LETTER OF TRANSMITTAL.

THE PANAMA CANAL, CANAL ZONE,
HEALTH DEPARTMENT,
Balboa Heights, May 16, 1916.

Maj. Gen. GEO. W. GOETHALS,
*Governor The Panama Canal,
Balboa Heights, Canal Zone.*

SIR: I have the honor to submit the following report of the operations of the Department of Health for the month of April, 1916.

Very respectfully,

E. E. PERSONS,
Acting Chief Health Officer.

GENERAL REMARKS.

No cases of yellow fever, smallpox, or plague originated on or were brought to the Isthmus during the month.

VITAL STATISTICS.

The health of the employees remained good during the month. The number of names on the rolls for the preceding month was 33,656.

The total number of admissions to hospitals and quarters was 586, a rate of 207.70 per thousand, as compared with 290.53 per thousand for the preceding month, and 282.02 per thousand for the corresponding month of last year.

The total number of deaths from all causes was 23, of these 18 died from disease, or 6.38 per thousand, as compared with 5.80 for the preceding month, and 1.76 for the corresponding month of last year.

The constantly noneffective rate was 9.81, compared with 10.77 for the preceding month, and 9.85 for the corresponding month of last year.

The total admission rate for malaria, hospitals, and quarters, was 7.80, compared with 6.89 for last month, and 28.48 for the corresponding period of last year; and the total noneffective rate 0.26, compared with 0.35 for last month, and 0.95 for April, 1915.

The five diseases causing the highest admission rates in the order of their numerical importance were: Venereal diseases, diseases of the digestive system, diseases of the respiratory system, diseases of the nervous system, and nonvenereal diseases of the genito-urinary system. These five classes of diseases caused 40 per cent of all admissions to hospitals. Six per cent of all admissions to hospitals was caused by malaria.

The admission rate for typhoid fever was 1.77, compared with 0.36 for last month, and 0.35 for the corresponding period of last year.

EFFECTS OF RACE.

The admission rate to hospital and the death rate for disease for black employees were 60.40 and 6.99 per thousand, as compared with 96.44 and 0.82 for the corresponding period of last year; for white employees 221.89 and 2.58, as compared with 240.84 and 7.37 for the month of April last year.

The admission rate to hospitals and quarters for malaria was 5.34 per thousand for blacks and 23.22 for whites, compared with 24.62 per thousand for blacks and 51.61 for whites for the corresponding month of last year.

The death rate for Americans was 5.62, and the admission rate to hospitals for disease was 202.22, as compared with 5.64 and 211.52 for April, 1915.

Following is a table giving ages of all male gold employees of the Panama Canal and the Panama Railroad Co., as shown by annual physical examination, November 20, 1915:

DEPORTATIONS.

Age (years)	Number of employees.	Age (years).	Number of employees.
16.....	7	45.....	104
17.....	8	46.....	70
18.....	11	47.....	47
19.....	17	48.....	40
20.....	29	49.....	48
21.....	27	50.....	38
22.....	46	51.....	42
23.....	58	52.....	25
24.....	74	53.....	11
25.....	108	54.....	12
26.....	125	55.....	15
27.....	149	56.....	10
28.....	147	57.....	6
29.....	173	58.....	4
30.....	190	59.....	7
31.....	163	60.....	3
32.....	158	61.....	3
33.....	157	62.....	2
34.....	131	63.....	4
35.....	169	64.....	2
36.....	129	65.....	2
37.....	141	67.....	1
38.....	147	69.....	1
39.....	151	70.....	1
40.....	130	72.....	2
41.....	98	76.....	1
42.....	95		
43.....	113	Total employees examined.....	3,548
44.....	96		

Nine employees were deported during the month; for disease 8, and for injury 1. Three nonemployees were deported, all for disease.

CANAL ZONE.

The population of the Canal Zone is 32,905, among whom there was a total of 25 deaths; of these 22 deaths were from disease, giving a rate of 8.02 per thousand, as compared with 9.28 for the preceding month, and 5.71 for the corresponding month of last year. Of the total deaths from disease, the percentage under five years of age was 32, as compared with 27 for last month.

There were 40 births reported, giving a rate of 14.59. Of these 7 were of white and 33 of colored children. There were 5 deaths of children under one year of age, all colored, giving an infant mortality of 0.00 for white and 152 for colored children, with a general average of 125. The percentage of stillbirths to total births was 5 per cent.

PANAMA CITY.

The population of the city is 60,778, among whom there was a total of 129 deaths; of these 124 deaths were from disease, giving a percentage of 24.48 per thousand, as compared with 23.29 for the preceding month, and 25.44 for the corresponding period of last year.

Of the total deaths from disease the percentage under 5 years of age was 41 per cent, compared with 40 for last month.

The principal causes of deaths showing an increase as compared with March were: Tuberculosis of the lungs 24, compared with 23 for the preceding month; diarrhea and enteritis 19, compared with 12 for last month; and cerebral hemorrhage 5, as compared with 2 for the month of March.

The percentage of stillbirths to total births was 11 per cent.

COLON.

The population of the city is 24,693, among whom there were 60 deaths; of these 55 deaths were from disease, giving a rate of 26.73 per thousand, as compared with 18.95 for the preceding month, and 19.64 for the corresponding month of last year. Of the total deaths from disease the percentage under 5 years of age was 44 per cent, as compared with 33 for last month.

The principal causes of deaths showing an increase as compared with March were: Broncho-pneumonia 7, compared with 4 for the preceding month; diarrhea and enteritis 6, compared with 1 for last month; and cerebral hemorrhage 3, as compared with 1 for the month of March.

There were 54 births reported, giving a rate of 26.24 per thousand. The infant mortality was 277 per thousand. The percentage of stillbirths to total births was 11 per cent.

HOSPITAL DIVISION.

ANCON HOSPITAL.

During the month the average number of patients constantly in hospital was 743. The per capita cost of patients in hospital proper was \$1.92 gross, and \$0.87 net. The net per capita cost of patients in the insane asylum was \$0.49 per day.

BOARD OF HEALTH LABORATORY.

The following work, in addition to routine, has been accomplished during the month:

The results of the investigation into the corrosion of metals indicate very clearly that cast brass, sheet brass, copper, and lead are corroded by dilute solutions of bleaching powder, acetic, nitric, and hydrochloric acids. These acids and bleaching powder are used extensively in the hospital and eventually find their way into the waste pipes of plumbing fixtures. The corrosion was more marked when the metals were only partially submerged, and also when they were submerged intermittently with intervening opportunities for drying. Under these conditions, the metal showing the most pronounced degree of corrosion was lead.

Preliminary steps have been taken in the preparation of colloid-gold solutions for use in the diagnosis of paresis.

INSANE DEPARTMENT.

During the month there were 13 admissions, 10 discharges, and 5 deaths. Included in these figures are 3 retransfers from Ancon Hospital, and 2 transfers to Ancon Hospital for surgical treatment. There were two deportations to the United States and one to the Philippines.

Authority for an additional medical officer trained in psychiatry has been granted. One has been selected from the staff of the Government Hospital for the Insane, and will report for duty during the month of May.

The general health of the patients and cripples remains good.

The small mouth milk pails for use in the dairy have arrived and have aided greatly in the improvement of the milk. At present the bacterial count runs between 2,000 and 3,000 per c. c., which would be considered unusually good milk anywhere.

The carpenter shop has been completed, the construction of the compost pit is well under way, and the work on the grounds is progressing rapidly.

CHRONIC WARD.

There were 31.20 chronic and incurable patients constantly cared for during the month. The cost per patient per day was \$0.22.

Detailed statistics are shown in Table XIII.

COLON HOSPITAL.

The average number of employees constantly sick was 17.96. The average number of days treatment per employee was 9.08. The per capita cost of patients was \$3.34 gross and \$2.50 net.

Detailed statistics are shown in Table XIV.

PALO SECO LEPER ASYLUM.

The number of patients under treatment at the end of the month was 57. There were no admissions, deaths, or discharges during the month.

Detailed statistics are shown in Table XV.

SANTO TOMAS HOSPITAL.

During the month a total of 1,205 patients were treated, 95 less than the preceding month. The daily average number of patients in the hospital was 426 as compared with 445 for March, and the total number of days treatment was 12,794 as compared with 13,803 for the preceding month. A total of 69 deaths occurred, with tuberculosis of the lungs, congenital debility, and pneumonia, the chief causes in the order named.

Detailed statistics are shown in Table XVI.

DISTRICT DISPENSARIES.

The dispensary having the highest admission rate for malaria was Pedro Miguel with a percentage of 0.05. No malaria cases were reported from the following districts: Ancon, Culebra-Empire, and Gatun.

SANITATION.

CANAL ZONE.

The following communicable diseases were reported during the month:

Measles.....	7	Tuberculosis.....	7
Typhoid fever.....	2	Leprosy.....	1
Chicken pox.....	11	Diarrhea.....	6
Diphtheria.....	1	Pneumonia.....	1
Malaria fever.....	53		

PANAMA.

During the month the work of cementing tree cavities was undertaken, as this has been recognized as an important antimosquito measure, but had not been undertaken before in Panama City.

In the city 1,611 trees were treated, plugging such cavities as might become "containers" on account of holding water. A cement and sand mixture of 1-4 was used to close the cavities. Where large holes were found pieces of rock were used to fill in, reducing amount of cement needed. Count was kept on about

1,000 trees to determine the number of cavities per tree which during the rainy season would act as water containers with consequent mosquito breeding. An average of 2.55 holes per tree was found, and using this figure for total number of trees treated, we find that 4,108 possible containers were eliminated. The large trees presented the greater number of cavities, naturally, and decayed places where limbs had been broken off, and in the angles formed by branching were to be found the most frequent sites. As many as 22 cavities were found in one tree requiring filling.

It is interesting to report that quite a number of the cavities found, even at this season of very little rain, contained mosquito larvæ, and larva from several of these were identified later as *Stegomyia*. *Stegomyia* were only found, however, in trees quite close to houses.

The following infectious diseases were reported during the month:

Tuberculosis, pulmonary.....	31	Mumps.....	1
Tuberculosis, other forms.....	2	Chicken pox.....	11
Diphtheria.....	4	Leprosy.....	1
Pellegra.....	1	Measles.....	4
Syphilis.....	3	Typhoid fever.....	3
Whooping cough.....	1		

COLON.

A concrete compost pit, with a capacity of 100 cubic yards for "curing" manure prior to use by local gardeners and farmers, has been erected at the municipal dump. It is believed that this pit will prove an important addition to the sanitary armamentarium in preventing fly breeding.

An arrangement has been effected with the alcalde of Colon whereby we hope to eliminate the dog nuisance in the city. The Health Department furnishes two silver employees as dog catchers and the municipal authorities furnish a policeman. The measure is directed particularly against the unlicensed dogs. After apprehension the dogs are held for 24 hours at the city dump awaiting the claim of their owners; but if not reclaimed by the payment of a redemption fee they are killed. Since the beginning of the month we have caught 178 dogs; of these only 22 have been reclaimed.

The following infectious diseases were reported during the month:

Measles.....	3	Tuberculosis.....	2
Malaria.....	3	Paratyphoid fever.....	1
Scarlet fever.....	1	Pneumonia.....	2

QUARANTINE SERVICE.

Reports of conditions on the west coast of South America are not reassuring. The yellow fever situation in Buenaventura and Guayaquil has shown no improvement during the month. An increase in the number of plague cases at several ports is noted, this increase being very generally distributed.

Medical clinic.....	286	196	57	262
Surgical clinic.....	193	70	10	15
Eye and ear clinic.....	591	235	14	306
Total.....	1,070	501	81	583

MONTHLY VACCINATION REPORT.

Number of adults vaccinated.....	115
Number of "takes".....	9
Number of school children vaccinated.....	3
Number of "takes".....	1

BOARD OF HEALTH LABORATORY.

Bacteriological examinations:	
Blood cultures.....	27
Throat cultures.....	46
Urines.....	34
Stools.....	27
Sputum.....	1
Pathological fluids, exudates, etc.....	7
Wassermann reactions.....	584
Leper suspects.....	2
Agglutination reactions.....	4
Autogenous vaccines prepared.....	1
Antityphoid vaccinations.....	3
Preparations of salvarzanized blood serum.....	3
Trypanosomes in horses.....	3
Water, for H. O. C.....	3
Animal inoculations.....	18
Dairy milk from Panama, bacteriological counts.....	52
Dairy milk from Corozal farm, bacteriological counts.....	30
Milk sediments.....	2
Dark field examinations.....	7
Blood for malaria.....	5
Chemical examinations:	
Milk from private dairies supplying cities of Panama and Colon.....	12
Mother's milk.....	6
Urines.....	13
Paint.....	1
Vino de Cardui.....	1
Gasoline.....	7
Kerosene.....	1
Heroin.....	1
Soda water.....	1
Crude carbolic acid.....	1
Chloride of lime.....	1
White brass.....	5
Water.....	1
Butyric acid.....	6
Surgical tissues neoplasms reported.....	24
Autopsies performed.....	24
Animals autopsied.....	14
Pathological tissues prepared, paraffin.....	215

Rats examined:	
<i>Mus musculus</i>	348
<i>Mus norvegicus</i>	774
<i>Mus alexandrinus</i>	8
<i>Mus rattus</i>	179
	1,309
Bodies embalmed.....	3
Interments at Corozal.....	14
Cremations.....	16

COROZAL HOSPITAL.

STATEMENT OF COMMITMENTS, DISCHARGES, AND DEATHS.

COMMITMENTS.

	Male.	Female.
From Canal Zone, first admission.....	3	
From Panama Government, first admission.....	2	5
From Panama Government (retransfer from Ancon Hospital)	13	
Total.....	8	5

¹ Had been transferred to Ancon Hospital for surgical treatment.

DISCHARGES.

	Well.		Improved.		Unimproved.	
	Male.	Female.	Male.	Female.	Male.	Female.
Barbados.....	1					
Panama.....			1	1	13	1
Philippines.....					21	
United States.....					32	
Total.....	1		1	1	6	1

¹ Transferred to Ancon Hospital for surgical treatment.

² Deported to Philippines.

³ Deported to United States.

DEATHS.

Medical diagnosis.	Mental diagnosis.	Male.	Female.
Pellagra; infective exhaustive psychosis.	Infective exhaustive psychosis.	1	
Chronic nephritis; abscess of lungs; acute colitis.	Catatonic dementia praecox.		1
Softening of the brain; embolism and thrombosis.	Epilepsy.....	1	
Cerebral syphilis; chronic alcoholism..	Cerebral syphilis.....		1
Pellagra.....	Pellagra.....		1

TABLE XVII.—SANITATION.

The following is a summary of sanitary work performed and material expended during the month of April, 1916, in the Canal Zone:

4	Grass cutting
10	Screening
6	Miscellaneous
9	Work requests on engineering department
3	Work requests on other departments
0	Notices served to abate nuisances
0	Arrests and convictions
748	Closets, inspections of
40	Stores, inspections of
79	Shops, inspections of
3,074	Garbage cans emptied
1,133	Closets disinfected
525	Rat traps in use
358	Rats destroyed
3,430	Adult anopheles caught
7,503	Adult culices caught
34	Stegomyia destroyed
258	Larvacide used
7,115	Crude oil used
525	Kerosene used

SUMMARY OF ROUTINE WORK DONE BY PANAMA HEALTH OFFICE.

30,620	Linear feet of ditches cleaned and maintained
1,318	Linear feet of new ditches dug
0	Number of cubic yards of earth used in filling
350	Gallons of larvacide used
1,315	Gallons of crude oil used
70,280	Square yards of pools oiled
9,547	Water containers treated
217	Mosquito breeding places found (stegomyia 130)
84	Fly breeding places found
59	Flies trapped, quarts (13,000 per quart)
1,014	Number of rats killed
17	Number of room disinfections
4,156	Number of loads of garbage removed to dump
9,561	Number of cubic yards of garbage removed to dump
42,171	Total number of cans of garbage emptied
4,874	Number of buildings inspected
21	Number of plans for new buildings approved
66	Number of permits issued for repairs to old buildings
87	Total number of building permits issued
14	Number of buildings condemned
2	Number of buildings demolished (stables 0)
5	Number of stables condemned
600,000	Average number of square yards of streets cleaned daily
90,000	Average number of square yards sprinkled daily
4	Number of private properties cleaned
400	Number of notices served and nuisances abated
1,611	Total number of trees treated in entire city
4,108	Approximate number of holes ("containers") closed
\$0.075	Average cost per tree
	Cementing tree cavities:

MONTHLY WORK REPORT FOR COLON AND CRISTOBAL AND MOUNT HOPE.

Sanitation, Colon-Cristobal:

Square yards street cleaned.....	3,895,800
Square yards street sprinkled.....	705,600
Square yards alleys maintained.....	624,000
Number of private properties cleaned.....	667
Number of rats caught.....	195
Number of dogs caught.....	178
Number of dogs killed.....	142
Loads of yard garbage disposed of.....	585
Number of cans, garbage (cubic yards 2,305).....	65,113
Colon dump maintained.....	
Linear yards ditches maintained.....	95
Acres of vegetation removed:	
Colon.....	0
Quarantine station.....	3
Panama Railroad properties, Colon.....	30
Parkway and E Street maintained.....	
Square yards oiled.....	28,275
Number of receptacles treated.....	47,470
Number of mosquito breeding places destroyed.....	7
Number of fly breeding places destroyed.....	27
Number of buildings inspected.....	10,315
Gallons of larvacide used in Colon.....	59 $\frac{1}{4}$
Gallons of crude oil used in Colon.....	468
Number of nuisances abated.....	315

Building, Colon:

Number of building plans approved.....	7
Number of permits to occupy issued.....	16
Number of permits to repair issued.....	25
Number of bills collected.....	188

Sewers, Colon:

Number of new connections made during the month.....	11
Total number of connections made to date.....	1,290
Number of houses in which connections were made.....	7
Outstanding permits.....	72

Sanitation, Cristobal:

Number of cans, garbage (cubic yards 685).....	13,942
Square yards of grading on fill at Camp Bierd.....	5,000
Loads of yard garbage handled.....	218
Acres of vegetation removed.....	$\frac{3}{4}$
Square yards oiled.....	4,525
Number of receptacles treated.....	7,600
Number of mosquito breeding places destroyed.....	1
Number of fly breeding places destroyed.....	2
Gallons of crude oil used.....	104
Gallons of larvacide used.....	6 $\frac{1}{4}$
Number of buildings inspected.....	1,020
Number of nuisances abated.....	43

Sanitation, Mount Hope:

Number of cans, garbage (124 cubic yards).....	1,361
Square yards oiled.....	66,200
Number of receptacles treated.....	7,450
Number of mosquito breeding places destroyed.....	24
Number of fly breeding places destroyed.....	0
Number of mosquitoes caught in barracks—	
Anopheles.....	119
Culex.....	219
Gallons of larvacide used.....	41
Gallons of crude oil used.....	181
Mount Hope Cemetery maintained.....	
Linear yards of ditches constructed.....	0
Linear yards of ditches maintained.....	13,887
Square yards of vegetation removed.....	181,290
Number of burials during month.....	54

TABLE XVIII.—CONSOLIDATED REPORT OF QUARANTINE TRANSACTIONS AT THE PORTS OF BALBOA-PANAMA AND COLON-CRISTOBAL.

Number of vessels inspected and passed.....	146
Number of vessels held in quarantine.....	10
Total number of vessels entered.....	156
Number of special inspections made to enforce compliance with anti-plague and mosquito-breeding regulations.....	116
Number of vessels fumigated on arrival.....	11
Number of vessels fumigated on departure.....	3
	14
Number of crew examined.....	10,490
Number of passengers examined.....	3,577
	14,067
Number of supplementary inspections.....	1,047
Number of stowaways inspected.....	5
Number of persons vaccinated at port of arrival because of compulsory-vaccination law.....	270
Number of persons vaccinated at port of departure or en route because of compulsory-vaccination law.....	1,361
Number of persons held in quarantine at the detention houses to complete period of incubation of yellow fever and bubonic plague.....	391
Number of persons held in quarantine on board vessels to complete period of incubation of yellow fever and plague.....	1,306
Total number of persons held under observation.....	1,697
Total number of persons landed from foreign ports:	
Cabin.....	1,523
Steerage.....	1,367
	2,890
Total number of persons embarked for foreign ports:	
Cabin.....	1,753
Steerage.....	1,177
	2,930
Total number of persons arriving from coast towns on small launches and sailing craft.....	2,163
Total number of persons sailing for coast towns on small launches and sailing craft.....	1,559
Apparent increase for month from coast towns.....	604
Apparent decrease for month from foreign ports:	
Cabin.....	230
Steerage.....	190
Net decrease for month.....	40
Number of persons rejected and deported.....	22
Number of bills of health issued or viséed.....	159
Number of inspections of docks.....	23
Number of inspections of vessels at docks.....	101
Total number of persons landed.....	5,053
Less number for Pacific ports.....	196
Total number of persons sailing.....	4,857
	4,489
