LETTER OF TRANSMITTAL.

THE PANAMA CANAL, CANAL ZONE,
HEALTH DEPARTMENT,
Balboa Heights, September 13, 1915.

Lieut. Col. CHESTER HARDING,
*Acting Governor of the Panama Canal,
Balboa Heights, Canal Zone.*

SIR: I have the honor to submit the following report of the operations of the department of health for the month of August, 1915.

Very respectfully,

CHAS. F. MASON,
Chief Health Officer.

GENERAL REMARKS.

No cases of yellow fever, smallpox, or plague have originated on or were brought to the Isthmus during the month.

VITAL STATISTICS.

EMPLOYEES.

The health of the employees remained good during the month. The number of names on the rolls for the preceding month was 36,024.

The total number of admissions to hospitals and quarters was 1,007, a rate of 335.44 per thousand, as compared with 389.22 for the preceding month, and 367.62 for the corresponding month of last year.

The total number of deaths from all causes was 17; of these, 12 died from disease, or 3.99 per thousand, as compared with 3.34 for the preceding month and 3.26 for the corresponding month of last year.

The constantly noneffective rate was 10.22, compared with 10.71 for the preceding month and 11.32 for the corresponding month of last year.

The total admission rate for malaria, hospitals and quarters, was 72.28, compared with 101.39 for last month and 89.73 for the corresponding period of last year, and the total noneffective rate 1.63, compared with 1.94 for last month and 1.95 for August, 1914. Malaria caused 21 per cent of all admissions to hospitals and quarters. Sixteen per cent of the total noneffective rate was caused by malaria. The diseases next to malaria causing the highest admission rates, in the order of their numerical importance, were: Diseases of the digestive system, venereal diseases, and diseases of the respiratory and circulatory systems. These five classes of diseases caused 55 per cent of all admissions to hospitals.

The admission rate for typhoid fever was 0.33, while the rate for the previous month was 0 and for the corresponding period of last year 0.27.

EFFECTS OF RACE.

The admission rate to hospitals and the death rate for disease for black employees were 169.35 and 3.44 per thousand, as compared with 432.45 and 7.77 for white employees. The noneffective rate for disease and injuries for black employees per thousand was 8.50, as compared with 21.87 for white employees.

The admission rate to hospitals and quarters for malaria was 55.81 per thousand for blacks, as compared with 183.86 for whites.

The death rate among Americans was 5.78, and the admission rate to hospitals for disease was 291.91. The admission rate for malaria to hospitals and quarters was 147.40 for Americans.

DEPORTATIONS.

There were 6 deportations accomplished during the month, all of whom were employees; for disease 2, and for injury 4.

CANAL ZONE.

The population of the Canal Zone is 30,219, among whom there was a total of 50 deaths. Of these, 46 deaths were for disease, giving a rate of 18.26 per thousand, as compared with 11.58 for the preceding month and 16.23 for the corresponding month of last year. Of the total deaths from disease the percentage under 5 years was 50, compared with 38 last month.

There were 59 births reported, giving a rate of 23.42 per thousand. Of these births 15 were of white and 44 of colored children. There were 18 deaths of children under 1 year of age, 2 white and 16 colored, giving an infant mortality of 133 for white and 364 for colored children, with a general average of 305. The percentage of stillbirths to total births was 5.

PANAMA CITY.

The population of the city is 60,373, among whom there was a total of 149 deaths; of these, 146 deaths were from disease, giving a rate of 29.02 per thousand, as compared with 25.24 for the preceding month and 23.55 for the corresponding month of last year. Of the total deaths from disease the percentage under 5 years of age was 49, compared with 59 last month. The principal causes of death showing an increase as compared with July were: Malaria, 6, as against 1 last month; tuberculosis, 25, as compared with 17 for the preceding month; and lobar pneumonia, 6, as against 2 for the month of July.

There were 274 births reported, giving a rate of 54.46 per thousand. The infant mortality was 161 per thousand. The percentage of stillbirths to total births was 6.

COLON.

The population of the city is 29,331, among whom there were 54 deaths; of these, 51 deaths were from disease, giving a rate of 20.86,

as compared with 24.14 for the preceding month and 22.54 for the corresponding month of last year. Of the total deaths from disease the percentage under 5 years was 51, compared with 51 last month.

The principal causes of death showing an increase as compared with July were: Dysentery 1, as against none last month; pneumonia 4, as compared with 3 for the preceding month; gastritis 2, as compared with none for the month of July.

There were 55 births reported, giving a rate of 22.50 per thousand. The infant mortality was 327 per thousand. The percentage of stillbirths to total births was 2.

HOSPITAL DIVISION.

ANCON HOSPITAL.

During the month the average number of patients constantly in hospital was 470.44. The per capita cost of patients in hospital proper was \$1.988 gross and \$0.984 net. The net per capita cost of patients in the insane asylum was \$0.377.

INSANE DEPARTMENT.

Thirteen patients were admitted for mental observation during the month, 5 of whom had been committed to the institution for that purpose in former years. Fifteen of the 17 patients discharged had recovered full possession of their mental faculties or were found not to be insane after repeated and thorough examinations, and the other 2 were deported in an unimproved condition to the Dutch West Indies and the United States.

Two deaths occurred among the insane female population.

There were no admissions of the physically disabled to the farm department in the month, but 3 of this class of inmates were discharged at their own request, and 1 of these was deported by the Panama Canal to his home in Jamaica.

On the 21st instant authority was granted for the consolidation of the Corozal Hospital for the Insane and the hospital farm at Corozal, which hereafter will be operated under the name of Corozal Hospital.

The principal object of this merger was to concentrate administration and jurisdiction, to simplify accounting and to place the hospital on the same basis as those insane institutions in the United States carrying on occupational treatment and farm operations conjointly.

Construction work done by the mentally affected patients, such as grading the grounds, setting out trees, plants, hedges, etc., continues with gratifying results, and those thus employed are noticeably quiet, contented, and healthy.

The dairy, piggery, poultry yard, and garden are being operated with profit to the institution. During the coming month 500 White Leghorn and Rhode Island pullets will be received from the States to replace an equal number of hens at this place the usefulness of which has practically ended through age, thus necessitating their disposal by marketing.

CHRONIC WARD.

There were 24.58 chronic and incurable patients constantly cared for during the month. The cost per patient per day was \$0.265. Detailed statistics are shown in Table XIII.

COLON HOSPITAL.

The average number of employees constantly sick was 40.91. The average number of days' treatment per employee was 7.68. The per capita cost of patients was \$2.42 gross and \$1.72 net. Detailed statistics are shown in Table XIV.

PALO SECO LEPER ASYLUM.

The number of patients under treatment at the end of the month was 57, compared with 56 for the preceding month. Detailed statistics are shown in Table XV.

SANTO TOMAS HOSPITAL.

During the month a total of 1,334 patients was treated, 63 less than for the preceding month. The daily average of patients in hospital was 448, as compared with 443 for July, and the total number of hospital days was 13,891, as compared with 13,746 for the preceding month. A total of 87 deaths have occurred, with tuberculosis, malaria, organic disease of heart, and measles the chief causes, in the order named.

Detailed statistics are shown in Table XVI.

DISTRICT DISPENSARIES.

The dispensary having the highest admission rate for malaria was Gatun, with an average weekly percentage of 1.06; that having the lowest was Ancon, with a percentage of 0.09.

Detailed statistics are shown in Table IX.

SANITATION—CANAL ZONE.

The following communicable diseases were reported during the month:

Measles.....	9
Typhoid fever.....	1
Mumps.....	3
Diphtheria.....	2
Malarial fever.....	194
Tuberculosis.....	14
Whooping cough.....	6
Dysentery.....	2
Rubella (rotheln).....	1

Detailed statistics are shown in Table XVII.

SANITATION—PANAMA.

The favorable malarial conditions continued during the greater part of the month. One week there were no cases of malaria reported, thus attaining the zero mark for the first time. In the past few days, since the heavy rains began, anopheles larvæ have been found in increased numbers.

BUSH CUTTING.

In addition to the regular amount of grass cutting, an extra work gang of 25 men has been cutting the jungle on this side of the Curundu River. A few pools and what is believed to be an old river bed were discovered, which were ideal places for mosquito breeding.

VACCINATION.

The vaccination of school children has been completed, thus finishing the vaccinations for the whole city.

CONTAGIOUS DISEASE AMONG CHILDREN.

The greatly increased number of measles cases reported this month is due to the fact that every school was visited and all cases reported. Three of the leading physicians were fined \$25 each for failure to report infective diseases, and since then a great many more cases have been reported than in any previous month.

TOTAL INFECTIOUS DISEASES DURING MONTH.

The following communicable diseases were reported during the month:

Measles.....	241
Chicken pox.....	4
Pulmonary tuberculosis.....	16
Diphtheria.....	3
Whooping cough.....	4
Tubercular meningitis.....	1

Detailed statistics are shown in Table XVII.

SANITATION—COLON.

The department has been actively engaged in antimalarial work during the month, and has submitted a comprehensive plan for the elimination of breeding places in the entire district; this includes the swamp areas of Mount Hope, the large area extending from the Union Oil section to Camp Bierd, the extensive marsh lying south of the filter plant, known as Arcia's property, and the section west of the Margarita Island railroad.

It is planned to drain the marsh lands of the Arcia and the Margarita sections and admit the sea water; to dry fill the entire swamp area of Mount Hope; and to put a hydraulic fill in the Union Oil section.

Many improvements have been made in the stable district of Colon. One stable was condemned and demolished as being hopelessly insanitary. Many have undergone structural improvements with special reference to rat proofing, and the better policing of the district has made a noticeable reduction in the fly situation.

A plan of police cooperation for the reduction and abatement of nuisances has been inaugurated and a special patrolman has been detailed for duty with the inspector in charge of nuisance work. A marked effect upon the number of nuisances has been observed.

The following communicable diseases were reported during the month:

Mumps.....	26
Chickenpox.....	4
Malarial fever.....	4
Tuberculosis.....	6
Whooping cough.....	4

Detailed statistics are shown in Table XVII.

QUARANTINE SERVICE.

The work of the division has been conducted without special incident during the month. There have been no fresh developments in the quarantine situation on the west coast of South America, with the exception of the appearance of plague at Coquimbo, Chile.

The fence inclosing the Balboa quarantine reservation has been completed with the exception of the gates. Some planting of trees and shrubs has been done under the supervision of the horticulturist of the quartermaster's department. The quarantine pier is still in process of construction but almost complete.

No disease of a quarantinable nature arrived at our ports during the month.

Detailed statistics are shown in Table XVIII.

Closets disinfected.....	2,259
Rat traps used daily.....	453
Adult Anopheles destroyed in houses.....	5,740
Adult Culices destroyed in houses.....	21,743
Larvacide used..... gallons.....	792
Crude oil used..... do.....	14,510
Kerosene used..... do.....	991
Rats destroyed.....	475
Containers with stegomyia larvæ found.....	1

SUMMARY OF ROUTINE WORK DONE BY THE HEALTH OFFICE, PANAMA.

Mosquito, rat, and fly work:	
Linear feet of ditches cleaned and maintained.....	20,480
Linear feet of new ditches dug.....	12,371
Number of cubic yards of earth used in filling.....	0
Gallons of larvacide used.....	689
Gallons of crude oil used.....	5,149
Square yards pools oiled.....	516,165
Water containers treated.....	15,154
Mosquito-breeding places found.....	194
Fly-breeding places found.....	130
Flies trapped (13,000 per quart)..... quarts.....	34
Number rats trapped.....	610
Number of room disinfections made.....	10
Garbage collection:	
Number loads garbage removed to dump.....	4,447
Number cubic yards garbage removed to dump.....	7,430
Total number of cans garbage emptied.....	108,135
Buildings:	
Number of buildings inspected.....	5,641
Number of plans for new buildings approved.....	16
Number of permits granted for repairs to old buildings.....	72
Total number of permits granted.....	88
Number of buildings condemned.....	7
Number of buildings demolished.....	4
Street cleaning:	
Average number of square yards cleaned daily.....	600,000
Average number of square yards streets sprinkled daily.....	90,000
Number private properties cleaned during month.....	13
Number of notices served and nuisances abated.....	248
Vaccinations:	
Number of vaccinations during month.....	797
Total number of vaccinations since Apr. 1, 1914.....	23,244

WORK REPORT FOR COLON, CRISTOBAL, AND MOUNT HOPE.

[Health office, Cristobal, Aug. 31, 1915.]

Sanitation, general, Colon:	
Square yards streets cleaned.....	4,501,752
Square yards alleys maintained.....	676,000
Number of private properties cleaned.....	124
