Lyrasis Members and Sloan Foundation

PANAMA CANAL COMMISSION

Balboa, Republic of Panama
OFFICE OF THE ADMINISTRATOR

FROM THE ADMINISTRATOR

It is a pleasure to submit the annual report of the Panama Canal Commission, for fiscal year 1985.

At the end of this fiscal year, the sixth year of operation of the Panama Canal Commission, the Canal remains in excellent operating condition and its facilities and equipment continue to be improved and modernized. Traffic passing through the waterway showed a modest improvement with an increase in oceangoing transits to 31.9 ships per day from 31.1 per day in 1984. Both Panama Canal net tonnage and tolls revenue rose 4 percent from FY 1984 levels.

Projects of major significance to Canal customers completed or underway during the year included: overhaul of Gatun Locks miter gates and installation of lateral culvert bulkhead slots, construction of a vessel tie-up station in Gaillard Cut, upgrading of the Marine Traffic Control vessel monitoring system, rehabilitation of the locks fire fighting system, conversion of Canal buoys to conform to international standards, widening of Bohio Curve in Gatun Lake, enhancement of Commission reservoir management and weather monitoring capabilities, and the awarding of a contract for three new towing locomotives.

The performance of the Commission in accomplishing these and other multifaceted modernization and maintenance programs under the challenging conditions of treaty implementation demonstrates that a skilled and capable work force has been retained to operate the Canal. To ensure that the necessary strengths are available in the critical years ahead, training programs continue to receive high priority, with a major emphasis on increasing the participation of qualified Panamanians commensurate with Treaty requirements. Panamanians now compose 80 percent of the permanent Commission work force with many occupying key management and supervisory positions throughout the organization.

As we look to the future, I am certain that the spirit of cooperation and commitment evident in the Commission work force will enable the Panama Canal to meet the rapidly changing demands of the maritime industry.

D. P. McAULIFFE,
Administrator.

PANAMA CANAL COMMISSION

INTRODUCTION

ORGANIZATION

The Panama Canal Commission is an agency of the Executive Branch of the United States Government, provided for by the Panama Canal Treaty of 1977, and established by the Panama Canal Act of 1979 (93 Stat. 452; 22 U.S.C. 3601 et seq), enacted September 27, 1979. The authority of the President of the United States with respect to the Commission is exercised through the Secretary of Defense and the Secretary of the Army. The Commission is supervised by a nine-member Board. Five members are nationals of the United States and four are Panamanians. Board members who are U.S. nationals are appointed by the President with the advice and consent of the Senate.

The Commission was established to carry out the responsibilities of the United States with respect to the Panama Canal under the Panama Canal Treaty of 1977. In fulfilling these obligations, the Commission manages, operates, and maintains the Canal, its complementary works, installations, and equipment, and provides for the orderly transit of vessels through the Canal. The Commission will perform these functions until the treaty terminates on December 31, 1999, when the Republic of Panama will assume full responsibility for the Canal.

The Commission is expected to recover through tolls and other revenues all costs of operating and maintaining the Canal, including interest, depreciation, capital for plant replacement, expansion and improvements, and payments to the Republic of Panama for public services and annuities, in accordance with paragraph 5 of Article III and paragraphs 4(a) and (b) of Article XIII, respectively, of the Panama Canal Treaty of 1977. Revenues from tolls and all other sources are deposited in the U.S. Treasury in an account known as the Panama Canal Commission Fund. Appropriations for operating expenses and capital improvements are enacted annually by the Congress and are limited to the sum of the estimated receipts for the year, plus any unexpended balances in the Panama Canal Commission Fund.

THE CANAL

The Panama Canal is a lock-type canal approximately 51 miles long from deep water to deep water. The minimum width of the navigable channel is 500 feet. Navigable channel depth varies according to the

amount of water available in Canal storage areas. The normal range of permissible transit draft is from 38 feet to 39 feet 6 inches tropical fresh water.

Vessels transiting the Canal are raised in three steps to the level of Gatun Lake, the principal source of Canal water, then lowered to sea level again in three steps. The three sets of Canal locks are paired so as to permit simultaneous lockage of two vessels in the same direction or in opposite directions.

Since August 15, 1914, the official date of its opening, the Panama Canal has served world trade virtually without interruption. Through this fiscal year, a total of 650,799 vessels of all types have transited with 546,084 or 83.9 percent of the total being of the oceangoing commercial class.

TOLLS RATES

Panama Canal tolls rates were increased approximately 9.8 percent on March 12, 1983. Tolls rates are: (a) On merchant vessels, Army and Navy transports, tankers, hospital ships, supply ships, and yachts, when carrying passengers or cargo: \$1.83 per net vessel ton of 100 cubic feet of actual earning capacity. Such tonnage is determined in accordance with the "Rules of Measurement of Vessels for the Panama Canal;" (b) on such vessels in ballast, without passengers or cargo: \$1.46 per net vessel ton; and (c) on other floating craft: \$1.02 per ton of displacement.

By treaty, the United States continues to provide to Colombia free transit through the Canal of its troops, materials of war, and ships of war.

BOARD OF DIRECTORS

Chapter I

CANAL TRAFFIC

TRAFFIC

Most elements of Canal traffic improved from prior year levels during fiscal year 1985. Cargo shipments through the Canal, however, decreased relative to the prior year. The gains in traffic without growth in cargo were primarily due to a rise in average ship size and an increase in low density commodities.

Oceangoing transits in fiscal year 1985 increased 2.4 percent to 11,654 or 31.9 vessels daily from 11,384 or 31.1 daily the prior year. Vessels owned or operated by the U.S. Government and free Colombian and Panamanian Government vessels made 139 transits during the year compared with 154 transits in fiscal year 1984.

Average ship size increased during fiscal year 1985 primarily as a result of transits by large, third generation container vessels deployed in new, round-the-world services. The increase was particularly concentrated in vessels with beams of 100 feet and over. Transits in this size category rose 9.8 percent to 2,382 or 20.4 percent of total oceangoing transits from 2,170 or 19.1 percent of total oceangoing transits in fiscal year 1984. Transits by vessels having beams of 80 feet and over accounted for 5,514 or 47.3 percent of total oceangoing transits compared with 5,496 or 48.3 percent of total oceangoing transits in the prior year. Average size of oceangoing commercial vessels, in terms of Panama Canal net tonnage, rose to 14,676 tons in fiscal year 1985 from 14,461 tons in 1984.

Total Panama Canal net tonnage increased 4.0 percent to 170.3 million in fiscal year 1985 from 163.8 million tons in the prior year. Correspondingly, tolls revenue rose 4.0 percent to \$300.8 million from the \$289.2 million in 1984.

A two-year summary of the principal elements of Canal traffic and tolls revenue is shown in the following table:

COMPARATIVE HIGHLIGHTS OF OPERATIONS

	<i>Fiscal year</i>	
	1985	1984
Oceangoing transits:		
Commercial	11,515	11,230
U.S. Government	129	137

Total Panama Canal net tons and reconstructed displacement tonnage.....	170,338,118	163,833,672
Transit revenue:		
Commercial tolls	\$298,562,452	\$286,754,765
U.S. Government tolls.....	2,236,404	2,400,270
Tolls revenue	<u>\$300,798,856</u>	<u>\$289,155,035</u>
Harbor pilotage, tug, launch, and other services.....	<u>\$61,824,017</u>	<u>\$58,931,942</u>
Total transit revenue	<u>\$361,824,017</u>	<u>\$348,086,977</u>

COMMODITIES AND TRADE ROUTES

Oceangoing commercial cargo totaled 138.6 million long tons during fiscal year 1985, with twelve key commodity groups accounting for 85.0 percent of that total. The groups, shown on page 10, have maintained relatively stable levels of importance to Canal traffic in recent years. In fiscal year 1984, the proportion observed for these commodity groups was 86.2 percent.

Despite a decline in petroleum and petroleum products, this commodity group continued to rank as the principal trade in fiscal year 1985, accounting for 19.3 percent of total oceangoing commercial cargo. The tonnage in this group totaled 26.8 million long tons, down by 12.7 percent from 30.7 million long tons the prior year. The petroleum and products movement at the Canal has been affected by sluggish conditions in these markets. Crude oil totaled 12.4 million tons, dropping 12.7 percent from

14.2 million long tons in fiscal year 1984 and petroleum products, at 14.4 million tons, registered a 12.7 percent decline from 16.5 million tons.

Grain was the second commodity group in fiscal year 1985, accounting for 17.0 percent of commercial cargo. Grain shipments totaled 23.5 million long tons, down 16.4 percent from the already depressed 28.1 million tons registered in fiscal year 1984. All components of the group, except oats and sorghum, showed decreases. The largest decline was reflected in the wheat tonnage which dropped 39.8 percent to 5.4 million long tons from the 9.0 million tons in the prior year. A number of factors accounted for the lower tonnage in the grain trade, particularly a smaller share of U.S. exports in Far East markets. Increased competition from countries such as Argentina and Australia, at the same time that some major importing countries have achieved self-sufficiency in certain grains, are factors which affected U.S. grain exports. An additional factor behind the drop in the Canal grain trade was the shift of U.S. export grain to West Coast ports, promoted by very low rail rates. Grain shipments from the U.S. to the Far East constituted 83.7 percent of the total movement, with Japan, Taiwan and China being the principal destinations.

A significant improvement was observed in the nitrates, phosphates and potash group in fiscal year 1985. This commodity group increased 20.2 percent to 11.9 million long tons from 9.9 million tons in 1984, gaining the third place in Canal major commodity groups. This trade accounted for 8.6 percent of total oceangoing commercial cargo.

Shipments of coal and coke increased 15.0 percent to 11.5 million long tons from 10.0 million tons the prior year, reversing a downward trend which began in 1983. Most of the increase was due to higher shipments to the Far East and Europe. Coal shipments to Japan, however, dropped 14.4 percent to 4.8 million long tons in fiscal year 1985, reflecting a declining U.S. market share in Japanese imports and increases in U.S. coal exports bypassing the Canal.

Other commodity groups experiencing gains during the year were ores and metals, which rose 11.5 percent to 9.7 million long tons; manufactures of iron and steel, which increased 6.9 percent to 7.8 million long tons; miscellaneous minerals, which rose 12.8 percent to 4.4 million long tons; canned and refrigerated foods, which rose 12.1 percent to 3.7 million long tons; and machinery and equipment, which was up by 9.1 percent to 2.4 million long tons.

Canal trades registering decreases during the year were lumber and products, which dropped 3.1 percent to 6.2 million long tons; chemicals and petrochemicals, which dropped 3.9 percent to 5.0 million long tons; and, miscellaneous agricultural commodities, which dropped 10.7 percent to 5.0 million long tons.

Trade between the East Coast of the United States and Asia remained the leading route in Canal traffic, with nearly 38.0 percent of total commercial cargo shipped over this route. The total cargo tonnage plying the U.S. East Coast-Asia route declined again this year, however, from 55.2 million long tons to 52.2 million tons, a drop of 5.4 percent.

The following chart and table show the principal commodity groups moving in oceangoing commercial vessels in 1985 and a comparison of the major trade routes in fiscal years 1985 and 1984.

PRINCIPAL COMMODITY GROUPS
TRANSITING THE CANAL
OCEANGOING COMMERCIAL CARGO FY 1985

Major Voyage Trade Routes in Canal Traffic

Trade Route	Fiscal year						Percent of Increase or Decrease
	1985			1984			
	Panama Canal Net Tons	Long Tons Cargo	Long Tons Cargo	Panama Canal Net Tons	Long Tons Cargo	Long Tons Cargo	
	[In thousands of tons]

Chapter II

CANAL OPERATIONS

Canal operations are comprised of Transit Operations and Maintenance and Related Canal Projects. The various functions are divided among a number of operating bureaus within the Canal agency.

TRANSIT OPERATIONS

Daily average transits by oceangoing vessels increased from the 31.1 per day during fiscal year 1984 to 31.9 per day during fiscal year 1985. Average time in Canal waters increased from 23.3 hours in fiscal year 1984 to 23.9 hours in fiscal year 1985.

<i>Fiscal year</i>	<i>Vessels of 600-foot length and over</i>	<i>Percent of total oceangoing transits</i>	<i>Vessels of 80-foot beam and over</i>	<i>Percent of total oceangoing transits</i>
1985	3,862	33.1	5,514	47.3
1984	3,865	33.9	5,496	48.3
1983	4,157	35.1	5,869	49.5
1982	5,534	39.1	7,226	51.1
1981	4,855	34.7	6,364	45.5
1980	4,598	33.8	6,089	44.7
1979	4,089	31.3	5,503	42.1

The number of vessels transiting at more than 36-foot drafts decreased 9.6% during FY 1985 with 1,468 vessels transiting the Canal compared to 1,623 last year.* The maximum allowable draft remained at 39 feet 6 inches during the entire fiscal year.

Total jobs performed by Commission tugs increased from 33,796 in fiscal year 1984 to 34,209 in fiscal year 1985.

	<i>Fiscal year</i>	
	<i>1985</i>	<i>1984</i>
Oceangoing transits.....	11,654	11,384
Tug jobs:		
Balboa	22,991	23,242
Cristobal	11,218	10,554
Tug operating hours.....	54,889	55,675

* Changed from 1,715 to 1,623.

A "lateral culvert bulkhead slot frame" is shown being placed into the locks floor at the base of the center wall, during the Gatun Locks overhaul.

MAINTENANCE AND RELATED CANAL PROJECTS

Dredging activities continued throughout the fiscal year and May of 1985 saw the completion of the channel deepening project, thereby providing the additional water necessary to virtually guarantee a year-round maximum draft of 39.5 feet for transiting vessels. During FY 1985, the dredges *Mindi* and *Christensen* excavated more than 1.3 million cubic yards of earth and rock.

The Bohio Curve Widening Project is proceeding on schedule. Land drilling and blasting was completed in mid-August and dredging operations are scheduled to begin in mid FY 1986. During FY 1985, the Panama Canal lateral navigational aids system was changed to conform to the International Association of Lighthouse Authorities (IALA) Maritime Buoyage System. Presently all lights, colors, and characteristics, as well as the color of their structures, conform to the IALA System.

Between October 1984 and March 1985, Miter Gates Nos. 21, 22, 23, and 24 from Gatun Locks were overhauled at the Mount Hope Industrial Division using the newly installed syncrolift. As part of the overhaul at Gatun Locks, 109 lateral culvert bulkhead slots were constructed in the east and west floors of the locks chamber. These bulkhead slots at Gatun, together with those previously installed at Miraflores and Pedro Miguel Locks, permit both lanes to remain safely in service during inspection, maintenance, or overhaul of the center and sidewall culverts. Other important maintenance work included continued efforts on the replacement and rehabilitation of the towing locomotive track system, the fendering system at Gatun Locks, and reactivation of the SIP-3 fire protection system at all three locks.

In February 1985, work began on a major modernization of the Dredge MINDI to replace the old spud-maneuvering system with a new hydraulic system mounted on a barge attached to the stern of the dredge. In addition, the cutter motor will be changed to a 900 HP unit and the main power system will be centralized. The overall cost of this project will be approximately \$3.6 million and will bring the capability of this 1937 dredge up to that of any modern dredge of its size and type.

In a continuing effort to upgrade the Commission's hydroelectric generation facilities, a new design turbine runner was installed in units No. 2 and No. 3 at Madden Dam Power Plant. The new design will reduce recurring cavitation damage repair costs and provide higher power output at high lake levels from the recently rewound and uprated generators. This work completes the project, begun in fiscal year 1984, to replace the turbine runners in all three Madden Dam units. Installation of the new Supervisory Control and Data Acquisition System (SCADA) for electrical power dispatching is progressing satisfactorily and is scheduled to be in full operation by the end of fiscal year 1986.

A solicitation for proposals to replace and upgrade the Commission telephone system was issued on July 10, 1985. The new system will replace obsolete, worn electromechanical switching equipment and provide all Commission facilities the opportunity to integrate both voice and data telecommunication services. This multi-year contract, the first of its type to

be approved by GSA for the Commission, is scheduled to be awarded in fiscal year 1986.

A new hydrographic station was constructed on the Piedras River above the Madden Reservoir to provide additional river elevation and rainfall data for early warning flood control operations. Because of the remoteness of the station, its construction required extensive helicopter support. Rio Piedras is the newest of a 30 station hydrographic network located throughout the Canal watershed.

Construction of the Vessel Tie-Up Station has been completed and the facility was accepted by the Commission on August 19, 1985. This station, located on the west bank of Gaillard Cut just north of Pedro Miguel Locks, increases lockage through-put by making it possible to moor northbound vessels awaiting transit of Gaillard Cut.

In other transit-related work, development efforts continued on the Commission's new computerized Marine Traffic Control System. This system, which will provide a major enhancement of vessel traffic management capabilities at the Panama Canal, is expected to come on line during the first quarter of FY 1986.

Miscellaneous maintenance work during the 1985 fiscal year included preparation of over 200 housing units to ensure minimum standards of safety, serviceability, and sanitation prior to their transfer to Panama. In addition, repair work on two major holes in Miraflores and Pedro Miguel locks walls was completed and a towing locomotive turntable installed on the centerwall of Miraflores Locks.

Chapter III

SUPPORTING OPERATIONS

Supporting operations of the Panama Canal Commission provided essential support services to the operation and maintenance of the waterway and the Agency's facilities, as well as to other U.S. agencies on the Isthmus and to employees and their dependents. These operations included logistical services, employee services, sanitation and grounds management, transportation facilities, public utilities, fire protection, Canal protection, health and safety, and library services.

LOGISTICAL SERVICES

The Storehouse Division provided centralized procurement, inventory management, warehousing, distribution, contract administration, and supply and property disposal support to Canal operations. A total of \$66.6 million in goods and services were procured during fiscal year 1985, including \$22.0 million from sources in Panama. Major contracting obligations included approximately \$9.2 million for Bunker "C" fuel and \$5.1 million for Navy special fuel for thermoelectric power generation, \$4.7 million for light diesel fuel for floating equipment, \$1.0 million for premium gasoline, \$1.4 million for a split-hull dump barge, and \$4.0 million for three locks towing locomotives.

Approximately \$17.9 million in Commission inventory items were issued for Commission use, and \$19.1 million was obligated for new inventory purchases during the year. A total inventory of 38,573 line items with an average landed cost value of \$28.0 million was on hand at year end.

Activities of the Excess Disposal Branch included no-cost transfers to other U.S. Government agencies of excess equipment having an original acquisition value of approximately \$899,814, while surplus property sold to the Government of Panama at fair market value amounted to approximately \$75,000.

The Logistical Support Branch in New Orleans, LA., expedited urgent purchases and coordinated all Commission cargo shipments from the United States to Panama. Under the coverage of the Military Sealift Command's contract, 12,100 measurement tons of containerized and breakbulk cargo were shipped to the Port of Balboa. An additional 3,550

tons of general cargo and vehicles were shipped under commercial contract with an ocean freight shipper from New Orleans to Las Minas, Republic of Panama.

COMMUNITY SERVICES

During fiscal year 1985, the Community Services Division managed employee housing, Commission-owned buildings, library services, and the employee fitness program for the agency.

Housing expenditures were concentrated on programs for preventive maintenance and repairs, quarters energy conservation, and enhancing the physical security of quarters used by the Commission. The agency continued its multiyear housing management plan designed to concentrate its diminishing housing requirements in selected core areas. Implementation of the plan is enabling the Commission to utilize housing and related maintenance resources in the most cost-effective manner, while at the same time preserving optimum housing accommodations for its eligible employees and meeting its ongoing responsibilities under the Panama Canal Treaty. From March to June, 1985, the Commission transferred an additional 500 housing units, excess to its needs, to the Republic of Panama. At the end of the fiscal year, the agency retained the use of 1,895 housing units for its United States-citizen and other eligible employees. This represented 44% of the inventory of approximately 4,300 units owned by the Panama Canal Company immediately prior to entry into force of the Panama Canal Treaty in 1979, indicating that a total of 56% of those units have been transferred in use to Panama in six years.

The buildings management activity, which is responsible for the maintenance and operation of Commission buildings and structures (not specifically assigned to other Commission units) and for a centralized custodial service, transferred 14 non-residential buildings no longer required by the Commission to the Republic of Panama. The Community Services Division was designated as the agency's coordinator for the implementation of Executive Order 12411 and Temporary Regulation D-71 for efficient space management.

Library Services provided mission-support information and research to all units of the Commission and maintained a collection of library and three-dimensional materials relating to the history of the Panama Canal. The division also administered a variety of duty-related as well as off-duty fitness programs and facilities for Commission employees and their dependents.

SANITATION AND GROUNDS MANAGEMENT

Approximately 2,900 acres of improved grounds were maintained within and around Commission residential areas, buildings, and the locks and industrial facilities. Vegetation control was maintained by Grounds Management Branch crews along utility line rights-of-way, earthen saddle dams, Gatun Dam, Canal bank stability drainage systems, and around the perimeters of aids to navigation towers and targets. Close coordination

with Panama officials in the transfer of responsibility for grounds care, resulted in a smooth transition of services in connection with the transfer of large blocks of Commission quarters and buildings in Coco Solo, Ancon, and other areas.

Environmental health services essential to maintain public health in the Panama Canal area were furnished by the Sanitation Management Branch. Surveillance and control of biting insects and vermin capable of transmitting disease were continued in the Canal Area with emphasis on non-chemical control methods such as drainage maintenance in lieu of extensive dispersements of chemical insecticides. Some 220 miles of surface water drainage ditches were maintained to eliminate mosquito breeding around employee work and housing areas. Requirements of specialized mosquito control measures continue to be necessary for the prevention of such major insect-borne tropical diseases as malaria, yellow fever, and dengue. Additional control efforts were directed against cockroaches, house flies, bats, rats, venomous snakes and other vermin.

Africanized honeybees continue to present ongoing problems within residential areas, at Canal work sites and on vessels transiting Canal waters. A total of 923 swarms and nests of Africanized bees were destroyed in a cooperative effort between Commission and U.S. military bee control teams this fiscal year, a 25 percent increase over the previous year's total. Nests have become more numerous and several severe stinging incidents have occurred, but no human deaths have yet occurred. Commission bee control teams handled 20 swarms on board transiting ships during the year, as compared to 12 incidents last year. A recent inadvertent introduction of Africanized bees into the central valley of California by an infested shipping container emphasizes the continuous need to provide effective bee control and maritime quarantine at the Panama Canal.

The Commission's Pacific and Atlantic sanitary landfill refuse disposal facilities handled 76,000 tons of refuse over the past year. Of the two sites, the Atlantic landfill is unique in that for the past 45 years, it has been utilized to receive all municipal refuse from the Colon metropolitan area and the U.S. military bases, in addition to that of the Commission's residential areas and Panama Canal work sites.

TRANSPORTATION FACILITIES

The Motor Transportation Division operated and maintained a consolidated motor pool of 866 vehicles designed to meet the vehicular transportation requirements of the Commission. The vehicle fleet in fiscal year 1985 included 602 trucks of various types, 208 passenger-carrying vehicles, and 56 special-purpose vehicles. Vehicle mileage decreased slightly from 7,170,000 miles in fiscal year 1984 to 7,056,706 miles in fiscal year 1985. Fully equipped shops, including a tire retreading facility and heavy duty repair shops, provided facilities for overhauls, maintenance and repairs to the Motor Transportation Division fleet and equipment of other Commission units. In addition, some services were contracted out where they were available in required quantity and quality in Panama. The

vehicle inspection facility located within the Motor Transportation Division, Ancon area garage, also was used by the Government of Panama to conduct inspections of privately-owned vehicles and by the Motor Transportation Division to perform Commission vehicle inspections.

PUBLIC UTILITIES AND ENERGY

Panama Canal Commission facilities include electric power generation and distribution systems, communication systems, water purification and distribution systems, and a central chilled water air conditioning system for certain public buildings on the Pacific side.

Total Canal area energy demand during fiscal year 1985 was 497 gigawatt hours, a 7.5 percent decrease from the 533 gigawatt hours used last year. The peak hourly demand of 81 megawatts reached on May 3, 1985, was 3.6 percent below the peak of 84 megawatts in the prior year. Agency-directed energy consumption in fiscal year 1985 for electrical power and fuel, calculated together in Btu's, was reduced a total of 28.9 percent in relation to the fiscal year 1975 baseline established by the Federal Energy Management Program. Electrical power consumption by the Commission, 71.6 gigawatt hours, was 3.7 percent below the usage levels recorded for comparable operations in fiscal year 1975; fuel consumption, excluding fuel for power generation, 3.9 million gallons, was 49.4 percent below the corresponding 1975 fiscal year baselines.

The water treatment and distribution systems operated by the Commission provide potable water for the Canal area and areas of the Republic of Panama. The Pacific side system serves the Canal area, Panama City, and suburban areas; and the separate Atlantic side system serves the Canal area, the city of Colon, and suburban areas. During fiscal year 1985, the two systems supplied 3,182 million cubic feet of potable water to consumers, a decrease of about 0.4 percent from the previous year. Water consumed by Panama City and Colon metropolitan areas amounted to approximately 51.1 million gallons per day.

FIRE PROTECTION

The Panama Canal Commission Fire Division, in conjunction with the Republic of Panama Fire Corps, is responsible for providing fire protection, firefighting, and rescue operations in Canal operating areas, defense sites, civilian and military areas of coordination, and shipboard firefighting on all vessels in Canal waters.

During fiscal year 1985, there were 758 fires (excluding ships), causing a loss of \$385,892 as compared to 563 fires during fiscal year 1984 which resulted in a loss of \$384,952. There were 20 ship fires during this year versus 17 in the previous year. Ship fire losses in fiscal year 1985 were \$353,405 as compared to \$243,112 the year before. A variety of hazardous materials type emergency responses totaled 64. Ship hazardous cargo stand-bys and marine/dock emergencies totaled 811.

CANAL PROTECTION

The Canal Protection Division is responsible for providing plant protection and physical security for Panama Canal Commission vital installations and facilities devoted to the operation, maintenance, and management of the Panama Canal. Physical security improvement projects continued during the fiscal year in accordance with the program designed to upgrade security systems and hardware and will continue over the next several years. In addition, a new in-service employment concept for filling guard vacancies began during the year using the upward mobility program, which should improve the quality of guard personnel and help reduce turnover.

HEALTH AND SAFETY

The Occupational Health Division and the Safety Division are components of the Office of Personnel Administration. The Personnel Director is the Designated Agency Safety and Health Official.

During fiscal year 1985, the Commission experienced 748 performance-of-duty accidents in which the employees required medical attention beyond first aid, as compared to 675 such accidents in fiscal year 1984. Though the incident rate rose from 7.7 in fiscal year 1984 to 9.1 per 200,000 man-hours worked in fiscal year 1985, there were no fatalities recorded in fiscal year 1985, as compared to the ten experienced in fiscal year 1984. The sharp decline in fatal accidents can be attributed in part to intensified safety and health awareness, increased training and publicity, issuance and implementation of various new criteria and policies covering safe and healthful work practices and use of protective equipment, such as safe PCB handling, working in confined spaces, and mandatory seat belt use. Additionally, the Commission's alcohol and drug abuse rehabilitation program was strengthened through increased emphasis on counseling abusers, thereby serving to further ensure a safe working environment.

Chapter IV

ADMINISTRATION AND STAFF

PERSONNEL FORCE EMPLOYED AND RATES OF PAY

At the end of fiscal year 1985, the total Isthmian force of the Commission was 8,435 compared to 8,090 employees in fiscal year 1984. Approximately 82 percent of the 1985 Isthmian force was comprised of Panamanians; 2 percent of third country nationals; and the remaining 16 percent of U.S. citizens. Of the total Isthmian force, 7521 were permanent and 914 temporary. There was a U.S. Coast Guard officer assigned to the Commission on the Isthmus. In addition, fourteen persons, all U.S. citizens, were employed by the Commission in New Orleans and Washington, D.C.

Rates of pay were based on a U.S. Wage Base for positions which historically have been hard to fill, and on a Canal Area Wage Base for other occupational categories. Although originally scheduled for elimination in October 1985, the last step of a three-stage plan to phase out the New Wage System was for various administrative reasons implemented on September 29, 1985; this eliminated the remaining difference between the New Wage System and pre-treaty wage schedules. The following table shows the Commission civilian permanent Isthmian work force by citizenship and wage base.

	<i>Fiscal Year 1985</i>		
	<i>U.S.</i>	<i>Non-U.S.</i>	<i>Total</i>
Canal Area Wage Base	119	4,221	4,340
U.S. Wage Base	<u>1,221</u>	<u>1,960</u>	<u>3,181</u>
Total	<u>1,340</u>	<u>6,181</u>	<u>7,521</u>

The total Commission payroll was \$182.7 million in fiscal year 1985 compared to \$178.3 million in fiscal year 1984. Of the total Commission fiscal year 1985 payroll, \$118.5 million was paid to non-U.S. citizen employees and \$64.2 million to U.S. citizen employees.

EQUAL EMPLOYMENT OPPORTUNITY PROGRAM

Between fiscal year 1984 and 1985, the number of EEO complaints formally filed with the Agency continued to decrease. A breakdown, by citizenship grouping, of formal complaints filed with the Agency during fiscal years 1984 and 1985 follows:

Citizenship Group	Fiscal year	
	1985	1984
United States	6	4
Non-United States	0	4
Total	6	8

This continuing decrease in the number of EEO complaints reflects the growing number of employees utilizing the grievance procedures negotiated under the Agency's collective bargaining agreements.

Panamanians continued to increase as a percentage of total permanent work force as follows:

	Fiscal year 1985		Fiscal year 1979	
United States Citizens	1,354	(18.0%)	2,105	(26.4%)
Panamanian Citizens	6,000	(79.6%)	5,523	(69.2%)
Third Country Nationals	181	(2.4%)	350	(4.4%)
Total	7,535	(100.0%)	7,978	(100.0%)

Over the six-year period, since October 1, 1979 through September 30, 1985, that the Panama Canal has operated under treaty mandates for increasing the participation of Panamanians, the Agency's total permanent work force decreased 5.6%, while the number of Panamanians rose by 8.6%. This trend of increased participation cuts across all wage categories and pay levels in the Agency.

Between Fiscal Years 1984 and 1985, there was little variation in composition of the total permanent work force on the basis of sex:

	Fiscal year 1985		Fiscal year 1984	
Male	6,744	(89.5%)	6,722	(89.7%)
Female	791	(10.5%)	775	(10.3%)

PUBLIC AFFAIRS

During fiscal year 1985, the Office of Public Affairs expanded its activities in support of marketing efforts and customer relations in addition to providing media coverage of Panama Commission activities locally and internationally. Through the Commission publication, Spillway, and local press releases, employees were provided information on significant milestones in treaty implementation which affected their work and daily lives as well as news of Canal operations and Commission policies.

The Graphic Branch provided support to the foregoing activities, and produced a variety of audio-visual aids, including slide briefings to assist in official orientations for visitors to the Canal; two multi-image shows, a three projector one for the topographical model at Miraflores Locks and a

12-projector one for use at local and international maritime expositions and conferences. A new information film, "The Vital Element", to stress the importance of preserving the Canal's watershed, was also produced.

During the year, the Guide Service handled a total of 280,480 visitors at Miraflores and Gatun Locks and conducted 843 VIP tours. Among the visitors were officials of the shipping industry, representatives of television networks, writers for news, travel, and shipping industry publications, producers of motion picture documentaries, and government and business officials from all over the world.

OMBUDSMAN

The Office of the Ombudsman, established by the Implementing Legislation for the Panama Canal Treaty of 1977, continued to respond to employee and dependent complaints, grievances, and request for information. Generally, complaints required the Ombudsman to investigate administrative problems, inefficiencies, omissions, and policy conflicts caused within the Panama Canal Commission and other U.S. Government agencies on the Isthmus as a result of the treaty. In resolving complaints, the widest latitude possible was applied to consideration of problems affecting employee morale and quality of life.

During fiscal year 1985, over 1,962 requests for information and/or assistance were recorded by the Ombudsman. As in the previous year, the majority of the Ombudsman's work concerned Commission employees and those employees who were transferred with their functions from the Panama Canal Company/Canal Zone Government to the Department of Defense.

INDUSTRIAL RELATIONS

With the exception of the pilot bargaining unit, labor-management relations within the Commission during the past year have been marked by routine contract administration activity. Communication between labor and management was generally good and unions continued to enjoy access to the Commission's top management officials. There was an increased awareness by management officials of the obligation to deal with the unions as part of the process of effecting changes in the work place. Labor-management concerns of a pressing nature received prompt attention, and resort to third party dispute resolution was minimal.

Renegotiation of the basic collective bargaining agreement between the Commission and its pilot employees, which began in February 1984 and resulted in impasse prior to the end of fiscal year 1984, was not brought to a conclusion until January of 1985. The agreement that emerged and which was imposed by the Federal Service Impasses Panel, although less generous than the prior agreement, restored a necessary balance to the relationship between the Commission and the pilots. The change, however, was not well accepted and many pilots have refused to embrace the new agreement. The result has been full resort by the union to the entire panoply of dispute

resolution machinery in a campaign against management initiatives and many aspects of the new collective bargaining agreement.

GENERAL COUNSEL

Legislation has been introduced in the 99th Congress to amend the provisions of the Panama Canal Act of 1979 pertaining to vessel damage claims. This bill, H.R. 729, was passed by the House of Representatives on July 22, 1985. By the close of fiscal year 1985, the Senate Armed Services Committee had not held hearings on bill H.R. 729. This bill is virtually identical to bills introduced in both Houses of the 98th Congress, which failed to reach the floor of either House before the end of that Congressional session.

The new bill, H.R. 729, if enacted, would transfer from the Congress to the Commission the authority to settle and pay claims of more than \$120,000 for damage to vessels which occurs outside the locks of the Canal and would subject the Commission to suit on non-locks accidents by claimants who are not satisfied by the Agency's findings, determinations or awards with respect to such claims. In addition, the bill would protect the General Fund of the Treasury from liability for accidents, allow the Commission to purchase catastrophic insurance and set a time limitation on the filing of claims.

Chapter V

FINANCIAL REPORT

FINANCIAL STATEMENTS

FOR THE FISCAL YEAR ENDED SEPTEMBER 30, 1985

The financial statements of the Panama Canal Commission, appearing as Tables 1 through 6, with accompanying notes, present the financial position of the Commission at September 30, 1985, and the results of its operations for the fiscal year then ended.

The accounts and statements of the Panama Canal Commission have been examined by the Office of General Auditor of the Commission and are subject to examination by the United States General Accounting Office. Detailed audit reports of the United States General Accounting Office are directed to the Congress and are presented as Congressional documents.

Summary information concerning operating results and capital expenditures follows:

RESULTS OF OPERATIONS

Net revenue from operations amounted to \$1.1 million. This amount is payable to the Government of Panama pursuant to the provisions of paragraph 4(c) of Article XIII of the Panama Canal Treaty of 1977 subject to the limitations set forth in chapter 3, subchapter V, section 1341(b)(2) of the Panama Canal Act of 1979 (Public Law No. 96-70).

CAPITAL EXPENDITURES

Accrued capital expenditures for fiscal year 1985 amounted to \$29.2 million. The principal expenditures were \$4.1 million for installation of bulkhead slots at Gatun Locks, \$3.9 million for replacement of tugboats, \$2.0 million for the purchase of three split hull dump barges, \$1.7 million for the Vessel Tie-Up Station, \$1.4 million for upgrading Marine Traffic Control System, \$0.9 million for the installation of the Supervisory Control and Data Acquisition System for the Commission's power system.

NOTES TO FINANCIAL STATEMENTS

1. Summary of Significant Accounting Policies.

The Comptroller General of the United States approved the Accounting Principles and Standards Statement of the Panama Canal Commission in his letter dated September 14, 1982. A summary of significant accounting policies follows:

a. *Accounting and reporting.* As required by section 1311(a) of the Panama Canal Act of 1979, hereinafter referred to as the Act, the accounts of the Commission are maintained pursuant to the Accounting and Auditing Act of 1950. This requires that the principles, standards and related requirements be met, as prescribed by the Comptroller General of the United States, after consulting with the Secretary of the Treasury and the Director of the Office of Management and Budget concerning their accounting, financial reporting and budgetary needs. The Accounting and Auditing Act of 1950 also requires that the accounts be maintained on an accrual basis.

b. *Cost recovery.* As required by section 1341(e)(1) of the Act, the application of generally accepted accounting principles to the Panama Canal Commission, a United States Government agency comparable to a rate-regulated public utility, determines the manner in which costs are recognized. The basis for tolls rates is prescribed in section 1602(b) of the Act. This section of the Act, known as the "statutory tolls formula," provides that:

"Tolls shall be prescribed at rates calculated to produce revenues to cover as nearly as practicable all costs of maintaining and operating the Panama Canal, together with the facilities and appurtenances related thereto, including unrecovered costs incurred on or after the effective date of this Act, interest, depreciation, payments to the Republic of Panama pursuant to paragraph 5 of Article III and paragraph 4(a) and (b) of Article XIII of the Panama Canal Treaty of 1977, and capital for plant replacement, expansion, and improvements. Tolls shall not be prescribed at rates calculated to produce revenues sufficient to cover payments to the Republic of Panama pursuant to paragraph 4(c) of Article XIII of the Panama Canal Treaty of 1977."

Under this statutory tolls formula, any unrecovered costs are to be recovered from subsequent revenues. The amount for recovery from subsequent revenues is transferred from Invested Capital to an account within the Other Assets classification. Unrecovered costs are charged back to Invested Capital to the extent subsequent annual revenues exceed annual costs.

c. *Property, plant and equipment.* Property, plant and equipment are recorded at cost, or if acquired from another United States Government

agency, at the value determined by the Director of the Office of Management and Budget. Administrative and other related general expenses are recovered currently and therefore not capitalized. The cost of minor items of property, plant and equipment is charged to expense as incurred.

d. *Advances for capital.* A portion of tolls in excess of depreciation recoveries may be programmed annually by the Board of Directors for plant replacement, expansion, or improvements. Such funds are considered capital advances from Canal users. Upon utilization, these advances are amortized through an offset to depreciation expense in an amount calculated to approximate the depreciation on assets acquired with such advances.

e. *Depreciation.* Property, plant and equipment are depreciated over their estimated service lives at rates computed using a straight-line method with additional annual depreciation, identified as composite, to provide for premature plant retirements.

The recurring costs of dredging the waterway are charged to expense. Non-recurring dredging costs for substantial improvements and betterments to the waterway are considered additions to plant and are capitalized and depreciated over their estimated service lives.

f. *Accounts receivable.* Uncollectible accounts receivable of the Panama Canal Commission are recognized as a reduction in revenue when written off. Any subsequent collections of Commission accounts receivable previously written off are recorded as revenue.

g. *Inventories.* Operating materials and supplies are stated at average cost, plus cost of transportation to the ultimate destination on the Isthmus of Panama. An allowance has been established to reflect the estimated cost of obsolete and excess stock.

h. *Retirement benefits.* Employer payments to the contributory United States Civil Service Retirement System and to the Republic of Panama Social Security System are charged to expense. The Commission has no liability for future payments to employees under these systems.

Non-United States citizen employees who retired from predecessor agencies prior to October 5, 1958, are not covered by the United States Civil Service Retirement System but do receive benefits under a separate annuity plan. Payments made under this annuity plan are recorded as a current year expense. The liability of the Commission for future annuity payments to these former employees or their eligible widows is reflected in the balance sheet as Retirement benefits to certain former employees of predecessor agencies and an equal amount is recorded as a Deferred charge.

As required by the Act, the Panama Canal Commission is liable for the increase in the unfunded liability of the United States Civil Service Retirement Fund which is attributable to benefits payable from that fund to, or on behalf of, employees and their survivors under the early retirement provisions of the Act. The annual installment to liquidate the increased liability is determined by the Office of Personnel Management.

i. *Reserve for lock overhauls.* A reserve is provided through an annual charge to expense to cover the estimated cost of periodic lock overhauls.

j. *Reserve for casualty losses.* A reserve is provided through an annual charge to expense to cover the estimated cost of marine accidents and other casualty losses.

k. *Reserve for floating equipment repair.* A reserve is provided through an annual charge to expense to cover the estimated cost of repairs to major floating equipment.

l. *Housing use rights.* No monetary value is assigned to the rights granted to the United States Government by the Republic of Panama to use Canal Area housing transferred to the Republic of Panama under the terms of the Panama Canal Treaty of 1977. The cost to manage, maintain and provide livability improvements to these quarters is charged to expense. Rental income is included in other revenues.

2. Plant Valuation Allowances.

At July 1, 1951, certain valuation allowances for property, plant and equipment transferred from the Panama Canal (agency) to the Panama Canal Company and the Canal Zone Government were established, to reduce to usable value the costs of the assets transferred. At October 1, 1979, such valuation allowances as were applicable to the assets transferred from the Panama Canal Company and the Canal Zone Government to the Panama Canal Commission were carried forward and are comprised of: (a) \$4.8 million at September 30, 1985, and \$5.5 million at September 30, 1984, to reduce to usable value the cost of property, plant and equipment transferred; (b) \$50.9 million at September 30, 1985, and 1984, to offset interest costs imputed for the original Canal construction period; and (c) \$42.5 million at September 30, 1985, and \$42.8 million at September 30, 1984, to offset the cost of defense facilities and suspended construction projects, the latter being principally the partial construction of a third set of locks abandoned in the early part of World War II.

Property, plant and equipment offset by valuation allowances, when fully or partially reactivated, are reinstated by a reduction in the valuation allowance and by an increase to the non-interest-bearing investment of the United States Government in proportion to the value to the Commission of the reactivated asset.

3. Depreciation as a Percentage of Average Cost of Plant.

The provision for depreciation, expressed as a percentage of average cost of depreciable plant exclusive of valuation allowances, was 2.53% for fiscal year 1985 and 2.63% for fiscal year 1984.

4. Cash and Fund Balances.

As of September 30, 1985, the cash and fund balances of \$79,738,565 are made up of \$74,572,119 on deposit in the United States Treasury, \$1,509,718 on deposit in commercial banks, and \$3,656,728 on hand. Of the total, \$77,963,559 is comprised of current budgetary accounts which include appropriated funds for operations, capital and the emergency fund.

As of September 30, 1984, the cash and fund balances of \$86,761,243 were made up of \$83,845,968 on deposit in the United States Treasury, \$1,209,019 on deposit in commercial banks, and \$1,706,256 on hand. Of the total, \$85,171,089 was comprised of current budgetary accounts which included appropriated funds for operations, capital and the emergency fund.

The emergency fund represents the amount on deposit in the United States Treasury which is to be used ". . . to defray emergency expenditures and to insure the continuous efficient and safe operation of the Panama Canal when funds appropriated for the operation and maintenance of the Canal prove insufficient for such purposes"

The postal fund consists of outstanding money orders, postal savings and interest accrued thereon. This fund will remain available until liquidated. The trust fund primarily includes deposits made by customers for future tolls and other service payments.

5. Panama Canal Commission Fund.

The Panama Canal Commission Fund as established by the Panama Canal Act of 1979 (Public Law No. 96-70) is made up of receipts deposited in the United States Treasury less appropriation warrants issued during the fiscal year. The balance in this account, \$180.8 million as of September 30, 1985, and \$171.2 million as of September 30, 1984, is available for future appropriations.

Section 1302 of the Panama Canal Act of 1979 (Public Law No. 96-70) provides that all appropriations necessary to operate the Panama Canal shall be issued from the Panama Canal Commission Fund. The appropriations for fiscal year 1980 were issued to the Commission from the General Fund of the United States Treasury. The status of the amount still owed to the General Fund of the United States Treasury for fiscal year 1980 is as follows:

	<i>Millions of Dollars</i>	
Operating Appropriation	\$427.2	
Capital Appropriation.....	<u>36.6</u>	\$463.8
Repaid to General Fund (07/81)	(350.0)	
Repaid to General Fund (12/82)	<u>(28.2)</u>	<u>(378.2)</u>
Amount owed General Fund of U.S. Treasury as of September 30, 1985		<u>\$ 85.6</u>

6. Accounting Changes.

a. In fiscal year 1984 a new method was adopted for amortizing advances for capital disbursements based on the flow of costs from construction work in progress. Disbursements are amortized in proportion to depreciation costs arising from completed projects transferred from construction work in progress.

b. During fiscal year 1984, a reserve was established for floating equipment repairs similar to the reserves now in existence for lock overhauls and marine accidents. A one-time charge to expense of \$2.5

million was made to establish the reserve. The annual accrual will be reviewed and adjusted as appropriate.

c. Effective with fiscal year 1984, there was a change in the method of applying the accounting policy for certain inventories. Inventories of manufactured materials and supplies and water system chemicals valued at \$1.3 million were written off by a charge to operations in fiscal year 1984.

d. During fiscal year 1985, the Commission virtually eliminated transfers of costs from performers of services to requesters of these services to simplify and streamline accounting for costs. Additionally, in fiscal year 1985, the operating expenses for storehouse, transportation, sanitation and grounds management services and the employee fitness program were reclassified in order to reflect more closely the Commission's functional alignment of costs. For comparability, fiscal year 1984 expenses were recast to reflect the same cost alignment as fiscal year 1985. In this connection, storehouse expenses of \$6,543,628 and transportation expenses of \$1,068,906 were combined and restated under supply and logistics. Sanitation and grounds maintenance services expenses of \$1,078,835 were combined with general repair, engineering and maintenance services, and expenses for the employee fitness program of \$888,251 were combined with other. These expenses were originally classified in fiscal year 1984 as follows: storehouse expenses were included in general repair, engineering and maintenance services; transportation expenses with utilities; sanitation and ground maintenance services with other; and employee fitness program costs with housing operations.

7. Other Receivables.

Other receivables represent services provided in connection with marine accidents for which the vessel is considered to be responsible awaiting final settlement. This amount is also included in the computation of estimated liabilities established for marine accident claims.

8. Unrecovered Costs Due from Subsequent Revenues.

Pursuant to the provisions of section 1341(e) and section 1602(b) of the Panama Canal Act of 1979 (Public Law No. 96-70) the net loss of \$4.1 million from fiscal year 1983 operations was recovered from fiscal year 1984 operating revenue.

9. Interest-Bearing Investment of the United States Government.

The interest-bearing investment of the United States Government in the Panama Canal is determined based on section 1603(a) of the Panama Canal Act of 1979. The interest-bearing investment of the United States Government at September 30, 1985, and September 30, 1984, was determined as follows:

	<i>Millions of Dollars</i>
Investment at September 30, 1983	\$108.9
Fiscal year 1984 transactions:	
Disbursements	\$381.4
Receipts	(406.0)
Net property transfers	<u>(0.3)</u>
Net change	<u>(24.9)</u>
Investment at September 30, 1984	84.0
Fiscal year 1985 transactions:	
Disbursements	412.6
Receipts	(416.1)
Net property transfers	<u>(3.6)</u>
Net change	<u>(7.1)</u>
Investment at September 30, 1985	<u>\$76.9</u>

10. Marine Accident Claims.

Liabilities arising from marine accident claims are divided into fund and non-fund categories. The fund category is made up of the following:

- a. Accidents which occurred prior to October 1, 1979.
- b. Accidents which occurred within the locks after September 30, 1979.
- c. Accidents which occurred outside the locks after September 30, 1979, for which the claim or estimated liability is \$120,000 or less per ship per accident.

Settlement of liabilities for marine accidents which occurred outside the locks where the claim exceeds \$120,000 requires specific Congressional approval. Until Congressional action is completed, liabilities for these accidents are booked as non-fund. Public Law 99-209, dated December 23, 1985, granted authority to the Commission to adjust and pay these claims. At September 30, 1985, such claims which have accrued since October 1, 1979, totaled \$23.1 million. The authority under Public Law 99-209 is retroactive to October 1, 1979; however, any payments will require appropriations action by the Congress.

11. Advances for Capital—Transit Booking System Fees.

During fiscal year 1982, with approval of the Board of Directors, the Commission tested a system whereby shippers, for a fee, could make an advance reservation for vessel transit. The system was activated in fiscal year 1983 and generated funds of \$5.8 million in fiscal year 1985 and \$4.9 million in fiscal year 1984. Such funds are considered capital advances from Canal users. By direction of the Board of Directors, these fees are set aside for capital improvements.

12. Contingent Liabilities and Commitments.

In addition to recorded liabilities, the estimated maximum contingent liability which could result from pending claims and lawsuits was \$3.4 million at September 30, 1985, and September 30, 1984. In the opinion of management and Commission counsel, these pending claims and lawsuits will be resolved with no material adverse effect on the financial condition of the agency.

Commitments under uncompleted construction contracts and unfilled purchase orders amounted to \$25.9 million at September 30, 1985, and

\$29.7 million at September 30, 1984. Of these amounts \$0.2 million in unfilled purchase orders were prepaid as of September 30, 1985, and \$0.1 million at September 30, 1984. In addition, the Panama Canal Commission is liable for an indeterminable amount with respect to death and disability payments under the Federal Employees' Compensation Act.

Cash and negotiable securities of a kind acceptable by the United States Government in the amount of \$7.3 million were held by United States depositories designated by the Panama Canal Commission at September 30, 1985, and \$6.3 million at September 30, 1984, to guarantee payment by third parties of their obligations.

The Panama Canal Treaty of 1977, Article XIII, paragraph 4(c), provides that an annual amount of up to \$10 million per year be paid to the Government of Panama out of operating revenues to the extent that such revenues exceed expenditures. Payment to the Government of Panama is subject to the limitations set forth in section 1341(e) of the Panama Canal Act of 1979 (Public Law No. 96-70). In the event operating revenues in any year do not produce a surplus sufficient to cover this payment, the unpaid balance shall be paid from operating surpluses in future years up to the amount available from these surpluses. As of September 30, 1985, the balance contingently payable to the Government of Panama amounts to \$53.1 million. As of September 30, 1984, the balance contingently payable to the Government of Panama amounted to \$44.2 million.

13. Treaty Impact.

On September 7, 1977, the United States of America and the Republic of Panama signed the Panama Canal Treaty of 1977. The Treaty provided for the establishment of the Panama Canal Commission on October 1, 1979, to assume certain operational responsibilities for the Canal until December 31, 1999. When the Treaty terminates on December 31, 1999, the Republic of Panama shall assume total responsibility for the management, operation, and maintenance of the Panama Canal, which shall be turned over in operating condition and free of liens and debts, except as the two Parties may otherwise agree. The effects of these long-range requirements are not considered in the financial statements.

¹ Oceaongoing traffic includes ships of 300 net tons and over, Panama Canal measurement, or of 500 displacement tons and over on vessels paying tolls on displacement basis (dredges, warships, etc.).

² Free traffic includes ships of the Colombian and Panamanian Governments and ships transiting for repair by the Commission.

³ Includes vessels under 300 net tons, Panama Canal measurement (or under 500 displacement tons for vessels assessed on displacement tonnage).

* Effective 10-1-76 the fiscal year for all U.S. Government agencies was changed from July 1 through June 30, to October 1 through September 30. For continuity purposes, July, August, and September 1976 were designated the Transition Quarter.

¹ Includes only commercial vessels of 300 net tons and over, Panama Canal measurement, or of 500 displacement tons and over on vessels paying tolls on displacement basis (dredges, warships, etc.).

² Includes 8 transits where no registered tonnage was reported.

Table 3.—Canal Traffic¹ by Flag of Vessel—Fiscal Year 1985—Continued

NOTE.—In Canal traffic statistics, foreign naval vessels such as transports, supply ships, tankers, etc., with a measurement of 300 net tons (Panama Canal measurement) and over, and vessels of war, dredges, etc., with a displacement of 500 tons and over, are classified as oceangoing commercial vessels. Statistics on these vessels, except as related to displacement tonnage, have been included in the table above. As displacement tonnage cannot be combined with net tonnage, the following table shows statistics covering 17 vessels which transited the Canal during fiscal year 1985 and paid tolls on displacement tonnage.

<i>Flag</i>	<i>Type</i>	<i>Number of transits</i>	<i>Displacement tonnage</i>	<i>Tolls</i>
Chile	Naval	1	1,515	\$1,545
Ecuador	Naval	1	1,000	1,020
France	Naval	4	24,494	24,984
Mexico	Naval	1	1,733	1,768
People's Republic of China	Dredge	1	17,530	17,881
Peru	Naval	1	11,564	11,795
Spain	Naval	1	3,750	3,825
United Kingdom	Naval	2	6,100	6,222
United States	Dredge	1	3,650	3,723
Venezuela	Naval	4	15,287	15,593
Total		17	86,623	\$88,355

Statistics compiled by Office of Executive Planning.

¹ Includes only commercial vessels of 300 net tons and over, Panama Canal measurement.

² Excludes 17 vessels paying tolls on displacement tonnage basis and 8 transits where no registered tonnage was reported.

Statistics compiled by Office of Executive Planning.
