and control the whole or any portion of the Sabanas land, or other territory hereby transferred to the Republic of Panama, as the same may be necessary, or convenient, for the construction, maintenance, operation, sanitation, or protection of the Canal or of any auxiliary canals, or other works necessary and convenient for the construction, maintenance, operation, sanitation, or protection of said enterprise.

XI.

This agreement shall not be construed to modify the rights of the authorities of the Canal Zone to employ

citizens of the Republic of Panama residing in the territory of the Republic as provided in section V of the above-mentioned agreement of June 15, 1904, and for which purpose the Government of the Republic granted the permission required by paragraph 2 of article 7 of the Panamanian Constitution.

XII.

The civil and criminal cases pending in the courts of the Canal Zone and the Republic of Panama at the time of the execution of this Convention shall not be affected hereby but the same shall be proceeded with final judgment and disposed of in the courts where they are now pending as though this agreement had not been entered into.

XIII.

The exhibits accompanying this agreement are signed by the representatives of the respective governments for identification. This Convention, when signed by the plenipotentiaries of the high contracting parties, will be ratified by the two governments in conformity with their respective constitutional laws, and the ratifications shall be exchanged at Panama at the earliest date possible.

In faith whereof the respective plenipotentiaries have signed the present Convention in duplicate and have hereunto affixed their respective seals.

Done at the City of Panama, the second day of September, in the year of our Lord, nineteen hundred and fourteen.

[SEAL.] WILLIAM JENNINGS PRICE,
[SEAL.] E. T. LEFEVRE

And whereas the said Convention has been duly ratified on both parts and the ratifications of the said Convention were exchanged in the City of Panama on the eleventh day of February, one thousand nine hundred and fifteen;

Now, therefore, be it known that I, Woodrow Wilson, President of the United States of America, have caused the said Convention to be made public to the end that the same and every article and clause thereof may be observed and fulfilled with good faith by the United States and the citizens thereof.

In testimony whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the City of Washington this eighteenth day of February in the year of our Lord one thousand nine hundred and fifteen, and of the Independence [SEAL.] of the United States of America the one hundred and thirty-ninth.

WOODROW WILSON.

By the President:
W. J. BRYAN,
Secretary of State.

Signed at Panama, September 2, 1914.
Ratification advised by the Senate, October 22, 1914.
Ratified by the President, January 4, 1915.
Ratified by Panama, February 8, 1915.
Ratifications exchanged at Panama, February 11, 1915.

Proclaimed, February 18, 1915.

OFFICIAL CIRCULARS.

Private Vegetable Gardens near Quarters.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., May 29, 1915.

To all concerned—Occupants of gold quarters may operate vegetable gardens in the vicinity of their quarters, providing the location is approved by the district quartermaster and the garden is conducted in a manner satisfactory to the sanitary inspector. These gardens must not occupy ground in front of the rear line of the quarters, and must not be enclosed by unsightly fences or violate sanitary regulations.

CHESTER HARDING,
Acting Governor.

Clearance at Balboa Heights Station.

THE PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,
BALBOA HEIGHTS, C. Z., June 4, 1915.

CIRCULAR No. 92:

To all concerned—The canopy roof of the new Balboa Heights station has a clearance of 12 feet 5 1/2 inches from top of rail; from center line of track five feet 11 1/2 inches, and from gage line of nearest rail, three feet 5 1/2 inches.

It is requested that all departments, in loading material for shipment to Panama, refrain from loading cars in excess of this clearance, and where the load is such as to exceed these measurements, the matter should be called to the attention of the terminal trainmaster in order that he may arrange for handling the movement of such loads southward on the northbound track between cross-overs north and south of the Balboa Heights station.

C. H. MOTSETT,
Superintendent.

Permits for Visiting Military Reservations.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., June 3, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

As all permits to military reservations expire June 30, 1915, it is requested that you submit, by June 15, the names of employes of your department or division whose duties necessitate frequent visits to the reservations.

It is desired to issue extended permits only as above outlined, and names of employes who make but occasional trips to reservations should not be submitted. These should be covered by individual request from head of department or division whenever necessity requires.

CHESTER HARDING,
Acting Governor.

Traveling Engineer and Roundhouse Foreman.

THE PANAMA CANAL,
MECHANICAL DIVISION,

BALBOA, C. Z., May 27, 1915.

To all concerned—Effective May 27, Mr. R. A. Compton, night roundhouse foreman, will be transferred as day roundhouse foreman in charge, vice Mr. W. H. Readle, who has been assigned to duty as traveling engineer.

Effective May 27, Mr. A. H. Harvey is appointed night roundhouse foreman, vice Mr. R. A. Compton.

D. C. NUTTING,
Superintendent, Mechanical Division.

Electrical Division Orders.

THE PANAMA CANAL,
ELECTRICAL DIVISION,

BALBOA HEIGHTS, C. Z., June 1, 1915.

To all concerned—Effective June 2, 1915, and during the absence of Supervisor J. A. Martin on leave, Foreman A. M. Horle will have supervision over the electrical construction and maintenance at Cristobal and Gatun.

Effective June 2, 1915, and until the return of Supervisor W. L. Hersh, operators in charge of substations and transmission linemen will report direct to me.

H. ROWE,
Electrical Superintendent.

Approved:

W. H. ROSE,
Electrical Engineer.

Superintendent in Building Division.

THE PANAMA CANAL,
BUILDING DIVISION,

BALBOA HEIGHTS, C. Z., May 27, 1915.

To all concerned—Effective May 27, 1915, Mr. James Cosgrove is appointed superintendent of the northern district, Building Division, with headquarters at Cristobal.

GEO. M. WELLS,
Resident Engineer.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 303, on Wednesday, June 16, 1915, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

For the benefit of applicants residing in Gatun and Cristobal or Colon, examinations for licenses as navigators of motor boats, and as chauffeurs, will be held at the office of the captain of the port of Cristobal on Friday, June 18, 1915, beginning at 9 a. m. Applicants should be provided with motor boats or automobiles for the demonstration test.

By direction of the chairman of the board,

F. M. NIXON,
Recorder, Board of Local Inspectors.

COMMISSARY DEPARTMENT.

Shipments of Strawberries.

Advice has been received by cable from New York to the effect that shipments of strawberries have been delayed on account of wet and cold weather during the past month and that shipments will be made at the first opportunity.

It is hoped that some will come forward on the steamship *Advance*, due June 17. It is probable that not more than two or three shipments will be received, on account of the lateness of the season.

New Order for Royal Doulton China.

A large order has been placed in Europe for Royal Doulton chinaware, punch bowls, mugs, and beakers, both hunting and coaching scenes, and these articles will be carried as regular items of stock in future. It is probable that this shipment will not arrive for two or three months.

A complete list of Royal Doulton chinaware pieces, hunting and coaching scenes, which it is intended to carry as regular items of stock, and for which no deposits to cover are required, is as follows: Tea plates; bread and butter plates; cups and saucers; punch bowls, with and without pedestals; beakers, large and small; and mugs, large and small.

Cold Storage Prices.

The charges published below will be increased by 10 per cent in case of sales to commercial ships and foreign naval vessels, and by 20 per cent for yachts.

The following is a list of retail prices of cold storage provisions which will be effective June 10, 1915:

FRESH MEATS.

There are no changes in the prices of fresh meats since publication in THE CANAL RECORD of June 2, except the reduction of spare ribs from 15 cents to 11 cents per pound.

	Price.
MISCELLANEOUS.	
Brains, calves', per pound	10
Calves' head, each	80
Kidneys, beef, per pound	12
Livers—Beef, per pound	10
Calf, each	70
half, each	35

Tues., July 27	5:06	11:10	17:11	23:29
Wed., July 28	14:2	1:9	14:3	0:6

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47 p. m.

The cable address of The Panama Canal, on the Isthmus, is "Pan canal, Panama," in the United States, "Pan canal, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C." for delivery in the United States.

The Canal Record

Official publication of *The Panama Canal*.

The *Canal Record* is published weekly. The subscription rate is \$1 per year in the United States and its possessions, and in Canada, Cuba, Mexico, and Panama (domestic postage), and \$1.50 in other countries (foreign postage). The paper is furnished free to United States Government departments, representatives of foreign governments, public libraries, and employes of *The Panama Canal* and the *Panama Railroad Company* whose names are on the gold roll.

All subscriptions expire on December 31. Domestic subscriptions are accordingly charged as beginning from the first of the quarter of the year in which received. Remittances should be made to pay only to December 31, on this basis: Sent between April 1 and July 1, 75 cents; July 1 to October 1, 50 cents; October 1 to January 1, 25 cents. For foreign subscriptions the year is divided into thirds: Between January 1 and May 1, \$1.50; May 1 to September 1, \$1; September 1 to January 1, 50 cents.

Remittances for subscriptions may be forwarded to *The Panama Canal*, Washington, D. C., or to *The Canal Record* at the address given below.

Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Large Sailing Ships Using the Canal.

The four-masted steel bark *Bell*, which was despatched from Balboa on June 10 after passing through the Canal on the way to Japan from Philadelphia, and the bark *Daylight*, due at Colon any day from New York, are practically sister ships and among the largest sailing vessels in the world. The *Bell* is 352½ feet long by 49 feet in the beam and 28 feet deep and has a net tonnage of 3,609; the *Daylight* is one foot less in length than the *Bell*, with her other dimensions the same, and has a net tonnage of 3,599. The *Bell* was launched as the *Brilliant*, having been built, like the *Daylight*, for the oil trade and named like her for a brand of oil. They went into service in 1902.

The largest sailing ship now in service is the *France*, a five-masted bark built at Bordeaux in 1912; her dimensions are 418.8 feet by 56 feet by 25 feet, and her net tonnage is 4,544. The *France* is equipped with auxiliary power, using oil engines. The seven-masted American schooner *Thomas W. Lawson*, built in 1902 and lost at sea in 1908, was in her time the largest American sailing vessel on the high seas. Her length was 375 feet, beam 50 feet, and net tonnage 4,914. The *Thomas W. Lawson* was exceeded in length and beam by the German bark *Preussen*, which had dimensions of 407 by 53 by 27 feet and net tonnage of 4,765.

Peruvian Line Vessel from Callao to Baltimore.

The passenger steamship *Mantaro* of the Peruvian Line, which has been engaged in a coastwise service between Callao and Balboa since her completion in 1910, will pass through the Canal next week, sailing from Cristobal

on June 26, on the way to Baltimore with a cargo of nitrates. Other vessels of this line have made use of the Canal in traffic with Europe. Efforts have been made to effect agreements with commercial associations of American ports to guarantee a certain quantity of freight for vessels of this line if a regular service were established between Peru and the United States, and it is possible some such arrangement will be made. The *Mantaro* is a twin-screw steamer rated at a speed of 13½ knots, which would enable her to make the distance of 1,903 miles from Cristobal to Baltimore in approximately six days, or the 3,290 miles between Callao and Baltimore in about 10½ days, allowing 10 hours for the transit of the Canal. The rate for first-class passenger transportation between Cristobal and Baltimore on this vessel will be \$65.

Payment for Pacific Mail Pier at Colon.

Final papers have been signed in the agreement by which the Panama Railroad Company pays the Pacific Mail Steamship Company \$150,000 for the latter's timber pier at Colon, known as Pier No. 5. The superstructure of the pier has been demolished as a step in the campaign to have only rat-proof piers for the sake of plague prevention.

Panama Railroad Steamship Line Using Additional Pier in New York Harbor.

On account of the increased amount of cargo handled to New York from the Isthmus by the Panama Railroad Steamship Line, following the discontinuance of the services between New York and the Isthmus of the Royal Mail Steam Packet Company and the Hamburg-American Line, the Panama Railroad Steamship Line has been using in addition to its regular terminals in New York Pier 65, North River, leased from the Hamburg-American Line for \$1,500 per month, subject to cancellation on 15 days' notice from either party to the contract. The pier is used only for the handling of cargo, and departures of passenger-carrying vessels of the line are all made from Pier 67, North River, as heretofore.

Over \$4,000,000 in Tolls.

The earnings of tolls for the use of the Canal reached and passed the \$4,000,000 mark on Sunday, June 6. The earnings during May were \$547,054.60, which brought the total for the period between the beginning of handling of cargo through the Canal, in May, 1914, and June 1, 1915, to \$3,897,693.61, and the earning of the additional hundred thousand dollars required to make up four million was accomplished in less than six days in June.

Building for American Bible Society at Cristobal.

The lease of lot No. 4 on the waterfront at Cristobal, near the entrance to Pier 9, has been granted to the American Bible Society for the erection of a building to serve as its

office, warehouse, and quarters for the local agent, in the work of the society in distributing books to sailors and other passing through the Canal. The lot is in the area of eight lots set aside for steamship offices and other enterprises with maritime connections, and adjoins the lot, No. 3, leased to La Veloce, the Italian Line, for the erection of an office building. Lots 1 and 2 are occupied respectively by the office buildings of the United Fruit Company and the Hamburg-American Line.

One of the provisions of the lease is that the building erected shall be of construction in keeping with the other buildings, and it is the expectation of the society to expend about \$10,000 on it. It is proposed to erect a building very similar to the four-family concrete quarters at Balboa, with modifications to suit its proposed uses. The Panama Canal has agreed to do the work, at cost plus a 10 per cent surcharge.

In view of the fact that this is a philanthropic enterprise, conducted without profit for the primary purpose of furnishing Bibles at low cost, it has been decided to charge the society only a nominal rental for the lot, instead of \$400 per year, which is the charge to the steamship companies for the adjacent lots.

In applying for the lease, the president of the society pointed out that similar work has been conducted at the Suez Canal for a number of years by a British society. He stated that the American Bible Society, organized in 1816, is now conducting 12 foreign and nine home agencies, through which approximately 5,000,000 Bibles, printed in over 100 different languages, are distributed each year.

Concerning Sailing Directions for Sailing Vessels.

In view of the increasing use of the Canal by sailing vessels, and the likelihood that more extensive knowledge of seasonal winds over various areas would be of value in connection with this traffic, the Marine Superintendent has requested the United States Hydrographic Office to furnish to *The Panama Canal* information as to these six general routes: For sailing both ways, between the Canal and the west coast of the United States, the west coast of South America, the east coast of the United States, the Gulf coast of the United States, European ports, and ports across the Pacific.

It is the intention to formulate this information in sailing directions for sailing vessels and publish it as a notice to mariners. The use of the Canal involves a considerable shifting of routes for these vessels, and as some of the areas to be crossed have not been frequented a great deal heretofore by sailing ships, accurate sailing directions are not at present available.

The steamship *Agamemnon* of the Dutch Royal Mail, which passed through the Canal on April 17 on the way to Guayaquil, returned through the Canal on June 3, laden with 1,895 tons of cacao for Amsterdam.

RECEIPTS AND EXPENSES.

Toll Earnings Within the Fiscal Year Nearly Equal Cost of Operation and Maintenance.

The tolls earned during the month of April were greater than the cost of operation and maintenance of the Canal by \$84,108.41. Tolls earned amounted to \$442,415.49, and the cost to \$358,307.08, which was the least for any month since the opening of the Canal to commercial traffic, in August, 1914. Costs for the preceding three months have been: January, \$435,025.74; February, \$408,001.26; March, \$423,275.32. The decrease of \$64,968.24 from the cost in March was due in large part to diminished dredging operations, as the latter cost \$42,199.40 less in April than in the preceding month; to the fact that there was no expenditure for maintenance of backfill at Pedro Miguel and Miraflores Locks, where a total of \$7,927.44 had been spent in March; and to a saving of \$3,141.28 in the prorated cost of Health Department work and \$6,187-

26 in administration. Approximately 35 per cent of the total overhead expense is charged to operation and maintenance.

For the 10 months which had elapsed in the present fiscal year, from July 1, 1914, to May 1, 1915, the total cost of operation and maintenance was \$3,377,195.73; and during the period the tolls earned were \$3,337,715.69. The deficit is \$39,480.04, or a loss of 1.17 per cent on the expenditure, not counting anything for interest on the money invested or depreciation of plant.

Tolls earned in May amounted to \$547,054.60. The cost of operation and maintenance for that month will be sufficiently below the amount of toll earnings to wipe out the deficit and show a profit for the Canal during the 11 months ending May 31, 1915.

Detailed summary of the various items of expenditure for April and March, and of the aggregate for the 10 months ending April 30, is given in the following table:

ITEMS.	Month of April, 1915	Month of March, 1915	Total since June 30, 1914
Civil Government, proportion	\$20,379.61	\$19,944.39	\$192,689.30
Health Department, proportion	17,102.59	20,243.87	200,583.95
Administration, proportion	77,209.98	83,397.24	735,178.04
Operation and maintenance:

Expenses in excess of tolls earned			39,480.04

PASSAGE OF "JOHN C. MEYER"

Sailing Vessel on the Way from Portland, Oregon, to Quebec.

The barkentine *John C. Meyer* of San Francisco, in the service of Sudden & Christenson, arrived at Balboa in the afternoon of Friday, June 4, from Portland, Oreg., and started through the Canal the next day in tow of the tug *Cocoli*. She is bound for Quebec with a cargo of 108,700 feet of lumber.

The *John C. Meyer* sailed from Portland on April 3 and, accordingly, took two months and a day for the voyage to Balboa. For the first month she encountered head winds and heavy seas, which made slow going under a load that made a draft of 20 feet and only four feet of freeboard. On May 9 she was sighted in the Gulf of Tehuantepec, off Salina Cruz, in latitude approximately 17° North and longitude approximately 95° West, about 1,000 miles from Panama. Here, on account of the seasons, the winds were irregular. Calms were the rule, interspersed with short squalls and lightning. The remainder of the voyage to Panama, which might have been made in six days with good winds, required nearly a month.

The voyage from Colon to Quebec may be expected to take about five weeks, so that the entire voyage will run to nearly 100 days. Around Cape Horn the *John C. Meyer* would probably have taken 150 days from Portland to Quebec at this time of the year. The Canal may be said to have saved, even under the unfavorable conditions encountered in the Gulf of Tehuantepec, about 50 days.

The vessel is 200 feet long by 40 feet in the beam and carries a crew of 13. Her Canal tolls were \$992.50 and a charge of \$150 was made for towage, bringing her total Canal bill to \$1,142.50. This expense prorated among the 50 days saved is equivalent to a charge of \$22.85 per day. In other words, if the vessel's operating expenses are not less than \$22.85 per day she should "break even" on the use of the Canal for this voyage. The pay of the crew alone will run close to that figure, and subsistence expenses will probably carry the *per diem* above it; while in addition to possible saving in the actual daily operating expenses the operators will gain by a great saving in the wear and tear on the sails and rigging, which is a considerable item for a large ship in a voyage around the Horn, and will gain by being able to discharge cargo and ship another in approximately a third less time than had the vessel been traveling over the longer route. This last is a very important item especially at this time, in view of the prevailing high prices for charters.

On the voyage from Portland to Balboa the *John C. Meyer* ran close to the coast, following to a considerable extent the course of steamships between these ports, and was frequently in sight of land. Operators of sailing vessels making this voyage would do well to make arrangements with as many as possible of the regular steamship lines plying between San Francisco and Balboa to pick up their sailing vessels out of the area of doldrums west of Central America and tow them into Panama. It will be noted that the *John C. Meyer*, after making fair progress under only partly favorable conditions, lost about three weeks in the Central American area, out of which she might have been towed by one of a fairly great number of steamships plying through the section.

Carrying Naturalization Papers for Entry to United States.

It is suggested that naturalized citizens of the United States going from the Canal Zone to the United States be sure to take their naturalization papers with them in order to avoid delay in entering the country. If the wife of a naturalized citizen is traveling alone, she should have her husband's papers, for the same purpose.

During the voyage the purser prepares for the immigration officers lists of citizens and of noncitizens of the United States, the latter being subject to immigration restrictions not imposed on citizens. As citizens are listed those who are native of the United States and those who have taken out final naturalization papers. In case of naturalization, it is required to "give name and location of court which issued naturalization papers, and date of papers." It has been found that many naturalized citizens or members of their families are not able readily to satisfy the immigration officers, who board the ship at quarantine for the purpose of checking up the passengers. Such cases occasion delay and irritation, which will be spared the naturalized citizen by his having his papers at hand.

Automobiles and Motorcycles.

On June 12, 1915, there were 190 automobiles and 85 motorcycles licensed in the Canal Zone. Nine of the motorcycle licenses were reciprocal, being held by residents of Panama and Colon and the remaining 76 were issued to residents of the Canal Zone. Of the 190 automobiles licensed, 62 were owned by residents of the Canal Zone, and 128 by residents of Panama or Colon. Automobile licenses are divided into three classes—for pleasure only, for hacking, or carrying passengers for hire, and for trucking. The 62 original Canal Zone licenses comprised 56 for pleasure only, four for hacking, and two for trucking. Of the 128 reciprocal licenses in force, 60 were for pleasure, 51 for carrying passengers for hire, and seven for trucking. A resident of the Canal Zone secures his original license in the Zone, and is granted a reciprocal rate in Panama or Colon, at a reduced fee. The same holds good in the Zone for residents of Panama or Colon who have obtained the original license in Panama territory.

In the Canal Zone a charge of \$1 is made for a tag, which, once lost or replaced by another, is not used again. These licenses are issued by the Chief of the Division of Civil Affairs, Balboa Heights, and no fee is accepted for less than one quarter of the fiscal year.

The first Canal Zone automobile license was issued on December 3, 1910, and the first 50 tags were granted indiscriminately to automobiles or motorcycles. Of this number, 18 were motorcycle licenses. Thereafter distinct tags were issued, so that, although the highest automobile license tag granted up to June 13 was 379, and the highest motorcycle tag was 167, the total number of motorcycle licenses up to that date was 185, and automobile licenses, 361, inasmuch as the new series commenced with number 1 for motorcycles and number 51 for automobiles.

On September 1, 1912, there were in service 65 automobiles, 14 belonging to residents of the Canal Zone, and 31 motorcycles, 28 of which were the property of residents of the Canal Zone.

LABOR FORCE AND QUARTERS IN MAY.

The force report of May 26, 1915, shows the actual working force of The Panama Canal on that date to have been 21,565; of the Panama railroad, 4,590; and of contractors, 279, a total effective working force of 26,434. This is an increase of 1,619 from the force on April 21, which was 24,815; is 2,660 more than the force on March 24 (which was 23,374); and is 3,089 more than the force employed on February 24 (numbering 23,345). There was an increase of 1,509 in the silver force of the Panama railroad, as compared with the force on April 21. These were principally laborers employed at the docks during a period of congestion and hence their numbers are not accurate indices of the ordinary labor conditions.

The gold force on the Isthmus, composed almost exclusively of white Americans, was 3,615, an increase of 254 over the force reported on April 21, an increase of 190 as compared with March 24, and an increase of 121 since February 24. The gold force on May 26, amounting to 3,615, was divided as follows: The Panama Canal, 3,271; the Panama Railroad Company, 296; contractors, 48. Detailed figures of the Canal force employed on the Isthmus, follow:

DEPARTMENT OR DIVISION	SILVER EMPLOYES*											Total silver.	Total gold.	Grand total.		
	Artisans.					Laborers.										
	Monthly.	Special.	22 cents.	18 cents.	15 cents.	12 cents.	Special.	Euro-pean 16 cents.	13 cents.	10 cents.	7 cents.				5 cents.

The estates of the abovenamed deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against the estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER, Administrator of Estates.

NEW PLANTS FOR THE ZONE.

Extensive Activities of Horticulturist's Forces for Improving Landscapes.

The second lot of economic plants presented to The Panama Canal by the United States Department of Agriculture, through the Canal horticulturist, is being distributed from the nurseries at Ancon. This collection comprises over 400 specimens, of some 25 species. The number of new fruits represented is regarded as remarkably large. There are included the jaboticaba from Brazil, the lansón of the Philippines, and other new plants from New Zealand, Paraguay, Morocco, Mozambique, Italy, and Guatemala.

The new propagating house near the Canal hotel at Ancon is filling with the decorative plants, which are to be placed on sale in the commissary stores as soon as practicable. The benches at the propagating house will hold about 5,000 plants, and the outside stands and patio will give space to hundreds of tubs and boxes for the larger ornamental plants. Some 300 varieties of shrubs, trees, palms, ferns, and other plants are being propagated in this building at present.

A new hedge-plant nursery has been established on the hillside near the Ancon schoolhouse. This will contain the overflow from the main nursery, and from it will be taken many thousands of the new hedge plants which are relied upon to take a prominent part in the beautification of the landscape along the southern end of the Canal.

At Cristobal two small nurseries and a propagating house have been established. It has been found necessary to surround these by fences and take extra precautions to prevent loss and injury by children. Pending improvement in the community attitude to-

ward the plants, it may be decided not to put out the higher grade of ornamentals in Cristobal.

A fine collection of hibiscus, including about two dozen varieties, all of which are probably new to the Isthmus, has been presented by the horticulturist of the Experiment Station of Hawaii. Among these are some white, orange, and yellow specimens which the Canal horticulturist believes will show to advantage among the reds and pinks so common on the Isthmus.

Arrangements are being made by which householders in Ancon and Balboa who desire to have flower beds may send in requests for labor or material to the district quartermaster; and orders for porch boxes, plant tubs, pot stands, etc., may be given in the same way. Advance orders for palms, ferns, roses, and pot plants will be placed on file, to be filled within two or three months.

Agricultural Possibilities in Maryland.

The Bureau of Immigration of the State of Maryland has forwarded to The Panama Canal 48 copies of two pamphlets giving information about the lands, products, and industries of the State, and description of farms for sale, listed by the owners with the Bureau. Those interested may obtain copies on application to the Executive Secretary; if requests should exceed the available supply, the surplus requests will be forwarded to the Bureau of Immigration of Maryland.

Swimming Pool Closed.

On account of the cleaning out of the Colon storm sewer, which is to be begun on Wednesday, June 16, it will be necessary to close the swimming pool at the Hotel Washington for about two weeks from date.

EXECUTIVE ORDER.

Suspending Charges for Rent, Fuel, and Lights.

By virtue of the authority vested in me, it is hereby ordered that the Executive Order of January 15, 1915, relative to charges for rent, fuel, and electric current furnished employes of The Panama Canal and the Panama Railroad Company on the Isthmus of Panama, is hereby modified by suspending from the operation thereof so much as relates to rent, fuel, and lights during the period of actual construction of The Panama Canal but not later than June 30, 1916.

WOODROW WILSON.

THE WHITE HOUSE,
May 25, 1915.

[No. 2204.]

The foregoing Executive Order is being published locally as Panama Canal circular No. 601-46.

Protection of Commissary Store during Colon Fire.

The value of the stock moved out of the Cristobal commissary store during the fire in Colon on April 30 was, according to a report by an accountant from the office of the Auditor of The Panama Canal, \$113,974.55. The value of the stock lost or stolen was \$4,959.87. There was a loss by reduction in price of some of the saved goods amounting to \$3,372.84, of which \$1,052.74 is a reduction in the shoe stock, most of which was included in the lot of goods which could not be moved on account of smoke and water and had to be left in the building until after the fire. With the addition of the cost of repairs, replacement of packing, extra labor, etc., necessitated by the fire, the total loss runs between \$9,200 and \$9,500.

This loss is approximately one-twelfth of the value of the goods moved. As some of the shelving was scorched and it was generally thought the building would not survive the fire, much credit is due to those whose special efforts were directed toward saving the building and removing the goods. Among these were employes of the commissary branch, the district quartermaster's force, members of the Coast Artillery Corps, men from the dry dock shops, and many volunteer employes of the Canal and Panama railroad.

Reduction of Passenger Rates for the Trip through Canal.

Effective June 19, 1915, the passenger rates through the Canal on steamships of the Panama Railroad Steamship Line will be as follows:

For adults, \$3; for children under 12 years of age, \$1.50.

Employes, \$2 and \$1, respectively.

The rates include meals aboard ship and berth when necessary.

Family Quarters.

Applications for married quarters on file on May 31, 1915, were as follows:

STATIONS	Number of applications.
ALCON	311 (117)
Corozal	50 (14)
Paraiso	135 (36)
Gatun	32 (6)
Cristobal	107 (26)
Total	635 (199)

NOTE—The figures in parentheses show the number of applicants already occupying regular or non-house-keeping family quarters at stations other than those at which applications are filed.

WEATHER CONDITIONS, CANAL ZONE, MAY, 1915.

The rainfall for the month was deficient at all stations except Miraflores. This deficiency was greater over the Atlantic and central sections, while on the Pacific coast conditions were nearer the normal. Monthly totals ranged from 5.10 inches at Gamboa to 13.38 inches at Miraflores. The maximum amount of precipitation recorded in any one day was 4.21 inches, at El Vigia on May 20. This was the only station having a daily rain in excess of four inches, and the deficiency in rainfall was slight as compared with other stations in the central section. Rainfall occurred generally throughout the Zone on the 7th, 15th, 20th, 21st, and 26th of the month, and heavy showers were reported on these dates at many of the stations.

The estimated rainfall over the Chagres River basin was 34 per cent below the average, or 8.57 inches against a 15-year average of 12.94 inches.

The average air temperature was slightly above normal on the Pacific coast, while on the Atlantic coast the daily excess was approximately two degrees Fahrenheit. The atmospheric pressure and daytime cloudiness were below normal, and the wind movement, evaporation, and temperature of the sea water were above normal on both coasts. The relative humidity of the atmosphere was slightly above normal at Balboa Heights, while at Colon normal conditions prevailed.

No fogs occurred on the Atlantic coast, and only one was observed on the Pacific coast. Several night and early morning fogs occurred at interior stations, 75 per cent of which were dissipated by 6.30 a. m., 92 per cent by 7.30 a. m., and all lifted or were dissipated by 8 a. m. Light fogs were observed at Gatun in the afternoon of the 23d and 27th.

The elevations of Gatun Lake, in feet above mean sealevel, may be summarized as follows: Mean for the month, 85.68; maximum (on the 7th), 86.54; minimum (on the 22d), 85.36; evaporation from the lake surface, 5.361 inches.

The following is a summary of climatological conditions during the month of May:

STATIONS.	Pressure (reduced to mean of 24 hours.)	Temperature.					Mean relative humidity.	Precipitation.			Wind.				
		Mean.	Maximum.	Date.	Minimum.	Date.		Total inches.	Station average.	Days of .01 inch or more.	Total movement (miles)	Prevailing direction.	Max. velocity in miles.	Direction.	Date.

OFFICIAL CIRCULARS.

Quarters for Gold Employees.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., May 25, 1915.

CIRCULAR No. 627-9: (Superseding circulars Nos. 627, 627-2, 627-3, 627-4, 627-5, 627-6, 627-8.)

1. Effective May 25, 1915, Circulars Nos. 627-3, dated February 24, 1915; 627-4, dated February 26, 1915; 627-5, dated March 12, 1915; 627-6, dated March 20, 1915; and 627-8, dated May 12, 1915, are canceled and the following rules will govern the assignment of quarters to gold employees:

CLASSES.

2. Family quarters for assignment will be divided into four classes according to rate of pay. Class "A" will include all quarters regularly assignable to employes drawing less than \$200 per month; class "B" to employes drawing \$200 and less than \$250 per month; class "C" to employes drawing \$250 and less than \$350 per month; and Class "D", official type house, to be assigned by the Chief Quartermaster with the approval of the Governor.

3. Family quarters will be assigned to classes as follows: Class "A," types 5, 7, 14, 15, 4-family concrete, miscellaneous class "A" and portable houses; class "B," types 1, 4, 17, 19, 27; class "C," types 6, 10, 13, 2-family concrete; class "D," types 3, 8, 20 to 26, and special houses.

APPLICATIONS.

4. Applications for original assignment in a district will be placed on one list according to the date of employee's last entrance into the service, and opposite each man's name will be indicated the class of quarters to which his rate of pay entitles him

5. A list showing all applications on file for each district will be posted in the office of the district quartermaster and will be open to inspection. Employes are responsible that changes in their classification are made known to district quartermasters.

6. An employe may, at the request of the head of his department, file an application for family quarters at, or transfer his application to, one point other than that at which he is employed.

7. All applications of employes working within a district will take precedence over applications of any employes working elsewhere regardless of class.

8. Applications for transfers of quarters within a district must be filed in writing with the district quartermaster, and the rules governing original assignment will be applied to transfers within a district. Applications for transfer from without a district will be placed on the assignment list according to date of employee's last entrance into service.

9. An applicant on the waiting list for family quarters, when he becomes eligible for assignment, will be given an opportunity to refuse three separate and distinct tenders. If he does not accept the third tender, his application will be canceled and he will not be allowed to file a new application for similar quarters for a period of 10 days.

10. When an employe forfeits family quarters through failure to occupy them within the time limit, he will not be allowed to file a new application for a period of 10 days.

11. All family quarters distinctly and definitely within hospital grounds shall be regarded as for the use of doctors and nurses, but the assignment of same shall remain under the jurisdiction of the Chief Quartermaster.

12. Applicants for hospital quarters can not place application for quarters outside of hospital grounds.

13. The wife constitutes the family of an employe, and no consideration can be given applications for family quarters for occupancy by other members of a family than the wife, except from widow or widower employes having dependent children residing with them; unless there are no other applicants on file.

14. Aliens, whether employed in the United States or on the Isthmus, will not be entitled to gold quarters until applicants have been assigned.

ASSIGNMENTS.

15. Quarters in each class will be assigned to applicants according to date of last entrance into the service, subject to the following exceptions: An employe in any class, due for assignment to family quarters, in his class, may be assigned to quarters of a class above his own where no applicants of said class desire them; or he may waive assignment in his class, and await in turn, according to date of last entry into the service, his assignment to quarters in any class below his own. Where service has been equal rate of pay will govern.

16. Employes will be required to accept or reject their quarters within 10 days from date of tender.

17. The rules applying to assignment of family quarters will be applicable in the assignment of bachelors to bachelor quarters, as far as practicable, except that there will be no class distinction as to bachelor quarters

18. Family quarters may, with the approval of the Chief Quartermaster, be assigned to bachelors with dependent relatives if there are no other applications on file for the quarters. Houses coming under the official class may be assigned to bachelors by the direction of the Governor.

19. Exchange of quarters will be permitted only when the rights of no other employes will be interfered with.

HOLDING QUARTERS.

20. Family quarters may be held for 90 days during the absence of an employe to whom they are assigned or his family, or both simultaneously, provided that this privilege shall not be granted for more than one period of 90 days in any service year. If vacated a second time during the service year, either by the employe, his family, or both simultaneously, quarters will be held not more than 30 days. The two periods can not be taken advantage of continuously or allowed to lap each other, either during the absence of both employe and family at the same time or of either separately. The two periods must be regarded as entirely separate and distinct, and the quarters must be reoccupied both by the employe and his family after the first period of absence before they can be vacated, without forfeiture, for the second period of absence.

21. When family quarters are assigned, an employe will be given nine weeks from date stated in tender in which to occupy the quarters, but this does not apply in case of transfers.

22. An employe, whose family is not on the Isthmus, and who has been assigned quarters on an original application will not be allowed to occupy the apartment until 10 days prior to the arrival of his family, nor will he be permitted to allow others to do so.

23. Services of employes discharged or resigned, securing immediate employment in some other department or division, are considered continuous as far as quarters are concerned, and they may hold quarters or have their applications remain on the list as of original date. Cases of this nature arising, however, should be referred to the Chief Quartermaster.

24. Whenever by reason of temporary decrease of work, or other cause, employes have been furloughed without pay for a period not exceeding 30 days, they will retain the rights of quarters during that time.

25. When an employe's services are terminated he will be expected to vacate quarters within 10 days from the date of termination of service.

26. A widow can hold quarters after death of husband until arrangements can be made for her departure.

FURNITURE.

27. The allowance of furniture for regular family quarters will be as follows:

- | | |
|-------------------|------------------|
| 1 range | 2 center tables |
| 2 kitchen chairs | 1 dresser |
| 1 chiffonier | 1 refrigerator |
| 1 sideboard | 6 dining chairs |
| 1 double bed | 1 dining table |
| 1 double mattress | 3 wicker rockers |
| 1 kitchen table | |

In official houses the following additional articles are authorized:

- | | |
|-----------------|------------------------|
| 3 dining chairs | 1 porch swing |
| 1 Morris chair | 1 parlor wicker rocker |
| 2 towel racks | 1 serving table |
| 1 parlor desk | 1 dresser |
| 2 parlor chairs | 1 double parch seat |
| 1 chiffonier | |

Employes occupying nonhousekeeping quarters will be given such furniture as may be available but in no case more than is provided above for regular family quarters.

28. The issue of beds, mattresses, and one dresser in excess of this allowance is authorized to families with children. Employes moving from one house to another in the same district will be permitted to take with them, at their own expense, if they so desire, beds, mattresses, and refrigerators.

ALTERATIONS.

29. No alterations or additions will be made to any house by the occupant without the approval of the Chief Quartermaster, and then only at his own expense.

CHESTER HARDING,
Acting Governor.

Preparation of Data for Annual Estimates.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., June 9, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Within a few weeks it is intended to issue formal instructions as to the preparation of estimates for the fiscal year 1917. In the meantime, please commence the tabulation of the necessary data immediately, so that no delay will be experienced when the formal instructions are given.

No radical change will be made in the form of estimate blanks used last year.

CHESTER HARDING,
Acting Governor.

Inspection of Cattle and Other Food Animals.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., June 1, 1915.

CIRCULAR No. 700:

1. All cattle, calves, hogs, sheep, goats, and other food animals imported into or offered for sale as food in the Canal Zone must be inspected by a veterinary inspector of the Health Department, and any such animal found in a manner dangerous to other animals, or any carcass held or offered for food, found to be unfit, shall be condemned and destroyed, and the owner of such diseased animal or unfit food shall be not compensated therefor.

2. Veterinary inspection will be charged for as follows:

- | | |
|---|--------|
| Beef cattle, ante- and post-mortem inspection..... | \$0.50 |
| Beef cattle, quarantine inspection..... | .25 |
| Pigs, calves, goats, and sheep, any inspection..... | .25 |

3. The above rates are for animals inspected in lots of 10 or more. The rates for single animals or lots of less than 10 are twice as great. All moneys derived from such inspections shall be turned in to the Collector of The Panama Canal.

CHESTER HARDING,
Acting Governor.

Prices of Chagres River Sand and Gravel.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., May 24, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Effective June 1, 1915, sand and gravel from the Chagres River will be invoiced to departments and divisions of The Panama Canal and Panama Railroad Company at 60 cents per cubic yard.

Sand and gravel from the Chagres River will be sold to employes of The Panama Canal and Panama Railroad Company, and to others entitled to the same rates as employes, at \$1.50 per cubic yard, delivered on board cars.

CHESTER HARDING,
Acting Governor.

Releasing East Breakwater Cars.

THE PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,

BALBOA HEIGHTS, C. Z., June 7, 1915.

To the heads of departments—I am informed by Mr. H. H. Rousseau that in the near future his department will again start shipping heavy rock to the East Breakwater at Coco Solo. Please instruct your foremen and subforemen not to load "E. B." cars of any kind and to release all "E. B." cars now under load in order that they may be properly inspected and such cars as may be in need of repairs sent to the shops for overhauling. Your cooperation is desired.

C. H. MOTSETT,
Superintendent.

Closing Down Balboa Store on Account of Annual Inventory.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

BALBOA HEIGHTS, C. Z., June 8, 1915.

To all concerned—On account of the taking of the annual inventory, Balboa storehouse will be closed for business from June 27 to July 1, both dates inclusive, except for emergency orders. Heads of departments and divisions, and storekeepers are requested to draw any material they may need during this period, prior to June 27, 1915. Rather than embarrass the work the storehouse will fill emergency orders at the request of the head of the department or division requiring the material, but it is requested that such requests be minimized as much as possible. It is also requested that no material be returned to stock between June 15 and July 15, inclusive.

W. R. GROVE,
Chief Quartermaster.

Approved:
CHESTER HARDING,
Acting Governor.

Milk for Sale.

As the milk production at the Corozal Hospital dairy shows an increased output, the dairy is again prepared to supply a limited number of customers with prime quality of milk at 25 cents per quart.

Customers so supplied, in order to retain the privilege, must return the identical empty bottles promptly.

Stray Cow.

Strayed from the Corozal Hospital farm, about two weeks ago, a dark fawn cow, age about 3 years, black points, solid color, weight about 650 lbs., has two horns, left horn branded with figure 30, hair-brand 30 on left hip.

Anyone having knowledge of her whereabouts, will please notify the Superintendent, Corozal Hospital, or the Canal Zone police.

COMMISSARY DEPARTMENT

Commissary Hours.

The commissary stores at Las Cascadas, Empire and Culebra are open from 7.30 to 11.30 a. m., and 1.30 to 5.30 p. m.

The commissary store at Balboa is open from 8 a. m. to 12.30 p. m., and 2.30 to 6 p. m.

All other commissary stores are open from 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m. on Saturdays and other sailing days of Panama railroad vessels.

Cold Storage Prices.

The charges published below will be increased by 10 per cent in case of sales to commercial ships and foreign naval vessels, and by 20 per cent for yachts.

The following is a list of retail prices of cold storage provisions which will be effective June 17, 1915:

SHIPPING INFORMATION.

July Weather Probabilities.

The following conditions may be expected to prevail at the Canal entrances during the month of July, 1915. These predictions are based on the records at Colon and Ancon for the past seven and eight years, respectively.

Winds.—The winds over the Atlantic coast will continue to be light and variable, northerly winds predominating. The average hourly velocity will be about nine miles an hour, although a velocity of from 25 to 30 miles may be expected during rain or thunder squalls. A maximum velocity of 40 miles an hour was recorded during the month of July, 1908, but the chances for a reoccurrence of so high a velocity during the month are extremely remote.

Light northwest winds continue over the Pacific coast and the interior, with an average hourly velocity of about seven miles an hour. Variable winds may be expected at times, especially during the passage of local rain or thunder storms, and the wind may attain a velocity of as high as 25 miles an hour, but these storms are generally of short duration. A wind squall was recorded at Ancon on July 10, 1909, during which a maximum velocity of 59 miles an hour was reached. This, however, expresses only extreme conditions, and is not likely to occur during the month.

Rain.—Heavy showers may be expected on both coasts and over the interior. The average July rainfall at the Atlantic entrance to the Canal, for a period of 44 years, is 16.22 inches, while 7.76 inches is the average fall at the Pacific entrance, this average being for a period of 18 years. The average number of rainy days, (one on which 0.01 or more inches of rain is measured), is 20 on the Pacific coast and 25 on the Atlantic side, while the average number of days on which the rainfall equals or exceeds one inch are two and five, respectively.

Fogs.—No fogs are likely to occur on either coast, but night and early morning fogs will be numerous over the interior. Over the Gaillard Cut section of the Canal, the average number of nights with fogs is 20. Of these fogs 50 per cent are dense; a dense fog is one in which objects can not be distinguished at a distance of 1,000 feet. All fogs that occur may be expected to lift or become dissipated by 8.30 a. m., and will not prove a hindrance to the navigation of the Canal under the present operating conditions.

Temperature.—The average shade air temperature over both the Atlantic and Pacific entrances to the Canal will be approximately 80 degrees Fahrenheit. The temperature is not likely to rise above 89° F., or fall lower than 70° F. on the Atlantic coast, while at the Pacific entrance the maximum temperature may not be expected to exceed 95° F., or the minimum to be lower than 67° F. The mean daily range of the temperature will probably be about eight degrees at the Atlantic entrance, and about 15 degrees at the Pacific entrance, the range in temperature being greater on the Pacific coast than on the Atlantic, owing to the prevailing direction of the winds.

Barometric pressure.—As the Isthmus is without the regions affected by violent atmospheric disturbances, the barometric pressure over the Canal area is remarkably constant and uniform, and changes in pressure are very slight, except for the well marked diurnal

fluctuation caused by the daily changes in temperature, which have little value as indicators of future weather conditions. The average sealevel pressure for the month should be about 29.85 inches, while the maximum pressure is not likely to exceed 30 inches, or the minimum to be lower than 29.70 inches at either Canal entrance.

Storms.—Most of the storms during the rainy season are local wind, thunder, or rain squalls of more or less limited extent, produced by the ascensional movement of the air, due to its excessive heating under the rays of the tropical sun. These storms may be expected quite frequently during the month, the average number of days on which thunderstorms have occurred on the Atlantic and Pacific coasts being 16 and 17, respectively. During the passage of these storms, comparatively high wind velocities may be attained, but they are invariably of too short duration to cause rough seas.

The season from July to October is the season of the West Indian hurricanes, but the paths followed by them lie well to the northward of the Isthmus. A rough sea and heavy swell, accompanied by brisk northerly winds, may be occasionally experienced outside the breakwater, however, following the passage of a hurricane across the Caribbean Sea to the northward.

Generally cloudy weather will prevail over both coasts, and smooth to moderate seas can be expected at the Pacific entrance to the Canal.

Tides.—The average tidal amplitude at Colon is less than one foot, and the maximum amplitude is approximately two feet. Owing to this fact, no consideration need be given to tidal fluctuations while navigating the Atlantic entrance to the Canal.

At the Pacific entrance a maximum range of 20 feet sometimes occurs during spring tides, but the average tidal range is approximately 13 feet.

Panama (Balboa) tide predictions are given below:

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3.47 p. m.

May Rainfall for Three Years.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly. The subscription rate is \$1 per year in the United States and its possessions, and in Canada, Cuba, Mexico, and Panama (domestic postage), and \$1.50 in other countries (foreign postage). The paper is furnished free to United States Government departments, representatives of foreign governments, public libraries, and employes of The Panama Canal and the Panama Railroad Company whose names are on the gold roll.

All subscriptions expire on December 31. Domestic subscriptions are accordingly charged as beginning from the first of the quarter of the year in which received. Remittances should be made to pay only to December 31, on this basis: Sent between April 1 and July 1, 75 cents; July 1 to October 1, 50 cents; October 1 to January 1, 25 cents. For foreign subscriptions the year is divided into thirds: Between January 1 and May 1, \$1.50; May 1 to September 1, \$1; September 1 to January 1, 50 cents.

Remittances for subscriptions may be forwarded to The Panama Canal, Washington, D. C., or to The Canal Record at the address given below.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Second Canal Collier in Service.

The second of the new Canal colliers, the *Achilles*, sister ship of the *Ulysses*, arrived at Cristobal on her maiden voyage on Thursday, June 17, carrying 12,500 tons of coal, with which she had sailed from Norfolk on Friday, June 11. She is discharging at the Brown hoist coal wharf at Mount Hope and is due to clear on Friday of this week.

The *Ulysses* arrived with her third cargo on Sunday, June 20, and has been lying in the bay off Cristobal, awaiting her turn at the unloading wharf. By the time she will have discharged the *Achilles* will be about ready to clear from Norfolk on her second trip and an approximately regular schedule can be established.

Houseboat Makes Use of the Canal.

The houseboat *John A.* was towed through the greater part of the Canal on Saturday, June 19, on its way from Balboa to Buena Vista, on the southern shore of Gatun Lake. The houseboat is the property of Mr. John A. Walker and is to be used by him as quarters at the Buena Vista plantation of the Central American Land and Improvement Company. The plantation is situated on the west bank of the east valley of the Trinidad River, several miles above Escoval. Escoval is just within the Canal Zone, or approximately five miles from the center line of the Canal. The plantation contains about 15,000 acres, on which the principal cultivations at present are 100 acres of cane, an orchard of 2,000 aguacate (alligator pear) trees, and an area of wild plant similar to pineapple, from which fibre is to be manufactured.

The *John A.* was towed by the tug *Cocoli* and accompanied by the launch *Mary J.*, which serves as a tender to the houseboat. The houseboat had nine passengers aboard. The quarters on it contain eight rooms, with verandas, the whole being considered more commodious than a type-17 Canal cottage. The hull was recovered from an obsolete French dredge, and the entire house cost about \$4,500.

The "Colon" Transferred in Payment for Wharf Work.

The steamship *Colon*, originally purchased by the Isthmian Canal Commission for operation primarily in connection with the Canal work, and operated by the Panama Railroad Steamship Line, has been transferred to the steamship line by The Panama Canal to effect payment to the Panama Railroad Company for its expenditures in the construction of the concrete wharf at Balboa, since included in the permanent terminals of The Panama Canal. The debt which was liquidated by the transfer amounted to \$388,700.58.

Balboa Shops Completed.

Balboa shops have been declared completed, with the exception of minor installations and changes classified as repairs, and were turned over by the Division of Terminal Construction to the Mechanical Division for maintenance at the close of business on June 15. Work remaining to be done includes the installation of some louvers, doors, piping, and plumbing, and work in the dry kiln, and is in buildings Nos. 1, 4, 9, 10, 12, 14, and 23 and in the shop tunnel. The remaining work in grading the roads and sidewalks will be assigned to the Municipal Division, and exterior lighting will be installed as a part of the illumination of the Canal Zone.

The railroad yards being nearly finished, they were turned over on the same date to the Panama railroad for maintenance.

Making Oil Barges from Wreck of the "Teredo."

The second half of the hull of the drill barge *Teredo*, which was sunk at the base of Cucaracha slide by a premature explosion of dynamite on July 20, 1914, is being overhauled at Paraiso and fitted for service as an oil barge to carry fuel oil to equipment in the Dredging Division fleet. After the sinking of the barge it was found impracticable to raise it without cutting the barge in two. This was done, and the two sections, each about 56 feet long by 36 feet in the beam and eight feet deep, subsequently removed from the channel. The first section was shortly afterward salvaged and made into an oil barge, and week before last the floating crane *Hercules* and a railway wrecking crane laid the second half on the bank of the Canal south of Paraiso, where forces from Paraiso shops are now working on it. When the new oil barge goes into service it will replace an old French barge now about ready for retirement.

DRY DOCK CONSTRUCTION.

Main Walls Completed and Erection of Entrance Gate in Progress.

The main walls of dry dock No. 1 at Balboa which, like the locks of the Canal, will be capable of handling the largest vessels afloat, have been completed with the exception of minor work around the entrance and at the tops, where machinery is to be installed, and the erection of the steel gate at the entrance is in progress.

The first girder was laid for the south leaf of the gate on June 12 and by June 16 the skeleton had been carried to its full height of 56 feet, with the exception of the top girder, which is withheld for greater convenience in the construction. The bottom girder for the north leaf was laid in the morning of Monday, June 21. It is expected that skeleton erection for both leaves will be completed this week and that sheathing will be in progress next week. The steel is handled by locomotive cranes, working on the bottom of the dry dock chamber and entrance, and the erection of a leaf to the height of a four-story house in approximately four days is regarded as rapid work.

The dry dock gate will have the same general construction as the lock gates. Its girders are exactly like the lock gate girders, being interchangeable with them, and were fabricated by the lock gate contractor, the McClintic-Marshall Construction Company, of Pittsburgh, under a supplementary contract. The length and thickness, 65 feet by seven feet, of the dry dock gate leaves will be the same as for the leaves of the lock gates. The height, by a different spacing of girders, will be 56 feet, to which the nearest approach among the lock gates is 54 feet eight inches, the height of the upper guard gates at Pedro Miguel and Gatun Locks. The lock gates vary in height from 47 feet four inches, for the upper guard gates of Miraflores Locks, to 82 feet, for the lower operating gates of Miraflores Locks.

The top of the sill for the dry dock gate will be at elevation 39.5 feet below mean sealevel, which will give a depth of water over the sill at extreme high tide of nearly 50 feet, and at extreme low tide of scarcely less than 30 feet. The sill is practically completed. It is of granite, a facing of smooth stones set in concrete. This is a variation from the practice adopted for the lock gates, the sills of which consisted of greenheart timber set in iron castings, embedded in concrete. The bottom of each leaf will have a timber facing, as the lock gates have, to make a close contact with the sill.

A further variation from the lock gate construction will be in the use on the dry dock gate of wooden quoins and niter posts, instead of rolled steel. The hollow quoins at the hinge ends of the leaves will be of granite. The placing of this granite has been begun. On account of the use of the timber bearings the

pintles of the leaves will be set six inches farther apart, center to center, than was done in the case of the lock gates. In provision for the replacement of the timbers, as well as any other repairs which may be required by the dry dock gates after the removal of the coffer dam, a seat has been built in the entrance, as at the entrances to the locks, for the use of the floating caisson. In the locks the seat consists of an offset, or niche, in the concrete of the walls, faced with castings, but for the dry dock it was decided to strengthen the shoulder by embedding horizontal steel brackets in the concrete. The bearing surfaces of the caisson will be of granite.

Of the estimated 175,000 cubic yards of concrete required for the dry dock, 145,282 cubic yards had been placed up to Monday, June 21. This is approximately four-fifths of the total amount, but it does not mean that the dry dock is four-fifths completed. Practically all of the concrete which has been placed in it has been mass construction, in heavy walls, where concrete could be placed as fast as mixed. Very little machinery has been placed, and practically none of the reinforced concrete which must be placed very carefully in connection with the erection of machinery, and in the general finishing work. The floor of the dry dock is about two-thirds completed. As referred to the time element, it may be said that the dry dock is a little over half finished, and that it may be expected to be in service within approximately 10 months from the present.

Refund of Rents.

In accordance with the Executive Order of May 25, 1915, (Panama Canal circular No. 601-46) modifying the Executive Order of January 15, 1915, (Panama Canal circular No. 601-37) "by suspending from the operation thereof so much as relates to rent, fuel, and lights during the period of actual construction of The Panama Canal but not later than June 30, 1916", employes of The Panama Canal and the Panama Railroad Company on the gold roll are entitled to a refund of the amount paid for rent and electric light for the period after May 24, 1915. Those who paid in advance for the month of May are entitled to a refund of one-fifth of the amount paid for that month. Those who paid in advance for the month of June or subsequent months are entitled to a refund of the amount so paid. Any arrearages for rent or electric light for the period from March 1 to May 24, 1915, inclusive, will be offset against the amount of refund to which the employe is entitled.

To secure this refund the employe should observe and strictly follow this procedure:

Mail or deliver to the Auditor, Panama Canal, Balboa Heights, the receipt or receipts showing payment of rent and electric light for the month of May or subsequent months on which refund is claimed with the following information endorsed on the back of the receipt:

Correct name (if different from that shown on the receipt);

Metal check number;

Department and division where employed;

Present post-office address.

No letter of transmittal is needed. A pay receipt similar in form to that now in use for the payment of salaries will be mailed or delivered to the claimant as soon as the roll can be prepared.

H. A. A. SMITH,
Auditor, The Panama Canal.

EXECUTIVE ORDER.

Flag of the Governor of The Panama Canal.

It is hereby ordered that the Governor of The Panama Canal shall have a distinctive flag for use in his official capacity, which shall be known as the Flag of the Governor of The Panama Canal.

This flag shall be made in two dimensions, as follows: Large flag, 6 feet hoist, by 7 feet 6 inches fly; small flag, 2 feet hoist, by 2 feet 6 inches fly. The body of the flag shall be dark blue. In the center of the flag shall be a white circle, the diameter of which shall be approximately one-half of the fly length of the flag. In the center of the circle, on each side of the flag, shall be the Seal of the Canal Zone, of which the following is a description:

"The seal consists of a shield, showing in base a Spanish galleon of the Fifteenth Century under full sail coming head on between two high banks, all purple, the sky yellow with the glow of sunset; in the chief are the colors of the arms of the United States. Under the shield is the motto: 'The land divided; the world united!'"

The flag of the Governor of The Panama Canal shall be used as follows:

When the Governor of The Panama Canal is embarked in a boat for the purpose of making an official call, his flag shall be carried on a staff at the bow of the boat in which he is embarked.

While on board in his official capacity, or when taking passage on any Canal craft, his flag shall be carried at the mainmast head.

WOODROW WILSON.

THE WHITE HOUSE,

June 8, 1915.

[No. 2208.]

The foregoing Executive Order is being published locally as Canal circular No. 601-47.

Shipment of Household Goods to United States.

Some of the employes taking their household goods to the United States under the seal of inspection of the Canal Zone customs authorities have had their goods shipped a week prior to their own departure. This has resulted in their shipments arriving a week ahead of the owners and consequently, after being allowed to remain 48 hours on the pier, being sent by the customs officials in New York to the customs storehouse to await the appearance of the claimant. When the owner reaches New York he is accordingly compelled to follow his shipment and make claim for it; whereas, if he had arrived on the same vessel as his goods he could have had them passed on the pier without difficulty. This information is published for the benefit of employes, in order that they may avoid a needless inconvenience.

Obituary.

Michael Bryce, a boilermaker at Paraiso shops, was drowned in the Canal at Paraiso on June 4, as the result of falling from a ladder while at work. He was a naturalized American citizen, native of Ireland, and his address in the United States was 274 Fifty-fourth Street, Brooklyn, N. Y.

The Navy tug *Potomac* sailed from Cristobal with the tender *Severn* and submarine flotilla for Bocas del Toro on June 22.

CANAL WORK IN MAY.

Monthly Report of the Acting Governor to the Secretary of War.

BALBOA HEIGHTS, C. Z., June 15, 1915.
The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of May, 1915:

Department of Operation and Maintenance.

Lock operation and maintenance—In addition to the usual maintenance and repair work at the locks, one fender chain was installed, which completes the placing of all apparatus of that class, except for the hanging of one chain at Miraflores; an electrically operated lockage whistle signal was installed at Pedro Miguel Lock, and the work of grading the dams and backfill, and grass planting at the Pacific locks, continued. The following commercial lockages were made:

Gatun—140 lockages, 143 vessels; Pedro Miguel, 141 lockages, 142 vessels; Miraflores—142 lockages, 142 vessels.

Electrical Division—The net output of the power plants was as follows: Gatun hydro-electric station, 2,367,000 kilowatt-hours; Miraflores steam station, 45,690 kilowatt-hours; Balboa steam station, 828 kilowatt-hours; total 2,413,518, kilowatt-hours.

The output of the Balboa air compressor plant was 120,760,010 cubic feet of free air compressed to 105 pounds. Construction work was carried on in connection with the installation of underground conduit systems and street lighting systems in the Ancon-Balboa, Cristobal, Gatun, and Pedro Miguel districts, and electrical work in connection with the new concrete barracks and quarters at Fort Grant, and various other buildings for The Panama Canal. Construction work also progressed in connection with the permanent telephone system for The Panama Canal and the railway signal system for the Panama railroad.

Municipal Engineering Division—On May 10, Mr. D. E. Wright was placed in charge of the Division as Municipal Engineer, vice Mr. G. M. Wells, assigned to other duties. In addition to the work incident to maintenance, operation, and repairs, the following construction work was in progress: The installation of water mains in the oil tank farm at Mount Hope; grading work and sewer main installation for the Army stables at Corozal; municipal work for the Coast Artillery post at Fort Amador and the staff headquarters; the widening and asphaltting of the road from Ancon to the Administration Building; the construction of a road from the Ancon post-office to the Tivoli Road; municipal work in Balboa; grading around the Miraflores steam purification plant, and the extension of the Miraflores steam power plant, this latter work being turned over to the Building Division on May 10.

Meteorology and hydrography—The rainfall was deficient at all stations except Miraflores. The monthly totals ranged from 5.10 inches at Gamboa to 13.38 inches at Miraflores. The maximum precipitation recorded in any one day was 4.21 inches, at El Vigia on May 20. The estimated rainfall over the Chagres River basin was 34 per cent below the average, or 8.57 inches against a 15-year average of 12.94 inches. The discharge at Alhajuela was 39 per cent above the 26-year May normal.

The elevation of Gatun Lake varied from 86.54 feet on the 7th to 85.36 feet on the 22nd, averaging 85.68 feet. Miraflores Lake varied in elevation from 54.28 feet on the 28th to 53.60 feet on the 1st, averaging 53.93 feet.

Division of Terminal Construction.
PACIFIC TERMINALS.

Shops—Concrete sill at the east end of the north leanto of building No. 12 was poured, and the reinforcing of the curtain wall in building No. 9 was started. The planing mill exhaust system was practically completed, and bids for painting same were advertised for. The work of erecting incompleting louver panels on the south ends of buildings Nos. 1, 2, and 4, and at the east and west ends of building No. 12, was started, and the work of making double operations out of the north louvers in the east leanto of buildings Nos. 1, 2, and 4 was completed.

Dry dock—Hand excavation was started for the footings of the compressor house and five were completed. During the month 11,825 cubic yards of concrete were placed, of which 7,693 cubic yards were classified as mass. Work on the granite sill progressed satisfactorily and the sill on the south side was completed. The piers on which the south gate will be erected have been poured, and work of erection is about to commence. Two hundred and eighty-nine thousand fifty-four pounds of reinforcing and rail anchorage, and 62,788 pounds of fixed steel were placed. Work on the crane rail piers progressed favorably and the work on the wall supporting the outer crane rail around the headwall of dry dock No. 1 is being pushed forward.

Entrance pier—Thirty-five thousand two hundred and fifty-seven pounds of rail reinforcing for the piers for the support of the deck were placed, and 375 cubic yards of mass, and 27 cubic yards of reinforced concrete, making a total of 402 cubic yards, placed in the piers and buttresses.

Coaling plant—The concrete covering the girders for the berm crane tracks was placed. In the unloader wharf 774 cubic yards of concrete were placed in the floor slab, 618 cubic yards in the apron and curtain wall, and 24 cubic yards in the footings for fender piles, making a total of 1,416 cubic yards. The floor system is now completed at station 2 plus 75 and eight panels of curtain wall have been completed. In the floor slab, apron, and curtain wall there was a total of 105,948 pounds of reinforcing used. For the reloader wharf there were nine caissons started. Excavation in the cylinders amounted to 1,277 cubic yards. A trestle was driven back of the "D" and "C" rows, as also guide piles for caissons, and in all 17,727 lineal feet of piling were driven during the month.

Excavation—The total excavation for the month amounted to 29,911 cubic yards, of which 16,971 cubic yards were classified as rock. Most of this material was obtained from Sosa Hill quarry, Diablo Hill, and the operations at the unloader wharf, and was used on the Cristobal mole, the fortifications, and the balance by other departments and divisions.

Quarantine boat landing—All of the pipe piles required have been driven, and 13 piles have been reinforced to date. During the month practically 27 per cent of the landing was erected. Due to the storm and the high tide prevailing May 26, 27, and 28, some damage was done to the contractor's erection platform that was supported on the piles.

ATLANTIC TERMINALS.

East Breakwater—On the shore trestle the trestle was advanced from bent 127 to bent 198, a distance of 1,137.8 lineal feet, and on the outside trestle from bent 368 to bent 380, a distance of 174 lineal feet; 1,311.8 lineal feet of single-track trestle and 30,320 lineal feet of piling were driven. All through the month scows dumped dredged material along the axis of the shore trestle ahead of the driving.

Coaling plant—The filling of caissons under the reloader and unloader wharves continued satisfactorily. At the end of the month there remained only two caissons to be filled for the unloader and 40 for the reloader wharf. Two thousand nine hundred and sixteen cubic yards of concrete filler were poured. The pouring of girder encasement and floor slab continued on both unloader and reloader wharves, and 592 cubic yards were poured into the former and 1,768 cubic yards into the latter. No work, except application of second coat of paint, was done on bridges of diggers during the month, under Washington order No. 40483, though the installation of machinery by the contractor might have proceeded had the material and forces been on the site. Work continued in a satisfactory manner on the four unloader towers, under Washington order No. 40587. The installation of machinery, concrete floors, etc., was started in two north towers, which are being rushed as much as possible. Except for a few minor members, all structural erection is completed and riveting is being pushed. No material was received or work done on reloader towers under Washington order No. 40483. Intermittent erection was done on viaduct system on south end of plant and on completed south 500 feet of reloader wharf. The total excavation at the Cristobal coaling plant for the month amounted to 639 cubic yards.

Fuel oil plants—General circular concerning the storage and handling of fuel oils at the Canal terminals was prepared for issuing to individuals and companies erecting tanks on the Isthmus, and others concerned. The erection of housing over manifolds at the Atlantic and Pacific terminal plants was 50 per cent completed. Installation of concrete drains and sewer lines for the Pacific terminal plant was 75 per cent completed.

Marine Division.

One hundred and forty-one vessels passed through the Canal in May, 66 southbound (not including one launch) and 75 northbound. Of this number 58 vessels were of American register and 53 of British register. Collections of tolls amounted to \$547,053.60. Twelve vessels were measured and 123 were inspected to see whether their certificates conformed to the rules.

Dredging Division.

The total excavation for the month, including earth, rock, and gravel was 1,092,637 cubic yards. Of this total 15,932 cubic yards were removed between the Pacific entrance and Miraflores Locks, 123,282 cubic yards from Balboa inner harbor, 671,149 cubic yards from Gaillard Cut, 45,602 cubic yards from Miraflores Lake, and 81,321 cubic yards from Gatun Locks to the Atlantic entrance. The hydraulic grader was engaged in sluicing slide north of Gold Hill and in cutting two of the Obispo Diversion ditches. The work of exterminating water hyacinths continued. The so-called floating islands seem to be breaking up and dying.

Mechanical Division.

Shop orders authorized during the month numbered 858, a decrease of 29 from the previous month, those left over from April being 492, those completed during the month numbering 863, and those carried forward into June numbering 487. The output of the foundry was 101,397 pounds of iron, 73,735 pounds of steel, and 13,553 pounds of brass. Hostling was done on 4,711 pieces of equipment, and shop and field repairs were made on 6,930 cars. In addition, 1,129 light repair jobs were done on equipment and eight cases of extended repairs. The fuel oil handling plant at Balboa handled 77,067.73 barrels and the plant at Mount Hope handled 27,333.58 barrels.

Building Division.

Effective May 10, upon the resignation of Capt. R. E. Wood, the title of Constructing Quartermaster was abolished, and Mr. G. M. Wells, Resident Engineer, was placed in charge of the Building Division. Construction work was in progress on the following buildings at the places named: At Fort Amador—Headquarters building, four barracks, three non-commissioned officers' quarters, two four-family lieutenants' quarters, three two-family captains' quarters, and two field officers' quarters. At Corozal—Stables, wagon sheds, and miscellaneous structures for the mobile army, the railroad station, and two one-family frame quarters. At Balboa—The residence of General Edwards, 11 four-family concrete quarters, three four-family and one two-family frame quarters, and 10 type-17 cottages. The Corozal block plant continued in operation during the month.

Supply Department.

The force report for the half month ending May 12 showed a total of 25,874 employes of The Panama Canal and Panama railroad, of whom 3,373 were white Americans and 22,501 were laborers. Of the latter approximately 316 were Europeans and the remainder West Indian negroes. There was an increase of 2,384 laborers and a decrease of 75 Americans, making a net increase of 2,309.

The occupants of Government quarters numbered 6,996 white Americans, of whom 3,677 were men, 1,575 women, and 1,744 children; 7,664 West Indians, of whom 4,718 were men, 1,279 women, and 1,667 children.

The value of material received during the month was \$544,527.93. It came forward in 27 steamers; the total weight of cargo, exclusive of lumber and piles, was 13,755 tons. Some of the principal items were 2,616,362 feet, board measure, of lumber for stock, 38,540 lineal feet of piles, and 148,955 bags of Portland cement.

Health Department.

General—No case of yellow fever, smallpox, or plague originated on or was brought to the Isthmus during the month. Thirty-six deaths occurred in the Canal Zone. The death rate for disease for the Canal Zone, based upon a population of 34,560, was 10.41 per thousand, as compared with 5.71 for the preceding month and 12.93 for the corresponding month of last year.

Employes—The health of employes continued good. The number of names on the pay rolls for the preceding month was 34,600. On this basis the admission to hospitals and quarters, 886, gave a rate of 307.28 per thousand, as compared with 282.02 for the preceding month and 407.92 for the corresponding month of last year. The admission rates

to hospitals for all diseases were: White, 307.19; blacks, 102.70; Europeans, 866.56; and Americans, 224.04. The admission rates for malaria to hospitals and quarters were: Whites, 104.84; blacks, 21.83; Europeans, 414.44; and Americans, 58.81. The total number of deaths from all causes was 13. Of these seven died from disease, or 2.43 per thousand as compared with 1.76 for the preceding month and 5.74 for the corresponding month of last year. No American died during the month.

Executive Department.

DIVISION OF CIVIL AFFAIRS.

One hundred and twenty-two licenses of all kinds were issued. Eight estates, having a total value of \$1,289.50, were settled. At the port of Balboa 103 vessels entered and 107 cleared, and at the port of Cristobal 144 vessels entered and 142 cleared.

Postal service—Postmasters remitted on account of stamp sales, second class mail collections, postage due collections, and box rent receipts \$7,475.48. Money orders issued aggregated \$334,845.86. Of this total \$110,510 represents the value of deposit money orders issued without fee, in lieu of postal savings certificates. Deposit money orders to the amount of \$106,590, and postal savings certificates to the amount of \$63,471 were paid. The balance of postal savings deposits on hand at the close of the month, represented by the unpaid certificates and deposit money orders, aggregated \$499,740, as compared with \$559,291 at the close of the previous month.

POLICE AND FIRE DIVISION.

Four hundred and thirty-one arrests were made during the month. Of these 400 were males and 31 females. Sixty-one convicts were confined in the penitentiary at the close of the month. Ten persons were deported, five of whom were convicts who had completed their sentences in the penitentiary, and five of whom were prisoners who had served terms in jail.

Twelve fires occurred during the month, and the damage to The Panama Canal and Panama railroad property amounted to \$3. Private property, however, suffered to the extent of about \$101,500, the larger losses being that suffered by the steamship *Pennsylvania* which caught fire at sea and returned to Balboa, the damage to which ship and cargo amounted to approximately \$95,000; a fire in a private residence at Gatun, beyond the water limit, resulting in a loss of \$5,700, and a fire in the Masonic temple at Ancon, resulting in a loss of \$750. The property of the United States Army suffered no loss.

COURTS.

In the District Court three civil, nine probate, and 50 criminal cases were settled; nine civil, 14 probate, and 42 criminal cases were filed, and 103 cases of all kinds were pending at the close of the month. In the magistrate's courts 16 civil and 431 criminal cases were tried.

DIVISION OF SCHOOLS.

The total enrollment in Canal Zone schools was 1,737 for the white schools and 1,599 for the colored schools. In the white schools the net enrollment was 1,139 and the average number belonging 891.8, the average daily attendance being 859.5. In the colored schools the net enrollment was 1,420, the average number belonging 786.5, and the average daily attendance 623.8.

Panama Railroad.

The cargo handled at the Colon and Balboa agencies aggregated 150,212 tons, of which 18,451 tons were handled through the Canal on steamers of the Panama Railroad Steamship Line, as follows: From New York to Balboa, 2,921 tons; from Colon to Balboa, 3,321 tons, total, 6,242 tons. From Balboa to New York, 10,169 tons; from Balboa to Colon, 2,040 tons, total, 12,209 tons; grand total, 18,451 tons.

The work on the terminal docks at Cristobal continued satisfactorily. Two thousand and two hundred lineal feet of steel cylinders were driven for Dock 7, making this item 83 per cent complete. Excavation in cylinders was 66 per cent complete, and 68 per cent of the required amount of concrete had been placed in cylinders. Twenty-eight caissons were completed during the month, making a total to date of 137, or 60 per cent of the total number required.

Respectfully,

CHESTER HARDING,

Acting Governor.

Cafeteria at Balboa.

The Balboa cafeteria will be ready to open on July 1. Meals will not be served outside of regular meal hours, except at the request of heads of departments or divisions. The following will be the meal hours:

Week days—Breakfast, 5 to 7.30; lunch, 11 to 1.30; supper, 5 to 7.30.

Sundays and holidays—Breakfast, 6 to 8.30; lunch, 11.30 to 1.30; supper, 5.30 to 7.30.

The cigar stand will be open only during regular meal hours. At first, until the new system is established, there will be no waiter service.

Bicycle License and Hunting Permits.

Bicycle licenses and hunting permits expiring on June 30 may now be renewed. The fee in each case is one dollar (\$1) for the fiscal year. Check or money order should be made payable to "Collector, Panama Canal," and forwarded to the Chief of the Division of Civil Affairs, Balboa Heights. The issuing of these licenses will be greatly facilitated if applicants for renewal will give the number of the previous license held. Applicants for bicycle licenses should give the name and factory number of the machine when no previous license has been granted. Those who make application for hunting permits for the first time may secure blank forms from any police station or from the Chief of the Division of Civil Affairs. These forms need not be filled out if a permit is to be renewed.

New Station at Corozal Nearly Ready for Use.

The waiting platforms of the new concrete railroad station at Corozal have been placed in use, the roof and walls are completed, the application of finishing plaster is in progress, and it is expected that the office of the station agent will be moved into the new station before the end of the month. The new station is directly to the north of the old, which will be torn down when the new is occupied. The general features of the Corozal station are in harmony with the design of the new station at Balboa Heights, both using concrete throughout and both supporting the roofs over the platforms on cantilever beams supported on single or double rows of columns.

FOR THE FOURTH OF JULY.

Americans Preparing to Hold Celebration at Balboa.

Employees of The Panama Canal and the Panama railroad are planning a celebration of the Fourth of July to be held at Balboa on Monday, July 5. Unlike the previous celebrations of the day, which were under semi-official management, the celebration this year is to be entirely in the hands of volunteer committees of the employees. The movement to have an unofficial celebration was started after it had been decided not to have the usual official celebration.

Features of the day will be athletic events, parades, music, patriotic exercises, and exhibition movements by various units of the Army stationed on the Isthmus. The Army forces on the Isthmus are now greater than at any preceding time and they will have a prominent part in the day's entertainments.

During the afternoon, called at 1.30 p. m., there will be a championship ball game between a picked team from the military forces on the Isthmus and a picked team from all civilians, both teams to be, in opinion of those selecting, the strongest lineup available from the players of all teams in Army or Isthmian leagues. The game is to be called early to enable the soldiers to return to line stations before evening. Arrangements may be made to follow the baseball game by the first football game to be played on the Isthmus.

In the evening there will be fireworks on Ancon Hill, and an open air dance will be held on the promenade along the front of the Administration Building. Preceding the dance and fireworks, there will be folk dancing and gymnastic drills on the prado, beginning at about 7 p. m.

The detailed program is in preparation in the hands of several committees, and will be ready for publication by the latter part of this week.

OFFICIAL CIRCULARS.

Rate for Special Trains.

THE PANAMA RAILROAD COMPANY,
OFFICE OF SUPERINTENDENT,
BALBOA HEIGHTS, C. Z., June 16, 1915.

To all concerned—I have to advise for your information that, effective the 19th instant, the Acting Governor has authorized a rate of \$60 to outside parties for special train, consisting of engine, baggage or buffer car, and one coach, seating not to exceed 60 passengers, for eight hours or fraction thereof, and a charge of \$7.50 for each additional hour, not to exceed four, per hour or fraction thereof.

Passes or tickets will be required on these trains for transportation, and trains making the round trip with midnight intervening and those consuming more than 12 hours will be charged as two trains.

The new tariff is being printed, and copies will be furnished to all concerned.

C. H. MOTSETT,
Superintendent.

Annual Reports.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., June 19, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

It is requested that annual reports for the fiscal year ending June 30, 1915, be submitted to this office not later than July 15, 1915.

The reports will be prepared in quintuplicate, on the same size and grade paper as that used for previous annual reports, namely, eight inches by 14 inches. Reports will be submitted to the Governor by heads of departments and divisions, covering the work under their jurisdiction as follows: the Engineer of Maintenance; the Division of Terminal Construction; the Marine Division; the Dredging Division; the Mechanical Division; the Fortification Division; the Building Division; the Purchasing Department; the Supply

Department; the Health Department; the Accounting Department; the Executive Secretary; the Washington Office; and the Special Attorney.

Where certain duties or certain parts of the work have been transferred from one department or division to another, or where new departments or divisions have been created, the department or division in which the work or duties are lodged as of June 30, 1915, will submit report for the entire fiscal year, obtaining any necessary data from the official previously in charge of the work, or from the records maintained by him if such official has left the service.

The official photographer will take appropriate photographs to illustrate the report. Those departments or divisions whose reports require illustrations should notify this office immediately what photographs are desired, in order that the work may be properly planned. The photographs are intended to show the progress of the work, especially new features, and no photographs will be included the subject of which has been sufficiently covered in a previous report.

CHESTER HARDING,
Acting Governor.

Treatment in Hospitals and Elsewhere.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., May 15, 1915.

CIRCULAR No. 618-5. (Superseding all previous Circulars of the 618 series and modifying Circular 624.)

The following rates and regulations governing hospital and medical services are effective on and after June 16, 1915:

1. Employees of The Panama Canal and the Panama Railroad Company in case of illness or injury will receive free treatment in the hospitals of The Panama Canal, except in cases of alcoholism, drug habit, or venereal disease, and for operations of election.

2. Employees will be admitted to such hospitals upon request made by a physician in the employ of the Health Department or by the official head of the department or division in which they are employed.

3. In sending sick employes to local physicians for treatment, request form must always be properly filled in so as to give the physician the necessary information in case he wishes to send the employe to hospital. The necessities of patients will be given first consideration, and no one in the urgent need of hospital care will be refused admission.

4. Officials who issue requests for medical treatment or forms for admission to hospitals will see that they bear not only the brass check number but the name of the employe as it appears on the pay roll. Special care should be used in case of foreign names, as much difficulty is experienced in identifying employes (on account of incorrect names being given) who have been sick or who have died in hospitals.

5. Employees living with their families in Government quarters who, in the opinion of the visiting physician, can not safely or conveniently report at the dispensary for treatment shall, if they so desire, be treated at their home without charge, except when in the opinion of the district physician convalescence may be unduly prolonged.

6. The family of an employe shall be understood to include those persons who are members of his immediate household, and dependent upon him.

7. The members of families of employes may consult their district physician free of charge. On the recommendation of their district physician they may also consult hospital physicians free of charge.

8. American seamen may be admitted to The Panama Canal hospitals upon the request of a representative of the Public Health Service.

9. Persons having, or suspected of having, contagious or infectious diseases, who are sent to hospital for the protection of the public, shall receive treatment without charge.

10. The indigent sick, insane, and lepers of the Republic of Panama, shall be admitted to such hospitals as may be designated for their reception, upon the request of a duly authorized official of the Republic, bills to be rendered against the Republic of Panama.

11. When Canal Zone school children are sent to hospital upon the recommendation of the district physician as a result of his inspection, no charge will be made for any necessary operation.

12. Charges for elective operations upon employes, dependent members of their families and others entitled to the same rates (as shown in the accompanying schedule), will be made on the basis of one per cent of the approved charge for the particular operation for each \$10 of monthly salary received by the person responsible for the charges, with a minimum charge of \$1 for an employe receiving \$50 or less per month, \$2 for an employe receiving more than \$50 and not exceeding \$100 per month, and \$5 for an employe receiving more than \$100 per month.

For employes and their families all operations listed in the schedule of operations at a price greater than \$250

shall be rated at \$250, and the percentage charge shall be made on that basis.

13. In case of emergency, or where humanity or the public good requires it, a physician may depart from these regulations, but in each such case a written report shall be made immediately to the Chief Health Officer. The Superintendent of Ancon Hospital may, when necessary on account of lack of means of the patient, reduce the charges herein prescribed not exceeding 50 per cent. A written report of all such cases shall be made immediately to the Chief Health Officer, and a copy forwarded to the Auditor of The Panama Canal. The Chief Health Officer may in cases of destitution remit the charges entirely.

14. The charges for treatment shall be as shown in the accompanying table. Where the charges in any case are not specifically provided for in the accompanying table or in the schedule of operations, the charges shall be fixed by the Chief Health Officer, based on the charges herein prescribed.

CHESTER HARDING,
Acting Governor.

SCHEDULE OF OPERATIONS.

Removal of foreign body from trachea or esophagus.....	75.00
Tonsillectomy, single..... (Elective)	50.00
Tracheotomy.....	75.00
Tumors of larynx.....	100.00
Various minor operations.....	10.00

NOTE.—The word "Elective" after an operation indicates that it is usually an elective operation, and its absence, that the operation is regarded as one of necessity. Neither thing is invariably true, and the arrangement is to be taken merely as a general guide. In general, an operation is considered necessary when indicated for the saving of life, limb, or efficiency, the operating surgeon deciding whether or not such is the case.

Combined operations: (a) When two or more operations are performed on the same patient at the same time the regular charge will be made for the more expensive operation and one-half of the regular charge for the less expensive operation, i. e., for hernia single, \$150, and for hernia double, \$225; for perineorrhaphy, \$150, and with trachelorrhaphy, \$200. (b) Curettage uteri is included in all female operations without extra charge. (c) For appendectomy in the course of some other abdominal operation, \$50 extra.

Charges will not be made for laboratory examinations for contagious, infectious, or quarantinable diseases other than venereal diseases. For other laboratory work charges will be made according to this schedule, except when certified to by the attending physician as necessary for diagnosis. Laboratory work not specified in this schedule will be charged for according to time spent and materials used, with a surcharge for work requiring expert knowledge or skill. This schedule will supersede all charges heretofore announced in other circulars.

Schedules of laboratory and miscellaneous charges are published on the following page:

SCHEDULE OF CHARGES FOR HOSPITAL AND OTHER MEDICAL TREATMENT.

	Ordinary care and treatment in hospital ward per day.	Care of alcoholism, drug habit or venereal disease in hospital ward per day.	Care of alcoholism, drug habit or venereal disease in private room (including cell room) per day.	Private room, when requested by patient, per day in addition to ward charges. ⁽¹⁹⁾	Ordinary care and treatment in insane ward per day.	Special nurse in hospital each per day, when requested by patient. ⁽¹⁹⁾	Special maid or attendant in hospital each per day, when requested by patient. ⁽¹⁹⁾	Obstetrical case, including 10 days' ward charges (complications to be charged surgical rates in addition.)	Obstetrical case, including 10 days' private room charges (complications to be charged surgical rates in addition.)	Obstetrical case, outside of hospital (complications to be charged surgical rates in addition.)	Surgical operations, elective.	Surgical operations, not elective.	Office consultation at hospital or dispensary.	Home visit, first, if unable to go to dispensary.	Home visit after first.

(This is free to all residents of the Canal Zone or Republic of Panama. Price when sold in bulk, \$5 per 10 c. c. bottle); anti-tetanus vaccine, per dose, \$5.

COMMISSARY DEPARTMENT

The "Ancon" Makes Trip for Beef Cattle.

The Ancon of the Panama Railroad Steamship Line made a special trip from Cristobal to Port Limon, Costa Rica, between Sunday, June 20, and 10 p.m., Tuesday June 22, for a cargo of about 416 head of cattle which are to be slaughtered on the Canal Zone and sold by the Commissary branch of the Supply Department, to ships and to employes through the commissary stores.

Commissary Hours.

The commissary stores at Las Cascadas, Empire, and Culebra are open from 7.30 to 11.30 a. m., and 1.30 to 5.30 p. m.

The commissary store at Balboa is open from 8 a. m. to 12.30 p. m., and 2.30 to 6 p. m.

All other commissary stores are open from 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m. on Saturdays and other sailing days of Panama railroad vessels.

Cold Storage Prices.

The charges published below will be increased by 10 per cent in case of sales to commercial ships and foreign naval vessels, and by 20 per cent for yachts.

The following is a list of retail prices of cold storage provisions which will be effective June 24, 1915:

FRESH MEATS.		Price.
Mutton—Stewing, per pound.....		19
Shoulder, trimmed, per pound.....		12
Leg (8 to 10 pounds), per pound.....		19
Short cut, chops, per pound.....		23
Shoulder, chops, per pound.....		14
Lamb—Stewing, per pound.....		12
Shoulder, trimmed, per pound.....		15
Leg, (5 to 8 pounds), per pound.....		24
Chops, per pound.....		29
Chops, shoulder, per pound.....		18
Veal—Stewing, per pound.....		12
Shoulder, for roasting (not under 4 lbs.), per pound.....		15
Chops, shoulder, per pound.....		20
Chops, per pound.....		30
Loin, for roasting, per pound.....		30
Cutlets, per pound.....		36
Beef—Suet, special, per pound.....		3 1/2
Soup, special, per pound.....		7
Soup, bones, special, per pound.....		2 1/2
Stews, special, per pound.....		11
native, per pound.....		8
Plates, special, per pound.....		12
native, per pound.....		8
Chuck roast, special (3 lbs. and over), per pound.....		12
Chuck roast, native (3 lbs. and over), per pound.....		8
Rib roast, second cut (not under 3 1/2 pounds), special, per pound.....		16
Rib roast, second cut (not under 3 1/2 pounds), choice, per pound.....		24
Rib roast, second cut, native (3 1/2 pounds and over), per pound.....		9
Rib roast, first cut (not under 3 pounds), special, per pound.....		19
Rib roast, first cut (not under 3 pounds), choice, per pound.....		27
Rib roast, first cut, native (3 pounds and over), per pound.....		11
Pot roast, special, per pound.....		20
choice, per pound.....		28
native, per pound.....		12
Rump roast, special, per pound.....		20
choice, per pound.....		28
native, per pound.....		12
Porterhouse roast, special, per pound.....		22
choice, per pound.....		31
native, per pound.....		16
Steak, chuck, special, per pound.....		13
native, per pound.....		9
Round, bottom, special, per pound.....		13
choice, per pound.....		19
native, per pound.....		9
Round, top, special, per pound.....		15
choice, per pound.....		22
native, per pound.....		10
Sirloin, special, per pound.....		20
Sirloin, choice, per pound.....		28
Sirloin, native, per pound.....		12
Sirloin, choice cut, special, per pound.....		23
Sirloin, choice cut, choice, per pound.....		32
Sirloin, choice cut, native, per lb.....		16
Rump, special, per pound.....		20
choice, per pound.....		28
native, per pound.....		12
Porterhouse (not less than 1 1/2 pounds), special, per pound.....		23
Porterhouse (not less than 1 1/2 pounds), choice, per pound.....		34
Porterhouse (1 1/2 pounds and over), native, per pound.....		17
Porterhouse, short, Delmonico special, per pound.....		20

	Price.
Porterhouse, short, Delmonico choice, per pound.....	28
Porterhouse, short, native, per lb.....	12
Tenderloin, Western, special, per pound.....	35
Tenderloin, Western, choice, per pound.....	46
Tenderloin, Western, native, per lb.....	25

NOTE.—"Choice beef" is kept on hand in the cold storage plant at Cristobal. Orders placed with commissary storekeepers before 11 a. m., will be shipped for delivery on the following morning.

Pork—Hams, fresh, per pound.....	\$23
Shoulders, fresh, per pound.....	\$19
Loin, chop, or roast, per pound.....	19
Pigs' feet, fresh, each.....	?
Pigs' head, fresh, whole.....	83
1/2 head.....	42
Sausage, home made, per pound.....	23
Spare ribs, per pound.....	11
Ox tails, per pound.....	9
Beef tongue, native, whole, per pound.....	20

MISCELLANEOUS.

There were no important changes in prices of vegetables, fruits, etc.

* Indicates advance from preceding list.
 † Indicates reduction from preceding list.
 ‡ Not less than 1/2 ham or 1/2 shoulder of fresh pork will be sold.

Wed., July 28.....	4:53	10:57	17:06
	1:6	0:1	15:8

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.). All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3.47 p. m.

The cable address of The Panama Canal, on the Isthmus, is "Panacanal, Panama;" in the United States, "Panacanal, Washington."

Shipping people addressing The Panama Canal by mail, should address, "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C.," for delivery in the United States.

MOVEMENTS OF OCEAN VESSELS.

(Week ending at 6 p.m., June 20, 1915.)

Sailings of Vessels in Regular Service with the Isthmus.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing every Saturday, direct from Cristobal; and every Thursday, direct from New York; between Colon and New York by the United Fruit Company, sailings via Kingston weekly and via Havana weekly; between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

NEW YORK TO CRISTOBAL-COLON.

Vessel	Sails	Arrives
Almirante	U. F. C. June 16	June 23
Panama	P. R. R. June 17	June 23
Pastores	U. F. C. June 19	June 27

Zacapa	U. F. C. June 23	June 30
Allianca	P. R. R. June 24	June 30

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly. The subscription rate is \$1 per year in the United States and its possessions, and in Canada, Cuba, Mexico, and Panama (domestic postage), and \$1.50 in other countries (foreign postage). The paper is furnished free to United States Government departments, representatives of foreign governments, public libraries, and employes of The Panama Canal and the Panama Railroad Company whose names are on the gold roll.

All subscriptions expire on December 31. Domestic subscriptions are accordingly charged as beginning from the first of the quarter of the year in which received. Remittances should be made to pay only to December 31, on this basis: Sent between April 1 and July 1, 75 cents; July 1 to October 1, 50 cents; October 1 to January 1, 25 cents. For foreign subscriptions the year is divided into thirds: Between January 1 and May 1, \$1.50; May 1 to September 1, \$1; September 1 to January 1, 50 cents.

Remittances for subscriptions may be forwarded to The Panama Canal, Washington, D. C., or to The Canal Record at the address given below.

Address all Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Gasoline Storage Tanks for Terminal Oil Plants.

Operations have begun for the erection of gasoline storage tanks in connection with the oil handling plants at the terminals of the Canal. Two tanks of approximately 5,300 barrels capacity each, situated on the west side of the locks at Gatun and formerly used for the storage of fuel oil for the electric plant at Gatun, are being emptied of oil and will be transferred to the terminal oil plants, for use in the storage of gasoline. Upon the completion of their erection, and of the pipeline connections with the handling plants and the oil cribs, it will be possible to supply gasoline to vessels with the ease and quickness with which fuel oil and Diesel oil are now supplied. Previous handling of gasoline has been in drums and cases.

Electric Trucks for Terminal Piers.

In order to expedite the handling of cargo on the piers at Cristobal the Panama Railroad Company has placed an order for electric trucks, in the expectation of increasing the use of such equipment if the results from their operation and the developments of traffic warrant. The order placed was for four electric tractor trucks, each equipped with three trailers, to be furnished by the Buda Company, of Chicago; and in addition eight trucks of different type are to be selected by the New York office of the company and sent to the Isthmus.

Each of the tractor trucks ordered is six feet long over all by 40 inches wide, has a wheel base of 42 inches and wheel gage of 32 inches, four wheels 16 inches in diameter, and a clearance of its working parts of six inches above the floor. Equipped with two sets of storage batteries, each weighs approximately

2,500 pounds. The steering radius is five feet and the speed, with three speeds forward and three in reverse, is from one to seven miles per hour. Each tractor is rated to haul 20,000 pounds on trailers.

It is proposed in the selection of additional trucks to experiment with types equipped with small cranes, making a unit capable of lifting cargo in a sling, transporting it, and delivering it, with a minimum of dependence on human labor.

Completing New Freight House in Panama.

The roof over the south wing of the new concrete freight house of the Panama railroad for the city of Panama was finished last week and the final plastering of the walls of hollow concrete blocks, and the painting of the roof trusses are in progress. The entire building is 75 by 600 feet in plan, with a two-story section in the center 40 feet long, the upper story of which is used for offices, and, after allowing for depressed tracks occupying a width of 12 feet for practically the length of the building, affords about 36,000 square feet of storage space in addition to the office space. The north wing has been in use several months, and with the virtual completion of the south wing, the entire building is now in service.

Vessels May Take Boiler Water from Gatun Lake.

Steamship masters are advised that, with the agreement of the pilot, excellent boiler water may be taken up in Gatun Lake, preferably between Gatun Locks and Darien. South of Darien the water is likely to be muddied by the dredging operations in the Cut or by high waters in the Chagres River. The pilot can advise of the best place to take water.

Southbound vessels of deep draft should confer with the pilot as to the advisability of taking water in Gatun Lake, as an increase in draft may affect the facility of handling the vessel past the part of the channel affected by slides. Northbound vessels which have passed through the Cut may take up all the water desired, without charge.

The water in Miraflores Lake is slightly saline, as a result of infiltration from the Pacific Ocean. At present the degree of salinity is not sufficient to be distinctly injurious but it is better to take the entirely fresh water of Gatun Lake.

The four-masted steel bark *Daylight* arrived at Cristobal on June 26 from New York, and entered the Canal the next day in tow of tugs, on her way to Shanghai. She is carrying 144,600 cases of refined petroleum and 5,000 cases of naphtha, loaded at New York.

The steamship *Anyo Maru* of the Toyo Kisen Kaisha called at Balboa on her way from Chilean ports to Hongkong with a cargo of 9,010 tons of nitrates and hides, to take on 1,800 tons of coal. She cleared from Balboa on Tuesday, June 29.

CANAL TRAFFIC IN MAY.

Number of Ships Using Canal Greater than in Any Previous Month—Summary of Movements.

The number of oceangoing vessels which passed through the Canal during the month of May was 141. This is more than used the Canal during any preceding month. The previous highest number was 136, for March. Cargo passing through the Canal in May amounted to 578,708 tons, which exceeded all previous months except March. The cargo traffic during March amounted to 635,057 tons.

Cargo reached and passed the 4,000,000-ton mark in May. The total which had gone through the Canal from its opening to June 1, was 4,347,568 tons.

During May 75 vessels passed through the Canal eastbound, or from the Pacific to the Atlantic, and 66 westbound, or from Atlantic to Pacific. Eastbound cargo amounted to 332,174 tons, and westbound to 246,534 tons.

A summary of the traffic eastbound and westbound by months since the opening of the Canal to commercial traffic, on August 15, 1914, is given herewith:

Month	Eastbound.		Westbound.		Total.	
	Ves-sels	Cargo.	Ves-sels.	Cargo.	Ves-sels.	Cargo.
Aug...	12	57,182	12	49,106	24	106,288
Sept...	30	186,776	27	135,262	57	322,038
Oct....	40	252,288	44	168,069	84	420,357
Nov....	38	242,291	54	206,510	92	448,801
Dec...	57	261,680	42	177,235	99	439,915
Jan....	54	240,875	44	208,082	98	448,957
Feb...	53	274,619	39	149,987	92	424,606
Mar...	80	417,610	56	217,447	136	635,057
April..	60	285,457	59	237,384	119	522,841
May..	75	332,174	66	246,534	141	578,708
Total	99	2,550,952	443	1,796,616	942	4,347,568

According to nationality, the vessels passing through the Canal during the month consisted of 60 American ships, 56 British, 10 Norwegian, five Swedish, four Danish, two Chilean, and one each of Italian, Canadian, Dutch, and Peruvian.

Thirteen of the vessels passing through the Canal in May were in ballast. The average loading of the 128 vessels which carried cargo was 4,961.3 tons.

In the eastbound traffic, two vessels were in ballast, and the average loading of the 73 cargo-carrying ships was 4,550.3 tons. Westbound, 11 vessels were in ballast, and the 55 laden ships averaged each 4,482.4 tons.

To June 1st, 83 vessels, not including launches and Canal craft, which are not counted in these summaries, had passed through the Canal in ballast, and 859 ships had carried cargo through the Canal.

The average daily transit of cargo through the Canal in May was 18,668 tons, exceeding all previous months except March.

The numbers of ballast and laden vessels using the Canal each month since its opening, the average amount of cargo in each of the laden vessels each month, and the average

daily transit of cargo are summarized in this table:

	Bal- last	Lad- en	Average loading	Daily movement
August.....	4	20	5,314.4	6,643.0
September.....	8	49	6,572.2	10,734.6
October.....	12	72	5,838.3	13,559.9
November.....	7	85	5,280.0	14,960.0
December.....	6	91	4,724.3	14,190.8
January.....	6	92	4,879.9	14,482.5
February.....	4	88	4,825.1	15,164.5
March.....	10	126	5,040.1	20,485.7
April.....	13	106	4,932.5	17,428.0
May.....	13	128	4,961.3	18,668.0

The average loading for all of the 859 laden vessels which had made use of the Canal up to June 1, 1915, was 5,166 tons.

The tolls earned during the month of May amounted to \$547,054.60. The earnings by months have been:

Prior to July 1, 1914.....	\$14,618.68
July.....	7,598.40
August.....	88,401.80
September.....	*266,513.28
October.....	375,787.44
November.....	381,533.28
December.....	410,043.60
January, 1915.....	419,037.12
February.....	383,904.96
March.....	560,784.96
April.....	442,415.49
May.....	547,054.60

Total..... 3,897,693.61

*Reduced from \$268,204.64 by remission of \$1,695.36 on account of making rate of 72 cents instead of \$1.20 on United States Army transport *Buford*, passing through the Canal on September 9.

The cargo passing through the Canal during May was carried over five principal routes, as follows:

Route.	Ves- sels	Tons of cargo
U. S. coastwise, eastbound.....	19	73,501
U. S. coastwise, westbound.....	22	118,375
Total.....	41	191,876
U. S. Pacific coast to Europe.....	8	43,543
Europe to U. S. Pacific coast.....	2	6,873
Total.....	10	50,416
South America to Europe.....	*21	95,045
Europe to South America.....	13	9,820
Total.....	34	104,865
South America to United States.....	12	87,805
United States to South America.....	10	43,406
Total.....	*22	131,211
United States to Far East.....	12	65,772
Far East to United States.....	6	29,632
Total.....	18	95,404
Miscellaneous eastbound.....	2	2,648
Miscellaneous westbound.....	1	2,288
Total.....	3	4,936
Vessels in ballast.....	13	

*Vessels making Cristobal or Balboa their destination after passing through the Canal, for discharging cargo for connecting carriers, are classified in the South American-European or North American-South American routes according to the ultimate destination of the greater part of the cargo of the respective vessels.

The miscellaneous westbound vessel was the *John A. Hooper*, carrying 2,288 tons of sugar from Matanzas to Vancouver. The eastbound vessels rated as on miscellaneous routing were the bark *John Palmer*, carrying 2,335 tons of lumber from the west coast to Quebec, and the walrus hunting vessel *Kit*, with 313 tons of hides, oil, curios, rice, etc. from the Arctic Ocean and Japan to Sandefjord.

Cargo declarations made by the masters of vessels passing through the Canal during May listed 141 commodities; of these, 31 were carried through the Canal in both directions.

Distribution of the listed commodities was as follows:

Commodity.	Atlantic to Pacific.	Pacific to Atlantic.	Total.	Remarks.
	Tons.	Tons.	Tons.	
Alfalfa meal.....			190	San Francisco to New York.
Apricot kernels.....			40	San Francisco to Scandinavian ports.
Animal food.....	18		18	New York to San Francisco.
Antimony ore.....		858	858	China and Chile to New York, Boston, and Liverpool.
Asphalt.....		140	140	San Francisco and Los Angeles to New York and London.
Balsam.....		2	2	Central American ports to Scandinavian ports.
Bamboo.....		1,200	1,200	Japan and China to New York and Boston.
Bark.....		5	5	Guayaquil to Colon.

Zinc.....		1	1	Balboa to New York.
Zinc concentrates.....		10,790	10,790	Port Pirie and Melbourne to Texas, Mobile, and Boston.
Total.....	246,534	332,174	578,708	

The principal commodities passing through the Canal during the month were barley, coal, coffee, copper, copper ore, lead, iron ore, lumber, manufactures of iron and steel, nitrates, mineral oils, petroleum, sugar, wheat, wool, and zinc concentrates. Analysis of the larger movements follows:

Barley amounted to 7,417 tons (about 341,000 bushels), all shipped from the west coast of the United States to Europe. Five hundred and fifteen tons were consigned to Liverpool, 2,000 to Copenhagen, and 4,902 tons to Stockholm.

Coal, including 1,200 tons passing from the Pacific to the Atlantic for ships' use but in cargo space, amounted to 22,395 tons. Ten tons were from Liverpool to Callao, carried as cargo but for ship's use, and 21,185 tons were shipped from the Atlantic coast of the United States; 1,020 tons to Sydney, 9,074 tons to San Diego, and 11,091 tons to San Francisco.

Coffee was shipped in both directions; 732 tons of roasted coffee from New York to Los Angeles and San Francisco, and 6,775 tons of the green bean from Central and South America to Europe and the United States, the United States receiving 865 and Europe 5,910 tons. Of the latter quantity, 1,832 tons went to Copenhagen and 3,212 tons to Norway and Sweden.

Copper, manufactured and in bars, amounted to 4,909 tons, of which 368 tons were shipped from New York to San Francisco. Of the eastward movement, 800 tons were from Japan for New York, 1,831 tons from South Pacific ports for New York, 360 tons from the west coast of the United States for New York and Boston, and 750 tons from Chile for Liverpool.

Copper ore amounting to 5,530 tons passed through the Canal in May from Chilean and

Peruvian ports for the United States and Europe; 552 tons went to Europe and 4,978 tons to the United States.

Under the rating of general cargo, which included great quantities of minor shipments not readily classified, 86,545 tons were carried through the Canal during the month from Atlantic to Pacific. Of this, 5,887 tons were from Europe, all for South and Central America except 262 tons for Los Angeles and San Francisco. The remainder, 80,658 tons, originated in the United States; 46,462 tons were in the coastwise trade, 10,730 tons were shipped to Australia, 8,457 tons to Vladivostok, and 15,009 tons to South America.

In the westward movement classified as general cargo, there was a total of 23,833 tons, of which 476 tons were from Japan and the Philippines for the United States; 3,712 tons from South America to the United States; 852 tons from South America for Europe; 60 tons from Vancouver to Jamaica; 13,554 tons in the United States coastwise trade; and 5,079 tons from Tacoma to Liverpool.

Of lead, 6,100 tons were shipped from New York to San Francisco, five tons from Liverpool to Valparaiso, a total of 6,105 tons moving westward; eastward shipments amounted to 247 tons, consigned to New York, 11 tons from Callao and 236 tons from San Francisco.

Lumber shipments included 500 tons from New York to Australia and 150 tons from New York to Antofagasta, moving westward. The eastward shipments amounted to 17,723 tons, 12 tons from Cavite to Hampton Roads, and the remainder from Pacific ports of the United States, excepting 2,400 tons from Vancouver for Jamaica. Of this, 3,147 tons were for Great Britain, 2,335 tons for Quebec, and 9,829 tons to United States ports.

Manufactured goods of iron and steel included one eastward shipment, of 676 tons

from Los Angeles to New York and Boston, and 32,492 tons from New York. The shipments out of New York were distributed to the west coast of the United States, 7,792 tons; to South America, 17,600 tons; and to Australia, 7,100 tons.

Of miscellaneous manufactured goods, there were 663 tons moving eastward in the United States coastwise trade, and 3,995 tons moving westward in the coastwise trade, in addition to 53 tons from Gotenburg for San Francisco.

Oats amounted to 5,550 tons, from Chile to Liverpool and London.

Mineral oils amounting to 17,214 tons were shipped from New York, 171 tons in the coastwise trade, 2,243 tons to Australia, 5,800 tons to Japan, and 9,000 tons to Manila.

Paper shipments through the Canal during May amounted to 2,125 tons, all from Atlantic to Pacific; 729 tons were from Norway for Chilean ports, 229 tons from Gotenburg for San Francisco, and 1,167 tons were shipped from New York to the west coast of the United States.

Nitrates were the largest single item during the month, amounting to 135,540 tons. This is the largest quantity of any item which has passed through the Canal during any month. The tonnage of nitrate cargo in March was 48,076 and in April, 68,277. The great increase is ascribed to the increasing use of nitrates in the manufacture of ammunition. Shipments from Chile amounted to 135,394 tons, of which 62,817 tons went to the United States and 72,577 tons to Europe. A single westward shipment, from Christiania to Valparaiso, contained 146 tons.

Sugar shipments westward consisted of 1,745 tons from New York to Vancouver, 2,288 tons from Matanzas to Port Angeles, and 1,906 tons from Liverpool to South America. The eastward shipments consisted of 30,409 tons from the Hawaiian Islands to Philadelphia and New York, and 6,674 tons from Peru, of which 6,101 tons went to France and 573 tons to the United States.

Wheat amounted to 20,140 tons (approximately 745,000 bushels). All of it was shipped from the west coast of the United States; 5,400 tons went to United States Atlantic ports and 14,740 tons to Europe.

Wool shipments were entirely from the west to New York, Boston, and Europe. Two hundred and forty-five tons were shipped from California to the Atlantic seaboard of the United States; Australia shipped 3,273 tons to Boston and 23 tons to New York; 800 tons came from Shanghai, for New York; and 361 tons originating in South America were distributed, 86 tons to Europe and 275 tons to the United States.

The "Ranger" Arrives at Cristobal.

The United States Navy gunboat *Ranger*, in service as a training ship with the nautical training school of the State of Massachusetts, arrived at Cristobal on Saturday, June 26, from Boston by way of the West Indies. The vessel will not pass through the Canal but her men are being given opportunity to inspect it. Through the courtesy of the local representative of the United States Steel Products Company, they were taken through the Canal aboard the steamship *Charlton Hall*, which made the transit on Tuesday, June 29, on her way from New York to Callao in the service of the New York and South American Line.

NOTICE TO STEAMSHIP LINES.

Increase in Price of Coal Supplied at Canal Terminals.

On account of the increased cost of ocean transportation due to the prevailing scarcity of bottoms and the general high prices of charters, resulting from conditions made by the war in Europe, the price of the coal delivered to vessels at the Canal is to be advanced, as set forth in this notice issued under date of June 16:

On and after September 1, 1915, the following prices will obtain at the Panama Canal for coal supplied steamships, including warships of all nations:

Cristobal-Colon.

Delivered alongside of vessel in lighters or in cars on the wharves, trimmed in bunkers, when handled by ship's gear.....(per ton)... \$6

Balboa.

Delivered alongside of vessels in lighters or in cars on the wharves, trimmed in bunkers, when handled by ship's gear.....(per ton)... \$7

An additional charge of \$1 per hour will be made for the use of each mechanical hoist or crane furnished by the Panama Railroad Company.

Provisions are being completed by which an ample supply of coal will be kept on hand in lighters ready for delivery upon arrival of vessels. These lighters will be fitted with mechanical hoists which should deliver coal as fast as it can be stowed.

These changes will apply to the prices given on page 41 of the revised edition of April, 1915, of the Sailing Directions and General Information, The Panama Canal.

CHESTER HARDING,
Acting Governor.

Motor Bus Service.

The four motor busses recently purchased by the Panama Railroad Company for service between East Balboa, Balboa Heights, and Ancon, which have been undergoing alterations at Balboa Shops, are now complete and ready for service.

One bus was placed in service last Friday morning, operating between the Panama railroad steel dock, East Balboa, and the Hotel Tivoli, Ancon, via the hospital grounds. A second car was placed in operation Sunday morning over the same route, running on a 30-minute headway.

All four cars will be placed in regular service commencing Thursday, July 1, on a con-

tinuous service between the hours of 6 a. m. and 11 p. m., operating on a 20-minute headway.

On account of the Bishop's Hollow road being out of service during reconstruction, all cars are operating via the hospital grounds. As soon as rebuilding the Bishop's Hollow road shall have been completed, which it is expected will be by July 15, the cars will be operated via both the hospital grounds and Bishop's Hollow, to and from the Administration Building in each direction, continuing on through to and from East Balboa.

Rest Room for Women Employes at Administration Building.

Two rooms on the third floor of the north wing of the Administration Building at Balboa Heights are being fitted up as a place of resting and recreation for the women employes in the building. The rooms are No. 325, originally assigned to the official photographer, and No. 329, adjoining, which was occupied by the superintendent of telephones and telegraphs before his work was transferred to the Electrical Division. No. 325 will be fitted out as a reading and sitting room, and No. 329 as a retiring room. There are 36 women employes at the building, exclusive of the 13 telephone operators, who have their own rest room at the end of the south wing, on the third floor, adjoining the exchange.

No room has yet been found available for a reading room for the gold men employes in the building, of whom there are about 375. Pool and billiard tables have been installed in the basement, but all of the rooms in the building which might serve as a suitable reading room have been occupied. The Canal library is so filled with reading matter as to leave little room for readers.

Pilots' Expenses at Government Hotels.

On account of the long and irregular hours at which the pilot force works, members of the force stay over night frequently at the opposite end of the Canal from that at which officially stationed. In order to simplify the handling of expense accounts, and to make matters more convenient for the pilots, the Auditor has authorized the Tivoli and Washington Hotels to render bills directly against the Marine Division for services to pilots. Pilots will certify on the memorandum bills presented by the hotel offices that the services charged for have been performed for them while they were on official duty, and the hotels will use these memoranda to support their regular bills against the Marine Division.

Deceased Employes.

The estates of the abovenamed deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against the estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

INDEPENDENCE DAY PROGRAM.

Outline of Features—Special Schedule on the Panama Railroad.

The program for the observance of Independence Day on Monday, July 5, at Balboa, has arranged for the holding of athletic events between 8 a. m. and 9.45 a. m.; military exercises, oration, and reading of the Declaration of Independence, to begin at 10 a. m.; a parade, with three brass bands, and various organizations; after the lunch hour, a wall-scaling contest between military units; baseball game between picked teams; athletic exhibition and folk dancing on the Prado; and in the evening a band concert, followed by an exhibition of fireworks, and a dance at the Administration Building, beginning at 9 o'clock.

A special train schedule has been provided on the Panama Railroad for July 5.

On the main line the regular daily service will be augmented by a late train each way on the holiday; one leaving Panama at 12.01 a. m. the morning of the 6th, reaching Colon at 1.45 a. m., and one leaving Colon at 9.30 p. m., reaching Balboa Heights at 11.10 and Panama at 11.15 p. m.

Trains will leave Colon for Panama at 7.15 a. m., 11.05 a. m., 5.10 p. m., and 9.30 p. m.; and will leave Panama for Colon at 7.10 a. m., 11 a. m., 5.05 p. m., and 12.01 a. m.

On the Las Cascadas branch, trains will leave Las Cascadas for Panama at 7 a. m., 9.30 a. m., 10.40 a. m., 1.10 p. m., 4 p. m., 7.20 p. m., 11.40 p. m., and 1.40 a. m. (morning of the 6th).

Trains will leave Panama for Las Cascadas at 4.30 a. m., 8.10 a. m., 8.30 a. m., 12.10 p. m., 3.05 p. m., 6.15 p. m., 10.40 p. m., and 12.40 a. m. (morning of the 6th.)

The trains will run through in each direction, without change of cars at Pedro Miguel.

The Canal hotel at Balboa will be open throughout the day.

Fourth of July Launch Service to Taboga.

For the accommodation of employes wishing to spend July 4 and 5 at Taboga, the regular schedule of launches will be supplemented on Saturday, July 3, by a boat leaving Balboa at 1.30 p. m., for passengers from the line on the noon train, and a boat from Balboa at 7.30 p. m., for those on the evening train.

The following is the regular schedule, in addition to which the special launches will be operated:

Leave Balboa dredge landing—Daily, except Thursday; at 5.30 p. m.: Monday, Thursday, Saturday, and Sunday, at 9.40 a. m.

Leave Taboga—Daily, except Friday, at 7 a. m. (On Mondays and days following holidays, one hour earlier), Monday, Thursday, and Saturday at 1.30 p. m.; Sunday at 7.15 p. m. The 9.40 a. m. trips from Balboa await the arrival of Panama railroad trains.

Earthquake Shock.

An earthquake shock was felt over the Isthmus in the early morning of Monday, June 28. According to the records of the seismographs at the Balboa Heights observatory, the seismic disturbance began at 3:27:58 and ceased at 3:29:31, lasting one minute and 33 seconds. The maximum amplitude of movement was 13 millimeters, and the distance to the epicenter of disturbance was approximately 100 miles. The intensity was III on the Rossi-Forel scale of I to X. No damage has been reported.

QUARANTINE ACTIVITIES.

Work Increasing with Growing Traffic to Canal and Terminal Ports.

Emigration from the Isthmus to foreign ports during the month of May exceeded immigration by 410 persons. This brings the net emigration since July 1, 1913, during a period of 23 months, to 26,299. The greater part of the emigration has been of people formerly employed on the Canal and the Panama railroad. The force of employes on June 25, 1913, was 42,262; that reported as of May 26, 1915, was 26,434, showing a net decrease of employes in the period of 15,828. The net emigration of all classes from the Isthmus, 26,299, has averaged 1,143.4 persons per month, or for the 700 days in the period from July 1, 1913, to May 31, 1915, has amounted to 37.5 per day.

The activities at the quarantine stations during May were greater than for the preceding month; 201 vessels were inspected, as compared with 185 in April, and 17,163 persons were examined (an average of 553 a day), as compared with 14,637 in April. A summary of the activities and of the movements of persons through the ports of Balboa-Panama and Cristobal-Colon is given in this consolidated report:

Number of vessels inspected and passed	190	
Number of vessels held in quarantine..	11	
Total		201
Number of vessels fumigated on arrival.	9	
Number of vessels fumigated on departure	0

AT PANAMA AND BALBOA.

For steamships, including warships of all nations, delivered in lighters or cars, trimmed in bunkers, when ships use their own gear.....	7 00
To parties taking carload lots.....	7 60
To parties taking less than one carload at a time in cars.....	9 20
Santo Tomas Hospital (special rate).....	6 00

An additional charge of \$1 per hour will be made for the use of steam hoist and crane when furnished by the railroad company.

All previous rates authorized are hereby cancelled.

C. H. MOTSETT,
Superintendent.

Empty Oil Drums Returned to Storehouses.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

BALBOA HEIGHTS, C. Z., June 15, 1915.

To all concerned—Your attention is invited to the fact that a great many oil drums are being received by the Balboa storehouse without bungs or plugs.

Please instruct all concerned to forward storekeeper, Balboa, without delay all bungs which they may be able to locate, or now have in their possession, as it is essential that all drums returned to the United States for credit be shipped complete with bungs. Please instruct all concerned when returning oil drums to storehouses, for credit, to ship same complete with bungs.

Your further attention is invited to the fact that the appearance of a great many of the drums returned to the storehouse indicate that the bungs have been removed with a cold chisel, which practice should be discontinued at once and I will thank you to so instruct all concerned. All bungs should be removed with a wrench.

WM. R. GROVE,
Chief Quartermaster.

Temporary Appointments in Classified Service.

THE PANAMA CANAL,
BOARD OF CIVIL SERVICE EXAMINERS.

BALBOA HEIGHTS, C. Z., June 9, 1915.

To heads of departments—The attention of heads of departments is called to the proper method to be pursued in making temporary appointments of employes in the classified service:

1. An employe placed in a regular position in the organization can be approved only until the position is filled by the certification of an eligible from the list, requisition for which must be made at the time that the temporary appointment is requested. Such temporary appointments are approved under section 1 of Rule VIII of the civil service rules governing the approval of temporary appointments.

2. An employe appointed for a brief period in a position which is temporary in nature and is a temporary position in the organization can be approved as a job appointment under section 4 of Rule VIII and this practice should not be extended to positions which, from the nature of the service, can not be considered as temporary work. These employes should not be shown in a regularly authorized position in the organization, but should be carried in a position authorized as temporary.

W. P. COPELAND,
Secretary.

JOINT LAND COMMISSION.

Awards.

In the matter of sundry claims, award No. 92, docket numbers as noted, June 22, 1915—An award is hereby made against the United States in favor of the persons hereinafter named, in the sum of \$1,558, United States currency.

This award shall be paid to the persons hereinafter named, in the amounts specified, on or before the 22nd day of July, 1915, and if payment or tender of payment of any of the items of this award is not made on or before that date, such item shall thereafter bear interest at the rate of six per centum per annum until paid.

Rebecca Jackson, docket No. 838—For all rights, claims, and other interests which the said Rebecca Jackson may possess or may have possessed in and to houses, crops, fruit trees, and any other improvements on lands claimed by the Schuber family near Corozal, the sum of \$398.

C. A. Bacquie, docket No. 839—For all rights, claims, and other interests which the said C. A. Bacquie may possess or may have possessed in and to houses, crops, fruit trees, and any other improvements on lands claimed by the Schuber family near Corozal, the sum of \$840.

Ezekiel Carmichael, docket No. 841—For all rights, claims, and other interests which the said Ezekiel Carmichael may possess or may have possessed in and to houses, crops, fruit trees, and any other improvements on lands claimed by the Schuber family near Corozal, the sum of \$320.

Total, \$1,558, United States currency.
FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

In the matter of the claim of Dominico Pico for property located near Corozal, award No. 84, docket No. 779, June 1, 1915—An award is hereby made against the United States, in favor of the person hereinafter named, in the sum of \$225, United States currency.

This award shall be paid to the person hereinafter named, in the amount specified, on or before the 1st day of July, 1915, and if payment or tender of payment of this award is not made on or before that date, such award shall thereafter bear interest at the rate of six per centum per annum until paid.

Dominico Pico, docket 779—For all rights, claims, and other interests which the said Dominico Pico may possess or may have possessed in and to houses, crops, fruit trees, and any other improvements situated upon the Schuber lands near Corozal, the sum of \$225.

FEDERICO BOYD, NICHOLAS CORNET, LEVI M. KAGY, S. Lewis, Commissioners.

In the matter of the claim of José Palma for property located near Matachin, award No. 85, docket No. 754, June 1, 1915—An award is hereby made against the United States, in favor of the person hereinafter named, in the sum of \$200, United States currency.

This award shall be paid to the person hereinafter named, in the amount specified, on or before the 1st day of July, 1915, and if payment or tender of payment of this award is not made on or before that date, such award shall thereafter bear interest at the rate of six per centum per annum until paid.

José Palma, docket No. 754—For all rights, claims, and other interests which the said José Palma may possess or may have possessed in and to house tax No. 392, and crops, fruit trees, and any other improvements on lands near Matachin, Canal Zone, the sum of \$200.

FEDERICO BOYD, NICHOLAS CORNET, S. LEWIS, Commissioners.

The full Commission heard and considered the above claim, but Commissioner Kagy declined to join in the award. Believing it is not supported by the evidence, I therefore dissent from the award.

(Signed) LEVI MONROE KAGY.

In the matter of the claim of Zoraida Cabeza for property located near Matachin, award No. 83, docket No. 539, May 28, 1915—This claim came on for hearing on May 17, at which time a partial hearing only was had. Further hearing was had on May 19 and May 21, on which latter date counsel for claimant and counsel for the United States agreed upon a settlement in the sum of \$700, United States currency, and requested the Commission to award that amount.

An award is therefore made in the sum of \$700, United States currency, against the United States, in favor of Zoraida Cabeza for houses tax Nos. 425, 423, and 424, located near Matachin.

This award shall be paid to said Zoraida Cabeza in the amount specified on or before the 28th day of June, 1915, and if payment or tender of payment of this award is not made on or before that date, such award shall thereafter bear interest at the rate of six per centum per annum until paid.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

In the matter of the claim of Narciso Goray, attorney-in-fact for the Hurtado family, for property designated as "Cordenas y la Ramona," rule No. 184, amending award No. 82, docket No. 295, May 18, 1915.—Upon motion of the claimants, award No. 82 of the Joint Land Commission in the matter of the above entitled claim is hereby amended so as to correct the said award, in accordance with the facts, as to the parties to whom payment shall be made by the United States, as follows:

Said award is made payable to: José Marcelino Hurtado, Manuela Hurtado Fabrega, Amalia Hurtado de Bidwell, Josefa Hurtado, and Manuela Hurtado de Santa Maria, instead of José Marcelino Hurtado, Manuel José Hurtado, Amalia Hurtado de Bidwell, Carmen Hurtado de Hurtado, and Manuel Hurtado de Santa Maria.

The secretary of this Commission will give due notice of this amendment and correction of said award No. 82, to the attorneys for the above named claimants and to the attorney for the United States.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rule of Dismissal.

In the matter of the claim of Mrs. R. Maitland, rule of dismissal No. 186, docket No. 837, June 13, 1915—The claim of Mrs. R. Maitland, docket No. 837, filed with the Commission May 9, 1913, and which came on for public hearing on June 21, 1915, is hereby dismissed for the reason that the evidence submitted to the Commission does not justify an award being made.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Joint Land Commission Notice.

The public is hereby informed that the offices of the Commission are open for the transaction of business each week day during the hours from 8 a. m. to 12 m. and from 2 p. m. to 5 p. m. Any information desired by claimants or their attorneys, relative to claims filed before the Commission, may be procured at the office of the secretary.

By direction of the Commission,

WILLIAM TAYLOR,
Secretary.

COMMISSARY DEPARTMENT.

Commissary Hours.

The commissary stores at Las Cascadas, Empire, and Culebra are open from 7.30 to 11.30 a. m., and 1.30 to 5.30 p. m.

The commissary store at Balboa is open from 8 a. m. to 12.30 p. m., and 2.30 to 6 p. m.

All other commissary stores are open from 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m. on Saturdays and other sailing days of Panama railroad vessels.

Cold Storage Prices.

These prices are increased by 10 per cent for sales to commercial and foreign naval vessels, and by 20 per cent for sales to yachts.

The following is a list of retail prices of cold storage provisions which will be effective July 1, 1915:

	Price.
FRESH MEATS.	
Mutton—Stewing, per pound	9
Shoulder, trimmed, per pound	12
Leg (8 to 10 pounds), per pound	19
Short cut, chops, per pound	23
Shoulder, chops, per pound	14
Lamb—Stewing, per pound	12
Shoulder, trimmed, per pound	15
Leg (5 to 8 pounds), per pound	24
Chops, per pound	29
Chops, shoulder, per pound	18
Veal—Stewing, per pound	12
Shoulder, for roasting (not under 4 lbs.), per pound	15
Chops, shoulder, per pound	20
Chops, per pound	30
Loin, for roasting, per pound	30
Cutlets, per pound	36
Beef—Suet, special, per pound	7
Soup, special, per pound	7
Native, per pound	5
Soup, bones, special, per pound	2½
Stews, special, per pound	11
native, per pound	8
Plate, special, per pound	11
native, per pound	8
Chuck roast, special (3 lbs. and over), per pound	12
Chuck roast, native (3 lbs. and over), per pound	8
Rib roast, second cut (not under 3½ pounds), special, per pound	16
Rib roast, second cut (not under 3½ pounds), choice, per pound	24
Rib roas, second cut, native (3½ pounds and over), per pound	9
Rib roast, first cut (not under 3 pounds), special, per pound	19
Rib roast, first cut (not under 3 pounds), choice, per pound	27
Rib roast, first cut, native (3 pounds and over), per pound	11
Pot roast, special, per pound	20
choice, per pound	28
native, per pound	12
Rump roast, special, per pound	20
choice, per pound	28
native, per pound	12
Porterhouse roast, special, per pound	22
choice, per pound	31
native, per pound	16
Steak, chuck, special, per pound	13
native, per pound	9
Round, bottom, special, per pound	13
choice, per pound	19
native, per pound	9
Round, top, special, per pound	15
choice, per pound	22
native, per pound	10
Sirloin, special, per pound	20

Tenderloin, Western, choice, per pound	35
	46
NOTE.—"Choice beef" is kept on hand in the cold storage plant at Cristobal. Orders placed with commissary storekeepers before 11 a. m., will be shipped for delivery on the following morning.	
Pork—Hams, fresh, per pound	\$23
Shoulders, fresh, per pound	\$19
Loin, chop, or roast, per pound	18
Spare ribs, per pound	11
Pigs' feet, fresh, per pound	5
Pigs' head, fresh, whole	83
½ head	42
Sausage, home made, per pound	23
Ox tails, per pound	9
MISCELLANEOUS.	
Brains, calves', per pound	10
Calves' head, each	80
Kidneys, beef, per pound	12
Livers—Beef, per pound	10
Calf, per pound	24
Steak—Hamburger, packages	17
Hamburger, 20-pound containers, per pound	14
Sausage—Bologna, per pound	11
Frankfurter, per pound	13
Frankfurter, imported, tin	11
Lieberwurst, per pound	10
Pork, per pound	*15
Sweetbread beef, per pound	17
Eggs, fresh, per dozen	128
per ½ dozen	114
Bloaters, fancy, each	5
Bluefish, per pound	*9
Haddock, smoked, per pound	14
Halibut, fresh, per pound	11
Salmon, per pound	9
Yeast, per pound	31
per cake	2
Pates de foies gras, per jar	*58
CURED AND PICKLED MEATS.	
Beef—Corned, No. 1, per pound	18
No. 2, per pound	15
Ham—Real York and Cumberland, per pound	43
Genuine Westphalia, per pound	50
Mincéd, "Bologna style," per pound	13
Sugar cured, boneless, whole, per pound	*17
Sugar cured, whole, per pound	*21
Half, per pound	*23
Sliced, per pound	*17
Whole, boiled, per pound	*27
Half, boiled, per pound	*20
Sliced, boiled, per pound	*35
Hocks, boiled, per pound	10
Shoulders, sugar cured, whole shoulder, per pound	*17
Bacon—Breakfast, sliced, per pound	*30
Whole piece, per pound	*29
Strips, whole, per pound	21
Sliced, jar	30
Sliced, tin	27
Ham, lunch, per pound	40
Pork, salt, family, per pound	14
Ox tongues, whole, 3 to 5 lbs., per pound	24
Pigs' feet, per pound	8
Tongues, per pound	22
POULTRY AND GAME.	
Chickens—Fancy roasting, milk fed, per pound	*29
Chickens—Fancy, roasting, corn fed, per pound	*26
Fowls, per pound	24
Fowls, light, per pound	21
Ducks, Western, per pound	23
Capons, per pound	32
Broilers, milk fed, per pound	34
Broilers, corn fed, per pound	30
Turkeys, per pound	28
Squabs, each	40
Geese, per pound	1
Grouse, each	120
Mallard ducks, 2 to 2½ pounds, each	2.35
Pheasants, each	1.35
DAIRY PRODUCTS.	
Butter—Creamery, special, per pound	40
Creamery, 60-62 lb. tub, whole tub, per pound	39
Sheffield Farms, extra fancy, per lb.	58
Oleomargarine, per pound carton	29
Cheese—Philadelphia crame, cake	9
Roquefort, per pound	41
Young America, per pound	23
Swiss, per pound	34
Edam, each	92
Edam, tin	29
Parmesan, per pound	38
Gouda, per pound	26
Snappy, per cake	9
Milk, Sheffield Farms, per quart	**15
Fermillac, bottle	**25
Ice cream, quart	125
½-gallon	150
Cream, 30 per cent, quart	**45
pint	**25
½-pint	**15
VEGETABLES.	
Beans, string, per pound	14
Beets, per pound	*3
Cabbage, per pound	2½
Carrots, per pound	2½
Cucumbers, per pound	14
Egg plant, per pound	17
Lettuce, per pound	2
Onions, per pound	5
Parsnips, per pound	4
Peppers, green, per pound	11
Plantains, per dozen	15
Potatoes, white, per pound	2
Sweet, per pound	2
Rhubarb, per pound	2½
Turnips, per pound	3½
Yams, Lucea, per pound	2
FRUITS.	
Apples, per pound	*10
Grape fruit—Select, each	*8
Tropical, each	3
Lemons, per dozen	11

	Price.
Limes, per 100	40
Oranges—Select, each	3
Tropical, per dozen	12
Coconuts, each	4
Bananas, per bunch	38
Bananas, each	12
Apples, evaporated, per pound	12
Apricots, evaporated, per pound	12
Pears, evaporated, per pound	23
Pineapples, each	12
Figs, dried, 12-oz. packages	14
Figs, dried, 5-oz. packages	5
Raisins, seedless, package	11
table, cluster, per pound	20
Currants, cleaned, package	12
Prunes, stewing, per pound	12
Cherries, per pound	27
Cantalou, es, each	12
Watermelons, each	12
Plums, per pound	8
Peaches, per pound	8

* Indicates advance from preceding list.
 **Indicates five cents allowed for return of bottle.
 † Indicates reduction from preceding list.
 ‡ Sold only from commissaries, no orders taken for delivery.
 § Not less than 1/2 ham or 1/2 shoulder of fresh pork will be sold.

Price Changes.

The following changes in prices of articles in stock at the commissary stores became effective June 28:

AUGUST.

DATE.	Time and height of high and low water.			
Sun., Aug. 1.....	1:30	7:42	13:59	20:02
	1.3	14.3	1.8	13.1
Mon., Aug. 2.....	2:13	8:25	14:45	20:48
	2.4	13.3	2.7	12.1
Tues., Aug. 3.....	3:01	9:08	15:33	21:41
	3.5	12.4	3.5	11.2
Wed., Aug. 4.....	3:54	10:02	16:34	22:48
	4.4	11.6	4.1	10.6

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3.47 p. m.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans for all States. Due at New Orleans on the following Tuesday.

Every Saturday to New York, for all States. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.*

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

NOTE.—The sailings on Monday, July 26, and August 23, will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7.10 a. m., connects with the despatches for the two sailings mentioned above.

Fuel and Supplies.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 400 and 650 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton either form of delivery.

Fuel oil may be obtained at Balboa or Cristobal from plants of The Panama Canal, or from private corporations. The present price from the Canal is \$1.25 per ton barrel. Prices from the corporations may be obtained on application to them.

Diesel engine oil is for sale by several companies at approximately 45 shillings per ton of seven barrels.

Water may be obtained in any quantity at either terminal. The price is 25 cents per 1,000 gallons, delivered at the dock with a minimum charge of \$3. Vessels may take up from the fresh water section of the Canal, without charge, all the boiler water they require. This water is, however, scarcely fit for drinking.

All standard lubricants, light and heavy hardware, cordage, and miscellaneous ship chandlery supplies are sold from the storehouses at Cristobal and Balboa.

Ice may be obtained in any reasonable quantity. The price is 30 cents per 100 pounds at Cristobal, and 35 cents per 100 pounds at Balboa.

Repairs to vessels may be made to any extent, except turning of the largest crank shafts or longest line shafts or work requiring dry docking of large vessels.

The Government hospital service is fully equipped for the treatment of medical and surgical cases. The charge for consultation at the dispensaries is \$3; for hospital per day. For American seamen, the charge for treatment in ward is \$1 per day; for foreign seamen, \$1.50 per day.

Subsistence supplies, including a large stock of fresh meats vegetables, canned groceries, fruits, bakery products, etc., are available for quick delivery at either terminal. Prices are generally lower than the retail prices in the United States, and compare favorably with prices in any port of the world.

Application for supplies, or for services, should be made to the Captain of the Port, Cristobal or Balboa.

Mail, other than registered, and cablegrams for men on ships which will call at the terminal ports, or pass through the Canal, may be addressed in care of the captains of the ports, if desired; or may be addressed to Cristobal or Balboa, general delivery, with the name of the vessel written plainly; or, in case the vessel has a known representative on the Isthmus, in care of such representative.

The cable address of The Panama Canal, on the Isthmus, is "Panacanal, Panama;" in the United States, "Panacanal, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C.," for delivery in the United States.

Sailings of Vessels in Regular Service with the Isthmus.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly. The subscription rate is \$1 per year in the United States and its possessions, and in Canada, Cuba, Mexico, and Panama (domestic postage), and \$1.50 in other countries (foreign postage). The paper is furnished free to United States Government departments, representatives of foreign governments, public libraries, and employes of The Panama Canal and the Panama Railroad Company whose names are on the gold roll.

All subscriptions expire on December 31. Domestic subscriptions are accordingly charged as beginning from the first of the quarter of the year in which received. Remittances should be made to pay only to December 31, on this basis: Sent between April 1 and July 1, 75 cents; July 1 to October 1, 50 cents; October 1 to January 1, 25 cents. For foreign subscriptions the year is divided into thirds: Between January 1 and May 1, \$1.50; May 1 to September 1, \$1; September 1 to January 1, 50 cents.

Remittances for subscriptions may be forwarded to The Panama Canal, Washington, D. C., or to The Canal Record at the address given below.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Starting a New Regular Service.

The Blue Funnel Line vessel *Idomeneus* arrived at Cristobal from Liverpool, by way of Kingston, with 700 tons of cargo for San Francisco on July 5. After the completion of coaling at Cristobal, she will go through the Canal on Thursday, July 8, and load 1,000 tons of pipe and 100 tons of machinery, belonging to the Union Oil Company, for Los Angeles. The passage of the *Idomeneus* marks the beginning of a regular service by this line between Great Britain and the west coast of the United States and Canada, with a sailing each way every month.

Continuing the Peruvian Service to Baltimore.

The steamship *Pachitea* of the Peruvian Line is due to sail from Cristobal for Baltimore on Thursday, July 8. This will be the second vessel of this line to have passed through the Canal on the way from Peru to Baltimore recently, the *Mantaro* having made the same trip in the latter part of June. The *Mantaro* is due back shortly and there are expectations of establishing a regular line over this course.

High Run with Half-Yard Mixers.

Seven hundred and seventeen cubic yards of concrete were placed by the Division of Terminal Construction on Thursday, June 17, in a large monolith in the north wall of dry dock No. 1 at Balboa, near the entrance, by two ½-yard cube mixers. The combined number of mixer-hours for the two mixers was 15½, giving an average amount of concrete per hour per mixer of 46.2 cubic yards. One of the mixers was on the south wall of the dry dock, and was operated under the supervision

of General Foreman M. N. Lenham, and the other was on the north side of the entrance pier, and was under the supervision of Foreman W. L. Green.

The total labor cost, including supervision, for operating the two mixers mixing the concrete was \$67.27, making the total labor cost per yard for mixing 9.4 cents.

Addressing Mail for Vessels at the Canal.

Instances occur of delay to mail for vessels or individuals on board them, which come to the Canal, on account of improper addressing. In order that this may be reduced, attention is called to the fact that mail should be addressed to the individual aboard the stated vessel in care of the Captain of the Port, Cristobal, Canal Zone, or Balboa, Canal Zone. Thus, for instance, using fictitious names:

MR. OLAF OLAFSEN,
Steamship *Hurodo*,
Care Captain of the Port,
Cristobal, Canal Zone.

It is important that mail be not addressed to Colon or Panama, as then it is delivered to the postal service of the Republic of Panama.

Each of the port captain's offices has developed a reliable system for the handling of ships' mail, filing it in readiness for delivery, and as soon as a vessel makes port her mail is despatched promptly. Where mail is properly addressed, as directed above, there is no trouble about its delivery.

Inasmuch as it seems inevitable that a great deal of the mail for sailors will be addressed incorrectly, for the reason that directions for the proper addressing of their mail can not be placed in the hands of all concerned, operators and masters of vessels are requested to spread this information among their men in order to reduce losses and promote their security and convenience.

Large Shipment of Oil for Delivery at Balboa.

The oil tank steamer *Lyman J. Stewart* of the Union Oil Company of California, which was launched on October 31, 1914, and described in THE CANAL RECORD of December 2, 1914, is due to arrive at Balboa on July 14 from Port San Luis, Cal., with a cargo of 60,000 barrels of fuel oil. The oil will be delivered to the company's tanks at Balboa, which have storage capacity of approximately 100,000 barrels.

Hospital Rates for Seamen.

The attention of shipping people is drawn to the change in rate for ward treatment of American sailors in the hospitals of The Panama Canal. Prior to July 1 it was \$1 per day, but, effective that date, it has become \$1.50 per day, which is the rate which has applied and still applies to foreign seamen. There is now no discrimination between them,

DEVELOPING LOCAL PRODUCE.

Supply Department to Assure Market for Panama's Fruits and Vegetables.

In order the more adequately to supply the needs of its patrons, both Canal employes and vessels making use of the Canal and its terminals, the Supply Department is entering on a movement for the encouragement of local growers of fruits and vegetables to increase their output. The essential element of the movement is pointing out the assured market for the produce and cooperating with the producers in the marketing of their goods.

The first step is the erection of a fruit and vegetable warehouse, for which the first lumber was delivered on the site on Saturday, July 3. It is to be situated on the site of the old engineers' quarters at the southeastern end of the Panama railroad yard, facing directly on North Avenue and almost directly opposite the head of the northern of the two inclined roads leading up from the harbor, at the Playa. This location makes it very convenient for receiving produce from the small sailing boats which anchor or beach at the Playa, as most of them do.

The warehouse will be a one-story structure, 25 by 50 feet in plan, suitably arranged for its purposes and equipped with a cold room in which fruits may be stored through the ripening stage. This will allow steady purchasing in greater quantities with relatively little danger of loss from spoiling, and do much to better the present situation, in which purchases are made from day to day as supply or demand may dictate, and in which there are violent fluctuations from no produce at all, of a given sort, to a glutting of the market and consequent loss to the grower.

The strength of the local market is seen in the fact that yams, for instance, which are profitably grown in Panama, are never equal to the demand, as about eight tons of them are imported each week from Jamaica. For sweet potatoes the conditions are similar; about five tons are imported per week, from Barbados.

Other vegetables which are grown locally with profit, but of which there is never a surplus, are tomatoes, string beans, cucumbers, green peppers, eggplant, radishes, both red and white, and the local squash, which is a sort of cross between an American squash and a pumpkin. Of limes, coconuts, mangoes, plantains, and bananas, there is an adequate supply. In the orange season the department uses about 30,000 oranges a week; out of the local season, the oranges are imported, principally from Jamaica. Grapefruit is not grown locally, and in experiments made with it there has been an abnormal development of size and pulpiness, with rather little juice or flavor, but if the right stock and conditions could be worked out, the department could assure a market of 30 barrels, or about 8,000 pieces, per week. Of papayas and aguacates

there are never too many. The locally produced aguacates are said to be growing less satisfactory year by year on account of lack of care, which could be remedied; and of papaya, 1,000 pounds a day could easily be disposed of. Of melones, a sort of canteloupe, though larger and not as piquant in flavor, there are never enough.

Prices can not be fixed and guaranteed, but the department feels that it can assure prices which will make profits for reasonable industry. Examples of present prices are \$2.40 gold per 100 pounds for yams, delivered at Colon, and \$1.55 gold for sweet potatoes, and \$2 gold per 100 pounds for papayas.

Some of the fruits and vegetables, as for instance, tomatoes and watermelons, are produced much more satisfactorily by the use of seed from the United States. For these cases the department is arranging for the local buyer at Panama to furnish the requisite seeds; and at all times the Canal horticulturist will be ready to advise with respect to the cultivation of any of the products.

"Local growers" are not only those living in the environs of Panama or Colon or the Canal Zone but all those who can transport their produce to Panama City within about two days of picking. This makes the market available over a wide area, and if the plans laid down are consistently pursued and responded to the arrangement may contain the seeds of important development within the Republic.

The steamship *Baron Lovat* of the Howarth Shipping Company arrived at Cristobal from New York on her maiden voyage with cargo on Tuesday, July 6, and entered the Canal for transit on Wednesday, July 7. She is carrying oil for Dairen, China.

NAUTICAL TRAINING SCHOOL.

The Work on the "Ranger," in Training Young Men to Become Ships' Officers.

The Massachusetts Nautical Training School ship *Ranger*, which arrived at Cristobal on June 26 on her regular summer practice cruise, cleared on Tuesday, July 6, for Havana. From Havana she will go to Guatemala, proceeding thence up the coast to Boston, where she is due to arrive about October 1.

The *Ranger* has aboard 104 students and a supervisory and instructing staff of eight, headed by a captain on the retired list of the United States Navy, who is assisted by a lieutenant and a chief boatswain from the active list of the Navy, and five experienced officers from the merchant marine, several of whom are graduates of the Massachusetts school. The course of instruction lasts two years of two sessions each, and the students are accordingly divided into four classes, according to the date of their entrance. From October to May the training ship is docked at Boston, and a school of theoretical instruction is carried on aboard, with instruction for six hours daily. For entrance to the course the young men are required to have essentially the preparation necessary for entrance to a high school, but the requirements are not entirely rigid and exceptions may be made in cases of indicated ability and aptness. The studies during the winter are made to supplement the shortages of individuals and to extend their knowledge of arithmetic, grammar, history, geography, etc., as well as to instruct in the more directly technical fields of electricity, steam, wireless operation, seamanship, and navigation. The summer course is entirely practical, putting into practice the

theoretical knowledge attained during the winter session.

Upon graduation, the students are ready to become third mates, if they have specialized in navigation, or to begin as oilers if they have made a specialty of the engineering branch. About two-thirds of them take the navigators' course, and one-third follow the engineering branch. There has been no lack of employment for the graduates, and the commissioners in charge of the school have received more applications from steamship operators for its graduates than they have been able to fill. This has been the case especially since recent enlargements of the American merchant marine.

The school was founded in 1891, and is now on its twenty-fifth year. It has been supported entirely by the State of Massachusetts, and the students must be residents of that State. Among the 104 present students, there are citizens of 57 different cities and towns of the State, the enrollment being by no means confined to the seacoast places. According to the records kept by the commissioners, approximately 76 per cent of the graduates of the school have kept to the sea. There is no tuition charge. The school is filled to its capacity and has a waiting list of about 30 young men who have passed the entrance examinations.

The Massachusetts school and the New York school, the training ship for which, the *Newport*, passed through the Canal on May 30, are the only ones of their sort maintained in the United States. That formerly maintained by the State of Pennsylvania has been abandoned, though there has recently been talk of reinstating it.

Captain P. W. Hourigan, U. S. N., retired, who is in command of the *Ranger*, has expressed his appreciation of the courtesies shown the school by the officials of the Canal and by the local representative of the United States Steel Products Company, in giving the men opportunity to see the Canal and observe something of its operation.

Fourth of July Celebration.

The Independence Day celebration of the Canal employes held at Balboa on Monday, July 5, was attended by a total estimated at about 5,000 people during all parts of the day and the various exercises passed off smoothly and with general enjoyment. The address of the day was delivered by Major Herbert A. White, Jr., and the Declaration of Independence was read by Mr. F. G. Swanson. The weather was clear throughout the greater part of the day, but rain in the evening, which did not interfere with the pyrotechnic display, made it necessary to abandon the outdoor dance. The dance was held later in two sections, at the Canal clubhouse at Balboa and at the Hotel Tivoli.

Stages of the Chagres River, Gatun Lake, and Miraflores Lake.

WEATHER CONDITIONS, CANAL ZONE, JUNE, 1915.

The rainfall for the month was above the station averages at five stations and deficient at thirteen stations. Over the Atlantic section, considered as a whole, the rainfall was slightly above the normal; over the Central section, generally below normal; while over the Pacific section, the deficiency was well marked, the rainfall at Balboa and Balboa Heights being the lowest on record for a period of 19 and 18 years, respectively. Monthly totals ranged from 2.37 inches at Balboa to 16.48 inches at Brazos Brook. The maximum amount of precipitation recorded on any one day was 4.04 inches at Brazos Brook on June 8, this being the only station having a daily rain in excess of four inches.

Rainfall occurred generally throughout the Zone on the 1st, 5th, 10th, 12th, 15th, 17th, 20th, 26th, 28th, 29th, and 30th of the month, and heavy showers were reported on these dates at many of the stations.

The estimated rainfall over the Chagres River basin was four per cent above the average, or 12.55 inches, against a 15-year average of 12.11 inches.

The average air temperature was above normal on both coasts, the daily excess being approximately one degree Fahrenheit. The atmospheric pressure and relative humidity were slightly below normal, while the daytime cloudiness, wind movement, temperature of the sea water, and evaporation were above normal at both coast stations.

No fogs were observed during the month at either coast station, but several night and early morning fogs occurred at interior stations, 23 per cent of which were dissipated by 6.30 a. m., 86 per cent by 7.30 a. m., and all fogs lifted or were dissipated by 8.30 a. m.

The elevation of Gatun Lake, in feet above mean sealevel, may be summarized as follows: Mean for the month, 85.44; maximum, on the 30th, 85.96; minimum, on the 20th and 21st, 85.35; evaporation from the lake surface, 5.040 inches.

The following is a summary of the climatological conditions during the month of June:

STATION.	Press re (reduced to mean of 24 hours.)	Temperature.					Mean relative humidity.	Precipitation			Wind.			Date.

PERMANENT SHORE DIKES.

Completed Dikes and Groins on South Shore of Limon Bay Have Arrested Erosion.

The construction of the three permanent shore dikes on the south shore of Limon Bay, with the center one about a quarter of a mile west of the center line of the Canal where it passes from the bay into the hills at Mindi, has been completed, and the construction of 25 timber groins, which shall supplement the effect of the dikes in the prevention of erosion of the shore and consequent heavy silting in the Canal channel, will be completed within about a week.

A summary of the plans for the dikes, with a resumé of the observations and experiments with temporary timber dikes which led to the decision to build the permanent structures, was published in THE CANAL RECORD of October 21, 1914. Their construction was started in the early part of November, and completed on April 20. The general plans were carried out, with modifications, and the erection of the groins was begun after the completion of the dikes.

As completed, the three dikes are spaced 500 feet apart, center line to center line, and all are built parallel to the axis of the Canal. This makes them extend due north and south and lie practically at right angles to the original shore line. The dike nearest the Canal is

be handled by hand in the construction of the dike. The rock was loaded in solid bottom barges formerly used in the Porto Bello rock service, and towed through the Canal to the shore of the bay, at the site of construction. Here it was unloaded into Decanville cars, which were lifted out by a derrick and swung into the trucks, running on a narrow-gage track on the landing wharf. The track led to the sites of the dikes and was extended as filling advanced.

The groins which are to act as auxiliaries to the dikes in protecting the shore are heavy timber fences, built out at right angles to the shore line, and are, in effect, miniature dikes. Each reaches about a foot above high water and extends from the high water line to the low water line. As the contour varies, their length is not constant, but the fences average about 100 feet in length. Twenty-two of the groins were built along the shore to the westward of the dikes, on the other side from the Canal. They are spaced 400 feet apart, and reach from the dikes along the south shore of the bay and up the west shore to a low headland called Kinney's Bluff, within the lee of Limon Point. In addition to these 22 groins, two have been built in the two spaces between dikes, and one has been built between the first dike and the edge of the Canal.

As the erosive effect of currents along the south shore of the bay is greatest during the

ward and deposited a great deal of silt in the Canal channel. How extensive the diminution of silting will be can not be foretold, but the dikes are at least serving their fundamental purpose of arresting the erosion and recession of the south shore.

Concerning Rent.

The following letter is published by direction of the Secretary of War:

WAR DEPARTMENT,
WASHINGTON, D. C.,
June 17, 1915.

HAMILTON FOLEY, ESQ.,
Editor, *Panama News Letter*,
Hotel Tivoli,
Ancon, Canal Zone.

My dear Sir:

I am in receipt of your letter of June 5th. There is one matter adverted to therein which I desire to take this opportunity to clear up by a perfectly plain statement of the facts. I refer to the matter of rent of buildings occupied by Panama Canal Zone employes.

This matter, as you must know, was complicated by almost diverse legislative provisions—certainly by diverse legislative intentions. Upon considering all the facts, and aided as I was in my consideration by the kindly help of Secretary Wilson of the Department of Labor, I reached the conclusion that the nearest that I could come to carrying out the intention of Congress and doing the just and fair thing all around was to suspend the requirement of the payment of rent until the finishing of the construction of the Canal, not later than June 30, 1916. (You will recall that this was made the subject of a special provision in the Urgent Deficiency Act approved April 6, 1914.) This course was recommended to and adopted by the President.

With respect to the future, all that I said was that rent would have to be paid in accordance with the Executive Order, now suspended as above stated, so soon as the Canal was completed, provided that in any event payments must begin on and after June 30, 1916. I of course expressed no views as to what Congress might or might not do in the premises. I gave no advice to the men who visited me as to what course they should pursue in the premises. What I did state was that under existing legislation, it was plain that the furthest period that the Executive could deal with the matter was June 30, 1916, and that after that, rent, under existing legislation, would have to be collected.

I thank you for the opportunity to straighten out any misunderstanding that may exist with respect to this subject matter.

Sincerely yours,
LINDLEY M. GARRISON,
Secretary of War.

Family Quarters.

Applications for married quarters on file on June 30, 1915, were as follows:

NOTE—The figures in parentheses show the number of applicants already occupying regular or non-house-keeping family quarters at stations other than those at which applications are filed.

MAP SHOWING AREA OF CONSTRUCTION OF SHORE DIKES IN LIMON BAY.

(Dikes are directly west of range light No. 2, and groins are built as far Limon Point.)

800 feet from the center line. This one is also the longest, being 700 feet in length, while the center dike is 400 feet long and the third one is 200 feet in length. Each dike is about eight feet wide at the top, which is approximately two feet mean sealevel, and the sides slope about one in one. Altogether, about 8,000 cubic yards of rock were used in their construction.

The rock was obtained from Gaillard Cut, in the slide at La Pita Point. The material was a hard rock and it was well broken up in excavation, so that most of the pieces could

dry season, under the southward driving of the trade wind, and the dikes and groins have been completed only since the close of the last dry season, they have not been subjected to a complete test. Their usefulness, however, was made apparent by the experimental timber dikes, and already the shore line, instead of continuing to recede, as heretofore, has been advancing slightly. This is due to the dropping of silt in suspension when the currents are arrested by the dikes and groins, and deflected back to the northward. In the original state, the currents swung to the east-

OFFICIAL CIRCULARS.

Prohibiting from Mail, Matter Pertaining to Lotteries and Similar Enterprises.

THE PANAMA CANAL, EXECUTIVE OFFICE, BALBOA HEIGHTS, C. Z., June 25, 1915.

CIRCULAR No. 697-1: 1. Section 482 of the United States Postal Laws and Regulations, edition of 1913, which section is effective in the Canal Zone, prohibits the use of the mails for the purpose of transmitting lottery tickets or anything in any way pertaining to any lottery, gift enterprise, or similar scheme of offering prizes dependent in whole or in part upon lot or chance. 2. The penalty for violation is a fine of not more than \$1,000, or imprisonment for not more than two years, or both; and for any subsequent offense imprisonment for not more than five years. 3. All patrons of the Canal Zone postal service are warned against the violation of the above-mentioned section of the United States Postal Laws and Regulations.

CHESTER HARDING, Acting Governor.

Operation and Maintenance of Docks at Balboa. THE PANAMA RAILROAD COMPANY, OFFICE OF SUPERINTENDENT, BALBOA HEIGHTS, C. Z., June 26, 1915.

To all concerned—Upon completion of the concrete docks at Balboa, they will be turned over to the Panama Railroad Company for operation and maintenance. The Panama railroad will bill The Panama Canal for all repair work, both to the superstructure and the substructure of these docks, including repairs to fender piles, etc.

The Panama Canal will receive all revenues derived from wharfage.

The Panama railroad will assume the expense of the sweeping of the docks and of clearing and keeping cleaned out of all flangeways along the rails.

The Panama railroad will collect revenue for stevedoring and storage.

On July 1, 1915, dock No. 15 will be transferred to The Panama Canal in order that expense of upkeep and maintenance will be apportioned in the same manner as those for other docks.

C. H. MOTSETT, Superintendent.

Approved: CHESTER HARDING, Second Vice-president.

Billing of Shipments of Household Goods.

THE PANAMA RAILROAD COMPANY, OFFICE OF SUPERINTENDENT, BALBOA HEIGHTS, C. Z., July 1, 1915.

CIRCULAR No. 108: To all concerned—It has heretofore been the practice for employes of the Panama railroad and Panama Canal to bill shipments of household goods and personal effects to Balboa storehouse, Balboa Heights, and Panama.

Effective at once all employes' shipments will be handled and billed to and from our freight house in Panama, where shipments should be delivered and delivery taken for incoming shipments of employes.

Please be governed accordingly.

C. H. MOTSETT, Superintendent.

Acting Captain of the Port, Balboa.

THE PANAMA CANAL, EXECUTIVE OFFICE, BALBOA HEIGHTS, C. Z., June 28, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS: Effective this date, Lieut. A. B. Reed, U. S. N., is appointed Acting Captain of the Port, Balboa, C. Z., in the absence of the Captain of the Port, Commander H. V. Butler, U. S. N.

CHESTER HARDING, Acting Governor.

Sailing of the "Cristobal."

THE PANAMA RAILROAD COMPANY, OFFICE OF SUPERINTENDENT, BALBOA HEIGHTS, C. Z., July 1, 1915.

CIRCULAR No. 104: To all concerned—The sailing of the steamship Cristobal has been set for 3 p. m., Wednesday, July 7, from pier No. 8, Cristobal.

C. H. MOTSETT, Superintendent.

Accountable Official.

THE PANAMA CANAL, OFFICE OF THE AUDITOR, BALBOA HEIGHTS, C. Z., June 30, 1915.

CIRCULAR No. 96: Effective July 1, 1915, Mr. O. M. Ewing, medical

storekeeper, is designated an accountable official of The Panama Canal, vice Mr. John J. Moran, and as such will account for all medical storehouse stock. Mr. Moran will cease to be an accountable official upon effecting a transfer of his accountability.

H. A. A. SMITH, Auditor, The Panama Canal.

Approved: CHESTER HARDING, Acting Governor.

Act of Congress.

THE PANAMA CANAL, EXECUTIVE OFFICE, BALBOA HEIGHTS, C. Z., March 22, 1915.

CIRCULAR No. 600-14: The extracts from an Act of Congress quoted below are published for the information of all concerned.

GEO. W. GOETHALS, Governor.

AN ACT making appropriations for sundry civil expenses of the Government for the fiscal year ending June 30, 1916, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending June 30, 1916, namely:

Table with columns of asterisks representing budget allocations for War Department and National Cemeteries.

Disposition of remains of officers, soldiers, civilian employes, and so forth: For interment, or preparation and transportation to their homes or to such national cemeteries as may be designated by proper authority, in the discretion of the Secretary of War, of the remains of officers, including acting assistant surgeons, and enlisted men of the Army active list; interment, or preparation and transportation to their homes of the remains of civil employes of the Army in the employ of the War Department who died abroad, in Alaska in the Canal Zone, or on Army transports, or who die while on duty in the field or at military posts within the limits of the United States; interment of military prisoners who die at military posts; removal of remains from abandoned posts to permanent military posts or national cemeteries, including the remains of Federal soldiers, sailors, or marines, interred in fields or abandoned private and city cemeteries; and in any case where the expenses of burial or shipment of the remains of officers or enlisted men of the Army who die on the Active list are borne by individuals, where such expenses would have been lawful claims against the Government, reimbursement to such individuals may be made of the amount allowed by the Government for such services out of this sum, but no reimbursement shall be made of such expenses incurred prior to July 1, 1910, \$57,500.

Table with columns of asterisks representing budget allocations for Department of Commerce and Coast and Geodetic Survey.

Field expenses: For surveys and necessary resurveys of the Atlantic and Gulf coasts of the United States, including the coasts of outlying islands under the jurisdiction of the United States; Provided, That not more than \$25,000 of this amount shall be expended on the coast of said outlying islands, and the Atlantic entrance to the Panama Canal, \$65,000.

THE PANAMA CANAL.

For every expenditure requisite for and incident to the construction, maintenance and operation, sanitation, and civil government of The Panama Canal and Canal Zone, including the following: Compensation of all officials and employes; foreign and domestic newspapers and periodicals; law books not exceeding \$500, text books and books of reference; printing and binding, including printing of annual reports, rents, and personal services in the District of Columbia; purchase or exchange of typewriting, adding, and other machines; purchase or exchange, maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles; claims for damages to vessels passing through the locks of the Panama Canal, as authorized by the Panama Canal Act; claims for losses of or damages to property arising from the conduct of authorized business operations; claims for damages caused to owners of private lands or private property of any kind by reason of the grants contained in the Treaty between the United States and the Republic of Panama, proclaimed February 26, 1904, or by reason of the operations of the United States, its agents or employes, or by reason of the construction, maintenance, operation, sanitation, and protection of

the said canal or of the work of sanitation and protection therein provided for, whether such claims are compromised by agreement between the claimants and the Governor of The Panama Canal or allowed by a joint land commission; acquisition of land and land under water, as authorized in the Panama Canal Act; expenses incurred in assembling, assorting, storing, repairing, and selling material, machinery, and equipment heretofore or hereafter purchased or acquired for the construction of the Panama Canal which are unserviceable or no longer needed, to be reimbursed from the proceeds of such sales; expenses incident to conducting hearings and examining estimates for appropriations on the Isthmus; expenses incident to any emergency arising because of calamity by flood, fire, pestilence, or like character not foreseen or otherwise provided for herein; per diem allowance in lieu of subsistence when prescribed by the Governor of The Panama Canal, to persons engaged in field work or traveling on official business, pursuant to section 13 of the sundry civil appropriation Act approved August 1, 1914, and for such other expenses not in the United States as the Governor of The Panama Canal may deem necessary to best promote the construction, maintenance and operation, sanitation, and civil government of The Panama Canal, all to be expended under the direction of the Governor of The Panama Canal and accounted for as follows:

For continuing the construction and equipment of the Panama Canal, including \$1,000 additional compensation to the Auditor for the War Department for extra services in auditing accounts for The Panama Canal, and not exceeding \$40,000 for establishing two lights on the Pacific coast, necessary as aids to navigation near the Pacific entrance to the Panama Canal, one at Bona Island and one at Cape Mala, said lights to be established and maintained as a part of the lighting system of the Panama Canal, \$10,500,000;

For maintenance and operation of the Panama Canal, salary of the Governor, \$10,000; purchase, inspection, delivery, handling, and storing of material, supplies, and equipment for issue to all departments of The Panama Canal, the Panama railroad, other branches of the United States Government, and for authorized sales, \$5,200,000, together with all moneys arising from the conduct of business operations authorized by the Panama Canal Act:

For sanitation, quarantine, hospitals, and medical aid and support of the insane and of lepers, and aid and support of indigent persons legally within the Canal Zone, including expenses of their deportation when practicable, \$700,000;

For civil government of The Panama Canal and Canal Zone, salaries of district judge, \$6,000, district attorney, \$5,000, marshal, \$5,000, and for gratuities and necessary clothing for indigent discharged prisoners, \$540,000;

In all, \$16,940,000, the same to be immediately available and to continue available until expended; Provided, That all expenditures from the appropriations heretofore, herein, and hereafter made for the construction of the Panama Canal, including any portion of such appropriations which may be used for the construction of dry docks, repair shops, yards, docks, wharves, warehouses, storehouses, and other necessary facilities and appurtenances, for the purpose of providing coal and other materials, labor, repairs, and supplies, for the construction of office buildings and quarters, and other necessary buildings, exclusive of fortifications and colliers, and exclusive of the amount used for operating and maintaining the canal, and exclusive of the amount expended for sanitation and civil government after January 1, 1915, may be paid from or reimbursed to the Treasury of the United States out of the proceeds of the sale of bonds authorized in section eight of the said Act approved June 28, 1902, and section 39 of the tariff Act approved August 5, 1909.

Except in cases of emergency, or conditions arising subsequent to and unforeseen at the time of submitting the annual estimates to Congress, and except for those employed in connection with the construction of permanent quarters, offices, and other necessary buildings, dry docks, repair shops, yards, docks, wharves, warehouses, and other necessary facilities and appurtenances for the purpose of providing coal and other materials, labor, repairs, and supplies, and except for the permanent operating organization under which the compensation of the various positions is limited by section four of the Panama Canal Act, there shall not be employed at any time during the fiscal year 1916 under any of the foregoing appropriations for the Panama Canal, any greater number of persons than are specified in the notes submitted respectively in connection with the estimates for each of said appropriations in the annual Book of Estimates for said year, nor shall there be paid to any such person during that fiscal year any greater rate of compensation than was authorized to be paid to persons occupying the same or like positions on the first day of July, 1914; and all em-

ployments made or compensation increased because of emergencies or conditions so arising shall be specifically set forth, with the reasons therefor, by the governor in his report for the fiscal year 1916.

In addition to the foregoing sums there is appropriated, for the fiscal year 1916, for expenditure and reinvestment under the several heads of appropriation aforesaid without being covered into the Treasury of the United States, all moneys received by The Panama Canal from services rendered or materials and supplies furnished to the United States, the Panama Railroad Company, the Canal Zone Government, or to their employes, respectively, or to the Panama Government; from hotel and hospital supplies and services; from rentals, wharfage, and like services; from labor, materials, and supplies and other services furnished to vessels other than those passing through the Canal, and to others unable to obtain the same elsewhere; from the sale of scrap and other by-products of manufacturing and shop operations; from the sale of obsolete and un-serviceable material, supplies, and equipment purchased or acquired for the operation, maintenance, protection, sanitation, and government of the canal and Canal Zone; and any net profits accruing from such business to The Panama Canal shall annually be covered into the Treasury of the United States.

In addition there is appropriated for the operation, maintenance, and extension of waterworks, sewers, and pavements in the cities of Panama and Colon, during the fiscal year 1916, the necessary portions of such sums as shall be paid as water rentals or directly by the Government of Panama for such expenses.

FORTIFICATIONS, PANAMA CANAL.

For fortifications and armament thereof for the Panama Canal, to be immediately available and to continue to be available until expended, namely:

Electric light and power plants: For the purchase and installation of electric light and power plants for the seacoast fortifications on the Canal Zone, \$3,081.

Searchlights: For the purchase and installation of searchlights for the seacoast fortifications on the Canal Zone, \$79,666.

Clearings and trails: For maintenance of clearings and trails, \$45,000.

For protection, preservation, and repair of the fortifications of the Panama Canal, including structures erected for torpedo defense, and for maintaining channels for access to torpedo wharves, \$15,000.

For maintenance and repair of searchlights and electric light and power equipment for the fortifications of the Panama Canal, and for tools, electrical and other supplies, and appliances to be used in their operation, \$7,500.

For reserve equipment for the fortifications of the Panama Canal, \$50,000.

Where the expenses of persons engaged in field work or traveling on official business are chargeable to appropriations herein for fortifications or other works of defense for the Panama Canal a per diem may be allowed in lieu of subsistence, pursuant to section 13 of the sundry civil appropriation Act for the fiscal year 1915.

For the purchase, manufacture, and test of ammunition for seacoast and land defence cannon, including the necessary experiments in connection therewith, and the machinery necessary for its manufacture at the arsenals, \$733,000.

Provided, That if, in the opinion of the Secretary of War, it should be to the best interests of the United States, not to exceed \$50,000 of the foregoing appropriations may be expended for the erection of a building at the Watertown Arsenal for the installation of machinery to be used in the manufacture of projectiles.

For the alteration, maintenance, and installation of the seacoast artillery, including the purchase and manufacture of machinery, tools, and materials necessary for the work, and expenses of civilian mechanics, and extra-duty pay of enlisted men engaged thereon, \$30,000.

For alteration, maintenance, and repair of submarine mine matériel, \$2,500;

Fire control: For the construction of fire-control stations and the purchase and installation of accessories therefor, \$383,301.30;

For continuing the construction on the Panama Canal Zone barracks, quarters, storehouses, and other buildings necessary for accommodating the mobile army and Coast Artillery troops to be stationed there, including water, sewer, and lighting systems, roads, walks, and so forth, and for repairing and remodeling existing buildings to render them suitable for sheltering troops, \$1,290,000;

In all, specifically for fortifications and armament thereof for the Panama Canal, \$2,639,048.30.

Sec. 2. No part of the money appropriated by this Act shall be used for payment of salaries or expenses of the Joint Land Commission, established under article 15 of the Treaty between the United States and the Republic of Panama, in adjudicating or settling any claim originating under any lease or contract for occupancy, made by the Panama Railroad Company in the Canal Zone, or for the payment of any awards made by said commission on account of any such claims.

Sec. 3. That in prescribing regulations under the provisions of section five of the sundry civil Act of August 1, 1914, the President shall provide that in lieu of furnishing to the Auditor individual detail collection vouchers, not provided for in said regulations, two competent persons, one from the office of the Auditor for the War Department, designated by the Auditor, and one from the office of the Comptroller of the Treasury, designated by the Comptroller, shall be sent semi-annually, at such time as may be designated by the comptroller, to the Canal Zone to examine the accounts and vouchers and verify the submitted schedules of collections and report in triplicate to the Auditor for the War Department, the Comptroller of the Treasury, and the Auditor of The Panama Canal; and such persons shall make other examinations into the accounts of The Panama Canal as may be directed by the Comptroller, and for all such purposes they shall have access to all records and papers pertaining thereto. Such examination and inspection shall be made for the period covered by the persons designated as soon as practicable, and the report of such persons shall be promptly filed. Such persons shall be furnished their transportation going and returning, including meals, and be paid a per diem of \$4 from the day of sailing from the United States until return thereto, both days inclusive, in lieu of subsistence on the Isthmus and all other expenses, out of such appropriation for the Panama Canal as may be designated by the Governor.

Sec. 4. That appropriations herein for printing and binding shall not be used for any annual report or the accompanying documents unless the copy therefor is furnished to the Public Printer in the following manner: Copies of the documents accompanying such annual reports on or before the 15th day of October of each year; and complete revised proofs of the accompanying documents and the annual reports on the 10th and 12th days of November of each year, respectively. The provisions of this section shall not apply to the annual reports of the Smithsonian Institution, the Commissioner of Patents, or the Comptroller of the Currency.

Sec. 5. That no part of any money appropriated by this Act shall be used during the fiscal year 1916 for the purchase of any typewriting machine at a price in excess of the lowest price paid by the Government of the United States for the same make and substantially the same model of machine during the period of the fiscal years 1913 and 1914; such price shall include the value of any typewriting machine or machines in exchange but shall not apply to special prices granted on typewriting machines used in schools of the District of Columbia or of the Indian Service.

Sec. 6. That all sums appropriated by this Act for salaries of officers and employes of the Government shall be in full for such salaries for the fiscal year 1916, and all laws, or parts of laws to the extent they are in conflict with the provisions of this Act are repealed.

Approved, March 3, 1915.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 303, on Wednesday, July 14, 1915, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the captain of the port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the captain of the port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

For the benefit of applicants residing in Gatun and Cristobal or Colon, examinations for licenses as navigators of motor boats, and as chauffeurs, will be held at the office of the captain of the port of Cristobal on Friday, July 16, 1915, beginning at 9 a. m. Applicants should be provided with motor boats or automobiles for the demonstration test.

By direction of the chairman of the board.

F. M. NIXON,

Recorder, Board of Local Inspectors.

COMMISSARY DEPARTMENT.

Articles Lost in Commissary Stores.

The acting storekeeper of the Ancon commissary has posted a notice near the entrance to the store, stating that numbers of articles, most notably umbrellas, have been left in the store by patrons and turned in at the office by the employes, and should be claimed.

In all the stores the employes have been directed to turn in such lost and found articles at the office. Patrons are requested to remember this and to make inquiry immediately for articles presumably lost in the stores.

Yamatoya Shirts.

The Depot Commissary has received a catalogue and samples of material from the Yamatoya Shirt Company, No. 6 Bentondori, Yokohama, makers of shirts to individual order. The materials are silk, pongee, and crepe, in about 100 variations, and the shirts are listed at 27.60 yen (\$13.80) per dozen, up. The catalogue and samples will be retained in the office of the Depot Commissary, Cristobal, where orders may be placed at the catalogue prices, with the addition of the regular surcharge on shirts.

Improving Ventilation at Ancon Commissary.

Changes are being made in the building of the Ancon commissary store to increase the ventilation. The original monitor in the center of the roof is to be fitted with three superimposed monitors, two over the store proper and one over the warehouse, and a hole is to be cut in the upper part of the wall separating the two divisions. It is believed that these changes will considerably augment both ventilation and illumination.

Commissary Hours.

The commissary stores at Las Cascadas, Empire, and Culebra are open from 7.30 to 11.30 a. m., and 1.30 to 5.30 p. m.

The commissary store at Balboa is open from 8 a. m. to 12.30 p. m., and 2.30 to 6 p. m.

All other commissary stores are open from 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m. on Saturdays and other sailing days of Panama railroad vessels.

Cold Storage Prices.

These prices are increased by 10 per cent for sales to commercial and foreign naval vessels, and by 20 per cent for sales to yachts.

The following is a list of retail prices of cold storage provisions which will be effective July 8, 1915:

FRESH MEATS.

No changes since publication last week except rise of price of ox tails to 13 cents per pound.

Ham—Real York and Cumberland, per pound	43
Genuine Westphalia, per pound	50

SHIPPING INFORMATION.

the statement of each vessel's expenses for each passage is sent in all cases.

CHARGES FOR TOLLS.

Tolls on loaded commercial vessels are charged at \$1.20 per net vessel ton—each 100 cubic feet of actual earning capacity—the net tonnage being determined by the rules for the measurement of vessels for the Panama Canal. Deck load is charged for in addition, at \$1.20 per 100 cubic feet of space occupied by deck load.

On vessels in ballast the toll charge is 72 cents per net vessel ton, Panama Canal rules of measurement.

These basic charges have been modified, however, by the ruling that loaded vessels shall not pay more than the equivalent of \$1.25 per net ton as determined by the rules of measurement for United States registry; and ballast vessels shall not pay less than 75 cents per net ton, United States registry measurement.

Hence, vessels coming to the Canal for passage should have certificates of measurement according to the Panama Canal rules and also according to the rules of United States registry. These certificates can be issued at the ports of entry to the Canal but this might cause several days' delay to a vessel.

CHARGES FOR SERVICES.

There is no charge for pilotage on vessels passing through the Canal which do not stop at either terminal port to discharge or take on passengers or cargo. Also there is no charge when they stop at terminal ports for the purpose of taking on coal, supplies, etc. Pilotage charges when levied are port charges and not a part of the expenses of passing through the Canal.

The only additional expenses to which a vessel may be put for Canal transit proper would be for services rendered necessary by the condition of the ship. Such are charges for furnishing extra men on deck to handle the lines in passing through the locks, when the ship's crew is not sufficient; and tug service for sailing vessels or steamships in condition requiring assistance. Under such conditions the tug charge is \$15 per hour; or for complete transit of the Canal, 10 cents per net Canal ton or four cents per displacement ton, with a minimum charge of \$150.

PANAMA RAILROAD COMPANY.

On account of the close relationship of the Panama Railroad Company (operating the Panama Railroad Steamship Line) to The Panama Canal the former can very advantageously act as agent for other steamship lines if desired. Upon regular request it will advance funds for payment of tolls, fuel, supplies, and attend to stevedoring, etc. The services of the company may be engaged by addressing its home office, 24 State Street, New York City, or the Superintendent, Balboa Heights, Canal Zone.

FUEL.

Coal is supplied to vessels at both terminal ports, at the rate of between 400 and 700 tons a day. The facilities are being improved. The present prices for delivery from lighters, trimmed in bunkers, are \$5.40 per ton, when handled by ship's gear, at Cristobal; and at Balboa, \$6.40. These prices will advance to \$6 and \$7, respectively, on September 1, 1915. The coal is Pocahontas standard.

Fuel oil may be obtained at either terminal

Concise Statement on Points of Primary Interest to Users of the Canal.

In order to spread as widely as possible this information of primary importance to users of the Panama Canal, there are published below concise statements on points of most immediate concern to them. More extensive information than may be published here may be obtained from the "Sailing Directions and General Information" issued by The Panama Canal. This is a booklet of 115 pages, thoroughly explicit and carefully indexed, in which are covered all matters involved in handling vessels through the Canal. Copies of this booklet are in the hands of United States consular officers all over the world, and in the offices of the collectors of customs at United States ports, or at United States branch hydrographic offices, and have been furnished to the principal governmental and commercial maritime agencies over the world. Copies may be obtained on application to The Panama Canal, Washington, D. C., or Balboa Heights, C. Z.

PAYMENT OF TOLLS AND OTHER CHARGES.

It is necessary to place funds on deposit to cover the tolls of a vessel before she will be allowed to enter the Canal. This deposit may be placed with any Assistant Treasurer of the United States (one of whom is situated at any of the larger United States ports); or with the Assistant Auditor of The Panama Canal in Washington, D. C.; or with the Collector of The Panama Canal, Balboa Heights. The Assistant Treasurer method seems to be the most convenient for operators, as it is the one most generally used.

In case deposit is made in the United States it is advisable to request at the time of making deposit that cable advice of same be sent to the Canal, in order that there may be no delay to a vessel when she presents herself for passage.

Foreign operators may handle such depositing with equal simplicity, by directing their bankers or shipping agents to have the deposit placed with the Assistant Treasurer in New York or San Francisco, for instance.

The Canal organization has been developed to handle the passage of vessels complete and to attend to their needs in the way of tolls, coal, supplies, cables, mail, etc., without delay or "red tape" and there is no need for operators to employ local agents for vessels which come to the Canal for the sole purpose of passing through it, without taking on or discharging freight or passengers in Canal waters. In fact the interposition of a third party in the arrangements for a vessel which is simply passing through the Canal is liable to result in confusion and delay. In other words, a local agent may be needed for commercial purposes, in looking after cargo and passengers if vessels handle either at the terminal ports; but he is not needed to look after the requirements of the ship herself as far as going through the Canal, communicating, taking on supplies, coal, etc., are concerned.

REFUNDING BALANCE.

As soon as a vessel has cleared from the Canal a statement of her expenses is forwarded to her operator, with a check on the Treasurer of the United States for the balance of the deposit. In the case of lines having frequent passages through the Canal it is permissible to allow such balance to apply on account, but

Mallard ducks, 2 to 2½ pounds, each	2.35
Pheasants, each	1.35

VEGETABLES.

Beans, string, per pound	4
Beets, per pound	3
Cabbage, per pound	†2
Carrots, per pound	*3
Cucumbers, per pound	4
Egg plant, per pound	7
Lettuce, per pound	5
Onions, per pound	2½
Peppers, green, per pound	11
Plantains, per dozen	15
Potatoes, white, per pound	2
Sweet, per pound	2
Rhubarb, per pound	2½
Squash, per pound	†4
Tomatoes, per pound	†5
Turnips, per pound	3½
Yams, Lucea, per pound	*3

FRUITS.

Apples, per pound	10
Grape fruit—Select, each	†6
Tropical, each	3
Lemons, per dozen	†9
Limes, per 100	40
Oranges—Select, each	3
Tropical, per dozen	12
Coconuts, each	4
Bananas, per bunch	38
Bananas, each	½
Apples, evaporated, per pound	12
Apricots, evaporated, per pound	12
Pears, evaporated, per pound	23
Pineapples, each	†10
Figs, dried, 12-oz. packages	14
Figs, dried, 5-oz. packages	5
Raisins, seedless, package	11
table, cluster, per pound	20
Currants, cleaned, package	12
Prunes, stewing, per pound	12
Cherries, per pound	27
Cantaloupes, each
Watermelons, each
Plums, per pound
Peaches, per pound

* Indicates advance from preceding list.
 **† Indicates five cents allowed for return of bottle.
 † Indicates reduction from preceding list.
 ‡ Sold only from commissaries, no orders taken for delivery.
 § Not less than ½ ham or ½ shoulder of fresh pork will be sold.

Price Changes.

The following changes in prices of articles in stock at the commissary stores became effective July 6:

ARTICLE.	PRICE CHANGE.	
	Old.	New.
Hammocks, ea.	2 80	3 00
Bedspreads, ea.	95	75
Towels, linen, ea.	23	26
Thimbles, ea.	02	01
Undershirts, ea.	33	29
Mattresses, ea.	4 60	5 25
Scissors, 7", pr.	29	44
Pans, muffin, ea.	23	27
Pans, fry, ea.	16	12
Buckets, ea.	26	30
Boards, pastry, ea.	48	44
Coolers, water, ea.	2 48	2 40
Trunks, ea.	4 05	4 35

from plants of The Panama Canal or from private corporations, at the rate of about 1,600 barrels an hour. The price from The Panama Canal is \$1.25 per barrel of 42 gallons, sold as dry oil at the local temperature, with subtraction of the amount of water contained, as shown by analysis. Prices from the corporations may be obtained on application to them.

Diesel engine oil is for sale by several corporations, one of which quotes a general price of 45 shillings per ton of seven barrels.

SUPPLIES.

Supplies in unlimited quantities, including meats, cold storage products, groceries, fruits, vegetables, etc., as well as ships' supplies—lubricants, cordage, ships' chandlery, standard articles for ships' use—can be purchased from The Panama Canal in either of the terminal ports and delivery can be made on short notice. By Governmental regulation these goods are sold at fixed prices very slightly above cost.

Ice is furnished for 30 cents per 100 pounds at Cristobal and 35 cents per 100 pounds at Balboa.

Laundry is handled quickly and no advance notice is required.

Repairs to vessels may be made to any extent, except where the use of a large dry dock is required or the turning of the largest crank shafts or longest line shafts.

Ships are boarded by a boarding officer immediately on arrival. He furnishes price lists and takes orders for all kinds of supplies or fuel. Any supplementary orders or requests for any kind of services may be sent to the Captain of the Port, communication with whom is always easy.

The Captain of the Port of entry is the local executive with whom, or his authorized immediate representatives, the master of a vessel coming into the Canal will have dealings. His office is the clearing house for all business with the ships, and is the local marine headquarters. It gives out chronometer comparisons, nautical information as to charts, sailing directions, etc., delivers and receives mail, and has supervision over the delivery of coal, supplies, etc., to vessels.

COMMUNICATIONS.

While by no means necessary it is advantageous if vessels can advise in advance when they will arrive, by mail, cable, or radio. Mail is received five times a week from the United States, and approximately a week after posting. The Canal is equipped with three radio stations, two for areas within 1,000 miles of the terminal ports and one which has a sending radius of approximately 3,000 miles.

Communications should be addressed to The Panama Canal, Balboa Heights, Canal Zone. The cable address of the Canal on the Isthmus is Pan Canal, Panama; of the Washington office, Pan Canal, Washington. Codes used are A. B. C. Telegraphic, 5th edition; Lieber's; Scott's Shipowners' Telegraphic (1906); Western Union Telegraphic (Universal Edition), etc.

Shipping people are invited to remember that the fundamental purpose of the Canal is to pass ships between the two oceans quickly. They are invited, accordingly, to make any suggestions by which this purpose may be even more completely realized, and to make inquiries for additional information.

Tide Predictions.

Panama (Balboa) tide predictions for the next five weeks are given in this table:

JULY.				
DATE.	Time and height of high and low water.			
Thurs., July 8.....	0:50 11.1	6:37 4.5	13:00 11.9	19:15 3.5

Thurs., Aug. 5.....	4:54 5.0	11:08 11.2	17:37 4.3
Fri., Aug. 6.....	0:05 10.5	5:58 5.1	12:20 11.2	18:40 4.1
Sat., Aug. 7.....	1:16 10.9	7:03 4.8	13:23 11.6	19:37 3.5
Sun., Aug. 8.....	2:10 11.6	7:58 4.2	14:15 12.3	20:25 2.7
Mon., Aug. 9.....	2:53 12.4	8:44 3.4	14:57 13.1	21:08 1.9
Tues., Aug. 10.....	3:29 13.3	9:26 2.5	15:35 13.8	21:46 1.1
Wed., Aug. 11.....	4:04 14.2	10:05 1.6	16:12 14.4	22:22 0.5

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from Oh (midnight) to 23h (11 p. m.). All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3.47 p. m.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:
Every Thursday to New Orleans for all States. Due at New Orleans on the following Tuesday.
Every Saturday to New York, for all States. Due at New York the following Friday, with the exception of the Advance, which is due there on Saturday.

Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.*

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

NOTE.—The sailings on Monday, July 26, and August 23, will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7.10 a. m., connects with the despatches for the two sailings mentioned above.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., July 7, 1915.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts and may be procured upon request of addressees:
Barrett, Chas. Irvin Geidel, Paul
Baxley, H. Harris, Federico
Carter, Arthur Heiner, Jno. L.
Colhouer, Charles S. Kraut, E. W.
Cook, Arthur Mecon, Tommie
Crouch, William T. McGowan, Arthur J.
Cunningham, Herbert N. Schroyer, Gray
Currie, Robt. Shanahan, T.
Dean, R. H. Walwyn, Harry
Devlin, Raymond M. Yarborough, I. M.
Edmunds, K. B. ..

Sailings of Vessels in Regular Service with the United States.

REGULAR CONNECTIONS THROUGH THE CANAL.

Approximately regular services between the Atlantic and the Pacific seaboard from Boston, New York, Philadelphia, and Baltimore, occasionally Charleston and New Orleans, to San Pedro, San Francisco, Portland, and Puget Sound, and return, are maintained by the American-Hawaiian Steamship Company, with a sailing each way about every five days; the Luckenbach Steamship Company, with a sailing each way about every 10 days; Sudden and Christenson, approximately fortnightly; the Atlantic and Pacific Steamship Company, about every three weeks; and the Panama-Pacific Line, each way every three weeks.

Regular lines are maintained between Cristobal and New York by the Panama Railroad Steamship Line, vessels sailing every Saturday, direct from Cristobal, and every Thursday, direct from New York; between Colon and New York by the United Fruit Company; sailings via Kingston weekly and via Havana weekly;

between Cristobal and New Orleans by the United Fruit Company, two vessels a week each way. Following are the sailings in the near future:

Sails. Arrives.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly. The subscription rate is \$1 per year in the United States and its possessions, and in Canada, Cuba, Mexico, and Panama (domestic postage), and \$1.50 in other countries (foreign postage). The paper is furnished free to United States Government departments, representatives of foreign governments, public libraries, and employes of The Panama Canal and the Panama Railroad Company whose names are on the gold roll.

All subscriptions expire on December 31. Domestic subscriptions are accordingly charged as beginning from the first of the quarter of the year in which received. Remittances should be made to pay only to December 31, on this basis: Sent between April 1 and July 1, 75 cents; July 1 to October 1, 50 cents; October 1 to January 1, 25 cents. For foreign subscriptions the year is divided into thirds: Between January 1 and May 1, \$1.50; May 1 to September 1, \$1; September 1 to January 1, 50 cents.

Remittances for subscriptions may be forwarded to The Panama Canal, Washington, D. C., or to The Canal Record at the address given below.

Isthmus of Panama.

NOTES OF PROGRESS.

Cape Mala Light in Service.

Mariners are advised that the new light at Cape Mala, at the western point of the Gulf of Panama, has been placed in service. It is equipped with a red sector to the northward covering Iguana Island and reef, and a red sector to the southward, covering the North and South Fraile Rocks, which are distant about 12 miles from Cape Mala. Complete sailing directions are given in the "Sailing Directions and General Information" for the Panama Canal, edition of April, 1915, and were published in THE CANAL RECORD of June 9.

Transfer Cargo through the Canal is About Four Per Cent of Total.

Approximately one twenty-fifth of the total amount of cargo passing through the Canal during recent months has been that which was transferred between carriers at the two terminal ports. The total of all cargo going through the Canal has been running over 500,000 tons per month. (Between January 1 and June 1 it averaged 522,034 tons). The transferred cargo shipped through the Canal has varied considerably but amounted to 19,323 tons in the month of May, when the total cargo was 578,708 tons.

The great body of the Canal cargo is through-shipped goods, traveling between ports remote from the Isthmus, and most of the vessels going through do not discharge or take on any cargo at the terminals. Their relation to the Canal in this respect is about the same as if they were passing through a strait. Most of the vessels stop to take on ship's supplies from the facilities provided by the Government to make the route attractive, but do not break cargo.

The relatively small portion which is transfer cargo affords a striking index to the fact that a great quantity of goods is passing through the Canal. For the transfer cargo now handled is about two-fifths of the movement of through freight handled over the Isthmus on the Panama railroad during the two years preceding the opening of the Canal, and it is recalled that the railroad at that time was supposed to handle more tons per mile than any other railroad in the world. Traffic one-twelfth as great as the present traffic of the Canal kept a well-equipped railroad exceedingly busy.

From the great quantities of transfer cargo to be seen on the piers at the terminals, an idea is gained of the vastly greater quantity of goods moving through the Canal without any breaking of cargo.

Advertising Space in Motor Omnibuses.

The Panama Railroad Company offers to carry advertising cards in the motor omnibuses which it is operating in the Canal Zone, at the rate of \$12.50 per month for a card in all of the four busses. Contracts are drawn for a period of one year, with the understanding that if the company should cease to maintain, control, or continue the advertising in the cars the advertiser shall be entitled to a rebate *pro rata* for the unexpired period. All cards are subject to the approval of the company as to style and copy.

Red Band Mileage Books Have Become Obsolete.

The holders of Panama railroad mileage books marked with the red band and issued prior to July 1, 1914, are advised that such books became obsolete at the end of June 30, 1915, and will not be accepted for transportation. Holders should turn in their books with unused mileage for redemption in cash. They may be presented at the office of the Paymaster at Balboa Heights or Cristobal, or sent by mail to the Auditor, The Panama Canal, Balboa Heights, C. Z.

Arrival of Practice Cruise Squadron.

The United States battleship *Wisconsin* will arrive in Limon Bay at about 3 o'clock in the afternoon of Wednesday, July 14, according to advice received by radio. The battleships *Ohio* and *Missouri* will arrive in the afternoon of July 15. The three vessels comprise the squadron for the summer practice cruise of the 680 midshipmen in the first, second, and third classes at the United States Naval Academy, and are on the way to San Francisco. They sailed from Annapolis on July 8, calling at Guantanamo for coal. Under the original schedule for the cruise, published in THE CANAL RECORD of May 19, the squadron should have left Annapolis on June 6, but the cruise was held up, pending an investigation at the Academy. The vessels will probably go into Gatun Lake on Thursday, July 16.

SUPPLYING BUNKER COAL.

Additional Equipment to Meet Needs Prior to Completion of Permanent Plants.

The difficulties of coaling vessels promptly at Cristobal, which have been experienced as the result of the increasing demands of vessels and the non-completion of the permanent coaling plants, have been lessened by the use, in addition to the previous facilities, of four motor-driven conveyors, or hoisters, which are used to discharge coal from barges and lighters alongside vessels into their bunkers. Two 500-ton barges have been fitted for this service, each with two conveyors. The conveyors are of the Demayo make and consist essentially of an endless chain of scoops, operating in a vertical steel casing about 25 feet high, from the top of which the material being handled is discharged into a pipe chute, passing by gravity to its destination. The elevators are suspended by cables from booms. This regulates their elevation while they dig into the coal and allows their being swung about to reach any point in the hold of the barge.

The first use of this new equipment on commercial vessels was in the coaling of the steamship *Finland* of the Panama Pacific Line, which passed through the Canal on her way from New York to San Francisco on June 24. On the second vessel coaled, the *Guatemala* of the Pacific Steam Navigation Company, the rate of supply was 26½ tons per hour. This is regarded as low for this equipment, and it is expected that when the operators shall have become thoroughly trained to their work each barge will supply approximately 60 tons per hour. If such effectiveness be attained the facilities for bunkering at Cristobal will have been practically quadrupled.

In the mean time, work is being pushed on the permanent coaling plant for the Atlantic entrance as rapidly as the material is supplied by the contractors. It is planned to complete two of the four unloader towers in September, and, by a modification of their construction, use them for both unloading colliers and loading into customer vessels from the stock pile. This is a temporary expedient, for use only until the regular reloader towers shall be completed, but as the two towers command a considerable storage space and each will be capable of handling about 250 tons an hour, it will in all probability meet the situation quite satisfactorily until the completed plant is in service.

All four of the towers for the plant have been erected, but the two toward the outer end of the wharf are those on which early completion is being pushed. The two stocking and reclaiming bridges have been practically completed with respect to the structural work, but the machinery is yet to be installed. They will probably be completed by the end of September. The material for the reloader towers has begun to arrive from the United States and their erection will begin shortly. The viaduct commanding the dry storage

LABOR FORCE AND QUARTERS IN JUNE.

space is about 50 per cent completed. The dredging alongside the wharves has advanced sufficiently to allow vessels access to the plant whenever desired.

At the Pacific plant, one of the two unloader towers is practically erected, and all four of the berm cranes, which will be used for stocking and reclaiming, have been erected. Work has not begun on the two reloaders, the wharf for which is yet to be built; the sinking of caissons for this wharf is in progress. This construction is intimately related to that of the dry dock, as the coaling plant will form one side of the entrance slip to the dry dock, and the work is held back somewhat by the needs of the dry dock construction. For instance, connecting the unloader wharf with the reloader wharf will require excavating through the cofferdam protecting the dry dock excavation, and this adds to the difficulty of the work. The preponderance of bunkering at the Atlantic end is such, on account of the prices being \$1 less per ton there, that the present commercial demand for a coaling plant at the Pacific entrance is slight.

Floating Caisson Transferred to Gatun Locks.

The floating caisson dam No. 1, for use in unwatering the lock chambers, was towed from Paraiso to Gatun Locks on Thursday, July 8, by the tug *Gorgona*. The caisson was drawing 33 feet of water at the time of passing through the Cut. It is to be used shortly for unwatering the lower and middle levels of the west flight, to allow the painting of the gates.

Civil Service Examinations.

Examinations for the following positions are scheduled to be held, probably on September 19 (date to be left blank in applications): Aid, Coast and Geodetic Survey; local inspector of boilers, local inspector of hulls, assistant inspector of boilers, assistant inspector of hulls, Steamboat Inspection Service (not for appointment in Canal Zone); clerk, Panama Canal service; computer, Coast and Geodetic Survey; copyist topographic draftsman and topographic draftsman, non-apportioned Departmental service; junior engineer draftsman, Engineer Department at Large; matron, Indian service; pharmacist, Public Health service; physician, all services except Philippine; postal clerk, Panama Canal service; veterinarian.

The fall edition of the manual of examinations has arrived and is ready for distribution.

Announcement will be made later of the examinations to be held in October.

Applications should be secured from and filed with the office of the Civil Service Examiners, Balboa Heights. Applications will not be received after August 27; this date may be changed if necessary. A card of admission will be sent to those found eligible to be admitted, upon the receipt of the questions from the Civil Service Commission.

In answer to questions as to residence, applicants must show residence in a State or Territory of the United States, and county thereof, up to the time of filing application, a ruling having been made that employes of The Panama Canal can claim residence in the United States while temporarily employed on the Isthmus.

The attention of those desiring to compete in the clerk examination is called to the fact that it is probable that no examination will be held in January, as has been the former custom for stenographer and typewriter, and typewriter.

The force report of June 23, 1915, shows the actual working force of The Panama Canal on that date to have been 21,677; of the Panama Railroad, 4,845; and of contractors, 375, a total effective working force of 26,897. This is an increase of 463 from the force on May 26, which was 26,434; is 2,082 more than the force on April 21, which was 24,815; and is 3,523 more than the 23,374 employed on March 24. As compared with May 26, there was a decrease of 22 in the total number of gold employes, in spite of an increase of 38 in the gold force of the contractors, while there was an increase of 485 in the number of silver employes, of which 58 are employed by the contractors.

The gold force on the Isthmus, composed almost exclusively of white Americans, was 3,593, a decrease of 22 from the preceding month; an increase of 232 from the gold force on April 21, numbering 3,361; and an increase of 168 from the 3,425 gold employes on March 24. The gold force on June 23, amounting to 3,593, was divided as follows: The Panama Canal, 3,212; the Panama railroad, 295; contractors, 86. Detailed figures of the employment of the Canal force on the Isthmus follow:

The estates of the abovenamed deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against the estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

RECEIPTS AND EXPENSES

Toll Earnings in May Wipe Out Deficit, Making Profit for Fiscal Year.

By the earnings of tolls on vessels passing through the Canal during May, the deficit on operation and maintenance of the Canal for the period from July 1, 1914, to May 1, 1915, which amounted to \$39,480.04, was wiped out, and a balance created in favor of the Canal, amounting to \$177,799.50 at the close of business on May 31. The excess of tolls earned over expenses, \$177,799.50, represents a profit of 4.79 per cent on the expenditure, not counting anything for interest on the money invested or for depreciation of plant.

Tolls earned in June amounted to \$541,181.55. The cost of operation and maintenance for that month will be less than that, thereby increasing the profit for the entire fiscal year.

The following detailed summary of the items

charged to operation and maintenance shows that under this classification are included all the diversified expenditures which have been made for keeping the Canal open and in order, and the work of handling vessels through; and in addition are charged prorated parts of the general expenses of civil government, sanitary work, and administration. Approximately a third of the total overhead expense of the Canal at present is charged to operation and maintenance. With respect to the actual operation and maintenance, the Canal has met and exceeded expenses; but with respect to the total investment involved, and the total of current expenditures, the receipts from tolls are not equalling expenses.

The cost for May was the least since August; this was due to the employment of a large part of the dredging equipment in the uncompleted channel, the cost of which is chargeable to construction.

QUARANTINE ACTIVITIES.

Net Emigration from Isthmus in Two Years.—Work Increasing.

Immigration to the Isthmus from foreign ports during the month of June exceeded emigration to foreign ports by 68 persons. This brings the net emigration since July 1, 1913, a period of exactly two years, to 26,231 persons. During the two-year period the decrease in the Canal force has been approximately 15,365. The force of employes on June 25, 1913, was 42,262; that reported as of June 23, 1915, was 26,897, showing a net decrease of employes amounting to 15,365. This is at the rate of 7,680 per year, or 640 per month, or 21 per day.

The activities at the quarantine stations during June exceeded slightly the activities in May. Two hundred and four vessels were inspected, as compared with 201 in May, and the number of persons examined, 17,725, was slightly over three per cent greater than the 17,163 in May. A summary of the activities and of the movements of persons through the ports of Balboa-Panama and Cristobal-Colon during June is given in this consolidated report for the two ports:

ITEMS.	Month of May, 1915.	Month of April, 1915.	Total since June 30, 1914.
Civil Government, proportion	\$20,913.33	\$20,379.61	\$213,602.63

VESSELS FROM WEST COAST.

Will Be Allowed to Enter Canal Docks at End of Six Days from Callao.

It has been decided to allow vessels trading between the west coast of South America and the Canal ports to come into dock at the Canal ports for the discharge of cargo after the expiration of six days from the time of their leaving Callao, a plague port, instead of seven days, as previously required. This concession has been made subject to strict regulations, which the Chief Quarantine Officer has set forth in a circular notice which is being sent to agents, masters of vessels, and others concerned.

The essential considerations leading to this change have been the fact that the vessels, on their northward voyages, do not dock in plague ports but lie out in the harbor and discharge and receive cargo by means of lighters; and that the Pacific carriers run on a schedule of close connections with Atlantic carriers, which makes it important for them to suffer as little delay as possible and will tend to assure their earnest compliance with the regulations, lest the concession be withdrawn.

The added restrictions deal principally with the control of the crews, pending the completion of the full seven days from Callao, and the registration of shore labor going aboard the vessels for the purpose of handling cargo. The danger of infection from plague-infected persons coming ashore is considered greater than that of the bringing ashore of plague by rats, in the face of the existing precautions against rats.

The following is the text of the notice sent out by the Chief Quarantine Officer:

Quarantine precautions and restrictions in force at the present time to be continued.

No shore leave for crew, with the exception of master and purser when necessary to transact business in Callao and way ports north. Crew to remain on board upon arrival at Zone ports to complete seven days from Callao. Shore labor necessary to go on board for discharge of cargo to be registered by name, metal check number, and address, and a list of such laborers to be furnished the quarantine officer at Balboa or Cristobal, as the case may be, not later than 24 hours from time of docking and commencement of discharge of cargo.

All precautions now in force with regard to fumigation, quarantine restrictions at ports of departure and way ports, breasting off, rat-guarding or mooring lines, gangways raised at night, etc., to be strictly enforced.

Vessels included in the above, transiting the Canal for Cristobal, may be permitted to pass through the Canal in quarantine during the fifth day.

The precautions to be observed at ports of departure and way ports to be properly certified to, and the measures to be carried out at Canal Zone ports are obligatory, upon the company concerned, for proper maintenance, and will be subject to inspection at any time by representative of the quarantine service.

Failure on the part of vessels to comply *strictly* with restrictions in force will result in such vessel being required to complete full time of *seven days* before being permitted to come alongside and discharge cargo.

The above arrangement will be allowed with the purpose of facilitating the handling of cargo from the west coast, and if the restrictions are carried out strictly and in good faith, can probably be maintained as a regular procedure. It must be understood, however, that this arrangement is subject to revision at any time should the quarantine authorities determine that it is impracticable or dangerous to Canal Zone ports.

Vessels from yellow fever infected or suspected ports are not included in the above.

Quarantine officers will see that the above requirements are strictly complied with.

Publications Received.

Receipt is acknowledged of pamphlets issued by the chambers of commerce of Baltimore, Seattle, and Manchester, England, describing the harbors, port facilities, and marine business of the cities.

Sale of Ancon Hospital Buildings.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 10 a. m., July 24, 1915, and then opened, for the purchase of the following Ancon Hospital buildings: Ward 3, building No. 252; Ward 4, building No. 248; office between Wards 3 and 4, building No. 250; two intervening buildings between Wards 3 and 4 and building No. 250; cover connecting passageway between Wards 2 and 3. Specifications giving details as to conditions of sale and removal of buildings may be obtained upon application to the office of the Chief Quartermaster.

Proposals must be accompanied by certified check, cash, or post-office money order for \$500 as a guarantee that bidder will enter into contract if required by The Panama Canal.

The Panama Canal reserves the right to reject all bids.

Bids should be marked "Proposals for purchase of Ancon Hospital buildings" and addressed to the Chief Quartermaster, The Panama Canal, Balboa Heights, C. Z.

OFFICIAL CIRCULARS.

Charges for Electric Current.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., July 1, 1915.
CIRCULAR No. 676-5; (Superseding Circulars Nos. 676-3, and 676-4.)

For the information of all concerned the following schedule of charges for electric current supplied by The Panama Canal is published:

FOR METERED SERVICE.

1. To departments and divisions of The Panama Canal and to the Panama railroad the charge shall be the actual cost to the Electrical Division for the district concerned as determined from month to month by the Cost Accountant.

2. To other departments and bureaus of the United States Government the charge shall be the actual average cost to The Panama Canal for all districts, as determined from month to month by the Cost Accountant.

3. To religious institutions, and to social and fraternal organizations of employes in the Canal Zone, the charge shall be an arbitrary rate that shall be adjusted from time to time to approximate as closely as practicable to the actual cost to The Panama Canal as determined by the Cost Accountant. For the present this rate shall be two cents per kilowatt-hour.

4. To individuals (nonemployes) and companies in the Canal Zone and to employes of The Panama Canal and Panama railroad for commercial use, the charge shall be eight cents per kilowatt-hour, except when a different rate is established by special authority of the Governor.

FLAT RATES.

5. To departments and divisions of The Panama Canal and the Panama railroad, other departments and bureaus of the United States Government, religious and charitable institutions, and to social and fraternal organizations of employes in the Canal Zone, the charge for unmetered lighting service shall be \$1 plus six times the number of 16-candlepower equivalents, in cents per month, for six or more equivalents. For less than six equivalents the charge shall be 25 cents per month per equivalent, with a minimum charge of 50 cents per month. For electrical appliances, such as extra lights, stoves, irons, toasters, water heaters, etc., charges shall be fixed from time to time by the Electrical Engineer with the approval of the Governor, dependent upon the cost of production of power, and the current consumption and probable number of hours of use of the appliance.

6. To individuals (nonemployes) and companies in the Canal Zone, and to employes of The Panama Canal and the Panama railroad for commercial use, the charge for unmetered lighting service shall be 75 cents per month per 16-candlepower equivalent, and for electrical appliances other than lights, rates to be fixed from time to time by the Electrical Engineer, with the approval of the Governor, dependent upon the cost of production of power and the current consumption and probable number of hours of use of the appliance.

BILLS AND PENALTIES.

7. Charges for flat rate electric service are payable on or before the 15th of the month in which the current is supplied. The charges for metered service are payable on or before the 15th of the month following rendition of the service. A penalty of 25 per cent will be added if bills are not paid when due. Deposits to secure the payment of bills will be required in sums to be fixed by the Auditor from religious institutions, social and fraternal organizations of employes, from individuals and companies, and from employes for commercial use.

8. Circular 676-4 is hereby revoked.

GEO. W. GOETHALS,
Governor.

Appointment.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., July 8, 1915.

CIRCULAR No. 661-18:

Effective this date, Lieut. P. P. Bassett, U. S. N., is appointed Captain of the Port, Cristobal, C. Z., to succeed Commander D. E. Dismukes, U. S. N., relieved from duty with The Panama Canal.

GEO. W. GOETHALS,
Governor.

Preparation of Specifications and Contracts.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., June 30, 1915.
CIRCULAR No. 636-1:

1. Hereafter contracts entered into by The Panama Canal or Panama Railroad Company on the Isthmus for the purchase of material or rendition of services or

both, will be prepared in the Accounting Department under the supervision of the Auditor.

2. When contracts are authorized to be entered into, the specifications will be drawn by the division interested and submitted to the Accounting Department for examination and the preparation of a form of contract, before any advertisement is placed in the local papers, or circulars calling for bids are distributed.

3. In the preparation of specifications the general conditions and the privileges to be granted to contractors will be kept entirely separate from the technical provisions. The general conditions and privileges which the division drawing the specifications desires to have inserted therein will be subject to revision by the Auditor in order to make such provisions uniform in all contracts.

4. The specifications for contracts to be entered into in the United States involving services to be rendered on the Isthmus will be referred to the Auditor and examined in his office, in order to unify the general conditions and privileges to be granted to contractors, before such specifications are forwarded to the Washington Office.
CHESTER HARDING,
Acting Governor.

Letterheads.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,
BALBOA HEIGHTS, C. Z., July 2, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

In compliance with instructions from the Executive Office, the use of official letterheads, forms P. C. 292-a, -b, -c, and -d is to be discontinued.

A supply of letterheads for the following departments is now ready for distribution, and as form numbers do not appear on the face of these letterheads, employes authorized to sign foreman's orders or to make requisitions for material are requested to make use of the following table of form numbers:

Department.	Heavy.	Medium.	Light.	Memo.
	H	M	L	S
Executive	101-H	101-M	101-L	101-S
Maintenance	102-H	102-M	102-L	102-S
Health	103-H	103-M	103-L	103-S
Supply	104-H	104-M	104-L	104-S
Accounting	105-H	105-M	105-L	105-S

WM. R. GROVE,
Chief Quartermaster.

Returning Material to Balboa Store.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,
BALBOA HEIGHTS, C. Z., July 6, 1915.

To all concerned—Referring to the last sentence in my circular of June 8, 1915, relative to closing the Balboa storehouse during time of taking the annual inventory:

This work is now in such condition that material returned to stock can be received without inconvenience.

WM. R. GROVE,
Chief Quartermaster.

Proposals for Manufacture of 10,000 Concrete Blocks for Atlantic Breakwaters.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 10 a. m., July 31, 1915, and then opened, for the manufacture of 10,000 concrete blocks for the Atlantic breakwaters.

Complete specifications, plan, form of contract, proposal, and bond may be obtained upon written application to the Chief Quartermaster, Balboa Heights, C. Z.

Bids must be accompanied by cash or certified check made payable to the Collector of The Panama Canal in the sum of \$2,500 as a guarantee that bidder will, if required by The Panama Canal, enter into a contract with satisfactory bond or certified check in the sum of \$5,000 as security for the faithful performance of the work covered by the contract. Deposits will be returned to unsuccessful bidders upon rejection of their bids.

The Panama Canal reserves the right to accept or reject any or all bids.

Bids should be marked "Proposal for manufacture of 10,000 concrete blocks for Atlantic breakwaters" and addressed to the Chief Quartermaster, The Panama Canal, Balboa Heights, C. Z.

Taboga Launch Service.

Leave Balboa dredge landing—Daily, except Thursday; at 5.30 p. m.: Monday, Thursday, Saturday, and Sunday, at 9.40 a. m.

Leave Taboga—Daily, except Friday, at 7 a. m. (On Mondays and days following holidays, one hour earlier), Monday, Thursday, and Saturday at 1.30 p. m.; Sunday at 7.15 p. m. The 9.40 a. m. trips from Balboa await the arrival of Panama railroad trains.

JOINT LAND COMMISSION.

Notice of Awards.

In the matter of the claim of William Keyes, for property located at Puerto Escondido, award No. 89, dockets Nos. 340 and 340-A, June 15, 1915—An award is hereby made against the United States, in favor of the person hereinafter named, in the sum of \$800, United States currency.

This award shall be paid to the person hereinafter named, in the amount specified, on or before the 15th day of July, 1915, and if payment or tender of payment of this award is not made on or before that date, such award shall thereafter bear interest at the rate of six per centum per annum until paid.

William Keyes, dockets Nos. 340 and 340-A—For all rights, claims, and other interests which the said William Keyes may possess or may have possessed in and to houses, crops, fruit trees, and any other improvements at or near Puerto Escondido, Canal Zone, the sum of \$800.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

In the matter of sundry claims, award No. 88, docket numbers as noted, June 14, 1915—An award is hereby made against the United States, in favor of the persons hereinafter named, in the sum of \$1,092.05, United States currency.

This award shall be paid to the persons hereinafter named, in the amounts specified, on or before the 14th day of July, 1915, and if payment or tender of payment of any of the items of this award is not made on or before that date, such item shall thereafter bear interest at the rate of six per centum per annum until paid.

Thomas Parker, docket No. 804—For all rights, claims, and other interests which the said Thomas Parker may possess or may have possessed in and to houses, crops, fruit trees, and other improvements on lands claimed by the Schuber family near Corozal, the sum of \$525.

Uriah Smith, docket No. 831—For all rights, claims, and other interests which the said Uriah Smith may possess or may have possessed in and to houses, crops, fruit trees, and other improvements on lands claimed by the Schuber family near Corozal, the sum of \$567.05. Total, \$1,092.05, United States currency.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

In the matter of the claims of Gabriel Jolly, deceased, and Rafael Maestre, for the lands known as Mandingita and the improvements thereon, award No. 86, June 7, 1915, dockets Nos. 740 and 482—The claim of Gabriel Jolly, deceased, docket No. 740, came on for hearing on June 3, 1915. At that time counsel for the United States stated that this same property was claimed by Rafael Maestre in his claim, docket No. 482, which also includes other properties that have previously been disposed of by the Commission's award No. 6 of July 3, 1913, award No. 17 of August 9, 1913, rule of dismissal No. 77 of September 16, 1913, and rule No. 123 of December 5, 1913.

On Wednesday, April 28, 1915, the special testimony of Rafael Maestre was taken as a witness in the claim of Gabriel Jolly, docket No. 740, and at that time Maestre claimed a one-half undivided interest in the property. One of the witnesses for the claimant, Ricardo Marciacq, who has filed with the Commission letters of administration authorizing him to act for the estate of Gabriel Jolly, deceased, stated on direct examination at the hearing on June 3 that the claimant Jolly and Rafael Maestre were copartners in the ownership and operation of the estate of Mandingita, and admitted that Maestre had a one-half undivided interest therein.

An award is therefore made against the United States, in favor of the parties hereinafter named, in the amounts shown, for the sum of \$1,625, United States currency, for all right, title, interest, and claims which the said Gabriel Jolly, deceased, his heirs or assigns, and Rafael Maestre may have had or may now have in the lands of Mandingita and in growing crops, fruit trees, buildings, or improvements of any nature, located thereon and covered by the claim of Gabriel Jolly, deceased, docket No. 740, and by that part of the claim of Rafael Maestre, docket No. 482, not previously disposed of by the awards or rules of the Commission above referred to.

To Ricardo Marciacq, administrator of the estate of Gabriel Jolly, deceased, \$812.50
To Rafael Maestre \$812.50
Total (United States currency) \$1,625.00

This award shall be paid to the parties named, in the amounts specified, on or before the 7th day of July, 1915, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum until paid.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

COMMISSARY DEPARTMENT.

Commissary Hours.

The commissary stores at Las Cascadas, Empire, and Culebra are open from 7.30 to 11.30 a. m., and 1.30 to 5.30 p. m.

The commissary store at Balboa is open from 8 a. m. to 12.30 p. m., and 2.30 to 6 p. m.

All other commissary stores are open from 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m. on Saturdays and other sailing days of Panama railroad vessels.

Cold Storage Prices.

These prices are increased by 10 per cent for sales to commercial and foreign naval vessels, and by 20 per cent for sales to yachts.

The following is a list of retail prices of cold storage provisions which will be effective July 15, 1915:

FRESH MEATS.

SHIPPING INFORMATION.

August Weather Probabilities.

During the month of August, 1915, the following weather conditions may be expected to prevail at the Canal entrances. Predictions are based on the records at Colon and Ancon for the past seven and eight years, respectively.

Winds—Light and variable winds will continue over the Atlantic coast with an average hourly velocity of about eight miles and the maximum velocity recorded during local rain or thunder squalls is not likely to exceed 30 miles an hour.

On the Pacific coast and in the interior the prevailing direction of the wind will be from the northwest, with a velocity averaging about seven miles an hour. A maximum velocity as high as 35 miles an hour may occur during the passage of thunder squalls, but such a velocity is not likely to continue for more than a few minutes.

Rain—Heavy showers are likely to occur over both coasts and over the interior. The average August rainfall at the Atlantic entrance to the Canal, for a period of 44 years, is 15.10 inches, while at the Pacific entrance 7.49 inches is the average fall, this average being for a period of 18 years. Twenty-five days with rain (one on which 0.01 inch or more of rain is measured) may be expected on the Atlantic Coast, and 21 rainy days are likely to be experienced on the Pacific side. The average number of days on which the rainfall equals or exceeds one inch is four and three, respectively.

Fogs—No fogs are likely to occur on the Pacific coast, and few, if any, will be experienced on the Atlantic side. Night and early morning fogs will be numerous over the interior, but should not prove a hindrance to the navigation of the Canal under the present operating conditions, as all that occur may be expected to lift or become dissipated by 8.30 a. m. The average number of fogs over the Gaillard Cut section of the Canal during the month of August is 21, of which 50 per cent are dense. (In a dense fog objects can not be distinguished at a distance of 1,000 feet.)

Temperature—The average shade air temperature over both coasts should be approximately 80 degrees Fahrenheit. A maximum temperature higher than 94° F., or a minimum temperature lower than 69° F., is not likely to occur at the Pacific entrance, while at the Atlantic entrance the temperature is not likely to exceed 89° F., or fall below 71° F. Owing to its location with regard to the prevailing winds, the range in temperature on the Pacific coast is much greater than on the Atlantic. The mean daily range in temperature will probably be about 15° and 8° F., respectively.

Barometric pressure—The Canal Zone lies without the regions of violent and widespread atmospheric disturbances, and except for the well marked diurnal change, caused by the daily changes in temperature, barometric fluctuations are so slight as to have little value in forecasting weather conditions. The average sealevel pressure for the month of August should be about 29.84 inches over both coasts, and the highest pressure is not likely to be above 29.95 inches or the minimum lower than 29.70 inches.

Storms—The extensive areas of high and low pressure that cross the continental areas of the United States at frequent intervals,

producing the cyclonic and anti-cyclonic storms that characterize the climate in the middle latitudes, do not extend southward beyond the tropic of Cancer. Most of the storms on the Isthmus during the rainy season are local wind, thunder, or rain squalls of more or less limited extent, and may be expected quite frequently during the month of August. The average number of days on which thunder storms occur on the Atlantic and Pacific coasts during the month is 17 and 23, respectively.

The season of the West Indian hurricanes is from July to October, and although the paths followed by them lie well to the northward of the Isthmus, a rough sea and heavy swell, accompanied by brisk northerly winds, may be experienced occasionally outside the breakwater in Limon Bay, following the passage of one of these storms across the Caribbean Sea.

Generally cloudy weather will continue to prevail over both coasts, and smooth to moderate seas may be expected at the Pacific entrance.

Tides—No consideration need be given to tidal fluctuations at the Atlantic entrance to the Canal, as the maximum amplitude is only about two feet.

At the Pacific entrance to the Canal the average tidal range is approximately 13 feet, while a maximum range of 20 feet sometimes occurs during spring tides.

Panama (Balboa) tide predictions are given below:

Tide Predictions.

Panama (Balboa) tide predictions for the next five weeks are given in this table:

JULY.				
DATE.	Time and height of high and low water.

	1.9	14.4	1.7	12.9

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3.47 p. m.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans for all States. Due at New Orleans on the following Tuesday.

Every Saturday to New York, for all States. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.*

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

NOTE—The sailings on Monday, July 26, and August 23, will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7.10 a. m., connects with the despatches for the two sailings mentioned above.

The cable address of The Panama Canal, on the Isthmus, is "Pan canal, Panama;" in the United States, "Pan canal, Washington."

Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C.," for delivery in the United States.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly. The subscription rate is \$1 per year in the United States and its possessions, and in Canada, Cuba, Mexico, and Panama (domestic postage), and \$1.50 in other countries (foreign postage). The paper is furnished free to United States Government departments, representatives of foreign governments, public libraries, and employers of The Panama Canal and the Panama Railroad Company whose names are on the gold roll.

All subscriptions expire on December 31. Domestic subscriptions are accordingly charged as beginning from the first of the quarter of the year in which received. Remittances should be made to pay only to December 31, on this basis: Sent between July 1 and October 1, 50 cents; between October 1 and January 1, 25 cents. For foreign subscriptions the year is divided into thirds; and remittances for the remainder of this year should be: Between May 1 and September 1, \$1; between September 1 and January 1, 50 cents.

Remittances for subscriptions may be forwarded to The Panama Canal, Washington, D. C., or to The Canal Record at the address given below.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Return of Lighthouse Expedition.

The main part of the expedition of the Marine Division which erected the new light at Cape Mala returned to Balboa on Friday, July 16; the 16 carpenters in the party returned on June 25, after completing the tank house and keeper's quarters. The expedition had left Balboa on June 3 and throughout the six weeks of work at Cape Mala the health of the party was good, the most serious illness being one case of fever. There were numerous prostrations from heat, and the pilot in charge of the expedition reports that between 10 o'clock in the morning and two in the afternoon the temperature averaged over 130° Fahrenheit.

As completed, the light is situated in latitude 7° 27' 15" North and longitude 79° 59' 20" West, by reference to data established at Cape Mala by the United States Coast and Geodetic Survey. The light has a 9-tip eluster burner, controlled by a sunvalve, flashes (light 5 seconds, eclipsed 15 seconds), and is of the first order, visible 18 miles. Daymarks were placed on two sides and painted white. With these the tower makes a good landmark, easily visible for 10 miles from a height of 20 feet above sealevel, and has been observed at 19 miles with glasses. The tower is 100 feet high, and the elevation of the light is 140 feet above sealevel.

From Below the Equator to the Arctic Ocean.

The Norwegian steamship *Torsdal*, W. Wilhelmson, operator, cleared from Cristobal on July 21 after passing through the Canal on the way from the west coast of South America to Archangel, Russia. This is the second vessel to have passed through the Canal on

this route, the *Grangewood* having made the transit on May 11, from Iquique for Archangel. In making this voyage the vessels travel from about 20 degrees south of the equator to a point well above the Arctic Circle, having to round North Cape, at latitude 71° N. and pass through the Arctic Ocean to the White Sea. Archangel is situated in latitude 64° 33' North and longitude 40° 33' East, about 135 miles below the Arctic Circle and 740 miles northeast of Petrograd, and it is only from July to September that the harbor is free of ice.

Battleships Complete Canal Transit.

The United States battleships *Ohio*, *Missouri*, and *Wisconsin*, which arrived at Cristobal from Annapolis, by way of Guantanamo, on the practice cruise of the midshipmen on Wednesday and Thursday of last week, made the transit of the Canal on Friday, July 16, and cleared immediately for San Diego. On account of the delay in departure from Annapolis the squadron did not stay in Canal waters as long as originally intended; in fact, the passage was made almost without stopping, which led many of the officers aboard the ships to express admiration for the smoothness of the Canal operations. In the lockages at Pedro Miguel and Miraflores two of the vessels were handled simultaneously, in double-barrelled lockage, the third being handled directly behind, so that the vessels of the squadron were at all times in close touch and put to sea in fleet formation.

Motor Wagons to Replace Teams.

Two Ford motor delivery wagons were placed in the service of the Ancon commissary store last week, for making deliveries of goods to quarters, a third is about ready to go into commission, and five others are under order in the United States. Of the five to come, several will probably be assigned to the Cristobal commissary, but it is not likely that any will be used at this time in the smaller towns, where the element of speed in delivery is of less importance.

The Supply Department has ordered a 3-ton and a 1½-ton motor truck for heavy hauling, and several other departments are considering the replacement of teams with motor wagons. With the establishment of the gasoline storage tanks at the terminals of the Canal, in connection with the fuel oil handling plants, it will be possible for the Government to obtain gasoline at about 11 cents a gallon, alongside the wharf at either terminal.

The "Ancon" to Carry Passengers on Return Voyage.

The steamship *Ancon* of the Panama Railroad Steamship Line, which arrived at Cristobal on Sunday, July 18, will carry passengers on her return trip to New York. She is due to sail on or about Wednesday, July 28, and has accommodations for 74 cabin passengers.

NOTICE TO STEAMSHIP LINES.

Charges for Wharfage, Storage, Lighterage, Cranage, Stevedoring, and Transferring Cargo, and Shifting and Towing Vessels.

Effective July 18, 1915, the following charges will obtain at the Panama Canal for wharfage, storage, lighterage, cranage, stevedoring and transferring cargo, and shifting and towing vessels:

Wharfage.

1. Sailing vessels:

Not exceeding 100 feet in length over all	(per linear foot, per day)	\$0.05
When clearing from wharf within five (5) hours from time of berthing, shall pay two-thirds of the regular daily rate with a minimum charge of		1.00
Over 100 feet in length over all	(per linear foot per day)10

2. Steam or power driven vessels:

On "overall" measurements taken from ship's certificate (per linear foot, per day)12½
--	--	------

3. All auxiliary vessels will be considered as power driven, and charge for wharfage will be made in accordance with their length as specified above.

4. All sailing vessels over 100 feet in length over all, and all steam or power driven vessels clearing from wharves within 5 hours from time of berthing, $\frac{2}{3}$ of the regular daily rate.

5. When vessels occupy a wharf for more than 24 hours but not over 27 hours, consecutively, the charge shall be 1½ of the daily rate.

6. "Per day" to mean a period of 24 hours from the time of berthing.

7. No charge for wharfage shall be made against steam or power driven vessels occupying berths solely for the purpose of obtaining coal or other supplies from the Panama Railroad Company or any department of The Panama Canal.

Shifting Berth.

8. Whenever in the judgment of the receiving and forwarding agent, or Port Captain, it is deemed advisable to shift any vessel not fully engaged in receiving or discharging cargo, in order to accommodate other vessels—or for any other reason—shifting will be made, and the towing and other expenses thereby incurred will be charged against the vessel so shifted.

Storage.

9. No charge will be made for the storage of transfer cargo held in cars or on piers up to the departure of the first connecting steamer of the final carrier, provided that such connecting steamer receives such cargo within a period of not more than 35 days from the date same is ready for delivery.

10. On all cargo refused by the first connecting steamer because its entire capacity is filled with cargo that has been loaded at the Panama Railroad Company's wharves, storage will be charged per bill-of-lading ton per day at the rate of three cents from and including the day of departure of such first connecting steamer up to the time that delivery is accepted by the second connecting steamer of such final carrier.

11. On all cargo refused by the second con-

necting steamer, storage will be charged per bill-of-lading ton, per day at the rate of 10 cents instead of three cents (the minimum charge being for not less than one ton), from and including the day of departure of the second connecting steamer up to the time delivery is accepted by the final carrier.

12. On all cargo refused by the first connecting steamer because of space being occupied by or reserved for other cargo, or for any reason other than that above indicated, storage will be charged per bill-of-lading ton, per day at the rate of 10 cents from and including the day of departure of the first connecting steamer, up to the time delivery is accepted by the final carrier.

13. No storage will be charged on cargo for local delivery for a period of 72 hours from the time the ship has completed cargo, but on any cargo not accepted by consignees within that time, a storage charge of three cents per 100 pounds per day, or fraction thereof, will be made—the minimum charge to be 15 cents.

Cranage.

14. Vessels desirous of availing of the Panama Railroad Company's cranes at the Balboa piers will be charged 15 cents per bill-of-lading ton on cargo so handled.

15. Live stock will be transferred and handled by the cranes at the following rates:
 Horses, mules, and donkeys... (per head) \$2 00
 Cattle..... (per head) 1 50
 Sheep, goats, and hogs..... (per head) 1 00

Stevedoring and Transferring Cargo.

16. When the delivering and receiving steamship lines elect to do their own stevedoring, a charge of 60 cents per bill-of-lading ton will be made for transferring such cargo, including mail, baggage, and specie (with the exception of explosives), from the cleared slings of the delivering carrier to the slings of the receiving carrier.

17. For handling explosives a transfer charge of \$2 per bill-of-lading ton will be made.

18. In addition to the transfer charge of 60 cents per bill-of-lading ton for handling specie, an additional charge of $\frac{1}{2}$ of one per cent, based on the value shown on the bill of lading will be made—the additional charge made necessary for its safe-keeping.

19. When one of the two carriers arranges for the Panama Railroad Company to stevedore cargo in or out of its steamers, a charge of 90 cents per bill-of-lading ton will be made for the stevedoring from or into the steamer and transferring across dock or docks.

20. When both carriers desire the Panama Railroad Company to stevedore cargo out of and into their steamer, a charge of \$1.10 per bill-of-lading ton will be made for the stevedoring and transferring.

21. The Panama Railroad Company will exercise the option of transferring cargo either by rail, dock, or water.

22. The Panama Railroad Company will collect from the carrier delivering cargo to its wharves, its charges for transferring and also for stevedoring from the steamer of the delivering carrier and into the steamer of the receiving carrier; leaving these carriers to arrange for the division of the expense between them. In instances where the stevedoring is performed only for one carrier, the Panama Railroad Company will collect from such carriers its charges for stevedoring.

23. The Panama Railroad Company will require early notice from both initial and final carrier of the cargo they desire to have stevedored and transferred at the \$1.10 per ton rate, and in the absence of such notice the regular

rate of 30 cents per ton will be charged for each stevedoring in addition to the transfer charge of 60 cents per ton that is collected from the initial or delivering carrier.

24. When the receiving carrier desires cargo stevedored into its steamers in such a manner as to permit of its discharge at more than one port, thus requiring more labor in the stevedoring than would be necessary if cargo were loaded for delivery at one port only; or when extra labor is made necessary to shift cargo in the holds in order to secure proper working room, the cost of such extra labor for this special work will be charged against the receiving carrier—plus a surcharge of 15 per cent.

25. When the receiving carrier does not lift all cargo on hand in its entirety, and calls for certain cargo, necessitating extra labor in its segregation—the cost of such labor will be charged against the receiving carrier—plus a surcharge of 15 per cent.

26. Steamships must furnish power and labor for operating winches, as well as suitable gear and tackle and if, in the judgment of the railroad company the winchmen furnished by the steamers do not give satisfactory results, it will have the right to substitute competent winchmen at the expense of the steamer.

27. Cargo for local delivery at Colon and Cristobal will be handled once across the wharves at the rate of 30 cents per bill-of-lading ton, and switched at the rate of \$5 per car.

28. Cargo for local delivery at Panama will be charged \$1.25 per bill-of-lading ton, including crantage at Balboa.

29. The rates for stevedoring cover only general cargo, and charges for special commodities will be made as follows:

Boilers, locomotive parts, machinery, railroad cars, etc., scrap machinery and scrap boilers, etc., or other heavy weights over two tons.....	(per bill-of-lading ton)	\$0 50
Structural iron over 35 feet long.....	(per bill-of-lading ton)	50
Loose brick, conduit, sewer pipe, terra cotta, and tiling.....	(per bill-of-lading ton)	50
Loose scrap iron of irregular shape, pieces not over two tons.....	(per bill-of-lading ton)	60
Lumber, switch and cross ties.....	(per M. ft. B. M.)	50
Rough timber and logs.....	(per ton)	40
Piling.....	(per linear foot)	60
Horses, mules, and donkeys.....	(per head)	1 00
Cattle.....	(per head)	75
Calves, goats, dogs, hogs, and sheep.....	(per head)	50
Live stock other than above indicated, when crated.....	(per ton)	1 00
Mail, baggage, and specie.....	(per ton)	1 00
Explosives.....	(per bill-of-lading ton)	1 60

30. The above-mentioned rates for stevedoring apply to only such cargo as can be handled by ship's gear. Any additional appliances, machinery, wrecking cranes, etc., to be supplied by the Isthmus will be paid for by the delivering carrier in the case of cargo discharged and by the receiving carrier in the case of cargo delivered.

Tugs.

31. For harbor work, shifting berth, work around piers or locks, and short tows in Gaillard Cut and elsewhere, per hour or fraction thereof.....\$15.00

Fractions of an hour beyond the first hour to be charged for on basis of 15-minute periods.

Charge to begin when tug leaves permanent berth and to continue until her return to same.

32. For towage through the Canal:

Per net Panama Canal ton.....	\$ 10
Per displacement ton.....	.04
Minimum charge for towage through the Canal.....	150.00

Lighterage.

33. When no berth is available and call is made on the Panama railroad for lighters, and it is possible to furnish same, they will be furnished free, the usual charge for labor, stevedoring, and transferring cargo to apply; but when lighters are furnished to a ship in quarantine, or by a ship on berth solely to expedite the discharge and loading of a ship with no corresponding benefit to the Panama railroad, a rental of 50 cents per hour for their use will be made, in addition to the usual charge for stevedoring and transferring, all towage to be borne by the steamship company.

34. When a steamship lines furnishes its own lighters, labor, towage, etc., then the right of basin charge will be assessed at the rate of 40 cents per bill-of-lading ton.

35. These changes apply to the charges given on pages 37-41 of the revised edition of April, 1915, of the Sailing Directions and General Information, The Panama Canal.

GEO. W. GOETHALS,
Governor.

NOTICE TO STEAMSHIP LINES.

Concerning Handling of Balance of Deposits Made to Cover Expenses of Vessels.

1. Heretofore it has been the practice of owners, agents, and brokers to make deposits to cover tolls and other expenses at the Panama Canal for individual ships, and upon the transit of the ship through the Canal the unexpended balance is automatically remitted to the depositor.

2. In general this custom will still be followed, unless such depositors request that the unexpended balance be retained and applied to cover tolls on other vessels specified by name. If they so desire, steamship lines and firms, which send their vessels at frequent intervals through the Canal, may make a lump sum deposit, specifying by name the vessels to which such deposit is to apply, and keep an open account with The Panama Canal.

GEO. W. GOETHALS,
Governor.

Deceased Employees.

Name.	Check No.	Native of	Isthmian Residence	Employed by	Date of death
Albright, Myron.....	1404	U. S. A.....	Corozal.....	Mechanical Div.	July 8.
Allen, A., alias Jones, Wm	42457	Barbados.....	Gatun.....	O. & M	July 10 (about)
Howell, Isaac.....	69046	Jamaica.....	Pedro Miguel	Electrical Div.	July 12

The estates of the abovenamed deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against the estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

CANAL WORK IN JUNE.

Monthly Report of the Governor to the Secretary of War.

BALBOA HEIGHTS, C. Z., July 16, 1915.

The Honorable the Secretary of War,
Washington, D. C.

SIR: I have the honor to submit the following report of operations on the Isthmus for the month of June, 1915:

Department of Operation and Maintenance.

Lock operation and maintenance—The last fender chain at Miraflores was placed, which completed the installation of all apparatus for this character at all locks. In addition to the usual maintenance and repair work at the locks, the work of grading the dams and backfill at Miraflores was completed, with the exception of the lower east side. The emergency dams at all of the locks were operated during the month. The following commercial lockages were made: *Gatun*—136 lockages, 145 vessels; *Pedro Miguel*—142 lockages, 145 vessels; *Miraflores*—141 lockages, 145 vessels.

Electrical Division—The net output of the power plants was as follows: Gatun hydro-electric station, 2,464,280 kilowatt-hours; Miraflores steam station, 1,740 kilowatt-hours; total, 2,466,020 kilowatt-hours.

The output of the Balboa air compressor plant was 151,915,500 cubic feet of free air compressed to 105 pounds. In addition to the usual operation, maintenance, and repair work, construction work was carried on in connection with the installation of the underground conduit and street lighting systems in Ancon-Balboa, Cristobal, Gatun, and Pedro Miguel districts. Electrical work was also in progress in connection with the construction of buildings for the Army and The Panama Canal, and in connection with the permanent telephone system for the Canal.

Municipal Engineering Division—In addition to the work incident to maintenance, operation, and repair, the following construction work was in progress: Installation of water and sewer lines, and roads, streets, and walks for the Army post at Fort Amador, and for the Army stables at Corozal; the construction of a concrete reservoir at Margarita; the installation of water and oil pipes for the fuel oil handling plants; widening and asphaltting the road from Ancon to the Administration Building; construction of Ancon post-office-Tivoli road; Ancon sewer outfall extension; and work on the roads and streets and on water and sewer lines in Balboa townsite.

Meteorology and Hydrography—The rainfall was above the station averages at five and deficient at 13 stations. The totals ranged from 2.37 inches at Balboa to 16.48 at Brazos Brook. The maximum precipitation recorded on any one day was 4.04 inches, at Brazos Brook on June 8. The estimated rainfall over the Chagres River basin was four per cent above the average, or 12.55 inches against a 15-year average of 12.11 inches. The Chagres River discharge at Alhajuela was 33 per cent above the 26-year June normal. The elevation of Gatun Lake varied from 85.35 on the 20th and 21st, to 86.96 on the 30th, averaging 85.44. Miraflores Lake varied in elevation from 53.55 on the 20th and 22d to 54.21 on the 30th, averaging 53.93. Three seismic disturbances were recorded at Balboa Heights, on the 6th, 17th, and 28th, respectively. Those of the 6th and 17th were but slight tremors, while that of the 28th was

of close origin and of sufficient intensity to be felt by a number of persons, registering 111 on the Rossi-Forel scale; the distance of the epicenter was 91 miles and the probable direction southeast. No damage was reported from any of the shocks.

Division of Terminal Construction.

PACIFIC TERMINALS.

Shops—Various minor repairs were made in buildings Nos. 1, 4, 6, and 10. In building No. 10 the work of raising the columns to grade was completed and concrete bases repoured. The reinforcing of the curtain wall in building No. 9 with a steel frame was completed. The planing mill exhaust system was completed, with the exception of rewiring the motor in the west fan house. On June 15, 1915, the Balboa shops were formally turned over to the Mechanical Division. The work of erecting incomplete louver panels in buildings Nos. 1, 2, 4, 12, and 15 was completed by the Mechanical Division.

Dry dock—Fifteen girders for supporting the outer crane rail of the dry dock were erected along the south side. Four thousand seven hundred and eighty-three cubic yards of mass concrete and 2,805 cubic yards of reinforced concrete were poured, and a total of 141,485 pounds of reinforcing steel was placed. The erection of the miter dock gates was started June 12, and the last horizontal girder of both leaves was placed on June 23. Structural steel erected in the dry dock proper amounted to 91.43 tons in addition to 565.68 tons erected in the dock gates. A total of 55 stones was placed in the granite miter gate sill and hollow quoin posts.

Entrance pier—Work progressed satisfactorily on the pier supports for the superstructure of this pier, and 1,014 cubic yards of concrete were placed; 42,700 pounds of rail reinforcement were placed in the pier.

Coaling plant—The erection of the unloader towers by the contractor progressed satisfactorily and approximately 150 tons of steel were erected. Installation of the mechanical and electrical machinery was continued on the berm cranes. Steamshovel excavation for the west end of the unloader wharf was continued and 1,430 cubic yards of material were removed, completing this work. Excavation by hand on the buttresses was started and 1,546 cubic yards of material were removed. The curtain wall behind the unloader wharf was finished. On the reloader wharf the work of sinking 6-foot caissons continued and all but eight of the caissons have been put in place, but only 27 have been sunk to rock. This work was somewhat delayed due to the removal by the crane *Hercules* of three caissons that had collapsed during driving.

Excavation—The total excavation at the Pacific terminals for the month amounted to 34,612 cubic yards, 9,580 cubic yards of which were classified as earth. Of this total, 22,324 cubic yards were excavated from Sosa Hill.

Quarantine boat landing and oil crib—The oil crib was completed. Work on the quarantine boat landing progressed very slowly.

ATLANTIC TERMINALS.

East Breakwater—On the shore section the trestle was advanced from bent 198 to bent 288, a distance of 1,436 linear feet. On the outside section, upon the fill, the trestle was advanced from bent 380 to bent 464, a distance of 1,251 linear feet. Two thousand five hundred twenty-eight linear feet of single-track trestle and 52,585 linear feet of piling were

driven during the month, and 1,426 linear feet of 3-inch water main were laid on the shore section of the trestle; 74,445 cubic yards of dredged material were dumped on the center line of the shore trestle.

Coaling plant—The filling of caissons under the reloader wharf was completed on June 15, and for the unloader wharf on June 4. Concrete poured into caissons during the month totaled 2,321 cubic yards. The pouring of the floor at the south end of the unloader wharf was completed, 1,088 cubic yards of concrete having been poured into wharf floors and girder encasement during June. All caissons were ready for the reception of deck girders on June 15. The placing of caissons for end wharf began on June 7 and excavation was completed in eight out of the total of 31 caissons under this wharf. The erection and riveting of deck steel for the entire unloader wharf were completed, and for the reloader wharf about 90 per cent completed. Under Washington order No. 40,483 a small amount of work was done on bridges in connection with hoppers, etc., some erection and riveting were done on the viaduct system, and the painting of the viaduct continued. Work on the unloader towers under Washington order No. 40,587 progressed satisfactorily. The total excavation for the month at the Cristobal coaling plant was 595 cubic yards, of which 550 cubic yards were classified as earth.

Fuel oil plants—At the Mount Hope oil plant the manifold housing was erected, and, with the exception of some riveting and painting, was finished on June 30. Grading around the plant was commenced. Sliding doors for the plant were made and hung in place. At the Balboa oil plant the roof and ends of manifold housing were finished and the building painted. Fire hydrants were installed, and grading and leveling about the plant was about 50 per cent completed at the close of the month. Foundations for gasoline tanks were laid at both terminals. A roof and ladder were fabricated and placed on tank No. 48. Tank No. 36 was dismantled at Gold Hill and its reerection near U. S. tank No. 4 was about 90 per cent completed. At both the Pacific and Atlantic tank farms branch water pipes were laid for the purpose of testing the tanks of licensees.

Marine Division.

One hundred and forty-two oceangoing vessels passed through the Canal in June, 82 (not including one launch) southbound and 60 (not including three launches), northbound. Of this total 47 vessels were of American registry and 62 of British registry. Fourteen vessels were measured, and 114 vessels were inspected to see whether their certificates conformed to the rules.

Dredging Division.

The total excavation for the month, including earth, rock, and gravel was 1,120,029 cubic yards. Of this total 29,015 cubic yards were removed between the Pacific entrance and Miraflores Locks; 128,976 cubic yards from Balboa inner harbor; 720,975 cubic yards from Gaillard Cut; 3,890 cubic yards from Miraflores Lake, and 108,812 cubic yards from Gatun Locks to the Atlantic entrance. At the Cristobal coaling station, 58,858 cubic yards of material were excavated, and 37,393 cubic yards of coral and sand were removed at Coco Solo for the East Breakwater fill. The hydraulic grader was engaged in digging ditches for the Obispo Diversion drainage system, and in sluicing the slide north of

Gold Hill. The work of exterminating water hyacinths continued, and approximately 44,000 young plants were pulled up and destroyed.

Mechanical Division.

Shop orders authorized during the month numbered 922, an increase of 64 over the previous month, those left over from May numbering 487, those completed during the month 878, and those carried forward into July, 531. The output of the foundry was 163,592 pounds of iron, 43,800 pounds of steel, and 13,946.5 pounds of brass. Hostling was done on 4,273 pieces of equipment, and shop and field repairs were made on 6,573 cars. In addition 1,115 light and four extended repair jobs were done on equipment. The fuel oil handling plant at Balboa handled 166,829.57 barrels and the plant at Mount Hope 8,560.64 barrels of oil.

Building Division.

In addition to the usual operation, maintenance, and repair work, the following construction work was in progress for the Army at the places named: *Fort Amador*—Four barracks, three non-commissioned officers' quarters, two four-family quarters, three two-family quarters, and two field officers' quarters. The three non-commissioned officers' quarters were practically completed. *Balboa*—General Edwards' house was finished on June 29, with the exception of some minor incidentals. *Corozal*.—The work on the various stables and sheds proceeded satisfactorily, as did the work on three type-17 quarters and a double mess hall. The following Canal structures were in the course of construction, at the places named: *Ancon-Balboa district*—Thirty-two frame and 12 concrete family quarters, work on which has been somewhat delayed by lack of lumber. *Cristobal district*—New Colon Hospital, slaughter house, concrete water tank at Margarita Island, and one four-family quarters at Mount Hope.

Supply Department.

The force report for the half month ending June 23 showed a total of 26,522 employes of The Panama Canal, and Panama railroad, of whom 3,507 were white Americans and 23,015 were laborers. Of the latter, approximately 347 were Europeans and the remainder West Indian negroes. There was an increase of 652 laborers and an increase of 208 Americans, making a total increase of 860.

The occupants of Government quarters numbered 7,091 white Americans, of whom 3,726 were men, 1,583 women, and 1,782 children; 7,572 West Indians, of whom 4,619 were men, 1,279 women, and 1,674 children.

The value of material received during the month was \$872,394.77. It came forward in 31 steamers; the total weight of cargo, exclusive of lumber and piles, was approximately 27,408 tons. Some of the principal items were 1,234,963 feet, board measure, of lumber, for stock; 319,997 bags of Portland cement; and 31,554 feet of piling.

Health Department.

General—No case of yellow fever, smallpox, or plague originated on or was brought to the Isthmus during the month. Forty-one deaths occurred in the Canal Zone. The death rate for disease for the Canal Zone, based on a population of 34,657, was 13.15 per thousand, as compared with 10.41 for the preceding month and 9.22 for the corresponding month of last year.

Employes—The health of employes continued good. The number of names on the

pay rolls for the preceding month was 36,564. On this basis the admission to hospitals and quarters, 1,127, gave a rate of 369.87 per thousand, as compared with 307.28 for the preceding month and 381.09 for the corresponding month of last year. The admission rates to hospitals for all diseases were: Whites, 401.77; blacks, 152.38; Europeans, 1,275.26; and Americans, 281.68. The admission rates for malaria to hospitals and quarters were: Whites, 199.62; blacks, 67.14; Europeans, 878.05; and Americans, 106.35. The total number of deaths from all causes was 14. Of these, four died from disease, or 3.61 per thousand, as compared with 2.43 for the preceding month and 3.28 for the corresponding month of last year. One American was accidentally drowned.

Accounting Department.

The cash balance in Canal construction appropriations on June 30 was \$22,606,516.24, and in the fortification appropriations \$4,159,833.85. The payrolls for June, exclusive of Army quarters, storehouses, fortifications, etc., amounted to \$953,835.04, and the fortification roll amounted to \$76,464.46. Payments by the Disbursing Clerk in Washington amounted to \$797,936.57, and by the Paymaster on the Isthmus to \$1,587,266.36. Collections on the Isthmus amounted to \$1,220,353.12, of which \$446,618.56 was repaid to the appropriations, \$229,001.51 was commissary collections and other trust funds, and \$544,733.05 was miscellaneous receipts to be covered into the Treasury. Of the miscellaneous receipts, \$539,229.05 was collected on account of tolls, as compared with \$544,207.75 for May. Deposits in the amount of \$426,472.60 were made with the Assistant Treasurer to be applied in payment of tolls and other charges against vessels using the Canal. Canal Zone revenue collections and miscellaneous funds received amounted to \$190,002.83, and the disbursements under the same heading amounted to \$259,017.53.

Executive Department.

DIVISION OF CIVIL AFFAIRS.

One hundred and eighty-five licenses of all kinds were issued during the month. Fifteen estates were settled, having a total value of \$1,398.39. At the port of Balboa, 90 vessels entered and 86 cleared, and at the port of Cristobal 153 vessels entered and 155 cleared.

Postal service—Postmasters remitted on account of stamp sales, second-class mail collections, postage due collections, and box rent receipts, \$8,159.20. Money orders issued aggregated \$343,246.03. Of this total, \$143,150 represents the value of deposit money orders issued without fee, in lieu of postal savings certificates. Deposit money orders to the amount of \$93,310, and postal savings certificates to the amount of \$71,804 were paid. The balance of postal savings deposits on hand at the close of the month, represented by the unpaid certificates and deposit money orders, aggregated \$477,776, as compared with \$499,740 at the close of the previous month.

POLICE AND FIRE DIVISION.

Four hundred and three arrests were made. Of this total 372 were males and 31 females. Fifty-eight convicts were confined in the penitentiary at the close of the month. Nineteen persons were deported, five of whom were convicts who had completed their sentences in the penitentiary and 14 of whom were prisoners who had served terms in jail. Three fires occurred and the damage to

The Panama Canal and Panama railroad property resulting therefrom amounted to \$50. Private property was damaged to the extent of \$275. The property of the United States Army suffered no loss.

COURTS.

In the District Court eight civil, 24 probate, and 22 criminal cases were settled; six civil, 18 probate, and 16 criminal cases were filed, and 89 cases of all kinds were pending at the close of the month. In the magistrates' courts 31 civil and 422 criminal cases were disposed of.

DIVISION OF SCHOOLS.

The total enrollment in Canal Zone schools was 1,777 for the white schools and 1,612 for the colored schools. In the white schools the net enrollment was 1,146, the average number belonging 869.8, and the average daily attendance 843.5. In the colored schools the net enrollment was 1,430, the average number belonging 765.3, and the average daily attendance 658.1. The schools closed for the regular vacation period on June 30.

Panama Railroad Company.

The cargo handled at the Colon and Balboa agencies aggregated 141,429 tons, of which 16,517 tons were handled through the Canal on steamers of the Panama Railroad Steamship Line, as follows:

	Tons.
From New York to Balboa.....	3,581
From Colon to Balboa.....	3,150
Total.....	6,731
From Balboa to New York.....	7,536
From Balboa to Colon.....	2,250
Total.....	9,786

Grand total..... 16,517

During the month the following coal was delivered and trimmed in bunkers: Colon agency, 20,021, tons; Balboa agency, 3,586 tons; total, 23,607 tons.

The work on the terminal docks at Cristobal continued satisfactory; 2,270 feet of steel cylinders were driven, making a total of 20,225 linear feet to date or 88 per cent of the total required. One thousand six hundred nineteen cubic yards of spoil were removed from and 2,669 cubic yards of concrete were placed in cylinders. Twenty-four caissons were completed during the month, making a total to date of 161, or 75 per cent of the total number required.

Respectfully,
GEO. W. GOETHALS,
Governor.

Whole Cargo of Steel in Coastwise Trade.

The steamship *George Hawley* of the Boston and Virginia Transportation Company passed through the Canal for the first time on July 5, carrying the first whole cargo of steel to be shipped through the Canal in the United States coastwise trade. The shipment amounted to 3,849 tons and was from New York to San Francisco and Portland. Previous shipments of steel in the coastwise routing have been parts of the entire cargo of the vessel carrying them.

Setting Boundary Monuments in the Lake Area.

A party consisting of three American engineers and 15 silver employes is engaged in monumenting the boundary between the Canal Zone and the Republic of Panama in the Gatun Lake area, according to the provisions of article 11 of the new boundary convention

which was proclaimed on February 18, 1915. The convention provides that there shall be included within the Canal Zone "the areas to be covered by the waters of Gatun Lake and all that part of the shores of the lake up to an elevation of 100 feet above mean sealevel, and the islands in said lake * * * and the peninsulas bordering on said lake to which there is no access except over lands of the Canal Zone or from the waters of Gatun Lake." The work of the party now in the field is to place about 750 monuments at important points along the 100-foot contour line. The work will be checked by a representative of the Republic of Panama.

The American Legion.

Numbers of the Americans on the Isthmus have made application for enrollment in the American Legion, which is an organization formed to enroll the names of citizens who are qualified by military or technical training to be of immediate value to the defensive forces of the United States and are willing to "hold themselves in readiness to respond to the call to its colors."

The American Legion was incorporated under the laws of the State of New York on March 6, 1915. It is a voluntary organization, without official standing, formed to be of auxiliary service to the Government, which, the Legion states, has now no record of the present addresses and qualifications of its honorably discharged soldiers, sailors, and marines, or information concerning available men trained in the various occupations essential to the conduct of modern warfare. About 75 vocations have been listed. Such information is to be collected and arranged as completely as practicable, for assistance toward the intelligent and orderly mobilization of volunteer forces if ever the need of them should arise. The Legion is not to organize into military units or require drills or assemblies; its activities are confined to registration. It requires that service members pay yearly dues of 25 cents and keep the secretary advised of changes of address or of fitness for service.

The management of the Legion is, according to the prospectus of the society, vested in an advisory membership of 300 representative citizens, chosen from all sections of the country, and headed by a council composed of not more than nine members. The present council consists of Charles J. Bonaparte, Jacob M. Dickinson, George von L. Meyer, Truman H. Newberry, Theodore Roosevelt, Elihu Root, Henry L. Stimson, William H. Taft, and Luke E. Wright, all of whom were prominent officials in former administrations. Local centers of enrollment are the Canal Zone Post, No. 49, of the Veterans of Foreign Wars, whose commander, James D. Williamson, has his office in the Panama railroad station at Panama; and the Cristobal clubhouse, the secretary of which has given out numbers of applications.

Limit of Weight and Rates for Mail Matter of First, Third, and Fourth Classes.

The limit on the weight of packages of mail matter of the first class, formerly four pounds six ounces, has been removed, and that for matter of the third and fourth classes raised from 11 to 20 pounds. The following limits of weights and rates on domestic mail matter are effective in the Canal Zone at present:

There is no limit of weight on domestic mail

matter of the first class. The rate of postage for domestic mail matter of the first class is two cents for each ounce or fraction thereof.

Second-class matter consists of publications entered as matter of the second class at the despatching post-office. The rate of postage for domestic mail matter of the second class is one cent per pound.

The limit of weight for domestic mail matter of the third and fourth classes is 20 pounds, provided such parcels do not exceed 72 inches in length and girth combined.

The rate of postage for fourth-class mail matter is one cent for each ounce or fraction thereof, and that for third-class mail matter is one cent for each two ounces or fraction thereof.

"Domestic mail" in the Canal Zone postal service is that addressed to the Canal Zone, Panama, the United States and its possessions, and Canada, Cuba, and Mexico.

Bachelor Apartments in the Hotel Tivoli.

Fifty rooms on the second and third floors of the main building of the Hotel Tivoli are offered for rent as bachelor apartments for employes at the following rates per room per month:

	With private bath.	Bath serving two rooms.	Without private bath.
One in a room . . .	\$25.00	\$17.50	\$12.50
Two in a room . . .	35.00	25.00	20.00

Original assignments to these rooms will be made according to length of service. The rooms are open for inspection and applications should be filed at the hotel. The following rules will govern the rental of the rooms:

1. Bath and bed linen, soap, maid, elevator, and janitor service will be furnished by the hotel.
2. Telephone tolls will be charged at the regular hotel rates.
3. Any person renting one of these apartments and terminating occupancy in less than two months will be rendered a bill at the regular daily hotel rate for employes on the European plan.
4. The hotel provides no menial personal services.
5. Bills will be due on the last day of the calendar month and must be paid at once. If desired, they may be turned in for pay roll deductions.
6. These quarters will be open for rental to all male employes of The Panama Canal and Panama Railroad Company; to all male employes of the Federal Government resident on the Isthmus but not provided with free quarters or commutation of quarters by their department and to male employes of all companies to whom The Panama Canal or Panama Railroad Company guarantees, by contract, to furnish quarters under the same conditions as to Canal employes. They will not be rented at less than regular hotel rates to any person in Canal or Federal employ whose salary or wage includes a pecuniary allowance for expenses or for commutation of expenses.
7. The hotel reserves the right to terminate this rental of apartments whenever the traffic conditions demand it. It will not be terminated for transient or very temporary increases in traffic.
8. A list of the rooms for rental under these rules will be kept posted in the hotel office and transfers within the hotel will take precedence over new assignments.

Change in Rates at Hotel Tivoli.

Effective August 1, the rate for all meals by the month at the Hotel Tivoli will be changed from \$45 to \$48 for employes, and from \$48 to \$60 for nonemployes. The rates for single meals will remain unchanged, both for employes and non-employes.

Obituary.

Myron Albright, a car inspector in the Mechanical Division, formerly of Pennsylvania and living at Corozal, died at Ancon Hospital on July 8.

OFFICIAL CIRCULARS.

Appointments.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., July 9, 1915.

CIRCULAR No. 661-20;

1. Effective July 1, 1915, Frank Feuille is appointed Counsel for the Panama railroad on the Isthmus.
2. Effective the same date, Walter F. Van Dame is appointed Assistant to the Counsel for the Panama railroad on the Isthmus.
3. Mr. Van Dame shall also act as Assistant to the Special Attorney for The Panama Canal.

GEO. W. GOETHALS,
Governor.

Appointment.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., July 8, 1915.

CIRCULAR No. 661-19;

Effective this date, Lieut. P. P. Bassett, U. S. N., is appointed Chairman of the Board of Local Inspectors, and member of the Board of Admeasurers, vice Com. D. E. Dismukes, U. S. N., relieved.

GEO. W. GOETHALS,
Governor.

Accountable Official.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,

BALBOA HEIGHTS, C. Z., July 15, 1915.

CIRCULAR No. 97;

Effective at once, Mr. E. M. Reinhold is designated an accountable official of The Panama Canal, vice Mr. X. D. Holt, and as such will account for the Paraiso store stock. The nonexpendable property in use at Paraiso store will be carried on the records of the district quartermaster at Paraiso.

H. A. A. SMITH,
Auditor, The Panama Canal.
Approved:
GEO. W. GOETHALS,
Governor.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 303, on Wednesday, July 28, 1915, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same.

The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the Captain of the Port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the Captain of the Port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

For the benefit of applicants residing in Gatun and Cristobal or Colon, examinations for licenses as navigators of motor boats, and as chauffeurs, will be held at the office of the Captain of the Port of Cristobal on Friday, July 30, 1915, beginning at 9 a. m. Applicants should be provided with motor boats or automobiles for the demonstration test.

By direction of the chairman of the board.
F. M. NIXON,
Recorder, Board of Local Inspectors.

Taboga Launch Service.

Leave Balboa dredge landing—Daily, except Thursday; at 5.30 p. m.: Monday, Thursday, Saturday, and Sunday, at 9.40 a. m.

Leave Taboga—Daily, except Friday; at 7 a. m. (On Mondays and days following holidays, one hour earlier); Monday, Thursday, and Saturday at 1.30 p. m.; Sunday at 7.15 p. m. The 9.40 a. m. trips from Balboa await the arrival of Panama railroad trains.

JOINT LAND COMMISSION.

Notice of Awards.

In the matter of sundry claims, award No. 90, docket numbers as noted, June 19, 1915—An award is hereby made against the United States, in favor of the persons hereinafter named, in the sum of \$627.25, United States currency.

This award shall be paid to the persons hereinafter named, in the amounts specified, on or before the 19th day of July, 1915, and if payment or tender of payment of any of the items of this award is not made on or before that date, such items shall thereafter bear interest at the rate of six per centum per annum until paid.

Santana Melendez, docket No. 436—For all rights, claims, and other interests which the said Santana Melendez may possess or may have possessed in and to crops, fruit trees, and any other improvements on Bohio and Buena Vista lands, near Frijoles, Canal Zone, the sum of \$200.

Inocencio Vega, docket No. 526—For all rights, claims, and other interests which the said Inocencio Vega may possess or may have possessed in and to crops, fruit trees, and any other improvements located at Mamey and Caimito, near Gorgona, Canal Zone, the sum of \$200.

William Douglas, docket No. 835—For all rights, claims, and other interests which the said William Douglas may possess or may have possessed in and to houses, crops, fruit trees, and any other improvements on the lands claimed by the Schuber family near Corozal, the sum of \$217.25.

Total, \$617.25, United States currency.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

In the matter of sundry claims, award No. 91, docket numbers as noted, June 21, 1915—An award is hereby made against the United States, in favor of the persons hereinafter named, in the sum of \$751.50, United States currency.

This award shall be paid to the persons hereinafter named, in the amounts specified, on or before the 21st day of July, 1915, and if payment or tender of payment of any of the items of this award is not made on or before that date, such item shall thereafter bear interest at the rate of six per centum per annum until paid.

Charles Hinds, docket No. 820—For all rights, claims, and other interests which the said Charles Hinds may possess or may have possessed in and to houses, crops, fruit trees, and any other improvements on lands claimed by the Schuber family near Corozal, the sum of \$382.50.

Frederick Lewis, docket No. 821—For all rights, claims, and other interests which the said Frederick Lewis may possess or may have possessed in and to houses, crops, fruit trees, and any other improvements on lands claimed by the Schuber family near Corozal, the sum of \$369.

Total, \$751.50, United States currency.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Rules of Dismissal.

In the matter of sundry claims, rule of dismissal No. 184, docket numbers as shown, June 5, 1915—In the following claims which were set down for public hearings on the dates shown, the United States on the day of hearing made plea of settlement. The Commission has investigated and considered these claims, and the evidence before the Commission is that settlements therefor have been made:

Table with columns: Claimant, Docket No., Date Set for Hearing, Tax No., Date of Payment. Lists cases for S. P. Wilson, C. Burke, Nicanor Chavez, John A. Giscombe, Eu. ebio Munoz & Damiana Olivito, Henry Brooks, Ebenezer White, Isee Sing, Stephen L. Abbot, Uriah Scott.

In view of the settlements above referred to, no further action is necessary by this Commission, and the foregoing claims are therefore dismissed.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

In the matter of the claim of J. Taylor Rose, for property on the Schuber lands near Corozal, rule of dismissal No. 185, docket No. 810, June 12, 1915—The claim of J. Taylor Rose, docket No. 816, filed with the Commission May 9, 1913, and which came on for public hearing on June 2, 1915, is hereby dismissed for the reason that the evidence submitted to the Commission does not justify an award being made.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

COMMISSARY DEPARTMENT.

Supplying Gasoline in Bulk.

The Supply Department is ready to supply gasoline in bulk at the office of the district quartermaster of the Ancon-Balboa district to those entitled to commissary privileges. The price is 20 cents per gallon. Those desiring gasoline will make payment at the commissary store in Ancon or Balboa, receiving there an order to be presented to the district quartermaster.

The price of gasoline in cases is \$2.65 for a 10-gallon can. At the Supply Department garages at Ancon and Balboa, automobile owners may keep not more than 10 gallons of gasoline in each stall.

Bottles.

Bottles used for bay rum, vinegar, salad oil, and denatured alcohol will be accepted at all commissaries and reimbursement allowed at the rate of one cent each, to be paid for by means of refund notes or credit notes. All such bottles must be those used to contain products manufactured by the commissary branch of the Supply Department, or bottles which are similar in shape and size.

Commissary Hours.

The commissary stores at Las Cascadas, Empire, and Culebra are open from 7.30 to 11.30 a. m., and 1.30 to 5.30 p. m.

The commissary store at Balboa is open from 8 a. m. to 12.30 p. m., and 2.30 to 6 p. m.

All other commissary stores are open from 8 a. m. to 12.30 p. m., and 3 to 6.30 p. m.

The gold departments of the Cristobal store will open at 2 p. m. on Saturdays and other sailing days of Panama railroad vessels.

Commissary Hours to Be Changed.

Effective August 1, 1915, the open hours will be changed as follows:

The commissary stores at Las Cascadas, Empire, Culebra and Toro Point to open from 7.30 to 11.30 a. m., and 1.30 to 5.30 p. m.

All other commissary stores to open from 8 a. m. to 12.30 p. m., and 3 p. m. to 6 p. m.

The gold departments of the Cristobal commissary to open at 2 p. m. on Saturdays and other sailing days of Panama railroad vessels.

Cold Storage Prices.

These prices are increased by 10 per cent for sales of commercial and foreign naval vessels, and by 20 per cent for sales to yachts.

The following is a list of retail prices of cold storage provisions which will be effective July 22, 1915:

Table of FRESH MEATS with columns: Item, Price. Includes Mutton, Lamb, Veal, Beef, and various cuts and preparations.

Table of various meat items with columns: Item, Price. Includes Rump roast, Porterhouse roast, Steak, Round, Sirloin, and Tenderloin.

NOTE—"Choice beef" is kept on hand in the cold storage plant at Cristobal. Orders placed with commissary storekeepers before 11 a. m., will be shipped for delivery on the following morning.

Table of MISCELLANEOUS items with columns: Item, Price. Includes Pork, Sausage, Hamburger, and Beef tongue.

Table of CURED AND PICKLED MEATS with columns: Item, Price. Includes Beef, Ham, Sausage, Bacon, and various cured meats.

Table of POULTRY AND GAME with columns: Item, Price. Includes Chickens, Fowls, Ducks, Capons, Broilers, Turkeys, and Geese.

SHIPPING INFORMATION.

Tide Predictions.

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3.47 p. m.

The cable address of The Panama Canal, on the Isthmus, is "Pan canal, Panama," in the United States, "Pan canal, Washington." Shipping people addressing The Panama Canal by mail, should address "The Panama Canal, Balboa Heights, Canal Zone," for delivery on the Isthmus, and "The Panama Canal, Washington, D. C.," for delivery in the United States.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., July 21, 1915.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts and may be procured upon request of the addressees:

Fuel.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 400 and 650 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa or Cristobal from plants of The Panama Canal, or from private corporations. The present price from the Canal is \$1.25 per barrel. Prices from the corporations may be obtained on application to them.

CANAL

RECORD

Volume VIII.

BALBOA, CANAL ZONE, WEDNESDAY, JULY 28, 1915.

No. 49.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly. The subscription rate is \$1 per year in the United States and its possessions, and in Canada, Cuba, Mexico, and Panama (domestic postage), and \$1.50 in other countries (foreign postage). The paper is furnished free to United States Government departments, representatives of foreign governments, public libraries, and employes of The Panama Canal and the Panama Railroad Company whose names are on the gold roll.

All subscriptions expire on December 31. Domestic subscriptions are accordingly charged as beginning from the first of the quarter of the year in which received. Remittances should be made to pay only to December 31, on this basis: Sent between July 1 and October 1, 50 cents; between October 1 and January 1, 25 cents. For foreign subscriptions the year is divided into thirds; and remittances for the remainder of this year should be: Between May 1 and September 1, \$1; between September 1 and January 1, 50 cents.

Remittances for subscriptions may be forwarded to The Panama Canal, Washington, D. C., or to The Canal Record at the address given below.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Increasing Facilities for the Handling of Oil.

The grading of lot No. 26 on the oil tank farm of the Atlantic entrance oil handling plant was completed on Saturday, July 24, in preparation for the erection of the second tank for the Panama Canal Storage Corporation (formerly the Roxana Petroleum Company), which has one tank nearly completed at Mount Hope. Each tank is to have a capacity of 55,000 barrels. Two similar tanks are to be erected at the Pacific entrance plant, and the material for them is due at any time from the United States. The Balboa tanks will store both crude fuel oil and Diesel engine oil, from California, and the Mount Hope tanks will handle crude oil from Oklahoma, Mexico, or the Island of Trinidad.

Other companies engaged in the erection of tanks in connection with the oil handling plants are the Texas Oil Company, and the Huasteca Oil Company, each erecting two 55,000-barrel tanks at the Atlantic terminus. In addition, lots have been leased to the

Standard Oil Company, for four tanks at Balboa and four at Mount Hope; the West India Company, for two tanks at Mount Hope; and the West Coast Fuel Oil Company, for four tanks at Balboa.

Corporations already engaged in supplying oil are the Union Oil Company of California, with four 37,000-barrel tanks at Balboa, the Panama Agencies Company, with one 25,000-barrel tank at Balboa, and The Panama Canal, with two 42,000 barrel tanks at each terminus.

More Cattle for Commissary Branch.

The steamship *Ancon* of the Panama Railroad Steamship Line completed her second side trip to Port Limon for cattle for the commissary branch of the Supply Department on Tuesday, July 27, when she delivered at Cristobal 450 head of Costa Rican cattle. The cattle have been turned to pasture on a tract between Mount Hope and Gatun, and will be slaughtered at Cristobal as demanded. The modern slaughterhouse being erected at Cristobal is nearing completion, and the machinery for it is expected to arrive shortly.

The "Ancon" to Go Into Coal Service.

The steamship *Ancon* of the Panama Railroad Steamship Line, sailing this afternoon, Wednesday, July 28, for New York with passengers and cargo, will, upon completion of discharge at New York, proceed to Norfolk and go into service between that port and the Canal as a collier, auxiliary to the Canal, colliers *Achilles* and *Ulysses*. This move has resulted from the increased demand for coal to supply shipping at the Canal.

The *Cristobal* of the same line sailed from New York on July 24 with cargo and passengers and is due at Cristobal on July 31. She is due to return to New York about August 8 to 10 and will carry passengers. She has accommodations for 75 cabin passengers.

The United States Navy gunboat *Annapolis*, which arrived at Balboa on July 23 from Corinto, will clear for the same port in the morning of Thursday, July 29, after coaling at Balboa.

Submarines *C-1* and *C-4* of the Isthmian flotilla are being overhauled in the dry dock at Mount Hope.

CANAL TRAFFIC IN JUNE.

Number of Vessels Exceeds Previous Months.—
Analysis of Cargo Handled.

The number of oceangoing vessels passing through the Canal during the month of June, amounting to 143, was the highest number to have used the Canal in any month since its opening. The cargo handled through the Canal exceeded that for all previous months except March, 1915. A comparison of the traffic in June with the movements during the other months may be made by means of the table published at the bottom of this page. The table shows the numbers of vessels through the Canal each month in each direction, and their aggregate gross and net tonnage, Panama Canal measurement, and the quantities of cargo in each direction.

It is interesting to note that this statement covers practically all of the traffic during the fiscal year ending at the close of business on June 30, as the cargo handled through the Canal in barges from July 1 to August 14, 1914, inclusive, amounted to only 8,410 tons, which is about one-sixth of one per cent of that passing through the Canal during the remainder of the fiscal year.

The tolls earned during June amounted to \$511,181.55, and brought the total since June 30, 1914, a period of one year, to \$4,424,256.48. The earnings by months were:

July	\$7,598.40
August	88,401.80
September	266,513.28
October	375,787.44
November	351,533.28
December	410,043.60
January	419,037.12
February	383,904.96
March	560,784.96
April	442,415.49
May	547,054.60
June	541,181.55

Total..... 4,424,256.48

During June 320,619 tons of cargo were carried through the Canal from the Atlantic to the Pacific, and 282,561 tons from the Pacific to the Atlantic, a total of 603,180 tons. The cargo declarations made by the masters of the vessels listed 132 different commodities, of which 32 were carried through in both directions.

The principal commodities passing through the Canal during the month were coal, coke, copper, flour, general cargo, iron ore, lumber,

SUMMARY OF TRAFFIC THROUGH THE PANAMA CANAL SINCE ITS OPENING TO COMMERCIAL TRAFFIC.

manufactured goods of iron and steel, machinery, railroad material, nitrates, refined petroleum, sugar, tin, wheat, and wines.

Coal, 56,312 tons, was all handled from the Atlantic to the Pacific; 22,812 tons were shipped from the Atlantic seaboard of the United States to South and Central America (the latter receiving 20 tons); 19,170 tons were handled from the east to the west coast of the United States; 930 tons went to the Far East; 10,700 tons from Cardiff went to unknown destinations in the Pacific Ocean; and 2,700 tons carried by the United States Navy collier *Brutus* went as far as Gatun Lake, returning later to the Atlantic Ocean.

Of 14,193 tons of coke, 2,350 tons were from Philadelphia to Noumea, 1,877 from England to San Francisco, and 9,966 tons from the Atlantic seaboard of the United States to South America.

Copper went through the Canal in both directions; 1,000 tons from New York to Vladivostok, and 387 tons from the former to Los Angeles and San Francisco; while of the 6,492 tons moving to the east, 898 tons were shipped from the west coast of the United States to New York, 3,862 tons from the same west coast to Swansea; and from the west coast of South America, from Chile, 1,233 tons were shipped to Europe, and 499 tons to the United States.

Of flour, 489 tons passed from the Atlantic to the Pacific; 369 tons from New York to Los Angeles and San Francisco; 16 tons from New Orleans to Central America; and 104 tons from New York to Chile. The eastward movement amounted to 3,083 tons, of which 315 tons were from Tacoma to London and 2,768 tons were in the United States coastwise trade, consigned to New York.

General cargo carried from Atlantic to Pacific amounted to 100,027 tons. Of this 42,929 tons were in the United States coastwise trade; 5,243 from Europe to South and Central America; 16,202 from the United States to South and Central America; 34,303 from the United States to the Far East; and 1,350 tons in a miscellaneous routing, from Marseilles to Noumea and Papeeti.

General cargo from the Pacific to the Atlantic amounted to 38,614 tons. Of this, 33,576 tons were in the United States coastwise trade, 278 tons from South and Central America to Europe, and 4,760 tons from the same area to the United States.

Iron ore from New York for Australia and New Zealand amounted to 2,000 tons; from Wilmington to Chile, to 200 tons; while 7,350 tons were shipped from Cruz Grande to Philadelphia.

Lumber shipments from the east amounted to 863 tons, from New York; 798 tons to Vladivostok and 65 tons to Antofagasta. The shipments from the west coast of North America amounted to 46,366 tons, of which 22,198 tons were in the United States coastwise trade, and 21,168 tons were consigned to Europe.

Manufactured goods of iron and steel, principally structural steel, passing through the Canal from east to west during June amounted to 21,422 tons, of which 430 tons were shipped from Liverpool to South America, and 20,992 tons were shipped from New York—11,351 tons to the Far East, 8,070 tons in the United States coastwise trade, and 1,591 tons from New York to South America. An eastward shipment of 700 tons went from San Francisco to New York.

Machinery shipments from the Atlantic to the Pacific amounted to 6,675 tons. Europe sent 347 tons to South America, and New York shipped 6,328 tons, of which 3,728 tons went to South America, 631 tons to San Francisco, and 1,969 tons to Kobe and Vladivostok. Twenty-five tons were shipped from San Francisco to New York, and 97 tons from Callao to New York.

Railroad material amounting to 7,151 tons came through the Canal from New York; 1,092 tons to Los Angeles and San Francisco, 3,610 tons to Shanghai, 300 tons to Kobe and Shanghai, and 2,149 tons to Vladivostok.

Of miscellaneous manufactured goods, Liverpool shipped 20 tons to south Pacific ports, to which Genoa sent 158 tons; while New York sent 1,000 tons to Chile and Peru and 2,930 tons to Los Angeles and San Francisco. San Francisco shipped 500 tons to New York, while Valparaiso sent 14 tons to Europe and 13 tons to the United States.

Of nitrates, with the exception of 15 tons from Liverpool for South Pacific ports, all of 100,075 tons were shipped from the west coast of South America; 41,251 tons to Europe and 58,824 tons to the United States.

Refined petroleum amounting to 58,166 tons was shipped from the Atlantic seaboard of the United States. Three thousand five hundred and twelve tons went to South and Central America; 1,450 tons to Australia and New Zealand; 9,870 tons to Japan; 32,307 tons to China; 2,363 tons to Vladivostok; and 1,049 tons distributed between Kobe and Shanghai,

while 7,615 tons were shipped from New Orleans to Los Angeles.

Of sugar, Liverpool shipped 7,100 tons to San Francisco, and New York shipped three tons to Callao, in the westward movement; the eastward movement amounted to 26,663 tons, of which Peru shipped 1,046 tons to the United States and Europe, 2,000 tons came from Manila to New York, 1,613 tons from the west coast of South America to New York, and 22,004 tons from Hilo to Philadelphia and New York.

Tin shipments from the Atlantic amounted to 3,051 tons, of which 11 tons were from Liverpool to Eten, and the remainder from New York; 2,180 tons to San Francisco, 775 tons to Shanghai, and 85 tons to Valparaiso. Shipments to the Atlantic ports amounted to 629 tons, 15 from Antofagasta to Liverpool four from Callao to Baltimore, 60 from Antofagasta to New York, 100 tons from Kobe to New York, and 450 tons from San Francisco to New York.

Wheat shipments were all from the west coast of the United States, and amounted to 4,575 tons. Three thousand and fifty tons went to New York, 875 tons to Avonmouth, and 650 tons to Christiania.

Wines amounting to 56 tons were shipped from France to Central American ports, and one ton passed through the Canal consigned from New York to San Francisco. Los Angeles shipped 400 tons to Boston, and San Francisco shipped 4,379 tons to New York.

The traffic is summarized in this tabulation:

Commodity.	Atlantic to Pacific.	Pacific to Atlantic.	Total.	Remarks.
	Tons.	Tons.	Tons.	
Animal food.....	50	50	New York to San Francisco.
Antimony.....	100	100	Hongkong to New York.
Asphalt.....	20	779	799	New York to Peru, and San Francisco to New York.
Automobiles.....	486	486	New York to Vladivostok and Shanghai.
Balsam.....	1	1	Central America to New York.
Bark.....	51	51	Chile to Cristobal.
Barley.....	2,349	2,349	Portland and San Francisco to New York and Christiania.
Beans.....	529	529	San Francisco to New York.
Beans, lima.....	240	240	To New York and Charleston.
Beet dust.....	550	550	San Francisco to New York.
Benzine.....	6,020	6,020	Talara to London.
Bones.....	20	20	San Francisco to New York.
Borax.....	200	200	Antofagasta to Liverpool.
Bricks.....	1,137	1,137	England to San Francisco.
Burlap.....	26	26	San Francisco to New York.
Cacao.....	10	3,447	3,457	South Pacific ports to New York and Europe.
Canned goods:				
Miscellaneous.....	80	300	380	Liverpool to south Pacific ports; Astoria and Yokohama to New York.
Fish.....	113	2,192	2,305	835, San Francisco to New York; 1,155, Vancouver and Seattle to Elrope.
Fruit.....	65	1,011	1,076	Liverpool, New York, west coast, and Hawaii.
Meat.....	60	60	San Francisco to New York.
Vegetables.....	34	356	390	New York, Los Angeles and San Francisco.
Castings.....	104	104	New York to Talcahuano.
Cement.....	6,135	6,135	New York and St. Thomas to west coast.
Chemicals.....	1,897	159	2,056	New York, Liverpool, and west coast.
Coal.....	56,312	56,312	See comment.
Cocoa leaves.....	11	11	Chile and Peru to New York and Cristobal.
Coffee.....	74	1,567	1,641	New York, Europe and west coast.
Coke.....	14,193	14,193	See comment.
Copper.....	1,387	8,258	9,645	See comment.
Copper ore.....	3,125	3,125	South Pacific ports to New York and Europe.
Corn.....	560	560	New York to Central America.
Cotton.....	20	1,122	1,142	South Pacific ports, New York, Baltimore and Liverpool.
Cream of tartar.....	194	194	Valparaiso to Cristobal.
Cresote.....	200	200	New York to Talcahuano.
Curios.....	700	700	Japan to New York.
Dyes.....	150	150	Gotenberg to Valparaiso.
Earthenware.....	125	125	Liverpool to south Pacific ports.
Explosives.....	132	132	New York and Norfolk to Callao.
Fertilizer.....	44	44	San Francisco to New York.
Fibre.....	12	12	San Francisco to New York.
Flint stones.....	188	188	Copenhagen to Valparaiso.
Flour.....	489	3,083	3,572	See comment.
Fruit, dried.....	15	1,969	1,984	San Francisco, Guatemala, New York, London, and Christiania.
Fruit, fresh.....	58	58	San Francisco to New York.
Furniture.....	30	30	Liverpool to south Pacific ports.
Gasoline.....	545	45	590	Philadelphia to Noumea; New York to south Pacific ports, Talara to London.
General cargo.....	100,027	38,614	138,641	See comment.
Glassware.....	75	75	New York to Shanghai and Talcahuano.
Gold.....	7	7	Aica and Valparaiso to New York and Cristobal.
Grease.....	296	296	New York to Orient.
Guano.....	21	21	San Francisco to New York.

Commodity.	Atlantic to Pacific.	Pacific to Atlantic.	Total.	Remarks.
Gums and copal.....		57	57	Balboa and Valparaiso to New York.
Gypsum.....	2,950		2,950	Marseilles to Noumea.

COMPLETING THE RECORDS.

Data Covering Omissions from Weekly Reports of Traffic through the Canal.

The form of weekly report of shipping movements published on the last page of THE CANAL RECORD was worked out after the opening of the Canal to commercial traffic, and has been found to present the essential facts concerning the movements. The table was used in its present form for the first time for the week ending October 4. In order to make the records of Canal operation complete, there are published herewith tables showing the data for the vessels using the Canal in the months of August and September. These tables show the date each vessel entered the Canal; the vessel's name; nationality; line or operator; port of origin; port of destination; general nature of cargo; quantity of cargo; and gross and net Canal tonnage.

Inquiries have been received as to the advisability of presenting also the registered or national tonnage of the vessels. This is omitted for the reason that the determination of tonnage varies as between nations, and so the national tonnage does not indicate anything with such accuracy as the Canal net tonnage measurements, which show the actual cargo-carrying capacity, in tons of 100 cubic feet, for all vessels on the same basis, irrespective of variations in construction or registration; and further, the determination of national tonnage is something with which the Canal has nothing to do, and for the figures of which it would not be responsible. The only interest the Canal has in registered national tonnage lies in the fact that its basic charges on cargo-carrying capacity (net Canal tonnage) are modified by a ruling that the sum of the charges on any vessel shall not exceed the equivalent of \$1.25, or be less than 75 cents per ton, on the basis of measurement of net tonnage for United States registry. But as United States registry measurement is one of the many national systems, differing from one another, while the rules of measurement for the Panama Canal establish precisely the one important general fact of actual cargo-carrying capacity, universal in its application, and meaning the same thing everywhere, it has been decided to publish only the tonnage as determined by the Canal rules.

In connection with the publication of data for August and September, there are published in the paragraphs following, certain data covering omissions from the weekly reports since October 1, 1914. The figures for the traffic in the various months, presented in this issue in connection with the report for June, have been revised slightly in several instances, to take into account the changes made by the ascertainment of more accurate data. Omissions from the weekly reports since October 1 are covered herewith:

ATLANTIC TO PACIFIC.

- October 12, *Honolulu*; gross and net Canal tonnage, 7,825 and 5,715, respectively.
- October 12, *Masaru*; gross and net Canal tonnage, 5,594 and 4,175, respectively.
- November 7, *Hector*; cargo amounted to 4,000 tons.
- November 29, *Athens*; gross Canal tonnage, 75.
- January 27, *Iowan*; cargo amounted to 7,650 tons.
- January 29, *John A. Hooper*; cargo amounted to 2,918 tons.
- February 13, *Allianza*; American; Panama Railroad Steamship Line; New York to Balboa; general cargo, 1,000 tons; gross and net Canal tonnage, 4,126 and 2,670, respectively.
- March 11, *Queen Maud*; gross Canal tonnage, 4,784.
- March 12, *Warrior*; American yacht, from Atlantic Ocean to Gatun Lake, without cargo; gross and net Canal tonnage, 1,221 and 455, respectively.
- March 30, *Buenaventura*; cargo amounted to 6,000 tons.
- April 27, *Limari*; cargo amounted to 1,750 tons.

Delay of Trains at Pontoon Bridge.

Effective at once, when it is seen that train No. 37, due to leave Las Cascadas at 4.50 p. m., is going to be delayed by the pontoon bridge being open to the extent of not making connection with No. 8 for Colon, it will back up from the pontoon bridge at Las Cascadas and leave Las Cascadas as No. 39 on time, or at 6.05 p. m.

This will eliminate the necessity of passengers desiring to go to Panama on train No. 39, connecting with No. 7 at Pedro Miguel, from the Las Cascadas branch, waiting for

No. 41, due to leave Las Cascadas at 7.20 p. m., and not arriving at Panama until 8.10 p. m.

C. H. MOTSETT,
Superintendent.

Balboa Heights, C. Z.,
July 23, 1915.

Obituary.

James Francis Curran, a signal maintainer in the Electrical Division, living at Cristobal, died at Colon Hospital on July 13. His residence in the United States was in Providence, R. I.

May 2, *Kiev*; Russian; Russian Volunteer Fleet; New York to Vladivostok; general cargo, 3,719 tons; gross and net Canal tonnage, 5,318 and 3,799, respectively.
 May 25, *Palena*; cargo (general) amounted to 1,270 tons.
 June 9, *Bell*; cargo amounted to 4,070 tons.
 June 19, *Rene*; cargo amounted to 2,363 tons.
 June 21, *Advance*; cargo amounted to 1,809 tons.
 June 27, *Hubert*; gross and net Canal tonnage, 4,896 and 3,559, respectively.
 PACIFIC TO ATLANTIC.
 October 1, *John A. Hooper*; cargo amounted to 3,759 tons; gross and net Canal tonnage, 2,462 and 1,536, respectively.
 October 1, *Saxon Monarch*; cargo amounted to 8,224 tons; gross Canal tonnage to 6,408.
 October 10, *Jupiter*; cargo amounted to 1,000 tons;

gross and net Canal tonnage, 11,361 and 6,142, respectively.
 October 26, *Melderskin*; cargo amounted to 6,291 tons; gross and net Canal tonnage, 4,362 and 3,326, respectively.
 December 9, *M. S. Dollar*; cargo amounted to 5,510 tons.
 December 26, *John A. Hooper*; cargo amounted to 4,000 tons.
 January 6, *Buford*, in ballast.
 January 26, *Saint Leonards*; cargo amounted to 6,860 tons.
 January 28, *Corosal*; cargo amounted to 3,540 tons.
 February 14, *Quilpue*; gross and net Canal tonnage 3,922 and 2,231, respectively.
 March 18, *Guatemala*; gross and net Canal tonnage 4,249 and 2,772, respectively.
 April 8, *Panama*; cargo amounted to 1,400 tons.

April 8, *Cairnross*; cleared for Norfolk.
 April 21, *Cristobal*; cargo amounted to 9,095 tons.
 April 23, *Colon*; cargo amounted to 2,024 tons.
 May 5, *Huasco*; Chilean.
 May 27, *Advance*; cargo amounted to 1,788 tons.
 June 5, *John C. Meyer*; cargo amounted to 5,418 tons.
 June 7, *Chile*; gross and net Canal tonnage, 4,040 and 2,628, respectively.
 June 7, *Lewis K. Thurlow*; cargo amounted 6,180 tons.
 June 9, *Allianca*; cargo amounted to 1,004 tons.
 June 13, *Chucumaque*; launch, not to be counted with oceangoing vessels.
 June 17, *Colon*, cargo amounted to 1,870 tons.
 June 19, *John A.*; did not carry cargo.
 June 24, *Advance*; cargo amounted to 1,865 tons.
 July 1, *Panama*; cargo amounted to 3,382 tons.
 July 8, *Allianca*; cargo amounted to 1,900 tons.
 July 15, *Colon*; cargo amounted to 2,868 tons.

Notice to Mariners.

Men-of-war visiting Panama Canal Zone waters are informed that national salutes will be returned as follows:

At the Atlantic entrance by Fort De Lesseps, Manzanillo Point.

At the Pacific entrance by a battery on Naos Island or one at Fort Grant barracks, dependent upon the position of the visiting ship when the salute is fired. Vessels which salute from the outer anchorage or before entering the Canal, will be answered by Naos Island; those which salute after having en-

tered the Canal, will in general be answered by Fort Grant.

GEO. W. GOETHALS,
Governor.

Balboa Heights, C. Z.
July 21, 1915.

RETAIL AND WHOLESALE PRICE LISTS.

Commissary Branch of Supply Department.

For the benefit of shipping interests there are published below the current price lists of supplies as sold from the commissary branch of the Supply Department. Shipping people will be interested in these three price lists from the commissary department: The retail cold storage price list, subject to change weekly; the wholesale fresh meat price list, subject to change at irregular periods; and the retail grocery price list, which is changed quarterly. All of these lists are published in this issue of THE CANAL RECORD, and due publicity is to be given to future lists and to changes in the current lists. This will make the entire matter available to steamship people at all times.

The following is retail grocery list No. 2, in effect August 1, 1915. The prices will be increased by 10 per cent in cases of sales to foreign naval vessels and commercial ships; and by 20 per cent in cases of sales to yachts:

* Indicates advance from preceding list.
 **Indicates five cents allowed for return of bottle.
 † Indicates reduction from preceding list.
 ‡ Sold only from commissaries, no orders taken for delivery.
 § Not less than ½ ham or ½ shoulder of fresh pork will be sold.

Commissary Hours.

Effective August 1, 1915, the open hours of the various commissary stores will be as follows:
 The commissary stores at Las Cascadas, Empire, Culebra and Toro Point to open from 7.30 to 11.30 a. m., and 1.30 to 5.30 p. m.
 All other commissary stores to open from 8 a. m. to 12.30 p. m., and 3 p. m. to 6 p. m.
 The gold departments of the Cristobal commissary to open at 2 p. m. on Saturdays and other sailing days of Panama railroad vessels.

COMMISSARY DEPARTMENT.

Wholesale Prices of Fresh Meats.

The following is wholesale price list No. 206, effective June 24, 1915, and in force until further notice. This list will govern, whether meat is sold from commissaries or from cold storage. The following prices will be increased by 10 per cent in cases of sales to commercial ships and foreign naval vessels, and by 20 per cent in cases of sales to yachts:

1. Beef hinds, No. 1.....	per lb.	\$0 19½
2. Beef hinds, No. 2.....	per lb.	15
3. Beef hinds, native.....	per lb.	09½
4. Beef fores, No. 2.....	per lb.	12
5. Beef fores, native.....	per lb.	08½
6. Beef, whole round or leg, No. 1.....	per lb.	14½
7. Beef, whole round or leg, No. 2.....	per lb.	11
8. Beef, whole round or leg, native.....	per lb.	07
9. Beef ribs, No. 1.....	per lb.	24
10. Beef ribs, No. 2.....	per lb.	16
11. Beef ribs, native.....	per lb.	10

	1.5	14.2	1.6	13.2
Tues., Aug. 31.....	1:37	7:38	14:04	20:00
	2.6	13.3	2.6	12.2

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3.47 p. m.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:
Every Thursday to New Orleans for all States. Due at New Orleans on the following Tuesday.
Every Saturday to New York, for all States. Due

at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.*

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

NOTE.—The sailings on Monday, August 23, and September 20, will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7.10 a. m., connects with the despatches for the two sailings mentioned above.

Stages of the Chagres River, Gatun Lake, and Miraflores Lake.

Maximum heights of the Chagres River, Gatun and Miraflores Lakes for the week ending midnight, Saturday, July 24, 1915:

Automatic rain gage at unstarred stations—values midnight to midnight.

Fuel.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 400 and 650 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Fuel oil may be obtained at Balboa or Cristobal from plants of The Panama Canal, or from private corporations. The present price from the Canal is \$1.25 per barrel. Prices from the corporations may be obtained on application to them.

Diesel engine oil is for sale by several companies at approximately 45 shillings per ton of seven barrels.

Subsistence supplies, including a large stock of fresh meats, vegetables, canned groceries, fruits, bakery products, etc., are available for quick delivery at either terminal. Prices are generally lower than the retail prices in the United States, and compare favorably with prices in any port of the world.

Application for supplies, or for services, should be made to the Captain of the Port, Cristobal or Balboa.

MOVEMENTS OF OCEAN VESSELS.

(Week ending at 6 p.m., July 25, 1915.)

The Canal Record

Official publication of the Panama Canal.

The Canal Record is published weekly. The subscription rate is \$1 per year in the United States and its possessions, and in Canada, Cuba, Mexico, and Panama (domestic postage), and \$1.50 in other countries (foreign postage). The paper is furnished free to United States Government departments, representatives of foreign governments, public libraries, and employes of The Panama Canal and the Panama Railroad Company whose names are on the gold roll.

All subscriptions expire on December 31. Domestic subscriptions are accordingly charged as beginning from the first of the quarter of the year in which received. Remittances should be made to pay only to December 31, on this basis; sent between July 1 and October 1, 50 cents; between October 1 and January 1, 25 cents. For foreign subscriptions the year is divided into thirds; and remittances for the remainder of this year should be: Between May 1 and September 1, \$1; between September 1 and January 1, 50 cents.

Remittances for subscriptions may be forwarded to The Panama Canal, Washington, D. C., or to The Canal Record at the address given below.

Address all Communications,
THE CANAL RECORD,
Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

More Coal Conveyors to be Placed in Bunkering Service.

For the further extension of the coaling facilities at the Canal, four more motor-driven conveyors, similar to the four now in service, are on the way to the Isthmus from the United States, and a project has been approved by which several berths at the commercial piers at each terminus will be fitted with booms for using the conveyors in unloading cars into ships' bunkers. The four conveyors now in service are used on barges, and bunker vessels at dock from the offshore side, and the new equipment will make it practicable to bunker vessels from both sides while they are discharging cargo. It is proposed to install two conveyors on both sides of Pier 8 at Cristobal, two on the front of wharf No. 9, and two on each side of Pier 7 when constructed. They will unload from a special type of car, consisting of a Lidgerwood flat car built up with 5-foot sides and ends, forming a compartment 38 feet long which will hold from 45 to 50 tons of coal.

Lock Gates to be Coated with Bitumastic Enamel.

The American Bitumastic Enamels Company, whose forces are now working on the guard and operating gates of the lower chamber of the west flight of Gatun Locks, has entered into contract with The Panama Canal to coat with bitumastic solution and enamel all of the leaves of the lock gates at Gatun and Pedro Miguel, for a lump sum of \$58,110. This is equivalent to approximately \$.113 per square foot of surface. The contractor is to prepare the surfaces and do all the work of applying the coating up to a line about one foot above the low water mark. The enamel is to be

applied only to the outside of the leaves, the interiors having been treated with the compound at the time of erection. The company guarantees the enamel to afford anticorrosive protection for a period of at least five years. The leaves at Miraflores have recently been coated with red lead, anticorrosive, and anti-fouling paints.

Work on Bona and Taboguilla Island Lights.

Following the completion of the Cape Mala light, the lighthouse forces of the Marine Division completed on August 2 the erection of the light at Bona Island, on which they had been working for the preceding week. The Bona Island light is now in service and the forces are proceeding with the erection of the light on Taboguilla Island, the last of the three new aids to navigation authorized for establishment in the Gulf of Panama.

Bona Island is on the western side of the Gulf, about 20 miles from the entrance to the Canal, and about 70 miles from Cape Mala, and is the most southern of the Otoque group. It is a small round island, about half a mile in diameter, and has a single peak rising to a height of 685 feet above sealevel. Taboguilla Island is about five miles to the southward of the entrance to the Canal and is an important landmark. It is about a mile long by half a mile wide, and rises to a peak at a height of 610 feet. The light will be located on a small haystack-shaped island off the center of the eastern side of the main island, and its principal use will be to note the turning point for vessels in rounding Taboguilla Island in approaching or leaving the Canal.

More Yachts Make Canal Trip.

Three pleasure yachts passed through the Canal last week, the *Sultana*, the *Gulma*, and the *Fiorgyn*. The *Sultana*, which is on the way from New York to San Francisco, is a steam yacht 161 feet in length by 28 feet in the beam, and carries a crew of 33. She belongs to the estate of the late E. H. Harriman. The *Gulma* is an auxiliary yacht, 86 by 18 feet, and carries a crew of eight. She belongs to Robert H. Ellis and is on the way from New York to Portland. The *Fiorgyn* is an auxiliary yacht, owned by T. Torkildsen, and is on the way from New York to Acapulco and Los Angeles. She is 117 feet long by 27 feet in the beam and carries a crew of 16.

New Edition of the Official Handbook.

A new edition of the Official Handbook of The Panama Canal has been published, and as long as the supply holds out a copy will be furnished free to any gold employe or member of his family or to any officer or enlisted man of the United States Army who may apply for it at the nearest post-office.

JOHN K. BAXTER,

Chief, Division of Civil Affairs.

BALBOA HEIGHTS, C. Z., July 30, 1915.

TRAFFIC FOR FISCAL YEAR.

Nearly Five Million Tons of Cargo through the Canal.—Over \$4,424,000 in Tolls—Analysis of Traffic.

At the close of business on June 30, 1915, was completed the fiscal year which included all of the period during which the Canal has been opened to commercial traffic of oceangoing ships. This period, from August 14 to July 1, was 10½ months, or seven-eighths of a calendar year.

During the period the Canal was used by 1,088 vessels, having aggregate gross and net tonnage of 5,416,787 and 3,843,035 tons, respectively, Panama Canal measurement, and carrying a total of 4,969,792 tons of cargo.

The movement of 4,969,792 tons of cargo in the period or 10½ months is at the rate of 5,679,762 tons in a full calendar year; or 473,313.5 tons per month; or 15,530.6 tons per day.

A summary of the numbers of vessels passing through the Canal in each direction, and the tons of cargo handled, by months, since the opening of the Canal to commercial traffic (not including the barge traffic prior to August 15) is given in this table:

Month	Eastbound.		Westbound.		Total	
	Ves-sels	Cargo tons	Ves-sels	Cargo tons	Ves-sels	Cargo tons
August...	13	49,106	11	62,178	24	111,284
Sept....	27	141,762	30	180,276	57	322,038
Oct.....	44	168,069	40	253,288	84	421,357
Nov.....	54	206,510	38	242,291	92	448,801
Dec.....	43	179,235	57	271,219	100	450,454
Jan.....	44	208,082	54	240,925	98	449,007
Feb.....	39	150,987	53	276,078	92	427,065
March...	57	217,447	80	417,610	137	635,057
April....	59	237,384	60	285,457	119	522,841
May.....	67	246,534	75	332,174	142	578,708
June....	83	320,619	60	282,561	143	603,180
Total...	530	2,125,735	558	2,844,057	1088	4,969,792

More elaborate classifications, showing the number of vessels, their gross and net Canal tonnage, and the cargo carried by them through the Canal each month in each direction, are appended to this article.

TRAFFIC ROUTES.

Vessels without cargo passing through the Canal in the period numbered 105.

Of the 983 vessels which were laden, all but 27 were plying over the five following great trade routes: The coastwise route of United States trade; a route between Europe and the west coast of the United States and Canada; a route between Europe and South and Central America; one between the Atlantic coast of the United States and the Pacific coast of South and Central America; and one between the United States and Australia, New Zealand, and the Far East. These routes were used by nearly 97 per cent of the vessels carrying cargo. The monthly traffic over each of them is presented in tabulation. The three per cent of loaded vessels which were not plying over these routes consisted principally of naval auxiliaries carrying coal to undetermined destinations, fishing vessels, and several ves-

sels carrying lumber and sugar over unusual routings

The United States coastwise route was used by 335 vessels, with total net tonnage of 1,305,291, carrying 1,846,658 tons of cargo. With reference to the total traffic, both laden and ballast vessels, this was 30.7 per cent of all vessels using the Canal, 36.5 per cent of the net tonnage, and 37.1 per cent of the cargo.

The route between Europe and the west coast or the United States and Canada was used by 142 vessels (13.05 per cent of all), with net tonnage of 528,079 tons (13.7 per cent of all), carrying 834,899 tons of cargo (16.8 per cent of all).

Traffic between Europe and South and Central America, including those vessels plying between the Atlantic terminus of the Canal and west coast ports, which carried cargo moving between Europe and South and Central America, engaged 155 vessels (14.2 per cent), with net tonnage of 428,224 (11.14 per cent), carrying 503,672 tons of cargo (10.13 per cent).

Traffic between South and Central America, including likewise the vessels terminating their voyages at one of the Canal ports but moving their cargo over this route, engaged 206 vessels (18.93 per cent), with net tonnage of 707,463 (18.4 per cent), carrying cargo amounting to 947,871 tons (19.07 per cent).

The route between the Atlantic seaboard of the United States and the Far East, including Australia and New Zealand, engaged 118 vessels (10.84 per cent), with net tonnage of 488,517 (12.7 per cent), carrying 725,712 tons of cargo (14.8 per cent).

The vessels without cargo, or in ballast, numbering 105, had an aggregate net tonnage of 306,086. This was 9.65 per cent of all vessels, and 7.96 per cent of the entire net tonnage.

The average cargo of the laden vessels was 5,055.7 tons. The average of cargo among all the 1,088 vessels, laden and in ballast, was 4,567.8 tons.

BARGE TRAFFIC

The first handling of cargo through the Canal was begun on May 18, 1914, with the towing of barges loaded with sugar; and this traffic was continued intermittently until August 15, when the regular commercial traffic of through ships began.

The barge traffic between June 30, 1914, and August 15 may be summarized as follows:

	Atlantic to Pacific		Pacific to Atlantic		Total	
	No. barges	Cargo carried	No. barges	Cargo carried	No. barges	Cargo carried
July.....	15	4,410	9	1,400	24	5,810
August....	5	1,600	4	1,600	9	2,600
Total....	20	6,010	13	2,400	33	8,410

The tolls levied in July, 1914, amounted to \$7,598.40, all on barges. The tolls on barges in August were included with those on the oceangoing ships, the aggregate being \$88,401.80.

The tolls on the barge traffic are carried as part of the receipts during the fiscal year, but in the consideration to be given the traffic through the Canal the cargo handled in barges

will not be considered. Including the barge traffic the total tonnage of cargo handled through the Canal during the fiscal year was 4,977,882 tons; without the barge traffic, that is, since August 14, 1914, it was 4,969,472 tons. From this it is seen that the barge traffic is less than one-fifth of one per cent of the total traffic since the discontinuance of barge service. And as the conditions of operation were so different, consideration of the barge traffic would be out of place in arriving at averages in the consideration of the regular commercial traffic.

COMMODITIES.

The principal commodities passing through the Canal, with the quantities moving in each direction, from August 14 to July 1, were as follows:

	Atlantic to Pacific	Pacific to Atlantic	Total
Nitrates.....	411	651,537	651,948
Sugar.....	21,038	277,776	298,814

CANAL ZONE REVENUES.

Are Hereafter to Be Turned into the Treasury and Not Expended Locally.

The sundry civil appropriation Act, governing appropriations and expenditures for The Panama Canal during the fiscal year begun July 1, 1915, which was published in THE CANAL RECORD of July 7, eliminated the separate appropriation of Canal Zone revenues for local expenditure, and such revenues will accordingly be turned into the Treasury of the United States as miscellaneous receipts. These funds have heretofore formed a considerable item in meeting the expenses for public works, schools, post-offices, and other necessities of civil government, the expenditures for which during the present fiscal year are included in a budget in the general appropriation. Between May 1, 1904, and June 30, 1915, inclusive, the total receipts in Canal Zone funds amounted to \$2,871,752.70. Of this amount, \$1,840,020.10 was revenues from various licenses, taxes, fines, water charges, etc.; \$83,660.36 was municipal funds collected prior to the fiscal year 1907; and \$948,072.24 was postal receipts.

The system of taxes and licenses has been a heritage from the civil government existing in the Canal Zone prior to the American occupation. At the time of the occupation there were five municipalities in the Zone, namely Cristobal, Buena Vista, Gorgona, Emperador, and Ancon. On April 15, 1907, the municipalities were abolished, and the four administrative districts of Cristobal, Gorgona, Empire, and Ancon established in their places. During the period of the municipalities, the revenues collected in each of them (not including postal receipts) were expended in the municipality from which collected. Under the system of administrative districts, the revenues were funded together in the hands of the Department of Civil Administration, and expended under the direction of the Governor, according to the resolutions of the Isthmian Canal Commission, Congress having appropriated them to civil government uses by successive acts, covering the time from March 4, 1907, to July 1, 1915. The omission of this appropriating clause in the Act for this year harmonizes the disposition of these revenues with that of the tolls; these revenues are to be turned into the central depository, the Treasury of the United States, and all funds for meeting the expenses of the Canal are to be drawn from it.

The Auditor has issued the following circular letter concerning the disposition of Canal Zone revenues under the present Act:

"The sundry civil appropriation Act approved March 4, 1915, eliminated the separate appropriation of Canal Zone revenues for the maintenance of the schools, post-offices, magistrates' courts, and public works in the Canal Zone. The revenues collected on and after July 1, 1915, therefore, become public moneys of the United States and are to be deposited in the Treasury of the United States as miscellaneous receipts. No deduction or disbursement can be made from the revenues so collected, but the entire amount must be deposited with the Collector, Panama Canal. All disbursements must be made directly from appropriations made by Congress for the support of the civil government of the Canal Zone.

"Any balance of revenues in the hands of collecting agents of the Canal Zone on June 30, 1915, such as postal funds, taxes, fines, and licenses, including money order fees, must be immediately remitted to the Collector as a separate item.

"At the end of July all officers or agents collecting money heretofore classified as Canal Zone revenues will render a cash abstract, form 78-A or 78-Rev., in duplicate (both copies signed), taking up on the debit side all amounts received during the month other than trust funds and on the credit side remittances to the Collector (showing collector's receipt number), and balance on hand at the close of the month. After July this cash abstract will be rendered monthly and the balance on hand at the close of the preceding month brought forward to the debit side of the account.

"In the case of postmasters the rendition of this cash abstract will be in addition to the reports now required.

"Clerks of courts, constables, and others handling both revenues and trust funds will render a cash abstract showing the details of the revenues received by them and accompanied by the duplicate of the receipts issued. Their account for trust funds will be rendered as in the past."

Levelman and Transitman Examination.

An examination for promotion to the positions of levelman and transitman will be held in the board room of the Administration Building on Sunday morning, August 15, 1915, at 9 o'clock.

The examination will be divided into three parts consisting of (1) a written test from 9 a. m. to 11.30 a. m., (2) an oral examination from 11.30 a. m. to 12 m., and (3) a statement of the competitor's experience qualifying him for promotion. All competitors will be re-

quired to complete the examination before 12.30 p. m.

Applications for entrance should be forwarded to the Office Engineer, Balboa Heights, through the head of applicant's division, before Thursday, August 12, 1915.

Applicants are to bring no books with them to the board room, as all the necessary material will be on hand.

C. J. EMBREE, O. E. MALSBURY, A. WILSON, *Board of Examiners.*

Typewriter and Stenographer and Typewriter Examinations.

The regular fall examination for typewriter and for stenographer and typewriter will be held at the Administration Building, Balboa Heights, C. Z. probably on October 3, 1915 (date to be omitted from applications); those desiring to take this examination should apply at once for form No. 1312; applications should be submitted before September 10, 1915.

All applicants should furnish typewriters and tables and should bring with them pencils, pens, ink, and erasers.

It is probable that this examination will not be held again before April, 1916.

W. P. COFELAND, *Secretary, Board of Civil Service Examiners.*

Sailing Date of the "Cristobal."

The sailing date of the steamship *Cristobal* of the Panama Railroad Steamship Line from Cristobal for New York has been set for Sunday, August 8, at 3 p. m.

Growing Fruits and Vegetable on the Isthmus.

Those interested in the movement of the Supply Department to encourage the growing of fruits and garden produce on the Isthmus, through assuring a steady market and cooperating with the producers in the handling of their goods, as set forth in THE CANAL RECORD of July 7, are advised to consult the local buyer for the department. He is in direct charge of the buying of fruits and vegetables and will have charge of the warehouse to be erected near the Playa, in Panama harbor, and his experience and intimate knowledge of the business may be found of service. The office of the local buyer is in the Panama railroad passenger station at Panama, his telephone number is Balboa 491, and his postal address is Ancon, C. Z.

Loss at East Breakwater Due to Northers.

The loss due to the effect of the northers of February 8-10 and April 3-5 on the East Breakwater in Limon Bay has been estimated, after careful surveys, at approximately \$361,000. Of this amount, \$307,000 was entailed in the destruction of trestle and loss of timber and other material, and of plant, and \$54,000 represents the loss, as far as availability in the breakwater is concerned, of 54,000 cubic yards of fill, either from the northers or by settlement, which can be replaced at approximately \$1 per yard. The loss, by reason of thorough salvaging and the adoption of economical methods in the work, is considerably less than was anticipated after the first rough estimates of damage.

The original estimated cost of the breakwater was \$3,415,000 for a 7,200-foot breakwater proper. The plans were afterwards changed to a 5,400-foot breakwater, and it is anticipated that a satisfactory breakwater can be completed within the original estimate.

The estates of the abovenamed deceased employees of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against the estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

OFFICIAL CIRCULARS.

Acting Governor.

THE PANAMA CANAL,

EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., July 31, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Effective August 2, and during my absence from the Isthmus, Lieut. Col. Chester Harding will act as Governor of The Panama Canal.

GEO. W. GOETHALS,
Governor.

Excusing from Duty Employees Drawn for Jury Service.

THE PANAMA CANAL,

EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., July 28, 1915.

CIRCULAR No. 701:

My attention has been called to the practice of heads of departments and divisions requesting that employees drawn for jury service be excused by the Court, notwithstanding such employees were chosen from the lists furnished of those available for duty as jurors. In the future, all requests of this nature will be submitted first to this office, with a statement of the reasons why the employee can not be spared, and, if approved by the Governor, the same will be transmitted to the Judge of the District Court of the Canal Zone for action.

GEO. W. GOETHALS,
Governor.

List of Gold Employees.

THE PANAMA CANAL,

EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., July 23, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

1. It is necessary for this office to have, at the earliest possible date, a complete list of gold roll employees in the new organization.

2. Please make up lists immediately on sheets eight by 14 inches, showing at the top of each sheet the name of department and division and, in a table following, the name of each employe, designation, and rate of pay, thus:

THE PANAMA CANAL.

Department	Division	Name	Designation	Rate of pay
------------	----------	------	-------------	-------------

3. Grades and designations to be grouped as far as practicable.

GEO. W. GOETHALS,
Governor.

Car Stakes.

THE PANAMA CANAL,

SUPPLY DEPARTMENT,

BALBOA HEIGHTS, C. Z., July 24, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

There are at present four steamers en route to the Isthmus loaded with lumber and piling and a large number of car stakes will be required to handle these cargoes. As a large number of car stakes have recently been made and sent out by this department, very few of which have been returned, it is believed that there are large numbers not in use, and it is requested that departments and divisions collect as many as possible and ship same at the earliest practicable date to Mr. R. B. Groves, inspector, Dock 11, Cristobal, sending invoices to the storekeeper, Balboa, C. Z.

WM. R. GROVE,
Chief Quartermaster.

Flat Cars Needed for Discharging Lumber Cargoes.

THE PANAMA CANAL,

EXECUTIVE DEPARTMENT,

BALBOA HEIGHTS, C. Z., July 30, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

There are now in port at Cristobal and Balboa over 2,000,000 feet of lumber and in order that the several cargoes may be discharged with as little delay as possible it will be necessary to use every flat car which can be made available. Please give this matter your immediate attention.

GEO. W. GOETHALS,
Governor.

Billing of Panama Canal and Panama Railroad Shipments.

THE PANAMA CANAL,

EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., July 23, 1915.

CIRCULAR No. 632-1:

1. All shipments between departments and divisions of The Panama Canal will be billed on Panama Canal billing.

2. Shipments from The Panama Canal to the Panama Railroad will be billed on Panama Railroad Company billing.

3. Shipments from the Panama Railroad to The Panama Canal will be billed on Panama Railroad Company billing.

4. Shipments to or from The Panama Canal, including stationery, etc., for the laundries at Ancon or Cristobal or any branch or the commissary department will be on commissary billing.

5. Shipments of laundry, when returned to owners, will be made on commissary billing consigned to the commissary at delivery point; billing to show owner's name.

6. All shipping orders will show consignors and consignees by departments and divisions.

7. Shipments for the various branches of the U. S. Army and Navy from The Panama Canal, also for the post exchanges and individual officers or enlisted men, will be on commercial billing at Government rates. These shipments are to be made at actual weights, and shipments will be consolidated as much as possible for each consignee and billed as one consignment in any one day, so that extensions may be figured at total weights covered by the same rate instead of on each individual item, at the minimum charge for L. C. L. or C. L. shipment. These shipments should be forwarded by freight, unless otherwise ordered, and then shipping orders should be endorsed "Express service requested." If the freight is for the U. S. Government the shipping orders will so indicate, and in such cases a Government bill of lading will be required upon delivery to consignee, which the agent will take up properly accomplished.

8. Shipments of material and supplies purchased from The Panama Canal by individuals and companies shall be made on commercial billing at tariff rates unless otherwise provided at special rates.

9. No exceptions will be made to these rules unless properly authorized in writing, and storekeepers of The Panama Canal and agents of the Panama Railroad Company will be responsible for the strict observance of these rules.

GEO. W. GOETHALS,
Governor, The Panama Canal,
President, the Panama Railroad Company.

In Charge of Obsolete Store and Printing Plant.

THE PANAMA CANAL,

SUPPLY DEPARTMENT,

BALBOA HEIGHTS, C. Z., July 24, 1915.

To all concerned—Effective today, the position of Sales Agent will be abolished. Mr. E. O. Bratt will be placed in charge of the obsolete stock at Mount Hope and will be designated as "Storekeeper, Obsolete Store, Mount Hope."

Mr. A. P. E. Doyle, Foreman Printer, will be in charge of the Mount Hope printing plant.

WM. R. GROVE,
Chief Quartermaster.

Appointment.

THE PANAMA CANAL,

EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., July 13, 1915.

CIRCULAR No. 661-21:

Effective July 8, 1915, Captain Earl J. Atkisson, U. S. A., is appointed assistant superintendent of Gatun Locks.

GEO. W. GOETHALS,
Governor.

Motor-driven Inspection Cars.

THE PANAMA CANAL,

ACCOUNTING DEPARTMENT,

BALBOA HEIGHTS, C. Z., July 20, 1914.

CIRCULAR No. 98:

Accountable officials will report to this office by not later than August 1, the number of motor-driven inspection cars in their custody, in order that numbers may be assigned and these items thereafter accounted for by those numbers.

H. A. A. SMITH,
Auditor, The Panama Canal.

Approved:

GEO. W. GOETHALS,
Governor.

Commissary Managers.

THE PANAMA CANAL,

SUPPLY DEPARTMENT,

CRISTOBAL, C. Z., July 24, 1915.

BULLETIN No. 246:

To all concerned—Under the new organization, effective July 1, 1915, the title "Commissary Storekeeper" has been eliminated and the employe in charge of each store will hereafter be known as "Manager,Commissary," and should be so addressed in official communications, etc.

BENJ. L. JACOBSON,
Depot Commissary.

COMMISSARY DEPARTMENT.

Sale of Gasoline.

THE PANAMA CANAL,

SUPPLY DEPARTMENT

CRISTOBAL, C. Z., August 2, 1915.

BULLETIN No. 256:

To Commissary Managers—Confirming telephone instructions from this office, effective at once, the Chief Quartermaster directs that the sale of gasoline through commissaries be discontinued, and in future it will be sold direct to consumers by district quartermasters and quartermaster's storehouses.

Please be governed accordingly.

BENJ. L. JACOBSON,
Depot Commissary.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 303, on Wednesday, August 11, 1915, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same. The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with boats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the Captain of the Port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the Captain of the Port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

For the benefit of applicants residing in Gatun and Cristobal or Colon, examinations for licenses as navigators of motor boats, and as chauffeurs, will be held at the office of the Captain of the Port of Cristobal on Friday, August 13, 1915, beginning at 9 a. m. Applicant should be provided with motor boats or automobiles for the demonstration test.

By direction of the chairman of the board.

F. M. NIXON,
 Recorder, Board of Local Inspectors.

SHIPPING INFORMATION.

Concise Statement on Points of Primary Interest to Users of the Canal.

In order to spread as widely as possible this information of primary importance to users of the Panama Canal, there are published below concise statements on points of most immediate concern to them. More extensive information than may be published here may be obtained from the "Sailing Directions and General Information" issued by The Panama Canal. This is a booklet of 115 pages, thoroughly explicit and carefully indexed, in which are covered all matters involved in handling vessels through the Canal. Copies of this booklet are in the hands of United States consular officers all over the world, and in the offices of the collectors of customs at United States ports, or at United States branch hydrographic offices, and have been furnished to the principal governmental and commercial maritime agencies over the world. Copies may be obtained on application to The Panama Canal, Washington, D. C., or Balboa Heights, C. Z.

PAYMENT OF TOLLS AND OTHER CHARGES.

It is necessary to place funds on deposit to cover the tolls of a vessel before she will be allowed to enter the Canal. This deposit may be placed with any Assistant Treasurer of the United States (one of whom is situated at any of the larger United States ports); or with the Assistant Auditor of The Panama Canal in Washington, D. C.; or with the Collector of The Panama Canal, Balboa Heights. The Assistant Treasurer method seems to be the most convenient for operators, as it is the one most generally used.

In case deposit is made in the United States it is advisable to request at the time of making deposit that cable advice of same be sent to the Canal, in order that there may be no delay to a vessel when she presents herself for passage.

Foreign operators may handle such depositing with equal simplicity, by directing their bankers or shipping agents to have the deposit placed with the Assistant Treasurer in New York or San Francisco, for instance.

The Canal organization has been developed to handle the passage of vessels complete and to attend to their needs in the way of tolls, coal, supplies, cables, mail, etc., without delay or "red tape" and there is no need for operators to employ local agents for vessels which come to the Canal for the sole purpose of passing through it, without taking on or discharging freight or passengers in Canal waters. In fact the interposition of a third party in the arrangements for a vessel which is simply passing through the Canal is liable to result in confusion and delay. In other words, a local agent may be needed for commercial purposes, in looking after cargo and passengers if vessels handle either at the terminal ports; but he is not needed to look after the requirements of the ship herself as far as going through the Canal, communicating, taking on supplies, coal, etc., are concerned.

REFUNDING BALANCE.

As soon as a vessel has cleared from the Canal a statement of her expenses is forwarded to her operator, with a check on the Treasurer of the United States for the balance of the deposit. In the case of lines having frequent passages through the Canal it is permissible to allow such balance to apply on account, but

the statement of each vessel's expenses for each passage is sent in all cases.

CHARGES FOR TOLLS.

Tolls on loaded commercial vessels are charged at \$1.20 per net vessel ton—each 100 cubic feet of actual earning capacity—the net tonnage being determined by the rules for the measurement of vessels for the Panama Canal. Deck load is charged for in addition, at \$1.20 per 100 cubic feet of space occupied by deck load.

On vessels in ballast the toll charge is 72 cents per net vessel ton, Panama Canal rules of measurement.

These basic charges have been modified, however, by the ruling that loaded vessels shall not pay more than the equivalent of \$1.25 per net ton as determined by the rules of measurement for United States registry; and ballast vessels shall not pay less than 75 cents per net ton, United States registry measurement.

Hence, vessels coming to the Canal for passage should have certificates of measurement according to the Panama Canal rules and also according to the rules of United States registry. These certificates can be issued at the ports of entry to the Canal but this might cause several days' delay to a vessel.

CHARGES FOR SERVICES.

There is no charge for pilotage on vessels passing through the Canal which do not stop at either terminal port to discharge or take on passengers or cargo. Also there is no charge when they stop at terminal ports for the purpose of taking on coal, supplies, etc. Pilotage charges when levied are port charges and not a part of the expenses of passing through the Canal.

The only additional expenses to which a vessel may be put for Canal transit proper would be for services rendered necessary by the condition of the ship. Such are charges for furnishing extra men on deck to handle the lines in passing through the locks, when the ship's crew is not sufficient; and tug service for sailing vessels or steamships in condition requiring assistance. Under such conditions the tug charge is \$15 per hour; or for complete transit of the Canal, 10 cents per net Canal ton or four cents per displacement ton, with a minimum charge of \$150.

PANAMA RAILROAD COMPANY.

On account of the close relationship of the Panama Railroad Company (operating the Panama Railroad Steamship Line) to The Panama Canal the former can very advantageously act as agent for other steamship lines if desired. Upon regular request it will advance funds for payment of tolls, fuel, supplies, and attend to stevedoring, etc. The services of the company may be engaged by addressing its home office, 24 State Street, New York City, or the Superintendent, Balboa Heights, Canal Zone.

FUEL.

Coal is supplied to vessels at both terminal ports, at the rate of between 400 and 700 tons a day. The facilities are being improved. The present prices for delivery from lighters, trimmed in bunkers, are \$5.40 per ton, when handled by ship's gear, at Cristobal; and at Balboa, \$6.40. These prices will advance to \$6 and \$7, respectively, on September 1, 1915. The coal is Pocahontas standard.

Fuel oil may be obtained at either terminal

from plants of The Panama Canal or from private corporations, at the rate of about 1,600 barrels an hour. The price from The Panama Canal is \$1.25 per barrel of 42 gallons, sold as dry oil at the local temperature, with subtraction of the amount of water contained, as shown by analysis. Prices from the corporations may be obtained on application to them.

Diesel engine oil is for sale by several corporations, one of which quotes a general price of 45 shillings per ton of seven barrels.

SUPPLIES.

Supplies in unlimited quantities, including meats, cold storage products, groceries, fruits, vegetables, etc., as well as ships' supplies—lubricants, cordage, ships' chandlery, standard articles for ships' use—can be purchased from The Panama Canal in either of the terminal ports and delivery can be made on short notice. By Governmental regulation these goods are sold at fixed prices very slightly above cost.

Ice is furnished for 33 cents per 100 pounds at both Cristobal and Balboa. It is available in any quantity.

Laundry is handled quickly and no advance notice is required.

Repairs to vessels may be made to any extent, except where the use of a large dry dock is required or the turning of the largest crank shafts or longest line shafts.

Ships are boarded by a boarding officer immediately on arrival. He furnishes price lists and takes orders for all kinds of supplies or fuel. Any supplementary orders or requests for any kind of services may be sent to the Captain of the Port, communication with whom is always easy.

The Captain of the Port of entry is the local executive with whom, or his authorized immediate representatives, the master of a vessel coming into the Canal will have dealings. His office is the clearing house for all business with the ships, and is the local marine headquarters. It gives out chronometer comparisons, nautical information as to charts, sailing directions, etc., delivers and receives mail, and has supervision over the delivery of coal, supplies, etc., to vessels.

COMMUNICATIONS.

While by no means necessary it is advantageous if vessels can advise in advance when they will arrive, by mail, cable, or radio. Mail is received five times a week from the United States, and approximately a week after posting. The Canal is equipped with three radio stations, two for areas within 1,000 miles of the terminal ports and one which has a sending radius of approximately 3,000 miles.

Communications should be addressed to The Panama Canal, Balboa Heights, Canal Zone. The cable address of the Canal on the Isthmus is Pan Canal, Panama; of the Washington office, Pan Canal, Washington. Codes used are A. B. C. Telegraphic, 5th edition; Lieber's; Scott's Shipowners' Telegraphic (1906); Western Union Telegraphic (Universal Edition), etc.

Shipping people are invited to remember that the fundamental purpose of the Canal is to pass ships between the two oceans quickly. They are invited, accordingly, to make any suggestions by which this purpose may be even more completely realized, and to make inquiries for additional information.

Tide Predictions.

Panama (Balboa) tide predictions for the next five weeks are given in this table:

AUGUST.				
DATE.	Time and height of high and low water.			
Wed., Aug. 4.....	3:54	10:02	16:34	22:48
	4.4	11.6	4.1	10.6

	13.7	2.0	14.0	1.0

The tides are placed in order of occurrence, with their times on the first line and heights on the second line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic Charts for this region, and which is 8.0 feet below mean tide level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it. The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 0h (midnight) to 23h (11 p. m.). All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3.47 p. m.

The Canal Record

Official publication of *The Panama Canal*.

The *Canal Record* is published weekly. The subscription rate is \$1 per year in the United States and its possessions, and in Canada, Cuba, Mexico, and Panama (domestic postage), and \$1.50 in other countries (foreign postage). The paper is furnished free to United States Government departments, representatives of foreign governments, public libraries, and employes of The Panama Canal and the Panama Railroad Company whose names are on the gold roll.

All subscriptions expire on December 31. Domestic subscriptions are accordingly charged as beginning from the first of the quarter of the year in which received. Remittances should be made to pay only to December 31, on this basis: Sent between July 1 and October 1, 50 cents; between October 1 and January 1, 25 cents. For foreign subscriptions the year is divided into thirds; and remittances for the remainder of this year should be: Between May 1 and September 1, \$1; between September 1 and January 1, 50 cents.

Remittances for subscriptions may be forwarded to The Panama Canal, Washington, D. C., or to The Canal Record at the address given below.

Address all Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Foundation Work for Pier 7 Nearly Completed.

The last of the steel cylinders for the new Pier 7 of the Atlantic entrance terminals are being driven, and about 90 per cent of them have been filled with concrete and reinforcement, in readiness for the erection of the superstructure. All of the 5,500 tons of steel for the superstructure, exclusive of the shed, have arrived from the United States, coming in two shiploads, and about 175 tons have been placed since the beginning of erection, in July.

Considering Construction of Additional Docks at Cristobal.

The Engineer of Docks has been directed to prepare estimates of the cost of constructing an additional 1,000-foot pier at Cristobal, tentatively designated as No. 6, on the site to the northward of Pier 7, toward the sea end of the mole from which Piers 7 and 8 extend. Such a pier would be an addition in the series now comprising Nos. 9, 8, and 7, in order, and would harmonize with them in layout and construction. In connection with this work, the Engineer of Docks is also to prepare estimates of the cost of replacing the timber Pier 11 and its extension, adjoining the east end of Pier 10, with reinforced concrete construction of the type used in the new piers. These investigations, looking toward extension of the docking facilities at the Atlantic entrance, have been undertaken as a result of the present congestion of transfer cargo on the piers of the terminal, and the prospects of increasing traffic.

Canal Blocked by Slide.

Movements of the slide on the west bank of the Canal at Culebra caused a suspension

of traffic from Saturday, August 7, to the afternoon of Wednesday, August 11. This was not a new or unexpected slide, but an accelerated movement of a part of the bank which has been in intermittent motion for some time. Dredges have been working at its base, keeping the channel clear, but the movement of last week brought material in the Canal more rapidly than it could be excavated. The present indications are that this slide, though active for short periods, is not as large as slides on the east bank.

Another Motorship Makes Maiden Voyage to the Canal.

The motorship *San Francisco* of the Johnson Line, which passed through the Canal on July 19 on the way to San Francisco from Gotenburg, was on her maiden voyage, having been launched at Copenhagen in June, completing her trials early in July. She is the sixth motorship of this line to go into service, and is a sister ship of the *Suecia*, of the same line, which has also made use of the Canal. The *San Francisco* is 362 feet in length by 51 feet beam, has a deadweight carrying capacity of 6,500 tons, and net Canal tonnage of 4,001. Her two 1,000-horsepower internal combustion engines, driving twin screws, make a speed of 10½ knots at sea. It has been estimated by shipping people that, as oil for fuel may be obtained at low prices at ports on the west coast, the *San Francisco* will operate at a fuel cost of approximately half the cost for a steamship of her size running over the same route.

Tickets for the Trip through the Canal.

Tickets for passage through the Canal on vessels of the Panama Railroad Steamship Line have recently been placed on sale at the Balboa Heights station. Tickets are now on sale at the Colon passenger station and Pier 11, Cristobal, for passage from the Atlantic to the Pacific, and at the Panama passenger station, the Balboa Heights station, and the docks at Balboa, for passage from the Pacific to the Atlantic. The fare one way for the general public is \$3 for adults and \$2 for children under 12 years of age; for Government employes and their families, the fare is \$2 for adults and \$1 for children under 12 years of age. Passengers are entitled to luncheon aboard the vessel and to a berth, in the event of delay over night, without additional charge.

Sale of Obsolete Stamps.

The remaining stock of the postage due stamps used in the Canal Zone from March, 1914, to March, 1915, and now obsolete will be placed on sale in the Canal Zone post-offices on August 23. These stamps can not be used for the payment of postage and are worthless except to collectors. They will be sold at their face value and cancelled as sold. Not more than one hundred sets will be sold to any one purchaser. The stock to be disposed of consists of 80,514 one's, 71,818 two's, and 9,603 ten's.

TERMINAL RADIO STATIONS.

With Increasing Business They Facilitate the Handling of Ships at the Canal.

The Naval stations at Colon and Balboa erected especially for communication with vessels coming to the Canal or its terminal ports, are performing increasingly effective service in facilitating Canal operations, and will be of even greater value when the masters of vessels shall have learned to make more use of them. Over half of the vessels coming to the Canal or its terminals are equipped with radio apparatus but only about a fourth of those so equipped have advised the authorities of their approach. It is distinctly desirable that vessels do so, as it is of considerable assistance to the Canal transportation forces, through acquainting them with the traffic problems to be met, and will greatly expedite the handling of vessels, both in the transit of the Canal, and in furnishing supplies. No charge is made against vessels for the handling of messages sent by the master relating to any of the subjects mentioned in paragraph 40 of Executive Order No. 1990, quoted below.

The Colon station is now handling approximately 2,300 messages per month, the Balboa station about 400, practically all in communication with vessels. Of these, about one-sixth are handled as a part of the Canal work, on which no charges are made. Their radii of communication have extended as far as 1,500 miles under favorable conditions, and in actual work the limit is usually the communicating radius of the vessel. The better equipped vessels will communicate with ease at a distance of 500 miles while a vessel of relatively small sending power may be unable to communicate from a point more than 100 or 150 miles from the station. Only in exceptional cases, however, would a vessel be unable to advise of her approach when 24 hours out from port.

The canal terminal stations use the Lowenstein 500-cycle spark sending system, and the international code. The high power station at Darien, which handles Government work exclusively and has no direct communications with commercial vessels, uses the Poulsen system.

The Colon station sends broadcast daily at 3.30 p. m. a news bulletin, made up of items taken from the press dispatches or any matters which might be of especial interest to vessels. Just after noon, daily, this station broadcasts on 1,400-meter wave length a weather forecast received from Key West, covering the Caribbean and south Atlantic and Gulf regions. Also, as soon as received and at 8 o'clock a. m., noon, 4 p. m., and 8 p. m. is broadcasted any hydrographic information covering dangers to navigation, such as wrecks, derelicts, etc., or changes in local navigation aids, and other important information.

It has recently been arranged, as a further convenience to commerce, that operators who

wish business messages delivered to their vessels may file them with the radio stations, for delivery as soon as the vessel comes into communication. As these messages are of private commercial nature they are charged for, at the regular commercial rate, which charge may be included with the other items for the vessel's expenses at the Canal and collected from the deposit made to cover the ship's expenses.

For the benefit of masters who may desire to avail themselves of the advantages afforded by the Canal radio facilities, there are published below the sections governing radio operations, from the Executive Order No. 1990, establishing rules and regulations for the operation and navigation of the Panama Canal and the approaches thereto:

RADIO COMMUNICATION AND REPORT.

40. As soon as radio communication can be established with the Canal, vessels should report their names, nationality, length, draft, tonnage, whether or not they desire to pass through the Canal, require coal, provisions, supplies, repairs, to go alongside of a wharf, the use of tugs, probable time of arrival, length of stay in port, or any other matters of importance or interest. If this information has been previously communicated, through agents or otherwise, to the captain of the port, it will not be necessary to report by radio, but the probable time of arrival should always be sent.

41. Control of radio communication is entirely in the hands of the radio shore stations. No vessel will be allowed to interfere in the slightest degree with the Canal radio stations; upon an order being received by a vessel at any time while within the waters under the control of the Canal, to discontinue using radio, even if in the midst of transmission of a message, she shall immediately comply.

42. Upon a ship's arriving within the 15-mile limit, and until leaving the 15-mile limit of the Canal Zone, she shall transmit only with low power, not exceeding 1/2-kilowatt.

43. Messages to stations will be sent only to Colon station (NAX) when in Gatun Locks and to northward thereof, and only to Balboa station (NPJ) when in Miraflores Locks and to southward thereof; between these two points, ships may work to either station, preferably to the nearer one; the high power station (Darien), at Darien, will not handle commercial work and will not be called for Canal business, except in case of emergency.

44. All messages between ships in the Canal Zone and ships at sea must be forwarded through the nearer shore station.

45. Messages from ships in the Caribbean Sea for ships in the Pacific waters, or *vice versa*, shall be routed through the Canal Zone shore stations.

46. All vessels fitted with radio, after leaving the terminal harbor to pass through the Canal, shall keep an operator on watch until the further terminal harbor has been reached; this applies to the time when they are anchored in Gatun Lake, while passing through the locks, or moored to the lock walls, or to any of the wharves in the Canal proper, as well as when they are under way. Messages relating to the ship's movements and the Canal business shall take precedence over all commercial messages.

47. Pilots on vessels passing through the Canal shall have the right to use a vessel's radio freely for the transaction of the Canal business.

48. Under the direction of the pilots, ves-

sels will, from time to time, report their progress through the Canal; accidents to machinery, propellers, steering gear, equipment, or anything else that may delay them or require assistance; any sickness or casualties that require medical attendance from Canal officials; or any other matters of importance that may arise.

49. No charges will be imposed against the Canal by vessels receiving or sending messages in relation to Canal business.

50. No vessel will be allowed to communicate with any lock or signal station while in transit through the Canal, except through the pilot; all messages of any kind must be sent through him. This does not apply to vessels moored at the terminals at Cristobal or Balboa, before entering, or after having passed through the Canal, which may wish to communicate through the terminal stations.

51. Vessels in transit through the Canal can communicate with the locks and signal stations, through the pilots, both by the international code and special signals; information on this subject may be obtained from the Governor of The Panama Canal.

Building in the Burnt Area of Colon.

Extensive rebuilding is in progress in the city of Colon, in the area devastated by fire on April 30. New buildings are being erected on nearly all the lots along Front Street, between the Panama Railroad station and the

Cristobal commissary store, and many of the blocks in the adjacent parts of Bolivar Street and Bottle Alley are also being occupied. Between 25 and 30 buildings, all of nonflammable material, are being erected, and up to Monday, August 9, the permits issued for construction in the burnt area numbered 40. The first permit was issued on June 10. None of the new houses have been completed. Ten will be one story in height and the remainder two stories. On the basis of a cost of construction approximating 15 cents per cubic foot, close to \$400,000 worth of building is now in progress, in charge of seven or eight contractors.

Four of the houses will be of metal lath and concrete, nine of reinforced concrete construction, and the remainder of plain concrete, in blocks or poured into forms. Some of the buildings will cover two, three, or even four lots (one instance) and the entire 40 will occupy an aggregate of 62 lots. Two individual owners have permits for five houses each, two are to build three each, and 24 are to build one each. The builders are Panamanians, Americans, British subjects, and Chinese.

The fire destroyed 430 buildings on 215 lots, in an area of 22 blocks covering 19 1/2 acres, about a third of the built-up part of the city.

The Taboguilla Island light is to be completed and placed in service in the evening of Wednesday, August 11.

WEATHER CONDITIONS, CANAL ZONE, JULY, 1915.

The rainfall for the month exceeded the station averages at all stations except Balboa, Balboa Heights, and Gamboa. Over the Pacific section considered as a whole, the rainfall was slightly below normal; over the central section about four inches in excess of the normal, while over the Atlantic section the excess was over five inches. This July has been the rainiest July since 1910 in both the Atlantic and central sections. The totals at Juan Mina, Vigia, and Frijoles exceed anything on record at these stations, and the rainfall at Frijoles was almost double the average amount. On July 23rd, .54 inch of rain was recorded at Frijoles in five minutes, breaking the record at this station, the previous maximum fall in five minutes being .53 inch, on August 12, 1914. On July 8, during a heavy rain at Alhajuela, the maximum record for one hour at this place was also broken, 4.19 inches being recorded, while the previous record of maximum fall in one hour was 3.40 inches, on December 28, 1909. Rainfall totals for the month ranged from 6.66 inches at Balboa to 21.24 inches at Brazos Brook. The maximum amount of precipitation recorded on any one day was 6.30 inches, at Colon on July 1. This rainfall, and the 5.33 inches at Alhajuela on July 8, were the only daily rains in excess of four inches. The rainfall was evenly distributed throughout the month and heavy showers occurred generally throughout the Zone on the 1st, 8th, 12th, and 17th of the month.

The estimated rainfall over the Chagres River basin was 30 per cent above the average, or 16.42 inches against a 15-year mean of 12.59 inches.

The average air temperature was slightly below normal on the Pacific coast and over the interior, and slightly above normal on the Atlantic coast. The atmospheric pressure was approximately normal. The relative humidity, daytime cloudiness, and temperature of the sea water were above normal, while the wind movement and evaporation were below the average at both coast stations.

One fog was observed on the Pacific coast on July 6, but none were observed on the Atlantic coast. Several night and early morning fogs occurred at interior stations, 72 per cent of which were dissipated by 6.30 a. m., 94 per cent by 7.30 a. m., and all fogs lifted or were dissipated by 8.30 a. m.

The elevations of Gatun Lake, in feet above mean sealevel, were as follows: Mean for the month, 86.19; maximum, on the 8th, 86.62; minimum, on the 1st, 85.96. Evaporation from the lake surface during the month was 4.107 inches.

The climatological conditions prevailing during the month at the Atlantic and Pacific coast stations are summarized in this table:

STATIONS.	Press re (reduced to mean of 24 hours.)	Temperature.					Mean relative humidity.	Precipitation.			Wind.				
		Mean.	Maximum.	Date.	Minimum.	Date.		Total inches.	Station average.	Days of .01 inch or more.	Total movement (miles.)	Prevailing direction.	Max. velocity in miles.	Direction.	Date.

Children Playing about Balboa Heights Station.

The attention of parents and others concerned is called to the dangerous practice of various young children in playing about the Balboa Heights station. On account of the numbers of trains, locomotives, and motor cars passing on the tracks of the railroad, on the one side, and the frequent passing of motor busses and automobiles along the rear of the station, this is an especially unsafe place for children, and it is expected that after the attention of parents is drawn to the situation they will not allow small children to go to the station unattended by responsible guardians.

Civil Service Examinations.

Examinations for the following positions are scheduled to be held, probably on October 17, 1915 (date to be left blank in applications): Agricultural Inspector, Philippine service; Aid, Bureau of Standards; Aid, Lighthouse service; Assistant Observer, Weather Bureau; Cadet Engineer and Cadet Officer, Lighthouse service; Civil Engineer and Draftsman, Departmental service; Draftsman, mechanical and draftsman, topographic, Panama Canal service; Draftsman, ship, Navy Department; Engineer, Indian service; Junior Engineer, civil and Junior Engineer, mechanical or electrical, Engineer Department at Large; Junior Engineer, mining, Bureau of Mines; Scientific Assistant, Department of Agriculture; Teacher, Indian service; and Trained Nurse, all services.

Applications should be obtained from and filed with the office of the Civil Service Examiners, Balboa Heights, C. Z. Applications should be filed before September 10, 1915. A card of admission will be sent to each applicant as soon as the questions arrive in this office.

In answer to questions as to residence, applicants must show residence in a State and county thereof of the United States up to the time of taking the examination, or at least to the time of executing the form, a ruling having been made that employes of The Panama Canal can claim residence in the State in which they last resided while temporarily employed on the Isthmus.

W. P. COPELAND,

Secretary, Board of Civil Service Examiners.

Levelman and Transitman Examination.

An examination for promotion to the positions of levelman and transitman will be held in the board room of the Administration Building on Sunday morning, August 15, 1915, at 9 o'clock.

The examination will be divided into three parts consisting of (1) a written test from 9 a. m. to 11.30 a. m., (2) an oral examination from 11.30 a. m. to 12 m., and (3) a statement of the competitor's experience qualifying him for promotion. All competitors will be required to complete the examination before 12.30 p. m.

Applications for entrance should be forwarded to the Office Engineer, Balboa Heights, through the head of applicant's division, before Thursday, August 12, 1915.

Applicants are to bring no books with them to the board room, as all the necessary material will be on hand.

C. J. EMBREE, O. E. MALSURRY, A. WILSON, Board of Examiners.

THE CANAL RECORD acknowledges receipt of a booklet, "The Netherlands Colony of Curaçao," containing descriptions of the ports and of the business of the colony.

LABOR FORCE AND QUARTERS IN JULY.

The force report of July 21, 1915, shows the actual working force of The Panama Canal on that date to have been 21,190; of the Panama Railroad, 5,349; and of contractors, 366, a total effective working force of 26,905. This is an increase of eight from the force on June 23, which was 26,897; is 471 more than the force on May 26, which was 26,434; and is 2,090 more than the force on April 21, which was 24,815. As compared with the June report, the report for July 21 shows an increase of 28 gold employes, though the gold force of contractors decreased by one. The silver force decreased by 20, including seven in the forces of contractors.

The gold force on the Isthmus, composed almost exclusively of white Americans, was 3,621, an increase of 28 from the preceding month; an increase of six over the 3,615 employed on May 26; and an increase of 260 from the gold force of 3,361 employed on April 21. The gold force on July 21, amounting to 3,621, was distributed as follows: The Panama Canal, 3,208; the Panama Railroad, 328; contractors, 85. Detailed figures of the employment of the Canal force on the Isthmus follow:

(1) Includes Taboga Island, Naos Island, and Palo Saco. (2) Includes 15 Asiatics. (3) Includes 12 American negroes, 70 Colombians and Panamanians, and two Panamanians on the gold roll. (4) Includes Miraflores. (5) Includes 31 Panamanians. (6) Includes Empire, Las Cascadas, and Bas Oisipo. (7) Includes 12 Panamanians. (8) Includes Colon Beach and Colon Hospital. (9) Includes 25 East Indians, 14 colored American citizens, and 95 Panamanians.

Deceased Employes.

Name	Check No.	Native of	Isthmian Residence.	Employed by	Date of death
Davis, Richard	96120	Panama	Panama	P. R. R.	July 30, 1915.
Fletcher, James	90759	Jamaica	Camp Bierd.	P. R. R.	July 30, 1915.
Gayle, James	90502	Jamaica	Colon	P. R. R.	July 31, 1915.
Maloney, Hubert	34479	Barbados	Gatun	Lighthouse Div.	Aug. 2, 1915.

The estates of the abovenamed deceased employes of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against the estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other moneys due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

POLICE CENSUS OF THE ZONE.

Shows Decrease of Civil Population, Increase of Military.

A house-to-house canvass of the inhabitants of the Canal Zone, which was made by forces of the Police and Fire Division as of July 10, shows a total population of 29,926. This does not include employes of The Panama Canal or the Panama Railroad Company living in the Republic of Panama, but is strictly an enumeration of the people living in the Canal Zone.

A similar count made between June 16 and 30, 1914, or approximately a year before, enumerated 37,706; the decrease during the period amounted to 7,780, which is slightly over 20 per cent of the population a year ago, or slightly less than 26 per cent of the present population.

As compared with a count made between December 22, 1914, and January 1, 1915, approximately six months before the count of July 10, the recent enumeration shows a decrease of 1,234 from the 31,160 inhabiting the Canal Zone at the first of the year. This is 3.96 per cent of the population at the first of the year, or 4.1 per cent of the present population. During the past six months, however, the people connected with military forces on the Isthmus have increased from 3,793 to 6,443, a gain of 2,650; while the decrease of other inhabitants of the Canal Zone, exclusive of prisoners, has been from 27,215 to 23,371, a loss of 3,844.

In the January count were included 784 inhabitants of the rural Sabanas district and of Pueblo Nuevo, many of whom are now, under the recent boundary convention, within the Republic of Panama; but this is largely offset by the fact that under the realignment of boundary the part of Pueblo Nuevo taken into the Canal Zone has, as of July 10, a population of 655.

The canvass was made by the two police districts—Balboa, from the Pacific to the south bank of the Chagres at Gamboa, and Cristobal, from the limit of the Balboa district to the Atlantic—and by enumerating the military organizations and the prisoners separately.

The Balboa district was found to contain 15,498 persons, a decrease of 3,204, or 17 per cent since the first of the year. The Cristobal district was found to have 7,873 persons, a decrease of 640, or 7½ per cent since the first of the year. Together they had a decrease of 3,844, or 14.12 per cent.

The number of American women in the Canal Zone, in the two districts (in which are not counted those connected with the military forces) was 1,563, an increase of 85 or 5.7 per cent since the first of the year. The American children similarly situated increased from 1,499 to 1,667, a gain of 168 or 11.2 per cent. The women and children connected with the military organizations increased from 96 to 238, or 142, and from 74 to 178, or 104, respectively; increases of 147.8 per cent and 140.5 per cent, respectively. There was one woman prisoner, compared with none six months before.

A detailed summary of the enumeration is given herewith. The total population counted, 29,926, shows a decrease of 31,353 from the maximum population of the Canal Zone, amounting to 61,279, enumerated in the census of 1912. The present population is seen to be less than half that of the Canal Zone approximately three years ago. The tabulation made by the Police and Fire Division follows:

OFFICIAL CIRCULARS.

Estimates for Fiscal Year Ending June 30, 1917.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., August 3, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

1. Detailed estimates for all departments and divisions for the fiscal year ending June 30, 1917, for submission to Congress, will be forwarded in sextuplicate, direct to the Auditor on or before September 15, 1914.

2. The estimates must be prepared and submitted in accordance with Section 6 of the sundry civil appropriation Act for the fiscal year 1915, approved August 1, 1914, reading as follows:

"Sec. 6. That for the fiscal year nineteen hundred and sixteen and annually thereafter the estimates of appropriations for the Panama Canal shall be submitted in detail showing the amounts required for personal services and the amounts required for material, including all supplies, under the heads of construction, maintenance, operation, sanitation, and civil government, and following each there shall be submitted notes giving in parallel columns information which will show the number, by grade and classes, of officers, employees, and skilled and unskilled laborers proposed to be paid under each of said appropriations for the ensuing fiscal year and those paid at the close of the fiscal year next preceding the period when said estimates are prepared and submitted; also, in connection with each item for material and miscellaneous purposes other than salaries or pay for personal services, the amounts actually expended or obligated, quantities purchased, and prices paid for material or supplies during the entire fiscal year preceding the preparation and submission of said estimates.

"There shall also be submitted in connection with the foregoing information, statements of actual unit cost of all construction work done, and of estimated unit cost of work proposed to be done, for the fiscal years included in the notes so required to be submitted with the annual estimates."

3. The estimates must be submitted under each of four heads—"Construction," "Maintenance and Operation," "Sanitation," and "Civil Government." Operation and maintenance divisions that will do construction work must specify the items of construction work that they will perform, the amount that will be charged for such work, and the proportion of labor, material, and indirect charges to be charged by them to construction.

4. The estimates for salaries and wages of officers and employees and skilled and unskilled labor will be prepared on form P. C. 279-Rev; the estimates for material, supplies, plant, equipment, and miscellaneous items will be prepared on form P. C. 280-Rev.

5. The estimates for salaries and wages will be arranged in the order in which they were included in the estimates for 1916. The form of the estimates for 1916 should be followed exactly.

6. Under "Organization paid June 30, 1915" the exact organization should be shown as it existed at that time.

7. If an increase in any item is submitted, either in number of employes or rates of pay, concise reasons for the increase must be given on a separate statement.

8. Each sheet should be totaled separately both as to number of men and amount. Where more than one is used for the estimate, the total of each sheet will be carried to a summary statement on a separate sheet.

9. Overtime will be estimated for separately as a lump sum item.

10. In addition to the items of material and supplies estimated for on form P. C. 280, there will be submitted an estimate for the following items:

(a) Purchase, maintenance, repair, and operation of motor-propelled or horse-drawn passenger carrying vehicles, with an explanation of the amount required, the public purposes for which the vehicles are intended, and the officials or employes by whom the same are to be used.

(b) Equipment, item by item.

(c) Freight transportation furnished by the Panama Railroad.

(d) Telephone service.

(e) Traveling expenses.

(f) Work to be performed by other departments and divisions, specifying each department or division separately and the character of the work to be done.

11. In addition the estimates will be accompanied by a statement of the work to be performed for other departments and divisions. This statement, as well as the statement of work to be performed by other departments and divisions, should only be submitted after an agreement is reached as to the character of the work to be done and the amount to be charged therefor.

12. The estimates for construction work will be accompanied by a statement showing the estimated cost of the proposed work to be done, compared in parallel columns with the actual cost of similar construction work during the fiscal year 1915.

13. Under Section 3 of the sundry civil appropriation Act approved June 23, 1913, the Auditor has been designated to supervise the compilation and classification of all estimates for the Panama Canal, and he should be consulted if these instructions are not understood. Before the estimates are typewritten the Auditor should be consulted as to the form so as to make it unnecessary to rewrite them in his office.

CHESTER HARDING,
Acting Governor.

Leave Regulations—Deferred Annual Leave.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., July 30, 1915.

CIRCULAR NO. 602-14:

In the case of those employes whose cumulative leave plus annual leave has been deferred for the good of the service beyond the four months period within which the regulations require such leave to be taken, the deferred annual leave may not be carried longer than nine months after the close of the employe's service year, and heads of departments and divisions should make every effort, if the employe desires to go on leave within that time, to permit him to do so. The employe should in such cases, for his own protection, have a definite written understanding with the head of his department or division in regard to his leave. If, however, the deferred cumulative and annual leave is not taken within the nine months, the annual leave will be forfeited.

GEO. W. GOETHALS,
Governor.

Acting Officials of Panama Railroad.

THE PANAMA CANAL,
EXECUTIVE OFFICE

BALBOA HEIGHTS, C. Z., August 4, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Effective July 31, 1915, and during the absence of Mr. Charles H. Motsett on leave, Mr. Samuel W. Heald will act as Superintendent of the Panama Railroad Company.

During the absence of Mr. Motsett the duties now performed by Mr. Heald as Master of Transportation will be assumed by Mr. William F. Foster, and the duties now performed by Mr. Foster as terminal trainmaster will be assumed by Mr. Charles W. Penman.

GEO. W. GOETHALS,
President.

Assistant Engineer in Charge of Pacific Terminal Construction.

THE PANAMA CANAL,
DEPT. OF OPERATION AND MAINTENANCE,

BALBOA HEIGHTS, C. Z., July 31, 1915.

To all concerned—Effective August 3, Mr. H. D. Hinman is appointed Assistant Engineer in charge of construction, field engineering, and inspection, Pacific terminals subdivision, Division of Terminal Construction, vice General Superintendent J. A. Walker, resigned.

H. H. ROUSSEAU,
Engineer of Terminal Construction.

Approved: GEO. W. GOETHALS,
Governor.

Accountable Official.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,
BALBOA HEIGHTS, C. Z., August 3, 1915.

CIRCULAR NO. 100:

Effective this date, Mr. H. D. Hinman is designated an accountable official of The Panama Canal, vice Mr. J. A. Walker, and as such will account for all non-expendable property in the service of the Division of Terminal Construction at the Pacific terminals.

H. A. A. SMITH,
Auditor, The Panama Canal.

Approved: CHESTER HARDING,
Acting Governor.

In Charge of Obsolete Store and Supply Department Operations at Atlantic Docks.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

BALBOA HEIGHTS, C. Z., August 5, 1915.

To all concerned—Effective today Mr. R. B. Groves will be in charge of the obsolete store at Mount Hope, vice Mr. E. O. Bratt, transferred.

Mr. A. W. Degenaar will be in charge of the Supply Department operations on Cristobal-Colon docks as inspector, vice Mr. R. B. Groves.

WM. R. GROVE,
Chief Quartermaster.

Accountable Official.

THE PANAMA CANAL,
ACCOUNTING DEPARTMENT,

BALBOA HEIGHTS, C. Z., August 5, 1915.

CIRCULAR NO. 101:

Effective at once, Mr. R. B. Groves is designated an accountable official of The Panama Canal, vice Mr. E. O. Bratt, and as such will account for all material, equipment, and supplies carried in stock at the obsolete storehouse. Nonexpendable property in use at the obsolete storehouse and in the scrap yards will be carried on the property records of the district quartermaster, Cristobal.

H. A. A. SMITH,
Auditor, The Panama Canal.

Approved: CHESTER HARDING,
Acting Governor.

Acting General Foreman of Machine Department of Balboa Shops.

THE PANAMA CANAL,
MECHANICAL DIVISION,

BALBOA HEIGHTS, C. Z., August 5, 1915.

To all concerned—Effective August 5, and during the absence of Mr. S. G. Shearer, general foreman, machine department, Balboa shops, on leave, Mr. C. S. Perry will act a general foreman of this department.

J. J. EASON,
Assistant Superintendent, Mechanical Division.

Approved: D. C. NUTTING,
Superintendent.

Typewriters and Numbering Machines.

THE PANAMA CANAL,
SUPPLY DEPARTMENT

BALBOA HEIGHTS, C. Z., August 2, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

The storekeeper at Balboa advises that he has requisitions for three typewriters which he is unable to fill on account of none being available in the storehouse. There are also no numbering machines available for issue.

It is believed that there are a number of typewriters and numbering machines on the Isthmus that are not in use and it is requested that the heads of departments and divisions turn any extra machines they may have over to the Mechanical Division to be overhauled and returned to stock at Balboa storehouse in order to avoid, if possible, the purchase of additional typewriters and numbering machines.

WM. R. GROVE,
Chief Quartermaster.

To Act as Land Agent.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., August 4, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

During the absence on leave of Mr. R. S. Carlson, Mr. Walter F. Van Dune is designated to act as Land Agent, effective August 5, 1915.

By direction of the Governor.

C. A. McILVAINE,
Executive Secretary.

COMMISSARY DEPARTMENT.

Cold Storage Prices.

For the benefit of shipping interests as well as of the local patrons of the commissary branch of the Supply Department, there is published below the retail cold storage price list, effective August 12 and subject to change each week. This list and the wholesale price list for fresh meats indicate the costs of all cold storage goods. The price list for groceries at retail which is now in effect was published in THE CANAL RECORD of July 28, 1915, covering four pages. Copies of this list may be obtained on application, by mail or from the boarding officers who visit incoming ships. These lists are published in order that the shipping interests may be kept informed of the facilities afforded by The Panama Canal for meeting the needs of vessels in the way of supplies.

The prices are increased by 10 per cent for sales of commercial and foreign naval vessels, and by 20 per cent for sales to yachts:

The following is a list of retail prices of cold storage provisions which will be effective August 12, 1915:

FRESH MEATS.

 The prices quoted in current retail cold storage list will govern for all other items not included in above.

Powder, Curry, 4-oz. Bottle.

THE PANAMA CANAL,
 SUPPLY DEPARTMENT,
 CRISTOBAL, C. Z., August 4, 1915.

BULLETIN No 262:
 To all concerned—This item was quoted in retail grocery price list No. 1 at five cents, whereas the correct price was eight cents up to and including July 31, 1915.
 Price change No. 654, effective August 1, changes price from five cents to seven cents.

Please correct this to read eight cents to seven cents, Commissary managers will take credit adjustment accordingly.

BENJ. L. JACOBSON,
 Depot Commissary.

Taboga Launch Service.

Leave Balboa dredge landing—Daily, except Thursday; at 5.30 p. m.: Monday, Thursday, Saturday, and Sunday, at 9.40 a. m.

Leave Taboga—Daily, except Friday, at 7 a. m. (On Mondays and days following holidays, one hour earlier); Monday, Thursday, and Saturday at 1.30 p. m.; Sunday at 7.15 p. m. The 9.40 a. m. trips from Balboa await the arrival of Panama Railroad trains.

Proposals for Excavating and Loading 500,000 Cubic Yards of Rock in Sosa Hill for East Breakwater.

Sealed proposals will be received at the office of the Chief Quartermaster, Balboa Heights, C. Z., until 10 a. m., August 28, 1915, and then opened, for the excavation of 500,000 cubic yards, more or less, of rock for the East Breakwater.

Bids must be accompanied by cash or certified check made payable to the Collector of The Panama Canal in the sum of \$5,000 as a guarantee that the bidder will, if required by The Panama Canal, enter into a contract with satisfactory bond, certified check, or cash in the sum of \$10,000 as security for the faithful performance of the work covered by the contract.

Bids should be marked "Proposal for excavation of 500,000 cubic yards of rock for the East Breakwater," and addressed to the Chief Quartermaster, Panama Canal, Balboa Heights, C. Z.

Rainfall from July 1 to 31, 1915, Inclusive.

Table with columns: STATIONS, Maximum one day, Date, Total for period. Rows include Pacific Section (Balboa, Balboa Heights, Miraflores, Pedro Miguel, Rio Grande), Central Section (Culebra, Camacho, Empire, Gamboa, Juan Mina, Alhajuela, El Vigia, Frijoles, Trinidad, Monte Lirio), and Atlantic Section (Gatun, Brazos Brook, Colon, Bocas del Toro).

- *Beck, W. J.; Cannon, John; Carozzi, Charles; Chapman, Mrs. F. H.; Colgan, James; Dreghorn, Matthew; Fletcher, Capt. Harry; Gales, Harry; Harvey, Mrs. F. J.; Irwin, Gordon; Joseph, Dr. Morris; Miller, A. C.; Morgan, William; Morris, Thomas C.; Otis, Clay; Raphael, Bert; Rafael, Edward; Vincent, Peter

* Special delivery. † Card.

Tide Predictions.

Panama (Balboa) tide predictions for the next five weeks are given in this table:

Table with columns: DATE, Time and height of high and low water. Rows for August (Wed. Aug. 11 to Tues. Aug. 31) and September (Wed. Sept. 1 to Wed. Sept. 15).

consecutively from 0h (midnight) to 23h (11 p. m.) All hours greater than 12 are in the afternoon (p. m.), and when diminished by 12 give the usual reckoning. For instance, 15:47 is 3:47 p. m.

Stages of the Chagres River, Gatun Lake, and Miraflores Lake.

Maximum heights of the Chagres River, Gatun and Miraflores Lakes for the week ending midnight, Saturday, August 7, 1915:

Table with columns: DAY AND DATE, STATIONS (Vigia, Alhajuela, Gamboa, Gatun Lake, Miraflores Lake). Rows for Sun. Aug. 1 to Sat. Aug. 7.

July Rainfall for Three Years.

Table with columns: STATIONS, 1913, 1914, 1915, Station Av., Years of record, Rainy days '15. Rows include Pacific Section, Central Section, and Atlantic Section.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans, for all States. Due at New Orleans on the following Tuesday.

Every Saturday to New York, for all States. Due at New York the following Friday, with the exception of the Advance, which is due there on Saturday.

Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.*

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

NOTE.—The sailings on Monday, August 23, and September 20, will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District or Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7.10 a. m., connects with the despatches for the two sailings mentioned above.

Coal is supplied to vessels at both Cristobal and Balboa, at the rate of between 400 and 650 tons per day. Present prices are: At Cristobal, from lighters, trimmed in bunkers, or from cars alongside wharf, handled by ship's gear, per ton, \$5.40; use of steam hoist and crane per hour, \$1; at Balboa, the price is \$1 more per ton, either form of delivery.

Sailings of Vessels in Regular Service with the United States.

Table with columns: Sails, Arrives. Rows include Santa Marta, Advance, Metapan.

(Continued on page 450.)

CRISTOBAL-COLON TO NEW YORK.

NEW ORLEANS TO CRISTOBAL-COLON.

The Canal Record

Official publication of The Panama Canal.

The Canal Record is published weekly. The subscription rate is \$1 per year in the United States and its possessions, and in Canada, Cuba, Mexico, and Panama (domestic postage), and \$1.50 in other countries (foreign postage). The paper is furnished free to United States Government departments, representatives of foreign governments, public libraries, and employes of The Panama Canal and the Panama Railroad Company whose names are on the gold roll.

All subscriptions expire on December 31. Domestic subscriptions are accordingly charged as beginning from the first of the quarter of the year in which received. Remittances should be made to pay only to December 31, on this basis: Sent between July 1 and October 1, 50 cents; between October 1 and January 1, 25 cents. For foreign subscriptions the year is divided into thirds; and remittances for the remainder of this year should be: Between May 1 and September 1, \$1; between September 1 and January 1, 50 cents.

Remittances for subscriptions may be forwarded to The Panama Canal, Washington, D. C., or to The Canal Record at the address given below.

Address all Communications,

THE CANAL RECORD,

Balboa Heights, Canal Zone,
Isthmus of Panama.

NOTES OF PROGRESS.

Peruvian Line Establishing New Service.

With the transit of the steamship *Ucayali* through the Canal on Wednesday, August 11, on the way from Mollendo to Cristobal, the Peruvian Line (Compañía Peruana de Vapores y Dique del Callao) is establishing a service between the Atlantic terminus of the Canal and the west coast of Ecuador and Peru. The line will carry both passengers and cargo and will have a sailing each way every 14 days. Sailings from Colon will be on Mondays, from Balboa on Tuesdays.

The establishment of a regular service between Baltimore and Peruvian ports by this line is in abeyance. Three vessels of the company have made the voyage from Baltimore to Peru, laden principally with coke, but that the service will be continued has not been determined.

Hamburg-American Building Nearly Finished.

The office building of the Hamburg-American Line on the water front at Cristobal, which was begun in June, 1914, but upon which work was suspended after the outbreak of the European war, is nearing completion, and the offices of the line in Colon will probably be moved into it by the end of this month.

The building is a two-story structure of substantial proportions, built in a strict Roman Tuscan style of architecture. The most striking feature is the massive Tuscan columns, 24 in all, supporting the roof and the wide second story balcony which surrounds the building on all sides. Each column consists of a 15-foot shaft, two and one-half feet in diameter, resting on a pedestal five feet 10 inches high, and approximately three and

one-half feet on the sides. The building is 105 feet long by 71 feet wide in outside plan measurements, while the interior length and width are 67 feet 10 inches and 33 feet six inches, respectively.

The ground floor will be used for office purposes, the second floor for employes' quarters. To the right and left as one enters from the front are the freight and passenger departments, respectively; in the rear are the manager's office and record rooms. Near the center is a fire-proof vault, on the front of which is an indented panel, intended to frame a painting to be sent from Germany. The counters, partitions, doors, and other woodwork are of solid mahogany. The ceiling is of asbestos board, set in rectangular squares between exposed beams and rafters. The floor is paved with mosaic tile. Access to the second floor is given at each end of the building by an interior spiral stairway, built of concrete.

The exterior of the building is finished in a light buff stucco. On the street and sea sides of the building, in the triangular space below the roof, are the words "Hamburg-Amerika Linie" in raised block letters, surmounted by the shield with the letters "H. A. P. A. G." which is the emblem of the line.

The "La Habra's" Narrow Escape from Destruction.

The oil tank steamship *La Habra* of the fleet of the Union Oil Company of California passed through the Canal on August 12, in returning from England after an experience unusual for a vessel of her class. On the outward voyage the *La Habra* was loaded with 8,597 tons of naphtha and benzine, from Talara for London, with which she passed through the Canal on January 18. Fire broke out, presumably from a short circuit in the pump room, while the vessel was in the north Atlantic, wallowing through a heavy sea. The contents of several of the compartments caught fire, and the crew began to take to the boats, believing the vessel doomed. But as the tanks exploded the heavy seas breaking over the vessel washed in through the tank cover apertures, and the water floated the oil out and thus extinguished the fire. The *La Habra*, considerably damaged, made her way to port and went into dry dock. Five of the crew who had taken to a boat were lost through the breaking of a cable; but of those who had remained on the ship, clinging to the rails while waiting for the end, none were lost.

The *La Habra* is one of the largest of the 25 oil carriers of the company, having a capacity of 72,000 barrels, equalled in the company's fleet only by the *Pectan* and the *San Joaquin*. Her length is 425 feet, beam 57 feet, and loaded draft 26 feet, and net Canal tonnage is 5,267. On her latest passage of the Canal she was carrying 10,600 tons of oil in bulk.

FIRST YEAR OF OPERATION.

Vessels Numbering 1,317 Have Net Tonnage of 4,596,444.—Tolls, \$5,216,149.26.

The first year of regular commercial operation of the Canal was completed at the close of business on Saturday, August 14, 1915. Commercial operations began in the morning of August 15, 1914, with the start of the *Ancon* through the Canal on the opening voyage.

During the year a total of 1,317 oceangoing vessels, in commercial or naval service and including yachts, passed through the Canal. Their aggregate net tonnage, Panama Canal measurement, was 4,596,644 tons, and their aggregate gross tonnage, Panama Canal measurement, was 6,494,673 tons. The average net tonnage of the vessels was 3,490. The average gross tonnage was 4,931.

As divided between eastbound and westbound movements, 661 vessels passing from the Pacific to the Atlantic had aggregate gross and net Canal tonnages of 3,227,757 and 2,286,144, respectively; while 656 vessels in transit from the Atlantic to the Pacific had gross and net tonnages of 3,266,916 and 2,310,500, respectively.

The tolls earned during the year, including \$114,085.89 levied on United States Government vessels, but not collected, amounted to \$5,216,149.26. The earnings by months were as follows:

	Gross earnings.	Net collections.
August 15-31, 1914	88,401.80	88,401.80
September	266,513.28	265,600.80
October	375,787.44	366,786.48
November	381,533.28	369,161.28
December	410,043.60	407,914.80
January, 1915	419,037.12	398,601.12
February	383,904.96	383,904.96
March	560,784.96	551,092.56
April	442,415.49	442,415.49
May	547,954.60	522,676.95
June	541,181.55	539,229.05
July	606,578.77	573,365.67
August 1-14	192,912.41	192,912.41
Total	5,216,149.26	5,102,063.37

In this connection it is interesting to note the figures for traffic through the Suez Canal during the calendar year 1914, as reported in the *Journal of Commerce* of Liverpool and London, of June 17, 1915, on the basis of the company's annual report. "During 1914," it is stated, "4,802 ships, representing a net tonnage of 19,409,495, went through the Canal. In comparison with 1913, this is a fall of 283 ships and 624,389 tons. Commercial traffic shows a fall of 784 ships and 2,842,576 tons. Warships and government transports show an increase of 501 ships and 2,218,187 tons. * * * From the 1st of August to the 31st December, 1914, the commercial traffic of the canal fell nearly 40 per cent; an important compensation for this, however, was the exceptional activity of military transports. The loss which the company sustained during the first five months of the war was about six and a half million francs. The total receipts for 1914 were 125,121,237.54 francs, representing a fall of 4,804,711 francs on the total for

1913. Expenses totalled 32,940,674.77 francs. These were 1,159,890 francs less than in 1913. The balance of income over expenditure was 80,359,898.44 francs. * * *. The average tonnage of ships passing through the canal in 1913 was 3,940, and in 1914, 4,042."

If Suez and Panama Canal reckoning of net tonnage be taken to be practically the same in the aggregate, it is seen that about four and one-half times as much tonnage went through the Suez Canal in the year 1914 as went through the Panama Canal during the first year of its operation. The number of ships using the Suez Canal was about three and two-fifths as many as used the Panama Canal. The total receipts at Suez (125,121,237.54 francs being equivalent, at 19.3 cents per franc, to \$24,148,398.85) were four and five-eighths times the amount of tolls earned by the Panama Canal during its first year of operation.

Vessels with Large Cargoes.

The average loading of the 983 laden vessels which passed through the Canal during the fiscal year ending June 30, 1915, was 5,055.7 tons, and the average for all vessels, laden and in ballast, in that time was 4,567.8 tons. From this it is seen that a cargo of 10,000 tons or over is practically double the average size.

During the fiscal year the number of vessels which passed through the Canal carrying 10,000 or more tons of cargo was 41. The largest cargo was 12,040 tons, consisting of sugar and general produce, carried by the *Alaskan* through the Canal on June 25, on the way from Hilo to Delaware Breakwater. Of the 41 vessels, 28 ships, or 68 per cent, were in the service of the American-Hawaiian Steamship Company, operating in the United States coastwise trade. The vessels with cargoes of 10,000 tons or over, with their ports of origin and destination, are shown below.

The vessels listed below, constituting 4.17 per cent of all the laden vessels making use of the Canal in the period, carried a total of 454,130 tons of cargo, or slightly over nine per cent of the total cargo, which amounted to 4,969,792 tons.

Date.	Vessel	Tons of Cargo	From	To
August 17	<i>Arizona</i>	11,183	New York	San Francisco.

Curtailement of Panama Railroad Steamship Line Service through the Canal.

In view of the establishment of the service through the Canal by the Peruvian Line the Panama Railroad Steamship Line will diminish its service through the Canal to the extent of withdrawing from it the *Colon* and the *Panama*, which will make Cristobal their southern terminus, and operating through the Canal only the *Advance* and the *Alliance*. This is in line with the company's previously announced policy of withdrawing as much from being a cocarrier as is feasible. Of the quantities of transfer cargo which are delivered at the terminals, much would have been greatly delayed in transit if the company's vessels had been withdrawn earlier.

Refund of Rent.

In THE CANAL RECORD of June 23, 1915, on page 384, was published a circular letter from the Auditor, giving directions as to making claim for refunds of rent, specifying that each claimant should give the correct name, if different from that shown on the receipt, metal check number, department and division where employed and present post-office address. A large number of receipts have been received in this office without this information. Employes who forwarded their rent receipts prior to August 1 and have not received a pay receipt as a refund for the amount due, should immediately forward this information to the Auditor. No refund will be made until this information is furnished.

H. A. A. SMITH,

Auditor, The Panama Canal.

BALBOA HEIGHTS, C. Z., August 17, 1915.

Sales of Plants from Nursery at Ancon.

The Canal horticulturist reports that at the Ancon nursery, which is now open for the sale of decorative plants, about 30 varieties of popular ornamental plants are being propagated and will be put on sale about October. He desires advance orders, payable on delivery of plants. Persons going to the nursery should bear in mind that sales are not made for cash and that the nursery will be open for sales from 8 to 11 a. m. and 3 to 5 p. m. only.

TIME SAVED BY CANAL.

Record of the "Pennsylvanian" is Instance of Economy.—Savings for Vessels of Different Speeds.

The fundamental purpose of the Canal is to save time. The prevailing high prices for charters make this of especial importance at present.

In addition to the economies effected by saving time, and reducing overhead expenses due to the shorter time of travel, the shorter route can greatly increase the effectiveness of the fleets. Between the Atlantic and Pacific coasts of the United States, one vessel can now haul practically what two would have been needed for over the route around South America. The record of the *Pennsylvanian* may be cited as an instance.

When the *Pennsylvanian* of the American-Hawaiian Line set a new record for time of transit from Philadelphia to San Francisco, by making the voyage in 14 days, 17 hours, and 25 minutes, her average speed over the course of 5,130 nautical miles was about 14½ knots, or 348 miles a day.

If the *Pennsylvanian* had made the voyage from Philadelphia to San Francisco by way of the Strait of Magellan, a distance of 13,003 miles, at the same speed, the voyage would have required approximately 37 days and eight hours. This is a little over 2½ times as long as the trip by way of the Canal required.

The 3,997 barrels of fuel oil which the *Pennsylvanian* burned on the trip by way of the Canal would have been increased for the longer voyage to 9,942½ barrels. The use of the Canal saved accordingly about 5,965 barrels of oil. At 80 cents a barrel this amounts to \$4,772. The Canal tolls on the *Pennsylvanian*, levied at \$1.25 per ton on 4,064 net tons, United States registry, amount to \$5,070. In other words, the saving on fuel alone in this case, by the use of the Canal, comes to within \$300 or paying the tolls on the ship. The saving of all the other per diem expenses of operation, possibly \$200 a day, for 22 days, represents almost clear saving to the operator.

A summary of the savings for vessels of nine, 10, 12, 14, and 16 knots, on voyages between principal Atlantic and Pacific ports is given on the opposite page.

First Dance at Hotel Aspinwall.

A dance will be held in the enlarged dance hall at the Hotel Aspinwall on Taboga Island, on Saturday night, August 21. The launch *Aspinwall* will make not only the regular trip from Balboa dredge landing at 5.30 p. m., but is also scheduled to leave for Taboga Island at 8 o'clock for the benefit of those who come from the east side of the Canal by the 5 o'clock train. The capacity of the launch is 35 persons. As it makes the trip in an hour, passengers coming on last launch can reach the island in time to enjoy three hours of dance that night.

The hotel porches and garden will be decorated with Japanese lanterns. Dance music will be furnished by professional cabaret musicians. Coffee and cakes, ice cream, and lemonade will be served, a charge of 25 cents per person being made to cover all expenses; tickets will be on sale at the hotel office.

Numerous rooms at the hotel are available without previous reservation. Launches will leave for Balboa on Sunday at 8 a. m., 3.30 p. m., and 7.15 p. m.

This dance is in the nature of an experiment and will be repeated if successful.

QUARANTINE ACTIVITIES.

Have Increased by one-third since January—
Summary of July Movements.

Emigration from the Isthmus to foreign ports during the month of July exceeded immigration from foreign ports by 600 persons. This brings the net emigration since July 1, 1913, a period of 25 months, to 26,831 persons. This is at the rate of 1,073.2 per month. During the same time the Canal force decreased from 42,262, reported as at work on June 25, 1913, to 26,905, reported on July 21, 1915. This is a decrease of 15,357, which is at the rate of 614.3 per month.

The activities of the quarantine forces at the two ends of the Canal in July exceeded considerably the work in preceding months. The number of vessels entering, 246, exceeded all other months of this year, the nearest approach having been 213 vessels in March. The number of persons examined, 19,110, exceeded those for previous months, which have been: January, 14,119; February, 13,632; March, 18,168; April, 14,637; May, 17,163; and June, 17,725. In these examinations, during the seven months considered, the members of crews have been, on an average, two and one-half times as numerous as passengers. The rise of the total number of examinations is in step with the increase of Canal traffic though affected considerably by variations in passenger travel.

A summary of the quarantine activities on the Isthmus during July is given in this consolidated report for the ports of Balboa-Panama and Cristobal-Colon during the month:

Number of vessels inspected and passed	237
Number of vessels held in quarantine	9
Total	246
Supplementary inspections of vessels detained	4
Number of vessels fumigated on arrival	7
Number of vessels fumigated on departure	1
Total	8
Number of crew passed on medical officers' certificates	1,828
Number of crew examined	14,136

The estates of the abovenamed deceased employees of The Panama Canal or the Panama Railroad Company are now in process of settlement, and any claims against the estates or any information which might lead to the finding of heirs or to the recovery of property, bank deposits, postal savings or postal money order deposits, or any other money due them, should be presented at once to the Administrator of Estates, Room 320, Administration Building, Balboa Heights, C. Z. All claims should be itemized, sworn to before a notary public, or other public officer having a seal, and submitted in duplicate. These names will be published but once.

JOHN K. BAXTER,
Administrator of Estates.

OFFICIAL CIRCULARS.

Notice to Divers.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., August 10, 1915.
CIRCULAR No. 702:

When diving work is necessary in channels where currents are created by the drawing or discharging of water by the locks, divers must, prior to entering the water, make arrangements with the control house operator of the locks involved. When a diver's work is finished, he shall give definite advice to the control house operator and shall, during the progress of his work, keep the operator advised as to his entering and leaving the water. His work shall be so arranged as not to impede traffic.

CHESTER HARDING,
Acting Governor.

Returning Oil Drums.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,
BALBOA HEIGHTS, C. Z., August 13, 1915.
HEADS OF DEPARTMENTS AND DIVISIONS:
The general storekeeper, Balboa, advises that oil drums from the construction departments under the annual contract, expiring June 30, 1916, requisition 2308-C, are coming in very slowly. As under the terms of this contract if the drums are not returned in six months The Panama Canal is required to pay for them, it is requested that every effort be made to return the drums received under this contract to the general storekeeper, Supply Department, Balboa, at the earliest practicable date.

WM. R. GROVE,
Chief Quartermaster.

Electrical Appliances or Changes in Wiring in Quarters.

THE PANAMA CANAL,
EXECUTIVE OFFICE,
BALBOA HEIGHTS, C. Z., August 4, 1915.
CIRCULAR No. 676-6:

1. Occupants of buildings belonging to The Panama Canal and Panama Railroad Company are hereby forbidden to make any addition or change whatsoever in the electrical wiring in their apartments, or to use electrical appliances of any kind whatsoever, without first obtaining the necessary authority from the office of the Electrical Engineer.

2. Applications for the use of electrical appliances or requests for additions or alterations of any kind to electrical systems should be made direct to the Electrical Engineer and not the the district quartermasters.

CHESTER HARDING,
Acting Governor.

Rock and Clay from Division of Terminal Construction.

THE PANAMA CANAL,
DEPT. OF OPERATION AND MAINTENANCE,
BALBOA HEIGHTS, C. Z., July 31, 1915.

To all concerned—Departments and divisions desiring to be furnished with rock or clay loaded by steamshovels operated by the Division of Terminal Construction, are requested to kindly place all such orders on a standard work request, form No. 159-b. This work request should state the yardage, class of material, date when required, the kind of cars in which delivery is requested, whether Panama Railroad transportation is desired to destination, and also what department or division will dump or dispose of the material, and the place where the same is required. In addition to forwarding the usual number of copies of work request to this division, it is requested that two extra copies of same be made for the information of the Panama Railroad and forwarded directly to the Superintendent of Transportation, who will in turn send one copy to the yardmaster at Balboa. On account of confusion which invariably results from attempting to meet the requirements of other departments and divisions for this material, it will be impossible hereafter to handle such requests as these if made orally or by telephone.

H. H. ROUSSEAU,
Engineer of Terminal Construction.

Shipments on Passenger Trains.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,
BALBOA HEIGHTS, C. Z., August 12, 1915.
HEADS OF DEPARTMENTS AND DIVISIONS:

At the request of the Superintendent, Panama Railroad Company, this office forwarded a circular letter to the various employes of the Supply Department on August 7 directing that passenger train shipments be reduced to a minimum. The following letter has been received from the storekeeper at Balboa in reply and

the same is quoted for your information and any action you may desire to take in this connection:

"Referring to your circular letter of August 7 in regard to passenger train shipments.

"Very few passenger train shipments are originated by the Supply Department. Practically all such shipments are occasioned by departments ordering material telephoning request that passenger shipment be made, in which case we have no recourse other than to make passenger shipment, unless we can judge from the nature of the material that it is manifestly unnecessary to make passenger shipment.

"Under the present system of handling supplies out of Balboa store, passenger shipments certainly ought to be reduced to a minimum. We load out a local each day for all main line points and a local car three days a week for branch line. Straight cars are also loaded each day for Paraiso store and one for dry dock store. These cars are moved from the storehouse at 5 o'clock each afternoon and go out on the locals at 4 o'clock the following morning. Any requisitions which we receive for shipment in the evening that are important enough can be loaded in these cars any time before 4 o'clock and the material should be in the hands of the party desiring same not later than noon of the next day."

WM. R. GROVE,
Chief Quartermaster.

Supplement No. 5 to List of Nonexpendable Property Published with Circular No. 656-1.

THE PANAMA CANAL,

ACCOUNTING DEPARTMENT,
BALBOA HEIGHTS, C. Z., July 29, 1915.

- Meters, water
- Sockets, rope, for star well drill
- Ties, cow
- Wrenches, tool, for star well drill

INSTRUCTION TO ACCOUNTABLE OFFICIALS.

Cable reels and other containers, which may hereafter be designated as expendable items, will be invoiced as separate items when they have a returnable value. When Washington orders covering such items are received, the Chief Quartermaster will decide if they have a returnable value, and will inform the storekeeper, the division ordering the material, the Auditor, and others concerned. When it is decided that they shall be returned, the value of the containers will be deducted from the contract price of the material and shown as a separate item. When containers are not considered to have a returnable value, no change will be made in the price of the article.

H. A. A. SMITH,
Auditor, The Panama Canal.

Approved:
GEO. W. GOETHALS,
Governor.

Entrance Rates for Silver Employees.

THE PANAMA CANAL,
EXECUTIVE DEPARTMENT,

BALBOA HEIGHTS, C. Z., August 12, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

There is considerable laxity on the part of certain foremen, field clerks, and field timekeepers with respect to compliance with circular No. 666-Revised. Entrance rates for silver employees as therein authorized are not being properly observed and it will be necessary to place this work in more competent hands. The Chief Timekeeper will report to you the failures which come to his notice and those who are plainly careless should be discharged.

CHESTER HARDING,
Acting Governor.

Form for Request for Leave of Absence in Excess of Five Days.

THE PANAMA CANAL,
EXECUTIVE DEPARTMENT,

BALBOA HEIGHTS, C. Z., August 13, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

Form 194-4, request for leave of absence in excess of five days, has been revised with the following notice appearing on the bottom of the form:

"Request for Time Voucher must be forwarded to the Chief Timekeeper, Balboa Heights, in all cases, where payment is desired prior to the employee entering on leave of absence and upon termination of service."
Please destroy your stock of this form and make requisition on Mount Hope for a supply of the revised form at once.

By direction of the Acting Governor.

C. A. McILVAINE,
Executive Secretary.

Examination by Board of Local Inspectors.

The Board of Local Inspectors will conduct examinations at the Administration Building, Balboa Heights, room No. 303, on Wednesday, August 25, 1915, beginning promptly at 9 a. m., for persons desiring the following classes of licenses: Pilots, masters, mates, marine engineers, chauffeurs, and navigators of motor boats. All applicants for license must procure from the office of the board, Balboa Heights, forms of application and information respecting the filling out of the same, not later than the day previous to the examination. In addition, all persons desiring chauffeurs' licenses must provide themselves with automobiles with which to demonstrate their ability properly to operate the same. The demonstration test for applicants for chauffeurs' licenses will be given on Tuesday, the day preceding the written examination, at 2 p. m., at the Administration Building, Balboa Heights; on Wednesday, the day of the regular examination, for out-of-town applicants, at 2 p. m., at the Administration Building, Balboa Heights.

Applicants for licenses as navigators of motor boats will be required to give a demonstration of their ability to operate such boats, and will be obliged to provide themselves with oats for this purpose. This test will be given on Thursday, the day following the written examination, as follows: At Cristobal, upon arrangement with the Captain of the Port; at Gamboa, at 8 a. m., and at Balboa at 2 p. m. Applicants for the test at Cristobal or Balboa should present themselves at the office of the Captain of the Port; at Gamboa, the deputy inspector will be present at the signal station at the hour mentioned above.

For the benefit of applicants residing in Gatun and Cristobal or Colon, examinations for licenses as navigators of motor boats, and as chauffeurs, will be held at the office of the Captain of the Port of Cristobal on Friday, August 27, 1915, beginning at 9 a. m. Applicants should be provided with motor boats or automobiles for the demonstration test.

By direction of the chairman of the board.

F. M. NIXON,
Recorder, Board of Local Inspectors.

Specifications for Excavation and Loading Rock from Sosa Hill Quarry for East Breakwater.

Amendment No. 1, August 11, 1915.

Any employe who may resign in order to become eligible for award of the contract will be permitted to retain the quarters he was holding as a employe, or the equivalent thereof, during the time he is engaged on this work regardless of whether he is living in family or bachelor quarters. The same rule will apply to any employe who may resign to accept employment with the contractor.

Proposals for Cement Sweepings.

Sealed proposals will be received at the office of the Chief Quartermaster, Panama Canal, Balboa Heights, C. Z. until 3 p. m., August 18, 1915, and then opened, for the purchase of any or all of a lot of cement sweepings, approximately 1,100 sacks. These sweepings may

be examined and full information obtained upon application to the storekeeper, Balboa, C. Z. The Panama Canal reserves the right to reject any or all bids. Proposals should be marked "Proposal for purchase of cement sweepings" and addressed to the Chief Quartermaster, Balboa Heights, C. Z.

Mail for Offices at Balboa.

THE PANAMA CANAL,
EXECUTIVE OFFICE,

BALBOA HEIGHTS, C. Z., August 10, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

A considerable amount of mail for the Mechanical Division, the Captain of the Port, the Receiving and Forwarding Agent of the Panama Railroad, Mr. R. K. Morris, storekeeper, Supply Department, and the commissary at Balboa is delayed because of the fact that it is improperly addressed to Balboa Heights.

Please be advised that mail for delivery to the addressees given above should be addressed to Balboa post-office and not to Balboa Heights.

C. A. McILVAINE,
Executive Secretary.

Quarters for Employes in Fiscal Year 1917.

THE PANAMA CANAL,
SUPPLY DEPARTMENT,

BALBOA HEIGHTS, C. Z., August 11, 1915.

HEADS OF DEPARTMENTS AND DIVISIONS:

To assist the Supply Department in determining matters connected with quarters for employes, will you please submit a statement at your earliest convenience showing the estimated total number of gold employes in your organization for the fiscal year ending June 30, 1917, so divided as to show the number to be employed in each town. For convenience in tabulation it is requested that a form be used, showing the numbers of employes in each district, in geographical order, from Ancon-Balboa to Cristobal-Colon.

WM. R. GROVE,
Chief Quartermaster.

Misdirected Letters.

BALBOA HEIGHTS, C. Z., August 16, 1915.

The following insufficiently addressed letters, originating in the United States and its possessions, have been received at the office of the Director of Posts and may be procured upon request of the addressees:

Allen, Thos. A.	Kidd, Bradley
Brown, Henry J.	Laing, H. A.
Core, H. C.	Muro, Fred (5 papers)
Gilbaugh, J. W.	Oglesby, R. J.
Grube, Claud	Oliver, Amos
Hastings, Ed.	Riley, Charlie
Hennesey, Thomas	Riley, Robert E.
Hensley, Robert (2)	Shay, Miss Helen
Herbert, John	Ward, Jno. C.
Jordan, Hastings A.	Whelen, Mrs. Townsend
Kenyon, Ralph	

JOINT LAND COMMISSION.

Joint Land Commission Notice.

The Commission will resume public hearings on Monday, August 16, and the following is a calendar of claims set for hearing for the week ending August 21:

Monday, August 16—Docket 852, Manuela G. de Iglesias.

Tuesday (p. m.) August 17—Docket 854, Claris McMakin; docket 855, Antolino Garcia.

Wednesday, August 18—Docket 866, Gumercinda Iglesias; docket 867, Abraham Johnson; docket 873, Joseph Osborne; docket 877, Mrs. Ann Williams.

Thursday, August 19—Docket 879, Loice Loebel; dockets 880 and 1595, Juan Apercio; docket 885, Jose Guerrero.

Friday, August 20—Docket 1662, Juana Miranda. J. A. LANGSTON, Acting Secretary.

Rules of Dismissal.

In the matter of sundry claims for property at Peñas Blancas, rule of dismissal No. 186, June 19, 1915, dockets Nos. 1371 and 1490—The claim of Santana Melendez, docket No. 1371, and that of Santana Melendez, Teresa Barrio, and Ramona Melendez, docket No. 1490, which came on for hearing before the Commission on April 9, 1915, are hereby dismissed for the reason that the evidence submitted to the Commission does not justify an award being made in these claims.

FEDERICO BOYD, NICHOLAS CORNET, LEVI MONROE KAGY, S. LEWIS, Commissioners.

Taboga Launch Service.

Leave Balboa dredge landing—Daily, except Thursday; at 5.30 p. m.; Monday, Thursday, Saturday, and Sunday, at 9.40 a. m.

Leave Taboga—Daily, except Friday, at 7 a. m. (On Mondays and days following holidays, one hour earlier); Monday, Thursday, and Saturday at 1.30 p. m.; Sunday at 7.15 p. m. The 9.40 a. m. trips from Balboa await the arrival of Panama Railroad trains.

COMMISSARY DEPARTMENT.

Cold Storage Prices.

For the benefit of shipping interests as well as of the local patrons of the commissary branch of the Supply Department, there is published below the retail cold storage price list, effective August 19 and subject to change each week. This list and the wholesale price list for fresh meats indicate the costs of all cold storage goods. The price list for groceries at retail which is now in effect was published in THE CANAL RECORD of July 28, 1915, covering four pages. Copies of this list may be obtained on application, by mail or from the boarding officers who visit incoming ships. These lists are published in order that the shipping interests may be kept informed of the facilities afforded by The Panama Canal for meeting the needs of vessels in the way of supplies.

The prices are increased by 10 per cent for sales to commercial and foreign naval vessels, and by 20 per cent for sales to yachts.

The following is a list of retail prices of cold storage provisions which will be effective August 19, 1915:

 § Not less than ½ ham of ½ shoulder of fresh pork will be sold.

Commissary Hours.

The open hours of the various commissary stores are as follows:

The commissary stores at Las Cascadas, Empire, Culebra, and Toro Point are open from 7.30 to 11.30 a. m., and 1.30 to 5.30 p. m.

All other commissary stores are open from 8 a. m. to 12.30 p. m., and 3 p. m. to 6 p. m.

The gold departments of the Cristobal commissary store open at 2 p. m. on Saturdays and other sailing days of Panama Railroad vessels.

Price Changes.

The following changes in prices of articles in stock at the commissary stores became effective August 4:

SHIPPING INFORMATION.

September Weather Probabilities.

The following weather conditions may be expected to prevail at the Canal entrances during the month of September, 1915. The predictions are based on the records at Ancon and Colon for the past seven and eight years, respectively.

Winds—Light southeast winds will prevail over the Atlantic coast, with an average hourly velocity of about seven miles, although a maximum velocity as high as 35 miles an hour may occur during the passage of local rain or thunder showers.

Over the Pacific coast and the interior, light northwest winds will continue to prevail with an average hourly velocity of about six miles. A maximum velocity of 25 or 30 miles an hour may be expected during local rain or thunder storms, but such velocities seldom last more than a few minutes.

Rain—The average September rainfall on the Atlantic coast for a period of 44 years is 12.52 inches, while the average amount at the Pacific entrance for a period of 18 years is 7.80 inches. Heavy showers may be expected over both coasts, and 19 to 24 days on which 0.01 inch or more of rain occurs. The average number of days on which the rainfall equals or exceeds one inch is four on the Atlantic coast, and two on the Pacific side.

Fogs—Few, if any, fogs are likely to occur on either coast, though night and early morning fogs will be numerous over the interior. Under the present operating conditions they should not prove a hindrance to the navigation of the Canal, as all that occur may be expected to lift or become dissipated by 8.30 a. m. The average number of fogs over the Gaillard Cut section of the Canal, during the month of September, is 25, of which 57 per cent are dense. (In a dense fog objects can not be distinguished at a distance of 1,000 feet).

Temperature—An average air temperature of approximately 80 degrees Fahrenheit may be expected over both coasts. The maximum temperature for the month is not likely to exceed 94°, or the minimum fall below 68°, at the Pacific entrance to the Canal, while at the Atlantic entrance a temperature higher than 90° or lower than 71° degrees, is not likely to occur. The mean daily range in temperature will probably be about 14 degrees Fahrenheit on the Pacific coast, and nine degrees on the Atlantic coast.

Barometric pressure—Except for the well marked diurnal change, caused by the daily changes in temperature, variations in atmospheric pressure on the Isthmus are so slight as to have little value as indicators of future weather conditions. The mean atmospheric pressure for the month will be about 29.84 inches over both coasts. The highest pressure is not likely to be above 29.95 inches, or the minimum lower than 29.70 inches.

Storms—Local wind, thunder, or rain squalls of more or less limited extent may be expected quite frequently over the Isthmus during the month of September. No severe general storms may be expected, as the Canal Zone lies without the regions of violent and widespread atmospheric disturbances. The West Indian hurricane season is from July to October, but the normal path followed by these storms during the month of September lies well to the northward of the Isthmus. However, a rough sea, accompanied by brisk northerly winds, may be experienced occa-

sionally outside the breakwater, following the passage of one of these storms. The average number of days on which thunder storms occur on the Atlantic and Pacific coasts is 29 and 18, respectively.

Generally cloudy weather will continue over both coasts, and smooth to moderate seas may be expected at the Pacific entrance to the Canal.

Tides—The maximum amplitude of tidal range at Colon is only about two feet, and no consideration need be given to tidal fluctuation in navigating the Atlantic entrance to the Canal.

The average tidal range at the Pacific entrance is approximately 13 feet, although a range of 20 feet sometimes occurs during spring tides.

Panama (Balboa) tide predictions are given below:

Tide Predictions.

Panama (Balboa) tide predictions for the next five weeks are given in this table:

AUGUST.				
DATE.	Time and height of high and low water.			
Wed., Aug. 18.....	2:30 1.9	8:30 14.4	15:08 1.7	21:06 12.9

Wed., Sept. 22....	2:48 14.7	8:50 1.1	15:09 14.6	21:10 0.6

The tides are placed in the order of occurrence, with their times on the first line and heights on the second

line of each day; a comparison of consecutive heights will indicate whether it is high or low water. The heights, in feet and tenths, are reckoned from mean low water springs, which is the datum of soundings on the Coast and Geodetic survey charts for this region, and which is 8.0 feet below mean sea level. To find the depth of water, add the tabular height to the soundings given on the chart, unless a minus (-) sign is before the height, in which case subtract it.

The time used is Cosmopolitan Standard, for the meridian 75° W. The hours of the day are numbered consecutively from 01 (mid night) to 23h (11:00 p. m.). All hours greater than 12 are in the afternoon (p. m.) and when diminished by 12 give the usual reckoning; for instance: 15:47 is 3.47 p. m.

Mail Despatches.

Following is the schedule of the despatches of mail made to the United States each week by the Cristobal post-office:

Every Thursday to New Orleans, for all States. Due at New Orleans on the following Tuesday.

Every Saturday to New York, for all States. Due at New York the following Friday, with the exception of the *Advance*, which is due there on Saturday.

Every Monday to New York, for all States except Louisiana, Mississippi, Arkansas, and Texas. Due at New York the following Monday.*

Train No. 6, leaving Panama at 11 a. m., connects with the above despatches.

NOTE.—The sailings on Monday, August 23, and September 20, will not land mail in New York until Tuesday of the following week; hence, despatches on those dates will be only for the following States: New England States, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, District of Columbia, North Carolina, South Carolina, Ohio, Indiana, Illinois, Michigan, Wisconsin, North Dakota, South Dakota, Iowa, Minnesota, Montana, Wyoming, Idaho, Washington, Oregon, and northern California. Despatches to States not listed above will be made on the Thursday boat to New Orleans. Train No. 4, leaving Panama at 7.10 a. m., connects with the despatches for the two sailings mentioned above.

Stages of the Chagres River, Gatun Lake, and Miraflores Lake.

Maximum heights of the Chagres River, Gatun and Miraflores Lakes for the week ending midnight, Saturday, August 14, 1915:
