(Martin Berends, Burnard Podratz, Wendell Maus, Orrin Haugen, on behalf of themselves and all others similarly situated, Plaintiffs, v. Earl L. Butz, Secretary of Agriculture of the United States; James V. Smith, National Administrator of Farmers Home Administration; Darrel A. Dunn, Assistant National Administrator of Farmers Home Administration; Willard Ballard, Chief of Emergency Loan Division of Farmers Home Administration; and Gordon F. Klenk, State Administrator of Farmers Home Administration for the State of Minnesota; Defendants)

On January 19, 1973, plaintiffs commenced this action against the Secretary of Agriculture of the United States and certain subordinate officials of the United States Department of Agriculture, Farmers Home Administration (FHA), seeking temporary and permanent injunctive relief, declaratory relief and further relief in the nature of mandamus. The thrust of plaintiffs' action is that the Secretary of Agriculture acted unlawfully and beyond the scope of his authority in terminating the FHA emergency loan program on December 27, 1972. Plaintiffs seek reinstatement of that program.

On February 15, 1973, pursuant to Plaintiff's Motion for a Preliminary Injunction, a hearing was held before this Court in Duluth, Minnesota. At that time, oral argument was heard and briefs and affidavits were submitted by plaintiffs and defendants in support of their respective positions. At the conclusion of plaintiffs' argument, plaintiffs moved that the Court order the advancement of the trial on the merits and its consolidation with the application for the preliminary injunction, pursuant to Rule 65 (a) (2), Federal Rules of Civil Procedure. Because the relief prayed for by plaintiffs and others similarly situated, if granted, will be fully meaningful only if granted prior to the 1973 planting season and in no event later than June 30, 1973, the Court granted the motion, ordered the consolidation, and advanced the trial on the merits to March 5, 1973. At that time, defendants moved to dismiss the amended complaint on the ground that the actions complained of were totally within defendants' discretion. Alternatively, defendants moved for summary judgment. Both motions were denied and full trial on the merits was held.

PARTIES

Plaintiffs are four farmers residing in the 15 county area designated as an "emergency loan" area, who were precluded from applying for emergency loans because of the directive of the Secretary of Agriculture halting the program in Minnesota. The action is brought as a class action. The Court finds that the class is so numerous that joinder of all members is impracticable; that there are common questions of law and fact common to the class; that the claims or defenses of the representative parties are typical of the claims or defenses of the class; and that the representative parties will fairly and adequately protect the interests of the class. Furthermore, the defendants have acted and refused to act on grounds generally applicable to the class, thereby making appropriate final injunctive relief or corresponding declaratory relief with respect to the class as a whole. The action is maintainable as a class action with the class being defined as those farmers in need of agricultural credit as the result of "natural disasters" who operate farms in one or more of the fifteen Minnesota counties involved herein, and were precluded from applying for emergency loans by the directive of the Secretary of Agriculture and the actions taken thereunder terminating the emergency loan program in Minnesota.

Defendants include the Secretary of Agriculture, the National Administrator and Assistant Administrator of the Farmers Home Administration, the Chief of the Emergency Loan Division of the Farmers Home Administration; and the State Administrator of the Farmers Home Administration for the State of Minnesota.

FACTUAL BACKGROUND

In the fall of 1971 and spring of 1972, a large part of western and central Minnesota suffered excessive and prolonged rainfall to such extent as to seriously and injuriously interfere with and delay the planting of crops in the spring of 1972. With many years of experience, area farmers were unable to recall such extreme and prolonged conditions of rain and wetness. Because of these conditions, many farmers in the affected areas were unable to get into their fields to plant some of their 1972 crops at all. To the extent planting was possible, in many cases it was only possible critically late in the season—for example, late June or July, 1972. Even after planting, replanting was often required because the seed would rot in the wet soil. Because of the weather, harvests of many farmers were very small; many of the crops were almost totally destroyed.

As a result of these weather conditions, on June 26, 1972, defendant Earl Butz, United States Secretary of Agriculture, declared that fourteen counties in western and central Minnesota had experienced "natural disasters" and designated those fourteen counties "emergency loan areas." This designation was published in the Federal Register, Volume 37, No. 126, page 12854, and provides as follows:¹

DESIGNATIONS OF AREAS FOR EMERGENCY LOANS

For the purpose of making emergency loans pursuant to section 321 of the Consolidated Farmers Home Administration Act of 1961 (7 U.S.C. 1961) and section 232 of the Disaster Relief Act of 1970 (Public Law 91-606), it has been determined that in the following counties in the State of Minnesota natural disasters have caused a general need for agricultural credit:

Counties

Big Stone	Pope
Chippewa	Renville
Douglas	Stevens
Grant	Swift
Kandiyohi	Traverse
Lac qui Parle	Wilkin
Meeker	Yellow Medicine

Emergency loans will not be made in the above-named counties under this designation pursuant to application received after June 30, 1973, except subsequent loans to qualified borrowers who received initial loans under this designation. The urgency of the need for emergency loans in the designated areas make it impracticable and contrary to the public interests to give advance notice of proposed rule making and invite public participation.

Done at Washington, D.C., this 26th day of June, 1972.

EARL L. BUTZ,
Secretary.

On June 26, 1972, pursuant to this designation of "emergency loan areas," the National Office of the FHA, by defendant Willard H. Ballard, Director of the Emergency Loan Division of the FHA, sent the following "notification" telegram to the Minnesota State Director of the FHA indicating that

¹ Subsequently, on September 20, 1972, defendant Butz declared that Stearns County, Minnesota, had suffered a "natural disaster" and also designated it an "emergency loan area." This designation is published in the Federal Register, Volume 37, No. 187, page 20122. There are, therefore, fifteen affected Minnesota counties involved in this action.

these fourteen Minnesota counties had been designated "emergency loan areas." This notification provides as follows:

Effective immediately Big Stone, Chippewa, Douglas, Grant, Kandiyohi, Lac qui Parle, Meeker, Pope, Renville, Stevens, Swift, Traverse, Wilkin, and Yellow Medicine Counties are designated for emergency loans. Initial emergency loan applications will not be received or approved after June 30, 1973, except applications pending on that date will be completed. (Emphasis added)

On June 28, 1972, defendant Gordon F. Klenk, State Director of the FHA for the State of Minnesota, sent a bulletin to County FHA offices in each of the fourteen designated Minnesota counties. This bulletin provides in pertinent part as follows:

Effective immediately the following counties have been designated eligible for Emergency loans by the Secretary of Agriculture: [Enumeration of the fourteen Minnesota counties omitted.]

Initial Emergency loans may be approved in these counties as authorized in FHA Instruction 441.2 to eligible applicants who have suffered production losses caused by excessive moisture conditions and not compensated for by insurance or otherwise. Initial loans for Emergency applicants will not be received or approved after June 30, 1973, except applications pending on that date will be completed.

It is not anticipated that a large volume of applications will be received until after the harvest season; however, where an immediate need for credit exists, the loan should be processed, approved and routed to the State Office for review. We plan to hold an Emergency program meeting with county office personnel in the near future.

County Supervisors in the affected counties should notify the County U.S.D.A. Defense Chairman and see that the public is adequately informed of the emergency designation. The attached news release may be used in the affected counties. (Emphasis added)

This bulletin (as well as the attached "News Release") indicates that emergency loan applications would be accepted and processed through June 30, 1973. It is clear, from the language of this bulletin, that the State Director anticipated that most applications would not be submitted until after the harvest season which was late November or early December, 1972.

Subsequent to the fourteen-county emergency loan designations of June 26, 1972, and the Stearns County designation of September 20, 1972, informational meetings were held throughout the designated areas by State, District and County FHA officials. Relying upon the designations of the National Office of the FHA, these FHA officials informed interested farmers that: (1) applications would be accepted and processed through June 30, 1973; (2) that farmers should not file until after their harvest to make sure that all eligible losses were included in their applications; and (3) that plenty of money was available in the program. Relying upon these representations, many farmers, including plaintiffs and others similarly situated, waited until after the 1972 harvest to file emergency loan applications.

As anticipated by State FHA officials, a substantial portion of emergency loan applications were not submitted until after the harvest season—late November and December, 1972. Between that time and December 27, 1972, many farmers in the fifteen-county emergency loan area contacted local FHA officials for appointments to submit emergency loan applications. Because of the large number of applicants that sought to apply after harvest, County FHA officials were forced to make appointments with many such applicants to review their applications—before formal acceptance—in January, February and even March, 1973.

However, on December 27, 1972, without

warning or notice of any kind, the Secretary of Agriculture, by teletyped message to the Minnesota State FHA office, directed the cessation of acceptance of emergency loan applications in these Secretarial designated counties. This teletyped message provides as follows:

Revised government policy requires that emergency and rural housing disaster loans will be handled as follows: *Cease receiving applications, processing, or approving E. M. [emergency] and R. H. D. loans in all secretarial designation areas sixty days after designation.* Hurricane Agnes and Rapid City, South Dakota, areas, Presidential only, will terminate January 15. All other Presidential designations terminate June 30, 1973. No added Secretarial designations are expected for the balance of 1973. Loan dockets approved and postmarked or in St. Louis by close of business December 27 will be honored. Notify county offices by telephone. Bulletin follows. (Emphasis added)

The message was addressed to all State Directors of the FHA and was received in the Minnesota office at 4:20 p.m. on December 27, 1972 just prior to the close of the business day. Whereas the directive terminated the emergency loan program as far as the plaintiffs were concerned, it continued the program in those areas designated by the President.

None of the County Supervisors in Secretarial designated areas who administered the FHA emergency loan programs at the local level received notice of the termination of the program in their counties on December 27; nor did any County FHA Supervisors receive this notice on the next day, December 28, 1972. All Federal offices were officially closed on December 26, 1972, because of President Truman's funeral. Consequently, it was not until December 29, 1972, that the State FHA office notified the County Supervisors of the termination. Typically, John Schulz, County Supervisor, FHA, for Chippewa and Yellow Medicine Counties, received notice of the termination at approximately 11 a.m. on December 29.

Testimony indicated that never before has a Secretary of Agriculture ordered the permanent halt of an emergency loan program in Secretarial designated emergency loan areas without notice and prior to the date specified in the original designation.

Subsequent to December 27, 1972, and prior to February 15, 1973, when this Court issued a Temporary Restraining Order directing FHA to resume accepting (but not processing) applications from farmers in the fifteen Minnesota Secretarial designated counties, all Minnesota FHA offices have refused to accept, process or consider emergency loan applications from plaintiffs and others similarly situated.

JURISDICTION

As the action is in the nature of mandamus, to compel defendants to perform ministerial duties owed plaintiffs, this Court has jurisdiction of the controversy under 28 U.S.C. § 1361. The scope of the Court's review is set out in Section 10 of the Administrative Procedure Act, 5 U.S.C. § 701, et seq.

The scope of review under the Administrative Procedure Act is stated at 5 U.S.C. § 706. That provision provides in pertinent part:

To the extent necessary to decision and when presented, the reviewing court shall decide all relevant questions of law, interpret constitutional and statutory provisions, and determine the meaning or applicability of the terms of an agency action. The reviewing court shall—

- (1) compel agency action unlawfully withheld or unreasonably delayed; and
- (2) hold unlawful and set aside agency action, findings, and conclusions found to be—
- (B) contrary to constitutional right, power, privilege, or immunity;

(C) in excess of statutory jurisdiction, authority, or limitations, or short of statutory right;

(D) without observance of procedure required by law;

The doctrine of sovereign immunity, raised by defendants, is inapplicable since plaintiffs contend that the defendants' actions were beyond the scope of their authority or they were acting unconstitutionally. *Dugan vs. Rank*, 372 U.S. 609, 621 (1962).

CONCLUSIONS OF LAW

It is the position of the plaintiffs that the unilateral termination of the emergency loan program without public notice was in violation of the mandatory language of the applicable statutes and administrative regulations, as well as violative of the due process clause of the Fifth Amendment. The Government, on the other hand, maintains that the administration of emergency loans is committed by law to the discretion of the Secretary, and hence is not subject to judicial review by this Court, pursuant to 5 U.S.C. § 701.² However, plaintiffs correctly point out that they are challenging only ministerial acts of the administrators. The language in the statutes and regulations relied on by plaintiffs is not of a permissive nature, but affirmatively directs defendants to perform. Whereas the Secretary may have a great deal of discretion in the administration of emergency loans, he has no license to act in violation of mandatory language of statutory laws or agency regulations.

The statutory basis for the emergency loan program is provided in 7 U.S.C. § 1971 which reads:

(a) The Secretary may designate any area in the United States . . . as an emergency area if he finds

(1) that there exists in such area a general need for agricultural credit which cannot be met for temporary periods of time by private, cooperative, or other responsible sources, at reasonable rates and terms for loans for similar purposes and periods of time, and

(2) that the need for such credit in such area is the result of a natural disaster.

As to this part of the statute, it is clear that the decision whether or not to designate an area an "emergency loan area" is committed to the discretion of the Secretary. However, the Secretary has exercised his discretion in this regard; he has designated this fifteen county area as an "emergency loan area." 7 U.S.C. § 1961(b) "authorizes" the Secretary to make loans in such a designated area. The chief benefit flowing from a Secretarial designation is the availability of emergency loans. It is clear from the legislative history that Congress intended that emergency loans would be available to those areas designated as emergency loan areas. In the Senate Report accompanying the Agriculture Act of 1961 it is stated:

Sec. 321(a) *Designation of areas*—The bill proposes that emergency loans would be available whenever the Secretary finds that there exists a need for credit not available from private, cooperative, or other responsible sources due to the occurrence of a natural disaster. . . .

(b) *Eligibility*—Under the bill emergency loans would be made available to any farmer or rancher in the designated area. . . . (Emphasis added) S. Rep. No. 566, 87 Cong., First Session (1961); 2 U.S. Cong. & Adm. News 1961 p. 2313.

Furthermore, Section 5 of P.L. 92-385,

² 5 U.S.C. § 701(a) provides:

This chapter applies, according to the provisions thereof, except to the extent that—

- (1) statutes preclude judicial review; or
- (2) agency action is committed to agency discretion by law.

adopted in August of 1972 as an amendment to 7 U.S.C. § 1961-1967 provides:

(e) The benefits provided under this section shall be applicable to all loans qualifying hereunder, whether approved before or after the date of enactment of this section.

"Shall" is mandatory language. The only sensible reading of these statutes requires the Secretary to apply emergency loan benefits to all loans qualifying under these provisions. In order to apply the benefit provisions, the Secretary must first determine which loan applicants qualify. To follow the dictate of Congress, the Secretary must accept loan applications and consider them.

In *Dubrow v. Small Business Administration*, 345 F. Supp. 4 (D. Cal. 1972), the right to apply for small business administration disaster loans was at issue. The government contended that under the Disaster Relief Act of 1972, 42 U.S.C. § 4451, the agency had absolute discretion to determine whether or not to make a loan under the Act. Of this, the Court stated:

The Disaster Relief Act clearly states that the SBA shall administer disaster relief loans in accordance with its administration of the Disaster Loan Program. Under 15 U.S.C. § 636(b) the agency is empowered to make such loans as "the Administrator may determine to be necessary or appropriate." This language calls for a determination which implies that some consideration of each application must be undertaken. While it may be true that an individual has no right to receive a loan under the disaster loan program, he does have the right to file an application and to have his application reviewed. In *Simpkins vs. Davidson*, 302 F. Supp. 456 (S.D.N.Y. 1969), the plaintiff brought a mandamus action seeking to enjoin the SBA from refusing to grant him a loan. The Court held that Section 634(b) removed any jurisdiction the Court might have to compel the agency to grant plaintiff a loan, but that it had a statutory duty to process the plaintiff's loan application. What *Simpkins* makes clear is that discretionary acts of the SBA may not be reviewed, but, acts which are tantamount to a refusal to exercise discretion are subject to judicial review. Whatever the limits on this Court's authority to review denial of an application, they do not preclude judicial review when the SBA has refused to follow its statutory duty to determine whether the loan to a given applicant is necessary or appropriate. 345 F. Supp. 8, 9.

The situation in the instant case is virtually identical. It is clear from the reading of the statute that Congress has directed the Secretary to accept and consider loan applications from those counties which have been designated as "emergency loan areas." The Secretary's refusal to comply with the statutory language, and the subsequent termination of the emergency loan program was accomplished in excess of the Secretary's authority and is unlawful.

Not only was the administrative action taken in excess of statutory authority, but it also was in violation of the duly promulgated regulations set up by the Department of Agriculture. Validly issued regulations of an administrative agency have the force and effect of statutes. See, *Sheridan-Wyoming Coal Co. v. Krug*, 172 F.2d 282 (8th Cir. 1949). The failure of an administrative agency to follow its own established procedures constitutes a violation of procedural due process. *Vitarelli v. Seaton*, 359 U.S. 535 (1959); *Service v. Dulles*, 354 U.S. 363 (1959); *Accardi v. Shaughnessy*, 347 U.S. 260 (1954). As stated in *United States v. Heffner*, 420 F.2d 802, 812 (4th Cir. 1970):

An agency of the government must scrupulously observe the rules, regulations or procedures which it has established. When it fails to do so, its actions cannot stand and the courts will strike it down. This doctrine

was announced in *United States ex rel. Accardi vs. Shaughnessy*, 347 U.S. 260, 74 S.Ct. 499, 98 L.Ed. 681 (1954). There, the Supreme Court vacated the deportation order of the Board of Immigration because the procedure leading to the order did not conform to the relevant regulations. The failure of the Board and of the Department of Justice to follow their own established procedures was held a violation of due process. The *Accardi* doctrine was subsequently applied by the Supreme Court in *Service vs. Dulles*, 354 U.S. 363, 77 S.Ct. 1153, 1 L.Ed.2d. 1403 (1959), and *Vitarelli vs. Seaton*, 359 U.S. 535, 79 S.Ct. 963, 3 L.Ed.2d. 1012 (1959) . . .

It is of no significance that the procedures or instructions which the . . . [agency] . . . has established are more generous than the Constitution requires. In *Service vs. Dulles*, supra, the Supreme Court vitiated the discharge of a foreign service officer because of the State Department's failure to follow its own procedures. The Court concluded that it made no difference that the State Department had no statutory or constitutional obligation to establish the procedure in question:

While it is, of course, true that . . . the Secretary was not obligated to impose upon himself these more rigorous substantive and procedural standards . . . having done so he could not, so long as the regulations remained unchanged, proceed without regard to them. 354 U.S. 288, 77 S.Ct. 1165.

The regulations involved give the Secretary the discretion to determine whether or not an area should be designated as an "emergency loan" area.³ However, as pointed out previously the Secretary has exercised his discretion in this regard, and his original designation of the fifteen Minnesota counties as "emergency loan" areas has not been revoked or repealed. The directive of December 27, 1972 sent to State FHA Directors, does not purport to remove the designation but merely halts the processing of loans under the statute.

However, under the applicable regulations the Secretary has no absolute authority to halt the emergency loan program in those areas designated as emergency loan areas. The language of the regulation is clear that emergency loans will be made available in the counties so designated.⁴ The language in the regulations is mandatory and the Secretary is directed to consider applications for emergency loans in designated areas. The refusal to consider applications for emergency loans in designated areas is a violation of the Department's regulations.

Inasmuch as emergency loans were made available up until December 27, 1972, it could be argued that the Secretary fulfilled his obligation under the statutes and the regulations. However, in this respect the method of termination of emergency loan benefits must be considered. The rights of individuals in so important a matter as procuring emergency relief to help restore damage caused by a natural disaster should not be at the mercy of the whims of an administrator. The unilateral termination of the program with-

out notice to the Minnesota farmers offends all traditional notions of fair play. The people have a right to expect better treatment from their government. In *Gonzales v. Freeman*, 334 F. 2d. 570 (D.C. Cir. 1964), the Secretary of Agriculture debarred a contractor from doing any further business with the Department. The matter was handled in summary fashion. In defending a subsequent suit brought by the contractor, the government argued that since a citizen has no "right" to do business with the government, there is no standing for this lawsuit. Judge Burger, now Chief Justice, disposed of this argument:

Thus, to say that there is no right to government contracts does not resolve the question of justiciability. Of course there is no such right but that cannot mean that the government can act arbitrarily, either substantively or procedurally, against a person, or that such person is not entitled to challenge the processes and the evidence before he is officially declared ineligible for government contracts. An allegation of facts which reveal an absence to legal authority of basic fairness in the method of imposing debarment presents a justiciable controversy in our view. 334 F.2d. 574, 575.⁵

In looking to the Secretary's actions it should be pointed out that although it is provided that the Secretary may specify the period within which initial loans may be made, nowhere is the Secretary given the authority to accelerate, or disregard the initial termination date. Looking to the Department's regulations, it is provided:

When an area is designated by the Secretary, the National Office will notify the State Director and Finance Office regarding such area designation. The notification will specify the period within which initial loans may be made to new applicants as a result of the disaster for which the area was designated. State Director will notify immediately the county offices involved. . . . The State Director also . . . will make such public announcements as appear appropriate.

On June 26, 1972 and September 20, 1972, in compliance with these regulations, the National Office of the FHA did inform the State Director of the designation and did specify that the loans be available until June 30, 1973. Public notice was given as to this deadline. The regulation contemplates that the public will be informed as to the designation and the specified period for applying for the loans so as to provide opportunity to take advantage of the loan program. Nonetheless the Secretary, without prior notice, terminated the program depriving thousands of disaster victims from applying for emergency loans.

The unilateral termination of the program without notice was also a violation of a rule promulgated by former Secretary of Agriculture Clifford Hardin which states:

Notice is hereby given of the policy of the Department of Agriculture to give notice of proposed rule making and to invite the public to participate in rule making where not required by law.

5 U.S.C. § 553 provides generally that before rules are issued by Government agencies, notice of proposed rule making must be published in the Federal Register, and interested persons must be given an opportunity to participate in the rule making through submission of data, views, or arguments.

The law exempts from this requirement rules relating to public property, loans, grants, benefits, or contracts.

The Administrative Conference of the United States has recommended that Gov-

⁵ In the instant case, the farmers' position is even stronger inasmuch as there is a right to have disaster loan applications submitted and considered. *Dubrow v. Small Business Administration*, supra, and *Simpkins v. Davidson*, supra.

ernment agencies provide for public participation when formulating the rules relating to public property, loans, grants, benefits, or contracts as a matter of policy.

The advantages of implementing the Conference's recommendation that the public be afforded an opportunity for greater participation in the formulation of rules relating to public property, loans, grants, benefits, or contracts will outweigh any disadvantages such as increased costs or delays.

The public participation requirements prescribed by 5 U.S.C. § 553 (b) and (c) will be followed by all agencies of the Department in rule making relating to public property, loans, grants, benefits, or contracts. The exemptions permitted from such requirements where an agency finds for good cause that compliance would be impracticable, unnecessary or contrary to the public interest will be used sparingly, that is, only when there is a substantial basis therefor. Where such a finding is made, the finding and a statement of the reasons therefore will be published with the rule.⁶

Effective date: Upon publication in the Federal Register (7-24-71) 36 F.R. 143, p. 13804.

In essence the Department has adopted the rule making provisions of the Administrative Procedure Act, 5 U.S.C. § 553,⁷ and made them applicable to the administration of loans. Basically, the statute requires that when a substantive rule is involved and none of the numerous exemptions applies, then administrative agencies shall:

(1) Give advance notice by publication in the Federal Register of the proposed rule making. This notice shall include a statement of the time, place and nature of the public rule making proceedings, reference to the legal authority under which the rule is proposed and the terms of the proposed new rule.

(2) After that notice is given, the agency shall give interested persons an opportunity to participate in the rule making.

(3) The agency shall incorporate in the rule adopted a statement of its basis and purpose.

(4) After the substantive rule is adopted, it shall be published in the Federal Register, not less than thirty days before its effective date.

In adopting the directive of December 27, 1972, defendants did not comply with even one of these mandatory requirements, despite the fact that the directive would have a substantial impact on those regulated, and hence is a "rule" as contemplated in the

⁶ No such finding has been published.

⁷ That statute provides:

(a) This section applies, except to the extent that there is involved—

(1) a military or foreign affairs function of the United States; or

(2) a matter relating to agency management or personnel or to public property, loans, grants, benefits, or contracts.

(b) General notice of proposed rule making shall be published in the Federal Register, unless persons subject thereto are named and either personally served or otherwise have actual notice thereof in accordance with law. The notice shall include—

(1) a statement of the time, place, and nature of public rule making proceedings;

(2) reference to the legal authority under which the rule is proposed; and

(3) either the terms or substance of the proposed rule or a description of the subjects and issues involved.

Except when notice or hearing is required by statute, this subsection does not apply—

(A) to interpretative rules, general statements of policy or rules of agency organization, procedure, or practice; or

(B) when the agency for good cause finds (and incorporates the finding and a brief

³ "The Secretary of Agriculture may designate an area as an E. M. loan area when there exists a general need for agricultural credit resulting from a natural disaster." Section 1832.3(b). 37 Federal Register 72 p. 7294.

⁴ "E. M. loans will be made available in counties named by OEP as eligible for Federal assistance under a major disaster declaration by the President, in counties designated by the Secretary. . . ." Section 1832.3. 37 F.R. 72, page 7294.

"Eligible applicants who are operators of not larger than family farms . . . whose credit needs are for annual recurring operating expenses which can be repaid from the year's income, . . . will receive E. M. loans instead of operating loans." 37 F.R. 72, page 7298.

statute. See, *Pharmaceutical Manufacturers Association v. Finch*, 307 F. Supp. 858 (D. Del. 1970); *Texaco Inc. v. FPC*, 412 F.2d 740 (3rd Cir. 1969); *National Motor Traffic Association v. United States*, 268 F. Supp. 90 (D. D.C. 1967). See also, *A. E. Staley Manufacturing Co. v. United States*, 310 F. Supp. 485 (D. Minn. 1970); *Housing Authority of the City of Omaha, Nebraska v. United States Housing Authority*, 54 F.R.D. 402 (D. Neb. 1972).

The failure to give notice prior to the termination of the loan program is also in violation of the Administrative Procedure Act, 5 U.S.C. § 551, et seq. As stated by Judge, now Chief Justice Burger in *Gonzalez v. Breeman*, *supra*:

The command of the Administrative Procedure Act is not a mere formality. Those who are called upon by the Government for a countless variety of goods and services are entitled to have notice of the standards and procedures which regulate these relationships. 334 F.2d at 972.

Section 3 of the Administrative Procedure Act (5 U.S.C. § 552) provides, in mandatory language, as follows:

(a) Each agency shall make available to the public information as follows:

(1) Each agency shall separately state and currently publish in the Federal Register for the guidance of the public—

(A) descriptions of its central and field organization and the established places at which, the employees (and in the case of a uniformed service, the members) from whom, and the methods whereby, the public may obtain information, make submittals or requests, or obtain decisions;

(B) statements of the general course and method by which its functions are channeled and determined, including the nature and requirements of all formal and informal procedures available;

(C) rules of procedure, descriptions of forms available or the places at which forms may be obtained, and instructions as to the scope and contents of all papers, reports, or examinations;

(D) substantive rules of general applicability adopted as authorized by law, and statements of general policy or interpretations of general applicability formulated and adopted by the agency; and

(E) each amendment, revision, or repeal of the foregoing.

Inherent in these provisions is the concept that the public is entitled to be in-

(c) After notice required by this section, the agency shall give interested persons an opportunity to participate in the rule making through submission of written data, views, or arguments with or without opportunity for oral presentation. After consideration of the relevant matter presented, the agency shall incorporate in the rules adopted a concise general statement of their basis and purpose. When rules are required by statute to be made on the record after opportunity for an agency hearing, sections 556 and 557 of this title apply instead of this subsection.

(d) The required publication or service of a substantive rule shall be made not less than 30 days before its effective date, except—

(1) a substantive rule which grants or recognizes an exemption or relieves a restriction;

(2) interpretative rules and statements of policy; or

(3) as otherwise provided by the agency for good cause found and published with the rule.

(e) Each agency shall give an interested person the right to petition for the issuance, amendment, or repeal of a rule. P.L. 89-554, Sept. 6, 1966, 80 Stat. 383. (Emphasis added) statement of reasons therefor in the rules issued that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest.

formed as to the procedures and practices of a governmental agency, so as to be able to govern their actions accordingly. The termination of the emergency loan program was without any notice, and was in violation of the provisions of the statute. The last paragraph of 5 U.S.C. § 552(a)(1) provides:

Except to the extent that a person has actual and timely notice of the terms thereof, a person may not in any manner be required to resort to, or be adversely affected by, a matter required to be published in the Federal Register and not so published . . . Notice after the termination of the loan program as was here given can in no way be considered timely. Furthermore, the deprivation of the right to file claims for the loans certainly adversely affected the plaintiffs.

As justification for terminating the loan program in Minnesota, the government argues that there was a shortage of available funds. The emergency loan program is funded by a "revolving fund" referred to as the Agriculture Credit Insurance Fund. Moneys received in connection with loans procured under the fund are credited to the fund and are used for making additional loans. In order to obtain additional money for the fund the Secretary of Agriculture is authorized to make and issue notes to the Secretary of Treasury. 7 U.S.C. § 1928. To draw upon the fund, the Secretary of Agriculture must procure an apportionment from the Office of Management and Budget pursuant to the Anti-Deficiency Act, 31 U.S.C. § 665. The original apportionment for Emergency Loans was \$135 million. The government argues that agency estimates indicated that the total commitment of emergency loans would be approximately \$800 million.

It is the opinion of the Court that the government's contentions are not justified. It is true that the Secretary is prohibited from spending funds in excess of the apportionment. However, there is nothing magic in an apportionment; that is, an original apportionment by the Office of Management and Budget is subject to change. In fact, the Office of Management and Budget is required by law to review each apportionment at least four times each year in order to make "effective use of the appropriation concerned." 31 U.S.C. § 665(4).⁸

In appropriating fund for the emergency loan program, Congress set no monetary limit on the funds that may be apportioned for emergency loans. The appropriation reads as follows:

The following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for Agriculture-Environmental and Consumer Protection programs for the fiscal year ending June 30, 1973, and for other purposes namely: . . .

AGRICULTURAL CREDIT INSURANCE FUND

. . . For loans to be insured, or made to be sold and insured, under this fund in accordance with and subject to the provisions of 7 U.S.C. 1928-1929, as follows: real estate loans, \$370,000,000, including not less than \$350,000,000 for farm ownership loans; water and waste disposal loans, \$300,000,000; and emergency loans in amounts necessary to meet the needs resulting from natural disaster. 92 U.S. Cong. And Ad. News 338, 3397.

In January and again in February of 1973, the Secretary did request and receive additional apportionments of funds for emergency loans bringing the total apportion-

⁸ 31 U.S.C. § 665(4) provides:

Apportionments shall be reviewed at least four times each year by the officers designated in subsection (d) of this section to make apportionments and reapportionments, and such reapportionments made or such reserves established, modified, or released as may be necessary to further the effective use of the appropriation concerned, . . .

ment of funds to \$500 million. The government offers no explanation as to why the Secretary could not request an apportionment that would be sufficient to cover the claims of the plaintiffs in this case. The Secretary has made the determination that there were needs for agricultural credit in the fifteen Minnesota counties involved, yet the Secretary is apparently unwilling to take the necessary procedural steps to insure that the financial needs of the farmers involved are fulfilled in the manner contemplated by Congress. Congress has appropriated sufficient funds to carry out the emergency loan program. It is the Secretary's duty to request an apportionment from the Office of Management and Budget, that would carry out the directives of Congress.

It may be that the Secretary questions the efficacy of the emergency loan program. It is not the role of the Courts to pass upon the necessity or soundness of a duly-promulgated law; likewise, an administrator should not engage in such a practice. It is the duty of the Courts to interpret the law and it is the function of the Administrator to enforce and effectuate the laws passed by Congress.

Furthermore, although the emergency loan program was terminated in Minnesota without notice on December 27, 1972, the program was continued in the areas declared as disaster areas by the President. Since December 27, 1972, \$270 million has been obligated for emergency loans and the Department anticipates that another \$150 million in emergency loans will be approved. If the government were correct in its claim that there was a shortage of funds for the program, it is not at all clear as to why this shortage of funds is evident only in areas designated by the Secretary. The government offers no rational explanation to this grossly inequitable result. There is absolutely no basis in the law to give preference in the administration of emergency loans to Presidentially declared disaster areas.

The bill that eventually became P.L. 92-385 was originally proposed by the Administration, solely to benefit victims of Hurricane Agnes in areas designated by the President. However, while the bill was being considered in Senate Committee, word was received of the disastrous weather conditions in West Central Minnesota. The report states:

The Committee notes that there have been thirty-seven Presidentially designated disasters and eighty-four administratively declared disasters since January 1, 1971, including the disasters associated with Agnes and the Rapid City flood. The Committee agrees that victims of all these disasters should be treated in the same manner insofar as disaster relief is concerned, and that it would be wrong and unfair to accord victims of particular disasters special treatment.

Moreover, the Committee notes that in the future other disasters may occur. For example, while this legislation is being discussed in the Committee, a serious new flood occurred in Central Minnesota devastating as many as ten counties and the same number of large towns. The Committee agreed that victims of future disasters, like this one in Minnesota, should receive the same measure of relief under disaster relief legislation which is accorded to victims of disasters which have already been declared. In no case should people sustaining comparable injury be afforded lesser relief because of their location in different disaster areas. Senate Report No. 91-1008, 72 U.S. Cong. & Ad. News 3472, 3473. (Emphasis added)

The Secretary's actions in giving a preference to Presidentially designated areas is not in keeping with the Congressional intent in promulgating the emergency loan program.

It is the opinion of the Court that the defendants have a ministerial duty to implement the emergency loan program as directed by Congress, that the unilateral termination of the program without notice to the

plaintiffs in this case was in violation of the statutes, the agency's own regulations, and due process of law. Furthermore to the extent that the administrators may have some discretion under the applicable statutes, in terminating the emergency loan program in Minnesota without prior notice, the administrator acted in an arbitrary and capricious manner.

ORDER FOR JUDGMENT

Based on the reasons as set forth in the attached Memorandum, It is hereby ordered that:

1. Defendants' action of December 27, 1972, which terminated, without notice, the FHA Emergency Loan Program in Minnesota, is unlawful and all subsequent actions taken in implementation or furtherance of that action are unlawful.

2. Defendants' Motion to Dismiss Plaintiffs' Amended Complaint for failure to state a claim upon which relief may be granted, is denied.

3. Defendants' alternative Motion for Summary Judgment is denied.

4. Persons situated similar to plaintiffs, within the class represented by Plaintiffs, include established farmers (a) who suffered loss as the result of natural disasters; (b) who operate farms in one or more of the fifteen Minnesota counties designated emergency loan areas by the Secretary of Agriculture on June 26, 1972, and September 20, 1972; and (3) who did not file applications for FHA initial emergency loans prior to December 26, 1972.

5. Defendants, their successors and agents shall reinstate the Farmers Home Administration (FHA) Emergency Loan Program for natural disaster victims in the fifteen Minnesota counties designated Emergency Loan Areas by the Secretary of Agriculture on June 26, 1972 and September 20, 1972, which program was unlawfully terminated by the Secretary of Agriculture on December 27, 1972. To accomplish this, it is ordered that the defendants, their successors and agents shall:

(a) Accept and file FHA emergency loan applications of plaintiffs and others similarly situated, if submitted to County FHA offices on or before June 30, 1973; and

(b) Process said applications as expeditiously as possible, and without delay grant emergency loans thereon to applicants found to be qualified pursuant to the same lawful eligibility and loan purpose requirements on the same basis as they were applied by the Farmers Home Administration between August 16, 1972, and December 27, 1972; and

(c) Pay and deliver the proceeds of approved loans to qualifying applicants without delay.

It is further ordered that this Order shall take effect immediately, except that Subparagraph (c) of this Order, which directs the payment and delivery of loan proceeds, is stayed for a period of ten days from the date hereof.

It is further ordered that in the event an appeal is taken, because of the urgency of this matter, the parties are directed to take all possible steps to procure an expedited appeal.

Mr. HUMPHREY. Mr. President, I also would like to request unanimous consent to have printed at this point in the RECORD, the list of all secretarily designated counties throughout the country that Congressman BERGLAND's amendment is designed to bring equitable relief under the law.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

COUNTIES DESIGNATED BY THE SECRETARY OF AGRICULTURE AS DISASTER AREAS DURING 1972

Arizona: Apache, Cochise, Coconino, Giya, Graham, Greenlee, Mohave, Navajo, Pima, Pinal, Santa Cruz, Yavapai.

California: El Dorado, Fresno, Kern, Kings, Madera, Merced, Nevada, Placer, San Benito, San Joaquin, San Luis Obispo, Santa Cruz, Stanislaus, Tehama, Tulare, Santa Barbara, Santa Clara.

Colorado: Delta, Mesa, Montrose.

Connecticut: Fairfield, Hartford, Litchfield, Middlesex, New Haven, New London, Tolland, Windham.

Delaware: Kent, New Castle, Sussex.

Florida: Gulf.

Georgia: Baker, Baldwin, Effingham, Emanuel, Jefferson, Jenkins, Johnson, Laurens, Miller, Mitchell, Montgomery, Screven, Telfair, Treutlen, Washington, Wheeler.

Iowa: Harrison, Humboldt, Pocahontas, Webster, Chickasaw, Delaware, Dubuque, Fayette, Floyd, Hamilton, Jones, Linn, Wayne, Wright.

Maryland: Allegany, Garrett.

Massachusetts: Barnstable, Berkshire, Bristol, Dukes, Essex, Franklin, Hampden, Hampshire, Middlesex, Nantucket, Norfolk, Plymouth, Suffolk, Worcester.

Michigan: Allegan, Berrien, Cass, Kent, Muskegon, Newaygo, Oceana, Ottawa, Van Buren, Menominee.

Minnesota: Big Stone, Chippewa, Douglas, Grant, Kandiyohi, Lac qui Parle, Meeker, Pope, Renville, Stevens, Swift, Traverse, Wilkin, Yellow Medicine, Stearns.

Nebraska: Lincoln.

New Hampshire: Belknap, Carroll, Cheshire, Coos, Grafton, Hillsborough, Merrimack, Rockingham, Strafford, Sullivan.

New Jersey: Bergen, Essex, Hudson, Hunterdon, Morris, Ocean, Passaic, Sussex, Union, Warren, Atlantic, Gloucester, Salem.

New Mexico: Bernalillo, Catron, Chaves, Colfax, Curry, De Baca, Dona Ana, Eddy, Grant, Guadalupe, Harding, Hidalgo, Lea, Lincoln, Luna, McKinley, Mora, Otero, Quay, Rio Arriba, Roosevelt, Sandoval, San Juan, San Miguel, Santa Fe, Sierra, Socorro, Taos, Torrance, Union, Valencia.

New York: Cortland, Erie, Franklin, Genesee, Jefferson, Lewis, Niagara, Orleans, Sullivan.

North Carolina: Davidson, Davie, Forsyth, Rockingham, Stokes, Surry, Yadkin.

Ohio: Defiance, Henry, Paulding.

Oklahoma: Alfalfa, Beaver, Beckham, Blaine, Caddo, Canadian, Cimarron, Cleveland, Choctaw, Comanche, Cotton, Custer, Dewey, Ellis, Garfield, Grady, Grant, Greer, Harper, Harmon, Jackson, Jefferson, Kingfisher, Kiowa, Logan, Major, McClain, Roger Mills, Stephens, Texas, Tillman, Washita, Woods, Woodward.

Oregon: Lake, Jackson.

Puerto Rico: Adjuntas, Arroyo, Barranquitas, Cayey, Ciales, Corozal, Juana Diaz, Morovis, Orocovis, San German, Yauco.

Rhode Island: Bristol, Kent, Newport, Providence, Washington.

South Dakota: Beadle, Brookings, Brown, Clark, Codington, Davison, Day, Deuel, Grant, Hamlin, Hanson, Kingsbury, Miner, Roberts, Sanborn, Spink, Yankton.

Tennessee: Benton, Carroll, Chester, Crockett, Dyer, Gibson, Haywood, Henderson, Madison, McNairy.

Texas: Andrews, Anderson, Angelina, Aransas, Archer, Armstrong, Atascosa, Austin, Bailey, Bandera, Bastrop, Baylor, Bee, Bell, Bexar, Blanco, Borden, Bosque, Bowie, Brazoria, Brazos, Brewster, Briscoe, Brooks, Brown, Burleson, Burnett, Caldwell, Calhoun, Callahan, Cameron, Carson, Castro, Chambers, Cherokee, Childress, Clay, Cochran, Coke, Coleman, Collin.

Collingsworth, Colorado, Comal, Comanche, Concho, Cooke, Coryell, Cottle, Crane, Crockett, Crosby, Culberson, Dallam, Dallas, Dawson, Deaf Smith, Delta, Denton, DeWitt, Dickens, Dimmit, Donley, Duval, Eastland, Ector, Edwards, Ellis, El Paso, Erath, Falls, Fannin, Fayette, Fisher, Floyd, Foard, Fort Bend, Freestone, Frio, Gaines, Galveston, Garza, Gillespie, Glasscock, Goliad, Gonzales, Gray, Grayson, Gregg, Grimes, Guadalupe, Hale, Hall, Hamilton, Hansford, Hardeman.

Hardin, Harris, Hartley, Haskell, Hays, Hemphill, Henderson, Hidalgo, Hill, Hockley, Hood, Hopkins, Houston, Howard, Hudspeth, Hunt, Hutchinson, Irion, Jack, Jackson, Jasper, Jeff Davis, Jefferson, Jim Hogg, Jim Wells, Johnson, Jones, Karnes, Kaufman, Kendall, Kenedy, Kent, Kerr, Kimble, King, Kinney, Kleberg, Knox, LaMar, Lamb, Lampasas, LaSalle, Lavaca, Lee, Leon, Liberty, Limestone, Lipscomb, Live Oak, Llano, Loving, Lubbock, Lynn, McCulloch, McLennan.

McMullen, Madison, Martin, Mason, Matagorda, Maverick, Medina, Menard, Midland, Milam, Mills, Mitchell, Montague, Montgomery, Moore, Motley, Nacogdoches, Navarro, Newton, Nolan, Nueces, Ochiltree, Oldham, Orange, Palo Pinto, Parker, Parmer, Pecos, Polk, Potter, Presidio, Rains, Randall, Reagan, Real, Red River, Reeves, Refugio, Roberts, Robertson, Rockwall, Runnels, Sabine, San Augustine, San Jacinto, San Patricio, San Saba, Schleicher, Scurry, Shackelford, Shelby, Sherman, Smith, Somervell, Starr.

Stephens, Sterling, Stonewall, Sutton, Swisher, Tarrant, Taylor, Terrell, Terry, Throckmorton, Tom Green, Travis, Trinity, Tyler, Upton, Uvalde, Val Verde, Van Zandt, Victoria, Walker, Waller, Ward, Washington, Webb, Wharton, Wheeler, Wichita, Wilbarger, Willacy, Williamson, Wilson, Winkler, Wise, Yoakum, Young, Zapata, Zavala.

Utah: Box Elder, Davis, Salt Lake, Utah, Washington, Weber, Beaver, Emery, Garfield, Grand, Iron, Juab, Kane, Millard, Plute, San Juan, Sanpete, Sevier.

Vermont: Addison, Bennington, Caledonia, Chittenden, Essex, Franklin, Grand Isle, Lamoille, Orange, Orleans, Rutland, Washington, Windham, Windsor.

Virginia: Essex, Lancaster, Mathews, Middlesex, Northumberland, Richmond, Westmoreland.

Wisconsin: Buffalo, Grant, Pepin, Wyoming: Park.

Mr. HUMPHREY. Mr. President, if the people of this Nation are to continue to have any confidence or trust in their Government, the Senate must, in my judgment, oppose the Senate Committee's amendments to H.R. 1975 and restore the language of the Bergland amendment. I cannot go back to the people of my State and justify or even explain this body's endorsement of an action taken unilaterally by the administration to treat victims of natural disasters unequally. I should also like to remind my colleagues that the benefits provided under the existing emergency loan program (P.L. 92-385) were specifically requested by none other than the President himself.

Mr. President, as the senior Senator from Minnesota indicated a while ago, the President saw fit to do all this on national television. He got all the political advantages out of the Emergency Disaster Relief Act before the election, showing great compassion, and showing how the needs would be met. This national disaster started first with Hurricane Agnes and then later with the floods

in Rapid City, and heavy rains that wiped out investments in crops in many other parts of the Nation. All of this was analyzed by the Government.

And, let us remember it was the administration that made the recommendations relating to the provisions of last year's Disaster Relief Act. The committees of Congress saw fit to review that recommendation, and the law was passed. The Department of Agriculture issued rules and regulations under the law. Applications were accepted under the law up to the date of December 27.

What in the world happened between Christmas and New Year's that should have changed the whole attitude of the Government is beyond me. What happened in the 5 days between Christmas and New Year's to compel the Government of the United States, the Office of Management and Budget, the President, and the Secretary of Agriculture to suddenly discover that this program was no good and that it ought to be terminated? If it was no good, then they ought to ask for refunds. That would be one way of making such cruelty equitable to all—everybody would be mistreated then. The way it is now, just some of the people are being mistreated, and there is no way anybody can justify such an action. That is why we have a Federal district court saying the Secretary has acted in an arbitrary and capricious manner, in violation of the law.

Mr. President, how are you going to ask people for law and order when you have high officials of Government ignoring the law and violating it? The Federal court has held the Secretary in violation of the law. Of course, the Government will have a roomful of attorneys trying to overrule the decision in favor of a handful of family farmers. I think there is no judge worthy of the title who will not believe that the spirit and letter of the law was violated and that there was arbitrary and capricious action on the part of the Secretary.

Mr. MONDALE. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. MONDALE. The Senator will recall that during the campaign the administration was bragging about this bill, and that their representatives went through the Midwest and would point to this law as another example to show how they were the friends of rural America. Just to make sure they understood the bias of this administration, the Secretary of Agriculture said, "I am going to spend like a drunken sailor." I believe were the words. So when the election was held on November 7—in which, incidentally, Mr. Nixon barely carried Minnesota—the people of rural Minnesota and the other 27 States believed, I am sure, the President intended to fulfill the law and that this disaster loan program, plus a whole range of other rural programs, such as rural telephone, rural electric, rural environment—the whole works—would have sympathetic support in legislation on which he was campaigning.

Well, right after the election, strangely, all these bills were terminated. The rural electric bill and the rest of them

were terminated. I think the cruelest of all, in a personal manner, was this particular program, because these farmers were struck by disaster. There is no other way of putting it. They were hurt just as badly as the people who were hurt in the Rapid City disaster, just as hurt as the people who were hurt in the serious flooding on the east coast. Yet, for some reason, it was determined that the administration could just totally ignore the legal rights of these people and their claims for justice.

The arguments that are heard are absolutely unbelievable. For example, they say the program is too liberal. Well, who set the terms of this program? Who asked for it? Who defined what kind of benefits ought to flow when they are struck by disaster? It was the President of the United States, on television, by official message. He set the terms; we did not. All we said was, "If we are going to have a program like this, it ought to be available to all citizens in the Union struck by disaster, declared to be a natural disaster by the President, or administratively declared to be a disaster by the Secretary of Agriculture."

That is all we did. That is the law. I have never seen citizens of this country as deceitfully and shabbily treated as they have been in this instance.

Mr. HUMPHREY. The Senator is just telling us that some of us did have, even at the time, some reservations about the recommendations that were made about the level of benefits requested by the President. We raised those doubts in committee, but we ultimately accepted the recommendations, the judgment and the assessment of the needs as given to us by the administration, and we gave the President what he asked for.

Now, as I have said, after the election, after the Presidential campaign, the President is changing the rules of the game.

Mr. EAGLETON. Mr. President, I ask unanimous consent that Jack Lewis, my assistant, be permitted on the floor during the remainder of the consideration of the Disaster Relief Act, as well as the par value modification bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUMPHREY. Mr. President, the administration wants to break not only its own commitment to these disaster victims, but wants Congress to become its accomplice. And, it is interesting to note that the administration at this same time is stressing the importance of Congress joining them in commitments made by Mr. Kissinger and the President in supplying several billions of dollars to rebuild North Vietnam as part of our Nation's peace agreements with that nation. It wants us to keep commitments to various defense contractors, even when those contractors overrun their initial cost estimates by hundreds of millions—and even billions of dollars. Yet, when it comes to keeping our Government's commitments to thousands of individual citizens who, through no fault of their own, suffer devastating and sometimes complete losses as a result of natural disasters, the administration wants to break its commitments.

I know the CONGRESSIONAL RECORD does not show photographs. One day we may make the RECORD sufficiently modern so that it may display such material, but I have in my hand pictures of some of the flood conditions in Alabama. These homes are inundated with water. Roads are destroyed—as happened in my own State. So it does not make any difference whether your crop is selling for 28 cents or \$28. If you are rubbed out, you are rubbed out.

The people hurt by these natural disasters were not only in Wilkes-Barre and up and down the east coast, which in itself was a tragedy, but also in many other parts of the country.

Now the people in my part of the country are being told, "You are out of luck," by a government which says it wants law enforcement, by a government which recommends capital punishment, by a government that tells a person who did not live up to his duty to serve under Selective Service, he will be punished, and who tells everyone else who has broken a law that he will be punished. Yet, Mr. President, the law has been openly, flagrantly, and arbitrarily violated by the administration when the benefits of this law were cut off in mid-stream, after the Government had told the people of this country what they were supposed to do in order to qualify for these benefits. I say there is only one way to describe it—an illegal, unlawful, arbitrary, capricious act.

I believe the Senator from Oklahoma wanted me to yield to him.

Mr. BELLMON. I was going to ask the Senator a question, if he would yield for that purpose.

Mr. HUMPHREY. Please.

Mr. BELLMON. I feel the Senator has described with great eloquence the situation that has developed, and I certainly make no effort to defend what has happened. I feel generally it is indefensible.

The problem is that we now have an impasse. The emergency loan program is stopped, whether properly or improperly. The fact is that we are not at present able to provide emergency loans for people who need them. The Senator from Minnesota points out that this matter is in the hands of the courts. There has been a decision, and the decision has been appealed. The problem is going to take many months to go through the courts. What we need now is a program on the books which the administration will accept to provide emergency loans so farmers and other citizens can go ahead with normal production activities.

My question to the Senator is, If we go ahead and restore the House language, how long will we have funds available from which to meet the needs?

Mr. HUMPHREY. I am saying that the Congress of the United States ought not to become an accomplice—at least I am not going to become an accomplice—to what I believe is an illegal act. I think that we have an obligation here. If the executive branch of the Government at any time wants to just stop the wheels of Government and say, "We will not do anything until you fellows in Congress change your mind," we will never have

any way in which we can predict what will happen in this country.

There are many areas of the Nation today that depend upon certain commitments from the Government such as our schools, for example, and many of our hospitals that today are also being treated capriciously.

It is interesting to note that the Government always wants people who have contracts with it to complete or keep its contracts. I know people in Minnesota that have been subjected to penalties because they have been unable to fulfill their contracts with the Government through no fault of their own, because of lack of material or labor or financial assistance. They have been subjected to penalties. Many of them have had their economic backs broken by the Government's demand that they fulfill their contracts.

Now we have a situation where the Government is breaking the back of many of the people because the Government will not keep its own contract or commitments.

Mr. President, if we restore the Bergland amendment—which I hope and pray we will—the President may veto it. I recognize that. However, we have the right to override the veto.

The time comes when we have the right to find out whether the President of the United States is going to obey the law. He is not the law. This is a government of law and not of men.

Mr. MONDALE. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. MONDALE. Mr. President, the Senate is being asked to go ahead and confirm the nomination of Mr. Gray and pursue its remedies in the court. And now, we are being asked once again to forfeit our duty as Members of the Congress to define the law as it should be defined, and we are being asked to pursue our remedies in the court.

Mr. BELLMON. Mr. President, if the Senator will yield, I respectfully submit that this is not what the committee had in mind at all. We are trying to get a program enacted now when there is a tremendous, immediate need.

I feel that this is a matter that needs to be settled finally so that we might know where the powers of the Executive are.

In the meantime we have thousands of producers who are unable to get their spring planting done. We need to know now. That is what is intended by this legislation.

Mr. MONDALE. This legislation is a very modest proposal. It only opens up the existing law for 18 days. We are not asking for a long term, revolutionary change in disaster aid programs in the country. We are only asking that the farmers be given a fair chance to come in and apply, with only an 18 days limitation.

We are more or less repealing the existing law for only 18 days. This is a very modest, short-term reopening of the existing law which only becomes necessary because of the utter lawlessness and unfairness of the present administration.

They suggest that we should pursue our remedies in the court. And the reason I make the point is that I keep hearing it over and over again. At the same time we assert our rights, we ought to keep in mind that if the Supreme Court took jurisdiction of the matter, it might be three years from now before we had a decision out of the Supreme Court of the United States. The reason that we have a Congress is to define these matters and to define them swiftly without requiring the citizens of the country to spend their time and their money and the necessary uncertainties involved in getting their rights determined in that slow and beleaguered fashion through the courts.

Mr. HUMPHREY. Mr. President, the issue involved here the integrity of our Government. Does it mean anything, or does it not?

I do not intend to stand by as one Senator and see the matter dismissed out of hand because a few officials are concerned suddenly about saving a few dollars. If they are going to apply those concerns to citizens who have been materially hurt by natural disasters, they should apply those concerns, equally, in other areas.

If I thought for one moment that this exercise was an exercise in politics, I would say that we might as well forget it. However, I believe that the President can change his mind. I believe that if we stand our ground, the Administration will respond, at least within the limited terms of the House bill, including the 18-day extension. I say that it is important.

I would also like to point out to my colleagues that our Government, after terminating these disaster loans last December in the name of economy, went ahead on February 13, 1973 and designated four California counties to receive assistance under the existing FHA emergency loan program, which includes the \$5,000 forgiveness feature and interest loans at one percent.

While this announcement was made out of Washington by Secretary Butz, it was made on that date in California by nobody less than the President himself. So, there is no misunderstanding about the benefits accompanying the announcement. Mr. President, I ask unanimous consent that the news release of Secretary Butz which covered these points in California be printed in the RECORD.

There being no objection, the news release was ordered to be printed in the RECORD, as follows:

FHA ACCEPTS APPLICATIONS FROM CALIFORNIA DISASTER VICTIMS

WASHINGTON, February 13.—Secretary of Agriculture Earl L. Butz announced today that the Farmers Home Administration (FHA) is authorized to assist California farmers, ranchers and homeowners with emergency loans in four counties and the outlying areas of the City of South San Francisco, due to recent storms and flooding.

On Feb. 9, 1973, President Nixon declared a "major disaster" in California due to floods in areas which include Marin, Santa Barbara, San Luis Obispo and Solano Counties, and the City of South San Francisco.

FHA is the rural credit agency in the U. S. Department of Agriculture that assists rural disaster victims to finance crop and livestock

production, and helps them to restore normal farming operations.

Borrowers agree to repay their loans as soon as possible consistent with their ability. Loans are secured as required to protect the government's interest.

Rural housing disaster loans are made to repair or replace housing and essential farm service buildings damaged or destroyed by the disaster.

The interest rate on the loans is one percent.

Up to \$5,000 on the farm or housing loan may be canceled when losses are not compensated by insurance or otherwise.

Applications may be accepted until further notice at local FHA offices serving the disaster areas.

Mr. HUMPHREY. Mr. President, apparently it depends upon where the President is visiting. When he is in California, suddenly counties in that State that have suffered from a natural disaster, whether it be from rain or what have you, become very important. I think that when he saw the problem there, he said that something had to be done.

I have felt for a long time that the President is getting some pretty lousy advice. I feel that the things he is being called upon to do are the result of the advice received from some of his advisers who do not know what is going on in the country.

If they are going to cut off the programs dealing with disaster loans in December of 1972, why are they opening them up to four counties in California?

Mr. BELLMON. Mr. President, if the Senator will yield, I have in my hand a letter signed by Frank B. Elliott, Acting Administrator of the Federal Home Administration. This letter bears on the California situation. I ask unanimous consent that the letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF AGRICULTURE,
FARMERS HOME ADMINISTRATION,
Washington, D.C.

HON. HERMAN E. TALMADGE,
Chairman, Committee on Agriculture and Forestry, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: This is in response to your telephone inquiry of March 21, 1973.

As you are aware, the establishment of a limited period for accepting Emergency loan applications did not preclude Presidential declaration of additional disaster areas as warranted, and the President determined that the recent flood damage in California constituted a disaster situation. The Department news release regarding this was a standard Farmers Home Administration response to a Presidential disaster declaration. This disaster, however, did little or no damage to farms or crops and, therefore, we have not authorized the acceptance of Emergency loan applications from flood victims and do not intend to do so.

We trust this explains the situation to your satisfaction.

Sincerely,

FRANK B. ELLIOTT,
Acting Administrator.

Mr. BELLMON. Mr. President, I read one part of the letter in which it says:

This disaster, however, did little or no damage to farms or crops and, therefore, we have not authorized the acceptance of emergency loan applications from flood victims and do not intend to do so.

Mr. HUMPHREY. Mr. President, that makes it all the worse. That is double duplicity. On my word, the day I heard about the California announcement, I protested, not to ask that California be denied, but to ask that the rest of the country be included and treated equitably.

They made the announcement. There can be no doubt about that. The news release went whirling out from the Department of Agriculture. The President himself made the announcement in California.

What happens? After some of us say that is not fair, they back off. And they have misinformed the country and, yes, they have lied to the people twice.

The law said that they were to get relief. Then there was a cancellation. Then they came back a second time and said to the four counties in California that they are included. Now they say that they are not going to accept any applications. That is a little like saying, "Santa Claus, I want you to come," and having him say, "All right; I will be there, but with no presents."

Mr. BELLMON. Mr. President, there are other provisions of the law that are available. However, the applications are not being accepted. I grant the Senator that is begging the law and the forgiveness features. However, the other features are available.

Mr. HUMPHREY. Mr. President, I ask for the yeas and nays on the committee amendment.

The yeas and nays were ordered.

Mr. HUMPHREY. Mr. President, despite efforts by the administration and the Department of Agriculture to rationalize or dismiss these particular designations as an error, the official release I have just placed in the *Record* speaks for itself. I call particular attention to where it states:

The interest rate on the loans is one percent.

Up to \$5,000 on the farm or housing loan may be cancelled when losses are not compensated by insurance or otherwise.

Applications may be accepted until further notice at local FHA offices serving the disaster areas.

Mr. President, there it is. It is in print. It was announced, it was stated, the orders were given, and then they backed off because somebody indicated that we want fair treatment.

Now, pray tell me, how do you explain this type of arbitrary, highly discriminatory, application of the law. Are we to tell disaster victims in the other secretarily designated counties throughout the Nation who had their benefits summarily terminated without notice that the laws of this country will be enforced only in those States where the President maintains a residence? I think not.

And finally, Mr. President, I should like to call into question the estimates of the Department of Agriculture contained in the Senate committee report on H.R. 1975 as it relates to the number of applications and costs that might be expected if H.R. 1975 is enacted into law as it originally passed the House. I believe the Department estimates in this regard to be very much on the high side. And should

you be wondering why I should question these estimates, I would like to point out that the Department had earlier estimated that between 4,000 and 5,000 applications would be filed by eligible applicants in our 15 Minnesota designated counties if the program were reopened. Well, due to the action of the Federal district court in Minnesota, FHA was ordered to reopen the program in those counties for the purpose of accepting applications pending the outcome of the trial. And, only 2,300 applications were submitted, or about one-half those estimated by USDA.

I hope and pray that the USDA is better on its crop estimates than it is on these, or we are going to be in one fix. I think the Presiding Officer of this body today (Mr. HUDDLESTON) knows what I mean, because the crop estimates are what we base our future agricultural programs on. Could it be that a numbers game is being played here to serve certain parties benefit? I will not try to answer that question, but leave it up to each of you to decide for yourself.

Also, Mr. President, I should like to point out that under the provisions of H.R. 1975—the Bergland amendment notwithstanding—the benefits to be provided under the FHA emergency loan program will be far less—both less than those now provided under the existing program (Public Law 92-385) and less than those provided earlier under Public Law 91-606. In addition, benefits to be provided under H.R. 1975 to farmers and other FHA eligible applicants will be much less than will continue to be the case for Small Business Administration applicants for emergency loans, who will continue to be eligible for benefits at existing levels provided under Public Law 92-385.

I mention this only to point out that our farm and rural people in the future will be getting less in benefits under this program than will the businessmen in their own areas from the same flood. Yet the Department of Agriculture is supposed to be the "friend of the farmer." Listen: the Department is a bigger disaster than the flood.

Mr. BROCK. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. BROCK. Would the Senator support an amendment which would change the law relating to the SBA so that the two are treated exactly the same?

Mr. HUMPHREY. Yes. I am perfectly content with making the two programs compatible.

Mr. BROCK. Even if the Senator's 18-day extension were accepted, after that time the existing law would be changed, would it not?

Mr. HUMPHREY. Yes, it does change the existing law, but it at least provides for an 18-day period for the secretarily designated areas that was earlier provided for presidentially designated counties. I am not going to let the Senator lead me down a rabbit trail, but it would provide for such a similar filing time so farmers could file their applications. That is all we want. It is exactly what was provided earlier for the presidentially designated counties. I am still not

happy with the bill, but I think it is the best we can get.

Mr. BROCK. Perhaps the Senator can advise me what I can tell my Tennessee farmers who have sought a designation but not received it yet, as to why they are not going to be allowed to participate.

Mr. HUMPHREY. I can give the Senator an answer to that.

Mr. BROCK. I wish the Senator would.

Mr. HUMPHREY. Because the Secretary of Agriculture has been derelict in fulfilling his responsibilities. He should have been down there getting those counties designated, if they fell within the criteria. They have not done the job they are supposed to under the law. The law was passed and the regulations were issued.

Mr. BROCK. Perhaps the Senator does not understand me. Tennessee farmers have never come and said, "We want \$5,000 forgiveness." They have said, "We have got to have a loan so that we can plant our crops."

Mr. HUMPHREY. Let me say that my farmers did not come to me and ask for it, either, but the administration came in here and said, "We want this program." I remind the Senator from Tennessee that he voted for it. This body voted for this program. The President had asked for the program. Some of us had doubts about it, but there it is.

Mr. BROCK. Perhaps some of us should admit that we made a mistake.

Mr. HUMPHREY. May I suggest that the people who terminated this program administratively did so at the expense of people who were assured earlier that they would receive such assistance by their Government.

Mr. BROCK. I am not suggesting that. All I am saying is that the people ought to be given assistance so that they can plant their crops.

The effect of the Senator's amendment is to preclude a number of my west Tennessee counties from having any opportunity for relief and an opportunity to be productive this year. That is the size of it. I do not argue the high moral purpose, but occasionally we have to get practical and say these people need to get their crops in the ground. They need some help, and if they are not going to get a designation under the Senator's formula or under the amendment, then I cannot accept that. I cannot back off and try to say, "Well, I am sorry, folks, you have just got to suffer this year."

They have already suffered. What we are asking for is an opportunity to get our money to put that seed in the ground. That is not an awful lot to ask.

Mr. HUMPHREY. May I suggest to the Senator that this bill will do just that. With the Bergland amendment it will do that. The only problem is, you have got to go through the Secretary of Agriculture.

Mr. BROCK. No, that is not the problem. We simply cannot, as a nation, continue the program as it was designed. We miswrote the program, and I think most of the Senate is willing to admit that this \$5,000 forgiveness has done the opposite of what we hoped it would do.

Mr. HUMPHREY. I do not think there

is any such evidence at all. First of all, there have been none of them who have demanded forgiveness. That is a proposition that has to be weighed out in terms of whether or not you have insurance, or whether or not you can get other forms of credit. There is a whole formula for that. I do not think Congress can judge at this point that this program has been a failure. What has happened is that the program has been terminated.

Mr. BROCK. I did not say the program has been a failure. I said the program has been abused.

Mr. HUMPHREY. And there has been no such evidence. The Department has brought in no evidence of abuse. They said in the State of Minnesota they would have 5,000 more applications if we opened it up. The Federal court opened up the program, and we had only 2,300 applications.

They are all judged by the Farmers Home Administration. There is no evidence of such abuse, and just to make the charge does not make it a fact.

There is a problem around here. We have government by pronouncement. I think we ought to have government by fulfillment. What we need here is just to fulfill the objectives of this law; that is all. We are merely asking for equal treatment of secretarily designated disaster areas and Presidentially designated disaster areas. That stays within the original intent of the law.

Mr. BROCK. If the Senator will yield further—

Mr. HUMPHREY. Yes, I yield.

Mr. BROCK. The Senator did not respond to my first question. Apparently he feels that some modification of the law is in order after the 18-day period. If he does not, I have not heard him say so. But if he does, then I would ask the Senator again whether or not he would find, in all sense of equity, that we should apply the same standards to the SBA designation.

Mr. HUMPHREY. No, I do not.

Mr. BROCK. Why? The Senator just got through saying we were discriminating against the farmer.

Mr. HUMPHREY. Just a minute. I am simply saying that if we deny the provisions of the law that I am asking to be restored, we discriminate. I am saying that the law was passed with equal treatment for small business and for the farmers in emergency disaster relief action, but when you start to change it to a 5-percent rate instead of a 3-percent rate, you do make for discriminatory treatment.

The Small Business Administration loan provides for 3-percent disaster loans. This bill provides for 5-percent disaster loans. That is discrimination.

Mr. BROCK. It is 1 percent for SBA.

Mr. HUMPHREY. That is under the Emergency Disaster Relief Act. All provided for 1-percent loans under the law passed last year but the original law was 3 percent with a \$2,500 forgiveness. If the committee bill is adopted, we go to, as far as the farmers are concerned, 5-percent loans. That is discrimination. We will not tolerate that. It is not fair. There is a simple way for both Congress

and the executive branch to act sensibly. We are simply saying that we want an 18-day extension, which is less than June 30. We are asking the administration to cooperate with an 18-day extension. That is fair. That is reasonable. We are not being stubborn about it. The law says up to June 30. We are saying, "Look, we think we can accomplish much although we seek it in 18 days and we are willing to compromise it out with you, Mr. President."

In the meantime, the President has not sent down here any new legislation for disaster relief. We have not received any recommendations from him. We have not received any new proposals, which he is required to submit by law. Public Law 92-385 requires him to do that. We have had no such legislative proposals.

So I urge my colleagues to oppose the adoption of the committee amendment. I realize that the committee amendment was designed as a way, hopefully, to get the farmers something—5 percent money. But Mr. President, I notice the other day that the Government already has said, under FHA operating loan programs, that they would provide loan money at 5½ percent. This is no big deal. The Farmers Home Loan operating loan funds will provide funds for victims of disaster but that is not what a disaster loan is all about. It must be at a lower rate of interest under such special conditions. That is exactly what we legislated in this body.

Mr. MONDALE. As I understand the existing law, the administration is required, I believe it was by January 1, to submit a report to Congress describing how the law was working and recommending such modifications as they thought would be necessary, based on experience under the new law. I am also under the understanding that they have ignored that responsibility, too, because no such report has been forthcoming.

So here we are with a situation where the administration disregards, illegally and unconstitutionally, the law of the land, a law which this President himself signed into law. And then, on the basis of that illegality, they argue that we should deny the citizens of this country the benefits which the law provides.

Also we are told that the law is being abused. If it is, who is abusing it? It is this administration. Why do they not tighten up their procedures if there is such abuse?

I agree with my colleague that there has been little if any abuse of this law. I have not heard of any abuse in Minnesota. These are farmers who are in desperate circumstances. They are not lazy people. They are not people asking for welfare. They are asking for a disaster loan because their crops were wiped out, sometimes twice, and they need some working capital in order to get back on their feet and plant their crops and produce what this country needs.

The Senator from Tennessee says, "How am I going to help my farmers?" Very simple. The law is on the books now. All he has to do is call up the President and the Secretary of Agriculture and say to them, "Why don't you obey the oath of office that you took?" If they do

that, then the farmers would have had help a long time ago.

Mr. BROCK. I would have a little difficulty in telling the President, because there are two laws here which are competing. We do not pass just one law here but a number at a time. We have a law relating to the debt ceiling, too, and the President is prohibited by law from spending more money than the debt ceiling would allow. If he were to spend every dime that Congress has appropriated, we would be over that limit now.

Let us be honest about this. There are limits to the taxpayers' ability to pay in this country. When we create conditions where, with all due regard to their humanitarian purposes and laudable objectives, we say we want 1 percent money and a \$5,000 forgiveness, when, in fact, such a law would result in a situation where some small counties cannot be designated because we do not have the capacity to respond to every county in the United States with that kind of largess, then such legislation itself is obviously self-defeating. The very people these programs are designed to help are not getting that help.

The people of my State and other States have never come in here and said, "We cannot survive without a \$5,000 forgiveness." They have never said that. They have said, "We do need equity and capital."

Mr. HUMPHREY. Mr. President—

Mr. BROCK. Mr. President, if I may just continue my thought for a second. What my farmers and other people in this circumstance have asked for is the opportunity to rebuild, the opportunity to reinvest, to be able to plant their crops, to restart their businesses with a loan which they fully intend and have the capacity by the use of their own productivity to repay. They are not asking for all the goodies in the Federal cookie jar. They are saying, "We can make it," and they can make it and do it responsibly and within the context of keeping this country solvent. That is all we are saying.

Mr. MONDALE. I would like to see the kind of mail the Senator sends to his constituents when he explains to them that they are not getting the help they want under the present law, which the President agreed to uphold when he took his oath of office. The law says that the farmers who have suffered in areas which have been declared disaster areas are entitled to apply for disaster loans, and that those loans will be at a rate of interest and with a forgiveness which the President himself asked be written into law. The law is there. There is no question about their entitlement to its benefits. The only question is whether the President and the Secretary of Agriculture think they are bigger than the law. That is the only issue here.

Mr. BROCK. The question is which law we are wanting to break.

Mr. MONDALE. Every Member of this body has to take the same position with regard to law or we would be better off just saying to the President, "Here is \$250 billion. Please spend it wisely," and then we will spend our time here doing other things. Then I would say that the

Senator from Tennessee is right. But I happen to believe that this is a country of laws. When we pass a law it should mean something. When the President of the United States signs it into law, it is something more than just an opinion. The benefits of the law in this case should go to the farmers of Tennessee as well as to the farmers of Minnesota and the farmers of Kentucky. That is what laws are all about. But we have a law now that acts only at the whim of the President. If we accept that principle, then Congress is unable to act. That is why the farmers are not getting the help they should have. If the law had been obeyed, the farmers would have gotten help a long time ago.

Mr. HUMPHREY. Mr. President, let me repeat that under Public Law 92-385, there was a requirement for the President to submit suggestions and legislative recommendations on further disaster relief by January 31, 1973. That was not a suggestion. That was a requirement, just as all our citizens are required to pay their income taxes by April 15 and if they do not do so, and then they suffer a penalty. Now we have been waiting for that requirement to be fulfilled. The law required that the President submit to us recommendations for permanent emergency loans programs that are necessary to assist the victims of any future natural disasters that might occur. Those recommendations and report have not as yet been submitted to Congress.

Mr. BELLMON. Mr. President, if the Senator from Minnesota will allow me to interject here, I believe that if he will check, he will find that the chairman of the committee, the distinguished Senator from Georgia (Mr. TALMADGE), with the Secretary of Agriculture, have been in agreement that the recommendations to which the Senator refers will be submitted by March 31. This has been mutually agreed to.

Mr. HUMPHREY. I understand that. I think that is kind of them to come in on March 31. But, I suggest to the citizenry of this country that if they do not pay their income taxes by April 15, just take a couple more months and see what happens to them. They will be penalized. The Government will want them to pay some interest. They will want them to do some explaining. But it is just fine for the President to take a look at the law and say, "I am busy. I do not have enough time."

No, no, Mr. President. As the senior Senator from Minnesota has said, you cannot have a country in which some people are going to look at a law and say, "Well, I just do not like it and I am not going to do anything about it."

We need those recommendations, and because we do not have them, we have to do what we are doing today. Congress is being asked to revise these programs without the benefit of the recommendations, which I hope would call for a uniform set of benefits applying to all victims of such disasters, whether they be small businessmen, farmers, or others.

In the meantime, we have a basic compromise piece of legislation that will fulfill immediate needs, at least on equitable terms for all the persons who qualify, for at least a period of 18 days.

That is what the House bill does. The Senate committee struck that out. The Senate committee recommendation struck out the 18-day extension. The 18-day extension applies to all those counties that are secretarily designated.

Mr. President, I hear that some States may not want it, but I think it should be noted that in the list of counties designated, which I placed in the RECORD, are States such as Tennessee, which has some recommendations made by its own Governor to the Secretary of Agriculture. Tennessee has Benton, Carroll, Chester, Crockett, Dyer, Gibson, Haywood, Henderson, Madison, and McNairy Counties.

The Governor of that State asked the Secretary of Agriculture to designate certain areas as disaster areas; and on investigation by the Department, they were so designated by the Department of Agriculture, under the terms of the emergency disaster relief law passed by Congress last summer.

Counties in my State and other States are being cut out. All the secretarily designated counties have been cut out. The presidentially designated counties were given 18 days extra time to get their applications in.

All we are saying is that 18 days should be given to the secretarily designated counties. That is fair.

I might add, in terms of the cost of this program, that I notice that the F-14 has a \$1.7 billion cost overrun.

I noted the other day, when I was here on another bill, that Litton Industries received \$182 million advance payment, interest free, from the Government of the United States—\$182 million, interest free! Come and get it!

We can afford that, but we cannot afford \$182 million in disaster relief for people if they are rubbed out, if their crops are destroyed, if their buildings are destroyed, if their homes are destroyed, if their businesses are destroyed. But we can advance money, to a defense contractor.

The President of the United States comes down here and says, "We have to help Lockheed." I voted to help them with guaranteed loans. That is fine. We have to help Penn Central. That is fine. But not when it comes to some good, hard-working people who provide the food and fiber for this Nation, who provide the sons for our armies, who are law-abiding citizens, who are not rioting or who are not out here burning down things.

They are merely saying "Here is the law. Can I qualify? Can I file an application?"

The Government says, "Yes, John, you can file an application. See me after Christmas. You know, mother wants me to be home for Christmas. The office is busy. We have to take care of the children. Come in after January and February, when you can document your case a little better. We know you, John. Come in, and we'll take your application and process it."

The FHA officers are well known among farm people. They are respected. I do not want to be critical of those officers. They were following instructions.

Then comes December 27, and there is a cheap, hand-me-down mimeographed press release. They could at least have put it on bond stationery. It announces that the whole program is terminated. And we are supposed to like it. I am supposed to go back, with my colleague from Minnesota, to see those people in Minnesota and say, "Well, folks, you know, they just fooled you."

They are going to look at us and say, "What were you doing? What's going on down there?"

I resent anybody implying, directly or indirectly, that those farm families we are talking about in those counties in Minnesota are trying to take this country to the cleaners. They pay their taxes, produce the food, and are good citizens. They have helped build this country, and all they are asking for is that the law which Congress passed, and which the President signed, be applied. How can anyone be against that?

All at once, we are told that we have to change, because somebody over in the executive branch does not like it. So what? We do not like a lot of things in this country that we have to do. Hundreds of thousands of young men put on a uniform and did not like it. They did it. Many people pay their taxes and do not like it, because they do not like what their money is being spent for. Believe me, many of them do not like what their money is being spent for. But they pay. That is a contract, a social contract, between the Government and its people. The minute you break the social contract between the Government and its people, capriciously and arbitrarily, you destroy the confidence that makes possible democratic government.

That is what is going on here, in one case after another. As has been said, in the case of disaster relief program, there is not a scintilla of evidence for the Government to stand on to support what they have done.

Why should a farmer have to go to court to get the Government to follow the law? Yet, the farm families in Minnesota had to raise \$2,500 or more in a public meeting, from their own pockets, to prosecute this lawsuit in order to be able to have a hearing.

So, Mr. President, I am asking that the committee amendment be stricken and that the language of the House bill, section 8, be maintained and sustained in H.R. 1975.

Mr. BELLMON. Mr. President, the Senator from Minnesota has very eloquently described the confused situation which has arisen. As I said earlier, I make no effort to defend this set of circumstances. I feel that I am embarrassed by it, and I am sure many other Members also are embarrassed by it.

I invite attention to one section of the law now on the books that I think may help put this matter in a little better perspective. I have before me a copy of Public Law 92-385, and I am going to read a portion of section 328 which relates to the loan program. It reads:

Notwithstanding any other provision of law, in the administration of this subtitle and the rural housing loan program under section 502 of title V of the Housing Act of 1949, as amended (42 U.S.C. 1472), in the

case of property loss or damage or injury resulting from a major disaster as determined by the President or a natural disaster as determined by the Secretary of Agriculture which occurred after June 30, 1971, and prior to July 1, 1973, the Secretary—

I skip to paragraph 2:

May grant any loan for repair, rehabilitation, or replacement of property damaged or destroyed, without regard to whether the required loan is otherwise available from private sources:

The important language is "may grant." Nothing in here requires the President or the Secretary to make these grants or loans in any way.

I think the charges about malfeasance connected with this whole business are probably not well laid, because this is permissive legislation.

But that is not the main point. To me, the issue is one I tried to express earlier, and it is that we do have in the United States today a real need and an urgent need for emergency-type loans. At the present time, we do have the Farmers Home Administration making operating loans, but those loans are circumscribed, in that they are only made to borrowers who qualify, and they are made in amounts not to exceed \$50,000. In modern-day agriculture, \$50,000 is not enough for some of our operators to go ahead with spring planting.

The fact is that at the present time there is an operational emergency loan program available to people who desperately need credit. All the committee is trying to do in this act is to make such loans available immediately while this entire matter of the division of responsibilities between the executive branch and the legislative branch is worked out.

The fact is that the amendment of the Senator from Minnesota would accomplish nothing, because all it would do is would be to put the present law back on the books for 18 days. If the President were going to use this authority he could use the present law, so all we would be doing, if we accept the recommendation of the Senator from Minnesota, would be to, in effect, kill the emergency loan program.

The committee is trying to get the program back in action again and the legislation we have brought here will do it effectively and accomplish the job at the present time.

I would like to see the controversy between the executive branch and the legislative branch settled. I do not know how far the authority of the President should go, but I would like to see the matter settled. These kinds of controversies have been raging for years. There is no reason for us to deny our food and fiber producers in this spring planting season while we try to settle this constitutional question.

If we pass the legislation suggested by the Senator from Minnesota we are going to prolong the impasse and work a tremendous hardship on the people of our country who can least withstand it.

I believe sincerely that the objective of the Senator from Minnesota is a worthy one, that there are injustices and that there are inequities. But I do not think that Congress, by restoring the Bergland amendment, would settle the

matter; it would just prolong the difficulties that our producers of food and fiber find themselves in today.

Therefore, I urge that the language in the act as it came from the Committee on Agriculture and Forestry be approved without the change suggested by the Senator from Minnesota.

Mr. HUMPHREY. Mr. President, I am prepared to vote in a moment, if that is the wish of the Senator from Oklahoma. I just want to mention this so that my remarks will not be misinterpreted. I respect the distinguished Senator from Oklahoma for his sincerity and his integrity. I know that he is a determined and dedicated friend of agriculture.

The House overwhelmingly passed this bill with the Bergland amendment. We will have to go to conference. That will not be an easy conference, knowing them as I know them from the past. They can be very determined, as can the Senate conferees, also.

If we want to get action we should pass it as it came from the House. It is said that the President may not act under those terms. We have been doing this on other bills such as the rural environmental assistance program and the rural electrification program.

The question is whether or not Congress is going to assert its will and ask for obedience of the law. It is our judgment, I hope, that those laws were designed for the public good. No one is saying we should not receive recommendations from the executive branch as to permanent, long-term disaster relief legislation. That is required in the law. But we are talking about a specific proposal in this bill, specifically relating to natural disasters that have been declared as such by the President and the Secretary of Agriculture. If we want this opportunity, vote down the committee amendment and sustain the language as it came to us in the House bill. That means the bill would go directly to the President. If he vetoes it, which he could do if he is adamantly opposed to it, we can come back and try to override his veto. But I think we should not act now on the basis that the executive branch may not like it.

Insofar as loans are concerned at 5 percent, while that is better than 5½ percent, the Farmers Home Administration normally provides loans at 5½ percent. The language of the bill from the committee provided for 5-percent loans. It is not much of a gain. Personally I think we should stick with what the law originally required, but it now appears that is not attainable, that is if we want to provide some type of assistance to these disaster victims now.

I think we ought to stick with what the law originally required.

Mr. BROCK. Mr. President, I often, in the course of debates like this, wish that I had the eloquence of the Senator from Minnesota in espousing my cause. I doubt that I ever shall. But I do think he is accurate in the sense that we have an honest disagreement. I think perhaps we come close to sharing the same objective in the case of this debate.

I shall support the committee amendment and the effort in this legislation for

one simple reason. I have in my State more than 10 counties that are in trouble. The Senator from Minnesota said that we have counties designated. He is absolutely correct. But there are 36 other Tennessee counties in distress which have not been so designated. It is for them I express this deep concern.

Mr. BELLMON. Mr. President, will the Senator from Tennessee yield?

Mr. BROCK. I yield.

Mr. BELLMON I should like to place in the RECORD, a list of all the counties in the United States that have requested secretarial designation, and these requests are all waived if this legislation is passed.

I ask unanimous consent that the list be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

SUMMARY OF REQUESTS FOR NATURAL DISASTER DESIGNATION BY SECRETARY OF AGRICULTURE PENDING IN THE NATIONAL OFFICE NOT APPROVED AS OF "CUTOFF" ON DEC. 27, 1972, AND THOSE RECEIVED SINCE THEN

	Number requests for new designation	Number requests for subsequent designation	Total requests on hand	Total unduplicated designations in State before cutoff

1 And 1 city.

* 82 and 30 cities.

* 31 cities and 879 counties.

Mr. BROCK. I thank the Senator from Oklahoma very much, because I think it goes to the central point of the debate. We can get all the headlines we want, to talk about the big issues of the day—about congressional versus executive privilege; about abiding by the law; the cost of living; the spending or money bills; but they are something else. The fact remains that what we are trying to do is to give the people who have been productive all of their lives, but who were caught in a tragic situation which effectively limited their opportunity to be productive, a chance to get back into business, to plant their crops, so that we can have some foodstuffs on the market this fall.

I vigorously disagree with the administration's policy concerning disaster relief. I have said so many times in this body and in other places around the country yet the fact remains that something must be done to provide relief now.

As I have said often, I think it is penny wise and pound foolish to withhold rebuilding money in the sense of economy, because what it will amount to is that if we do not get the crops planted, we will have less food on the market, next fall food prices will be even higher. It will cost a whole lot more to do the job then than it will if we can get help to our people to get back in business now.

But let us take this specific language. What does it mean. The Senator from Minnesota is seeking an 18-day extension. That is all he is asking for—an 18-day extension of the mandate in the law. Then, so far as I can tell, it means that we have to wait another 18 days before we get any disaster relief, because it will be 18 days before my 36 counties are designated. Then the counties will be allowed to come under the new law.

Whether I agree with the President is not the point. The point is that we are in planting time right now. Our crops ought to be going into the ground. Every day we delay, and every day the farmer does not have the capacity to put that crop in the ground, places the crop in jeopardy. It lessens his opportunity to get a yield or a harvest in the fall. The crop is in jeopardy. That is what the debate is all about. It is not what kind of relief, but whether or not they will get any relief in time to solve the problem.

My people have not come in and said, "We need \$5,000 and a 1-percent loan." They just want the availability of capital. They want to become productive again. That is what we are debating now. We disagree on how to achieve the objective.

It is my honest conviction that if the committee amendment is not adopted, if it does not become effective in terms of law, the effect on my constituents and those in several other counties in the United States is going to be no relief at all during the course of the time covered by the amendment; and that could place the crops and the farmers in very serious jeopardy. That is why I take the position I take. I support the committee amendment.

Mr. MONDALE. Mr. President, I rise to urge that the Senate reject the committee amendment to H.R. 1975 and approve the bill in the form in which it passed the House of Representatives.

Both the House and Senate committee versions of H.R. 1975 are designed to restore to operation the Farmers Home Administration emergency loan program for disaster-stricken individuals. Both would replace existing loan authority with a program of loans at an interest rate of not more than 5 percent. In each case, the forgiveness feature of the current law would be eliminated.

But before final passage of H.R. 1975, the House adopted by a wide bipartisan majority an amendment offered by Representative BOB BERGLAND. The Bergland amendment provides for an 18-day sign-up during which eligible individuals in counties designated by the Secretary last year could apply for assistance under the terms of existing law.

The Senate Agriculture Committee's report on H.R. 1975 deletes the Bergland amendment. I feel strongly that the Bergland amendment should be retained for a number of important reasons.

The Secretary of Agriculture, through an administrative order issued December 27, 1972, denied eligible individuals in over 500 secretarily designated counties in 25 States any further opportunity to apply for emergency aid. But people in 354 presidentially designated counties in 21 States were given an additional 18-day period until January 15, 1973, during which they could continue to submit applications.

The Agriculture Department's action created a serious inequity among farmers suffering hardship as a result of natural disasters. Farmers in Minnesota, for example, had been given appointments by officials of the Agriculture Department to discuss their applications dated months after the December 27 cutoff.

Four Minnesota farmers who were precluded from applying for emergency loans as a result of the December 27 directive from the Department of Agriculture filed a class action suit for reinstatement of the program. They were backed by the Minnesota Farmers Union.

In a recent decision on this case, U.S. District Judge Miles Lord found that Secretary Butz' action violated Federal statutes, the Department's own regulations and due process of law.

Judge Lord stated:

The rights of individuals in so important a matter as procuring emergency relief to help restore damage caused by a natural disaster should not be at the mercy of the whims of an administrator. The unilateral termination of the program without notice to the Minnesota farmers offends all traditional notions of fair play. The people have a right to expect better treatment from their government.

I wholeheartedly concur in this judgment. For the benefit of my colleagues, I should like to insert in the RECORD at the conclusion of my remarks a review of the circumstances involved in the cases of secretarily designated counties in Minnesota.

Judge Lord ordered Secretary Butz and other officials of the Department to re-

instate the Farmers Home Administration emergency loan program for disaster victims in the 15 Minnesota counties designated by the Agriculture Secretary. He ordered that the FHA accept and file applications, process them as expeditiously as possible and beginning March 30 without delay grant emergency loans to qualified individuals on the same basis as such loans were provided prior to December 27.

While this decision offers hope to people in Minnesota, it is still subject to appeal; and additional court action would be required before individuals in other States could be assisted.

I believe that the Bergland amendment should be approved as a matter of simple justice. Such action would reinforce help provided to Minnesota farmers as a result of Judge Lord's decision and would extend assistance to disaster victims in other States affected by the Department's December 27 order.

The States directly affected are: Arizona, California, Colorado, Connecticut, Delaware, Florida, Georgia, Iowa, Maryland, Massachusetts, Michigan, Minnesota, Nebraska, New Hampshire, New Jersey, New Mexico, New York, North Carolina, Ohio, Oklahoma, Oregon, Rhode Island, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Wisconsin, and Wyoming.

The Senate committee's rejection and the administration's opposition to the Bergland amendment are apparently grounded not on the fundamental issue of equity, but on the basis of cost. The Department has estimated that the forgiveness provision of the Bergland amendment would cost \$180 million, with the total value of assistance including repayable loans costing approximately \$300 million.

I think we should take a close look at these figures. First, the 18 day grace period provided to individuals in Presidentially designated counties did not cost the Treasury anywhere near this amount. In fact, according to the Department of Agriculture, between December 27 and January 16 only 9,000 applications were received from Presidentially designated disaster areas nationwide. The entire value of these loans was only \$45 million with the cancellation totaling roughly \$31 million.

The total value of all forgiveness plus repayable loans under the FHA emergency loan program in both Presidentially and Secretarily designated counties from passage of the 1972 act last August through March 16, 1973, is \$350 million. I find it very difficult to imagine that it would cost nearly as much—\$300 million—for the 18 day grace period in just Secretarily designated under the Bergland amendment.

Second, the Department contends that 60,000 applications might be submitted if the 18 day sign up were provided for Secretarily designated counties. Thus far, a total of 84,000 applications for emergency loans from both Presidentially and Secretarily designated counties have been received by the Department of Agriculture since the inception of the Disaster Relief Act of 1972. The Department is thus telling us that more than 40 percent of all eligible individuals un-

der the emergency loan program in 1972 were precluded from submitting their applications by the December 27 cut-off.

In Minnesota this past January, the Farmers Home Administration identified 4,000 to 5,000 potential loan applicants in Secretariately designated counties. On February 15 Judge Lord ordered the FHA to accept applications from these individuals. However, through last Friday, the FHA had received only 2,300 applications for emergency loans. With nearly 6 weeks to apply, rather than 18 days as provided by the Bergland amendment, fewer than half the FHA's potential applicants had signed on for loans. The experience suggests that the Department's figures of \$180 million for forgiveness and \$300 million for total loan value based upon 60,000 potential applicants may be inflated by a factor of more than double the actual amount.

Estimates aside, I do not know what the true cost would be. But I do know that I asked the Department of Agriculture for a State by State breakdown of their \$300 million price tag for the Bergland amendment. I was told that they had no such figures. I asked how many potential applicants by State would be affected by the Bergland amendment. The Department told me they did not know.

Finally, it is argued that the Bergland amendment ought to be deleted because it would lead to a Presidential veto of the bill. I find this argument unconvincing. The President in February designated four California counties for Farmers Home Administration emergency loans at a 1-percent interest rate with the first \$5,000 forgiven. It seems inconceivable that he would veto a bill providing equal benefits to farmers who had been promised such assistance long before the California counties were added to the program. How could the President veto a bill because of a provision so firmly grounded in the concept of equal protection for our citizens under law?

I believe for all of these reasons that the House passed bill should also be adopted by the Senate.

I urge the full support of my colleagues in voting against the Senate committee amendments and for approval of H.R. 1975 with the Bergland amendment.

Mr. President, I ask unanimous consent that a statement which I have prepared on the Minnesota emergency loan program and the recent Federal court decision be printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MINNESOTA EMERGENCY LOAN PROGRAM I. BACKGROUND

During the fall of 1971 and the spring of 1972 much of western and central Minnesota suffered heavy flood conditions. Farmers in this region had never seen such excessive rain and wetness. Because of the floods, many farmers were unable to plant their 1972 crops. Where planting was possible, in many cases it could be done only very late in the season. Seed often had to be replanted because it had rotted in the

wet soil. Because of the terrible weather, harvest of many farmers were very small; and many crops were almost completely destroyed.

As a result of these conditions, on June 26th Secretary Butz declared fourteen counties in Minnesota as emergency loan areas. Another Minnesota county was so designated on September 20, 1972.

Notice was sent to local F.H.A. offices and relayed to disaster-stricken individuals that emergency loan applications could be received and approved until June 30, 1973. Farmers were advised not to file for aid until after their harvest was completed so that all eligible losses would be included in these applications.

A major share of the Minnesota emergency loan applications were not submitted until after the harvest season in late November and December 1972. At that time because of the large influx of applications, county F.H.A. officials set up appointments with people to discuss their applications prior to final acceptance, extending through January, February and March 1973.

Then on December 27, 1972 without warning the Secretary of Agriculture notified the Minnesota State F.H.A. office that applications would no longer be accepted in Secretariately designated counties.

Never before has a Secretary of Agriculture ordered the permanent halt of an emergency loan program in Secretariately designated disaster areas without prior notice.

II. COURT ACTION

In reaching a decision in this case, the Federal District Court in Minnesota examined the Secretary of Agriculture's actions in light of the provisions of the Disaster Relief Act and the legislative history surrounding this law. Judge Lord found, "It is clear from the reading of the statute that Congress has directed the Secretary to accept and consider loan applications from those counties which have been designated as 'emergency loan areas.' The Secretary's refusal to comply with the statutory language and the subsequent termination of the emergency loan program was accomplished in excess of the Secretary's authority and is unlawful."

Departmental regulations governing administration of the emergency loan program provide for notification to the State F.H.A. office of the period within which initial loans may be made to applicants with modification immediately to county offices involved and to the public.

In accordance with these regulations, notice was provided on June 26th and September 20th, 1972 of the designation, specifying that loans be available until June 30, 1973. However, no advance notice whatsoever was provided prior to the December 27 close-out of loan applications in counties designated by the Secretary. In fact, local F.H.A. offices in Minnesota did not learn of this action until December 29th.

In addition, regulations issued on July 24, 1971 by former Agriculture Secretary Clifford Hardin also made the rule making provisions of the Administrative Procedure Act applicable to the administration of F. H. A. loans. This statute requires that when a substantive rule is involved, then administrative agencies shall: give advance notice by publication in the Federal Register of the proposed rule making; after notice is given, the agency shall give individuals an opportunity to participate in the rule making; the agency shall include in the rule adopted a statement of its basis and purpose; and after the substantive rule is adopted, it shall be published in the Federal Register not less than 30 days before its effective date.

The U.S. District Court noted, "In adopting the December 27th directive, the Department did not comply with even one of these man-

datory requirements, despite the fact that the directive would have a substantial impact on those regulated, and hence is a rule as contemplated in the Statute. The failure to give notice prior to the termination of the loan program is in violation of the Administrative Procedure Act."

Judge Lord ordered Secretary Butz and other officials of the Department to reinstate the Farmers Home Administration Loan program for disaster victims in the fifteen Minnesota counties designated by the Agriculture Secretary. He ordered that the F.H.A. accept and file applications, process them as expeditiously as possible and beginning March 30th without delay grant emergency loans to qualified individuals on the same basis as such loans were provided prior to December 27th.

Mr. BELLMON. Mr. President, to see if I understand correctly the parliamentary situation, is it accurate that a "yea" vote will support the committee action?

The PRESIDING OFFICER. That is correct.

The question is on agreeing to the committee amendments en bloc. The yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Iowa (Mr. HUGHES), and the Senator from California (Mr. TUNNEY) are necessarily absent.

I further announce that the Senator from South Dakota (Mr. ABOUREZK) is absent on official business.

I also announce that the Senator from Mississippi (Mr. STENNIS) is absent because of illness.

I further announce that the Senator from North Carolina (Mr. ERVIN) is absent because of a death in the family.

I further announce that, if present and voting, the Senator from Iowa (Mr. HUGHES), the Senator from South Dakota (Mr. ABOUREZK), and the Senator from California (Mr. TUNNEY) would each vote "nay."

I further announce that, if present and voting, the Senator from Arkansas (Mr. FULBRIGHT) would vote "yea."

Mr. GRIFFIN. I announce that the Senator from Massachusetts (Mr. BROOKE) is absent by leave of the Senate on official business.

The Senator from Colorado (Mr. DOMINICK), the Senator from Arizona (Mr. GOLDWATER), the Senator from Wyoming (Mr. HANSEN), and the Senator from Ohio (Mr. TAFT) are necessarily absent.

The result was announced—yeas 39, nays, 50, as follows:

[No. 68 Leg.]

YEAS—39

Aiken	Eastland	Pearson
Allen	Fannin	Percy
Bartlett	Fong	Proxmire
Bellmon	Griffin	Roth
Bennett	Gurney	Saxbe
Brock	Hatfield	Scott, Va.
Buckley	Helms	Stafford

NOT VOTING—11

Abourezk	Fulbright	Stennis
Brooke	Goldwater	Taft
Dominick	Hansen	Tunney
Ervin	Hughes	

So the committee amendments were rejected en bloc.

Mr. HUMPHREY. Mr. President, I move to reconsider the vote by which the amendments were rejected.

Mr. MONDALE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Hakney, one of its reading clerks, announced that the House had disagreed to the amendment of the Senate to the bill (H.R. 2107) to require the Secretary of Agriculture to carry out a rural environmental assistance program; asked a conference with the Senate on the disagreeing votes of the two Houses thereon, and that Mr. POAGE, Mr. FOLEY, Mr. SISK, Mr. JONES of Tennessee, Mr. TEAGUE of California, Mr. WAMPLER, and Mr. GOODLING were appointed managers on the part of the House at the conference.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 3577) to provide an extension of the interest equalization tax, and for other purposes; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. MILLS of Arkansas, Mr. ULLMAN, Mr. BURKE of Massachusetts, Mrs. GRIFFITHS, Mr. SCHNEEBELI, Mr. COLLIER, and Mr. BROYHILL of Virginia were appointed managers on the part of the House at the conference.

AMENDMENT OF EMERGENCY LOAN PROGRAM UNDER CONSOLIDATED FARM AND RURAL DEVELOPMENT ACT

The Senate continued with the consideration of the bill (H.R. 1975) to amend the emergency loan program under the Consolidated Farm and Rural Development Act, and for other purposes.

Mr. BELLMON. Mr. President, I ask for the yeas and nays on final passage.

The yeas and nays were ordered.

Mr. SCHWEIKER. Mr. President, this legislation would repeal the loan cancellation or grant provisions of the law allowing for forgiveness of up to \$5,000 for residents of rural areas hit by disasters. It would also increase the maxi-

mum interest rate on emergency loans to 5 percent, from the present 1 percent under the Disaster Relief Act.

I strongly oppose this legislation.

In June 1972, this Nation suffered the worst natural disaster in the history of the country. Hurricane Agnes caused over \$3 billion in property damage, flooded 5,000 square miles of land area, and caused 118 deaths; \$2.6 billion of the damage was suffered by private individuals and about \$400 million was caused to publicly owned facilities.

In addition, there was severe flooding in other parts of the country, including the particularly disastrous flood in South Dakota only shortly before the Agnes storm.

Of the States involved in the Agnes disaster, Pennsylvania was hardest hit. About 70 percent of the total damage occurred in Pennsylvania. Of that, 70 percent occurred in the area of Wilkes-Barre. Many other communities including the capital city, Harrisburg, were very hard hit.

The Office of Emergency Preparedness has said that hundreds of cities, towns, and rural communities along 4,500 miles of major rivers and 9,000 miles of streams and tributaries were flooded. Over 500,000 people suffered losses, 116,000 dwellings and mobile homes, and 2,400 farm buildings were damaged or destroyed and 5,800 businesses were destroyed.

Unfortunately, on January 15, 1973, the Department of Agriculture cut off applications for disaster loans. I protested this action by the Department of Agriculture, particularly since the Farmers Home Administration last fall encouraged many rural residents not to submit applications for disaster loans and grants until this spring when they would know more accurately the extent of their losses and their needs for the upcoming growing season. Unfortunately, these protests were to no avail.

In the House-passed version of this bill, provisions were included to permit applicants a period of time, 18 days, to submit their applications to the Farmers Home Administration under existing law. The Senate Agriculture Committee, however, deleted these provisions from the Senate version of H.R. 1975. I, therefore, strongly supported the efforts of Senators MONDALE and HUMPHREY to add these provisions back into the Senate bill. However, these provisions only give 18 days to applicants in areas designated as disaster areas by the Secretary of Agriculture. Pennsylvania was designated by the President, and, therefore, is not eligible for the grace period.

In my view, it is bad enough to cut out the forgiveness features of disaster loans and to increase the interest rates on these loans. It is even less justifiable, however, to repeal the provisions of existing law without giving disaster victims a chance to qualify, particularly in view of the fact that, as I said before, the Farmers Home Administration itself urged potential applicants to delay submitting their requests.

Therefore, while I support efforts to "do equity" by giving applicants in disaster areas designated by the Secretary of Agriculture the same 18-day grace

period permitted to applicants in Presidentially designated areas like Pennsylvania, I intend to vote against this bill. I hope it will be defeated so the disaster assistance program can be reinstated.

Mr. AIKEN. Mr. President, the vote just taken is a strong indication that this bill should be defeated. If not, it certainly ought to be vetoed. It is the strongest argument we have had so far for sustaining the President's vetoes of unwisely legislation.

Moreover, if the President is right about this bill, he is probably right about many of the others, which he intimates he will veto and I am beginning to change my mind about some of Congress actions, because legislation of this type is simply a raid. It is a political raid, and does not speak well for the Congress.

The PRESIDING OFFICER. The question is, Shall the bill pass?

Mr. HUMPHREY. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. The yeas and nays have been ordered.

Mr. TOWER. Mr. President, the bill has not been read the third time, to my understanding.

The PRESIDING OFFICER. No, it has not.

Mr. TOWER. I call up an amendment which I have at the desk, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

Add at the end of the bill the following new section:

"SEC. 9. Notwithstanding the provisions of any other law, any loan approved by the Small Business Administration on or after the date of enactment of this Act under sections 7(b)(1), (2), or (4) of the Small Business Act (15 U.S.C. 636(b)(1), (2), or (4)) shall bear interest at the rate determined under section 324 of the Consolidated Farm and Rural Development Act, as amended by section 4 of this Act. No portion of any such loan shall be subject to cancellation under the provisions of any other law."

Mr. TOWER. Mr. President, H.R. 1975 is an important and well warranted measure. In its present form, however, it would create an inequity between disaster loans approved by the Farmers Home Administration and those approved by the Small Business Administration. As presently drafted, the bill would amend the disaster loan authority of the Farmers Home Administration by deleting the loan cancellation provision and by increasing the interest rate from the present rate of 1 percent per annum to a rate not to exceed 5 percent per annum.

The amendment I offer today, Mr. President, would correct this inequity by applying the same provisions to disaster loans approved by the Small Business Administration. My amendment would add to H.R. 1975 a new section providing that any disaster loan approved by SBA on or after the date of enactment would bear interest at the same rate that the bill would make applicable to disaster loans made by the Farmers Home Administration. Further, no portion of any such SBA loan approved on or after the date of enactment would be subject to cancellation.

Mr. President, this amendment would make H.R. 1975 a much stronger and a much more equitable measure, and I urge that the Senate accept it.

What I am saying, Mr. President, is that we are simply trying to make the loan procedures and policies relative to SBA disaster loans consistent with those in this bill.

SBA computer records indicate SBA has approved 185,753 disaster loans from July 1, 1972 through February 28, 1973 for \$1.298 billion. This indicates an average size of \$6,988 per loan.

So far, SBA has processed the "forgiveness" for 80,574 loans aggregating \$234,687,000—or an average of \$2,912 "forgiveness" per loan; almost \$3,000 per loan.

This amounts to 40 percent of the "average" loan.

SBA is expecting the program to reach \$1.6 billion this fiscal year. Based on 40 percent "forgiveness," some \$640 million will be written off.

In addition, first year interest costs, alone, will amount to approximately \$70.4 million since interest at 1 percent on the remaining \$960 million, after forgiveness, will amount to \$9.6 million, whereas the interest at 5 percent on \$1.6 billion would amount to \$80 million.

These statistics include the Rapid City disaster and the massive destruction wrought by Agnes. In smaller disasters, especially where the damage to an individual is less than \$5,000, the entire loan will be forgiven. Consequently, when an area is hit primarily by flooded basements, this program becomes merely a grant program with a high probability of the major portion of all outlays being forgiven.

Obviously, this is a disincentive for a person to avail himself of the HUD Flood Insurance Program now available in many areas at a subsidized premium rate.

Not only is there a disincentive as far as flood insurance is concerned, but, without the amendment, it encourages every area, no matter how slight the damage, to press for a disaster declaration from SBA. Furthermore, it will result in a gross inequity between the farmer, or rural dweller, and the city dweller and small businessman.

Therefore, to bring the SBA policy and the SBA authorization into conformity with that in H.R. 1975 applying to the Farmers Home Administration, I urge the adoption of this amendment.

Mr. SCHWEIKER. Mr. President, I rise in opposition to this amendment. This is just a part of a wipe out on Hurricane Agnes that we are doing here on the Senate floor today, and I daresay that some of my colleagues from other States, when they face the same kind of disaster we had in our State, will rue the day we did what we are doing here today. They are taking completely away the grant program for people who well might need it in their States as a result of future disasters. They are raising the interest rates from 1 percent to 5 percent.

The amendment of the distinguished Senator from Texas is telling householders as well as small businesses that they will no longer qualify for grants

under any future disaster, that they will have to get 5-percent interest money.

So let us not kid ourselves; today we are wiping out any future relief for disasters in any substantial amount, except the 5-percent loans.

We have experienced in Pennsylvania a sad situation where a 5-percent loan does not help people in the upper age brackets who will not sign their names and their children's names on the line when they do not have many more years left to live, on a long-term indebtedness that they cannot pay back at a 5-percent interest rate. At least the 1-percent provision was something that perhaps they could carry for some reasonable length of time, even though they could not expect to pay it all back.

We are totally gutting today, here on the Senate floor, our disaster relief program. I think we ought to label it for what it is, and all of us should be aware of it.

Sure as the dickens, when the next disaster hits this country, there will be Senators from other States doing what I am doing here today, and wondering why they were asleep when this legislative action was taken on the Senate floor. We are just reversing everything we did as a result of our experiences at the time of Hurricane Agnes.

We are rolling over and starting from scratch, telling the people that they have to go out and get 5 percent money. That is completing the job of wiping out householders and small businesses.

I not only oppose the amendment, Mr. President, but I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. BROCK. Mr. President, I wonder whether the Senator from Pennsylvania noticed some of the ads that were run in the Los Angeles newspapers after the earthquake out there, where the contractors ran ads saying in effect, "Come on in. Uncle Sam has opened up his cookie jar. You get \$5,000 free to remodel. All you have to do is come in and apply and we will fill out the papers for you. If you have a crack in your chimney, just claim the earthquake did it. If you have a slightly disabled automobile, claim that the earthquake did it, if you have a dent in your hood, just come on in and we will fix it. There is \$5,000 for you. Just let Uncle Sam pay the bill."

The fact is, and it has been demonstrated and proved, there was much fraud in these areas. I am sympathetic to what the Senator from Pennsylvania is saying. We have had a sizable disaster in my State. I could not agree more that we have a responsibility to try to provide some relief and opportunity for reconstruction, rebuilding, and to allow people to have a chance to get back on their feet. But I also think that the American people as a whole deserve a little bit of relief, too. This program as written has no criteria and no limitations on it. The fact is, as the Senator from Texas mentioned, that in a great percentage of cases it is not a loan at all. As it is today, it is a flat grant, because the damage often, as a matter of fact, in the majority of cases, is less than \$5,000, so that in this instance, the

Federal Government pays the whole bill. There is no repayment at all.

So I simply cannot understand, in the face of the documented record that we have on this matter, how Congress can refuse to accept a sense of responsibility to correct the problem.

We have an obligation to the people of this country to afford them the opportunity for rebuilding but we also have an equal obligation to protect the sanctity of the pocketbooks of the American people as a whole and protect their rights in terms of not spending them into oblivion by a government that simply finds it more expedient to promise than to perform.

Mr. SCHWEIKER. I appreciate the remarks of the Senator from Tennessee and I would respond in two ways. First of all, I think the RECORD will show that what has happened in the Wilkes-Barre area, in terms of some of the cases the Senator recited that occurred in California, is somewhat different. We have learned a lot from the mistakes of the first disaster program attempted in California and we have not repeated the overwhelming majority of the mistakes either in South Dakota or in Pennsylvania. I think the Senator will find that the kind of abuses existing there on the scale that he describes have not occurred in Pennsylvania or in South Dakota. I think that this in itself shows that we have zeroed in on some of the administrative procedures.

But secondly, what about abuses in the foreign aid program where money has been wasted, cut off, or misused? I see no one here wanting to eliminate the foreign aid program because we had abuses in it or because it was not administered properly. The foreign aid program seems to be the hardest thing to stop. I do not understand this double standard, that because we have some abuses in a good program but it is a domestic program, that we should cut it off; but that a foreign aid program should continue, regardless, that we should appropriate \$5 billion for rehabilitation of Vietnam. I think it is a matter of priorities as to where we put our money. Where is the money coming from that is paying for all these things, if not from the people? Domestic disaster relief should have a higher priority than foreign aid.

Mr. BROCK. If the Senator will permit me to observe, in the 11 years I have served in Congress, I have not supported foreign aid—just for that simple reason. I have tried to exercise a sense of responsibility. But that does not preclude my exercise of a sense of responsibility here as well.

The fact is, in both instances, the American taxpayer has been abused, far too often and in far too many ways. Too many times the President has been criticized, but I have as yet to see Congress establish a legislative budget. I have yet to see Congress establish a mechanism by which it can determine the priorities of this Nation, I have yet to see a sense of fiscal responsibility exercised by Congress. When we consider every single bill, we do so totally out of context—without relating each to the needs of the Nation

as a whole, without relating them to the limited resources of the taxpayer.

Our resources are not created in Washington. They emanate from the people of this country. Those resources are limited by the ability of the American people to pay their taxes. We are placing a pretty heavy load on our citizens today. I believe that we have an obligation to try to structure our programs so as to do the job we seek to do, but to do it within the context of political responsibility and fiscal sanity. That is the effect of the amendment of the Senator from Texas and I support it.

Granted, the whole program needs review, and I would be delighted to support such review. But as of today, if the amendment of the Senator from Texas does not prevail, what the Senator from Pennsylvania has just said will mean that we are not going to have any more disaster relief because we simply cannot afford it. That is where we are at this point. That is the reason this farmers bill is on the floor today. We have reached the point where we are running out of money and we are not going to have any more programs for disaster relief unless we modify the basic law. So, it may be great policy and it may be good politics, it may also be with a true sense of moral purpose that we propose this \$5,000 forgiveness and this 1 percent money. But the fact is, the effect of that position will be, that the people simply will not get help. That is what I cannot understand and cannot support.

Mr. STEVENS. Mr. President, my State of Alaska is one-fifth the size of the United States and has suffered at least one-fifth of the national disasters in this country. At the time of the great Alaska earthquake, there was no forgiveness. The \$5,000 forgiveness has been built into this system since then. It was built in last year. I warned at that time that people supporting it would destroy the disaster relief system.

At the time of the great earthquake in Alaska, loans were at 3 percent and there was a deadline setting a time for making an application to get a disaster loan. We recovered from that disaster and we were grateful to the Federal Government for its assistance, as well as to those in the Senate who served at that time who assisted my State to a great extent by making available loans at the rate of 3 percent.

My home was severely damaged in the 1964 earthquake and there was no forgiveness on the loan that I obtained at that time. First came an \$1,800 forgiveness, and at the time of Hurricane Agnes, it went up to \$5,000. Now we are killing the disaster relief system entirely, a system which is vital to my State. The disaster relief system is being killed by making it so large that it drains the Treasury and is losing support.

I would rather go back to no forgiveness and 3 percent interest to be paid within a reasonable period of time than have this 1 to 5 percent and have the \$5,000 forgiveness and not know whether we will get any help or not.

Mr. TOWER. Has the Senator repaid his loan?

Mr. STEVENS. I have not repaid my

loan yet. I still pay it at the rate of \$70 a month, at 3 percent. It is a 15-year loan. There was no forgiveness on it. It was about \$15,000, in order to rebuild the portion of my home that came down during the earthquake. I was not a Member of the Senate then, but I am very happy to have it right now, as a matter of fact.

But I still do not understand the concept whereby we have to continue to extend more and more this forgiveness giveaway—in order to remake a program that had a good solid foundation and which brought my State back more rapidly after the greatest natural disaster—there may have been greater ones in the country as a whole—but we had the greatest natural disaster, I think, that hit the North American Continent in terms of earthquakes. It was a good system. Why do we destroy it by giving away more? I am worried about this, because I know we are going to have more earthquakes. We are going to have more floods.

I argued on the floor one time about trying to explain to the people of Anchorage, who suffered the greatest earthquake on the North American Continent, why the people of Fairbanks got \$1,800 forgiveness when they suffered a flood. I went to Fairbanks, and they said "We only got \$1,800, and the people in Pennsylvania got \$5,000."

You are going to hurt my State unless you stop this.

Mr. BROCK. The Senator from Alaska has just made an excellent point in support of the amendment; and to bring it to bear today, in terms of the disaster that faces my State of Tennessee, just to illustrate the point, we have 10 counties that have been designated, but we have 36 waiting designation. They cannot be designated because we do not have the money to give them relief under the \$5,000 forgiveness and the 1 percent interest. But if we can go back to the basic program that supported Alaska and allowed Alaska to rebuild, Tennessee can do the same thing, and my farmers can plant their crops.

Mr. STEVENS. I wish someone would explain to me why we got away from the 3-percent loan.

Mr. HUMPHREY. Just call up 1600 Pennsylvania Avenue, 456-1414, and ask for President Nixon.

Mr. STEVENS. I seem to remember that the Senator from Minnesota tried to get a lease on that address once. [Laughter.]

Mr. HUMPHREY. All I am telling the Senator is that the glorious suggestion that all this fuss is about came right out of the high councils of the administration. I did not vote for him.

Mr. STEVENS. I thank the Senator from Minnesota for his contribution.

Mr. MCINTYRE. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. MCINTYRE. Mr. President, last year, I was the floor manager of the bill on disaster relief, and we are the ones who are involved in the question of adjustments of \$5,000, \$3,000, and low interest rates.

We were faced with an epic year in the case of disasters. But the Small Business Committee said on the floor that day, when we had the bill before the Senate, that we were not particularly proud of this type of legislation, that we were moving into an emergency. We had had Hurricane Agnes and the South Dakota disasters on our hands, and we included Minnesota. I do not know whether California was included.

The point I want to make is what the Senator from Minnesota has just said: We should not be arguing about this matter now. In that legislation we mandated the President of the United States to set up a commission to study this disaster problem. It is a difficult problem, a very difficult one, and we should be having legislation flowing in here from the administration, so that we could have full debate and full hearings on the matter.

Mr. HUMPHREY. The law requires that the President have that down here by January 31, 1973. That is what is in the Senator's bill. The President was ordered to send down the recommendations.

Mr. MCINTYRE. And we have nothing, as so often happens in this administration. They will form a commission and take a report and then shelve it; but we do not seem to be able to come up with the legislation we need badly, and we need it in this area, as I am sure the Senators from Pennsylvania and the Senators from New York know, because they suffered so badly during Hurricane Agnes.

Mr. BELLMON. Mr. President, I compliment the Senator from Texas for bringing up this amendment. This corrects one of the great injustices in the existing situation which the distinguished Senator from Minnesota pointed out during earlier debate on the committee amendment.

The fact is that we now have a double standard. The bill we are about to approve here, I feel, will make emergency loans available to agriculture at 5 percent, with no forgiveness. At the present time, the administration is making emergency loans under the Small Business Administration to urban dwellers and businesses, with a \$5,000 forgiveness and 1 percent interest. To me, there is no equity here. We should be treating rural and urban residents the same. The purpose and effect of the amendment of the Senator from Texas will be to accomplish that objective. I strongly support the amendment.

Mr. BUCKLEY. Mr. President, will the Senator yield?

Mr. BELLMON. I yield.

Mr. BUCKLEY. I should like to ask a question of the Senator from Texas, to make sure that I understand what his amendment proposes.

It would affect only future loans from the SBA. Is that correct?

Mr. TOWER. That is correct.

Mr. BUCKLEY. I wanted to clarify that, because it would be an act of unfairness to change the ground rules with respect to those who already have accepted loans.

Mr. TOWER. It would operate only on future loans.

Mr. BUCKLEY. I think the amendment has the virtue of symmetry. It would assure comparable treatment for the victims of natural disasters, although when we do approach disaster legislation on a more comprehensive basis, I believe we may well need to distinguish between damage to homes and damage to income-producing properties.

I do feel that this debate has underscored the urgent need for Congress to come up with more comprehensive legislation to handle natural disasters. We now have extensive practical experience on which to build a truly effective, equitable approach to this hand of relief. I hope that Congress will not feel bound to wait for the administration to recommend such legislation before it moves on its own initiative to hold the appropriate hearings, and so on, so that we can come up, at a reasonably early date, with the kind of legislation that will anticipate all kinds of disasters and will provide a mechanism for disaster insurance.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. BUCKLEY. I yield.

Mr. TOWER. I concur with the Senator that we have a patchwork of disaster relief legislation that, like Topsy, grew. I think it is high time we passed some sort of legislation, preferably under a single agency. I certainly support the concept offered by the Senator from New York.

Mr. BROCK. Mr. President, will the Senator yield?

Mr. BUCKLEY. I yield.

Mr. BROCK. I should like to add my concurrence with respect to the suggestion of the Senator from New York. The current situation is absolutely tragic, with the hodgepodge of programs, the inordinate lack of coordination, the inordinate lack of a coherent Federal policy established by Congress. The whole matter needs to be brought to focus after full investigation, with a better method designed to achieve the relief we seek.

But I support this amendment for two or three basic reasons. First, in the sense of equity, as the Senator from Oklahoma has pointed out, I cannot justify treating urban areas with a different kind of program than rural people have.

But, more directly than that, I hope no Senator finds himself in the position the Senator from Tennessee has been in during the last few months, because I have had two disasters in my State—last fall and again this spring. If any other Senator is in this position, he will find very quickly that unless this amendment is adopted, he will face a situation of almost desperation, as he seeks to afford some relief, some opportunity for rebuilding, to the people of his State.

That is the situation the Senator from Tennessee has been in during the past several weeks. It is an intolerable circumstance, and it is something that I cannot allow to continue. We must conform these laws; we must place them, as the Senator from New York has said, in symmetry. But, more than that, we must do it in the coherence of the whole

of our national budget, the needs of the taxpayers, and the needs of the communities of America.

We simply cannot continue a program which is so ill-designed that it effectively keeps the President and the Secretary from designating an area that desperately needs help because it would cost too much money. That flies in the face of the purpose of the program.

We must resolve this question and amend this law so that relief can be afforded to the people who deserve help and would repay it. They are productive individuals, and they deserve the support of Congress, rather than political games playing that would say, "We're going to pass a law that will allocate all kinds of promised money for you, but you're not going to get it because there isn't enough in the till." That approach is neither responsible nor fair.

That is why we need a revision of the law, and I support the amendment of the Senator from Texas.

Mr. CURTIS. Mr. President, I rise in support of the amendment of the Senator from Texas. This bill was considered by the Committee on Agriculture and Forestry. I believe the sentiment there was such that had we had jurisdiction we would have adopted the amendment in committee.

In my opinion, Congress made a mistake last year in writing a disaster relief bill that was unsound. There are certain limits to what the Government can do to relieve people in time of disaster. Our emotions sometimes say to us that we ought to give them something, and at times that runs into a lot of trouble. It was compounded last year by the fact that we not only gave grants and loans to people but we did not require that they had to show that they could not get the money anyplace else. Then we further compounded the situation by providing for a forgiveness of the first \$5,000 which, of course, is the grant. In other words, one of the wealthiest persons in the country could lose property, get a long-term loan, with the interest subsidized by the taxpayers, and then have \$5,000 of that money forgiven.

The bill reported by the committee is going to change that. The interest is going to be more realistic. They are going to be able to get long-term loans so that someone can be billed, if they have a national disaster, but also these loans will not be given to someone who cannot show whether he could get a loan anyplace else. After a short period of clearing up some pending applications the forgiveness will be done away with.

Frankly, I go farther. I supported the committee position. It did not prevail. This is going to be considerable reformation in a law that should be reformed now.

The question before us is, Should the Committee on Agriculture and Forestry respond and reform the law as it applies to rural areas and not have it applied to the other side of the city limits? It is my understanding that that is what will be accomplished by the Tower amendment. I support the Tower amendment and I hope it is agreed to unanimously.

Mr. DOMENICI. Mr. President, I rise in support of the amendment of the Sen-

ator from Texas and also in support of the argument made by the Senator from Alaska regarding his catastrophe.

I am privileged to serve on the Subcommittee on Financial Disasters of the Committee on Public Works. Last week we went to Biloxi to talk with those who could tell us about Camille and that great disaster and how the law worked there. We did not have a \$5,000 forgiveness provision for the victims of Camille. There was enthusiasm and genuine agreement among the people that our laws had worked well. As a matter of fact, one of the SBA people testifying before the committee said, "We did not have the \$5,000 forgiveness; we had \$1,800." I said, "How much did the \$1,800 cost at the time of Camille?" He said, "\$18,000." He said, "Our estimate is we would have spent 10 times as much."

We proceeded to inquire into the costs. He indicated that, indeed, possibly many people who did not need the money applied and that the \$1,800 forgiveness had no relevancy in terms of ratio and that everyone would apply, regardless of need.

Mr. President, it is only proper that we make the entire law fair and that the farmers and the city dwellers have the full benefit of the law, that we not have a different law for those who live on farms and those who live in the city. If we are going to have the \$5,000 forgiveness, then it should apply in all situations and not in just some situations.

As I toured parts of Mississippi and saw the damage it occurred to me that many who need the \$5,000 forgiveness would not be taken care of; the owner of the premises would get it and the occupant probably would not get the benefit of the \$5,000 forgiveness.

My State of New Mexico had a catastrophe. The facts given to me indicate that many people would qualify for the \$5,000 forgiveness. Our people say they do not think that is fair because among those would be very few poor who need it and many people who do not need it might say, "Let us take advantage of the Federal Government's gift."

Mr. President, let us take a look at the entire law. A national insurance policy should be considered. Let us decide if we are going to bring a package to the Senate. One of the most important ingredients that we must consider is a national policy on disaster insurance. Are we going to insist that companies write it and are we going to subsidize it?

Those considerations are almost more important than the \$5,000 forgiveness. The \$750 million we spent under the \$5,000 forgiveness may very well have subsidized a national disaster insurance policy for many years and provided relief to the citizens on a direct ratio of insurance companies' handling of the claims, on a basis which is fair to all, rather than the haphazard approach, with the Government trying to do all things for everybody.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Texas.

Mr. HUMPHREY. Mr. President, I wish to ask the Senator from Texas a question on his amendment. The Senator from Texas said he wanted his amendment to comply with the provisions of

the bill as now before us that relate to agriculture. Is that correct?

Mr. TOWER. The Senator is correct.

Mr. HUMPHREY. Is it not a fact that the amendment of the Senator from Texas would cut off all funds, all loans at 1 percent and the \$5,000 forgiveness at once, on passage of the act?

Mr. TOWER. The Senator is correct. The Senator has underscored an inequity that would exist if my amendment is adopted.

I am willing to accept a modification of my amendment to make it totally consistent.

Mr. HUMPHREY. Consistent with the language from the House?

Mr. TOWER. Yes.

Mr. HUMPHREY. And that could be done by eliminating in the House language that reference to section 5.

Mr. TOWER. That is correct.

Mr. HUMPHREY. If the Senator would do that we would have a change across the board for the SBA provisions of the law as well as the FHA provisions.

Mr. TOWER. The Senator is correct.

Mr. HUMPHREY. I hope the Senator might make that kind of modification. It would seem to me the amendment would fit in the bill quite well.

Mr. TOWER. The Senator's point is well taken.

Mr. President, I so modify my amendment.

I ask unanimous consent, the yeas and nays having been ordered, that I may modify the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Will the Senator from Texas send the modification to the desk.

Mr. TOWER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. TOWER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will state the amendment, as modified, of the Senator from Texas.

The legislative clerk read as follows:

Add at the end of the bill the following new section:

Sec. 9. Notwithstanding the provisions of any other law, any loan approved by the Small Business Administration on or after the date of enactment of this Act under sections 7(b)(1), (2), or (4) of the Small Business Act (15 U.S.C. 636(b)(1), (2), or (4)) shall bear interest at the rate determined under section 324 of the Consolidated Farm and Rural Development Act, as amended by section 4 of this Act. No portion of any such loan shall be subject to cancellation under the provisions of any other law.

Strike on page 3, line 12, "section 5 of".

Insert on page 3, line 11, after "Agriculture" "and/or the Administrator of the Small Business Administration".

Insert on page 3, line 15, after "Agriculture" "and/or the Administrator of the Small Business Administration".

Mr. TOWER. Mr. President, we seem to have reached an agreement that, I think, makes the amendment more acceptable to the Senator from Minnesota (Mr. HUMPHREY). Under those circum-

stances, I should think that we could go ahead and act on the amendment by voice vote. I, therefore, ask unanimous consent that the order for the yeas and nays be vacated.

Mr. SCHWEIKER. Mr. President, reserving the right to object, I ask the Senator from Texas if it is his understanding that the amendment would give to presidentially designated areas of Pennsylvania that suffered floor damage the same 18-day period on the SBA features of the program.

Mr. TOWER. The Senator is correct.

Mr. SCHWEIKER. Mr. President, in view of the fact that I only got my left toe cut off, instead of my left leg, I will be glad to vacate the request for the yeas and nays. I do intend to vote against the request for the yeas and against the bill. However, I appreciate the 18-day reprieve here, which is a help.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Texas? The Chair hears none, and it is so ordered.

The question is on agreeing to the amendment as modified of the Senator from Texas (Mr. TOWER).

The amendment, as modified, was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. STEVENSON. Mr. President, I send an amendment to the desk and ask to have it stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to state the amendment.

Mr. STEVENSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, immediately following Section 7, insert the following:

"Section 8, the Disaster Relief Act of 1970 is amended by inserting in § 101(a)(1) between the words 'high waters,' and 'wind-driven waves,' the following: 'erosion,' and inserting in section 102(1) between the words 'high waters,' and 'wind-driven waves,' the following: 'erosion,'."

Mr. STEVENSON. Mr. President, my amendment would eliminate one of the inequities and inconsistencies in the bill concerning our disaster relief programs.

In the past few weeks we have again witnessed the destructive force of shoreline erosion. In Indiana, three homes and a section of roadway fell into Lake Michigan—the result of an accelerated erosion that has been occurring there for many years. In North Carolina, five motel units and two beach cottages near the Cape Hatteras Lighthouse were destroyed by heavy seas which brought severe erosion and flooding to the shore. These are only two examples of an inexorable process continuing daily, in many States, including my own. We are losing our shorelines and the damage and danger to property is enormous.

This amendment would change section 102 of the Disaster Relief Act of 1970 to include "erosion" in the definition of "major disaster." This would allow the Office of Emergency Preparedness, at the

request of the Governor of an affected State, to declare a disaster where severe and unforeseen erosion seriously endangers life or property. Such a declaration would trigger the assistance provisions of the Disaster Relief Act and would therefore make low-interest loans available from the Small Business Administration to those individuals who are fighting to save shoreline facilities before they are washed away.

At the present time the Office of Emergency Preparedness has expressed a willingness to consider designating eroding shorelines as disaster areas. This amendment would make clear its authority to do so.

There can be little question that the disaster of severe erosion can be as serious as other natural disasters like flooding and hurricanes. And there can be no doubt about the urgency of the situation along our shorelines.

I, therefore, hope, Mr. President, that the committee might be favorably disposed to accepting this amendment without the necessity of a rollcall vote.

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. STEVENSON. I yield.

Mr. RANDOLPH. Mr. President, I believe that there is actually an inequity that is apparent from the remarks of the distinguished Senator from Illinois.

It is appropriate and necessary at this time to explain that in this consideration of water resource measures in the Public Works Committee we have attempted to do something about streambank erosion in the river valleys of the country. We made provision for a demonstration project to go forward under the jurisdiction of the Army Corps of Engineers, recognizing the seriousness of the problem which has existed in many areas of the country. The Ohio River Valley is, of course, one with which I am most familiar from a personal standpoint.

Mr. President, I have journeyed into the Ohio Valley region and have accompanied the Chief of the Corps of Engineers and its representatives from the Pittsburgh office to inspect riverbank erosion conditions in the Ohio River Valley.

Mr. President, shoreline erosion is a very serious problem, even without the disaster provisions which would further indicate our awareness of the problem.

We have in recent years built and rebuilt many river locks and dams which make it possible to move the barges and other types of water-borne traffic. We have a bend in the river, the water moves to the other side and valuable property is eroded. Houses are endangered. This is a very considerable problem all over the United States.

I am not certain that this particular provision has a place in the bill. Within our Public Works Committee we have been working on this problem and have been moving very energetically and, I hope, constructively to solve it, through our water resources legislation. Certainly I recognize the problem, and I do not want to oppose the amendment, for it calls further attention to the seriousness of the situation.

I only point out there is a constant

erosion of the shoreline on the Ohio River, on both the West Virginia and Ohio sides.

There have been several experimental programs, and in the Flood Control Act, which has passed the Senate, we have authorized an intensive study by the Corps of Engineers to determine both the causes of riverbank erosion and feasible methods of bringing it under control.

In addition, the Public Works Committee is now conducting hearings on disaster relief and certainly will consider the riverbank erosion problem when it reviews possible changes in the basic disaster relief law which we developed and saw enacted in 1970. Additional hearings on water resources will begin in late April, giving us still another opportunity to address this problem.

I commend my colleague from Illinois for bringing this matter to our attention. Perhaps there is a reason why it should be considered here, accepted by those who are in charge of the bill and taken to conference. This can happen with the understanding that the Committee on Public Works, through its Subcommittees on Water Resources and Disaster Relief, will give intensive consideration to this problem in connection with legislation to be reported this year.

Mr. STEVENSON. I thank the distinguished Senator. He, as much as any Member of this body, has been concerned about the preservation of our natural resources over the years, and has done a great deal to preserve them. He makes a very good point. When we think of shoreline erosion, I think many tend to think of the shorelines along the ocean and the lakefronts.

Mr. RANDOLPH. That is right.

Mr. STEVENSON. My own State, like the Senator's, borders the Ohio River. It also borders the Mississippi River. We have severe erosion along our rivers as well as along our lakes and our ocean shorelines. But for reasons that are not altogether clear in the laws now, flooding is considered to be a natural disaster, but the same results, when they flow from erosion, are not considered a natural disaster. The purpose of the amendment is to eliminate that inconsistency.

Mr. RANDOLPH. Mr. President, if the Senator will yield for one request, I think I would like, if the Senator feels it appropriate to permit me, to join him in this amendment as a cosponsor.

Mr. STEVENSON. I would be very pleased.

Mr. RANDOLPH. I have a feeling, on reflection, that what we have done is in another category, and that what we are doing here is attempting to deal with shoreline erosion, which is certainly not confined to the ocean areas, but to the inland waterways of this country as well.

Mr. STEVENSON. I thank the Senator. Mr. President, I ask unanimous consent that the name of the Senator from West Virginia be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, will the Senator put me on the amendment as well? We have a great problem of that

kind in New York. We have been trying very hard to get it corrected. It affects the Great Lakes shoreline as well as other shorelines. I think this is a very constructive amendment, and I would like very much to join the Senator from Illinois and the Senator from West Virginia.

Mr. STEVENSON. I thank the Senator. Mr. President, I ask unanimous consent that the names of the Senator from New York (Mr. JAVITS) and the Senator from Connecticut (Mr. RIBICOFF) be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BELLMON. Mr. President, the Senator from Illinois has described a serious problem that exists in many States, including my own. I believe this amendment is meritorious and would strengthen the bill. I am willing to accept it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

Mr. BUCKLEY. Mr. President, I also would like to support this amendment, and ask that my name be added as a cosponsor.

In a sense, this is an amendment that ought not to be necessary if we were applying the rule of constructive and enlightened commonsense in interpreting existing legislation. We have occurring now in the Great Lakes basins what is really a naturally caused disaster in slow motion. We have had, over the period of months, unusually large rainstorms and precipitations throughout those basins, which have caused the level of those lakes to rise to historic heights. The natural drainage systems simply are not adequate to remove that excess water.

I believe the Stevenson amendment explicitly copes with a situation that is inherent in the purpose of existing legislation. It will cope with the kind of natural developments causing extensive damage with which a person could not normally anticipate. I believe that it in no way strikes the purpose of existing legislation to consider what is taking place in the Great Lakes as being the result of a normally induced disaster.

I, therefore, urge my colleagues to support the amendment.

Mr. NELSON. Mr. President, I support Senator STEVENSON's amendment to add erosion to the list of natural occurrences which make an area eligible for disaster relief assistance.

The rising levels of the Great Lakes have caused severe hardship to both municipalities and private property owners who are suffering great loss, because of the high water levels of the Great Lakes. This amendment will be one step toward providing relief to the entire area.

It is important, however, that we also develop a rational long-range policy designed to minimize the effects of changing lake levels which will take into account the potential environmental impact of artificially tampering with the processes of nature. So while meeting the present need of some form of financial assistance to those who have endured significant property loss, we must also meet our responsibility to the future by

guaranteeing that any steps taken do not have any detrimental environmental effect.

EROSION DISASTER IN INDIANA

Mr. BAYH. Mr. President, I support the amendment offered by the distinguished Senator from Illinois (Mr. STEVENSON). I cosponsored this amendment when first introduced, and I continue to believe it is necessary. This proposal would amend the Disaster Relief Act to make it clear that shoreline erosion areas suffering from severe and unforeseen erosion where life or property is seriously endangered qualify for disaster assistance, including low interest loans.

The erosion which has been eating away at the Indiana shoreline of Lake Michigan is a disaster. There can be no other name for it. Let us recognize this problem for what it is and enable the residents and communities of northwestern Indiana to receive the much needed assistance which Federal disaster relief can afford.

Only 10 years ago a savage storm lashed the Indiana shore of Lake Michigan. Natural barriers, such as a wide beachline and offshore sandbars, would have retarded the full force of the storm. However, erosion had taken those natural barriers long before the storm occurred. Erosion had also taken many homes, weakened the Lake Front Road, and robbed the Indiana Dunes National Lakeshore of scenic beauty which was hundreds of years in the making.

Stout seawalls, private homes, national parkland, public roads, and natural beauty have fallen into Lake Michigan, because of this disastrous erosion.

This amendment to include erosion in the definitions of disaster in the Disaster Relief Act of 1970 will be of help not only on Lake Michigan, but along the Ohio River and the Wabash and any other place in Indiana where this destroyer takes property and income.

The need for this amendment is apparent and immediate.

The PRESIDING OFFICER (Mr. HELMS). The question is on agreeing to the amendment of the Senator from Illinois.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill (H.R. 1975) was read the third time.

Mr. PELL. Mr. President, I rise today on behalf of a small, but vital, segment of Rhode Island's working populations, our farmers.

There are fewer than 3,500 persons working in agricultural pursuits in my State. They are a hardy breed who toil against the opposing forces of weather and land to earn a living and to provide our citizens with food.

Rhode Island's farmers ask little—and receive little—from the Government. Few of the major farm programs have

much direct impact on our State. But I do not believe that, because their numbers are few, that they should be excluded from assistance in times of hardship.

That is the situation we had in Rhode Island last year, Mr. President. Because of an extremely rainy growing season, many farmers in my State suffered heavy crop losses. This type of situation might have been negligible to a big corporate farmer. But to the small independent farmer of Rhode Island, the situation was disastrous.

The seriousness of the situation was recognized last October by the Secretary of Agriculture when he declared all five counties in Rhode Island a disaster area. This action made Rhode Island farmers who had suffered most heavily eligible for the emergency loan program of the Farmers Home Administration.

Mr. President, USDA officials in my State estimated that 350 farmers were eligible for loans. And many of them applied for loans immediately. Others, however, acting on the information from the USDA representatives that they could apply any time prior to June 30 of this year, held off.

Then, with no prior warning, the Secretary of Agriculture terminated the loan applications as of December 27. This meant that approximately 235 Rhode Island farmers, who had suffered losses and were eligible for loans, were excluded from applying for them.

Now, Mr. President, we have legislation before us that would completely change the rules of the game. I believe these changes are wise, but they should not be allowed to apply retroactively.

The issue here is simply one of fair-play. The Congress had authorized and appropriated funds for these loans. Rhode Island farmers were eligible. The rules of the game were clear.

Then, suddenly and without any congressional action, the hope that had been held out to these farmers was withdrawn, leaving them with their financial losses and without recourse. I believe this is wrong.

For that reason, I support the provision included in the House bill to allow an 18-day grace period during which farmers in my State and in other States, who were eligible for the loans prior to December 27, can apply under the terms of the loans program as it existed before that date.

If the farmers do not apply during the 18-day period, then they will have clearly chosen not to seek help under the program. But in the interests of fair play, I believe this is an option which we in the Congress must give them.

Mr. President, I ask unanimous consent that a newspaper account of the plight of several Rhode Island farmers be inserted in the RECORD at this point. It appeared in the Providence Sunday Journal of January 21, 1973.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RHODE ISLAND FARMERS SQUEEZED BY FEDERAL AID CURB

(By Joel H. Sekeres)

The federal government's decision to abruptly discontinue two assistance programs

last December has put many Rhode Island farmers in a financial squeeze that could leave them and consumers gasping.

An overly wet growing season last year, which yielded smaller and more sodden crops than usual, was devastating to some Rhode Island dairy, potato and market produce farmers.

Their crop losses meant little or no profit for them, created shortages of some market items and led to generally higher retail costs for consumers.

And when the federal government stopped its disaster loan and soil conservation assistance programs without warning—and before scores of farmers had a chance to apply for the aid—many farmers started talking about selling their land for housing developments.

Louis E. Perreault of Richmond, who has potato farms with a total of 437 acres in Richmond and Charlestown and whose 10 per cent crop losses would not have entitled him to a disaster loan, lambasted the government for stopping the soil conservation program.

"If these fellows down in Washington want to keep on eating, they ought to give some encouragement to the people who work the soil," he said. "Some of the actions they take make you wonder whether they care or not or realize the importance of conserving agricultural soil."

The disaster loan program of the Farmers Home Administration became available here after the state was declared a disaster area on Oct. 26 because of heavy seasonal rains and Tropical Storm Agnes. Farmers who could show losses in 1972 of at least 20 per cent of the averages of their crops in 1970 and 1971 were eligible. They could apply for outright grants of up to \$5,000 and loans at one per cent interest for amounts higher than that.

Because the federal government set a deadline of June 30 this year for farmers to apply, many of them did not submit their applications for this aid right away. They were shocked when on Dec. 28 it was announced in Washington that the program was being discontinued.

The Farmers Home Administration office in Greenville, a Department of Agriculture agency that has jurisdiction in the entire state, had accepted 11 applications for an estimated \$1,375,000 in aid before the program was discontinued. An official in that office said he had expected to receive 350 applications by the original June 30, 1973, deadline.

The other discontinued program, the Rural Environmental Assistance Program to which Mr. Perreault referred, offered farmers matching money for engaging in any one of 25 separate conservation projects. They included the planting of cover crops, which prevent erosion of soil during fallow periods.

Joseph M. Bouchard, who owns potato farms with a total of 273 acres in Richmond and South Kingstown, qualified for a government disaster aid loan because he suffered 21 per cent crop losses last year over the average for 1970 and 1971. But there was one catch. He, like so many others, had not filed his aid application by Dec. 28, when the program was suddenly discontinued.

Mr. Bouchard had intended to apply for the \$5,000 grant and for a \$30,000 loan to help pay some of his costs for seed, fertilizer spraying and equipment repair to help him plant this year's crop. (Under the program, the government did not give farmers cash. The farmers presented their bills, and the government directly paid them off.)

The government action has left Mr. Bouchard bitter. "If we don't get the loan, we will cut down our acreage about 40 per cent, because that's all we can afford to plant this year," he declared. "That will mean a shortage of potatoes another year. People are hollering about paying higher prices. If this

continues, they will have to pay a lot more for potatoes and potato products."

He is equally embittered by the decision to discontinue the soil conservation program. "If they (the government) don't keep pushing this soil conservation money in, a lot of farmers will be forced to sell their land. If the government doesn't resume this program, the topsoil on unplanted land will be blown right into the woods and into the ponds and rivers. After your topsoil is gone, your crops have less yield per acre, and this means higher prices to consumers. If we can't farm our land and make a reasonable profit that way, we'll be forced to sell it for housing developments."

Mr. Bouchard said farmers are "disgusted with the way the government handled this. They should have given us a few days to get our applications in, instead of leaving us out in the cold."

One farmer who did get his application in on time is John S. Kesson, a prominent Middletown dairy farmer with a milking herd of 60 cows and 30 other calves. The wet season last year cost Mr. Kesson about one-third of his hay and corn crops, which he uses to feed his livestock.

He said last night that he is purchasing—from a supplier north of Syracuse, N.Y.—75 tons of hay, at \$75 to \$80-a-ton, to feed his cows. In addition, Mr. Kesson said that the corn he did harvest had so much water content and was of such poor quality that he has had to purchase 14 tons of grain supplements—at \$60-a-ton—to give his livestock proper nutrients.

Mr. Kesson applied for the \$5,000 grant and a loan of \$2,500 at one per cent interest.

Even if the aid is approved, he said, "there absolutely won't be any profits this year." His cows produce about 14,700 gallons of milk each year—all of it purchased by H. P. Hood & Sons. Because of the competition, he said he didn't get any more money for the milk, but still had to absorb financial losses that the rainy season inflicted on him.

Mr. Kesson said he believes the disaster loan program "should be opened up again for a short time so that those who were led to believe it would continue until next June 30 can have a chance to file their applications."

One of the state's largest poultry farmers, Joseph Russo of Hopkinton, said he wasn't affected at all by the wet growing season last year. But, he added, "I was affected by the Russian grain sale, which created a shortage of grain here and forced up the price from \$75-a-ton three months ago to about \$150-a-ton now."

Mr. Russo, whose farm has 50,000 egg-laying chickens, which produce about 30,000 eggs each day, about 100,000 "growing stock"—chickens raised to be eaten—and 6,000 turkeys, said he purchases 60 tons of grain each week throughout the year.

The rising cost of grain, he said, already is reflected in egg prices, which have climbed five to eight cents a dozen during the last three weeks.

DISASTER RELIEF

Mr. BAYH. Mr. President, it is with a great sense of irony that I approach the vote on final passage of this bill to restore Farmers Home Administration emergency loans. I will vote for final passage to insure that at least individuals are eligible for disaster loans of some kind, rather than left out in the cold as farmers have been since the administration terminated this program on December 27, 1972. However, from my perspective as a Senator who has been involved in the problems of disaster relief for almost a decade, and who authored the Disaster Relief Acts of 1966, 1969, and 1970, it seems pretty clear that this bill does not represent a carefully considered solution to an old problem of disaster assist-

ance as much as it represents an extreme reaction to last year's rather precipitous action to help victims of Hurricane Agnes.

Let me make my point more clearly by sketching the history of the disaster relief debate. As a result of the Disaster Relief Act of 1970 which was developed by the Disaster Relief Committee which I chaired, interest rates were set at 2 percent less than the cost to the Federal Government. Today, interest rates would be set at about 4 percent under that provision. Forgiveness of these loans was permitted on amounts up to \$2,500, excluding the first \$500. I emphasize the exclusion of the first \$500 since that provision, designed to prevent unnecessary expenditures, has since been dropped.

Last summer, after the Hurricane Agnes disaster and the publicity surrounding the tragedy, the administration hurriedly asked Congress to pass a new bill providing a \$5,000 forgiveness feature without any exclusion for small loans combined with 1-percent interest rate on the loans. At the time of debate, I was no longer chairman of the Disaster Subcommittee of Public Works, so I was forced to rely on the administration's economic analysis of the impact of its proposal on the budget. Therefore, since I support sufficiently generous benefits to the hapless victims of disasters, I supported the proposal. In my view, the important goal was to provide a permanent program which would help all victims equitably and consistently.

But, suddenly in December 1972, the administration, without warning, suspended the funding for the very program which it had asked Congress to expand 5 months earlier. The administration did not cut the program back to its former status, but eliminated the benefits completely, and then called for new legislation repealing the forgiveness features completely, and bouncing the interest rate from 1 percent up to 5 percent. Rather than providing the country with a consistent disaster program, we have presented three very different payment provisions in less than 9 months.

Congress is now faced with the choice of approving legislation to do what the administration wants done—gut the program—or call for higher expenditures which the President has already said he will impound.

The final irony, Mr. President, is that Congress is faced here with a do-or-die decision presented by an administration which has already twice delayed its report to the Congress on the effectiveness of the 1970 Disaster Relief Act. The Disaster Relief Subcommittee, chaired by Senator BURDICK, has begun comprehensive hearings in an effort to improve the 1970 act, but is still waiting for the administration's report which was supposed to be sent up by January 1 of this year.

As a final observation, if Congress decides, as a result of these hearings, to change the formula for disaster benefits again, we will have had four different proposals in less than a year—a far cry from the permanent program envisioned. And if there are any disasters in the next interim months, those hit will truly be

victims—victims of both a natural disaster and a logistical fiasco.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question, the yeas and nays have been ordered.

Mr. JAVITS. Mr. President, I ask unanimous consent that a statement in the form of a letter with reference to this bill by Representative GILMAN of my State be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CONGRESS OF THE UNITED STATES,
Washington, D.C., March 26, 1973.

Senator JACOB K. JAVITS,
Russell Building,
Washington, D.C.

DEAR JACK: In light of the problems experienced by the farmers in Orange County (southeastern New York State) and Wayne County (western New York State bordering on Lake Ontario) with respect to obtaining emergency loan assistance, your help in making legislative history on H.R. 1975, amending the Emergency Loan Program, would be greatly appreciated while this measure is still under active consideration in the Senate.

I have developed a few points and observations which I suggest you may wish to include in the Record at an appropriate time in the course of debate when the bill comes before the Senate for deliberation.

1. It is evident that the affected farmers do qualify under the provisions of the Agnes-Rapid City Act (P.L. 92-385) and will receive emergency loans at 1% interest with \$5,000 forgiveness. However, the one-year period of time for repayment of operating loans is clearly unrealistic and the stringent security requirements by the Farmers Home Administration virtually ignore the extent of the devastation wrought by Hurricane Agnes.

2. The irony of the situation is highlighted by the fact that while operating loans have been approved for 1973 crops, there is a void in refinancing the outstanding indebtedness as a result of the 1972 crop losses. Creditors and farmers alike ask how this indebtedness will ever be satisfied.

3. The House Agriculture Committee, in its report (No. 93-15) on H.R. 1975, recognized the need to liberalize credit terms under the Emergency Loan Program and I call your attention to the following statement found on page 4 of the report:

"The Committee observes that in many instances in the past, emergency loans were made under terms which eventually became too burdensome to the borrower. There were many occasions where a farmer was given a one-year loan only to discover that there was no possible way he could recover within a one-year period. The Committee intends that loans shall be made for a longer duration to give the farmer every opportunity to recover from his losses. Consideration shall be given by the Farmers Home Administration to this particular point because it is foolish in the long run to make a loan under terms too confining to allow the farmer to continue his operation."

Certainly, with the restoration of the Emergency Loan Program as provided in H.R. 1975, the Secretary of Agriculture should make operating and refinancing loans "at reasonable rates and terms for loans for similar purposes and periods of time" as stated in Section 321(a) of the Consolidated Farm and Rural Development Act. The Secretary must also be encouraged to observe with more empathy the Committee's intent to liberalize credit terms.

4. Under the provisions of H.R. 1975 as approved by the House and by the Senate Committee on Agriculture and Forestry, it

is clear that the applicants who qualified for emergency loans pursuant to the Agnes-Rapid City Act (P.L. 92-385) and the Disaster Relief Act (P.L. 91-606) would continue to be eligible for emergency loans to meet their farm operating needs, regardless of the size of the farm, and should be allowed to apply for long-term refinancing assistance.

In this regard, the Secretary is encouraged to reexamine the Department's administratively-determined emergency loan, real estate indebtedness standard for the purpose of setting a more realistic level. In our State, as you know, there are a number of medium-sized family operators who, because of the extremely high capital requirements of "muckland" farming have indebtedness exceeding the existing non-statutory \$300,000 limit.

5. I would also call your attention to a gray area which exists with respect to so-called "agribusiness", a coined word of recent vintage used to identify certain agriculture-related businesses such as commodity processing, packaging and shipping. Small Business Administration regulations have extended assistance to agribusiness enterprises under the regular loan program, but the regular loan agribusiness criteria were belatedly held not to apply to disaster loans.

As you know, Orange County farmers held written commitments on approved SBA emergency loans totaling more than \$4.5 million which were cancelled just as the 1973 planting season was getting under way.

In a recent letter addressed to me, the Deputy Administrator of the Small Business Administration summarized this particular problem as follows: "In view of FHA's substantial emergency loan authority, and the parallel development of that authority along with SBA's in the recent disaster enactments . . . the need for extension of SBA's disaster loan assistance into the agricultural area has not been evident, at least until now. SBA will obviously have to re-examine its agribusiness policy in its disaster assistance programs".

This re-examination and reassessment of administratively-determined definitions, regulations, and guidelines should, in conjunction with the Farmers Home Administration, be concluded at an early date to avoid the specter of bureaucratic red tape which leaves the disaster victim floundering between two agencies, both of which claim the responsibility to be that of the other.

Inasmuch as the liberalization of credit terms is clearly within the intent and authority contemplated by the Congress under the bill, it would appear that further amendment of H.R. 1975 is not necessary in this respect. It is sufficient to say that our exposure to the practices of the Farmers Home Administration and its interpretation of the law authorizing emergency loans adequately supports the statement that disaster relief to the medium-sized family-operated farms has been neither timely, adequate, nor with an appreciation of the extent of the Agnes disaster which fully justify the more liberal credit terms that the House Agriculture Committee envisions.

An identical letter has been addressed to Senator James L. Buckley, and Senator Herman E. Talmadge (Chairman, Senate Committee on Agriculture and Forestry) and the Honorable Frank Horton are being apprised of its contents by copy.

Thank you for your cooperation in this effort which relates directly to the past several weeks of difficult negotiations between the SBA and the FHA concerning the administration of the Emergency Loan Program.

With kindest personal regards,

Sincerely,

BENJAMIN A. GILMAN,
Member of Congress.

Mr. MANSFIELD. Mr. President, for the information of the Senate, I would like to state that when this bill is disposed of, the Senate will turn to the consideration of S. 929, a bill to amend the Par Value Modification Act, this afternoon.

The PRESIDING OFFICER (Mr. HELMS). The bill having been read the third time, the question is, Shall it pass? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from Wyoming (Mr. McGEE), the Senator from California (Mr. TUNNEY), the Senator from Nevada (Mr. CANNON), and the Senator from Iowa (Mr. HUGHES) are necessarily absent.

I further announce that the Senator from South Dakota (Mr. ABOUREZK) is absent on official business.

I also announce that the Senator from Mississippi (Mr. STENNIS) is absent because of illness.

I further announce that the Senator from North Carolina (Mr. ERVIN) is absent because of death in the family.

I further announce that, if present and voting, the Senator from South Dakota (Mr. ABOUREZK), the Senator from Iowa (Mr. HUGHES), the Senator from Mississippi (Mr. STENNIS), and the Senator from California (Mr. TUNNEY) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Massachusetts (Mr. BROOKE) is absent by leave of the Senate on official business.

The Senator from Colorado (Mr. DOMINICK), the Senator from Wyoming (Mr. HANSEN), and the Senator from Ohio (Mr. TAFT) are necessarily absent.

The result was announced—yeas 79, nays 10, as follows:

[No. 69 Leg.]

YEAS—79

Allen	Eastland	McIntyre
Baker	Fong	Metcalfe
Bartlett	Fulbright	Mondale
Bayh	Gravel	Montoya
Beall	Griffin	Moss
Bellmon	Gurney	Muskie
Bennett	Hart	Nelson
Bentsen	Hartke	Nunn
Bible	Haskell	Pastore
Biden	Hatfield	Pearson
Brock	Hathaway	Pell
Buckley	Hollings	Proxmire
Burdick	Hruska	Randolph
Byrd	Huddleston	Ribicoff
Harry F., Jr.	Humphrey	Roth
Byrd, Robert C.	Inouye	Scott, Va.
Case	Jackson	Sparkman
Chiles	Javits	Stafford
Church	Johnston	Stevenson
Clark	Kennedy	Symington
Cook	Long	Talmadge

Cranston	Mansfield	Tower
Curtis	Mathias	Weicker
Dole	McClellan	Williams
Domenici	McClure	Young
Eagleton	McGovern	

NAYS—10

Aiken	Packwood	Scott, Pa.
Fannin	Percy	Stevens
Goldwater	Saxbe	
Helms	Schweiker	

NOT VOTING—11

Abourezk	Ervin	Stennis
Brooke	Hansen	Taft
Cannon	Hughes	Tunney
Dominick	McGee	

So the bill (H.R. 1975) was passed.

Mr. TALMADGE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BELLMON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BELLMON. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make the necessary technical corrections in H.R. 1975.

The PRESIDING OFFICER. Without objection, it is so ordered.

RURAL ENVIRONMENTAL ASSISTANCE PROGRAM

Mr. TALMADGE. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 2107.

The PRESIDING OFFICER (Mr. HELMS) laid before the Senate a message from the House of Representatives announcing its disagreement to the amendment of the Senate to the bill (H.R. 2107) to require the Secretary of Agriculture to carry out a rural environmental assistance program, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. TALMADGE. I move that the Senate insist upon its amendment and agree to the request of the House for a conference on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. TALMADGE, Mr. ALLEN, Mr. HUDDLESTON, Mr. AIKEN, and Mr. YOUNG conferees on the part of the Senate.

AMENDMENT OF THE PAR VALUE MODIFICATION ACT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 82, S. 929, that it be laid before the Senate and made the pending business.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 929) to amend the Par Value Modification Act.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

Mr. BELLMON. Mr. President, I ask unanimous consent that Mr. Charles Waters and Mr. Rod Solomon, members of my staff and the staff of the Senator from Ohio (Mr. TAFT), be granted full privileges of the floor during consideration of S. 929, the Par Value Modification Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. MANSFIELD. Mr. President, for the information of the Senate, it is my understanding that there may be rollcall votes on amendments this afternoon.

When the pending business is disposed of, it is the intention to proceed to the consideration of the various crime bills on the Calendar, beginning with S. 800, the so-called Omnibus Crime Control and Safe Streets Act of 1968, to be followed— not necessarily in this order, but very likely so—by S. 13, S. 15, S. 33, and S. 300.

Following the disposition of those measures, it is anticipated that we might consider the bill in which the distinguished assistant minority leader is interested—I am not confident on this—S. 1021. That will be followed, I believe, by S. 1235, reported by the Committee on Foreign Relations, but we will try to observe the 3-day rule, so that would not be before Monday.

On Tuesday, it is anticipated that we will take up S. 352, the so-called Postcard Voter Registration Act.

Mr. SCOTT of Pennsylvania. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. SCOTT of Pennsylvania. I would hope that arrangements could be made to vote on the veto message fairly early in the day. I have some requests expressing the hope that we could vote perhaps between 12 and 2, if possible.

Mr. MANSFIELD. Would 2 p.m. be satisfactory?

Mr. SCOTT of Pennsylvania. Yes, 2 p.m. would be satisfactory.

Mr. MANSFIELD. I assure the distinguished Republican leader that I will do my very best to see that the vote occurs at 2 o'clock, but I have to consult with a few Members.

Mr. SCOTT of Pennsylvania. I understand. I thank the distinguished Senator.

AMENDMENT OF THE PAR VALUE MODIFICATION ACT

The Senate continued with the consideration of the bill (S. 929) to amend the Par Value Modification Act.

Mr. SPARKMAN. Mr. President, this bill, S. 929, would effect a 10-percent devaluation of the dollar by amending section 2 of the Par Value Modification Act to authorize and direct the Secretary of the Treasury to take the steps necessary to establish a new par value of the dollar of one dollar to equal 0.828948 Special Drawing Right or, in terms of gold, of one dollar to equal 0.23684 of a fine troy ounce of gold.

The enactment of this bill is required because the pressures on the dollar in the world money markets made it necessary for the President to declare a second devaluation of the dollar. This bill would give congressional sanction to this devaluation.

Congressional consent to this 10-percent reduction in the par value of the dollar is important for the effective implementation of the needed realignment of international currency values. This is the case even though financial transactions are presently being carried on on the basis of the new exchange rate pat-

tern. The United States agreed to make this realignment only after obtaining agreements from other nations regarding the exchange rate of their own currencies; for example the floating of the Japanese yen upward to a rate consistent with the Japanese balance of payment equilibrium, a continued float by the United Kingdom and Canada, and the initiation of a float by Italy.

The administration informed the committee that this decision to devalue the dollar will be the first of three important steps which the administration will take which will have as their purpose the achievement of balance in our trade and payments position. The other two steps described by the administration involve the phasing out of U.S. capital controls by the end of 1974 and the submission to Congress of comprehensive trade legislation to enable the United States to negotiate a reduction in trade barriers. This trade legislation has not been sent to the Congress but is expected shortly.

Some realignment of exchange rates are undoubtedly necessary to reflect the enhanced competitive position of our major trading partners. Devaluation of the dollar is no panacea but the committee believes it will be of some help in reducing our chronic balance-of-payments deficits and in achieving a trade surplus.

The committee believes that the President and the Congress should pursue responsible economic policies for strengthening the long-term competitive position of the United States in the world economy so as to preclude the need for further devaluation. This second devaluation of the dollar in 14 months should be regarded not as a victory but as a signal that more fundamental changes in our domestic and international economic policies are in order. This latest devaluation will only buy us more time. We must use that time wisely by focusing on the improvements needed to strengthen our ability to compete in world markets.

It is understood that an appropriation for a maximum of \$2.3 billion will be needed to fulfill U.S. maintenance-of-value obligations in international financial institutions resulting from the change in par value authorized by this bill. Since legislative jurisdiction over the international financial institutions affected fall within the purview of the Senate Committee on Foreign Relations this bill was referred to that committee for consideration. The bill was favorably reported to the Senate by the Foreign Relations Committee on March 21, 1973.

Mr. President, I urge passage of this bill by the Senate.

Mr. President, in connection with the Committee on Banking, Housing and Urban Affairs' consideration of this bill, we heard testimony from Senator PETER DOMINICK on his bill, S. 395, which would permit private American citizens to own gold. We did not include the provisions of S. 395 in this bill. I told Senator DOMINICK in our hearings that I was sympathetic with his proposal and that I felt

that additional hearings should be held on this matter. Senator STUART SYMINGTON raised the question of private ownership of gold in the consideration of this bill by the Foreign Relations Committee. I would like to announce at this time that 2 days of hearings will be held on this question on May 1, and 2, 1973, by the Subcommittee on Production and Stabilization of the Committee on Banking, Housing and Urban Affairs.

Mr. President, the Senator from Colorado (Mr. DOMINICK) told me that in view of these hearings he would not offer his amendment to the bill.

Mr. President, I ask unanimous consent that the following staff members be admitted to the Chamber during consideration of the bill: Dudley O'Neal, Mike Burns, Ken McLean, T. J. Oden, Tony Cliff, and Steve Paradise.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TOWER. Mr. President, the events which have brought us to consideration of this measure today are by now well known to most Americans. The United States has undergone a change in its economic position with respect to the rest of the world over the past two decades, which has been partly due to the desirable factor of tremendous improvement in the economic base of other countries and partly due to the undesirable factor of the maintenance of outdated trade and monetary policies by other nations. We welcome and have encouraged the economic growth of other countries, and will continue to do so in the future. But we must also ask that the "surplus" psychology that has characterized many other nations in their trade and monetary policies be altered to reflect new economic realities on the international scene. I believe that we are seeing considerable progress in this area, perhaps due more to the exigencies of dollar sales in money markets than to conscious planning, but at least we are seeing the initiation of steps to cure persistent imbalances in the world's payments system.

The present devaluation bill is in fact only an official recognition of a parity change between currencies that developed as a result of structural problems in the international trade and monetary system. The principal structural problems that caused this devaluation have been trade barriers abroad and the maintenance of artificially low currency values in some other countries under the fixed rate system. With this second devaluation, we have achieved a realignment among currencies that brings them into what we might term "proper" relation to each other, for the time being. But we will need to correct the trade imbalance problem over the next few years in order to make any fixed-rate set of parities remain relatively stable, including the present one.

The economic health of all countries depends on proper resolution of the chronic-surplus/chronic-deficit situation. For the most part now, this is a question of removing trade barriers that

were developed to suit the international economic situation in the post-war period, and which are no longer justified on the basis of today's situation. These are both direct barriers such as quotas and tariffs, and many types of indirect barriers such as import licensing, "quality" standards, exchange controls, and the like. The White House has undertaken a tremendous effort to work out the removal of these unjustified barriers, and I support this effort totally.

One other factor that contributed to our trade slippage in the last decade was the problem of rapid inflation in the United States. We have taken strong steps to knock out cost-push inflation in this country and have largely succeeded. We are facing, it is true, commodity shortages of various types which are driving up our wholesale prices, but other areas of the world face these same shortages and we are probably not, on balance, losing ground internationally in our price structure due to these types of price increases.

In summary, then, Mr. President, the devaluation bill before us is simply a recognition of monetary changes that have occurred naturally in the exchange markets, based on certain trade problems that have not been resolved yet. The Senate should pass this bill today to fulfill our international commitments, and should help the administration work in the future toward restructuring the trade rules of the international community to bring about general equilibrium in trade and payments accounts, so that further monetary disruptions do not become necessary.

Mr. President, I am well aware that a number of amendments will be offered to the measure. I would hope that we can adopt this measure of the Senate as a clean bill without any amendments because it is addressed to our international monetary situation. It is a simple bill to reevaluate the dollar by raising the price of gold 10 percent. I hope we can keep this bill clean. This is a necessary ratification of a presidential act that was undertaken to meet an international monetary crisis.

I know that some of the amendments that are going to be proposed to this measure will be very meritorious. Some of them I agree with in substance and I laud the merits of them, but I feel constrained in this particular instance to oppose such amendments. There are several reasons. First, I think this should be a clean bill, dealing with the matter it deals with; second, I believe these other matters should be considered as an independent legislation; and third, I fear delay if we adopt some of the amendments proposed to this measure because it would result in the fact that conceivably a point of order might lie against the measure in the House. For example, a provision to provide a spending ceiling almost certainly would incur the raising of a point of order in the House which would mean we would not be able to sustain that kind of an amendment in conference. I hope we can act with great dispatch and I hope Senators who have

amendments will agree to a time controlled situation.

The PRESIDING OFFICER. Under the previous order, the Senator from Wisconsin (Mr. PROXMIER) is recognized.

Mr. PROXMIER. Mr. President, I intend to call up an amendment, but before I do I would like to briefly discuss the bill and then I shall yield briefly to the Senator from Virginia who also would like to discuss the bill. Then I shall call up my amendment.

I think we should first note that devaluation of the dollar, the second devaluation of the dollar, was not the victory that some are making it sound like, or an economic master stroke; it was a serious mistake, a blunder. When I say "mistake," it was an attempt to rectify a series of economic policy mistakes by the administration. It reflects the failure of the administration in our domestic and international monetary policy. Instead of applauding the administration, we should recognize what a burden this imposes. As I am going to point out, furthermore, it reflects a very serious mistake in judgment on the part of the administration.

On January 31, 1973, the economic report of the President was made available to the press and to the public. I wish to read one sentence from that report. Subsequent events in 7 or 8 days repudiate the judgment of the President's economic report as few economic policy expressions have been repudiated in recent history.

One of the most striking changes has been in the attitude of the international economic community toward the American inflation; before August 1971 it was the major concern of foreign observers and investors. By the end of 1972, the American anti-inflation policy had become the marvel of the rest of the world. Largely because of this change the rest of the world is willing to hold increasing amounts of dollars.

Nine days after this statement was issued, foreign investors had dumped more than \$7 billion in the German and Japanese foreign exchange markets. So I say it is rare that a statement such as this should be so swiftly contradicted. In fact, not since the "prosperity is just around the corner" statement of Herbert Hoover have we had such a dramatic and conspicuous repudiation.

There are many reasons for this. One was the incredible timing of moving to phase III, a move made at a time of increasing inflationary pressures, when wholesale prices were going through the roof and when we had increasing inflationary pressures in our economy. That was a blunder that will be admitted by every competent investor and investor's adviser in the United States.

In the second place, we had the President proposing to establish an increase in Federal spending, an increase of over \$19 billion, a 7.5-percent increase, one of the biggest increases we have had in many years, certainly by far the biggest increase this country had after a war. In fact, after wars we usually reduce spending, especially military spending.

In the third place, this was the result of a failure to control, or at least to get

information on, the speculative activity of American multinational corporations. I am going to be able to document in some detail, on the basis of a superb study by the Tariff Commission, the kind of immense power multinational corporations have and how they really dominate the foreign market in U.S. dollars and foreign currencies, and I am going to suggest amendments, both in terms of holding down excessive domestic spending, in the first place, and indicating, in the second place, what multinational corporations have been able to achieve in upsetting the dollar.

In addition to all the foregoing policy errors, the administration contributed the latest attack on the dollar by placing too much reliance upon the last devaluation as a permanent solution for our rising trade deficit. Instead of examining the more fundamental causes for the decline of our trade surplus, the administration has placed excessive reliance upon depreciating our currency. And yet, despite the optimistic predictions made at the time of the Smithsonian agreement, our trade surplus has not improved. In fact, it has worsened.

For example, during the third quarter of 1971 our merchandise trade deficit was approximately \$500 million. In the fourth quarter of 1971 it jumped to \$1.5 billion. In 1972 the deficit remained nearly constant in each quarter and reached \$6.8 billion for the year.

In other words, we devalued the dollar in 1971 and what happened? Our trade deficit did not diminish and disappear. It got worse. It did not help. It hurt.

It is true that there is lots more involved here. For us to fail to recognize that this is not a solution and not act in more fundamental ways of holding down spending and controlling domestic financial policies in more effective ways would be a mistake.

I think we have to recognize that there are victims of this inflation policy. The number one victim is the U.S. consumer. He is hurt because he spends billions of dollars on things he buys that come from abroad, and the cost of virtually everything he pays for is going to go up.

Arthur Burns, Chairman of the Federal Reserve Board, has said that the consumers will have to pay at least \$3 billion. He has repeated this as a conservative estimate of the burden placed on the American consumer. This is like a \$3 billion sales tax.

In addition to the added cost of imports, the consumer will be hit because competition will be reduced. Competition of foreign imports is very important in the steel industry. It is very important in the automobile industry. It is very important in many other industries. Absent that competition, there will be a strong tendency for the price of domestic products to increase.

Also, to the extent that U.S. imports are diminished by devaluation, there will be fewer goods available for domestic consumption.

The New York Times had a news story today entitled "Signs of Shortages Discerned in U.S. Economy. Bottlenecks Hit

Material and Personnel." This is the clearest kind of indication of inflationary pressures as a result of fewer goods from abroad competing.

I ask unanimous consent that this New York Times article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Mar. 28, 1973]
SIGN OF SHORTAGES DISCERNED IN U.S. ECONOMY—BOTTLENECKS HIT MATERIAL AND PERSONNEL

(By Leonard Sloane)

The signs of shortages of material and personnel are everywhere in the economy and the voices of those affected are becoming louder.

"To say that there is a shortage of lumber is the understatement of the year. Inventories of softwood lumber are 16 per cent below a year ago and at their lowest levels since World War II."—Dr. John Muench, forest economist of the National Forest Products Association.

"Prices of worsteds are unbelievable. If apparel manufacturers buy worsteds now, they're lucky to get delivery in the third quarter."—Paul Honig, president of the Anglo Fabrics Company.

"The delivery time on large-size capacitors has gone from six weeks to six months and we're scrounging. Wherever you can find them, you pay whatever price is asked."—Max Kupferberg, treasurer of Kepco, Inc.

"There's a problem in filling any skilled machinist job. We expect it to hit a high point at the end of this year."—Edward F. Lannigan, vice president for industrial relations of Reliance Electric Company.

The bottlenecks go beyond those that typically arise when the economy moves to a higher level of output. For today's barriers to full-throttle economic activity in the United States are part of a worldwide shortage of fuels, foodstuffs and other commodities that significantly exceeds the usual problems in an expansionary period.

Among the leading materials in short supply are gasoline, nonferrous metals, textiles, lumber and plastics. And despite the high overall national unemployment rate, vital categories of jobs in the executive, clerical and factory classifications have become more difficult to fill as productive rates increase and plant capacity levels are raised. Finally, there is the prospect of more upward pressure on prices.

"Either you've got to find ways of increasing supplies on some reasonable and economic basis or people begin to bid for the available supply," said Alan K. MacAdams, professor of management economics at Cornell University. "This is the real meaning of inflation."

STATISTICS TELL STORY

Some of the latest statistics that tell the story of the shortages and the efforts to alleviate their impact include:

The Association of American Railroads believes that the carriers are 100,000 cars short of the number needed to transport the nation's goods. There now are some 1.4-million freight cars in use, about 300,000 fewer than 15 years ago, although the average tonnage capacity per car has increased by approximately one-quarter.

American industry operated at 83.5 per cent of capacity last month, up ½ point from a month earlier and 5 points above February, 1972. According to Douglas Greenwald, chief economist of McGraw-Hill, when the utilization rate reaches 85 per cent, there is likely to be an increase in capital spending plans.

The average work week in manufacturing seasonally adjusted, rose to 41 hours in February—almost one hour more than in January. Average weekly overtime increased to 3.9 hours—the highest level since October, 1966.

New orders for machine tools which have been rising steadily for about two years, outpaced shipments last month by a 2-to-1 ratio. Even sales of used machine tools have been high. February sales of second-hand machine tools were the highest for the month since 1958.

HAND-TO-MOUTH BUYING

As the most recent business survey of the National Association pointed out, not only are numerous commodities in short supply, but also "many suppliers are requiring greater lead time and the shortage situation is making hand-to-mouth buying risky in more instances.

For example, United States stocks of gasoline fell to 215-million barrels in the week ended March 16, compared with 240-million barrels a year ago. Inventories of residual oil, used in commercial and industrial establishments, were down too—45.7 million barrels, compared with 49.8 million barrels.

Of the nonferrous metals in tight supply, zinc stands out. The St. Joe Minerals Corporation, in noting the continuing decline in domestic smelting capacity, said until price levels become profitable—the present United States price is 20.25 cents a pound—it could not justify expenditures for new facilities.

Textile shortages are selective, with woolen, denim and corduroy fabrics and worsteds most in demand. Robert L. Leeds Jr., chairman of Manhattan Industries, Inc., said: "Until last year, it was possible to buy piece goods in Japan at prices lower than in the United States, but since the devaluation of the dollar, this is no longer the case. Now it is the other way around. Japanese are buying in the American market."

Both the housing and the furniture industries are suffering from severe shortages of lumber, thereby causing long delays in the delivery of finished products. Even though production and imports of softwood and hardwood lumber are up and prices are advancing, the supply has been inadequate to meet booming demand.

The paper industry similarly is facing strong demand for virtually all its products, with supplies expected to get even tighter. Thus, although all paper machines at the International Paper Company's 18 primary mills in the United States are operating at full production, orders are backed up and many customers are on allotments.

Mr. PROXMIRE. Mr. President, also the New York Times contained an article this morning entitled "U.S. Trade Gap Widens." So it is not getting better. The most recent statistics, today, indicate that the balance of trade has gotten worse. Our imports with respect to our exports have given us a worse picture than we had before. I think we must recognize, as I say, that we simply should not be satisfied with this kind of depreciation of our currency as any kind of fundamental answer.

I do think the most important single step the Congress can take and the Government can take is to restrain excessive Federal spending.

Last year the Federal Government increased the supply of money, the availability of credit, by over 8 percent—a \$19 billion increase in the supply of money, the largest increase, by far, in the history of our country in any year, and one of the biggest percentage increases.

I ask unanimous consent that the article entitled "U.S. Trade Gap Widens;

Tougher Policy Urged," be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

U.S. TRADE GAP WIDENS; TOUGHER POLICY URGED

EXPORTS IN FEBRUARY SURPASSED \$5 BILLION FOR FIRST TIME

WASHINGTON, March 27.—The United States trade deficit worsened in February after a sharp improvement in January, even though exports in February topped the \$5-billion mark in a single month for the first time, the Commerce Department reported today.

The export-import deficit in February was \$476.2-million. This was larger than the January deficit of \$383.8-million but well under the worst months of 1972, such as November's deficit of \$663.6-million.

Exports in February were \$5,064,600,000. Imports, at \$5,540,800,000, were above the \$5-billion mark for the fourth consecutive month with all figures seasonally adjusted.

The figures indicated a continued growth in both United States and world trade despite the recurrent international monetary turmoil.

Paul A. Volcker, Under Secretary of the Treasury for Monetary Affairs, said "there has been a little improvement" in the trend of the trade figures in recent months, but he repeated his view that "it is going to take time to get healthy again," he commented at a news conference.

In Tokyo, Henry Kearns, president of the Export-Import Bank, was quoted by The Associated Press as having predicted that the American trade balance would start showing an export surplus as early as July or August of this year and would continue in surplus indefinitely.

Mr. Kearns, conceding he was alone in the degree of his optimism within the United States Government, said he based his forecast on his bank's statistics for such items as foreign orders placed with United States suppliers.

He also said, the A.P. reported, that purchasing agents he spoke to during his recent trip in the Pacific area had unanimously told him that United States goods, following the two devaluations of the dollar, were now priced competitively.

Mr. Volcker, when asked today about the Kearns statement, said, "Those are Mr. Kearns's figures."

WASHINGTON, March 27.—The Commerce Department said today that foreign affiliates of American companies expect to increase their investment in plant and equipment by 7 per cent this year, with petroleum companies accounting for much of the increase.

The capital outlays abroad should total \$16.3-billion in 1973, compared with \$15.4-billion in 1972, the department reported. It said petroleum companies expect to increase such investment by \$5.8-billion, up 11 per cent from last year in response to "rapidly increasing needs."

Manufacturing affiliates plan to increase spending abroad by about 2 per cent to a total of \$7.3-billion in 1973, the department said.

Mining and smelting companies cut spending abroad by \$1.3-billion in 1972, and no increase is expected this year.

CONNALLY BACKS WHITE HOUSE

(By Brendan Jones)

John B. Connally, former Secretary of the Treasury, asserted last night that the United States needed a new hardnosed trade policy "to get an even break in the world marketplace."

Mr. Connally, who proved a tough bargainer in the negotiations that brought the major currency realignments of December,

1971, voiced support for a proposed new system of flexible tariffs and import safeguards.

The proposals, which are expected to be included in the Administration's new trade bill, have been made by both the White House and Chairman Wilbur D. Mills of the House Ways and Means Committee.

Presidential Power

In a speech prepared for delivery at a dinner of the Wharton Graduate Business School Club of New York at the Waldorf-Astoria, Mr. Connally said:

"The President needs freedom to swap cuts in United States tariffs for matching concessions from other nations, and he needs freedom when necessary to raise tariffs and impose quotas.

"There are people in some ivory towers around this country whose feelings are hurt because the old days [of liberal trade policy] are over. But a negotiating process which always negotiated the United States down and other countries up should be buried deep and permanently."

The dinner was held to honor Donald M. Kendall, chairman of PepsiCo, Inc., who received the club's Joseph P. Wharton business-statesman award. The award is named for the pioneer Philadelphia financier and steel man who endowed the Wharton School at the University of Pennsylvania.

Mr. Connally foresaw difficult bargaining ahead on economic and commercial issues with other nations. But he said he was optimistic that "good-faith negotiations" would succeed "provided that there remains a clear understanding that the United States now considers its own needs to be of equal importance with the needs of others."

He recalled that as Treasury Secretary, "I was sometimes accused of chauvinism, of being too tough in negotiations," and added:

"But if I reflected impatience in my talks with nations, it was the expression of an irresistible urge to speed the process of altering a monetary system that has crumbled and a trading system that is essentially inequitable."

Multinational Question

The award to Mr. Kendall was a recognition of his long efforts in developing this country's East-West trade, especially with the Soviet Union. In accepting, he noted that efforts were being made to weaken American multinational corporations at a time when the United States needed to strengthen its world market position.

In a reference to the Burke-Hartke bill which would restrict American corporate investments abroad, Mr. Kendall said that the charge that multinational companies were "exporting American jobs" was ill-founded. He cited a recent Department of Commerce study that showed that such overseas investors had created more American jobs than they had displaced.

Mr. Kendall also denied that multinational corporations had participated in the currency speculations that precipitated two devaluations of the dollar. He said it was "absurd" to believe "that even the largest of the multinationals has massive uncommitted reserves to whisk from country to country at the drop of an exchange rate."

Mr. PROXMIRE. Monetary experts think that this has a great inflationary effect and that the inflationary impact is one that is going down the pike.

Finally, we need to improve our competitive posture through structural reforms. We must move far more vigorously and efficiently in enforcing our antitrust laws. We are not acting to eliminate many other elements in our economy which are under the control of the Federal Government.

The procurement policy, for example,

has had an inflationary effect, and we need to establish the kind of efficient and vigorous competition that is necessary if we are going to sell as much abroad as we buy from abroad.

I hope, for all these reasons, the Senate is not going to pass this bill and be a rubberstamp for something merely because the administration has asked for it.

We should not come to the conclusion that just because the administration has devalued the dollar we should follow through and do anything they ask about it. This field is specifically the responsibility of Congress, under article I, section 8, paragraph 5 of the Constitution, where Congress is specifically given the power to coin money and regulate the value thereof—I repeat, regulate the value thereof—determine its value. This is a congressional responsibility.

When President Nixon decided to devalue the dollar, there was no consultation with Congress. There was no recognition of the constitutional right of Congress to determine this. He just went ahead and did it. Under the circumstances, having made mistakes, our Government probably had to act. I am not saying it should not have, and I will support the bill on final passage, but I think we should recognize that we should not just take whatever the President sends down to Congress, and not amend it, and not provide protections which are more far-reaching as fundamental reforms.

When the President previously did the same thing and we adopted it, we were burned. This time we should act to make it effective.

Mr. President, before I call up my amendment, I would like to yield to the Senator from Virginia, without losing my right to the floor.

The PRESIDING OFFICER. The Senator from Virginia is recognized. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. HARRY F. BYRD, JR. I yield.

Mr. JAVITS. Mr. President, I ask unanimous consent that George Krumshaar and Ken Guenther may be present on the floor to assist me during the consideration of this bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. Mr. President, I thank the Senator from Wisconsin for yielding to me.

Mr. President, this legislation will solve very little. This legislation does not address itself to the many grave economic problems, financial problems, facing the American people. This legislation merely formalizes what already has occurred.

Namely, there has been a loss in the value of a dollar in the markets of the world. The dollar on its own initiative has become less valuable.

What this legislation does is to formally recognize that fact. It does not get to the heart of the problem in any way, shape, or form.

It is the second devaluation of the dollar in a period of 14 months. Despite the importance of the subject which the Senate is debating today, I find very little interest in Congress in this matter.

Here is what the Under Secretary of the Treasury for Monetary Affairs, Mr. Volcker, said about this bill in testimony before the Senate Finance Committee on March 7, 1973, when I put this question to him:

Mr. BYRD. Now, you said in your dialogue with Senator Hansen, Mr. Volcker, that you found it necessary to take radical action. Would you indicate the radical action to which you referred?

Mr. VOLCKER. Well, we devalued the dollar twice and had a major exchange rate realignment in the last 14 months, twice. I consider that radical action.

On page 26 of the committee hearings, I put this question to him again:

Mr. BYRD. It is in your judgment radical action to devalue the dollar twice in 14 months.

Mr. VOLCKER. It is indeed. And this is nothing I look forward to repeating at all. It is radical action.

Those are not the words of the senior Senator from Virginia. Those are the words of the Under Secretary of the Treasury for Monetary Affairs.

So, according to the Treasury Department, the Senate today is considering a bill calling for radical action in regard to the American currency. I do not oppose this legislation. I shall vote for it when the roll is called. However, I want to emphasize, and I want the record to show, that in the judgment of the senior Senator from Virginia it does not in any way, shape, or form get to the heart of the financial, monetary problems facing our Nation. It is a costly bill. It is costly to the consumers of the United States.

The Chairman of the Federal Reserve Board, Dr. Arthur Burns, has testified that, as a conservative estimate, the devaluation of the dollar will cost the American consumer \$3 billion. That is one cost.

The other cost is noted in the report of the Committee on Foreign Relations. It is noted also in the report of the Committee on Banking, Housing and Urban Affairs. On page 3 of the report of the Committee on Banking, Housing and Urban Affairs, we find this statement:

It is understood that an appropriation for maximum of \$2.3 billion will be needed.

The report of the Committee on Foreign Relations is substantially the same.

Mr. President, this is an expensive bill. It will be costly to taxpayers and the consumers of America. It is a bill that has to be passed because the executive branch of the Government has already taken steps formally to devalue the dollar. I know of no logical way the Congress could not go along with that action. But we must do it with our eyes open.

When devaluation was announced by the administration some weeks ago, it was heralded as a great achievement. There is no great achievement in this action. It is a costly endeavor. It is costly to the consumers, and it is costly to the taxpayers. It is brought about by runaway spending by the Federal Government, which has resulted in a lack of confidence in the American dollar. Until we restore that confidence, we will find ourselves called upon for additional devaluation. That, in turn, will mean a

greater cost to the consumers and the taxpayers.

So there are all sorts of ways that this legislation and the action of devaluing the dollar will affect the American people and the American servicemen overseas.

I say again, in concluding my remarks, that the bill solves none of the Nation's problems. Devaluation is not a solution. Devaluing the dollar will cost the consumers, according to the estimation of the Federal Reserve Board, at least \$3 billion. It will cost the taxpayers, according to the committee reports, at least \$2 billion.

We must get to the heart of the problem. We must put a ceiling on Government spending and get away from the smashing Federal deficits.

These inflation creating deficits are eating into the pay checks of every workingman and the grocery money of every housewife.

Mr. PROXMIER. Mr. President, before I proceed with my amendment, the Senator from New York (Mr. JAVITS), who is always generous to me, has asked me to yield to him for 5 minutes. If I may do so, I, of course, yield to him for 5 minutes.

Mr. JAVITS. Mr. President, I requested the courtesy of the Senator from Wisconsin yielding because my observations go to the bill.

First, Mr. President, I asked the Treasury Department, in connection with this measure, which was also considered by the Committee on Foreign Relations, of which I am a member, whether the United States has undertaken any international commitment to maintain the existing exchange rate structure. Their answer was "No." I ask unanimous consent that an appropriate excerpt from the letter of Paul Volcker to me, dated March 20, 1973, be printed in the RECORD at this point.

There being no objection, the excerpt from the letter was ordered to be printed in the RECORD, as follows:

THE UNDER SECRETARY OF THE
TREASURY FOR MONETARY AFFAIRS,

Washington, D.C., March 20, 1973.

HON. JACOB K. JAVITS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR JAVITS: The United States has undertaken no international commitment to maintain the existing exchange rate structure. Conversely, we have taken no commitment, either conditioned or unconditioned, to devalue the dollar further. The President said in a news conference on March 2, 1973 that "there will not be another devaluation." This is the position of the United States and we have no commitments in conflict with this position.

What I have just stated is in no way inconsistent with the discussions we have had in Europe over the past two weeks on cooperative methods of assuring orderly conditions in foreign exchange markets. These discussions were undertaken in the context of our strong conviction that the exchange rate adjustments agreed to in December 1971 and in February 1973 are realistic and broadly reasonable. To the end of contributing to order and stability in markets, we agreed with our major trading partners that in principle official intervention in exchange markets may be useful at appropriate times to facilitate the maintenance of orderly condi-

tions. Each country stated it will be prepared to intervene, at its own initiative in its own market, when necessary and desirable and in a flexible manner.

I hope this answers your questions and that you can give your full support to S. 929.

Sincerely yours,

PAUL A. VOLCKER.

Mr. JAVITS. Mr. President, I do not include the entire letter because the first paragraph relates to an executive session of the Committee on Foreign Relations.

Mr. President, the Senator from Virginia is correct. This is no solution, and it is expensive. However, it is essential, because of our expenditure level exceeding what the world is willing to accept by way of an outpouring of dollars, which many of the countries feel they are required to take because of the status of the dollar as a reserve currency. Therefore they would feel the devastating effect of material depreciations of the dollar unless there be some agreed rate of devaluation. That is the nubbin of the matter.

There is some \$800 billion of float in the dollar, or overhang, which needs to be funded in order for the United States not to have more current liabilities than current assets. We are solvent, Mr. President, but we have to depend upon the enormous assets of this country as they are amassed on a more capital basis than the liquid liability of outstanding dollars.

What has not been noted in the very fine statement of Senator BYRD is that what hurts us also is that for years we did not stand up to the cost of the Vietnam war. We spent and spent and spent, and we did not tax and tax and tax. That was a deliberate political decision, because we did not want our people to take the brunt of the Vietnam war or to realize what it was costing. We are surely paying dearly for that action but we are paying for that reason.

Another reason, and one of critical importance to the country, which is even superior to the reason I have just mentioned is the fact that our economy is not as vigorous, not as intelligent, not as productive, and not as inventive as it formerly was. Perhaps it was not possible to maintain absolute supremacy, but it certainly is not impossible to maintain more of it than we have. We are still a very rich Nation, and we still represent 30 percent of the world's gross product with only 6 percent of its people. That is a ratio of 5 to 1. Those are the current figures. That is our position now, but we are not doing as well as we did only two decades ago, when we had half the world's gross product.

Maybe that is a good thing. You cannot be quite so rich on such a poor street; and many of the people of the world are very, very poor. So I do not say, necessarily, that that is a bad thing for our Nation, but it is a bad trend, Mr. President. The erosion is a bad trend, just as the Senator from Wisconsin (Mr. PROXMIRE) points out. Surely, we have been bested in competition in many items in which we were heretofore paramount, but we are supposed to be smart enough, quick enough, and able enough to find lots of other items in which we cannot be bested, like jet passenger planes, where we are still top dog, and other sophisti-

cated forms of hardware, as they are called.

So this imbalance in our international trade also represents a measure of our inadequacy, the fact that we have not kept up, that the American worker is not as productive as he used to be, that the American inventor is not as ingenious, and that the American engineer is not as smart, or that they are not putting out enough. This is a tremendous challenge, Mr. President, for our country, and there is no use in begging the question as to what has caused the erosion of our position.

One last point: The devaluation of money can only hold us level. We will not get ahead on that basis. You cannot get ahead on monkeying around with money. You can only get ahead by actually showing your ability in goods and services.

We have great opportunities for investment in the world. These multinational corporations, which need to be regulated, can be a blessing in a disaster, because they are producing the foreign exchange in earnings and interest which compensate for our trade deficits. But in order to do what we have to do, we have to get level. We cannot lose any advantage which results from the exchanges of money, from somebody else's money being undervalued and ours overvalued. These are strictly corrections, and nothing else. If the American people will understand that, Mr. President, then we will have a clearer sight at our problem, and we will realize that fundamentally and basically it is the productivity and the ingenuity of the American economy that need to be bucked up, and especially the morale of the American worker and the American technician.

I thank the Senator for yielding.

Mr. BUCKLEY. Mr. President, the entire international monetary system today is undergoing its most significant change since the present set of international monetary arrangements were established at the Bretton Woods, N.H., Conference of 1944.

The system which Bretton Woods established, known as the gold-exchange standard, is what I would describe as a "fair weather" monetary agreement. It was based on the belief that a stable international monetary framework for the postwar growth of international trade could be fashioned out of a government supported price for gold to maintain a worldwide system of fixed exchange rates. This agreement would prosper so long as there was economic "fair weather." The storms which resulted from a 25-year accumulation of pressures built up through the emergence of Europe and Japan as major economic powers were more than the Bretton Woods system would support. This body ratified the first devaluation of August 1971, and is now called upon to ratify the second devaluation in 14 months.

The need for a devaluation of the dollar has merely ratified what was already and accomplished fact in the market place. It recognizes the fact that equilibrium in our international balance of payments could not be maintained at the existing exchange rate. I am highly pessimistic, however, as to the likelihood that any exchange rate for the dollar

established by governmental fiat can be sustained in the marketplace because of the inevitable changes in the economic circumstances between us and our major trading partners. As a consequence, I would strongly urge that the dollar be allowed to float permanently so that the political and economic trauma that the free world has had to endure each time the international value of the dollar has had to be altered can be avoided in the future.

Whatever the nature of a reform of the international monetary system, a return to anything resembling the Bretton Woods gold exchange system is most unlikely because of its spectacular failure in recent years. As a consequence, the Congress now has an opportunity to eliminate from the statute books, an anomaly of 40 years' duration, the prohibition against the private ownership of gold.

The statutory prohibition against the private ownership of gold no longer retains a shred of justification as gold is no longer a vehicle for international monetary settlements; gold having been replaced by other financial instruments in the past few years. Even if the world's major trading nations agree to return to a fixed exchange rate international monetary system, instruments other than gold, such as Special Drawing Rights or some equivalent, will be employed. Therefore, whether we operate on a fixed or flexible exchange rate system or some intermediate alternative, the U.S. monetary gold stock is no longer in need of the protection afforded by the prohibition of the private ownership of gold by U.S. citizens.

The time is appropriate to reform as much of the international monetary mechanism as can prudently be done. The devaluation of the dollar to a level more likely to be sustainable, at least for the near future, is unquestionably necessary in order to match the law with reality, it should not, however, be confused with basic reform. It is equally appropriate that we cleanse from the statute books such laws as the statutory prohibition against the private ownership of gold which no longer serves a useful function.

We have, in short, no alternative but to enact this bill—but we need to do much more if we are to achieve true monetary reform.

ORDER FOR ADJOURNMENT UNTIL 10 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in adjournment until 10 o'clock tomorrow morning.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

AMENDMENT OF THE PAR VALUE MODIFICATION ACT

The Senate continued with the consideration of the bill (S. 929) to amend the Par Value Modification Act.

AMENDMENT NO. 20

Mr. PROXMIRE. Mr. President, on behalf of myself, the Senator from

South Carolina (Mr. HOLLINGS), the Senator from Illinois (Mr. STEVENSON), the Senator from Virginia (Mr. HARRY F. BYRD, JR.), the Senator from North Carolina (Mr. ERVIN), the Senator from Alabama (Mr. ALLEN), the Senator from South Dakota (Mr. MCGOVERN), the Senator from Texas (Mr. BENTSEN), the Senator from Idaho (Mr. CHURCH), the Senator from Oregon (Mr. HATFIELD), the Senator from Florida (Mr. CHILES), the Senator from Nevada (Mr. CANNON), the Senator from Iowa (Mr. HUGHES), and the Senator from Colorado (Mr. HASKELL), I call up my amendment No. 20, which would establish a ceiling on fiscal year 1974 spending at \$265 billion, and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

At the appropriate place insert the following new section:

SEC.—. Expenditures and net lending during the fiscal year ending June 30, 1974, under the budget of the United States Government shall not exceed \$265,000,000,000.

Mr. PROXMIRE. Mr. President, this is an amount which is almost \$4 billion below the level which President Nixon has established for outlays for spending in his new budget.

WHY OFFERED ON THIS BILL

The devaluation bill, which is the bill before us, is an appropriate vehicle for a ceiling amendment. In fact, it is an excellent vehicle for the amendment.

First of all, we need a spending ceiling. We need it this year. We need it as soon as we can get it. I shall discuss the merits of my \$265 billion ceiling, but first of all, we need a ceiling. We need it now, for fiscal year 1974, and not for 1975.

Second, if a ceiling amendment is to have any significance or meaning as a guide to action, it must be debated and passed early in the calendar year. It should be on the books long before June 30th, the start of the new fiscal year. The devaluation bill is before us and action on the amendment now makes it possible to establish a ceiling before the new year starts.

In the past, opponents of ceiling amendments have tried to have it both ways. If we offer an amendment early, they cry out that it is too early. We should wait until the new fiscal year, they say.

But if we wait until the new fiscal year, they say it is too late. They say that it will take the executive agencies several weeks to get their cuts lined up and several more weeks to put them into effect. Therefore, they argue, the executive really has to put a 12 month reduction into effect over a 9 or 10 month period. And they may be right about that.

For that reason, I think we should act on it and act on it now if it is going to give the executive branch time to limit their spending to the spending ceiling.

Third, the Joint Committee on the Budget has made some tentative and preliminary proposals concerning a congressional ceiling and the need for congressional institutions and procedures to support it. So have a number of individual members of the House and Senate.

But all of these programs look to next year. They would merely set up the machinery by which a congressional ceiling could be established. But it would not be until fiscal year 1975—or a year from now—before a specific proposal to set a specific ceiling on a specific budget would be before us.

The crisis, however, is now. I think we should act now. Further, in his economic message, the President urged us to establish a ceiling on the budget this year.

On page 75 of the Economic Report, the Council of Economic Advisers said the following, on behalf of the President:

That is why the President has urged the Congress to establish a rigid ceiling on fiscal year 1974 expenditures before it passes any other spending legislation this year.

Now, obviously, if we are going to act before we pass on spending legislation, we had better act now because most of the appropriation bills in the House are already up for action. We have been holding hearings on appropriation bills in the Senate, and some are nearing action. For the guidance of all of us when we mark them up, we should know what kind of ceiling we have. So the time has come, and we should act, and act now.

Finally, the devaluation bill specifically is an appropriate bill or instrument for a ceiling amendment.

Devaluation, as the distinguished Senator from Virginia (Mr. HARRY F. BYRD, JR.) and I have pointed out, is the result of inflation at home. And that inflation is related to the Federal budget.

Devaluation makes sense only in the context of a tough anti-inflationary policy here at home. Therefore this bill is a proper instrument on which to vote a domestic spending ceiling. There are other bills, of course, but they may well come before us far too late.

WHY WE NEED A SPENDING CEILING

We need a spending ceiling, first and foremost, because President Nixon's budget is a very, very high budget.

Many people do not realize this.

In fact, I would say the generality of the public and perhaps even some Members of Congress, do not appreciate how high the budget is. This is a \$268.7 billion budget. That is a 7½ percent, \$19 billion increase in 1 year and \$22 billion more or 9 percent more than the \$246.3 billion President Nixon originally proposed for fiscal year 1973.

This is the first time in my knowledge, ever, in history, that both military spending and overall spending has gone up in the year following the end of a war.

In my view, both should be held down.

A lot of nonsense has been talked about this new budget and how tight it is. The opposite is true. The military budget is \$4 billion higher than last year. The budget for HUD, believe it or not, is \$1.4 billion more than last year, and that is an increase of about 30 percent.

The HEW budget is \$4 billion higher than last year.

There is a big increase in social security. Spending for natural resources and environment is up. Interest costs are higher. What is termed "international affairs and finance" or that amount of foreign aid which is listed

under foreign aid in the budget, is up by about a half billion.

So that this is no tight budget. This is a bigger budget increase over last year. It is \$85 billion more than President Johnson's highest budget. And they called President Johnson the "big spender."

For all these reasons, the budget total, the overall budget, is too high. We need a ceiling of \$265 billion, because the \$268.7 billion spending in the new budget is too high.

The \$265 billion ceiling is what I am proposing here, which still means a 6-percent increase over last year. In my view, that is enough. That is the reason I chose \$265 billion as the ceiling amendment.

TWO ELEMENTS TO AMENDMENT

My amendment contains, or will shortly contain, two elements. The first and foremost point is that it establishes a ceiling on "outlays" or "spending" for fiscal year 1974 at \$265 billion.

The second element is that it will provide an anti-impounding provision that limits the President in his ability to impound funds provided we stay below his budget levels. Shortly I will accept the amendment of the Senator from Texas (Mr. BENTSEN) as a modification of my amendment in order to provide an anti-impounding procedure.

Mr. BENTSEN. Mr. President, will the distinguished Senator from Wisconsin yield at that point temporarily?

Mr. PROXMIRE. I am happy to yield to the Senator from Texas.

Mr. BENTSEN. Mr. President, I am a cosponsor of the amendment by the distinguished Senator from Wisconsin and I think it shows congressional responsibility in this situation and the desire on the part of Congress duly to exercise some control over spending and to do something about inflation. In the words of the President, to get together.

Mr. President, I believe the Congress is well aware of the need to reduce spending and deflate the size of the Federal budget deficit. Ever since the Senate considered an expenditure ceiling during October of last year, thousands of words have been expended on the need to control Federal spending in a regulated, coordinated way—but we continue spending in a piecemeal fashion with scant regard for what the total will be. The Congress has cut the President's budget requests every year, but has added programs of its own and spending is still outrunning income. There is blame enough to go around for both the President and Congress for past excessive spending.

But now facing us, Mr. President, are indications that inflation is gaining a new momentum, driving prices even higher and the value of our American incomes lower.

Inflation is really the cruelest tax of all because it most affects those of fixed and low incomes. The distinguished Senator from Wisconsin and I are members of the Joint Economic Committee which has recently completed hearings on the state of the economy. The testimony we heard was not encouraging, to say the least.

In the last 7 months the Consumer Price Index has risen at an annual rate of over 4 percent.

We are advised by the administration that some of these are short-run increases. However, the best measure of future inflationary pressures, the wholesale industrial price index, has increased at a rate of 4.1 percent in the last 12 months and at an annual rate of 5.9 percent in the last 3 months. If you annualize last month's increase in wholesale industrial prices, it is 12 percent.

This Nation is in for some serious inflation problems by year's end unless we act now.

There is a growing concern that phase III will not do the job, in the absence of a more effective control program, there are two things we can do to reduce inflation. We can reduce the supply of money with tighter monetary policies or we can reduce Federal spending. In 1969 and 1970 the administration tried to use tight money as its chief inflation fighting tool. It did not work. It produced high interest rates on homes which many of our people will be paying for 30 years. It caused our economy to stagnate and produced 6 percent unemployment. But it did not bring a reduction in the inflation rate. Our only course must be to reduce Federal spending.

For this reason I am lending my full support to this amendment setting a ceiling \$4 billion lower than proposed by the President.

I think it is high time the Congress moves toward carrying out some reductions in Federal spending that will be necessary to stave off the inflation that seems to be reemerging as the major problem facing our economy. Some hard decisions are going to have to be made by Members of the Congress to reduce spending and it will mean deferring some important projects and programs. But it seems to me that the alternatives to these cutbacks, painful though they may be, seem far more harmful to our Nation's future.

What I am concerned about in this particular piece of legislation as now drafted, is that it might be misinterpreted by the President, that he might decide this gives him a blank check or would be an unlimited assumption of authority to impound funds under the antideficiency act which is now before the courts, and additional legislation which is being drafted in great detail by the distinguished Senator from North Carolina (Mr. ERVIN).

For this reason, Mr. President, I now call up my Amendment No. 51, which is a technical amendment and which I have discussed with the distinguished Senator from Wisconsin (Mr. PROXMIER) and which I intend as a modification to his amendment and ask that it be stated.

Mr. PROXMIER. Mr. President, I am happy to yield to the Senator for that purpose. I understand that his amendment is a modification of my amendment.

The PRESIDING OFFICER (Mr. HELMS). The amendment will be stated. The legislative clerk proceeded to read the amendment.

Mr. BENTSEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered, and the amendment will be printed in the RECORD.

The text of the amendment is as follows:

On page 1, line 1, immediately before "Expenditures," insert the subsection designation "(a)".

On page 1, after line 3, add the following: "(b) (1) Notwithstanding the provisions of any other law, the President shall reserve from expenditure and net lending, from appropriations or other obligatory authority heretofore or hereafter made available, such amounts as may be necessary to effectuate the provisions of this section. In no event, however, shall such reservations be made until there is sufficient information available to indicate clearly that the figure referred to in subsection (a) of this section is going to be exceeded.

"(2) In carrying out the provisions of paragraph (1) of this subsection, the President shall reserve amounts proportionately from appropriations or other obligatory authority available for all programs and activities except for expenditures and net lending for—

- "(A) interest;
- "(B) veterans' benefits and services;
- "(C) payments from social insurance trust funds;
- "(D) public assistance maintenance grants;
- "(E) Medicaid;
- "(F) social services grants under title IV of the Social Security Act;
- "(G) food stamps;
- "(H) military retirement pay; and
- "(I) judicial salaries.

"(3) In carrying out the provisions of paragraphs (1) and (2) of this subsection, no amount specified by the Congress in any appropriations or other obligatory authority for fiscal 1971 and no amount of unobligated balances in any appropriations or other obligatory authority specified for obligation in fiscal year 1974 in the President's budget for fiscal year 1974, may be reduced by more than 10 per centum.

"(c) In the administration of any program as to which—

"(1) the amount of expenditures is limited pursuant to subsection (a) of this section; and

"(2) the allocation, grant, apportionment, or other distribution of funds among recipients is required to be determined by application of a formula involving the amount appropriated or otherwise made available for distribution; the amount available for obligation (as determined by the President) shall be substituted for the amount appropriated or otherwise made available in the application of the formula.

"(d) In carrying out the provisions of subsections (a) and (b), should the President find it necessary or desirable to exceed the 10 per centum limitation provided in paragraph (3) of subsection (b), he shall notify Congress of those programs and activities for which he believes it desirable to reduce funds in excess of such 10 per centum, and the amounts of such excess reductions. Any such excess reduction shall be effective upon the day the President so notifies the Congress, except that if during the first period of sixty calendar days of continuous session of Congress after the date on which such notice is transmitted to it, Congress agrees to a Concurrent Resolution stating that it does not favor that excess reduction, such excess reduction shall thereafter no longer be effective.

For the purpose of this subsection, (1) continuity of session is broken only by an adjournment of Congress sine die, and (2) the days on which either House is not in session because of an adjournment of more

than three days to a day certain are excluded in the computation of the sixty-day period.

"(e) If the committee to which a resolution with respect to a proposed excess reduction has been referred has not reported it at the end of ten calendar days after its introduction, it is in order to move either to discharge the committee from further consideration of any other resolution with respect to the proposed excess reduction which has been referred to the committee.

"(1) A motion to discharge may be made only by an individual favoring the resolution, is highly privileged (except that it may not be made after the committee has reported a resolution with respect to the same proposed excess reduction), and debate thereon shall be limited to not more than one hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(2) If the motion to discharge is agreed to or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other resolution with respect to the same proposed excess reduction.

"(f) When the committee has reported, or has been discharged from further consideration of a resolution with respect to a proposed excess reduction, it is at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion is highly privileged and is not debatable. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(1) Debate on the resolution shall be limited to not more than ten hours, which shall be divided equally between those favoring and those opposing the resolution. A motion further to limit debate is not debatable. An amendment to, or motion to reconsider, the resolution is not in order, and it is not in order to move to reconsider the vote by which the resolution is agreed to or disagreed to.

"(g) Motions to postpone, made with respect to the discharge from committee, of the consideration of, a resolution with respect to a proposed excess reduction, and motions to proceed to the consideration of other business, shall be decided without debate.

"(1) Appeals from the decisions of the Chair relating to the application of the rules of the Senate of the House of Representatives, as the case may be, to the procedure relating to a resolution with respect to a proposed excess reduction shall be decided without debate."

Mr. BENTSEN. Mr. President, I have sent to the desk certain changes in amendment No. 51 of a technical nature.

The first of which clarifies that we are applying the 10-percent limitation to congressionally approved figures of obligatory authority for fiscal year 1974.

The second includes within the 10-percent limitation any amount of unobligated balances from prior years which is specified for obligation in fiscal year 1974 by the President's budget. This will insure that if the Appropriations Committee relies on these past obligatory authorities in making appropriations for fiscal year 1974 that authority will be included in the 10-percent limitation.

The third change is to make reserva-

tions in excess of 10 percent effective on the day the President gives notice to the Congress.

If during the next 60 days the Congress acts to disapprove the reduction then the reservation will cease, and the President must propose another one. This is a practical change to insure that the President does not propose a cut with which we agree only to find the agency as already spent the funds some time during the 60 days. I am concerned about preserving congressional priorities but I also want to see us stay within this ceiling.

Mr. PROXMIRE. Mr. President, I am happy to modify my amendment in accordance with that of the Senator from Texas.

The PRESIDING OFFICER. The amendment is so modified.

Mr. EAGLETON. Mr. President, will the Senator from Wisconsin yield to me for the purpose of asking a question?

Mr. PROXMIRE. I am happy to yield.

Mr. EAGLETON. Will the Senator yield to me later, so that I can offer a substitute to the Proxmire amendment as modified by the Bentsen amendment?

Mr. PROXMIRE. Yes indeed. As soon as I finish my presentation, the Senator will get the floor to offer his amendment.

Mr. EAGLETON. Fine. I thank the Senator.

Mr. BENTSEN. In the absence of some language as to how this ceiling is to be implemented, I believe the President will claim he is being given a blank check.

Mr. President, my amendment is similar to the amendment offered last year by the distinguished Senator from Idaho (Mr. JORDAN). That amendment passed the Senate by a vote of 46 to 28.

This amendment, like the Jordan amendment, would require that any reductions necessary to implement the ceiling be made proportionately and across the board. For example, if it was felt that putting a 7-percent limitation on expenditures was necessary to achieve the \$265 billion limitation, that would be applied to each and every program, and each and every program that had a dollar sign by it and an item in the budget under contractual authority.

It exempts the same list of uncontrollable items. And like the version which passed the Senate last year, it provides that spending authority could not be reduced by more than 10 percent in any activity, program or item that has a dollar amount in an appropriation bill.

Some concern was expressed last year that given the list of exemptions and congressional authority already granted, 10 percent reductions would not be enough, that we would not achieve the \$265 billion by that route. So we provided for that by saying that the President would have authority to go beyond 10 percent if it was necessary to get to the \$265 billion but if he did that, Congress would have the right by concurrent resolution to deny that excess reduction within 60 days. It should be a high priority item and a resolution that the committee could be discharged from its responsibility if it had not given early consideration to that matter. I am concerned about giving that additional

amount of flexibility to the President. But it will be necessary in order to assure that we achieve the \$265 billion limitation.

The question has been asked: What would happen if Congress continued to turn down during that 60-day period the reductions in excess of 10 percent? I do not believe that is a realistic situation because Congress would be responsible in that regard. He would have to come back with additional reductions if those specific numbers were turned down, but we would finally achieve a compromise that would be equitable and accomplish the job.

I hope that, if we enact this \$265 billion expenditure ceiling early in the year, the 1974 spending authority would not cause outlays to exceed that figure. However, in order to provide some flexibility I have included a provision that should the President find it is necessary or desirable to reduce any program by more than 10 percent in implementing this ceiling, he must notify Congress of such a reduction and Congress could veto that action within 60 days. Provision is also made to expedite both committee and floor action on such a measure.

Mr. President, I wish I did not feel it necessary to give the President even this much flexibility, but the Congress has not yet provided itself with the facilities to coordinate its spending actions so that we can exercise the control necessary to hit a target figure even for obligation authority, much less for the actual outlays. There is no committee or organization within the Congress that can translate spending authority into actual outlays for any given year. We must depend upon the agencies in the executive branch and the computers at the Office of Management and Budget to tell us what outlays result from the authority we grant.

And, Mr. President, we wonder why we have lost control over Federal spending. If we are to regain that control, we must give ourselves the personnel, the organization, and the machinery to make informed decisions on both authority and outlays. But that is not going to happen in time for fiscal 1974.

Mr. President, this amendment does not solve all of the Congress budget problems. Nor does it attempt to deal with the propriety or lack of propriety of Presidential impoundments under the Anti-Deficiency Act. The Joint Study Committee on the Budget and the Government Operations Committee are seeking to deal with those questions in other legislation and they are the proper ones to accomplish that. We should wait to have that before going ahead on the impoundment provision. And whatever action we take here, the impoundment issue will ultimately be settled in the courts.

But this amendment is necessary to prevent the expenditure ceiling from being used as a means of voiding congressional spending priorities; without this amendment, it surely would be voiding it. It will put the President on notice that the Congress is through writing blank checks—that we are tired of filling up the well for him to pour.

Thus, I urge acceptance of this modifi-

cation to the amendment of the distinguished Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I want to thank the Senator from Texas very much. In my view, his modification to my amendment will contribute greatly to the merits of my amendment. It is clear that any amendment, as has been pointed out, would mean that we have not crossed the very vital bridge of other priorities. Once we have set the ceiling, once we have established the fact that Congress is going to be fiscally responsible, then it seems to me the priorities established by Congress in our appropriation measures should be followed.

CEILING REMOVES IMPOUNDING ARGUMENTS

In my view, if Congress establishes a ceiling and sticks by it, that removes any genuine argument the President has for impounding funds.

If Congress establishes a fiscally responsible ceiling, then Congress, in my view, has the right to determine spending priorities, and the President then has both the duty and the responsibility to carry them out faithfully.

Members of the Senate may differ over what our priorities should be. We can work that out over the term of this session. But if we establish a ceiling and stick with it, then whatever priorities we work out, through the cut and thrust of our debate, the bills we pass, and the programs we push forward or cancel, should prevail. That is why my \$265 billion ceiling also will have an anti-impounding provision, to make certain that once we establish a ceiling at or below the President's proposed spending, our priorities will prevail.

PRESIDENT LOSES IMPOUNDING ARGUMENT

In the absence of a spending ceiling, the President's right to impound funds on grounds of fiscal responsibility—that there is a raging inflation at home and the devaluation of the dollar abroad—is in my view undeniable. If he acts to save the economy and to save the dollar, any Congress which tries to spend more than we should is going to lose the argument. The President is bound to win, and he should win.

But if we establish a ceiling, then the President is no longer justified in freezing funds which Congress has authorized, merely on the ground that he does not like the programs.

This is not to say that many programs cannot be improved. Of course they can. They should be improved, and that goes for programs we like as well as programs we do not like. One can find waste not only in the military budget but also in education and health and housing and in the space budget and, in fact, everywhere anyone really takes the time and effort to look.

None of us objects to improving programs. Most of us object to killing them off or impounding the funds provided we act responsibly on an overall basis.

If we establish a spending ceiling, then I believe the President has no leg to stand on with respect to impounding funds for fiscal reasons. If he does not like a program, provided we are below this budget, it would be incumbent for him to come to Congress and to ask for

a change in the law or a rescission of the funds, before he cut those programs or impounded the funds.

All of us know that there are any number of specific programs in which constructive changes could be made both to save money and to make them more efficient and effective. But legislative proposals should be made and authority sought before they are killed by administrative action.

We should insist on that. We must assert the traditional rights of Congress to legislate and to control the purse strings.

BELIEVE PRESIDENT WOULD BE RESPONSIBLE

If we establish a ceiling at or below the President's budget level, I believe that the President will be politically responsible and end the arbitrary impounding of funds. But until a ceiling is established and the budget is under control, the President has Congress over a barrel, and we in Congress ought to be intelligent enough to recognize it.

If Congress is going to go to the mat with the President over priorities and the impounding of funds, we must first set our own house in order and limit spending.

Then our views and our priorities make sense. Without a ceiling, the President is bound to win the budget struggle.

DIFFERENCE BETWEEN OUTLAYS AND APPROPRIATIONS

One of the things that has caused so much disagreement over the issue of a spending ceiling is the difference between an "outlay" or "spending," on the one hand, and an "appropriation" or "new obligational authority," on the other.

The President's spending proposals and our proposal for a ceiling both have to do with "outlays" or "spending" in fiscal year 1974.

The \$268.7 billion in spending in the President's budget comes from a variety of sources. Only about half of it is appropriated this year by Congress. A big chunk of it comes from past appropriations. We already have a backlog of \$299 billion in past appropriations and spending authority. Some \$42.4 billion of the \$299 billion is included in the "outlays" the President proposes in fiscal year 1974.

Additional funds come from the social security and highway trust funds.

So what is spent in fiscal year 1974 and what is appropriated in fiscal year 1974 are two entirely different things.

In fact, they are so badly related that it takes a \$3 cut in appropriations to effect a \$1 cut in "outlays" or "spending" this year. That is the rule of thumb.

The \$268.7 billion "outlay" budget of the President is made up of funds appropriated in the past, from trust funds over which Congress has little immediate control, for interest on the debt which varies with economic conditions, and for required payments under contracts such as the Commodity Credit Corporation, where the bills are paid first and the agency submits the amount to Congress as an accomplished fact.

That is the problem we face, and that is why the only way Congress can gain control of the purse strings this year is

to vote a spending ceiling on the President's right to spend.

Mr. JAVITS. Mr. President, will the Senator yield for a question?

Mr. PROXMIRE. I yield to the Senator from New York.

Mr. JAVITS. I would like the Senator to know that these questions are friendly, not unfriendly. They are intended to elucidate the situation. The reason for my asking them is that I serve on the Government Operations Committee and, and other members of that committee, as the Senator knows, Senator Ervin including myself, have been trying to fashion some generic bill to deal with the constitutional issue of impoundment, upon which we and others on the committee feel very strongly. So I just give the Senator the framework within which I am asking these questions.

Mr. PROXMIRE. I ask the Senator from Texas (Mr. BENTSEN) if he would take part in this colloquy, to the extent that he would like to, because the Senator from New York is going to address some questions on the impounding provisions which have just been incorporated into the amendment.

Mr. JAVITS. I note that the amendment of the Senator from Wisconsin cuts the spending figure to \$265 billion. I note, also, that his press release, which I have read very carefully, says that he actually considered the administration's \$268.7 billion figure and that he and his colleagues felt that it should nonetheless be cut to \$265 billion. He gives no reasons except that it is just a cut.

The question I ask the Senator is this: Would we not be better advised to leave the level at \$268.7 billion, in view of the fact that we, ourselves, have not yet set up the necessary machinery to determine what should be a proper ceiling, and that the President's appraisal is the best we have at this time. If we tried to use \$265 billion, we would be guessing and would be reaching for a figure simply to cut his, without necessarily being able to make a case for it. However, knowing Senator PROXMIRE as well as I do and respecting him as much as I do, is there a case prepared for the cut? Why is it necessary to reduce the President's ceiling by \$3.7 billion?

I should like to point out to the Senator that, where the shoe pinches, in housing, in health, in manpower training, in poverty, and so forth, the individual amounts involved are not very great, not when you lay that beside \$79 billion for defense or other big items in the budget.

So the \$3.7 billion reduction is really an important item when it comes to the things which many of us feel have been neglected in terms of priorities. The \$3.7 billion, while only 1.5 percent of the total ceiling is important because that will figure in the question of allocating priorities.

Mr. PROXMIRE. I say, first, to the Senator from New York that the Senator from Missouri, it is my understanding, will offer an amendment to raise the level to the \$268 billion. I do not know if it is \$268.7.

Of course, the crux of the discussion

on the Eagleton amendment will be whether or not we should stick close to what the President has proposed or whether we should go as far down as I have.

I have a whole series of reasons for taking the \$265 billion figure. The Senator should know that some 6 weeks ago I developed, with the help of the staff of the Joint Economic Committee and my own staff, a counter budget; that we went through every major item and determined the level of spending we thought could be justified.

On the basis of that counterjudgment we determined that \$265 billion would provide what I think is a generous budget and would be effected—here are many ways to do it—by keeping military spending at the current level rather than raising it by \$4 billion, by \$1 billion below what the President requested in foreign aid, and by one or two other relatively modest reductions, and then restoring all of the reductions the President made in the welfare programs. That is one scenario. You would not have to accept those to adopt my position.

I understand the President arrived at his \$268.7 billion by calculating what a full employment balanced budget was and by starting with that. He did not start with what we need in the various programs.

I think because inflation is so serious we can argue that a full employment balance is not adequate to restrain an economy in which the No. 1 problem is inflation. No. 2, during the last 6 months of calendar year 1973, if we go ahead with the President's budget of \$268.7 billion, the full employment deficit will be \$3.7 billion. In other words what I am proposing would bring it into balance in this period, and a surplus next year.

I think from an economic standpoint and from the standpoint of recognizing spending priorities and needs, that this is a responsible and logical approach.

Mr. JAVITS. I thank the Senator. I will await with interest the statement of the Senator from Missouri (Mr. EAGLETON).

Mr. PROXMIRE. Later on in my speech I will point out that whereas the administration argued that they made the most meticulous examination of spending, we have secured their justification and they are anything but meticulous. It is based on generalization and not on detailed analysis. I can document that, and I intend to do so.

Mr. JAVITS. I thank the Senator.

Will the Senator yield so that I may address a question to the Senator from Texas?

Mr. PROXMIRE. I yield.

Mr. JAVITS. On the impoundment issue, I am moved only by the fact that there are serious constitutional questions about impoundment as it terminates a program, such as the dismantling of OEO, or for practical purposes, by denying it any funds, as in the case of the Neighborhood Youth Corps.

We have this matter under consideration. We do not wish to concede the constitutional point until we are ready to argue the statute dealing with the relationship between Congress and the Presi-

dent on that score. Therefore, I wish to ask this question.

Does the Senator think that under those circumstances it is desirable to make any provision respecting impoundment in this ceiling bill? In other words, are we not conceding the right of the President to impound? That is part A. If we adopt the Senator's amendment, are we not conceding the right of the President to impound, and that is something we do not want to do yet. We may or may not do it in the future depending on the definitive legislation from the Committee on Government Operations.

Second, even if we went the Senator's route, does he not think we should have a saving clause saying this is for 1 year only, which it is, and tack it onto this amendment, which is for 1 year?

We do not want to give away the ball game. I do not think we should act now but at least we should have a provision, which I shall be glad to offer, to say that nothing in this amendment, which is only applicable for the temporary period of 1 year to implement the ceiling, shall prejudice the right of Congress to legislate in this field, passing on that constitutional power?

Mr. BENTSEN. I share the concern of the Senator from New York. I went to some lengths to avoid the question the Senator has raised. We have this matter in committee and also the distinguished Senator from North Carolina is working on this matter. I understand the bill is almost at the markup stage. In addition, we know we have this matter before the courts where it will ultimately be decided. We tried to avoid the question to the extent we could, and still be practical. We thought the President had to have the authority to get back to the \$265 billion limitation. It is a matter of being pragmatic.

On the second point, we are talking about only 1 year. That is what the Senator from Wisconsin was saying.

At this time we do not have the mechanics relating to income and outgo, which will be the ultimate accomplishment of a sophisticated piece of legislation that we are considering now, what is before the committee. I would have no objection to the 1-year limitation, myself. I defer to the Senator from Wisconsin.

Mr. PROXMIRE. That is an excellent suggestion. That is the intention. I am a member of the committee of the House and the Senate of this whole problem. The reason we are doing it this way is that it will not be ready until next year, and I think the Senator's suggestion is excellent.

Mr. JAVITS. I will draft something and may offer it.

Mr. MONDALE. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. MONDALE. Mr. President, I listened to the statement of the Senator on the introduction of his amendment. I share his view that we must have a spending ceiling and reassert congressional priorities within that ceiling, and we must do so as quickly as possible, for a host of reasons.

I am sympathetic with the thrust of the Senator's proposal. However, I have one question of fact I would like to ask the Senator. I think the answer is in his remarks. His amendment, which is now part of the Proxmire amendment, is designed to deal with how the President reduces spending for the purpose of coming under the spending ceiling. It does not deal with the other issue, which is called impoundment. The President claims he has unlimited power to reduce the program or eliminate it. The President claims the authority to spend or not to spend as he sees fit.

Mr. BENTSEN. Mr. President, the Senator from Minnesota is correct. I have tried to avoid the impoundment question because it was before the appropriate committee in the Senate and the court. I felt this was a grave constitutional question, and one that should not be resolved by amendment on the floor of the Senate, without full consideration by the committee. I was waiting for that piece of legislation. I understand it will be forthcoming soon.

Mr. MONDALE. I thank the Senator for his clarification. The reason I ask, and I would appreciate the Senator's response, is that I am afraid if we give the President a spending ceiling that I think we all want, without some very specific control over this generalized impoundment, he will use the spending ceiling to excuse a whole host of things. He will not only continue to impound, as he has in the past, but say that he has been directed by Congress to do so.

Mr. BENTSEN. We have carefully provided in this amendment that he cannot pick and choose the program he will cut; it has to be the same in each program; a line item, anything that has a dollar figure, which the House and the Senate decide merits a dollar figure would be controlled by this 10-percent maximum curtailment. If it were 7 percent on one item it would have to be 7 percent on all of them.

Mr. MONDALE. What is being proposed essentially is the Jordan amendment adopted in the last Congress.

Mr. BENTSEN. That is right, which passed here by a vote of 46 to 28.

Mr. MONDALE. And which I supported.

There is some concern—and I would like the Senator to give me his views on this—that if we give the President the spending ceiling, we will have great difficulty getting control, later on, on the broad issue of impoundment. If we give him the spending ceiling, he will use the spending ceiling to blame the Congress for the cuts in human programs. Parenthetically, I might add that the \$265 billion ceiling would result in cutting out billions of dollars in human programs. Then when we try to control impoundments, we will find that he is in a far better strategic position to oppose our seeking to have control over impoundments. Does the Senator from Texas share that concern?

Mr. BENTSEN. No, the Senator from Texas does not.

Mr. PROXMIRE. Mr. President, if the Senator will yield unless I misunder-

stood the Senator, he said the \$265 billion ceiling will result in billions of dollars being cut from human programs. He is wrong. I have a list of all the human programs that have been passed by Congress. If we put them all into effect, the total is less than \$2.7 billion. Certainly, if we cannot cut more than that amount out of the military budget and out of the foreign aid budget and, as a matter of fact, out of the space budget, I will be astounded. Certainly, out of the military and foreign aid budget alone, we should provide for that \$2.7 billion, and there is \$3 billion to restore control.

I think there is confusion over outlays and obligational authorities. In outlays what we need is very little, and that is what the Senator is talking about.

Mr. MONDALE. The Senator has yielded to me for a question, so I will be very glad to defer to the Senator to complete his statement, but I have two concerns over the proposed amendment, even though I agree that we should set a ceiling as quickly as possible and set priorities, and they are: No. 1, the cut proposed by this amendment is too deep. I would oppose a \$267 billion ceiling, because I think it takes another \$1 billion out of compelling human programs that we cannot afford. No. 2, the amendment does not deal with the general question of impoundment at all.

I think, unless we do that, the President is going to use this ceiling to justify further selective cuts, even though it might not be within the meaning of the Bentsen amendment. I can hear the answer being made to the doctors, the teachers, the poverty workers, the environmentalists, the housing specialists: "Congress told me to cut these programs." So we will be held to answer for these cuts.

Further, if we give him the spending ceiling without providing for control over impoundments such as envisioned in the Ervin amendment, he will be in a strategic position to oppose our effort to get congressional control.

I am told that is the reason Mr. MAHON, chairman of the House Appropriations Committee, fights so hard on the question of control over impoundments, because he is fearful that if the President gets this spending ceiling without control over impoundment on the part of Congress, the President will get what he wants.

Mr. BENTSEN. Mr. President, I will say to the Senator from Minnesota that what he says would be ideally true if we could accomplish it now, but I do not think we can do it. What we have here, in effect, is a stopgap measure. It is a 1-year limitation on the effectiveness of this law. But when we take these people and what they represent, we are saying, under the Bentsen amendment their cuts will be the same, be it for child welfare, national defense, farmers' programs. If the President cuts 3 percent on one, he cuts 3 percent on each. Congress would set the priorities. We have let the President cut back to the ceiling. We have set this procedure for the forthcoming fiscal year. It is the best we can come up with after a great deal of thought and study.

Mr. PROXMIRE. Let me read the list of what has been restored:

All of OEO, \$425 million.

In agriculture, all of REAP, REA, housing—domestic farm labor, disaster loans, special milk.

For HEW, health services planning and development, preventive health services, library services, civil rights education, NIH, student loans, health and manpower.

For HUD—incidentally, it is substantially higher in 1974 than in 1973—it includes low-rent public housing, housing for elderly and handicapped, counseling services, grants for basic water and sewer facilities, rehabilitation loan fund.

Also, under Labor, all of manpower revenue sharing and all of emergency employment assistance.

Under EPA, all of resource recovery, and new technology for air pollution.

Under Veterans' Administration, all of compensation and pensions.

All of Arms Control and Disarmament Agency.

All this for less than \$2.7 billion.

We ought to take a look at what these outlays have been before we argue that we are going to cut human programs. This is something that can be done with the kind of reduction in the military and foreign aid budgets which, on the basis of our experience last year and the year before, Congress is going to put into effect.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. TOWER. The Senator from Wisconsin expects most of these cuts to come out of the defense budget, and not the foreign aid budget. Is that what the Senator from Texas anticipated?

Mr. PROXMIRE. I am just answering the Senator from Minnesota by pointing out that this is something that can be accomplished without cutting human programs. It may be that the majority of Congress may want to reduce those so-called human or welfare programs. Maybe it does. I am saying that this is a modest diminution of what the President is proposing. Last year the Congress cut the defense budget by \$5 billion. It cut the foreign aid budget more than I am suggesting here. In other words, if we do what we did last year, we would possibly have lower than a \$268 billion budget—in fact, a \$265 billion budget we are proposing.

Mr. TOWER. I may point out that 60 percent of the defense budget is for personnel. That means it would not come out of personnel, but procurement and military construction, and perhaps result in base closings.

Mr. BENTSEN. Approximately 56 percent of the defense budget is in personnel costs, so a cut across the board would come out of controllable items.

Mr. TOWER. Would come out of what?

Mr. BENTSEN. Would come out of controllable items.

Mr. TOWER. That would mean procurement and construction.

Mr. BENTSEN. It would come out of controllable items in the defense budget.

Mr. GOLDWATER. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield to the Senator from Arizona.

Mr. GOLDWATER. When the Senator talks about decreasing the defense budget, approximately 50 percent of it is to be used for pay increases that have already been made.

Mr. PROXMIRE. I understand that fully. I understand there are going to have to be increases for pay and inflation. But the Vietnam war is over. By 1973 we will have spent close to \$6 billion on Vietnam. I am saying we can fund \$4 billion because of pay and inflation, and have some left over. Then there would be a modest reduction in defense that would give us \$2 billion to hold it down to the level of last year. I am saying that the proposal I make is not very drastic.

Mr. GOLDWATER. We are talking about a very major portion of the defense budget—now close to 60 percent—that is wrapped up in pay. We are trying to force down this amount so that it will be less by virtue of the fact that the number of men and women involved will be fewer. We are not ready to argue whether we are ready to delete this specific item or that.

Mr. PROXMIRE. That is correct. It may very well be that Congress will decide the military budget will be cut more or less. I am trying to establish a \$265 billion budget. I think it is not a drastic reduction. This reduction in spending will permit the restoration of some of these so-called human programs.

Mr. BENTSEN. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. BENTSEN. We are talking about controlled items. The joint economic report shows that we have about \$75 billion in controllable items, out of the \$265 billion budget we are proposing. So if we go to a 10-percent cut, we are talking only about a \$7.5 billion cut. And that is across the board on all the controllable items, and the priorities will have been set by the Congress itself. That is what we are trying to preserve.

Mr. PROXMIRE. The Senator is correct.

Mr. MONDALE. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. MONDALE. Mr. President, it seems to me that the amendment in its present form includes two principles that are essential for a reassertion of the congressional authority in the control of the overall outlays. However, it is missing a third. I think we all agree that some ceiling is needed. I would like to have a higher ceiling than the Senator would. However, I think we all agree, or most of us, on what the proposal of the Senator from Texas (Mr. BENTSEN) seeks to achieve. At least, the last time we voted on essentially that proposal, approximately 65 Senators voted for it.

What is missing and what is bothering me—and I would like to have the Senator give me his views on this matter—is that there is still, according to the President, even with the amendment as modified, unlimited authority in the President to cut and eliminate anything he wants to, any time he wants to. We need the Ervin

amendment which seeks to meet the question of the President's unprecedented theories about his powers to impound anything he wants to.

Mr. PROXMIRE. Mr. President, that is the whole point of the Bentsen amendment. That is why I wanted it.

Mr. BENTSEN. Mr. President, there is no unlimited authority in the President. He asks to do it across the board in each and every program on the same percentage. However, I think this means to cut it back to the \$265 billion. So, there is a very strict limitation on what he can do.

Mr. MONDALE. Under this, that is correct. However, he can still say, "Not under the Proxmire amendment or the Bentsen amendment, but under my general power to cut all funds, I will cut out all programs that I do not want." That is what he can say.

He can say, "The Bentsen amendment gives me the authority to reduce the items pro rata to get down to the spending ceiling. However, I am cutting out this program as President because I am the Commander in Chief and have control over the economy and the other things I claim to have authority over. I will cut out the program."

Mr. PROXMIRE. Mr. President, my answer to the Senator from Minnesota is that he makes a good point. But of course, we cannot do everything on this bill. If we try to do that, we will not get anywhere.

We have to decide what we can do now. Other things may come along. After we agree to the amendment, the House may act on Representative MAHON's proposal that has great merit, I think. I would like to see that matter considered. However, we do what we can do. And my amendment would let us have far greater powers to prevent impoundments than before.

The President is still free, as the Senator from Minnesota has pointed out. However, we have to be careful about proceeding further on this point. The urgency is to establish a ceiling and impoundment provisions.

Mr. SPARKMAN. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. SPARKMAN. Mr. President, I would like to pose a question to the Senator from Wisconsin, the Senator from Texas, and perhaps the Senator from Minnesota.

It puzzles me as to why this amendment would be offered at this time. I believe that the Senator from Texas stated a little while ago that the Senator from North Carolina was going to bring out a bill dealing with this matter within the next 2 or 3 days. Did I not understand that to be true?

Mr. BENTSEN. On the question of impoundment, that is correct. However, that does not deal with the ceiling or expenditures or the impoundments of funds.

Mr. PROXMIRE. The reason I offered the amendment on the devaluation bill is that the President asked Congress to establish a ceiling before any action on any spending bills. And I think that was a reasonable and proper suggestion.

As a member of the Appropriations

Committee and as chairman of the appropriations subcommittee that has the third highest budget to consider, I would like to see a ceiling established, and established as soon as possible. I cannot think of a bill more appropriate than the devaluation bill, because we are in this difficulty because of our inflation problem. And a major reason for that problem is because we have had a very big Federal spending and a very huge Federal deficit. One way to cope with that problem is to establish a ceiling.

Mr. SPARKMAN. Mr. President, I am thoroughly in sympathy with our establishing a ceiling. I have felt that we ought to accept the President's ceiling rather than try to set one and go lower. However, have we not set up a joint committee for the purpose of studying this very question?

Mr. PROXMIRE. The Senator is correct. I am on that joint committee, and that joint committee has, as the Senator knows, already issued an interim report unanimously and has come to the conclusion that they will not have recommendations for fiscal year 1974 appropriations. The first fiscal year for which we will have it is for 1975 and subsequent fiscal years.

For this budget, we cannot deal with the many problems we have. We have to schedule hearings over a number of months and then debate and discuss the matters and come out with recommendations. However, that will be after next year.

Mr. SPARKMAN. I am glad to have that explanation. I was under the impression that an effort would be made to establish a ceiling this year and not proceed to work out both priorities and a ceiling for the coming fiscal year. However, I can understand the situation that the Senator has just explained.

This thought occurs to me. If I may go further, let us assume that this is added to this bill and let us be realistic about it. What is going to happen when it gets to the House of Representatives? I think we all know that Representative WILBUR MILLS is not going to let this amendment stay in the bill. And I imagine that, when the chairman of the Finance Committee is present on the floor, he will raise some questions about it, also.

Mr. PROXMIRE. That may well be the situation in the House. They may have a ceiling that will be higher or lower.

Mr. SPARKMAN. Mr. President, I was not thinking about that. The jurisdiction of this, as I interpret it, lies with the two revenue committees—the Ways and Means Committee in the House and the Finance Committee in the Senate.

Mr. PROXMIRE. May I say to the Senator from Alabama that my understanding is that the Appropriations Committee probably asserts the most convincing case.

Mr. SPARKMAN. The Senator may be right.

Mr. PROXMIRE. Mr. President, in the past they have been attached to tax bills. There is no reason why it cannot be attached to the pending bill because it is germane. We all recognize the very serious importance of having a ceiling that will stick.

Mr. SPARKMAN. Germaneness is not a matter concerned here. However, when it reaches the floor of the House, it will be a different matter. I think we ought to consider the two sides of this thing.

I believe in a ceiling. However, I have not felt that we were ready to set the amount here. Of course, I was hoping that the joint committee was coming up with something.

Mr. PROXMIRE. It seems to me that we are pretty much forced to act if we are to have a ceiling that will be effective. If we wait much longer, it will be before the House and it will move along there. Then we will have a different proposition. Besides appropriating in any area, we are pretty much tied to it.

Mr. SPARKMAN. I recognize that problem. And I have thought about it in connection with some bills we have already passed.

While I was for them, I was wondering whether we were acting wisely in establishing the amounts we did for those bills.

Mr. MONDALE. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. MONDALE. Mr. President, the point that I am getting to is somewhat related to the Senator's point. It seems to me that we are missing someone important—the Senator from North Carolina (Mr. ERVIN), the congressional scholar on Federal impoundments and on the question of the constitutional rights of Congress.

His bill affecting impoundment, which he is working on now and which is close to completion, as I understand it, is, I think, the missing element in what we are doing. I think, if a spending ceiling leaves the Senate without something dealing with fund impoundment, we will have done far less than we have expected. As a matter of fact, it may be an invention which will turn to plague the inventor, because I would not be a bit surprised if the President used this amendment to cut the heart out of many programs, and then blame Congress for doing so.

So I would like to see us wait until Senator ERVIN comes back. I think then we could put together a bill that we could live with, and could act much more swiftly than we can today.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. SPARKMAN. Mr. President, let me say just this: I am in essential agreement with what the Senator from Minnesota has said. I think perhaps we are taking a big bite without considering the little bites that go to make it up, and I think the matter of impoundment is one of them.

Several Senators addressed the Chair.

Mr. PROXMIRE. Mr. President, before I yield to the Senator from Texas, may I point out that the Government Operations Committee, under the leadership of Senator ERVIN, is working on this principle, but once again, it is generally applicable machinery that they are trying to develop, and probably not machinery that could be adapted and applied to the problem commencing this

year. If we are to act this year, we have to act soon.

I yield to the Senator from Texas.

Mr. TOWER. Mr. President, it is my understanding that the Senator from North Carolina is going to report soon. It occurs to me that his bill would be a more appropriate vehicle for what we are trying to do here, because there we will be considering more comprehensively, I think, the matter of impoundment. It would seem to me to be logical to pull down the amendment on this bill and await Senator ERVIN's bill, and get the matter in more proper context.

Mr. PROXMIRE. Let me say to the Senator from Texas that this is exactly the kind of bill that we have to adapt the amendment for if it is going to work. The problems with an impoundment bill are several. For one thing, it could involve extensive hearings and debate in the House of Representatives, and is very easily subject to a veto. This bill, let us face it, is one the administration has to have. If we are going to have a ceiling and the appropriate kind of action on this problem, it seems to me this is the time to do it.

Mr. TOWER. Legislative blackmail.

Mr. PROXMIRE. What is that?

Mr. TOWER. Legislative blackmail is what it is.

Mr. PROXMIRE. Oh, no, not at all. I do not think we intend that. I think many people who support the President will think it is time for a ceiling, and he asked for a ceiling.

Mr. TOWER. May I say he did not ask for it on this bill.

Mr. PROXMIRE. He asked Congress to enact a ceiling itself. Not on any particular bill.

Mr. BENTSEN. Mr. President, if the Senator will yield for a comment, I would like to say to the Senator from Minnesota that I share his concern. This is a really grave constitutional question, but that does not get into the mechanics of setting a limit on expenditures. That is what we are talking about here, a limit on expenditures, trying to see some way to fit it into fiscal 1974, getting it done while we are considering authorizations. But the two are separate issues, and do not have to be considered as a whole.

Mr. MONDALE. Mr. President, last time, when we voted on the Jordan amendment, we voted essentially on how to allocate funds within a ceiling.

Mr. BENTSEN. Trying to retain the priorities of Congress.

Mr. MONDALE. Yes. My argument is that I think circumstances have changed. Since we voted on the Jordan amendment, the President has resorted to a massive new practice of impoundment and spelled out a new theory of almost one-man rule. It seems to me that we have to make certain that he complies with the Bentsen amendment, because I am afraid if we do not have something covering the general issue of impoundment, he will blame all of his cuts on this amendment, and do exactly as he pleases.

In addition to that, I come back to the point that I think we could dispose of this issue more responsibly if we had the presence of the Senator from North Carolina. I am just saying that for myself;

I am not authorized to speak for him in any way. I have not talked to him.

I, for one, and I think my colleagues agree, highly value the advice and counsel of the Senator from North Carolina (Mr. ERVIN) on this issue.

Mr. BENTSEN. I share the high esteem of the distinguished Senator from Minnesota, but I think we would make a serious mistake if we used the mechanics of trying to cut expenditure down to the ceiling approved by Congress, that the President said he thought he ought to have. We would have to have some mechanics to accomplish that.

I would suggest to the Senator that we put on a 1-year limitation. By the time we came up with a procedure to adopt a budget, we would not be able to accomplish that by the year 1975. So this proposal is what accomplishes that for us. It accomplishes it for 1974, so that the President can use the fund as a further excuse for maintenance, although I think he would rather have to stretch his imagination.

Mr. MONDALE. I agree that he would try to stretch it.

Mr. BENTSEN. We will not circumvent the issue. We will not have to subtract one iota from his power by the Bentsen amendment to the Proxmire amendment.

Mr. MONDALE. I thank the Senator from Texas. He has stated my case very well.

Mr. NUNN. Mr. President, I am in sympathy with the Bentsen amendment. I have legislation very similar to that of the Senator from Texas. But I am sure that the Senator is aware that there was to be a meeting of the Committee on Government Operations tomorrow morning, that was scheduled for tomorrow morning, but which will be held next week. I am also aware that the Government Operations Subcommittee on the Budget has 20 or 30 proposals that are similar to the Proxmire amendment and also the Bentsen amendment, and also that detailed hearings will be started on April 1 in the committee of which the Senator from Montana (Mr. METCALF) is the chairman.

I personally have read his proposal, and I think he has an excellent point, very similar to what the Senator from Texas (Mr. BENTSEN) is proposing. But I think if we give ourselves a little more time, we will come up with a much more meaningful, much more well-thought-out proposal.

I agree with the Senator from Texas, the Senator from Wisconsin, and the Senator from Minnesota, in particular on many of these items. I think, personally, the question of impoundment and the question of a spending ceiling are tied together. I think the Bentsen amendment is a way to actually give the President authority to impound funds under the priority system set up by Congress. So I think the two are interrelated. I would like to see the Senate deal with this subject without going through the same degree of hearings which are going to be taking place.

I also think that for us to set a ceiling of a real figure, which we have not had considered by the Appropriations Committee, on which we have had no testi-

mony—not yet, at least—I am not aware of it—just trying to take a figure from the air, certainly is not rational judgment.

Whether I agree with it in the final analysis is another question. For Congress to set a figure without a hearing or without any rational discussion appears to be an irresponsible budgeting process.

Mr. PROXMIRE. This is a very unfortunate world. It is an imperfect Congress and an imperfect Senate. We should take all the time we need on these questions. We should take all the time we need to debate the question. The President's own ceiling, as I pointed out, justifies our providing a ceiling on the basis of arriving at a judgment of an economic balance, on the basis of a full employment budget. Our ceiling is aimed at recognizing that the President's budget will be inflationary during the rest of calendar 1973, the first half of fiscal 1974—a deficit of \$7 billion, so that it would be more fiscally responsible to the President in that sense and, furthermore, with an analysis of where the money will go and where the money will come from, we can reduce the military budget by holding it down to the present level. We can reduce the foreign aid budget and hold it down to its present level as last year it was cut over \$1 billion. That takes time and I say to the Senator from Georgia that we do not have the time to do it. If we wait for the bill in the Government Operations Committee, it will be 2 or 3 weeks before it will be on the floor. It has to be debated and go to the House and there have to be hearings in the House. There is no pressure to pass that bill or for the President to sign it. The devaluation bill he has to have. The House has to act on it rather promptly. There just is no other vehicle on which we can act now. It is true that the permanent machinery can be more maturely developed more adequately than what we have here, but this is the best we have.

Mr. ROBERT C. BYRD. Mr. President, if the distinguished Senators from Texas and Georgia would allow me just to interject a question here, may I ask what the prospects might be for getting a time limitation on the bill and/or amendments thereto?

I have discussed this possibility with several Senators who have amendments and I find that a great many of them are amenable to such suggestion, so that we might know whether there is that possibility.

I ask that question at this time.

Mr. PROXMIRE. Mr. President, on the amendment I have pending, if we could have 1 hour, half an hour on each side, that would be satisfactory, beginning tomorrow.

I have one other amendment on requiring multinational corporations to report their foreign currency activities. That is a big amendment. I have a great deal of material on it. If I could have 1 hour, with a half an hour to a side on that amendment—

Mr. LONG. Mr. President, reserving the right to object, this amendment is the type of thing that the House always regards as a revenue amendment. This

amendment would make a revenue bill out of a bill that is not a revenue bill. Most Senators do know, and all Senators should know, that the Constitution requires that revenue bills originate in the House of Representatives.

The Senate has tried to contend in years gone by that appropriation bills are not revenue bills, but that does not make any difference so far as the House is concerned; they will not consider them.

If you put such an amendment on this bill, I predict that the bill will come back to us with that little blue sheet on it which they print over there, which says in effect that the Constitution requires that legislative bills originate in the House, so here is your bill back.

That is what happens if they are lucky. What happens if you are not lucky is that you never see the bill again. That is the end of it.

I am surprised that a senior member of the Committee on Banking, Housing and Urban Affairs, who is for this bill, would want to kill the bill in this fashion. I would think that he would want, if he is for the bill, to see it passed. We just got through passing a revenue bill and I am glad to see that he did not bring it up on that one. It would not be subject to a constitutional objection if we had put it on the bill we passed last night; but this is not a revenue bill. I predict with confidence that if we are lucky, the best that can happen is that we will see the bill come back to us with that little blue sheet affixed to it, the sheet that the Parliamentarian over there slaps on it. So that is all you will achieve. You will buy a two-way ticket to the House and back for this bill.

I do not know why Senators insist on doing that. If you want to try to act on it, you would think you would put it on an appropriation bill which the House considers a revenue bill, even though we do not think it is; but that has been the historic truth. It would not be subject, in any event, to the constitutional objection that revenue bills originate in the House.

Mr. PROXMIRE. May I say to the Senator from Louisiana that the House will construe an appropriation amendment as a revenue amendment. If they do, we cannot do much about it, but I would hope they would not do that in this case. The Senate before has originated ceiling amendments—

Mr. LONG. On revenue bills—

Mr. PROXMIRE. Nevertheless, the ceiling amendment originated here and not in the House and was accepted and made effective.

Mr. LONG. My point is, yes, we have had a spending ceiling on bills offered, and I should know, because they have been offering bills that I was managing because they were revenue bills, but I do not know why Senators will insist on going through the motions of killing bills just to be the first to vote for a spending limitation.

We have a joint committee working on one. They will propose legislation. They will hold hearings. They will propose, and I am confident where a bill originates in the House, they will propose it to a House-passed revenue bill. But I do not

know why the Senate would want, in the face of what the Constitution says—at least from the point of view of the House—and perhaps you can argue that a spending limitation is not a revenue bill. You can argue that, but you are wasting your time to argue that before the House—I assure you.

Mr. PROXMIRE. We have to recognize that the committee is not going to act in time to affect the 1974 budget. They have indicated as much. Hearings are scheduled for weeks into the future. There will be no markups or coming to a conclusion before the end of the fiscal year, so we cannot wait for them, or there will not be a ceiling.

Mr. LONG. I guarantee there will not be one if you put it on this bill. That is the one thing I can say. They will say this is an effort by the Senate to do this, or that. Actually, we already have enough of an argument going on between us and the executive about impoundment, usurpation, and so forth, without going back and bringing that other argument up all over again.

So far as this Senator is concerned, it was not the Finance Committee that initiated the bill but if the Senate sees fit to consign an otherwise good bill to the boneyard by putting this amendment in the bill, the Senator can do so, but I think it is a very unwise thing to do.

Mr. TOWER. Mr. President, reserving the right to object—

Mr. PROXMIRE. Mr. President, who has the floor?

The PRESIDING OFFICER (Mr. JOHNSTON). The Senator from Wisconsin has the floor.

Mr. MONDALE. Mr. President, reserving the right to object—

Mr. ROBERT C. BYRD. Mr. President, I had not proposed any request yet. Could we hear from the Senator from Minnesota now?

Mr. EAGLETON. Mr. President, I have a substitute for the Proxmire-Bentsen amendment which I would like to offer before sundown or sunup tomorrow; 30 minutes would be all I would need to take.

Mr. MONDALE. Mr. President, I hate to be in the position of objecting to any motions made by the leadership, because that is the only way we can get anything done around here. But for several reasons I think I would have to object. I would also have to serve notice on the Senate that I would need a considerable amount of time to discuss any amendment if it did not include the provision dealing with general impoundment. That will be difficult for us because the distinguished Senator from North Carolina (Mr. ERVIN) is not here today and he has done all this work on it, and the distinguished Senator from Maine (Mr. MUSKIE) and others on the Government Operations Committee are very close to marking it the Ervin bill. In addition, it is very likely that the Proxmire amendment, or any spending ceiling, would be considered as a revenue measure, and maybe we are tacking it onto the wrong measure. If I am not misinformed, very shortly the debt ceiling will be coming out of the Finance

Committee of the Senate. This is a revenue measure originated in the House which would be a more appropriate vehicle, in my opinion. And we can take time to consider the Ervin impoundment provisions, because the debt ceiling is even better than the gold devaluation—the President has to sign that one—

Mr. LONG. That is the bill on which the provision was put last time and no one argued about it. That bill is not subject to a constitutional objection if it goes on the debt limit bill, but it is if you put it on this one.

Mr. MONDALE. For that reason I am hoping the leadership will not make the motion.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield me 30 seconds?

Mr. PROXMIRE. I yield.

Mr. ROBERT C. BYRD. I think my question has been answered. I will not, of course, pursue the matter any further today. I would simply want to say that there will be no more yea-and-nay votes today.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. TOWER. I think that under the circumstances, since we cannot get a time limitation, what the Senator from Louisiana says is absolutely correct: They will push our bill aside and bring up their own bill, which will be a clean bill, and we will never get it out of conference.

So this is really an exercise in debate, and probably is great for the edification of the American people, but it is not going to result in this getting passed on this bill, because the House is not going to lie down for it. I think the chairman knows that. Obviously, the Senator from Louisiana knows it.

If we cannot get an agreement on a time limitation, what I probably will do is move to table the amendment and get a test on it that way.

Mr. ROBERT C. BYRD. I assume the Senator will not make that motion today.

Mr. TOWER. I am withholding it for the moment.

Mr. ROBERT C. BYRD. Then, I would be safe in saying that there will be no more yea-and-nay votes today.

Mr. TOWER. Unless the yea-and-nay votes were asked on a tabling motion.

Mr. ROBERT C. BYRD. Even in that event, I think the leadership would want to move to adjourn and have that vote tomorrow, so that all Senators would be on notice. It would be a pretty important vote, and they would not want to miss it.

ORDER FOR RECOGNITION OF SENATORS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on tomorrow, after the two leaders have been recognized under the standing order, the following Senators be recognized, each for not to exceed 15 minutes, and in the order stated: Mr. JACKSON, Mr. MATHIAS, Mr. HATFIELD, Mr. BEALL, Mr. ALLEN, Mr. CHILES, Mr. NUNN, Mr. GRIFFIN, Mr. HRUSKA, Mr. COOK, Mr. LONG, and Mr. ROBERT C. BYRD.

THE PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT OF THE PAR VALUE MODIFICATION ACT

The Senate continued with the consideration of the bill (S. 929) to amend the Par Value Modification Act.

Mr. PROXMIRE. Mr. President, I can complete my remarks in 3 minutes.

1974 SPENDING CUTS TOTAL ABOUT \$3 BILLION

I have calculated that for \$3 billion or less, we could put back into the spending budget virtually every major program the President has cut this year—the funds for OEO, REA, REAP, NIH, housing, manpower training programs, the Veteran's compensation and pension cut, and many other cuts.

Mr. President, I ask unanimous consent that a table which sets forth the various programs that could be restored and the amounts be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

MAJOR OUTLAY CUTS IN THE FISCAL YEAR 1974 BUDGET

	Amount
Program:	
OEO	\$425, 593, 000
Agriculture:	
REAP	172, 500, 000
REA	216, 166, 000
Housing—Domestic farm labor	3, 425, 000
Disaster loans	20, 000, 000
Special milk	56, 025, 000
	468, 116, 000
HEW:	
Health services planning and development	99, 900, 000
Preventive health services	10, 730, 000
Library services	33, 987, 000
Civil rights education	11, 827, 000
NIH	28, 268, 000
Student loans	150, 000, 000
Health manpower	100, 000, 000
	434, 712, 000
HUD:	
Low rent public housing	10, 000, 000
Housing for elderly and handicapped	10, 043, 000
Counseling services	3, 250, 000
Grants for basic water and sewer facilities	7, 295, 000
Rehabilitation loan fund (Brooke amendment)	38, 965, 000
Others	155, 000, 000
	69, 553, 000
Labor:	
Manpower revenue Sharing (Includes Neighborhood Youth Corps)	474, 000, 000
Emergency employment Assistance	520, 000, 000
	994, 000, 000
EPA:	
Resource recovery	75, 000, 000
New technology for air pollution	53, 000, 000
	128, 000, 000
Veterans' Administration: Restore Arms Control and Disarmament Agency	2, 200, 000
	2, 682, 174, 000

¹ The Brooke amendment was not funded. So this amount does not represent a cut from fiscal year 1973 but an estimate of what should be in the budget but is not in the budget.

Mr. PROXMIRE. Mr. President, in addition, I ask unanimous consent that a

table showing the difference between outlays and budget authority for fiscal years 1973 and 1974 for certain housing and urban development programs be printed in the RECORD at this point.

[In millions]

Program	Fiscal year—		Change
	1973	1974	
Counseling services:			
Outlays	\$1.0	\$1.0	-----
Budget authority	0	0	-----
Model cities:			
Outlays	583.0	600.0	\$17.0
Budget authority	500.0	0	-500.0
Neighborhood facility grants:			
Outlays	26.0	35.0	9.0
Budget authority	40.0	0	-40.0
Open space land programs:			
Outlays	57.0	70.0	13.0
Budget authority	100.0	0	-100.0
Water sewer grants:			
Outlays	130.0	122.7	-7.3
Budget authority	0	0	0
Urban renewal:			
Outlays	950.0	1,050.0	100.0
Budget authority	1,450.0	137.5	-1,312.5
Rent supplement:			
Outlays	117.0	157.0	40.0
Budget authority	48.0	0	-48.0
Sec. 235:			
Outlays	320.0	387.0	67.0
Budget authority	170.0	0	-170.0
Sec. 236:			
Outlays	105.0	188.0	83.0
Budget authority	175.0	0	-175.0
Low-rent public housing:			
Outlays	1,110.0	1,250.0	140.0
Contract authority	473.4	350.0	-123.4
College housing:			
Outlays	11.0	18.0	7.0
Budget authority	5.0	0	-5.0

¹ Contract authority for public housing included \$245,000,000 for operating subsidies in fiscal year 1973. In 1974, all the authority is for operating subsidies. In other words, no new starts.

HUD:	Fiscal year—		Change (billions)
	1973	1974	
Outlays	\$3,364,451	\$4,767,996	(¹)
Budget authority	5,048,000	3,712,864	(²)

¹ Up \$1,400,000,000.

² Down \$1,335,000,000.

Mr. PROXMIRE. That is the arithmetic.

We have heard outcries about the President freezing funds for water construction grants—the \$6.9 billion frozen funds. But do Senators know that the outlays or spending for that program go up about \$1 billion in 1974, from \$727,000,000 to \$1.6 billion? The freeze or the cuts affect future contracts and do not affect spending in the 1974 fiscal year budget at all.

New urban renewal funds are virtually frozen in fiscal year 1974. But urban renewal spending goes up from \$1 billion in fiscal year 1973 to \$1,050 million in fiscal year 1974. Mass transit in the HUD budget goes up by \$100 million.

An example of just the opposite effect may also help make this problem clear. Last year and this year—fiscal year 1973 and 1974—we will appropriate, if the administration gets its way, almost \$1 billion for the new aircraft carrier CVN-70. But actual spending for CVN-70 in these 2 fiscal years, so far as we can determine, will be about \$34 million.

Mr. HATHAWAY. Mr. President, will the Senator yield for a question?

Mr. PROXMIRE. I yield.

Mr. HATHAWAY. During the colloquy between the Senator from Wisconsin and the Senator from Minnesota, the Senator from Wisconsin mentioned that the amendment that has been accepted by the Senator from Wisconsin, which was offered by the Senator from Texas (Mr. BENTSEN), was all we could hope to get, even though it was imperfect. I wonder whether the Senator would clarify that statement, because the Senator from Minnesota is going to offer an amendment—and perhaps there will be one by the Senator from Oklahoma, joined by the Senator from Ohio (Mr. TAFT)—that would cut across this impoundment question and cover all appropriations and have a mechanism whereby the cuts would be made by the President on a proportional basis; and if he wanted to go over the proportional basis, he would have to submit it to Congress for ratification.

My question is this: Why can we not have amendments such as that, rather than the one the Senator from Wisconsin has accepted?

Mr. PROXMIRE. I want to take a careful look at the amendment offered by the Senator from Minnesota, and I have not had a chance to do that. I have not had a chance to examine the amendment by the Senator from Missouri. I may have a different view of those amendments tomorrow.

I did have a chance to examine the amendment offered by the Senator from Texas, and it seems to me that it does accomplish a great deal we would like. It does not leave the impoundment situation as wide open as it was. If the President makes reductions, he must make them across the board. It confines him to a 10-percent cut in any program, and I think it is a constructive advance.

I am concerned about taking this complex issue and going further than that without hearings, without much more debate than we have had here. I think the important thing to do in the next day or so is to establish a ceiling on spending, so that it is clear to the country and to the administration that the Democratic Congress means business with respect to holding down spending; also, for the guidance of the appropriations subcommittees and others, so that we will be in a better position to act, recognizing what kind of constraints we will be under.

Mr. HATHAWAY. I agree wholeheartedly with the Senator from Wisconsin that we should have a ceiling, although I think the ceiling should be higher than the one that has been recommended. But I also think we ought to have imposed upon the President the obligation to make cuts across the board, on a proportional basis; and if he wanted to go further than that, he would have to get congressional consent. By leaving it open to him to take one of the two avenues—either making proportional cuts or simply making impoundments—does not seem to me to be an exercise of good judgment on our part.

Mr. PROXMIRE. I share the view of the Senator. In fact, I will be happy to support the Mahon principle, as I understand it, which would give Congress

the right, by majority vote, to override any Presidential impoundment. I think that is good. That is what I think the Senator has in mind.

Mr. HATHAWAY. That might be a good approach. But I think the approach of the Senator from Minnesota is even better, because it takes care of that in one fell swoop. If the President wanted to make such an impoundment or a cut, other than a proportional cut, he would have to come to us for permission.

Mr. PROXMIRE. It is possible that overnight we can work this out with the Senator from Texas (Mr. BENTSEN), the Senator from Minnesota (Mr. MONDALE), and the Senator from Missouri (Mr. EAGLETON), who also has an excellent proposal which I think we have not had a chance to consider at all.

Mr. HATHAWAY. I thank the Senator from Wisconsin.

Mr. MONDALE. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. MONDALE. What I am worried about is that the whole issue about the President's alleged powers of unlimited impoundment—powers which he does not have, but which he claims to have, and which he is operating on—remains untouched by these amendments. Several things follow from that.

First, I think we will find that the President unfairly will blame Congress for the cuts he makes under his general impoundment. We have seen how they do that. When the health professionals and the educators and the poverty workers and the environmentalists and the housing people write and say, "How come there are no resources left?" the letter that will come back will very subtly suggest that it is Congress that holds the dagger.

Second, I believe that if we give the President the spending ceiling, we have given him all he wants. Then, when we try to get the impoundment powers later on—and I am sure we are going to make an attempt—he will be in an excellent strategic position to veto and not let us have those impoundment powers. Thus, we will have to pass it with a two-thirds vote over his veto, and I am not sure we can get it.

So I think the issue of the spending ceiling and general impoundment should be handled together.

The final point is that I think it should be pointed out that the chairman of the Appropriations Committee of the House, Mr. MAHON, if I understand correctly, opposes exactly what we are doing today, for the reasons I have given. He thinks we should establish the impoundment issue first and then go back and deal with spending, because if we do it the way we are proposing, we will be in a tactical position that is impossible.

The final point I want to make is that I do not like the House proposal for congressional veto of Presidential impoundments because I do not think we can win a single one. It puts the burden on the Congress rather than on the President, and anybody who has inertia on his side usually wins and inertia would be on the side of the President. Mr. President, you would have 60 days to overcome a Presidential veto. After the second

or, third time, because of necessity, we would have to relent to wholesale impoundments.

The Ervin proposal solves this problem. The distinguished Senator from North Carolina (Mr. ERVIN) is not with us today because of a family tragedy. He proposes that the burden be with the President to affirmatively procure congressional approval. That is the only way that makes sense.

Mr. PROXMIRE. Mr. President, what the Senator says makes sense to me, and I would be happy to support it. I have the same problem with that other Senators have. It might go a little too far. We have not had sufficient hearings to refine the impoundment idea that much. But let me consider it overnight, and I may be happy to support that. I think the Senator from Missouri has a presentation, and perhaps we can arrive at something that we can all support.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. PROXMIRE. I had promised to yield to the Senator from Missouri.

Mr. EAGLETON. Mr. President, will the Senator yield so that I may offer my substitute for his amendment?

Mr. PROXMIRE. I would like to complete my statement first.

Mr. JAVITS. Mr. President, will the Senator yield briefly?

Mr. PROXMIRE. I yield.

Mr. JAVITS. I did not hear all of the remarks of the Senator from Minnesota (Mr. MONDALE), but he discussed his remarks with me in advance. I want to express my interest in the remarks the Senator made, and I thank the Senator from Wisconsin for yielding.

Mr. PROXMIRE. Mr. President, I will not yield further until I have finished, which will not be more than 5 or 6 minutes.

SPENDING AND APPROPRIATIONS ARE TWO DIFFERENT THINGS

Mr. President, like the flowers that bloom in the spring what we appropriate has almost nothing to do with spending. The spending for this year, unless we limit it by a ceiling, is decided almost entirely by the President.

We can limit it and effect it in only one major way. And that way is to establish a ceiling on it. And to my colleagues who argue that we must not establish a ceiling for fear that good programs will suffer, I say to them that if they are willing to cut the military budget back to last year's level and to take a \$1 billion from the \$10 billion foreign aid program, and to take a billion or two elsewhere—all of which Congress has done every year, year in and year out over the last 25 years to every President's budget—we could fund all the programs the President has cut for the next fiscal year and still save \$3 to \$4 billion and establish a ceiling at \$265 billion or a level which is below the President's budget.

If a majority of Congress wants that to happen, my amendment is one way to make it possible while remaining fiscally responsible.

For all these reasons, Mr. President, I believe we need the \$265 billion ceiling now.

Now is the time. This is the bill. Let us act before it is too late.

The claim is made that the Congress should not interfere with the President's budget decisions and ceiling because the executive has studied these matters thoroughly. The argument is made that the Office of Management and Budget and the agencies have thoroughly reviewed Government programs to determine which ones do not work or are in some sense wasteful.

The administration, of course, does all that it can to advance this idea. In yesterday's New York Times, Mr. Casper Weinberger, in the process of castigating the Congress as solely to blame for the spending problem, praised the President for his careful analysis of Government programs. He states:

President Nixon's second step was to order the most exhaustive evaluation of Federal programs ever undertaken. Those in the Office of Management and Budget who conducted the evaluation used only one criterion: Does the program work?

Of the more than 1,000 Federal grants programs reviewed, 115 were found to be riddled with waste and inefficiency. There is no money for such programs in President Nixon's 1974 budget.

In an effort to determine just how careful an evaluation the administration had made of Government programs, I wrote to Mr. Roy Ash on February 6 and asked him to present more information on the fiscal 1974 program reductions when he appeared before the Joint Economic Committee to testify on the President's budget. I asked him to explain the rationale behind each program cut. He did not have this information when he appeared, but subsequently did respond to a request from myself and Senator HUMPHREY to provide the evaluation studies to support the President's decisions.

It is difficult to describe the material Mr. Ash has sent to support the President's budget cuts. They are not studies or evaluations of programs at all. They are primarily undocumented assertions, descriptions of the programs, explanations of the actions taken, nonsequiturs, and phony cuts. But they do not indicate that the Executive has carefully studied these matters. The Congress has no reason to have more confidence in the President's budget decisions than their own.

Let me give you a few examples of the nonsense the President has sent to Congress as justifications for the budget cuts.

The President cut \$75 million in what he calls low priority medical services to adults, and OMB tells us the justification is: "Lack of dental care is seldom life-threatening and is less critical for adults than for children." No further analysis or explanation is given.

The President has terminated the Emergency Employment Assistance program and, as justification, OMB asserts that unemployment is no longer serious enough to merit this program, that remaining unemployed would not be served by this program and that State and local governments do not need this program. Similar assertions are made for housing, health, OEO, and so on. In no case is there an analysis to support the assertion.

In one incredible case we have an assertion based on an assertion. The urban renewal program is condemned with quotes from speeches given by former HUD Secretary Romney. According to Romney the program is ineffective because:

These categorical programs are no longer adequately responsive to the crisis of our central cities. We have poured billions into these programs with little result. To continue would mean throwing more billions of the taxpayers' money away. Larger infusions of money have not served to solve the problems. Something else is needed.

Maybe something else is needed, but let us base the decisions on some careful studies.

In three of the four health programs that are cut, part of the justification is that funds can be obtained from special project grants. Nowhere does this document tell you that special project grants have been cut 36 percent since fiscal year 1972.

But the most incredible area is defense. In this area the budget is not cut but increased—the savings are fabricated. For example, a fiscal 1974 saving of \$1.2 billion is claimed with two sentences of "analysis," one of which says:

Reduced proposed inactivity rates for real property maintenance, material depot maintenance, operating force support, and supply operations.

The key word of course is proposed, which means a saving is claimed because the Secretary of Defense cut the military's wish list.

There are many other examples of the shoddy evaluations done by OMB. The Joint Economic Committee is making a more detailed evaluation for the Congress. But it is already clear that the administration has not made a careful evaluation of Government programs in establishing its ceiling.

Mr. President, I ask unanimous consent to have printed in the RECORD a letter that I wrote to Roy Ash on February 6, 1973.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

FEBRUARY 6, 1973.

Hon. ROY ASH,
Director, Office of Management and Budget,
Washington, D.C.

DEAR MR. ASH: To assist the Committee in understanding the spending choices the Administration has made for fiscal 1973 and 1974, additional information on the cuts listed on pages 49-57 of the Budget would be valuable. In conjunction with your testimony before the Committee on February 8th, I would therefore ask you to bring a written explanation of these items that is more detailed than that available in the budget. In particular, we need brief statements of: (a) why each cut was made, and (b) the specific nature of each cut.

If you have any questions about this request, Mr. Jerry Jasinski of the Committee staff will be happy to assist you.

Sincerely,

WILLIAM PROXMIRE.

ECONOMIC IMPACT OF FISCAL YEAR 1974
BUDGET

Mr. PROXMIRE. Mr. President, I wish to point out that the 1974 budget will impact the economy during the last half of 1973 as well as the first half of 1974.

The impact of Federal spending during calendar year 1973 will be quite inflationary.

On a national income accounts basis, Federal expenditures during calendar year 1973 will increase by 9.3 percent over 1972.

The deficit, on a national income accounts basis, will increase from \$18.5 billion in 1972 to \$22.5 billion in 1973, an increase of 14.5 percent.

On a full employment budget basis, Federal expenditures increase by 10.1 percent in calendar year 1973.

On a full employment budget basis, the Federal deficit increases from \$6 billion to \$7.1 billion, an increase of 18.3 percent.

During the last 6 months of calendar year 1973—first 6 months of fiscal year 1974—the full employment budget deficit will be \$3.7 billion.

The effect of the Proxmire amendment is to cut \$3.7 billion from the fiscal year 1974 budget and thus make it possible to bring Federal expenditures into balance during the last half of 1973, as measured by the full employment budget.

AMENDMENT NO. 68

Mr. EAGLETON. Mr. President, I have an amendment to S. 929 and I offer it as a substitute for the Proxmire-Bentsen amendment.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

The amendment is as follows:

In lieu of the language proposed to be inserted by the amendment of Mr. PROXMIRE and others (No. 20 as modified) insert the following:

Sec. . . (a) Expenditures and net lending during the fiscal year ending June 30, 1974, under the budget of the United States Government shall not exceed \$268,700,000,000.

(b) Whenever the President determines that appropriations or other obligatory authority hereafter made available would require or permit expenditures and net lending during fiscal year 1974 to exceed the limit prescribed by subsection (a), he shall propose, by special message transmitted to the Congress, reservations from expenditure and net lending, from appropriations or other obligatory authority heretofore or hereafter made available, of such amounts as are necessary to keep expenditures and net lending during fiscal year 1974 within such limit. A proposal under this subsection shall be transmitted to both Houses on the same day and shall be delivered to each House while it is in session.

(c) The President is authorized, after the close of the thirty-day consideration period (as defined in subsection (e)) applicable to a proposal transmitted under subsection (b), to reserve from expenditure and net lending the amounts set forth in such proposal, unless, before the close of such thirty-day period, the Congress has passed legislation rescinding appropriations or other obligatory authority available for expenditure or net lending during the fiscal year 1974 in an aggregate amount not less than the aggregate amount of reservations set forth in such proposal. If, before the close of such thirty-day period, the Congress has passed such legislation, but it does not become law, then the figure set forth in subsection (a) is hereby increased by an amount equal to the aggregate amount of reservations set forth in such proposal.

(d) During the thirty-day consideration

period applicable to any proposal transmitted by the President under subsection (b), any proposed legislation to rescind appropriations or other obligatory authority shall be highly privileged in both Houses of the Congress and rules similar to the provisions of sections 911, 912, and 913 of title 5, United States Code, shall apply to such proposed legislation, except that amendments to such proposed legislation shall be in order. This subsection is enacted as an exercise of the rule-making power of the Senate and House of Representatives, respectively.

(e) The thirty-day consideration period applicable to any proposal submitted under subsection (b) is the first period of thirty calendar days of continuous session of the Congress after the date on which the proposal is transmitted to the Congress. For purposes of the preceding sentence, (1) continuity of session is broken only by an adjournment of the Congress sine die, and (2) the days on which either House is not in session because of an adjournment of more than three days to a day certain shall be excluded in the computation of the thirty-day period.

(f) In the administration of any program as to which—

(1) the amount of expenditures is limited pursuant to subsection (c), and

(2) the allocation, grant, apportionment, or other distribution of funds among recipients is required to be determined by application of a formula involving the amount appropriated or otherwise made available for distribution,

the amount available for expenditure (as determined by the President) shall be substituted for the amount appropriated or otherwise made available in the application of the formula.

Mr. TOWER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. TOWER. Is the amendment of the Senator from Missouri in order?

The PRESIDING OFFICER. It is a substitute for the Proxmire amendment.

Mr. TOWER. Mr. President, a further parliamentary inquiry. The Proxmire amendment has been modified to accept the Bentsen amendment. Did he accept it as a modification?

The PRESIDING OFFICER. The Senator from Wisconsin modified it in his own right.

Mr. TOWER. I thank the Chair.

Mr. EAGLETON. Mr. President, may I address a question to the acting majority leader?

Mr. ROBERT C. BYRD. Yes.

Mr. EAGLETON. I wonder if this would perhaps be a satisfactory time to cease deliberations on S. 929 so that between now and tomorrow the Senators from Wisconsin, Minnesota, Texas, myself, and others who are interested in the question can put our heads together and see if there is a common ground to meet the objections raised by the Senator from Alabama, the Senator from Louisiana, and other Senators?

Mr. ROBERT C. BYRD. Yes; I would answer in the affirmative the question of the Senator from Missouri. I think it would be a good idea to cease here for the day.

Mr. TOWER. Mr. President, I ask unanimous consent that when the Senate resumes consideration of S. 929 I be recognized.

The PRESIDING OFFICER. Tomorrow?

Mr. TOWER. Yes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Mr. President, I did not hear the unanimous-consent request.

The PRESIDING OFFICER. That when the Senate proceeds to the consideration of the bill tomorrow, the Senator from Texas be recognized.

Mr. PROXMIRE. Mr. President, will the Senator from Texas yield for a question on that?

Mr. TOWER. Yes.

Mr. PROXMIRE. Does the Senator from Texas intend to move to table the Eagleton amendment or the Proxmire-Eagleton amendment?

Mr. TOWER. In due course, but not immediately, because obviously some more debate should take place.

Mr. PROXMIRE. Mr. President, I have no objection.

(The remarks Senator BARTLETT made at this point on the submission of Senate Concurrent Resolution 19, relating to the establishment of an appropriation ceiling, are printed earlier in the RECORD under Submission of a Concurrent Resolution.)

SUBCOMMITTEE TO INVESTIGATE JUVENILE DELINQUENCY MEETING DURING SENATE SESSION TOMORROW

Mr. BAYH. Mr. President, I request unanimous consent that the Subcommittee To Investigate Juvenile Delinquency of the Committee on the Judiciary may be authorized to meet to conduct hearings on the nature and extent of methamphetamine abuse and diversion in the United States during the session of the Senate tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS TOMORROW AND FOR THE RESUMPTION OF CONSIDERATION OF S. 929

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at the conclusion of the orders for the recognition of Senators on tomorrow, there be a period for the transaction of routine morning business for not to exceed 15 minutes, with statements limited therein to 3 minutes each, at the conclusion of which the Senate resume its consideration of the unfinished business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that if the orders for the recognition of Senators have not expired by the close of the morning hour, the unfinished business not be laid before the Senate until such time as the orders for the recognition of Senators have been consummated and there has been a period for the transaction of routine morning business in conformity with the previous order.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the program for tomorrow is as follows:

The Senate will convene at 10 a.m. After the two leaders have been recognized under the standing order, the following Senators will be recognized, each for not to exceed 15 minutes, and in the order stated: Mr. JACKSON, Mr. MATHIAS, Mr. HATFIELD, Mr. BEALL, Mr. ALLEN, Mr. CHILES, Mr. NUNN, Mr. GRIF-FIN, Mr. HRUSKA, Mr. COOK, Mr. LONG, and Mr. ROBERT C. BYRD, after which there will be a period for the transaction of routine morning business for not to exceed 15 minutes, with statements therein limited to 3 minutes each.

At the conclusion of routine morning business, the Senate will resume its consideration of the unfinished business, S. 929, the dollar revaluation bill. There will be yea-and-nay votes thereon.

The distinguished ranking Republican member of the committee (Mr. TOWER) has requested and received consent to be recognized at the time the unfinished business is laid before the Senate tomorrow, and he has already indicated to the Senate that he will, at some point during the day, move to table the amendment by Mr. PROXMIRE.

So there will be yea-and-nay votes tomorrow. Hopefully, the Senate will complete action on the bill tomorrow. We cannot be assured of that in view of the fact that there is no time agreement on the bill or on amendments thereto.

If action is completed on the bill at a

reasonably early hour on tomorrow, the Senate will then take up the various crime bills. If the Senate does not complete its action on the unfinished business tomorrow, the various crime bills and other measures on the calendar would go over until Friday.

ADJOURNMENT UNTIL 10 A.M.

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in adjournment until 10 o'clock a.m. tomorrow.

The motion was agreed to; and at 6:39 p.m. the Senate adjourned until tomorrow, Thursday, March 29, 1973, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate March 28, 1973:

DEPARTMENT OF JUSTICE

Allen L. Donielson, of Iowa, to be U.S. attorney for the Southern District of Iowa for the term of 4 years; reappointment.

V. DeVoe Heaton, of Nevada, to be U.S. attorney for the District of Nevada for the term of 4 years; vice Bart M. Schouweiler, resigned.

IN THE AIR FORCE

The following officer under the provisions of title 10, United States Code, section 8066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 8066, in grade as follows:

To be lieutenant general

Maj. Gen. Carlos M. Talbott, ~~xxx-xx-xxxx~~ FR (major general, Regular Air Force) U.S. Air Force.

Col. John P. Flynn, ~~xxx-xx-xxxx~~ FR, (colonel, Regular Air Force) U.S. Air Force, for appointment to the temporary grade of brigadier general in the U.S. Air Force to be retroactive to the effective date of May 1, 1971.

Col. David W. Winn, ~~xxx-xx-xxxx~~ FR, (colonel, Regular Air Force) U.S. Air Force, for appointment to the temporary grade of brigadier general in the U.S. Air Force.

IN THE NAVY

The following named captains of the line of the Navy for temporary promotion to the grade of rear admiral, subject to qualification therefor as provided by law:

Lando W. Zech, Jr.	John B. Berude
Reuben G. Rogerson	Thomas B. Russell, Jr.
Cyril T. Faulders, Jr.	Elmer T. Westfall
Robert P. McKenzie	Paul C. Boyd
Henry P. Glindeman	Charles S. Williams,
Jr.	Jr.
James R. Sanderson	Edward P. Travers
Gordon R. Nagler	William H. Ellis
Robert F. Schoultz	Ralph H. Carnahan
Robert H. Blount	James B. Stockdale
Harold G. Rich	William J. Crowe, Jr.
George P. March	Robert S. Smith
Jeremiah A. Denton,	Richard A. Paddock
Jr.	Roy F. Hoffmann
Donald P. Harvey	William H. Harris
John D. Johnson, Jr.	Robert H. Gormley
Robert K. Geiger	James H. Foxgrover
Kenneth G. Haynes	Ernest E. Tissot, Jr.
Kenneth M. Carr	Gerald E. Synhorst
Paul A. Peck	Carl T. Hanson
Ralph M. Gormley	William J. Cowhill
John T. Coughlin	Albert L. Kellin
Carlisle A. Trost	

HOUSE OF REPRESENTATIVES—Wednesday, March 28, 1973

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Acquaint now thyself with God and be at peace; thereby good shall come to thee.—Job 22: 21.

Our Heavenly Father, in this quiet moment of meditation and prayer help us to find in Thee our true peace. Let us not be led astray by the foolish customs of the world, nor kept from doing our duty at the call of selfish spirits, nor drawn into wrong ways by the example of unworthy men.

In every experience of daily life may we know that Thou art with us, in every temptation may we find strength in Thee, in every trouble feel the support of Thy spirit, and in every anxiety to lay hold of Thy peace. May Thy grace enlighten us in darkness, strengthen us in weakness, and renew in us the spirit which makes life worth living.

Bless our country, our leaders, and our people. Whatever light may shine, whatever darkness may fall, keep us in the fellowship of those who trust and obey Thee.

In the spirit of Him who walked in Thy way we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's pro-

ceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Marks, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed without amendment bills and a joint resolution of the House of the following titles:

H.R. 5445. An act to extend the Clean Air Act, as amended, for 1 year;

H.R. 5546. An act to extend the Solid Waste Disposal Act, as amended, for 1 year; and

H.J. Res. 5. Joint resolution requesting the President to issue a proclamation designating the week of April 23, 1973, as "Nicolaus Copernicus Week" marking the quincentennial of his birth.

The message also announced that the Senate had passed with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 3577. An act to provide an extension

of the interest equalization tax, and for other purposes.

The message also announced that the Senate insists upon its amendments to the bill (H.R. 3577) entitled "An act to provide an extension of the interest equalization tax, and for other purposes," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. LONG, Mr. TALMADGE, Mr. HARTKE, Mr. BENNETT, and Mr. CURTIS to be the conferees on the part of the Senate.

The message also announced that the Vice President, pursuant to Public Law 86-42, appointed Mr. HUMPHREY to the Canada-United States Interparliamentary Meeting to be held in Washington, D.C., April 4 to 8, 1973.

The message also announced that the Vice President, pursuant to Public Law 83-420, appointed Mr. CLARK as a member on the part of the Senate, of the board of directors of Gallaudet College.

AMERICAN POW'S AND FIGHTING MEN

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. MONTGOMERY. Mr. Speaker, today is a great and historical date for our country in that the last of the officially listed American prisoners of war will be

released in Hanoi and the last American fighting men will be withdrawn from South Vietnam effective tonight Washington time.

This country has certainly done its part to insure peace in that faraway land and give the South Vietnamese people the right of self-determination. It should be pointed out that we are not claiming 1 inch of land in Southeast Asia, and yet we have paid dearly to insure freely elected governments. I only hope other free nations of the world realize the sacrifices made by the United States to help these small countries.

Mr. Speaker, I am preparing a House resolution to honor those who served in Vietnam by having a recess meeting.

The House would, in the near future, recognize the different groups who served and sacrificed in the Vietnam war.

I hope my colleagues will join me in this type of resolution.

SPEAKER'S RESPONSE TO PRESIDENT'S VETO OF THE VOCATIONAL REHABILITATION ACT OF 1973

(Mr. WRIGHT asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WRIGHT. Mr. Speaker, on yesterday the President vetoed the vocational rehabilitation bill, which had been passed by this House by a vote of 318 to 57 and which had been passed in the other body by a vote of 86 to 2.

This bill reduces the total authorizations some \$900 million for the 3-year period below those contained in the bill vetoed by the President last year.

Most of us obviously felt that it was a humane response to the needs of the handicapped people of this country.

Mr. Speaker, I offer for insertion at this point in the RECORD the well-reasoned statement of Speaker CARL ALBERT on the subject of this veto:

SPEAKER'S RESPONSE TO PRESIDENT'S VETO OF THE VOCATIONAL REHABILITATION ACT OF 1973

The President's veto of the Vocational Rehabilitation Act of 1973, though expected, was very disappointing. It is hard for me to understand why the President of the United States would twice veto a program that passed both Houses of Congress with overwhelming bipartisan support and has so successfully brought opportunity and hope to thousands of physically handicapped Americans.

The President's reasons for turning his back on these citizens are no better than the ones he gave last year when he vetoed a similar bill. The merits of this program cannot be disguised within a smokescreen of fiscal responsibility. Congress cut the bill the President vetoed last year by nearly a billion dollars, reducing it to an amount that is less than what was appropriated for the program in either Fiscal Year 1971 or 1972.

The President argues that the bill duplicates services already available under Medicare or Medicaid. This is not true. Medical services vary from state to state and usually do not include the specific help which the disabled person needs. In addition, Medicaid does not offer a full range of rehabilitation services, such as counseling and training, which are vital to moving people back into the work force.

The President also attacked new programs

added to the Vocational Rehabilitation Act on grounds that they would divert the program from its original emphasis. This is not so. New programs added to the bill amount to less than 5% of the total authorization. These programs which aid patients suffering from kidney disease, spinal cord injuries and other severe handicaps, offer vocational services not offered by any other government program.

The President says he is defending the public interest by vetoing this bill. How is denying the physically handicapped a chance to help themselves defending the public interest? Handicapped Americans should not have to suffer the affects of such callous and neglectful treatment.

Congress feels a strong responsibility for helping the handicapped improve their quality of life. Every effort will be made to override the President's veto of this legislation.

PRESIDENT'S VETO OF VOCATIONAL REHABILITATION BILL

(Mr. BRADEMAS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BRADEMAS, Mr. Speaker, following the observations of my distinguished colleague from Texas, Mr. WRIGHT, I want to express my own viewpoints. Mr. Speaker, President Nixon's veto yesterday of a vocational rehabilitation bill slams the door in the face of disabled Americans.

Although rehabilitation of the handicapped has never been a partisan matter in Congress, the President has now twice vetoed this bill.

The second veto comes after both Democrats and Republicans in the House and Senate gave the program overwhelming support. To meet administration objections after the first veto, Congress this year cut spending for the program by over \$900 million—a 25-percent reduction from the bill Mr. Nixon disapproved last year.

I would here add that the bill vetoed last year at a higher level of authorization was passed unanimously in both the House and the Senate.

Mr. Speaker, I want to reiterate that this is not a partisan matter. This bill was passed in the Committee on Education and Labor with the help of both Democrats and Republicans and reported by a vote of 33 to 1, and it met with the overwhelming support of Members on both sides of the aisle in this body.

This bill, which I sponsored in the House, continues a 50-year effort to help handicapped persons become employed or self-sufficient. And this year we gave new priority to the severely disabled, including the elderly, deaf-blind, persons with spinal cord injuries, and those with kidney diseases.

President Nixon may assign a low priority to helping our handicapped fellow citizens, but we in Congress do not, and I predict Democrats and Republicans will join to override the veto.

PROTECT HIGH SCHOOL AND COLLEGE FOOTBALL

(Mr. DORN asked and was given permission to address the House for 1 min-

ute, to revise and extend his remarks, and include extraneous matter.)

Mr. DORN. Mr. Speaker, high school and college athletics must not be destroyed by the broadcasting of professional sports. We have again introduced our bill to prohibit the broadcast of pro football on Friday nights and Saturday when it conflicts with America's greatest fall pastime, high school and college football.

These Friday night broadcasts would destroy the vitality of both amateur and pro football, because the professionals are dependent on amateur football as a source of all their talent. Attendance at high school and college games very definitely falls off when pro football is broadcast simultaneously, and this is causing a great deal of concern among amateur athletes, students, school administrators, and the general public.

High school athletes do not compete for pay. Their reward is the enthusiastic support of classmates, parents, and friends in the football stadium. High school football is supported and financed by the small admission fee. Should part of this support be enticed away for the television viewing of professional sports, it could destroy the game. The enthusiastic approval of football fans in attendance is necessary to maintain the competitive spirit, the desire to play, and the physical fitness of the high school and college athlete.

Mr. Speaker, the bill we have introduced with several other colleagues would impose a pro football broadcast blackout on Friday nights and Saturdays within 75 miles of any high school or college game. Further, I believe the Congress ought to investigate the effect of the broadcasts of other pro sports on high school and college programs. Professional sports is a financially sound business. We must not allow greed to destroy high school and college athletics.

MAJORITY LEADER THOMAS P. O'NEILL, JR., DENOUNCES THE VETO OF THE VOCATIONAL REHABILITATION ACT

(Mr. O'NEILL asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and include extraneous matter.)

Mr. O'NEILL. Mr. Speaker, every Member with compassion for those less fortunate than himself must deplore the cash-register mentality that lead to the veto of the Vocational Rehabilitation Act yesterday.

The President has labeled the bill "fiscally irresponsible" merely because it does not happen to fit in with his own ideas of budget priorities. This veto is typical of the philosophy of this administration: pick on the poor and weak in favor of the rich and powerful.

This bill is no more fiscally irresponsible than an administration budget that proposes an increase in defense spending at the conclusion of a war. It is no more irresponsible than a tax structure that bears down upon the common man to the benefit of the corporate interests and the rich.

It is a disgrace that this Nation cannot fund programs designed to help the

disabled and severely handicapped to help themselves. I submit that the money is in the budget within the President's suggested spending ceiling. It remains only for the Congress to shift those funds from dubious administration priorities to the more compassionate and constructive purposes of vocational training.

Mr. Speaker, our vote to override Mr. Nixon's veto is more than a repudiation of this single instance of callousness toward the handicapped. It will be a reaffirmation of the principle that this Nation shall continue to have a government that is concerned for its people.

THE RECORD ON VOCATIONAL REHABILITATION UNDER THE NIXON ADMINISTRATION

(Mr. GERALD R. FORD asked and was given permission to address the House for 1 minute, to revise and extend his remarks.)

Mr. GERALD R. FORD. Mr. Speaker, it is perfectly obvious that the distinguished majority leader has not looked at the facts and figures, and is not familiar with the sound and progressive program of vocational rehabilitation under the Nixon administration. The budget for the vocational rehabilitation program under this administration from fiscal year 1969 to fiscal year 1974 shows a tremendous increase of 75 percent and a tremendous increase in the number of people who will be taken off the rolls as tax eaters, and who will become tax producers.

Under the Nixon program on vocational rehabilitation which the President has recommended for the coming fiscal year it is my recollection that 1,225,000 Americans will be taken care of under the various vocational rehabilitation programs, as compared with 781,000 persons in 1969. It is estimated that some 350,000 persons will be rehabilitated as compared with 241,000 at the start of the Nixon administration.

The gentleman from Massachusetts, before making such irresponsible charges as he has made on the floor of the House, should look into the facts. If the gentleman would do so, I believe he would take a different view.

APPOINTMENT OF CONFEREES ON H.R. 3577, EXTENSION OF INTEREST EQUALIZATION TAX

Mr. MILLS of Arkansas. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3577) to provide an extension of the interest equalization tax, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas? The Chair hears none, and appoints the following conferees: Messrs. MILLS of Arkansas, ULLMAN, BURKE of Massachusetts, Mrs. GRIFFITHS of Massachusetts, SCHNEEBELI, COLLIER, and BROYHILL of Virginia.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 3577, EXTENSION OF INTEREST EQUALIZATION TAX

Mr. MILLS of Arkansas. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tonight to file a conference report on the bill (H.R. 3577) to provide an extension of the interest equalization tax, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

CONFERENCE REPORT (H. REPT. NO. 93-95)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3577) to provide an extension of the interest equalization tax, and for other purposes, having met after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1 and 15.

That the House recede from its disagreement to the amendments of the Senate numbered 2 through 14; and agree to the same.

W. D. MILLS,
AL ULLMAN,
JAMES A. BURKE,
Mrs. GRIFFITHS,
H. T. SCHNEEBELI,
HAROLD R. COLLIER,
JOEL T. BROYHILL,

Managers on the Part of the House.

RUSSELL B. LONG,
HERMAN TALMADGE,
VANCE HARTKE,
WALLACE F. BENNETT,
CARL CURTIS,

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3577) to provide an extension of the interest equalization tax, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

Amendment numbered 1: The bill as passed by the House extends the application of the interest equalization tax for a period of fifteen months, through June 30, 1974. The Senate amendment provides instead for a two-year extension, through March 31, 1975. The Senate recedes.

Amendment numbered 2: The bill as passed by the House provides an exemption from the United States estate tax imposed on non-resident alien individuals for debt obligations issued by a domestic corporation or partnership under an election to treat the debt obligation as foreign for purposes of the interest equalization tax. The exemption applies generally with respect to estates of decedents dying on or after January 1, 1973. The Senate amendment postpones the effective date of this provision so that it applies with respect to estates of decedents dying on or after January 1, 1974 in the case of assumptions of debt obligations of foreign financing subsidiaries during calendar year 1973. The House recedes.

Amendments numbered 3 and 4: The bill as passed by the House provides that the interest equalization tax exclusion for stock or debt obligations issued by a less developed country corporation shall not apply to stock

or debt obligations issued by a less developed country shipping corporation after January 29, 1973. The House bill also provides, however, for the continuation of the interest equalization tax exclusion generally where transactions involving ships were in an advanced stage of completion prior to January 30, 1973. Senate amendment numbered 3 is technical. Senate amendment numbered 4 provides for the continuation of the exclusion in certain other types of transactions which were also in an advanced stage of completion prior to January 30, 1973, but which were not covered by the House bill. The House recedes.

Amendment numbered 5: This is a clerical amendment. The House recedes.

Amendments numbered 6 and 7: The bill as passed by the House provides for an exclusion from the interest equalization tax for original or new issues of stock or debt obligations to finance direct investment in the United States subject to the foreign issuer or obligor agreeing to meet certain conditions with respect to that investment for a period of ten years.

The Senate amendment numbered 6 provides that the exclusion shall also apply to (1) stock acquired by conversion of a debt obligation if no additional consideration is paid and if the debt obligation itself qualified for the exclusion, and (2) a debt obligation issued to refund or refinance an original or new issue which qualified for the exclusion.

Senate amendment numbered 7 provides that a foreign issuer or obligor will not be considered to have failed to meet the conditions applicable to this exclusion, in the case of such stock or debt obligations, if he continues to comply with such conditions (with respect to the debt obligation converted, refunded, or refinanced) for the ten-year period beginning on the date of his original or new issue of that debt obligation.

The House recedes with the understanding that the exclusion for original or new issues (under new section 4922(a) of the Internal Revenue Code of 1954) is not to apply to new direct investment for the acquisition and exploitation of natural resources in the United States.

Amendment numbered 8: The first sentence of Senate amendment numbered 8 provides that in the case of a domestic corporation or partnership formed or availed for the principal purpose of acquiring foreign securities, the interest equalization tax is to be imposed at the corporate level, rather than at the shareholder level, where all the foreign investments of the domestic corporation were taxable or were exempt from taxation by reason of the exclusions relating to less developed countries, the Canadian exemption, the exemption for prior American ownership and compliance, or as foreign stock treated as domestic.

The second sentence of this amendment provides that an acquisition which satisfies the requirements of being an export credit transaction is not to be taken into consideration in determining whether a domestic corporation or partnership is formed or availed of for the principal purpose of obtaining funds for a foreign issuer or obligor.

The House recedes.

Amendment numbered 9: Senate amendment numbered 9 provides that the exemption from the interest equalization tax applicable to certain acquisitions of debt obligations arising from the sale or lease of property made in the United States or the performance of services by a United States person shall also apply to acquisitions by any United States person of a foreign debt obligation acquired in connection with the sale or lease of such property or the performance of such services where the acquisition is reasonably necessary to accomplish the sale or lease. The House recedes.

Amendment numbered 10: Senate amendment numbered 10 provides that a qualified lending or financing corporation, or a United States corporation which is engaged in a lending or financing business through offices located outside the United States, may use domestic source funds to lend for qualified export credit transactions or to buy goods made in the United States for leasing or sale outside of the United States. The House recedes.

Amendment numbered 11: Senate amendment numbered 11 clarifies existing law by providing that a participating firm (as defined in section 4918(c) of the Internal Revenue Code of 1954) may issue a valid broker-dealer confirmation indicating that the securities it is selling are exempt from the interest equalization tax if it sells the securities for its own account and pays the tax by the date it would have had to deposit the funds in a separate account if it had been acting for a customer instead of for itself. The amendment applies to acquisitions of foreign securities made after July 14, 1967, the effective date of amendments relating to such firms made by the Interest Equalization Tax Extension Act of 1967. The House recedes.

Amendment numbered 12: Senate amendment numbered 12 provides that interest shall be paid on overpayments of interest equalization tax arising out of sales by underwriters and dealers to foreign persons (under section 4919(a) of the Internal Revenue Code of 1954) where such overpayment is not refunded within 45 days after filing of a claim for refund for an overpayment in a prior quarter. The House recedes.

Amendment numbered 13: Senate amendment numbered 13 provides that a United States corporation which would otherwise be treated as primarily engaged in the foreign lending or finance business is to be allowed to make equity contributions from foreign source funds to foreign lending or finance corporations which are members of the same affiliated group without being considered not "primarily" engaged in a lending or finance business. This amendment also provides that a corporation considered as primarily engaged in a lending or finance business may make loans for periods of up to 60 months.

This amendment also provides that stock of certain foreign corporations treated as domestic issuers for purposes of the interest equalization tax, acquired by United States employees on the exercise of their stock option, is exempt from the tax if certain conditions are met. This amendment also provides that stock acquired by an employee on the exercise of an employee stock option issued to the employee by his employer corporation, or its parent or subsidiary, after November 10, 1964, and prior to January 30, 1973, is exempt from the tax if the tax was paid on any prior acquisition of the stock in those cases where the stock was issued pursuant to the exercise of an employee stock option.

This amendment also provides that a foreign corporation which is treated as a domestic issuer may issue stock as consideration for the acquisition of stock or assets of a foreign corporation if certain conditions are met.

This amendment also provides that (1) a commercial bank which is an affiliated corporation of a qualified lending or financing corporation may make a loan to that qualified lending or financing corporation without having to comply with certain prior notice and tracing requirements, and (2) a qualified lending or financing corporation which is an affiliated corporation of a second qualified lending or financing corporation may make a loan to that second qualified lending or financing corporation from funds obtained from related or unrelated corporations.

This amendment also provides that a qualified lending or financing corporation may make loans to foreign persons out of the proceeds of the payment for its stock or contributions to its capital if these proceeds were derived from the sale to unrelated foreign persons of securities by an at least 10 percent related corporation.

This amendment also provides that the proceeds from the sale of debt obligations by a domestic corporation which has made an election to treat these obligations as foreign for purposes of the interest equalization tax may be loaned to foreign persons by a qualified lending or financing corporation if the proceeds are directly transferred by unrelated foreign lenders to that corporation.

This amendment also provides that a qualified lending or financing corporation may (1) make a 10 percent or more equity investment in another such corporation or in a partnership which would generally satisfy the requirements of being a qualified lending or financing corporation; (2) acquire stock by foreclosure if the stock is disposed of within a certain period; or (3) acquire stock of a foreign corporation in connection with, and incidental to, a financing transaction, subject to certain conditions.

This amendment also provides that a qualifying domestic mutual fund is allowed to distribute stock dividends to its shareholders without the imposition of the interest equalization tax.

The House recedes from its disagreement to the Senate amendment numbered 13.

Amendment numbered 14: Senate amendment numbered 14 requires the Secretary of the Treasury to study the effect on international monetary stability of the Canadian exemption from the interest equalization tax and report back to the Congress not later than September 30, 1973. The House recedes.

Amendment numbered 15: Senate amendment numbered 15 requires the Secretary of the Treasury to submit to the Congress proposals for comprehensive reform of the Internal Revenue Code of 1954 within 120 days after the date of enactment of this Act. The Senate recedes with the understanding that this amendment is unnecessary because the Secretary of the Treasury has accepted an invitation to testify before the Ways and Means Committee beginning on April 30, 1973, with respect to tax reform at which time he is expected to present the administration's comprehensive tax reform proposals.

W. D. MILLS,

CALL OF THE HOUSE

Mr. HAYS. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. O'NEILL. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 59]

Andrews, N.C.	Flowers	Mailliard
Annunzio	Foley	Mann
Armstrong	Ford,	Mathias, Calif.
Aspin	William D.	Morgan
Badillo	Frelinghuysen	Price, Tex.
Barrett	Glaimo	Reid
Biaggi	Goldwater	Rooney, N.Y.
Blatnik	Gray	Roybal
Boland	Harvey	Ruppe
Burke, Calif.	Hébert	Sandman
Carney, Ohio	Henderson	Stark
Chappell	Hollifield	Udall
Clark	Holtzman	Wilson,
Conyers	Kartha	Charles, Tex.
Coughlin	King	Zwach
Diggs	Koch	
Dingell	Kuykendall	

The SPEAKER. On this rollcall 386 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

AID FOR HANOI

(Mr. PIKE asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. PIKE. Mr. Speaker, a lot of us, among them even the President's staunchest supporters, have been thrown into a quandary by his resolute pledge of U.S. aid in reconstructing the war-torn country of our late adversary, North Vietnam. There are even those who would normally be disposed to do this on moral, ethical, and religious grounds but who have sadly concluded that there are domestic programs that have greater need of the money and that "charity should begin at home." The editor of the Port Jefferson Record in my home district out on Long Island has come up with a suggestion that can get us all off the hook and I commend it to your attention as a model of brevity, clarity, and cogency:

AID FOR HANOI

We agree with President Nixon that the U.S. should give financial assistance in the rebuilding of North Vietnam; we disagree over the source of payment. Nixon would dig into the overexpended U.S. treasury for the money. We offer an alternate suggestion: assign Hanoi the still-unpaid World War II debt of the Soviet Union. The gesture will cost us nothing, since the Russians give no sign they will ever honor their obligation. Should the Soviets one day decide to become a government of their word, Hanoi would be better blessed than it had thought possible.

DRUG ENFORCEMENT ADMINISTRATION—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 93-69)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Government Operations and ordered to be printed:

To the Congress of the United States:

Drug abuse is one of the most vicious and corrosive forces attacking the foundations of American society today. It is a major cause of crime and a merciless destroyer of human lives. We must fight

it with all of the resources at our command.

This Administration has declared all-out, global war on the drug menace. As I reported to the Congress earlier this month in my State of the Union message, there is evidence of significant progress on a number of fronts in that war.

Both the rate of new addiction to heroin and the number of narcotic-related deaths showed an encouraging downturn last year. More drug addicts and abusers are in treatment and rehabilitation programs than ever before.

Progress in pinching off the supply of illicit drugs was evident in last year's stepped-up volume of drug seizures worldwide—which more than doubled in 1972 over the 1971 level.

Arrests of traffickers have risen by more than one-third since 1971. Prompt Congressional action on my proposal for mandatory minimum sentences for pushers of hard drugs will help ensure that convictions stemming from such arrests lead to actual imprisonment of the guilty.

Notwithstanding these gains, much more must be done. The resilience of the international drug trade remains grimly impressive—current estimates suggest that we still intercept only a small fraction of all the heroin and cocaine entering this country. Local police still find that more than one of every three suspects arrested for street crimes is a narcotic abuser or addict. And the total number of Americans addicted to narcotics, suffering terribly themselves and inflicting their suffering on countless others, still stands in the hundreds of thousands.

A UNIFIED COMMAND FOR DRUG ENFORCEMENT

Seeking ways to intensify our counter-offensive against this menace, I am asking the Congress today to join with this Administration in strengthening and streamlining the Federal drug law enforcement effort.

Funding for this effort has increased sevenfold during the past five years, from \$36 million in fiscal year 1969 to \$257 million in fiscal year 1974—more money is not the most pressing enforcement need at present. Nor is there a primary need for more manpower working on the problem, over 2100 new agents having already been added to the Federal drug enforcement agencies under this Administration, an increase of more than 250 percent over the 1969 level.

The enforcement work could benefit significantly, however, from consolidation of our anti-drug forces under a single unified command. Right now the Federal Government is fighting the war on drug abuse under a distinct handicap, for its efforts are those of a loosely confederated alliance facing a resourceful, elusive, worldwide enemy. Admiral Mahan, the master naval strategist, described this handicap precisely when he wrote that "Granting the same aggregate of force, it is never as great in two hands as in one, because it is not perfectly concentrated."

More specifically, the drug law enforcement activities of the United States now are not merely in two hands but in half a dozen. Within the Department of

Justice, with no overall direction below the level of the Attorney General, these fragmented forces include the Bureau of Narcotics and Dangerous Drugs, the Office for Drug Abuse Law Enforcement, the Office of National Narcotics Intelligence, and certain activities of the Law Enforcement Assistance Administration. The Treasury Department is also heavily engaged in enforcement work through the Bureau of Customs.

This aggregation of Federal activities has grown up rapidly over the past few years in response to the urgent need for stronger anti-drug measures. It has enabled us to make a very encouraging beginning in the accelerated drug enforcement drive of this Administration.

But it also has serious operational and organizational shortcomings. Certainly the cold-blooded underworld networks that funnel narcotics from suppliers all over the world into the veins of American drug victims are no respecters of the bureaucratic dividing lines that now complicate our anti-drug efforts. On the contrary, these modern-day slave traders can derive only advantage from the limitations of the existing organizational patchwork. Experience has now given us a good basis for correcting those limitations, and it is time to do so.

I therefore propose creation of a single, comprehensive Federal agency within the Department of Justice to lead the war against illicit drug traffic.

Reorganization Plan No. 2 of 1973, which I am transmitting to the Congress with this message, would establish such an agency, to be called the Drug Enforcement Administration. It would be headed by an Administrator reporting directly to the Attorney General.

The Drug Enforcement Administration would carry out the following anti-drug functions, and would absorb the associated manpower and budgets:

- All functions of the Bureau of Narcotics and Dangerous Drugs (which would be abolished as a separate entity by the reorganization plan);
- Those functions of the Bureau of Customs pertaining to drug investigations and intelligence (to be transferred from the Treasury Department to the Attorney General by the reorganization plan);
- All functions of the Office for Drug Abuse Law Enforcement; and
- All functions of the Office of National Narcotics Intelligence.

Merger of the latter two organizations into the new agency would be effected by an executive order dissolving them and transferring their functions, to take effect upon approval of Reorganization Plan No. 2 by the Congress. Drug law enforcement research currently funded by the Law Enforcement Assistance Administration and other agencies would also be transferred to the new agency by executive action.

The major responsibilities of the Drug Enforcement Administration would thus include:

- development of overall Federal drug law enforcement strategy, programs, planning, and evaluation;
- full investigation and preparation for prosecution of suspects for vio-

lations under all Federal drug trafficking laws;

- full investigation and preparation for prosecution of suspects connected with illicit drugs seized at U.S. ports-of-entry and international borders;
- conduct of all relations with drug law enforcement officials of foreign governments, under the policy guidance of the Cabinet Committee on International Narcotics Control;
- full coordination and cooperation with State and local law enforcement officials on joint drug enforcement efforts; and
- regulation of the legal manufacture of drugs and other controlled substances under Federal regulations.

The Attorney General, working closely with the Administrator of this new agency, would have authority to make needed program adjustments. He would take steps within the Department of Justice to ensure that high priority emphasis is placed on the prosecution and sentencing of drug traffickers following their apprehension by the enforcement organization. He would also have the authority and responsibility for securing the fullest possible cooperation—particularly with respect to collection of drug intelligence—from all Federal departments and agencies which can contribute to the anti-drug work, including the Internal Revenue Service and the Federal Bureau of Investigation.

My proposals would make possible a more effective anti-drug role for the FBI, especially in dealing with the relationship between drug trafficking and organized crime. I intend to see that the resources of the FBI are fully committed to assist in supporting the new Drug Enforcement Administration.

The consolidation effected under Reorganization Plan No. 2 would reinforce the basic law enforcement and criminal justice mission of the Department of Justice. With worldwide drug law enforcement responsibilities no longer divided among several organizations in two different Cabinet departments, more complete and cumulative drug law enforcement intelligence could be compiled. Patterns of international and domestic illicit drug production, distribution, and sale could be more directly compared and interpreted. Case-by-case drug law enforcement activities could be more comprehensively linked, cross-referenced, and coordinated into a single, organic enforcement operation. In short, drug law enforcement officers would be able to spend more time going after the traffickers and less time coordinating with one another.

Such progress could be especially helpful on the international front. Narcotics control action plans, developed under the leadership of the Cabinet Committee on International Narcotics Control, are now being carried out by U.S. officials in cooperation with host governments in 59 countries around the world. This wide-ranging effort to cut off drug supplies before they ever reach U.S. borders or streets is just now beginning to bear fruit. We can enhance its effectiveness, with little disruption of ongoing enforcement activities, by merging both the

highly effective narcotics force of overseas Customs agents and the rapidly developing international activities of the Bureau of Narcotics and Dangerous Drugs into the Drug Enforcement Administration. The new agency would work closely with the Cabinet Committee under the active leadership of the U.S. Ambassador in each country where anti-drug programs are underway.

Two years ago, when I established the Special Action Office for Drug Abuse Prevention within the Executive Office of the President, we gained an organization with the necessary resources, breadth, and leadership capacity to begin dealing decisively with the "demand" side of the drug abuse problem—treatment and rehabilitation for those who have been drug victims, and preventive programs for potential drug abusers. This year, by permitting my reorganization proposals to take effect, the Congress can help provide a similar capability on the "supply" side. The proposed Drug Enforcement Administration, working as a team with the Special Action Office, would arm Americans with a potent one-two punch to help us fight back against the deadly menace of drug abuse. I ask full Congressional cooperation in its establishment.

IMPROVING PORT-OF-ENTRY INSPECTIONS

No heroin or cocaine is produced within the United States; domestic availability of these substances results solely from their illegal importation. The careful and complete inspection of all persons and goods coming into the United States is therefore an integral part of effective Federal drug law enforcement.

At the present time, however, Federal responsibility for conducting port-of-entry inspections is awkwardly divided among several Cabinet departments. The principal agencies involved are the Treasury Department's Bureau of Customs, which inspects goods, and the Justice Department's Immigration and Naturalization Service, which inspects persons and their papers. The two utilize separate inspection procedures, hold differing views of inspection priorities, and employ dissimilar personnel management practices.

To reduce the possibility that illicit drugs will escape detection at ports-of-entry because of divided responsibility, and to enhance the effectiveness of the Drug Enforcement Administration, the reorganization plan which I am proposing today would transfer to the Secretary of the Treasury all functions currently vested in Justice Department officials to inspect persons, or the documents of persons.

When the plan takes effect, it is my intention to direct the Secretary of the Treasury to use the resources so transferred—including some 1,000 employees of the Immigration and Naturalization Service—to augment the staff and budget of the Bureau of Customs. The Bureau's primary responsibilities would then include:

- inspection of all persons and goods entering the United States;
- valuation of goods being imported, and assessment of appropriate tariff duties;

- interception of contraband being smuggled into the United States;
- enforcement of U.S. laws governing the international movement of goods, except the investigation of contraband drugs and narcotics; and
- turning over the investigation responsibility for all drug law enforcement cases to the Department of Justice.

The reorganization would thus group most port-of-entry inspection functions in a single Cabinet department. It would reduce the need for much day-to-day interdepartmental coordination, allow more efficient staffing at some field locations, and remove the basis for damaging inter-agency rivalries. It would also give the Secretary of the Treasury the authority and flexibility to meet changing requirements in inspecting the international flow of people and goods. An important by-product of the change would be more convenient service for travellers entering and leaving the country.

For these reasons, I am convinced that inspection activities at U.S. ports-of-entry can more effectively support our drug law enforcement efforts if concentrated in a single agency. The processing of persons at ports-of-entry is too closely interrelated with the inspection of goods to remain organizationally separated from it any longer. Both types of inspections have numerous objectives besides drug law enforcement, so it is logical to vest them in the Treasury Department, which has long had the principal responsibility for port-of-entry inspection of goods, including goods being transported in connection with persons. As long as the inspections are conducted with full awareness of related drug concerns it is neither necessary nor desirable that they be made a responsibility of the primary drug enforcement organization.

DECLARATIONS

After investigation, I have found that each action included in Reorganization Plan No. 2 of 1973 is necessary to accomplish one or more of the purposes set forth in Section 901(a) of Title 5 of the United States Code. In particular, the plan is responsive to the intention of the Congress as expressed in Section 901(a)(1): "to promote better execution of the laws, more effective management of the executive branch and of its agencies and functions, and expeditious administration of the public business;" Section 901(a)(3): "to increase the efficiency of the operations of the Government to the fullest extent practicable;" Section 901(a)(5): "to reduce the number of agencies by consolidating those having similar functions under a single head, and to abolish such agencies or functions as may not be necessary for the efficient conduct of the Government;" and Section 901(a)(6): "to eliminate overlapping and duplication of effort."

As required by law, the plan has one logically consistent subject matter: consolidation of Federal drug law enforcement activities in a manner designed to increase their effectiveness.

The plan would establish in the Department of Justice a new Administration designated as the Drug Enforcement Administration. The reorganizations provided for in the plan make necessary the appointment and compensation of new officers as specified in Section 5 of the plan. The rates of compensation fixed for these officers would be comparable to those fixed for officers in the executive branch who have similar responsibilities.

While it is not practicable to specify all of the expenditure reductions and other economies which may result from the actions proposed, some savings may be anticipated in administrative costs now associated with the functions being transferred and consolidated.

The proposed reorganization is a necessary step in upgrading the effectiveness of our Nation's drug law enforcement effort. Both of the proposed changes would build on the strengths of established agencies, yielding maximum gains in the battle against drug abuse with minimum loss of time and momentum in the transition.

I am confident that this reorganization plan would significantly increase the overall efficiency and effectiveness of the Federal Government. I urge the Congress to allow it to become effective.

RICHARD NIXON.

THE WHITE HOUSE, March 28, 1973.

THE PRESIDENT'S REORGANIZATION PLAN FOR DRUG ABUSE CONTROL

(Mr. GERALD R. FORD asked and was given permission to extend his remarks at this point in the Record.)

Mr. GERALD R. FORD. Mr. Speaker, the President's proposal to place the responsibility for the war against illicit drug trafficking entirely within one agency seems to me to make a great deal of sense.

In fact, it appears obvious that creating a single, comprehensive Federal agency to coordinate the drive against dope should result in a vastly improved attack on the drug abuse problem.

We should no longer continue to employ a fragmented approach in dealing with the drug abuse menace. I therefore urge that the Congress allow the President's proposal, Reorganization Plan No. 2 of 1973, to become effective.

APPOINTMENT OF CONFEREES ON H.R. 2107, RURAL ENVIRONMENTAL ASSISTANCE PROGRAM

Mr. POAGE. Mr. Speaker, pursuant to clause 1, rule XX, by direction of the Committee on Agriculture, I move to take from the Speaker's table the bill (H.R. 2107) to require the Secretary of Agriculture to carry out a rural environmental assistance program, with the Senate amendment thereto, disagree to the Senate amendment, and request a conference with the Senate.

The SPEAKER. The Clerk will report the motion.

The Clerk read as follows:

Mr. POAGE moves to take from the Speaker's table the bill H.R. 2107, with the Senate amendment thereto, disagree to the Senate

amendment, and request a conference with the Senate.

The SPEAKER. The gentleman from Texas is recognized.

Mr. POAGE. Mr. Speaker, this is the REAP bill, which we passed some weeks ago. The Senate has placed an amendment on it. This is merely asking to send the bill to conference to consider this Senate amendment.

Mr. TEAGUE of California. Mr. Speaker, will the gentleman yield?

Mr. POAGE. I yield to the gentleman from California.

Mr. TEAGUE of California. Mr. Speaker, I have no doubt that this motion by the chairman will carry, but I did want to take advantage at this time to read a few short excerpts from an excellent article which appeared in today's Wall Street Journal on the subject of REAP, and I ask unanimous consent that the entire article be included with my remarks.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. TEAGUE of California. This article is written by Burt Schorr in today's Wall Street Journal. He has this to say:

[From the Wall Street Journal, Mar. 28, 1973]
NIXON'S ATTEMPT TO KILL RURAL AID PROGRAM
BRINGS SOME CHALLENGES FROM THE CONGRESS

(By Burt Schorr)

WARRENTON, VA.—Thirty-seven years ago Sen. Arthur Capper of Kansas lamented that floods had washed away "millions of acres of fertile soil" and that dust storms were ravaging half a dozen states. He warned against permitting fertile areas to become "uninhabitable deserts." Then Congress passed the Soil Conservation Act.

Today the white-fenced, bluegrass pastures in this corner of the Virginia hunt country seem a long way from the devastation depicted by Sen. Capper; they have been showered with various conservation aids provided by the 1936 law. And some of the present-day beneficiaries of the Rural Environmental Assistance Program based on that law seem far removed from the low-income dirt farmers it was designed to help.

For here in Fauquier County resides Katherine Graham, publisher of The Washington Post; last year she got \$340 in rural assistance funds to fertilize pasture land at her farm-retreat. Here also are retired Brig. Gen. R. Townsend Heard, recipient of \$858 for pasture improvements, and Mrs. Joseph W. Barr, wife of the former Treasury Secretary, who got \$397 for grass seed and fertilizer.

Fauquier, located on the edge of Washington's exurbia, isn't the typical rural county. Nevertheless, payments to the nonneedy are very much a part of the more than \$7 billion given agricultural landowners since 1936 to carry out soil-conservation practices. In fact, the nonneedy may well make up a rising share of the program's outlays in recent years.

ACCOMPLISHED ITS AIM

This situation reflects the changed circumstances that recently impelled President Nixon to order an end to the REAP program. Among other things, the program's critics say Washington has continued to pay landowners to undertake conservation projects that they now should and could finance by themselves.

Basically, the President contends this long-time federal help has accomplished its aim. Rural Environmental Assistance and lesser farm-conservation programs "have done their job well: The United States now leads the world in agricultural productivity, and con-

servation measures have become standard farm-operation procedures," Mr. Nixon says in his new budget.

But the program's defenders in Congress and elsewhere loudly disagree. Without the government to share the cost, the program's defenders question whether farmers will be able to do what is necessary for soil conservation. They also warn that erosion may spread again and that America's farm productivity may suffer.

So irate are farm-state lawmakers that, with urban-suburban support, they have made REAP's future a constitutional issue. The House and Senate have challenged the presidential cutoff order and dared a Nixon veto by passing bills to force continuation of the program. The program's survival is the "direct test of whether the legislative or executive branch will determine spending priorities," asserts Texas Democrat W. R. Poage, chairman of the House Agriculture Committee.

SOME COMPLAINTS

In Congress's zeal to rebuff the President, it is largely ignoring various complaints leveled against REAP. Critics maintain that the program has wandered somewhat from its original conservation objective and has tended to foster farm production directly by paying for, say, land drainage and irrigation ditches. Administrators seeking to eliminate such practices have been hampered by congressional orders leaving decisions to farmer committees in each county.

The critics complain that payments have gone to well-heeled landowners and that REAP's entrenched supporters have refused to brook proposed restrictions that would bar payments to the wealthy.

Beneath it all is the basic question: Is the incentive of federal cash to induce good conservation practices as widely needed in the 1970s as it was in the Depression days of the 1930s? The REAP payment records on file in the local office of the Agricultural Stabilization and Conservation Service here suggest that it isn't. So do conversations with some recipients.

Take Mrs. Graham. Gen. Heard and Mrs. Barr; all say they would undoubtedly keep their Fauquier County fields properly limed, fertilized and seeded even if the federal aid became unavailable.

It would appear that other beneficiaries hereabouts, some of whom live in sumptuous hilltop homes on land worth \$1,000 and more an acre, could well afford to do the same. For the convenience of one owner of 533 acres, a director of several corporations who received \$374 in REAP payments last year, a notation on his form in the Warrenton Agricultural Stabilization and Conservation Service office directs: "Mail check to Hobe Sound, Fla." Hobe Sound is a winter haven for the wealthy.

IMPORTANT IMPROVEMENTS

There isn't any doubt, however, that federal conservation aid has wrought important long-term improvements throughout rural America. Washington has helped build some two million water storage ponds, reshaped over 32 million acres with antierosion terraces and induced planting of trees and grass and use of stripcropping to buffer 114 million acres from wind and water. In 1970, the program was expanded to include control of animal wastes and other antipollution practices.

The government's REAP outlays totaled about \$180 million in fiscal 1972. The individual payments, which ordinarily can't exceed \$2,500 per landowner, averaged only \$292. But they stimulated a larger spending effort by the recipients, who usually foot 50% to 70% of each project's costs.

Robert L. Herbst, Minnesota natural resources commissioner, sees a "blow to wildlife and erosion control" if the program were to die. He says that the payments have encouraged Minnesota farmers to plant 3.5

million acres of land diverted from crop production with alfalfa, clover and perennials that provide cover and food for pheasants.

And along the gullied watershed of the North Sulphur River of Northeast Texas, government help in constructing hundreds of small dams on tributary streams is seen as the only way to check galloping erosion of the region's black soil. The trouble traces back to the 1920s when the Army Corps of Engineers straightened and deepened the main channel of the North Sulphur to protect rich bottomlands from flooding. Unexpectedly, the river continued the job, increasing water velocity so that erosion began eating its way up the tributaries of the river.

THE YOUNG AND OLD VIEWS

The old wooden bridge on the dirt road linking the small Lamar County community of Bankston with U.S. Highway 82 shows the consequences of this. Originally only 12 feet in length, the bridge had to be stretched to five times that size over a 15-year period as the banks of the stream it crossed fell away. Last summer, the county halted the continual reconstruction by joining with three adjacent landowners, who got REAP aid, to construct a \$5,800 earthen dam. The structure greatly slows water flow in the stream and also carries the Bankston road along its crown.

"Young farmers say they don't have that kind of money to spend on their own, and old farmers say they don't want to spend it because they won't live to see its value," says Jim West, Lamar County commissioner and developer of the joint project.

For Robert Kochs, president of the National Limestone Institute, whose producer members depend heavily on sales financed with REAP funds, the big danger is clear. "Is this country going to let its land go the way of India and China?" he asks. A onetime Agriculture Department conservation official, Mr. Kochs has called on grass-roots supporters of REAP, including thousands of federal employees as well as landowners, to flood Congress with a million protest letters. Last week he fired off a warning to institute members that they weren't doing enough for the cause and might meet defeat.

SUPPORT IS LACKING

Mr. Kochs and his allies have helped to push through both houses legislation that would require the Agriculture Secretary to release money appropriated for the program. (He now has an option.) But leaders of the REAP resuscitation effort fear that the House margin is too thin to override a threatened Nixon veto.

One thing lacking in the struggle to save the assistance program is any strong support from environmentalists. One organization, the Natural Resources Defense Council, in fact, is sharply critical of REAP spending to drain wetlands and buy pesticides for killing vegetation. "Maybe we need a moratorium so the program can be resurrected on more constructive lines," says Thomas J. Barlow, a council staff member.

Environmentalists also complain that the county committees that pass on payment applications last year allowed 20% of the program dollars to go for drainage, irrigation and other practices deemed more valuable to crop production than conservation.

Prior to the Nixon cutoff, the Agricultural Stabilization and Conservation Service had been whittling away at such payments. But its officials say they were hampered by language in House-Senate conference reports authored by Democratic Rep. Jamie Whitten of Mississippi, a REAP proponent who chairs the House Agricultural Appropriations subcommittee. The reports, in effect, directed the department not to interfere if a county committee chose to approve any of a score of practices not recommended by the agricultural service.

According to a General Accounting Office study of REAP operations released last year, however, the service itself is partly to blame for certain shortcomings. In one state, the congressional watchdog agency found that REAP aid regularly paid for "normal maintenance measures which should have been done by farmers without cost-sharing." Four out of six counties visited by GAO investigators in another state paid for "converting woodland to pastureland for grazing cattle."

WHY NOT?

When the Soil Conservation Service (whose field men advise landowners on REAP projects) was asked for an example of the program's good effects, it cited two Ross County, Ohio, farms that cooperated to battle erosion along a meandering brook. The service's records show it was necessary to bulldoze a 5,700-foot waterway through the old brook bed and plant it with long fescue grass, construct a rock barrier at the end of the new waterway to slow water flow, and build an additional 900 feet of ditch to carry the water to a receiving stream—at a total cost to the government of \$5,300.

However, William D. Knowles, part-owner of the benefiting farms, doesn't characterize the project as antierosion but as "mostly for drainage" to expand production. By drying out swampland, he says, "I judge we've got 12 to 15 acres more tillable ground than before. We'll grow corn, wheat or soybeans there, whatever looks to bring the best price."

The General Accounting Office recommended last year that Congress end the supplemental REAP bonus to landowners who receive a basic payment of less than \$200. Such bonuses, from 40 cents to \$14 each, were intended as an extra incentive for small farmers. In recent years, though, they have often gone to "operators of large farms, absentee landowners and persons for whom such increases were not intended," the office's report said.

One Fauquier County recipient of the bonus is R. Martin Kremer, a Warrenton accountant. To help pay for fertilizer on 11 acres around his home that he uses for pasture, Mr. Kremer received a regular REAP disbursement of \$81.32 last year, plus an extra \$14. (Three horses, "basically for fox hunting," kept on the pasture land qualified him as an agricultural landowner eligible for assistance.)

"My philosophy is that if the government spends money for everything else, why not spend money for this," Mr. Kremer says.

The SPEAKER. The question is on the motion offered by the gentleman from Texas (Mr. POAGE).

The motion was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER. The Chair appoints the following conferees: Messrs. POAGE, FOLEY, SISK, JONES of Tennessee, TEAGUE of California, WAMPLER, and GOODLING.

AMENDING FOREIGN SERVICE BUILDINGS ACT, 1926

Mr. SISK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 327 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 327

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5610) to amend the Foreign Service Buildings Act,

1926, to authorize additional appropriations, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommend.

The SPEAKER. The gentleman from California (Mr. SISK) is recognized for 1 hour.

Mr. SISK. Mr. Speaker, I yield 30 minutes to the gentleman from California (Mr. DEL CLAWSON), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 327 provides for an open rule with 1 hour of general debate on H.R. 5610, which is a bill to authorize funds to carry forward the Foreign Service buildings programs during fiscal years 1974 and 1975. The appropriations under the current act expire on June 30, 1973.

H.R. 5610 authorizes \$59,611,000 for the purpose of continuing this program, with a maximum of \$26,211,000 allowable for fiscal year 1974. The Department of State plans to request an appropriation of the balance for fiscal year 1975.

The authorization breakdown for this bill is as follows: \$13,811,000 for the purchase, construction, major alteration and long-term leasing of overseas buildings; and \$45,800,000 over the next 2 years for the operational activities of the building program such as maintenance, repair, utilities, and furnishings; \$21,700,000 of the operational account is available for fiscal year 1974 and the remaining \$24,100,000 for fiscal year 1975. The operating account provides the funds needed to meet the Department of State's share of the daily operating expenses of the buildings.

The Department of State currently maintains 270 posts abroad. The passage of H.R. 5610 will permit the Department to provide representative consolidated office space abroad for the Foreign Service and other permanent agencies of the U.S. Government operating in cooperation with the Foreign Service. It will also allow the Department to provide Government-owned furnished residences for all Ambassadors and Ministers, and to assure the proper maintenance and operation of properties which it already owns or leases.

Mr. Speaker, I urge adoption of House Resolution 327 in order that we may discuss and debate H.R. 5610.

Mr. DEL CLAWSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 327 provides for an open rule with 1 hour of general debate, for the consideration of H.R. 5610, Foreign Service Buildings Act amendments.

The primary purpose of H.R. 5610 is to authorize funds to support the Foreign Service buildings programs during fiscal years 1974 and 1975.

The Committee on Foreign Affairs recommends that \$59,611,000 be authorized, of which not more than \$26,211,000 may be made available for fiscal year 1974. The Department of State plans to request an appropriation of the balance for fiscal year 1975.

Of the total amount authorized in this bill \$13,811,000 is authorized for the purchase, construction, major alteration, and long-term leasing of buildings.

The remaining \$45,800,000 is authorized over the next 2 years for the operational activities of the building programs, such as maintenance, repair, utilities, and furnishings.

The Department of State currently maintains 270 abroad. Under the Foreign Service buildings program, the United States has long-term lease agreements or owns the following improved properties: 241 office buildings, 172 residences for Ambassadors, and other principal officers and attachés, 297 other single or duplex residential buildings, 272 apartment buildings, and 167 other buildings such as warehouses and garages.

Mr. Speaker, I know of no objection to the rule and urge its adoption.

Mr. Speaker, I yield such time as he may consume to the gentleman from Iowa (Mr. GROSS).

(Mr. GROSS asked and was given permission to proceed out of order.)

GENERAL ACCOUNTING OFFICE HITS METRIC STUDY

Mr. GROSS. Mr. Speaker, at my request the General Accounting Office has been conducting a study of the report to Congress last year by the Department of Commerce which recommended a crash program to convert this country to the metric system.

It occurred to me when this report was issued that the Department and the Bureau of Standards, which wrote it, might have a biased view of this subject and so I asked the GAO to evaluate it.

Because the House Science and Astronautics Committee is now considering legislation that would put into effect a terrifically expensive, 10-year conversion program, I asked the GAO for an interim report.

I have now received that report and it confirms fully my suspicions that the Commerce Department recommendation was misleading in that it did not present all the facts. It actually ignored some of them.

For example, the Department glowingly stated that conversion to the metric system would drastically increase this country's exports.

It failed to mention that conversion to the metric system will also dramatically increase imports.

Moreover, it did not even mention the fact that the tremendous costs of conversion will increase manufacturers' costs, and thus the prices of their products, placing them, as the GAO points out, "at even more of a competitive disadvantage vis-a-vis the products of foreign firms that are already metric."

The General Accounting Office also points out a serious flaw in the conversion cost analyses used by the Commerce Department.

Mr. Speaker, the GAO reveals that the

staggering multibillion-dollar costs of a 10-year metric conversion program will be far greater than if conversion is allowed to take place gradually and voluntarily. The Commerce Department, with the usual bureaucratic disregard for costs and spending, would have Congress and the public believe just the opposite.

The implications of this interim report by the General Accounting Office are great, because it appears that Congress has been deceived by an instrumentality of the executive branch; that bureaucrats, perhaps with a vested interest, have produced a misleading and highly inaccurate report.

I do not have an estimate from the General Accounting Office as to when its final report will be ready, but I believe it would be only prudent if the hearings on this proposed conversion program were to be held in abeyance pending receipt of that report.

I do not believe that the members of the Science and Astronautics Committee, to say nothing of the other Members of the House of Representatives, should be required to cast a vote on such a far-reaching proposal as this without having the benefit of the GAO's careful study of the subject.

I am including for insertion in the RECORD at the end of my remarks the letter to me from Comptroller General Staats on the GAO's work thus far. It will be noted that no cost figure is mentioned for this program.

I have received evidence, however, which proves that those who prepared the Commerce Department report realized that if the American people were told what the cost of this conversion program really was they would reject it outright. For that reason the cost was hidden.

This evidence is most damning and I hope to be able to present it to the House at an early date.

The letter follows:

COMPTROLLER GENERAL OF THE
UNITED STATES,
Washington, D.C., March 27, 1973.
Hon. H. R. Gross,
House of Representatives.

DEAR MR. GROSS: On October 17, 1972, you requested the General Accounting Office to evaluate the Department of Commerce U.S. Metric Study (Study) report to Congress. Our evaluation is not completed but, as agreed with your office, we are reporting on matters noted to date which may be of use in the current congressional consideration of proposed legislation to adopt the metric system for use in the United States.

Public Law 90-472 authorized the Secretary of Commerce to conduct a program of investigation, research, and survey to determine the impact on the United States of increasing worldwide use of the metric measurement system. The ensuing Study covered such areas as international trade, manufacturing industry, international standards, defense, and a history of the metric controversy in the United States. The results were published in July 1971.

The Study includes the Secretary's finding that increased metric usage is in the best interests of the United States and his recommendation that the Nation change to the metric system through a 10-year coordinated national program at the end of which the Nation will be predominantly metric.

EFFECTS ON INTERNATIONAL TRADE AND DOMESTIC ECONOMY

The Study states that had the United States been metric by 1970, in 1975 its exports of measurement standard sensitive products would have been increased by \$600 million and that there would have been no difference in imports of such products. This statement was based on surveys of importers and exporters. Our examination of the survey of importers, however, showed that imports of measurement standard sensitive products would have been increased by \$100 million. We believe that this substantial offset to the favorable export benefit should have been recognized in the Study.

We also noted that the Study did not discuss the possibility that costs of converting the U.S. manufacturing industry to the metric system would tend to increase costs and prices of its products and thus place these products at even more of a competitive disadvantage vis-a-vis the products of foreign firms that are already metric.

NATIONAL CONVERSION PROGRAM MORE COSTLY

The Study concluded that the Nation was already on the way to becoming metric and that the question was whether the change should be made under a planned national program or without a plan.

The Study included a comparative analysis of the costs to change to metric by the manufacturing industry sector. The analysis considered two alternatives; a 10-year planned national changeover and a 50-year no-plan national changeover, and made a comparison at three assumed base cost levels—\$10, \$25, and \$40 billion. The analysis showed that, regardless of the cost assumptions, the 10-year planned changeover was the preferred alternative because it would be less costly and the benefits of metric usage would be realized sooner than under the 50-year no-plan changeover.

Although we have not evaluated all the data use in the calculations, we do take issue with the omission of a factor (interest) representing the time value of money.

We applied the present-value method to the Study's manufacturing industry analysis. This is the method most often used to evaluate alternatives that differ in the timing of cash flows.

A major problem in the use of the present-value method has been the selection of the appropriate interest rate. Arguments have been presented for rates ranging from as low as the interest rate for borrowing by the Treasury to as high as certain rates of return that can be earned in the private sector of the economy. In our computation we used the 10-percent interest rate prescribed by the Office of Management and Budget, in OMB Circular No. A-94, Revised, dated March 27, 1972.

Our computation showed that if the time value of money had been set at 10 percent, the analysis would have shown that:

1. At the \$10 billion level the 10-year planned changeover alternative would be less costly than the 50-year no-plan changeover—as shown by the Study.

2. At the \$25 and \$40 billion levels, the 10-year planned changeover would be more costly than the 50-year no-plan changeover—contrary to what was shown by the Study.

It should be noted that the costs used in the Study's analysis were assumed for the purpose of comparing the 10-year planned changeover and the 50-year no-plan changeover. Elsewhere in the Study it is stated that an initial estimate of the manufacturing industry's changeover costs was \$25 billion which after various modifications was changed to a final estimate ranging from \$6.2 to \$14.3 billion.

IMPACT OF METRICATION ON SMALL BUSINESS

Public Law 90-472 directed that the Study give full consideration to the advantages,

disadvantages, and problems associated with the Nation's changeover to the metric system, and recommend specific means of aiding those areas of the economy where metrication would entail significant costs. One such area was small business.

In a March 1972 report, the House Subcommittee on Minority Small Business Enterprise of the Select Committee on Small Business stated that the Study did not fulfill the intent of the Congress with respect to small business. The Subcommittee report noted that the Study did not inquire directly into the impact of metrication on the small business sector and that the Study's small business recommendations were based on (1) a statement of one small business association, (2) opinions of three officials of the Small Business Administration, and (3) surveys of manufacturing and non-manufacturing firms most of which were not small business.

Sincerely yours,

ELMER B. STAATS,
Comptroller General of the United States.

Mr. HAYS. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I am glad to yield to my friend, the gentleman from Ohio (Mr. HAYS).

Mr. HAYS. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I just want to say that:

I have some aversion
To metric conversion
Though it's sound from the scientist view.
But describing a dame
Won't be the same
If she's 96—61—92.

Mr. McCLODY. Mr. Speaker, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Illinois.

Mr. McCLODY. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, may I just say this—that as one of the sponsors of the 3-year study program, and as one who has studied the report, it seems to me that it is very important for us to develop a metric conversion program, and one that is largely a voluntary program.

The United States remains now as the only large industrial country in the world that has not converted to or is not now in the course of converting to the metric system.

I think that many of the bugaboos and many of the perils about which the gentleman now in the well is warning us—and which appear to be in the GAO report, have been demonstrated to be virtually groundless and it is my view that the expenses of such a conversion will be far less than may be anticipated. Also there are many advantages to our Nation that can result from a conversion to the metric system.

Mr. GROSS. Mr. Speaker, may I say to the gentleman from Illinois that I am learning something. I did not know the gentleman was so easily convinced by misleading information.

Mr. McCLODY. Mr. Speaker, will the gentleman yield further? I would like to say that I am hopeful that we will have a full and fair hearing before the Committee on Science and Astronautics, and that we can come out with a mean-

ingful bill and one that will enable us to convert in an orderly manner with Federal direction, but largely through the voluntary support of industry, and all of the other segments of our society.

Mr. GROSS. Mr. Speaker, I would say to the gentleman from Illinois that with around \$485 billion of debt, and with another huge deficits staring us in the face, I think it would be well to stop this subject here and now, and not throw more billions, taken sight-unseen from the public into conversion to the metric system.

Mr. McCLORY. If the gentleman will yield further, may I say that there are opportunities for making a lot of money as a result of a conversion to the metric system. The National Association of Manufacturers and the U.S. Chamber of Commerce are in support of a conversion to the metric system, and they would not be in favor of it if they thought it would harm our national economy—or if it would be detrimental to American business or industry.

Mr. GROSS. Mr. Speaker, I would say to the gentleman from Illinois that I do not have tool and die making plants in the district I represent.

Mr. DEL CLAWSON. Mr. Speaker, I have no further requests for time.

Mr. SISK. Mr. Speaker, I have no requests for time.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

Mr. HAYS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 5610, to amend the Foreign Service Buildings Act, 1926, to authorize additional appropriations, and for other purposes.

The SPEAKER. The question is on the motion offered by the gentleman from Ohio (Mr. HAYS).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 5610, with Mr. FULTON in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Ohio (Mr. HAYS) will be recognized for 30 minutes, and the gentleman from Wisconsin (Mr. THOMSON) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Ohio (Mr. HAYS).

Mr. HAYS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, in the 16 years that I have been the chairman of the Subcommittee on State Department Organization and Foreign Operations I have tried to bring the Foreign Service buildings operations under closer congressional control. Congress used to vote large sums of money for this program based upon Executive requests that had little relation to the real needs of the country.

This year the Department of State again asked for a lump sum appropriation for the acquisition of buildings overseas. The committee promptly denied that request and wrote into the bill specific sums for each of the geographic areas. We recognize that there may be circumstances during the life of the authorization when funds should be shifted from one area to another to meet unusual situations. Hence, we have provided for a maximum transfer between geographic areas of not more than 10 percent. Those in charge of the buildings program understand that when such transfers are made, the committee is notified, and an explanation is made.

H.R. 5610 covers two accounts of the building program. The first is the capital account which is used to acquire buildings by purchase, construction, or lease. Congress has not authorized funds for this account since 1966. Such limited construction as has taken place since that date has been under the authorization then voted, through the use of excess local currencies, and the proceeds of sales of property no longer needed by the Government. This bill contains an authorization of \$13,811,000 for the next 2 fiscal years. About \$3.8 million of that amount will be used by the Department of State to buy local currencies held by the Treasury Department. This is a bookkeeping transaction. The balance of slightly less than \$10 million will not be spent abroad. Sophisticated materials, such as elevators and electrical equipment, will be purchased in the United States for incorporation into the buildings under construction.

The second account is the operating account for which the committee has authorized an appropriation of \$45,800,000 for the next 2 years. This account covers the costs of maintaining and operating the properties that the Department owns abroad. The modest increase over previous authorizations reflects rising costs of materials and services abroad, as well as the inclusion of about \$5 million for the acquisition of Public Law 480 funds which previously were not included in the authorization.

It is important to know that while these authorizations are for the Foreign Service buildings program, which is under the jurisdiction of the Department of State, that program provides the office requirements and some of the housing needs of many other civilian Government agencies. I say this so that Members will not think that only the Department of State benefits from this bill.

The United States has an investment at cost value of more than \$300 million in buildings overseas. These include residences for our Ambassadors and officers and attachés; staff houses and apartments; office buildings, warehouses, and garages. Estimates made by those who operate the program indicate that the present value of these properties is at least double that figure.

I should think, based upon my observations—and I have looked at some of these buildings—it might be a billion dollars.

When I began to look into this program some years ago, I was dismayed to find that it was regarded as another as-

signment for Foreign Service officers. Whatever qualifications these individuals may have had, real estate operation was not one of them. The Department has recognized, through a little prodding from Congress, that the handling of properties is a highly specialized activity, and has entrusted this to individuals who are not only qualified, but who stay in that assignment. I think anyone who sat through our hearings when we examined 97 projects, on a project-by-project basis, will recognize that the program is in competent hands.

Mr. WYLIE. Mr. Chairman, will the gentleman yield?

Mr. HAYS. I thank the gentleman from Ohio.

Mr. WYLIE. I thank the gentleman for yielding.

I notice in all there is authorized \$59 million plus by H.R. 5610. I called the Department of State this morning and found out that there are about \$277 million around the world in so-called counterpart funds.

My question is: Can the counterpart funds be used for the purposes outlined in this bill, or will they be used?

Mr. HAYS. As I have said in my statement, there will be \$3.8 million by the Department of State which they will buy in counterpart funds from the Treasury, and that is a bookkeeping transaction.

There is another provision for \$5 million, which also is in my statement, for Public Law 480 funds, which, although they are of a different category, to all intents and purposes are a counterpart.

I will say to the gentleman from Ohio that the Foreign Service Buildings Office is under instructions from the committee to use local currency that we own whenever and wherever it can.

But the trouble is, we have to build some buildings and acquire some buildings in countries where we do not own local currency, but they will use such currency wherever it is available. As I said in my statement, a great deal of this money will be spent in this country, because whenever we build a building we put in elevators and air conditioners and electrical equipment, and that is of American manufacture which is bought here and shipped over for the building.

Mr. WYLIE. I thank the gentleman for his answer. I appreciate the thoroughness of it, and I was hoping that would be the answer. We get the question in a sort of declarative way as to why, if we have these counterpart funds available, we have to send more money overseas to carry out the purposes of a program like this? For instance, in Bolivia, we have on deposit \$6 million in counterpart funds, and we are here authorizing \$150,000 to acquire a site for a new building in Bolivia.

Mr. HAYS. Of course, the problem is we use the funds wherever we are building and for whatever we are acquiring in that country where it is possible to do so. But, for instance, we have a tremendous amount of money in Indian rupees, and it is not convertible currency, and we can use it only in India, and nowhere else.

Mr. WYLIE. I appreciate that. I thank

the gentleman for his answer. I hope he will use his good offices to insure that we use counterpart funds wherever possible.

Mr. HAYS. We will use them wherever we can, and however much we can.

Mr. WYDLER. Mr. Chairman, will the gentleman yield?

Mr. HAYS. I yield to the gentleman from New York.

Mr. WYDLER. Can the gentleman assure me that the amounts being considered here today are in the budget?

Mr. HAYS. I have taken the policy in anything I have anything to do with that we will stay within the budget. We gave these people exactly what was asked for, but they also asked for an open-end authorization to take care of things beyond their control such as devaluation. We did not give them that. I told them that I am going to stay within the President's budget, and I am not going to give them an open-end authorization that nobody can predict the amount it will mean.

I deplore the fact that they have not been building and buying more buildings. That goes back beyond this administration into other administrations. But that policy was penny-wise and pound-foolish, because rents have doubled, and in some cases tripled. I can cite one building in a South American country where we paid on a 5-year lease for two-thirds of the cost of the building.

I raised a big fuss downtown about it at the time, and I was overruled, because they already had the money, but our committee has ordered them to proceed forthwith to build a building with the proceeds of sales in another country. We are building properties all around the world, and we would save a great deal of the taxpayers' money if we owned some we are renting. I am delighted that we are finally able to convince this administration and the Bureau of the Budget to start on this program of building and acquisition. Many of the buildings we have built under a lease plan by which we can purchase them within a number of years, for instance, 3 or 5 or 7 years, and apply a big percentage, usually 75 or 80 percent, of the rent we paid toward the purchase price. If we do not do that, although the annual appropriation may be less, on a 10- or 20-year basis it will cost the United States many times the cost.

Mr. WYDLER. I thank the gentleman from Ohio.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. HAYS. I yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, I looked at the report this morning, and I noticed there was a million or so in it for South Vietnam. I wonder what that was for? Am I in error?

Mr. HAYS. There is no money in this bill for South Vietnam. I make that statement categorically. I cannot remember anything for South Vietnam in this bill, and I know I would recall it. We have gone over it with the staff. There is nothing here for South Vietnam.

Mr. SNYDER. Maybe it is not what I thought it was.

Mr. HAYS. I have to think the gentleman is talking about the Ramseyer provision, which shows existing law. There

is no money in this authorization for South Vietnam. What we are doing is amending the old law. The gentleman knows the procedure, that we are required under the Ramseyer rule to print existing law as amended by the bill. The money the gentleman is talking about is money we used to build our Embassy building some years ago, in the Johnson administration.

If the gentleman recalls, we had an attack on that building. First we had an attack on the leased building in which several people were killed and some were blinded. We put a crash program in, which I handled, in which I urged the President to increase the amount he was asking for so that we could have all our people in this one building and build a big concrete fence and screen around it.

When the Vietcong attacked the building, they threw a lot of bombs. No one lost his life except for one marine guard who was shot, and all the people doing the bombing were killed.

If we had not had that, we would have lost a lot of lives. That was built around 1966 or 1967.

There is no money in this bill for Vietnam. Nothing.

Mr. SNYDER. That language which is printed in the report is existing law?

Mr. HAYS. That is correct.

Mr. SNYDER. Has that money been appropriated?

Mr. HAYS. The money has been appropriated, spent, and the building is there.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The Chair recognizes the gentleman from Wisconsin (Mr. THOMSON).

Mr. THOMSON of Wisconsin. Mr. Chairman, I rise today in support of H.R. 5610, which authorizes appropriations for the Foreign Service buildings program for fiscal year 1974 and 1975. It was considered by the Foreign Affairs Committee on March 20 and ordered reported by a unanimous vote.

The chairman of the subcommittee, the gentleman from Ohio, has already provided the essential details of this legislation. The committee recommendation of \$59,611,000, of which not more than \$26,211,000 may be made available for fiscal year 1974, is reasonable and well justified.

The authorization contains funds for both the capital account of the buildings program—for which no sums have been authorized since 1966—and the program's operational activities such as maintenance, repair, utilities, and furnishings.

I would like to emphasize that not all of the funds described in the bill require dollar outlays. In certain excess foreign currency countries, acquisition and operating costs, where possible, are funded with local currencies.

This legislation is necessary if we are to properly maintain and operate the valuable property of the United States abroad.

I urge passage of H.R. 5610.

Mr. HAYS. Mr. Chairman, I have no further requests for time.

Mr. THOMSON of Wisconsin. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. The Clerk will read. The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4 of the Foreign Service Building Act, 1926 (22 U.S.C. 295), is amended—

(1) by redesignating subsection (g) as subsection (h) and by inserting immediately after subsection (f) the following new subsection:

"(g) In addition to amounts authorized before the date of enactment of this subsection, there is hereby authorized to be appropriated to the Secretary of State—

"(1) for acquisition by purchase or construction (including acquisition of leaseholds) of sites and buildings in foreign countries under this Act, and for major alterations of buildings acquired under this Act, the following sums—

"(A) for use in Africa, not to exceed \$2,190,000, of which not to exceed \$590,000 may be appropriated for the fiscal year 1974;

"(B) for use in the American Republics, not to exceed \$375,000, of which not to exceed \$240,000 may be appropriated for the fiscal year 1974;

"(C) for use in Europe, not to exceed \$4,780,000 of which not to exceed \$160,000 may be appropriated for the fiscal year 1974;

"(D) for use in East Asia, not to exceed \$2,585,000, of which not to exceed \$985,000 may be appropriated for the fiscal year 1974;

"(E) for use in the Near East and South Asia, not to exceed \$3,518,000, of which not to exceed \$2,218,000 may be appropriated for the fiscal year 1974;

"(F) for facilities for the United States Information Agency, not to exceed \$45,000 for use beginning in the fiscal year 1975;

"(G) for facilities for agricultural and defense attaché housing, not to exceed \$318,000 for use beginning in the fiscal year 1974; and

"(2) for use to carry out other purposes of this Act for fiscal years 1974 and 1975, \$45,800,000, of which not to exceed \$21,700,000 may be appropriated for fiscal year 1974"; and

(2) by striking out paragraph (2) of subsection (h), as so redesignated by paragraph (1) of this Act, and inserting in lieu thereof the following new paragraphs:

"(2) Not to exceed 10 per centum of the funds authorized by any subparagraph under paragraph (1) of subsections (d), (f), and (g) of this section may be used for any of the purposes for which funds are authorized under any other subparagraph of any of such paragraphs (1).

"(3) There are hereby authorized to be appropriated to the Secretary of State such additional or supplemental amounts as may be necessary for increases in salary, pay, retirement, or other employee benefits authorized by law."

Mr. HAYS [during the reading]. Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the Record, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

The CHAIRMAN. If there are no amendments to be proposed, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. FULTON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 5610) to amend the Foreign Service Buildings Act, 1926, to authorize additional appropriations, and for other purposes, pursuant to House Resolution

327, he reported the bill back to the House.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

CITIZEN EFFORT ENDS WASTE IN FEDERAL PURCHASE OF SALT

(Mr. MELCHER asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. MELCHER. Mr. Speaker, citizen participation in our Government at the grassroots level should be the basis of making democracy work. Taxpayer concern for Federal dollars starts at the very point where the waste is first observed.

A constituent of mine, Donald Felton, of Havre, Mont., provides the Nation with a classic example of how one citizen's observation can straighten out a vast bureaucracy and cut a Federal expenditure by over 80 percent. Even though the amount in this case is small and even though the saving for the Treasury will not do much in cutting our Federal deficit, the principle involved is an example for the Nation.

Following is a letter that Mr. Felton wrote to me on February 19 of this year. It explains itself:

HAVRE, MONT.,
February 19, 1973.

To Representative JOHN MELCHER.

DEAR SIR: This letter is to bring to your attention some of the wasteful spending that is going on within some of the agencies such as GSA, that control money that is allocated for the maintenance of some of the Federal buildings here in this part of the country.

On Feb. 13th I delivered to the US Border Patrol building from the Burlington Northern freight house, eight hundred pounds of sodium chloride (salt). This salt is used in the operation of the water softener located in the building. This salt was shipped to Havre from Albuquerque, New Mexico via truck freight, and the freight charges were \$52.96. Now that same salt could have been purchased here in Havre for \$2.20 cwt and if in amounts of say 800 or 1000 pounds they would even deliver it to the Patrol building at that price. That would be a savings of \$4.42 cwt and not to mention the original cost of the salt.

I think you will have to agree with me that it is outrageous to purchase things such as salt and sweeping compounds and ship them so far when they can be purchased here in Havre at so little cost to the taxpayers. This isn't the first time that GSA has done this. It seems to be the policy of agencies such as them to have total disregard for the taxpayers' money. I think that spending such as this should be looked into, especially after Mr. Nixon's talking so much on cutting cost and spending, and especially after what he has done to the farm programs and other programs that in my way of thinking were essential.

Hopeful that something can be done about this kind of waste.

Very truly yours,

DONALD FELTON.

I inquired of the General Services Administration on February 28 to see if they would check out the facts. Here is their reply dated March 19:

HON. JOHN MELCHER,
House of Representatives,
Washington, D.C.

DEAR MR. MELCHER: Thank you for your letter of February 28, 1973, on behalf of Mr. Donald Felton of Havre, Montana, concerning the procurement of salt for the Havre Border Station.

Mr. Felton's statement that the salt for the Border Station in Havre is shipped from our Albuquerque, New Mexico, Supply Depot is correct. As a result of your letter we investigated the relative costs of salt, considering the cost of shipment from the depot to the point of use, and found that salt can be purchased cheaper locally in Havre.

The Havre facility is under the jurisdiction of our Denver Regional Office, and we are issuing instructions to that office to procure future salt requirements locally rather than from our depot.

We appreciate your calling this matter to our attention and if we can be of further assistance, please let us know.

Sincerely,

ALLAN G. KAUPINEN,
Assistant Administrator.

Taxpayer observation such as Donald Felton's, which ended an incident of gross waste in our Government, should be encouraged and praised. All of us are indebted to him for this small saving; we are even more deeply indebted to him for the example of reporting it so it could be corrected by the General Services Administration. I trust that they will now review other possible areas for similar waste.

As one taxpayer to another, I say with all sincerity, "Thank you, Donald Felton."

INTRODUCTION OF BILL TO ESTABLISH A CONSUMER COUNSEL INDEPENDENT OF EXECUTIVE DEPARTMENTS

(Mr. THORNTON asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and include extraneous matter.)

Mr. THORNTON. Mr. Speaker, today I am introducing a bill to establish an Office of Consumer Protection, which, under the direction of a consumer counsel, will be independent of the executive departments of Government.

The growing need for consumer protection and representation in the decisionmaking processes of our administrative bureaucracies is widely recognized.

At the State level, I was privileged to develop legislation for, and then administer, a consumer program which fairly and effectively provided such representation.

The office was charged with responsibility for gathering and disseminating information, resolution and referral of complaints, and recommendations for further legislation.

To accomplish these objectives, the office was delegated certain functions of independent oversight, and the authority to obtain judicial review.

It seems to me that Congress should now establish an Office of Consumer Protection which, subject to judicial review, is delegated similar functions.

By structurally patterning the office after the General Accounting Office, it is emphasized that the protection of consumers' interests is a part of the oversight responsibility of the legislative branch of Government.

By providing avenues for judicial review, the bill reflects the proper balance between the three departments of Government, and has the potential of becoming a useful means of exercising congressional oversight over our national bureaucracy.

It will be obvious to all who study this bill that it is also based upon many hours of hearings by committees which have been considering this subject and upon thoughtful suggestions made by many others.

I believe the Office of Consumer Counsel, as proposed by this bill, will truly be responsible and responsive to the will of the people as reflected by the Members of the two Houses of Congress, the only directly elected officers of our Federal Government.

THE CONSTITUTIONAL OATH SUPPORT ACT

(Mr. ICHORD asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and include extraneous matter.)

Mr. ICHORD. Mr. Speaker, I have today, jointly with the gentleman from North Carolina (Mr. PREYER), the gentleman from Ohio (Mr. ASHBROOK), the gentleman from Florida (Mr. BURKE), the gentleman from South Carolina (Mr. DAVIS), the gentleman from Indiana (Mr. ZION), and the gentleman from Ohio (Mr. GUYER) introduced a bill titled "The Constitutional Oath Support Act."

This bill is the outgrowth of an extensive oversight inquiry undertaken by the Committee on Internal Security into the administration of laws and procedures underlying the Federal civilian employee loyalty-security program and the administration of a related program under the Subversive Activities Control Act of 1950. The committee inquiry revealed a number of failures in the administration both of the program and of the act. It is a purpose of the bill to initiate necessary remedial legislation toward remedying certain deficiencies revealed by the investigation.

This investigation, recorded in four published parts, or volumes, was commenced in the 2d session of the 91st Congress and was continued through the 92d Congress by a subcommittee chaired by the gentleman from North Carolina (Mr. PREYER), and consisting of myself, Mr. PEPPER, Mr. ASHBROOK, and Mr. ZION. The subcommittee report, prepared by Mr. PREYER, titled "The Federal Civilian Employee Loyalty Program," was reported to the House on January 3, 1973—House Report No. 92-1637. It is a significant contribution to the subject and makes a number of recommendations both for executive and legislative action. The bill is directed toward giving legislative support to a number of them.

The bill's provisions, which I shall more fully detail in the course of my remarks, is directed particularly to a resolution of

several important issues with which the committee had been confronted in its inquiry and in hearings on several related bills held in the preceding Congress. These included the question of the repeal or retention of the Subversive Activities Control Act of 1950; failures to maintain an updated and current Attorney General's list in the administration of Executive Order 10450, upon which the present Federal civilian employee security program is based; failures of the departments and agencies to implement the loyalty-security program maintained pursuant to Executive order and civil service regulations; and the question of the need for remedial legislation in light of a 1969 unappealed lower Federal district court decision in *Stewart v. Washington* (301 F. Supp. 601), which invalidated an act of Congress requiring the execution of a "loyalty" oath as a condition of Federal employment.

The manner in which the bill addresses itself to and resolves the aforementioned issues can be fully understood and appraised only in relation to an analysis of the complex factors and the circumstances prompting its introduction. They are, of course, fully detailed in the hearing record and the subcommittee report to which I have referred. It may be helpful briefly to touch upon them on this occasion in the elucidation of the terms of the bill.

Let me say at the outset that the bill repeals those provisions of the Subversive Activities Control Act of 1950 under which the Subversive Activities Control Board was established and its work performed. I shall not dwell upon this subject, in light of the recent action of the Congress in limiting the Board's appropriation, and the President's action this February in deleting any request for its continued funding in his budget for the ensuing fiscal year. For all practical purposes, this action nullified the act, while leaving it upon the books. In repealing the operative provisions of the act sustaining the Board, the bill would finally terminate its existence both in word as in fact.

When enacted over two decades ago, the Subversive Activities Control Act was conceived as a means, among others, of countering the threat which the world Communist movement and its ramifications within the United States posed to our national security and to the free functioning of our domestic institutions. To that end it was designed to provide a source of public identification of Communist organizations operating within the United States. The Subversive Activities Control Board, which the act established, was given the quasi-judicial function of making determinations on motion of the Attorney General of the character of organizations defined as "Communist action" and "front."

Adopted at a time when the Communist movement was largely unified under the control of the Soviet Union, the act's provisions were formulated so as to embrace the exposure only of the identity and mode of operation of Moscow-controlled organizations operating within the United States. As we all know, within the past decade the organization of the movement has changed, and we have

witnessed a proliferation of revolutionary organizations of varying types not embraced within the terms of the act. Apart from the serious failures attending the administration of the act, with the result that the workload of the Board had become negligible, the act had ceased to be effective toward accomplishing those purposes it was intended to serve.

In any event, the Attorney General's duties under the act, so far as it embraced the limited category of Moscow-controlled organizations, overlapped with his duties in the designation of the broader categories of subversive organizations in the administration of the Federal civilian employee loyalty-security program maintained pursuant to executive orders. I refer to the Attorney General's "list." In this work the Board did not participate. It was previously brought into application by President Truman on March 21, 1947, on the promulgation of Executive Order 9835. It was continued under a similar, but revised and superseding order, Executive Order 10450, promulgated by President Eisenhower on April 27, 1953, and now in force.

The list is a compilation or specification of subversive organizations which, after investigation and determination, are designated by the Attorney General. It is but a limited aspect of the broader requirement of the Executive order requiring the conduct of investigations to determine an individual's suitability for Federal employment on loyalty and security grounds. Among other factors, the Executive order requires inquiry into an individual's organizational activities specified in the order as follows:

(5) Membership in, or affiliation or sympathetic association with, any foreign or domestic organization, association, movement, group, or combination of persons which is totalitarian, Fascist, Communist, or subversive, or which has adopted, or shows, a policy of advocating or approving the commission of acts of force or violence to deny other persons their rights under the Constitution of the United States, or which seeks to alter the form of government of the United States by unconstitutional means.

The Attorney General's list, in aid of the execution of this provision of the order, identified those organizations thus generally described as totalitarian, Fascist, Communist, or subversive.

The committee, in the course of its inquiry, thoroughly examined the question of the maintenance and use of the Attorney General's list. We sought the views of all of the cabinet departments of the Government, including the U.S. Postal Service, and not less than 12 independent agencies. Virtually all of the departments and agencies supported the concept of the Attorney General's list as a necessary and valuable guide in the administration of their responsibilities under the executive order. Designations of the character of organizations are of great importance in the administration of denial or dismissal procedures on loyalty and security grounds. It not only forms a basis for inquiries with respect to organizational affiliations of applicants for Federal employment, but in those cases where the character of the

organization is a material fact in issue in eligibility proceedings, the prior determination of the fact renders unnecessary a repetition of the extensive proof and hearings required to establish it, and thus expedites the proceedings. Moreover, several agencies have made clear that they have neither the expertise nor the facilities for making these determinations. They have urged that the determination of such questions be centralized.

However, the departments and agencies have deplored the fact that there has been a failure in maintaining current designations. The list of organizations previously designated under the Truman order—1947-53—192 in number, were redesignated and consolidated with other organizations designated under Executive Order 10450 following its promulgation in 1953. The last designation of any organization was made on October 20, 1955. As of that date, about 283 organizations had been included on the Attorney General's list, all of which, with the exception of 13, are now defunct, and none has been designated since. Yet, it seems clear that on the basis of such evidence as we possess, the list might otherwise have been doubled by organizations within the scope of the order that have subsequently come into existence.

The question of the failures in the maintenance of this list was, therefore, a point of concern in the committee's investigation of the overall employment program.

Under the Truman order, the responsibility which it had imposed upon the Attorney General to furnish the list, and to maintain it currently, was conceived solely for the internal management of the Government and in aid of the exercise of the President's constitutional appointing power. The Attorney General made his designations on the basis of information furnished to him by the Federal Bureau of Investigation and such other investigation as he deemed necessary. No hearings were accorded to organizations thus incidentally affected. This, of course, afforded an expeditious and unimpeded development of the list, but it laid the basis for subsequent complications.

The program was virtually brought to a halt following the decision in *Joint Anti-Fascist Refugee Committee v. McGrath*, 341 U.S. 123 (1951), by which the practice of designating organizations without hearing on their designation was brought into question. In this case, the Supreme Court reversed and remanded petitions for injunctive relief brought by three organizations complaining of their designation without notice or hearing. The reversal went on technical procedural grounds, but the diverse opinions of the Justices made clear that thereafter a designation of an organization without notice and hearing would raise grave constitutional issues.

On the change of administration, and as a consequence of this decision, regulations were first adopted by Attorney General Brownell, published in the Federal Register of May 6, 1953, by which he instituted a procedure in which organizations were afforded an opportunity to question his designations. Un-

der this procedure, however, the Attorney General not only maintained his function of proposing designations, but also retained authority for adjudicating the ultimate fact of the propriety of the designation. Nor did he possess the subpoena authority which only the Congress could authorize, but which might be necessary to make these hearings a reality. As a consequence, the adequacy of the new regulations were immediately challenged in an early effort to apply them. But the constitutional issues raised have never been resolved. The Attorney General back-tracked and ultimately, in 1955, abandoned the program.

See *National Lawyers Guild v. Brownell*, 225 F. 2d 552 (1955). The proceeding against this organization was subsequently withdrawn.

The deficiency of lodging both prosecutive and adjudicatory functions in the Attorney General can thus be identified as the cause of the demise of the program.

A tardy, but unsuccessful, effort to repair this deficiency was made by the President in his promulgation, on July 2, 1971, of Executive Order 11605, amending Executive Order 10450, together with the Attorney General's request for the enactment of a draft bill (H.R. 9669) which was introduced on July 8, 1971, by Congressman ASHBROOK. This order would explicitly require the Attorney General to resume the designations of the described organizations, whose definitions were further enlarged by the amending order. The order, however, delegated the adjudicating function to the Subversive Activities Control Board, then a subject of much controversy. It was a purpose of the draft bill to accord procedural support to the Board in the exercise of this new function.

As the result of an action instituted by several organizations claiming to be affected by the amending order, its enforcement was voluntarily stayed by the Attorney General pending disposition of the litigation, which is now on appeal and as yet unresolved. While the lower court had dismissed the action as premature, in doing so it had volunteered the view that the organizational definitions contained in the order raised constitutional issues by reason of their vagueness and overbreadth. Later the House of Representatives passed H.R. 9669 which subsequently died in the Senate. The final death blow was dealt Executive Order 11605 when the Senate succeeded in obtaining the enactment of a prohibition against the use of appropriated funds for the purpose of administering Executive Order 11605.

The failures in this limited aspect of the employment program have had serious repercussions in the impairment of the investigative program as a whole. A word or two in explanation may be desirable. While the President is authorized by the Congress to prescribe regulations for the admission of individuals into the civil service, to ascertain the fitness of applicants as to character and other qualifications, and to appoint and prescribe the duties of individuals to make inquiries for that purpose, the Congress has not otherwise, with respect to the

generality of the departments and agencies, given him any guidance. Nor has the Congress prescribed the manner or extent of investigations it may have contemplated. Certainly an applicant's association with subversive organizations, their extent and nature, are relevant to a determination of the individual's character and fitness for Federal employment. How are these facts to be ascertained?

Of course, a full field investigation of each individual would normally disclose all relevant information. However, under present practices, full field investigations are only required of applicants for employment in "critical sensitive positions," which embrace about 5 percent of the total Federal employment. They are confined to employees who will have access to top secret defense information and top policymaking positions. Only a national agency check, with written inquiries to former employers, colleges or universities attended, and local law enforcement agencies, is required for the vast number of other positions in the Federal establishment constituting about 95 percent of the total Federal employment. While such checks will reveal such information as enforcement agencies generally possess, it will obviously not be complete, or necessarily current.

Are we then to require full field investigations for all applicants for Federal employment? There are serious policy questions in the resolution of this issue. I think we are all in agreement that the adoption of any such course would not be desirable both from the standpoint of the expense it would entail in the funding of the huge investigative apparatus necessary to accomplish it, and in light of its probable impact upon individual liberties generally. But unless we are to require full field investigations of all applicants for Federal employment, it is obvious that some technique or device must be adopted to give assurance on this important area of inquiry in determining an individual's suitability for employment.

Indeed, the Attorney General's list has been applied as such a device, but the practice has been abandoned within recent years because the list was not currently maintained.

At the present time applicant questionnaires make no inquiry of the individual concerned regarding his activities in specified organizations other than the "Communist Party of the United States of America." The host of other Communist party organizations, several operating under assumed names, and their subsidiary organizations, as well as a number of non-Communist organizations equally at war with our constitutional system, are not the subject of inquiry. While applicant questionnaires contain a generalized inquiry as to whether the applicant is, to his present knowledge, a member of an organization which advocates the overthrow of the constitutional form of government by unlawful means, this is inadequate. Its impact may be easily avoided. It is utterly impossible to provide any effective sanction for the false responses to such generalized inquiry under the perjury or false statement statutes.

An adequate specification of designated organizations, after determination by appropriate procedures, will form a basis for properly constructed questionnaires and thus also serves to remedy the hiatus created by the decision in *Stewart* against Washington, to which I have referred. This decision invalidated those provisions of an act of Congress—5 U.S.C., sections 3333 and 7311—requiring that an individual be denied office or employment in the Government of the United States or of the District of Columbia unless he executed an affidavit that: First, he does not advocate the overthrow of our constitutional form of government; and, second, is not a member of an organization that he knows advocates the overthrow of our constitutional form of government. Prior to this decision, the Civil Service Commission required all applicants to execute standard form 61, titled "Appointment Affidavits," which contained an affidavit as to subversive activities and affiliations in the following language:

I am not a Communist or Fascist. I do not advocate nor am I knowingly a member of any organization that advocates the overthrow of the constitutional form of the Government of the United States, or which seeks by force or violence to deny other persons their rights under the Constitution of the United States. I do further swear (or affirm) that I will not so advocate, nor will I knowingly become a member of such organization during the period that I am an employee of the Federal Government or any agency thereof.

As a consequence of the decision in *Stewart*, this affidavit is no longer required.

This bill contains provisions which are directed toward remedying this deficiency in applicant questionnaires and in furtherance of the investigative program by establishing a centralized agency, the Federal Employee Security and Appeals Commission, which will have the function, on petition of the Attorney General, of making determinations of organizations within five clearly specified categories. To be established as a quasi-judicial agency, the Commission will accord due process hearings to organizations affected, as well as to individuals who may intervene as a party to the Commission's proceedings.

Nevertheless, in serving this limited purpose, the determinations of the Commission are not intended to serve as a substitute for the periodic reports furnished to security and personnel officers by the Federal Bureau of Investigation or for communications within the intelligence community. It is recognized that it will not be practicable, or perhaps even desirable, to maintain a current list of all subversive organizations, regardless of size or influence, under the full scale hearing procedures contemplated for their determinations and designations in proceedings before the Commission. It is, however, important that determinations be made of the principal organizations specified in the bill under procedures which accord them notice and hearing, however tedious and time-consuming the process may be. They will provide that reasonable basis for specification and inquiry in relation to the vast

number of positions for which full field investigations are not required.

I believe it is in point to observe, that in this approach we do not adopt the negative disclaimer technique, or impose any absolute disqualification for Federal employment upon a refusal or inability to make the disclaimer, in the manner and form required under the statute invalidated in *Stewart*. The bill does not establish or mandate the execution of any oath conclusive on the question of the applicant's eligibility for employment.

We do not believe that reliance upon such disqualifying oaths, without opportunity on the part of the applicant to respond, or without a system of inquiry or hearing, is the most satisfactory method for securing the investigative objectives of the employment program. Instead, the bill establishes a system of inquiry and will require the execution of questionnaires on the subject. These, however, are but one step in the investigative process toward making determination on all of the evidence of an individual's suitability in relation to the ultimate constitutional standard of his willingness to support the Constitution in good faith. Responses to these inquiries are nevertheless subject to penalties for false statements under the provisions of existing law, 5 U.S.C. 1001.

I have thus far discussed only the bill's impact with respect to issues on the periphery, perhaps, of the employment program. The bill, however, addresses itself to other more fundamental problems regarding the present deterioration of the overall program. It is apparent that the 24-year-old effort of the Government of the United States to keep those who are hostile to its system, laws, and institutions from penetrating the Federal civil service is in serious trouble.

The committee's investigation discloses that the bulk of the departments and agencies in the executive branch have virtually abandoned what is known as the Federal civilian employee loyalty security program. Others barely pay it lip service. Those agencies which do attempt some screening indicate that they are confused by a wide variety of rules and regulations, and depend upon information and guidance which is not provided to them and which they are not trained to appraise. The evidence indicates that an estimated 95 percent of the Federal civilian work force may be escaping an effective application of the loyalty security program. This includes the 10 percent in the sensitive category described as "noncritical," who nevertheless have access to information classified as "secret."

Doubtless much of the irregularity in the administration of the program is traceable, in point of time at least, to the 1956 decision in *Cole v. Young* (351 U.S. 536). In this case the court had its first opportunity to construe the application of Executive Order 10450 in a dismissal proceeding, and held that the dismissal procedures under Executive Order 10450 were applicable only to positions which had been determined to be "sensitive." It appears that as a consequence of this decision, the departments and agencies no longer apply the order to the bulk of positions now described as nonsensitive.

This holding can be understood only in reference to the history of the order. This is fully developed in the Preyer report and I shall not relate it in any detail. Under the preceding order, Executive Order 9835, promulgated by President Truman, which Executive Order 10450 supplanted, the standard for the refusal or removal from employment on grounds relating to loyalty was that "on all the evidence there is a reasonable doubt as to the loyalty of the person involved to the Government of the United States." This standard was applicable to all positions in the executive branch. It imposed a personal responsibility upon the head of each department and agency to establish an effective program to assure that disloyal persons were not retained in employment in his department or agency. Individuals whose removals were sought on loyalty grounds were accorded hearings before a loyalty board appointed by the head of each department and agency, and there was a right of appeal to the Civil Service Commission's Loyalty Review Board. The application of the order was upheld in *Bailey v. Richardson*, 182 F. 2d 46 (1950), and affirmed in 341 U.S. 918.

The program was continued by President Eisenhower in 1953. It was, however, expanded to embrace not only the explicit loyalty factors contained in the Truman order, but also what have been described as "security" factors unrelated to loyalty, such as criminal conduct, habitual use of intoxicants, drug addiction, mental illness, and sexual perversion. On its adoption it was conceived as embracing all positions in the executive branch. However, to accommodate the expanded factors, a new employment standard was substituted for the Truman "loyalty" standard. The new order provided that an individual's eligibility for employment was to rest upon a determination whether his employment was "clearly consistent with the interests of the national security." Moreover, it was required that proceedings for dismissals under it should be in accordance with the act of August 26, 1950—now 5 U.S.C. 7531-7533. This proved to be a point of failure.

This act, initially made applicable to certain designated agencies, was, as authorized by its provisions, extended by Executive Order 10450 to cover all departments and agencies in the executive branch. The act authorizes the head of an agency to suspend summarily and, after hearing, to dismiss any employee in his agency when he considers that action necessary "in the interests of national security." The term "national security," as used in the order and as used in the act, was neither defined by the President nor the Congress. Describing the order as both "awkward in form" and "ambiguous," the Court in *Cole* against *Young* took the view that the term "national security," as used in the act, was intended to comprehend only those activities of the Government which were directly concerned with the protection of the Nation from internal subversion or foreign aggression, and was hence applicable only to a limited category of positions described as "sensitive." In the 17 years following that decision, there has been no reformation or correc-

tion of the order by the Department of Justice.

Nor does a similar, but more limited, program appear to be effectively applied by the Civil Service Commission. Under present procedures the Civil Service Commission has responsibility for adjudicating an individual's suitability for employment in the competitive service pursuant to a standard established by its regulations of "reasonable doubt as to the loyalty of the person involved to the Government of the United States." This authority is exercised on a post-appointment basis and is limited to the initial probationary period of 1 year after the effective date of the applicant's appointment. Moreover, it embraces only persons appointed to the competitive service and nonsensitive positions therein. This authority it shares concurrently with the departments and agencies.

With respect to sensitive positions in the competitive service, and all positions in the excepted service, the departments and agencies are confided sole responsibility for denials on loyalty and security grounds. However, the Civil Service Commission has indicated that it is not basing denials upon loyalty grounds, but upon the basis of other "suitability" factors. When such other factors do not appear, we must assume that disloyal persons may be employed. The bulk of the departments and agencies maintain no implementing regulations whatsoever for the dismissal of appointees on loyalty grounds from nonsensitive positions. Hence, those loyalty cases bypassed by the Civil Service Commission are not addressed by the employing departments and agencies.

While on such evidence as we now possess, it appears that the departments and agencies are not applying the loyalty program to the vast number of positions, over 85 percent in the civil service now classified as nonsensitive, we are unable to provide specific information as to the degree and extent of the failure. It is an extraordinary fact that neither the Civil Service Commission nor the several departments and agencies of the Government maintain separate indices of persons presently employed as to whom investigation has revealed present or past affiliations with subversive organizations. Moreover, it does not appear that the departments and agencies are in possession of any designation of such organizations as a basis for compiling any such indices other than the largely defunct Attorney General's list from which the Department of Justice is now assiduously striking defunct organizations rather than updating its designations.

Nevertheless, testimony of personnel and security officers of the agencies of whom inquiry has been made points to the conclusion that the program is not being generally applied. The fact is that during the past 5 years—a cutoff period only—the bulk of the departments and agencies have not dismissed any employee on loyalty grounds from either nonsensitive or sensitive positions. Nor has the act of August 26, 1950—authorizing suspensions and dismissals in the interest of "national security"—been applied since 1965.

Testimony of representatives of U.S. Postal Service must be regarded as symptomatic, if not conclusive, of failures in this aspect of the program. They have admitted that they are now employing known and active members of Communist and other subversive organizations. In correspondence with the committee, the U.S. Postal Service has advised us, for example, that it has employed three persons identified as Communist Party members, two of whom are present members, and one of whom was a past member; four members of the Socialist Workers Party—Trotskyite Communist—three of whom are current and one a former member; one present member of the Progressive Labor Party—Communist—three present members of the Young Socialist Alliance, a youth group of the Socialist Workers Party; and eight members of the Black Panther Party, seven of whom are current members and one of whom was a past member. In response to the question whether the Postal Agency acquired information regarding such membership at a time prior or subsequent to the individual's employment with the agency, we were advised that in all cases this information was acquired by the agency at a time subsequent to their employment, and that this information was derived, in fact, from the post appointment national agency check.

This brings us to a vital important point. No preappointment investigation is conducted for persons employed in nonsensitive positions. This failure has obviously had serious and unfortunate results. When such persons are brought on board, so to speak, the agencies have been either unwilling or unable to get rid of obviously disloyal persons. Certainly the agencies have not adopted regulations or procedures to implement their dismissal. We are at a loss to understand this continued failure. Over 27 years ago, President Truman's Temporary Commission on Employee Loyalty, which had examined into the then existing loyalty program, reported that the departments and agencies were in general agreement that preemployment investigations and checks be conducted. A similar recommendation has recently been made by the Preyer subcommittee. It reported:

In our view a minimum degree of preemployment investigation should be mandatory for access to all positions, including those generally, although not always accurately, described as nonsensitive. We regard such preappointment investigations as essential to the effectiveness of the loyalty program. It is, moreover, a procedure generally of decided benefit both to the Government and to the applicant. The appointing power has more discretion in making preappointment determinations. It is not bound to the same technical requirements and limitations as it is—and very properly so—with respect to post-appointment determinations. The practice is also less wasteful, for there will be a reduction in turnover of employees. It is likewise of benefit to the applicant. Having usually uprooted himself and his family to accept Federal employment, he and members of his family must suffer obvious hardship as a consequence of rejection after employment. Thus, by this requirement he obtains greater assurance of his ultimate retention in employment following appointment.

By the terms of the bill introduced today, we give support to this and other recommendations. We would require the President to establish and maintain an effective program to insure that no person shall be employed in the executive branch "as to whom there is a reasonable doubt that such person will in good faith support the Constitution of the United States." This basic standard is, in effect, an implementation of a minimal standard required by the Constitution itself in the provisions of article VI, clause 3. To that purpose the bill requires the conduct of appropriate investigations and a minimum preappointment check with favorable results of the files of the Federal Bureau of Investigation and of the Civil Service Commission, together with the completion of questionnaires relating to membership in organizations prescribed by the bill and as determined by the Federal Employee Security and Appeals Commission. Individuals suspended or dismissed by the heads of the departments or agencies in the application of the standard are accorded the right of appeal to the Commission, and are thus assured a final hearing by an impartial tribunal.

I might also add that since the Government now maintains an adequate investigative apparatus for the conduct of investigations mandated under Executive Order 10450, the investigative requirements of the bill will not result in any enlargement of the present system, or any increase in costs.

In the matter following I briefly set forth the principal provisions of the bill and the underlying authority for their inclusion:

SECTION-BY-SECTION ANALYSIS

Section 1 of the bill provides that this act may be cited as the "Constitutional Oath Support Act."

Section 2 of the bill, headed "Statement of Purpose," explains that a principal purpose of the act is to establish procedures in the executive branch to insure that the oath or affirmation to support the Constitution, required of Federal employees by law and in pursuance of article VI, clause 3, of the Constitution of the United States, is taken in good faith. While this is a principal purpose of the bill, it is further explained that the procedures established by it are intended to provide a means for assuring that only such persons are employed by the Government as are disposed to protect and defend the Constitution to the best of their ability against all enemies, foreign and domestic, who will preserve, uphold, and adhere to the system and processes established by the Constitution, and who are committed to the faithful execution of their duties thereunder. Thus, likewise, more specific content is given in elucidation of the employment standard set forth in section 3 of the bill.

Section 3 of the bill, headed "Employment Standard," requires the President to maintain in the executive branch an effective program to insure that no person shall be employed "as to whom there is a reasonable doubt that such person will in good faith support the

Constitution of the United States." Foreign nationals are of course excepted from the requirements of the act.

While we believe this standard is sufficiently clear in its terms, it has been further clarified, as we have noted, by section 2. The standard is derived from express provisions of the Constitution itself and the provisions of the present statutory oath of office (5 U.S.C. 3331) implementing the constitutional requirement.

Article VI, clause 3, of the Constitution requires all Senators and Representatives, all members of the several State legislatures, and all executive and judicial officers, both Federal and State, to be "bound by oath or affirmation, to support this Constitution." Article II, section 2, of the Constitution spells out the terms of this oath as required of the President in the following language:

I do solemnly swear (or affirm) that I will faithfully execute the Office of President of the United States, and will to the best of my ability, preserve, protect and defend the Constitution of the United States.

The statutory oath, to which I have referred, requires each individual, except the President, elected or appointed, to an office of honor or profit to the civil service or uniform services, to take the following oath:

I, AB, do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely, without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties of the office on which I am about to enter. So help me God."

I should further observe that in hearings upon a similar bill (H.R. 11120), which Mr. PREYER and I introduced in the preceding Congress, the claim was made from some sources that the standard of good faith support of the Constitution was vague and, therefore, unconstitutional. We cannot accept this charge. If we were to concede that this standard is unconstitutionally vague, or suffers from any other claimed defect, then it must follow that the provisions of article 6, clause 3, and article 2, section 1, of the Constitution, to which I have already referred, are themselves unconstitutional. Unless we are to treat the constitutional language as meaningless we cannot escape the implication that what such opponents are saying, in effect, is that a provision of the Constitution is itself unconstitutional. To borrow the words of Mr. Justice Frankfurter, are we "to suffuse a part of the Constitution with an atmosphere of unconstitutionality"?—*Korematsu v. United States*, 323 U.S. 214, 224f.

This charge, nevertheless, as absurd as it may appear, was, indeed, made and disposed of in *Cole v. Richardson*, 405 U.S. 676 (1972), as well as in *Ohlson v. Phillips*, 304 F. Supp. 1152 (1969). Affirmed without opinion or dissent, 397 U.S. 317. In the former case, the Court upheld a Massachusetts oath conditioning public employment on the taking of an oath in the following language:

It do solemnly swear (or affirm) that I will uphold and defend the Constitution of the United States of America and the constitution of the Commonwealth of Massachusetts and that I will oppose the overthrow of the government of the United States of America or of this Commonwealth by force, violence, or by any illegal or unconstitutional method.

In the latter, the Court upheld a Colorado statute requiring all teachers to take the following oath as a condition of employment:

I solemnly (swear) (affirm) that I will uphold the Constitution of the United States and the constitution of the State of Colorado, and I will faithfully perform the duties of the position upon which I am about to enter.

In response to the claim of vagueness, advanced in *Cole* with respect to the second clause of the oath, the Chief Justice, quoting Mr. Justice Harlan, observed that—

Almost any word or phrase may be rendered vague and ambiguous by dissection with a semantic scalpel.

Said Chief Justice Burger—

The Court rejected such rigidly literal notions and recognized that the purpose leading legislators to enact such oaths, just as the purpose leading the framers of our Constitution to include the two explicit constitutional oaths, was not to create specific responsibilities, but to assure that those in positions of public trust were willing to commit themselves to live by the constitutional processes of our system. . . .

Moreover, while the constitutional standard as applied in the more restrictive oath forms, which establish a conclusive presumption of ineligibility on refusal or failure to execute them, has been upheld, the bill makes a less rigid application of this standard in relation to an investigative program to ascertain the good faith with which an applicant for employment may comply with it. If there was any question of such an application, as made by the terms of the bill, this has since been dispelled by a recent decision of the Supreme Court expressly upholding it. That was the February 23, 1971 decision of the Supreme Court in *Law Students v. Wadmond*, 401 U.S. 154. This, and other relevant supporting cases, have been fully analyzed in the subcommittee's report, pages 144-162. See also *Lerner v. Casey*, 357 U.S. 468 (1958); *Garner v. Los Angeles Board*, 341 U.S. 716 (1951); and *Application of Walter Marvin, Jr.*, 53 N.J. 147 (1969), cert. denied by the U.S. Supreme Court. October 13, 1969.

Section 4 of the bill, headed "Authority to Prescribe Regulations," as the heading suggests authorizes the President to institute such measures as may be necessary to maintain the program required by section 3. This section of the bill likewise makes clear that the procedures are not to be exclusive of the maintenance of any loyalty or security program which may be now required by law, particularly with respect to certain sensitive agencies, or in derogation of the authority of the President under the Constitution or laws of the United States to maintain such additional measures as he deems necessary to assure the appointment and re-

tention of persons suitable as to character and fitness.

Section 5, headed "Conduct of Investigations," requires that all appointments shall be made subject to investigation to determine an individual's suitability for employment in accordance with the requirements of section 3 of the act and as may otherwise be required by law or regulation. The section, moreover, requires a minimum preappointment check of the files of the Federal Bureau of Investigation and of the Civil Service Commission, as well as the completion of questionnaires required by section 6 of the act. It also requires that personnel employed in carrying out the act shall be specially trained for their duties.

Section 6 of the bill, headed "Organizational Inquiry," establishes guidelines for the conduct of investigations into membership or association with defined groups in making determination of the individual's suitability for employment in relation to the employment standard. Five categories or types of organizations, all clearly within constitutional limits, are specified and defined. More fully described in the bill, they include:

First. Organizations of whatsoever description which have as a purpose or objective the overthrow of the Government of the United States or of any State by unlawful means.

Second. Organizations which advocate, teach, or urge, as a principle to be translated into action, the propriety or necessity of the unlawful use of force or violence to oppose the execution of Federal or State laws or of assisting or engaging in any rebellion or insurrection against the authority of the United States or of any State.

Third. Organizations or groups which advocate, teach, or urge, as a principle to be translated into action, the necessity or propriety of unlawful killing or wounding any officer or employee of the United States or of any State, or of unlawfully destroying or damaging any property or instrumentality of the United States or of any State.

Fourth. Organizations or groups which advocate, teach, or urge, as a principle to be translated into action, the necessity or propriety of the commission of unlawful acts or force or violence to deny other persons any right or privilege secured by the Constitution or laws of the United States.

Fifth. Organizations or groups controlled by the foregoing and operating in support of their purposes.

The section also requires all applicants for employment to complete questionnaires relating to membership in organizations advocating or teaching that the Government of the United States or of any State should be overturned by force and organizations of the five types above noted which have been specifically determined to be of such types in proceedings before the Federal Employee Security and Appeals Commission. The questionnaires required are of such form and character as fully comply with applicable decisions of the Supreme Court itself, particularly *Law Students* against *Wadmond*, *supra*, and other cases briefed

in the subcommittee report to which reference has been made.

Security and Appeals Commission," Security and Appeals Commission," establishes the Commission as a quasi-judicial body whose functions are set forth in the following section. The Board would be composed of five Commissioners, all of whom shall be trained in the profession of law and have been admitted to Federal or State bars. Additionally, they are required to be knowledgeable by reason of training or experience in concepts of ideological subversion and the history and origin of subversive organizations. Members shall be appointed by the President by and with the advice and consent of the Senate. No more than three Commissioners shall be members of the same political party.

Section 8, headed "Function of the Commission," details its duty and authority. Briefly, the Commission has two principal functions. Its first is to make determinations, on application of the Attorney General or such other person as the President may appoint, whether organizations are of the five types set forth in section 6. These determinations are in aid of the execution of the program laid down by sections 3 and 6 of the bill.

Application for such determinations may also be made by the heads of departments and agencies in cases where, in the execution of other programs pursuant to law or Executive order, such as the industrial security program, the character of any of the specified organizations is a controverted fact in issue not previously adjudicated by the Commission. Full due process hearings are accorded to all organizations, and any organization so determined may thereafter likewise make application for determination that it is no longer of the types set forth in section 6.

Second, the Commission will serve as an impartial appeals body upon application of individuals dismissed or suspended from employment pursuant to section 3 of the act. Individuals holding employment in the Federal Bureau of Investigation, Central Intelligence Agency, and National Security Agency are alone excepted. There are special enactments governing their retention in employment, and these are not disturbed by this provision of the bill.

All other persons claiming to be adversely affected by the application of any of the provisions of the act may intervene as a party to the Commission's proceedings. Full due process hearings are accorded in all instances. Each party shall have the right to the assistance of counsel and, in all evidentiary hearings conducted by the Commission, shall have the right to offer oral and documentary evidence, and to cross-examine witnesses. All hearings are required to be public, with the single exception of hearings on the appeal of individuals who are dismissed or suspended from employment pursuant to section 3. However, if the individual involved demands a public hearing, it is required that his hearing shall be public.

Section 9, headed "Compulsory Proc-

ess," accords to all interested parties the power of subpoena to compel the attendance of witnesses and the production of evidence in proceedings before the Commission. Federal district courts are granted jurisdiction to enforce this process on application.

Section 10, headed "Misbehavior at Hearings," likewise gives ancillary authority to the Commission to maintain order in the hearing room similar to that possessed by Federal district courts.

Section 11, headed "Judicial Review," accords all parties the right of obtaining a review of orders of the Commission on appeal to the U.S. Court of Appeals for the District of Columbia and on certiorari to the Supreme Court of the United States. The right of judicial review is fully accorded to all persons adversely affected by the operation of the provisions of the bill, but dilatory actions beyond the scope of orderly judicial review are properly limited.

Section 12, headed "Laws Repealed and Amended," repeals all of the operative provisions of the Subversive Activities Control Act of 1950 relating to the maintenance and work of the Subversive Activities Control Board. However, certain independent sections are retained, particularly section 4 of the act—relating to espionage and other prohibited acts—and sections 18 through 32 which include amendments made by the Subversive Activities Control Act to other sections of law unrelated to the work of the Board. The section also includes conforming amendments rendered necessary by reason of the disestablishment of the Board and the creation of the Commission.

Section 13, headed "Separability of Provisions," expresses the intent of the Congress that if any provision of the act shall be held invalid, other provisions shall not be affected.

In conclusion, I would advise the House, and the members of the public generally, that it is my purpose to call for early hearings on this bill. I urge all Members and other persons who are interested to present their views upon the measure.

THE BUREAUCRATIC ACCOUNTABILITY ACT

(Mr. DELLUMS asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DELLUMS. Mr. Speaker, students in schools all over the United States are learning how their Government operates: the Congress passes the laws of the land, and the Executive carries them out.

I hate to disillusion them, but that is not how it works. What we say or do in Congress often has very little to do with the actions of the Executive. In fact, the Federal Government is the greatest lawbreaker in the country today.

Last summer the Congressional Black Caucus held a series of hearings on the general topic of "governmental lawlessness," the widespread bureaucratic practice of distorting, ignoring, and

subverting the congressional mandates contained in legislation. These hearings uncovered a pattern of abuse so extensive as to constitute the gravest threat to meaningful self-government.

In response to what we learned during those hearings and other congressional investigations of governmental lawlessness, Senator KENNEDY and I, along with 26 of my colleagues in the House, are introducing today the Bureaucratic Accountability Act of 1973. This legislation proposes concrete steps toward strengthening responsible and reliable government through amendments of the Administrative Procedures Act.

I strongly feel that among the basic causes of "governmental anarchy" is a lack of mechanisms which would allow citizens some means of protection against officials in their concrete, day-to-day contact with them. These mechanisms cannot guarantee that Congress will pass wise and democratic substantive legislation, but they allow us to hope when such legislation is indeed passed, citizens may rely on seeing it actually carried out. And this hope is the basis of active democratic reform and confidence in the capabilities of government.

The aim of the "Bureaucratic Accountability Act" is to confine the bureaucracy to its legal purposes. We intend to do this by the democratic method of increasing its responsibility, its answerability, both to citizens and to the intent of Congress. Specifically, the bill strengthens the ability of citizens to enforce their rights as established by Congress—against either action or inaction by the bureaucracy. Notice-and-comment rulemaking requirements are extended, costs of participation are reduced, bars to judicial review are removed, and procedures set up to enforce State and local compliance to Federal standards in administering grant-in-aid programs.

All of these reforms are based on long-felt needs and careful suggestions from the many groups involved in working in administrative law. I think the over-all result will be more effective government, greater cooperation between citizens and officials, and greater congressional effectiveness.

I would like to emphasize this last point. These administrative reforms are a natural corollary of recent proposals to Congress and the executive branch. In both these ways, we would strengthen the status of the objection legislation, arrived at by democratic means, as against the subjective political and bureaucratic desires of an uncontrolled administration.

The basic aim of the bill is to insure that a citizen may receive an accurate idea of his rights and of the procedures of the bureaucracy by reading the statute books and published material of the bureaucracy. I think this will mean an important extension of responsible participation in the work of government.

ANALYSIS OF THE BUREAUCRATIC ACCOUNTABILITY BILL

Sections 101 and 102(a).—Extension of rulemaking requirements: The Administrative Procedures Act sets forth

some minimal due process requirements to be followed whenever the bureaucracy issues "rule" that affects the citizenry. These include adequate prior public notice of the intended rule, opportunity for written comments by interested persons, and opportunity to petition for changes or exceptions. Opportunity for oral argument is discretionary, and final administrative decisions are not confined to any record established by these proceedings.

Although these requirements are minimal, there exist very large exceptions. In fact, at present the requirements apply mainly to the regulatory agencies. The time has come to extend these APA procedures to social programs and other aspects of "positive government." Allowing the citizen to present his case, and requiring the bureaucracy to hear all relevant views, are increasingly indispensable tools of effective government.

Therefore, this bill eliminates the existing exemptions of "matters relating to public property, contracts, loans, grants, benefits" from the rulemaking requirements of notice and comment.

Section 102(b).—New criteria for rulemaking requirement exemptions: This section regulates those cases in which there is a legitimate public interest served by exemptions from the public notice and opportunity to comment requirements. First, the present exemption of interpretive rules and general statements of policy is eliminated. These agency decisions are often just as important as rules proper. The division between "rules" and "interpretive statements" is inefficient for deciding what should or should not be exempted.

The bill substitutes a more function classification, based on language already in the APA: "impracticable, unnecessary, or contrary to the public interest." Grant-in-aid decisions cannot be exempted, in accordance with the procedures set up in section 401.

Section 201—Payment of expenses incurred before agencies: Our system of government relies on the spontaneous cooperation of the citizenry. This includes active participation in the administrative process, either by defending rights that Congress has sought to protect—the "private attorney general" concept already recognized by the courts—or by providing information and perspectives that the bureaucracy would not have the resources to discover. When this private participation aids in vindicating public policy, the citizen should not be penalized by excessive financial burdens. Costs of participation should be kept at a minimum, and the agency should have the option of subsidizing those who otherwise would not be able to make a contribution. The Comptroller General has already expressed his opinion that agencies may spend appropriated funds in this way; this section of the bill makes it incontrovertible.

Section 301—Sovereign immunity: "Sovereign Immunity" is a common law doctrine that prohibits suits against the sovereign without his consent. It is used by the Government arbitrarily and unpredictably, and frustrates the orderly legal planning of the citizen. The removal of this doctrine in the days of ac-

tive positive Government is a long overdue reform endorsed by most of those concerned with administrative law.

Section 401—Enforcement of standards for grants: The aim of this section is to insure the maintenance of Federal standards of performance and policy aims in those State and local programs that depend on Federal funds.

The bill defines grant-in-aid programs as "programs pursuant to which the Federal Government transfers funds to State and local governments and public and private nonprofit organizations to provide general public services or finance programs for special groups."

Second, all grant decisions are made subject to the public notice-and-comment procedures of rulemaking. This was done in section 102 above. This will allow objections to be heard before a State or local program is approved and funded. Relevant materials are required to be made available to interested persons.

Third, procedures for hearing complaints concerning grant plan applications and the administration of existing grant programs are set up, both on the level of the Federal administering agency and the State or local grantee.

The agency will hear complaints when they are made in the name of a substantial number of those persons affected by a grant-in-aid program, or when the agency decides an important policy question is involved. The agency is also given less disruptive ways of enforcing Federal standards than the complete termination of the program.

Grantees are required to hear complaints from any person adversely affected by their administration of the program. Minimum standards for grantee complaint procedures are set up.

FOOD PRICES AND THE FARMER

The SPEAKER pro tempore (Mr. McFALL). Under a previous order of the House, the gentleman from Kansas (Mr. SEBELIUS) is recognized for 60 minutes.

Mr. SEBELIUS. Mr. Speaker, I appreciate this opportunity to discuss the current situation regarding food costs and farm prices. We must keep this issue in proper perspective if we are going to find answers to the high food cost problem.

The current attack on farm prices and the farmer-stockman in particular is an injustice. A quick review of the record reveals the farmer has led the fight against inflation for the past 20 years:

Farm prices for food are up only 6 percent from 20 years ago;

Wholesale food prices are up 20 percent from 20 years ago;

Retail food prices are up 43 percent from 20 years ago;

The average wage rates per hour for the nonfarmworker in 1950 was \$1.33. In 1972, it was \$3.65 an hour and in January of this year, it was up to \$3.78.

The farmer only recently began to get for his crops what he received 20 years ago. And, the cost of items that go into his production have doubled and in some cases, tripled; and

There has been much discussion regarding high meat prices. In 1950, choice

steers at Omaha were bringing \$28.88 per hundred weight. If choice steers had gone up as much since 1950 as a first-class postage stamp, they would now be worth \$77.02 per hundred weight. Compared to the rise in cost of medical care, they would be bringing \$72.34 per hundred weight. Compared to the rise in average hourly wage rates, steers would be \$80.69 per hundred weight, and compared to the rise in per capita disposable income, \$80.89 per hundred weight. The current Omaha quotations range in the neighborhood of \$45 per hundred weight. Indications are that cattle presently on feed to be marketed during the first half of 1973 will have to average between \$38 and \$42 per hundredweight to break even as a result of increasing costs and substantial death losses due to adverse winter weather.

I do not question the concern or the integrity of unhappy consumers across the Nation. I do question and take strong exception regarding the understanding needed to keep food prices in proper perspective.

Cheap food is not a birthright of American citizenship. To satisfy the growing demand for meat and food products, the farmer must receive equity at the marketplace.

We do have cheap food in the United States, but this is no reason for a family to overextend its budget with luxury items bought on time and consumer credit accounts which leave only a fixed minimum amount for food purchases. The fact is that the percentage of disposable income spent for food has declined steadily over the past 20 years.

Agriculture has given America the lowest cost food bill in the history of mankind—approximately 16 percent of disposable income for the best quality of food in history. Compare this figure with 23 percent in 1950. America's food bill was approximately \$51 billion less than it would be if Americans still paid 23 percent of their income for food.

Americans spent that \$51.7 billion for second cars, trail bikes, boats, stereophonic sound systems, fancy furniture, summer cottages, dishwashers, color television, and a host of other consumer goods. This means jobs and higher incomes for nonfarm employees.

By comparison, consumers in Great Britain spend 29 percent of their income for food, Italians spend 45 percent, and Russians spend approximately 50 percent.

I think it is revealing to study the composition of the consumer's food dollar. A little more than 66 cents, or two-thirds of every dollar spent by U.S. consumers for farm-originated foods in 1972, went to pay the marketing bill, according to preliminary estimates of the U.S. Department of Agriculture.

The marketing bill includes the cost of transportation, processing and distribution, and accounted for a whopping \$77 billion out of the total expenditures of \$116 billion. Labor was the most costly element in the marketing bill, amounting to nearly one-half or more than \$37 billion. That is a little more than 32 cents out of the total farm food dollar and nearly equals the farm value of 34 cents.

Yet, in the March 5 edition of Newsweek, a labor leader was quoted as saying:

When the price of a new car goes up \$50, the working man pays little attention, but when the price of steak goes up pennies, he gets madder than hell.

In other words, the consumer literally bites the hand that feeds him.

This same Newsweek article went on to further spell out the breakdown of the price of bread which I would like to share with my colleagues. The farmer sells enough wheat for a 1-pound loaf of bread to a miller for 3.8 cents. The miller grinds that into flour that he sells to a baker for 4.9 cents. The baker adds ingredients that cost another 2.3 cents and bakes a loaf of bread that he sells to a retailer for 20.3 cents. The retailer then sells it for 25 cents.

I think these illustrations serve to place food costs and farm prices in proper perspective.

Consumers also need to understand the farms pricing mechanism. Our free enterprise society has become accustomed to a form of price fixing whereby prices seem to move up uniformly within an industry. Then that increase is fixed until the next increase is announced. However, the pricing of farm commodities reflects pure supply and demand. Rising food prices are always front-page headlines. How many headlines announced a 41-cent—20-percent—decline in wheat prices in February? Farm prices, unlike most of our economy's prices follow a roller coaster pattern. What other industry would tolerate a price rollback of 20 percent especially when they are already at a level far below par with the rest of the economy.

Another factor consumers should consider is the weather—a most important but little discussed factor that has directly affected the farm and food price structure in the last year. The effects of Hurricane Agnes, adverse weather in Russia, drought conditions in India, a swift Pacific current off Peru, and a bitter winter in the Great Plains have escalated meat and protein prices far beyond expectations.

In the Great Plains, extreme winter weather has resulted in death losses two or three times normal levels. Weight gains for the cattle that have survived have been substantially reduced and, as a result, the cost of gains to producers has skyrocketed.

Of course, every American and especially the American farmer, is interested in providing the best quality food possible at a reasonable price. The American farmer has done this for the past 20 years with little or no credit and at a price well below what has been received by the nonfarm sector.

I am hopeful that this discussion will be of help to consumers and allow us to approach this problem with the proper perspective. In closing I would like to call the attention of my colleagues to an article from the January issue of the Reader's Digest, "Why Food Prices Keep Rising." The article provides much factual

information to those interested in food prices as well as a probing look into the food industry:

WHY FOOD PRICES KEEP RISING
(By James E. Roper) *

Labor unions involved in food distribution have made a fine art of featherbedding, make-work and greed. Until they agree to provide a day's work for a day's pay, housewives will continue to find "hidden costs" at the checkout counter.

In Los Angeles, a truck driver delivers bread to a supermarket warehouse and earns, in addition to his \$10,000 annual salary, a union-mandated ten-percent commission as a salesman.

In St. Louis, a supermarket butcher cuts up chickens with a knife instead of using a much faster saw. Why? Union rules.

In Baltimore, a shipment of frozen orange juice arrives on pallets at a warehouse, but the warehouse uses a different-sized pallet. So the juice has to be transferred by hand from one pallet to another before forklift trucks move the cargo farther.

These are some of the hidden costs that today find their way into your food bill at the supermarket checkout counter. For supermarkets have just about exhausted their ability to absorb any more expenses themselves. Their profits, as a percentage of sales, have fallen from 1.41 in 1965 to .86 in 1971—to an estimated .55 for 1972. This means that a store selling \$10 worth of groceries gets to keep only 5½ cents in profit.

For this razor-thin margin, food chains buy merchandise, warehouse it, sort it, truck it to individual stores, price it, display it and, finally, check it out at the cashier counter. The physical job is massive: an annual 10 billion cases of merchandise weighing 140 million tons. So much labor is needed to keep this tonnage moving—and the profit is now so tiny—that retail prices must eventually reflect the minutest change in the costs of that labor. And those costs—in base pay, fringe benefits and inefficiency—are soaring.

Supermarkets have yielded to teamsters, retail clerks and meatcutters more increases in wage and fringe benefits in the last three years than during the previous nine. Nationally, wages in all food retailing jumped nearly 20 percent in those three years—compared with a 12-percent rise in retail food prices. The Pay Board says that supermarkets, for the good of the country, should resist all such increases that go above national guidelines for curbing inflation. However, the industry is in a weak bargaining position. A strike of just a few days can ruin tens of thousands of dollars' worth of perishables; a long strike means lost customers who never come back.

When Nixon Administration Cabinet members twice summoned supermarket operators to Washington during 1972 to explain why food prices were going up, the executives, speaking behind closed doors, twice placed most of the blame on labor costs—but they dared not mention the subject to waiting news reporters. "We were afraid to," concedes one of the conferees, the head of a major chain. "We have to live with the unions."

Wages Up, Output Down. Increases in wages and benefits in the food industry could be offset, of course, if employee productivity kept pace. It hasn't. The physical volume of merchandise sold by store personnel for each hour of work edged up an

average of only 1.5 percent during the last decade. The management-consulting firm of Daniel J. Bartz and Associates, studying 64 representative warehouses across the country, found that wages there went up 37 percent in five years, while the number of cases handled per man-hour of work remained about the same and the tonnage went down 36 percent. In the last ten years, says the head of a regional retail chain, the cost of his meatcutters went up 65 percent, while their productivity went up only 35 percent.

Most union contracts, in fact, discourage increased productivity. A U.S. Department of Commerce staff study estimates that work restrictions written into contracts cost consumers up to \$400 million a year through higher food prices. Here's how the unions take these millions of dollars out of your pocket:

The Teamsters. Locals of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen and Helpers have scores of contracts that require most truck drivers to work during approximately the same hours—causing costly traffic jams at unloading docks during peak periods, and leaving expensive transportation equipment idle during off-hours. Some drivers, paid by the hour, stall to stretch their day into overtime. In Pittsburgh, drivers caught attending movies during working hours could not be fired: the union insisted that they were ill and had to go into theaters to cool off. A number of contracts, particularly in New York City, provide that a driver must be accompanied by a "helper," even though the helper may have nothing to do on that truck's run.

Many drivers who deliver huge trailerloads of bread or milk receive, in addition to their salaries, "sales" commissions of 7 to 11 percent even though they do no selling. In Los Angeles recently, a bread deliveryman collected commissions of \$104,000 in 16 months. Even the union agreed that this was unreasonable, but instead of eliminating the commission the union simply divided the money among more drivers. All of which helps explain one finding of the National Commission on Food Marketing: that it costs about as much to deliver a loaf of bread from the bakery to the consumer as it does to grow the wheat, mill the flour and bake the bread.

When a union truck arrives at a warehouse, only the driver or his crew is allowed to place the cargo onto the unloading platform. This restriction has resulted in some bizarre impasses: in parts of California, for instance, a portable conveyor belt may not be placed inside the truck because the belt is operated not by truckers but by warehousemen, members of a different local of the same union. (Lines are sometimes painted on the floor to delineate jurisdictions.) The warehousemen in turn set a "pace" which becomes the work norm for moving unloaded cargo. Says an official of one Pittsburgh chain, "Our crews, working by hand, used to load four trucks a day. When we installed equipment so they could load 15 trucks a day, the union said that eight or nine were enough—and so that's now the 'pace.'"

The Clerks. The Retail Clerks International Association, which represents all employees except the meat workers in unionized stores, has ensnared its members in restrictive work practices that rival the worst achievements of the Teamsters. Some examples:

Food manufacturers generally want their products placed on grocers' shelves by their own men—at no cost to the stores. But the union insists, with few exceptions, that this work be done by clerks; if a manufacturer's representative does the chore, a clerk must stand idly by.

Although supermarkets do nearly as much business on Fridays as on Mondays, Tuesdays and Wednesdays combined, the union bars split workweeks. The result is that a store manager, without authority to schedule his

employees efficiently, finds himself with idle workers early in the week, and too few workers on Friday.

Other frequent union provisions require clerks to price-mark all merchandise in the store, even if the manufacturer already has affixed prices, and bar store managers from doing "clerk's work," even in emergencies.

The Meatcutters. Locals of the Amalgamated Meat Cutters and Butcher Workmen of North America generally insist that retail portions of meat be cut, wrapped and priced inside the store rather than at a central facility where it could be done more cheaply—which is the practice in Europe. Contracts often stipulate that well-paid journeymen butchers do relatively simple tasks such as filling display cases, washing knives and sweeping back rooms. Indeed, a detailed study of four Ohio supermarkets showed that meatcutters spent less than one half their time doing skilled work.

Almost everywhere, butchers report for work at about the same time, resulting in surplus manpower during slack morning hours and a shortage during busy afternoons. Contracts also usually provide that a butcher must be on duty whenever meat is on sale, even though it is already cut, wrapped and priced. With some stores open all night and on Sundays, this sometimes enables meatcutters to receive double pay, or better, just to preside over well-stocked cases. With butchers earning up to \$14,000 a year, plus high-paid overtime, most supermarkets today lose money on their beef sales—and compensate by raising prices on other items.

Future Challenge. What can be done about rising food prices? "Although the primary cause of higher prices is the cost of labor," says Secretary of Agriculture Earl Butz, "it is also clear that the whole food-distribution system needs to be improved." Here are the basic steps that need to be taken:

1. Labor must curb its demands for wage increases far in excess of productivity increases. It must give up pointless work restrictions, perhaps in return for moderately higher wages (as justified by the increased productivity that would result) and guarantees against present employees losing their jobs.

2. Supermarket owners must accelerate their capital spending to provide the tools for both labor and management to be more productive. For a decade, they have delayed in adopting the much-heralded automatic checkout counter, which would assure customers faster, more accurate checkout service and save the industry \$100 to \$250 million a year if widely used. Says one food-chain executive: "The technology for a more efficient checkout operation is available—it's already a big hit in Switzerland—but nobody wants to be the first here to make the investment, about \$125,000 a store."

3. Various segments of the industry must cooperate to improve the distribution system. Many suppliers still load their goods directly onto the floors of railway cars rather than onto wooden pallets, which can be unloaded with forklift trucks perhaps six times as fast. Then, too, pallets come in two sizes so that a shipment on one size of pallet sometimes arrives at warehouse that uses only the other size, forcing workmen to transfer the cargo from pallet to pallet by hand. Shipments also arrive in a bewildering variety of cartons that make efficient handling impossible. Robert Bohall, of the U.S. Department of Agriculture, estimates, for instance, that failure to standardize containers for apples adds one cent a pound to the retail price.

4. Consumers must decide whether they are willing, for the sake of economy, to accept certain changes in supermarket operations. Would American housewives, after checking out, be willing to put their groceries in bags themselves, as many European women do? Supermarkets could save immense amounts of labor by eliminating their

*James E. Roper, a free-lance writer, was editor of the 11-volume 1966 report of the National Commission on Food Marketing. The commission was established by the federal government to make a two-year study of the distribution of food from farmer to consumer.

bagging operation, but they are afraid to try. Do shoppers really want to pay for the choice of 8000 to 11,000 items that a large supermarket offers? A recent study found that some 91 percent of the items in a store sold less than 24 units a week, and are costly to stock. Says one official: "A woman is entitled to choose yellow facial tissue, but does she need the choice of four brands of yellow facial tissue?"

5. The National Commission on Productivity—composed of representatives of labor, management, the public and government—already is investigating some of these problems. Its responsibility is clear: to develop forceful programs to revive the retail food industry, now clearly in a productivity crisis.

In the words of Gordon Bloom, of the Massachusetts Institute of Technology, one of the most respected authorities on the food industry: "What we have done in the past simply will not be good enough to meet the challenge of the future."

Mr. THOMSON of Wisconsin. Mr. Speaker, will the gentleman yield?

Mr. SEBELIUS. Yes, I yield to the gentleman from Wisconsin (Mr. THOMSON).

Mr. THOMSON of Wisconsin. Mr. Speaker, I appreciate the chance afforded by this special order to clear up some of the misunderstandings that have generated such apparent widespread resentment at the cost of food.

One should not have to be a representative of a farm district as I am to appreciate the simple fact that American farmers are not only the best, but the most efficient in the world. Our farmers provide the most food, the best quality food, and provide that food at bargain basement prices compared with any other country in the world.

Attacks on our farmers will right no social injustices. Simple economic sense and social justice demand that the farmer be allowed even greater returns on his gigantic investment. While other segments of the economy have been sharing in the general economic expansion, the farm community is financing it. Efficiency and productivity are advancing far faster in the agricultural sector than

in industry. Farm exports are salvaging our Nation's balance of trade and of payments which otherwise would be beyond the crisis stage in total chaos.

Since 1950, hourly wage earners have seen their paychecks increase by 174 percent and the percentage of their disposable income used to feed their families shrink from 23 percent to only 16 percent at present. During this same period farm income increased only slightly resulting in a 25-percent decline in real income for farmers—adjusted for inflation—from 1950 to 1970. What worker earning \$50 a week 20 years ago would be satisfied with \$60 a week today? Well, farmers are not satisfied. And they should not be satisfied.

Farmers are consumers, too. Not only are they paying more for food, they have absorbed fantastic increases in other operational costs. During the last 10 years alone total farm operating costs have jumped 50 percent, capital investment has increased 79 percent, fertilizer costs are up 64 percent.

Farmers are not the ones in this country driving Cadillacs. Rural communities, in fact, the ones which depend so completely on the future vitality of our agricultural economy, are already among the poorest in the Nation. Rural poverty is an immense problem. While only 29 percent of our people live in rural areas, fully 43 percent of this Nation's poor people make their homes in these small communities or on the farm. By destroying the farmers, we are sealing the doom of smalltown America, forcing additional millions to join the unfortunate migration to our already-overcrowded and polluted metropolitan centers.

Advocates of the meat boycott have told me that it is not their aim to hurt the farmers whose claim to economic justice, they concede, has substantial merit. But, I ask, who would be hurt by the meat boycott, the farmers or the processors and marketing middlemen? While the farmer's share of the consumer food dollar has been shrinking from 50

percent in 1947-49 to about 38 percent today, the middleman's share has been increasing quickly. During 1971, for example, average food costs rose \$21. Of that \$21, \$20 went to the middlemen and only \$1 to the farmer.

Yet, what is the impact if food prices fall. Will the butcher renegotiate his wages to a lower wage per hour? Will packagers, handlers, and supermarkets accept lower wages or profits? I think the possibility is remote. As in the past, a decline in food prices is certain to reflect a decline in farm prices, although increasing food prices are shared by everyone in the food marketing chain.

Consider for a moment what the cost of food today would be if farmers had fully shared in the retail cost rise. Pork prices would be 39 cents a pound higher; beef prices higher by an average of 63 cents a pound; bread would cost 7 cents a loaf more; eggs would more than double in cost; milk would cost 46 cents more a gallon; cheese 28 cents more a pound, and even potatoes would cost 14 cents more for a 10-pound sack. A housewife should consider what those prices would do to her food budget if she thinks today's prices are too high.

If consumers think they can drive down meat prices with a "meatless week" they should also consider the possibility of beef producers conducting a market boycott and forcing a "meatless summer." Such a producer counterboycott would not only significantly increase the price of beef, but would produce shock waves and resentment among the Nation's consumers. Perhaps such an action would awaken public awareness that the farmer is getting just as sick of being taken for granted and of being forced to accept the short end of the stick in the marketplace as the consumer is of paying higher food prices.

I am including at this point in the RECORD a chart showing the consumer cost of various food items if farmers had been allowed to share equally in the food price increases paid by consumers.

	Consumer price ¹	Percent to farmer of consumer price ²	Farm price ³	Farm prices if had been equal to wage increases ⁴	Consumer prices if farm prices had been equal to wage increase ⁵
Pork—hogs (pork per pound; hogs per hundred-weight).....	\$0.88	59	\$27.93	\$49.32	\$1.27
Beef—cattle (beef per pound; cattle per hundred-weight).....	1.13	62	33.80	63.84	1.76
Bread—wheat (bread per 1 pound loaf; wheat, per bushel).....	.25	17	2.08	5.48	.32
Eggs (dozen, large).....	.58	62	.37	.99	1.18

	Consumer price ¹	Percent to farmer of consumer price ²	Farm price ³	Farm prices if had been equal to wage increases ⁴	Consumer prices if farm prices had been equal to wage increase ⁵
Milk (milk per half gallon; milk per hundredweight (Class I)).....	\$0.60	51	\$6.82	\$11.95	\$0.83
Cheese—milk (cheese American, per 8 ounces; milk, manufactured, per hundredweight).....	.55	44	5.38	8.44	.69
Potatoes (potatoes 10 pounds and 100 pounds).....	.98	25	2.37	3.75	1.12

¹ USDA data as reported by U.S. News and World Report, Mar. 19, 1973. All data average from October to December 1972.

² Calculated from U.S. News figures.

³ Economic Research Service, USDA.

⁴ Since 1950 hourly wages in all of private sector have risen 174 percent as reported by the Bureau of Labor Statistics, U.S. Department of Labor. Farm prices in 1950 from Agriculture Statistics 1972, USDA.

⁵ Calculated from prior 4 sets of data.

Mr. GROSS. Mr. Speaker, Will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from Iowa.

Mr. GROSS. Mr. Speaker, I am glad the gentleman from Kansas has taken this time to relate to the House of Representatives at least a part of what is taking place with respect to food produc-

tion and prices. I am sure the gentleman from Kansas is aware that on yesterday, on some markets, hog prices dropped \$5 a hundred. This morning I am informed that in some markets hog prices went down as much as \$4 a hundred. This represents a \$9 drop per 100 pounds in 2 days for some of the swine that were sold. This has brought chaos to the hog

markets in the Midwest and no one seems to know how far down the market will go. I am sure the gentleman will agree that if this continues very much longer—and I suspect that it has been enough in the past 2 days to convince a good many farmers that they ought to get out of the hog business.

If they do get out of the hog busi-

ness, what we have seen by way of high prices for food products in the stores will be as of nothing. Rather than lower meat prices a year or so from now prices may be skyrocketing beyond what they are now.

I am glad the gentleman has taken this time today. Some day the farmers may do what organized labor does, and that is withhold their products and their services from the marketplaces. When they do, this country will know, and quickly the meaning of what the farmers produce and what the agricultural industry means to the welfare of this Nation.

Again I thank the gentleman for yielding.

Mr. SEBELIUS. Mr. Speaker, I thank the gentleman from Iowa for his comments, and in pointing out that the prices have shifted, especially in the hog producing field, because I had a packing company in my district close yesterday because of that very reason, that the hogs were not there, and so they had to close down. It is a question of supply and demand. One thing is sure, and that is that you cannot provide more hogs quickly than you can decrease the gestation period of a sow.

Mr. SKUBITZ. Mr. Speaker, will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from Kansas.

Mr. SKUBITZ. I have listened very intently to the remarks of my colleague, the gentleman from Kansas (Mr. SEBELIUS) and the remarks of the gentleman from Iowa (Mr. Gross). I want to commend both of them for the statements they made. I want to associate myself with both of them.

Mr. SEBELIUS. I thank the gentleman for his comment.

Mr. JOHNSON of Colorado. Mr. Speaker, will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from Colorado.

Mr. JOHNSON of Colorado. I want to thank the gentleman for yielding.

I want to align myself with the gentleman's remarks. It is unfortunate that every time we have a special order on something of this nature that we all stand around and talk to each other and seem to be in agreement, and it is unfortunate that we cannot have other Members of the body and other members of the public present to understand what we are trying to communicate, because it is a vitally important subject.

During the last 20 years farm prices have remained essentially unchanged. The Committee on Agriculture has been receiving testimony about this. It has been startling to people who were not aware that farm prices are essentially the same today as they were 20 years ago.

No one else wants to go back to the wages they received 20 years ago. No one else wants to go back to the total income they received 20 years ago. But when testimony comes in that farmers are receiving today the same as they received 20 years ago, people do not believe it. Testimony which was heard before the Committee on Agriculture today was challenged today. It is available if the public will just take a look at it.

I find it ironic that the people who have received increased incomes over the last 20 years, who pay more for their clothing, who pay more for their cars, for their housing, for every other item, resent having to pay more for food, in the days when they are driving people off of the farms. The age of the farmer is gradually and steadily growing older. Young people cannot afford to invest in farms. The average farm costs, according to testimony that has been presented, for a half section or more \$100,000 to \$120,000. The machinery a man has to invest in will run \$50,000 to \$75,000. Young people simply are not able to go back to work on the farms, and they are being driven off of the farms.

We are holding hearings in the Committee on Agriculture, as the gentleman knows, dealing with the total farm program. If we cannot approach it in a calm atmosphere, one that is not filled with resentment for increased prices, one that is not filled with resentment for this one particular segment of the economy, we may very well wind up 20 years from now with an economy, an agricultural economy, where people will be deprived of food because it will be unavailable, because people will not be producing food. Today nobody in America goes hungry because of the unavailability of food. That situation may not prevail unless things change.

Mr. HUNT. Mr. Speaker, will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from New Jersey.

Mr. HUNT. I am happy to know and listen to the gentleman's observations.

I come from a rural area. In fact, I was raised on a farm. I understand the economics of farming. I know the many perils the farmer faces in producing a crop. Raising a crop of anything today is like shooting craps because of having to depend upon the weather. If there is too much rain, we do not have a crop. Too much snow does not bother it, but a drought does.

By the same token, it always resorts to whose ox is being gored, and the strangest part of life is that everybody thinks that his ox is the one that should win the blue ribbon.

I understand a little bit about food prices. I called my sister-in-law in Des Moines, Iowa, last Tuesday evening, a week ago. Lettuce in Des Moines was selling for 19 cents a head. There we are in cold country. It was cold that day. In supermarkets right here in Washington lettuce was selling for 45 cents a head. Frankfurters out there were selling for 72 cents a pound, and here they were on the market for \$1.35 a pound. In my estimation this proves one thing. The farmer is not the man who is the derivative factor in increased prices. Somebody in the middle here is inflating this to their own satisfaction for swollen profits.

It is my hope that somewhere along the line in the Committee on Agriculture—of which I am not a member, but which I have followed very closely—they will begin to ask where this money is going in between.

We have a large hog-raising industry in my district.

Mr. SEBELIUS. If I might interrupt

the gentleman for just a minute, we are having hearings in our subcommittee at the present time and we will have one tomorrow afternoon at 2 o'clock on that same subject because we want to make progress on this same question.

Mr. HUNT. I am glad to hear that. I hope the gentleman does get to the bottom of it. It is imperative that we know where that money is going and imperative that we take the stigma for it off the farmer.

This is the gentleman's first term and I would advise him that there is always a vehicle by which the gentleman can get an audience in this Chamber, and if he has the courage he can always make a point of no quorum.

Mr. JOHNSON of Colorado. If I may say to the gentleman, I think this would be an inappropriate time to do that.

Mr. ANDREWS of North Dakota. Mr. Speaker, will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from North Dakota.

Mr. ANDREWS of North Dakota. Mr. Speaker, I thank the gentleman for yielding. I also thank the gentleman for taking this opportunity to acquaint our people with the problem involved in food prices today.

We have heard a great deal about the housewives revolt. Today a metropolitan newspaper in this city, the morning paper, ran a full-page ad by a supermarket chain in the city of Washington which said they were going to shut down their supermarkets for the day of Saturday in protest against what they called unreasonably high food prices. In that ad they went through a column of things they indicated were too high.

They said the price of wheat was up 61 percent and still rising. I think there has to be honesty in advertising. This particular market chain is guilty of pandering to the emotions of the moment to misinform the public. The price of wheat is not 61 percent higher and still rising. The price of wheat has dropped 40 cents a bushel in the last 2 months. If the supermarket chain wanted to be honest, which obviously it did not, it would not have put that type of advertising together. The fact of the matter is that in 1947, 25 years ago, the price of wheat in Minneapolis, which is the major milling center of this country, was \$2.70 a bushel and the price of a 1-pound loaf of bread was 12½ cents. This Monday, 25 years later, in Minneapolis, the same town, the price of wheat was \$1.99 a bushel. Today we have the wheat certificate which is an additional 75 cents. So if we add the 75 cents to the \$1.99 price, the miller paid \$2.74 a bushel for his wheat in Minneapolis. That is essentially the same price as 25 years ago. But what is the price of a loaf of bread. It is 25 cents a loaf today and the bakers have said they have to have 3 cents more to break even, and they are blaming it on the farmer. It is time for some honesty.

I do not blame the housewife for being upset, but let us point the finger of blame at the right place.

Another supermarket ran an ad in the same paper some time ago featuring Mrs. Esther Peterson, consumer adviser, to the President—not the President of the

United States any more but to the President of Giant Food—who said:

Do not buy beef because the farmers have run the price up. We must bring it down by refusing to buy.

She also said that everything else was under price controls and asked why should beef not be. The fact is, on the day they put that ad in the Washington Post the price of beef on the hook in Omaha, Nebr., which is the way the supermarkets buy their beef, was actually lower than it was on the date the President imposed price controls.

This is downright false advertising. The American consumers ought to know they pay half as much for their beef and for their wheat as the consumers in Europe do. In other areas it is the same story. Corn is the basic food grain in Latin America where it sells for \$112 per ton. Today in Chicago, in mid-America, corn sells for \$57.60 per ton—half as much.

Mr. SEBELIUS. Just to follow up on the gentleman's remarks, Giant Food, 3 weeks after the ad was run about the beef prices, took an ad which said the prices had come down and said:

Aren't you glad we did?

But the fact is that the wholesale price of meat had been going down for 2 months before that time. Finally, it got to the point where Giant Food Co. had to admit the price had been going down, but the wholesale price for 2 whole months before that time had been at a lower price.

I am sorry to have interrupted the gentleman at that point.

Mr. ANDREWS of North Dakota. Giant Food's cost was lower on the day of the ad than it was when wage and price controls were put into effect. They ran the price of meat up expecting that they could get by with it and with facts being ignored.

These are some of the facts which have to be brought to the forefront, because this Nation remains the best-fed Nation in the world. Our farmers continue to give us an adequate supply of food at a reasonable cost. What if we had to pay for food what people are paying in other countries?

In France, they have to work nearly twice as long to earn the price of a loaf of bread. In Japan, over four times as long.

The American farmer makes a great contribution to the quality of life in America and this fact must be brought out.

I commend my colleague from Kansas (Mr. SEBELIUS) for taking this special order on this subject.

Mr. SEBELIUS. I thank my colleague, especially for the last comparison, because hamburger in Japan is \$3 per pound.

Mr. ABDNOR. Mr. Speaker, will the gentleman yield?

Mr. SEBELIUS. I yield to the distinguished gentleman from South Dakota (Mr. ABDNOR).

Mr. ABDNOR. Mr. Speaker, I, too, would like to commend my colleague from Kansas for taking this special or-

der and bringing this to the attention of the public.

Like my colleague from Colorado, I cannot help but feel what a shame it is that we are not reaching out for more people when we hold this discussion on the matter of food prices.

I suppose, being a farmer myself, that I feel a little more aware of the criticisms of food prices than most of the Members of the House of Representatives. I have been in the farming business for over 20 years, and I also realize that today less than 5 percent of our population is engaged in agriculture.

We talk about discrimination; perhaps it is very easy to start discriminating in this case when 95 percent of the people are consumers and less than 5 percent are doing the raising of the food products. I think certainly, when these criticisms arise, those who are making them should stop and realize that the farmers' prices are only one small part of the formula of food costs.

As I said, I believe earlier, 34 cents of the dollar goes for the cost of food. I recall last February that someone made the remark, "My heavens, these meat prices are at a 20-year high."

What a shame that is. For the first time in 20 years we have reached a high point. This is what happened in the beef industry, the thing we are criticizing so much today, high-priced beef.

All I can say to the American public is, Stop and think about this and think about what part of the overall food income is going into food costs. It clearly reflects that less than 17 percent of the take-home pay today goes for the food bill. As high as it may seem, it is still a good price for food anywhere in this country or anywhere in the entire world.

I think we should remember that people cannot expect continually to have been prepared food when everything else is going up and up and up.

I do know that farm costs have more than doubled. Whether it is operating costs or costs of machinery, taxes, whatever it might be, it is the only reason the farmers are in business today, because of their great productivity. If all the industries in this country got equal productivity to that in agriculture, what a great situation we would be in today. We would not be faced with the tremendous deficit in our exports throughout the world which we find ourselves in.

If farming itself is such a profitable business, I am sure that today we would find a lot more than 5 percent engaged in it.

I would like to point out that today, over 20 years having passed, people like their food already prepared and made attractive. They like their potatoes chopped and ready to go into the frying pan; cakes mixed and buns ready for the oven. That costs money.

If we take out all the ingredients from a loaf of bread, we are still paying 21 cents for the wrapping. If we go to a restaurant in Washington, it is a little bit higher than it is in South Dakota. I put in the RECORD that in Sioux Falls, S. Dak., in the best eating place, the best steak costs \$4.25. I guarantee that the

best place in Washington will charge \$7 or \$8. If they just give you a plate, it would cost you \$6 for the empty plate.

These are the things I think the people of this country ought to be made aware of.

When the farmer today is only getting 34 cents out of the farm dollar, although he used to get over 40 cents out of that dollar, it is easy to see that the farmers certainly are not overpaid for their work, their time, and their investment. Quite to the contrary, if everyone were earning a livelihood on the basis of receiving the same return on investment and time of work, this country would be in bad shape.

Instead of criticizing farming, agriculture, and food prices today, we should be commending those who are engaged in that business, because they are doing a great job, a great job not only for this country but also for the world.

I want to say that I am proud of the record agriculture has. I thank the gentleman.

Mr. SEBELIUS. I thank the gentleman from South Dakota.

Mr. Speaker, I am disappointed that so many of my colleagues I invited to come over here, who have been getting their names in the papers, fighting for their people or demagoguing the subject to their people, are not here.

I should like to try to answer a little question which has been raised, about what would happen if the prices of farm products, and particularly of beef, were frozen.

A brief look at history may give us some insight regarding what took place in the Truman administration freeze. Panic buying set in and prices skyrocketed. That was at the time of the Korean war, so controls were imposed. A series of five Government orders cut meat prices 10 percent. Henceforth there was nothing but trouble. In a few weeks there was a cattleman's revolt which closed down many meatpacking plants. As I say, one closed in my district yesterday. This was because of a lack of supplies. Feed lots emptied and black markets developed in Omaha and Chicago, where the large plants were.

As President Nixon recently stated—Price controls on farm products—at the farm level—would be counterproductive in that they would discourage production.

Our need is to get more production. Chickens are a good case in point. Right at the moment, broilers are much higher than they have been for some time. This is the result of some very unprofitable months in the latter part of 1972, when our chicken farmers liquidated their breeding hens. As a consequence, we are somewhat short of poultry. It will take a little while to build that back up again.

As I said earlier, no Congress in the world can pass a law to speed up the gestation period of a cow.

For a while we will have to look at this thing, and to work with it. Just like anybody else, the farmers and cattlemen produce in response to price, and they do not leave the land if they are getting an adequate price for their products.

In final approach to that point, all of

the other additives are involved, such as labor, transportation, lack of an efficient delivery system.

The article from the Reader's Digest tells about what takes place in the supermarkets, who puts things down that are brought in, and that somebody else cannot touch it, but another employee has to do it. Even the butchershop has to have a butcher when all of it is precut and packaged.

I say to the others, who run these ads, "Why do you not stiffen up, put some starch in your backs, when they come in with their next union contract?"

I do not like to be caught in this cycle. I want the workingman to get an adequate supply of beef and good pork. I have a large group of cattlemen out in my district, and it does not look like prosperity there. One can go down and see many empty streets and empty buildings. If this were all a "gravy train" they would be all bustling, because activity comes with prosperity.

I should like to quote from what Secretary Butz said the other morning on CBS, because it is a good followup to the thinking we need here. Secretary Butz said:

You know—I'd like to go back to 49-cent pork chops and 79-cent roasts. But we're not going to go back to them until we go back to the 60-cent minimum wage, until we go back to the thousand dollars for a new Chevrolet car, until we go back to getting your bathroom repaired for \$19.50 instead of the \$80 they charge you for it. This is all part of the same package. And I think it's wrong to single out one single thing when our farmers have done a pretty good job in feeding America better than ever before.

The farmer has done a very good job in this situation. I would only say, as I stand here, that I commend the farmers of my district for their gallant effort to try to supply this country with good food and fiber at a reasonable price.

Mr. RAILSBACK. Mr. Speaker, will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from Illinois (Mr. RAILSBACK).

Mr. RAILSBACK. Mr. Speaker, I want to commend the gentleman for once again expressing his concern for the American farmer. I also want to join with him in the tenor of his remarks, which I understand to be that farmers in the past have not really enjoyed the same degree of prosperity that other segments of our economy have enjoyed.

It seems to me that if the American people panic, they are forgetting that—in relation to other countries—they are getting food much cheaper. We spend less, percentagewise, of our dollars for food than any of the other developed countries.

Mr. Speaker, I join the gentleman in his remarks, as I certainly agree with him.

Mr. SEBELIUS. I thank the gentleman for his statement.

Mr. BLACKBURN. Mr. Speaker, will the gentleman yield?

Mr. SEBELIUS. Yes, I yield to the gentleman from Georgia (Mr. BLACKBURN).

Mr. BLACKBURN. Mr. Speaker, I appreciate the gentleman yielding to me.

I would like to have some further dis-

cussion about the union contracts which prevent, as I understand the gentleman's observation, the most economical distribution of meats in our markets.

Does the gentleman have any estimate as to how much these featherbedding tactics add on to the price of the delivery of meats?

Mr. SEBELIUS. Mr. Speaker, I do not have it specifically. We are conducting hearings in the departmental operations subcommittee, in the Committee on Agriculture, on what the deal is on food prices and where it goes.

I do know this, however: that I have a packing plant in my district that kills over 10,000 head of beef a week—and this is beef of one size; it is automated basically—and it can supply to the Washington area of the New York area beef at a lot less price. But I think we have all just read in the paper about the high beef prices and the investigation in New York, because it seems that certain union officials are making rosy deals so they could bring in boxed beef with cuts at less cost than where a side of beef is cut up by a butcher in the shop. It would get to the consumer for less money, because they are not shipping the fat, and they are not shipping the bones. It is all precut, ready to go, and they can do it for a lot less money.

Another thing in the same field is the fact that these supermarkets now have begun to stay open 7 days a week and all day around the clock, and a butcher has to be present even though they are not cutting meat at all.

I do not mind that really, but at the same time I do not like featherbedding. I do want the meatcutters to make a good living, because they buy groceries, they buy meat, but when they want to featherbed and make the American consumer pay for it, and then the American consumer blames the farmers, I rebel at that.

Mr. BLACKBURN. Then, the gentleman says that in his district the meatpacking plant is one plant that accommodates itself to these packing techniques. Does the gentleman have any idea what the difference is in price delivered in boxes, as opposed to, say, a half a side that has to be shipped to the butcher here locally?

Mr. SEBELIUS. In answer to the gentleman's question, I know the freight costs about 4 cents from western Kansas, that is, 4 cents more. In other words, they would be getting rid of about 4 cents a pound for all the bone and all the fat which they are going to cut out, but it would be thrown away or utilized out there.

When you take that and multiply it by all the various cuts, the prices of the various cuts, the price is getting pretty high.

These cattle have so much brisket, so much hamburger, and so much bone, and there is just so much steak, and if the American people want that steak, the law of supply and demand is going to increase the cost of it. Everybody wants steak.

But in answer to the gentleman's question, I do not have the exact figure, no.

Mr. BLACKBURN. Mr. Speaker, I

appreciate the gentleman's efforts in calling this to the attention of the Congress and of the public, because I think with all the attention that is being given to consumers, as to the prices we are paying for our foodstuffs, it is only fair that if there are methods of reducing the cost of delivery of these goods to the public, then we ought to take advantage of it.

Mr. SEBELIUS. Mr. Speaker, I thank the gentleman for his remarks.

I would like to reflect on another point which I think needs to be brought up as a matter of education to the consumer.

As the United States and other countries upgrade their diets—and they are doing it—to more protein-oriented products, the cost of food will naturally increase.

A pronounced multiplier effect comes into operation when consumption patterns shift from grain-based diets to diets of meat and poultry. Each unit of beef production requires at least eight units of feed. In the case of each unit of beef it takes about eight units of feed to raise or produce one unit of beef.

It takes 4 pounds of feed to produce 1 pound of pork; that is the ratio. In poultry it takes 2½ pounds to 1; that is the ratio.

Internationally this produces figures that have dramatic proportions. For example, the consumption of only 1 more pound of chicken a year for every Chinese person requires slightly more than 900,000 tons of feed grains to produce. If you give that some thought, you will see it takes 900,000 tons—and not bushels—to produce 1 pound of chicken for every Chinese. That is something that I think you should reflect on when you are shifting from grain-oriented to meat-oriented diets. That is what it will take to deliver that item.

If the whole world suddenly wants beef, chicken, and pork, then we have to be geared up for it. We are gearing up for it, and production is up.

I say, for the third time I guess, that you cannot shorten the gestation period of a cow. It takes 9 months, and it also takes 18 months to feed that calf until it reaches market weight to the grade of Choice in Omaha, Chicago, or Kansas City.

Mr. YOUNG of South Carolina. Will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from South Carolina.

Mr. YOUNG of South Carolina. I would like to ask the gentleman if he is aware of the number of people or the percentage of people presently engaging in agriculture in this country.

Mr. SEBELIUS. It is down again this year, as it has been every year, to the point where only 5 percent of the people today are engaged in agriculture, when back 30 years ago over half were engaged in it.

Mr. YOUNG of South Carolina. Then, what are these additional 45 percent, according to your figures, Mr. SEBELIUS, released to do in this country?

Mr. SEBELIUS. They contributed to a lot of the urban blight. When they lost their farms or quit working on a farm, many of them migrated to the city seek-

ing opportunities there. Not being skilled for anything except farmwork, many of them went on welfare and caused greater problems in our cities and in our country. We need to face that problem in trying to give them economically an opportunity to function in other areas.

Mr. YOUNG of South Carolina. By the same token, have some of these people been employed in making television sets and automobiles and building homes?

Mr. SEBELIUS. Very definitely.

Mr. YOUNG of South Carolina. And in being Members of Congress and other things?

Mr. SEBELIUS. Very definitely.

Mr. YOUNG of South Carolina. If they do not milk cows any longer, they can be beneficial to our society by doing other things, then.

Mr. SEBELIUS. Definitely. That is where we try to point out the fact that where a total of 23 percent 20 years ago of the consumers take-home dollar went for food, it is now down to 16.5 percent. Those \$51 billion have gone into the buying of cars and TV sets and stereos.

Mr. YOUNG of South Carolina. By the same token, do you not feel that this had helped this Nation to become the great Nation it has because the farmers have allowed other people to be employed in other functions in our society?

Mr. SEBELIUS. Very definitely. This Nation's being able to produce its foods and fibers at the lowest cost per unit price in the world has really contributed to the prosperity of every citizen. I hope that some of the misguided or uninformed people could get the message and understand it. Nobody wants to gouge anyone. We all want reasonable earnings. Two years ago in my district the farmer was either getting about 4 percent on his investment and nothing for his labor or about \$4,500 for labor and not a dime on his investment, which has gone up to the point where almost every farmer has to have over \$100,000 invested just for the machinery to operate.

Mr. JOHNSON of Colorado. Will the gentleman yield at that point?

Mr. SEBELIUS. I yield to the gentleman.

Mr. JOHNSON of Colorado. Was the gentleman present at the hearings of the Committee on Agriculture this morning when the gentleman from North Dakota was testifying and he said taking the average county and the average farmer, in the past several years he received a total return of 3.8 percent on his investment, which gave him nothing for his labor and for that of his wife and children and all of the rest of those working on the farm?

Mr. SEBELIUS. He was right on the target.

On that point I want to say before I came here, I filled out the tax returns of about 100 farmers a year. Frankly, I did not know why any of them would stay on the farm except for their love of the job and the soil. They were making nothing like what they were making in other fields.

Mr. JOHNSON of Colorado. Will the gentleman yield further on that point?

Mr. SEBELIUS. Yes. I yield to the gentleman.

Mr. JOHNSON of Colorado. There are many farmers back in my area who say it is much wiser for them to sell their farms and put the money in the bank and live on the interest. They would do better than if they continued to farm. Does the gentleman find that to be true?

Mr. SEBELIUS. That is true, and many of those who are hitting 65 are doing just that.

Mr. SYMMS. Mr. Speaker, will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from Idaho.

Mr. SYMMS. Mr. Speaker, I believe there is another point I would say to the gentleman from Kansas (Mr. SEBELIUS) that we might mention, that could be raised as a factor in increasing the price of beef, and that is in Idaho we have a statement that we make jokingly, although we are serious, and that is that 120,000 coyotes cannot be wrong, so eat more lamb.

I think this is a factor that is increasing the cost of meat production, both of sheep and of cattle.

In the western grazing lands at the same time we have another agency of the Government, the Environmental Protection Agency, that is making arbitrary decisions about whether or not we can use predator controls.

Also at the same time we have the Department of the Interior, and the U.S. Forest Service raising the cost of grazing lands arbitrarily, and thus increasing the cost of meat production, and literally legislating through executive order these people out of business, by raising the cost of using the grazing lands so that it is not feasible for these people to graze upon the public land in many areas.

Another thing that was said this morning in the agricultural hearing that maybe this is one of the places we should consider insofar as raising the cost of meat products, and that is that the EPA could do the farmers more good by leaving them alone so that they could get on with the business of raising meat, and not letting all the coyotes graze on our sheep and our cattle.

Mr. SEBELIUS. The gentleman from Idaho has raised a very excellent point. I think if we are going to have anything from the Department of the Interior in regard to predator control, and if we are going to have to do away with such things as diethylstilbesterol, which is going to raise the cost of beef because the beef will not gain as fast, and if we are going to have all the other environmental things which are being proposed, sewers, and so forth, for our dairy cattle—which is a fine thing, of course—then the consumer must realize that he is going to have to pay for these things.

Mr. SYMMS. Mr. Speaker, if the gentleman will yield further, I agree that that is correct. I would like to just make one further comment with regard to the proposals by some people on freezing the prices of farm products, and that is that the best way to insure a good meat supply and lower meat prices is not to tamper with the marketing functions, and that the farmers will do very well to

take care of the situation themselves if we give the opportunity to them. This will result in assuring sufficient red meat, and it is the best way to do it, and that is to allow the prices to seek their own levels, otherwise, as the gentleman has pointed out, this will lead to the possibility of black marketeering in meat, and then the flow of capital would not go into meat production, and this would actually work conversely to what we are really trying to achieve.

Again I want to commend the gentleman from Kansas for his efforts here today on behalf of the American farmers.

Mr. SEBELIUS. I thank the gentleman from Idaho.

Mr. BRINKLEY. Mr. Speaker, will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from Georgia.

Mr. BRINKLEY. Mr. Speaker, I thank the gentleman for yielding to me, and I simply wish to commend the gentleman for putting this matter into what I feel to be the proper perspective.

I too come from a rural district, so-called, but yet there are a number of my people, in fact, the major percentage of them, who are not farmers at all, yet we are classified as a rural district, and we do have a familiarity with the problems with which the farmers are confronted.

I think it is just unfair with the farm legislation being considered that it is being considered in an atmosphere of animosity to the farmers. I say this because we know the farmers are doing an excellent job, and traditionally have been the very backbone of our country. The farmers have made a magnificent contribution to the quality of life in this country. I think that if we can just turn the farmers loose, so to speak, not only can they feed this country, but they can certainly do their part toward feeding the hungry in the nations of the world.

So I just want to commend the gentleman from Kansas for what I think has been a good job in putting this matter into its proper perspective.

Mr. SEBELIUS. Mr. Speaker, I thank the gentleman from Georgia.

Mr. Speaker, in conclusion I would like to reflect that we might take a little time to consider that a good point was made last week with National Bake and Take Day. And in that we are shifting our thoughts to what we can do as far as the quality of our life is concerned. The concept of National Bake and Take Day was an idea that was started by the Wheathearts of Kansas Wheat Growers Association. It was that you would bake something and then take the baked product around to your neighbors, or shut-ins, or the elderly, I think that if we start something like that I think we can do a lot of good. Through baking things and then taking it to the shut-ins thereby giving them a wholesome product especially if it is made, of course, from Kansas wheat.

Mr. YOUNG of South Carolina. Mr. Speaker, will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from South Carolina.

Mr. YOUNG of South Carolina. I should like to thank the gentleman for yielding.

I should just like to ask the gentleman's opinion what would have happened had not this country sold some wheat to the Russian people for bread?

Mr. SEBELIUS. As far as what would have happened if we had not sold them the wheat, they would have been able to get the wheat somewhere throughout the world. As far as the prices here in the Russian wheat sale, it does not mean too great a thing because there has been an increase in our domestic price. But, as pointed out earlier, what the amount to the consumer was was probably 1 penny from the Russian wheat sale. If we can take that amount of foreign exchange and use it to our benefit—because we have got about a \$7 billion balance of trade deficit—the farming community is the one that is serving this country. The dollar would be in much worse shape if it were not for the fact that this year we will probably export somewhere around \$10 billion in foreign products, and that will be mostly for cash. That will help our balance of trade as the wheat sale likewise did. The Russians used very little credit; they paid for it in dollars.

Mr. SYMMS. Mr. Speaker, will the gentleman further yield?

Mr. SEBELIUS. I yield to the gentleman from Idaho.

Mr. SYMMS. I should just like to take this opportunity to commend the New England apple industry for having their apples here today to help promote their product. As the saying goes, "An apple a day keeps the doctor away."

I am also engaged in the apple business in the West, but I was happy to see one of my eastern competitors here today encouraging the use of this fine product.

I think it is interesting to note that in the grocery stores of America, apples, lettuce, and potatoes are the big money-makers at the produce counter, and the items that have been better promoted, like bananas, actually lose money for the grocery stores and retail merchants who sell them. Every time a housewife buys bananas on a lead item, it is actually costing the retail merchant money, because he has to have them on an ad in order to draw the housewives in.

Mr. SEBELIUS. What does the average farmer in Idaho get for a pound of potatoes? Of course, most potatoes sell by the hundredweight.

Mr. SYMMS. About \$1.50.

Mr. SEBELIUS. In my home county I looked at the paper yesterday. Old hens and cocks were selling for 3 cents a pound, and eggs were 18 cents, so I would recommend that everyone come out to our bountiful country and shop out there on the farm and leave all of the rest of them out of the chain of what makes the price go up and the product too expensive. It is not the farmer who is at fault.

My only purpose in appearing here today is to explain his position that in fact he still gets less than anybody else in the overall prosperity of this Nation.

Mr. SYMMS. Mr. Speaker, will the gentleman yield further?

Mr. SEBELIUS. I yield to the gentleman from Idaho.

Mr. SYMMS. In the year 1970 we developed a market to sell Idaho potatoes in Japan. The Japanese, being very shrewd traders, recognized that it was in direct competition with their rice, so they put a 60-percent import duty on our potatoes in Japan, putting our potatoes out of the market.

I have noticed, however, of late that they still export rice here to compete with our potato growers.

With the presence of the fair-trade policy that we have heard the chairman of our Committee on Ways and Means and our President talk about this past week, I am curious about the fair-trade policy as well as free-trade policy with regard to our farm products.

I am concerned about the importation of dairy products that do not meet the same standards that we produce here, and also when we import subsidized dairy products from the European Community to compete with dairy producers here in America, they are certainly put in an unfair position, and they certainly deserve the consideration of this body.

Mr. SEBELIUS. I thank the gentleman for his comments.

Mr. ABDNOR. Mr. Speaker, will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from South Dakota.

Mr. ABDNOR. The gentleman touched on a couple of matters I would like to talk further about. We know this import-export imbalance we have is one of the great problems facing this country, and the monetary problems of the world. I would submit to the gentleman that agriculture offers one of the best means of working our way out of this situation. Last year alone I believe farm supports had a total of over \$9 billion, up several billion dollars from the year before. Apparently food is something that this country has that the rest of the world wants.

I would go so far as to say that I think the farmers of America deserve some credit for their bringing peace in Southeast Asia. The fact that President Nixon was able to break down the barrier between Russia and China so we could start talking, and talking about trade, and the fact that Russia more than anything else needed food for its people, and apparently so did China.

I think they had to consider this very carefully when they were looking toward the country they were supporting in Vietnam. I believe the farmers of this Nation deserve a real pat on the back for helping to bring peace to the world.

Mr. SHRIVER. Mr. Speaker, will the gentleman yield?

Mr. SEBELIUS. I yield to the gentleman from Kansas (Mr. SHRIVER).

Mr. SHRIVER. Mr. Speaker, I wish to thank my friend and colleague from the adjoining First District of Kansas for this opportunity to join urban and rural interests in a frank discussion of a critical national problem—rising food costs.

Representing a congressional district which, according to the 1970 census, is 80 percent urban but which lies in the middle of the greatest farming area in the country, I can reflect the mixed views of my constituents on this problem. No one

likes to pay higher prices for daily needs, least of all our farmers. At the same time, many of my urban constituents have family ties to the farm and can remember the years of inadequate income from farming.

Who do we blame for higher food costs? We can blame the weather, the Russians, the railroads, the food processors, farmers and ranchers, the grocers, the Government, and even the anchovies swimming off the coast of Peru. It seems that because the Humboldt Current off the west coast of South America shifted this year, the anchovy harvest was poor. American soybean meal makes an excellent substitute for fish meal in the diets of European chickens. The price of soybean meal has gone from \$85 per ton in January 1972 to \$195 per ton in January of this year. This is directly reflected in the livestock market and at the meat counter.

Aside from the anchovies, the wettest winter in many years prevented the harvest of a bumper feed grain crop in the Midwest. Ranchers and feed lot operators in the Great Plains area face livestock losses two to three times normal because of the severe wet weather. The rendering plants cannot handle all the carcasses. Most of these losses are young stock, so the situation will continue for some time to come.

Foreign demand for American farm products has reached unprecedented levels. Russian crop failures and lower Argentine livestock production contrasted with increased demand in Russia and elsewhere for better diets, including beef. The "peace dividend" for the American farmer came in the form of large foreign sales of his products. The double devaluation of the dollar made our farm exports more attractive while foreign agricultural imports became more expensive.

All of these are factors in the rise of food prices, but they do not entirely explain the situation. American farmers and the food processing industry will out-produce other elements in the economy in terms of productivity. We are not facing a food shortage in this country, in spite of the situations I have just described.

What we are witnessing is a worldwide jump in demand for more meat. And this demand is born of rising affluence, both here and abroad.

The United States, with 6 percent of the world's population, consumes 30 percent of the world's meat production. A more affluent America demands more meat, especially beef, and prices go up when the steadily increasing supply cannot keep up with this rapidly increasing demand. As the demand of the housewife registers in the marketplace, processors must compete with one another for supplies, thus bidding up the prices to get what they can from strained supplies.

Farmers do not set the price of beef; consumers do that by bidding for the supply. These food costs are not being pushed up by farmers; they are being pulled up by consumption.

Figures published by the Departments of Commerce and Labor show that, while

retail food prices are up a third since 1965 when inflation really began to take hold, per capita income is up 62 percent. The money supply in the United States has risen by 47 percent over the same period. We have witnessed a huge growth in the number of dollars American families have to spend on food and everything else.

With better income, Americans are eating better; and eating better means more meat. On a per capita basis, each American is eating more than a third more beef now than 10 years ago, and that is measured in pounds of beef, not in prices.

I realize that the use of per capita statistics, while meaningful, does not allow for the actual situation in all families. For some, their incomes have not kept pace with the per capita average. These people will require special attention, and we have many programs at the Federal and local levels through which to offer this attention. There is no logical reason in America today for any person to go hungry, and I do not believe that this is the case.

What we must remember, and what the representatives of urban districts must understand, is that the only successful way to bring food prices down is to increase the supply of what consumers want to buy.

Farmers cannot be forced to produce, not in this country nor anywhere else where it has been tried. The only way to encourage increased production is to provide a fair return on the farmer's and rancher's human and financial investment. Imposed price ceilings on their return would certainly be detrimental and, in the long run, counterproductive to the efforts to bring food costs to an acceptable level.

As the Secretary of Agriculture has noted, farm prices go up, but they also go down, unlike the prices for most other items in our economy. A free supply and demand or more accurately, demand and supply—economy will force prices for various food items back in line with the prices Americans are willing to pay.

Finally, I would emphasize that the American farmer has performed exceedingly well in providing more than adequate food supplies to not only feed our own population, but many of the hungry throughout the world. I, therefore, salute the American farmer and the American agriculture industry for a job well done in providing so well for the people of the world.

Mr. SEBELIUS. I thank the gentleman from Kansas for those kind remarks.

Mr. Speaker, in closing I would only hope that maybe we can open avenues of communication and conversation which will help in trying to understand the problem and work toward more food at reasonable prices, available to all. We can do this if the public will just work with us and let us present to them a true picture of what the position is so we can all share in this Nation's prosperity.

Mr. ZWACH. Mr. Speaker, while housewives are concerned about food prices going through the roof, American farmers are deeply concerned about crop

and livestock prices going through the floor.

Consumers ask, "How can this be?" knowing that in 1972 farmers had the best year in 20 years, with net farm income up \$3.1 billion over 1971's \$16.1 billion.

It is extremely important that we put increased farm income in its proper perspective in regard to increased farm production costs and increases in the cost of living in general.

While farm prices have increased 11 percent over the past 20 years, retail food prices have increased 46 percent. Farm costs have gone up 109 percent, industrial salaries have increased 129 percent, and taxes have sky-rocketed 297 percent over the same 20 years. In addition, health and recreation costs posted a 75-percent bulge; housing, 63 percent; and transportation, 54 percent. Machinery costs are up 100 percent.

And now for some even bigger increases—semiprivate hospital rooms are up 370 percent; physician's fees, up 122 percent; dentist charges, up 94 percent; and the good old 5-cent cigar is up 300 percent—plus taxes.

Even with the recent increases in farm prices, the farmer still gets only one-third of each dollar American families spend on food. In 1972 the farmer received 33.4 cents of the food dollar, while the retailer received 33.1 cents, the processor 22.1 cents, the wholesaler 6.1 cents, and transportation firms 5.3 cents.

The current farm prosperity is tempered by a number of factors. It is not evenly spread among all farmers. The small farm operator does not have the volume sales needed to offset production costs, which rose even faster than the price of food in the supermarket. They soared 7 percent in 1972, and are expected to increase even more in 1973.

The farmer who has to buy soybean meal to feed his livestock is hurt, rather than helped, by this crop's sky-high price. Beef calves that must be bought for feed lots are bringing staggering prices.

A recent study by an extension economist at the University of Minnesota, John Waelti, points out "that food costs more but you work less for it." The following is the text of his study:

Hour's Work Still Buys More Food Than Before

An hour of work buys more food than ever before—housewives protest over recent hikes in food prices notwithstanding.

Despite 25 years of inflation, farmers' efficiency has kept food costs far below what they might otherwise have been, says University of Minnesota economists. They cite these figures showing what an hour of labor would buy for various foods in 1970, compared to 1970 and 1960:

An hour of labor paid for only 2.2 dozen eggs in 1950, 3.6 dozen in 1960 and 5.2 dozen in 1970.

An hour of labor paid for only 2.2 pounds of turkey in 1950 and 5 pounds in 1960, opposed to 7.9 pounds in 1970.

The same trend is true for other foods such as potatoes, bread and milk. Even in the case of beef, an hour of labor bought 75 per cent more round steak in 1970 than in 1950.

Equally impressive is the time required to earn money for a loaf of bread or a pound of

sirloin steak in the United States compared to other nations. The average U.S. wage earner works six minutes to earn a loaf of bread, but it takes 11 minutes in France, 12 minutes in Russia, 27 minutes in Japan and 46 minutes in Brazil.

Likewise, it takes 24 minutes to earn a pound of sirloin steak in the United States, 110 minutes of labor in France, 132 minutes in Russia, 118 in Brazil and 269 minutes in Japan.

The declining amount of labor required to buy food is especially important to low and moderate-income families. This means that efficient farmers are crucial to the average working man and his family, says John Waelti, an extension economist at the University.

When Oscar Bredthauer, president of the National Livestock Feeders Association, addressed the opening of the 28th annual convention on February 7, he did an excellent job of putting the price of beef in its proper perspective. I would like to share part of his speech with my colleagues:

Perhaps, also, our consumers can appreciate a few comparisons of just how much various prices have risen in relation to other prices. Late last year, the average price of a pound of Choice beef at retail was \$1.12. The highest price ever reached was in August, 1972, when the average pound of Choice beef reached \$1.17 per pound.

In 1950, Choice beef at retail was worth 75.4 cents per pound. Had a pound of Choice beef at retail gone up as much as a first class postage stamp since 1950, it would be selling at \$2.01 per pound. Had a pound of beef gone up as much as the cost of medical care, it would be selling at \$1.88 per pound. Had a pound of beef gone up as much as average hourly wage rates or per capita disposable income since 1950, it would be selling at \$2.11 per pound. Or compare to the cost of having a baby since 1950, a pound of Choice beef would be worth \$3.11.

In 1950, Choice steers at Omaha were bringing \$28.88 per hundred weight. If Choice steers had gone up as much since 1950 as a first class postage stamp, they would now be worth \$77.02 per hundred weight. Compared to the rise in total medical care, they would be bringing \$72.34 per hundred; or compared to the rise in average hourly wage rates, \$80.69 per hundred, and to the rise in per capita disposable income, \$80.89 per hundred.

If Choice steers since 1950 had gone up as much as the cost of having a baby, they would now be commanding \$119.13 per hundred, and a rise equal to the daily cost of hospital service would put Choice steers up to \$176.69 per hundred.

As everyone knows, Choice steers were selling in the range of \$42.00 per hundred weight. Our consumer friends might also like to know that according to latest information, live cattle prices in the Common Market countries of Europe at the beginning of 1973 averaged \$56.00 per hundred weight for older cattle and cows culled from dairy herds. They ranged from about \$46.50 in Holland to \$62.00 in Italy.

I think we also need to be honest about the future cost of food and red meat. They are not going to decline appreciably as long as wages and salaries continue their upward trend, or as long as distribution and transportation costs continue to increase, or as long as the cost of machinery and equipment continues to rise and taxes keep on going up. There may be some savings possible through improved efficiency here and there, such as central cutting and fabrication of meat.

We can also assure consumers there will be further increases in the domestic production of red meats provided there are neither wide spread consumer reactions nor policy decisions on the part of our government that

become discouraging to the livestock feeders and ranchers. Present price levels will encourage that increased production.

Over a period of about twenty years the beef producers in the United States actually doubled per capita production for the consumers of this nation. It rose from 55 pounds per capita to 110 pounds per capita despite the fact that prices did often fluctuate down and up and we experienced some periods of almost economic disaster. During these twenty years, production was out-running demand.

In about the last six years, however, production of beef has not increased so much, with the result that demand for it by consumers has generally caught up with the supply. Due to changes in the availability of cattle for feeding purposes nearly all of the increased production of beef will have to come from more calves. This takes time, but further production will be showing up before long.

I hope this discussion proves valuable to all of you. I am sure you have heard some of it before, but perhaps it has not been put in quite the same perspective. We have a story to tell and a position to defend. In so doing, we need make no apologies to anyone.

Agriculture is by far the largest single industry in the United States. It still generates jobs for nearly 40 percent of the employed workers of our Nation.

One farmer in America can today ably feed 44 people. In Russia, one farm worker can support no more than two persons off the farm.

Twenty years ago, consumers spent 23 percent of their disposable income on food. In 1972, it went below 16 percent. In Russia it takes between 40 and 50 percent; in Western Europe, 22 to 30 percent; in Canada and Australia, about 20 percent; and as much as 75 to 80 percent in the Far East.

The recent farm price improvements is only a partial recovery. A farmer's disposable income in 1972 was still only 78 percent of that enjoyed by nonfarmers.

Food is still a bargain—even at today's prices. Five percent of the population is feeding 100 percent of our people better and more cheaply than ever.

Thank God for the farmer.

Mr. FINDLEY. Mr. Speaker, organized labor argues that wage increases should be tied directly to food price increases. Unfortunately, this argument looks at only one side of the coin. Will organized labor argue for lower wages when food prices come down, as they have in the past and undoubtedly will do in the future?

The following editorial, which appeared in the March 26 issue of Farm Bureau News, helps put organized labor's argument into perspective:

KEEPING OUR PERSPECTIVE IN TALKING ABOUT FOOD PRICES

The key word is "perspective;" that's the word to keep in mind during any food price discussion.

It's hard to keep your perspective when the money runs out. As one wit put it—we used to have money left at the end of the month . . . now we have *month* left at the end of the *money*.

Keeping things in proper perspective demands that we consider the fact that there is no shortage of food. If there was a food shortage we would really have problems. But, farmers and ranchers are doing their job and doing it well. In fact there is every evidence that American farmers are doing their

job better than farmers in any other country of the world.

Perspective demands that we realize how food prices are not the cause of inflation, rather—that inflation is the cause of food prices. Inflation is caused in turn by deficit government spending and by otherwise increasing the supply of money and credit which chases after a limited supply of goods and services.

Keeping things in perspective means that organized labor can't have it both ways . . . for example, higher wages . . . which drive up costs of everything—including what the farmer must buy for production needs and still cheap prices at the meat counter.

It has been interesting to note the unhappiness of butchers about food prices . . . yet in the past twenty years when most farm prices had gone up only modestly (and some not at all) wages paid butchers tripled during the same span of time.

A balanced perspective calls for realizing that farm prices go up—and go down. That the prices of many, if not most goods and services just go up . . . that under union wage contracts, wages and fringe benefits keep going up and up . . . and they stay up.

For example, the United Auto Workers have a new, three-cents-per-hour wage increase under such provisions. This increase goes to 150 thousand workers producing agricultural equipment, as well as 700 thousand auto workers and 50 thousand workers in parts factories.

At the same time, current estimates indicate that farmers will get less net income this year, than they got last year.

So, keeping things in proper perspective suggests that if organized labor is sincere in demanding that wage increases be tied to farm prices—surely then labor is willing to allow wages to go up—and down, just as farm prices do.

One thing that has become increasingly more evident as arguments and counterarguments such as the preceding continue to grow out of the current food price situation is this—high food prices do not cause inflation. But the converse is true—inflation causes high food prices.

Prof. Larry Simerl, the respected and insightful agricultural economist at the University of Illinois, makes this important point and dispels several other so-called facts about food prices in his Outlook Newsletter of March 7 which follows:

FACTS AND FIBS ABOUT FOOD COSTS

Food prices seem to be replacing the war as a leading subject of controversy. Consumers are complaining because the prices of meats and many other foods have been up. Some groups are demanding controls on food prices. Cartoonists and comedians joke about what they call "the high price of steak." Various speakers and writers try to explain the situation, but most just add to the confusion. Many people are perplexed and alarmed, in part because they have been misled concerning family food bills.

THE 16-PERCENT FABRICATION

We often read and hear statements like this one: "American families spend less than 16 percent of their take-home pay for food." Such statements are highly misleading. About 16 percent of the national personal disposable income (what's left after paying income taxes) is spent for food; however, a large majority of families—especially those in the lower and middle income brackets—lay out considerably more than that to get food on their tables. The "average" is brought down to 16 percent by the fact that families in the high-income brackets need to spend only a very small proportion of their incomes for food.

The USDA has estimated that 1972 food expenditures totaled about \$125 billion. Our population was about 208 million. Thus, the typical outlay for food was around \$600 per person, or \$3,000 for a representative family of five. Even so, food in the United States still represents the "best buy" in the world.

Why have food prices gone up? In general, for the same reasons that the prices of other products and services have increased. Inflation. Rising wages and salaries boost production costs, and also provide more buying power. Wage and salary rates increased about 7 percent during 1972, and food prices went up about 6 percent. There are, however, some special reasons for the advances in food prices during the last year or so.

THE MEAT AND EGG SITUATION

Pork. Two years ago, farmers produced a record amount of pork—73 pounds per person, the greatest amount since World War Two. Pork and hog * * * profitable levels in 1972, and farmers took steps to increase production. But the additional hogs will not be ready for market until next fall.

Beef. Cattle men provided 116 pounds of beef per person in 1972—3 pounds more than in 1971, and a new record high. Yet, consumer spending for beef increased even more, forcing prices upward. Cattle men are responding by building up their breeding herds to produce more beef this year and next, but it may be 1975 before there will be a really large increase in the supply of beef.

Eggs. The prices were at unprofitable levels during most of 1971 and 1972. Some producers quit the business, and many laying flocks were wiped out by disease. Egg prices got back to profitable levels in December. Now, feed costs are very high. This will delay the next increase in laying flocks for several months.

Mr. MARTIN of Nebraska. Mr. Speaker, in recent months there has been particular concern across the Nation about the high cost of food in the American supermarket. No one will deny that food prices have been going up rapidly in this time. However, as our food prices in the supermarket have been increasing, there has been a tendency on the part of consumers to "blame" these rising food costs on the American farmer.

As a representative of an agricultural district, I am not going to attack the American consumer for this criticism of food prices. But, I will take issue with the finger of blame for these costs being pointed at the farmer. We have heard the claims and figures and statistics of consumer interests and of the farmers on this subject, and my purpose now is not to add to all that has been said about the reason, or blame, for our food cost increases.

We are all consumers, whether we live on the farm, in the small Midwest community, or in the cities of the eastern seaboard. And as such, we all feel the effect of the high cost of living, whether it is in the increasing grocery bill of the city supermarket, or in the rural farm supply store where tires, equipment, fertilizers, seed, and other costs have skyrocketed. For all that has been said about the reasons behind the recent high food increases, it remains that the average American consumer of the eastern or western city continues to blame the farmer.

This is a regrettable situation, and one which exists I think, because of the lack of knowledge, information, and understanding of the city dweller, for and of

the area of farming. While food prices have gone up greatly in recent weeks, it remains that food is the best bargain the American consumer has for his and her dollar. We spend less for our food than is spent in any other nation.

I think we can look forward to our farmers continuing to supply the American dinner tables with an abundance of food at a reasonably low cost. This morning, March 28, 1973, I attended the seventh annual congressional breakfast of the National Association of Wheat-growers. The president of this organization is a resident and wheat farmer in my Third District of Nebraska. Mr. Ray Davis gave what in my opinion was an excellent talk on the issue of food costs as they relate to the costs of production of our food and other living standards here in the United States and in countries abroad. In the interest of helping city consumers to understand the plight of the farmer, and of the value of the American supply of food we enjoy,

I list below a talk recently given by Mr. Ray Davis, national president of the Wheat Growers Association. I have the honor to represent Ray Davis in the House, since he is a resident of my district from Potter, Nebr.

His remarks follow:

REMARKS OF RAY DAVIS

Distinguished Members of Congress and Friends: Will Rogers used to say that anything can be funny as long as it's happening to somebody else.

I'm afraid there are people in our country today who think it would be kind of funny—at least, not a bad idea—if farmers, after all these years, had their agricultural programs abolished. And, along with this, maybe we ought to have a few old-fashioned surpluses hanging around to lower farm prices and make raw materials and food prices a little cheaper.

But those of us who make a living by farming don't think this would be very funny. Or wise. Or right.

We don't think it's right, through low farm prices, to have farmers subsidize the rest of the nation, as too often they have done. We do think it's right, and necessary, to continue to have the supply management and income safeguards of farm programs because, no matter what is said about the nobility of agricultural independence, in a world dominated by big enterprise the individual farmer, alone, doesn't have much voice.

We have come far since the first efforts to set up a national farm program. That was 44 years ago—1929—during the Presidency of Herbert Hoover, when the Congress established the Federal Farm Board. Its main purpose still has a familiar ring: "To place agriculture on a basis of economic equality with other industries."

Unfortunately, the old Farm Board didn't get very far but it was a beginning. Other more successful programs followed, administered under the New Deal, the Fair Deal, the New Frontier and the present Administration.

Now we are beginning to deliberate over renewal of the Agricultural Act of 1970 and related legislation. Should the program be renewed? Or, after 44 years, are we in a fortunate new era where we can forget about farm programs?

My reply is that agriculture has made a lot of progress in its struggle for equality and we are encouraged by it. But if anyone tells us the battle is won, we say they are wrong—for the facts show otherwise.

Farm Income. Latest figures from the De-

partment of Agriculture show that income for farm people, per capita, is 20 percent lower than for people not on farms.

Farm Costs. The cost-price squeeze on farmers continues. Farm prices today, at least for crops, are not much different from 20 years ago. But the cost of farm machinery has doubled and taxes and farm wages have gone up considerably more than that.

Farm Prices. The parity index, which is about the only measuring stick of equality that we have, shows that many farm prices are still a long way from equality with other enterprises. Take wheat, for example. The middle of last month the average cash market price for wheat was \$1.97, down somewhat from earlier but considered strong. Yet, this was only 62 percent of parity. If the wheat grower's price was on equal level with inflated costs of things he has to buy, instead of \$1.97 he should have got \$3.16.

One of the Great Myths of today is that farmers, practically everywhere, are doing just fine—and, furthermore, that this alleged prosperity is at the expense of the American consumer.

If farming was such a money-making enterprise, why does the drop-out rate continue so high? As recently as 1960, farm people made up close to 9 percent of our country's total population. In 1972, they made less than 5 percent. That means that in the last 12 years families totalling more than 6 million men, women and children moved out of agriculture.

Perhaps the modern environmentalist, in his proper concern for survival of the bald eagle, the osprey and the sandhill crane will want to add the American farmer to his list of endangered species.

Let's consider the myth that farmers are to blame for the current unhappiness of housewives over rising food costs.

We know that at today's unusually high prices for steak and other livestock products, it doesn't go over very well to suggest to the lady of the house that food is a bargain—because some foods aren't. But I think people across the country, by and large, have lost sight of one important fact—that while food prices have been rising, personal incomes have been going up even more. American people, on the average, are better able to buy food at today's prices than they were a dozen years ago at 1960 prices. In 1960 the average American family was spending 20 percent of its income on food. Last year, despite higher prices, the average family was spending 15.5 percent of its income on food. During these 12 years, according to the Department of Agriculture figures, the cost of food went up 76 points but average family income went up 127 points.

We sometimes forget that food costs have not gone up as much as the cost of most other things. One of our Congressional friends recently observed that if beef had gone up as much as the cost of having a baby, it would be selling for over \$3 a pound.

It is not my purpose to try to minimize consumer complaints. We are all consumers and we all feel the pinch. But some perspective on the matter is justified. If it is any comfort, it is worth noting that consumer prices during 1972 went up more in Canada, Japan, France, Germany, Italy, Netherlands and Britain than they did in the United States where they increased 3.9 percent. In parts of Europe they went up twice that much.

I am afraid that for many years this nation of ours has taken it for granted that it's a natural and desirable condition for farm prices to be low and food prices to be cheap. We don't expect this of other things—automobiles, TV sets, lumber, hospital costs, books and magazines and mini-skirts. But from that basic necessity, food, we expect the economic miracle of cheapness—or, at least, cheapness relative to other things we buy.

One West Coast farm journalist said recently that the farm production story is one of the least known and least appreciated of our time. More than 95 percent of our nation's population is dependent on less than 5 percent for its food supply—yet little do urban people realize that "the unparalleled efficiency of the American farm is one of the basic reasons for the high and still rising American standard of living." He goes on to say that "the moment America goes on a binge of anti-farm legislation . . . the nation will be sowing the seeds of wretchedness for the cities as well as the farms."

The basic purpose of the National Association of Wheat Growers is to provide a means and a voice for American wheat growers to work for a fair and equitable position in our nation's economy. We ask no more than other segments of the economy are getting—but we want no less.

The National Association of Wheat Growers has been functioning since April 1950. We directly represent wheat growers in 11 commercial wheat states and we believe that our voice is that of virtually all wheat growers across the nation for the problems of wheat are common problems.

We suggest to the Congress and the Administration that there are at this time three subjects of especial consequence that require your favorable consideration. One is the new farm legislation. Another is the role of agriculture in international trade negotiations. A third is the critical area of farm-to-market transportation.

New Legislation. We recommend continuation of the Agricultural Act of 1970 for a period of 5 years, with certain changes. One needed change is to set the wheat loan at a minimum of 50 percent of parity.

We request continuation of certificate payments. If such payments are to be phased out, this must be accompanied by legislation that phases in price support loans—or a phase-out of certificate will surely mean a further phase-out of farmers.

We strongly endorse continuation of Public Law 480. This has been the most innovative and effective tool in history for moving farm products into export, feeding hungry people and building large commercial cash markets overseas.

Trade position. With more than half of our wheat production going into export, we have an obvious and strong interest in access to foreign markets. The more that we can sell abroad, at prices that are fair to both grower and consumer, the greater our financial independence will be and the less the farm program costs to the government.

It is essential to the farmer and to the entire nation that agriculture be fully and strongly represented in all international trade reviews, conferences and negotiations in which the United States participates. Others may be more optimistic than some of us are over current prospects for larger and larger exports, giving us a new and higher economic base. One swallow does not make a summer and one especially remarkable export year does not mean that our trade problems have been solved. But we do need to press for wider access to markets and for greater recognition that American agriculture continues to be the world's most efficient producer and that we have a unique ability to supply large amounts of the world's need for grains.

Transportation needs. The need for an efficient, well-managed transportation system is increasingly vital. New market opportunities provide little hope to wheat producers if our transportation system is unable to meet the challenge of increasing demand.

Right now, with a new harvest ahead, we still have at least half of last year's Soviet grain sale to move. Our pipeline is glutted with this grain and movement of Government inventories. Problems caused by delays

and car shortages are being aggravated by tightening fuel supplies.

Policies and programs must be developed to strengthen our transportation system so it can cope with current and future requirements. Failure of our system to keep pace with demand will severely minimize any benefits which we hope to achieve from increased trade.

Thank you ladies and gentlemen, for this opportunity to express our views.

We stand in readiness to work with the Congress and the Administration in whatever ways we can toward these objectives.

Mr. OBEY. Mr. Speaker, I want to congratulate my colleague from Kansas (Mr. SEBELIUS) on coordinating this special order today.

I was happy to participate in "Farm Forum Days" which we in the House have had on previous occasions, because I think it is vital that those who represent urban districts be made aware of the problems facing those of us representing and our constituents living in largely rural areas.

We from rural areas are not unaware of the pending meat boycott or sharply increasing food prices. My wife goes shopping for our family, too, and I am fully aware of those increasing grocery bills.

But, I have said on many occasions, and want to emphasize again here, that there is a difference between farm prices and food prices. In fact there is a difference, too, between our food bills and our grocery bills.

Our total grocery bill reflects not only the food we buy—which takes about 42 cents of each consumer dollar—but the toothpaste which is supposed to make our teeth sparkle, the Ajax which is supposed to make our sinks sparkle, and the polish which is supposed to make our cars sparkle and our children's shoes scuffproof.

In this country we also have a highly complex distributional system for food. Each step of the way, from the farmer to the supermarket, someone is adding a few cents to the price of our food, and in the end the consumer pays a great deal more for food than the farmer has received for producing it. When you add to this the housewives' desire for prepackaged, precooked, premeasured, and precut products, I think you should be able to see in part why our grocery bills seem so high.

Mr. Speaker, while Mr. Butz has proudly told us how farm income is going up, some farmers are not making out so well at all. In fact, I think a strong case can be made that some of the policies of this administration—and not just farm policies—have not been particularly helpful to either the farmers or the consumers.

I know that milk prices and cheese prices have gone up in some areas. But let us look closer at the dairy industry, which is a highly important one in my district.

I just want to quote from Dairy Situation, a publication of the USDA, of March 1973:

This year's prospective strong markets indicate another rise in farmers' gross cash receipts from dairying, likely to around \$7½ billion from \$7.2 billion in 1972. However,

sharply rising production costs may reduce dairy farmers' net incomes from 1972 levels.

What that means is that farmers' prices for feed have skyrocketed, especially for soybean meal. There are strong indications that those sharply increased grain prices did not go to the soybean farmer, but to speculators in the commodities market. But the dairy farmer must pay those increased prices for feed, nonetheless, and he is actually going to lose money, this year compared to last, by producing a hundred pounds of milk.

High feed prices have caused some farmers in my area to quit dairying. Some others realize they can sell their herds and make more money in the beef market. So, if high feed prices and high beef prices cause dairymen to leave their farms, the shortage of milk which could result is certainly not going to lower the price of milk in the grocery stores.

The administration could have done something to thwart this possibility by increasing the price support for milk several weeks ago, but they did not.

The price of feed was not helped either, by the "grain deal" with Russia. That agreement certainly will help right our balance of payments. But it was not a spectacular success for our farmers or our consumers.

We sold about one-quarter of our grain crop last year to Russia. That has increased the price of wheat for bread. It has increased the cost of feeding a cow, and of buying a quart of milk or a pound of beef. But who got the money from the "grain deal"? It was not the farmers, many of whom sold their wheat before they knew a huge sale to Russia was in the works. It was the big grain merchants, whose loyalties are not always with the farmer.

To complicate the issue further, let us look at the energy crisis.

It should be obvious to all that if we are going to meet consumers' demands and the demand from foreign nations for feed grains, we will need to plant more grain in this country. But unless the administration drops all oil import quotas, or in some other way increases our fuel supplies to small refiners, there may not be enough fuel oil this spring for farmers in the Midwest to get their tractors into the fields to plant the seed and cultivate the land which will give us more grain—and more meat.

Mr. Speaker, what I have been trying to point out is that high food prices are not a simple issue, and certainly not one which should be laid solely at the feet of our farmers and rural communities. It is an issue which affects both urban and rural areas, and one which can only be dealt with adequately if Congressmen from all sectors of the country work together to understand all points of view and seek solutions which do not help some of our people at the expense of others.

GENERAL LEAVE

Mr. SEBELIUS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the subject of

my special order today and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Kansas?

There was no objection.

ROBISON INTRODUCES NARCOTICS CRIME BILL

The SPEAKER pro tempore (Mr. FULTON). Under a previous order of the House, the gentleman from New York (Mr. ROBISON) is recognized for 10 minutes.

Mr. ROBISON of New York. Mr. Speaker, drug addiction continues to be a pervasive and perplexing national problem, despite more than a billion dollars a year in Federal funding for drug enforcement, drug intercept, drug rehabilitation and education. In a notable instance of Executive-legislative cooperation, the President and the Congress have joined in a concerted effort to meet every aspect of drug addiction. Congress has established Federal programs to get at both the symptoms and causes of narcotics addiction. The President has provided the most talented administrators for these programs and worked to provide them with generous funding. The 92d Congress passed, with my support, authorizing legislation to create a strong special action office for drug abuse prevention, to serve directly under the President. With the support of Congress, the President has negotiated agreements with opium producing countries to reduce the supply of raw opium, and he has created special drug task forces which are finding increasing success in intercepting large quantities of illicit drugs and apprehending high echelon drug traffickers. All of these efforts are necessary to counteract the many faceted problem of drug abuse—and I will continue to support aggressive Federal action on every front and to propose, as I do today, even stronger action when it is apparent that more must be done.

I am introducing a new narcotic crime bill today because I am convinced that another, stiffer deterrent is needed. The President's drug task forces have been most energetic, and often heroic, in tracking down the high echelon pusher both overseas and in the United States, but the huge profits offered by drug trafficking create two new entrepreneurs of misery for each one that is put out of business. Both the President and Governor Rockefeller have proposed new laws requiring mandatory punishment for narcotics pushers, and I would hope that through the bill I am now introducing I can add my own contribution to this legislative dialog. It is worth mentioning that my own study has taken several months, and that a good deal of my effort went toward finding legislative language which would match my intentions for this bill.

My purpose in this legislation is to distinguish between two levels of drug trafficking which ought to be defined and kept apart when a strong prison deterrent is proposed. There is, first, the street level pusher, who engages in the sale of narcotics to support his own per-

sonal habit, or for relatively small personal profit. This is the individual who is most frequently apprehended, whose case clogs the court docket, and whose confinement further cramps space in prison facilities. He is also one of those, I would maintain, who might be rehabilitated through existing Federal programs and taken out of the drug orbit. If not—or perhaps in conjunction with such rehabilitation programs—he will be subject to the 0 to 15 year prison sentence provided by the Controlled Substances Act.

The second level consists of those I have termed "high echelon drug pushers," who handle large quantities of narcotics and peddle them solely for profit. These are the major, hard drug suppliers, the big time narcotic businessmen often affiliated with organized crime, who realize such exorbitant profits that they are willing to buck prevailing penalties.

Once described, there would seem to be little difficulty in recognizing a so-called "high echelon drug pusher," yet finding the correct terms for a bill which seeks to focus on this individual has proven one of the more challenging legislative tasks I have ever taken on. I emphasize the difficulty of this undertaking to impress upon my colleagues that we must be most careful and correct in any final draft of such legislation, so that the law does precisely what we intend—and no more.

If one chooses to distinguish between "big fish" and the "small fry" among drug dealers—as have the President and Senator JAVITS—there are basically two ways to proceed. The narcotic trafficker can be identified by the amount of hard narcotics found in his possession, or he can be defined according to the function he plays in the drug distribution network. The President and my fellow New Yorker, Senator JAVITS, have chosen the quantitative route, such that the President's Heroin Trafficking Act would apply its most severe penalties to those who are found to have more than 4 ounces of hard narcotics in their possession, and Senator JAVITS proposes his most severe penalty, 7 years to life imprisonment and a \$200,000 fine, for those twice apprehended carrying more than 10 ounces.

When considering this approach, I contacted the Bureau of Narcotics and Dangerous Drugs to determine what volume of drugs might be handled by a high level pusher. During these conversations, I found that the going price in New York City for 1 ounce of 25 percent pure heroin was \$16,000—which, on the basis of my own budget at least, seems to be a high level price. It was further explained that by the time this ounce of heroin gets to the streets, it has been adulterated to between 2 and 6 percent pure, with the price ranging from \$250 to \$1,800 per ounce.

These are the kind of details which must be contended with when a definition of the high-echelon pusher is attempted. To my own mind, they provide several obstacles to succinct legislative language, as well as grounds for speculation about the possibilities for evasion

of any statute which gages its penalties to a quantitative measure. Whatever number of ounces are used as a cutoff, it would be most convenient and vitally important to the narcotics dealer to carry only a fraction less than the statutory limit, to avoid the possibility of a long prison sentence without parole.

The purity of that quantity of heroin provides an additional complexity. For instance, should the man who carries 4 ounces of heroin which is 25 percent pure, and worth \$64,000 in New York City, receive the same mandatory sentence as the man caught with 4 ounces of 2 percent heroin worth \$1,000? My own inclination is to say "No," arguing that a stiffer deterrent does not serve its purpose unless it is in some way measured more precisely to the gravity of the offense, and to the kind of individual who is likely to commit that offense.

So, how to describe this man? I would propose the latter of the two alternatives I raised: That the culpable individual be described according to the role he plays in providing hard narcotics. My bill, therefore, defines the high-echelon drug pusher as "any person engaged in a conspiracy to import, smuggle or purchase for further distribution a controlled substance in schedule I or II [of the Controlled Substances Act] which is a narcotic drug."

After emphasizing the difficulties in constructing such a definition, I can hardly deny the imperfections of this legislative description; however, I do suggest that the phrase "for further distribution" might be one key to isolating the big time trafficker. He is not usually seen on the street selling individual bags of drugs; he is the dealer in large quantities, the businessman who has calculated the risks and the profits and, also, his own ability to evade imminent prosecution or a lengthy prison sentence by snarling legal technicalities to the greatest degree possible.

Let me repeat, factoring in that key phrase—"for further distribution"—may enable us to catch these "big fish" we want. And, it is a fact that this sort of criminal has not been running much of a risk during the past few years. For a variety of reasons, these members of the narcotics distribution system have been getting light sentences or probation in many court jurisdictions. This is particularly true in my own State of New York, and certainly one reason for Governor Rockefeller's proposal that drug pushers receive mandatory life sentences, or the death penalty in the most serious cases.

Prof. James Q. Wilson has described in a recent New York Times Magazine article a study which maintains that certainty of punishment has a significant deterrent effect on crime rates, while severity of punishment has a deterrent effect only on murder. Although this contention is presented in the form of a hypothesis, I think many of us have a gut feeling that if penalties are to make a difference in deterring dope trafficking, there must be unyielding penalties which are clearly understood by potential violators.

They must also be severe enough to express society's contempt for the gravity of that crime, and severe enough to assure society that there will be no opportunity for the convicted felon to repeat such a malicious offense.

The bill I am asking my colleagues to consider brings these ideas to bear on the high echelon drug pusher. I propose stiffer penalties than now exist in Federal law for those who reap unconscionable profits by ruining countless lives and destroying others. My bill calls for a mandatory 20-year prison sentence, without parole, for the big time drug peddler who is engaged in a conspiracy to import, smuggle, or purchase a controlled substance for profit.

As I have suggested, the certainty and severity of punishment must go hand in hand if any legislative proposal is to have the desired effect on drug trafficking. There can be no certainty of punishment if plea-bargaining is used to clear court dockets, or if individual judges inject a philosophical relativity which results in short or reduced sentences to narcotics dealers. The vast profits to be made will lure these offenders right back to their narcotics dealership.

So that both the public and drug pushers are fully aware of prison sentences given to convicted drug traffickers, I am also proposing in my bill that a "judicial spotlighting" procedure be established. These provisions would require the Department of Justice to release the following information on a monthly basis: Name of the judge; name of the offender; nature of the conviction, and length of sentence.

Such a practice would be similar to methods now used by the Department of Transportation to inform the public of the auto industry's recall statistics. In this manner, my bill will demonstrate a certainty of punishment to present and potential narcotics traffickers, as well as "spotlight" judges who continually hand down short or suspended sentences to the big time peddlers of hard drugs. I ask that my colleagues give their full attention to this proposal, which I insert for their study.

H.R. 6272

A bill to amend the Controlled Substances Act to increase the penalty under that Act for the illegal distribution of certain drugs by high echelon pushers

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 401(b)(1)(A) of the Controlled Substances Act (21 U.S.C. 841(b)(1)(A)) is amended—

(1) by inserting after "person" each time it occurs the following: "unless such person is a high echelon pusher,"

(2) by inserting immediately before the last sentence thereof the following: "A high echelon pusher who violates this paragraph shall be imprisoned not less than twenty years, or for life, and, notwithstanding any other provision of law, the court shall not suspend the sentence of such pusher under this paragraph, or give such pusher a probationary sentence, nor shall such pusher be eligible for parole during the term of such imprisonment."

Sec. 2. Section 102 of such Act (21 U.S.C. 802) is amended by adding at the end thereof the following:

"(26) The term 'high echelon pusher' means any person engaged in a conspiracy to

import, smuggle, or purchase for further distribution a controlled substance in schedule I or II which is a narcotic drug."

SEC. 3. The Attorney General shall release to the public each month a statement which shall identify each high echelon pusher convicted of an offense under section 401 (b) (1) (A) of the Controlled Substances Act during the preceding month, together with the sentence imposed with respect to such conviction, the name of the judge imposing such sentence, and the factual allegations of the indictment relating to such offense.

RESOLUTION INTRODUCED TO MAKE ABORTION ILLEGAL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. HOGAN) is recognized for 20 minutes.

Mr. HOGAN. Mr. Speaker, on January 30 in response to the Supreme Court decisions legalizing abortion earlier that month, I introduced a constitutional amendment, House Joint Resolution 261, which would reverse that decision.

I said at that time that I had to protest the gross disregard for human life which is now the official law of the United States. I cannot accept that it can be right—that it can be legal—to end one human life for the personal convenience of another human being.

Since that time I have received over 4,200 letters from all over the Nation in support of my amendment in addition to petitions listing thousands of additional supporters. Daily I receive phone calls from individuals and groups all over America who want to support this effort and want to know how they can help.

Mr. Speaker, today I am reintroducing my amendment, this time with seven co-sponsors. They are: Mr. BEVILLE, Mr. CAMP, Mr. KEATING, Mr. HUBER, Mr. LUTJAN, Mr. MAZZOLI, and Mr. WON PAT. Some of our other colleagues have introduced similar measures with a view toward reversing the Supreme Court's abortion decision.

I am happy to have these distinguished Members join me in an effort to overturn the grievous decision of the Court.

In addition to the overwhelming sup-only two referendums on the abortion question clearly demonstrate that the overwhelmingly majority of Americans do not share the Supreme Court's callous disregard for the lives of the unborn. Last November in Michigan and North Dakota voters turned back efforts to liberalize abortion laws. The results are as follows: Michigan—yes, 1,270,416; no, 1,958,265. North Dakota—yes, 62,604; no, 204,852.

I think it is clear to most Americans that the only way we will overturn the Court decision is to amend the Constitution. It is the only effective recourse left open to us.

The abortion decisions of the Supreme Court (Roe against Wade and Doe against Bolton, January 22, 1973), held that the child in the womb is not a "person" within the meaning of the 14th amendment which provides:

No State shall . . . deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws.

The Court's decisions are a practical

license for elective abortion at any stage, right up to the last minute before normal delivery.

My amendment would protect the right to live from life's beginning. It would not, however, prevent the State from making reasonable classifications to govern the rights of the child in the womb to inherit, to sue for personal injuries and in other matters where reasonable and legitimate distinctions can be made between the child in the womb and an older human being. Such distinctions in varying degrees now exist in the laws of all States and my amendment would not disturb them.

A constitutional amendment is absolutely necessary to protect not only the child in the womb, but the retarded, the aged and other innocent persons who are now in peril of being defined as nonpersons.

When members of a society have the audacity and the arrogance to assume the power to attach a value or lack of it on another human being, it is a short step from abortion to killing the retarded, the crippled, the senile, the other "unwanted" members of our human family.

It is well to remember that judicial decisions are not necessarily sound moral decisions. The view that the question of abortion is one should be decided between a pregnant woman and her doctor would be a sound one if a fetus were a tonsil or an appendix, but it is not. The fetus is not an organ; it is not part of its mother and should not be subject to disposal at her wish alone.

The fetus—literally, "the young one"—is one of us—he is a member of the human family. Because he cannot defend himself, society must defend him, there is no pressing social problem or no degree of personal inconvenience which can justify his destruction. If history has taught us anything, it is that no society should permit some of its members to decide which of the others shall live. In Nazi Germany they started with abortion and "progressed" to medical experimentation and elimination of mental deficiencies to extermination of 6 million Jews. They made a value judgment about these lives and decided they were not worthy of staying alive. The horror of the same antilife movement in America chills and terrifies me.

Each of us lives briefly and but once, and we should treat each precious human life with the respect that its uniqueness demands. To do so is to dignify the human family; to treat human life as expendable if it is inconvenient is to demean all of us.

WHEAT PRODUCERS SPEAK OUT ON FARM PRICES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Dakota (Mr. ABDNOR) is recognized for 25 minutes.

Mr. ABDNOR. Mr. Speaker, this morning I attended the seventh annual congressional breakfast of the wheat producers leadership of this Nation. The breakfast, sponsored by the National Association of Wheat Growers, Great

Plains Wheat, Inc., and Western Wheat Associates, reflected the legitimate concern of the Nation's wheat producers over consumer criticism of food prices, the need for new and meaningful farm program legislation and future farm prices.

In talking to individual producers and their families I found the same concern as shown by many urban consumers over rising prices.

Their concern, however, was not for food alone, but for the many, many production items required to produce the Nation's food supply. They questioned the singling out of farm products as the villain when all costs are rising. To them, farm products must demand a higher return, not just for the sake of greater and greater income, but to keep pace with rising costs of production and personal family needs.

They expressed a fear that concern over consumer reaction to rising food prices may father policies which could perhaps be in the short-term interest of the consumer but against the long-term interests of the consumer and the producer. They called for consideration of both producer and consumer interests in developing national policies.

Mr. Speaker, we will make many decisions important to both consumers and producer interests. I am hopeful that this balance of interests can be found. I feel it would be helpful to Congress if we reviewed the statements of the wheat industry leaders made this morning and I would like to make them a part of the Record.

The first statement is by Ray Davis, president of the National Association of Wheat Growers, who is a wheat farmer from the neighboring State to South Dakota, Nebraska. Mr. Davis' statement covers the legislative needs of producers in the important areas of farm programs Public Law 480, trade and transportation.

The second statement was presented by another nationally known wheat spokesman on behalf of the two foreign market development organizations, Great Plains Wheat, Inc., and Western Wheat Associates, Inc., Dean Parsons, president of Great Plains Wheat. Mr. Parsons is from Wall, S. Dak. He has been active for many years in wheat affairs at both the State and National level and brings an unusually clear perspective to essential U.S. policy in foreign trade.

In closing, Mr. Speaker, let me state that I appreciated the opportunity to break bread this morning with my colleagues and the wheat producers from South Dakota and the other major wheat-producing States. I only wish that every consumer had the opportunity to personally visit with these farmer-businessmen and their families. They are dedicated to producing abundant supplies of food for the world, at a reasonable price, and expect no more than a reasonable return on their investment and labors.

The statements follow:

REMARKS OF RAY DAVIS, PRESIDENT, NATIONAL ASSOCIATION OF WHEAT GROWERS AT THE SEVENTH ANNUAL CONGRESSIONAL BREAKFAST, MARCH 28, 1973

Distinguished Members of Congress and Friends, Will Rogers used to say that anything can be funny as long as it's happening to somebody else.

I'm afraid there are people in our country today who think it would be kind of funny—at least, not a bad idea—if farmers, after all these years, had their agricultural programs abolished. And, along with this, maybe we ought to have a few old-fashioned surpluses hanging around to lower farm prices and make raw materials and food prices a little cheaper.

But those of us who make a living by farming don't think this would be very funny. Or wise. Or right.

We don't think it's right, through low farm prices, to have farmers subsidize the rest of the nation, as too often they have done. We do think it's right, and necessary, to continue to have the supply management and income safeguards of farm programs because, no matter what is said about the nobility of agricultural independence, in a world dominated by big enterprise the individual farmer, alone, doesn't have much voice.

We have come far since the first efforts to set up a national farm program. That was 44 years ago—1929—during the Presidency of Herbert Hoover, when the Congress established the Federal Farm Board. Its main purpose still has a familiar ring: "To place agriculture on a basis of economic equality with other industries."

Unfortunately, the old Farm Board didn't get very far but it was a beginning. Other more successful programs followed, administered under the New Deal, the Fair Deal, the New Frontier and the present Administration.

Now we are beginning to deliberate over renewal of the Agricultural Act of 1970 and related legislation. Should the program be renewed? Or, after 44 years, are we in a fortunate new era where we can forget about farm programs?

My reply is that agriculture has made a lot of progress in its struggle for equality and we are encouraged by it. But if anyone tells us the battle is won, we say they are wrong—for the facts show otherwise.

Farm Income. Latest figures from the Department of Agriculture show that income for farm people, per capita, is 20 percent lower than for people not on farms.

Farm Costs. The cost-price squeeze on farmers continues. Farm prices today, at least for crops, are not much different from 20 years ago. But the cost of farm machinery has doubled and taxes and farm wages have gone up considerably more than that.

Farm Prices. The parity index, which is about the only measuring stick of equality that we have, shows that many farm prices are still a long way from equality with other enterprises. Take wheat, for example. The middle of last month the average cash market price for wheat was \$1.97, down somewhat from earlier but considered strong. Yet, this was only 62 percent of parity. If the wheat grower's price was on equal level with inflated costs of things he has to buy, instead of \$1.97 he should have got \$3.16.

One of the Great Myths of today is that farmers, practically everywhere, are doing just fine—and, furthermore, that this alleged prosperity is at the expense of the American consumer.

If farming was such a money-making enterprise, why does the drop-out rate continue so high? As recently as 1960, farm people made up close to 9 percent of our country's total population. In 1972, they made less than 5 percent. That means that in the last 12 years families totalling more than 6 million men, women and children moved out of agriculture.

Perhaps the modern environmentalist, in his proper concern for survival of the bald eagle, the osprey and the sandhill crane will want to add the American farmer to his list of endangered species.

Let's consider the myth that farmers are to blame for the current unhappiness of housewives over rising food costs.

We know that at today's unusually high prices for steak and other livestock products, it doesn't go over very well to suggest to the lady of the house that food is a bargain—because some foods aren't. But I think people across the country, by and large, have lost sight of one important fact—that while food prices have been rising, personal incomes have been going up even more. American people, on the average, are better able to buy food at today's prices than they were a dozen years ago at 1960 prices. In 1960 the average American family was spending 20 percent of its income on food. Last year, despite higher prices, the average family was spending 15.5 percent of its income on food. During these 12 years, according to the Department of Agriculture figure, the cost of food went up 76 points but average family income went up 127 points.

We sometimes forget that food costs have not gone up as much as the cost of most other things. One of our Congressional friends recently observed that if beef had gone up as much as the cost of having a baby, it would be selling for over \$3 a pound.

It is not my purpose to try to minimize consumer complaints. We are all consumers and we all feel the pinch. But some perspective on the matter is justified. If it is any comfort, it is worth noting that consumer prices during 1972 went up more in Canada, Japan, France, Germany, Italy, Netherlands and Britain than they did in the United States where they increased 3.9 percent. In parts of Europe they went up twice that much.

I am afraid that for many years this nation of ours has taken it for granted that it's a natural and desirable condition for farm prices to be low and food prices to be cheap. We don't expect this of other things—automobiles, TV sets, lumber, hospital costs, books and magazines and miniskirts. But from that basic necessity, food, we expect the economic miracle of cheapness—or, at least, cheapness relative to other things we buy.

One West Coast farm journalist said recently that the farm production story is one of the least known and least appreciated of our time. More than 95 percent of our nation's population is dependent on less than 5 percent for its food supply—yet little do urban people realize that "the unparalleled efficiency of the American farm is one of the basic reasons for the high and still rising American standard of living." He goes on to say that "the moment America goes on a binge of anti-farm legislation . . . the nation will be sowing the seeds of wretchedness for the cities as well as the farms."

The basic purpose of the National Association of Wheat Growers is to provide a means and a voice for American wheat growers to work for a fair and equitable position in our nation's economy. We ask no more than other segments of the economy are getting—but we want no less.

The National Association of Wheat Growers has been functioning since April 1950. We directly represent wheat growers in 11 commercial wheat states and we believe that our voice is that of virtually all wheat growers across the nation for the problems of wheat are common problems.

We suggest to the Congress and the Administration that there are at this time three subjects of especial consequences that require your favorable consideration. One is the new farm legislation. Another is the role of agriculture in international trade negotiations. A third is the critical area of farm-to-market transportation.

New Legislation. We recommend continuation of the Agricultural Act of 1970 for a period of 5 years, with certain changes. One needed change is to set the wheat loan at a minimum of 50 percent of parity.

We request continuation of certificate payments. If such payments are to be phased

out, this must be accompanied by legislation that phases in price support loans—or a phase-out of certificate will surely mean a further phase-out of farmers.

We strongly endorse continuation of Public Law 480. This has been the most innovative and effective tool in history for moving farm products into export, feeding hungry people and building larger commercial cash markets overseas.

Trade position. With more than half of our wheat production going into export, we have an obvious and strong interest in access to foreign markets. The more that we can sell abroad, at prices that are fair to both grower and consumer, the greater our financial independence will be and the less the farm program costs to the government.

It is essential to the farmer and to the entire nation that agriculture be fully and strongly represented in all international trade reviews, conferences and negotiations in which the United States participates. Others may be more optimistic than some of us are over current prospects for larger and larger exports, giving us a new and higher economic base. One swallow does not make a summer and one especially remarkable export year does not mean that our trade problems have been solved. But we do need to press for wider access to markets and for greater recognition that American agriculture continues to be the world's most efficient producer and that we have a unique ability to supply large amounts of the world's need for grains.

Transportation needs. The need for an efficient, well-managed transportation system is increasingly vital. New market opportunities provide little hope to wheat producers if our transportation system is unable to meet the challenge of increasing demand.

Right now, with a new harvest ahead, we still have at least half of last year's Soviet grain sale to move. Our pipeline is glutted with this grain and movement of Government inventories. Problems caused by delays and car shortages are being aggravated by tightening fuel supplies.

Policies and programs must be developed to strengthen our transportation system so it can cope with current and future requirements. Failure of our system to keep pace with demand will severely minimize any benefits which we hope to achieve from increased trade.

Thank you ladies and gentlemen, for this opportunity to express our views.

We stand in readiness to work with the Congress and the Administration in whatever ways we can toward these objectives.

REMARKS OF DEAN PARSONS, PRESIDENT, GREAT PLAINS WHEAT, INC., AT THE SEVENTH ANNUAL CONGRESSIONAL BREAKFAST, MARCH 28, 1973

Members of Congress, honored guests and fellow wheat producers. I am very pleased to have been asked this morning to address you on behalf of Great Plains Wheat and Western Wheat, the two wheat producer marketing organizations.

For those of you who may not yet be familiar with our organizations and the functions they perform, permit me to explain briefly that both Great Plains Wheat and Western Wheat Associates are organizations supported by the wheat farmers in their member states through the State Wheat Commissions. We work with the Department of Agriculture under project agreements with the Foreign Agricultural Service as part of their cooperator program, to protect farmer income by expanding sales of U.S. wheat into the overseas markets. We are pleased that many of the key officials of the USDA are here also with us this morning.

We maintain offices in the United States and work also through nine foreign offices throughout the world. We also cooperate

closely with the National Association of Wheat Growers and the state wheat grower groups, which it represents, although our functions are actually separate and distinct.

This marketing year has been a year of exciting activity, the significance of which will probably be felt in wheat marketing for at least the next several years if not actually permanently.

It has, of course, been a very good year. It was the year of the historic grain sale to the Soviet Union, which has proved to be beneficial to practically every sector of the U.S. economy. There were some producers who failed to benefit from the higher prices which were paid for wheat after July 1972, but these producers can still benefit from the sale by cashing in on the stronger markets and wheat prices which are still good despite some decline from December and January levels. The prospect of what we feel will continue to be good markets during at least this next marketing year is heartening.

We are, nevertheless, becoming increasingly concerned. These may be good times, but they are also frightening times, for a time of change is always a time of apprehension. When we examine the strength in the wheat markets, the exceptional sales and the sharply reduced carryover we realize that a great deal of it has come to us from abroad. We harvested good crops in 1972, which would have greatly increased our carryover if we had not had an exceptional export year.

When we talk of a market-oriented agriculture we are certainly talking also of foreign markets, for they now must account for over one-half of total U.S. wheat disappearance. The 1973 wheat crop is being estimated at approximately 1.75 billion bushels. This means we must export at least one billion bushels this next marketing year if we are not to add to our carryover. Favorable export programs and an aggressive export posture are, therefore, of extreme importance to the wheat economy.

As producers there are times when we are not happy with one or another of the positions taken by the Department of Agriculture on domestic issues and these differences have led to some disagreement. On one point, however, we have always been completely in accord, and that is an attempt to maximize exports to the greatest extent possible. To Mr. Butz and the other USDA Officials present here this morning we say "We salute your efforts to expand grain exports and take particular note of your success in helping open up new markets for U.S. grains. We have enjoyed working with you for this expansion and look forward to continuing this important effort." Unfortunately, the interest in exports does not appear to be completely universal in the United States. We see some indications of what may be the development of an attitude against grain exports. We fear that concern over consumer reaction to rising food prices may foster policies which could perhaps be in the short-term interests of the consumers but which might prejudice agriculture as we now know it and, therefore, be against the long-term interests of the consumer and the producer. Such outside pressure is undoubtedly going to be felt in the deliberation on new legislation, on which our colleagues in the National Association of Wheat Growers will be working. We do not envy them their work on what we feel will be a difficult assignment, although we as farmers share their concern over the outcome, for we know the pressures to which the USDA is being subjected. We feel that those of us working on exports also have our work cut out for us.

Although exports for at least the next marketing year should continue to be good, we are wondering where we shall go from there. We fear that export policies may be established which are compatible with the current seller's market but may not be compatible with the more competitive years which are

sure to come. At the present time we are exporting without benefit of some Government-sponsored programs such as the export equalization payment program. So long as it is not necessary obviously such a program should not be used, but we have urged the Department of Agriculture to maintain stand-by authority for an aggressive program when it should again become necessary. There are also other issues which will strongly influence grain exports.

The United States has been able to continue to expand its Government sponsored credit programs, resulting in increased export possibilities. We urge strong support of this type of program, necessary to continue to keep the United States competitive in world markets. Although the current situation is still best described as a seller's market, we note that competitive exporters continue to use Government sponsored credit. It will be imperative that the United States continue to be in a position to offer similar terms.

The PL 480 program has been an excellent market development tool during the past several years. We were disappointed to note some cut-back in planned Title II programs, which involve relief and government to government shipments, but relieved to note that there is not cut-back—indeed a slight increase—in proposed expenditures for Title I programs. Title I is, of course, the program which involves payment for commodities, usually in dollars, over a prescribed period of time. It is this type of program which we feel is the most beneficial in helping build foreign markets.

Gentlemen, I am a farmer, as are my colleagues here from Great Plains Wheat, Western Wheat and the National Association of Wheat Growers. I am proud of what farmers have done, what they are doing and what they can do in the future. I cannot remember when the farm situation has been as good, and, as I have already mentioned, this is in very large part due to the foreign markets. I am convinced that the world market is our market—that the amount of land we use increases or decreases in accordance with the rise and fall of foreign demand, and we want to take care of this foreign demand and will continue to work for the foreign markets. Not only will we support foreign market development activities by expending large amounts of time, effort and our own funds, but we will also support broad-based trade negotiations which should help us to take the greatest possible advantage of what the foreign markets may offer.

We know that in the EEC enlargement negotiations now going on it is very important an effective agreement be worked out. These negotiations should provide the United States with an opportunity to obtain greater access for U.S. grains to areas such as the European Community. We hope the United States may be able to enter such negotiations with as strong a position as possible.

We know our foreign customers have to have the right to sell to us if we want to sell to them. We will support giving them the same kind of tariff treatment other countries get from us.

We know we have to work to help clear up any disturbances in our export system, whether or not it be rail car shortages or rail and dock tie-ups which stop our grain from moving to our customers.

The farmer has come a long way in helping himself, but he has not come that way alone—we all feel you have come that way with us, and we assure you of the sincerity of our gratitude for your assistance. Thank you.

IMPORTS CAPTURE CONSTRUCTION SITE IN CONGRESS' BACKYARD

The SPEAKER pro tempore. Under a previous order of the House, the gentle-

man from Ohio (Mr. MILLER) is recognized for 5 minutes.

Mr. MILLER. Mr. Speaker, the cast of characters in the continuing saga of foreign-made cranes on Capitol Hill enlarged today as the third French-made tower crane is being assembled on the construction site of the Madison Library across the street.

Although these very same tower cranes as well as hydraulic excavators and hoisting equipment are made here in this country, the domestic construction industry insists on buying abroad, thus contributing to our balance-of-payments deficit and exportation of jobs. One firm in my home State of Ohio producing these units is evaluating whether it can possibly stay in business when the market is largely cornered by France and other European countries.

It is tragically ironic that while we daily decry the loss of jobs from import penetrations and the steady outflow of dollars, the American taxpayer subsidizes the purchase and use of imported construction equipment to build our public buildings.

Equally absurd is the case of a major steel company which preferred to buy a foreign-made crane made of steel from one of its competitors over an American unit made with the company's very own steel.

I suggest that the Congress know what is going on in its own backyard before getting too far out on a limb in talking about what needs to be done to curb imports.

DR. NELSON POLSBY ON ROLE OF CONGRESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. McFALL) is recognized for 5 minutes.

Mr. McFALL. Mr. Speaker, Los Angeles was one of the sites for Time, Inc.'s "Role of Congress" regional meetings in December. Dr. Nelson Polsby, a distinguished scholar in congressional affairs, addressed the meeting on "congressional knowledge" what it knows/does not know and how it may improve its data gathering and analysis. The moderator of the discussion was Louis Banks, editorial director, Time, Inc. I insert the text of the address in the RECORD at this point:

Mr. BANKS. Forgive my interrupting your dining, but we are going to put you to work.

My name is Louis Banks, I am the Editorial Director of Time Inc. publications. Here, too, are Henry Luce III, a vice president of Time Inc., and Henry A. Grunwald, the Managing Editor of Time, the Weekly Newsmagazine. We are your hosts today, along with some of our colleagues.

Our assignment, in which we have invited your participation, is to try to bring back to public view the vital importance of the Congress in the functioning of our national Government. And if you will agree with me that the present and future hope of free men everywhere hangs on the successful operation of that Government, then we can enter upon our assignment convinced that it's worth all the effort that we can muster.

In the opinion of some of my Washington colleagues, the erosion of congressional power and influence comes close to providing a constitutional crisis. But you will hear from others that things are somewhat better than this; in fact, that the fault, dear friends, lies

not solely in our Congress, but partially in the journalism that covers it. In any case, we find this study of the Role of Congress an entirely congenial one since the cover of the very first issue of *Time*, March 3, 1923, was that of the former Speaker of the House of Representatives, Uncle Joe Cannon, and from that day to this, *Time* has written some 150 cover stories on congressional figures.

Our format for these meetings is to bring together for a panel discussion a distinguished scholar in the area of congressional affairs, two members of the Congress, and our own Senior Congressional Correspondent. Our scholar today is Dr. Nelson W. Polsby, Professor of Political Science at the University of California, Berkeley. You will note his exemplary credentials in your program. But what makes him very special is that he's spent a great deal of time pounding the corridors of the U.S. Capitol in pursuing his research. He will summarize for us his paper which many of you have read in advance of this meeting. It is titled *Does Congress Know Enough to Legislate for the Nation?* We welcome Dr. Polsby here today.

Dr. Polsby. Thank you, Mr. Banks.

Ladies and gentlemen: Of course we all remember what the old vaudeville term was for the opening number on the bill. This afternoon, I guess I get to be the dog act. It's not so bad to be the dog act at a birthday party, however.

Recently one of my daughters got a birthday card and on the front cover was Charlie Brown who said: "Happy birthday. May you enjoy an abundance of ice-cream and cake." And inside, Snoopy said: "Everything that falls on the floor is mine."

One of the things that will undoubtedly fall to the floor before long is the paper that was prepared for this session, and that is unquestionably mine. It was written—as my papers sometimes are—without excessive recourse to the English language, so if you will bear with me, I think I'll just summarize it briefly.

It begins by saying: "No, Congress doesn't know enough to legislate for the nation." But then, nobody else does either. Because Congress holds a constitutional mandate to try, it does seem incumbent upon all of us to give some thought to how Congress can improve its capacity to gather, analyze and use facts. But we should begin with the realization that none of us know or are likely ever to know enough to solve the major problems of our society.

In some respects, I suggest Congress does do quite well as an information collecting agency. These special areas of competence come about because of the sort of organization Congress is.

The Constitution provides for frequent congressional elections. Because Congressmen must run for office, Congress as an institution receives and processes enormous amounts of information about who wants what, and how badly in the way of public policy and federal activity.

The Constitution further provides for checks and balances among separate institutions sharing powers. Because the lives of their constituents and their careers as legislators are tied in various ways to the performance of the bureaucracies of the Executive Branch, Congress receives and processes a great deal of information about the delivery of public services and the execution of the laws. Right about here I have a short section on the committee system, which is the means by which this information is gathered, and I am not going to read it but just simply say that as I see it, the committee system and seniority system, which is the means by which the population of the committees are stabilized, is the foundation not merely of congressional power but also congressional competence. Consequently, to improve congressional compe-

tence, we have to improve, not cripple, congressional committees.

Now, in the next section of the paper, I attempt to deal with two common complaints about congressional information. The first is that Congress is usually outgunned by the experts from the Executive agencies, and consequently lets its prerogatives in shaping legislation lapse.

This is certainly true some of the time. Some of the time, however, it is not. The fact is that when committee chairmen are able and intelligent, as they frequently are, and want to pursue an independent congressional course of action, they can get all the information they need, and deploy it skillfully.

This may work to the advantage of Congress as a collective entity, but it does not necessarily meet the needs of individual Congressmen. As individuals, Congressmen by the dozens may rightly feel at the mercy of their ignorance. The tax-writing staff of the Joint Committee on Internal Revenue Taxation, for example, does not work directly for them after all, but rather for the small fraction of members directly charged with writing tax policy. Yet they all must vote on tax measures. Most of them will have at one time or another to pretend to knowledge of what they are doing in this area. And in their private knowledge-gathering enterprise, over the vast range of policies, individual Congressmen and Senators are mostly on their own.

This creates a tension between two clear organizational imperatives: Congressmen and Senators must specialize, or else Congress loses the capacity to shape policy that expert knowledge alone grants. On the other hand, Congressmen and Senators must be generalists because they believe—and for good reason—that this is what their constituents demand of them.

The resolution of this dilemma that I have in general favored comes down hard on the side of specialization. We must educate constituents to more reasonable expectations of their representatives. We must help them to see that the demand for the illusion of omniscient Congressmen is a demand for the reality of an incompetent Congress.

Members of Congress are entitled to smile at this prescription; indeed they are entitled to ask how someone who claims to have taught in a university these last few years, comes to place such confidence in the efficacy of education. There is no real answer to this objection except this: alternative solutions entail much higher costs and risks, most significantly the risk of rendering the Legislative Branch utterly impotent.

The second complaint about congressional knowledge is this:

In many subject matter areas, Congress is immobile and ignorant because the Congressmen in charge of those sectors are immobile and ignorant and wish to remain so. This may come about for four reasons:

Senility or ineptitude of committee chairmen; the opposition of chairmen to legislation in the field; the corruption of chairmen by outside interests; or collusion between chairmen and Executive agencies.

This complaint is also true some of the time. Many people have given thought to the underlying problem of the selection of committee chairmen to which it points. The best suggestion I have heard that deals with this problem was made a few years ago by Congressman Udall. To decrease the influence of outside factors on committee chairmen, and to increase the influence of inside factors, Udall suggested subjecting all committee chairmen to an automatic, nondiscretionary election by secret ballot in the party caucus that precedes the opening of each Congress. Chairmen would be automatically slated against the two next ranking committee members, so an element of choice would be present, but seniority—which is a

major incentive for Congressman to build up subject matter expertise—would also be given its due. It was anticipated, of course, that most chairmen most of the time would pass this hurdle without difficulty. Only those chairmen hopelessly out of step with the majority of their party in Congress, or definitely incapable of doing the job, would be likely to be replaced in this process. But the mere existence of such a mechanism might reasonably be expected to encourage chairmen to build their alliances within Congress more broadly and, hence, more responsibly. Some of these elements, of course, have begun to be enacted, mostly by House Republicans. It is, I take it, an attempt by Democrats to change what is presently an open ballot of chairmen into a secret ballot. Of course, it's certainly the case that a secret ballot would be much more likely to get a fair test of the sentiments of the Congressmen, but so-called public interest lobbying groups have opposed a secret ballot because it makes it harder for them to keep score on their friends and foes.

Congress has moved slowly, but on the whole, more effectively in related areas. A gratuitous Supreme Court decision in *Powell v. McCormack* places the establishment of an automatic congressional retirement system beyond the reach of any enactment short of a constitutional amendment. It is within the power of Congress, however, to restrict the holding of chairmanships to persons below a certain age. Quite understandably, more progress has been made on the carrot than on the stick side of this problem; congressional pensions are now sufficiently generous—as they should be—to help senior members contemplate voluntary retirement with equanimity, and even pleasure.

Once we increase the number of committee chairmen who want to improve data gathering and analysis, what advice have we got to help them go about it? One thing they can do is get some help in monitoring the professional capability of their committee staffs by constituting advisory panels of outside experts to meet occasionally to consult with the chairmen and the committee on the general quality of the staff's output. Another suggestion would be to take a leaf from the book of the Executive Branch.

It seems to me that congressional knowledge falls behind that of the Executive Branch in those areas where the Executive has been most energetic in adopting professional standards of data collection and analysis. Adopting professional standards means submitting to the rules and practices and craft norms and constraints of the professional community. It is such a community which decrees, for example, what respectable economics is—regardless of the politics in whose service the economics is harnessed. In consequence of this commitment to professionalization by the Executive Branch, Democratic Administrations must find Democratic economists, and Republicans, Republican economists to do their economics for them. The age of debate about economic policy is surely not over, but the age of patent medicine economics in national politics—at least in the Executive Branch—is over.

Many bright, young economists now have the opportunity early in their careers to serve a tour of duty with the Council of Economic Advisers. There is no reason why Congress cannot tap the same pool of talent for its committee staffs, and in much the same way if it chooses to do so. The same is true of operations researchers or defense analysts. Instead of hearing from experts occasionally at hearings, the relevant committees and subcommittees could hire them for two-year periods, let us say, and gain a much greater familiarity with the thought waves that underlie expertise. This can also give Congress continuous access to technically advanced

criticism of Executive proposals, more sophisticated insight into alternatives, and more sensitive awareness of emerging problems in the world.

That, more or less, is what there is in my paper. I'm sorry to have taken quite so long, but now that Ed Sullivan's off the air, we dog acts have to seize every chance we can get.

Mr. BANKS. Thank you, Dr. Polsby.

Our two congressional speakers are from notable Western Political families. First of all, we have Senator Bob Packwood of Oregon. His great-grandfather was member of the 1857 Oregon constitutional congress, and his father was adviser to the Oregon State legislature on tax and labor affairs. In that atmosphere, Bob Packwood got the political bug. He was taught by Mark Hatfield, now his senior colleague in the Senate, and he was a Root-Tilden Scholar at the law school of New York University. He defeated the veteran Wayne Morse to become Oregon's junior senator in 1968, and arrived in the Senate to become at that time its youngest member.

In any case, Senator Packwood is a leader in liberal Republican ranks and an inspiration to those who would like to change things, to add a new spirit of life to the Senate of the U.S. It is my great pleasure to present Senator Bob Packwood.

Sen. Packwood. Mr. Banks, I find that "young" is relative even to those who are not succeeding me as younger Senators. To some of you I may look young, but a couple of weeks ago I made a speech to a high school audience and I thought I made a pretty good presentation. Afterwards one of the girls called me at my office and asked if she could come and interview me about Republican politics. I said yes. She wanted to know if she could bring some of her journalism classmates with her. I said: "Yes. Anything you want to know in particular?" "No," she said, "just Republican politics." I said: "O.K. If you want to know anything specific, I would try to be better prepared." She said: "Well, we would like to know your personal recollection of politics in the '30s."

I'm not going to comment on Dr. Polsby's paper; it's good. I agree with 90% of it; the seniority system ought to go, and really there are half dozen varieties of ways, any of which would be better. My legislative assistant, who has done research on it, has come across the seniority system in the ancient common council. The oldest man is the leader and by common consent of the rest of the council, if they decided he was too old to serve they slaughtered him. I suppose that could work in the U.S. Congress in some fashion to take care of the problem.

We can make all of the reforms that Dr. Polsby talked about, but all of the reforms aren't going to make any difference unless there's the will in Congress to want to govern. And if the will is there, I frankly think we can do it whether or not we make any reforms. The old practices are not an impediment, they are an inconvenience. You get rid of the seniority system, but you still would have the same committees and one chairman, merely the selection of another.

So while we argue it out for reform and changes in the structure of the Congress, let's not think that because we make changes it's going to make a difference necessarily. This whole argument, of course, has come up basically since the Gulf of Tonkin Resolution in 1964. Up through that time, we abandoned, or gave away, power to the President. I say we in Congress gave it away; the President didn't steal it. Congressional power is very much like chastity: it's seldom lost by force but you can give it up voluntarily, and we have given and given and given away. And we gave it away in the Gulf of Tonkin Resolution. Then we had the war in Viet Nam and, because the war didn't go well, we didn't win soon enough or it was unpopular. Congress soon began to feel pains of self guilt, began to flagellate the President, blame him. And all the time, in the back of our minds,

we knew we had given power and responsibility away. When we repealed the Gulf of Tonkin Resolution, we puffed out our chest and we said: "What a great job we have done re-establishing power."

And at the very same time that we have finally voted to repeal the Gulf of Tonkin Resolution, we left on the books the Formosa Resolution passed in 1955, the Middle East Resolution passed in 1957, each of which delegated to the President roughly the same powers militarily to do the same in those areas that the Gulf of Tonkin measure gave him in Indochina. We allowed the President to enter into a legal contract, or whatever you want to call it, with Bahrain, to establish a new naval base though we never had any military agreement with that country, which didn't even exist 15 years ago. Without so much as a whimper from Congress, we allowed for the extension of contracts for military bases with Spain, the Azores and Portugal, without so much as a by-your-leave or whimper from Congress.

This is all in the area of foreign relations, where the President does have some historical prerogative. It's been just as bad domestically. We have given away the Post Office. Congress used to run it politically, and badly. We gave it to the President and now it's just run badly. Don't write me if it doesn't work any more and complain about your postal rates. I don't have anything to do with it. It is not my responsibility any more. It is the President's responsibility. If I had power to do something about it, you see, I think it would be better, but I don't have the power because we have given it away.

Wage and price controls are the single most formidable domestic economic power you can give away in this country. The first time we gave it away, we gave to the President the power to set wage and price controls as of May 25, 1970 in any manner he saw fit in the national interest, except that he could not permit gross inequities. That's the standard, gross inequities. We said, "Fix the wage and price structure any way you want to."

The only thing we did right, and then for the wrong reason, was not to give the President the power to set wage and price controls as of May 25, 1970, in any manner he saw fit in the national interest, except that he could not permit gross inequities. That's the standard, gross inequities. We said: "Fix the wage and price structure any way you want to."

* * * Republicans voted to give this power to this President because they trusted him on where he would make the cuts.

I went up to a couple of them and said: "What would you do if you passed this and if by chance McGovern is elected?"

"Well, we'd have to repeal the law," they said. That was the sum total of the logic and inconsistencies of that vote.

I am convinced that Congress can govern, man can do anything he believes he can do if he wants to do it badly enough. Congress can make the laws of this country, we can set the policy, we can take back the powers if we want. We have said: "Can't, can't, can't" so long; we've said we can't fathom the federal budget, we can't set a date to get out of Viet Nam, we can't really control departmental policies. As we gave these powers to the President, and I think it's become an excuse for "won't," or "don't want to." We don't want the powers because if we give them away, we don't have to make the tough decisions. We can delegate them to the President, and sit back and carp or applaud, depending on whether what he does is popular or unpopular. If it's unpopular, we can say: "What a terrible thing, we wouldn't have done that."

If it's popular, we applaud what a great thing we all did together, and hopefully we'll all be re-elected together. But in no event has Congress helped the President make the prospective decision on which way to go when

faced with a difficult decision, and I frankly don't think Congress wants to. I don't see the heart in Congress to really want to take that power. If that's pessimism, that is what it is. If we keep going down the road that we have gone down in the past, Congress is going to become merely a vetoing agency. The president will establish the taxes, set the budget, determine the appropriations, except as Congress chooses to veto. And when we have started down that road, we have bordered very close to a fundamental change in the system of government that our forefathers gave to us. We will come very close to an Executive monarchy, and that may be fine when the monarch is one we like, but not when he is one we don't. If we start down that road, there is going to be no turning back. I hope some place along the way that Congress gets the will and desire to be the policy-making body that they were intended to be by the Constitution.

AN INTERNATIONAL AGREEMENT TO BAN MILITARY WEATHER MODIFICATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. FRASER) is recognized for 5 minutes.

Mr. FRASER. Mr. Speaker, I am introducing today House Resolution 329 asking the U.S. Government to take the lead in seeking an international agreement to ban weather modification activities for military objectives. Only 23 years ago the first successful cloud-seeding experiments took place. Today it is no longer science fiction to predict that in the future, the climate of a particular area might be changed at will. Before a potential for enormous good becomes another instrument of destruction, we must act to restrict all weather modification activity to peaceful purposes and place it under effective international control.

During the controversy last year, over reports of U.S. rainmaking in Indochina, the question was asked: "What's worse, dropping bombs or rain?" Granted, it does not matter to noncombatants whether they are starved or drowned by floods or blown up. The point is that it does matter in terms of morality and international respect, and perhaps even in terms of survival of life on this planet, that war should be limited as much as possible to combatants. To attempt to modify water flow, or change the course of storms, or perhaps eventually alter physical properties of large land masses, gives war a new, and if possible, an even more terrible dimension.

The Federation of American Scientists early this month asked President Nixon to reveal details of possible United States use of weather modification during the Vietnamese conflict. This group of 4,500 scientists expressed concern over the precedent our actions could set and over the possibility of more harmful weather modification activities in the future if we do not seek international agreement on peaceful use of weather modification.

The 21st Principle of the Declaration of the 1972 United Nations Conference on the Human Environment states that nations have "the responsibility to insure that activities within their jurisdiction or control do not cause damage to the environment of other states or of areas beyond the limits of national jurisdiction."

tion." Air cannot be kept within national boundaries. What one nation does to modify its weather can have a direct impact on the weather and lives of its neighbors.

There is a clear need and widespread wish for international cooperation in weather modification programs. The argument has been made that we do not have techniques for international controls. It is urgent that while we are working out such techniques—through organizations like the World Meteorological Organization and the International Council of Scientific Unions, and through programs like the global atmospheric research program and "Earthwatch," that we take steps to ensure that military rainmaking ceases and that it does not lead to experimentation in more harmful varieties of weather warfare. As a first step in achieving international cooperation in this area, we should seek the cooperation of other nations in dedicating all weather modification activities and research to peaceful use.

Several national and international bodies have recently endorsed this principle. At the initiative of the distinguished Senator from Rhode Island (Mr. PELL) the North Atlantic Assembly at its 18th meeting in November 1972 recommended a treaty to ban environmental or geophysical modification except for peaceful purposes. In a 1971 report, the National Academy of Sciences' Committee on Atmospheric Sciences urged the U.S. Government "to present for adoption by the United Nations General Assembly a resolution dedicating all weather-modification efforts to peaceful purposes." The President's National Advisory Committee on Oceans and Atmosphere in its first annual report in 1972 strongly recommended that we seek international arrangements to renounce hostile uses of weather modification. The Sierra Club joined the Federation of American Scientists last July in urging that—

The United States should henceforth dedicate all geophysical and environmental research to peaceful purposes and should actively seek the cooperation of other nations in programs of joint research on geophysical phenomena, their control, and their peaceful use.

In the past we have recognized that certain actions in war are self-defeating. We have placed restraints on ourselves, and have agreed with other nations on mutual restraints—on use of nuclear bombs, biological warfare, and poison gas. We have declared certain areas such as outer space and the seabeds out of bounds for certain military operations. We have at hand another possible kind of warfare—weather warfare—manipulation of the weather to achieve military objectives.

Now that the cease fire is taking effect, we should take this logical step toward lessening the scourge of war and actively seek international agreement to confine future weather modification to peaceful purposes only. I urge support of House Resolution 329 calling on our Government to seek agreement with other nations to outlaw all weather modification activities as weapons of war.

The resolution follows:

HOUSE RESOLUTION 329

Whereas, the Declaration of the 1972 United Nations Conference on the Human Environment declared that nations have the responsibility to ensure that their own activities do not damage the environment of other nations; and

Whereas, the World Meteorological Organization has machinery to facilitate international cooperation in meteorology; and

Whereas, environmental cooperation can help build a foundation for world peace; and

Whereas, there is great danger to the world environment if weather modification activities are used for warfare: Now, therefore, be it

Resolved, that it is the sense of the House of Representatives that the United States Government should seek agreement with other members of the United Nations on the prohibition of research, experimentation, or use of weather modification activity as a weapon of war.

INTRODUCTION OF LEGISLATION FOR HEALTH INSURANCE COVERAGE FOR MENTAL ILLNESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. HARRINGTON) is recognized for 5 minutes.

Mr. HARRINGTON. Mr. Speaker, in his 1963 message on mental illness and mental retardation, President John F. Kennedy stated that—

Mental health services should be financed in the same way as other medical and hospital costs. At one time this was not feasible in the case of mental illness where prognosis almost invariably called for long and often permanent courses of treatment. But tranquilizers and new therapeutic methods now permit mental illness to be treated successfully . . . within relatively short periods of time—weeks or months rather than years. . . .

Yesterday, Senator PHILIP A. HART and I introduced legislation which will turn President Kennedy's dream into a reality, the Mental Health Act of 1973. As you may remember, I introduced similar legislation providing comprehensive national health insurance for mental illness last year. This bill is substantially the same. The revisions will be detailed later in this statement.

We have a history of ignoring the medical needs of the estimated 3.6 million Americans annually afflicted with some form of mental illness. Our health care and insurance programs have discriminated against mental health treatment, and most Americans have attached a cruel stigma to those tormented by mental disorders. The double standard which has characterized American medical care must be ended. The time has come to guarantee that every American, regardless of economic status, will be able to obtain adequate mental health care.

Yet, it is becoming all too apparent that the Nixon administration intends to continue the unwritten policy of "malignant neglect" toward our mentally ill.

As outlined in the budget for fiscal year 1974, the President has proposed the termination of Federal aid for community mental health centers as soon as current grant support expires. After that, the centers will have to depend upon payments by private individuals, State and local governments, and third-

party reimbursement systems for the funds necessary to continue operations. This phasing-out process would be carried out over an 8-year period and would result in the Federal Government saving approximately \$75 million by 1975. To say the least, fiscal "responsibility" of this nature will have a severe impact upon the segment of our society which cannot afford adequate treatment on its own.

In addition, the administration has apparently deleted any mention of mental health coverage from its own National Health Insurance Partnership Act—NHIPA—proposal. As originally designed, this coverage was intended to replace Federal grant support for mental health centers. The deletion of all coverage is insensitive and regressive.

Mr. Speaker, since its inception during the Kennedy administration, the community mental health program has stimulated the growth of 515 mental health centers dedicated to the goal of providing a comprehensive method for the delivery of mental health services to all Americans. During the past 9 years, Congress has on seven occasions broadened the authority of the Community Mental Health Act of 1963. In each instance, the Federal financial commitment has been increased. Thus, the administration's budgetary action is totally at odds with congressional intent.

Within America, the groups largely served and most directly affected by the elimination of funding for the centers will be the so-called have nots of our society—the poor, young, and aged. It is precisely these groups who have the highest frequency of mental disorders. As Ramsey Clark pointed out in *Crime in America*:

Mental and emotional illness afflicts substantial proportions of the population in some parts of town, while in others it is comparatively rare and carefully treated. Mental illness among children on welfare has been estimated at twice the rate of other children of poor families living in the inner city—afflicting nearly one in four.

In addition, the administration's contention that the States will be capable of taking over the funding of the community mental health centers is not well founded. For example, Massachusetts—one of the more affluent States of the Union—has indicated that once Federal support is withdrawn, it is very unlikely that the State will be able to continue to supply funds to the existing centers. In addition, the State feels that it will be unable to provide money for future mental health centers, such as the one proposed for the Union Hospital in Lynn. Given this fact, it is inconceivable that other States, less richly endowed, will be able to maintain their centers or plan for future one.

Moreover, when this is combined with the fact that third-party reimbursement payments are virtually nonexistent in any consistent manner, it becomes perfectly clear that without Federal assistance, the community mental health program will be destroyed.

It is, therefore, essential for progressive and good mental health that these centers remain open. They have contributed immeasurably to keeping pa-

tients out of the hospitals and to providing adequate outpatient care. If we permit the centers to close, America will have lost one of the best, most economical, and most farsighted health organizations in existence.

At this time, the House Interstate and Foreign Commerce Subcommittee on Public Health and Environment is considering the Public Health Extension Act of 1973 (H.R. 5608) which would continue Federal support for the Community Mental Health Centers Act and several other health related programs until June 30, 1974. As demonstrated by my cosponsorship of this bill, I fully concur with its objective. However, Congress is in the position to do more than merely postpone for another year the crisis currently confronting the centers. Through the enactment of the Mental Health Act of 1973, this crisis situation could be permanently ended.

Under the terms of the model mental health insurance program which I am introducing, the cost of treating every patient entering the centers will be covered. Consequently, the financial burden placed upon these facilities as the result of the discontinuance of Federal grant assistance will be greatly relieved.

Mr. Speaker, I fully realize that because of the precedent-setting and potentially controversial nature of my legislation, the likelihood of its prompt passage is indeed slim. In lieu of this, I urge Congress to assure the survival of the community mental health centers program by immediately enacting H.R. 5608.

Many people have criticized me for introducing a bill which they deem too expensive. The best available estimates of the cost of such legislation are put in the range of between \$2.5 and \$3.5 billion per year, a substantial amount of money.

My point in introducing the legislation, however, is to require Congress to discuss national health insurance coverage in terms both of who will and who will not be covered. It seems to me that there is a general popular conception that everyone is going to be covered. We know that is not true for the mentally ill and the chronically ill. If we cannot afford to cover everyone, then let us at least be honest with ourselves and the rest of the people in the country and let us set our spending priorities in an open and honest way.

This bill is a model bill. It is not offered as the total answer to the mental health problem in America. It is offered, however, as a means of starting a dialog within the Congress.

REVISIONS IN BILL

Before I briefly describe the major provisions of the Mental Health Act of 1973, I would like to take a moment to outline the revisions made in it since the measure was originally introduced during the 92d Congress.

To begin with, I have added a provision—section 102(B)—that would require recipients of halfway-house care to contribute 100 percent of cost, not in excess of 25 percent of his or her income, for such care.

Since, in many cases, the users of halfway houses have full-time jobs, it only seems reasonable that those with an

income should pay the normal rental costs.

In connection with halfway-house care, I have also inserted a clause—section 103(g) (3)—which would provide the use of halfway houses as an alternative to hospitalization.

Halfway-house care is increasingly being utilized as an effective and positive substitute for hospitalization. The combination of a day care facility and halfway house care at night is, in many cases, the initial treatment received by a severely disturbed person. For others just leaving the hospital, halfway houses provide the transitional living situation needed for readjustment to community life. Halfway houses are a 20th-century solution to hospitalization and their use and numbers should be increased.

Another modification in the legislation can be found in section 103(J) (2) where I have more precisely defined the term "psychotherapist."

Specifically, this term has been broadened to mean any psychiatrist, psychologist, social worker, nurse, or paraprofessional who meets such training and experience qualifications as the Secretary of the Department of Health, Education, and Welfare prescribes.

As you know, the number of psychotherapists in America is exceedingly low. By enlarging the definition to include social workers, nurses, and paraprofessionals, a greater number of qualified professionals will be available to administer the services covered by this act.

With the addition of section 104(9) (b), I have enlarged the scope and responsibility of the utilization review board by requiring it to meet at least once every 30 days to review the care provided to each patient in the facility and to determine if further care is warranted. In this manner, the interests of every patient will be better safeguarded.

Notably absent from this year's bill are the provisions dealing with the Federal mental health trust fund and title II governing mental health taxes. The bill simply calls for funding from general Treasury revenues. I have deleted the tax provisions for the time being because I am not an expert on the finer points of tax structures. I believe that those better qualified than myself should decide on the proper funding mechanism, although I support the Kennedy-Griffiths type of mechanism.

It was my experience last year that attention was focused on the tax portion of the legislation, often to the detriment of the mental health provisions. Since my objective in introducing the bill is to bring greater awareness to the Congress of the core concept of the problems of mental health care, I feel that debate on the legislation is of the highest priority.

ANALYSIS OF BILL

Title I includes full payment of—

First, psychiatric hospital care which will include all care to an individual in a qualified psychiatric hospital. This care will be limited to a 90-day period except when the individual's physician requests an additional 30 days subject to the approval of the utilization review board. Further extensions may be granted by the

utilization review board but not less often than every 30 days.

Second, psychotherapeutic care which will include visits made by an individual to a psychotherapist for mental health treatment which is of an active preventive, diagnostic, therapeutic, or rehabilitative nature during any benefit period. Payment for these visits shall not exceed \$20 unless the physician to whom the visits are being made is participating in a group health program approved by the Secretary.

Third, prescription drugs which will include drugs and biologicals for which a physician's prescription is necessary.

Fourth, psychotherapeutic home care which will include all home visits made to an individual by a qualified institution therapist or by qualified staff members of a mental health clinic or comprehensive mental health center approved by the Secretary of Health, Education, and Welfare.

Fifth, day mental hospital care which will include all care and services provided to an individual in a qualified institution which is primarily engaged in furnishing psychotherapeutic treatment during the daytime hours but does not provide the patients with 24-hour accommodations. This is subject to the same 90-day restriction as in psychiatric hospital care.

Sixth, night mental hospital care which will include all care and services provided to an individual in a qualified institution which is primarily engaged in furnishing psychotherapeutic treatment, sleeping accommodations, and related care and services during the nighttime hours to individuals who work during the day. This is subject to the same 90-day restriction as in psychiatric hospital care.

Seventh, the recipient of halfway house care shall contribute 100 percent of cost, not in excess of 25 percent of his income for the care which includes that provided by those institutions which furnish a transitional residence to those patients who have been released from psychiatric hospital care at the recommendation of their physicians and at the approval of the utilization review board. Also included is care for those patients who will need long-term living arrangements, who require permanent substitution for hospitalization, and who can be maintained in the community with continuing supportive help. Lastly, halfway house care can be utilized as a viable alternative to hospitalization.

Eighth, community mental health care center services which include all care in a facility meeting the requirements of the Community Mental Health Act and is making available to a substantial proportion of the residents a comprehensive program of mental health care.

The term "psychotherapist" includes a psychiatrist, psychologist, social workers, nurses or paraprofessionals who meet such training and experience qualifications as the Secretary shall prescribe.

These services will be available to all Americans regardless of their ability to pay and without copayment or deductibles or coinsurance. All mental health care will be made available to all Americans without direct cost.

To maintain the quality of care, the bill sets strict qualification standards for the providers. These include maintenance of adequate clinical records, accreditation by the Joint Commission in Accreditation of Hospitals, bylaws that will prevent discrimination on any grounds unrelated to professional qualifications, every patient under a physician's care and the ratio of physician to patient not to exceed 40 to 1, 24-hour nursing service with a registered nurse on duty at all times and the ratio of nurses during the daytime hours never exceeding 10 to 1 and 25 to 1 during the nighttime hours, and the ratio of LPN's to RN's never exceeding 5 to 1, and most importantly a utilization review board consisting of not more than eight persons.

The composition of the board shall include three members of the general public, one physician, one psychotherapist, at least one paraprofessional, and two additional members appointed from among other persons in these categories with not more than two members of the board being members of the hospital staff, and will meet at least once every 30 days to review the care provided to each patient in the facility and to determine if further care is warranted.

The program would be administered by the Secretary of Health, Education, and Welfare, with the advice of a Committee on Mental Health which shall be appointed by the Secretary. The Committee will consist of five psychiatrists, five hospital administrators, five former mental patients, five members of the general public, and the Secretary, who will act as Chairman. Terms of office of the Committee members and any conditions of service will be determined by the Secretary.

Also included in the bill will be a full and complete study over the next 5 years of the costs of providing mental health insurance in order to determine the feasibility of expanding the program. This study would be conducted by the Secretary of Health, Education, and Welfare.

The Congress is authorized to appropriate such sums as may be necessary to carry out this act, including any sums necessary to establish and maintain a reasonable reserve for the payment of benefits under this act.

The effective date of the program will be the first day of the first calendar month which begins 6 months after the date of the enactment of this act.

CONCLUSION

Mr. Speaker, there is a serious health crisis confronting America not only in the area of mental health but in every facet of medical care. As the late President Truman said in his message to Congress on September 6, 1945:

We should resolve now that the health of this Nation is a national concern; that the financial barriers in the way of attaining health shall be removed; that the health of all its citizens deserves the help of all the Nation.

He continued that—

The ability of our people to pay for adequate medical care will be increased if, while they are well, they pay regularly into

a common health fund, instead of paying sporadically and unevenly when they are sick.

Still, nearly 18 years later, America has yet to establish a comprehensive health insurance program. Americans can no longer afford to pay out of their pockets for proper health care. The Mental Health Act of 1973 will provide complete mental health insurance coverage for everyone.

President Truman summed it up best in his 1945 speech by saying:

We are a rich Nation and can afford many things. But ill health which can be prevented or cured is one thing we cannot afford.

HON. WILLIAM BACON CAMP RETIRES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. CASEY) is recognized for 5 minutes.

Mr. CASEY of Texas. Mr. Speaker, Friday, March 23, marked the last day of distinguished service as U.S. Controller of the Currency for my longtime friend, William Bacon Camp.

Bill Camp was born in Greenville, Tex., but we became friends while we both attended San Jacinto High School in Houston.

After attending Baylor University, Bill entered Government service with the Office of the Controller in 1937, as a junior examiner. This marked the beginning of a dedicated career in which his abilities were recognized by continued promotion until he was made First Deputy Controller.

When James J. Saxon resigned as U.S. Controller in 1967, President Johnson, seeking the best man to fill the job, called on Bill Camp with his long tenure in the office and knowledge of its duties to become our U.S. Controller of the Currency.

Mr. Speaker, you and my colleagues are well aware that Bill Camp filled this very responsible post of supervising approximately 5,000 national or federally chartered banks, controlling about half of our Nation's banking resources, in a very able and impartial manner.

The excellent manner in which he performed his duties as U.S. Controller of the Currency, under the appointment of President Johnson, were so well recognized that President Nixon, in February 1972, reappointed Bill Camp for another 5-year term as U.S. Controller of the Currency. To my knowledge this is the first time that reappointment under such circumstances has taken place in the history of our country. This is a real tribute to a distinguished friend.

Bill Camp has now, on his own, chosen to retire, and Mr. Speaker, I know you and my colleagues will agree with me that our Government and the Nation will miss this excellent administrator and dedicated public servant. By the same token, we all can readily see that after more than 35 years of hard work from one of the lowest positions in the Office of the Controller of the Currency, to its highest position of responsibility, Bill Camp is indeed entitled to consider taking a little rest.

Mr. Speaker, I feel that I share the views of this body in extending to Bill Camp our sincere thanks for all that he has given to this great land of ours and wish him and his charming wife, Eileen, many days of happiness in the future as they now are able to do some of the many things which they have so long postponed, because of the responsibilities of his duties.

CONSUMERS AND PRICE CONTROLS: SAME OLD LOOPHOLES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. BURKE) is recognized for 15 minutes.

Mr. BURKE of Massachusetts. Mr. Speaker, in the last couple of days attention has been focused on a consumer movement whose aim is to roll back the price of beef in the supermarkets, a degree of consumer resistance not encountered heretofore in the American economy. I remember the days following World War II when there used to be advertisements on the subways and billboards urging consumers to fight inflation by refusing to pay higher prices for staple items. Since then I have not heard too much about this idea, but to judge from the tremendous coverage in the newspapers and TV news programs this definitely seems to be an idea which is catching on. Knowing full well all the tremendous energy put into this campaign by my good friend and colleague from Connecticut, BILL COTTER, I am pleased to see the movement getting off the ground and beginning to make an impact. The American consumer is serving notice on the middleman and the processors and the cattle barons themselves that they are tired of being taken and that these people can no longer count on a perpetually quiescent American consumer who is just going to accept, however reluctantly, every price increase that comes along.

You can imagine my surprise on yesterday morning when I listened to several live interviews on the early morning news indicating that the consumer movement might well boomerang because the cattle people have a loophole; namely, exports overseas. It is that old nemesis "no export controls" coming back to haunt us again. Having been one of the leaders last year in the fight to impose controls on the export of cattle hides only to have the administration's decision to impose such controls overturned by congressional action, I now find out that once again the fact that foreigners are willing to pay more for a product in short supply which is diverting supplies away from domestic markets and driving up prices further here at home. In other words our Government's hands-off attitude on exports is wreaking havoc on our domestic economic policies, particularly as far as our fight against inflation is concerned. Just as phase II could not work effectively and control the prices on footwear with such an obvious loophole as the export of cattle hides creating shortages of leather in our domestic market similarly a weak, watered-down phase III will never work with American beef being diverted to foreign markets and further restricting

domestic supplies. I just hate to see the well-intentioned efforts of the American consumer to keep beef prices down foiled by the cattle barons' free access to other markets. In other words even if the American consumer bucks at the high prices, the price will not be adjusted—the barons will simply find foreigners willing to pay the price.

Mr. Speaker, once again we have a compelling case for a complete restructuring of this Nation's trade policies. The American consumer, just like the American worker is the one who is paying the price over the years of neglect, euphemistically referred to as the free trade era. It is time the Government faced up to the fact that the economy must be viewed as a whole piece of cloth, domestic and foreign transactions together, since foreign trade has a direct impact on our domestic economy, it follows that domestic economic policies do not operate in a vacuum and they are either aided or frustrated by foreign trade policies in force at the moment. If this Nation is serious about an all-out fight against inflation then it cannot ignore the influence of foreign trade on prices in our domestic markets. One only has to look at what is happening to the price of lumber to see the same point illustrated for all to see. The cost of housing construction is increasing because the price of lumber is sky rocketing. While all this is going on our timber people are maintaining, or indeed stepping up, exports overseas, notably to Japan, further aggravating an already serious domestic lumber shortage. Once again instead of clamping on export controls the Government is prepared to permit more timber to be taken from our national forests.

Mr. Speaker, we are not confronted here with a case of cutting down exports of American manufactures, made by American workers. God knows we need all the jobs we can get in our factory towns around the country. What causes concern around this country are exports of staple items in short supply—exports which have the effect of limiting even further scarce domestic supplies of these commodities. The one who is caught in the middle ultimately is the American consumer, especially the low- or middle-income families for whom a large portion of the family budget goes for food, home, and basic clothing and footwear.

Mr. Speaker, it is time the Government price control machinery attacked the problem of such sky-rocketing items as beef, leather, and timber by imposing export controls at once. Only then will the American consumer resistance movement have a chance of being effective.

TIMBER MANAGEMENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. WYATT) is recognized for 5 minutes.

Mr. WYATT. Mr. Speaker, some 500 million acres in the United States are classified as commercial forest land. This means the land is capable of producing industrial wood crops and not otherwise withdrawn from timber management.

In 1970 the Forest Service, U.S. De-

partment of Agriculture, compiled its latest forest survey which revealed that about 107 million acres or 21 percent of all commercial forest land is federally owned. The national forests alone contain more than half the Nation's standing sawtimber inventory.

It might be logical to conclude that these forests also produce half the Nation's timber. But this is not true. The Federal forests produce 31 percent of the Nation's softwood sawtimber while private industrial lands, with only 16 percent of the softwood sawtimber inventory, produce 34 percent. Most of the remaining production comes from small, widely scattered private woodlots, mostly in the East and South.

The United States contains some of the finest commercial forests in the world. Others with great potential for timber yield are not being managed. In the case of the federal forests, funding is inadequate to maximize production. In the case of small private woodlot owners, insufficient incentive and technical advice are available.

We have an obligation to the citizens of this country to see to it that lands best suited to growing commercial forests are placed in production and that these forests are replanted immediately after harvesting.

STATEMENT OF CHAIRMAN RAY J. MADDEN OF THE RULES COMMITTEE MEETING OPENING HEARINGS ON THE PRESIDENTIAL IMPOUNDMENT LEGISLATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. MADDEN) is recognized for 5 minutes.

Mr. MADDEN. Mr. Speaker, this morning the House Rules Committee opened hearings on the pending Presidential impoundment legislation which will be considered on the floor of the House in a short time. A great number of Members have filed or sponsored bills pertaining to present impoundment of funds on a number of domestic programs which the Congress has enacted in the last several sessions.

On tomorrow, March 29 at 10:30 a.m., the Rules Committee will continue hearings in room 2170, the Foreign Affairs Committee Room, in the Rayburn Building. A number of Members have asked to testify on this legislation and the hearings will probably extend over the next 2 weeks.

Mr. Speaker, I include with my remarks the statement I made today at the opening of the hearings on Presidential impoundment of legislation:

CHAIRMAN MADDEN'S STATEMENT

Today we start hearings on one of the most serious constitutional challenges ever to confront Congress.

The legislative impoundment crisis brought on by the Nixon Administration demands firm and prompt exposure by the Congress.

Members of Congress and the Senate have been deluged with mail, telephone calls, and protests from their constituents against President Nixon's impounding of numerous domestic programs passed by the Congress in recent years for the benefit of millions of American citizens. These impoundments

include elders, unemployed, handicapped, veterans, and those needing government assistance, etc.

The American public should know that since President Nixon was inaugurated over four years ago, approximately \$11 billion 100 million of funds have been impounded which cover housing, education, health, transportation, anti-pollution, hospital construction, including the veterans' hospitals, small business loans, watershed and flood prevention, help for domestic farm labor, food stamp program, rural electrification loans, waste and sewer facilities, etc.

In the past four years, we have poured billions upon billions of dollars into the Vietnam war. Now we have concluded that war, and we ought to start putting the money into domestic priorities where it belongs.

President Nixon has set out deliberately to achieve an unwarranted concentration of powers. He has sought to tighten his rule at the expense of other branches of government.

For several years now, President Nixon has waged his undeclared war on Congress.

In 1971, the Nixon Administration said it would withhold more than \$12 billion in highway and urban programs money. The funds were not impounded to effect savings or to fight inflation. The withholding was designed solely to shift the balance of budget priorities to those projects which the Administration preferred.

The same biased treatment showed in the Administration's handling of public works for fiscal 1972. Mr. Nixon pressed ahead with all the projects he wanted. But, without exception, he deferred all the additional projects which the Congress had voted and which he had signed into law.

And then just this year, 1973, the Administration announced yet another massive impoundment—\$8.7 billion in funds voted by Congress and \$6.6 billion in contract authority.

Mr. Nixon has justified much of his impoundment action as necessary to fight inflation. I think we ought to place the blame for this inflation—and its skyrocketing food prices—where it belongs—at Mr. Nixon's door.

The Congress voted Mr. Nixon the absolute authority to control wages, prices, interest, rents, food costs, etc., in August 1970, and he let it sit on his desk for one year before he acted upon it. In August 1971, in a nationwide television broadcast, he announced his 90-day freeze—which was a failure. He then followed with Phase II and now Phase III.

After the 1972 election, he abolished controls prematurely and he started us on another round of inflation.

I would note that Mr. Nixon's own budgeting recommendations have helped spur inflation. This year he has submitted to the Congress his fifth consecutive big-deficit budget. Those deficits total more than \$100 billion, and they have accounted for the accumulation of one-fourth of all the national debt in the space of four short years.

Mr. Nixon has blamed the Congress for the economic crisis he precipitated. And then he has used the economic emergency as justification for his impoundment actions.

He has elevated his distaste for consultation with Congress into the doctrine of executive privilege. And he has expanded that spurious privilege to prevent members of his staff from testifying before Congress on the Watergate scandal. When the truth is known about that matter, it will eclipse all the scandals of the Harding Administration, including Teapot Dome, and all the Grant Administration scandals, put together.

I think we ought to forget the shadow boxing on this impoundment business and have it decided once and for all on the question of one-man rule. These Rules Committee hearings should greatly aid the American public on learning the true facts concerning the high cost of living.

The legislation before us today will set a new pattern of working relations between the executive and the Congress during President Nixon's second term. We are going to give him every cooperation. But we will not be bullied by an overly aggressive executive. We will not permit one man to substitute his own preferences for the carefully deliberated judgment of 435 Members of the House of Representatives and 100 Senators. It is up to Mr. Nixon now—at this time—to show Congress and the nation whether he wants a government of cooperative but balanced powers, or whether he will leave the Congress no choice but to apply further checks to the overriding ambition of the executive.

We have with us this morning Congressman George Mahon, Chairman of the Appropriations Committee. Mr. Mahon will testify in behalf of H.R. 5193, his bill to preserve the distribution of powers within the national government. Mr. Mahon.

REVERSING DECLINING MANPOWER IN NATIONAL GUARD AND RESERVES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. DULSKI) is recognized for 5 minutes.

Mr. DULSKI. Mr. Speaker, I would like to take this opportunity to commend our colleague, Congressman MONTGOMERY, for the leading role he has taken to reverse the declining manpower levels in the National Guard and Reserves. Only this morning, the Insurance Subcommittee of the Veterans Affairs Committee, on which I am privileged to serve, reported out favorably to the full committee a piece of legislation to provide full-time coverage under the Servicemen's Group Life Insurance program for members of the Reserve components of the Armed Forces.

Mr. MONTGOMERY, who is chairman of the subcommittee and author of the legislation, is to be congratulated for pushing for this incentive for the reserve components. I might add that he is also author of legislation to provide retirement at age 55 following 20 years of creditable service and reduced annuities for survivors of guardsmen and reservists who die before reaching retirement age.

Mr. Speaker, I am very pleased to have been able to lend my support to the bill to give full SGLI coverage to members of the reserve components and again commend Congressman MONTGOMERY for his deep and abiding interest in providing the necessary incentives to recruit and retain personnel in the National Guard and Reserves.

WELFARE REFORM IS NEEDED

(Mr. ROUSH asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. ROUSH. Mr. Speaker, I would like to make a few remarks following upon Mrs. GRIFFITHS' release yesterday of a staff report of the Subcommittee on Fiscal Policy of the Joint Economic Committee.

First of all I would like to congratulate Mrs. GRIFFITHS for initiating and carrying through this significant study and I would also like to commend the committee staff as well as the GAO for the assistance they provided.

The report, "How Public Welfare Benefits are Distributed in Low-income Areas," is an historic project sampling 1,758 unidentified households drawn from 6 sites designated by the Census Bureau as low income areas. The staff report examines how the benefits of 100 different Federal, State, and local welfare programs are distributed in these areas, and this includes unemployment insurance, social security benefits, public housing, cash public assistance, aid to dependent children, school lunches, and so forth.

While Mrs. GRIFFITHS and the Joint Economic Committee do not claim that this report is more than a selective survey of data, it is clear that as a sample of income maintenance programs for low income families, the report is distinctive, original and highly significant. I believe this report may well point us toward effective welfare reform.

In an unusual approach, the report takes into account all kinds of income assistance—cash, goods, services—to determine precisely the dollar value of benefits received. How the cash, goods, services are distributed, to whom they are allocated, how equitably dispersed, who benefits—these are questions answered by this study.

Certain revealing conclusions become apparent. First of all 11 percent of all sample households evidently participated in five or more programs during the year. This would lead you to think that many welfare recipients are being overpaid, but it does not work out that way. Commenting on this data Congresswoman GRIFFITHS pointed out that the point of welfare is to provide a reasonable amount of aid to those who need it.

That is not what is happening. For example, a family receiving higher cash benefits than another family, may actually be less well off, if the second family, as a result of the lower income factor, is also eligible for additional assistance in the form of food stamps, housing, and health care. If there are a number of adults in a family, and they are receiving varying kinds of benefits, this particular family may be far ahead financially of a family headed by a woman with a number of children. So some of the poorest families are receiving inadequate aid and others are getting more public assistance than can be justified under Mrs. GRIFFITHS' criterion stated above, with which I wholeheartedly agree, welfare should provide aid to those who need it.

Another example of how this principle is being violated is the situation in which families live next door to one another. Family A has several kinds of welfare assistance; Family B has an able-bodied wage earner. The take-home pay of the wage earner may actually be less—after taxes—than the benefits of Family A from several public assistance programs.

Thus there is no incentive for Family B to struggle to remain off of welfare when, given certain conditions, they might even improve their income thereby. And since many programs reduce benefits with each dollar earned, there is less incentive for welfare recipients to begin to work.

The report also indicates conflicts among these programs. For example, last

year Congress voted a 20-percent increase in social security benefits to help senior citizens hurting from inflation. But, those who were receiving old-age assistance find that this increase decreases other benefits and may completely cut them off from medicaid, food stamps, et cetera. This was not the intent of Congress. That is giving with one hand and taking with the other.

And this points up the administrative nightmare involved in checking on income, family circumstances, keeping records, mailing checks, making adjustments on 100 programs, programs administered at different levels of the government. It is, as Mrs. GRIFFITHS described it, a "nonsystem," and an "impossibly complex maze of programs which produces unintended results." Of course the duplication of efforts is another drain on the taxpayer who must support these unnecessary administrative costs.

Mr. Speaker, almost 2 years ago now the Members of the House of Representatives were debating H.R. 1 and the program that legislation offered to change the welfare system. That part of the proposal was lost. But I do not think that we can afford to let the need for welfare reform go unattended. The problems are worse, not better; the inequities abound; costs increase; discontent mounts on both sides. It is my hope that this Congress, with this valuable report by the Subcommittee on Fiscal Policy in hand will proceed toward welfare reform.

NEW KIDNEY DISEASE TREATMENT UNCOVERED

(Mr. GUDE asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. GUDE. Mr. Speaker, not many weeks ago, newspaper accounts flourished which described the provisions of H.R. 1, approved by the 92d Congress, which in part provides for Federal payments to persons who suffer from kidney disease to cover the costs of dialysis. Those accounts expressed the view that within 10 years, this provision alone could cost the Government \$1 billion annually.

Many of my colleagues and I felt that these estimates were greatly inflated and that technological advances and ongoing medical research would provide newer and better ways to treat kidney patients—at far less expense than might be the present case with dialysis.

Yesterday's Baltimore Sun ran a story of particular importance to this debate. It reported that medical researchers at the Johns Hopkins University have identified a new chemical method for treating kidney patients—a program whose cost could prove to be one-fifth that of traditional dialysis treatment. The new method, which must still be subjected to further testing, involves the use of certain keto-acids, which are derivatives of amino acids, along with a strictly controlled diet. This treatment method would seem to hold great promise for kidney patients, and I would like at this time to place in the Record the text of the Sun story for the information of the Congress:

CHEMICAL SUBSTITUTE FOR DIALYSIS SOUGHT (By Frederick P. McGehan)

Medical researchers at the Johns Hopkins University reported yesterday that they have developed a chemical means of treating severe kidney disease that may reduce—or even eliminate—the need for costly kidney machines.

The method, which combines a low-protein diet with daily administration of keto-acids, still requires considerable additional research and evaluation before it can ever hope to have widespread application.

But initial studies at the Hopkins School of Medicine have been promising enough for the Hopkins to begin negotiating with pharmaceutical firms to develop plentiful supplies of keto-acids.

Persons with severe kidney disease lose the ability to remove waste products derived from protein in the diet. These wastes accumulate in the blood and, unless removed mechanically, can produce death. Current choices of treatment are to place patients on dialysis machines permanently or until a kidney transplant can be performed.

ABOUT 3,000 ON DIALYSIS

In either case treatment is costly, from \$5,000 to \$25,000-a-year for dialysis treatment two or three times a week, or a transplant operation at \$8,000. The operation is successful about 50 per cent of the time. Some 58,000 Americans die of kidney disease annually.

Under Social Security amendments passed last year, the government now pays for longterm dialysis treatment. Currently there are 3,000 patients on dialysis nationwide and 7,500 who become candidates each year. The eventual cost of this has been placed at \$1 billion annually.

The method reported yesterday by Dr. Mackenzie Walser and colleagues at the Hopkins basically regulates the food intake of kidney-disease patients so that waste products are not created.

Keto-acids are key to the method. They are chemicals—five in all—derived from amino acids (components of proteins) that do not produce waste materials. These chemicals, however, can supply most of the protein requirements.

STRICT DIET CONTROL

Also essential to the method is strict diet control. Some patients in the Hopkins study were not allowed to eat any meat.

Keto-acids were given to volunteer patients with meals, sprinkled as a powder on apple-sauce or dissolved with soup or lemonade. The chemical compound "tastes terrible," Dr. Walser reported.

The professor of pharmacology and experimental therapeutics estimated that, if keto-acids were commercially mass produced, the cost of this treatment on a weekly basis would be about one-fifth the cost of dialysis.

DETERIORATION UNSTOPPABLE

"It is clear that, for patients with certain levels of severity, it (keto-acid therapy) can replace dialysis," he stated in a telephone interview. The best candidates would be those who have between 2 and 10 percent of normal kidney function, he added.

The 48-year-old Hopkins researcher reported his findings in the current issue of the *Journal of Clinical Investigation*, a publication of the American Society for Clinical Investigation.

He said 6 of 10 patient volunteers were able to go without renal dialysis for up to nine months. He indicated that his experiments, carried out over three years, were hampered by the shortage of keto-acids, which are produced in only a very few laboratories.

One of the six patients, he noted, died during a period when Dr. Walser had to go to England to replenish his supply of the chemical compound.

The remaining five patients are alive and

are all on dialysis treatment currently, he said.

Keto-acid treatment, he explained, cannot prevent deterioration of kidney function and is not useful when the kidneys have ceased to function.

But, Dr. Walser noted, it is not possible to predict the rate of deterioration. For some patients it can be months and, for others years.

His method, he added, would be potentially useful for persons who are not normally considered candidates for dialysis machines, such as diabetics. It may also be used in conjunction with machine therapy to reduce the requirement of washing out the blood to, perhaps, once every two or three weeks.

Since the initial series of patients reported in the journal, Dr. Walser said his group has treated an additional seven, four of whom are now receiving daily administration of keto-acids. One patient died of total kidney failure and the other two are on dialysis.

The longest patient in the current series has been on keto-acid therapy for 2½ months, Dr. Walser said. The compound is being administered to this patient on an out-patient basis.

"If it continues to show the promise it has in early cases," Dr. Walser said, keto-acid therapy "may be a suitable alternative" to dialysis.

He urged a "crash program" on the part of the federal Food and Drug Administration and the pharmaceutical industry to review the method and begin producing keto-acid compounds.

Should the drug industry wish to obtain Food and Drug Administration approval for keto-acids as a food supplement, Dr. Walser said it could take only a year or two for clearance.

If, however, it is submitted as a new drug the process will take longer. And, if the federal drug agency decides to evaluate each of the five constituents as a separate drug, it would take even longer, he noted.

Dr. Walser collaborated in the project with A. Will Coulter, an organic chemist; Shrikent Dighe, a research chemist, and Frank R. Crantz, a medical student. He was also assisted by biochemists at Oxford University in England.

He is working under a \$50,000-a-year grant from the National Institute of Arthritis, Metabolic and Digestive Diseases. He also receives about \$50,000-a-year from the Hopkins clinical research center.

I would hope that this new treatment will prove as effective as it at first appears to be. I am contacting the Food and Drug Administration and urging their immediate investigation of the keto-acid treatment method so that no time will be lost in attempting to come to grips with this serious and costly disease.

WEATHER MODIFICATION AS A TOOL OF WAR

(Mr. GUDE asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. GUDE. Mr. Speaker, during the 92d Congress, one of my major priorities, as chairman of the World Environment and International Cooperation Committee of Members of Congress for Peace Through Law, was to investigate the use of weather modification as a tool of war by the United States in Indochina. Although the Department of Defense closely guarded this secret, overwhelming circumstantial evidence convinced

me that this Nation had, indeed, entered the field of environmental warfare.

Today, my colleague DONALD M. FRASER and I are introducing legislation to put the House of Representatives on record as favoring an international agreement to prohibit research, experimentation, or use of weather modification activity as a weapon of war. Such an agreement has been endorsed by the President's National Advisory Committee on Oceans and Atmospherics, the North Atlantic Assembly—the parliamentary adjunct to NATO; the Federation of American Scientists; Maurice Strong, U.N. Environmental Secretary; the National Academy of Sciences Committee on Atmospheric Sciences; and the Sierra Club.

At this point, I would like to insert in the Record a copy of my testimony on this issue before the Senate Foreign Relations Subcommittee on Oceans and International Environment on July 27, 1972, and a copy of the aforementioned resolution which Congressman FRASER and I hope to see passed during the 93d Congress:

STATEMENT OF HON. GILBERT GUDE, A REPRESENTATIVE IN CONGRESS FROM THE EIGHTH CONGRESSIONAL DISTRICT OF THE STATE OF MARYLAND

Mr. Chairman, it is a distinct privilege to appear before this subcommittee. You, Mr. Chairman, have a remarkable record of sponsoring arms control measures, particularly the Seabed Treaty, for which we owe you so much. It is encouraging, therefore, that this committee is considering the challenge to good sense and arms control raised by the specter of geophysical warfare.

I have served for almost 2 years as Chairman of the World Environment and International Cooperation Committee of Members of Congress for Peace through Law—MCPL. MCPL is a bipartisan, bicameral association of 32 Senators and 101 Congressmen. Together with Senator Alan Cranston, our committee's Vice Chairman, we have been investigating the military use of weather modification since March of 1971.

I have noted that you will hear from a number of eminent scientists today, and that yesterday you were briefed by administration spokesmen, such as it was. I will leave the technical details of this new form of warfare to these experts. I do want to explore, however, three major areas of my concern over the development and use of environmental warfare techniques: The arms control implications, the effects on the U.S. scientific community, and the environmental consequences.

ARMS CONTROL IMPLICATIONS OF ENVIRONMENTAL WARFARE TECHNIQUES

Concerning arms control implications, it appears that this country has precipitously blundered into a most unwise use of technology. The arms control implications are staggering. As Senator Cranston and I pointed out to the Secretary of Defense on June 15, 1971:

"Using weather modification as a military tool opens the door to a vast unknown category of warfare. Although techniques are primitive today, experience with other military systems suggests that refinements inevitably will come."

We are taking a step that demands gifted foresight and prophecy beyond our powers. For this reason alone, caution—even abstention—should be our guide.

COMMAND AND CONTROL PROBLEMS

Why should we be so alarmed about a technique that is not nearly as lethal as other forms of warfare? There are several reasons: First, there are distinct command

and control problems associated with geophysical warfare and weather modification in particular. We simply do not have effective short- or long-term control over the climates of the world. We can create certain disturbances, but as civilian experiments have shown, control is not very precise. In a military environment, control over the results of weather experimentation is even more uncertain.

The command problem is no less acute. Since the technology to date does not involve great expense or sophisticated equipment, it is not difficult to imagine the use of weather modification by many different military subunits. In fact, there have been reports that we have trained the South Vietnamese to use weather modification. There are no double-key safing mechanisms here, no exclusive possession as with nuclear weapons.

POTENTIAL INDISCRIMINATENESS

We must also consider that the use of weather modification is potentially indiscriminate. Unlike other weapons, the winds and seas are not so directable that we can discriminate between one target and another. By their nature, they are areawide weapons. We cannot flood only military targets or cause drought in areas producing only military rations. The technology will be used against people regardless of their uniform or occupation. Weather modification will inevitably strike civilians harder than nearby military objectives. Will rain along the Ho Chi Minh Trail succeed where years of bombing has not? And what price will it exact from the agrarian societies along its path, both friend and foe?

DIFFICULTY OF DETECTION

The issues of command, control, and discrimination highlight another disturbing characteristic of weather modification, the difficulty of detection. Unlike other weapons, it may be possible to initiate military weather modification projects without being detected. In other words, the military results may not be visibly tied to the initiating party. This raises the possibility of the clandestine use of geophysical warfare where a country does not know if it had been attacked. The uncertainty of this situation, the fear of not knowing how another country may be altering your climate, is highly destabilizing.

POSSIBILITY OF FALSE CHARGES

I can also envision another possibility. Suppose, for example, that a U.S. plane flies a routine, nonmilitary mission near Chile, Egypt, or Tanzania and by some quirk of fate a major earthquake, flood, or forest fire occurs in one of these countries. Because we have been tinkering with geophysical warfare, we could be charged with creating that environmental calamity due to the mere proximity of the U.S. aircraft. Propaganda would echo around the world. There is ample precedent for believing that this could happen. We need only remember the incident during the Korean war when the North Koreans unjustly claimed that we were using poison gas.

ADMINISTRATION LEADERSHIP IN ARMS CONTROL FIELD

The administration has shown great leadership in the arms control field. SALT and the ban on biological weapons are two excellent examples. It is to this record that we should look for a model to follow.

There are certain parallels between weather modification and the early use of chemical warfare in Vietnam. Then, as now, we did not know the long-term consequences of our actions. We are only now beginning to understand how profound was our effect on the Vietnamese ecology. We cannot afford to repeat this experience. Therefore, I propose that the President's initiative in the biological field could be used as a relevant

model for restrictions on geophysical warfare.

CONSEQUENCES OF MILITARY ENVIRONMENTAL WARFARE ON SCIENTIFIC COMMUNITY

Mr. Chairman, my second area of concern deals with the consequences of U.S. military environmental warfare on the U.S. scientific community. Geophysical warfare can poison the atmosphere surrounding legitimate international programs such as the global atmospheric research program, the international hydrological decade and meteorology in general. We have already seen that it caused the U.S. delegation at the Stockholm Conference to water down a recommendation on climatic changes. The potential for embarrassment is great and for that reason Senator Cranston and I conducted our correspondence with the Defense Department in private for over a year until the issue broke in the press.

Our scientific community could come under suspicion or attack at these international meetings. The trust built over the years by our excellent atmospheric scientists could be dispelled in one stroke of Pentagon experimentation. For this reason, it is of paramount importance that the Secretary of Defense publicly divorce all U.S. military weather modification or geophysical research activities from civilian organizations.

The U.S. Forest Service already has been drawn into the Vietnam conflict and in a most disturbing manner. Who would have thought that the same agency that teaches "Help Smoky stamp out forest fires!" would be contracted by the Pentagon to help create firestorms in Vietnam. It is a sign of the pervasive influence of this mistaken war.

ENVIRONMENTAL CONSEQUENCES OF WEATHER MODIFICATION

In recent years we have come to realize that many of our activities in society have undesirable environmental consequences. Too often we learn of these after much of the damage has been done. The area of weather modification has potential for causing considerable environmental harm and I regret the fact that the public has been kept ignorant or what developments are taking place.

The Department of Defense has testified that it is conducting a study of climate modification known as Project Nile Blue. Under this study a sophisticated computer called the Illiac IV will further advance our technological knowledge of how to change weather patterns. Obviously, such knowledge can be used for offensive military purposes.

Today there exists the strong likelihood that we have artificially increased rainfall in Indochina. Obviously, this activity can be significantly destructive. Floods and intense downpours can do more than hinder troop movements; they kill people and they destroy property.

Such operations are still at a primitive stage; however, beyond making rain, we just look to the possibility of prolonging droughts, redirecting storms and hurricanes and setting off earthquakes with small nuclear devices. Even the possibility of permanently changing the world's climate by tampering with the polar ice cap is no longer in the realm of science fiction.

We learned at the dawn of the atomic age that no military potential will long remain in the sole control of one power. It may be possible, for example, that as the Soviets develop their computer technology their weather control technology will progress correspondingly. But we should not be forced into this field due to some possible Soviet interest and neither should we encourage the U.S.S.R. to increase its capability because of our experimentations. It is in the best interest of both countries to avoid a technology race that could culminate in environmental disasters.

Many authorities have testified that

weather modification is a Pandora's box. This is true in more ways than one. We not only do not know how far our technology will take us, but we also have no idea of what may be the permanent consequences of the experiments we have conducted so far. The top secret acidic rain, produced by the so-called hygroscopic seeding, is a prime example. Has it changed the acid content of the soil? Does it destroy plant life or alter the ecosystem of the area on which it falls?

ABSENCE OF NATIONAL POLICY ON WEATHER MODIFICATION

In the exchange of correspondence with the Department of Defense, Senator Cranston and I repeatedly inquired about U.S. national policy regarding weather modification. In one reply we were told that weather modification has been discussed in DOD for some 20 years. It probably goes back even further, for during World War II we solved a fog problem at Iwo Jima airport by blasting the top off a nearby hill. Regardless of the time span, the most startling point is that only recently has an Under Secretary's committee been convened to formulate a definitive national policy. Twenty years or more we have been moving toward a new form of warfare with no overall policy guidance. Deputy Director of Research and Engineering, John S. Foster, has said that "Presumably this policy when completed will be announced to the Nation in some appropriate fashion."

I think we have all waited too long. I must also note that the Pentagon has been most uncooperative in our search for answers. They have decided to keep this aspect of our Vietnam policy secret from the public and from Congress except for one or two committee chairmen.

RECOMMENDATIONS

In the light of the potential embarrassment and environmental hazards involved in geophysical warfare, I have three firm recommendations:

First, I recommend that all geophysical research and development be conducted under open, civilian auspices except designated defensive military applications designed to save lives. Picking up downed pilots and fog control at airports would be examples of permitted activities. There is no justification for DOD to remain in the business of harnessing the environment for military use.

Second, I recommend that the United States reject all forms of geophysical warfare as of a date certain and request other nations to join in an international treaty to that effect. The model of the biological agreements could well be followed, including a no first-use provision.

Third, I recommend the creation of a civilian oversight board composed of representatives of the National Academy of Sciences—NAS, Environmental Protection Agency—EPA, Department of Defense—DOD, Arms Control and Disarmament Agency—ACDA, Department of Agriculture, Department of the Interior, Department of Commerce—NOAA, NASA, Department of State and a nonvoting representative from the United States Intelligence Board—USIB, to be chaired by NAS, to insure that all environmental research and operations do not have covert military applications and to insure the divorce of military and civilian scientists studying geophysical engineering.

H. Res. 329

Whereas, the Declaration of the 1972 United Nations Conference on the Human Environment declared that nations have the responsibility to ensure that their own activities do not damage the environment of other nations; and

Whereas, the World Meteorological Organization has machinery to facilitate international cooperation in meteorology; and

Whereas, environmental cooperation can

help build a foundation for world peace; and

Whereas, there is great danger to the world environment if weather modification activities are used for warfare: Now, therefore, be it

Resolved, that it is the sense of the House of Representatives that the United States Government should seek agreement with other members of the United Nations on the prohibition of research, experimentation, or use of weather modification activity as a weapon of war.

LEGISLATION TO PROTECT U.S. PUBLISHERS OF SOVIET WORKS

(Mr. BINGHAM asked and was given permission to extend his remarks at this point in the *Record* and to include extraneous matter.)

Mr. BINGHAM. Mr. Speaker, any new commitment by the Soviet Union to adhere to international agreements and treaties is generally a promising development—one Western nations should encourage and applaud. The Soviets for too long have tended to go their own way in international affairs, thereby often stirring international tensions and disagreements more than avoiding them.

There is apparent reason, however, to suspect the Soviets' motives for acceding to the Universal Copyright Convention effective May 27, 1973. The Soviet announcement of their accession was followed by an ominous change in Soviet domestic law which would, among other things, allow the Soviet Government to claim proprietary rights over United States and other foreign copyrights on the works of Soviet authors.

While information on this change in Soviet law is still limited to press reports and Western experts have not yet had an opportunity to study it in detail, the implications seem clear. With this kind of domestic legal authority, and with the machinery of the Universal Copyright Convention at its disposal, the Soviet Government could be in a position to prevent further foreign publication of works by what it considers dissident Soviet authors. It could do so by asserting proprietary rights over their works and bringing suits in the United States and other countries against publishers who print those works.

Mr. Speaker, whatever gains nations and publishers outside the Soviet Union might stand to reap from Soviet participation in the Universal Copyright Convention would surely be far outweighed by the damage that could be done to fundamental human rights and freedom of expression should the Soviets choose to use their accession as a muzzle on foreign publishers and Soviet authors. I believe firm action must be taken now to make it clear to the Soviets that we do not intend to stand for such a cynical, unjust, and self-serving abuse of the Universal Copyright Convention.

With that in mind, I am today introducing legislation in the House which is intended to block the Soviets or any other nation from stifling dissident authors and isolating them from the outside world by bringing suit against American publishers who print their works. This legislation is supported by the Authors League of America, and is similar

to legislation introduced March 26 in the Senate by Senator JOHN McCLELLAN, chairman of the Senate Subcommittee on Patents, Trademarks, and Copyrights. The bill simply amends section 9 of the U.S. Copyright Act to provide that U.S. copyrights shall vest only in the author of a work, his executors or administrators, or his voluntary assignees and that in no instance may any foreign government or state divest the author of a U.S. copyright or bring action against a U.S. publisher on that basis.

Mr. Speaker, I do not regard the legislation I am proposing today necessarily as the final, and certainly not the only, device for dealing with this most significant problem. I feel that every effort should be made also by our State Department and diplomats of other nations to determine precisely the intent of the Soviets and, through discussion and negotiation, to attempt to dissuade them from any action that would further stifle their own authors or deprive citizens of other nations of access to the writings of any Soviet author.

We must be perfectly clear and firm in any such negotiations that we will not tolerate suppression of Soviet authors or any interference with the right we accord our own citizens to read and to publish. As a Member of the House Committee on Foreign Affairs, I intend to do everything possible to see that the State Department adopts a strategy that could lead to a satisfactory diplomatic resolution of this problem.

With regard to enactment of remedial U.S. legislation, I am hopeful that Subcommittee No. 3 of the House Judiciary Committee, which has jurisdiction over copyright law and which is chaired by my distinguished colleague from Wisconsin, Mr. KASTENMEIER, will take the legislation I have proposed under immediate consideration, and will assess it carefully. Whatever changes and improvements in the bill the committee may wish to make, I trust it and this Congress will share my strong support for the bill's basic purpose and intent—to preserve the rights of American citizens and American publishers to have access to the works of foreign authors regardless of the views of their governments, and to defend the rights of authors in every country to publish and be read at least in this country without government interference.

We do not seek in this bill to impose upon the Soviet Union our system of freedom to publish, committed and devoted as we are to that freedom. We seek only in this bill to prevent the Soviet Union from imposing on us—on our citizens and publishers—the repressive system they maintain in their country.

Hopefully, Mr. Speaker, we can resolve this problem through diplomatic action, or through domestic legislation such as I have introduced today, or both, without causing the Soviets to withdraw from the Universal Copyright Convention. Certainly that should be our goal. But if we cannot have continued freedom to read and publish in this country the works of dissident Soviet authors with Soviet accession and participation in the Universal Copyright Convention, then

certainly we must opt to retain that freedom without Soviet accession to the Convention.

Mr. Speaker, several recent articles from the *Washington Post*, *Publishers Weekly*, and the *New York Times* concerning developments on this matter follow:

[From the *Washington Post*, Mar. 28, 1973]

SOVIET ABUSE OF COPYRIGHT IS FEARED

Moscow, March 27.—Physicist Andrei Sakharov and five other liberal scientists and writers warned today that the Soviet Union's agreement to join the International Copyright Convention could suppress rather than protect the rights of Soviet authors.

In an open letter to the United Nations Educational, Scientific and Cultural Organization, they warned that the "harsh and arbitrary" powers of Soviet censorship could now possibly operate on an international scale, supported by the Geneva Copyright Convention.

The Soviet decision to join the convention was announced last month, to be effective May 27.

Sakharov, who helped develop the Soviet hydrogen bomb, and the other signatories said they basically approved the Soviet decision, but wished to set forth "some misgivings."

"In the special circumstances of our country the law about the state's monopoly of foreign trade could be converted into a power which limits and even completely suppresses the copyrights of Soviet citizens," they said.

"Ideological and aesthetic censorship has always been extremely rigorous in our country, and in recent years has become ever more harsh and arbitrary."

[From the *Publishers Weekly*, Mar. 26, 1973]

AUTHORS, PUBLISHERS DEPLORE SOVIET MOVES TO CURB DISSIDENT WRITERS BY COPYRIGHT LAWS

The Authors League of America has asked the State Department to lodge a "strong protest" and demand that new provisions of the Soviet copyright law be rescinded if they provide a broad exemption for educational materials or prevent foreign publication of works by dissident Russian authors.

In a follow-up action, the Authors League asked Congress to amend the American copyright law to prevent the U.S.S.R. or any foreign government from appropriating U.S. copyrights granted to their authors and using them to bar publication of the authors' work in this country. On March 20, the League sent identical letters to Senator John L. McClellan and Representative Robert W. Kastenmeier, Chairman of the Senate and House Judiciary Subcommittees dealing with copyright matters. The letters cited an Associated Press Moscow dispatch reporting adoption by the Supreme Soviet of a decree 133 which they said "apparently is designed to permit the U.S.S.R. to prevent publication of these works abroad by bringing suits for infringement of United States or other copyrights against publishers in foreign countries who issue these works." The U.S.S.R. would presumably claim proprietary rights in the U.S. or other foreign copyrights in the works of dissident authors—copyrights which will be secured by its forthcoming adherence to the Universal Copyright Convention.

Others throughout the American publishing industry also voiced concern at reports from Moscow that the Soviets had taken steps to amend their domestic copyright law in ways that would nullify any benefits arising from adherence to the UCC. Details of the new provisions were not known as this issue of *PW* went to press.

An emergency meeting was called by the Association of American Publishers Board of Directors for March 21 to discuss ramifications.

tions of reports that the Soviets had amended their domestic copyright law on February 2 to exempt books used for "nonprofit scientific and educational purposes" from royalty payments and to allow the Soviet Government to acquire control of foreign copyrights of Soviet authors and thus prevent publication of dissident authors abroad.

"Authors League respectfully urges the State Department to immediately obtain for it and other interested organizations translation and analysis of new provisions." Authors League President Jerome Weidman said in a March 19 telegram to Secretary of State William P. Rogers. "If these have effects reported . . . it is essential U.S. immediately make strong protest to U.S.S.R. and demand provisions be rescinded."

State Department officials said they were surprised at the actions of the Soviet Government and had requested the Moscow Embassy to furnish a summary and translation of the amendments to the domestic Soviet copyright law of 1961.

If they provide a broad exemption for educational materials, the Authors League pointed out, a vast proportion of all U.S. books published in the Soviet Union after the May 27 effective date for accession to UCC would receive no copyright protection.

Robert L. Bernstein, Chairman of the AAP, said that American publishers had made it clear to the delegation of Soviet publishing authorities on their recent visit to the United States "that the promising atmosphere engendered by the Soviet's extension of law and equity to proprietors of intellectual products would be jeopardized by attempts to exploit the international copyright regulations as a weapon to silence Soviet writers."

"It is very regrettable that the Soviet Government has apparently chosen to ignore the sensitivity of U.S. authors, publishers and all those interested in freedom and harmonious international relations," said Bernstein, president of Random House.

Boris I. Stukalin, Chairman of the State Committee for Publishing, Printing and Book Distribution of the U.S.S.R. Council of Ministers, and four high-ranking colleagues departed from New York the first week of March after completing a historic two-week visit as guests of the AAP. They met with U.S. officials and dozens of American publishers in New York, Boston and Chicago. "As hosts of the first such delegation of ranking officials in the publishing industry in the U.S.S.R., AAP representatives and publisher members had not wished to anticipate publicly during Chairman Stukalin's stay in this country the fears that many had voiced privately to their guests about the possibility that some would wish to use UCC to repress Soviet authors," Mr. Bernstein said.

The Authors League had earlier sought assurances from the State Department that U.S. authors would receive adequate protection in the U.S.S.R. under any copyright agreement resulting from generally improved U.S.-Soviet relations and the trade negotiations between the two countries.

In a letter to Deputy Assistant Secretary of State Bruce C. Ladd, Jr., the League on December 10 said: "We know that the United States does not favor or condone Soviet suppression of writers and artists; we only suggest that caution be taken . . . to avoid giving them [the Soviets] the opportunity to distill such a claim out of the copyright discussions" (PW, February 12).

It could be said that this, in effect, is what has happened. While the Soviet publishing delegation was in this country, the news that the U.S.S.R. had acceded to UCC was cheered by American publishers. Only after the delegation returned home did word emerge that stiff new provisions in the copyright law would enable authorities to clamp down on Soviet authors who attempt to publish abroad without going through government procedures.

In the opinion of Roger W. Straus, Jr., president of Farrar, Straus & Giroux, which publishes Alexander I. Solzhenitsyn and other Russian authors, there is "absolutely no doubt that the Soviet Government can now control publication at home and abroad." Adherence to UCC gives the Soviet Government a handle on foreign publishers it did not have before the Soviets joined the international copyright system, he told PW.

If press reports from Moscow are accurate, the Soviet Government will now be able to prosecute authors who fail to comply with domestic publishing procedures. It will also be able to go to court in the United States to enjoin U.S. publishers from publishing any given Soviet work, Mr. Straus said.

"It is a deplorable situation," he added. "It puts Solzhenitsyn in a far more complicated and strangled position."

It has now become obvious that one motive the Soviets had in joining the international copyright family was to suppress their own underground writers. But that was not the only motive, according to Soviet experts in Washington. They were also interested in earning royalty payments from the West and in getting into world trade generally as part of an improvement in East-West relations.

"At that point, the Russians began to think," one authority on Soviet affairs told PW, "and they saw that if they joined the copyright system they might be able to control their own authors whose works have been published abroad without approval of the government."

[From the New York Times, Mar. 25, 1973]

U.S. AUTHORS ASK A BAR TO SOVIET—SEEK TO BLOCK COPYRIGHT ACTIONS IN U.S. COURTS

(By Wolfgang Saxon)

The Authors League of America has urged Congressional action to prevent the Soviet Government from using the American courts to enforce its claim to copyright control over the works of Soviet authors.

The request for a change in the United States Copyright Act reflected concern that Moscow might use the courts in a new worldwide campaign to stifle the voices of dissident Soviet authors.

Thomas C. Brennan, counsel of a Senate Judiciary subcommittee on copyright and patent legislation, commented in Washington that Senator John L. McClellan, chairman of the panel, shared the league's concern and that the Arkansas Democrat would introduce the amendment it proposed early this week.

The Soviet Union notified UNESCO, the United Nations Educational, Scientific and Cultural Organization, last month that it wished to become a party to the Universal Copyright Convention, assuring foreign authors that their works would no longer be pirated at will and that they would be paid regular royalties by the Soviet Union's state-run publishing houses.

LEGALITIES ARE FOUND

But after the initial elation over the announcement in Western countries, reports from Moscow indicated that the fine print in the revised Soviet copyright statute contained legal machinery for halting the foreign publication of Soviet authors deemed unpublishable in their own country for ideological reasons, such as the Nobel-Prize novelist Aleksandr Solzhenitsyn.

Under a loosely defined provision, the Soviet Government appeared to claim copyright control over the works of Soviet citizens. The law and Soviet accession to the international convention would therefore permit the Government to take legal action against either the author of an "underground" manuscript or his foreign publisher.

If the author contends that his writing found its way into print abroad without his

consent, the Soviet Government could sue publishers to halt publication in more than 60 countries now honoring the convention. If the author admits a part in smuggling his "unpublishable" manuscript abroad, he could himself be prosecuted in the Soviet courts for defaming the Soviet Union.

To blunt this double-edged threat, the American authors' group, headed by Jerome Weidman, proposed that the United States copyright law be changed to disallow claims to copyright control by any foreign government.

In letters to Senator McClellan and his counterpart in the House of Representatives, Robert W. Kastenmeier, Democrat of Wisconsin, Mr. Weidman set forth an amendment that would uphold a foreign author's right to his own work against infringement by his own government.

TWENTY-FIVE YEARS AFTER FULTON

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, 25 years after Sir Winston Churchill made his historic "Iron Curtain" speech at Westminster College in Fulton, Mo., when he was introduced by President Harry S. Truman, the grandson of Sir Winston, the Honorable Winston S. Churchill, Member of Parliament, also delivered an able and significant address at the same place. The occasion was the receipt of honorary degrees by Mr. Churchill and the Honorable W. Averell Harriman. Mr. Churchill was introduced by a former distinguished Ambassador to the Court of St. James's, the Honorable Lewis W. Douglas.

The title of Mr. Churchill's address on May 21, 1972, was "25 Years After Fulton: A New Balance." Mr. Churchill made eloquent reference to the address of his grandfather 25 years before and to its momentous significance to the time in which it was made and to history. With penetrating understanding Mr. Churchill reviewed the events of the intervening years and finally surveyed the situation in the world at the time of his own address. As Sir Winston's address at Fulton in 1946 in power and prescience was equal to or even surpassed some of his great prewar speeches, so does the speech of his grandson, rising to his own eminence in British and world recognition, reveal that he too is man of broad knowledge and understanding of world affairs and perhaps also has a prescience which will later receive high commendation.

Therefore, for its reminder of and references to the great "Iron Curtain" speech of Sir Winston Churchill and for its own important contribution to an understanding of world events in the last 25 years as well as in 1972, I commend the Honorable Winston S. Churchill's address at Fulton to my colleagues and to my fellow countrymen, who will ever revere the Churchill name, and include it in the Record following these remarks:

COMMENCEMENT DAY ADDRESS

(By the Honorable Winston S. Churchill, M.P.)

MR. CHURCHILL'S ADDRESS

Ambassador Douglas, President Davidson, Governor Harriman, members of the board of

trustees, faculty and graduates of Westminster College, families and friends, it is a very great privilege and honor for me to have been invited here as your guest today, and I particularly appreciate this chance of at last visiting this magnificent memorial to my grandfather. It is a very great pleasure for me to have been done the honor of being introduced by Ambassador Douglas, who is known on both sides of the Atlantic as not only a distinguished diplomat, but a very gallant gentleman, and certainly a very close and long standing friend of my family. It is also a fact of which I am proud that Governor Harriman and his new bride, with whom I have some passing acquaintance, should be on the platform with me today.

You have given me a very tall order ladies and gentlemen, to ask me here to follow where my father and my grandfather before me have addressed you. It is perhaps inevitable that anyone who comes to speak at Fulton, and stands at this podium, which I believe my grandfather used the day he made his famous speech here; that we stand under Winston Churchill's shadow of his "Iron Curtain" speech. The fact that I have the privilege of bearing his name makes this task no easier, I can assure you of that; indeed the reverse is the case; but though it is an awesome task, as I am all too well aware, it is also a very special privilege for me to have been invited here as your guest today.

I would like to say how much I have been impressed by all I have seen of the college and in particular of the memorial here in this very pleasant weekend that I have had the chance of spending among you. I believe my grandfather, when he came to Fulton, said, "I have been told that Mid-America is the heart of isolationism. I don't know about that," he added with a twinkle, "but when it came to the late war, Mid-America proved to be the backbone of the nation." And I think ladies and gentlemen that the ROTC ceremony that I had the privilege of witnessing this morning shows in no small measure that this is still the case today. And I think the role to which they aspire of belonging to a citizen army is a noble one and a very vital one, and all congratulations to them and indeed to all of you who today are graduating, and to your parents too who I know are with you here now.

This magnificent memorial to Churchill—this blitzed Wren church translated from the smouldering ruins of wartime London to the heartland of America—is more than a memorial to one man.

It is a memorial to the common heritage and blood, common suffering and sacrifice of the British and American peoples. It is also a memorial to the highest aspirations of the human spirit to achieve beauty, perfection and peace.

These walls, transported stone by stone from England, may bear witness to the folly and wickedness of Man but, by their reconstruction here in the heart of America, they stand as avowal of the enduring determination of our two peoples that never again shall a World War darken the face of the Earth and afflict its miseries on mankind.

Churchill's speech at Fulton was the first of four speeches that in their power and in their prescience, equal or even surpass the pre-war speeches in which he had given warning of the threat to the world and to world peace posed by the growing power of Nazi Germany.

In 1946 the world stood at a crossroads. The mists of war still obscured the shape of the world which was emerging from the battlefield. A new balance of world power was evolving.

The United States stood at the pinnacle of power. Her industry accounted for 50 per cent of the world's total production and she possessed, on top of that, a monopoly of nuclear power.

The British people, who had borne the brunt in both conflicts and made the greatest sacrifice of resources and blood, stood exhausted. We were about to embark on the task of converting the British Empire into a Commonwealth of independent countries. That task has today been accomplished. This peaceful change from Empire into Commonwealth will be regarded by historians as an outstanding achievement of statesmanship. The Commonwealth, which today comprises one quarter of the people of the world, provides a bridge between the races and continents—a bridge more vital today than ever before.

By contrast the might of the Soviet Union was to increase dramatically in Eastern and Central Europe, harnessing the labour and skills of some two hundred million of the most able and technologically advanced people in the world who—against their wishes—found themselves incorporated into a new Soviet empire.

Since the last years of the war Churchill had recognized the Stalinist threat to the countries of Eastern and Central Europe and had tried to alert the United States Government to the dangers. But the United States leaders and American public opinion took a more optimistic view of the situation. His advice went unheeded and by 1946 almost all U.S. forces had been withdrawn from Europe. He realised the true meaning of the word "liberation" by the Soviet Red Army of the nations of Eastern Europe—great nations such as Poland, Hungary and Czechoslovakia, so many of whose citizens were to find refuge and a new home in your country. By 1946 it had become clear to Churchill that all Britain had gone to war for, all the Western democracies had fought so long to achieve—the end of tyranny in Europe and a peaceful world—was being threatened. Czechoslovakia was in danger, Vienna and much of Austria was under Soviet domination and the countries of Western Europe lay devastated and defenceless. The Iron Curtain, as he put it, was descending across Europe. No one could tell where or whether it would stop. He saw that only the United States, possessing supreme nuclear power in the world, could save the situation. Thus he came to Fulton to put his case to the American people.

"The Iron Curtain" speech, as it has come to be known, caused a great stir at the time. It was disavowed by the State Department and roundly attacked by statesmen on both sides of the Atlantic and large sections of the press. Churchill found himself greeted in New York City by hostile crowds of pickets. It was a speech that shattered many illusions and ran counter to the universal hope, with the death of Hitler and the destruction of Nazi Germany, that tyranny had been destroyed and the threat of war had been banished from the face of the earth.

The message of the Fulton speech—initially ignored—was to be translated into action by the United States, though sadly not in time to save Czechoslovakia and the remaining vestiges of freedom that might have survived in other Eastern European countries. But through the Marshall Plan, the Atlantic Alliance and, above all with the backing of the American nuclear shield, the countries of Western Europe were saved.

Only a few months after Fulton, Churchill spoke in Zurich. Surveying the devastation of our continent where countless men and women were homeless, industry was paralysed and hunger and poverty lurked through many lands, he called on the peoples of Europe to join together and build a United States of Europe. This grand conception which fired the imagination of millions is only now, a quarter of a century later, on its way to becoming a reality. By January next year ten nations, including Britain, comprising between them some 300 million people, will be joined together in building

a second bastion of Western Civilisation to stand alongside the United States. This unity—and Britain's part in it—will enable Europe to share with the United States the burdens of defence and make a greater contribution towards the solution of the problems that beset the developing nations of the world.

In the years between 1946 and 1949 the safety of the Western World depended upon the American monopoly of nuclear power. But by 1949 this position was being challenged by the Soviet Union. The communists had taken over China and would soon threaten Korea and South East Asia. In 1949 at Llandudno, Wales, Churchill called on the Western powers to bring matters with the Soviets to a head and hammer out a settlement while the Western Powers could still negotiate from a position of strength. He spoke in vain.

In May 1953 shortly after Stalin's death, Churchill spoke in the House of Commons. The supremacy of the West was already in question. We could no longer talk from strength. Nevertheless, the Russian regime was under great stress. He accordingly called for a summit meeting of the Western Powers and the Soviet Union to try to reach a settlement with the new rulers of Russia. It is ironic to think that many of the same statesmen who had denounced the Fulton speech as "war-mongering" were quick to criticize the speech of May 1953 as "appeasement." One may conclude that it is a thankless task to be a prophet and to warn the world of a reality it does not wish to face. But it is only those who—forsaking the idol of instant popular acclaim—declare fiercely and fearlessly the truth when history comes to be written, rank as statesmen.

There have been many summit meetings since. A vital one is today in progress. But if we draw a balance sheet comparing the situation today with that of 1953, we must in all honesty confess that our defeats far outweigh our successes.

1953 marked the beginning of the tension between the United States on the one hand and Britain and France on the other, in the Middle East, which was to characterise much of the decade. Our differences in that vital area only served the interests of our foes. Who would have thought in 1953 that the dominant influence in the Middle East today would be Soviet? That there would be more Red Army personnel in Egypt than there were British troops in India at the height of British rule one-hundred years ago? That the Soviet fleet would be a force to reckon with in the Mediterranean and the Indian Ocean? That Soviet diplomacy would rival that of the United States and Britain in the Indian-subcontinent? That Soviet influence would have penetrated deep into Africa? That the Soviet Union would have reached a position of military parity with the United States? All this has come about in the space of the last 15 years. It has come on us like a thief in the night. And though each successive setback has created a temporary shock, it is soon forgotten as have been the Soviet repressions in Hungary and Czechoslovakia.

But the picture is not all dark. There may be grounds for hope where it has been least expected.

Today, a quarter of a century after Fulton, we stand once again at a crossroads. For the first time since those early post-war years a new balance is evolving in the world with the rise of new centres of power in Europe, China and Japan. Then the crossroads were in Europe; today they are in Asia.

Just as the changed balance of power at the end of the war led to a new era which soon came to be characterised as the Cold War, the prospect before us threatens to be a struggle for Asia. The old mould—the structure of a two-power world—is broken. We are moving into a new and fluid situation that will be ruled by many unknown factors. Cer-

tainly the monopoly of power that has been wielded by the peoples of Europe and of European origin, which of course includes the United States and the Soviet Union, is at an end. The balance has shifted eastwards. Five or ten years from now who will rule the score or so independent countries of Asia? Will it be the Chinese, will it be the Russians, the Japanese, or will they still stand as free and independent countries controlling their own destinies? These are questions which will vitally affect all of us in the coming years.

Japan with her economic dynamism has risen to third place in the league of the world's industrial powers and her influence in Asia is becoming increasingly a factor to be reckoned with. Should she ever decide to match her military power to her economic and industrial resources, she would be a most formidable power.

China, with a quarter of the world's population, though in no way approaching Japan in industrial power and economic might, by her very size and above all by her growing military power has stepped on to the stage of world affairs to take up her rightful place.

A month ago I was in Peking where I had the opportunity of discussing the new situation with Premier Chou-En-lai and other Chinese leaders. A number of events have combined together to propel China on to the stage of world affairs. The two most significant were the Soviet invasion of Czechoslovakia in 1968 and the new policy of the United States in Asia.

The first brought home to Chinese leaders the vulnerability of their position should their ideological differences, overseas rivalries and common border disputes, ever lead to a conflict. It is above all, fear of the Soviet Union and Soviet ambitions that rules Chinese foreign policy considerations today. They find themselves faced with an army of more than one million Soviet troops armed with nuclear weapons ranged along the length of their 7,000 mile border. This military force—which stands at some 44 divisions of Soviet troops compared to the more than 31 divisions with which the Soviets favour us in Europe—represents a trebling of Soviet military manpower on their Eastern border in the space of the last three years. It is not without significance that the Russians have achieved this without decreasing by so much as one division their forces facing us in Western Europe.

To the rulers of the Church in medieval times ignorance and disbelief was just tolerable: the cardinal sin was heresy. So to the Chinese the Soviet leaders' "revisionism" or backsliding on the true doctrines of Marxism-Leninism, is anathema. "After all we both started at the same point," the Chinese complain with bitterness.

There's no doubt that today there exists a deep gulf of hatred between the leaders of China and the Soviet Union. Nothing dramatized this more starkly than the spectacle of the two communist giants vilifying each other in the Security Council in December last year over the Third Indo-Pakistani War. It is a hatred that is on both sides tinged with fear. The Chinese fear is of the vast nuclear superiority of the Soviet Union and the possibility of a pre-emptive nuclear strike and certainly it is impossible for a visitor to China today not to notice the vast programme of shelter construction that is under way. All over the country a new 15 mile underground railway system has been built in Peking but, although completed a year ago, it is not open to the general public. Those who have seen it believe that it has been constructed as a nuclear blast shelter. The efficacy of such precautions must be open to doubt but, as the Chinese themselves point out: what better way of psychologically readjusting their people towards a new direction of threat than to have them digging bomb-shelters in the cities and villages throughout China.

The Russians, for their part, have a more long-term fear of what they are not above referring to as the "yellow peril," particularly as Chinese nuclear capacity becomes more substantial.

In the wake of the United States' military withdrawal from Indo-China—which in terms of combat troops is already completed—a new struggle for Asia has already got under way. My talks with China's leaders left me in no doubt that even in the context of South East Asia, the United States is seen as yesterday's enemy. With Soviet influence in Hanoi paramount as a result of the Soviet Union's far greater material backing of the North Vietnamese offensive, the Chinese are deeply concerned at what they see as Soviet 'expansionism' not only in South East Asia but in the India sub-continent, the Indian Ocean, Persian Gulf, Mediterranean and Middle East.

At a time when the United States is bent on reducing the burdens of alliance and protection, the Soviet Union shows itself eager to take them up by establishing colonial-type treaties with Egypt, India and Iraq. This is in marked contrast to the "stand on your own feet" doctrines of President Nixon and Chairman Mao-tse-tung and inevitably presents a grave threat to the independence of the developing nations of the world.

Obsessed with the power of the United States, the Chinese leaders long failed to observe the rise of Soviet influence throughout Asia. No one can say what are the precise calculations of the rulers in Peking. But certainly their private and many of their public declarations show growing awareness that the main threat to them does not come from the Western Powers. If this be so, it must be the aim of Western statesmanship to ensure that we live together if not in friendship at least in mutual forbearance. How far that relationship can prosper will largely depend on their respect for us and that respect will depend in its turn on the determination which we show to defend our interests against forces which may seem as hostile to them as they do to us.

The other and surer source of comfort is the revival of Western Europe. A revival which owes so much to American support and defence in the difficult and dangerous post-war years.

Our economic revival is already far advanced and with the extension of the European Community will gain in impetus. This should enable us to shoulder with you more of the burden of defence which you have carried for so long alone and a more generous programme of assistance to the developing nations. In the revival of Europe and the close conjunction of a united Europe with the United States, lies the best, perhaps the only hope of retrieving the mistakes of the past and meeting the dangers of the future.

Those of us who never knew the Second World War—and we are after all in the majority in the world today—must ensure that we do not repeat the mistakes of the generations that have preceded us. At all costs another, and potentially final, world war must be avoided—but so too must the spread of tyranny. The "two gaunt marauders"—tyranny and war—to which Churchill referred in his Fulton speech still stalk the globe today.

There are others—poverty, disease and famine—as he rightly recognised. After all what is freedom of spirit to a man who does not possess the most basic freedoms of all—freedom from poverty, hunger and disease? If even half of all that has been spent on armaments in the past quarter century had been devoted to the welfare of the human race, can anyone doubt that the world would today be a better place? It has been a tragic fact that over the two years the United States and the Soviet Union have been engaged in the Strategic Arms Limitations Talks, the armaments race has been

continuing at a faster rate than ever before.

It must be the hope of all that the statesmen now meeting in Moscow will successfully resolve this problem so that the world can turn from the catastrophic course of piling up weapons of mass destruction towards a new era—an era of prosperity and advance unhampered by intolerable levels of military expenditure, of freedom not threatened by tyranny and of peace built not on fear but on friendship.

There was a time, not so very long ago, when the people of America were in love with the world. Today you seem to eye her with less enchantment, even with some diffidence. One senses that you are tempted to find more congenial the rarefied atmosphere of the planets—where the problems are not human, only technological and more easily overcome. But, as History has shown and indeed this splendid memorial bears witness, there can be no shorter cut to disaster for us all than if America turns her back on the world.

Only with the firm commitment and resolve of the people of the United States—looked to today, as ever before, as the inspiration of free men everywhere and indeed of those who yearn to be free—is there hope that those "gaunt marauders" that so afflict humanity—war, tyranny, poverty, disease and famine—can be overcome. It was in search of that commitment that Churchill came to Fulton just over a quarter of a century ago.

What I have seen here at Fulton—the evidence of your commitment to your country and to its high ideals—encourages me to hope that America's commitment to the forward progress of mankind everywhere will remain. It is certainly every bit as vital today as ever it was then.

The challenge facing our generation is to resolve these problems—to ensure that the smaller nations of the world become truly independent, that they do not fall victim to a new imperialism and that the widening gulf between the rich nations and the poor is bridged so that the human race may move forward to those "broad, sunlit uplands" of prosperity, freedom and peace of which my grandfather so often spoke. That is the challenge we must meet.

THE FOREST CONSERVATION AND IMPROVEMENT ACT OF 1973

(Mr. MEEDS asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. MEEDS. Mr. Speaker, wood fiber is a resource which can be either finite or renewable. Unlike petroleum, iron ore, bauxite, or other resources, trees can be replaced—provided they are managed properly. Today we are not managing our forests in the best possible way. In fact, we are treating our forest resources with something akin to contempt.

Harsh words, yes, but sadly true. To my way of thinking it is wrong to have 5 million acres of our commercial national forest lands cut over but not reforested, and to have another 13 million acres in dire need of stand improvement. It is wrong, in my view, to export ever increasing amounts of raw wood fiber to Japan and import ever increasing amounts of lumber from Canada. This is not "free trade." It is economic colonialism. It is wrong, in my view, to be told by the U.S. Forest Service that all land ownerships on the Pacific Coast are being overcut. It is wrong, in my view, that we have no balanced approach to the

overall problems of log exporting, land management, and reforestation.

Today I am introducing the Forest Conservation and Improvement Act of 1973. With this legislation we can restore some common sense to the total problem of timber supply.

Concern for our forest resources has been forced upon us by soaring lumber and plywood prices. "Punitive" might be a better word than soaring. In March of 1972 you could buy 2x4 green Douglas Fir lumber in Portland for \$119 a thousand board feet. A year later you could buy it for \$192. Three-eighths inch sanded plywood? A year ago it was priced at \$100, and today you could buy it for \$168.

To blame lumber price increases on any one single factor is incorrect. The major problem is that we have a limited resource base which can crank out only so much finished product. When demand is high, and when the resource is being shipped to Japan, prices naturally soar. Also to be cited are boxcar shortages in the Pacific Northwest, and cutbacks in the Forest Service budget. Studies carried out pursuant to the Wilderness Act have also reduced the annual public timber cut by 300 million board feet.

A few years ago the House refused to take up a bill called the National Timber Supply Act. This bill had merits, but it also had defects that aroused the ire of conservation groups. With the Forest Conservation and Improvement Act I believe we have removed these defects and have a balanced approach to land management and timber supply.

Let me say a word now about our land and its resources. For the past several years I have noticed a "covered wagon psychology" on the part of the environmental groups and the timber industry. They distrust each other and are constantly warning themselves that the other side is planning new onslaughts. "They are coming at us again, boys. Draw up the wagons." The industry fears loss of timberlands and interference with their business, while the conservation people see disasters and threats everywhere.

Last June there commenced a series of legal actions over the timber sale program of the U.S. Forest Service vis-a-vis the ongoing wilderness studies. I hope this case knocked some sense into both sides. The plain fact of the matter is that neither the timber industry nor the environmentalists know which side is going to win, what is going to happen next, how the votes will be cast.

So I say it is just about time we stopped shouting at each other and started recognizing that the need for wood fiber and sensible land management are legitimate goals. And because trees are uniquely renewable resources, they can furnish a host of uses—if we manage them properly.

The Nation needs wood fiber. In its "Outlook For Timber in the United States" study, the Forest Service predicted that demand could exceed supply by as much as 20 billion board feet by the year 2000. It also predicted that log exports to Japan would hit 5.2 billion board feet by 1980. Timber harvests on private lands on the Pacific coast are

expected to decline from 10.5 billion board feet in 1970 to 4.4 billion board feet by 2000. And the Government's response to all of this? Last fall the administration's trade team went to Tokyo and persuaded the Japanese to purchase an additional 700 million board feet by the end of this month. Then they cut the Forest Service budget by \$105 million. That is what they have done. Never mind that the cost of preparing a timber sale has jumped from \$1.54 per thousand board feet to \$3.06 per thousand in 5 years. Never mind that Forest Service roadbuilding will drop in 1 year from 719 miles to 173 miles. Never mind that potential American home buyers are paying the price for this folly, and never mind that rents are skyrocketing. Budgets and short-term private profits are apparently more important than people. Export the trees, cut the funds, pocket the dollar and the yen.

If Members of Congress want a precise explanation of the dollars involved, I offer the examples of the capital gains tax on timber and the Domestic International Sales Corp. There is enormous money made when one applies the capital gains difference between the price of the timber and the cost in raising it. The new DISC law allows companies to exempt up to 50 percent of their export profits from the Federal corporate tax. The Nation's largest private exporter confides to us in its 1972 annual report that—

Undistributed earnings of the Company's domestic international sales corporation (DISC) are invested indefinitely; therefore no provision for income taxes is made in respect of such earnings.

You cannot fault the exporters for trying to make money. Were I a business executive I would make the same decision, since my responsibility would be to the stockholders. But as a Member of Congress I have stockholders in my district who are dependent on an abundant supply of wood fiber, regardless of whether they work on the docks or in the mills. We are depleting the resource. This cannot go on without serious economic damage.

The Nation also needs sensible land management. Hearings before congressional committees have documented shocking cases of logging damage, of streams choked with sediment, of forests that were cut but not able to regrow. We should not forget that wilderness is a multiple use. The public land should serve all the public wants.

To the timber industry and to the conservation groups, I say this: We simply cannot continue to set aside large areas for wilderness and national parks unless we spend more money to improve those lands classified as commercial forest lands. Conservationists must realize that not reforesting those 5 million acres is putting pressure on the de facto wilderness areas. Nor can we continue to export unlimited amounts of raw wood fiber to Japan while deploring wilderness and park bills. We can have our wilderness, and we can have our wood fiber. Yet we cannot continue our present course, our mounting antagonism over the land.

The Forest Conservation and Improve-

ment Act of 1973 offers a reasonable approach to this very complicated issue. The bill is essentially a forest management measure.

The legislation requires the Secretary of Agriculture to develop comprehensive management plans for all the national forests, and stipulates that the Secretary of the Interior will do the same for the commercial forest lands under his jurisdiction. A proposed plan is to be published in the Federal Register not less than 60 days prior to at least one public hearing in the State where the land is located. Following oral and written comments, the respective Secretary will promulgate a management plan and publish it in the Register. The plan will take effect 120 days later unless disapproved by a majority of the House and Senate Agriculture Committees, or, in the case of Interior Department lands, the House and Senate Interior and Insular Affairs Committees.

Each plan will be developed in accordance with the public laws of the United States. The only major priority in the plans is obtaining regeneration after harvesting and reforesting non-stocked or poorly stocked areas of the commercial forest lands.

The plans will also give priority to wilderness uses, wise forest management practices, outdoor recreation, environmentally sound methods of access, and improved fish and wildlife habitat. The bill should not be construed as changing in any way the authority of State officials to manage game and fish.

The measure also provides assurance that small, independent mills can obtain a fair proportion of Federal timber sales. This is being done today under a Forest Service-Small Business Administration "set aside" program, and writing the practice into law will aid the smaller firms who are almost entirely dependent on the national forests for wood fiber.

The bill sets up a Forest Conservation and Improvement Fund capitalized by the receipts from the sale of Federal timber. The moneys in this fund are in addition to those appropriated annually and are to be used to administer the comprehensive management plans.

Here we find an important difference between this legislation and the old Timber Supply Act. The old bill set the funds aside for timber harvesting and management only. In the fund established by the Forest Conservation and Improvement Act, all multiple uses are to be served. I think this is significant, for many persons have complained, often with justification, that the timber sale program now comes first and gets the lion's share of the Forest Service appropriations. In fact, the Mount Baker National Forest in my district has responded to the impending budget cutbacks by announcing that road and trail money will be used exclusively for timber harvest activities.

Unlike the old Timber Supply Act, this new legislation does not direct the Government to immediately launch a high-yield forest management program. On the contrary, what the Government will do will be determined by manage-

ment plans formulated through public hearings.

Some have voiced fears that because the Forest Service is to be funded by timber receipts, there will be a temptation to cut more to get more. This fear is understandable, but I've noticed that the Government has been somewhat more sensitive to environmental concerns. Recently they have taken steps toward environmentally sound harvesting practices.

Mr. Speaker, the Public Land Law Review Commission's report recommended that we simplify timber sale procedures and that environmental considerations be written into harvest rules and regulations. This is the thrust of the Forest Conservation and Improvement Act's section 207. It requires the Secretary of Agriculture and the Secretary of the Interior to develop uniform rules for the appraisal, sale, and removal of timber. Like the comprehensive management plans, these rules must be formulated through public hearings. Included are scaling methods, competitive pricing, and logging practices. Let me make two observations. One objective of this section is to avoid situations such as have been reported in the Rocky Mountain region in which areas were cut over but not able to regrow. Another objective is to establish rules that will get the slash and debris off the ground as soon as possible and get new seedlings planted. As the Forest Service points out, wood fiber is biodegradable. Slash could be ground up and used, in effect, as organic fertilizer.

The Forest Service has also stated that with improved investment in the land, we can increase annual yields by as much as 50 percent. I view this as essential in light of the declining cuts on the private lands in the west and in light of our demand for wood fiber. "The Outlook For Timber" concludes that—

Intensified forest management offers a major potential for increasing timber supplies in the long run, while maintaining an acceptable forest environment.

When you say "increase the timber sales," it can mean two entirely different things. If the forest is not being replanted, thinned, or otherwise managed to encourage stand growth, then increased sales can deplete the resource in the manner of overdrawing a bank account. But if the money is being invested in growing stock, then the sales can be increased with no danger. This is a critical distinction. It is not a matter of how many trees you do or do not plant when other trees are removed. Rather, it is a matter of how much is grown and how much is removed.

Trees have other values as well. Trees produce oxygen and absorb heat and moisture. Wood fiber as a building material has lower energy requirements and lower pollution impacts. The Forest Service has observed that—

Use of steel for framing exterior walls of houses, for example, involves more than three times as much energy as required for processing timber products, and use of concrete blocks or aluminum requires eight times as much energy.

And trees are renewable resources.

The Forest Conservation and Improvement Act also requires the Secretary of Agriculture to conduct a complete inventory of all non-Federal timber lands and all private lands, and it stipulates that he shall submit a report recommending a plan for the conservation, development, and enhancement of these lands. We put this section into the bill for one major reason. What happens to the public commercial—and noncommercial—forest lands will be affected by the management of the private lands. The industry is foolish if it thinks it can use up its own timber and then demand to cut much more heavily on the public forests. That lawsuit last summer showed that a lot of people take the public lands very seriously, and with good reason. Furthermore, the ongoing wilderness studies will result in additions to the national wilderness preservation system. So I think we have to take a good look at all our timber resources so that we can plan for the future.

The second part of the legislation deals with log exporting. The bill requires that after January 1, 1974, no timber can be exported from the Federal lands, subject to the expiration of existing contracts entered into prior to March 1 of this year. There is widespread agreement in the industry that this must be done. It is not a significant change, since the Morse amendment limits Federal log exports to 350 million board feet annually. The real impact will come from the fact that the export pressure will be reduced on all timber sale bidding.

In regard to non-Federal and private log exporting, my bill is different from that introduced by the distinguished Senator from Oregon, Bob Packwood. His measure would gradually phase out all log exporting unless surplus to domestic needs.

The Forest Conservation and Improvement Act states that log exports after January 1, 1975, cannot exceed 1.5 billion board feet. Exports from these lands last year amounted to about 2.4 billion board feet, and the total export unless checked is projected to hit 5.2 billion board feet by 1980.

The measure spells out a somewhat complicated licensing system. Any exporter would be guaranteed an export volume at least equal to 40 percent of the average of his exports in calendar years 1970, 1971, and 1972. His initial base could be as much as 50 percent of this same average. He could, by acquiring other licenses, export up to 70 percent of this same average. Provision is made for the entry of new exporters.

Contained in the licensing section is a unique requirement. To export \$25 million worth of raw timber, for example, an exporter would also have to export \$25 million in finished wood products. We include here products such as lumber, plywood, pulp, linerboard, paper, veneer, and commodities manufactured from these finished products. For instance, exporters could sell prefabricated houses.

The finished product requirement is intended to stimulate more capital investment in the Pacific Northwest. Because of transportation, labor, and tax

factors, new capital in the forest products industry is being invested mainly in the south and in Canada. This pattern holds for nearly all the major companies. Industry officials have warned repeatedly that mills in the West are becoming old and marginal.

What we are doing with the finished product requirement is to create a market in Japan. Today, for example, it costs Georgia-Pacific a lot more to ship its plywood to Philadelphia from Coos Bay, Oreg., than from Crossett, Ark. Conversely, a Japanese trading company would prefer to buy from Oregon rather than Arkansas.

I think that this bill can stimulate new mill construction. Japan is in a very tight situation on wood fiber. Several things have occurred in recent months which lead me to believe that they would buy our finished products. First, the Japanese Ambassador spoke in Portland recently and indicated that additional lumber purchases were forthcoming. Second, Japan has greatly increased its housing goals while at the same time it has reduced its own timber harvest. Third, Southeast Asian nations now supplying Japan with enormous lots of wood fiber are beginning to view the practice with an eye toward a primary processing requirement. Fourth, both Canada and Alaska restrict log exports, and both supply large quantities of lumber, pulp and paper to Japan.

The benefits of additional mill capacity in the Pacific Northwest are manifest. We would have additional capacity to furnish our own markets as well. We would generate more business for ports and longshoremen. We would be able to provide more jobs and to ease the habitual layoffs that occur when domestic demand declines. And, with a market overseas for finished products, companies with mills to supply that market would have to conserve their timber resources if they are to get their money back from new capital investment. This is especially true in the pulp and paper side of the business, for a new plant today costs anywhere from \$50 to \$150 million, sometimes more. Heavy front-end capitalization is the name of the game. Pulp and paper mills can be good environmental citizens, and their value helps schools and other services.

Mr. Speaker, the Forest Conservation and Improvement Act represents a sensible approach to our overall problems of timber supply and land management. It is a middle-ground position which I hope will draw wide support. To me it is obvious that we cannot satisfy everyone totally, we cannot write a bill that is perfect for each and every interest. But that's the point. We are going to have to stop complaining and start sharing. If we do not, then the great forests of the Nation will suffer. We have heard the expression, "You can't see the forests for the trees." Well, today the forest is the overall good of the people. It belongs to us to use, conserve, and manage wisely.

FLAT TOPS WILDERNESS AREA

(Mr. JOHNSON of Colorado asked and was given permission to extend his

remarks at this point in the RECORD and to include extraneous matter.)

Mr. JOHNSON of Colorado. Mr. Speaker, today I have introduced a bill to establish the Flat Tops Wilderness Area in the Routt and White River National Forests in northwestern Colorado.

This bill was introduced in the other body by Senators DOMINICK and HASKELL, of Colorado, on February 1, 1973, and I had the opportunity, of course, of introducing the measure here in the House at that time. I chose, instead, to delay an introduction of the legislation until I could determine the attitudes and positions of the people of the Fourth Congressional District of Colorado, in which this proposed wilderness area is located. As a new Member of Congress, I was aware only that the original proposal of the Forest Service was for an area of some 142,000 acres and that subsequent reviews had resulted in substantial increases in the proposal. I needed to know the reasoning behind these alternate proposals and whether there were any overriding reasons why I should depart from the proposal offered by Colorado's two Senators—a proposal, I might add, that is also endorsed by Gov. John Love and is thus the official position of the State of Colorado.

My contacts with various groups and individuals have resulted in a pattern of responses that I am sure are similar to those associated with most other wilderness proposals. There is nearly unanimous agreement that a wilderness area of some size should be statutorily established. In addition, there are differences of opinion as to just what the boundaries should be. There are those who feel that certain areas should be excluded on the basis of not meeting the wilderness criteria as enunciated in the 1964 Wilderness Act, or as being potentially more useful to mankind under multiple use management than under the single use that would be imposed by wilderness legislation.

There are others who feel strongly that an even larger area should be given protection under this legislation in order to prevent the intrusion of developmental uses.

Without passing judgement on the positions of the advocates on either side of this proposal, I would simply state that I did not find that overriding reason that I was looking for on which to base a substantially expanded or reduced Flat Tops wilderness bill.

I am, therefore, introducing a bill calling for a wilderness area of 212,716 acres and I do so with the confidence that all interested parties will be given the opportunity to present their strongest case for adding to or subtracting from that figure before the committees which shall have jurisdiction over this legislation and that said committees, having considered all the evidence, will report a bill that is considerate of all views and is in keeping with the provisions of the Wilderness Act of 1964.

A NATIONAL HOLIDAY FOR FEDERAL ELECTION DAYS

(Mr. PODELL asked and was given permission to extend his remarks at this

point in the RECORD and to include extraneous matter.)

Mr. PODELL. Mr. Speaker, there are currently a number of plans before the Senate that would change the day of Federal elections from the first Tuesday in November to either the first Saturday or Sunday. The motivation behind these plans are good—they are presented in the hope that they will increase the number of voters exercising their franchise in Federal elections. However, they are not the best way of accomplishing this laudable goal.

To change the date of the Federal election to a Saturday would effectively disenfranchise millions of Jews, Seventh Day Adventists, and Seventh Day Baptists who observe their Sabbath on Saturday. Two rights as important as voting and religious freedom should not be put in conflict in this manner. A Sunday election day would raise similar problems. In addition, it is questionable whether changing the date of the Federal election to a weekend would have more than a marginal effect on voter turnout.

Many people do not vote at present because they cannot take the time off from work. By making the first Tuesday in November a national holiday on which all businesses and government offices are closed, voters who do not exercise their franchise will have only themselves to blame for not voting.

INCOME TAX EXEMPTIONS FOR BLIND OR ELDERLY DEPENDENTS

(Mr. PODELL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PODELL. Mr. Speaker, I am today introducing legislation designed to ease the income tax burden of those taxpayers who support blind or elderly dependents. At the present time, the law provides exemptions for a blind taxpayer or his blind spouse, and exemptions for a taxpayer or spouse aged 65 or over. These provisions, however, afford no relief to those who support an elderly parent, grandparent, or other relative, or those whose children, parents, or other dependents are blind. In view of the added cost involved in supporting aged or sightless dependents, and to encourage their support by relatives, rather than by the State, my bill would amend the Internal Revenue Code to permit an exemption for each dependent who is blind and an additional exemption for each dependent who has attained the age of 80.

I hope, Mr. Speaker, that the Committee on Ways and Means, which is presently conducting hearings on the subject of tax reform, will give careful consideration to this bill, and that the Congress will provide relief this year for taxpayers who incur these additional expenses because of their generosity and sense of familial duty.

THE SPEECH OR DEBATE CLAUSE OF THE CONSTITUTION

(Mr. PODELL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PODELL. Mr. Speaker, this morning I presented testimony to the Joint Committee on Congressional Operations which is conducting hearings on the Speech or Debate Clause of the Constitution, article I, section 6, on which is premised the doctrine of legislative immunity.

The doctrine provides that—

For any Speech or Debate in either House they (members) shall not be questioned in any other place.

That is a keystone of our democratic government. It is the legislative device through which representatives of the people discover, discuss, disseminate and make known to the Nation the merits and demerits of Government policy and actions.

It is the basic tool for informing the electorate so that they may respond intelligently to the highly complicated affairs of jet-age government. And that principle is under attack, most recently in the courts. The Supreme Court's recent interpretations limited the scope of that traditional and constitutional immunity. As a result Members and their aides may be subject to inquiry and prosecution for gathering and making known information to an interested constituency through traditional channels.

The bullies are at it again. The executive and the judicial would pounce on a Congress that has served them well, and would render it ineffective at a time when its resources are in the greatest demand. At a time when the certain need of the electorate is more information to explain increasingly complex government, there are those who would take away our power to inform.

Mr. Speaker, I would like to review now the remarks I presented this morning to the Joint Committee on Congressional Operations:

LEGISLATIVE PRIVILEGE

Members of Congress are charged by the Constitution with legislating. To fulfill this function we must obtain information, and make that information known. Disseminate it to our colleagues and to the public. To this end, Article I, section 6 provides that Members of Congress shall not be questioned regarding their communications made in either House.

The Constitution provides that the three branches of the government shall be equal, with none subservient to either of the others. This is the basis for the claim of executive privilege. It is the reason why federal judges have life tenure, and why their compensation may not be diminished during their continuance in office. It is also the reason why Members of Congress must be immune to questioning regarding the fulfillment of their legislative function.

Members must also be free to communicate with their constituents. In order to represent our constituencies, we must ascertain the views of the public. Woodrow Wilson said:

"It is the proper duty of a representative body to look diligently into every affair of government and to talk much about what it sees. It is meant to be the eyes and the voice, and to embody the wisdom and will of its constituents. Unless Congress has and uses every means of acquainting itself with the act and the disposition of the administrative agents of the government, the country must be helpless to learn how it is being served; and unless Congress both scrutinize these things and sift them by every form of discussion, the country must remain in embarrassing, crippling ignorance

of the very affairs which it is most important that it should understand and direct. The informing function of Congress should be preferred even to its legislative function. The argument is not only that discussed and interrogated administration is the only pure and efficient administration, but, more than that, that the only really self-governing people is that people which discusses and interrogates its administration. The talk on the part of Congress which we sometimes justly condemn is the profitless squabble of words over frivolous bills or selfish party issues. It would be hard to conceive of there being too much talk about the practical concerns and processes of government. Such talk it is which, when earnestly and purposefully conducted, clears the public mind and shapes and demands of public opinion."

A determination that Members of Congress may be called to account in the courts regarding matters which were the subject of their Constitutional duties is a determination that Congress is inferior to the other two co-equal branches of government. That is a subversion of the Constitution. At a time when the Congress' Constitutional mandate is being challenged by the executive in the form of impoundments, and challenged by the judiciary, in the form of the Proposed Uniform Rules of Evidence, it is essential that Congress not let its Constitutional authority be further weakened, particularly on a matter so explicitly enumerated in the Constitution as the legislative privilege.

If Members are not free to investigate, if we are not free to speak, and if we are not free to act in fulfillment of our Constitutional duties, the Congress of the United States will be unable to function. Legislation would be not only useless, but dangerous, if it were not based on a determination of the needs and wishes of the public.

James Madison wrote: "No man can be a competent legislator who does not add to an upright intention and a sound judgment a certain degree of knowledge of the subjects on which he is to legislate. . . . It is a sound and important principle that the representative ought to be acquainted with the interests and circumstances of his constituents."

If Members can't research the issues and make known their findings, they will serve no purpose. Without a strong, functioning Congress, instead of a democracy we will have government by executive fiat and court decree.

There is an inherent friction between the three branches of our government. It is the function of the President, in his capacity as chief executive, to administer the laws and treaties of the United States. It is also his function to formulate the policies of the government. It is the function of the judiciary to decide cases and controversies, and to interpret the Constitution. It is the responsibility of the Congress to make laws, and, in the case of the Senate, to pass on appointments and treaties.

These different functions necessarily conflict. The courts may decide that a law exceeds the permissible limits of the Constitution. The legislature may feel that the courts were in error, and pass corrective legislation. The Congress may disagree with the President's policy determination, and refuse to consent to an appointment or treaty. The President may feel that Congress was in error in passing certain legislation, and veto it accordingly. These are the natural functions of the different branches of the government. It is the formula established by the Constitution. But what was not intended by the Framers was that one branch of the government might be called to account by one of the other two.

The Constitution explicitly grants immunity to Members of Congress in the performance of their duties. However, executive privilege, which has been claimed with increasing frequency, is nowhere enumerated.

In fact, in the trial of Aaron Burr, Chief Justice Marshall ruled: "That the president of the United States may be subpoenaed, and examined as a witness, and required to produce any paper in his possession is not controverted."

Congress has allowed its Constitutional obligation to investigate and inform to be eroded by recognizing executive privilege. Perhaps such a privilege is advisable, under extraordinary circumstances. But if this is to be recognized, certainly legislative privilege which is Constitutionally mandated, must also be respected.

Members of Congress have taken an oath to "support and defend the Constitution of the United States." Legislative immunity is a part of the Constitution. We cannot support one without the other.

CONTROL RISING FOOD PRICES—NOW

(Mr. PODELL asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. PODELL. Mr. Speaker, the report just released by the Bureau of Labor Statistics indicates that the prices of our food have risen 2.5 percent in February. The combined price increase for the first two months of 1973 was 5.2 percent. In the entire past year, from February 1972 to January 1973, total food price increases amounted to 8.4 percent.

It is becoming impossibly expensive to eat even the cheapest cuts of meat. President Nixon's inflation-control program, which he touted so highly, have been an unmitigated disaster when it comes to controlling food prices. For the entire length of the phase I and phase II programs, no attempt was made to control farm prices for food, and we are now paying for the White House's shortsightedness.

When the President took office, sirloin steak was selling for an average price of \$1.25 a pound. Today a housewife is fortunate if she can buy sirloin for less than \$1.70 a pound. That is a rise of 27 percent in the period encompassing phases I and II. In the same 4 years, hamburger has gone from 58 cents a pound to an average of 84 cents a pound.

Fish, which the President has suggested we eat as a cheap substitute for meat, has soared from 69 cents a pound in 1969 to \$1.20 today, nearly a 100 percent increase. If housewives are protesting at having to pay nearly \$1 a pound for ground beef, how are they expected to acquiesce to paying \$1.20 a pound for fish? What is the housewife, who must feed a family on \$35 weekly, supposed to do?

A rise of 5.2 percent for the first 2 months of this year means that, unless other events intervene, the rate of increase in our food prices will exceed 30 percent for 1973. The President's advisers have told us that it is unwise to extrapolate in this manner. They have also told us to expect a total price of no more than 6.5 percent for the entire year.

The administration is unrealistic on two counts. First, the past gives us no evidence that price rises will be limited to the estimated 6.5 percent. Last year alone increases in food prices were over 8 percent. Second, the administration acts as though a 6.5-percent increase—at the very least—can be absorbed by the con-

sumers with little or no trouble. We know that simply is not true. What about the elderly trying to live on fixed incomes, or the children on welfare who depend on a limited amount of food stamps? Can they really be expected to continue to absorb increases in food costs? I think not, and I think the administration must come to grips with the problem of food prices immediately.

So far the President has taken a few, halting steps in the right direction, but there is no prospect in sight for the kind of unified program needed to deal with a problem of this magnitude. Simply to release surpluses and lower meat import quotas will not be enough. The problem of high food costs extends far beyond stockpiling and tariffs. It is a problem of the structure of the entire food industry in the United States.

What we have seen in the supermarkets in the last few months reflects a total lack of planning on all levels from the Department of Agriculture to the farmer to the middleman to the retailer. Ultimately it is the consumer who pays for the haphazard food growing and distribution system. And it is the consumer who can least afford to pay.

The first step in controlling food price increases is to put an immediate freeze on all food prices, and roll them back to the levels of last November. The current plans to freeze food prices at March 16 levels miss the point entirely. Food prices were already far too high on March 16. People had already stopped buying meat on March 16. Last November, people could still afford to eat some cuts of meat on a regular basis. Prepared foods were still selling at acceptable levels. Eggs were still less than 65 cents a dozen. Prices must be rolled back to that level.

And the rollback should not extend only to supermarkets. The supermarkets in this country, it is alleged, are operating on less than a 1-percent profit margin. They have absorbed as much of the increases in food costs as possible without putting themselves in financial jeopardy. They are on to the consumer only what costs they have been forced to over the past few months. It is not the fault of the supermarkets that most food prices have gone right through the roof.

The rollback should extend from the supermarket to the middleman all the way back to the farmers. Reliable figures indicate that for every dollar spent on food, middlemen get 16 percent and farmers get 82 percent.

The burden of food price increases lies with the farmers of this country and with the Department of Agriculture. Farmers are paid for letting their fields lie fallow. Can you imagine that—to be paid for not growing food while the Nation is in a food crisis?

Consumer boycotts, while they are perhaps the best method of expressing indignation at the callous disregard for the consumer's interests, will not really have the kind of long range effect necessary to effectively control food prices. For that, only complete revamping of the Department of Agriculture's farm subsidy program will do.

The President has already indicated that he will support an end to the current farm subsidy program. However,

this, just as many of the other inflation-control policies he has put forth, is shortsighted. If farmers' subsidies are taken away from them completely, then they could resort to producing less on their own to artificially jack up prices. The current farm subsidy program already does this under the aegis of the law. We see at every grocery store that the current farm subsidy program operates directly against the interests of the consumer. What is needed, then, is not a total abandonment of the farm subsidy program, but a whole new approach in the way that the program is to be used to benefit both farmers and consumers.

Rather than pay farmers for not producing, why not pay them for producing as much as possible? The current price support program sets a parity price, which the Government has arbitrarily established as the level below which prices for certain commodities may not fall. The difference between the market price and the parity price is paid to the farmer as a subsidy. If the farmer cannot sell his produce at the current market price, or does not sell all of it, the Government will purchase it at the subsidy price. In addition, the farmer is also paid for letting his fields lie fallow, and he is given instructions by the Department of Agriculture on how much acreage to allow for certain kinds of crops.

Rather than have this kind of system, why not design a subsidy system that would keep the parity price and the subsidy payments, but that would encourage farmers to use as much of their acreage as possible, and a plan that does not dictate the kinds and amounts of crops to grow?

Once the crops are grown, the Department of Agriculture has a continuing responsibility to the consuming public to see to it that farm products are distributed in this country first. How much was the price of bread, of beef cattle, of milk, raised last year because of the massive grain sales to the Soviet Union, China, and India? I by no means wish to begrudge our largesse to other nations. However, I question the motives of our own Government when this largesse means that the American consumer will have to pay more for his commodities. The Government's first obligation is here at home.

There is no easy answer to the problem of rising food prices. No matter what is done, someone will be unhappy. However, something must be done, and done soon. What you are doing, boycotting meat, shopping carefully and counting every penny. That is good for the moment, but that alone will not change the situation for more than a few weeks or months. What is needed is a radical new approach.

We must start with a complete wage, price and profits freeze for a minimum of 6 months. That would allow time to redesign agricultural programs to insure enough food is produced to feed all the people in this country at prices which they can afford, and at prices which will give farmers, middlemen, and market owners a fair return on investments.

Part of the problem we see today is that nobody really understands how the decisions are made that affect our food

supply and the prices we pay for it. We need the breathing space that a 6-month freeze would provide in order to figure out just what happens between the time the seed is put into the ground and the loaf of bread reaches our dinner table. We do not possess that information now, and must have it in order to adequately provide for the needs of the American people. We need time to see whether the Department of Agriculture is working on behalf of both the farmer and the consumer. We need time to see if middlemen are unnecessarily jacking up their prices and passing on too much of their own costs. We need the time to see whether people who work in the food industries are as productive as they could be, and if they are not, how to make them more so. All of these things would result, if not in lowered costs, at least in costs that do not rise at the near light-speeds which we have witnessed lately.

Anything short of a full price, wage, and profits freeze will simply not be enough. We have already been victims of over 2 years of President Nixon's caution, and it has been far too costly. We must put a halt to this—absolutely and unequivocally—before food and shelter become luxuries for only the wealthy.

EXEMPTION OF PUBLIC SERVICE RETIREMENT INCOME FROM FEDERAL INCOME TAX

(Mrs. MINK asked and was given permission to extend her remarks at this point in the RECORD and to include extraneous matter.)

Mrs. MINK. Mr. Speaker, the burden of the heavy inflation of the past few years bears most heavily on our retired workers whose sole source of income is a small pension or annuity. Yet under our Federal income tax system, we continue to take away a substantial portion of the meager income of retired Government workers.

This inequity should be redressed. Currently, we exempt social security retirement income from tax, and I believe we should do as much for civil service workers at the Federal, State, and municipal levels. I do not see why employees who have devoted their careers to public service should have to pay taxes on their retirement income while those who worked for the private sector do not.

One of my constituents recently pointed out to me that with a State civil service pension of \$4,400 per year he had to pay \$571 in Federal taxes. Obviously the remaining \$3,829 is not sufficient to provide an adequate living, especially in a high cost area such as Hawaii. The ability to retain the full amount of pension income would mean a great deal to a retired Government employee.

The average Federal civil service retirement annuity as of last June was only \$338 a month, for the 758,496 retirees. This is inadequate, and even more so if the Federal tax bite takes away a sizable portion. A similar situation exists with respect to State and local employee pensions.

To correct this situation I have introduced legislation today to exempt from Federal income tax any pension or annuity received under a public retirement system. My legislation provides for

a complete exemption regardless of the amount of the annuity, or whether it is received from a State, Federal, or local civil service or similar pension system.

It seems to me that we should reward the years of public service devoted by our governmental employees, instead of taxing their small pensions. Certainly most have faced hardship as a result of the rapidly escalating cost increases over the past several years. Many can no longer afford adequate diets, housing, or other necessities. Often their income falls below the official poverty level. Because of advanced age they cannot work to supplement these pensions. By ending this unfair taxation, we can enable former governmental employees to live more rewarding lives during their retirement years.

Presently, all they receive is a partial tax credit for their public service retirement income. Equity demands that they receive total exemption from taxation instead. I hope that this legislation receives the prompt attention of my colleagues.

A section-by-section analysis follows:

SECTION-BY-SECTION ANALYSIS

Section 1. Part (a) adds a new Section 124 to the Internal Revenue Code setting forth a general rule that gross income does not include amounts received by an individual as a pension, annuity, or similar retirement benefit under a public retirement system. A public retirement system is presently defined under section 37(f) as a pension, annuity, retirement, or similar fund or system established by the U.S., a State, a Territory, a possession of the United States, any political subdivision of the foregoing, or the District of Columbia.

Part (b) is a conforming amendment to the code adding the new Section 124 to the table of sections.

Section 2. Parts (a) and (b) terminate the existing partial credit for public service retirement income under Section 37 of the code effective January 1, 1973, so that Section 37 will be compatible with the new Section 124 which completely excludes all such income from taxation effective on that date.

Parts (c) and (d) are conforming changes to cross-reference the new Section 124.

DETAILED STUDY SHOWS NIXON SETS NEW ONE-TERM "EXECUTIVE PRIVILEGE" RECORD

(Mr. MOORHEAD of Pennsylvania asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, I am sorry to report that the Nixon administration has set a new one-term record in Government-by-secrecy, using the claim of an executive privilege to hide the facts of Government from the Congress in 19 instances during these first 4 years.

This record is detailed in a study by the Government and General Research Division of the Library of Congress. For the first time since the use of executive privilege supposedly was limited to a claim of Presidential power in 1962, we have a complete record of how executive privilege actually has been used against the Congress. Not only has President Richard M. Nixon wielded this claim of power as a personal weapon at a rate far in excess of his predecessors, but he has

permitted administrative officials far down the line from the President to withhold information from the Congress. The Library of Congress study shows:

President Nixon personally used the claim of executive privilege to hide information from the Congress in four instances during the first 4 years of his administration, not three instances as the President and his congressional apologists have claimed.

Nixon administration officials in agencies directly responsible to the Congress have refused testimony or documents to congressional committees in 15 additional instances since President Nixon promised to limit the claim of power to withhold information from Congress to a personal, Presidential use.

These Nixon administration officials who have wrapped themselves in the cloak of executive privilege 15 times were either appointed with the advice and consent of the Senate to run agencies created by the Congress or they held jobs in agencies created by Congress, serving under officials appointed with the Senate's consent.

Not even included in this sorry record of secrecy are at least eight instances in which White House aides appointed by the President have refused testimony or documents to the Congress. Certainly a problem arises when the President's personal White House aides withhold information from the Congress, but an even more pressing problem is posed by officials throughout the executive branch claiming that they have a privilege to refuse information to the Congress.

The 15 instances of executive branch secrecy reported in the Library of Congress study are not minor cases where an individual Member of Congress has been refused information. They are major cases where a committee of Congress has officially requested testimony or documents and has been turned down.

And they are in addition to the four instances—not three as the President and his supporters claim—in which President Richard M. Nixon has personally hidden information from the Congress. To come up with its phony figure of "three," the White House cleverly lumped two cases together by refusing both of the requests on a single day.

On March 15, 1972, a memorandum from President Nixon directed the State Department to withhold studies of the fiscal year 1973 AID program which had been requested by the House Foreign Operations and Government Information Subcommittee. The same memorandum directed the U.S. Information Agency to withhold all USIA country program memoranda which had been requested by the Senate Foreign Relations Committee. Thus, two clear and separate congressional requests for information were covered by one Presidential memorandum, just as two other clear and separate requests for information had earlier been refused by President Nixon—a total of four Presidential assertions of Executive privilege, not three.

The two earlier instances were on November 21, 1970, when President Nixon directed the Department of Justice to withhold evaluations of potential ap-

pointees which had been requested by the House Intergovernmental Subcommittee and on August 30, 1971, when President Nixon directed the Department of Defense to withhold foreign military assistance plans which had been requested by the Senate Foreign Relations Committee.

But these four Presidential assertions of Executive privilege are merely the tip of the secrecy iceberg in the Nixon administration, when you look at the 15 other refusals of information to congressional committees outlined in the Library of Congress report.

I do not mean to imply that the Nixon administration is the only administration which has wrapped itself in the broad cloak of executive privilege, claimed as a power to withhold information from the Congress. The Eisenhower administration holds the unenviable record—so far with 34 instances of the use of "executive privilege" in two terms. And even the Kennedy and Johnson administrations, in which both Presidents promised to limit the use of the claim to a personal, Presidential power, did not actually limit the claim. The Library of Congress study above shows that President John F. Kennedy personally claimed Executive privilege against the Congress in one instance, but information was refused to the Congress by executive branch officials in the Kennedy administration three additional times after he promised to limit executive privilege to a Presidential power. Although President Lyndon B. Johnson did not personally use the claim of executive privilege against the Congress, in two instances executive branch officials in the Johnson administration refused information to the Congress after he said executive privilege would be used only as a Presidential power.

Presidents in earlier administrations have, of course, claimed a power rooted in the Constitution to withhold information from the Congress, but this has most often been a personal exercise of a Presidential power, not a broad cloak of executive privilege wrapping all of the executive branch in secrecy. And often the historic claims of executive privilege cited by modern administrations as precedents for secrecy have not, in fact, been exercises of the claim.

As the Library of Congress study points out, the first instance of executive privilege in President Washington's first administration did not result in withholding information from Congress. Although President Washington claimed a power to withhold information about General St. Clair's military disaster from the Congress he did not, in fact, use that power but turned over all of the information to the Congress.

There will be additional studies of the conflict between the executive branch and the legislative branch over access to Government information, and they will cover additional areas—for instance, the refusal of White House aides to testify before Congress, or the withholding of documents from the General Accounting Office serving as the auditing arm of Congress—but the current study by the Library of Congress highlights the seriousness of the problem, pointing out the

extent to which Nixon administration officials throughout the executive branch claim an immunity from congressional scrutiny. Following is the complete study:

THE PRESENT LIMITS OF "EXECUTIVE PRIVILEGE"

(A study prepared under the guidance of the House Foreign Operations and Government Information Subcommittee)

May 17, 1954, was an important day on Capitol Hill. On that day, two separate political battles shifted emphasis, and the new emphasis of each controversy still is causing political problems.

In the Supreme Court Building Chief Justice Earl Warren issued the court's unanimous decision in *Brown v. Board of Education* holding that separate education is not equal education. In the Senate Office Building John Adams, the Army's general counsel, delivered a copy of a letter from President Dwight D. Eisenhower to Secretary of Defense Charles Wilson directing the Secretary to tell all his subordinates not to testify about advisory communications during the hearings of a special subcommittee of the Senate Government Operations Committee.¹

Both important developments of May 17, 1954, had roots deep in the history of the United States. In the future both would effect the political development of the nation. The results of the Supreme Court's school desegregation decision are widely discussed in popular literature and scholarly studies and have become a part of current history. But there is comparatively little current knowledge about the developments that flowed from President Eisenhower's May 17, 1954, letter. Possibly, that letter and the political conflict of which it is part are more important to the study of the American form of democratic government with three branches than is the widely studied school desegregation issue.

President Eisenhower's May 17, 1954, letter brought a new dimension to the interactions between the Legislative and Executive Branches of the Federal government which are part of our separate-but-coordinate system. His letter, and its accompanying memorandum purporting to list historic examples of Presidential assertion of the right of "executive privilege," became the basis for an extension of the claim of "executive privilege" far down the administrative line from the President.² Eight years later there was an attempt to bring "executive privilege" back into proper perspective, but the effort has not been a complete success even though it involved three Presidents.

There are many privileges exercised by the executive head of the United States Government, ranging from the free use of the mountain retreat at Camp David (or Shang-ri-la as President Franklin D. Roosevelt christened it) to a funeral with full military honors. But the "executive privilege" has come to mean a claim of authority to control government information.³ This "executive privilege" to control the dissemination of information has been asserted against the public⁴ and against the courts,⁵ but the claim of an "executive privilege" which was the basis of the President's May 17, 1954, letter is the claim of authority to withhold information from the Legislative Branch of the Federal government. And the authority claimed in President Eisenhower's May 17, 1954, letter was extended throughout the Executive Branch to include agencies administered by persons appointed by the President with the advice and consent of the U.S. Senate. This claim of control over government information is in addition to the power exercised by Presidents to protect their immediate White House staff—their personal advisers, in effect, over whose appointment the Congress has no confirming power.

Footnotes at end of article.

The Separation of Powers and the Control of Information.

The conflict between the Legislative and Executive Branches of the Federal government over access to information begins with the first clause of the first section of the first article of the Constitution of the United States. Article I, Section I states that "all legislative Powers herein granted shall be vested in a Congress of the United States. . . ." The power to legislate carries with it the power to investigate⁶ and the clash between the executive and the legislature over access to information almost always has occurred in connection with a Congressional investigation.

In fact, the earliest attempt by the Congress to investigate brought on a conflict over the authority of the executive to withhold information. The House of Representatives in 1792 appointed a committee to investigate General St. Clair's military disaster in the Northwest and empowered the committee to "call for such persons, papers, and records, as may be necessary to assist their inquiries."⁷ This demand for information by the first Congress and the reaction to it by the first President was brought up 162 years later in connection with President Eisenhower's letter of May 17, 1954. A memorandum from the Attorney General which accompanied the letter listed the call for information in the St. Clair caper as the first example of Presidential assertion of "executive privilege."⁸ The memorandum states that President Washington called a Cabinet meeting and the group decided that "neither the committee nor House had a right to call upon the head of a Department who and whose papers were under the President alone."⁹

Not only did this first Congressional investigation result in a confrontation over legislative access to Executive Branch information but it also provided a vehicle for the first major factual error in the memorandum accompanying the May 17, 1954, letter, discussing what has come to be called "executive privilege." Far from being an example of Presidential assertion of "executive privilege", the St. Clair episode was an example of Congress effectively asserting its right of access to information. A Cabinet meeting was held and the question of Presidential power over records was discussed, as reported in the memorandum, but the full text of Thomas Jefferson's notes of that meeting shows that it was decided "there was not a paper which might not be properly produced."¹⁰ In fact, an historian-newsman who analyzed the precedents listed in the memorandum for withholding information from the Congress concluded that, in most of the examples, "the Congress prevailed, and got precisely what it sought to get."¹¹

The assertion of an "executive privilege" to withhold information from the legislature is rooted in the opening words of Article II of the Constitution: "The executive power shall be vested in a President of the United States of America" and in the last clause in Section 3 of Article II: "He shall take care that the laws be faithfully executed."¹²

This Constitutional grant of power is both vague and complicated, the language raising more questions of how the power shall be exercised than it answers.¹³ In the past 18 years, however, there have been some major changes in Congressional-Executive relationships which clarify the practice—if not the principle—of "executive privilege".

THE RECENT GROWTH OF "EXECUTIVE PRIVILEGE"

After May 17, 1954, the Executive Branch answer to nearly every question about the authority to withhold information from the Congress was "yes," they had the authority. And the authority most often cited was the May 17, 1954, letter from President Eisenhower to Secretary of Defense Wilson.¹⁴ Not only was the letter cited, but usually the

claim of authority included the accompanying memorandum from Attorney General Herbert Brownell, supposedly prepared in the Department of Justice.

The letter and the memorandum were involved in a controversy between Senator Joseph McCarthy (R., Wis.) and the United States Army over the propriety of the Senator's pressure tactics as chairman of the Permanent Subcommittee on Investigations of the Senate Committee on Government Operations. During two days of testimony at special hearings called to give McCarthy and the Army a forum for their fight, Army Counsel John Adams mentioned a meeting in the Attorney General's office attended by top White House staff members.¹⁵

When Subcommittee members tried to get more information from Adams about what went on at the high-level meeting, Joseph N. Welch of Boston, the Army's special counsel for the Army-McCarthy hearings, said Adams had been instructed not to testify any further about the meeting.¹⁶ That was on Friday, May 14, 1954. When Subcommittee members insisted that Adams testify, Welch asked for and was granted a recess until the following Monday.

On Monday, Adams gave the Subcommittee the letter of instructions from the President to the Secretary of Defense, accompanied by a memorandum supposedly prepared officially in the Department of Justice over the weekend. In fact, the memorandum consisted only of excerpts and paraphrases from a 1949 article printed in the *Federal Bar Journal* and written by Herman Wolkinson, a Justice Department research lawyer.¹⁷ Two years later the Justice Department presented to another Congressional subcommittee what appeared to be an expanded memorandum supporting their position on "executive privilege,"¹⁸ but it was merely the text of the Wolkinson article.¹⁹

There was a favorable public response to President Eisenhower's firm stand against disclosing conversations in his official family. Newspapers which were later to inveigh against the excesses of "executive privilege" praised the President's letter of May 17, 1954. The *New York Times*, for instance, editorialized against Senator McCarthy's use of legislative powers to encroach upon the Executive Branch "in complete disregard of the historic and Constitutional division of powers that is basic to the American system of Government."²⁰ And the *Washington Post* called the memorandum which was made public in connection with the President's letter "an extremely useful document," concluding that the President's authority under the Constitution to withhold information from Congress "is altogether beyond question."²¹

But the May 17, 1954, letter from the President, with its accompanying memorandum, soon became the major vehicle for spreading a claim of Presidential authority throughout the Executive Branch. The letter referred only to a specific series of conversations between Presidential appointees, restricting access to information about those conversations only to one specific Subcommittee of the Congress. Four months later, however, the May 17, 1954, letter was extended to cover more than the President's personal appointees and more than the specific Subcommittee's hearings.

In August, 1954, the U.S. Senate established a select committee to determine whether Senator McCarthy was guilty of conduct "unbecoming a member of the United States Senate" and asked two Army generals to testify about their conversations in connection with McCarthy's activities. Major General Kirke B. Lawton refused to testify on the advice of counsel that the May 17, 1954, "directive" applies to "this or any other" committee.²² Senator Arthur V. Watkins (R., Utah), the chairman of the select committee, asked Secretary of Defense Charles Wilson for clarification and received a letter stating:

"As a matter of legal application, the Attorney General advises me that the principles of the Presidential order of May 17, 1954 are as completely applicable to any committee as they were to the Committee on Government Operations."²³

Telford Taylor, in his study of Congressional investigatory powers at the time of the Army-McCarthy controversy, commented:

"If President Eisenhower's [May 17, 1954] directive were applied generally in line with its literal and sweeping language, congressional committees would frequently be shut off from access to documents to which they are clearly entitled. . . . It is unlikely, therefore, that this ruling will endure beyond the particular controversy that precipitated it."²⁴

He proved a poor prophet, in this case. President Eisenhower's May 17, 1954, letter became the major authority cited for the exercise of "executive privilege" to refuse information to the Congress for the next seven years of his administration²⁵ and it established a pattern which the three Presidents after Eisenhower have followed.

"EXECUTIVE PRIVILEGE" LIMITED

President John F. Kennedy bent, although he did not break, the pattern of "executive privilege" claims by officials far down the administrative line from the President. He had been in office for one year when a special Senate subcommittee held hearings on the Defense Department's system for editing speeches of military leaders. When the Subcommittee asked the identity of the military editors who had handled specific speeches, President Kennedy wrote a letter to Secretary of Defense Robert S. McNamara directing him and all personnel under his jurisdiction "not to give any testimony or produce any documents which would disclose such information."²⁶ The similarity of President Kennedy's letter of February 8, 1962, and President Eisenhower's letter of May 17, 1954, stopped there, for Kennedy added:

"The principle which is at stake here cannot be automatically applied to every request for information. Each case must be judged on its own merits."²⁷

There was no legal memorandum attached to President Kennedy's letter, although one was available. A 169-page study of "executive privilege" cases through 1960 had been prepared by two lawyers in the Department of Justice and printed in two issues of the *George Washington Law Review*.²⁸ The study, reminiscent of Herman Wolkinson's article in the *Federal Bar Journal* which was used as the back-up memorandum for President Eisenhower's May 17, 1954, letter, discussed executive responses to legislative inquiries from 1953 through 1960 and described some of the cases in which "executive privilege" was claimed. The new study called the exercise of "executive privilege" awkward and embarrassing—but not improper—and concluded:

"This power, like most other Presidential powers, therefore, must be delegated to other officials. The question is how far down the administrative line can this delegation proceed."²⁹

President Kennedy's answer was: it cannot. His position was clarified in an exchange of correspondence with Congressman John E. Moss (D., Calif.) who, as chairman of the Foreign Operations and Government Information Subcommittee and its predecessor special subcommittee, had been leading the fight against government secrecy for nearly six years. Moss wrote that President Kennedy's letter of February 8, 1962, "clearly stated that the principle involved could not be applied automatically to restrict information", but he urged clarification "to prevent the rash of restrictions on government information which followed the May 17, 1954, letter from President Eisenhower."³⁰ President Kennedy, whose staff had gone over

Footnotes at end of article.

a draft of the Moss letter before it was sent formally, replied on March 7, 1962:

"Executive privilege can be invoked only by the President and will not be used without specific Presidential approval."³¹

Soon after Lyndon B. Johnson was elected President, Congressman Moss asked him to limit the use of "executive privilege" as had President Kennedy. In a letter of March 31, 1965, Moss discussed the spread of the use of "executive privilege" following President Eisenhower's letter and contended that, as a result of President Kennedy's limitation of the use of the authority, "there was no longer a rash of 'executive privilege' claims to withhold information from the Congress and the public." Moss expressed to President Johnson the hope that "you will reaffirm the principle that 'executive privilege' can be invoked by you alone and will not be used without your specific approval."³² President Johnson, in a letter of April 2, 1965, to Congressman Moss, reaffirmed the principle, stating flatly that "the claim of 'executive privilege' will continue to be made only by the President."³³

Congressman Moss repeated the procedure soon after President Richard M. Nixon took office, asking him to "favorably consider a reaffirmation of the policy which provides, in essence, that the claim of 'executive privilege' will be invoked only by the President."³⁴ Two months after receiving the letter from Congressman Moss, President Nixon issued a memorandum to the heads of all executive departments and agencies stating that "executive privilege will not be used without specific Presidential approval." He buttressed his memorandum with a letter to Congressman Moss stating:

"I believe, as I have stated earlier, that the scope of executive privilege must be very narrowly construed. Under this Administration, executive privilege will not be asserted without specific Presidential approval."³⁵

President Nixon's memorandum of March 24, 1969, spelled out procedural steps to govern the invocation of "executive privilege". First, he stated, anyone who wanted to invoke "executive privilege" in answer to a request for information from a "Congressional agency" had to consult the Attorney General. If the Attorney General and the department head agreed that "executive privilege" should not be invoked, the information requested should be released to the Congress. If, however, either or both of them wanted the issue submitted to the President, "the matter shall be transmitted to the Counsel to the President, who will advise the department head of the President's decision." If the President decided to invoke "executive privilege", the memorandum concluded, "the department head should advise the Congressional agency that the claim of Executive privilege is being made with the specific approval of the President."³⁶

This was the first time that a step-by-step procedure was set up for invoking "executive privilege" against Congressional inquiries. It was not, of course, the first time that a President had promised to make the final decisions on the use of "executive privilege", but neither was President Kennedy's decision that only he should refuse information to the Congress, a Presidential first. On April 14, 1909, President William H. Taft issued Executive Order 1062 stating:

"In all cases where, by resolution of the Senate or House of Representatives, a head of a Department is called upon to furnish information, he is hereby directed to comply with such resolution, except when, in his judgment, it would be incompatible with the public interest, in which case he should refer the matter to the President for his direction."

No information is available on the results of President Taft's Executive Order 1062, but

there is information from public sources on the results of the Kennedy-Johnson-Nixon limitation of the use of "executive privilege."

THE LIMITS OF LIMITATION

Has the Executive Branch claim of power to refuse information to Congress been severely limited since President Kennedy exercised "executive privilege" but said it would be used only by the President, judging each case on its merits? To answer the question, public sources were researched from 1962 through 1972 to determine the instances in which the Executive Branch refused documents or testimony to Congressional committees. The instances of invocation of "executive privilege" covered might or might not involve the issuance of a subpoena or a formal resolution requesting information. What has been focused upon is a publicly-recorded request for information by a Congressional committee and a publicly-reported refusal by an Executive Branch official to grant that request. That which was sought might be a document, a witness, or both. The refusal may or may not have been accompanied by a reason for the denial. The invocation of "executive privilege" has been interpreted for the purposes of this study to refer to a refusal of information to a Congressional committee or subcommittee by an Executive Branch agency or official. It does not include instances in which Presidential aides, serving in the White House Office, have refused to appear before Congressional committees.

Sources used in this study were the *New York Times*, the *Washington Post*, the *Washington Evening Star*, the *Congressional Record*, the *Congressional Quarterly* reports and almanacs, and printed hearings of Congressional committees. Following is the result:

Kennedy administration

Exercise of "executive privilege" by the President:

1. State and Defense Department witnesses directed not to give testimony or produce documents at hearings of the Senate Special Preparedness Subcommittee on Military Cold War Education which would identify individuals who reviewed specific speeches. (Committee on Armed Services, United States Senate, *Military Cold War Education and Speech Review Policies*, 87th Congress, Second Session, pp. 338, 369-370, 508-509, 725, 730-731 and 826).

Refusal by Executive Departments and Agencies To Provide Documents or Testimony

1. The Food and Drug Administration refuses to comply with a request from the House Interstate and Foreign Commerce Committee for files on MER-29 drug (*New York Times*, 6/21/62).

2. The State Department refuses to provide a copy of a working paper on the "mellowing" of the Soviet Union to the Senate Foreign Relations Committee (*New York Times*, 6/27/62).

3. General Maxwell D. Taylor appears before the House Subcommittee on Defense Appropriations and refuses to discuss the Bay of Pigs invasion as "it would result in another highly controversial, divisive public discussion among branches of our Government which would be damaging to all parties concerned." (*Congressional Record* 4/4/63, p. 5817).

Johnson administration

Refusals by Executive Departments and Agencies to provide documents or testimony

1. The Department of Defense refuses (April 4, 1968) to supply a copy of the Command Control Study of the Gulf of Tonkin Incident to the Senate Foreign Relations Committee (Committee on the Judiciary, United States Senate, *Executive Privilege: The Withholding of Information by the Ex-*

ecutive, 92nd Congress, First Session, p. 39). This source hereafter cited as Senate Judiciary Committee hearings, *Executive Privilege*.

2. Treasury Under Secretary Joseph W. Barr refuses to testify before Senate Judiciary Committee on the nomination of Abe Fortas to be Chief Justice (*CONGRESSIONAL RECORD*, vol. 114, pt. 21, p. 27518, and *Washington Post*, 9/17/68).

Nixon administration

Exercise of "executive privilege" by the President:

1. The Attorney General refuses (November 21, 1970) to give Congressman L. H. Fountain, chairman of the Intergovernmental Relations Subcommittee of the House Government Operations Committee, reports furnished by the Federal Bureau of Investigation to evaluate scientists nominated to serve on advisory boards of the Department of Health, Education and Welfare (Committee on Government Operations, U.S. House of Representatives, *U.S. Government Information Policies and Practices—The Pentagon Papers*, Part 2, 92nd Congress, First Session, pp. 362-363).

2. The Department of Defense refuses (August 30, 1971) to supply foreign military assistance plans to the Senate Foreign Relations Committee (Senate Judiciary Committee hearings, *Executive Privilege*, pp. 45-46).

3. The State Department refuses (March 15, 1972) to give the House Foreign Operations and Government Information Subcommittee the Agency for International Development country field submissions for Cambodian foreign assistance for the fiscal year 1973 (*New York Times*, 3/17/72; *CONGRESSIONAL RECORD*, vol. 118, pt. 7, pp. 8694-8695).

4. The United States Information Agency refuses (March 15, 1972) to give the Senate Foreign Relations Committee all USIA Country Program Memoranda (*CONGRESSIONAL RECORD*, vol. 118, pt. 7, pp. 8694-8695).

Refusals by Executive Departments and Agencies To Provide Documents or Testimony

1. The Department of Defense refuses (June 26, 1969) to supply the five-year plan for military assistance programs to the Senate Foreign Relations Committee (Senate Judiciary Committee hearings, *Executive Privilege*, p. 40).

2. The Defense Department refuses to provide a copy of "Commitment Plan 1964" between U. S. and Thailand to the Senate Foreign Relations Committee (*New York Times*, 8/9/69).

3. The Department of Defense refuses (December 20, 1969) to supply the "Pentagon Papers" to the Senate Foreign Relations Committee (Senate Judiciary Committee hearings, *Executive Privilege*, pp. 37-38).

4. Secretary of Defense Melvin Laird declines invitation to appear before Senate (Foreign Relations) Disarmament Subcommittee (*New York Times*, 3/19/70).

5. Department of Defense General Counsel J. Fred Buzhardt refuses in hearings (March 2, 1971) to release an Army investigation report on the 113th Intelligence Group requested by Senate Constitutional Rights Subcommittee (Senate Judiciary Committee hearings, *Executive Privilege*, pp. 402-405).

6. The Department of Defense refuses (April 10, 1971) to supply continuous monthly reports on military operations in Southeast Asia to the Senate Foreign Relations Committee (Senate Judiciary Committee hearings, *Executive Privilege*, p. 47).

7. The Department of Defense refuses (April 19, 1971) to allow three designated generals to appear before the Senate Constitutional Rights Subcommittee (Senate Judiciary Committee hearings, *Executive Privilege*, p. 402).

8. The Department of Defense refuses (June 9, 1971) to release computerized surveillance records and refuses to agree to a

Senate Constitutional Rights Subcommittee report on such records (Senate Judiciary Committee hearings, *Executive Privilege*, pp. 398-399).

9. The State Department refuses (March 20, 1972) to supply Senate Foreign Relations Committee with a copy of "Negotiations, 1964-1968: The Half-Hearted Search for Peace in Vietnam" (*Washington Post*, 3/20/72).

10. Treasury Secretary John Connally refuses to testify before Joint Economic Committee on matter of the Emergency Loan Guarantee Board refusing to supply requested records on the Lockheed loan to the Government Accounting Office (*Washington Evening Star*, 4/27/72).

11. Benjamin Forman, Department of Defense Assistant General Counsel, appears before the Senate Foreign Relations Committee but refuses to discuss weather modification efforts in Southeast Asia (*Washington Post*, 7/27/72).

12. Henry Ramirez, chairman of Cabinet Committee on Opportunities for the Spanish Speaking, refuses to testify before House Judiciary Subcommittee on Civil Rights (*Congressional Quarterly*, 8/12/72, p. 2017).

13. SEC Chairman William J. Casey refuses to turn over Commission investigative files on ITT to the House Interstate and Foreign Commerce investigative subcommittee (*Washington Evening Star/Daily News*, 11/1/72).

14. HUD Secretary George Romney declines invitation to appear before the Joint Economic Committee to testify on Federal housing subsidies (*Washington Post*, 12/6/72).

15. Department of Defense refuses to turn over documents requested by the House Armed Services Committee on unauthorized bombing raids of interest to the committee as part of hearings on the firing of Gen. John D. Lavelle (*Washington Post*, 12/19/72).

CONCLUSIONS

President Kennedy exercised the Presidential claim of "executive privilege" one time when he directed witnesses not to identify speech reviewers in testimony before the Senate subcommittee investigating military cold war education policies. Six separate refusals to provide information to the subcommittee were involved in the President's single action.

After the Kennedy directive, however, Executive Branch officials in his administration refused to provide information to Congressional committees three times, apparently without Presidential authority.

In the Johnson Administration "executive privilege" was not claimed by President Johnson, but there were two refusals by appointees in his administration to provide information to Congressional committees after President Johnson's letter of April 2, 1965, stating that "the claim of 'executive privilege' will continue to be made only by the President."

President Nixon personally and formally invoked the claim of "executive privilege" against Congressional committees four times after his memorandum of March 24, 1969, stating that "executive privilege" will not be used without specific Presidential approval. After the memorandum was issued there were, however, 15 other instances in the Nixon Administration in which documents or testimony were refused to Congressional committees without Presidential approval.

This public record of the controversies over Congressional access to Executive information after three Presidents limited the use of "executive privilege", raises a number of questions. Were the Executive Branch officials who apparently refused information to Congressional committees 20 times in violation of the orders of three Presidents, actually acting under orders? Is it possible that three Presidents ordered information withheld 20 times from Congressional committees and left no evidence of their orders? Contrariwise, is it possible that, in 20

instances, Executive Branch officials were ignoring the clear orders of three Presidents? Or possibly, is there some of both: Executive Branch officials refusing information to Congressional committees with the tacit understanding—at least by the White House staff if not the President, himself—of what was going on?

There are many other problems which can be raised in addition to these three alternatives, such as the question of what formal action the Congress or one of its constituent units must take to assert the Legislative Branch's right of access to information by the Constitution, and the question of whether the Legislative vs. Executive conflict over access to government information may be regarded as a partisan political fight having little to do with the evolution of a system of government based on three coordinate branches.

The fact that there is much more conflict over Congressional access to Executive Branch information when the two branches are controlled by different political parties gives substance to the view that "executive privilege" is a partisan problem. There were, for example, 19 cases of refusal of information to Congressional committees under the first four years of the Republican Nixon Administration working with a Democratic Congress, but there were only six refusals of information in seven years of the Kennedy and Johnson Administrations when both branches were controlled by the same political party. An additional indication of the partisan nature of the conflict is that there were some 34 instances of information refused in response to Congressional requests during the last five years of the Eisenhower Administration, after he issued his letter of May 17, 1954.²⁷ In that period, the Executive and Legislative Branches were under control of different political parties.

Partisan the problem is, but not purely partisan. It can come up when both branches are under control of the same political party—witness the six cases in the Kennedy and Johnson Administrations—and the partisan makeup of the two branches may merely sharpen the conflict and not make it less of a problem to be solved as the governmental system evolves.

President Nixon, in fact, did more to regularize the flow of information to Congress on controversial subjects than did his predecessors. He issued the first orders setting up a step-by-step procedure to be followed in his administration before "executive privilege" could be invoked. And his memorandum of March 24, 1969, moved toward an answer to the question of what type of formal action the Congress must take to demand information before "executive privilege" would be asserted.

His memorandum referred throughout to a "Congressional agency" as requesting Executive Branch information. By this language, apparently he was recognizing that a Congressional committee or subcommittee—or, possibly, the chairman of either—could make a formal request for information that might result in the claim of "executive privilege". He did not require a resolution of the House or Senate, as did President Taft, nor did he leave the problem completely in limbo, as did Presidents Kennedy and Johnson.

There is some additional information to indicate which of three alternatives—violation of a Presidential order, secret Presidential approval or both—explain the fact that the limitation on the use of "executive privilege" apparently has been ignored. It is possible that the five cases in the Kennedy and Johnson Administrations in which information was refused, apparently without Presidential approval, in fact had Presidential approval but this fact has been kept from public knowledge.

This is not the case in the Nixon Administration. President Nixon's memorandum

requires a potential "executive privilege" case to go through the Office of Legal Counsel in the Department of Justice. The "executive privilege" expert in that office is Herman Marcuse, one of the authors of the *George Washington Law Review* study of "executive privileges" from 1953 to 1960 (see footnote 28). Marcuse has stated that only the cases of "executive privilege" listed above were handled in the office and approved by President Nixon since his memorandum.²⁸

There is a possibility that, in all three administrations, the cases of refusal of information to Congress, apparently in violation of Presidential orders, did not result from formal confrontations between the two branches of government. Assistant Attorney General William H. Rehnquist, who was in charge of the Office of Legal Counsel, testified after two years' experience under President Nixon's "executive privilege" memorandum that "agencies which seek to withhold information are complying with the procedures set forth in the memorandum."²⁹ By the time of his testimony, there already had been one formal Presidential use of the claim of "executive privilege" and eight other cases in which, public records show, testimony or documents had been refused to Congressional committees.

Rehnquist downgraded refusals of information to Congress which had not had the stamp of Presidential approval, arguing that no real confrontation over access to information occurs in many cases because they are mere discussions at the staff level between Executive agencies and Congressional committees. And in other cases, he testified, a witness would mention the possibility that a request for particular information might raise the spectre of "executive privilege." Rehnquist added:

"But such a statement, of course, is by no means tantamount to the President's authorizing the claim of privilege. It is simply a statement by a department head or his representative that he is prepared to recommend a claim of privilege to the President should the demand for information not be settled in a mutually satisfactory manner to both the agency and the chairman of the committee or subcommittee involved."³⁰

None of the 15 Nixon Administration cases of refusal of information to a Congressional committee without the formal, Presidential citation of "executive privilege" seems to fit the Rehnquist criteria. While the committees or subcommittees involved may not have taken a formal vote to demand the testimony or documents in each case the request for information did come up in hearings or as part of a formal request from the chairman.

If the 15 Nixon Administration cases involved formal, direct requests for information and if there are no secret Presidential orders directing the invocation of "executive privilege", it seems that Executive Branch officials violated the Presidential directive 15 times. When interpreting orders in government administration, however, one bureaucrat's violation may be another bureaucrat's compliance. Those who want to withhold information from the Congress will do everything possible to make it difficult for Congress to get what it needs. That is apparent from the 34 instances occurring in five years when the Executive Branch wrapped itself in President Eisenhower's letter of May 17, 1954, as a cloak of "executive privilege". That cloak no longer exists, but the bureaucracy that used it is little changed. And the top-level policy makers apparently are happy to use the bureaucracy's tactics of delay and obfuscation to prevent Congress from getting at information which might embarrass their agency or their administration.

While the Kennedy-Johnson-Nixon statements limiting the invocation of "executive privilege" may state clearly to Congressional readers that information will not be refused

without specific Presidential approval, they may also state to Executive Branch readers that they should be careful when claiming "executive privilege" but they can use other techniques to block Congressional access to information.

Thus, the use of the claim of "executive privilege" has been severely limited but the limitation has not opened new file drawers to Congress. In fact, the Presidential statements have been limitations in name only.

⁵ *Marbury v. Madison* (1 Cranch 137) and the conspiracy trial of Aaron Burr are the classic historical cases. *Kilbourn v. Thompson* (103 U.S. 168), *McGrain v. Daugherty* (273 U.S. 135), *ex rel. Touhy v. Ragan* (340 U.S. 462) and *U.S. v. Reynolds* (345 U.S. 1) are modern cases which have considered court access to Executive Branch information. When President John F. Kennedy limited the use of "executive privilege" to the President alone (see below), he was asked by the Attorney General whether the limitation applied only to congressional requests for information. Theodore C. Sorenson, Special Counsel to the President, replied in a letter of March 30, 1962, to the Attorney General that the policy "relates solely to inquiries directed by the Congress or its committees to the Executive Branch" and does not have any application to "demands, made in the course of a judicial or other adjudicatory proceeding, for the production of papers or other information in the possession of the Government."

¹² Senator Sam Ervin (D.-N.C.), the United States Senate's acknowledged constitutional expert, explains:

"Although the Constitution is silent with regard to the existence of executive privilege, its exercise is asserted to be an inherent power of the President. Its constitutional basis allegedly derives from the duty imposed upon the President under article II section 3 to see that the laws are faithfully executed. The President claims the power on the grounds that it is necessary in order to provide the executive branch with the autonomy needed to discharge its duties properly. Inasmuch as the 'President alone and unaided could not execute the laws * * * but requires 'the assistance of subordinates' (*Myers v. U.S.*, 272 U.S. 117 (1926)), the alleged authority to exercise executive privilege has thereby been extended in practice to the entire executive branch."

WHAT TO DO TOGETHER

(Mr. SYMINGTON asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SYMINGTON. Mr. Speaker, as SALT II proceeds and the peace dividend for our tortured economy is absorbed by the requirements of World War III, we should be moved to new reflections. For a number of years it has seemed to me that peace would be better served if the super-

powers agreed not merely what not to do, separately, but what to do, together. In 1962, as Deputy Director of Food For Peace, I prepared for the Director GEORGE MCGOVERN, a memorandum for President Kennedy on the eve of his historic meeting in Vienna with Premier Khrushchev. At that time Laos appeared to be the bone of great power contention, Vietnam being buried a little deeper. The memorandum, detailing the joint efforts of the American Relief Commission and Soviet authorities to alleviate hunger in Russia in the early twenties, suggested a similar coordinated program of developmental assistance to the Laotian people. Recalling the success of negotiations leading to the end of the four-power occupation of Austria, we suggested that the Vienna talks would provide an ideal opportunity to consider a two, three, or four power economic development effort in Indochina. It was an initiative that might have been called at another time an investment in peace. But the tense confrontation with Khrushchev was unrelieved by speculation of this kind. And the Laotian accords of 1962 contained no such provision. Instead, they embodied pledges of mutual noninvolvement in Laotian affairs which were mutually breached in short order. Our view was dismissed as perhaps impractical, if not wholly naive. As the "practical" approach has cost 55,000 American lives, many times that figure in wounded, \$150 billion, a dislocated economy, inflation, neglect of domestic priorities, a balance of payments deficit, dollar devaluation, citizen distrust, and the sorrow and contempt of a good many friends abroad, it is sobering to consider what impracticality might have brought upon us.

In any event, finding myself a decade later as chairman of the recently established House Subcommittee on International Cooperation in Science and Space, I decided to nail down as firmly and quickly as possible bureaucratic, congressional, and public support for the truly nonnuclear agreements concluded last May. Accordingly, with Congressman LOUIS FREY of Florida, the ranking Republican member of the subcommittee, and with the approval of Chairman George Miller of the parent Committee on Science and Astronautics, I scheduled a series of hearings on these accords, 2 weeks following the President's return from Moscow. The hearings are concluded and the report printed.

What do the agreements say? Briefly, in addition to broadened exchanges of scientists, they provide for joint studies and projects in basic and applied sciences, cancer and heart research, public health methods, air and water pollution control, including preservation of the marine environment, earthquake prediction, arctic and subarctic ecological systems, space biology and medicine, exploration of near earth space, and a space docking mission between Soviet and U.S. manned spacecraft in 1975. To spur implementation of the agreements, joint commissions are established for each area of endeavor excluding space where such a working committee already exists. These commissions will meet annually and alternately in Moscow and Washington for review and planning purposes.

What did the hearings reveal? We learned without surprise that scientific and technological cooperation between the United States and the Soviet Union was virtually nonexistent following World War II; that as Dr. James Flisk, president of Bell Telephone Laboratories, Inc., put it, "Despite the formal exchanges between the countries, contacts in science and technology have been largely scientific and technical tourism with little follow up"; that the Soviet Union withdrew from the World Health Organization in 1950, and returned in 1957. Why? In January 1956 a severe outbreak of poliomyelitis in the U.S.S.R. prompted the Soviet Government to request permission to send specialists to the United States to study American progress in the control of that disease. As a result of that visit over 12 million children in the Soviet Union received the Salk vaccine between 1957 and 1960. Then, between 1958 and 1963 more than 91 million persons were inoculated with the Sabin live vaccine, thereby successfully eliminating polio as a major disease threat in the Soviet Union. Apparently, the program of assistance was well concealed from the public of both nations. We expressed the hope that future cooperative efforts of this kind would receive the attention they merit. We learned from the President's Science Adviser, Director Edward David, that our common interests now "went beyond basic sciences, and that a problem-solving approach might be possible." This viewpoint was echoed by Mr. D. M. Gvishiani, Deputy Chief of the State Council for Science and Technology of the Soviet Union. In a June article in *Izvestia*, Mr. Gvishiani wrote that:

While cooperation . . . so far . . . in atomic energy, space research, public health, and so forth, has made a positive contribution to the . . . relations between the U.S.S.R. and the U.S. . . . one cannot fail to note that the volume and nature of scientific and technical links between our countries far from match the real possibilities and requirements.

I remember with pleasure the opportunity I had to escort Mr. Gvishiani's wife and her father Premier Kosygin following his talks with President Johnson at Glassboro in 1967. Her interest and concern for child care, health, and nutrition, deserved a wider audience than the State Department staff aboard Air Force One.

We learned from Dr. George M. Low, Deputy Administrator of NASA, that the Soyuz spacecraft's standard atmosphere of oxygen and nitrogen at about 14.7 pounds per square inch, is a preferable environment to the Apollo atmosphere of one-third pure oxygen—the cause of the fatal Apollo fire—which was adopted early in our space program because of weight limitations imposed by smaller booster capability; further, that the docking module required to complete the mission is essentially an airlock permitting the otherwise impossible exchange of visits, and that the future U.S. manned program will incorporate the Soviet approach in this regard.

From Dr. Gordon J. F. MacDonald, a

member of the Council on Environmental quality, we learned that while air pollution is a less serious problem in the U.S.S.R., inversions in some heavily industrialized areas, as in Los Angeles, can cause severe local air pollution; also, that controlling urban sprawl, and improving public urban transportation are high on the list of Soviet priorities. The threat to Lake Baikal, the world's deepest body of fresh water, stemming from the lumber mills and cellulose plants along its shores, has been discussed in the press, but not the Soviet anxiety over the effluents being discharged into the waterways of the Volga and Ural basins, as well as the report from the Leningrad City Party Committee calling factory directors to task for dumping pollutants into the Neva River and canals.

Dr. MacDonald described how important water was as a resource to the Soviets, particularly fresh water. He said:

The Soviets depend upon fresh water fisheries to a far greater extent than we do as a source of protein. It is, therefore, in the Soviet interest to attempt to maintain a high level of water quality, and because of this . . . they have a very significant interest in the technologies we have developed here.

This prompted us to inquire about trade opportunities for the United States that Soviet environmental needs might generate. Specifically, I asked Dr. MacDonald if he envisaged Soviet interest in our hardware and hardware systems. His reply:

Yes, for example, some of our electrostatic precipitators designed to control the emission of particular matter are potential candidates. Certainly some of our advanced water treatment facilities, actual hardware—another candidate. Some of the developments in desulfurization are still another.

On a subsequent trip to General Electric headquarters in Philadelphia with the Space Applications Subcommittee, I saw the GE proposal for the study of Connecticut's environmental needs worked out in concert with Daniel Lufkin, the most active and imaginative State environmental director in the country. Unless otherwise occupied following this study, the GE experts may find themselves munching caviar on the banks of the Neva, or Lake Baikal. Surely, in this balance-of-payments doldrum period, we should work to stay ahead and sell ahead along the advancing frontiers of technology.

As a member also of the Public Health and Environment Subcommittee of the Commerce Committee, I was much interested in the testimony of Dr. Roger O. Egeberg, Special Assistant for Health Policy in HEW and consultant to the President for health affairs. Dr. Egeberg has for some time enjoyed a friendly and close working relationship with Dr. Boris Petrovsky, the Soviet Minister of Health. In addition to reviewing the groundwork laid for cooperation in cancer, heart, and environmental science, Dr. Egeberg gave a quite interesting profile of the Soviet public health structure and methods. Those working on Federal legislation to insure ambulance and emergency care service of a high quality throughout the country, will benefit from examining the Soviet central systems. These systems

provide direct telephone access for any citizen to a central clearing office. In Moscow, for example, there are echelons of "triage," a sorting process by which the afflicted citizen is treated on the scene or picked up and delivered to the hospital for appropriate treatment. Dr. Theodore Cooper, head of the National Heart and Lung Institute, testified that the Moscow emergency teams can reach any afflicted person within 10 to 15 minutes of the report. Their ambulance attendants are paramedics with a generally high level of competence for administering emergency treatment. Concerning the Soviet ambulance, Dr. Cooper continued:

It can immediately adapt a stretcher to a hydraulic system on the bottom which can be activated to become an operating table at proper height so that attending physicians and nurses can work around the operating table. There is a light that is useful as an operating room light; respiratory equipment, anesthetist, defibrillation, and surgical technology are available. The unit can function as a coronary care unit, respiratory assistance unit for respiratory failure, or any situation requiring the control of hemorrhage or the administration of oxygen to provide respiratory support.

The versatility of this "pop-top" ambulance service would seem to merit emulation in a country which loses 50,000 persons a year to traffic accidents and over one million to coronary attacks.

The Soviet paramedic is known as a "feldscher," an old Austrian word meaning "man in the field." According to Dr. Egeberg, "the feldscher's training varies from 2 to 10 months. In distant places such as Siberia, he may be the main source of medical aid." Egeberg also testified that the Soviet Union not only has twice the number of physicians as we do, but that about 70 percent of them are women. He said:

The men's lib is out doing something about it, and they are now admitting at least 50% men in the medical schools. They are trying to get it down to about 50-50.

Asked if the "feldscher" program has any relevance for the United States, particularly in medically short urban or rural areas, Egeberg observed:

We could make great strides in our cities if we realize only one such person should have the responsibility for two or three hundred people and that he would belong in that area. He wouldn't have any fear of entering the area. The people wouldn't have to leave the area to make their first contact with the health professions. It has great possibility.

We learned further from Dr. Rauscher of the exchange of drugs effective in cancer therapy. He discussed also the growing evidence that suggest most human being are not destined to contract cancer, but said that:

Something in the environment causes cancer . . . The Japanese male has the highest risk to stomach cancer of any male in the world. When he moves to this country, by the end of the third generation, his risk falls to yours and mine.

The witnesses confirmed the need for any bilateral joint efforts at cancer research to take into consideration the experiences of all other countries. They discussed drug problems, alcoholism, internship programs, and the place of rest

and recreation in Soviet life. We learned to our discomfort that the mechanics of visitor exchange have not always produced the right result, as when a Soviet scientist in the United States took sick, and there being no interim insurance, had to leave the country under the shadow of failure to pay his bill. Problems of language and communication also plague an exchange program especially where close concentration is involved. Russian language training for participating U.S. medical and scientific personnel was acknowledged to be needed.

The planned Apollo-Soyuz docking mission represents an enormous stride in space cooperation. Although it may not necessarily entail exchange visits to launching or recovery sites, it will require the closest possible kind of painstaking coordination to insure success. Significantly, no specific mention is made in the space agreement of earth resources and communications satellite development. Both technologies raise serious problems of international law and comity. The agreement does provide by article 4 that "the Parties will encourage international efforts to resolve problems of international law in the exploration and use of outer space for peaceful purposes with the aim of strengthening the legal order in space." More recently the Soviet Government has voiced concern at the grave possibility of uninvited broadcasts from communications satellites, and all nations are justifiably apprehensive over the use, or abuse, of resource information gleaned from orbiting their territory by scanners. Diplomats at the United Nations were unanimous in their hope expressed to me last spring that the State Department would agree soon to discuss this aspect or what they term "sovereign privacy."

Some fair way must be found to share in the search for earth secrets as well as in the rewards of discovery. With respect to communications satellites, I would hope again that we could do more than merely agree not to misuse them. I look to the day when once a month or more a conversation, great or small, between persons of different lands and cultures, from cabbies to philosophers, could be aired, with simultaneous translation, in homes across the world. Such an experiment should have a claim on our attention equal at least to the average talk show. To bring the Soviet Union and the United States to a point where the fulfillment of these agreements is looked upon as a welcome adventure might require even bolder initiatives. For example, a sister-city program of student exchange and home hospitality involving hundreds of high school youngsters could thaw at the corners of our glacial distrust.

The hearings themselves were not without mild incident. Questioning Dr. Low on the space accord, my friend, Congressman Bob PRICE of Texas, expressed grave reservations about Soviet cooperation. He said:

I want to warn you that they will use our technology to their advantage . . . It is my conclusion that they will not ever live up to any agreement they have ever made in his-

tory. And I think as long as they can they will use us to develop their equipment in every way they can, and then will abandon us when that time comes.

Soviet guests, including the Science and Cultural attachés of the Soviet Embassy whom I had invited to attend the hearings, smiled at this. Mr. PRICE had entered the hearing room following my introduction of the visitors. When he concluded his line of questions I observed:

I think this is a rare opportunity for our Soviet guests who are here today to see the manner in which we deliberate all sides of questions of this kind. Whether or not Dr. Keldysh, President of the Soviet Academy of Sciences, has to appear before the Presidium and present his program in the same manner, I am not sure. But we do have to explore all points of view as we proceed to develop our policies.

Congressman PRICE's honest reservations are shared by many. As Dr. Kissinger observed in a briefing to congressional leaders following the President's return from Moscow:

The factors which perpetuated that rivalry remain real and deep. We are ideological adversaries, and we will in all likelihood remain so for the foreseeable future.

Ford Foundation President, McGeorge Bundy, in his stimulating keynote statement to our subcommittee, recalling his own experience as a Presidential adviser cautioned:

Active cooperation is much harder than exchanges, and we must therefore be prepared to expect that there be delays and difficulties in one or more of these undertakings.

But Mr. Bundy agreed with President Nixon's statement that:

By forming habits of cooperation and strengthening institutional ties in areas of peaceful enterprise, these four agreements will create on both sides a steadily growing vested interest in the maintenance of good relations between our two countries.

Mr. Bundy also noted the likely financial commitment that would attend meaningful implementation of the agreements, saying:

Perhaps one consequence of these agreements is that primary fiscal responsibility will shift in this field, from private institutions like the one I represent, toward public bodies like this subcommittee.

I concur. A nation which has come to accept an annual \$80 billion tax burden to sustain its war capability, ought not to be averse to spending, let us say, 1 percent of that figure on initiatives that might some day lead to a saving of a good part of the other 99 percent. President Wilson said to the Senate:

There must be not a balance of power, but a community of power; not organized rivalries, but an organized common peace.

Four wars, many thousands of American lives, and billions of dollars later, we stand on the threshold of the opportunity to test the validity of President Wilson's observation. We certainly have given organized rivalries a fair try.

Two years ago a Foreign Affairs Journal article speculated on the number of casualties that U.S. strategists would deem acceptable, in formulating a nuclear exchange capability. Twenty million

was the figure I recall. I asked a large audience of high school youth for a showing of hands of those who considered themselves acceptable casualties. No hands went up. I concluded that most people consider themselves unacceptable casualties, at least unless rather special conditions obtain. I told them they were in a sense a league of unacceptable casualties the acronym of which is LUC. It will take plenty of luck for the nuclear powers to find a way to the social, economic, and political, not to mention the moral, equivalents of war. But joint ventures in peace would not be a bad place to begin.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. ASHBROOK (at the request of Mr. ARENDT), for March 29 and April 2, on account of official business.

Mr. CHARLES H. WILSON of California (at the request of Mr. McFALL), for March 29 and April 2, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. CRONIN) to revise and extend their remarks and include extraneous matter:)

Mr. ROBISON of New York, for 10 minutes, today.

Mr. HOGAN, for 20 minutes, today.

Mr. ABDNOR, for 25 minutes, today.

Mr. MILLER, for 5 minutes, today.

Mr. WYATT, for 5 minutes, today.

(The following Members (at the request of Mr. BRECKINRIDGE) to revise and extend their remarks and include extraneous matter:)

Mr. McFALL, for 5 minutes, today.

Mr. FRASER, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. HARRINGTON, for 5 minutes, today.

Mr. CASEY of Texas, for 5 minutes, today.

Mr. BURKE of Massachusetts, for 15 minutes, today.

Mr. DRINAN, for 60 minutes, on April 2.

(The following Members (at the request of Mr. BRINKLEY) and to revise and extend their remarks and include extraneous matter:)

Mr. MADDEN, for 5 minutes, today.

Mr. DULSKI, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. MOORHEAD of Pennsylvania and to include extraneous matter notwithstanding the fact it exceeds two pages of the CONGRESSIONAL RECORD and is estimated by the Public Printer to cost \$765.

(The following Members (at the request of Mr. CRONIN) and to include extraneous matter:)

Mr. WYDLER.
Mr. YOUNG of Alaska.
Mr. WYATT.
Mr. KUYKENDALL.
Mr. GUDE in five instances.
Mr. HOGAN in two instances.
Mr. BELL.
Mr. RONCALLO of New York.
Mr. THOMSON of Wisconsin.
Mr. RAILSBACK.
Mr. SHOUP.
Mr. ANDERSON of Illinois in three instances.

Mrs. HOLT in three instances.
Mr. HUDNUT.
Mr. WYMAN in two instances.
Mr. CLEVELAND.
Mr. ESCH.
Mr. FRENZEL.
Mr. DERWINSKI.
Mr. HUNT.
Mr. BOB WILSON in four instances.
Mr. MARTIN of Nebraska.
Mr. KEATING.

(The following Members (at the request of Mr. BRECKINRIDGE) and to include extraneous matter:)

Mr. MAZZOLI.
Mr. BADILLO.
Mr. CASEY of Texas.
Mr. FASCELL in three instances.
Mr. DRINAN in three instances.
Mrs. GRIFFITHS.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

Mr. HAYS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 5445. An act to extend the Clean Air Act, as amended for 1 year;
H.R. 5446. An act to extend the Solid Waste Disposal Act, as amended, for 1 year; and
H.J. Res. 5. Joint Resolution requesting the President to issue a proclamation designating the week of April 23, 1973, as "Nicolaus Copernicus Week" marking the quinquacentennial of his birth.

ADJOURNMENT

Mr. BRINKLEY, Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly, at 2 o'clock and 8 minutes p.m.), the House adjourned until tomorrow, Thursday, March 29, 1973, at 12 o'clock noon.

OATH OF OFFICE

The oath of office required by the sixth article of the Constitution of the United States, and as provided by section 2 of the act of May 12, 1884 (23 Stat. 22), to be administered to Members and Delegates of the House of Representatives, the text of which is carried in section 1757 of title XIX of the Revised Statutes of the United States and being as follows:

"I, A B do solemnly swear (or affirm) that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I take this obligation freely, without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties of the office on which I am about to enter. So help me God."

has been subscribed to in person and filed in duplicate with the Clerk of the House of Representatives by the following Members of the 93d Congress, pursuant to Public Law 412 of the 80th Congress entitled "An act to amend section 30 of the Revised Statutes of the United States" (U.S.C., title 2, sec. 25), approved February 18, 1948; CORINNE C. BOGGS, Second District, Louisiana and DON YOUNG, At Large District, Alaska.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

665. A communication from the President of the United States transmitting proposed supplemental appropriations for the fiscal year 1973, for the legislative, judicial, and executive branches of the Government (H. Doc. No. 93-70); to the Committee on Appropriations and ordered to be printed.

666. A letter from the Deputy Secretary of Defense, transmitting three reports of violations of section 3679, Revised Statutes, pursuant to section 3679(1)(2), Revised Statutes; to the Committee on Appropriations.

667. A letter from the Adjutant General, Veterans of Foreign Wars of the United States, transmitting the proceedings of the 73d national convention of the Veterans of Foreign Wars, pursuant to Public Law 88-224 (H. Doc. No. 93-72); to the Committee on Armed Services and ordered to be printed with illustrations.

668. A letter from the Assistant Secretary of Agriculture, transmitting the second annual report of the National Advisory Council on Child Nutrition, pursuant to the National School Lunch Act, as amended; to the Committee on Education and Labor.

669. A letter from the Acting Secretary of the Interior, transmitting the 1972 Annual Report of the Bonneville Power Administra-

tion, containing a consolidated financial statement for all of the electrical power generating projects and the transmission system comprising the Federal Columbia River Power System, pursuant to Public Law 89-448; to the Committee on Interior and Insular Affairs.

670. A letter from the Secretary of Health, Education, and Welfare, transmitting the Second Annual Report of the Department of Health, Education, and Welfare on the studies of deaths, injuries, and economic losses resulting from accidental burning of products, fabrics, or related materials, covering fiscal year 1972, pursuant to section 14(a) of the Flammable Fabric Act Amendments of 1967; to the Committee on Interstate and Foreign Commerce.

671. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting the 1972 Annual Report of the Service; to the Committee on the Judiciary.

672. A letter from the Under Secretary of Agriculture, transmitting a draft of proposed legislation to prevent the unauthorized manufacture and use of the character "Woodsy Owl," and for other purposes; to the Committee on the Judiciary.

673. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Highway Safety Act of 1966, title 23, United States Code, section 401 *et seq.*, and for other purposes; to the Committee on Public Works.

674. A letter from the Chairman, U.S. Tariff Commission, transmitting the 56th Annual Report of the Commission; to the Committee on Ways and Means.

675. A letter from the Chairman, the Renegotiation Board, transmitting a draft of proposed legislation to extend the Renegotiation Act of 1951; to the Committee on Ways and Means.

RECEIVED FROM THE COMPTROLLER GENERAL

676. A letter from the Comptroller General of the United States, transmitting a report on the examination of financial statements of the Tennessee Valley Authority for fiscal year 1972 (H. Doc. No. 93-71); to the Committee on Government Operations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. STRATTON: Committee on Armed Services. H.R. 4954. A bill to amend title 37, United States Code, relating to promotion of members of the uniformed services who are in a missing status; (Rept. No. 93-94). Referred to the Committee of the Whole House on the State of the Union.

Mr. MILLS of Arkansas: Committee of conference. A conference report to accompany H.R. 3577; (Rept. No. 93-95). Ordered to be printed.

By Mr. THORNTON (for himself and Mr. ALEXANDER):

H.R. 6280. A bill to establish an Office of Consumer Protection which shall be independent of the executive departments, headed by the Consumer Counsel of the United States, in order to secure within the Federal Government effective protection and representation of the interests of consumers, obtaining and disseminating information useful to consumers, cooperation and assistance to other agencies and State and local governments, and for other purposes; to the Committee on Government Operations.

By Mr. TIERNAN:

H.R. 6281. A bill to establish a Commission on Fuels and Energy to recommend programs and policies intended to insure, through maximum use of indigenous resources, that the U.S. requirements for low-cost energy be met, and to reconcile environmental quality requirements with future energy needs; to the Committee on Interstate and Foreign Commerce.

By Mr. VANIK:

H.R. 6282. A bill to provide that tax exempt interest is to be added into average base period income for purposes of income averaging; to the Committee on Ways and Means.

H.R. 6283. A bill relating to the dutiable

status of fresh, chilled, or frozen cattle meat and fresh, chilled, or frozen meat of goats and sheep (except lambs); to the Committee on Ways and Means.

By Mr. WALDIE:

H.R. 6284. A bill to require the President to notify the Congress whenever he impounds funds, or authorizes the impounding of funds, and to provide a procedure under which the House of Representatives and the Senate may approve the President's action or require the President to cease such action; to the Committee on Rules.

H.R. 6285. A bill to permit payment of extended unemployment compensation benefits to additional workers, and for other purposes; to the Committee on Ways and Means.

By Mr. WHITTEN:

H.R. 6286. A bill to amend the Communications Act of 1934 to establish orderly procedures for the consideration of applications for renewal of broadcast licenses; to the Committee on Interstate and Foreign Commerce.

By Mr. WOLFF:

H.R. 6287. A bill to provide for improved labor-management relations in the Federal service, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. WRIGHT (for himself and Mr. DON H. CLAUSEN):

H.R. 6288. A bill to authorize appropriations for construction of certain highways in accordance with title 23 of the United States Code, and for other purposes; to the Committee on Public Works.

By Mr. WYDLER:

H.R. 6289. A bill to amend title 28 of the United States Code to permit the holding of Federal District Court for the Eastern District of New York at a suitable site in Nassau County in lieu of Mineola; to the Committee on the Judiciary.

By Mr. YOUNG of Florida:

H.R. 6290. A bill to amend title 38, United States Code, to stabilize and "freeze" as of January 1, 1973, the Veterans' Administration Schedule for Rating Disabilities, 1945 edition, and the extensions thereto; to the Committee on Veterans' Affairs.

H.R. 6291. A bill to amend titles II and XVIII of the Social Security Act to include qualified drugs, requiring a physician's prescription or certification and approved by a formulary committee, among the items and services covered under the hospital insurance program; to the Committee on Ways and Means.

By Mr. WHITEHURST (for himself, Mr. ARCHER, Mr. BEVILL, Mr. BROYHILL of Virginia, Mr. BUTLER, Mr. DERWINSKI, Mr. GERALD R. FORD, Mr. HASTINGS, Mr. HUBER, Mr. HUNT, Mr. KETCHUM, Mr. MAZZOLI, Mr. PARRIS, Mr. SIKES, Mr. STEIGER of Arizona, Mr. WON PAT, and Mr. ZION):

H.J. Res. 468. Joint resolution, proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. FRASER (for himself and Mr. GUDE):

H. Res. 329. Resolution expressing the sense of the House that the U.S. Government should seek agreement with other members of the United Nations on prohibition of weather modification activity as a weapon of war; to the Committee on Foreign Affairs.

By Mr. FRASER (for himself, Mr. ZABLOCKI, Mr. FASCELL, Mr. DIGGS, Mr. NIX, Mr. ROSENTHAL, Mr. CULVER, Mr. HAMILTON, Mr. BINGHAM, Mr. YATRON, Mr. REID, Mr. HARRINGTON, Mr. RYAN, Mr. RIEGLE, Mr. MAILLIARD, Mr. FINDLEY, Mr. BUCHANAN, Mr. WEALEN, Mr. MATHIAS of California, Mr. WINN, Mr. GILMAN, and Mr. GUYER):

H. Res. 330. Resolution on U.S. oceans policy at the Law of the Sea Conference; to the Committee on Foreign Affairs.

By Mr. ANDERSON of Illinois (for himself, Mr. GIBBONS, Mr. CLEVELAND, Mr. FRASER, Mr. HOSMER, Mr. PEYSER, Mr. MICHEL, Mr. THOMSON of Wisconsin, Mr. BADILLO, Mr. CRANE, Mr. HINSHAW, Mr. MAYNE, Mr. COHEN, Mr. WHITEHURST, Mr. QUIE, Mr. TREEN, Mr. DON H. CLAUSEN, Mr. ERLÉNBOEN, Mr. HUNT, Mr. MITCHELL of Maryland, Mr. YOUNG of Florida, Mr. SARASIN, Mr. FISH, Mr. GUBSER, and Mr. ROBISON of New York):

H. Res. 331. Resolution to amend clause 32(c) of rule XI of the House of Representatives to provide the minority party, upon request, with up to one-third of a committee's investigative staff funds; to the Committee on Rules.

By Mr. ANDERSON of Illinois (for himself, Mr. GIBBONS, Mr. CLEVELAND, Mr. FRASER, Mr. GOLDWATER, Mr. VANDER JAGT, Mr. LEHMAN, Mr. BROYHILL of North Carolina, Mr. KEMP, Mr. CONLAN, Mr. COCHRAN, Mr. WYDLER, Mr. HARRINGTON, Mr. FROELICH, Mr. BURGNER, Mr. WALSH, Mr. NELSEN, Mr. MYERS, Mr. VEYSEY, Mr. PRITCHARD, Mr. WYMAN, Mr. DELLENBACK, Mr. BROZMAN, and Mr. WARE):

H. Res. 332. Resolution to amend clause 32(c) of rule XI of the House of Representatives to provide the minority party, upon request, with up to one-third of a committee's investigative staff funds; to the Committee on Rules.

By Mr. ANDERSON of Illinois (for himself, Mr. GIBBONS, Mr. CLEVELAND, Mr. FRASER, Mr. MALLARY, Mr. MOSHER, Mr. HUBER, Mr. STEELMAN, and Mr. HUDNUT):

H. Res. 333. Resolution to amend clause 32(c) of rule XI of the House of Representatives to provide the minority party, upon request, with up to one-third of a committee's investigative staff funds; to the Committee on Rules.

By Mr. SMITH of Iowa:

H. Res. 334. Resolution to provide funds for the expenses of the investigations and studies authorized by H. Res. 279; to the Committee on House Administration.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

115. By the SPEAKER: Memorial of the Legislature of the Commonwealth of Massachusetts, relative to daylight saving time; to the Committee on Interstate and Foreign Commerce.

116. Also, Memorial of the Legislature of the Commonwealth of Massachusetts, relative to the establishment of a national cemetery in Massachusetts; to the Committee on Veterans' Affairs.

117. Also, Memorial of the Legislature of the Commonwealth of Massachusetts, relative to a national health care insurance plan; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause I of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DAVIS of Georgia:

H.R. 6292. A bill for the relief of Jesus Tiscareno-Avina; to the Committee on the Judiciary.

H.R. 6293. A bill for the relief of Cruz Sandoval-Acosta; to the Committee on the Judiciary.

H.R. 6294. A bill for the relief of Jesus Rojas-Vasquez; to the Committee on the Judiciary.

H.R. 6295. A bill for the relief of Simon Belles-Hernandez; to the Committee on the Judiciary.

H.R. 6296. A bill for the relief of Jesus Avina-Almanza; to the Committee on the Judiciary.

By Mr. REUSS:

H.R. 6297. A bill to authorize R. Edward Bellamy, doctor of philosophy, a retired officer of the Commissioned Corps of the U.S. Public Health Service, to accept employment by the Canadian Department of Agriculture; to the Committee on the Judiciary.

By Mr. RODINO:

H.R. 6298. A bill for the relief of Augusto dos Santos Nunes de Matos; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

88. By the SPEAKER: Petition of William F. Southers and others, Tampa, Fla., relative to protection for law enforcement officers against "nuisance suits"; to the Committee on the Judiciary.

89. Also, Petition of Capt. W. M. Clements and others, Macon, Ga., relative to protection for law enforcement officers against "nuisance suits"; to the Committee on the Judiciary.

90. Also, Petition of Paul E. White, Jr., and others, Snow Hill, Md., relative to protection for law enforcement officers against "nuisance suits"; to the Committee on the Judiciary.

91. Also, Petition of Andrew Chando and 76 other correction officers at the Annandale Youth Correctional Facility, Annandale, N.J., relative to protection for law enforcement officers against "nuisance suits"; to the Committee on the Judiciary.

92. Also, Petition of William J. Solomon and others, Lorain, Ohio, relative to protection for law enforcement officers against "nuisance suits"; to the Committee on the Judiciary.

93. Also, Petition of Richard Osborne and others, Tallmadge, Ohio, relative to protection for law enforcement officers against "nuisance suits"; to the Committee on the Judiciary.

94. Also, Petition of Earl L. Mease and others, Steelton, Pa., relative to protection for law enforcement officers against "nuisance suits"; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

WHAT PATRIOTISM MEANS

HON. WILLIAM H. HUDNUT III

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. HUDNUT. Mr. Speaker, last Monday, March 26, I had the privilege of presenting a flag flown over the Capitol to the Mary Evelyn Castle Elementary School in Lawrence Township, in Indianapolis. There were some 700 children there, each one bedecked in a red, white, and blue piece of finery of his or her own making—a bow tie, a hat, a straight tie, a necklace and so forth. We sang the "Star-Spangled Banner" and some other songs. Some of the children read poems about the meaning of the flag. The school principal, Mr. Thomas D. McClain, and other dignitaries spoke. The parent-faculty organization presented the school a standard for the new flag to hang from. And after I made the presentation, one of the students, Diana Mutz, responded.

This was indeed a thrilling occasion, the highlight of which was this young fifth grader's response. I am pleased to insert her remarks in the RECORD for the benefit of my colleagues, because they reflect an idealism, a commitment, a faith, and a hope, that all Americans should possess; and they represent, in my opinion, an extraordinary insight, for one so young, into the meaning of patriotism.

Her remarks are as follows:

WHAT PATRIOTISM MEANS

John Adams, the second President of the United States once told his wife, "There are only two kinds of people in this world who really matter—those who are committed and those who require the commitment of others."

As those of you know who have seen the musical "1776," John Adams was reminded of his statement when he had all but given up hope of achieving American independence from the British. It was the commitment of his wife that gave him the courage to continue his fight and to win it later on that same month.

Because we all become discouraged and sometimes forget, it is important to be reminded of our commitment to freedom and to the principles of the United States. A flag presentation is a physical symbol of the commitment of thousands and thousands of

Americans who have committed themselves to our country.

In recent weeks we have watched the triumphant return of our P.O.W.'s on television. We will never know what type of commitment was required of them but today we are reminded of our thankfulness for what they have done.

Every American worthy of the name loves his country and respects the flag. But patriotism is more than a feeling. It is a willingness to serve America, to put the nation's welfare above his own.

Now some of us may not be called on to serve in Viet Nam or to serve as politicians or leaders. But we can do our part by making the very best of our talents and abilities. Our country and our family and each of us individually is best served when we do our best at whatever we do. No matter what it is, to do it to the best of our ability is part of our responsibility to our country.

So let today's presentation remind us of our responsibility as American citizens to keep America great and strong—that should be our commitment.

THE DYER MEMORIAL AWARD TO LAWTON M. CALHOUN AS "SUGAR MAN OF THE YEAR"

HON. HERMAN E. TALMADGE

OF GEORGIA

IN THE SENATE OF THE UNITED STATES

Wednesday, March 28, 1973

Mr. TALMADGE. Mr. President, one of the State of Georgia's most distinguished citizens, Lawton M. Calhoun, retired president and chairman of the Board of Savannah, Ga., Foods and Industries, Inc., has been awarded the Dyer Memorial Award as "Sugar Man of the Year" for 1972.

This is indeed a high honor for Mr. Calhoun, and well-deserved recognition of his outstanding leadership in our Nation's sugar industry over a period of some four decades. I congratulate Mr. Calhoun on this award, and also commend him for service he has rendered for the State of Georgia and our Nation.

It is of interest to the Senate that Mr. Calhoun is a member of the board of trustees of the Richard B. Russell Foundation, Inc., which was organized following our beloved colleague's death to preserve the late Senator Russell's

historical papers at a memorial library at the University of Georgia in Athens. Mr. Calhoun was finance director in our fundraising efforts, and did an outstanding job.

I ask unanimous consent that there be printed in the RECORD as an extension of my remarks, an article from the Savannah Morning News, as well as the citation on Mr. Calhoun's award.

There being no objection, the article and citation were ordered to be printed in the RECORD, as follows:

CALHOUN NAMED TOP SUGAR MAN

Lawton M. Calhoun, retired executive of Savannah Foods and Industries Inc., has received the Dyer Memorial Award of "Sugar Man of the Year" for 1972.

Considered the most prestigious honor in the U.S. sugar industry, the award is given for "significant and meritorious service" to the industry.

Calhoun, who retired last year as chairman of the board, president and chief executive officer of Savannah Foods and Industries, received a giant silver bowl, a symbol of the award, at a luncheon in New York City Monday.

The presentation was made by John B. Bunker, president of Holly Sugar Corporation of Colorado Springs, Colo. who was chairman of the three-man judges' panel.

Other judges were James H. Marshall, president of the California and Hawaiian Sugar Co. of San Francisco, Calif., and Robert M. Armstrong, president of Imperial Sugar Co. of Sugarland, Tex.

The citation for the 15th annual presentation of the award noted that Calhoun during his nearly 40 years in the industry served for a period as chairman of the Sugar Association Inc. and was instrumental in organizing the International Sugar Research Foundation, a worldwide body dedicated to initiating and conducting investigations on sugar and disseminating the results.

The "Sugar Man of the Year" award was established in 1958 as a memorial to the late B. W. Dyer, founder of B. W. Dyer and Co., sugar economists and brokers of New York City.

Calhoun joined the Savannah office of Lamborn and Co., general brokers for the Savannah Sugar Refining Corporation, in 1934. In 1940 he accepted a job as assistant sales manager for the sugar refinery.

DYER MEMORIAL AWARD "SUGAR MAN OF THE YEAR 1972" TO LAWTON M. CALHOUN, CITATION FOR SIGNIFICANT AND MERITORIOUS SERVICE TO THE SUGAR INDUSTRY

For his significant and meritorious service to the sugar community during his nearly

40 years in the industry, Lawton M. Calhoun is hereby commended.

As Chairman of The Sugar Association, Inc., he early recognized that sugar must be actively promoted as a wholesome, nutritious source of food energy.

As Chairman of The Association's Ad Hoc Committee, he was instrumental in organizing the International Sugar Research Foundation, a world-wide body dedicated to initiating and conducting investigations on sugar and disseminating the results.

Active in directing the affairs of the United States Cane Sugar Refiners' Association, his knowledge of the industry and his integrity made him as welcome in the hallowed halls of Congress as he was among his peers in the commercial and civic worlds.

More than his accomplishments was the man, possessing the highest integrity with a great appreciation of human relationships and understanding of other individual's problems.

His wise counsel and farsightedness are appreciated by a grateful industry which long will remember his outstanding contributions in its behalf.

CONGRESSIONAL APPROVAL FOR EXECUTIVE IMPOUNDMENT OF APPROPRIATED FUNDS

HON. JEROME R. WALDIE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. WALDIE. Mr. Speaker, I am today introducing a bill to force the executive branch to gain legislative approval for the impoundment of funds appropriated by Congress. I have become increasingly concerned with the contemptuous disregard the executive branch has continued to show for legislative and budgetary policy duly formulated by Congress. As the most direct representative link with citizens of this Nation, the Congress was designated as the only constitutional source of authority for raising and spending public funds. From time to time, Congress itself has granted the executive authority to amend its appropriations to prevent a depletion of the Public Treasury, to effect savings in procurement, and to permit the rechanneling of funds into priority areas during periods of national emergency.

However, the present administration has taken upon itself powers never before exercised by the Executive nor envisioned by the Congress or the Founding Fathers. In effect, the Nixon administration, through the withholding of appropriated funds in a broad range of social programs, has sought to "pad the pockets" of those special interests to which it feels indebted and to deny services to the great majority of Americans.

In so doing, the administration has totally subverted the intent of policies for which funds were appropriated by Congress. This can only be interpreted as a blatant contempt for the will of the people as expressed through bills enacted by their representatives in Congress. Further, the effect of impoundment upon the mere mechanics of congressional authorization is catastrophic—in essence the executive branch may effectively veto individual item of an act of Congress.

Mr. Speaker, my concern stems not only from the constitutional implications of Executive impoundment, but also from the great harm dealt our cities and States due to the failure to expend funds for much needed programs. As a Representative from the State of California, which would greatly benefit from these programs, I understand in very real terms the hardships this policy has inflicted.

In 1970, Congress approved \$394 million for the Federal Government's public housing program, and at the close of fiscal year 1971, only \$201 million had been expended. During the same year, Congress appropriated \$1.2 billion for urban renewal programs, and at the end of fiscal year 1971 \$200 million remained unobligated. In 1971 and 1972, Congress appropriated \$700 million for water and sewer construction, and at the end of the most recent fiscal year more than \$490 million remained unobligated. Again in fiscal year 1972, the President refused to spending over \$300 million in mass transit appropriations.

Mr. Speaker, this legacy of Executive subversion of congressional mandates is very disturbing to all those genuinely concerned with our constitutional system of checks and balances. It is time that the Congress reassert its power and tell the Executive that he cannot legislate through the budget.

The bill I am introducing would maintain the integrity of congressionally established programs and policies, by requiring the President to submit to Congress notification of any impoundment he institutes, and by requiring Congress to either approve or disapprove the impoundment within 60 days after official notification. I believe the provisions of this bill leave fully intact the Executive's authority to effect savings and direct the economy toward levels of greater efficiency. Therefore, I submit this bill for the careful and thoughtful consideration of the Members.

NATIONAL CONFERENCE OF SUPERINTENDENTS OF TRAINING SCHOOLS AND REFORMATORIES— GOLDEN ANNIVERSARY—1923-73

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mrs. HOLT. Mr. Speaker, the National Conference of Superintendents of Training Schools and Reformatories has been meeting annually since 1923. This group represents superintendents of juvenile and young adult institutions and the communities which these institutions serve.

Their annual meeting serves as a workshop for superintendents. It consists of seminar discussions covering institutional and community problems relative to delinquency, as well as advancements and recent innovations in rehabilitative programs. The myriad of activities, functions, and involvements of institutions as

a means of crime control are readily communicated among the participants. The emerging role of the institution as an integral part of the community and the State organization is enhanced by the interactions of those leaders who are so closely identified with the problems of delinquency.

I take pride in saluting this outstanding conference and with it every success in the future.

MINORITY STAFFING REFORM

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. ANDERSON of Illinois. Mr. Speaker, I am today introducing on behalf of myself, the gentleman from Florida (Mr. GIBBONS), the gentleman from New Hampshire (Mr. CLEVELAND), the gentleman from Minnesota (Mr. FRASER), and a bipartisan group of over 50 cosponsors a resolution to provide the minority party on each committee, upon request, up to one-third of the committee's investigative staff funds.

I am greatly encouraged by the fact that we are today rekindling the bipartisan reform spirit of 1970 which was responsible for the adoption of a number of important amendments to the Legislative Reorganization Act of that year.

Unfortunately, an amendment quite similar to this which was part of the 1970 act was later deleted in 1971 with the adoption of the House rules of the 92d Congress, and replaced by a rule granting the minority only "fair consideration" in the appointment of staff.

What we are attempting to do today is to demonstrate that the bipartisan reform fires are still burning, and that providing adequate committee staffing for both the majority and minority members is central to strengthening the role of Congress vis-a-vis the executive branch. While Republicans currently comprise 44 percent of the House membership, we have been allotted only 10 percent of the committee investigative staff and 9 percent of the staff funds. If, as minority members, we are to function effectively and independently, we must have adequate staffing at the committee level which is the very heart of the legislative process. This is, therefore, not a partisan issue, but a congressional reform issue, and if we are serious about reasserting ourselves, we must be willing to reform ourselves from top to bottom. This House has already made a commendable beginning this year with the adoption of such important changes as seniority and open committee reforms. I hope we can continue to build on this momentum, and minority staffing reform is the next logical step. I, therefore, again call upon the House Rules Committee to schedule hearings on this important reform legislation at the earliest practicable date.

At this point in the RECORD, Mr. Speaker, I include a list of cosponsors along with the text of our resolution:

COSPONSORS OF H. RES. 331

Mr. Anderson of Illinois (for himself and Mr. Gibbons, Mr. Cleveland, Mr. Fraser, Mr. Hosmer, Mr. Peyser, Mr. Michel, Mr. Thomson of Wisconsin, Mr. Badillo, Mr. Crane, Mr. Hinshaw, Mr. Mayne, Mr. Cohen, Mr. Whitehurst, Mr. Quile, Mr. Treen, Mr. Don Clausen, Mr. Erlenborn, Mr. Hunt, Mr. Mitchell of Maryland, Mr. Bill Young, Mr. Sarasin, Mr. Fish, Mr. Gubser, Mr. Robison, Mr. Goldwater, Mr. Vander Jagt, Mr. Lehman, Mr. James T. Broyhill, Mr. Kemp, Mr. Conlan, Mr. Cochran, Mr. Wydler, Mr. Harrington, Mr. Froehlich, Mr. Burgener, Mr. Walsh, Mr. Nelsen, Mr. Myers, Mr. Veysey, Mr. Pritchard, Mr. Wyman, Mr. Dellenback, Mr. Broetzman, Mr. Ware, Mr. Mallary, Mr. Mosher, Mr. Huber, Mr. Steelman, Mr. Hudnut).

H. RES. 331

Resolved, That clause 32(c) of rule XI of the Rules of the House of Representatives is amended to read as follows:

"(c) The minority party on any such standing committee is entitled, upon request of a majority of such minority, to up to one-third of the funds provided for the appointment of committee staff pursuant to each primary or additional expense resolution. The committee shall appoint any persons so selected whose character and qualifications are acceptable to a majority of the committee. If the committee determines that the character and qualifications of any person so selected are unacceptable to the committee, a majority of the minority party members may select other persons for appointment by the committee to the staff until such appointment is made. Each staff member appointed under this subparagraph shall be assigned to such committee business as the minority party members of the committee consider advisable.

FOOD PRICE INCREASES

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mrs. HOLT. Mr. Speaker, the current food price situation is rapidly approaching crisis proportions. My constituents, as well as consumers all across our country, are up in arms at the increasing portion of their paychecks devoted to food purchases. There is much talk of action such as boycotts and selective shopping by consumers. This may produce desirable results in the short run, but it does not solve the problem.

I am convinced that Government has a responsibility to work toward the development of a permanent and equitable solution to this dilemma. Food prices are a complex area; there is no simplistic remedy which will produce satisfactory results. Price controls make good rhetoric, but I do not think we know enough about the situation to judge the effectiveness or desirability of such controls. We must find the source of the onerous rise, whether it stems from labor or production.

I support this investigation because it represents a balanced and reasonable approach. We should make an in-depth study of all the variables which affect food prices. We must assure an abundant food supply at reasonable prices with a reasonable return to farmers.

I hope my colleagues will join with me in attempting to get at the bottom of the food price increases so that appropriate action may be taken to stem this tide.

CURTAILING SOCIAL PROGRAMS

HON. ROBERT N. C. NIX

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. NIX. Mr. Speaker, the administration disclosed in its budget proposals and many public statements that on the one hand that drastic cuts in spending on social services are required, and on the other hand, a complete shift in resources and responsibility must be made from the Federal to local governments.

Mr. Nixon characterizes his budget in terms of an effort to chart a new course for America. A year ago the President proposed to spend \$246.3 billion in fiscal 1973 which ends this coming June 30. Meanwhile, Congress voted to spend \$261 billion, and the President in turn countered with a request to cut that back to a ceiling of \$250 billion, with him making the itemized cuts. The Congress said "No." The President became adamant and refused to spend more than the \$250 billion of the money which Congress had appropriated.

Viewed from this background, the President's new proposed budget of \$268.7 billion for fiscal 1974, while presented as a conservative and noninflationary Federal spending program, is actually 7 or 8 percent higher than last year's proposal. The battle between the branches of government is in the area of priorities. The President's program calls for scrapping 70 Federal aid projects, including some in aid to education, law enforcement, job training, and urban development. As a consequence, the allocated \$6.9 billion yearly to four special revenue sharing programs with cities and States is not sufficient to carry on many of the Federal programs being eliminated.

The President's budget appears to be an attack on what remains of former President Johnson's Great Society programs: gone are model cities slum restoration; local action antipoverty programs; local mental health programs; among others. Some of the President's own pet ideas were missing in his message: no mention of welfare reform; no provision for his touted family assistance program, and no real commitment to national health insurance. Most people must seriously question the \$1 billion cutback on manpower training programs, the reductions in research on high speed rail travel, the slashes in subsidies for Amtrak passenger rail services, and dilution of water pollution control.

The excuse given by the President for the forced reductions in current programs is focused on not proposing any new tax increases. However, it is very favorable to those who are in the upper brackets. If the people in this country have a choice of paying higher taxes in lieu of cancellation and/or termination

of various social programs, it is quite likely the poor people would prefer employment and this can be provided through job training programs.

The rich and affluent society is resisting a tax increase. Before there are fewer libraries, hospitals, low-income housing and sewerage control systems, more taxes should be paid by coddled corporations.

An analysis of Mr. Nixon's 1974 budget for which he claims savings of \$16.9 billion are not real savings. About \$5 billion of the alleged \$16.9 billion reductions refer to savings from a previous proposed commitment. An example of this is a claimed \$400 million saving in the 1974 defense budget set down as follows: "Limit new spending for all-volunteer force." The administration considers this a cut from a total commitment that had never been made.

The real cuts are substantial, and are made at a time when many public needs are unmet.

This is where the cuts in the 1974 budget were made:

	Billion
Welfare	\$1.5
Medicare and housing	1.5
Manpower programs	1.5
Health, education and poverty programs	1.0
Pension and retirement	1.0
Environment	1.0
Agriculture	1.5
Water and natural resources	.5
Defense and foreign	2.0
Space	.3
All others	1.0

That all adds up to \$12.3 billion. If \$2.3 billion saved on defense, foreign, and space commitments is subtracted, there is an even \$10 billion that has been eliminated out of funds basically programed in fiscal year 1974 for the poor and underprivileged.

The inner cities may lose more from the cutbacks in welfare and antipoverty programs than they will get back in revenue sharing.

Inflation falls most heavily on the poor, who spend their income largely on rent, food, and clothing than on the rich who can accumulate capital.

This new procedure against the poor in our Nation is a retreat from the American dream of equal opportunity for all. We must rectify these proposals before they bring chaos to all of us.

JUNIOR RAILROAD EXPERTS REPORT

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. PICKLE. Mr. Speaker, it was a child who had the courage and honesty to say to the crowd that the Emperor was not wearing any clothes, and so sometimes it is best to look at things through the eyes of children to get a frank evaluation of them.

As the new rail passenger service, Amtrak, begins its third year of operation, much has been written about its quality,

efficiency, and service. These reports have been prepared by experts in the fields of transportation, business administration, and rail travel. But they have been so filled with technical data, appraisals of complex machines, and raw statistics on numbers of cars, towels, and stemware that they have been of little value to the average person who is interested in trains and would like to know what Amtrak has done for them.

In the interest of simplicity, honesty, and frankness, I present here several letters written by the fourth-grade class at Liberty Hill, Tex., after the children took their first ride on the Amtrak train from Austin to San Marcos. They are printed below just as they were sent to the Austin Amtrak office, with the same errors of spelling and punctuation as were in the originals.

It is obvious from the letters that the children enjoyed their train ride, but something more important comes through in their notes. These children saw much more on the train than twice as many adults would ever have seen. From the armrests to the hot and cold water pedals in the restrooms, they took infinite delight in small things that we take for granted and ignore.

That is the essence of childhood and optimism, and reading these letters may bring back a little of both.

The letters follow:

DEAR AMTRAK: It was fun riding the train to San Marcos. I hope that I can ride another train. I like the seats. I also like the restroom. And I liked the armrest. I like the clubcar best.

Your friend,

EDWARD.

DEAR AMTRAK FRIENDS: My name is Denise Stultz. I'm from the fourth grade. I liked the train ride very much. Sometimes when I walked down the lane it made me dizzy. The only part that scared me was when I went across the part where it connected on to another car.

Your friend,

DENISE.

DEAR AMTRAK: I wanted to tell you how much I liked the trip on your train. I like the nice clean cars. The seat are very pretty, too, and it's nice, quiet, and peaceful. I just wanted to tell you how much I like the trip. By-by.

Truly Yours,

MITCHELL S.

DEAR AMTRAK: I didn't like it went we went over the water. But I love it otherwise. It was a fair to me but to my mom it was wonderful. I hope we meet again. I hope that more classes come and ride on your train and the conductors as very nice.

When I got on the train I didn't like it at all. But you made me love it. Your and Mrs. Lett are the most wonderful I have ever seen.

Yours Truly,

LORIE.

DEAR AMTRAK: I saw the ticket that said Amtrak. We didn't get to sit on the new car.

But we enjoyed the ride. Edwardo and I didn't come on TV. The boy and girl came on TV. I think the new car was the diner.

Your friend,

AURELIO.

DEAR AMTRAK: I like the train ride. The ride was very nice. The ride felt just like Home to me. I like the train ride very much. The other ones liked it too.

Your friend,

WANDA.

DEAR AMTRAK: I like your train. It has all the comforts you would ever want. The bathrooms are very well fashioned. Your club car is very nice. Your water fountains are neat.

Your rider,

CURTIS RILEY.

DEAR AMTRAK FRIENDS: I'm glad you could spare the room for Liberty Hills fourth grade class. I like the train for its neatness and its food. I wish it could have gone faster. But I know you can't help it because trains can only go so fast. I also like the hot and cold pedals in the rest room a lot.

Your friend,

STEVEN MOORE.

DEAR AMTRAK: I am from the 4th grade, and I want to tell you that I was glad to be on your train. It wasn't the first one I have been on. But it was the best. I like the lounge and how smooth the train went. At first I didn't know how to make the seats go back, then I looked in front of me and did what he was doing.

Your 4th grade passenger,

DIANA HAIGHT.

DEAR AMTRAK: I like the train ride. I like the restroom, too. I also like the dining cart. I wish I could eat something but I couldn't. I like the windows too. I also like the seats.

The train is pretty all over. I like the engine to. I like the colors of the engine to.

Your friend,

CYNTHIA.

CUTTING FEDERAL FUNDS

HON. J. EDWARD ROUSH

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. ROUSH. Mr. Speaker, the following short editorial very clearly points out another inconsistency in the administration's approach to the solution of problems. In the Fourth District of Indiana we are trying to "do it ourselves." The editorial indicates how the administration is forcing a community to turn to tax funds to replace private funds if a very good program is to continue. I understand that objections such as this one have caused the Secretary of Health, Education, and Welfare to reconsider this regulation. I hope the proposed regulation will be abrogated and the reasons it should be are well stated in this editorial.

The editorial follows:

CUTTING FEDERAL FUNDS

(By Carl W. Vandagriff, vice president and general manager, WOWO Radio, Fort Wayne, Ind.)

WOWO normally avoids national issues in its editorials but a recent proposal by the Department of Health, Education and Welfare would have such a drastic impact on Fort Wayne that we feel compelled to comment.

HEW is proposing that present regulations under Social Security Title IV-A be changed so that no private funds can be used to match these federal funds, which in Fort Wayne are being used to provide day care services to low income families. Unless local tax monies can be secured, which is unlikely, a day care program at the Regional Vocational Center would be ended. This means 35 high school students who are enrolled in the vocational program would have to switch courses. Twenty five young children being cared for in the program will not have day care services. In addition, many mothers who depend on Child Care of Allen County to care for their children while they work, may have to quit their jobs and apply for welfare or ask for increased welfare benefits.

WOWO thinks this proposal runs counter to all the recent speeches by President Nixon. The President says local communities should assume responsibility for services and not run to the government to solve their problems. The proposal to require local tax dollars to match federal tax dollars is ridiculous because the present matching funds come from private sources such as United Way of Allen County. If you agree, write to Congressman Roush and Senators Hartke and Bayh. They can help us save a valuable program.

MASONIC AWARDS IN NEW JERSEY

HON. JOHN E. HUNT

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. HUNT. Mr. Speaker, I am particularly pleased today to insert for the Record a compilation of the fine work being done by the Grand Lodge of the Most Ancient and Honorable Society of Free and Accepted Masons for the State of New Jersey. The record achieved by this fine organization is a tribute to the men who belong, and their grand master, Brother Otto Gehrig.

The Masonic lodges of New Jersey have long been known for their outstanding work to humanity. And, as you will note, Mr. Speaker, their good deeds are not confined to the borders of New Jersey. No matter where the need, the Masonic lodges of New Jersey have been there, reaching out to aid and console.

The following have received one of four of the grand master's "Community Action Awards," certificates that Most Worshipful Brother Gehrig has presented.

The first such award went to Alpha Lodge No. 116, for the 20 years of service they have contributed to the East Orange Veterans' Hospital.

The second award was made to Harmony Lodge No. 18, in Toms River. This lodge made a pledge to the local hospital 3 years ago to contribute \$6,000, and fulfilled this pledge in fall of last year. In order to maintain a fund to be used for community and charitable projects, Harmony Lodge has adopted a lodge bylaw which assesses each member \$1 per year for this purpose.

The third presentation was made to North Arlington Lodge No. 271 in the community of the same name. This lodge received the award because they orga-

nized a project and sent 7½ tons of clothing and household goods, in two separate shipments, to Wilkes-Barre, Pa., to assist flood victims in that community.

In addition, the grand master has a "Masonic Community Charity Fund of New Jersey," which provides funds to the local lodges where compelling and unusual events happen. This fund in no way is meant to replace the programs the lodges have now, but rather, is meant to supplement their activity. If used, the lodge gets the credit.

There has already been one instance in the Tuckahoe area where a tragic fire completely burned out a family killing one child and severely burning another. Donations by the local lodge, district masters and wardens, and the fund, were "pooled" and the total reached \$1,000. This amount was presented to the family within 36 hours after the tragedy. It is the aim of the grand master to get there first when help, aid, and assistance is really needed, and not to wait until some project is started by the local community. The grand master feels that if the local lodges take part in this type of activity it will prove to the profane that masonry in New Jersey is truly a charitable and benevolent society whose aims are to practice outside the lodges those principles that are taught within them.

Again Mr. Speaker, I commend the lodges of New Jersey, and can only say that I am extremely proud to be a member among them.

SUPREME COURT TIMID IN RULING ON OBSCENTY

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. DERWINSKI. Mr. Speaker, it is not unusual for Members of this body, representing their constituents across the country, to comment on a number of questionable Supreme Court decisions.

Rather than prepare my own comments on the subject, I insert into the RECORD at this point an editorial by Harry Sklenar, editor of the Desplains Valley News, an independent publication which serves a number of suburbs in southwest Cook County, Ill., which is, I believe, a very fascinating and correct observation on the recent Supreme Court decision relating to obscenity.

The article follows:

OBSERVATIONS

This week, the U.S. Supreme Court, by a 6 to 3 unsigned decision ruled that a "lewd and obscene" word (blank) published in an underground university newspaper by a girl editor was not sufficient reason for her being expelled from the university.

Chief Justice Burger held that the decision was "bizarre" in that the majority of the judges declined to spell out the foul language in question. In each instance, the word in question was deleted by (blank).

Now what nasty word could a girl publish which none of the six majority judges dared to repeat? Aren't you a bit curious? Or the amount of time attorneys for and against

the case spent in bringing the issue to the Supreme Court, or of the time the Supreme Court spent on the issue of obscenity in relation to free speech?

Perhaps in time public taste will be so shocked by obscene words that they will upgrade their cultural standards and cease reading obscene novels, viewing obscene nudity as "art," and those (blank), (blank) (write your own obscene words in the blanks) words will cease to exist.

IN MEMORY OF HENRY T. MCKNIGHT

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. FRENZEL. Mr. Speaker, the late Henry T. McKnight of Jonathan, Minn., was a man who worked effectively both for environmental preservation and realistic community development. Minnesota and the field of community development lost a great champion when he died in December. His record in this field and as a Minnesota State senator deserve recognition by the Nation and its Congress. Consequently, I introduce into the RECORD a fitting editorial tribute from the Minneapolis Star, January 3, 1973. I remember Senator McKnight with great personal fondness and admiration. He and his work will be sorely missed:

The editorial follows:

HENRY T. MCKNIGHT

Henry T. McKnight was aware that his twin careers as an environmentalist and real estate developer were seemingly at odds. And, in truth, his attempts to combine the two sometimes drew challenges to his motives.

But his record on behalf of conservation causes—in private life, as a member of the National Agricultural Advisory Commission under President Eisenhower and as a Minnesota state senator—offered ample evidence of his commitment. He was chief author of Minnesota's 1963 natural resources act and the 1969 bill for parks, open space and floodplain management.

His most spectacular achievements,

though—the ones for which he may be best remembered and which may best represent his resolution of the developer-environmentalist "conflict"—were the successful launchings of the new towns of Jonathan and Cedar-Riverside. He saw new towns as protectors of the environment because they enable growth to be channeled where it will fit, minimizing land waste while still providing the quality of life that people want.

In many ways McKnight was a visionary. But he also was a man who, until his death last week at age 59, had the personal resources and business and political acumen to convert his dreams into realities that others might share.

AVERAGING OF TAX EXEMPT INCOME PROVIDES BENEFITS TO THOSE WHO CAN AFFORD IT

HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. VANIK. Mr. Speaker, it is shocking that the tax code provides a "double whammy tax gain" to those who use the benefits from income averaging when they cash in on tax free investments.

The wealthy recipient of tax exempt income receives double tax benefits when he calculates his gain so that it is realized in certain years, averaging his income into lower tax brackets.

The original intent of income averaging was to provide tax relief for those who for reasons beyond their control, have income fluctuations from year to year. I support this equitable concept. The most common examples are those whose jobs are dependent on weather conditions or who depend on sporadic short-term employment. The averaging provision applies a mathematical procedure which generally spreads excessive income over the previous 4 years and taxes it at a lower rate.

The following is an example of an individual who receives his tax exempt bond interest over a 4-year period and decides to cash in on the fifth year, switching to a taxable yield. On the fifth year he files a joint return with his wife and averages his income. A description follows:

Year	1	2	3	4	5
Tax-exempt interest 1.....	\$100,000	\$100,000	\$100,000	\$100,000	0
Taxable interest 1.....	0	0	0	0	\$150,000
Other income.....	20,001	20,001	20,001	20,001	20,001
Other deductions and personal exemptions.....	20,000	20,000	20,000	20,000	20,000
Taxable income.....	1	1	1	1	150,001

1 \$2,000,000 at a 5-percent tax-exempt yield equals \$100,000. \$2,000,000 at a 7.5-percent taxable yield equals \$150,000.

Note: See following table:

	Year 5	Joint return tax with averaging
Averageable.....	\$150,000	\$39,402
Base amount.....	1	
Total.....	150,001	
Less taxes.....	39,402	39,402
Total.....	110,599	

After tax income is about \$10,600 more than when invested in tax-exempt bonds.

It is disturbingly unfair that such manipulations and double windfall benefits are only available to those who are already wealthy. The taxpayer used in my example gained \$10,600 by using this double tax benefit.

To correct this inequity in the law I am today introducing legislation which requires that tax exempt income be added back into the average base period for purposes of computing the current year's averageable income.

I will attempt to see this bill adopted into the tax reform act that is presently pending before the Ways and Means Committee.

FREEDOM OF SPEECH VITAL TO ALL CITIZENS

HON. ANTONIO BORJA WON PAT
OF GUAM

IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 28, 1973

Mr. WON PAT. Mr. Speaker, the Joint Committee on Congressional Operations today winds up its hearings on an issue of vital importance to all citizens: Freedom of speech. Although this precious freedom is under attack in certain segments of our society, as it always has been throughout history, the joint committee has been concentrating their attention on the right of Members of Congress to speak out freely as part of our responsibilities to our constituents.

I, therefore, heartily endorse the underlying purpose of the hearings before the Joint Committee on Congressional Operations, which is to clarify and solidify the immunity from questioning and prosecution of Members of Congress for their utterances in debate and performance of their other vital legislative activities.

The Constitution of the United States, article I, section 6, clause 1, provides that:

... for any Speech or Debate in either House, the Senators and Representatives ... shall not be questioned in any other place.

The preconstitutional history of this clause clearly demonstrates that the framers of the Constitution intended to protect the Members of Congress from harassment and prosecution by the executive branch in response to unfavorable comments made by Members in congressional debate.

The framers relied upon lessons learned from English Parliamentary history. Efforts by the King to stifle Parliamentary debate by jailing and prosecuting Members of Parliament resulted in revolution, and renewed assertion of the Parliamentary privilege that—

... The Freedom of Speech, and Debates or Proceedings, ought not to be impeached or questioned in any Court or Place out of Parliament.

These lessons were especially bitter to James II, who lost his throne, and to Charles I, who lost his head, after tampering with the rights of members of the House of Commons and House of Lords to speak their minds freely on the floor of Parliament.

Such was the determination of the framers of the Constitution to avoid vio-

lence and bloodshed over the congressional right of free debate that the speech or debate clause was adopted without discussion or dissenting vote. And to their credit, no such blemish on the history of the United States has ever erupted. Yet, even though acts of violence between branches of the government are completely foreign to the United States, the protection of congressional free speech should be no less scrupulously preserved.

For this reason, I favor legislation which would redefine the speech or debate immunity, in light of recent Supreme Court decisions which seemingly allow the President to impede by indirect methods the ability of Members of Congress to perform vital legislative activities.

While a Congressman is still free to say what he pleases in floor debate and in committee, the Government can harass the sources of his information and those who attempt to privately republish a Congressman's utterances for wider circulation. While a Congressman's legislative activities are still immune from question, his promises to perform such activities are not.

I would also like to urge that the proposed legislation make it clear that a Delegate to Congress and a Resident Commissioner enjoy the same speech or debate immunity as a Representative in Congress. Although the Constitution does not clarify this point, it should be noted that except for the right to vote on the floor of Congress, a Delegate and Resident Commissioner possesses practically every other privilege, and bears every other burden and responsibility, that a voting Member does.

With great commendation to the purpose of these hearings, let me express the hope that from this forum will emerge meaningful disclosures, resulting in well-wrought and purposeful legislation on a subject vital to every Representative, Resident Commissioners and Delegate to the Congress of the United States.

SPEEDY TRIALS

HON. WILLIAM J. KEATING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 28, 1973

Mr. KEATING. Mr. Speaker, David Brinkley of NBC News recently talked about some of the problems associated with delays in bringing criminal defendants to trial. His comments were incorporated into the regular broadcast of the NBC Nightly News program, thereby focusing public attention on the need to implement the constitutional guarantee of speedy trials.

As Mr. Brinkley points out, implementation of this guarantee would certainly be an effective deterrent to crime. It would deter crime through the prompt incarceration of guilty defendants. It would deter crime through assuring a clear connection between the commission of a crime and the imposition of an appropriate sentence. And it would deter crime by guaranteeing the conduct

of trials while witnesses are still available, memories are still fresh, and the defendants themselves are under closer supervision by law enforcement authorities.

Speedy trials would unquestionably benefit the public interest, the victims of crime, and the defendants themselves. When the time between arrest and trial is delayed for long periods of time, as it often is, defendants remain free to commit additional crimes, witnesses are subjected to lengthy periods of uncertainty and inconvenience, and the innocent languish in jail only to await either an acquittal or a dropping of the charge.

Mr. Speaker, on February 27 of this year, 12 of my colleagues and I introduced in the House a bill to guarantee the implementation of speedy trials. This bill, H.R. 4807, would accomplish the following objectives if enacted into law:

It would require the trial of all criminal defendants within 60 days of arrest or a filing of information, whichever occurs first;

It would restrict the number of continuances to be made in the disposition of criminal cases, and require other new procedures to speed up the overall administration of justice;

It would authorize the Administrative Office of the U.S. Courts to make payments to those federal districts which require immediate funds to implement the provisions of the bill;

The bill would authorize the Judicial Conference of the United States to consider and report on possible changes in the Federal Rules of Criminal Procedure and the United States Code which would further improve the judicial system;

The bill would also authorize the Judicial Conference of the United States to analyze the impact of this legislation on the detention facilities in the country and to make appropriate recommendations;

Finally, the bill would call for the establishment of pretrial service agencies on a full-time operational basis, thereby increasing the supervision of persons who are not incarcerated prior to trial.

Mr. Speaker, I believe the recent remarks of Mr. Brinkley were most timely and appropriate, and should be printed in the RECORD:

NBC NIGHTLY NEWS, MARCH 14, 1973

The President wants return of the death penalty in certain Federal crimes, leaving the States to decide if they want it. One State (Florida), already has. Others may. The Gallup Poll shows rising public support for it.

So, Congress may pass Mr. Nixon's bill, because the public support seems to be there. It is there because people in and around the big cities (which is most people), are victimized by murderers, rapists and robbers.

And despite some tinkering with the figures, violent crime has increased without interruption.

But will restoring the death penalty be of any help? No one knows. It is not proved either way.

Executions are sensational whether or not effective. There is another way, not sensational, that certainly would help: quick trials.

Here yesterday, there was a robbery and one killed and six people shot. Two of those arrested were out on bond awaiting trial for another murder.

One of those charged with robbing and shooting Senator Stennis was out on bond awaiting trial for two previous robberies.

To stop that . . . and also to avoid keeping accused people in jail weeks, months and years awaiting trial . . . the answer is to deliver what the Constitution already promises: speedy trials.

The British do it much faster than we do and their crime figures are better than ours.

Ideally, one arrested for a crime tonight should be tried tomorrow morning. If he's innocent, he's out by noon. If guilty, he's locked up in time for a jailhouse lunch.

It would cost a little money, but less than a new aircraft carrier . . . and certainly more useful.

And it would require lawyers, judges and the courts to change their work habits, attitudes and procedures . . . and require an overhauling and simplifying of a criminal court system that is slow, cumbersome, complex and expensive . . . and not a moment too soon.

John—

WELFARE SCANDAL—IV

HON. VERNON W. THOMSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. THOMSON of Wisconsin. Mr. Speaker, welfare fraud continues to blight our humanitarian efforts to provide assistance to the needy. Not only is the system an inefficient method of delivering aid, overpaying some and shortchanging others who deserve assistance, but the system is easily abused by those seeking undeserved aid.

Today I am inserting a fourth segment of an investigative series of articles on the fraud, waste, and mismanagement of the Milwaukee County Welfare Department which appeared recently in the Milwaukee Sentinel. The authors, Miss Gene Cunningham and Stuart Wilk, allege that about \$1 in \$5 appropriated for public assistance is wasted through fraud or maladministration.

Examples of fraud by recipients in this segment of the series show how simple it is for those with deceptive intent to defraud welfare administrators. One man applied and received aid under 21 different names. Other abuses testify for the need for reform.

If we are to devise a welfare system that is fair both to the truly needy and to the taxpayers, some drastic overhaul and procedure tightening is required—and soon.

The article follows:

[From The Milwaukee Sentinel, Feb. 28, 1973]

AID SYSTEM INVITATION TO DECEIVE

(By Gene Cunningham and Stuart Wilk)
The Milwaukee County Welfare Department has locked itself into a system that invites—and gets—fraud.

In 1972, the Sheriff's Department Fraud Squad uncovered 207 welfare fraud cases—totaling \$354,731.

"This is only a small percentage of it," said Sgt. Daniel Richardson, a veteran member of the squad, set up to investigate welfare fraud.

As of late last year, the squad's files were clogged with a backlog of 1,275 suspected welfare fraud cases. It's too much for the five man squad to keep up with.

Occasionally, a spectacular case will find its way into the courts and will stir the ire of the public.

Take the case of Mrs. Loretta Mae Nichols, the Cudahy woman who reported that her furniture was stolen from a moving truck en route to her new home.

The department promptly obliged Mrs. Nichols by issuing a check for new furniture—\$1,201 worth.

The fraud squad later discovered the furniture was never stolen, Mrs. Nichols, it turned out, had put it into storage.

SHE HAD JOB

Then it was learned that she was employed and was not reporting the income to the department.

The amount of the fraud came to \$2,062. Mrs. Nichols was ordered to make restitution and was put on two years' probation.

Sgt. Richardson can spend hours reciting similar cases.

Supervisor William Nagel, head of the County Board's Welfare and Human Resources Committee, goes into angry tirades about welfare fraud.

Caseworkers and aides complain that the prevailing departmental attitude is to "give a client what she wants, but keep her out of my office," as one administrator said.

CALLS PROBLEM MINOR

Meanwhile, Welfare Director Arthur Silverman—whose 1% estimate of total fraud is significantly below the findings of the most recent study on the subject—strenuously insists that fraud is a minor problem.

But the fraud squad, county supervisors and many caseworkers, aides and welfare administrators tell a different story. They claim that fraud is indeed a major problem.

The losers: the honest welfare client, the frustrated caseworker, the county's taxpayers.

Nagel's committee has probed the county's welfare fraud situation over a period of years.

It was his committee's 1969 study that estimated 20% of the budget was being dwindled away in fraud and "administrative error" in Aid to Families with Dependent Children (AFDC), the department's largest category of aid.

Nagel held that there is reason to believe that the figures apply to every category of aid in the department.

ESTIMATE OF LOSS

That would mean that last year alone about \$28 million was wasted on false claims and bureaucratic inefficiency. It would mean that this year the figure will climb to about \$30 million.

Where does it go?

Some examples:

It went to a man who had applied for assistance under 21 different names—and received aid under each of them until he was found out.

It went to a man who was receiving aid under general assistance, and who then returned to the department dressed as a woman and received aid under AFDC.

It went to a woman who was working as an "exotic dancer" at a tavern owned by her husband—while the department sent her welfare checks because she was "unemployed" and "deserted," a welfare worker reported.

It went to a woman who collected \$1,552 from the department while she earned \$953 in unreported income from the convalescent home where she worked—until the fraud squad got on the case.

It went to a woman who moved from Milwaukee County to Michigan—but continued to receive welfare checks for a year and a half after she moved. Her sister merely went over to the woman's former residence, picked up the checks and mailed them to her.

It almost went to a family who moved into a house but "couldn't afford" to buy furniture. The family asked the welfare department for money for furniture. The landlord told the department that "something fishy" was going on. All the household goods, the landlord said, were stashed in the garage.

It might have gone to the family that held a "rummage sale" of household possessions one Saturday afternoon. "Then they'll be in and apply for new stuff," said the disgruntled case aide who witnessed the sale. And, he said, the department would probably go ahead and issue a grant for the family's "special needs."

Meanwhile, the clients who are in legitimate need—and must live within the confines of the department's normal allotments—are the ones who suffer.

Theories—and platitudes—on how to cure the department's woes are plentiful. But few agree on how to solve the fraud problem.

MANY DISPARITIES

The lack of agreement extends to those who set and carry out policy. Between the workers, administrators, state and federal officials and the local district attorney's office—there are hopeless disparities in defining the fraud problem, agreeing on what is being done about it and determining how to cure it.

For instance, John Casey, supervisor of Staff Resources for the welfare department, told a reporter that in fraud cases "many have a restitution agreement (with the district attorney's office) . . . They will pay back in lieu of prosecution."

But Asst. Dist. Atty. Allan Love, who has handled welfare fraud cases since last June, said that he has stopped working out repayment agreements.

Welfare recipients once were allowed to pay back the money they had pilfered, "if the amount was not big," Love said.

Now, he said, the philosophy is that if a crime is committed, it should be prosecuted.

INTERVIEW CONDUCTED

Casey said, however, that the recipient and the caseworker appear before the district attorney for an interview and "determine whether to prosecute or to give (the recipient) the opportunity to make repayment."

There are also contradictions in statements concerning whether the federal government shares in the loss on fraud.

Silverman told The Sentinel that since the grants, which turned out to be fraudulent, were made in "good faith" by the department, the federal government will share in the loss if the county can't recover the funds.

But George Rowland, director of the Bureau of Audits and Accounts, Division of Family Services, State Department of Health and Social Services, said:

"There's no sharing on fraud claims, or detected cases of fraud."

George Trewartha, director of the Bureau of Program Planning and Development, Division of Family Services, State Department of Health and Social Service, shared Rowland's view. He agreed that there is no sharing on fraud.

A spokesman for the Department of Health, Education and Welfare (HEW) also said there is no federal sharing in fraud cases.

"The federal government does not pay for these kinds of errors," said Lee Feldman, assistant regional director for public affairs in HEW's Chicago office.

Thus the county apparently ends up paying 100% of the costs.

But the welfare department has yet to acknowledge it, control it and—ultimately—make a forceful stab at eliminating it.

POW'S REVIVE SPIRIT OF AMERICA

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. BOB WILSON. Mr. Speaker, as the first prisoner of war stepped off the

plane at Clark Air Force Base and proclaimed "God Bless America," millions of Americans watching this event on television reaffirmed their own belief in the strength and goodness of our great Nation. Efforts have been made by some antiwar activists and certain members of the media to demean the sincerity of this pronouncement, but subsequent statements by the returned POW's have upheld their original proclamation. We have all received a great renewal of patriotism from the POW's and I ask unanimous consent to include in my remarks the following editorial from the San Diego Union.

[From the San Diego Union, Mar. 8, 1973]
A SIMPLE LESSON IN PATRIOTISM: POW'S REVEIVE SPIRIT OF AMERICA

When the first returning American prisoners of war set foot on Clark Air Force Base in the Philippines, they said, to a man, in one way or another, God bless America. For the most part citizens of the United States of America responded in kind.

Ours, however, is a pluralistic nation and there were those who had reservations about the genuineness of the POW emotions. Numbered among them are the Jane Fondas and the Ramsey Clarks—professional anti-Vietnam agitators who expected the former POWs to criticize their country and its President. The POWs have done neither.

In still another league are the reporters in some of the nation's largest news media who found the unabashed patriotism of the former POWs contrary to their preconceived notions of how the men would act. This thinking is represented in the opinions of one correspondent who wrote from Clark Air Force Base that there could be three reasons why "the American prisoners freed by the Communists have come home to the theme God bless America" . . . which has set the stage for "unchallenged patriotism."

He suggests that the return of the POWs is one of America's "undisputed achievements" in the war, the only symbol of "victory." Additionally, he believes that the men were blessing America fervently because they "were predominantly career officers and fighter-bomber pilots—probably the most enthusiastic of America's warriors." Finally, the correspondent suggests that the men may have been programmed as to what to say—brainwashed and kept at arm's length from the inquiring press.

A lot of water has gone under the bridge since Feb. 19. The original delegation of 163 prisoners has had many opportunities to talk to the press. Some have returned to their home towns. All have had a great deal of public exposure; an opportunity to speak freely. All still are saying God bless America as passionately as they did nearly a month ago.

What is more, an additional 140 prisoners shared the homecoming experience this week. Many of them are not career officers or bomber pilots, but all are saying God bless America, let us appreciate the great nation that we have. None is shy about his patriotism.

The simple, sincere responses of the returning men have warmed the hearts of all Americans and given us many new perspectives.

Not the least of these is that the people who have for so long questioned the sincerity of the American purpose in Vietnam or the intelligence and honesty of our prisoners of war may have suffered a little brainwashing of their own.

URBAN MASS TRANSPORTATION

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. CRANE. Mr. Speaker, as a member of the Mass Transportation Subcommittee of the Banking and Currency Committee, I intend to take a special interest in sensible transit development in the United States and elsewhere.

My position on Federal urban mass transportation legislation is quite simple. I do not believe the Federal Government ought to be involved in funding an area which belongs so clearly to local or State jurisdictions.

However, the Federal Government is involved. As long as the taxpayer's money is being spent, and at this time it is being spent to the tune of \$1 billion per year on urban transportation projects, then it shall be my aim to see to it that this money is spent as wisely as possible.

I expect to look into a number of pending projects as to their economic and technical feasibility. I believe President Nixon is serious when he says that he wants to end wasteful and uneconomical programs in Government. I hope to be of some assistance to this general effort in the area of urban transit where I think some legislative oversight is in order. I am sorry to say that few in Congress have paid much attention to this program, especially since it was enlarged with the passage of the Urban Mass Transportation Act of 1970. I intend to make it my business to see to it that, at the very least, boondoggle-type projects are avoided.

Speaking of sensible transit development, I should like to call to the attention of my colleagues an article in the October 1972 edition of *Modern Tramway*, a British publication. It details progress on the Dayton, Ohio, light rail project which strikes me as making a good deal of sense. I include this article in the RECORD at this point:

NEWS FROM DAYTON
(By P. J. Walker)

On Wednesday June 8, 1972 the Montgomery-Greene County Transportation Coordinating Committee—an embryonic regional transport authority—authorized the appointment of two consultants to study the feasibility of a light rapid transit system for Dayton, Ohio, at a cost of \$35,000. This event is due almost entirely to the work of a voluntary body of citizens who last year fought to oppose the recommendations of an earlier study in favour of segregated busways. Such a success for the pressure of informed public opinion deserves full mention in *Modern Tramway*, and we are particularly happy to relate this success story.

Dayton is a prosperous manufacturing town of 264,000 inhabitants, surrounded by a rich agricultural area. It is of interest as the first large municipality to employ a city manager to administer its development, and also as the last medium-sized trolleybus stronghold in the United States. Despite its lack of railborne rapid transit, the bus and trolleybus undertaking is a progressive one and, even today, public transport plays a much greater part in the life of the community than in most American cities.

As part of a regional transport plan, a study was made in 1962 of the future role of

public transport, which recommended improvement of public facilities. The study rejected a heavy rapid-transit system for Dayton, but it was suggested that a partially-segregated light rapid-transit rail route could have a positive influence on the growth of the region. There is no indication that this suggestion was taken very seriously; by 1969 it had been virtually abandoned in favour of improving bus and trolleybus services at a fraction of the cost.

On July 1, 1972, the consultants, Vogt Sage and Pflum, produced their feasibility study for segregated busways, partly to replace trolleybuses and partly (in theory at least) to give public transport a better chance to compete with the private car. The consultants nevertheless expressed doubts about the capacity of the busway to attract new patronage from the private motoring sector, and their most optimistic ridership estimate was 10,000 to 15,000 passenger trips per day. Since the modest cost of creating these busways could hardly be justified by this low traffic volume, Vogt Sage and Pflum studied the benefits to be gained from allowing motor cars carrying three or more persons to use the busway at peak hours, concluding that about 1,000 cars would thereby be able to reach the city centre without hindrance to or from other traffic. If two-occupant cars were allowed on the busway, the predicted flow would reach about 4,500 vehicles each rush hour. In this way, the consultants inferred that a busway could be justified only if it were not a busway at peak periods. In effect they were recommending not a busway but another fast highway with private cars in the large majority. While such a conclusion was perhaps logical in a motor-oriented community, it made nonsense of the official policy of improving public transport in order to reduce the problems caused by too many cars in the city centre, and the authorities could hardly have been happy with the result of the study.

Certainly some members of the public were appalled by the proposal, and so they set about to produce their own counter report as quickly as possible. Within days an alternative plan was established for adopting under-used railway lines and building new tracks to form an extensive light rapid transit system for the area, similar to the earlier suggestion of 1962.

THE DART REPORT

By October 1, 1971, a 219-page report was prepared, undoubtedly the most impressive document on rapid transit ever produced by a voluntary body, covering in detail every aspect of its proposals and, incidentally, proving that its authors were better versed in the problems of transport than the consultants previously hired to advise the public authorities.

Entitled "DART (Dayton Area Rapid Transit)—The Coming Way To Go," and appropriately prefaced by Lewis Mumford's relevant adage that "cities exist not for the constant passage of motor cars but for the care and culture of man", the report begins by outlining the objectives of a public transport system. Its first function is to enhance the importance of the central business district (and thereby its rate revenue) and to create conditions in which the whole urban community can grow properly. A high-capacity rapid-transit system can ensure that new shopping and office development in the city centre is a commercial proposition, whereas the further decline of public transport in Dayton would cause new investment to be dispersed in the surrounding area, to the detriment both of the city itself and of its environs.

Particular attention is given to a proposed covered shopping mall which would form the focal point of the city, and several illustrations are reproduced of a similar scheme to revitalise the city of Buffalo, New York by such a shopping precinct. The proposed DART rail route would run through the

shopping mall, either in a shallow subway or on the surface. Close by would be a convention centre, while new office development would be concentrated in the immediate vicinity. The trolleybus system would remain, but as a complement to the rail system, its role being enhanced by the new building development. Highways would not be neglected, but their function would be redefined, while park-and-ride facilities on the DART lines would reduce the volume of traffic causing congestion on the highways.

The second section of the report describes in detail the proposed DART plan, after discussing how light rapid transit offers a better solution than the busway proposals put forward by Vogt Sage and Pfum. Quoting many eminent authorities in the United States and Canada, the importance of achieving a healthy balance between public and private transport is stressed, and convincing evidence is given of how rail transit investment has paid for itself many times over in terms of property value and rate revenue. Next the light rapid transit concept is described, followed by a discussion on vehicle types. Examples of many modern vehicles are illustrated and special attention is given to development work by the MBTA of Boston on the suitability of the Hannover U-Bahn car design for renewing PCC trams on existing American tramways. In addition to many more eminent authorities, the present writer is honoured by some quotations in this section.

Possible alternative modes of transport are reviewed, with the sensible conclusion that the only possible contender is the segregated busway. Here, convincing evidence has been obtained to show that busway operating costs are high. M. E. L. Tennyson, Deputy Commissioner of Philadelphia is quoted as saying that operation in Cleveland of a 80-seat rapid-transit car costs \$0.92 per mile compared with \$0.97 per mile for a 53-seat bus, while the railcar could seat 100 passengers if the spacing were as uncomfortable as in the bus. The report also quotes the disappointing results when the centre reservation of the former Ardmore tram route was converted in 1966 into a busway. Within one year, peak-hour ridership had declined by 11 per cent in the mornings and 14 per cent in the evenings, while journey times had increased by 17 per cent. Revenue increased from \$6,832,280 to \$6,980,415 from 1966 to 1967, but costs rose from \$7,320,363 to \$8,144,543. After losing 15 per cent of the traffic immediately following the change, five buses were still required to do the work that four railcars did better!

On the relative attraction of rail and bus modes, Mr. Tennyson is again quoted. *"On a national basis, the record shows that rapid-transit served cities attract 50 per cent more riders per capita than bus-only cities. In fact, there are more bus riders in rapid-transit cities. The same record shows a 50 per cent decline in ridership in bus-only cities as compared to rapid-transit cities."*

Several incorrect or misleading statements in the Vogt Sage and Pfum report are next dealt with. The fact that light rapid transit was overlooked as a possible alternative mode to the busway is rightly criticised, and the firm's assertion that new trolleybuses were not available is disproved on the simple evidence that a new Canadian-built vehicle was already running in Dayton, while the same manufacturer is negotiating an order for 210 new trolleybuses for San Francisco. Claims that electric vehicles cause more pollution than the diesel bus were challenged by evidence from Dayton and Philadelphia to the contrary, to which we refer elsewhere in this journal.

The proposed route pattern is next described, followed by a section on service speeds and frequency. A novel feature of the presentation here is a prototype publicity folder with a map and timetable of the projected first stage. To demonstrate how rapid transit can attract new passengers, the report quotes evidence of experience on the

Skokie Swift line near Chicago, where over 50 per cent of the riders formerly drove their cars on journeys now made by rail.

The first section of route proposed extends from the city centre to Centerville, about seven miles to the south. Construction costs are discussed in relation to costs quoted for the busway scheme by Vogt Sage and Pfum, and it is mentioned that capital costs for similar proposals in Rochester and Buffalo were found to be about 12 per cent dearer than an alternative busway. The report makes no attempt to predict actual capital costs or ridership, or the revenue that could be gained. Instead it keeps to firm ground by explaining that DART would attract more passengers and would cost far less to operate than a busway, and stressing that a detailed technical and financial study would be necessary to produce realistic estimates.

Apart from its immediate benefit to city-centre properties, the DART line would, the report shows, increase the value of factory sites along its line, and encourage new industrial development; labour would be more easily available and rail facilities would be retained and improved for freight traffic along the DART route.

The report concludes by recommending that consultants be appointed to evaluate the DART scheme, and that the firm responsible for the Buffalo shopping mall be commissioned to prepare similar proposals for Dayton. Other action recommended includes a study tour of modern European light rapid transit, consultation with officials in other American cities engaged on similar projects, and the loan of the proposed Düwag demonstration car, if it is ever imported, for static display. In addition, a committee should be formed to study the feasibility of the proposals for industrial development along the line and to investigate the need to modify new legislation now being framed to broaden the powers of regional transport authorities to allow for such industrial development.

A bulky appendix includes full copies of the many relevant documents quoted in the report, as well as a useful list of persons contacted in its preparation.

THE SEQUEL

Whether the Montgomery-Greene County Transportation Coordinating Committee was taken completely by surprise when it received this massive report we do not know, but we can be sure that it was pleased to get so much valuable material free of charge. The Committee must have been in a dilemma, having paid only four months earlier for a costly busway study which had been endorsed by its own technical advisors.

Very commendably, the Committee applied on December 28, 1971 for Federal approval for a new study into the feasibility of the light rapid transit proposal, and this approval was given by the Secretary of Transportation, John Volpe, on April 21 last, together with an instruction that purchase of part of the Penn Central Railroad right-of-way (intended for a busway demonstration) be deferred until the transport mode had been decided.

It remained for the Committee to authorise the appointment of consultants, which took place on June 7. Responsible for technical aspects of this study will be the firm of Louis T. Klauder and Partners, a company we have often mentioned before because it has been concerned with the design of new railway vehicles and equipment on many American systems. Economics and financial aspects of the study will be carried out by Peet Marwick Mitchell and Company, which, we assume, is connected with the British firm of accounts Peet Marwick Mitchell and Company, which is closely concerned, incidentally, with the finances of British Rail.

The authors of the DART report, Stephen S. King, Thomas S. Norwalk and James B. Rhinehart, are to be congratulated not only upon the outcome of their efforts but also upon the quality, quantity and the timing of

their prodigious work. By presenting their report so quickly, they were able to stop the ill-conceived busway proposal before it was too late, and to prove that public common sense can alter the misguided course of official policies in a democratic community.

It is expected that the consultants' study of the light rapid transit proposals will be completed in September. We look forward to being able to publish their findings.

AUTHORITY OVER FEDERAL BUDGET

HON. MARVIN L. ESCH

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. ESCH. Mr. Speaker, surely one of the most important issues facing this Congress is the question of authority over the Federal budget. Today in considering the matter of impoundment we are dealing with one very important aspect of this issue.

It seems clear to me and to most constitutional scholars who have testified on this subject that the power of the purse was to be vested in the legislative rather than the executive branch. Those who have spoken before me have adequately stated the case and it needs no further repetition.

However, those who have spoken before me are, as I have said, addressing themselves to only one aspect of this issue. I wholeheartedly agree that Congress should have authority over the Federal budget. Yet inherent in that authority is not only congressional control but congressional responsibility. Those who have voiced a concern over the usurpation of congressional authority have shown far too little concern over the lack of responsibility in their own House. I believe we have witnessed an increasing use of impoundment by every administration since Roosevelt, not solely because those administrations have hungered after more than their share of power in the constitutional scheme of things, but because the legislative branch has failed to live up to its own responsibilities. The Congress has on the whole refused to make the hard decisions of setting national priorities, staying within some kind of reasonable spending limitation and providing sufficient tax income to meet Government expenditures. We speak in lofty terms about reordering national priorities, yet year after year rather than reordering priorities, we simply add on new ones. The result has been a public debt which has increased by 60 percent in the last 10 years. It has been yearly deficits which increasingly contribute to inflation at home and critical scrutiny by governments abroad.

In an effort to bring congressional responsibility as well as congressional control to the Federal budgetmaking process, I am introducing what I believe to be a very necessary amendment to the bill before us today. The amendment calls for the Congress to fix by concurrent resolution a budget ceiling with respect to the next fiscal year. The Mahon machinery would then only go into effect during a fiscal year for which a budget ceiling has been adopted and observed by

Congress and when the President impounds any funds authorized within that congressionally approved limit.

I agree with many of my colleagues that the power of impoundment is at best constitutionally questionable and has certainly been unwisely used by both this and previous administrations. In the last session of Congress, I introduced a comprehensive bill, the Federal Fiscal Responsibility Act of 1972 which included a title very similar to the bill before us today. Yet I would argue today, as I argued upon the introduction of my own bill, that the question of congressional authority over the budget cannot simply be limited to the question of impoundment. Just as the Executive has

the responsibility to faithfully execute laws, so the Congress has the responsibility to allocate a limited number of dollars to many competing priorities. The decisions are necessarily difficult ones, yet they are the same that we expect of any family, any business or any university who have to live within a budget.

The establishment of a ceiling is a responsible request. It will give us better control over how Federal money is spent. Within an overall ceiling, we can determine which programs will be expanded and which reduced. When we add to one budget request, we know that we will have a corresponding duty to reduce another by comparable amount.

Mr. Speaker, I strongly support the efforts that the Congress is now undertaking to reassert its constitutional prerogatives. However, I am also strongly of the opinion that until the Congress starts to accept its responsibilities as well as its power, that power will be misplaced.

CONSIDERATION OF THE FEDERAL BUDGET BY CONGRESS

Since 1956, the budget has increased by over 300 percent. This tremendous growth of the Federal budget is best illustrated by the following charts. Chart 1 compares budget estimates and appropriations since fiscal year 1946. Chart 2 compares budget data since 1954 on a Federal funds and unified budget basis:

CHART 1.—COMPARISON OF BUDGET ESTIMATES AND APPROPRIATIONS BY SESSIONS OF CONGRESS

¹ Includes \$225,000,000 requested in 1965 for fiscal year 1966.

² Includes \$75,000,000 appropriated in 1965 for fiscal year 1966.

³ Includes \$937,500,000 requested in 1966 for fiscal year 1967.

⁴ Includes \$926,000,000 appropriated in 1966 for fiscal year 1967.

⁵ Includes \$900,000,000 requested in 1967 for fiscal year 1968.

⁶ Includes \$875,000,000 appropriated in 1967 for fiscal year 1968.

⁷ Includes \$1,055,000,000 requested in 1968 for 1969.

⁸ Includes \$995,000,000 appropriated in 1968 for fiscal year 1969.

⁹ Does not reflect additional reductions in controllable obligations effected pursuant to Public Law 90-218 (H.R. 888) estimated at \$3,400,617,000 on June 30, 1968. Reserves established \$6,075,520,000; reserves subsequently released, \$2,674,903,000; reserves remaining \$3,400,617,000. (See pp. 278-282 for detail.)

¹⁰ As in tables IV and IVa, VIIa, and VIIb, these totals are adjusted to exclude \$12,800,000,000 of interfund and intergovernmental transactions—see par. 4, "Compilers' Notes", p. 3. Budget estimates include \$2,835,000,000 requested in 1969 for 1970.

¹¹ As in tables IV and IVa, VIIa and VIIb, these totals are adjusted to exclude \$12,800,000,000 of interfund and intergovernmental transactions—see par. 4, "Compilers' Notes", p. 3. Appropriations include \$1,965,814,300 appropriated in 1969 for 1970.

¹² Totals adjusted to exclude \$13,915,525,000 of interfund and intergovernmental transactions—see par. 4, "Compilers' Notes", p. 3. Budget estimates include \$1,651,000 requested in 1970 for 1971.

¹³ Totals adjusted to exclude \$13,915,525,000 of interfund and intergovernmental transactions—see par. 4, "Compilers' Notes", p. 3. Appropriations include \$214,000,000 appropriated in 1970 for 1971.

¹⁴ Totals adjusted to exclude \$18,232,767,000 of interfund and intergovernmental transactions—see par. 4, "Compilers' Notes", p. 3. Budget estimates include \$188,011,000 requested in 1971 for 1972.

¹⁵ Totals adjusted to exclude \$18,232,767,000 of interfund and intergovernmental transactions—see par. 4, "Compilers' Notes", p. 3. Appropriations include \$150,000,000 appropriated in 1971 for 1972.

Note: Concept of "budget estimates" and "appropriations" as used in the above tabulations, beginning with the 90th Cong., 2d sess., differs to some limited general extent from previous tabulations, and significantly differs in respect to inclusion of trust fund appropriation amounts not included in this tabulation prior to the 90th Cong., 2d sess. See explanation, par. 4, "Compilers' Notes", p. 3. Also, beginning with the 85th Cong., 2d sess. (fiscal year 1959), figures exclude amounts relating to refunding Internal Revenue collections and sinking fund and other debt retirement funds.

¹ The unified budget concept includes both Federal funds and trust funds for receipts and outlays. Federal funds correspond roughly to the old administrative concept used by the Federal Government prior to fiscal year 1969. Federal funds are those which the Government administers as owner as distinguished from those administered in a trustee or fiduciary capacity (the trust funds). Historical functions of Government, such as National Defense, Veterans' Benefits, Commerce, Labor, Agriculture, interest on the public debt, and others are paid from Federal funds (tax revenue and borrowed funds). Income taxes (individuals and corporations), most excise taxes, estate and gift taxes, customs duties, and miscellaneous receipts are paid into the Federal funds accounts from which all Federal funds expenditures are paid. All trust funds receipts are paid into the specific trust fund accounts for which the revenue is earmarked. All trust fund payments are made from the specific trust funds accounts. Trust funds surplus receipts are invested in Federal securities (public debt or Federal agencies obligations). At the end of fiscal year 1971 the trust funds owned \$96,000,000,000 of public debt securities. Major Federal trust funds are: old-age and

survivors insurance, disability insurance, health insurance, unemployment, Federal employees retirement, railroad employees retirement, and the highway trust fund.

² Since the Second Liberty Bond Act of Sept. 24, 1917, the U.S. Government gross public debt has been subject to a statutory ceiling or maximum limit. Public Law 92-5, Mar. 17, 1971, established a debt limit of \$400,000,000,000 and temporarily increased the limit to \$430,000,000,000 through June 30, 1972. Since 1954 there have been 21 legislative measures increasing or extending the public debt limit. During this period the debt limit has been raised from \$275,000,000,000 to \$430,000,000,000. New legislation as expected in the immediate future to raise the public debt limit above the current level of \$430,000,000,000 so as to permit financing of the current budget deficit.

Sources: U.S. Office of Management and the Budget (selected budget documents). U.S. Treasury Department (selected Treasury reports).

With the tremendous growth in the Federal budget, Congress has lost more and more of the control it should rightfully exercise over the budget. A review of the total budget is an activity in which Congress no longer participates. If Congress required itself to establish an overall limitation on expenditures, this situation would change. Setting such a limitation would require Congress to consider the economic state of the country at the beginning of each budgetary cycle. It would encourage Congress to establish a comprehensive plan for Federal budget priorities.

We have heard a great deal of rhetoric lately about changing the Nation's priorities, but Congress cannot have a hand

in this process until it starts to consider the budget as a plan for action which makes basic choices between competing categories. Aaron Wildavsky, author of "The Politics of Budgetary Process," describes several different uses for the budget. He states that it is a financial document, a plan of "intended behavior," a statement of goals, a choice mechanism, and a contract. In recent years Congress has worked from the President's budget exclusively so that its adjustments have been made without reference to an overall congressionally established spending plan. The roles in the budget which include planning and evaluation are lacking in congressional

deliberation. This seems incongruous in light of the many thousands of hours of thought and work which goes into individual pieces of legislation which creates the programs the budget later funds.

In the last 5 years Congress has found it necessary to pass 29 supplemental appropriations bills. These represent several midyear corrections in Federal spending policy. However, they also represent a serious deficiency in congressional budgetary planning. In the last 9 fiscal years we have appropriated almost \$10 billion a year through supplementals. Chart 5 presents a record of supplemental appropriations since 1964. Chart 5A presents the cost of these supplemental measures for each fiscal year since 1964:

CHART 5.—A RECORD OF SUPPLEMENTAL RESOLUTIONS, FISCAL YEARS 1964-72 (SUPPLEMENTAL APPROPRIATIONS)

Number of bill	Reported	Passed House	Reported in Senate	Passed Senate	Reported to conference	Date approved	Law No.
Fiscal year 1964: 1. H.J. Res. 875 (HEW)	Dec. 14 (63) Rept. 1401	Dec. 19, 1963	Dec. 20, 1963	Dec. 21, 1963	(¹)	Feb. 10, 1963	88-268, 1963.

92-256	957,476,059	
(In conference)	4,347,698,270	
Total	8,982,059,700	

¹ These figures represent new budget—obligational—authority, not budget expenditures—budget outlays—which in addition to expenditures from new budget authority include billions of dollars of expenditures from carryover balances of appropriations made in previous years, and also expenditures from certain so-called permanent appropriations, such as interest on the public debt and a number of trust funds which Congress is not required to act upon at each session. Neither were release of reserves counted.

Source: Congressional Record—end-of-year tables titled "New Budget (Obligational) Authority in the Appropriation Bills, fiscal year —" and general discussion on the supplemental bills themselves.

We are dealing then with a complex problem and one that Congress must address itself to immediately. The Mahon bill begins that process by addressing itself to the important question of impoundment. But we must realize that more than the question of impoundment is involved. We speak in terms of returning authority, of returning the powers of the purse to the Congress. Yet simply reasserting its control over the budget by tightening up on the practice of Presidential impoundment is not the whole answer. Not until Congress truly deals with the Federal budget in a responsible

manner will we be truly facing up to the entire question of authority over that budget.

READING HIGH BASKETBALL: A
TRIBUTE TO THE RED KNIGHTS

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. YATRON. Mr. Speaker, I would like to share with my colleagues in the House of Representatives the remarkable performance of the Reading High School basketball team—the Red Knights.

The Red Knights completed their season with a 28-2 record last Saturday night as General Braddock High School spoiled my alma mater's second attempt at a Pennsylvania Interscholastic Athletic Association championship with a 63-62 win in Harrisburg.

Reading's Red Knights won more basketball games this year than any other team in the history of the school. The Reading five included among their championships the Central Penn League title, the district 3, PIAA championship, and the Eastern Pennsylvania PIAA class A championship.

Therefore, despite their loss Saturday, the Red Knights have more than proven themselves in Pennsylvania. I would like to express my pride in the team's accomplishments and to congratulate these outstanding athletes, their coach, Mr. James Gano, and Reading High School for earning the respect and admiration of Pennsylvanians everywhere.

This fantastic season was the result of outstanding coaching, excellent teamwork, and use of the full potential of Reading High senior, Stu Jackson. Stu finished the season with 1,563 career points—13 short of Reading's all-time scoring record—by setting a new PIAA class A championship scoring record Saturday night with 38 points.

While Stu Jackson's abilities contributed to the team's excellent performance, the fine athletic abilities of Mike Garman, Perry Wentzel, Cliff Durham, and Stan Cooper must not be forgotten. Also, substitutes Bob Van Buskirk, Bob Sakin, Jeff Giddens, Don Brown, Pete Pasko, John Covington, and Elwood Davis will be back next season, along with Cooper, to continue the legacy of Reading's basketball team.

Coach Gano and his assistants, Mark Braun and Mike Eckenroth, deserve much credit for the success of the 1972-73 Red Knights, as does Trainer Hoby Geesaman for keeping the team in tip-top condition.

Mr. Speaker, I would like to extend my sincere congratulations and best wishes to the Red Knights, Reading High School, and the five graduating seniors—Jackson, Wentzel, Hahn, Garman, Durham, and their combined career points totalling 3,422.

The memory of this extraordinary team will linger in Pennsylvania for many years to come and I wish every success to all who combined their talent,

sportsmanship, and moral character to bring hours of great basketball to Reading.

FLYING PRIEST HONORED

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. ADDABBO. Mr. Speaker, the Reverend Joseph H. J. Fox, chaplain of Our Lady of the Skies Chapel at Kennedy Airport in New York, was recently honored at a luncheon sponsored by the Air Industry. The recognition of Reverend Fox was well deserved and he has made many friends during his service as Catholic chaplain since the founding of the Tri-Faith Chapel at Kennedy Airport in 1966.

The following article which appeared in the March 11, 1973, edition of the New York Daily News contains some interesting facts about Reverend Fox's distinguished career and I commend it to my colleagues in the House:

FLYING PRIEST AT JFK WINS WRIGHT PRIZE

(By Arthur Mulligan)

The Rev. Joseph H. J. Fox, chaplain of Our Lady of the Skies Chapel at Kennedy Airport, was honored Tuesday at an Air Industry's Awards luncheon for "humanitarian goodwill." Those that know him among the thousands of employees at Kennedy would certainly agree that the choice was an excellent one.

The Rev. Fox has been Catholic chaplain at Kennedy ever since the new Tri-Faith Chapel was inaugurated in 1966. He is an honorary chaplain of the New York City Fire Department and chaplain of the Fire Department's Emerald Society. He has dedicated his life to aiding firemen who risk their lives in performing their own "humanitarian goodwill."

Airport chaplains are often referred to as sky pilots and, in the case of the Rev. Fox, the title is most apropos. Soon after his advent at Kennedy, he learned to pilot a plane and obtained a private pilot's license. Since then he has received a commercial pilot's license.

WEEKLY FISHING FLIGHT

He borrows a friend's plane about once a week and hops out to Montauk or up to Nantucket to go fishing. He said he can't afford a plane of his own.

As to his Fire Department affiliations, he has received numerous awards for his bravery at multiple-alarm fires. He shrugs these off with the remark, "If you come out all right, apparently it wasn't so dangerous." He says he has never done anything that any other fire chaplain wouldn't do.

Back in December 1960 he was at the scene of dual disasters, the plane collision over Brooklyn and the aircraft carrier Constellation fire, also in Brooklyn. He boarded the Constellation and administered last rites to a dozen men below decks who were burned or suffocated.

CRAWLED TO TRAPPED PAIR

On another occasion he crawled into the cellar of a burning factory building in Brooklyn after the collapse of upper floors trapped two firemen. He stayed with them until rescue squads dug them out.

At the luncheon, held at the International Hotel, the Rev. Fox was one of four recipients of the second annual Bishop Milton Wright Awards, named in honor of the Methodist bishop who was father of the Wright Brothers.

ers. The other recipients were astronaut Frank Borman, retired Port Authority executive director Austin J. Tobin, and Igor Sikorsky, the last a posthumous award.

The nonsectarian awards were established a year ago by the Chapel Council of the Protestant Chapel at the airport.

PROJECTED U.S. ENERGY REQUIREMENTS AND THEIR RELATED PROBLEMS

HON. DOMINICK V. DANIELS

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. DOMINICK V. DANIELS. Mr. Speaker, during this session of Congress, the House Committee on Public Works created a new Subcommittee on Energy. The new chairman is Representative JAMES J. HOWARD, of New Jersey, with whom I have had the pleasure of serving with for the past 8 years.

Congressman HOWARD chaired ad hoc hearings into the energy crisis last year and has been a leader in the House trying to resolve this problem which is, unquestionably, one of the most serious problems facing our Nation today.

Recently Mr. HOWARD addressed a national energy forum here in Washington. I have had an opportunity to read his speech and because of its importance to this Nation, I urge all Members and all persons who read the RECORD to take a few minutes to ponder on the question raised by the able chairman of the Subcommittee on Energy:

PROJECTED U.S. ENERGY REQUIREMENTS AND THEIR RELATED PROBLEMS

(Remarks of Representative JAMES J. HOWARD, before the National Energy Forum, Washington, D.C., March 19, 1973)

Energy is the life-blood of our society. Just as nothing lives without the sun, nothing operates without energy. Strictly speaking, anything with the inherent ability to perform work may be considered energy.

Today our primary energy sources are coal, oil and natural gas, with electricity as a secondary source. Human labor, once the mainstay of production, now provides energy for less than 1% of the work performed in factories, refineries and mills.

Because energy is absolutely essential to the welfare of the United States, the continuing availability of an abundant supply of energy is a matter of vital importance.

Properly, all consumers—business and private, large and small—should be concerned. It is the obligation of the administration, the legislature, and related industries to accord the highest priority to the matter of energy supply.

The core problem, then, is how to provide an abundant supply of energy to all. Our growing wisdom dictates resolution of this problem with minimal environmental deterioration. Further complicating the problem is recognition that energy is as necessary for the poor as it is for the rich. Therefore, energy must be available at a cost which is reasonable.

Resolution of the problem must begin with a knowledge of the facts. The facts are these:

Of the total amount of energy consumed in the United States, both in primary form and as electricity, approximately two-thirds is used for business-related purposes, and one-third for all private, non-business needs. The total amount of electricity currently generated is consumed in approximately the same proportions.

Expanding population is one of the factors contributing to increased demand. One Census Bureau projection estimates that our population will increase by 37 million between 1970 and 1985.

This population increase is further compounded by an increase in the concentration of people between the ages of 20 and 35, for it is in this age group that the greatest amount of buying is done.

Rapid economic activity will be required to satisfy their needs, and much energy will be necessary to "fire" that economic activity.

The importance of increased population becomes even more evident when we consider that the per capita use of energy has doubled within the last thirty years. It is expected to continue at an even faster rate in the future.

Improving environmental quality and furthering the social and economic welfare of the underprivileged will also be important elements in this increased per capita use.

It has been estimated that by 1985, per capita energy consumption may be nearly two-thirds greater than in 1970.

There are five major markets for primary energy sources. An analysis of these markets will give an indication of where projected demand increases are expected.

The first major market is transportation. The automobile is perhaps the greatest instrument of mobility in our society, and that mobility has brought with it a great many benefits. But also a great many automobiles! Multiplying like mechanical rabbits, it is estimated that four-fifths of the nation's households now own at least 1 car, and nearly one-third own two or more. To accommodate the nation's expanding needs for transportation, the total number of trucks and buses is likely to rise by 40%.

Jet travel will also be on the up-swing. The Federal Aviation Administration estimates that jet fuel demands will double between 1972 and 1982.

Therefore, the growth in the transportation market is going to be great; its energy requirements demanding. To be prepared for this growth, there will be a great need for planning, mass transportation, and more efficient engines.

To a major degree, the high standard of living achieved in the United States reflects the nation's productivity. Industry's enormous output of goods and services could not possibly be accomplished without the use of vast amounts of energy.

At present, the industrial market uses approximately 32% of the total energy market. By 1985, this is expected to decrease to 26%. This decrease could be somewhat misleading, however, as the shift will be mainly from dependence on the primary fuels of coal, oil and natural gas, to increase use of electricity. This shift is partially the result of natural gas shortages and partially for convenience.

Thus, industrial demand is expected to be 25% greater in 1985 than in 1970. Much of this increased demand will be filled by increased dependency upon electricity. The problems that this poses will be taken up later in this discussion.

Another sector making increased energy demands is the commercial market. It is the smallest market constituting approximately 5% of the total energy demand.

For the most part, the primary energy source utilized in the commercial market is for space heating. Other commercial requirements are satisfied almost exclusively by electricity. By 1985, the commercial market's use of primary energy will be nearly 75% greater than in 1970.

As was true in the commercial market, the residential market also uses the primary fuels, especially oil and gas, principally for space heating. However, more than one-third of residential energy requirements are satisfied by electricity.

As recently as 1940, wood still satisfied over 25% of residential needs, but coal had al-

ready taken over more than half of the market. After World War II, the low cost of natural gas made it increasingly attractive. Now, natural gas represents 52% of the primary energy used for residential purposes.

It is estimated that the cumulative use of energy in the residential sector will be 47% greater in 1985 than in 1970.

The final major market, the second largest and the fastest growing, is that of the electric utilities. By 1985, it is expected to be the largest of the five major markets.

Per capita consumption of electricity more than doubled between 1955 and 1970, and it is expected that the rise will be even greater in the next fifteen years.

Large quantities of electricity will be required for environmental purposes such as recycling, waste treatment, and enriching uranium fuels for power plants.

In 1970, approximately 49% of the primary fuel for utilities was coal; 24% natural gas; 15% hydroelectric; 11% oil; and 1% nuclear. In 1985, coal's role is expected to decrease to 8%; gas' role to decrease to 11%; hydroelectric to decrease to 8%; while oil's role is expected to increase to 17% and nuclear to rise to 35%. Thus, by 1985, nuclear power is expected to emerge as the primary fuel for power plants.

Oil was the largest source of primary energy in 1970, and it is expected to continue to be the largest source because its versatility allows it to be used in all five major markets. Of the over-all growth of the nation's energy needs between 1970 and 1985, oil alone is expected to accommodate half of the increased demand.

The five major markets (transportation, industry, commercial, residential, and utilities) vary substantially in size; however no single one can be considered more important than the others. All are essential. None can be denied an adequate supply of energy without impairing the nation's economy and its standard of living.

The obvious conclusion then, is that demand is going to rapidly increase, but the degree of increase cannot be adequately determined until supply projections and their problems are considered.

We must consider how to supply this increasing demand; or, in the alternative, how to effectively equalize this demand with available supplies, without seriously damaging the environment or disrupting the economy.

One of the most fundamental problems of determining the extent of our resources is the reliability of supply projections, especially since great reliance is placed on them in determining future policies.

In the past, supply projections have been misleading, and the significance of temporary shortages misunderstood. The East Coast black-out of 1965 was really no indication of supply problems, since its cause was a mechanical failure—not a fuel shortage.

In 1966, a White House study optimistically concluded that "the nation's total energy resources seemed adequate to satisfy expected requirements through the remainder of the century, at costs near present levels."

As recently as three years ago, a Presidential Task Force predicted that the United States would have to import no more than 27% of its oil by 1980; but we have already reached that level.

Projections such as these should make us wonder if the present supply-demand projections are perhaps as overly pessimistic as the past projections were optimistic.

Consequently, projections which don't inspire absolute faith are part of the problem. Perhaps an independent organization should be commissioned by Congress to reassess our supply needs on the basis of the most recent technology.

Further, revealing studies, at times, seem to be lost in the shuffle, or so it appeared with a more recent Presidential Task Force

Report recommending that the oil import program be abandoned.

Surely, it would have been in the public interest to have published the report so that its merits could have been discussed and evaluated openly before action or non-action was taken by either Congress or the Administration.

It is quite possible that Congress, in order to acquire universal acceptance of the extent of our problem, will consider allocating funds or specifically directing the Department of Interior to compile a completely independent study of our existing, probable and possible energy resources.

At present, the American people are not convinced that the energy industries are commensurately concerned with satisfying their responsibility to the public interest as they are to their stockholders.

The energy industry must be on notice that its responsibilities to the public interest are going to increase. It is hoped that it will not be necessary to legislatively educate companies in the duties of public utilities and public utility suppliers to the public interest.

If companies fail to make their requests for higher prices, etc., within the bounds that the public can absorb without a change in lifestyle, then the recent action of the Cost of Living Council in denying their price increases may become more common. But this would not be necessary if, for example, companies, in seeking price increases, would be as responsive to the public interest as they are to their stockholders.

For years, it was almost universally believed (with the possible exception of the oil interests!) that if something was good for the oil companies, it was bad for the country. Whether this "intuition" was true or not, and I am by no means implying that it was, the important fact is that a credibility gap exists between the oil companies and the public. This constitutes a serious underlying problem in working out the differences among industrial, governmental, and environmental interests.

As an example, although there is a growing recognition of the energy challenge, there seems to be a concurrent increase in the number of people who wonder whether or not the shortage is real, and, if a shortage does exist, whether or not it was caused, fostered, or permitted by the petroleum interests.

The veracity of this attitude is not relevant to this discussion. What is relevant is that in order to overcome the energy challenge, we must work together for the common cause of an abundant supply of low-cost energy available to all with minimal environmental deterioration. Yet our work would be for naught of the intended beneficiary of that work, the public, does not believe we are working in its best interest. Moreover, any type of distrust could seriously undermine the cooperation necessary among industry, government, and consumer.

I want to point out that "low cost" is relative. Low cost flows from paying a reasonable price that affords a reasonable profit—not a windfall to the seller. When the public is fully aware of the cost to the producer of what it is buying, it is willing to pay a price that includes a reasonable profit. It is part of our way of life that the laborer is worthy of his hire. I suggest, therefore, that if the producers were more open with the public, letting the public see in black and white, simply and clearly, what their true costs are, the public will pay. If what has to be paid cannot be afforded by some, it will then be up to the government to assist them.

So this distrust of producers and the problems it creates will be best quelled by complete sincerity on the part of energy related industries. They must make available the foundation of their reserve estimates. They must encourage the American people to conservation of energy rather than increased consumption. They must encourage manu-

facturers of energy related products from megawatt generators to toasters to produce reliable and efficient products. They must work with environmentalists at the onset of projects with openness and sincerity so that any necessary compromises with regard to, say, power plant siting, emission standards, coal mining, or oil pollution, can be arrived at without resulting in serious delay.

However, I am not implying, nor do I intend to imply, that the responsibility for solving the problems of the energy challenge lies solely with the energy industry.

Government, too, must play a crucial role. A comprehensive Federal energy program is necessary. This is somewhat impossible while Federal responsibility is dispersed throughout some 64 different Federal agencies. Federal coordination of responsibility and inter-agency cooperation will be absolutely essential to meeting the energy challenge.

Last August, I had the privilege of chairing hearings inquiring into the problems causing the energy challenge for the House Committee on Public Works. We were repeatedly told that although the delays in power plant construction were frequently caused by environmental difficulties, the most frequent problem seemed to be the bureaucratic red tape associated with obtaining construction and operating permits.

This problem has been most evident with respect to nuclear power plants. When we consider that they are being depended upon to fill the supply gap caused by diminishing reserves of oil and natural gas, this is especially disquieting. A way must be found to bring power plants to the production line quickly, while adequately considering and solving environmental problems.

Whether it be one-stop siting, an environmental arbitration board, or something else, progressive action must also be taken to relieve utilities of the burden of needing the approval of some 60 Federal, State and local agencies before a power plant can begin to operate.

I might also mention that during our hearings, the problem of changing emission standards was repeatedly mentioned. The testifying electric companies expressed a sincere willingness, though it involves great expense, to meet emission standards. However, they pointed out that in the last few years, emission standards have been changed so frequently that a generator, for example, selected for use in 1970, would not meet standards in 1973.

Serious and reasonable problems such as these must be given prompt consideration by both Congress and the Administration.

Another problem is the serious inadequacy of energy research and development funding. Setting aside the possibility of increased incentive for oil and gas exploration and development, greater funds must be appropriated for energy research ranging from the fast-breeder reactor to geothermal energy.

Prominent on the list of research possibilities are coal gasification and coal desulfurization. This country is very rich in coal deposits; coal desulfurization and gasification could reduce the supply problem while filling the gap left by diminishing reserves of domestic oil and natural gas.

The President's recent budget message called for a 20% increase in Federal spending for energy research and development and it is questionable whether this increase will be sufficient to implement the wide range of research necessary.

In the past, the greatest percentage of research and development funds has been devoted to the nuclear field, especially for fast-breeder development. Although this is an important area for research, the federal program should be far broader in scope in order to carry us through the problems associated with near and short term demands.

Not so long ago, a great man was considered by some a bit light-headed for suggesting that we could put a man on the moon

in ten years. Yet, with concentrated effort and great financial investment, it was accomplished.

A similar policy can and must be pursued with respect to energy resources. Not only do we possess the physical resources necessary, but we also possess the scientific brainpower to accomplish such a program. I often think of what the brother of that great man said: "Some men see things as they are and say, 'Why?' I dream of things that never were and say, 'Why not?'" I believe in that. I hope you do, too.

One of the more serious problems of the on-coming supply deficit involves our foreign policy. Our shortages come at a time when we may have to compete with Europe and Japan for Middle Eastern oil. This could lead to international cooperation as well as international strife. There is serious doubt as to the soundness of creating a massive balance of trade deficit. Furthermore, the Middle East is not a politically sound area upon which we can always depend.

There are also many problems associated with the transportation of oil from the Middle East. The question of superports and supertankers and the possibility of "super" oil spills; the increased cost of imported oil; the vast expense of superports.

Taken together, serious consideration must be given to whether it is really wise to invest such vast sums externally, or whether the majority of governmental and private investments should be made internally, bearing in mind the fact that beyond the year 2000, the world supply of oil may be relatively exhausted.

Those of us concerned with preserving the environment will also be presented with serious decisions in the future. Coming from the shore area of New Jersey, I know the beauties of this country. As a member of the House Public Works Committee, I have seen the destruction that can be wrought by large oil spills such as Torrey Canyon and Ocean Eagle.

In the years ahead, there may be a need for some environmental compromises. But we must remain steadfast in our determination to develop an abundant supply of energy that is compatible with safeguarding the environment.

The time is now for near-, short-, and long-range programs to meet the energy challenge at each stage of its development. The challenge is not only to our physical and mental resources, but also to our ability to unite all interest groups to a common goal.

Only through the development of sound programs can we continue to enjoy an adequate energy supply. Only with such a cooperative approach can we meet our energy needs without sacrificing our environmental aspirations. Only then can we insure that prices will be held to a reasonable level.

This is the goal of the Congress. It must also be the goal of the Administration, of the related industries, and of the environmentalists and consumers as well.

Working together, balancing the interests of all as equitably as possible, with serious and coordinated energy, economic and environmental planning, this country must again be united. It must be united as our pioneer families were united—each member of the family sacrificing a little for the well-being and happiness of all.

ENVIRONMENTALISTS, AEROSPACE INDUSTRIES JOIN IN EFFORT TO BREACH HIGHWAY TRUST FUND

HON. JOE L. EVINS

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. EVINS of Tennessee. Mr. Speaker, we can all recall, I am sure, the bit-

ter clash between environmentalists who were opposed to construction of a supersonic transport plane, and the aerospace industry which strongly supported the supersonic project.

In a current issue of the authoritative Congressional Quarterly, it is reported that now the environmentalists and the aerospace industry are now working hand in hand in an effort to breach the highway trust fund and siphon off some proceeds from the fund into municipal transit projects.

Because of the interest of my colleagues and the American people in this most important subject, I place in the RECORD herewith excerpts from the article in the Congressional Quarterly:

BUSTING THE HIGHWAY TRUST: AN UNLIKELY ALLIANCE

In a bitter lobbying contest only two years ago, environmentalists clashed with the aerospace industry over construction of a supersonic transport plane. The environmentalists won, and the SST never got off the ground.

Now the environmental lobby is working equally hard to open the highway trust fund for mass transit projects. If they win, one big reason will be the help they are getting from their old enemies—the aerospace people.

That sounds like a strange alliance, but consider what has been happening to the aircraft industry in recent years. The decline in the U.S. space program and the expiration of plane production contracts has left the aircraft companies in poor condition, forcing many of them to lay off employees and bringing recession to the communities that depended on them for economic survival.

Their pleas for help have been met by the argument that they could again prosper by converting their aerospace technology to the production of surface transportation equipment.

Five years ago, that was conjecture. Now it is much more. Rohr Industries, a California firm whose business was more than 90 per cent aerospace in 1967, has won two multimillion-dollar contracts to build subway cars for new transit systems in Washington, D.C., and San Francisco. Boeing has submitted the low bid for \$230-million worth of surface cars in San Francisco and Boston.

"The need is greater than the entire industry could fill if it were to drop everything else tomorrow," a spokesman for one aerospace company told Congressional Quarterly. But he acknowledged that the demand doesn't equal the need; cities don't have the money to rebuild their aging transportation systems.

That is why several aerospace companies are working actively in behalf of efforts to open up the highway trust fund. As of now, the \$6-billion fund can be used only to finance roads and bus lanes. Transit supporters in the House and the Senate want to let state and local officials spend their share of the money on streetcars and subways if they would prefer that to more highways.

On March 14, the Senate passed a comprehensive highway bill with an amendment allowing \$850-million of trust fund money to be spent on rail mass transit. Similar legislation is now being considered in the House, and although the highway forces are stronger there, mass transit people feel they have a chance to win.

To help things along, several of the companies now moving from aerospace into mass transit have formed a loose-knit organization to coordinate their efforts. Rohr, Boeing and LTV are involved, as are General Electric and Westinghouse.

They have not mounted a public lobbying campaign. "We're operating on some very

sound advice," said a spokesman for one of the companies. "Sit tight for now, and maintain a very low profile." The source of the advice appears to be the Nixon administration's Transportation Department, which supports opening the trust fund.

One reason for the industry's reluctance to speak publicly is the beating it took in trying to save the SST. "Aircraft companies leave a bad taste in peoples' mouths," an industry official stated. "The anti-SST people did a hell of a job on us. We're working with them today, but I have to congratulate them. They did a beautiful job."

For the aircraft industry, cooperating with the environmentalists now means working with groups such as the Sierra Club, Friends of the Earth, and the League of Conservation Voters. "In this business," the industry spokesman said, "you can be fighting someone tooth and nail and the next day you're working together. . . . We add something that they can't provide—solid business support."

The current focus of the battle in the House is the Roads Subcommittee of the Public Works Committee. Last year the subcommittee voted 10-3 against an amendment by Glenn M. Anderson (D-Calif.) to open up the trust fund. There is one difference this year: Chairman John C. Kluczynski (D-Ill.) has changed his mind and now favors it.

"The problem on Public Works," said one mass-transit lobbyist, "is that those people are all rural. They're all country boys, without any major industrial centers in their districts. We aren't too optimistic about them."

If they are unsuccessful on Public Works, which seems likely, the mass-transit advocates will attempt to get the amendment approved on the House floor. But to do so they may need a favorable decision from the Rules Committee, which must clear the highway bill for floor consideration.

In 1972, the Rules Committee, by an 8-7 vote, sent the highway bill to the floor under a complicated parliamentary procedure which prevented a House vote on the Anderson amendment. The pro-transit forces hope to avoid an entanglement this year.

SOVIET JEWISH EMIGRATION TO ISRAEL

HON. ROBERT N. C. NIX

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. NIX. Mr. Speaker, recent information would indicate that Soviet authorities had lifted all major restrictions on emigration to Israel. However, the U.S. Embassy in Moscow has said that it had yet to receive any official confirmation from the Soviet Government that the education taxes for emigrants had been suspended indefinitely.

It has been estimated that at least 1,000 Jews who have sought permission to emigrate to Israel were refused visas, regardless of the status of the education tax.

The Soviets contend that 90 percent of Jewish applicants for emigration had been granted visas and that only a small percentage of intellectuals were being barred for state considerations.

The exit tax depends on the immigrant's degree of education—as much as \$40,000. The few who manage to raise such sums did this either by means of loans from their families or through do-

nations from relatives in Western countries.

Mr. Speaker, it is obvious that the Soviet authorities are anxious to overcome U.S. congressional resistance to a bill which would accord the Soviet Union most-favored-nation status in trading. There is every indication that the Soviets do not intend to repeal the exit tax regulation but merely to suspend it.

Until and unless this exit tax is completely abolished, I am against any and all concessions to the Soviet Union for trade preferences. For those Jews who wish to remain in the Soviet Union, we must insist that they be permitted the right to live, if they so desire, according to Jewish religious and cultural tradition.

THE PRAEGER REPORT ON THE WEST FRONT OF THE CAPITOL

HON. J. EDWARD ROUSH

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. ROUSH. Mr. Speaker, in view of the fact that the House of Representatives will probably soon be asked to decide the fate of the west front of our Capitol Building, I believe that the following letter which introduced the report to the then Acting Architect of the Capitol from the firm of Praeger-Kavanagh-Waterbury on that subject would be instructive.

The Praeger firm of New York City was asked to perform a feasibility study to determine whether in fact the west front central wall of the Capitol could be restored, and to estimate the cost of such restoration. I am unable to include the complete report on this matter because of its length, but I refer those who would like to read the report in its entirety to the entry of Senator PROXMIRE in the CONGRESSIONAL RECORD, vol. 118, part 7, page 9039. The aforementioned letter follows:

PRAEGER-KAVANAGH-WATERBURY,

NEW YORK, N.Y., December 21, 1970.

Re restoration of the west central front, U.S. Capitol, Washington, D.C.

Hon. MARIO E. CAMPIONI,
Acting Architect of the Capitol, U.S. Capitol,
Washington, D.C.

DEAR MR. CAMPIONI: Submitted herewith is our report on the feasibility of restoring the west central front of the United States Capitol. Included are descriptions of our investigations, analyses, cost estimates and conclusions.

Prior to undertaking the investigation of the existing condition of the wall, we held discussions with you and your associates concerning various details of your experience related to construction and maintenance of the Capitol. We examined photographs, drawings and sample materials of the wall; made a detailed inspection of the interior and exterior of the structure, and carefully read and studied the reports of Thompson & Lichtner and Moran, Proctor, Mueser & Rutledge.

We also studied histories of the construction of the Capitol and the major changes made over the years, the printed deliberations of the Commission for the Extension of the U.S. Capitol, the reports in the Con-

gressional Record concerning the project, and numerous other historical documents.

As part of our study, a detailed structural analysis was made of the walls and floor systems. Stresses in the walls and other component parts of the building, as well as in the foundation soils, were determined.

In addition, plans and specifications were prepared, proposals were invited and a contract was awarded to perform on-site tests of various techniques to strengthen and repair the walls. This research work included drilling holes into the exterior wall; injecting materials into these holes to fill voids, using neat cement, sand cement, epoxy and monomer grouts; and drilling test cores of the grouted walls. The work also included removing exterior paint from typical wall areas and applying stone preservatives. Test borings were made and samples of soil adjacent to the wall were recovered for laboratory testing.

The contract for this exploratory work was awarded to Layne-New York Company, Inc., and work progressed over a period of 10 weeks. During this period our office supervised the work with a full-time resident engineer and assistant. Senior personnel from our New York office made frequent visits to the site to observe and direct the work. One of our staff architects visited England to research restoration projects there.

The firm of Woodward-Moorhouse & Associates, Inc., was retained to conduct laboratory tests of soil samples, and the National Bureau of Standards prepared laboratory tests of grouts, stonework and preservatives. Mr. A. J. Eickhoff and Mr. Jay S. Wyner were consulted on painting and paint removal techniques. Mr. Norman Porter, Geodesist, was retained to prepare a detailed survey of control points which had previously been set in the west wall, and Mr. Thomas W. Fluhr, Engineering Geologist, surveyed the Aquia Creek Quarry and reported on both the quality of stone and the feasibility of developing the quarry as a source of stone for restoration work.

Our studies indicate that while the Capitol is over one hundred and fifty years old and has been exposed to many adverse conditions, it survives in relatively good condition, attesting to the excellence of its builders and to the concern of those responsible for maintaining this, the national monument to our Republic.

Based upon a detailed investigation of the west front walls, we conclude that under conditions indicated in the report, restoration of the west central front of the Capitol is feasible. Further, the restoration can be accomplished within the general guidelines set forth by Congress as a directive to the Commission for Extension of the Capitol.

I would like to thank you and your staff for your assistance and cooperation in this endeavor. Your congenial interest has been an appreciated contribution to the completion of this report, and your genuine concern for the safety of this important structure, which has been entrusted to your care, has made a profound impression on me.

Respectfully submitted,

E. H. PRAEGER.

BYELORUSSIAN INDEPENDENCE COMMEMORATED

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. ADDABBO. Mr. Speaker, this week Congress observes the 55th anniversary of the proclamation of independence of the Byelorussian Democratic Republic.

On March 25 the Byelorussian-American Association, Inc. sponsored a commemorative program in New York City. The association is headquartered in Flushing, N.Y., with a branch office in Jamaica. I would like to insert in the RECORD at this point, the text of my remarks prepared for delivery at the commemorative program:

REMARKS OF HON. JOSEPH P. ADDABBO

I am pleased to share with you the commemoration ceremonies observing the 55th Anniversary of the proclamation of independence of the Byelorussian Democratic Republic. It was on March 25, 1918, that Byelorussia announced its independence. Just 10 months later the Byelorussian people found themselves under the rule of the Bolshevik expansionists living in a puppet state controlled from the outside by powers in Moscow.

Each year Americans of Byelorussian descent commemorate the proclamation of independence as a reminder of those precious months of freedom in 1918. Each year during those ceremonies, Members of Congress and other government leaders join in expressing their hope for the day when Byelorussians will once again taste the fruits of freedom.

This year the 55th Anniversary of the proclamation of independence makes the occasion more important as landmark anniversaries often are considered more noteworthy. The historical background of this day has been told and retold many times but as times change the lesson of Byelorussian independence does not really change. That lesson is that freedom once attained must be preserved and maintained. Oppression is bitter and must be guarded against with all the energy at our command.

Americans pride themselves on living in the land of the free and they are sympathetic to the hopes for liberty held by those who are less fortunate. No case is more deserving than the Byelorussian people who have lived under oppression and outside domination since that 1919 Soviet takeover. During these past 54 years the people of Byelorussia have been the victims of a deliberate plan of cultural genocide. The Soviet regime has tried to destroy any hope for freedom based on the traditions, culture, or background of the Byelorussian people. But that hope will not die.

Hope can be a powerful weapon and the Byelorussian people have not given up. They cling to their hope and one day, if we are patient and continue to support their desire for liberty, they will achieve the freedom they so briefly tasted in 1918. That is why we participate in these ceremonies marking the 55th Anniversary of the proclamation of independence in Byelorussia. That is why government and Congressional leaders join in these ceremonies and why the world spotlight focuses today on the oppressed people of Byelorussia.

HOUSING AND COMMUNITY DEVELOPMENT ISSUES

HON. RICHARD T. HANNA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. HANNA. Mr. Speaker, almost every Member of this body has received complaints about the moratorium on housing programs and inquiries as to the extent of the moratorium, as well as on what the near future holds for housing.

As every Member who is familiar with our housing programs knows, there is

no simple answer to these questions. We are all in search of a definitive statement on where we are today, of something that will translate the bureaucratic edicts and regulations into a readable form.

This need has been most ably filled, I believe, by the National Association of Housing and Redevelopment Officials' Journal of Housing. I am inserting into the RECORD in three installments their February article, "Housing and Community Issues Looming for 1973—White House/Congressional Debate." I am sure every Member of the House will find the article of great value:

HOUSING AND COMMUNITY DEVELOPMENT ISSUES LOOMING FOR 1973 WHITE HOUSE/ CONGRESSIONAL DEBATE

(By Miss Mary K. Nenno, director, NAHRO Policy and Research Division, and John Maguire, staff director, NAHRO Information Center for Community Development)

The Nixon Administration, in the early weeks of 1973, initiated a series of fiscal and budgetary actions and offered a set of proposals designed to curb federal spending and to accomplish the President's program of "New Federalism," i.e., a restructuring of the federal system, a reorganization of the national government, and a redirection of public decisionmaking away from the federal government to state and local government. In the housing and community development field, these actions included:

An 18-month moratorium on new commitments for subsidized housing programs, effective in January;

A termination of all community development programs, effective June 30, 1973, to be replaced in part by a Community Development Special Revenue Sharing Program, whose effective date would be a year later, July 1, 1974; and

The impoundment of nearly 1.25 billion dollars of fiscal year 1973 appropriations and Congressionally-approved contract authority for housing, urban development, and rural development programs (see Table 1).

The blueprint for the Administration's new domestic strategy is set forth in a series of Presidential statements issued since the first of the year: the second inaugural address, the State of the Union message, the budget proposal for fiscal year 1974, the 1973 Economic Report, and the January 8 announcement of an 18-month housing moratorium. These policy directions are summarized in a terse opening paragraph of the budget message sent to Congress on January 29: "The 1974 budget proposes a leaner federal bureaucracy, increased reliance on state and local governments to carry out what are primarily state and local responsibilities, and greater freedom for the American people to make for themselves fundamental choices about what is best for them."

The keystone of the fiscal year 1974 budget is a 268.7 billion dollar spending ceiling and the maintenance of a 250 billion dollar ceiling for the current fiscal year. The President's firm intention to maintain these ceilings is based on a belief that this decision will result in improving the nation's economic picture. As further detailed in the 1973 economic report, the "268.7" figure is designed to preclude the necessity for new taxes, to reduce inflation to an annual rate of 2.5 percent, to lower unemployment to a 4.5 percent rate, to accelerate national economic growth to a 6.75 percent figure, and to cut the federal deficit in half, to a 12.7 billion dollar level.

While the 268.7 billion dollar spending ceiling does represent an 18.7 billion dollar rise over estimated fiscal year 1973 spending, increases in "uncontrollable" items (e.g. interest on the national debt and increased

social security payments) mean that other programs must be terminated or curtailed to achieve this spending maximum. The budget, therefore, proposes a termination of over 70 programs and severe spending reductions for dozens more. Likewise, the budget also reveals the extent of fiscal year 1973 impoundments necessitated to maintain this year's 250 billion dollar level and proposes to stretch other fiscal year 1973 appropriations through the end of fiscal year 1974.

In addition to the housing and community development areas cited above, the budget also would terminate such programs as: the public service employment program; Hill-Burton hospital construction; federal library construction grants; regional medical research and treatment centers; and training programs for medical and scientific research personnel. The budget also proposes to phase out federal support for local mental health programs; to curtail or to eliminate various education and manpower programs, including a drastic reduction in "impacted" aid to local school districts; and to reduce federal spending in the environmental field. Ironically, the budget does call for increases in certain areas, such as a 5.7 billion dollar increase in defense and smaller increases for law enforcement, housing and community development research, and mass transit.

The President also proposes that federal special revenue sharing be substituted for many of the programs in the fields of manpower, education, and community development. His budget proposes four such categories of special revenue sharing—community development, education, law enforcement, and manpower. These programs, similar to those proposed two years ago by the President, but not enacted by Congress, would allocate federal money to state and local governments to be used within these broadly defined areas. However, in some cases the special revenue sharing would result in less federal money than is currently being spent and in others (community development) would not be activated until 12 months after the existing programs were terminated. Proposals for two other special revenue sharing programs—transportation and rural development—are dropped from this year's legislative package.

The President's justification for terminating programs and proposing special revenue sharing is summed up in his State of the Union message: "The time has come when we must make clear choices—choices between old programs that set worthy goals but failed to reach them and new programs that provide a better way to realize those goals; and choices, too, between competing programs—all of which may be desirable in themselves, but only some of which we can afford."

Implicit in these messages, moreover, is the President's determination to bring about a restructuring of the federal bureaucracy. It is expected that his executive reorganization proposals to create four new super-cabinet posts will again be sent to Congress. Pending Congressional action, the President has moved to accomplish much of this reorganization through administrative action. For example, Housing and Urban Development Secretary Lynn has already been named community development counselor to the President and, as such, is to coordinate all federal programs in the fields of housing, transportation, and community development, not just those administered by his department. In a related move, the budget proposes to dismantle the Office of Economic Opportunity and transfer its functions to various other departments. (The community action programs would be terminated but could continue at the local level by using general or special revenue sharing funds.) Finally, the elimination of

programs or their substitution by special revenue sharing would mean a reduction in the federal bureaucracy, another goal of "New Federalism." In short, the President summarized his philosophy in a radio address of January 28, telling Americans that the purpose of his new program was "to get big government off your back and out of your pocket."

The President's Philosophy: An analysis of "New Federalism" as contained in the Presidential messages and documents reveals five undercurrents in the philosophy that underlies it.

First, the President's domestic priorities are clearly economic, not social. Curbing inflation is given a higher priority than rebuilding cities. In fact, controlling the economy becomes the chief federal domestic function, with the solution of social problems relegated to state and local government for action.

Second, the Administration firmly believes that many existing categorical grant programs are not working and, therefore, should be eliminated, reevaluated, or replaced. Housing and community development programs fall within this category, as noted below.

Third, the "economy first" argument is being used to kill or cripple a number of programs that have always been unpopular with conservatives. The dismantling of OEO is one prime example of this undercurrent.

Fourth, there is a belief that the shifting of responsibility to state and local government in certain areas will improve efforts to cure social problems. This "grass roots" philosophy is evidenced in the special revenue sharing proposals. A corollary to this feeling is that state and local government will be strengthened by the shifting of responsibility to them and that the citizen will be better served by local decisionmakers.

Fifth, there is a distrust of the present federal bureaucracy composed, to a large degree, of men and women believed to be more sympathetic to the philosophy of the Democratic party than to Republican goals. Because of civil service protection, many middle management staff and professionals remain within the bureaucracy, having entered into federal service during the Kennedy and Johnson years. The President may feel thwarted by these bureaucrats and, hence, see a major governmental reorganization and restructuring as the only means of accomplishing his objectives.

HUD 1974 APPROPRIATIONS REDUCED BY 37 PERCENT

Appropriations requests to Congress for the Department of Housing and Urban Development for fiscal year 1974 total 2.7 billion dollars: a net reduction of 1.6 billion dollars, or 37 percent, from the 4.3 billion dollars appropriated for fiscal year 1973. Actual HUD outlays in 1974, however, will increase from 3.4 billion dollars to 4.8 billion dollars, reflecting the momentum of past commitments.

The principal area for reductions is community development, where the appropriations request is over 2 billion dollars less than approved in fiscal year 1973, a drop of over 90 percent. This reduction reflects the termination of all new community development activity for seven categorical grant programs by June 30, 1973 (urban renewal, model cities, water and sewer, open space, neighborhood facilities, rehabilitation loans, and public facility loans). To replace them the budget anticipates Congressional passage of urban community development special revenue sharing legislation, to be effective on July 1, 1974. The budget document projects an annual level of 2.3 billion dollars for fiscal year 1975 for community development under new legislation.

In terms of the urban renewal program,

the budget document indicates that the full fiscal year 1973 appropriation will be committed during the fiscal year (950 million dollars for regular Title I programs and 510 million dollars for disaster assistance). For fiscal year 1974, 137.5 million dollars is proposed but this amount will not support new activity. The funds for 1973 must cover existing activity in urban renewal projects, including NDPs, until the effective date of special revenue sharing. The appropriations request for 1974 covers 127 million dollars for conventional projects and 10 million dollars for NDPs and is intended only to accelerate the close-out of existing projects, as well as to "preserve the capability" of local agencies (e.g. provide administrative costs) over the year so that they will be in a position to participate in any special revenue sharing for community development effective on July 1, 1974.

During a January 28 radio address, the President cited urban renewal as one of the programs that needs replacement. He stated: "[Urban renewal programs] have cost us billions of dollars, with very disappointing results. And little wonder. How can a committee of federal bureaucrats hundreds or thousands of miles away, decide intelligently where building should take place? This is a job for people you elect at the local level, people whom you know, people you can talk to."

An additional 20 million dollars is made available under the 312 rehabilitation program, bringing the amount available for fiscal year 1973 to 70 million dollars; this additional funding will be used for loans to facilitate the closing out of urban renewal projects. A total of 72 million dollars still remains impounded and the 117 code enforcement program is not reactivated.

Model cities funding will be used to supplement programs in effect as of June 30, 1973. It is estimated that the funds will be sufficient to provide localities, on the average (except for planned variations cities), new funds at a rate of 55 percent of the current grant level, from February 1, 1973 to July 1, 1974, with no additional funds thereafter. Not all cities will be funded at the average rate but funds will be withdrawn from poor performers and reallocated to better performers. According to the Administration, model cities "does not have a significant enough impact on social and economic problems nationally to justify continued funding as a separate program."

The fiscal year 1974 budget also anticipates the termination by June 30 of the community development training and fellowship programs funded at a 1973 level of 3.5 million dollars and the new community supplementary assistance program funded in 1973 at 7.5 million dollars.

The largest increase in the HUD appropriations, other than for housing payments, is for research and technology, with a new level of 71.5 million dollars, up 18.5 million dollars over last year. This is largely a result of the addition of 13 million dollars for research and demonstration efforts formerly performed by the Office of Economic Opportunity. The balance of the increase (5 million dollars) will be used to maintain the level of HUD research activity attained in 1973. A major emphasis of HUD research and technology will be in *housing management* (11 million dollars); *housing allowances* (11.6 million dollars); *other research* to support national housing programs (9.4 million dollars). In addition, a range of research activities (17.8 million dollars) will focus on *environment and utility service technology*; *patterns and trends of national growth*; and *delivery, equity, and quality of local government services*. For the first time since 1969, no funds will be allocated to *Operation Breakthrough*.

TABLE 1.—Amount of fiscal year 1973 appropriated funds and congressionally-approved contract authority currently impounded

Appropriated funds for community development and other HUD programs impounded:	
Water and sewer grants.....	\$400,175,000
Section 312 rehabilitation loan fund*.....	72,320,000
Nonprofit sponsor loans and grants.....	6,686,000
Open space grants.....	50,050,000
Public facility loans*.....	20,000,000
Interstate land sales protection program.....	2,341,000
Subtotal	551,572,000
Congressionally approved contract authority withheld:	
Section 235 homeowner-ship	221,000,000
Section 236 rental assistance	171,500,000
Rent supplements.....	38,600,000
College housing.....	10,200,000
Subtotal	441,300,000
Farmers Home Administration funds impounded:	
Rural water and waste disposal grants.....	120,000,000
Housing for domestic farm labor	2,947,000
Mutual and self-help housing	832,000
Rural housing insurance funds	133,000,000
Subtotal	256,779,000
Total	1,249,651,000

* Includes balance available from loan repayments.

A significant shift in direction, although related only to an increase of 10 million dollars in appropriations, is in the "701" comprehensive planning program. In the past, the majority of this funding was made directly to cities for comprehensive planning. Beginning in 1974, grants will be made only to states, with governors expected to make sub-allocations to local governments and other eligible recipients in accordance with state priorities. The Administration intends to propose legislation to broaden this program into "a more flexible instrument of community development planning and management assistance, which will support all aspects of government management including the application of development resources."

Appropriations for the Federal Insurance Administration's national flood insurance program will be doubled, from 10 million dollars to 20 million dollars. This money will be used for administrative expenses and for studies and surveys necessary for conduct of the program.

Significant appropriations decreases occur within HUD management. Total appropriations for departmental management decline by some 6 million dollars, reflecting the projected cut-backs in total HUD personnel by some 12 percent. The number of permanent full-time employees is expected to be cut to 13,868 by June 30, 1974, a drop of 1968 from the expected June 30, 1973 level. Virtually all of this decrease will result from reductions in the staffing of housing production

and community development (382) programs as a result of the projected reduced workload. The full impact of these staff reductions is shown in "functional" areas. Salaries and expenses for housing production and mortgage credit are reduced from 15.7 million dollars in 1973 to 5.3 million dollars in 1974, the result of the cut of over 1500 employees in this area.

Appropriations requests for all other HUD activities remain at basically the same levels as in 1973. For further detail, see Table 3. second installment.

TABLE 2.—APPROPRIATIONS REQUESTED FOR THE DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT: FISCAL YEAR 1974

[In thousands of dollars]		
	Estimated appropriations: 1972-73	Appropriations request: 1973-74
Housing Production and Mortgage Credit: Nonprofit sponsor fund.....	1,000	
Total.....	1,000	
Housing Production and Mortgage Credit—GNMA:		
Restoration of capital—special assistance funds.....		95,647
Participation sales insufficiencies.....	26,054	24,931
Total.....	26,054	120,578
Housing Management:		
Housing payments:		
Public housing.....	1,214,500	1,305,000
College housing.....	11,500	19,000
Rent supplements.....	122,000	164,000
Sec. 235 (homeownership).....	340,000	412,000
Sec. 236 (rental).....	112,000	200,000
Total.....	1,800,000	2,100,000
Community Planning and Management:		
Comprehensive planning grants (701).....	100,000	101,000
Community development training.....	3,500	
New community assistance grants.....	7,500	
Total.....	111,000	110,000
Community Development:		
Urban renewal programs.....	1,450,000	1,375,500
Rehabilitation loans (312).....	70,000	
Model Cities.....	500,000	
Neighborhood facilities grants.....	40,000	
Open space land programs.....	100,000	
Total.....	2,160,000	1,375,500
Federal Insurance Administration:		
National flood insurance.....	10,000	20,000
Interstate Land Sales Registration.....	885	1,100
Research and Technology.....	53,000	71,450
Fair Housing and Equal Opportunity. Department management:	9,489	9,850
General management, administration, staff services.....	25,048	29,325
Regional management and services.....	22,991	20,200
Salaries and expenses, functional programs.....	72,041	64,300
Total.....	120,080	113,825
Total HUD appropriations.....	4,291,508	2,684,303

¹ Additional authorizing legislation will be proposed by the administration to focus 701 grants more particularly on improving State and local government management.

² Includes \$510,000,000 for disaster assistance.

³ The administration anticipates community development revenue-sharing legislation to be enacted by July 1, 1974, and funded at \$2,300,000,000 for fiscal year 1975.

⁴ Includes \$13,000,000 in research activity transferred from the Office of Economic Opportunity.

⁵ The increase in general management and administration includes creation of the new Office of Inspector General. Under salaries and expenses for functional programs, there is a decline in housing production and mortgage credit from \$15,700,000 to \$5,300,000 reflecting the reduction of over 1,500 employees

SGT. RENEE L. BROWN OF YOUNGSTOWN, OHIO, RECEIVES FREEDOMS FOUNDATION AWARD

HON. CHARLES J. CARNEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. CARNEY of Ohio. Mr. Speaker, the Freedoms Foundation recently awarded the George Washington Medal of Honor to Sgt. Renee L. Brown, the son of Armand and Geneva Brown of 7487 Salinas Trail, Youngstown, Ohio. Sergeant Brown is currently serving with the 511th MI Battalion of the U.S. Army in Europe.

The award was presented to Sergeant Brown for his essay entitled: "The Fiscal Aspects of American Freedom." Unfortunately, neither of his parents was able to attend the award ceremonies due to a serious illness in the family.

Mr. Speaker, I would like to take this opportunity to congratulate Sergeant Brown for his outstanding achievement. I insert his essay in the RECORD at this time:

THE FISCAL ASPECTS OF AMERICAN FREEDOM

(By Renee L. Brown)

I am the Chairman of the Board of Directors of that venerable institution American Freedom, Inc., the manufacturer and sole distributor of the most highly revered brand of freedom in the world: the American brand. The purpose of this letter is to clarify a few points which have been raised in the recent controversy about the price of our product. As you know, there are some Americans who think that they are paying too much for what they are getting in return. Perhaps they are unaware of the unequalled high quality of our product.

At the risk of sounding boastful, I would like to make known, once and for all, that American Freedom, Inc., takes a back seat to no one. Our freedom is the best in the world, bar none. But do we rest on our laurels, on our past accomplishments? Do we become complacent? Never! The quality control people at American Freedom, Inc. factories work 365 days a year in an effort to make the best freedom known to man even better. Granted, our product has flaws and imperfections, but fewer by far than anyone else's freedom. And as I said before, our quality control is constantly working on getting rid of them. But, alas, this takes time, money, and a great deal of effort and patience on the part of everyone concerned, and is reflected of necessity in the price of our freedom. There's just no other way. Unless, of course, you would be satisfied with a second- or third-rate product, which we assure you, a discriminating American, would not. So we are obliged to ask for your tax dollars in order to keep in full operation our main factory in Washington, D.C., and our branch factories in the various state capitals and county seats.

We have to ask for your personal help in the military forces in order to keep competing concerns from gaining a monopoly on the market, which would cause us to go bankrupt. We have to ask for your observance of our laws and regulations in order to keep our factories and offices operating at maximum efficiency. We have to ask you to accept without too much grumbling a slightly less-than-perfect product until we get all the bugs worked out. And we ask you for all these things for one reason only: To enable us to eventually bring you a vastly improved product, the closest thing to absolute freedom that the civilized world has ever seen.

Now, bearing all this in mind, how could anyone think that the price of American freedom is too high? The record indicates just the opposite: American Freedom is by far the best value on the world market today.

NEW COPERNICUS SOCIETY HAS MAJOR ANNIVERSARY ROLE

HON. THADDEUS J. DULSKI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. DULSKI. Mr. Speaker, the Congress has approved a joint resolution requesting the President to designate the week of April 23 as "Nicolaus Copernicus Week."

It is only proper that the Congress take the lead in calling attention to the 500th anniversary of the birth of Copernicus, the Polish scientist whose theory is credited with marking the beginning of modern science.

House Joint Resolution 5 was introduced by me on the opening day of the 93d Congress. It passed the House on March 22, the Senate on March 27 and has been sent to the White House for signature.

Many organizations, here and abroad, are participating in a continuing series of events marking the anniversary. National recognition is focused on the week of April 23 when the Smithsonian Institution and the National Academy of Sciences have developed a broad cultural and scientific program.

An integral factor in the non-Government leadership of the plans for the observance has been the Copernicus Society of America, organized by a distinguished Polish-American, Edward J. Piszczek of Philadelphia, Pa.

The work of Mr. Piszczek's organization deserves full recognition and appreciation. To give a picture of its activities, I include a press release from the society as part of my remarks:

COPERNICUS SOCIETY OF AMERICA

The Copernicus Society of America was established in 1973 by Edward J. Piszczek, President of Mrs. Paul's Kitchens, Inc., as a cultural and educational foundation to advance the arts and sciences.

The Copernicus Society is dedicated to emphasize to the world the accomplishments and contributions of the Polish Astronomer Nicholas Copernicus on the occasion of the 500th Anniversary of his birth.

The efforts to celebrate the Copernican Year began over a year ago. The formulation of plans, discussions, arrangements involving four countries, museums, planetariums, etc., were all necessary before anything could be executed.

In December 1972, four students selected by the Smithsonian Institution in Washington in cooperation with the Copernicus Society of America, made a pilgrimage to Poland to retrace the life steps of Copernicus.

These students included Miss Katharine S. Park, a graduate student at the Warburg Institute, London, Gregory Perczak, a senior

at the University of Notre Dame, South Bend, Bruce M. Dolego, a junior at St. John's College, Annapolis, and Clifford Martin, a graduate student at Pennsylvania State University.

The arrangements in Poland and underwriting of expenses was the first project of the Copernicus Society. The report of this pilgrimage was published in the *Smithsonian Magazine* in March and will be continued in the April issue.

The highlight of this year's events, arranged by the Copernicus Society, is the exhibition of the original instruments used by Nicholas Copernicus during his years of research and discovery at the Jagiellonian University in Cracow.

These spectacular brass instruments are in a perfect state of preservation; they include armillaries, astrolabes and celestial globes. The exhibition will arrive in the United States during the first week of April. A press preview and cocktail is scheduled for Friday, April 6th. At this event Polish vodka will be the beverage.

The public opening for the instrument exhibit is scheduled for Sunday, April 8th. The original Copernicus Instruments will also be exhibited in the following cities: New York, Philadelphia, Detroit, Milwaukee, Chicago, Ottawa, Canada and London, England.

During the week of April 22 many other significant events are scheduled in cooperation with the Copernicus Society and the Smithsonian Institution. On Sunday, April 22, the opening ceremonies of the Copernicus Week are scheduled. At 8:00 P.M. a musicale of chamber ensemble dimensions will be conducted by the National Academy of Sciences, music by Leo Smit, with narration by Sir Fred Hoyle. This presentation was underwritten by the Copernicus Society of America in cooperation with the National Academy of Sciences.

On Monday, April 23, at 12:30 P.M. the Postmaster General of the United States will issue the commemorative Copernicus Stamp. The Invocation for this commemoration will be given by Father Walter Ziemba, President of St. Mary's College, Michigan.

On Tuesday, at 8:00 P.M. at the Regency Room of the Shoreham Hotel a banquet will feature the meal fare of Copernican times. Two medals will be presented at this banquet by the Copernicus Society of America to the outstanding scientific scholars of the year, Mr. Jerzy Neyman and Mr. Edward Rosen.

On Wednesday, April 25th the Copernicus Society, in cooperation with the Smithsonian Institution, is sponsoring a concert by Leon Kirchner conducting players of the Boston Symphony Orchestra.

During the month of April an exhibit of the Persistent Crafts of Poland will also be featured at the Smithsonian Institution. This is a collection of art and artifacts reflecting Polish Culture from the renaissance to the present day. This exhibit was assembled by Richard Ahlborn in Poland and is underwritten by the Copernicus Society of America. This exhibit will travel throughout the United States following its presentation at the Smithsonian Institution.

During late summer, the Copernicus Society will release a feature movie, *Copernicus*, for television. This movie was filmed in Poland and is approximately one and a half hours in length. At the present time, it is undergoing editing and dubbing into English.

In addition, the Copernicus Society has caused a book, *Copernicus and His Epoch*, to be published and is providing Copernicus Lapel Buttons to commemorate the year of Copernicus.

The Copernicus Society headquarters is Box 111, Eaglesville, Pa. 19408.

SUPPORT FOR THE LEGAL SERVICES PROGRAMS

HON. DOMINICK V. DANIELS

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. DOMINICK V. DANIELS. Mr. Speaker, I wish to have inserted in the *RECORD* the text of a resolution adopted by the municipal council of the city of Jersey City on March 6, 1973, in support of continuing the legal services program after June 30, 1973.

As you know, the President is planning to dismantle all programs formerly under the jurisdiction of the Office of Economic Opportunity, including this most valuable legal assistance to the poor. There are many individuals in this country who will no longer be eligible for full due process of the law only because they cannot afford it.

I do not want that to happen—and neither do the officials of one of the larger cities in the country. They know that the indigent residents of their city, and of the entire country, will be the loser—and so will we all.

The text of the resolution is as follows: RESOLUTION URGING THE CONTINUATION OF LEGAL SERVICES TO INDIGENT PERSONS

Councilmen as a whole offered, and moved adoption of, the following resolution:

Whereas, there is a continuing need for legal services for the poor, not only in Jersey City, Hudson County and the State of New Jersey but also throughout the nation; and

Whereas, there are, at present, federally funded Legal Services Programs to meet this need in Hudson County, the State of New Jersey and each of the states of the United States; and

Whereas, the Hudson County Legal Services program provides legal services to three thousand indigent Jersey City residents each year which represents 57% of the total number of cases it handles each year; and

Whereas, these federally funded Legal Services programs provide counsel for the everyday legal problems facing the poor including family, consumer, housing, employment, social security and veterans matters; and

Whereas, these legal services will not be available to the indigent residents of Jersey City, Hudson County, the State of New Jersey and each of the states of the United States if the Legal Services program is terminated; and

Whereas, the continuation of these Legal Services program has been seriously threatened by the federal government; now, therefore,

Be it resolved by the Municipal Council of the City of Jersey City that it continues to support the need for adequate legal services to the poor of Hudson County, the State of New Jersey and each of the other states of the United States.

Be it further resolved, that the President of the United States be and he is hereby urged to continue the Legal Services program after June 30, 1973.

Be it further resolved, that copies of this resolution be sent to Richard M. Nixon, President of the United States; Mr. Howard Phillips, the Acting Director of O.E.O.; William T. Cahill, Governor of the State of New Jersey; Senator Harrison A. Williams and Senator William P. Case, the United States

Senators from New Jersey; Congressman Dominick V. Daniels and Congressman Henry Helstocki, the two U.S. Congressmen whose districts encompass Hudson County; Mr. Martin L. Haines, President of the New Jersey Bar Association and Mr. Martin J. Brenner, President of the Hudson County Bar Association.

BYELORUSSIAN INDEPENDENCE

HON. FRANK J. BRASCO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. BRASCO. Mr. Speaker, we live in a period when men pointedly seek out and reaffirm their ethnic heritage. This is not merely a throwback to tribalism in an age of rootlessness. In many respects it is a dramatic illustration of the viability of individual cultures, language, and ways of life.

In many places across the globe, giant nation states have arisen, dominating ancient peoples and demanding that they bend the knee to science, modern culture, and what is decreed by a central government.

Some nation states, such as our own, while composed of a variety of nationalities, have never sought to repress their unique expression of ethnic identity.

Unfortunately, this has not been the case in a number of other countries, particularly the Soviet Union.

Russia's leaders have sought the homogenization of its many peoples into a bland blend of conformity, whose one dominant theme was adherence to Marxist and Leninist thinking and endeavor.

Many such groups have silently refused to bend their collective and individual knees to this kind of pressure. The Jews of the Soviet Union are remarkable for their resistance. The same is true of the Ukrainians and Lithuanians, among others.

Still another such group are the Byelorussians, who constitute a very unique group in the Soviet Union. This ancient people has long maintained its traditions, culture, education, and art, even in the face of persistent and harsh attempts to end their uniqueness on the part of the regime.

After the Romanoff dynasty found its doom in the throes of World War I, old Russia split up into a series of quasi-independent states, each one seeking to reaffirm the ethnic and cultural identity of its dominant group.

The Soviet regime ruthlessly stamped out such efforts at independence. One such state was proclaimed on March 25, 1918, known as Byelorussia. Crushed militarily, it has been a component of the Soviet Union since. However, like so many fiercely independent peoples, physical dismemberment of a state is not the end of the story. Byelorussian individuality has remained alive and well in that area and abroad, in the emigre communities.

On this day, we remember their efforts

and their desire to maintain their heritage. That time inevitably will come.

FOREST SERVICE REORGANIZATION

HON. GUNN McKAY

OF UTAH

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. McKAY. Mr. Speaker, for over a year I have questioned the Forest Service about possible plans for realigning forest regions. These plans would split the intermountain forest region, and jeopardize proper management of the forests. Regrettably, I feel that the Forest Service has every intention of pursuing such a course.

The Forest Service remains one of the few Federal agencies which does not conform to the 10 standard Federal regions, even though it is a clearly stated administration goal to bring all Federal agencies into this conformity. The regionalization plan is supported because administrative costs and duplication which the Forest Service claims could be eliminated. But this move would fragment the intermountain region, with Utah offices moving to Denver, Idaho forest supervision to Portland, and Nevada offices to San Francisco.

Mr. Speaker, the position of the Forest Service seemed clear to me at a recent meeting I had with the Deputy Chief Forester. Although no firm decision has been made, nor any date for regional conformity set, the Forest Service has completed a study which indicates that such a move is feasible. No absolute figures are available, but the move would likely eliminate more than 200 positions in northern Utah. I have requested a copy of this study, but thus far the Forest Service has refused to provide it, claiming it is only a working document at this stage.

I am not at all pleased with the prospect of job or service reductions in Utah, Mr. Speaker. I know the Forest Service is working under budgetary pressure, with a shrinking budget and demands for increased services. I would have expected the administration to be responsive to this dilemma, but the President has sharply reduced Forest Service budget requests. Funds for forest roads and trails were reduced to half of what was budgeted last year. Reforestation was cut by \$8 million, and the operating budget was trimmed by \$58 million. Clearly, the Forest Service is under pressure.

But I am convinced regionalization is not the answer. The intermountain region was laid out to conform to geographic and natural boundaries, not to satisfy bureaucratic convenience. It is entirely possible that the quality of forest management would suffer in such a drive for economy.

Any more would itself require tremendous expense, and money for such a move has not been programed into this year's

budget. Should the Forest Service move this year, using regular operating money to do so, I would be very much opposed to a supplemental appropriations from Congress to replace these funds. As a member of the subcommittee which handles funding for the Forest Service, I have made my position clear to Forest Service officials.

MY RESPONSIBILITY TO FREEDOM

HON. RAY THORNTON

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. THORNTON. Mr. Speaker, the following is a speech written by Miss Margaret Louise Kendall, Monticello, Ark. Miss Kendall is Arkansas' winner in the Veterans of Foreign Wars Voice of Democracy Contest for 1973:

MY RESPONSIBILITY TO FREEDOM

The American Democracy is made up of the people, for the people, and by the people. There has been few types of governments where it has been possible for the people to rule, to make laws and to enforce the laws, or to elect their own officials.

Individual importance, equality of all men, compromise, majority rule and minority rights, and individual freedom, these five things are all essential in making our American Democracy what it is today.

In order for a Young American to know what responsibilities he has in maintaining freedom, he must first know what freedom is. As a young American, I believe freedom, to me, is the right to express my ideals on a moral point of view without being penalized by society. For almost two hundred years Democracy has been our American way of life. We as Americans, young and old, have not gained our freedom by sitting down and waiting for it. Our "Founding Fathers" fought a bloody revolution which lasted seven years to gain freedom for themselves, and us, their future children. Even then the true meaning of freedom was not realized, that Today "we", as Americans are beginning to realize the meaning of freedom as it is guaranteed in the Constitution. For example, Young Americans between the ages of eighteen and twenty are guaranteed by the Constitution and the Twenty-sixth Amendment have the right to vote in all local, state, and federal elections. I believe this is the right step taken to the road of individual freedom for the Young People of America.

As a Young American a responsibility I believe I have in maintaining FREEDOM is to be informed on federal, state, and local community issues, to be educated so that OUR Democratic form of government can survive. I have the responsibility of becoming involved in activities such as civic organization, politics, and school programs. The greatest responsibility, I believe I have as a Young American in maintaining my FREEDOM is to support the Constitution.

As a Young American the actions I would like to take in fulfilling my personal responsibility to the preservation of FREEDOM are in learning to face reality, not only to accept the subjective, but also the objective issues facing my country today. Another action I would like to take in fulfilling my personal responsibility to the preservation of FREEDOM is in respect for its local, state and

federal laws. I believe if the people of America do not respect the laws established to run the Country, there would be no Democracy, there would be Anarchy instead. Also an action I would like to take as a Young American in fulfilling my personal responsibility to the preservation of FREEDOM is to practice Patriotism. All of which I can state in the last stanza of the "American's Creed" by William Tyler Page, I quote:

"Therefore, I believe it is my duty to my country,

To love it, to support its Constitution,
To obey its laws, to respect its flag,
And to defend it against all enemies."

As a Young American the actions I would like to take to prepare myself to be a more effective citizen are, to respect the rights of others, to be tolerant, and to accept criticisms, to develop values and accept change, to vote in all elections, and to support my local, state, and federal government.

Therefore, I as a Young American believe that the future of American Democracy lies in my hands and I will do my best to retain it. Thank you.

RT. REV. MSGR. GORDON G. GUTMAN, PASTOR OF ST. CHRISTINE PARISH IN YOUNGSTOWN, OHIO, IS HONORED

HON. CHARLES J. CARNEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 28, 1973

Mr. CARNEY of Ohio. Mr. Speaker, on March 11, 1973, I had the pleasure of attending the celebration marking the 40th ordination anniversary of Rt. Rev. Msgr. Gordon G. Gutman, and the 20th anniversary of St. Christine Parish, which was established by Monsignor Gutman.

Monsignor Gutman was honored by the people of St. Christine parish and the city of Youngstown for his dedicated, unselfish service to the holy priesthood of the Roman Catholic Church.

During the ceremony, Monsignor Gutman received the praise and acclaim of Youngstown City Prosecutor Vincent Gilmartin, who spoke in behalf of the parishioners. The Honorable Jack Hunter, mayor of Youngstown, and City Council President William Wade presented a resolution declaring March 11, 1973, as "Monsignor Gutman Day" in the city of Youngstown.

The members of the "40-20 Committee for Monsignor Gutman," whose hard work made the occasion a great success, were:

Jack Hanlon, cochairman; Charles O'Nesti, cochairman; Pat Alessi, Robert Terpak, Howard Satsinger, Virginia Collins, and Al Tauss.

Mr. Speaker, I insert a biography of Rt. Rev. Msgr. Gutman and a history of St. Christine parish in the RECORD at this time:

RT. REV. MSGR. GORDON G. GUTMAN
EDUCATION

St. Mary Seminary, Cleveland, Ohio.

Ordained by Bishop Joseph Schrembs on March 11, 1933, Cleveland, Ohio.

APPOINTMENTS

Assistant, St. John Parish, Canton, Ohio, March 17, 1933.

Pastor, St. Joseph Parish, Maximo, Ohio, July 13, 1944.

Pastor, St. Christine Parish, Youngstown, Ohio, March 27, 1953.

Domestic Prelate, April 28, 1961.

SPECIAL ASSIGNMENTS

August 4, 1947-July 11, 1949, Chaplain Knights of Columbus Alliance Council No. 558.

1960-Member, Diocesan Board of Education.

June 19, 1959-present, Pro-Synodal Judge.
April 24, 1969-present, Diocesan Consultor.

THE BIRTH OF A PARISH

In Passion Week 1953, the Rev. Gordon G. Gutman, pastor of St. Joseph's Church, Maximo, Ohio, was given an assignment to establish a new Parish on Youngstown's southwest side.

After one announcement in the Vindicator, 305 people found their way to Pioneer Pavilion in Mill Creek Park on a brisk Easter Sunday to take part in the celebration of the Birthday Mass of this new Parish.

After three Sundays, the Parish had outgrown the Pavilion and moved to Idora Park Ballroom for summer Masses and then Princeton Jr. High School for the fall and winter. By Christmas, 350 families had registered as parishioners.

Enthusiasm and friendliness ranked high among the members of the newly formed Altar-Rosary Society and Holy Name Society. They set into motion many activities. Other eager groups held home card parties, children's shows, lawn parties, bake sales, monthly raffles, spaghetti dinners, and minstrel shows with proceeds going to our building fund. Our first pledge campaign amounted to \$100,000.

The ground breaking was held on Sunday, March 28, 1954, on seven acres of land on South Schenley Avenue donated by John and Fred Shutrump. This new Parish was named after their mother's patron saint, St. Christina. Symbols commemorating the life of St. Christine are used on the outside face design of the original building which was to be a church and school.

Even before the building was started, plans had to be cut down to fit the budget. The rectory was built by many parishioners volunteering their services. The first Mass said in the new church was Midnight Mass, Christmas, 1954.

The original school had ten classrooms. In 1957, fourteen more rooms were added and in 1960, due to a still growing enrollment, eight more rooms were completed. Again many faithful parishioners donated their time and talents to help with the painting and laying tile in the church and school.

The convent was built in 1955 and expanded to its present size in 1957. The school is staffed by the Daughters of Charity of St. Vincent de Paul and many dedicated lay teachers.

With the help of our many organizations and continued support financially by the parishioners, the goal of a new and permanent church was met. In August, 1964, the transfer was made to the spacious and beautiful new church building. Dedication was held on November 1, 1964, Bishop Emmet M. Walsh officiating.

These last ten years have seen the parish grow to 2,000 families. Our present school enrolls 1,000 children. Many parish organizations have helped in the parish growth over these past twenty years. Thanks and appreciation go out to all:

Infant of Prague Guild, St. Vincent de

Paul, Holy Name Society, Altar-Rosary Society, Cub and Boy Scouts, Bus Club, Bingo Workers, Booster Club, Choir, Pizza Mothers.

C.Y.O., Senior Citizens, Our Lady of Fatima Garden Club, Home and School Association, Quilting Mothers, Ushers Club, Festival Workers, Monthly Raffle Committee, Parish Councils, CCD Teachers, Legion of Mary.

Our sincere thanks to all the people of Saint Christine Parish who helped over the years make this day "a day to remember."

DEMOCRATS AND NATIONAL DEFENSE

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 28, 1973

Mr. BOB WILSON. Mr. Speaker, with the current talk of dismantling our defense establishment and devoting all this unnecessary spending to social programs, it is time to take stock of why we need to maintain our defense posture and its importance to our national well-being. The following commentary by Joseph Alsop provides considerable food for thought and I hope my colleagues will carefully consider his conclusions.

The article follows:

DEMOCRATS AND NATIONAL DEFENSE
(By Joseph Alsop)

Nowadays, in the dark hours before dawn, you sometimes wonder whether a lot of virtuous Americans do not actually want to see their country defeated. Consider, to begin with, the powerful drive now taking shape among the liberal Democrats in Congress to dismantle the national defense.

Then consider a few other things of some significance, like the dreadful surprise that followed hard on the heels of the first round of SALT talks. The surprise took the form of a Soviet test, demurely delayed until the first SALT round was over, of a submarine-launched ballistic missile with a range of about 4,500 miles.

The surprise was dreadful for several reasons. To begin with, the range of this new submarine-launched missile exceeds by around 1,000 miles the maximum that had been considered possible by the American scientific analysts. The first SALT agreement was squarely based on the U.S. analysts' predictions, which have now turned out to be poppycock.

Then, too, the Soviet test proved that in the first round of SALT talks, the Soviet negotiators had been grossly misleading, if not directly untruthful. They had pleaded that their submarine launched ballistic missiles had a much shorter range than the comparable American weapons. They had stressed the complex operational factors that make an increase of range almost exactly equivalent to an increase of number, in the case of strategic missiles launched from submarines.

Hence the Soviets had claimed they had a right to a lot more submarine-launched missiles than the United States. This claim, made in the sacred name of "parity," was in fact recognized. Under SALT I, the Soviets are allowed to build up to a total of 950 submarine launched nuclear missiles, whereas the United States is held to a level of about 600 such missiles.

Now, however, the Soviets have a submarine launched missile of much longer range

than any in the U.S. arsenal, either in existence or in prospect. Its present accuracy has been questioned, but accuracy can always be improved. With missiles of such range, moreover, Soviet nuclear submarines can lurk in the Bering Sea or the Sea of Okhotsk, far beyond the reach of U.S. sea surveillance, and thence loft their missiles to almost all the most vital American targets!

In sum, this single Soviet missile test betokens a coming change in the strategic balance that ought to give the creeps to any liberal Democrat who gives a pin about his country's future. Instead, one of the prime aims of the liberal Democratic attack, now being organized in the Senate, is the destruction of the U.S. Trident program. This is the program, of course, intended to give this country greater and less vulnerable sea-borne nuclear striking power.

One of the main objections to Trident, naturally, is that the new missiles will be MIRVed—in other words, will have multiple warheads capable of being independently targeted. The doctrine of the virtuous is that if the United States goes on MIRVing its missiles, the Soviets will then be driven to MIRV their missiles. This, once again, is purest goose talk.

Soviet nuclear missiles are not MIRVed today, simply because Soviet missile development took a wrong turn a good many years ago. To MIRV a missile successfully, you have to put a complex miniaturized computer on board the missile. For detailed guidance, the Soviets instead relied for a long time on computer-systems at the launch point, rather than using on-board computers.

Throughout much of the first round of SALT talks, however, it was already perfectly clear that the Soviets were working, all out, to correct this past error—and thus to MIRV. Another recent Soviet missile test has shown, furthermore, that the Soviets have already achieved considerable success in this intensive effort.

The new missile tested is called the SS-17. It has an on-board computer and a range of 6,000 miles. It can even be regarded as a new "counterforce weapon." But the main point is that the new missile is a long step in the direction of much more widespread Soviet MIRVing, which the goose-talkers say we must not "stimulate." In such matters, the Soviets need no stimulation.

The goose-talkers still quack about "parity." In reality, another question already faces us. How will the Soviets behave, if and when they are allowed to acquire a heavy predominance of nuclear striking power? Any sensible man ought to be able to figure out the answer to that question. And the question indicates where the Soviets are heading.

JOB SITE VIOLENCE

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mrs. HOLT. Mr. Speaker, I rise today to speak out on the problem of job site violence which is having serious consequences on our construction industry. Violent attacks on nonunion construction sites are no longer isolated instances perpetrated by a handful of individuals. During the past 12-month period more than 100 separate incidents of violence, vandalism, and destruction of property as well as personal assaults were reported.

In the past, these violent occurrences have been too often passed off as simple

labor disputes between management and the unions. These are not, and should not be, considered as labor disputes in the American tradition of collective bargaining. What we are witnessing is deliberate and wanton sabotage by irresponsible elements of our society. The issue at stake is an individual's right to conduct his business free of violence and terror.

I maintain that we all have an obligation to condemn the tactics of violence and terror when used for any purpose, including their use as a tool in labor-management negotiations.

MEMPHIS, TENN., VA HOSPITAL

HON. DAN KUYKENDALL

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. KUYKENDALL. Mr. Speaker, I am very pleased to submit for the Record today, articles which appeared in the Commercial Appeal on March 9, 1973, and the Memphis Press Scimitar on March 8, 1973.

Both of these items concern our fine Veterans' Administration Hospital at Memphis, Tenn.

In view of the fact that many unfavorable stories have recently been printed concerning the operation of our VA hospitals, I felt that it would be of interest for my colleagues in the House to read these stories concerning the VA Hospital at Memphis, Tenn.:

[From the Memphis (Tenn.) Press-Scimitar, Mar. 8, 1973]

MEMPHIS VA HOSPITAL SAYS NO FUND CUTBACKS HERE YET

The director of the Memphis VA Hospital said today the 923-bed facility has suffered no staffing shortages or patient overloads because of any funding cutbacks.

"We are adequately funded to the point we can give a reasonably high level of patient care," said John B. Byrd, the hospital director. "We have not been cut back in any areas of funding and don't anticipate any funding problems in the future."

Byrd was responding to a report that Congressional investigators studying the massive VA system had found that funding cuts had caused a pattern of neglect that endangers the wellbeing of thousands of patients.

The confidential report was prepared for the House Appropriations Committee by staff investigators who reported they talked to VA officials in Washington and in 14 of the 168 hospitals across the country. Byrd was not interviewed.

Byrd said the daily patient bed census, instead of declining, is above average—801 patients on an average day, and all of the hospital has remained open.

He said the staffing ratio remains the same and has not dropped in recent years. The employee-to-patient ratio, he said, is 1.5 employees to each patient.

The report alleged that an ailing veteran must wait weeks or months for admission to one of the 168 Veterans Administration hospitals. Once there, he is likely to suffer from cramped quarters and may seldom see a nurse, according to the report. Conditions at some hospitals were reported so bad that a patient may leave in worse shape than when he was admitted.

A copy of the report was obtained Wednesday by The Associated Press.

Ultimately, the report said, the blame falls on the White House Office of Management and Budget for refusing to allow VA hospitals to hire enough employees to meet patient needs and for blocking expansion of hospital facilities.

The OMB, in the interest of saving money may even force 29 VA hospitals to close by 1975 and may intend to force the VA out of the hospital business entirely, the report suggested.

Describing staff shortages, the report said "nursing personnel are working at abnormally high pace because of understaffing" and "many essential nursing procedures either are not performed or not done properly."

The report noted that the VA claimed to have 98,297 operating beds as of last Dec. 31, but the investigators said the figure may be padded by as many as 2,000.

[From the Memphis (Tenn.) Commercial Appeal, Mar. 9, 1973]

SLASH IN VA HOSPITAL FUNDS IS UNLIKELY TO HIT MEMPHIS

A possible cutback in funds to Veterans Administration Hospitals will not affect the Memphis facility, John Byrd, VA hospital administrator here, said yesterday.

Mr. Byrd's comment came after a report for a House appropriations subcommittee said the Nixon administration's proposed 1974 VA budget will cause conditions to deteriorate and may even close some VA hospitals.

"Based on informal information we've received, we anticipate our 1974 budget will be at the same level as the 1973 budget," Mr. Byrd said.

"No, we don't anticipate any cutbacks. In fact, we anticipate an expansion to take care of the increased demands for service here," he said.

Mr. Byrd, however, said the hospital has not received its 1974 "target allowance"—the amount it can spend next year.

"We expect to receive the target allowance by the end of the month."

The report, critical of the VA hospital system, said thousands of veterans suffer from a dangerous lack of care in some VA hospitals.

The report further alleged the VA has attempted to conceal hospital conditions by distorting records and by falsifying the true number of beds available for patients.

It said that as of last Dec. 31, the VA was listing 98,297 beds in its 168 hospitals. But the report said the operating beds are not all in active service.

Mr. Byrd said such was not the case here. "We have 923 operational beds and an average daily census of 801 patients for fiscal year 1973."

A LITTLE RAY OF SUNSHINE

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. ALEXANDER. Mr. Speaker, we gravely meet and seriously contemplate the future of our constitutional democracy, we discuss the problems that seem to confront the very survival of some elements of our Nation. Our minds are filled only with the weighty matters of State. But every so often a piece of our daily mail can contain a little ray of sunshine that brightens our day and reminds us there is a lighter side to life. Howard Thielemier wrote me just such a letter

recently and I wish to share it with my colleagues today:

DEAR BILL ALEXANDER: I am writing this letter to say that you have my full support on one of the Tax Credit Bills. Tax Credit Bill H.R. 49.

By the way, I included a small joke. I thought that it might get pretty boring reading all of these letters.

The rain makes everything beautiful.

It makes everything blue.

If the rain makes everything beautiful.

Why doesn't it rain on you."

HOWARD.

AMENDMENT TO PERMIT VOLUNTARY PRAYER

HON. WILMER MIZELL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. MIZELL. Mr. Speaker, I am today introducing a joint resolution for a constitutional amendment to permit voluntary prayer in America's public schools and other public places.

I have offered this same amendment in both the 91st and 92d Congresses, Mr. Speaker, and we have come closer to passage each time we have reintroduced the measure.

I recall particularly the keen disappointment I felt when this resolution was defeated narrowly in the House during the last Congress, and I recall as well the disappointment felt by my constituents in North Carolina's Fifth Congressional District and by millions of Americans throughout the Nation on that occasion.

I believe the membership of the House in this 93d Congress will provide the margin needed for victory in this cause which I, and many of my distinguished colleagues, have fought for so long.

As I have said on several occasions in the past, Mr. Speaker, I am personally convinced that the authors of the Constitution had no intention of forbidding public prayer, or of abridging any religious freedom. This is the true meaning and purpose of the first amendment, as I read it.

But the courts have disagreed with this opinion in a series of decisions beginning 10 years ago. In 1971, for example, the local school board in Leyden, Mass., passed a resolution providing for a 5-minute period of voluntary prayer before school classes began. The State supreme court struck down that resolution as unconstitutional, and the U.S. Supreme Court on October 12, 1971, refused to disturb the lower court's decision.

The courts have said the authors of the Constitution did not approve of public prayer, despite the fact that at the Constitutional Convention of 1787, every session was begun with a public prayer, as suggested by Benjamin Franklin.

The courts have said that the invocation of God's blessing through public prayer is not consistent with our heritage of religious freedom, despite the fact that not one of the 37 Presidents of the United States has assumed the "splendid misery" of that Office without first call-

ing on the Almighty—in the presence of their countrymen—to guide and sustain them.

And now efforts are being made to remove the right of prayer and public worship from the White House itself and from the space flights of Americans. These efforts must not succeed.

From antiquity to our modern age, the hand of God has been the most significant influence on the works of man.

The Bible, in the 33d Psalm, reminds us that "blessed is the nation where God is the Lord."

As a nation whose motto is "In God We Trust," we have, in less than two centuries, grown to be the mightiest and freest and greatest Nation in the history of the world. These two facts cannot, in my estimation, be reconciled as merely coincidental.

If we are to do God's work and serve His purpose in this Nation, Mr. Speaker, we must preserve the right to call upon God publicly and seek His guidance openly and confidently, not covertly and not in fear of legal reprisal.

For any other situation to prevail to this country is a travesty of the first amendment to the Constitution, rather than a fulfillment of it.

That amendment guarantees the right to free exercise of religion. But the series of court decisions I mentioned has called that right into question, and the amendment I am proposing is intended to reassert the right to call upon God however, whenever, and wherever one chooses.

I urge the expeditious consideration of this resolution, and I look forward with millions of Americans to its passage and ratification.

MAN'S INHUMANITY TO MAN— HOW LONG?

HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. SCHERLE. Mr. Speaker, for more than 3 years, I have reminded my colleagues daily of the plight of our prisoners of war. Now, for most of us, the war is over. Yet despite the cease-fire agreement's provisions for the release of all prisoners, fewer than 600 of the more than 1,900 men who were lost while on active duty in Southeast Asia have been identified by the enemy as alive and captive. The remaining 1,220 men are still missing in action.

A child asks: "Where is Daddy?" A mother asks: "How is my son?" A wife wonders: "Is my husband alive or dead?" How long?

Until those men are accounted for, their families will continue to undergo the special suffering reserved for the relatives of those who simply disappear without a trace, the living lost, the dead with graves unmarked. For their families, peace brings no respite from frustration, anxiety, and uncertainty. Some can look forward to a whole lifetime shadowed by grief.

We must make every effort to alleviate their anguish by redoubling our search for the missing servicemen. Of the incalculable debt owed to them and their families, we can at least pay that minimum. Until I am satisfied, therefore, that we are meeting our obligation, I will continue to ask, "How long?"

WAR IN PERSPECTIVE: A CLERGY- MAN'S VIEW

HON. JAMES C. CLEVELAND

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. CLEVELAND. Mr. Speaker, at a time when the pulpits of many of our churches have become forums for criticism of U.S. involvement in South Vietnam, and war critics have sought to stake exclusive claim to the moral side of the question, I have been encouraged to find more reflective and reasoned views expressed by a prominent clergyman in my congressional district.

The Rev. Chandler H. McCarty, rector of St. James Episcopal Church, Keene, N.H., in a sermon on the cease-fire January 28, sought to render no final judgment on our conduct in Southeast Asia. As to justification, he said:

No one can say for certain and that must be left for future historians to decide.

But his historical perspective reminds us that the great evil of war has nonetheless served on occasion in times past to preserve from extinction the inheritance of cultural and ethical values we cherish today. These values underlie our reverence for life and abhorrence for war. They also inspire our dedication to freedom in which these values flourish and our willingness to defend them for ourselves and others.

I commend to my colleagues the text of the Rev. Mr. McCarty's sermon which follows:

CEASE-FIRE IN VIETNAM

The hearts and minds of all Americans this day are filled with gladness and gratitude over the signing of the Vietnam cease-fire agreement. It has been a long and frustrating conflict which has taken a heavy, heavy toll. It has been a divisive, polarizing experience for our nation, for as the frustration of Americans mounted, we found ourselves in our impatience inclined to think in terms of extremes. The desire to conclude hostilities and bring American soldiers home led many to believe that there were only two possible ways of accomplishing this.

One was to pull-out without further regard to whatever commitments had been made by our nation, and without further concern for the people of South Vietnam or Southeast Asia. The other was by a massive exercise of force which would bring the enemy to his knees in surrender.

The intensity with which individuals and group held to these conflicting convictions has left scars and divisions which will be long in healing. However, the policy our government committed itself to follow was to secure a peace without victory and without surrender. This middle course has now resulted in a cease-fire agreement and it is our hope and prayer that we may not know a time of lasting peace when perhaps the dream of Isaiah will finally be fulfilled.

At such a time as this it is the inclination of many to believe that war never accomplished anything. War is the great evil in the world, but there have been times when it was a necessary evil. Some wars have been decisive for all that has followed after.

One such war took place in the fifth century B.C., when a small army of Greeks, most of them from Athens and Sparta, turned back the hordes of invading Persians who had swept across Asia and into Europe intent on absorbing Greece into the oriental Persian Empire. Many men fought and died at Marathon and Thermopylae and Salamis and they prevailed. If they had not, there would have been no Plato or Aristotle or Socrates. The whole tradition of Greek culture with its insistence on freedom of mind and spirit would have been extinguished by an oppressive despotism.

Another such event took place in the third and second centuries B.C., when Romans were engaged in the Punic Wars in Carthage. Carthage in North Africa, was a colony of the Phoenicians and it was in these wars that Hannibal, the great Carthaginian general, crossed the Alps with his elephants in one of the most remarkable military feats of all time. He invaded and occupied Rome for a number of years, but finally the Romans were victorious.

If Rome had not prevailed, the world of the Western Mediterranean would have been oriental in culture and institution. The Roman Republic of Caesar, Cicero and Pompey would not have existed. There would have been no Roman law to serve as the foundation of our legal institutions and the Greco-Roman culture on which western civilization has been built would have been suppressed and extinguished.

A third such event took place in the eighth century A.D., when an army of gallant Frenchmen under the leadership of Charles Martel opposed invading hordes of Mohammedans who had already swept across North Africa from Egypt to the Atlantic, had engulfed Spain and were now intent on the conquest of the remainder of western Europe. If Charles Martel and his French soldiers had not stopped the Mohammedan invasion, Western Europe would probably not be Christian today, for everywhere they conquered they put Christianity to the sword, and in most of the areas where they conquered, it has never revived.

In our own time, who of us can forget the sacrifice of those who stopped the advance of Hitler as he launched a madman's attempt to plunge the whole world into a new dark age of brutality and barbarism? We can't conceive what life today would be like if Hitler had won.

So although war is the great evil in the world, we cannot claim that no war has ever accomplished anything, for again and again throughout history only armed might has preserved the institutions of freedom and justice.

Perhaps only the historian of the future will be able to say with certainty whether our involvement in Vietnam was a tragic mistake from start to finish in which we endeavored to impose our will and prevent the majority of those people in that divided country from determining their own destiny, or whether as others claim, we have prevented a totalitarian, anti-Christian Communist conspiracy from conquering all of Southeast Asia in a step toward world domination. Who can say, but if the latter should prove to be right, then perhaps our involvement in Vietnam will have been as important as the Greeks combating the Persians or the Romans the Carthaginians.

No one can say for certain and that must be left for future historians to decide. Our task now is to heal our differences within our own nation and deal with our former enemies in a Christian spirit of forgiveness and reconciliation. We must work and pray that the

time has come when the vision of the prophet Isaiah will finally be fulfilled. "The day would come," Isaiah said, "when men would beat their swords into plowshares and their spears into pruning hooks, when nation would no longer rise up against nation, and there would be no more war." May we as a nation do all within our power to make this dream come true in our time.

ARKANSAS ARTIST USES TALENTS TO RECORD HISTORICAL STEAMBOATS ON CANVAS

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. ALEXANDER. Mr. Speaker, we in the delta country of Arkansas have long been aware and proud of our history and of the contributions the people of the Mississippi River region have made to the development of our Nation. I am afraid, however, that all too often there are certain things that we take for granted and which may be forgotten with the passing of time. That is why as the tricentennial celebration of the Mississippi River approaches, I would bring to your attention a woman with an unusual talent.

Mrs. Marion S. Bradford of Harrisburg, Ark., paints steamboats—those colorful and infamous boats which toiled cargo, gamblers, and riverboat queens and which meant so much to the growth and success of many of the towns up and down the river as well as to the economy of the entire country. Mrs. Bradford recognizes the importance of art in preserving the local history, culture, and customs of a region and her paintings are not just for the esthetic value. Working with a researcher, she records on canvas accurate and detailed descriptions of the steamboats of the 1900's and 1920's. These paintings are presently being recorded on microfilm and will be available to libraries all over the country.

Recently, Mrs. Bradford spoke at a meeting of the Osceola Progressive Club where she spoke of the role of the arts and of her experiences in painting river steamboats. I share that discussion with my colleagues at this point:

MRS. BRADFORD BRINGS RIVER BOAT PAINTINGS
(By Emma Nell France)

Mrs. Marion Bradford, painter of river steam boats, of Harrisburg, Ark. gave the program at the March meeting of the Osceola Progressive Club last week. Mrs. Bradford a member of the Harrisburg Federated Women's club, has twenty paintings of river steamboats on display this month at Mississippi County Library.

Mrs. H. L. Veasman, Art Chairman of the Osceola Club, introduced Mrs. Bradford who talked on "The Arts-GFWC 1973-1974". Following is the text of the talk:

"GOALS—Develop respect for our rich, culturally divergent heritage—nurture reverence for all forms of art—share the responsibility of passing on to future generations the ability to create family and ethnic arts and crafts, thus assuring the endurance of customs—involving the youth and the elderly, challenging their creative abilities—encourage creativity, appreciation, and participa-

tion in the arts to enhance the quality of life.

It is the responsibility of the Arts Department to involve in some phase of the arts every federated club and every member of that club. Involve yourself and include the arts as an integral part of your living experience.

As a clubwoman, seek out programs that will develop a better understanding of America's rich cultural heritage.

Promote and support professional talent whenever possible, placing special emphasis on encouraging the talents of youth. Attend their concerts and recitals, they need an appreciative audience. Show civic pride to that which is unique or interesting about your town. Study your town, your state, your country. Take pleasure in becoming an expert on local history, customs and people. Be aware of our country and state contributions to all forms of art.

It has become my opportunity during the past few years to study and paint a part of our history that could only occur here in America. There are many rivers in the earth that resemble the Mississippi family, but none of them was being intensively developed at the same time as the American invention of steam power. No other nation had the overwhelming urge to settle so vast an area in such a short time. So, the steamboat and the destiny of Amerimer, now a steamboat history are firmly locked in history and each depended on the other for its eventual success.

"A Steamboat" by George Fitch is an engine on a raft, with \$11,000 worth of jigsaw work around it. Steamboats are built of wood, tin, shingles, canvas and twine, and look like a bride of Babylon. A steamboat must be so built that when the river is low and the sandbars come out for air, the first mate can tap a keg of beer and run the boat four miles on the suds. Steamboats were once the beasts of burden for the great Middle West. The city which could not be reached at low water by a steamboat with two large, hot stacks, twenty-five negro roustabouts on the bow and a gambler in the cabin, withered away in infancy. The most decorative part of a great river is a tall, white steamboat with a chime whistle and a flashing wheel in the far foreground.

Perhaps you would like to know how this interest in painting steamboats came about. The one that most people enjoy is that one of the first steamboats up the Arkansas River was the Robert Thompson. My grandfather's name was Robert Thompson and perhaps a reincarnation of a steamboat. The more logical reason is a love of boating on the rivers in northeast Arkansas, where my Dad and I spent many happy hours boating and fishing. When I started painting, a towboat builder asked me to do commissions for his company. A retired riverman, now a steamboat historian, heard of my work and suggested that I try painting steamboats and help get this important part of history on canvas. There are few artists who can or want to spend the necessary time to draw the intricate details of steamboats, and my friend was worried that the coming generations would not have a record of many of the steamboats. There are many steamboat photographs, but many of them even as late as 1900's and 1920 were not photographed. Since working with my friend we have recorded many of the boats from his description following research. These are being recorded on microfilm and will be available in libraries over the country. The present project is of special interest to this area as it is the history of the Lee Line out of Memphis.

In February, 1972 the steamer, Delta Queen made history for the State of Arkansas that was noted all over the world. She made her first trip up the new Arkansas River navigation system to Little Rock to race the excursion boat Border Star. It was my privilege to make this excursion. The

Cincinnati office of the Delta Queen had given me special permission to exhibit on board during this excursion and told me take the paintings on board with me in Memphis. My husband and I were carrying the paintings on and were suddenly assisted by a very tall, distinguished looking gentleman who introduced himself as Mr. Quinby. As we were spreading the work out in the lounge as requested the tall broadshouldered Capt. Ernest Wagner came lumbering down from the Texas Lounge and over to where we were.

He was closely followed by the Head Steward, Mr. Miles and the First Mate, Capt. Don Sanders. Immediately thereafter five more gentlemen joined us and we were introduced to none other than two former owners of the boat, two pilots who first brought the boat from New Orleans to Cincinnati on its first trip up the Mississippi and "Mr. River" Capt. Fredway, Jr., who was responsible for the Delta Queen getting from Sacramento around through the Panama Canal and up to New Orleans. He is also a noted author of many books on steamboating. Well I was like a kid in a candy store, but I suddenly realized the importance of this credit and felt that if they liked my work and it "passed" then I would continue painting steamboats. Reaction gave me reason to do so, as there was only two changes suggested.

I am sure many of you have traveled and had much more sophisticated experience than those we had on this trip, but having talked since then with other passengers who were on the same historic excursion, we have felt that there could not have been a more enthusiastic steamboat passenger list at any time. We have since learned of nearly all the passenger's interest in steamboating, and we feel it would make a good story.

There were movies being made by a California movies making company, the President of the Overseas Airways and his Swedish wife joined us to add to the celebrity list but there were small amusing incidences that add to the enjoyment of anyone's travels. Such as the first night at dinner.

We found after about a forty minute conversation that our table had been bugged and we had been included in the filming. We immediately tried to recall what had been said, and was amused to remember the conversation was how the city of Oil Trough got its name. The bear oil was sent down the river in a tree trough. The next night we had forgotten this incident. I joined three other ladies at the table and conversation started with how nice it was not to have to wear a girdle with some of the long dresses. We later again found out that our table was bugged, so we began to think about what we were going to say before going to dinner.

The Border Star and the Delta Queen raced again last month and we had great fun participating in it. My son rode the winner—Delta Queen and my husband and I rode the Border Star. We are looking forward to the race again next year when the Border Star is going to beat the Delta Queen. How about this having "steamboat races" in this atomic age. Among steamboat circles the races at Louisville each year is not the Kentucky Derby but the one between the Belle of Louisville and the Delta Queen.

Mrs. Bradford closed her talk by expressing thanks to the club for inviting her and said she hoped that something from the talk would make the exhibits of her steamboats in the library more meaningful to those who came to view them.

Mrs. E. M. Beatty gave the invocation at the luncheon. Miss Nellie Gant, an employee at the Mississippi County Library played violin music accompanied at the piano by Mrs. H. L. Veasman during the time the ladies were having lunch.

Mrs. Benny Nichol was chairman of hostesses who used arrangements of spring flow-

ers to decorate the tables carrying out a St. Patrick Day theme. Serving with Mrs. Nichol were H. F. Ohlendorf, Mrs. R. B. Holthouse, Mrs. Leo Schriek, Jr., Mrs. Joe Rhodes, Sr., Miss Ruth Richmond and Mrs. J. B. Seitz.

Other guests in addition to the speaker and Miss Gant were Mrs. Dick Cromer, Miss Julie Mae Morrison, Mrs. Lorene Gibbons, Mrs. Charles Wildy, and Mr. Elton McCann, Junior High Counselor in the Osceola school system.

CIVILIAN USE OF SURPLUS HELICOPTERS

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. REUSS. Mr. Speaker, on February 15, I wrote to Secretary of Defense Elliot L. Richardson urging that surplus military helicopters be made available for use in civilian medical rescue programs and requesting a summary of the number and types of vehicles now in storage.

During the Vietnam conflict, thousands of lives were saved by using airborne evacuation to provide prompt medical treatment. Helicopters could serve the same purpose in domestic traffic accidents and natural disasters, and would be of additional value in law enforcement, traffic control, and fire prevention and control.

On March 13, I received a response from Joseph P. Cribbins, Director of Aviation Logistics for the Department of the Army, listing 1,459 military helicopters currently in storage, most of them at the Military Aircraft Storage and Disposal Center at Davis-Monthan Air Force Base in Tucson, Ariz. Mr. Cribbins conceded that the Pentagon has received "many requests from Federal, State, and local agencies for loan, transfer, or sale of helicopters to be used for medical evacuation and other purposes," and he acknowledged that the Pentagon has been testing a medical evacuation program—military assistance to safety and traffic—MAST—at several military bases since 1970. However, Mr. Cribbins said that the Pentagon has decided not to expand the program at the present time.

Most of these 1,459 vehicles are surplus to the requirements of the military service, and the Pentagon has the authority, under laws such as the Federal Property and Administrative Services Act of 1949, to make them available for civilian use. But the Pentagon keeps them in mothballs, when they could meet urgent civilian needs.

Many of the people injured in highway crashes die needlessly or are permanently disabled because they do not receive prompt and proper care. A recent report by the Center for the Study of Trauma at the University of Maryland says that "for every 30 minutes that lapse from the time of injury to the time of definitive care, the mortality rate increase threefold."

Since 1969, Maryland has had a civilian program of emergency medical evacuation, operated jointly by the Maryland

State Police and the University of Maryland. But the high cost of purchasing new helicopters is a serious obstacle in widespread application of that program.

If the Pentagon's surplus vehicles were freed for civilian use, our highways would be safer and thousands of lives would be saved. An added benefit is that thousands of returning Vietnam veterans could be employed across the country, operating and servicing the helicopters.

On March 23, an editorial in the Sarasota Herald-Tribune of Sarasota, Fla., expressed support for civilian use of these surplus helicopters. The text of that editorial follows:

PUT USEFUL "CHOPPERS" TO WORK

Rep. Henry S. Reuss (D-Wis.) put forward a fine idea last week, when he suggested that the military should release for civilian use more than 1,400 surplus helicopters being stored on American bases. "Since the Vietnam ceasefire, most of these helicopters have been declared in excess of the requirements of the United States air services," Reuss said in his statement. "The Pentagon has authority to make them available for civilian use. But still they remain in storage, deteriorating and unused, when they could meet civilian needs."

The usefulness and effectiveness of helicopters for transporting the critically ill and injured, and for assisting in police work, has been demonstrated in many parts of the country.

Manatee County's Sheriff Weitzenfeld, has put in a request for a helicopter, but so far the funds have not been available. Probably Sheriff Hardcastle of Sarasota, and other police and public safety agencies, would like to have these aircraft, if they didn't have to pay the relatively high initial cost of purchasing them.

Another advantage of having these helicopters released is that they could provide good jobs for the hundreds and hundreds of Vietnam veterans who were trained to top proficiency as helicopter pilots, but cannot find jobs in civil life because of the relatively low number of helicopters in use.

In the aftermath of World War II, millions of dollars' worth of bulldozers, electric generating plants, and every conceivable type of equipment was destroyed, frequently by dumping from barges into the Pacific.

The theory was that if this equipment were returned to the United States it would cut down on the manufacture of new equipment and reduce the number of jobs.

We just do not buy this theory, but instead feel that if the surplus helicopters were put into the market, their use would stimulate the production of spare parts, the creation of overhaul centers, and ultimately encourage more communities and businesses to purchase newer, more modern versions.

Probably manufacturers have some hesitancy about the helicopters being released bearing their brand names, since there has been an unusual rash of suits against aircraft manufacturers, with juries tending to hold the manufacturers responsible, even though it was never proved whether the accident bringing on the suit was caused by a pilot or mechanical failure.

However, as these helicopters are in United States government hands, there must be some way to interpose the government's sovereignty between the manufacturers and the users. To date, the FAA, apparently cooperating with manufacturers, has declined to issue civil airworthiness certificates for the helicopters.

Unquestionably some of the surplus helicopters are not readily suitable for civilian use, but since they range from small, two-place, scout machines to medium transport

helicopters, many of them would surely be of great help to the public in a variety of roles.

Rep. Reuss has a good idea, and we hope that a way can be found to get around the red tape. What better use could there be for surplus military equipment than providing jobs for veterans, and for saving civilian lives?

ON CHISELING THE VETS

HON. LIONEL VAN DEERLIN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. VAN DEERLIN. Mr. Speaker, articulate voices have been raised in the San Diego area—a part of which I represent—to protect the shabby treatment returning Vietnam veterans are receiving at the hands of a government that seemingly no longer cares.

These expressions, I think, are an indication of the nationwide concern over the plight of these veterans. I am sure that all our colleagues have been seeing and hearing plenty on this score from their own districts.

I will include at the end of these brief remarks an editorial and a letter, both published originally in newspapers serving the San Diego suburbs.

The editorial, which appeared last week in the Chula Vista Star-News, is a litany of the injustices perpetrated on these former service men and women. The letter was carried a few days earlier in the El Cajon Daily Californian; it documents the desperate circumstances in which many veterans who are attempting to attend school under the GI bill now find themselves.

Both documents follow:

CHISELING VIET VETS

Whatever one's views on the United States' intervention in Vietnam, it was not the fault of those who served there. The rank-and-file members of our armed forces did not make the decisions that dragged us into the war; that was the doing of the Presidents and the Pentagon generals and the admirals who fight wars from safe positions, like from 10,000 miles away.

Our servicemen, rather, were the war's victims, like the people of Vietnam and those Americans whose consciences compelled them to leave their homeland rather than be forced to fight in an enterprise they considered odious.

All of our servicemen in Vietnam lost something—if only some of the best years of their lives. More than 50,000 lost life itself. And a quarter of a million have lost part of themselves—a hand . . . a foot . . . an eye . . . or the ability of a part of their body to properly function.

Yet the Nixon administration, which is long on rhetoric about the "great debt" we owe our Vietnam veterans, wants to chisel down their benefits.

Incredibly, at the same time the last American troops are being withdrawn from Vietnam and a relieved nation is welcoming home its POWs, Mr. Nixon has presented to Congress a budget that slashes over a quarter of a billion dollars from the Veterans Administration for benefits to veterans.

Much of the cut in the VA's proposed budget would be in aid for disabled Vietnam veterans. Thus, a serviceman who lost five fingers in Vietnam would have his benefits cut in half—from \$212 a month under the existing benefit schedule to \$106.

A Vietnam veteran who had his leg amputated at his hip would suffer an even greater benefit cut from a grateful Nixon administration—from \$275 a month to \$106. And if he were lucky enough to have had his leg amputated only at mid-thigh, his benefits would be reduced to \$77 a month, from the \$179 he receives under present schedules.

This benefit reduction, recommended by the President's VA chief, would save Mr. Nixon \$160 million of the \$277 million cut he has proposed for the Veterans Administration.

Other cuts would be in veterans' education benefits, employment programs and work-study programs (which could provide 800 jobs for veterans at our own Southwestern College, alone).

The cuts for the disabled were justified by Mr. Nixon's VA bossman, Donald Johnson, on grounds that, thanks to new prosthetics and fewer jobs requiring manual labor, being disabled isn't such a handicap any more. Mr. Johnson, of course, is not disabled.

The cuts, he said, "just reflect our ability to spend prudently and wisely."

We do not think it is either prudent or wise to cut the benefits of Vietnam veterans; if anything, in the face of inflation and the agonizing readjustment problems all veterans face in returning home from an unpopular war, the benefits should be increased.

But that's the human way of looking at it. Mr. Nixon, however, looks at things differently. He believes in the philosophy of "self-help" (even if you're lacking an arm or a leg.)

That's why he's slashing the antipoverty program and cutting back on aid to the disadvantaged, the hungry, the ill-educated and the poor. No longer, under the Nixon Doctrine, should the unfortunate feed at the government trough.

The fortunate, however, will continue to munch there happily. For there is nothing in Mr. Nixon's budget that cuts fat subsidies to defense contractors or subsidies in the form of tax loopholes to oil companies and millionaires who get away with paying little or nothing in taxes—while Mr. Nixon cries budgetary poorness and takes it out on the hides of the disadvantaged, veteran and nonveteran alike.

Mr. Nixon's proposed VA budget makes the Vietnam serviceman a second-class veteran—with far fewer benefits than for veterans of America's prior wars. (Indeed, the benefits for the disabled from earlier wars would remain the same.)

Perhaps Mr. Nixon felt he could get away with this politically because Americans regarded Vietnam as a second-class war. Johnny did not come marching home to brass bands and cheering throngs, and only a minority of Americans viewed the war as an heroic enterprise.

But that is all beside the point. For America owes a debt to its Vietnam veterans not because of the merits or demerits of the war, not because of what the war accomplished or did not accomplish, but simply because it's right and it's fair.

Our servicemen in Vietnam paid a high price for a governmental decision; rightly or wrongly, the American people supported that decision, or at least passively accepted it. Therefore the government and the American people should compensate our Vietnam veterans.

We hope that Mr. Nixon's callous cuts in Vietnam veterans' benefits are fully restored by Congress.

COLLEGE VETS ARE DROPPING OUT

An open letter to Veterans' Administration, Regional Office, Federal Building, 11000 Wilshire Boulevard, Los Angeles, Calif. 90024. Gentlemen:

During the month of February, 1973, the first month of our current semester, eighty-

eight veterans withdrew from Grossmont College. Many of them, and I am unable to give you the exact number, were forced to drop out because of the lack of funds.

The same complaint continues to arise—payments from the V.A. have not arrived. I am fully aware that the veteran himself often contributes to this problem, but nevertheless many veterans are unable to buy books and supplies, are unable to pay fees, to pay rent, to buy food, and in many cases, to support families while checks are being held by the V.A.

I now have in my office a young Vietnam era veteran who is married, has children, and who has not received a penny from the V.A. since he filed his papers last November. He is withdrawing from school today in order to look for work. Now, he will not receive benefits, he has no job, and he has to repay borrowed funds, as well as pay rent and care for his family.

Can anyone really believe that he and his family are not becoming embittered?

And now, may I ask four important and pertinent questions?

1. In view of all of the rhetoric from the Veterans' Administration, the President and numerous politicians, when is the V.A. going to streamline its procedures so that veterans can receive the services and benefits to which they are legally entitled?

2. When is the V.A. going to publish guidelines and implement that portion of Public Law 92-540 relative to "work study" allowances for veterans?

3. When is the V.A. going to publish guidelines to implement advance payments to veterans who have returned to college, as the public law now provides?

4. When are educational funds for veterans, approved and signed into law under the so-called "Cranston Amendment," to be released and made available?

And now, I would like to make two suggestions:

1. San Diego is urgently in need of a regional office of the Veterans' Administration, if only on a temporary basis, in order to speed up services to thousands of veterans in the area. Money has seldom been an obstacle to the pursuit of war. Why should it now prove to be an obstacle when serving its veterans?

2. At a time when most public and private schools and colleges are being forced to reduce their budgets, they are also being asked by the V.A. to take on a greater and greater clerical task in the processing of veterans' benefits. Grossmont College is a prime example of such a squeeze.

In April, 1972, we received a check from the V.A. in the amount of \$5,464 to compensate for services to 1,888 veterans who, according to V.A. records, were attending this institution as of Oct. 31, 1971. This amount scarcely pays the salary of a full-time clerk, and does not compensate for services rendered to:

a. Several hundred veterans whose papers were processed earlier, but (who) withdrew from school before Oct. 31.

b. Hundreds of additional veterans who enrolled, and were fully processed by our staff, during the spring semester.

c. Hundreds of veterans who attended summer session and who had to be processed by our staff.

d. Hundreds of inquiries, problems and complaints that come to our desk during the year.

At the same time, our staff, with a payment from the V.A. of \$5,464 for the entire year, is being asked to form a veterans' club; help find jobs for veterans; make loans; provide special counseling; attack the drug abuse problem; provide special classes; improve tutorial services; and many other things while experiencing severe budget problems of our own.

If these services are to be rendered, and if we are to recruit and keep veterans in school, then we need more funds for those

services. If they aren't forth-coming, then there is not much we can do for those "freedom loving," "patriotic," veterans of whom President Nixon said on Oct. 24, 1971, "It is to our veterans that we owe the final debt for America's greatness, and we intend to pay that debt."

BRING THEM HOME

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. GAYDOS. Mr. Speaker, with the return of our prisoners from Indochina, the time certainly is here for a major effort of Congress, backed up by a strong public opinion, to bring home, too, those thousands of other captives of our past illusions.

I speak of the 300,000 Americans wasting good years in Western Europe, the 50,000 in Japan, and the approximately 50,000 still manning the watch towers along the historic truce line in Korea—all supposedly safeguarding the freedom of peoples over there.

We know by now how unfair, if not totally absurd, have been the policies which placed them there. They are compelled to make the sacrifices of standby soldiers in foreign lands when those lands have ample men and means to protect themselves. And against whom are they standing guard? The old cold war enemies long ago lost their fearsomeness, at least to our protected allies, and today are claimed to be our friends.

Our role abroad has been an injustice to those personally caught up in it and a damaging factor to the U.S. economy. The cost of maintaining the overseas troops is estimated at \$17 billion a year with the figure expected to go up another billion next year. And yet we insist on paying this enormous bill despite the widening trade balance against us, two recent devaluations of the dollar, the unmanageable Federal deficits and the cruel neglect, because we lack the money to meet them, of urgent needs at home.

We are persisting in this insanity for only one reason. With all good intentions, we allowed ourselves to get trapped in it while failing to foresee its inevitable consequences—that, once in and established, we would find it extremely hard to get our troops out. So we let them stay.

Our forces have meant a steady multi-billion flow of U.S. dollars for their maintenance into the countries where they are posted. These dollars have had heavy impact on the West German prosperity and the good times generally in Europe and in Japan. Now, joined by those hoarded from our giveaway programs and newly gained in trade profits against us, they have so clogged up in the world's money channels that their value is lessened sharply. Still, we continue as the "Great Defender," paying with our buffeted dollars what otherwise would be the normal defense costs of "partners" abroad and letting them enjoy the benefits!

Every try to bring our men home has stirred up the "globalists" in the State Department and fretted the White

House which obviously does not quite know how to handle an ally protesting a treat to the gravy train. News from Frankfurt, Germany, however, may show a turning. Crowds there demonstrated the other day against the U.S. military presence in their city and demanded its withdrawal. Perhaps, with our dollars no longer in high esteem, we shall hear again that "Yankee, Go Home!" cry which echoed so widely a generation ago.

It was disturbing to me to read recently that the White House is using our troops in Europe and Japan as bargaining chips to get trade concessions. This surely is an abrupt departure from the original purpose of sending them there. The President was overheard by newsmen as he told NATO Commander Gen. Andrew J. Goodpaster:

The problem of trade will be interesting and sometimes difficult with our European allies and Japan. We can't overlook the fact that all this is tied into security arrangements we have with Europe and Japan.

Thus the President, in words certainly meant to be overheard, warned the Europeans and Japanese that, unless they stop clobbering us with unfair trade practices, we will cut the strength of our security forces in their countries. An end to the dollar drain of these forces, I might add, would make the need of such concessions less urgent.

If we bring home our men, then what shall we do with them? This question always is raised in some justification for keeping them away. But I say that, if they cannot be returned and readily absorbed in private employment, they still can be kept in uniform here and doing tasks more meaningful to their own country than they are doing now. And their support money and their own spending would be retained in the domestic economy, providing, indeed, a \$17 billion shot in the arm which the economy well could use.

So, I say, let us bring them home from Europe, Japan, and other places too and, with them home, give full attention to protecting our own Nation from its real enemies of inflation, urban decay, pollution, disease, crime, drugs, traffic pile-ups, and so forth. It is ridiculous, in my mind, to raise the fears that, if we did this, the Russians and the Chinese suddenly would turn aggressive and that our allies, rather than using their own swollen treasuries and their own forces to protect themselves, would quickly lie down and accept the chains of unspeakable tyranny. This is so overdrawn as to seem silly to us now. And, still, it was this very kind of scare thinking which first led Uncle Sam into trying to protect, with our men and resources, the whole free world.

BYELORUSSIAN INDEPENDENCE

HON. MARTHA W. GRIFFITHS

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mrs. GRIFFITHS. Mr. Speaker, on March 25, Americans of Byelorussian descent and all those who cherish free-

dom from bondage and tyranny observed the 55th anniversary of the founding of the Byelorussian Democratic Republic. I am happy to join with my colleagues in the House in paying tribute to the brave Byelorussians.

The Byelorussians were forced to live under czarist rule for several centuries until they seized the opportunity afforded by the Russian Revolution of 1917, and proclaimed their independence on March 25, 1918. They formed their own democratic government in their capital city Minsk, and began to rebuild their war-torn country. Unfortunately, the Byelorussian independence of 1918 was to be short lived. In December 1918, the Red Army seized Minsk and established a government of military revolutionary committees. Today, there is no real free and independent Byelorussia. They are under a Communist regime imposed on them by the Soviet Union. However, the desire of the Byelorussian people for their national freedom has not perished. The fight for Byelorussian independence is the fight of all the captive nations. Let us continue to hope for the day when these courageous people can truly say they are a free nation just as they were for those few moments in 1918.

A BILL TO EXTEND UNEMPLOYMENT BENEFITS

HON. JEROME R. WALDIE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. WALDIE. Mr. Speaker, major reductions in the employee levels of Federal agencies, layoffs in private industry, inadequate public services, and rising prices make it very clear that Congress must now respond vigorously in order to deal with the existing problems of unemployment.

I am introducing today a bill to extend unemployment insurance benefits for an additional 13 weeks beyond the current 26-week period in States which have an insured unemployment rate of more than 4 percent. Essentially, the provisions of this bill eliminate the "on" and "off" trigger mechanism in the 1970 Federal State Extended Compensation Benefits law. This would thereby extend unemployment benefits to workers, now jobless, in over 20 States.

In my State of California, unadjusted unemployment figures for January of this year show that 5.9 percent of the work force is unemployed—over 500,000 people. Over the last 4 years California's unemployment rate has risen from 4.5 to 7 percent in 1971, and preliminary figures for 1972 indicate an annual unemployment rate of 6 percent.

Mr. Speaker, I do not feel that Congress should allow the administration to on the one hand force massive reductions in employee levels in Government agencies in the name of "cost-saving" and in the other hand continue to allow corporations to escape paying their fair share of taxes.

Government must be responsive to the needs of all citizens—especially those

who suffer as a result of Government inaction. If the President is so insensitive as to continue avoiding the implementation of policies to create jobs and stabilize prices, the Congress must assume leadership for the interests of all Americans who want to and need to work, but who cannot due to the failure of the administration's economic policy.

The costs of implementing this bill cannot be considered fiscally unsound or inflationary, because the costs would not, in fact, be an item of expense to the Federal Government. Actually, the plan would be entirely financed out of taxes levied on employers which are paid into trust funds administered by the Federal Government.

Mr. Speaker, responsible leaders of Government cannot turn a deaf ear to the needs of those they represent. To those now exhausting their regular 26 weeks of unemployment benefits, as many as 4,000 per week in some States, we cannot turn back. I urge the Members to give this bill their careful and thoughtful consideration.

BYELORUSSIAN INDEPENDENCE DAY

HON. JOHN W. WYDLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. WYDLER. Mr. Speaker, at a time when world attention is drawn to the difficulties of those in the Soviet Union who wish to emigrate but are faced with either harassment or prohibitive fees, I rise to call attention to an entire nation that exists bound and confined within the Soviet Union. March 25 marked the 55th anniversary of Byelorussian Independence Day, and I am proud to add my voice to those of my distinguished colleagues who help commemorate what should be a joyful time for over 9 million Byelorussians.

The contrary is true, however. It is a sad commentary on the condition of personal freedom and national liberty in the Soviet Union that we in the United States must never forget that the Soviet leadership persists in perpetuating a myth when it maintains that the Byelorussian Soviet Socialist Republic is a free and willing member in a federal union of autonomous national groups. Nothing could be further from the truth.

Byelorussia suffered greatly under two centuries of Tsarist Russian rule—two centuries that had been preceded by centuries more of Polish domination. This nation of proud and industrious people, which at one time in the middle ages formed one of the most progressive and vital states in East Europe, found itself literally fighting to withstand countless attempts at cultural assassination and oppression from both Poles and Russians.

Finally, events surrounding the disintegration of the czarist empire during World War I permitted creation of a new Byelorussian state founded on rapidly developing Byelorussian nationalism. The Byelorussian National Republic, vibrant with new found pride and liberty

could not overcome the handicap of wartime devastation coupled with political infiltration by Russian Bolsheviks backed by the Red army. Ultimately the Byelorussian national government was forced into exile and the remaining state, after a new period of Polish control, underwent the ignominy of a Russian-Polish settlement that partitioned Byelorussian's territory. A new struggle just to restore its geographic dimensions had to be coped with by the Byelorussian Bolshevik Government.

During the Soviet new economic policy—NEP—period from 1921 to 1929, the Byelorussians were among the most ardent defenders of their cultural identity and independence. In fact, the veritable groundswell of literary and nationalistic activity that developed helped the Byelorussians to jointly resist collectivization and socialization efforts. Indeed, under the NEP guidelines they quickly established a reputation as hard-working, industrious people in a free enterprise sector that continued to exist in deference to their fierce independence. Unfortunately, the Byelorussian S.S.R., already stripped of any real political autonomy, subsequently lost the educational and cultural freedom that existed in the 1920's.

Once Stalin was firmly in control of the Soviet Union's central authority, Byelorussian independence of mind and spirit came under a concerted attack. The result was a level of suffering exceeded only by that in the neighboring Ukraine. This campaign waged by the Kremlin to liquidate Byelorussian nationalism could not succeed, but it did severe damage. Nearly 15 percent of the peasants were deported, as much as 5 percent of the population died of starvation, the church was looted and razed, political and cultural leaders were arrested and removed by execution or deportation.

The determined Byelorussians, once again victims as before in their history, have weathered this and subsequent onslaughts and continue to demand recognition of their right to liberty and free expression. We can only feel saddened at the fate history has assigned these forthright people, yet we marvel at their resolute championship of their right to stand unbound alongside the community of free nations on this earth. We must applaud every gain made in their struggle toward real freedom, and it is with this in mind that I urge everyone to not ignore this nation's plight.

KENTUCKY STATE BASKETBALL TOURNAMENT

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. MAZZOLI. Mr. Speaker, each year for the last 56 years Kentucky has held a statewide basketball tournament. In this year's final game Shawnee High School of Louisville defeated Male High School of Louisville to become State

champions for the first time. It is my privilege to represent each of these fine schools in this Congress.

Kentucky is a basketball State. The quality of play and the enthusiasm of the fans is not surpassed anywhere in the country. It is a true achievement to make it through the tough regional competition to become one of the 16 teams in the final playoffs. The champion which emerges from this "sweet 16" is the best of the best.

Both teams in the final game were outstanding examples of the quality basketball played in Kentucky. Male, coached by Jim Huter, and Shawnee, coached by James Gordon, amassed impressive victory records during the regular season and their play throughout the tournament reflected championship style.

It was a long road for the players and coach of Shawnee from the first game of the season to the last seconds of the championship game in Louisville's Freedom Hall.

Each step of the way was paved with hard work, dedication, and personal sacrifice. I am honored to take note of the rewards of their efforts here in the Congress of the United States.

AMENDING THE FISHERMEN'S PROTECTIVE ACT OF 1967

HON. DAVID C. TREEN

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. TREEN. Mr. Speaker, I have co-sponsored legislation with several of my distinguished colleagues to insure the safety of U.S. commercial fishing vessels, crews, and equipment against illegal harassment and seizure.

I am disturbed by recent incidents in which the Governments of Ecuador and Peru have seized American ships in what the United States regards as international fishing waters. The problem is that several nations are seeking to extend their boundaries to include all waters up to 200 miles from their shores. These new limits would exclude other nations' fishing vessels from some of the most productive international fishing waters in the world.

It is obviously not equitable for American fishermen to be confined to the traditional 12-mile limit off our own shores, while having to respect 200-mile limits for other nations.

I understand that the State Department is attempting to negotiate treaties with several of the nations involved; but until some equitable agreement is reached, we should all respect the existing rules and traditions of international law. Our resolution would convey to foreign powers the message that the United States is prepared to protect its fishermen. The resolution authorizes the President to use Navy and Coast Guard vessels, as well as air and sea surveillance of the contested waters, to protect American ships from illegal harassment and seizure.

The resolution follows:

HOUSE JOINT RESOLUTION 370

Joint resolution amending the Fishermen's Protective Act of 1967 to insure the safety of United States commercial fishing vessels, crews, and equipment against illegal harassment and seizure.

Whereas the Governments of Ecuador and Peru recently harassed and seized United States commercial fishing vessels while such vessels were carrying out fishing operations in international waters and subsequently levied fines against such vessels;

Whereas such illegal acts against United States vessels by the Governments of Ecuador and Peru as well as by other foreign nations have become more and more frequent; and

Whereas, although Federal law presently provides financial relief to the victims of such illegal acts, it is imperative that measures be taken to prevent the perpetration of such acts in the first instance: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Fishermen's Protective Act of 1967 (22 U.S.C. 1971-1977) is amended by adding at the end thereof the following new section:

"Sec. 10. The President is authorized and directed to use vessels and aircraft of the Coast Guard or of the United States Navy, or of both, in such manner as he deems appropriate to insure the safety of any United States commercial fishing vessel and its crew and equipment while such vessel is carrying out fishing activities in waters recognized by the United States as international waters. In order to carry out the purposes of this section, the President is further authorized and directed to provide for the implementation of appropriate air and surface surveillance of those waters recognized by the United States as international waters in which United States commercial fishing vessels have been, or are likely to be, subjected to harassment or seizure by foreign nations."

MISTAKEN PERMISSIVISM

HON. LOUIS C. WYMAN

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. WYMAN. Mr. Speaker, the mistaken and misguided view of the Constitution's first amendment as conferring absolute license to say anything one wishes, anywhere at any time, given sanction in judicial decision, has done great damage to our country. A reasonable measure of restraint in matters such as obscenities or libel and slander is a public necessity.

Recently a State university sought to discipline a student for willfully distributing on campus obscenities in printed form. "Unconstitutional" held a bitterly divided Supreme Court.

Applauding the decision as "free speech" is the Washington Post. Its editorial states the rationale of extreme permissivism in a nutshell. Those who believe our Nation needs reasonable restraint and not more license deplore this mistaken expression of approval of defiance of the attempt of a university to control obscenity on campus. It is difficult

to understand how a major newspaper can get so far off base—if any base can remain in the wake of such judicial pronouncement.

The Post article follows:

WHO'S AFRAID OF A BIG BAD WORD?

Even the majority of the Supreme Court could not bring itself to spell out m—f—, as it ruled that its use in a university newspaper should not be suppressed and there is a certain logic in this simultaneous bow to good taste as well as to good law. Taking our cue from the court, we will identify The Word no further ourselves, other than to note that it is a word with which children from Harlem, Watts and Hough have been punctuating their sentences for years. It is also one which some black units used as a password in World War II because neither the Germans nor white Americans could pronounce it properly. And, lately, it has been taken up by the radical white left to scandalize whomever it is they are always trying to scandalize and to express their disdain for almost anything. And that is how The Word finally got to the Court.

It seems that Miss Barbara Susan Papish, a graduate student in journalism of little visible academic accomplishment, but of high political visibility, was selling a paper on the University of Missouri campus one day and the paper contained The Word. The administration of the University decided that in selling the paper containing the expletive in question, Miss Papish had violated the General Standards of Student Conduct, requiring students "to observe generally accepted standards of conduct." After due process had been observed, Miss Papish was expelled from the university for the infraction. She promptly went into the federal courts seeking an injunction on the ground that her First Amendment freedoms were infringed by the university's action. She lost in the trial court and in the Court of Appeals and then appealed to the Supreme Court.

She won there six to three, with Justice Powell joining the pre-Nixon justices and with Mr. Nixon's other nominees dissenting vigorously. The majority rested its decision on the principles that a university campus is not an enclave "immune from the sweep of the First Amendment" and that "the mere dissemination of ideas—no matter how offensive to good taste—on a state university campus may not be shut off in the name alone of 'conventions of decency.'"

The Chief Justice thought otherwise and said so forcefully. He suggested that a university is a place where, among other things, "individuals learn to express themselves in acceptable civil terms." He also chided his colleagues because he thought their resort in the opinion to capital letters and dashes was inconsistent with their conclusion. Mr. Justice Rehnquist thought, among other things, that limitations on the authority of university administrators, such as that imposed by the Court might lead to widespread "disenchantment" with the system of tax-supported colleges and universities.

We think the majority was quite right. The central purpose of a university is the encouragement and perpetuation of the freest possible flow of ideas and information. Although we do not suggest that this particular expression is a necessary, or even particularly useful, addition to the language, the idea that First Amendment notions of freedom of expression can be subordinated on university campuses to other interests such as "the conventions of decency" strikes us as profoundly pernicious and threatening to the essence of a university as well as to free speech everywhere.

WAR ON POVERTY

HON. HERMAN BADILLO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. BADILLO. Mr. Speaker, President Nixon has apparently decided to give a new twist to the war on poverty—he demolished the Office of Economic Opportunity and declared war on the poor. As a result, our cities, already suffering from our lopsided national priorities that countenance an increase of the defense budget, but cannot sustain efforts to assist the elderly poor, are further deprived of the tools to help themselves. Community Action Agencies, which have acted as catalysts in mobilizing the strengths and resources of their communities shall, by executive fiat, now no longer be funded. Programs which were designed to allow the have-nots to become part of the action, which were intended to advocate the cause of those who thus far have not been heard, are now expected to become part of the establishment through that panacea for all our ills—revenue sharing. Localities, already slicing the meager pie of revenue available to them into more and more pieces are expected to pick up the tab for the poverty programs.

Mr. Speaker, all of us know that this cannot be done and, I believe, all of us suspect that this was not intended to be done. Having used to the utmost the spinoff authority of the Director of the Office of Economic Opportunity to delegate programs and having turned that office from an office of advocacy into an office of research and development, the President determined to use the power of the budget to terminate programs which by congressional mandate have been reserved for the Office of Economic Opportunity alone.

Only concerted congressional action has any chance of saving these programs—of salvaging at least a viable remnant of the structure which we must have if we intend to assist the poor to regain control over their own destinies. We must continue to have an OEO. For this reason, I have supported all the efforts that have been made to employ various and sundry means to thwart the President's intention to end the war on poverty. I sincerely hope that our efforts will prevail.

I do believe, however, that the present setup of the Office of Economic Opportunity, its very location in the Executive offices, makes it too vulnerable to undue reorganizations and removes it too conveniently from direct congressional control. For this reason I have introduced on February 20, H.R. 4343, a bill making OEO an independent agency and terminating its director's spinoff authority. I am today reintroducing that measure with 19 cosponsors and hope that it will receive the support of those interested in the continued efficient operation of the Office of Economic Opportunity.

For the information of my colleagues, I am inserting here the list of cosponsors:

MARCEL FRANCISCI AS "MR. HEROIN"

HON. MORGAN F. MURPHY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. MURPHY of Illinois. Mr. Speaker, in the March 15 RECORD, I noted that Marcel Francischi issued a defamation action against Congressman ROBERT STEELE and myself for mentioning in our May 1971 World Heroin Report Francischi's role in the French Connection, the heroin pipeline to the United States.

Francischi figured prominently in a Newsday series, The Heroin Trail, which labeled him "Mr. Heroin." Newsday senior editor Robert W. Greene and fellow reporters exhaustively researched the multimillion-dollar heroin business during a 3-month stay in France last fall. The entire investigation involved 9 months of persistent digging.

The title of the February 15 Newsday article, "Marcel Francischi's Good Life: Heroin and Champagne Do Mix," aptly describes the man in question. References to Francischi's financial and political connections as well as family difficulties are worth quoting at length:

A retired federal narcotics agent who served in France told us: "Everytime we mentioned the name Francischi to the French police, they froze. You could tell they didn't want to hear anything about him, much less work on him. He was a no-no. In this country we would have gotten him on a conspiracy a long time ago."

People who know Francischi say that he is a tireless campaigner for the UDR in Corsica. Even the police records reflect it. For example, in 1958 Francischi was called in front of the public prosecutor of Ajaccio to explain why he and his brother Jean had offered money to the head of a family with 15 voters to vote for Francischi's old mob friend Jean Colonna. Francischi said it was all a joke. The case was dismissed. And when he first ran for his own seat as the Gaullist counsel general from Zicavo, Corsica, in 1967, his opponent won. Francischi overturned the election, charging vote fraud.

Francischi still maintains a villa in Zicavo, and he is very good to the people of the area.

According to a report in confidential police files, "his largesse toward the unfortunate of this mountain locality is priceless. He has contributed his own money for the supplies of the commune, restoring squares and streets and contributing to the refurbishing of the parish church."

In 1952, Francischi was involved in the attempted swindle of a gambling house in Aix-en-Provence, in southern France. Because of this the minister of the interior issued a decree Feb. 28, 1952, barring him from all gambling houses in France for life. In 1966, Francischi bought the Club Haussmann gambling casino in Paris. He told a respected French journalist that he had been able to buy the casino because of the intercession of his old and good friend, a high-school classmate, Jean Buzzi, at that time deputy to the interior minister.

In June, 1964, Francischi's brother, Antoine, returned to his home in Corsica one evening to discover that his wife, Simone, had a lover on hand. Antoine shot the lover through the throat, rendering him speechless for life. Francischi then took away the couple's only son, Jean-Francois, while Antoine spent a few months in jail. The mother went to the courts, who ordered the police to find the boy. They didn't.

But the child was discovered by police in October, 1964, when they raided the villa that housed the heroin lab of Joseph Cesari in Aubagne, near Marseilles. The people running the lab with Cesari were baby-sitting for the child because Francischi was busy in Paris. The police, despite the outstanding court order, gave the child back to Francischi and his brother. This fact was casually mentioned by the distinguished French reporter Jacques Derogy in a story on drugs in L'Express on Oct. 14, 1968.

"Two nights later," Derogy recalls, "I got a phone call at home at about midnight from a Corsican journalist who is a friend of mine. He said that Francischi wanted me to meet him in Fouquet's immediately. My friend said that he thought that it might be dangerous for me if I didn't go. I got dressed and went to the restaurant. Francischi was at a special table with some friends eating oysters and sipping champagne. He asked me to sit down."

"Then," Derogy said, "Francischi started complaining. It was a very Corsican thing. He said that he could take other things that I might write about him, but that I had gone too far when I wrote about his brother's wife trouble—family affairs. He said that I was not to write about such things again. The way he looked at me, I knew that he really meant it. Then, about the kid being in the laboratory, he said it was a big mistake, not his fault. He said that he had left someone watching the boy, who had turned the boy over to someone else. That's how he got to the lab."

In 1954, as part of his cover for frequent trips to Beirut, Francischi took control of the Casino de France, which has the games concession at the Casino du Liban. The Casino du Liban, which owns the building, was owned at the time by a huge Beirut-based banking conglomerate known as Intrabank. The banking concern, headed by Youssef Beldas, was heavily backed by the governments of Lebanon, Kuwait and Qatar.

The chairman of the executive committee of the bank until 1967 was H. E. Sheikh Suleiman Bey Al-Hamad Al Suleiman, former finance minister of Saudi Arabia. And Sheikh Suleiman was the Arab world representative buying guns from the French surplus arms company owned by industrialist Gilbert Beaujolin and his partner Col. Roger Barberot. These two men have long operated parallel intelligence agencies for the Gaullist government of France. And it was Barberot

who introduced heroin courier Roger Deloutete into the French secret service and wrote to French Defense Minister Michel Debre in his behalf.

In 1961, Intrabank applied to open a branch in Paris. The French Banking Control Commission recommended against it. But then Finance Minister Valery Giscard d'Estaing reversed the decision of the board and granted permission. Lobbying d'Estaing for the bank were Interior Minister Roger Frey (head of the French national police) and French Deputy Jacques Baumel, who at that time was secretary-general of the UDR.

Shortly afterward, Intrabank gained indirect control of a materials company called CEMA, which in turn, under Intrabank direction, took over France's second largest shipbuilding firm, Chantiers Navals de la Ciotat. And, according to a confidential French Interior Ministry report obtained by Newsday, Francischi suddenly emerged as a major stockholder in both CEMA and the shipbuilding firm.

In 1966, Intrabank got into financial trouble. And the U.S. government became one of its creditors, as did Lebanon, Qatar and Kuwait. Each country, including the U.S., has a representative in Beirut overseeing the casino operations to protect the outstanding loans. As a result, Francischi, who has been named as a top heroin operator by two U.S. congressional committees, has the gambling concession in a casino that is under partial U.S. guardianship.

Jack Cusack, former European chief of the U.S. Bureau of Narcotics and Dangerous Drugs, did not make many friends within the French Government during his years there. Cusack refused to be optimistic about French cooperation with U.S. efforts to curtail drug traffic. He indicated on more than one occasion that huge bank balances protected France's top heroin traffickers and guaranteed special favors from financiers and politicians alike.

Cusack was unceremoniously replaced as a result of French Government pressure. Reports of French cooperation now pour in daily. Cusack incidentally was mentioned by Francischi in his defamation action against Congressman STEELE and myself.

Cusack's comments on special favors have been directed toward Marcel Francischi. Leaders of France's ruling Gaullist political party often intercede on behalf of Francischi. There is a logical explanation for such "strange bedfellows." In the late 1950's, President de Gaulle enlisted underworld figures to assist the Gaullists in their conflict with the Secret Army Organization—OAS—in Algeria. The racketeers kept their end of the bargain and government indifference to their criminal activities today amounts to compensation for past deeds.

Dominic Venturi, a close associate of Francischi, is a leading supporter of Gaston Deferre, the mayor of Marseilles and a leading Socialist. Venturi is, according to the Newsday series, "operating director of the Francischi heroin syndicate." Dominic's brother, Jean, married a Canadian citizen and is largely responsible for establishing heroin smuggling routes into the States via Canada.

The defamation action filed by Francischi against us Congressmen includes those newspapers which reproduced por-

tions of our report—Le Monde, Journal du Dimanche, France-Solr, L'Humanite, Parisien Libre, Valeurs Actuelles. The deposition further names radio stations which broadcasted news of our report.

An article published in L'Express during September 1971, gave a seemingly balanced view of Mr. Francisci. The article quoted liberally Francisci himself who alleged that he "came out white as white" as a result of a 1957 inquiry of his activities prior to assuming ownership of the exclusive Haussmann Club. He noted further:

I don't have any enemies.

The same article stated that the mention of Francisci as an illicit heroin trafficker surprises Corsicans. The article continued:

The 300 inhabitants of his village of Ci-amannacce, in the Taravo Valley, praise his generosity, and also his pity. M. Marcel has paid out of his own pocket for the re-surfacing of the cemetery road. On holiday, when he leaves the family yacht in Ajaccio Harbor and the hubbub on the terrace of the "Nord-Sud," he climbs up on a Sunday to the village with his wife and daughter. To attend Mass.

Mr. Francisci has succeeded in duping his fellow Corsicans. It is my intention to see that the deception stops there.

LEGISLATIVE PIPELINE PROJECT

HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. BROOMFIELD. Mr. Speaker, I would like to take this opportunity to commend the Jaycees of Rochester, Mich. for their continued interest in and support for various public and community service programs.

The most recent example of this commitment was the legislative pipeline project initiated by the Jaycees in order to survey the opinions of citizens on a wide range of important national issues.

Approximately 200 surveys were distributed at random at two local shopping centers. The results were forwarded to me and along with the many spontaneous comments volunteered by the respondents they represent a valuable measure of the concerns and attitudes of my constituents. Many people, who for one reason or another, might have been reluctant to write their Congressman were given an opportunity to express their views.

The results indicated a very strong opposition to forced busing, a growing concern over the escalation of prices and particularly food prices and a desire for stiffer penalties for many criminal offenses. In this latter category, a surprisingly large number of people volunteered their concern that drug pushers should receive longer jail sentences.

Mr. Speaker, it would be difficult to overestimate the value of this legislative pipeline project. The Rochester Jaycees should be commended for initiating this program which benefits not only the peo-

ple but their elected representatives as they strive to represent the best interests of their constituents.

I include a copy of the Rochester Jaycees' questionnaire so that my colleagues can see for themselves how comprehensively this survey covered the major topics of current national concern:

LEGISLATIVE PIPELINE

1. Should there be legislation or a constitutional amendment against forced busing?
 - (a) Yes 150
 - (b) No 44
2. Should the death penalty be mandatory for certain crimes?
 - (a) Yes 140
 - (b) No 57
3. If your answer in 2. is yes, for what crimes (circle as many as apply).
 - (a) Killing of a policeman or fireman on duty 119
 - (b) Aggravated rape 52
 - (c) Murder 116
 - (d) Skyjacking 80
 - (e) Assassination of a public official 108
 - (f) Other 12
4. The following deal with federal spending and taxes (circle as many as you feel apply).
 - (a) American money should be used to rebuild North and South Vietnam 40
 - (b) American money should not be used in North Vietnam 102
 - (c) Program like OEO (Office of Economic Opportunity) should not be cut 85
 - (d) Taxes must not be raised even if some federal programs must be cut out 80
 - (e) Persons over 65 should have some substantial property tax relief from congress 158
 - (f) The President should not cut funds for pensions to disabled veterans 135
 - (g) Other 3
5. Wage and price controls.
 - (a) Wages are controlled, but prices are not 99
 - (b) The 5.5% maximum wage increase is too low 99
 - (c) Wage and price controls should be strictly applied 105
 - (d) Neither wages nor prices should be controlled 15
 - (e) Special legislation should be passed to control rising food costs 115
6. Does the Supreme Court have the authority to make the decision they made in the abortion case?
 - (a) Yes 96
 - (b) No 98
7. Should a federal law be passed to restrict the availability of handguns?
 - (a) Yes 147
 - (b) No 47
8. What should be done to draft evaders who wish to return to the U.S.?
 - (a) They should be required to serve a jail term 54
 - (b) They should be given amnesty, with no restrictions 26
 - (c) They should be given amnesty, provided they perform 3 years' national service 103
 - (d) Other 14
9. Should there be a reduction of troop strength in Europe?
 - (a) Yes, unconditionally 66
 - (b) Yes, if the Soviets carry out a similar reduction 101
 - (c) No, under no circumstances 27
10. Should the U.S. aid Laos and Cambodia?
 - (a) Yes, with funds, supplies, and bombing strikes 15
 - (b) Yes, with funds and supplies, but no bombing 57
 - (c) No aid should be provided 77
11. Should Congress make safety equipment for automobiles mandatory?
 - (a) Yes 112

- (b) No 77
12. Should the U.S. have either socialized medicine or national health insurance for all citizens?
- (a) Should have socialized medicine 57
- (b) We should have national health insurance for all 96
- (c) Neither 54

DREAMING OF ISRAEL

HON. ALPHONZO BELL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. BELL. Mr. Speaker, the tragic situation which confronts Russian Jews wishing to emigrate to Israel is exemplified by the transcript of a telephone conversation between a 34-year-old Jew from Leningrad possessing those desires and one of my constituents, Stuart Lotwin.

The transcript of the January 14, 1973, conversation was forwarded to me by Mr. Lotwin, who spoke with Daniel Teitelbaum, married, father of two, and a candidate of technical sciences. In it, Mr. Teitelbaum relates the numerous procedural difficulties which have been encountered by his family and friends in their efforts to obtain exit visas from the Soviet Union in order to reach freedom in Israel.

Mr. Speaker, I should like to insert this conversation in the RECORD in the hope that we may see the end to such needless persecution of Russian Jews and the realization of their dreams to have a safe arrival in Israel:

FLIGHT OF DANIEL TEITELBAUM

Telephone conversation between Stuart Lotwin, Los Angeles, California and Daniel Teitelbaum, Leningrad, USSR on January 14, 1973:

- S.L. Shalom, Friend Teitelbaum.
- D.T. Yes, Yes.
- S.L. Is that you? This is your friend Stuart Lotwin calling from America.
- D.T. I understand, I understand.
- S.L. You understand; well listen to me and we'll converse. My name is Eliezer and I am speaking to you because Mr. Lotwin does not speak Yiddish.
- D.T. I understand.
- S.L. He is a friend of Lev Lerner who is now in Tel Aviv. Do you understand?
- D.T. I understand.
- S.L. I want to ask whether you have any news to convey to us. And I'll allow you to talk as long as you please.
- D.T. Good! Good! Well we have no concrete (hard) news. With us it is very hard. Things are very tough in Leningrad.
- S.L. Hard?
- D.T. In the last days we have had bad answers.
- S.L. Bad answers?
- D.T. Refusals!
- S.L. Refusals! I understand.
- D.T. They refuse us, the reasons are ridiculous, silly.
- S.L. I understand.
- D.T. With one the refusal is on account of "secret work."
- S.L. What is the name of the one that was refused on account of "secret work?"
- D.T. Chernoch. He has tried 4½ years and still he is refused. And another Bert, a woman whose daughter works on secret work, but daughter does not want to leave,

only the woman who is 60 years old and she cannot leave.

S.L. Tell us about yourself.

D.T. We have been waiting for two years.

S.L. And you're refused?

D.T. I submitted my documents last time in October. Already 3 months and some days, and yet not received answer. We rode to Moscow and there we were told that we would be getting answers. First they said November and then December. They promised us. And now in January. You understand?

S.L. I understand each word. Continue to talk.

D.T. Good, good. They had lied to us. Now there is a commission in Leningrad. The Minister was here.

S.L. What is his name, the Minister?

D.T. Sholohov.

S.L. Speak, speak.

D.T. We have written to every place possible. To Chief of police, the government, the Kremlin and all the time we get one answer. We have to get our documents at the Leningrad OVIR.

S.L. Please wait a minute! I must ask you several questions. We will understand your situation, but we must have certain information in order to be able to help you. What is your wife's name?

D.T. Margaret is her name.

S.L. How old is she?

D.T. 33 years.

S.L. Is she working?

D.T. No.

S.L. What was her work?

D.T. At a factory.

S.L. Factory?

D.T. Where they make ships—a shipyard. She does not have a higher education. She is a typist—a copier.

S.L. I understand—she operates a typewriter. Do you have children?

D.T. Two children.

S.L. Boys or girls? What are their names?

D.T. A boy, 6 years, Ilya; a girl, 4 years, Sonia.

S.L. Good. Are you now working?

D.T. I was working before I submitted my papers.

S.L. What were you working as?

D.T. How do you call it—yes—Senior Scientific.

S.L. What was your work? I don't understand it completely.

D.T. A Scientist—an electrical engineer.

S.L. Were you employed where secret work was done?

D.T. No, nothing secret.

S.L. Well, I want to tell you this. We are with you 100%. We want to help you. We will help you. Nothing will deter us until you get permission to leave. Do you understand?

D.T. Yes, I understand.

S.L. And above all, I want to tell you that we will not forget you. I speak not only for myself but for a whole group of people. And now I'll tell you some news from here. Two days ago I heard from my Senator. He knows your name already. He has spoken about you to our Department of State, secondly, the largest newspaper in the Western United States, here in California, knows of you. Perhaps in several weeks your name will appear in that paper.

D.T. I understand.

S.L. Now I want to ask you. Are there any English speakers in your family?

D.T. I know several who speak English but not very good. I can give you their telephone numbers.

S.L. Don't bother. I want to talk with you. Do you want letters in English or Yiddish? It is all the same to us.

D.T. It is immaterial to me. I know a little English. I don't speak but I read and translate.

S.L. Now I want you to answer three questions. First, do you have enough food?

D.T. Again.

S.L. Do you have enough food?

D.T. Again.

S.L. Food?

D.T. Food, No! We still have food.

S.L. How about clothing?

D.T. But I want to tell you this. It is very hard for us. Most of us are unemployed. We have families where neither husband nor wife work.

S.L. Clothing? Warm clothing?

D.T. Yes, we have although you could help us with that.

S.L. Tell me—have you ever heard of certificates to Vneshposyl'trg stores?

D.T. I received them once.

S.L. Do they help—the certificates?

D.T. They help. I want to tell you that our greatest hopes depend on you, only on you.

S.L. We assume the burden. We promise you that.

D.T. We're putting great hopes in your Congress.

S.L. We, too, are putting our hopes in our Congress. Give our love to your wife and son and daughter. Be well—we will talk to you again.

D.T. Good, good.

S.L. Shalom.

D.T. Shalom.

S.L. L'Hitraot.

D.T. L'Hitraot.

S.L. Shalom.

SEEK CONSTITUENTS' OPINIONS

HON. WENDELL WYATT

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. WYATT. Mr. Speaker, each year since I first entered Congress in 1964, I have sent a congressional questionnaire to my constituents requesting their opinions on the serious issues confronting our Nation.

I am presently in the process of mailing my 1973 questionnaire, and would like to share the text of this document with my colleagues. I consider the results of this opinion poll to be extremely informative, and I am anxiously awaiting the response of the people of the First District of Oregon.

The questionnaire follows:

I. Do you feel the President should be able to impound federal monies which the U.S. Congress has already approved for spending?

Yes.

If Congress approved.

No.

No opinion.

Other alternative.

II. Should the Social Security Tax be absorbed into the Federal Income Tax structure?

Yes.

No.

Change in some other way.

No opinion.

Other alternative.

III. Should members of the press (newspapers, magazines, radio and TV) be protected by law from having to disclose their sources of information even if a court, legislatures, or executive branches of government feel that they should disclose their information sources.

a. Yes (Newsmen's sources should be protected).

b. No (Newsmen should be forced to disclose).

c. No opinion.

d. Other alternative.

IV. Now that there is a cease fire in Vietnam and the U.S. prisoners are being returned should those persons who have deserted from the armed forces or evaded the draft during the Vietnam War be granted some form of amnesty?

a. Now.

b. Sometime in future.

c. Never.

d. Equivalent service.

e. No opinion.

f. Another alternative.

V. Even if it might result in higher taxes to you, would you favor substantial federal incentives in the form of federal grants, tax incentives and strong federal controls on industry and state and local governments to reduce air, water, land and other pollution?

a. Yes.

b. No.

c. No opinion.

d. Other alternatives.

VI. Should access to and use of marijuana be treated in the law much the same as alcohol now is?

a. Yes.

b. No.

c. No opinion.

d. Other alternatives.

VII. Do you think the federal government should provide a medical insurance program to everyone, even if it meant higher taxes to you?

1. If you answered yes above, how would you finance it? (Select One)

a. Social Security taxes.

b. Income taxes.

c. National Sales Tax.

d. Other alternatives (Please describe).

2. No.

3. No opinion.

4. Other alternatives.

VIII. In order to slow inflation should the Federal Government

a. Continue the present program of wage and price controls pretty much as the Administration is now doing.

b. Increase Taxes.

c. Reduce Federal Expenditures.

d. Place stronger controls on:

1. Wages.

2. Prices.

3. Profits.

e. None of the above.

f. Other alternatives.

IX. Do you feel that there should be some legal constitutional constraint by Congress on the President's power to commit U.S. troops outside the U.S. to hostile actions?

a. President should be limited to committing troops to hostile action for only sixty days unless specifically approved by Congress.

b. No change should be made in the present powers of the President to commit troops to hostile action outside the U.S.

c. Other alternatives.

X. What legislative programs or policies should Congress pass or change?

THE FUTURE OF OUR EARTH LIES BEYOND "Z"EBRA

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. TEAGUE of Texas. Mr. Speaker, I feel privileged to insert in the RECORD the speech delivered by one of our distinguished astronauts, Mr. John L. Swigert, before the Colorado Bankers Association in Colorado on February 19, 1973:

SPEECH BY JOHN L. SWIGERT, NASA ASTRONAUT

It's good to be home again, and I'm very pleased that you asked me to come here and address the members of the Colorado Bankers Association.

In my search for remarks that might interest you today, I rejected the idea of talking about Apollo 13 because it is almost three years into the history books. In fact, our last Lunar flight, Apollo 17, is also history now. But the data collected by our Apollo flights is not history. This treasure of new data will keep scientists busy for years and will provide new insight into the world in which we live. But it is a remembered inspiration, also, to the whole world, recorded forever in history that in 1969 Americans first landed on the moon. As Americans, you can indeed be proud, for Apollo was your program.

I would like to begin these remarks with some words from a book by a doctor with whom some of you may be familiar—Dr. Seuss. Although these words come from a children's book, there is meaning in them for us all:

"Said Conrad Cornelius O'Donald O'Dell, my very young friend who is learning to spell, the 'A' is for Ape and the 'B' is for Bear. The 'C' is for Camel, the 'H' is for Hare. Through to 'Z'—'Z' is for Zebra, I know them all well, sayeth Conrad Cornelius O'Donald O'Dell. From beginning to end, from start to the close, because 'Z' is as far as the alphabet goes. Then he almost fell flat on his face on the floor when I picked up the chalk and drew one letter more. In the places I go, there are things that I see, that I never could spell if I stopped with the 'Z'."

As the command module pilot on Apollo 13, I have been privileged to be one of 24 astronauts who have had a long, far away look at this earth on which we live. When you see our whole world, all at once, on a scale where you can cover it with your hand, the beauty and awe of this new perspective cannot help but influence your thinking. Every astronaut who has returned from the moon has said it has changed his outlook at life. Imagine yourself far away from earth, looking back on a colorful sphere silhouetted against the black vastness of space. You see no boundaries between nations . . . no races . . . no different religions . . . no opposing political philosophies. Just one small planet inhabited by some 3½-billion varied individuals . . . all seeking about the same thing from life. You see the world not from the concern for an individual or a group or a city or a nation, but from a concern for all mankind.

If this earth is a closed system, representing, in Doctor Seuss' fashion, from "A" to "Z", then an Apollo mission is truly a trip "beyond zebra." You understand, when you view the world as a small sphere, that if this closed system where all resources have a limit is not managed with new imagination, then there may also be a limit to the time of man on earth. All of us—and particularly those in positions of leadership in government and industry—must plan new solutions for problems that must be solved within the next 30 years. Today, I want to stir your thoughts beyond the usual. . . I want you to join me on a trip "Beyond Zebra."

Turn your thoughts ahead to the year 2000 when the population of this planet will have doubled and there will be 7-billion people. This means that we have less than 30 years to double or triple this planet's food production which has taken centuries to develop. Agriculture will find the space program an indispensable tool in meeting this challenge.

Sensitive sensor systems onboard a spacecraft can tell more than a farmer now knows about his own plot of land—the moisture

content of the soil. . . . Whether he has vigorous or ailing crops and even the degree of crop disease or insect infestation. . . . Where there is useable land that lies untilled and actually even what kinds of crops will grow there. . . . The location of uncut timber or underground water that is waiting to be tapped, and the existence of geological faults suggesting mineral deposits or oil fields. Let me show you pictorially in a few of these slides.

A single spacecraft can sense every corner of the world every 18 days, and do it for months or years. Imagine what could be accomplished by a system of spacecraft, each feeding its data into a central computer complex. At a single instant of time the exact status of the whole world's agricultural output would be known. Tillable land all over the world that is unused could be planted with the needed kinds of crops. From determining snow depths, spring run-offs and floods could be predicted. We would know whether to expect short falls or bumper crops of grain in both the northern and southern hemispheres; whether potato blight is about to break out in Maine or coconut wilt in Kerala. We would be able to adjust planting schedules to plant more corn in the southern hemisphere if drought had taken its toll six months earlier in the northern countries.

The pressures of population growth and world hunger are real. Because we believe in the dignity of man, it is innate within us that people should never be allowed to starve. But sometimes the impact of starvation gets lost when it happens to people on the other side of the world . . . or to people in the year 2000. In a world where everyone does not have adequate food today, it is well established that hungry people make ideal targets for political systems that ferment unrest in their efforts to dominate the world. What are the chances for a lasting peace if there are no provisions to provide food for the increased population? Will your children or theirs be called on to fight more wars that might be prevented if we expand our planning beyond the "A" to "Z" of today?

Two recent isolated news events have focused our attention on problems which are interrelated in their solutions. During the recent cold spell, schools and factories in many states could not open for lack of fuel to provide heat. The oil rationing in some eastern states is another indication that the energy crisis is upon us. This entire nation of 200-million people burns more energy than all the people in Japan, Great Britain, Germany, and the Soviet Union combined.

Just last year our 109-million cars used 90-billion gallons of gasoline; our 2,000 jetliners more than 1-billion gallons of jet fuel; and our 3,400 power plants 1-billion barrels of oil, 4-billion cubic feet of gas, and 300-million tons of coal. Coal mines and oil and gas fields don't reproduce—every time one is drilled or mined there is one less to go! Even today we consume more energy in this country than we produce. The cost of imported petroleum amounted to 4-billion dollars last year. By 1985 economists predict that more than half our oil and gas will come from imports, increasing the balance of payments deficit in petroleum to 30-billion dollars. Because the supply of natural gas will be insufficient to fulfill this nation's future needs, oil will be in even greater demand. And the great bulk of the supply of both rubber and organic chemicals is derived also from petroleum.

In 1985, this Nation's oil and gas supply—and our standard of living—may well depend on how we are getting along with countries such as Libya, Algeria, Nigeria, Saudi Arabia, and the Soviet Union. Many of these foreign producing areas have long been the scene of strife and turmoil. As the dependence upon foreign sources of supply increases, this

Nation will be placed in a highly vulnerable position. The supply of oil could be halted by a governmental action, by sabotage, or by military conflict between nations. Even a brief interruption of the supply can have a severely damaging impact on this Nation's economy.

The energy crisis threatens the American way of life—at least the life that means to you color television, frostless freezers, electric blenders, knives, grills, and the myriad of other ways we enjoy life. To depend upon uncertain foreign sources for such a high proportion of this Nation's oil supply would make no more sense than to expect foreign countries to provide for this Nation's defense.

The second event to make national news recently was a proposal by William Ruckelshaus, head of the Environmental Protection Agency, to ration gasoline in the Los Angeles area in an effort to decrease air pollution there. We are taking the first tentative steps toward a new national goal—the remaking of our environment. Pollution will be a continuing problem because it is a product of congestion—both population and industrial. There will be efforts to escape it by leaving it behind. . . . To minimize it by dispersal or by overly restrictive controls or the relocation of economic activity. The cost of our environmental efforts will be enormous. The projection by William Ruckelshaus is a phenomenal \$105-billion over a five-year period. For a comparison, the Apollo Lunar Landing Program, from the moment President Kennedy announced the goal until Neil Armstrong stepped on the moon, cost \$24-billion.

The cost incurred in applying current technology and developing new technology to clean up our environment will eventually be passed on to the consumer in the form of higher prices for everything from food to toys. For the money spent on pollution abatement controls and facilities doesn't contribute to productivity. . . . And productivity is the essential ingredient of growth . . . and growth means jobs. Harold Scott, Assistant Secretary of Commerce, put it even more bluntly: "You begin to cost our environmental solutions and you find that many of our industries are going to be priced out of the world market."

An editorial of the Indianapolis Star pointed out the effect of foreign competition already: "Bendix Corporation recently announced that it is closing a manufacturing automotive plant and moving it to Mexico—too much competition. Westinghouse has decided to get out of the small appliance business—foreign competition. Remington Rand and Royal Typewriters are discontinuing U.S. production. Motorola has said that it is getting out of the portable radio and television business. B. F. Goodrich is closing up its footwear business—the competition from abroad is too much."

This all seems contradictory. Does the future mean that in order to maintain a competitive international economic position, we must reduce our efforts to obtain clean air and clean water? How does this nation go about achieving the economic growth that will not just halt the loss of jobs but will provide the necessary 20-million new jobs for our future population in the next 20 years? And, how does this Nation sustain the high standard of living for its people without the energy for its enormous productive capacity? And, how do we obtain this energy without depending on foreign supplies or burning high polluting materials such as high sulphur coal?

This complex problem has a single solution in an imaginative and entirely feasible application of space technology. Instead of trying to control pollution by curing the symptoms, why not cure the disease by developing a new source of pollution-free energy? The enormous consumption of this

planet's energy sources and the chemical and nuclear wastes associated with power generation could be alleviated by placing power generating stations in space. Large orbiting solar collectors would convert sunlight into electricity which would then be changed into microwave energy and beamed to earth, where it would be collected by an antenna and converted back to electricity. There is a solution both to the energy crisis facing our Nation and to the pollution of our environment if we start thinking "beyond zebra."

To apply space technology to these and future problems of mankind in any practical sense, the cost of placing payloads into orbit must be reduced. It doesn't make much sense to discard expensive spacecraft after just one use. The Space Shuttle—NASA's next major space program—is a combination aircraft and rocket that will achieve its economic savings by reuse again and again. Space Shuttle is a multipurpose vehicle that will be our workhorse in space in the decades ahead. It can perform scientific missions of its own or it can be used to launch or retrieve malfunctioning satellites and bring them back to earth for repair and relaunch. In its 15-×60-foot cargo bay could be carried the equipment to assemble power generating stations in space or to launch unmanned probes to other planets to increase man's knowledge of the universe. It could also be used to perform a military mission if that should ever be required.

There are many eloquent spokesmen—writers, academicians, and some prominent political figures—who maintain that we must reorder priorities . . . that we should spend less on space and other technological programs and more on the social problems that exist in our country. They would divert the 1½ cents of each Federal tax dollar now spent on space to the 45 cents we are spending on our social programs. I do not deny that there are pressing social needs, but even if that 1½ cents should accomplish the impossible and solve all of our social problems, what is the risk of this "A" to "Z" philosophy to our Nation and the world—in the future.

There must be a continuing stimulus to our economy that will provide employment for the continually increasing work force and also keep this Nation competitive in international trade. The space program is that stimulus—because it has set the pace for science and technology in this country, forcing an advance that had only previously occurred in wartime. The space program accomplished the same end in peacetime and, in that sense, could be termed a "moral substitute for war." It is science and technology that holds the key to the solution of major problems facing this country and will also provide the needed employment and the economic expansion to finance future social programs. Many Americans today seem much more interested in how to divide up the available wealth than in how to create new wealth. It is not a matter of choice between social programs and something else; it is a choice between social programs and the ability to support social programs. Obviously, the economy cannot be made self supporting if the economy is not a generator of goods, for without generators of wealth there can be no social programs.

I, for one, strongly believe that the two—space and social programs—are not mutually exclusive. . . . And must exist together, each with its own importance. For in our haste to solve our present difficulties, we cannot neglect our youth and generations unborn. Arthur Clarke, a noted writer, has said: "A Nation which concentrates on the present will have no future. In statesmanship as in everyday life wisdom lies in the right division of resources between today's demands and tomorrow's needs."

The histories of English speaking democracies are almost universally characterized

by a management of crisis rather than management of society. Look at some of the examples that have occurred during your lifetime. We reacted to the crisis of the depression. . . . to Pearl Harbor. . . . and to the crisis of Sputnik.

It is rare, however, to find historical examples of long-range plans designed to avoid probable or even certain crisis. . . . or long-range plans designed to provide for the well-being of a future generation. Our approach to national problems today is characteristic of our indifference to approaching crisis. If you listen carefully, most of the argument about current national problems centers about how much tax money should be spent on the "A" to "Z" to make the symptoms of problems less noticeable. There is little discussion about putting some of this money to work "beyond zebra" or curing the diseases that produce these symptoms.

As the problems of the world become more complex, the time to solve them becomes greater. To protect our freedom, it took only four years after Pearl Harbor to turn this Nation into the greatest military power in history. But it required almost a decade to achieve a dominance in space after the crisis of Sputnik. You cannot suddenly materialize trained scientists and engineers overnight. A world-wide system to conserve and manage this planet's limited resources cannot suddenly be put into operation when starving billions and warring nations signal its need. Nor can power generating stations be quickly placed in space to provide ecological solutions to our dying lakes and rivers or the needed energy to maintain our standard of living. These require long-range decisions, planning and organization of government and industry, and a commitment of human and economic resources.

The future must be given more consideration if there's going to be any kind of life for your children or the succeeding generations. We must think beyond the finite. . . . We must see "beyond zebra". . . . For only then can we open this closed system we call earth.

DEAR POW: WELCOME BACK

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. BOB WILSON. Mr. Speaker, as we welcome back our returning prisoners of war and rejoice in their health—both mental and physical—we cannot help but marvel at the strength which saw them through their captivity. I would like to share with my House colleagues the following "Dear POW" letter by Max Lerner, published in the Daily Californian, El Cajon, Calif.:

DEAR POW: WELCOME BACK

CHICAGO, Ill.—Dear POW: Welcome home to what remains the only fabulous country. With few exceptions, Americans are proud of you and of how you behaved in your long ordeal of imprisonment. Don't let anyone tell you differently. Here in Chicago and in Florida, Pennsylvania, Indiana, where I have been traveling, I have felt this outflowing of pride and warmth toward you.

You have expressed surprise at it because you heard in your camps about the antiwar demonstrations. Yet it shouldn't surprise you. This has been a war without heroes probably the least popular war in American history.

Nonetheless, the hero-hunger is there—for a chance to welcome heroes home. You and your fellows fulfill that hunger. While

the war was going full force, and even during the phased withdrawal, the returning soldiers understandably came back in silence. This is the first war I can recall where the prisoners, not the main bulk of the army, got the welcome. I wish we had reserved some for the nonprisoner wounded.

To be proud of their returning prisoners, a people must at least have come to terms in their own minds with the war they fought in. The way the war is ending makes that possible now. If the United States had ended the war unilaterally, as some proposed—if there were no political settlement, only an exchange of prisoners—the whole national climate would have been different. You would have returned amid bitterness from every direction. What makes me happiest is the current climate of your return. You make us feel better about how the war ended, and how the war ended makes us feel better about you.

We like the coolness and self-discipline you showed in the camps. For years to come, I suspect, you will look back at your prison-camp days, not with pleasure but with something better than pleasure—with self-respect tinged with awe at what you and your fellows endured, how your morale survived, how you organized for study, exercise and debate, the kind of fellowship you achieved. That cracked cup or plate you brought back with you, that bent spoon—they will bring back memories that the rest of your life may never match.

Yes, there must have been quarrels, recriminations, divisions among you. How could there fall to be, since you grew to manhood in an individualistic society? There must have been some who broke discipline by making antiwar statements for their captors, not under duress, against the orders of their own commanding senior officers. Whatever their act—and it was shabby—there isn't much point in dragging it up now. They may have felt they were speaking out of conscience: Leave them now to their own consciences and their own memories.

That doesn't mean a total close-mouth policy about the camp experiences. The Pentagon has kept a watch over you since your return. Until all the remaining prisoners are back, it makes sense not to rake up the embers of resentment. After that we must take the lid off. We need to know more, in depth, about the behavior in the camps—whether the old Rules Manual needs revising, how deep the quarrels were, what kind of personality took it best or worst, what belief and what value structure kept a man's spirit sustained. We can know it only if we use a research approach, not a public relations one.

Waiting it out must have been an eternity for you, especially since you were unsure about what was happening in your society. You missed those you loved—parents, women, children. For most of you there was some inner assurance about them, for others a gnawing doubt. You had a lot of time to think about things. Not all the thoughts could have been comforting.

One thing you bring back to the United States that was badly needed—a willingness to speak out about what was thought to be square in the whole past decade—love of country. If you didn't bring this back with you, how could you endure the memory of your ordeal? We at home had almost begun to despair about something so elementary and elemental. As with love between people, it should be deserved, but it must also outlast imperfections and inadequacies on one side or the other. You have kept it alive and have shown that it need not be linked with hatred of other countries and systems.

You will come to know more about this society you have come back to—about the convulsions through which it passed, the scars it suffered, some old values weakened and others renewed.

You have lost some good years of your

life—was it four, five, seven?—but were they really lost? You have had something many of us lack—time to think things out. Your talent need not have rusted: It may only have deepened. If you can escape getting rigid in your reaction to what you have found on your return, the years ahead may prove the flowering of the years you have endured.

AIM FIGHTS PRESS BIAS

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. CRANE. Mr. Speaker, too often, the press publishes material which is not only misleading but, in many instances, untrue. This situation is even more pronounced with regard to the electronic media, such as television, and the result has been a public which has found it difficult to differentiate between truth and falsehood, between reality and the one-sided analysis of those in positions of influence.

Fortunately, the public interest is being protected by a watchdog organization which has been formed for the specific purpose of correcting errors in the media. This group, Accuracy In Media, is a nonprofit, nonpartisan organization which investigates charges of serious factual errors and omissions in news reporting. As a result of its activities, to cite one example, the American Broadcasting Co. issued a statement correcting five errors in its news documentary, "Arms and Security... How Much Is Enough?"

In many instances, however, the media refuses to correct its errors, and even to permit those who challenge the accuracy of their presentations to be heard. Accuracy In Media has faced such a "news blackout" and has responded by publishing paid advertisements in various newspapers and magazines.

The Washington Post of March 7, 1973, contains an advertisement which includes excerpts from letters to the editor, written by Accuracy In Media to the Post, which the Post refused to print.

One letter discusses the report in the Post of a luncheon given at the State Department in honor of John Stewart Service and other old China hands of the 1940s. The Post described the recipients of this honor as the men who were persecuted and dismissed for sending news their country did not want to hear.

Accuracy In Media, in its letter, stated that—

An analysis of the reports from China submitted by John Stewart Service in 1944 suggests that Mr. Service was fundamentally wrong in his judgments about the philosophy and intentions of the Chinese Communists. For example, a report of his dated September 28, 1944, said: "The Communist political program is simple democracy. This is much more American than Soviet in form and spirit." In the same report, Mr. Service assured Washington that it was wrong to think that Mao wanted to bring socialism to China. He said: "The next stage in China's advance must be capitalism."

The letter concluded that—

The American Foreign Service Association does no credit to its own reputation when it

honors Service and his colleagues without ascertaining the facts. The Washington Post practices poor journalism when it parrots this distorted version of history without checking the record.

The advertisement published by Accuracy In Media includes five letters the Washington Post refused to print. I wish to share this material with my colleagues, and insert it into the Record at this time:

LETTERS THE EDITOR OF THE WASHINGTON POST REFUSED TO PRINT

The following letters have been submitted to the Post by Accuracy In Media for the purpose of correcting inaccuracies or misleading information published in the Post and other papers. The editor has declined to publish these letters. Since AIM believes that the readers of the Washington Post really do have a right to know, we are publishing them at our own expense:

JOHN STEWART SERVICE

Sir: In reporting on a luncheon given at the State Department to honor John Stewart Service and other "old China hands" of the 1940s, the Post described the recipients of this honor as "the men who were persecuted and dismissed for sending news their country did not want to hear." This statement was apparently based on an uncritical acceptance of an assertion made by Mr. William C. Harrop, Chairman of the Board of Directors of the American Foreign Service Association, the sponsor of the luncheon.

In a letter announcing the luncheon, Mr. Harrop said: "The facts they reported were unwelcome at home. Many of these officers suffered harsh domestic criticism and were unable to continue their careers."

Mr. Harrop has admitted in private conversations that he had never made any systematic study of the reporting of the foreign service officers whose reporting his association was honoring. Nor was he able to cite any study that would confirm that Service and his colleagues suffered because they reported factually and objectively information that was "unwelcome at home."

An analysis of the reports from China submitted by John Stewart Service in 1944 suggests that Mr. Service was fundamentally wrong in his judgments about the philosophy and intentions of the Chinese Communists. For example, a report of his dated September 28, 1944, said: "The Communist political program is simple democracy. This is much more American than Soviet in form and spirit." In the same report, Mr. Service assured Washington that it was wrong to think that Mao wanted to bring socialism to China. He said: "The next stage in China's advance must be capitalism."

Mr. Service's analysis of the Chinese communists was dead wrong, but it is incorrect to say that it was unwelcome in Washington. On the contrary, this kind of analysis was very popular in the United States in 1944. Mr. Service was simply one voice in a loud chorus that was telling America that the true democrats in China were the communists and that we should support them, not Chiang. That chorus was largely successful in getting American policy changed, and the policies recommended by Service and his colleagues were to a large extent adopted.

Those historians who are now rewriting history would have us believe that Washington ignored Service and Davies and gave unstinting support to Chiang Kai-shek. That is not true. The policies followed in the critical postwar years were essentially those that these experts recommended. We actually withheld vitally needed arms from Chiang for a whole year while we tried to force him into forming a coalition government with the communists.

When America later discovered that these policies had helped bring about Mao's abso-

lute control of the mainland and when they found that the communists were Stalinist totalitarians, not the democratic reformers described by Service, there was strong criticism of Service's reports and policy recommendations.

However, John Stewart Service would probably never have been fired on the basis of his misleading reporting alone. What got him into hot water was the fact that it was found that in 1945 he wrongfully gave copies of some 18 classified State Department documents to Philip Jaffe, the editor of *Amerasia*, a pro-communist publication. He has admitted this serious violation of security, and there is no doubt that it weighed heavily in the judgment of the Loyalty Review Board.

The American Foreign Service Association does no credit to its own reputation when it honors Service and his colleagues without first ascertaining the facts. The Washington Post practices poor journalism when it parrots this distorted version of history without checking the record.

AMNESTY

FEBRUARY 9, 1973.

Sir: Haynes Johnson's recent article on the issue of amnesty (2/4/73) suggests that there is a need to clear up the serious misunderstanding that has arisen about the actions and attitude of Abraham Lincoln toward deserters and draft evaders. Johnson and others have discussed Lincoln's policies without drawing a clear distinction between his offer of amnesty to those who had rebelled against the Government of the United States and fought for the Confederacy and his policy toward those who deserted from the Union forces or evaded the draft. The distinction is an important one.

Lincoln issued an amnesty proclamation on December 8, 1863, while the war was still in progress. It provided that members of the Confederate forces below the rank of colonel and others who were supporting the Confederate cause, with certain exceptions, would be exempted from any punishment if they took a loyalty oath. The purpose of the proclamation was to encourage desertion from the Confederate forces. It did not apply to those who were already prisoners of war, and Lincoln made it clear that it was "not for those who may be constrained to take (the oath) in order to escape actual imprisonment or punishment."

It is most misleading to confuse this tactical move by Lincoln to encourage enemy desertions with Lincoln's policy toward deserters from his own forces. The standard punishment for desertion during the Civil War was death, and although Lincoln commuted many death sentences, many such sentences were carried out. As the war neared its end, on March 11, 1865, Lincoln issued a proclamation offering a conditional pardon to deserters. The condition was that they return to their units and serve out their enlistment, adding time for the period of their desertion. The proclamation stated that those who failed to turn themselves in or who fled to avoid the draft would be deemed "to have voluntarily relinquished and forfeited their rights of citizenship" forever. Lincoln clearly took a very firm stand toward deserters and draft evaders, a fact that has been badly obscured in much of the current discussion.

Post readers might also be misled by Haynes Johnson's discussion of Truman's pardoning of some selective service violators after World War II. Johnson says that Truman granted amnesty to 1523 violators, but he fails to say that 90 per cent of the selective service violators whose cases were considered by Truman's amnesty board were not pardoned. Nor does he say that the pardons were not extended to deserters. None of those pardoned by Truman were excused because they sympathized with the Nazi cause and had moral scruples about fighting them.

Mr. Johnson advocates that an amnesty board be established "to determine those

cases that merit pardon on grounds of moral objections to the war." These would not be persons who could qualify for conscientious objector status because of opposition to all war, but persons who objected to this particular war. There is no precedent in American history (or probably the history of any country for forgiving deserters and draft evaders for such a reason.

TV BIAS

FEBRUARY 14, 1973.

Sir: By coincidence, George Will's article arguing that TV bias does not matter appeared in the Post at the same time as an article in *TV Guide* demonstrated that TV bias matters very much.

Will contends that the networks are indeed biased but lacking in power to influence public opinion. Therefore, we need not worry about the distorted view of the world that comes over the tube.

TV Guide's article, "The Black Eye That Won't Go Away," shows that the city of Newburgh, N.Y. is still suffering today from the unfair negative image that it was given by an NBC documentary aired over ten years ago. The mayor of Newburgh is quoted as blaming the difficulty experienced in attracting industry to his city on the unfavorable impression that was created by the NBC program.

Was the NBC portrayal of Newburgh accurate and fair? The people of Newburgh don't think so. The local newspaper described the program as "a hatchet job on the city." It asked for an apology from NBC, but no apology was ever made. The *TV Guide* points out that because of the NBC documentary the local media are extremely distrustful of the national press, both print and broadcast.

The Newburgh case is only one of many that could be cited to show that TV has a stronger influence on public opinion, for good and ill, than Mr. Will seems to believe.

MORE TV BIAS

FEBRUARY 15, 1973.

Sir: In a recent speech the president of NBC, Julian Goodman, charged that "some Federal Government officials are waging a continuing campaign aimed at intimidating and discrediting the news media." Singling out an official who recently charged that there was bias in TV network news, Mr. Goodman said: "He did not say how we are biased."

Accuracy in Media, Inc. has spelled out in detail many specific cases of TV network bias. Many of these involve NBC, and Mr. Goodman knows of them. He misleads the public when he implies that charges of bias are lacking in documentation.

In the AIM Report for February 1973, we cite the following cases of bias in NBC News programs in recent months.

1. An attack on private pension plans in America in a documentary called "Pensions: The Broken Promise." The program was very one-sided.

2. An attack on private health care systems in a documentary called "What Price Health?" Another one-sided presentation.

3. A documentary on San Francisco's famed Chinatown based entirely on the carping criticisms of two radical youths whose sympathies for Mao Tse-tung came through loud and clear.

4. A documentary about the drug traffic in Southeast Asia transmitting the views of those who wanted to portray America and its Southeast Asian allies in a bad light. At the same time, NBC did not report the testimony on the other side that was given by Marine General Lewis W. Walt before the Senate Internal Security Subcommittee.

It is not the government that is discrediting the networks. The networks are discrediting themselves by their one-sided presenta-

tions of controversial issues of public importance.

ELECTION CAMPAIGN LAW VIOLATIONS

FEBRUARY 19, 1973.

Sir: On February 13, the Associated Press sent out a story which began this way: "The General Accounting Office reported today that the campaign organizations of President Nixon and Senator George McGovern failed to report within 48 hours a series of large contributions received in the last 12 days of the 1972 Presidential campaign." The story proceeded to say that no legal action was being recommended because "neither the new law nor the regulations were sufficiently explicit on these matters," according to the Comptroller General.

This report was a very accurate account of the GAO press release on this subject.

The Washington Post carried a story about the GAO release under the headline: "GAO Says Nixon Funds Unit Violated Spirit, Intent of Law." The headline was a summary of the Post's lead paragraph. It was not until the reader penetrated to the sixth paragraph of the Post story that he learned that the GAO had "also reported apparent violations by the campaign organization" of Senator McGovern. The Post story then reverted to the Nixon campaign funds, describing how large contributions had been divided among numerous committees so that each amount would be under the \$5000 floor for contributions that had to be reported within 48 hours. Nothing was said about the fact that the McGovern campaign organization was reported by the GAO to have followed the same practice.

The GAO criticized the Nixon committee for its handling of funds totaling over \$1 million. It criticized the McGovern committee for its handling of funds totaling over \$150,000. Is it the difference in the amounts that justifies the difference in the way the Post reported the criticism of the two committees? Does that wipe out the fact that the GAO criticism was directed evenhandedly at both committees?

CONGRESSMAN DRINAN SUPPORTS
"NOW" ACCOUNTS

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. DRINAN. Mr. Speaker, I have introduced today a bill which attempts to protect a newly developing practice within the banking community. The bill which I have introduced today has been previously introduced in the other body by Senator THOMAS J. MCINTYRE of New Hampshire and is numbered S. 1008.

In recent months, mutual savings banks in Massachusetts and New Hampshire have established a new type of savings account which permits depositors to receive interest on accounts from which they may draw by using negotiable instruments of withdrawal. This practice has been sustained by the Supreme Judicial Court of Massachusetts.

Negotiable order of withdrawal accounts—NOW accounts—while similar to checking accounts, are distinct from conventional checking accounts. A negotiable order of withdrawal is drawn on a demand deposit as is a check, but it is drawn on an interest-bearing account and in effect is a replacement for the need of presenting a passbook in order

to withdraw funds. This method of withdrawal removes the inconvenience to a depositor of having to personally present a passbook in order to withdraw his savings. Further, NOW accounts are available only to individuals and are not offered for commercial purposes.

One issue that has been raised is whether all financial institutions should be granted the same right to offer this service to their customers. The bill which I have introduced seeks to make clear that Federal banking statutes do not prohibit federally regulated financial institutions from offering depositors negotiable order of withdrawal services in connection with interest-bearing deposits.

The text of the bill follows:

H.R. 6226

A bill to extend certain laws relating to the payment of interest on time and savings deposits and to make clear that Federal banking statutes do not prohibit depository institutions from offering negotiable order of withdrawal services in connection with certain interest-bearing deposits

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 7 of the Act of September 21, 1966 (Public Law 89-597), is amended by striking out "1973" and inserting in lieu thereof "1974".

SEC. 2. Section 19(1) of the Federal Reserve Act (12 U.S.C. 371a) is amended by adding at the end thereof the following new sentence: "Nothing in this paragraph shall be construed as prohibiting payment of interest on a deposit with respect to which the bank may require the depositor to give notice of an intended withdrawal not less than thirty days before the withdrawal is made, even though in practice such notice is not required and the depositor is allowed to make withdrawals by negotiable instrument for the purpose of making payments to third persons or otherwise."

SEC. 3. Section 18(g) of the Federal Deposit Insurance Act (12 U.S.C. 1828(g)) is amended by adding at the end thereof the following new sentence: "Nothing in this subsection shall be construed as prohibiting payment of interest on a deposit with respect to which the bank may require the depositor to give notice of an intended withdrawal not less than thirty days before the withdrawal is made, even though in practice such notice is not required and the depositor is allowed to make withdrawals by negotiable instrument for the purpose of making payments to third persons or otherwise."

SEC. 4. Paragraph (13) of section 107 of the Federal Credit Union Act (12 U.S.C. 1757) is amended to read as follows:

"(13) in accordance with rules and regulations prescribed by the Administrator, (A) to sell to members negotiable checks (including travelers checks) and money orders, and to cash checks and money orders for members, for a fee which does not exceed the direct and indirect costs incident to providing such service and (B) to allow its members to make withdrawals from their share accounts by negotiable instrument for the purpose of making payments to third persons or otherwise; and"

SEC. 5. The last sentence of section 5(b) (1) of the Home Owners' Loan Act of 1933 (12 U.S.C. 1464) is amended to read as follows: "An association may allow holders of savings accounts to make withdrawals from such accounts by negotiable instrument for the purpose of making payments to third persons or otherwise as long as the association retains the right to require the advance notice referred to in the third sentence of this paragraph."

OBSCENE RADIO BROADCASTING—
VIII

HON. JAMES V. STANTON

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. JAMES V. STANTON. Mr. Speaker, over the last several weeks I have inserted into the RECORD several items relating to controversial broadcasting by station WERE in Cleveland, Ohio, and on how this appears to be part of a national trend in programming by radio.

Members of this body who have a similar problem in their own congressional districts might wish to check the RECORDS of February 5, 6, 7, 8, 21, 26, and 28 for material leading up to the insertion I am making today.

The latter is an exchange of correspondence between me and the Department of Justice, which is self-explanatory. For purposes of clarity, I am inserting these letters in the RECORD in chronological order, starting with my original communication to the Attorney General of the United States and concluding, finally, with the most recent letter I have received from his office, dated March 23, and my reply to that, which is dated today. The letters follow:

WASHINGTON, D.C., February 7, 1973.

HON. RICHARD G. KLEINDIENST,
Attorney General of the United States,
Washington, D.C.

DEAR MR. KLEINDIENST: Because of an acute problem relating to offensive radio programming in Cleveland, Ohio, I have written letters to the United States Attorney for the Northern District of Ohio, to the Federal Communications Commission and to the Legislative Counsel of the House of Representatives. I enclose copies of those communications for your perusal, since they deal with an issue over which the Justice Department has jurisdiction.

I have made inquiries pertaining to your enforcement of Title 18, United States Code, Section 1464, which states: "Whoever utters any obscene, indecent, or profane language by means of radio communication shall be fined not more than \$10,000 or imprisoned not more than two years or both."

From the Congressional Research Service, I received this report about your activities:

"There are apparently a number of unreported decisions involving indictments under sec. 1464 but the precedent value of these proceedings seems to be limited. The General Counsel's Office of the FCC indicated that when a case is referred to the Justice Department for criminal prosecution under sec. 1464 the Department may not prosecute where it appears that the language in question would be protected under the First Amendment. The FCC General Counsel's office explained, however, that local U.S. District Attorneys, under community pressure, may obtain indictments and that the defendants often plead guilty to these indictments. The Justice Department, according to the FCC, does not rely upon these proceedings as precedents."

In conversations with officials of the Federal Communications Commission and your own Justice Department, I was able to confirm that what the Congressional Research Service reported to me is indeed true. I learned also from these conversations that your Department does not keep track of guilty pleas and that may have been entered in various Federal trial courts around the

country—i.e., that such cases, when they occur, are not necessarily reported to your office in Washington.

In view of this fact, I want to say respectfully that I fail to see how it is possible for the United States Attorney General to achieve a uniform enforcement policy around the country with respect to Section 1464 if certain facts that might prove useful to you are not reported to you.

If indeed there are guilty pleas being made to violations of Section 1464, wouldn't you want to know what accounts for your success in each case? Wouldn't such knowledge suggest to you strategy for action with respect to new complaints as you receive them? In other words, wouldn't the circumstances under which you might be achieving success in one area prove instructive to you with respect to other parts of the country?

Again respectfully, I would like to suggest that you circulate your United States Attorneys across the Nation, asking them to report to you all prosecutions and dispositions in recent years under Section 1464.

It could be that such information would be of particular value to Mr. Coleman in Cleveland, who is considering whether to institute proceedings against Station WERE there.

As your superior, President Nixon, asserted on October 24, 1970:

"So long as I am in the White House, there will be no relaxation of the national effort to control and eliminate smut from our national life . . . Pornography can corrupt a society and a civilization. The people's elected representatives have the right and obligation to prevent that corruption . . . The Supreme Court has long held, and recently reaffirmed, that obscenity is not within the area of protected speech or press. Those who attempt to break down the barriers against obscenity and pornography deal a severe blow to the very freedom of expression they profess to espouse."

I am certain that you want to have in effect the kind of enforcement policy that implements the President's feelings on this matter. Therefore, I would appreciate your comments not only on this letter but also on the three others which I enclose.

Kindest personal regards.

Sincerely,

JAMES V. STANTON,
Member of Congress.

DEPARTMENT OF JUSTICE,
Washington, D.C., March 2, 1973.

HON. JAMES B. STANTON,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN: Your letter to the Attorney General of February 7, 1973, concerning offensive radio transmissions has been referred to this office for reply.

We are presently compiling statistical information concerning the number of prosecutions arising under 18 U.S.C. 1464. Upon receipt of this information, we will correspond with you in detail concerning the subject matter of your letter.

Sincerely,

HENRY E. PETERSEN,
Assistant Attorney General.

DEPARTMENT OF JUSTICE,
Washington, D.C., March 23, 1973.

HON. JAMES V. STANTON,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN: This is in further response to your letter of February 7, 1973, to the Attorney General concerning certain programming on Radio Station WERE, Cleveland, Ohio.

The statistical information referred to in my letter to you dated March 2, 1973, concerning this subject, has now been compiled. United States Attorneys are required to furnish the Department with caseload reports on

a regular basis. According to the information we have received, there have been a total of 15 defendants involved in cases arising under 18 U.S.C. 1464 from and including Fiscal Year 1969 through January, 1973. Cases involving six defendants were disposed of on pleas of guilty or *nolo contendere*; seven defendants were convicted. Three convictions were affirmed on appeal and one was reversed; and cases against two defendants were dismissed.

The paucity of cases arising under this statute illustrates the difficulties involved in enforcing the Federal obscenity laws. As these laws have been interpreted by the Supreme Court, material, to be obscene, must (1) have as its dominant theme an appeal to a prurient interest in sex, (2) offend contemporary community standards in the representation of sexual matters, and (3) be utterly without redeeming social value. Consequently, speech which has as its dominant theme a discussion of an issue or presentation of an idea, however controversial or offensive that idea may be, is protected by the First Amendment against a charge of obscenity. Needless to say, most radio broadcasting falls into this category.

We have reviewed certain investigative reports prepared by the Federal Bureau of Investigation concerning the activities of Radio Station WERE. While certain of that station's programs focus upon discussion of sexually oriented topics, we do not believe the programs could be considered violative of 18 U.S.C. 1464 for the reasons set forth above. Nevertheless, because these programs are certainly controversial and undoubtedly offensive to some individuals, we are requesting the Federal Bureau of Investigation to furnish the Federal Communications Commission with the results of its investigation of this station so that agency may determine whether or not this programming is in the public interest.

I trust this satisfies your inquiry. If I can be of further assistance, please contact me.

Sincerely,

HENRY E. PETERSEN,
Assistant Attorney General.

WASHINGTON, D.C., March 27, 1973.

HON. RICHARD G. KLEINDIENST,
Attorney General of the United States,
Washington, D.C.

DEAR MR. KLEINDIENST: On March 23, 1973, Mr. Henry E. Petersen, the Assistant Attorney General in charge of your criminal division, replied to my February 7, 1973 letter to you pertaining to obscene radio broadcasting and the policy of the Department of Justice as to enforcement of Title 18, United States Code, section 1464.

As you know, that letter was critical of your policy, and, in it, I asked questions and made suggestions. In his reply to me, Mr. Petersen was hardly responsive to the substantive points raised in my letter. Therefore, I am enclosing herewith a copy of my original letter, and I ask that you personally review it and respond to it, since your assistant—despite his high rank and responsibilities—evidently chooses to evade the issues involved.

A perusal of my letter will indicate, I am sure, that I did not ask for a statistical report, which, as it turns out, is all I received from Mr. Petersen. However, I am happy to learn, from the second paragraph of Mr. Petersen's letter, that Section 1464 is not exactly unenforceable. This is a fact that I find encouraging, at a time when I am urging both the Department of Justice and the Federal Communications Commission to adopt a more aggressive policy.

Again, I would appreciate hearing directly from you on the points raised in my original letter.

Sincerely,

JAMES V. STANTON,
Member of Congress.

THE EARTHQUAKE RESEARCH ACT
OF 1973

HON. DICK SHOUP

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 28, 1973

Mr. SHOUP. Mr. Speaker, scientific knowledge about the physical conditions within the earth is at a stage of development in the United States where our ability to predict the occurrence of destructive earthquakes appear imminent. The strong theoretical and applied research expertise developed in Government-sponsored programs supporting seismology and related sciences is at the threshold of having sufficient understanding of earth processes to accomplish this end. The national need for this capability has been clearly shown in recent years in Montana, California, Alaska, and Missouri where the destruction of property and tragic loss of life have been severe.

In this year of centennial for one major Montana earthquake, which wreaked considerable destruction in the west-central part of the State, it is very appropriate to consider the possibility that such unannounced disasters be either controlled, or at the very least, predicted. As Congressman from Montana, it is also impossible for me to overlook the fact that over \$4,000,000 in damage occurred in 1935 in the State capitol and surrounding region—in 1935 valued dollars—and that the Hebgen Lake Earthquake of 1959 in the southwestern part of Montana took one of the highest tolls of life, some 29 persons, of any earthquake occurring in the United States up to that time. The entire western region of Montana lies within the highest or nearly the highest seismic risk regions of any part of the country, and the active earth processes in this region, which are announced by a continuous flow of reports of small earthquakes being felt by the Montana citizens, clearly indicates the potential for further destruction.

Japanese seismologists have recently reported changes in tilting and elevation of the ground in the vicinity of large earthquakes prior to the energy release in the main large shock. Russian scientists have also noted a distinct change in the velocity ratio of two common seismic waves within the earth near the earthquake focus prior to the earthquake itself. Chinese scientists are reported to have undertaken a major program in earthquake prediction. This followed the almost total destruction of a moderately large village. Utilizing the observations made there as well as others, such as the long term monitoring of ground water levels which may respond to changes in the earth of premonitory character, the Chinese are making important advances.

Seismologists in California have also reported similar changes in ground water conditions in the vicinity of the famed San Andreas Fault, but it is not yet clear as to the direct relationship to earth-

quakes happening along the fault or in its vicinity.

The recent visit to Russia by President Nixon produced among other newsworthy items with profound importance to our country, the intended exchange of scientific information related to earthquake prediction as a specific area of international interest. Such attention amid the weighty items of arms control and mis-silery appears as a clear indicator of the necessity to enter into such a worthy effort.

Mr. Speaker, the time to act against earthquakes is now. Between the United States and the other countries of this world, we now have the basic knowledge to act in a very positive way. There is no reason for not providing our citizens such basic protection as advance warnings from natural disasters such as earthquakes. This protection could be provided with the right equipment and tools. Legislation which provides this protection would be important to all the people in areas of high seismic risk.

Mr. Speaker, I ask that the text of my bill, in its entirety, be printed at this point in the RECORD. Thank you.

H.R. 6277

A bill to provide a sound program for the development and application of physical theory and operational systems for predicting damaging earthquakes in the United States

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That

(a) this Act be cited as the "Earthquake Research Act of 1973".

(b) The Congress hereby finds and declares that certain regions within the United States have been identified as subject to high risk in terms of destructive earthquake potential; that a significant part of the population of the United States lives within serious danger of loss of life and property from the unpredicted occurrence of destructive earthquakes in those regions; that scientists in other countries have issued earthquake warnings; that Russian and Chinese scientists have begun systematic studies of premonitory earthquake phenomena; that the need for international transfer of pertinent scientific information is clearly indicated; and that seismic research capability in the United States is sufficiently advanced that an earthquake prediction competence may be achieved with an earthquake research program. To minimize loss of life and property damage, the Congress hereby declares that it is its purpose to establish a specific program of research and development in the United States to provide for the collection, analysis, and interpretation of seismic and related data, and to provide supporting field, laboratory, and theoretical studies leading to the goal of predicting destructive earthquakes within the United States.

(c) For the purposes of this Act, those regions identified as "high seismic risk" include places where destructive or fatal earthquakes have occurred and in which seismic activity continues, such as areas within the States of Alaska, Washington, Montana, Wyoming, Colorado, Utah, Nevada, and California; in Missouri, Illinois, West Virginia, Tennessee, Louisiana, Arkansas, and South Carolina; and in the States of New York, Maine, Massachusetts, and Connecticut.

SEC. 2. (a) There shall be established an Earthquake Research Board, which shall consist of no less than five and no more than seven members, and with at least five perma-

nent, full-time members for the term of the research effort. The function of the Board is to set guidelines for the distribution of research effort and funding, insure that the spirit of the guidelines is being followed, and to make certain that the research results are reported to the President, the Congress, and the Public in a timely manner. The Board shall have the authority to review and evaluate major program efforts, establish specific research goals, and accept or reject the suitability of proposed research, engineering, and development efforts.

Membership of the Board, which may include temporary members with expertise in areas of particular need during the progress of the program, shall also include at all times at least one seismologist, one solid-earth geophysicist, one geologist, one seismological engineer, and one instrumentation engineer. Compensation and administrative support for the members shall be at a level appropriate to equivalent responsibilities in the private sector.

Recommendations for membership on the Board shall be accepted from the Congress, National Science Foundation, National Academy of Sciences, Department of Interior, National Oceanographic and Atmospheric Agency, Department of Defense, and professional societies with capability and interest in earthquake prediction. All members of the Board shall be appointed by the President.

The Earthquake Research Board shall select appropriate public entities and organizations, foundations, and private entities and organizations for the conduct of a program to predict earthquakes which shall include—

(1) heavy instrumentation within areas of high seismic risk to obtain detailed records of data useful in developing an earthquake predicting capability;

(2) establishment of facilities for the collecting and computerized reduction, analysis and interpretation of the data flow from such instruments;

(3) supporting procedures for field, laboratory and related theoretical studies directed toward description of predictive earthquake phenomenon;

(4) development and field testing of additional instruments which are useful in connection with the foregoing provisions of this section; and

(5) design and utilization of facilities and methods for the timely distribution of research and development results to the scientific and other concerned communities, including the exchange of useful information with the international earthquake research community.

The Board shall also insure that no more than one-half of the funding provided by this Act is distributed to a single agency, entity, or organization, and that approximately one-quarter of the funding be distributed to university research through appropriate distribution, grant, and contracting agencies. The specific intent of this requirement is to aid in bringing all possible national capabilities to bear upon the problems of successfully predicting destructive earthquakes in the United States.

SEC. 3. (a) The Earthquake Research Board is authorized to establish and carry out a program to review and assess the current state of knowledge on earthquake prediction and earthquake warning systems, and to define plans which are needed to reduce primary and secondary losses from earthquakes. Such a review and assessment shall include:

(1) a forecast of the problems expected to be associated with the issuance of earthquake warnings to the population residing in high seismic risk areas;

(2) an analysis, prepared prior to the occurrence of an earthquake, of the behavioral and psychological effects of an earthquake;

(3) an analysis, prepared prior to the issuance of earthquake warnings, of steps

which should be taken to make such warnings effective, and how to make a decision to issue such warnings.

(b) The Board will be responsible for dissemination of the results of the research efforts for preparation of high seismic risk areas for the occurrence of earthquakes, particularly for the purposes of defining emergency community planning, insurance needs, architectural and engineering goals, and other such studied applications which would serve to protect life and property.

(c) The Board is authorized to enter into

contracts, agreements, or other appropriate arrangements with the National Academy of Sciences, public entities and organizations, and private entities or organizations to provide the necessary scientific advisory services as may be required to carry out the purposes of this section.

Sec. 4. The Earthquake Research Board shall make information developed pursuant to the Act available to the President, the Congress, Governors of States in high seismic risk, and other government and private organizations which are concerned with prepara-

tions for or reactions to earthquakes or earthquake warnings.

Sec. 5. (a) For purposes of section 2 of this Act, there is authorized to be appropriated for the fiscal year ending June 30, 1975, the sum of \$15,000,000 and for each of the next following six fiscal years the sum of \$12,000,000.

(b) For purposes of sections 3 and 4 of this Act, there is authorized to be appropriated for the fiscal year ending June 30, 1975, and for each of the next following six fiscal years, the sum of \$400,000.

HOUSE OF REPRESENTATIVES—Thursday, March 29, 1973

The House met at 12 o'clock noon.

Rt. Rev. Zoltan Beky, bishop emeritus of the American Hungarian Reformed Church, offered the following prayer:

Almighty God, Father of all nations, we stand before Thee in humble reverence as leaders, chosen representatives, and lawmakers of this great Nation.

We invoke Thy gracious blessing upon this great assembly. We confess that we are unable to carry the heavy responsibilities of our enormous tasks without Thy help. Give us Thy guidance and wisdom. Our entire world is in turmoil, divided as it is, needs Thy deliverance.

Make us all instruments in Thy hand to bring about a better and more peaceful world.

We pray for our beloved country, the "Land of the free, and the home of the brave."

We give Thee thanks for our great heritage that is ours in this Nation.

We thank Thee that by Thy spirit Thou hast kindled the longing for freedom in the hearts of men.

On this day we remember the noble people of Hungary who so gloriously attempted to achieve a free and independent nation 125 years ago.

Lord, Thou knowest that their dreams and aspirations have not been fulfilled yet.

We beseech Thee to hear their prayers and mercifully grant freedom to all enslaved nations on earth.

We pray for our President and all Members of the Congress. Give them Thy wisdom and Thy strength to serve Thee and our country in Thy name. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 1975. An act to amend the emergency loan program under the Consolidated Farm and Rural Development Act, and for other purposes.

The message also announced that the Senate insists upon its amendment to the bill (H.R. 2107) entitled "An act to require the Secretary of Agriculture to carry out a rural environmental assistance program," disagreed to by the House; agrees to the conference asked by the House on the disagreeing votes of the two Houses thereon, and appoints Mr. TALMADGE, Mr. ALLEN, Mr. HUDDLESTON, Mr. AIKEN, and Mr. YOUNG to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1136. An act to extend the expiring authorities in the Public Service Act and the Community Mental Health Centers Act.

THE RIGHT REVEREND ZOLTAN BEKY

(Mr. PATTEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PATTEN. Mr. Speaker, the Right Reverend Zoltan Beky, who has just said the prayer, for many years has been and is head of the American Hungarian Federation. They have their own buildings out on New Mexico Avenue and have over 1 million members.

This is a great group. I want the Members here to know that the administration of the American Government does not have any more loyal supporters in any phase of American life than this group, whose country is overrun and controlled by a foreign army, whose people cry out for freedom.

These Hungarians who are now Americans support the foreign policies of our Government to preserve freedom all over the world. They are great Americans. I think it is wonderful that we have Bishop Beky here today to bless us with the opening prayer. I thank him ever so much.

THE 184TH ANNIVERSARY OF THE FIRST MEETING OF THE HOUSE OF REPRESENTATIVES

(Mr. PODELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PODELL. Mr. Speaker, I should like to call to the attention of my colleagues that the House of Representatives was organized in New York City

on April 1, 1789. This coming April 1, 1973, marks the 184th anniversary of the first meeting of this august body.

April 1, Mr. Speaker, has traditionally been known as April Fool's Day.

BASKETBALL CRISIS

(Mr. BELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BELL. Mr. Speaker, I rise this afternoon to alert my colleagues to a terrible crisis facing our Nation which we in Congress must confront squarely.

I am referring to the dreaded basketball crisis, which has gradually taken hold in the United States.

This crisis culminated in the conquest by the team of the University of California at Los Angeles of the NCAA National Basketball Championship for the seventh time in a row.

UCLA also vanquished its 75th straight opponent last Monday night.

Some political commentators have warned that this situation constitutes "five-man rule."

Whatever it may be, we in West Los Angeles realize it is certainly demoralizing to all those basketball players and fans in America who have chosen a team other than UCLA as their own.

Since I represent the UCLA five in this Congress, I have been given advance word that the administration is planning to send to the Hill very shortly a special basketball revenue-sharing bill. The Better Dribbling Act of 1973, which would allocate funds to each State's universities to provide for expanded basketball facilities and training.

The sharing formula will exclude California entirely as a fund recipient.

This is certainly one plausible approach.

Whatever course of action this Congress in its wisdom elects to follow, Mr. Speaker, I am sure that the record of the UCLA team, led by Coach John Wooden, Bill Walton, Tommy Curtis, Larry Farmer, Larry Hollyfield, Greg Lee, and Keith Wilkes will stand unchallenged for a long time to come.

MAJORITY LEADER THOMAS P. O'NEILL, JR., SUPPORTS CON- SUMERS SUPERMARKET PRO- TEST ON FOOD PRICES

(Mr. O'NEILL asked and was given permission to address the House for 1

minute and to revise and extend his remarks.)

Mr. O'NEILL. Mr. Speaker, Consumers Supermarkets in the Washington area have announced that they will close Saturday—their biggest business day—to protest the fantastic increase in food prices.

This will be a considerable financial sacrifice for Consumers, and it should serve to drive home the point Consumers is trying to make: that wholesale and retail food prices have shot up alarmingly in the past year and are still climbing.

That is not news to our wives, of course. Their beef boycott already has had some success in forcing down meat prices.

Consumers has rightly caught the mood of public outrage. The store documented the staggering increases of the past 12 months in commodities which grocers must purchase to supply their customers. Wheat has gone up 61 percent; hogs up 66 percent; steers up 24 percent; broilers up 54 percent; eggs up 39 percent; coffee up 41 percent.

These kinds of price rises are intolerable. What we are experiencing is the result of the Nixon administration's politically motivated farm policies of 1972. Agriculture Secretary Butz set out deliberately to see how high he could drive food prices. Look how well he has done.

Mr. Speaker, Consumers is asking its customers to sign petitions to President Nixon, telling him that the Nation wants something done about these unbelievable increases in food prices. Consumers' effort and its financial sacrifice deserve the appreciation and support of the public.

THE AMERICAN FARMER UNDER THE NIXON ADMINISTRATION

(Mr. GERALD R. FORD asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. GERALD R. FORD. Mr. Speaker, I am deeply grateful to the distinguished Democratic majority leader, the gentleman from Massachusetts (Mr. O'NEILL) because he has given me some very fine quotes which I intend to use in some political speeches in the farm areas of America.

I am delighted that he is condemning the good fortune of the American farmer under the Nixon administration. I do not think the farmers of America will respond very well to the condemnation of American agriculture by my friend, the gentleman from Massachusetts.

Mr. Speaker, the farmers of America are good people. They deserve for their labor and investment fair share of the benefits of our economy, and I regret exceedingly that the gentleman from Massachusetts (Mr. O'NEILL), the Democratic majority leader, is condemning their efforts to produce the food and fibers for the American people.

Mr. O'NEILL. Mr. Speaker, will the gentleman yield?

Mr. GERALD R. FORD. I shall be glad

to yield to the gentleman from Massachusetts (Mr. O'NEILL), the majority leader.

Mr. O'NEILL. Mr. Speaker, I admire the courage of the gentleman from Michigan (Mr. GERALD R. FORD), the Republican minority leader, in that he would have the courage to go before the American farmers to explain the wheat deal with Russia which took place last year. If the gentleman does that, I know it will be extremely interesting.

Mr. GERALD R. FORD. Mr. Speaker, the American farmer, by the gentleman's own quotation, has done extremely well as a result of that transaction. We have had the surpluses under Democratic administrations, and the taxpayers now have been the beneficiary of the foreign sales of our agricultural production.

Mr. CEDERBERG. Mr. Speaker, will the gentleman yield?

Mr. GERALD R. FORD. I yield to the gentleman from Michigan (Mr. CEDERBERG).

Mr. CEDERBERG. Mr. Speaker, I think what we really need is a little less "bull" on the floor of the House and more bulls in the marketplace, and I think that is exactly what is going to take place in the near future.

PERMISSION FOR COMMITTEE ON THE DISTRICT OF COLUMBIA TO FILE REPORTS ON H.R. 342 AND H.R. 4586

Mr. DELLUMS. Mr. Speaker, I ask unanimous consent that the Committee on the District of Columbia may have until midnight tonight to file reports on two bills, H.R. 342 and H.R. 4586.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

GRAIN EMBARGO

(Mr. WOLFF asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. WOLFF. Mr. Speaker, for the last several weeks, I have sponsored hearings in New York along with a number of colleagues from the metropolitan area in which we have considered the questions relating to the tremendous price rises in the cost of food over the last few weeks. One clear fact that has emerged has been the direct relationship between the Russian wheat deal and the impending China grain deals, other grain exports, and the rise in prices of bread, meat, poultry, and dairy products. The administration's food policies are quickly leading to a national disaster of major proportions.

The President has called for increased production of grain on our farms. But by the time we see any results from the President's policy, millions of families may be driven to the poorhouse. The people of America need relief immediately, so that the laws of supply and demand can operate freely in this country. It is wrong to be shipping our grain

abroad when our supplies for domestic consumption are so inadequate.

Therefore, I am today introducing a bill to halt all grain exports from the United States until such time as it can be shown that our domestic needs are being adequately met. While this action may appear drastic, so is the condition of the American food market today. I would hope that we could act in concert to protect the interests of all our constituents.

NATIONAL CLEAN WATER WEEK

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the joint resolution (H.J. Res. 437) to authorize the President to designate the period beginning April 15, 1973, as "National Clean Water Week," and ask for immediate consideration of the joint resolution.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. GROSS. Mr. Speaker, reserving the right to object, this resolution does not place any financial obligation on the Federal Treasury, does it?

Mr. EDWARDS of California. Mr. Speaker, will the gentleman yield?

Mr. GROSS. Yes.

Mr. EDWARDS of California. The answer is "No." It places no financial obligation on the Federal Government.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the joint resolution as follows:

H.J. RES. 437

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That, to emphasize the importance of intelligently planned use and distribution of the Nation's water resources, and in recognition of the highly developed professional and industrial techniques which provide the American people with a constant supply of clean water for use in home, office, school, factory, hospital, and wherever else such clean water is needed, the President is hereby authorized and requested to issue a proclamation designating the period beginning April 15, 1973, and ending April 2, 1973, as "National Clean Water Week", calling upon interested groups and organizations to observe such week with appropriate ceremonies and activities.

Mr. CASEY of Texas. Mr. Speaker, I am here to urge my colleagues to join me in approving House Joint Resolution 437 which will authorize the President to designate April 15 through 22 as "National Clean Water Week."

The problems of keeping water clean and usable have become more familiar to Americans as the ecological movement has increased in recent years. Few people ever wonder how they get that water into the kitchen sink, however. We owe

this convenience to the largest and oldest trade association in the construction industry—the National Association of Plumbing, Heating, and Cooling Contractors.

Civilization has always depended on the efforts of these trades. Today our skyscrapers and cities depend on the talents of this industry. Without the convenience and service afforded by this industry our life-styles would be vastly different. Certainly the plumbing, heating, and cooling industry has greatly affected the level of health in the United States by providing high quality water and effective waste removal systems. We owe these trades more than we realize.

Nearly 2 million men and women will join the national association in celebrating this event. Our economy and society receive important benefits from these individuals' service. I am sure my colleagues will agree with me and join in support of this resolution to authorize "National Clean Water Week."

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL CHECK YOUR VEHICLE EMISSIONS MONTH

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of the joint resolution (H.J. Res. 337) authorizing and requesting the President to proclaim April 1973 as "National Check Your Vehicle Emissions Month" and ask for the immediate consideration of the joint resolution.

The Clerk read the title of the joint resolution.

The SPEAKER. Is there objection to the request of the gentleman from California?

Mr. GROSS. Mr. Speaker, reserving the right to object, I would ask the distinguished gentleman from California the same question as I did on the prior joint resolution.

Mr. EDWARDS of California. I assure the gentleman from Iowa there is no cost to the Federal Government for any of these purposes.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the joint resolution as follows:

H.J. RES. 337

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating the month of April 1973 as "National Check Your Vehicle Emissions Month", and call upon the motorists and the automotive industry of the United States to take appropriate steps during the month of April to reduce substantially air pollution from the motor vehicles operating on the streets and highways.

Mr. ECKHARDT. Mr. Speaker, passage of House Joint Resolution 337, which authorizes and requests the President to proclaim April 1973 as "National Check Your Vehicle Emissions Month" will insure that a voluntary program to help clean up the air will be well on the road to success. Members of the oil and automotive industry organized into an ad hoc Vehicle Emission Check Committee have sparked an enthusiastic program to encourage automobile owners to participate in a program to substantially reduce air pollution by testing the emissions from their automobiles.

The resolution calls upon motorists and the automotive industry of the United States to take appropriate steps during the month of April to reduce substantially air pollution from motor vehicles operating on streets and highways. Congress passed a similar resolution last year, and the members of the industry engaged in a widespread educational program to encourage drivers to check the content of the emissions of their automobiles and to make repairs when needed. The ad hoc committee developed a standardized engine emissions check and developed program tie-in materials for repair service outlets. The industry's business press and trade associations actively publicized the program.

These activities are an important part of the total effort to clean up the air. While new automobiles must comply with Government standards for emissions, older automobiles on the roads continue as the worst offenders of the environment. Tests have indicated that simple adjustments and minor tune-ups can result in a minimum of 15- to 25-percent reduction of automobile air pollution. For example, engine misfire caused by a malfunction of the ignition system is a major cause of hydrocarbon emissions. Carbon monoxide emissions can be controlled by the adjustment of the idle air/fuel ratio and idle rpm. When such adjustments are made, motorists can expect an additional direct benefit in money saved because engine life is increased, performance improved, and operating costs reduced.

The automotive and oil industry must assume a major responsibility for cleaning the air. Yet, we cannot expect them to shoulder complete responsibility. The educational effort which was conducted in accordance with the resolution passed last year, and will be conducted again this year, brings to motorists' attention the fact that they too can actively contribute to improving the quality of the air we breathe. Furthermore, it may serve to discourage motorists from asking mechanics to adjust their new automobiles to provide better performance but dirtier emissions.

Members of the ad hoc committee which has organized industry and civic group efforts are: James Bates, Ignition Manufacturers Institute; William D. Cushman, American Driver and Traffic Safety Education Association; Richard F. Curry, American Automobile Association; Richard D. Kudner, Champion Spark Plug Company; Arthur H. Nelle,

Jr., Car Care Council; A. J. Russo, Shell Oil Co.; Lynn Stitt, American Association of University Women; and Charles E. Sundin, the U.S. Jaycees.

The joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. EDWARDS of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the two joint resolutions just passed.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 5293, PEACE CORPS ACT AMENDMENTS OF 1973

Mr. PEPPER. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 328 and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 328

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5293) authorizing continuing appropriations for the Peace Corps. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Foreign Affairs, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER. The gentleman from Florida (Mr. PEPPER) is recognized for 1 hour.

Mr. PEPPER. Mr. Speaker, I yield 30 minutes to the gentleman from California (Mr. DEL CLAWSON), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 328 provides for an open rule with 1 hour of general debate on H.R. 5293, which is a bill to authorize appropriations to finance the operation of the Peace Corps during fiscal year 1974 and fiscal year 1975.

H.R. 5293, as amended by the Committee on Foreign Affairs, authorizes an appropriation of \$77,001,000 for fiscal year 1974 and limits the appropriation for 1975 to an amount "not to exceed \$80,000,000." For fiscal year 1973, the Committee on Foreign Affairs recommended, and the House of Representatives passed, an authorization of \$88,027,000. The total amount appropriated

is expected to amount to approximately \$81,000,000 by June 30, 1973.

The Peace Corps has attempted to provide skills and knowledge in the person of U.S. volunteers in underdeveloped countries. It has tried to improve the image of the United States abroad and it has tried to bring back to the United States an understanding of the countries which are hosts to our volunteers.

The Peace Corps carried out its services in Africa, Latin America, Southeast Asia, and the South Pacific. Its activities have important foreign policy implications.

Today our Peace Corps volunteers have a higher degree of skill than ever before, and a greater percentage have a higher degree of education in the specific areas which they serve.

Mr. Speaker, I urge adoption of House Resolution 328 in order that we may discuss and debate H.R. 5293.

Mr. DEL CLAWSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 328 provides for the consideration of H.R. 5293, Peace Corps Act Amendments of 1973, under an open rule with 1 hour of general debate.

The primary purpose of H.R. 5293 is to authorize appropriations for the Peace Corps for fiscal years 1974 and 1975.

This bill authorizes \$77,001,000 for fiscal year 1974 and \$80,000,000 for fiscal year 1975.

As introduced, the bill authorized \$77,001,000 for fiscal year 1974 and "such sums as may be necessary" for fiscal year 1975. The Committee on Foreign Affairs amended the bill to limit the 1975 authorization to an amount "not to exceed \$80,000,000." In addition, the Committee amended the title of the bill with a technical change to make it clear that the bill authorizes "additional" appropriations for the Peace Corps and does not provide for "continuing appropriations."

In order to put into perspective the amounts authorized for fiscal years 1974 and 1975, it is useful to note that for fiscal year 1973, \$88,027,000 was authorized.

Mr. Speaker, I urge the adoption of this rule.

Mr. PEPPER. Mr. Speaker, I have no requests for time.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

CALL OF THE HOUSE

Mr. GROSS. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. O'NEILL. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 60]

Armstrong	Gettys	Riegle
Ashbrook	Gialmo	Roberts
Aspin	Griffiths	Rooney, N.Y.
Badillo	Grover	Rosenthal
Biaggi	Guyer	Roussellot
Blatnik	Hanna	Roybal
Bolling	Harsha	Ruppe
Brown, Calif.	Harvey	Schneebell
Burton	Hawkins	Sisk
Carey, N.Y.	Hébert	Smith, Iowa
Carney, Ohio	Ichord	St Germain
Chappell	Jones, N.C.	Steele
Chisholm	King	Teague, Tex.
Clark	Kuykendall	Thompson, N.J.
Clay	Lujan	Udall
Davis, S.C.	Mann	Wilson,
Dent	McClary	Charles H.,
Erlenborn	McKinney	Calif.
Flowers	McSpadden	Wilson,
Foley	Mills, Ark.	Charles, Tex.
Fraser	Passman	Wright
Frelinghuysen	Price, Tex.	Young, Ill.
Gaydos	Reuss	

The SPEAKER. On this rollcall 368 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

PEACE CORPS ACT AMENDMENTS OF 1973

Mr. MORGAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 5293) authorizing continuing appropriations for the Peace Corps.

The SPEAKER. The question is on the motion offered by the gentleman from Pennsylvania (Mr. MORGAN).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 5293, with Mr. NATCHER in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Pennsylvania (Mr. MORGAN) will be recognized for 30 minutes, and the gentleman from California (Mr. MAILLIARD) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Pennsylvania.

Mr. MORGAN. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the bill H.R. 5293 is short and simple. It authorizes an appropriation of slightly over \$77 million for the Peace Corps for the fiscal year 1974—and \$80 million for the fiscal year 1975.

The proposed authorization for the coming year is \$11 million—or 12.5 percent—lower than what the Congress authorized for fiscal year 1973.

The fiscal 1975 authorization is \$8 million less than the current authorization.

The actual cutbacks in authorizations are even more severe than the figures I just quoted would indicate.

This is because of the 25 percent devaluation of the dollar during the past 17 months.

Nevertheless, the committee felt that

the sums recommended will be sufficient to carry out legitimate Peace Corps activities during the coming 2 years.

COMMITTEE ACTION

The committee was of one mind on this issue.

The bill was reported from the committee with strong bipartisan support, by a vote of 19 to 0.

Moreover, the committee made only one change in the executive branch request:

In place of an open-ended authorization for the fiscal year 1975, the committee recommended a fixed authorization of not to exceed \$80 million.

Over the years, the Committee on Foreign Affairs has done its best not to bring any open-ended authorizations to the floor of the House.

Our action on the Peace Corps request is consistent with that policy, and our desire to see close congressional supervision over all overseas undertakings.

LOWER PROFILE

Another thing which the committee favors, Mr. Chairman, is a lower profile for the Peace Corps.

This lower profile has been becoming a reality during the past several years.

In 1968, for example, the Peace Corps consisted of nearly 14,000 volunteers and trainees.

This year, it is down to about 7,000.

Looking at it from the financial standpoint, the Peace Corps budget request for 1968 amounted to nearly \$125 million.

The authorization proposed for fiscal year 1974 is almost \$50 million lower; it amounts to \$77 million.

EMPHASIS ON PROFESSIONAL SKILLS

The size of the Peace Corps, and its budget, are not the only things that are changing.

Under the "new directions" program introduced not too long ago, the Peace Corps is emphasizing professional skills in the recruitment and placement of its volunteers.

The Peace Corps is seeking men and women who can do jobs in agriculture, forestry, animal husbandry, building trades, and other fields—not only generalists and college graduates.

And the Peace Corps is beginning to attract some people with such professional skills.

By the end of 1972, over 300 Americans, age 50 or over, were serving with the Peace Corps overseas.

Also, more than 300 families—married couples with one or more children—were carrying out Peace Corps programs.

All of these people had more maturity, more experience, and more skill than the average Peace Corps volunteer of the 1960's.

This, in my opinion, is a good, healthy trend.

Our committee has encouraged the Peace Corps to continue: to forget about high numbers of volunteers and to concentrate instead on getting people with the right skills to do the jobs that need to be done.

There is much room for improvement in that area of Peace Corps activity. The committee investigations have pointed out some weaknesses in Peace Corps recruitment procedures. The officials of the agency are now aware of them, and hopefully, will try to correct them.

PEACE CORPS OVERVIEW

The lower profile and the new emphasis in professional skills have not changed the mission of the Peace Corps—or reduced its usefulness.

The Peace Corps remains a very important, and very American, instrument for sharing our know-how and helping others solve their own problems.

It personifies one of the finest, and most humane, undertakings in our national history.

At the present time, there are about 7,000 Peace Corps volunteers and trainees working on 955 projects in 58 countries.

Some of them are working in agriculture and rural development.

Others are in education and health.

Still others are working on urban problems, and helping their host countries learn about business procedures and public management.

All of them are living on the same level as their host-country counterparts, getting only \$75 a month for their support.

They do not live in fancy apartments—sporting expensive clothes and cars—or putting money in the bank.

They are out there in the field—or in a school—or in a village—because they honestly want to help somebody.

They are a credit to America's voluntary tradition.

Moreover, most of them—when they come home—apply what they have learned in their Peace Corps assignments to the solution of the problems of their own communities.

BUDGET BREAKDOWN

Mr. Chairman, I would now like to say a few words about the budget proposed in the bill before us.

About 40 percent of the Peace Corps budget—\$32 million in fiscal 1974—will be spent for program support.

A smaller part—about 38 percent or \$30 million—will go for the support of the volunteers in the field.

The remainder—about \$15 million—will be spent for training.

Within these broad categories, a couple of significant changes are taking place:

First, staff costs—in Washington and abroad—are going down by about \$1 million: from \$16 million in the current year to \$15 million in fiscal year 1974; and

Second, Peace Corps' share of ACTION administrative support costs will also decrease by about \$400,000: from \$13 million to \$12.6 million.

These changes represent some tightening of the program on the administrative side.

When you add them to the lower authorization levels, and the effects of the

25-percent devaluation of the dollar, they become significant.

CONCLUSION

Mr. Chairman, in conclusion—I believe that the bill before the House is sound and reasonable, and that it ought to be approved.

Admittedly, the Peace Corps has experienced some difficulties in placing more emphasis on volunteers with professional skills. But the agency is aware of its shortcomings and is trying to correct them. This warrants some patience on our side.

Moreover, the proposed authorization is within the President's budget request and represents a substantial decrease in comparison with authorization levels of recent years.

For these reasons, and because I believe in the program, I urge the approval of H.R. 5293.

Mr. MAILLIARD. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I support H.R. 5293, which would provide a 2-year authorization for the Peace Corps. This legislation authorizes an appropriation of \$77,001,000 for fiscal year 1974 and \$80 million for use in fiscal year 1975.

The distinguished chairman of the committee, the gentleman from Pennsylvania, has already reviewed in some detail the committee's action in bringing this legislation before the House.

However, I think it is appropriate to emphasize here today the extent to which the Peace Corps has become more responsible and mature in the way in which it conducts its operations.

The emphasis in today's Peace Corps is on quality—not quantity. In fiscal year 1974 the Peace Corps expects to have 7,265 volunteers and trainees—less than half the peak of 15,556 volunteers and trainees in fiscal year 1966.

Despite a steady increase in volunteer applications since a low period in 1969, the Peace Corps has limited its numbers. It has placed its emphasis on the selection of volunteers with the attitudes and skills needed to meet the requests of host countries.

As part of an effort to provide the most practical and effective training possible, more of the volunteers are being trained in the countries in which they will serve.

Host country requests have been increasing with particular emphasis on skills needed in agriculture, education, and health. A meaningful job awaits every volunteer in his host country.

Today's volunteer is more mature, more practical, and more job oriented. The average age is now 27, with 5 percent of the volunteers over 50 years of age. There are 300 families with dependent children.

The new directions of the Peace Corps have brought results. Countries are requesting more skilled volunteers than we can supply. The number of applications by prospective volunteers with maturity and skills is increasing.

I urge your support of H.R. 5293.

I feel that the program as a whole has been steadily improving in the last 5 or 6 years, and I think the House has every reason to support this program.

Mr. Chairman, I urge the support of this bill.

Mr. DERWINSKI. Mr. Chairman, will the gentleman yield?

Mr. MAILLIARD. I yield to the gentleman from Illinois.

Mr. DERWINSKI. Mr. Chairman, I rise in support of H.R. 5293. It is my strong feeling that the Peace Corps has come of age. I have been a close observer of this agency's progress since its inception 12 years ago and I am now convinced that it has become an integral part of the U.S. program to aid underdeveloped countries. Its purpose and quality have reached a new maturity while still maintaining its pride of service to peoples overseas.

The Peace Corps has shown remarkable flexibility and willingness to accommodate the countries it serves by updating its screening process and training program to better fulfill the needs and requirements of host countries. It now appears that volunteers are more carefully screened, have skills in areas which have been specifically requested by the host country, and are showing a marked maturity and responsiveness in working with the host country government and its peoples.

Job assignments are now geared to the priority needs of developing nations and the Peace Corps waits for the host country to request a program. Recruitment of volunteers focuses more on people with skills and they are largely being trained in the country in which they will serve. Operating in 58 countries, volunteers no longer go out to "do their own thing"—their job is defined even before recruitment begins.

Reflecting the greater maturity of the Corps, the average age of the volunteers now is 27 rather than the past average of 23; and one-fourth of the volunteers are married.

The "new direction" of the Peace Corps is now emphasizing quality rather than quantity and I should like to urge my colleagues to support the Peace Corps program.

Mr. MAILLIARD. Mr. Chairman, I yield 5 minutes to the gentleman from Ohio (Mr. WHALEN).

Mr. Chairman, many Americans are not aware of the great service the Peace Corps is rendering our own country. One, of course, may ask how can the Peace Corps render a service to the United States when all of its programs are based in foreign lands.

Peace, Mr. Chairman, is and should be one of the highest priorities in our time. As its name implies, this is one of the missions of the Peace Corps. To promote peace through better understanding is the great service the Peace Corps is rendering America. Through its work in the underdeveloped world, Peace Corps is generating goodwill for the United States. Everyday Peace Corps volunteers create hundreds of friends for the United States all over the world,

by presenting to the people they serve a view of America they have never seen: a view of America as a brother helping those less fortunate, a view of America as a land in which our youth are willing to live a part of their lives in a strange, rigorous environment so that the lives of others may be bettered. In the past we have encouraged the people of these countries to come to America to seek a better life. Now we are going to those people to help them attain a better life in their own countries, their own surroundings, their own cultures.

It has been said that one of the goals of the Peace Corps is to eventually work itself out of a job, and I hope to see the day when there is no need for us to be here debating a Peace Corps authorization bill. That will mean that the underdeveloped world has achieved a reasonable degree of self-sufficiency in these skills now being provided by Peace Corps volunteers. But until that day, Mr. Chairman, I pledge my strong support to this meritorious program. Because, as long as we receive a request for an authorization for the Peace Corps it means that there is hunger, disease, and illiteracy in our world. And, while it is not within our ability to cure all the evils of the world, I submit that it is within our province, it is our obligation, to try to lessen them.

Mr. Chairman, as proof of the goodwill it is generating, permit me to quote briefly from some letters received by the Peace Corps from high ranking functionaries of the countries they serve:

From the chairman of the Coordination Committee Operation Help in Afghanistan:

The Prime Minister has asked me to extend the deepest appreciation of the Royal Government to the Peace Corps . . . we wish to share this feeling with those members of the Corps who so selflessly participated in our program. They reflected great credit on the nation which they serve and on themselves.

From the village chief of Bargule, Ivory Coast:

The whole population is assembled to express their thanks and gratitude . . . to the whole American Peace Corps and to put our gratitude into tangible form, a monument will be erected to commemorate the Peace Corps of the U.S.A.

From the governor of Haipai, Tonga:

The Peace Corps Volunteers are so different from other *Palangis* (foreigners). They give up their good life back home and come here to live in huts, and teach in our poor schools.

Mr. Chairman, this is only a small sampling of the thousands of unsolicited testimonials given the Peace Corps during the last year. I believe they are proof of the goodwill generated by this organization.

Mr. Chairman, I urge approval of this legislation.

Mr. HAMILTON. Mr. Chairman, the Peace Corps is alive and well; and its good health is especially apparent in the Near East and South Asia area. Programs in Iran, India, Afghanistan and Nepal are being carried out by over 600 volunteers in a variety of technical

areas, and some of these programs are among the most successful in the Peace Corps.

In Iran, Peace Corps programs have, over the last decade, emphasized agriculture, secondary education, public works and urban planning projects; in India, Peace Corps programs are oriented toward rural community development, small business development and education.

Afghanistan and Nepal, two small states with giant neighbors, are determined to protect their independence. They are among the least developed countries in the world with less than one of every 10 citizens literate and a per capita annual income less than \$100. One hundred and sixty Peace Corps volunteers in Nepal concentrate on agricultural, rural development, forestry and educational projects; over 200 volunteers in Afghanistan stress a variety of educational, health and urban development projects along with activities similar to those in Nepal.

SOME PAST SUCCESSES

The Peace Corps is appreciated by the governments and the people of each of these countries. The demonstrated accomplishments of the volunteers include these examples:

First, in Iran nearly 500 English teacher volunteers have taught, since 1963, close to 200,000 Iranian students and almost 250 Iranian teachers who participated in in-service English language courses.

Since 1965, over 75 volunteers have labored on urban planning projects. The exemplary results include: 48 5-year city growth guide plans; 45 city parks; 34 urban design projects; 52 architectural projects; and 25 research projects. The American civil engineers, architects, planners, economists and sociologists involved in these projects represent the new breed of volunteer with technical expertise.

In Afghanistan, the Peace Corps program has not produced as much evidence of detailed plans and large-scale efforts but it can point with pride to several programs in the countryside and the cities where Peace Corps volunteers have helped in a variety of self-help vocational training and education programs and in health care efforts, all designed to help eradicate disease and famine and increase the supply of skilled manpower.

Operation Help, a dramatic international program, gave nearly 240,000 Afghans a renewed hope for survival in 1972. Droughts in 1970 and 1971 had spread famine and disease throughout many rural areas of the country and in 1972, the world community united to get donated food, clothing and health supplies to remote and isolated regions. The Agency for International Development played an impressive role in this operation and several Peace Corps volunteers remained on the scene in remote towns and villages to help make this program a success.

SOME FUTURE PROSPECTS

Past and present accomplishments in the Middle East and South Asia area

are an important reason for supporting the Peace Corps program. But it is equally significant that the Peace Corps will be expanding in 1973 into a new area—the Arabian Peninsula.

In 1972, the United States signed Peace Corps program agreements with the Yemen Arab Republic and Oman and it is possible that other states will follow. By the end of 1973, small programs involved in health, education, central economic planning and water supply will have begun with just under 50 volunteers. We should encourage this modest addition to the Peace Corps for it is bringing self-help programs to some of the most isolated and poorest people in the world in a region which may become vital to the United States.

Mr. Chairman, it is a long distance from Washington to Afghanistan, Nepal and the Yemen but it may be an even longer ride from the capitals of these countries to the towns and villages where Peace Corps volunteers usually work. These Americans are bringing to ordinary people the important message that America does care about helping others help themselves.

We are not sending volunteers where local talent can do the job. We are sending them where they are wanted and where the host countries are willing to help pay for American expertise and assistance. Because they are willing to pay to benefit their own people, we should be willing to help them.

I urge your support of the Peace Corps.

Mr. MONTGOMERY. Mr. Chairman, I am greatly concerned over the matter-of-fact manner in which we are considering this piece of legislation today to extend the Peace Corps for another 2 years. It appears there will be little or no debate on a bill which provides for an expenditure of \$77 million in fiscal year 1974 and \$80 million in fiscal year 1975. Even though \$157 million over a 2-year period may not seem like much money in view of the extremely large authorization bills to which we have become accustomed, I can assure you that it is indeed a large sum of money in view of the tight restrictions on the Federal budget.

In view of the pressing needs in our own Nation, I believe we need to question very seriously an expenditure of this size that will be spent overseas. Not only will this money be lost for domestic needs, but I fear that it will further contribute to the staggering deficit in our balance of payments.

Mr. Chairman, at the time the concept for the Peace Corps was envisioned it had the very noble purpose of trying to assist the so-called developing nations with their most basic problems in the field of education, health, agriculture, and public works. But this was 11 years ago and it appears that we are still there, so to speak, trying to do all the work ourselves.

I believe it is time we realize that we cannot continue to provide all the manpower needed for activities being conducted under the Peace Corps. It is time we changed our mode of operation and trained people in each country to do the work we are still attempting to do our-

selves. I certainly feel that in the long run this would prove to be much less expensive for the U.S. taxpayers.

The present concept of operation for the Peace Corps needs to be revamped and we need to begin looking to the day we can phase the program out and turn the full responsibility over to the individual nations. We need to teach people of other countries self-reliance and not total dependence on the United States. It escapes me completely how in a period of 11 years, we have been unable to impart our expertise to a core group of people in each nation who in turn could perform the same functions we are sending our own people to do year after year after year.

Mr. Chairman, if we are truly serious about holding the line on Federal spending then we should defeat this bill and give the Committee on Foreign Affairs an opportunity to draft another bill which would be more in line with our spending priorities. We have to make the resolve to start somewhere in establishing new and better priorities for the Federal budget. I can think of no better place to start than with the rejection of the excessive spending limits contained in the Peace Corps Act Amendments of 1973.

Mr. MORGAN. Mr. Chairman, I rise to pay tribute to the Chairman of the Committee of the Whole House, the distinguished gentleman from Kentucky (Mr. NATCHER).

Once again, he has presided over the deliberations of this body with fairness and consideration for the rights of all Members.

I do not know how many Members of the House are aware of this, but our esteemed colleague from Kentucky, Mr. NATCHER, has chaired the Committee of the Whole House on every occasion that the Peace Corps authorizations had been before the House, except one.

Because of this, he has been associated very closely with the legislative history of the Peace Corps.

I would like to add that that association has always reflected most favorably upon the gentleman from Kentucky. He is a scholar of the legislative procedure. He has been judicious and eminently fair in his rulings. And I personally appreciate the many courtesies that he has extended to our committee—on both sides of the aisle—when we have brought these bills before the House. *

Mr. Chairman, I have no further request for time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first phrase of section 3(b) of the Peace Corps Act (22 U.S.C. 2502(b)), ending with a colon, is amended to read as follows: "There are authorized to be appropriated to the President for the fiscal year 1974 not to exceed \$77,001,000 and for the fiscal year 1975 such sums as may be necessary to carry out the purposes of this Act."

COMMITTEE AMENDMENT

The CHAIRMAN. The Clerk will report the committee amendment.

The Clerk read as follows:

Committee amendment: On the first page, beginning in line 7, strike out "such sums as may be necessary" and insert in lieu thereof "not to exceed \$80,000,000."

SUBSTITUTE AMENDMENT FOR THE COMMITTEE AMENDMENT OFFERED BY MR. GROSS

Mr. GROSS. Mr. Chairman, I offer a substitute amendment for the committee amendment.

The Clerk read as follows:

Substitute amendment for the committee amendment offered by Mr. GROSS: On page 1, strike all of lines 7, 8 and 9 and insert the following: "\$80,000,000 to carry out the purposes of this Act."

Mr. GROSS. Mr. Chairman, my amendment would do two things: It would cut the \$77,001,000 down to \$60 million and hopefully launch Congress on the way to phasing out this international WPA, and it would limit the authorization to 1 year, rather than 2 years.

I cannot understand how Members of the House, in view of the financial crisis that confronts this country, can go on financing this boondoggle, at \$77,001,000 a year. And is it not interesting that it is 77 million, 1,000 dollars? And when I asked the Peace Corps representatives who come before the committee, why the \$1,000, they said, in effect, "Well, it just came out that way."

No, Mr. Chairman, I cannot understand how the House, in this time of financial trouble and with the cutbacks and cutoffs in spending on programs in this country can go on with this outfit at a cost of \$77 million next year and \$80 million in fiscal year 1975.

There is not a Member of this House who has any idea about what the financial situation of this country will be a year from now, or what it will be like by the end of this summer—whether there will be another devaluation of the dollar by the end of this summer. Moreover, this is one of several programs that ought not to be projected over a period of 2 years. What business have we committing the American people here and now to spending \$80 million on the Peace Corps for the 1975 fiscal year in view of what is going on financially in this country?

So, I have offered this amendment in good faith in an attempt to do something for the taxpayers of this country by cutting \$17 million out of next year's funding and all the \$80 million for 1975. I hope, as I have said before, that that will be the beginning of the end of this boondoggle.

The gentleman from Ohio (Mr. WHALEN), a few minutes ago, read some plaudits of the Peace Corps from some foreign government pooh-bahs. I have no doubt that they appreciate having the Peace Corps, because we are spending money in those countries. But it is my understanding the Peace Corps has been kicked out of 17 countries. I notice he did not say anything about that. I do not know whether they were kicked out of any foreign countries last year, but it is evident that not all is gold that glitters with this outfit.

I offer this amendment in the hope

that this can be the beginning of some financial sanity on the part of the Members of the House. I cannot think of anything that could be better dispensed with, in view of what is going on, than this entire program.

Mr. Chairman, more than \$1 billion has been spent on this international WPA since its inception and for what? Our problems around the world have increased, not diminished. Now it is proposed to borrow and spend another \$157 million in 2 years. To what end?

I urge the adoption of my amendment.

Mr. HUBER. Mr. Chairman, my distinguished colleague from Iowa has pointed out one potential avenue of cost cutting in his amendment to slice \$17 million from our total budget. This morning I have just attended a meeting in the Veterans' Affairs Committee at which time the Disabled American Veterans presented their testimony concerning the very sad and very serious situation all disabled veterans face. The pittance that is referred to as pension funds falls miserably to maintain minimum standards for those who have sacrificed a normal and healthy, and full life for our country. Nowhere do I see this plight of our honored disabled veterans being given the priority of treatment that is so justly deserved. The high priority goes overseas to, as my distinguished colleague so aptly phrased it, an international WPA. I think we would be doing a far greater justice to our taxpayers as well as our disabled American veterans if we would slash this \$17 million from our Peace Corps and place it in the hands of our disabled veterans. For that reason, I totally endorse the gentleman from Iowa's economy move.

Mr. MORGAN. Mr. Chairman, I rise in opposition to the amendment. Before I deal with the substance of the gentleman's amendment, I wish to assure him that the Peace Corps was not asked to leave any country in the last fiscal year. The Peace Corps withdrew from Uganda because of a border clash between Tanganyika and Uganda. A Peace Corps volunteer was killed there, so we immediately withdrew the Peace Corps from Uganda. But no country asked the Peace Corps to leave during the last fiscal year.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Iowa.

Mr. GROSS. How many countries have the Peace Corps been kicked out of?

Mr. MORGAN. They have been removed from about 15 countries. Some countries invited them back. Several countries removed the Peace Corps and then invited them back.

The gentleman from Iowa is a member—and a very valuable member—of the Foreign Affairs Committee. He has an outstanding reputation as a great economist. He has been opposed to proposals to spend dollars overseas for a good many years. I realized that this amendment would come from him.

I would like to point out, however, that the 2-year authorization request was

made by the administration. The Committee on Foreign Affairs did not manufacture it; it came from downtown.

As a distinguished member of the Committee on Rules pointed out here when the rule was being debated, our committee knocked out the open-end authorization requested by the administration for the second year. This was done through an amendment offered by the distinguished Member of Congress from the great State of Alabama (Mr. BUCHANAN). His amendment closed the open end and provided for a 2-year authorization with an \$80 million ceiling in fiscal 1975.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. MORGAN. I yield to the gentleman from Iowa.

Mr. GROSS. I thank my chairman for yielding. The amendment to provide \$80 million for fiscal year 1975, which is an increase over fiscal year 1974, was adopted by the committee in a matter of 5 minutes; was it not? And the Peace Corps never testified in behalf of the \$80 million.

Mr. MORGAN. The Acting Director of the Peace Corps testified in support of the open-ended authorization for fiscal 1975. That could have gone as high as \$100 million. The committee would not buy it. In its wisdom, the committee decided, however, that they would give the Peace Corps some flexibility and give them \$77 million in fiscal 1974 and \$80 million the following year.

Mr. GROSS. But, of course, the committee knew that the House would not adopt an open-end authorization. So the committee threw in \$80 million which is not a decrease, but an increase. How in all conscience can this be approved?

Mr. MORGAN. As the gentleman knows, I have always opposed open-end authorizations, and I opposed this one in the committee during the markup.

At the same time, our committee has watched the Peace Corps since 1961. The Peace Corps reached a peak in 1968 when they had 14,000 trainees and volunteers, and the program was costing about \$124 million. In more recent years, the Committee on Foreign Affairs has worked with the Peace Corps to move it in a new direction, to reduce the number of volunteers and to improve the quality of its performance. They have done a good job moving in those directions. There are only 7,000 volunteers this year. The budget has come down from \$124 million to where we are now asked to approve \$77 million. And the quality has gone up considerably.

The main reason the Peace Corps is asking for a 2-year authorization is because we, among others, have criticized them for their shortcomings in recruitment and training. To get the right kind of volunteers and to get them ready within 1 year's authorization, is difficult. We realize this. And for this reason, we propose to give them a 2-year authorization so that they will have the opportunity to select better qualified volunteers, and to improve the performance of the Peace Corps.

So I hope that the amendment offered by the gentleman from Iowa will not be

adopted. The Peace Corps has been a good program. It has been received very well overseas in most of the countries. To give the Peace Corps a chance to move in the new direction and to enable it to attract volunteers with the right kind of skills, we should give it a 2-year authorization and the funding provided for in the committee bill.

The CHAIRMAN. The question is on the substitute amendment offered by the gentleman from Iowa (Mr. GROSS) for the committee amendment.

The question was taken; and on a division (demanded by Mr. GROSS) there were—ayes 24, noes 28.

Mr. GROSS. Mr. Chairman, I demand tellers.

Tellers were refused.

So the amendment was rejected.

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. NATCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 5293) authorizing continuing appropriations for the Peace Corps, pursuant to House Resolution 328, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

NOTION TO RECOMMIT OFFERED BY MR. GROSS

Mr. GROSS. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. GROSS. Unalterably and unequivocally, Mr. Speaker.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. Gross moves to recommit the Bill H.R. 5293 to the Committee on Foreign Affairs with instructions to report the bill back to the House forthwith, with the following amendment: On page 1, strike all of lines 7, 8 and 9 and insert the following: "\$60,000,000 to carry out the purposes of this Act."

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. GROSS. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 132, nays 238, not voting 63, as follows:

 Mr. Gaydos with Mr. Reuss.
 Mr. Rogers with Mr. Ullman.
 Mr. Symington with Mr. Udall.

The result of the vote was announced as above recorded.

The title was amended so as to read: "A bill authorizing additional appropriations for the Peace Corps."

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MORGAN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed (H.R. 5293).

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. GERALD R. FORD asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. GERALD R. FORD. Mr. Speaker, I take this time for the purpose of asking the distinguished majority leader the program for the remainder of this week, if any, and the schedule for next week.

Mr. O'NEILL. Mr. Speaker, will the gentleman yield?

Mr. GERALD R. FORD. I yield to the gentleman from Massachusetts.

Mr. O'NEILL. Mr. Speaker, I am happy to respond to the distinguished minority leader.

The program for the House of Representatives for the week of April 2d is as follows:

On Monday, Consent Calendar, no business.

Suspensions. H.R. 3153, technical and conforming changes in Social Security Act; House Resolution 330, Law of the Sea Conference.

On Tuesday, Private Calendar, there is no business. There will be no suspensions for Tuesday.

On Tuesday, before the hour of 2:30, we anticipate that the vocational rehabilitation veto will have arrived on the floor subject, of course, to the action of the other body.

On Wednesday and the balance of the week, there is H.R. 5683, insured loan program for REA, subject to a rule being granted. There is H.R. 3180, franking privilege for Members of Congress, subject to a rule being granted; House Joint Resolution 205, Atlantic Union delegation, subject to a rule being granted.

Conference reports may be brought up at any time. Any further program will be announced later.

Mr. GERALD R. FORD. Mr. Speaker, would the gentleman yield for an amplification of his comment on the Tuesday program?

Mr. O'NEILL. I yield to the distinguished minority leader.

Mr. GERALD R. FORD. Am I correct that the other body is going to vote at 2 o'clock on Tuesday on the veto on S. 7, and, that as soon as that is considered over there, and on the assumption that it will not sustain, it will be sent over here and we will vote right after that?

Mr. O'NEILL. The gentleman from Michigan is correct.

Mr. GERALD R. FORD. I thank the gentleman.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. GERALD R. FORD. I yield to the gentleman from Iowa.

Mr. GROSS. What will be the situation on Tuesday if this one vote is not scheduled? Will there be any business at all on Tuesday?

Mr. O'NEILL. I would have to say that there is no business scheduled other than the vote on the vetoed bill.

Mr. GERALD R. FORD. Would the gentleman clarify this? If we have to wait for the other body to send the veto message over, will we recess in the interim?

Mr. O'NEILL. Well, we could make a motion to recess, or we could take the special orders that would normally be asked for to use the time.

We have been notified by the other body that they anticipate that the vote will be at 2 o'clock and that the other body would send it forthwith.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. GERALD R. FORD. I yield to the gentleman from Iowa.

Mr. GROSS. If there were four special orders on Tuesday, in order to occupy the time, would we be able to hear the gentleman from Massachusetts discourse further on the high cost of food?

Mr. O'NEILL. I would be happy to associate with the gentleman from Iowa. I am sure he appreciates the problem of the farmers out there and how they are sweating it out.

Mr. GROSS. I sure do.

Mr. O'NEILL. And the Russian wheat deal. I know the gentleman from Iowa is in sympathetic feeling with the farmer because of the high price of grain and things like that. I appreciate his sympathetic attitude.

ADJOURNMENT OVER TO MONDAY, APRIL 2, 1973

Mr. O'NEILL. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. O'NEILL. Mr. Speaker, I ask unanimous consent to dispense with business

in order under the Calendar Wednesday Rule on Wednesday next.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

PREDATOR CONTROL

(Mr. RONCALIO of Wyoming asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. RONCALIO of Wyoming. Mr. Speaker, on March 19 the National Audubon Society presented testimony before a subcommittee of the House Merchant Marine and Fisheries Committee on predator control bills. With their testimony they filed for the hearing record a supplementary statement on payments made under the National Wool Act and on alleged "low" grazing fees paid by livestock producers.

Their statement, in my opinion, was misleading. Since one of my colleagues published their statement in the CONGRESSIONAL RECORD, I felt it proper to publish the rebuttal statement submitted for the hearing record by the National Wool Growers Association which follows:

STATEMENT OF THE NATIONAL WOOL GROWERS ASSOCIATION

This statement is submitted in rebuttal to a statement filed for the hearing record by a witness for the National Audubon Society. While not related to the subject of the hearings, predator control, the witness named several sheep producers in Wyoming and Colorado and listed payments she claimed they receive in 1971 under the provisions of the National Wool Act.

For example, the witness alleged that Vern Vivion, immediate past president of the National Wool Growers Association "received a fat government check in 1971." Vern Vivion did not receive a fat government check in 1971. The facts are that Vern Vivion and his family are one of three families that are a part of the Leo Sheep Company of Rawlins, Wyoming. The corporation and not Vern Vivion individually did receive a larger-than-usual payment in 1972 and no payment was received in 1971. This is what actually happened:

In 1970 and 1971 wool prices in this country were extremely depressed, as they were all over the world. When wool prices reached these very low levels in 1970, the Leo Sheep Company, like many other sheep ranches held their 1970 wool clip over into 1971 in the hope for a higher market price which would mean a lower Government payment. When 1971 did not bring higher prices, but instead the lowest prices in 33 years, the Leo Sheep Company, like many other sheep ranches, was forced to sell two years' production of wool at the depressed prices.

What the witness failed to state is that the check she is referring to covered payments on two years' wool production. This is also true for some others she names. She also failed to state that due to the much better wool market this year, there is an extremely good possibility that there will be no Government payments on the 1973 wool clip.

Furthermore, the Leo Sheep Company is a highly respected pioneer sheep ranching operation in an area near Rawlins, Wyoming. It has been a family operation for several generations and, in fact, provides a livelihood for three separate families; namely, Charles Vivion, his two sons and their families. Since it is in a semi-arid region where crop production is not possible, it is necessary that

it be a large operation to form an economic unit. Bigness does not denote badness.

While the witness emphasized low market prices for wool in 1971 and consequent higher payments under the National Wool Act, she neglected to state that in all of the other years since the inception of the Wool Act, market prices were higher and payments were lower. In some years market prices were much higher and consequently payments were much lower. If the witness wants to be fair she should list the payments of these same growers for all other years in which they participated in the Government program and not just the year of highest payments when there was a worldwide depression in wool prices. Why did she fail to list the low payments for 1957, 1962, 1963, 1964, 1965 and 1966, for example?

The witness is really attacking the legislative wisdom of Congress when it enacted the wool program to provide for situations of this type and to assure that we have a viable domestic wool industry in this country.

The lack of knowledge of the witness on how the National Wool Act operates is shown by her statement concerning "the peculiar way in which wool incentive payments are calculated." She infers that the large growers receive more per pound than the small growers. This is not true. Instead of calculating the cents per pound difference between the incentive price level under the Wool Act and the market price, the difference is calculated on a percentage basis. This one percentage rate (the percentage required to bring the national average price for wool sold in the free market up to the incentive level) is applied to the net sales proceeds received by each grower to determine the amount of his incentive payment. By making payments on a percentage basis, growers are encouraged to improve the quality and marketing of their wool to obtain the best price possible, because the higher the price the individual grower gets in the free market, the greater his payment.

The quality of a man's wool clip rather than the size of his operation determines the incentive price per pound he receives under the Wool Act. If a small grower prepares a better clip of wool, and receives a better price for it on the open market, the return will be more per pound than that of a large grower who prepares a clip of lesser quality. To associate the payment per pound with the size of the grower's operations which the National Audubon Society witness has done, is misleading and utterly ridiculous.

As for "low grazing fees" just what does the witness mean by such a statement? Grazing fees in many instances are probably high for the type of desert and semi-arid grazing land that is involved. Much of it requires 100 acres to graze one cow or five sheep. Much of this land would be useless and would lie idle if it were not for sheep and cattle to convert the sparse grass into meat and wool to feed and clothe the people of this country. The witness fails to give any credit to the livestock industry for developing the economy of these semi-arid and desert regions, providing taxes for roads, schools and other necessities to many Western communities and making it possible for these communities to exist.

The economic theory of the witness with regard to "savings" to graziers on public lands

is apparently based on a comparison of grazing fees on private leased lands with those on Federal lands. The witness fails to state that in many cases private lands are superior pasture lands capable of grazing more animals on a smaller acreage and, consequently, command a higher lease fee.

Furthermore, on private lands the grazier has tenure and the owner of the private land gives the grazier the right to manage the land he is leasing. A great deal of the acreage of Federal lands is land that was not valuable enough to be taken up by homesteaders. Much of it is land on which the Federal Government would realize no return whatsoever if it were not for livestock to graze it for a part of the year.

The witness says that one-third of the grazing fee is used for range improvements "which benefit the grazier such as fence building." She does not state that over one-half of the fencing on Federal lands was paid for by the graziers themselves and she fails to mention that range improvement fees also go for re-seeding, erosion control and other good husbandry practices which have made much of the grazing land better and more productive than when it was first grazed. A good portion of range improvement fees are used for the development of water sources and other improvements beneficial to wildlife as well as domestic livestock.

Her statements on grazing fees demonstrate a misunderstanding of the theory and application of the 1966 Western Range Livestock Survey. For example, she makes the statement:

"The livestock interests did not succeed in having the interest cost considered as an operating cost when the fee was set, but other costs including moving animals, lost animals, herding, salting and feeding were deducted before the fee was set."

The costs referred to were not used for the purpose of deductions at any time. Fees and other cost items are common to operating on both private and public lands and when computed and compared, conclusively demonstrated that the cost of grazing on public lands was higher than the cost of grazing on private lands.

The witness also latched on to these hearings as one more opportunity to recite the death in Wyoming of some eagles in 1971. She is apparently going on the theory of "guilt by association." Because several ranchers were accused of violating the law she is apparently intimating that the other 175,000 respected citizens of this country who happen to be sheep farmers and ranchers are also guilty of wrong-doing. The National Wool Growers Association does not condone any violations of the law; neither do we believe that law-abiding citizens should have any stigma of guilt attached to them because they happen to be sheep farmers and ranchers.

I would like to get this clarification on the hearing record and to state further that the type of testimony offered by the Audubon Society, in my opinion, does nothing to assist the Subcommittee in its earnest deliberations to solve the predator problem—a problem which affects not only the sheep producers which the National Audubon Society is attacking, but cattlemen, turkey producers, other farmers and also meat processors who are trying to supply American consumers with an abundant quantity of meat at the

lowest possible prices. Really the fundamental issue here does not involve the National Wool Act or grazing fees, but rather the right of farmers and ranchers producing calves, lambs, turkeys and other defenseless living things to protect their property through adequate measures to control depredating animals.

FARM SUBSIDIES

(Mr. CONTE asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. CONTE. Mr. Speaker, I expect momentarily the annual honor roll of the Department of Agriculture: The list of those farms that received subsidy payments of \$20,000 or more under the Federal Government's cotton, feed grains, and wheat programs for 1972.

A record number of 12,309 farms received subsidy payments of \$20,000 or more last year for withholding production of these crops. This select group received a total of \$411.8 million, which is more than 10 percent of all Federal farm subsidies paid in 1972.

Total farm subsidies last year were \$4 billion, spread among 2.4 million farmers.

Contrary to my previous practice, I will not insert this list in the Record. It would fill about 90 pages, and the cost to the Public Printer would exceed \$15,000.

As much as I would like to make this list a permanent part of the Record, my conscience restrains me from spending such an exorbitant sum of the taxpayers' money.

However, I shall make this list available in my office.

In this time of high food prices, meat boycotts, and feed grain shortages, the magnitude of the Federal Government's generosity to the big, rich farmers is clearly outrageous. It is time to phase out these welfare-for-the-rich programs, starting right now.

I fully support the administration's plan to terminate these giveaway programs and unleash the farmers' full productive capacity. I have been advocating this for years.

The American taxpayer is tired of forking over an added \$4 billion to Uncle Sam every year. The consumer has been knifed too long by artificially high food prices. And the farmer is ready to be weaned from Federal spoon feeding.

Mr. Speaker, I respectfully request permission to revise and extend my remarks.

The number of farms that have received subsidy payments exceeding \$20,000 has tripled since 1967. The following table demonstrates this remarkable growth:

TABLE 1.—PRODUCERS RECEIVING GOVERNMENT PAYMENTS OF \$20,000 OR MORE AND DOLLAR AMOUNTS RECEIVED, 1967-72

	1967	1968	1969	1970	1971	1972
Number of producers:						
Cotton.....	3,494	5,249	6,194	7,753	8,810	9,066
Feed grain.....	80	877	1,482	1,395	245	1,855
Wheat.....	542	741	1,123	1,223	1,088	1,388
Total producers.....	4,116	6,867	8,799	10,371	10,143	12,309
Total payments received (million dollars).....	(1)	\$266.6	\$344.9	\$408.9	\$350.1	\$411.8

¹ Not available.

Three programs account for almost 90 percent of all farm payments made by the Department of Agriculture in 1972. These programs are the feed grain set-aside program, \$1,845,383,693; the wheat set-aside program, \$855,844,734; and the cotton set-aside program, \$808,039,560.

The Department of Agriculture has provided figures showing a State-by-State breakdown of these programs:

TABLE 2.—PAYMENTS TO PRODUCERS BY STATES AND PROGRAMS DURING 1972

[Amounts in dollars]

State	Cotton set-aside program	Feed grain set-aside program	Wheat set-aside program
Alabama	45,663,377	14,401,968	382,935
Alaska			
Arizona	37,266,251	4,342,750	833,049
Arkansas	73,539,705	2,252,133	1,127,862
California	76,748,787	11,801,900	4,862,028
Colorado		23,644,209	29,895,587
Connecticut		113,599	542
Delaware		1,394,688	316,198
Florida	1,048,618	6,626,951	117,543
Georgia	35,228,488	34,483,359	1,299,148
Hawaii			
Idaho		4,798,475	30,757,034
Illinois	112,086	211,250,592	23,964,491
Indiana		109,108,214	17,255,469
Iowa		304,947,571	1,173,259
Kansas	249	98,479,508	137,240,367
Kentucky	384,197	26,213,436	2,212,834
Louisiana	35,832,280	2,138,211	262,234
Maine		68,256	2,651
Maryland		6,524,139	1,748,636
Massachusetts		26,665	91
Michigan		34,496,082	16,009,705
Minnesota		147,890,208	17,762,451
Mississippi	108,985,481	9,207,249	593,491
Missouri	20,800,087	98,121,343	20,238,963
Montana		16,539,714	73,215,780
Nebraska		166,119,365	54,003,504
Nevada	245,137	70,759	424,097
New Hampshire		26,289	
New Jersey		2,233,478	634,663
New Mexico	11,608,951	13,037,539	7,921,749
New York		8,997,813	4,911,110
North Carolina	14,636,933	30,520,335	4,801,980
North Dakota		53,587,067	141,243,764
Ohio		58,597,268	19,731,214
Oklahoma	20,936,518	19,259,312	70,637,073
Oregon		3,398,707	13,880,405
Pennsylvania		11,680,650	4,720,855
Rhode Island		1,517	
South Carolina	29,641,579	12,534,656	2,125,605
South Dakota		57,713,566	40,719,532
Tennessee	31,246,287	18,365,954	1,541,565
Texas	263,805,941	153,621,378	54,157,238
Utah		1,197,602	3,964,560
Vermont		101,054	738
Virginia	308,608	9,884,587	3,176,372
Washington		5,823,497	41,542,398
West Virginia		662,104	169,353
Wisconsin		47,703,703	575,325
Wyoming		1,354,273	3,689,286
Total	808,039,560	1,845,383,693	855,844,734

Other subsidy programs and payments made in 1972 were:

Extra long staple cotton	\$4,601,882
Sugar Act	85,133,583
National Wool Act	113,139,476
Milk indemnity	34,127
Beekeepers indemnity	6,125,490
Cropland conversion	107,702
Conservation reserve	4,966
Appalachian region conservation	
Cropland adjustment	1,084,137
Rural environmental assistance	51,509,259
Emergency conservation	\$181,931,135
Office of emergency preparedness	4,539,985
Hay transportation assistance	125,200
Wild hemp elimination	2,958
Water bank	2,916
	272,104

The grand total for all Federal agricultural payments in 1972 is \$3,957,882,907.

SELECTIVE SERVICE SYSTEM

(Mr. WHALEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WHALEN. Mr. Speaker, in 1967 four of my House colleagues and I published the results of our detailed examination of the Nation's Selective Service System. In our book, "How To End the Draft: The Case for an All Volunteer Army," Congressmen FRANK J. HORTON, RICHARD S. SCHWEIKER—now U.S. Senator—GARNER E. SHRIVER, ROBERT T. STAFFORD—now U.S. Senator—and I observed that—

The draft, however necessary, is inherently incompatible with the basic principles of democracy.

My cosponsors and I concluded that the draft should be replaced by an all-volunteer Armed Forces which could be realized "within 2 to 5 years, if preliminary steps are taken now—1967—in pursuit of that objective." Our research indicated further that such an all-volunteer force "would not necessarily be over-representative of the socially or economically deprived segments of the U.S. population, but neither is it inappropriate for the services to offer an opportunity to the deprived to better their economic conditions."

It was with considerable pleasure, therefore, that I read Defense Secretary Elliot Richardson's March 21 statement indicating that—

It will not be necessary to extend the draft induction authority beyond its expiration date of July 1.

Thus, the all-volunteer military concept, for which my four fellow Representatives and I pleaded 6 years ago, has become a reality. True, the conditions contributing to the present zero draft call are dissimilar to those assumptions upon which my colleagues and I postulated our conclusions. Today, termination of hostilities in Vietnam has permitted a reduction in active duty troop strength from 3,367,000—as of January 1, 1967—to 2,309,967. In 1967, however, Messrs. HORTON, SCHWEIKER, SHRIVER, STAFFORD, and I reasoned that a higher force level—over 3,000,000—could be maintained on a volunteer basis even "in times of limited war"—such as then existed.

The administration is to be congratulated upon the attainment of President Nixon's goal of an all-volunteer Armed Force to which so many of us in Congress have subscribed. It is clear that the Nation derives at least three major benefits from the accomplishment of this objective.

First, by ending military conscription our Government reaffirms the premise of individual liberty—freedom of choice—the cornerstone upon which our democratic society rests.

Second, terminating Presidential induction authority should remove the temptation to become involved in potentially expansive "brush-fire" wars or so-called peace-keeping operations. It can be argued that Presidents Kennedy and Johnson might not have accelerated our

Vietnam commitment had they been required to go to the Congress for reinstitution of draft induction authority.

Third, allowing section 17(c) to lapse should help resolve the "war-powers" question. If, in the future, a President perceives a threat to our national security which requires a rapid troop build-up, the draft machinery would become operative only through an act of Congress. This would represent a shared responsibility between the legislative and executive branches for any subsequent military developments.

It is the hope of every American citizen that, having embarked upon a generation of peace, this eventuality never will materialize.

TAILLIGHT REGULATIONS

(Mr. MYERS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. MYERS. Mr. Speaker, I am today introducing legislation requiring new automobile taillighting regulations designed to prevent rear-end related collisions which in 1971 resulted in at least 2,500 deaths and about 8 million accidents.

The legislation to amend the National Traffic and Motor Vehicle Safety Act is cosponsored by Mr. BROWN of California, Mr. DEVINE, Mr. GIBBONS, Mrs. HANSEN of Washington, Mr. WON PAT, and Mr. YATRON.

It would require a separate green taillight to signal when the automobile is accelerating; an amber light to indicate when the car is coasting, and a red light to warn that the vehicle is being braked. The early warning system would be mandatory on all vehicles built after August 15, 1973.

Since passage of the National Highway Safety Act, a number of significant steps have been taken to reduce the traffic toll which includes an estimated 56,300 deaths and 16.4 million accidents in 1972. The National Highway Traffic Safety Administration has inspired many of the improvements in automobile construction and traffic regulations. However, the problem of rear-end collision related accidents is an area that deserves immediate attention.

The National Highway Traffic Safety Administration has stated that nearly 50 percent of all accidents and 10 percent of all traffic fatalities are rear-end collision related.

The cost of rear-end collisions is estimated by the Library of Congress as in excess of \$2 billion property damages, over a quarter of a million disabled injuries, and 26 million man-hours of production labor, annually.

However safety authorities are generally agreed that our means of signalling between drivers on increasingly crowded streets and highways, are seriously inadequate. Traffic conditions have made it virtually impossible for drivers to perform safely and successfully.

By way of illustration, Dr. John Crosley, University of Indiana, proved 10 years ago that, considering such factors

as travel rate and traffic density, it is mathematically impossible to avoid rear-end collisions in emergency conditions at peak traffic volume, given conventional automotive safety equipment—ordinary brake lights. Crosley's research indicated even then that conditions were steadily worsening. If today's rear-end fatality rate continues, the rear-end fatality toll will increase to approximately 7,500 annually by the end of this decade, given present rates of travel, traffic density, and our limited human response capabilities. Crosley said the solution to the problem is to put green, amber and red early warning signal lights on the rear of all motor vehicles.

The technology is available and economical. In the past 50 years hundreds of patents dealing with taillighting improvements have been issued, including many of the type that Crosley recommended. Nearly all are gathering dust in the patent files—because the auto industry has not responded to the challenge—and the DOT has not paid sufficient attention to the immediate needs of the motoring public.

The plea is heard that the resources of both industry and the DOT are insufficient to handle both accident severity reduction projects and accident prevention projects simultaneously.

I will go on record with the observation that a considerable contribution to accident prevention can be made immediately with no strain on any sector. And that is by installation of color-coded early warning signals on the rear of newly manufactured vehicles—and by encouraging such installations in service.

DOT is well aware of the demonstrated advantages of color-coded accelerator pedal early warning lights but has shown singular neglect in putting its knowledge into effect despite the growing rear-end collision problem.

We have seen postponement after postponement at DOT of moves to put early warning standards into effect.

Present indications are that DOT may issue a notice of proposed rulemaking for a permissive standard on early warning sometime soon. Meantime, the daily toll continues.

I am satisfied that the merits of color coding of taillights have been sufficiently established at this point in time.

I am satisfied that a green, amber and red taillight system showing accelerator pedal position as well as brake pedal position will improve driver communication and reduce frequency of traffic accidents and that this has been sufficiently demonstrated. I, therefore, propose that the NHTSA be directed by act of this Congress to stipulate specifications for such a system leading to mandatory adoption of all U.S. motor vehicles without further delay.

I have prepared a bill which would enable the above by its adoption. This bill specifies that color-coded pedal position indicator benefits be made mandatory in the motor vehicle field no later than August of 1973. It will positively assure that we move ahead in this area with as much energy and determination as we have, for example, in the more publicized

areas of air pollution and passenger restraint. The time has come to quit talking about the problem. Therefore, the following legislation is proposed to assure that the appropriate action is taken decisively and immediately:

H.R. 6349

A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 to require the establishment of standards related to rear mounted lighting systems

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 103 of the National Traffic and Motor Vehicle Safety Act of 1966 (15 U.S.C. 1392) is amended by adding at the end thereof the following: "(1) the Secretary shall, as soon as practicable after the date of enactment of this section, prescribe such standards under this section as may be necessary to insure that motor vehicles be equipped with rear mounted lighting systems as follows: (1) with a constant green light when the motor vehicle is moving forward under power from its engine, (2) with a constant amber light when the motor vehicle is moving forward or standing and idling, but not under power from its engine, (3) with a conventional red brake light when the motor vehicle is being braked through the use of its braking system, and such other information with respect to such motor vehicles as the Secretary deems necessary."

(b) The amendment made by this subsection shall take effect no later than August 15, 1973.

I urge this Congress to take this important vehicle safety aspect under immediate consideration and support its passage without delay. Let us give our motor vehicle safety program the green light and get on with the job of saving more lives.

EXECUTIVE IMPOUNDMENT OF APPROPRIATIONS

(Mr. PICKLE asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. PICKLE. Mr. Speaker, today I testified before the Rules Committee on a bill that I introduced early this session on the question of executive impoundment of appropriations.

Before the committee, I offered a compromise version of my original legislation and I am introducing this revised proposal today.

I insert my remarks before the Rules Committee which detail my original proposal and the proposal that I now offer in the RECORD at this point:

TESTIMONY OF U.S. REPRESENTATIVE J. J. PICKLE

Mr. Chairman, and my distinguished colleagues, I am pleased to have this opportunity to discuss with you today the courses available to us in dealing with the problem of Executive impoundment of lawfully appropriated funds.

The first point I want to make is that Presidential power to impound, or not spend, lawfully appropriated funds is neither clear-cut nor inherent.

It exists in the final analysis only at the will and wish of this United States Congress. It is in our power today, as always, to define the limits of lawful impoundments—or even to state when or whether they are legal at all.

The President and his officers at the Office of Management and Budget have claimed that the Presidential authority to impound funds is derived basically from Article II,

Section I of the Constitution, that it is inherent, and that it is complete.

But they also hasten to add a host of other justifications for their impoundments—an action which in itself indicates they themselves are still searching for a bedrock authority to do what they want. Impoundment has been recently justified on the grounds that appropriations are not mandatory, that there was a need to manage expenditures so as not to exceed the debt ceiling, that spending of money which might result in increased prices or taxes would violate the Employment Act of 1946 which makes it federal policy "to promote maximum employment, protection, and purchasing power."

Claims such as these flounder because of the possibility of satisfying them through other means or of the distinct Presidential possibility of putting the bug on the Congress to resolve these difficulties itself.

Just because the Executive has found impoundment useful—and sometimes even essential—as a tool to achieve its objectives does not mean that impoundment is a legal tool as it is used today.

Moreover, the "inherency" of any power that requires more than 170 years to become apparent is to me dubious. The assertion that the President may not spend lawfully appropriated funds involves the tenuous propositions that the President can break the laws that he is to faithfully execute—for appropriations are laws.

The best case the Executive has for impoundment is simply precedent. Since the Constitution is a living document, this is not a negligible or unimportant basis to stand on.

But the precedents for impoundment are being misread and misconstrued today because what those precedents are is not clearly understood.

Even Associate Justice William H. Rehnquist, who, I would assume, well understands these precedents, wrote of impoundment as an assistant Attorney General in 1969:

"With respect to the suggestion that the President has a constitutional power to decline to spend appropriated funds, we must conclude that the existence of such a broad power is supported by neither reason nor precedent."

I think it would be extremely helpful to this Committee to review a bit of the history of impoundment over the past two centuries in this country.

I would like to ask unanimous consent to insert into the hearing records the testimony of Professor Joseph Cooper, Department of Political Science of Rice University, Houston, Texas, before the Senate Subcommittee on Separation of Powers, March, 1971, as it gives an excellent and detailed history of impoundment.

And I would also like here briefly to summarize that history myself.

The first period we can look at would be the time prior to 1921 and the creation of the Bureau of the Budget. In this time only one impoundment case stands out—and it stands out because it is being so frequently quoted as a precedent for the Administration's current actions. That case is the deferring of funds by President Jefferson in 1803 to build 15 gunboats for service on the Mississippi River. I use the word deferral—not impoundment—very purposefully, for that is precisely what Jefferson did.

In a message to Congress, Jefferson reported that he had not spent the money for the gunboats because the Louisiana Purchase had ended any immediate need for them.

But as pointed out in a recent letter to the *Washington Post*, he did not tuck the money away forever. He did not "claim a right to impose his own policy judgments on the execution of law, to kill or trim programs in accord with his own policy desires."

Instead, since the immediate need was re-

moved, he waited to spend the money until he was sure the new gunboats would be the best possible. And he did spend the money within a relatively short period, according to the best historical analysis available.

In 1905 and 1906, in an effort to foster more efficiency in government spending, Congress passed the Anti-Deficiency Acts. These Acts sought to prevent, and I quote, "undue expenditures in one portion of the year that may require deficiency or additional appropriations to complete the service of the fiscal year." These acts further provided that apportionments could be waived or modified in the event of "some extraordinary emergency or unusual circumstances which could not be anticipated at the time of making such apportionment."

It said nothing about waiving appropriations for policy reasons or because of differences of opinion between the Legislative and Executive branches at the time of appropriation.

In 1921 the creation of the Bureau of the Budget brought a new step in the impoundment history. The first Director, Charles Dawes, firmly believed that the new agency's purpose was to bring efficient business management to bear on federal spending.

Accordingly, he formulated the now oft-cited formula that appropriations are not mandatory. But Dawes did not use this formula as it is used today. Dawes meant that an agency did not have to spend the full amount of an appropriation—if it could accomplish the same program objectives while spending less.

I think a quote from Mr. Dawes' book, *The First Year of the Budget of the United States*, makes clear what Mr. Dawes really had in mind:

"I want to say here again that the Budget bureau keeps humble, and if it ever becomes obsessed with the idea that it has any work except to save money and improve efficiency in routine business it will cease to be useful in the hands of the President. Again I say, we have nothing to do with policy. When as we love the President, if Congress, in its omnipotence over appropriations and in accordance with its authority over policy, passed a law that garbage should be put on the White House steps, it would be our regrettable duty, as a bureau, in an impartial, nonpolitical, and non-partisan way, to advise the Executive and Congress as to how the largest amount of garbage could be spread in the most expeditious and economical manner."

Some wags even today seem to think that this bickering between the Executive and the Congress is a lot of political garbage, but believe you me it isn't.

In the 1930's, this notion that appropriations are not mandatory or that money might be withheld to effect "savings" was broadened by President Hoover under the pressures of the Depression to withhold funds to effect savings by controlling the tempo or rate of program implementation.

And soon after, in the early 1940's, the Budget Bureau began to move to effect savings not simply by controlling the rate or tempo of program implementation, but by controlling the rate or tempo of program implementation, but by controlling the achievement or execution of particular programs *per se*.

Thus, in 1941, President Roosevelt announced that because of the war emergency he was not going to allocate any funds for any water resource project that did not have an important national defense value. He took that next step from shrinking entire programs to removing portions of programs at his own discretion.

And Congressional outcry, for the first time, was massive and bitter.

As a result, by 1950, following the recommendation of the 1949 Hoover Commission Task Force Report on Budgeting that

"additional legislation is needed to sustain the Bureau's powers with regard to both apportionments and reserves," Section 1211 of the General Appropriation Act of 1951 amended the Anti-Deficiency Act as follows:

"In apportioning any appropriation, reserves may be established to provide for contingencies, or to effect savings whenever savings are made possible by or through changes in requirements, greater efficiency of operations, or other developments subsequent to the date on which such appropriation was made available."

The following statement from the Congressional Research Service of the Library of Congress sums up the present statutory authority under the Anti-Deficiency Act to impound funds:

"Even as amended it is hard to see how the language of this section can be interpreted to give the Bureau of the Budget unlimited discretion to apportion reserves. The establishment of reserves is authorized 'to provide for contingencies, or to effect savings whenever savings are made possible by or through changes in requirements, greater efficiency of operations, or other developments subsequent to the date on which such appropriation was made available.' This seems to preclude the establishment of reserves simply because of a disagreement of policy between the Executive and Legislative Departments on the basis of the facts existing at the time the appropriation was made."

The language was clearly not intended to authorize the Budget Bureau to frustrate the legislative purpose of the Congress. Read narrowly, it authorizes no more than what Charles Dawes had expounded thirty years before.

But the language was broad and was easily stretched to reach as an authorization of control of the tempo or rate of program implementation in the interests of economy. And controlling the tempo or rate of program implementation and controlling the achievement of the program at all are merely matters of degree. They blend into one another.

But the Hoover Commission which recommended the legislation clearly recommended that the President be granted authority "to reduce expenditures under appropriations, if the purposes intended by the Congress are carried out."

The impoundments we see today not only transcend in number and scope those of previous years, they have an important qualitative difference.

The Administration is treating these statutory provisions as though they represent a blank check to implement whatever policy he sees fit.

In no law has the Congress given the President authority to have final say over the policy of this land.

Some may question if this authority was given when we changed the Budget Bureau to the Office of Management and Budget in 1970. But I ask permission to include here in the hearing record the text of the Executive Order which created the OMB. I want to include it because when one reads it it is tacitly clear that in no way has the OMB been given authority to set policy. In no way has the OMB been given authority to thwart the priorities of the Congress or the programs set up by the Congress.

In 1949 the Hoover Commission noted that the Executive needed more legislative authority for impoundment. I think that is basically the question we face today—whether we will expand that authority or put it back into historical and Constitutional perspective.

Mr. Chairman, with the history and legal background in mind, I wish to state briefly why I am so concerned over impoundment.

Last year, I stated that the Congress would wake up and find that everything we legislated could be meaningless. I warned that we

could complain when money for our District was withheld, but that someday everybody's District could suffer. I warned that many philosophies—liberal, conservative, rural, urban, and so on—would be affected. I warned that someday constituents would request our help and we could do nothing.

Well, Mr. Chairman, someday is today, considering the recent massive impoundments.

What does this mean? It means that the Federal officials most responsible to the people, the Federal officials most accessible to the people, are no longer able to help the people.

When a constituent calls you, as a Member of Congress, for help in getting Federal aid from a program impounded by the Executive, I do not advise you to tell him to come to Washington to see his friendly OMB man—your constituent would not understand because he thought that you, the Congressman, were elected to serve. So, unless we take steps this year to restore Congress as an equal branch of the government, we may disappear from the halls of actual government.

Unless we take steps towards restoration, we will not be able to maintain the faith that those who elected us entrusted to us. Unless we do something our words and our actions in the Congress will become as "sounding brass and tinkling cymbal"—and maybe little else.

Another disturbing point about impoundment is that a bunch of back-room boys down at the OMB are making the specific impoundment decisions.

Quite frankly, Mr. Chairman, the Office of Management and Budget has become the "invisible government" of the United States.

This title used to be reserved for the CIA; but, there is a committee of Congress to oversee the CIA.

To those who think that the President himself reviews each OMB decision, I have only to cite the recent proposal to cut disability payments to Viet Nam veterans. Although much blame was placed on the Veterans Administration for the proposal, the real culprit was the OMB.

When the President got full wind of what the OMB was doing, we all know that he quickly withdrew it, for further study.

The President may not need enemies with his political friends down at OMB wanting to cut disability payments to Viet Nam veterans.

Furthermore, even if the Chief Executive himself went over each impoundment with a fine tooth comb, I would be upset.

Unbridled impoundment of funds is placing too much power in one man.

Now, many say that all the talk about the Executive running over Congress, of the Executive gathering power in one man, is a bunch of hot-air rhetoric.

All of us being politicians, there is probably a great deal of truth in the rhetoric criticism.

But there are also some very serious questions involved.

Some say Congress is archaic. Some say Congress does not represent all the people—that only one Federal official, who is not even elected directly by the people does. Some say that only the Executive Branch, mostly populated by bureaucrats, can control the budget, and thus make policy decisions.

I say that if these people are correct, then let us re-write the Constitution to weaken the role of the Legislative Branch.

As a believer in representative government, I would fight such a change with all my heart; but I would respect an attempt at changing the Constitution much more than the backhanded implementation of government by one man and his Star Chamber through the OMB.

Such advocates of one-man rule and Star Chamber rule exist in the highest levels of our government today.

I refer the Committee to an interview Dan Rather had with John Ehrlichman of the White House.

Mr. Ehrlichman asserted the right of the President to manage the budget, with his White House advisors, not answerable to Congress.

Dan Rather questioned Mr. Ehrlichman if this was not a drift into "one-man rule."

Ehrlichman answered, "That's what the President of the United States is, Mr. Rather."

Mr. Rather, in surprise, replied, "One-man rule?"

Ehrlichman responded, "Yes, sir. He's the only elected officer elected by all the people of the United States, unlike the Senators or Congressmen."

I respectfully disagree with Mr. Ehrlichman, Mr. Chairman, and I think the American people would, also. This country does not need an elected monarchy.

Before addressing myself to my own anti-impoundment bill, I would want to discuss anti-impoundment bills and fiscal responsibility in general.

The anti-impoundment measures we are considering are not an endorsement that the Congress intends to spend excessively for every proposal made. Clearly, anti-impoundment and high Federal spending is not a cause-and-effect situation.

The authorization and appropriations process of the Congress and the will of the Congress determines the levels of spending. Once that will has been worked, it represents the will of the people.

In the same manner that we are responsible for constitutional government on impoundment matters, we are responsible for a sane fiscal policy.

Perhaps the most important question facing the Congress is how it will control spending. I must say that this question is equally as important as the impoundment question. Congress must be able to control its spending. Hopefully and prayerfully, this session will see us do something about this question. In the meantime, if we are to preserve this Republic, we must preserve our right to spend.

To wed anti-impoundment to irresponsible spending is a shot-gun marriage.

Mr. Chairman, I now turn to the specific proposal that I have made to restore equal power to the Congress.

There has been general confusion as to the differences between the various anti-impoundment bills that have been proposed.

The bill that I introduced, in close cooperation with Congressmen William Ford (Michigan), Paul Sarbanes (Maryland), and Michael Harrington (Massachusetts), has a long history.

The bill was originally introduced by our former colleague William Anderson (Tennessee) in the 92nd Congress. I joined nearly one-hundred and fifty Members of the House who co-sponsored the Anderson bill.

This bill was nearly identical to the one introduced by Senator Sam Ervin. The bill on the Senate side had 50 Senatorial co-sponsors.

Senator Ervin's bill was originally drafted after four years of study of the impoundment question by the Senate Subcommittee on the Separation of Powers.

This study included public hearings in 1971.

On July 22, 1972, I offered an abbreviated version of the bill as a floor amendment to the appropriations bill for the Treasury, the Postal Service, and General Government purposes. My amendment was ruled non-germane.

Four days later, I reserved a Special Order for one hour of general debate on the growing powers of the Office of Management and Budget. During my remarks that day I discussed fully what the Anderson, Pickle, et al, anti-impoundment bill was about.

The Pickle-Ford-Sarbanes-Harrington bill differs from the Mahon anti-impoundment measure in two major respects.

First, under our bill, the impoundment message is placed immediately on the House and Senate calendars, without being referred to any Congressional Committee. Under the Mahon bill the impoundment matter is referred to the Appropriations Committee of both Houses of Congress.

The second difference is under our bill the Congress must approve the impoundment for it to take effect for longer than 60 days. Under the Mahon bill, the Congress must disapprove the impoundment for it not to take effect for longer than 60 days.

These are the two major differences, Mr. Chairman, and before going into what I think about these differences, I want to repeat a statement that I have made time and time again.

I have listened to all ideas. If this Committee believes other approaches will better suit the job than mine, I will listen. Let me state firmly that I place working to get something that will pass both Houses of Congress above being bullheaded for my bill only.

I still stand by this statement.

In this spirit, I offer a compromise to the Committee between my bill and the Mahon measure.

I cannot say that all my colleagues who co-signed my bill will join with me in this compromise proposal. I do believe the majority will, because we have discussed this matter thoroughly. I am hopeful that this Committee and the Congress will approve my proposal.

My proposal is this:

(1) Allow the impoundment message to be referred to the Appropriations Committee; and require the Committee to report a resolution on the message within 30 calendar days after receiving the President's message.

(2) State that the impoundment is to cease within 90 days if the Congress does not approve the impoundment, or the impoundment as recommended by the Appropriations Committee.

In brief, I am willing to give the Appropriations Committee the jurisdiction on the impoundment messages. The House Appropriations Committee represents the 55 most knowledgeable Members on appropriations in the House. Furthermore, this Committee is led by a most distinguished Chairman, the Honorable George Mahon of Texas.

This Committee could sniff out the real thrust of the Executive Branch's action. In doing so, it could go into each nook and cranny of appropriations pipelines, and share its findings with the other Members.

I concede that the original bill that I proposed did not do this.

On the second point, I must stand by my original belief that the Congress must approve an impoundment before it is effective over a great length of time.

Let us look closely at what is involved legislatively with this anti-impoundment procedure.

The Congress appropriates monies. The President signs the appropriations into law—he makes it the law of the land.

Then the Executive Branch impounds the money. In short, the Executive nullifies a law, or part of a law.

To say that the Congress, by doing nothing, allows a law to be nullified by Executive fiat is a gross abdication of Congressional authority.

On the other hand, to have the Congress approve an impoundment is requiring the Congress to do no more than pass a modified appropriations bill.

Another point, Mr. Chairman, is that the impoundment matter, going to the heart of Constitutional balance between the Executive and Legislative branches, should not be left entirely in the hands of one Committee.

Also, the majority party, or a majority

clique on a Committee by holding an impoundment message up could dictate the course on this all-important matter of balance between Congress and the Executive.

I feel that in the final analysis the whole Congress should pass judgment on the impoundment.

Before concluding, Mr. Chairman, may I point out that 113 Members of Congress are co-sponsors of the Pickle-Ford-Sarbanes-Harrington bill, including five members of this Rules Committee.

The approach I offer today, I feel, combines the best of the Mahon bill with the best of the Pickle-Ford-Sarbanes-Harrington bill.

I submit to the Committee a suggested draft of such an approach.

In conclusion, Mr. Chairman, let the Congress say to our countrymen, "The 93d Congress again made the United States a country of government by the people, a government of three equal branches."

A greater gift we could not give to this country as we approach our 200th anniversary.

We all know the old story about the lady who cornered Ben Franklin as he emerged from the Constitutional Convention at Philadelphia.

"What do we have, Sir, a monarchy or a Republic," she asked.

"A Republic," replied Dr. Franklin, "if you can keep it."

Let us keep the Republic.

SUCCESS OF DUBUQUE FLOODWALL

The SPEAKER pro tempore (Mr. DANIELSON). Under a previous order of the House, the gentleman from Iowa (Mr. CULVER) is recognized for 30 minutes.

Mr. CULVER. Mr. Speaker, last week the Mississippi River in Iowa reached one of the highest flood crests since records have been kept. I do not rise today, however, to seek Federal help in mitigating the effects of a natural disaster, but rather to call attention to and to thank the House for its role in preventing a disaster. The new floodwalls in Dubuque and Guttenberg, built in part with Federal funds, performed their tasks perfectly and kept those cities dry.

It is rare that we have such a clear opportunity to see immediate results from a project, and I think it is instructive to reflect on our successes as well as our failures. Therefore, I would like to call your attention to some facts about these floodwalls and the flood that did not happen.

The initial planning grant for the Dubuque floodwall was made in fiscal year 1964 by the Army Corps of Engineers. Additional grants were made for planning and construction in each succeeding year until 1973, when a total of nearly \$11 million in Federal funds had been invested in the project. This amount was augmented by well over a million dollars of local funds.

The total Federal contribution only tells part of the story, however, since the timely completion of the floodwall last year is what prevented substantial flood damage this year. On two occasions, testimony by Dubuque city officials resulted in an increase in the funds allotted to the project. In fiscal year 1967, according to a Corps of Engineers official in Rock Island, the \$145,000 proposed by the Bureau of the Budget was increased

to \$250,000 following their testimony. And in fiscal year 1970 their testimony resulted in an increase in construction funds for that year from \$1.6 million to \$2.1 million, even though the President had declared a 75-percent reduction in contract awards. Without these funding increases to accelerate the project at these crucial stages, the floodwall would not yet be completed and Dubuque today would be shoveling mud out of its homes and businesses.

Mr. Speaker, I believe that the Dubuque floodwall is an excellent example of a sound investment of the taxpayers' dollars. Constructed at a total cost of \$12 million, the floodwall prevented a flood in its first year that would have caused an estimated \$19 million damage. I would like to quote from an article in the Dubuque Telegraph-Herald, written 2 days before the flood's crest last Friday:

It is startling to think what Dubuque would be like this spring without its dike as floodwaters inch toward an expected 22-foot crest on Friday. As food for thought, City Engineer John White has some interesting statistics.

According to White, the Mississippi River today, if it were not for the floodwall, would have a west bank along South Main Street, the East Fourth Street-Central Avenue intersection along Elm Street all the way north to 22nd and Kniest streets.

Celotex, Caradco and the Dubuque Packing Co. would be shut down, not to mention all industries and businesses east of them. Homes of "Flats" residents and some Washington Street neighborhood dwellers would have water and muck lapping at the foundations. Sewers would be backing up all over the city.

In Guttenberg, the situation is similar. The floodwall there cost about \$2½ million, and the Corps of Engineers estimates that this year alone it prevented a million dollars in property damage and cleanup costs.

Mr. Speaker, the people of Dubuque and Guttenberg are profoundly grateful for the assistance which has helped to build their floodwall, and I want to particularly thank the members of the Appropriations Committee and the Public Works Committee for their support. The gratitude of the people in Dubuque and Guttenberg, and the evidence of the sound investment the U.S. Government made in helping to fund these projects, indicate to me the importance of rapid completion of a similar project in the city of Clinton.

The Mississippi crested at 20 feet in Clinton last Saturday—4 feet above flood stage—for the seventh worst flood in Clinton's history. Emergency flood protection constructed in 1969 prevented an estimated \$7 million in damage this year, but the project is not complete and the city is incurring major flood prevention costs; \$300,000 is in the Corps of Engineers fiscal 1974 budget for construction, and completion of the project for Clinton is scheduled in 1977. The success of the Dubuque and Guttenberg floodwalls in preventing any damage during this year's high water should be a sufficient stimulus to us to insure adequate funding and prompt completion of the Clinton project.

CXIX—640—Part 8

Mr. BOLAND. Mr. Speaker, will the gentleman yield?

Mr. CULVER. I am happy to yield to the gentleman from Massachusetts (Mr. BOLAND).

Mr. BOLAND. Mr. Speaker, I am pleased to hear of the success of the Dubuque and Guttenberg floodwalls, in preventing major floods this spring, but the gentleman from Iowa has neglected to mention his own important role in securing adequate, and timely Federal funding for these projects. In fiscal year 1967 and again in 1970, when economy measures and competing priorities resulted in reduced allocations, it was the gentleman from Iowa who testified and arranged for city officials to testify in administrative hearings on the Corps of Engineers budget. It was also the gentleman from Iowa who worked for these projects from the day he came to Congress in 1965, the year of the worst flood in the history of the upper Mississippi, until they were completed last year. In 1967, at his invitation, I toured some of the areas which had been flooded and I saw the need for those projects. This firsthand experience enabled me to urge favorable action on these projects in the Appropriations Committee.

Credit is obviously due to the cities of Dubuque and Guttenberg and to the Corps of Engineers, but the record would be incomplete if it did not include reference to the tireless efforts of the gentleman in the well. He has been remarkably persuasive and effective in convincing us of the need to accelerate the timetable for these flood control projects. His dedicated work has saved not only millions of dollars but insured the safety of countless lives, and he is to be commended for a job well done.

Mr. CULVER. I wish to thank the gentleman very much for his kind remarks and once again say to him how extremely grateful we all are for his invaluable help on the Committee on Appropriations.

Mr. BOLAND. I thank the gentleman.

APPROPRIATIONS AND MANPOWER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oregon (Mr. WYATT) is recognized for 5 minutes.

Mr. WYATT. Mr. Speaker, our Federal forests which collectively contain 58 percent of the Nation's standing sawtimber inventory, are not being intensively managed for lack of funds and manpower. Average current receipts for timber sold under Federal contracts are more than four times greater than timber management costs. Yet these proceeds are not returned in full to the agencies which manage the timber, notably the Forest Service and Bureau of Land Management.

Instead, timber sale proceeds are funneled into the general fund and reappropriated annually by the Congress. Funding requests of the managing agencies are further subject to the whims and domination of the Office of Management and Budget.

If we are to increase the output of our

Federal forests on a sustained basis, we simply must find a way to inject stability into the financing of our Federal timber management agencies. And the most dependable solution is through new legislation.

We must provide the Forest Service and Bureau of Land Management with sufficient dollars on an assured basis to bring their reforestation programs into line with their timber sale programs. It is a national disgrace that nearly 5 million acres of our Federal forests, a priceless national heritage, are lying fallow for lack of enough money and manpower to establish new forests.

Large industrial landholders cannot and will not permit similar conditions to prevail and are the leaders in the field of intensive forest management. It is time that the Federal Government adopts a similar philosophy and that we come to regard management of Federal forests as an investment in the future.

LEGISLATION FOR LOWER COST HOUSING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. BLACKBURN) is recognized for 5 minutes.

Mr. BLACKBURN. Mr. Speaker, on behalf of myself and the gentleman from California (Mr. BOB WILSON) I am introducing legislation today which will eliminate building code and union work rule restrictions on the use of industrialized building products in federally assisted and subsidized housing programs.

The prospective home buyer is faced with construction costs spiraling at a rate greater than 10 percent per year. The recent curtailment of housing subsidy programs will increase his outlay even more. Now more than ever, we must find the means to drastically cut construction costs. Many experts say a prime method is through wider use of prefabricated and preassembled construction products. However, testimony last year before the Senate Subcommittee on Housing and Urban Affairs confirms that restrictive union work rules and outmoded building code provisions, the latter often union instigated, continue to hamstring efforts to employ such industrialized building techniques.

By inclusion of provisions in collective bargaining agreements, the building trades unions have assured themselves that they will not have to handle or install specific products or materials or if they do, that they will be paid reparations. Although Congress intended to outlaw such conduct in the Taft-Hartley and Landrum-Griffin Acts, the National Labor Relations Board and the courts have limited the effectiveness of the congressional intent.

Building codes also restrict the use of modern construction technology. As pointed out in the 1967 Battelle Memorial Institute Research Report for the Building and Construction Trades Department, AFL-CIO, patchwork building codes discourage volume production that could be obtained from serving a wide geographic area.

As a member of the Subcommittee on Housing, I proposed a measure similar to the bill I introduce today during subcommittee consideration of H.R. 16704, the Housing and Urban Development Act of 1972. It is the outgrowth of legislation proposed by the gentleman from California (Mr. Bob Wilson) in the 91st and 92d Congresses. I want to commend my colleague for his continuing efforts in behalf of low-cost housing for all our citizens and for his assistance in the preparation of this bill.

The basic elements of my bill are:

First, through a civil court action in a Federal or State court, any person, including a builder, a contractor, or a manufacturer may prevent the enforcement of any local code, law, ordinance or work rule that restricts his use of new techniques or materials in a federally assisted housing program. No action by a governmental agency is required.

Second, the remedy does not apply if the restrictive code or work practice is required to protect the health or safety of working or living conditions. However, the person invoking this exception must show by a preponderance of the evidence: first, that the restraint is necessary to assure safe and healthful working conditions, and second, that the prefabricated product fails to provide this assurance. In placing the burden of proof on the person invoking the health and safety exception, I have modified the proposal I presented to the subcommittee last year. In doing so, I have eliminated a provision involving HUD-designated testing and standard setting agencies. Now my bill will require no administrative duties of HUD. There is no way that my bill could lead to the adoption of national building standards.

Third, the court may order equitable or preventive relief and damages, although damages may not be assessed against a local governmental body.

Fourth, the safety and health issue and all other questions under the bill will be decided by a State or Federal court in the locality.

There are few more significant consumer issues today than providing lower cost housing to all Americans, but particularly those in the middle and lower income groups. The Department of Commerce Technical Advisory Board's Panel on Housing Technology reported that in 1970 over 10 million families were housed in unacceptable conditions and that to meet this need a production rate of 2.5 million units per year is needed in the decade of the 1970's. This is an increase of 65 percent over the annual production rate of the previous 10 years.

Meeting the needs of the housing consumer at a price he can pay, without at the same time overburdening the taxpayer with increasing Federal housing subsidies, is an almost unsolvable problem. My bill will allow the free use of the most modern building techniques and products, and, thus, offers a partial solution.

The text of the bill follows:

H.R. 6303

A bill to promote the utilization of improved technology in federally assisted housing projects and to increase productivity in order to meet our national housing goals, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) any provision or requirement in any building code or other local law or ordinance, or in any contract or agreement, or any practice or other restraint which interferes with or restricts the use of new or improved techniques, methods, or materials or the use of preassembled products in connection with any development, construction, rehabilitation, or maintenance activity assisted under any program administered by the Secretary of Housing and Urban Development shall be unlawful with respect to such activity: *Provided*, That nothing contained in this paragraph (a) shall be construed to make unlawful any such provision, requirement, practice or restraint if it is shown by a preponderance of the evidence (1) that such provision, requirement, practice or restraint is necessary to assure safe and healthful working or living conditions and (2) that such technique, method, material or product fails to assure such safe and healthful working or living conditions.

(b) Any person who is aggrieved because of any provision or requirement in any building code or other local law or ordinance, or because of any contract, agreement, practice, or other restraint unlawful under subsection (a) of this Act may bring a civil action in any appropriate United States district court notwithstanding any other provision of law and without regard to the amount in controversy, or in any appropriate State or local court of general jurisdiction to obtain equitable or preventive relief for violations of this section, or for appropriate damages, and may request such relief, or enter a claim for such damages, in any court whenever relevant in connection with a defense to, or counterclaim in, any suit or action brought against such person in that court, except that damages shall not be awarded where the person bringing the action under this section is aggrieved by reason of any provision or requirement in any building code or other local law or ordinance.

PRIVATE PENSIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. HEINZ), is recognized for 10 minutes.

Mr. HEINZ. Mr. Speaker, on Friday, March 23, I had the privilege of being present at Field Hearings in Pittsburgh, Pa., of the House Education and Labor Committee's Pension Task Force. Serving both as a witness and, by leave of the chairman, as a guest member of the committee panel, I believe the work of this committee is particularly important, as evidenced by the valuable testimony taken from a number of witnesses. I especially want to commend the chairman of the Task Force, Mr. DENT, for his efforts and would add that the hearings demonstrated to me even more forcefully the need for strong remedial action in the field of private pensions.

Over the past several years, we have witnessed a growing, and intensive concern by the public and the Congress over the problems of living in retirement in America. Stories in the media and con-

gressional hearings have dramatized the difficulties of living on a fixed income when the costs of necessities skyrocket daily.

This is just part of the picture which details the difficulty of life for the aged. As a former member of the Special Studies Subcommittee of the Government Operations Committee, I came to view firsthand many of the shortcomings and inconsistencies of the programs, and forms of aid, which Government has created to help our elderly. I am firmly convinced that many of these efforts are inadequate, and for this reason, I have offered legislation to create a select committee on the problems of the aging so that the House can focus more effectively and intelligently on the problems of aging and their legislative solutions. I recognize, however, that the landscape is not totally bleak.

In the last 3 years Congress has focused attention on social security legislation, and granted a substantial boost, totalling 45 percent to 20 million recipients. Today we are in the midst of a growing controversy over private pensions, which cover 30 million of the more than 80 million Americans now in the work force. Private pension trust funds today aggregate \$153 billion and pay out annually an average of \$1,600 to about 5¼ million recipients. The question then is why is there a growing controversy over pensions, both private and federal? The reason is that neither social security nor private pensions provide most Americans the income security they have every right to expect after long years of work. Since last year Congress passed social security legislation, there is little chance for more legislation this year, particularly when new changes would result in increased taxes. The thrust, quite properly, will be in the area of private pensions, where the problems are not being solved in the marketplace of American commerce and industry. The testimony presented by witnesses in Pittsburgh and around the country indicates a serious problem overdue for remedy, but a look at the future gives an even clearer picture and justification for action at the soonest possible moment.

The fact is that we are becoming an older America where every day 4,500 Americans celebrate their 65th birthday. For the first time the average age of our population is increasing, not decreasing, and it is doing so with surprising rapidity considering the vast numbers involved. In part this is due to the drop in the birth rate, in part due to advances in medicine that enable us to live longer and enjoy it more.

But even this trend does not fully reveal the tremendous rate at which Americans are retiring from the workforce. This is no longer a question of reaching the magic age of, say, 65. The retirement age is moving down to 62, and even 55 in some pension plans. Civil servants, the military, not to mention congressmen, can claim a substantial retirement stipend after 25 or 20 years of service.

Less job satisfaction and added frus-

trations at work are sadly becoming an accepted fact of life. There are pressures to ease people out of jobs to create positions for younger people pushing up, and obstacles to continuing work even to able-bodied and experienced men and women. There is a youth culture and prejudice against a fullness of years. Just living in the 1970's, hustling to beat the traffic, struggling to make ends meet and somehow make the next mortgage payment or son's tuition payment make life more demanding and, let us face it, more tiring, too.

The result of these trends and forces is to accelerate people at ever increasing numbers into retirement.

In addition to all this, the costs of being retired are rising steadily. Inflation is rampant today and those now on fixed incomes know just what a toll it exacts. As the standard of living of our Nation improves yearly by the rate that wages and productivity gain on inflation, so also increase the needs of retired people and the amount of income they need to maintain a decent standard of living.

But perhaps most critical of all to the retired person is the cost of good health and combating the illnesses that afflict us all as we grow older. In recent years, no cost has escalated more rapidly than that for health care. Even with the establishment of medicare, the elderly person today still spends the same proportion of his income on medical care as in 1965 before medicare was enacted. As we develop new and more expensive means to secure good health while living longer, we can, once again, expect compounded demands on the incomes of retired persons.

The job of Congress is then to develop and pass legislation making private pensions sounder, fairer, and more responsive and broader in their coverage to meet these evolving challenges that I have just mentioned. But equally important, your job is to remedy the inequities and vagaries of a system whose shortcomings are becoming clearer in the growing body of evidence that builds almost daily.

Some companies fail, leaving hundreds or thousands of employees with little or no coverage to show for the years they worked. This has certainly been the case with Studebaker employees and those laid off by the Penn Central Railroad.

In other cases, funds are mismanaged by scandalous and unethical practices of speculating in the stock market, or using the pension funds for the administration of union functions.

Some employees are fired before their pension funds are vested as a way of saving the company money.

Employees change jobs voluntarily, or because of involuntary conditions such as a bad job, a poor supervisor, or dangerous working conditions.

While there are many problems to be addressed, I would like to focus on a list of five key problems that I believe must be solved above all.

(1) VESTING

Vesting is probably the single most troublesome item for the retired Amer-

ican worker today. It is the promise of security for the worker who has labored for a company for years and who has participated in its pension plans and who has the right and the expectation that he will draw a pension when he retires. Today's odds are against his receiving pension benefits. Under present practices, only one-third to one-half of the 30 million people who currently participate in private plans can expect to receive the benefits the contributions were supposed to assure for them. This is despite the fact that three-quarters of these people are enrolled in plans which permit vesting.

What is the reason for this? The provisions of vesting vary from plan to plan. Only 1 percent of the private pension plans in force today permit vesting before 5 years of service; about 35 percent permit vesting from 5 to 10 years; another 30 percent require from 11 to 15 years, which means that as many as one-third of the plans require 16 years or more for vesting.

The picture varies from industry to industry, from union to union. In this highly mobile society, some industries operate on a boom to bust schedule so that layoffs and early terminations may destroy the chance to vest pension income. For example, of the 50,957 employees who left the A & P before retirement, fully 37,461 forfeited all rights to any pension benefits. And what is more many people find themselves short-changed when their industry fails or when there are large scale layoffs as is the case in defense-oriented and aerospace industries.

The present vesting provisions reward the long-term and higher paid employees with the payments of those who went on to other jobs. It seems to me that early vesting is highly desirable and should be achieved within a reasonable number of years of initial employment, or a combination of age and employment years.

(2) DISCLOSURE

It is clear to me that companies will have to tell employees and Government more about the way their pensions work and are administered. We can no longer abide the confusion and despair that results from misunderstandings about pension shortcomings, nor can we tolerate the unethical or even highly questionable activities of pension administrators. Their investment activities need to be watched closely by plan participants as well as by corporate shareholders and the Government.

The present Welfare and Pension Plans Disclosure Act is sufficiently general as to be useless in pinpointing misconduct. What proves the point is the number of classic cases of union and corporate misuse of the trust they hold in employees' pension funds, and the slow response in tracking down these abuses. Unquestionably, some funds, and their uses, need watching.

(3) FUND MANAGEMENT

The impact of \$153 billion in pension funds on the securities market cannot be ignored by Government. There should

be concern not only for the protection of investors, but primarily for men and women who will have to rely on the soundness of pension funds that will be their lifeline in retirement.

(4) REINSURANCE

Vested pensions should be guaranteed through reinsurance against any plan termination which leaves funds bankrupt and their pensioners stranded on a mound of financial hardship.

(5) PORTABILITY

The question of portability goes to the heart of employment practices in the United States. The time honored principle of holding down one job for a lifetime seems to be going the way of living in one house for a lifetime. Americans in the 1970's look for better opportunities and are necessarily employment mobile to achieve them. Although few young people in their 20's or 30's concern themselves with pension rights, it's the man in his 40's who may receive his most challenging and attractive job offer, who has to consider what happens to his pension if he changes jobs. As a result, he may choose not to take this opportunity. Or it is the man in his fifties whose job prospects are probably less bright who is forced to change jobs—but does not have the right or the chance to take with him his pension credits.

Clearly we have to develop a way to insure that a man who vests in his pension does not lose his equity if he changes jobs. We need portability as a means of guaranteeing the future of retired people. Although by no means the only alternative, an early and fair vesting requirement is one of the surest ways to achieve this objective.

In considering portability, I think we have to be frank in recognizing there is a strong body of feeling in a number of labor unions and corporations which holds that transfer of funds to other pension plans will make it difficult to continue the high and protective pensions which they presently offer retired employees and prospective retirees, but I am confident we can find a satisfactory solution to these objections.

If we can achieve these five main goals, I think we will have taken a giant step in assuring the future security of the American people, and we will be helping to restore their confidence that Government can and does fill a vital job as watchdog of the public interest.

In closing, I would add a note of caution. Too often concepts are oversold and in trying to treat problems they later lead to a new low in disillusionment. Today employees pay directly only \$1.5 billion of the \$14 billion contributed to pension funds in their name. Reform will be costly, and either the present level of benefits will be spread thinner across more retirees, or today's employees will be bargaining less for an increase in direct wages and more for a contribution to their pension fund as a substantial part of their wage package. Nonetheless, we should not be deterred in finding or enacting a just and necessary solution. We must pass a strong, workable, and responsible pension reform bill.

FORMER SPEAKER JOHN MCCORMACK AT MEDFORD HIGH

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. O'NEILL) is recognized for 5 minutes.

Mr. O'NEILL. Mr. Speaker, it is always a pleasure to hear that our former Speaker John McCormack is enjoying an active and healthy retirement, and I was especially pleased to read a recent account of the Speaker's appearance at Medford High School in Massachusetts.

From a news story by Peter Theroux, we learn that the Speaker is as tireless as ever. Mr. Theroux reports in the Medford Daily Mercury that John McCormack stressed the continuing need for a strong legislative branch of Government. "Therein" he told the students, "lies the true power of the people and the democratic spirit of the country." How true and timely this reminder from our friend and former Speaker.

I know John McCormack's friends will be interested in the account of his appearance in Medford, and I include the article at this point in the RECORD:

[From the Medford (Mass.) Daily Mercury] "MR. SPEAKER" BIG HIT AT MEDFORD HIGH (By Peter Theroux)

MEDFORD.—On Tuesday Medford High School students had the chance to hear and ask questions of John W. McCormack, former Speaker of the House.

He spoke at Sounding Board, the program at MHS whereby several times a week teacher Thomas Convery presents various well-known or interesting individuals or groups. In the past, the program has featured such things as Hare Krishna groups, opera singers, gospel singers and musicians from the New England Conservatory of Music, office holders and also sports figures.

Mr. McCormack appeared for two class periods, and spoke with and to the students, answered questions and, after the school hours, talked with more students, faculty members and local politicians who were there to hear him speak.

McCormack has had a long and fruitful political career. He has held elected offices for 51 years of his life. He has served under eight presidents of the United States (Harding, Coolidge, Hoover, Roosevelt, Truman, Eisenhower, Kennedy, Nixon).

He believes, he told the students, in an exceedingly strong legislative branch of the government, for therein lies the true power of the people and the democratic spirit of the country. He insists that the executive (or judicial) branches of our government ought to never impound or threaten, or in any way limit, the clout of the legislative branch. "The Congress," he said, "is for the country."

Former Speaker McCormack also answered many questions from the students and faculty concerning current affairs in the government.

One student asked the retired Congressman's opinion of amnesty for those who have fled the USA rather than fight. McCormack replied that before we turn our attention to those who have fled, we first have the prisoners of War to deal with. He said he believes that first we must wait until all our fightingmen are back safe here, before we decide the fate of those who are concerned by amnesty. However, he reminded the students, the issue of amnesty is not a simple one at all, for there are several federal laws concerning amnesty, as well as certain army regulations that face the ex-armymen in Sweden and Canada.

Perhaps the issues which McCormack felt

most strongly about was a questioning of the significance of student government, and also the feasibility of Congress wielding real power against an extremely powerful central executive figure.

McCormack said "absolutely that government of all sorts, in every walk of life, is vitally important, and that government at high schools, and this includes Student Councils as well as 'reps', are the very roots of a democratic society."

"The great democratic government must have factions such as students getting to know their school laws, for this is the springs, he said. McCormack also said he believes implicitly in the democratic system, and feels "absolutely" that the government can both uphold the law and be fair. He stressed that faith, from legislators as well as citizens and students, is "wholly necessary."

At the end of the period, when it was time for the students to return to their classes, the elder statesman was greeted with a thunderous round of applause from all.

He stayed a bit longer than planned, after school hours, speaking with faculty and Medford officeholders for some time, before ending the day with his return home.

CONSUMER REVOLT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. COTTER), is recognized for 5 minutes.

Mr. COTTER. Mr. Speaker, when I first called for a nationwide consumer revolt on March 1, I did so for two reasons. First, I believed that it was possible—if enough people observed the April 1 through 7 meat boycott—to impact the marketplace, to halt the absurd upward spiral of food costs. Second, I believed that such a demonstration of consumer clout would generate enough heat in Washington to force the administration into action.

Today's Wall Street Journal contains three stories which demonstrate not only the market clout of the irate consumer but also the growing political muscle of this ad hoc consumer movement.

I include these articles for the benefit of my colleagues:

LIVE HOG PRICES DROP RECORD \$5 PER 100 POUNDS AT INDIANAPOLIS; CATTLE QUOTES DECREASE \$1 TO \$2

Live hog prices tumbled a record \$5 per 100 pounds at Indianapolis and \$2 to \$4 at other leading marketing terminals.

Live cattle prices dropped \$1 to \$2 per 100 pounds.

Brokers said the wholesale beef trade showed the first sign of genuine weakness in some time yesterday, with the price for choice beef falling three cents a pound to 68 cents. Two weeks ago, retailers paid a record 71½ cents for supplies. The meat handlers said that even at the lower prices, demand remained slow.

The wholesale price weakness and further sharp declines in futures markets for live animals and meat products continued to reflect expanded reports of consumer boycotts and curtailed packer operations; packers don't want to have large meat stocks on hand if next week's scheduled widespread boycotts are effective.

A New York wholesaler who usually handles three boxcars of beef weekly said he ordered only one this week and these supplies were moving slowly. He feared a big price loss if he operated with larger supplies and the consumer resistance prevailed. Large restaurants in New York City and other areas started to push fish and other nonred-meat dishes, meat handlers said.

PROCESSING DECLINES

Federally inspected packing plants processed 208,000 head of cattle on Monday and Tuesday, 21,000 less than a week earlier. The 632,000 hogs slaughtered was down from 641,000 in last week's first two days.

Farmers shipped 32,100 hogs to the 11 major Midwestern marketing terminals yesterday, down from 37,600 a week earlier and 48,300 a year before. Livestock men said that even the reduced supplies could only be sold at sharply lower prices. They noted that hog prices at interior markets also were sharply reduced.

Price weakness in the wholesale pork trade during the previous four or five sessions attracted some buyers. Hams needed to fill the Easter trade sold at 62 cents a pound, up 1½ cents from Tuesday. With chain stores featuring pork loins, some buyers wanted to replenish stocks and they paid 64 cents a pound for the cut, two cents more than Tuesday. The price, however, was still 16 cents below the record a month ago.

Live hog prices yesterday were down as much as \$10 per 100 pounds from the record two weeks ago.

Chicago cattle, hogs, pork bellies, soybean meal and soybeans dropped their respective price limits when trading started yesterday. As the day progressed, these commodities recorded extremely nervous price movements. For cattle, live hogs, pork bellies and soybean meal it was the third day of limit declines. For soybeans it was the second day of maximum losses.

However, the day ended with prices for pork belly futures off ¾ cent to up ½ cent a pound hogs closed up ¾ cent to off ¼ cent a pound, and cattle ended one cent a pound lower.

Chicago soybeans closed down the 15-cent limit. Soybean meal closed off \$5 a ton, and the wheat market ended 1 cent a bushel lower to 3¾ cent higher.

Chicago shell egg futures closed off two cents a dozen, the daily limit.

Soybean selling was induced again by this week's Agriculture Department action that will allow farmers to use more set-aside land to plant soybeans, feed grains and other crops.

The first ship entered the St. Lawrence Seaway in the 1973 shipping season yesterday, marking the earliest opening in the history of the 14-year-old inland waterway. Almost 55 million tons of cargo were moved over the water route to the Great Lakes last year.

TIGHTER PHASE 3 CONTROLS URGED ON NIXON BY HOUSE REPUBLICANS LEST CONGRESS ACT

WASHINGTON.—House Republicans have privately told the Nixon administration what the Democrats have been saying publicly for weeks: that unless it tightens up on Phase 3 economic controls, Congress will order tougher standards.

Cost of Living Council Director John Dunlop went to Capitol Hill yesterday to brief Republican members of the House Banking Committee on the administration's request for a simple one-year extension of the President's wage-price authority, to April 30, 1974. But according to participants, the private session centered around congressional complaints that Phase 3 is inadequate.

"We told him they better move pretty quickly on food prices and rents or they're dead up here," said one of these Republicans. Mr. Dunlop reportedly remained noncommittal on possible moves to tighten the controls. But, recalled one participant, at the close of the meeting Mr. Dunlop said: "We've got your message."

MEMO CIRCULATED

Mr. Dunlop apparently held the unannounced session in hopes of staving off a House drive for tougher controls. At the meeting, he circulated a memo attacking the major proposals for stiffening price controls. The administration remains "totally and

completely opposed" to a Senate-adopted amendment that would impose rent controls in areas where vacancy rates are low, the memo said. Earlier this month, the Senate approved a one-year extension of the wage-price authority but attached this rent-control provision.

The administration memo also was sharply critical of a proposal by House Banking Committee Democrats that would impose a 60-day freeze on all prices and interest rates. "In addition to being contrary to the President's goal of decontrolling the economy, a freeze is not warranted or justifiable on economic grounds," the memo stated.

In response, however, most of the Republicans warned Mr. Dunlop that the only way to avoid these measures is through dramatic and tough action to curb spiraling prices. "We really gave him an earful," said one Republican Congressman.

MEANY ASSAILS PHASE 3

At the full committee's public hearing on the controls legislation yesterday, AFL-CIO President George Meany sharply assailed Phase 3 and urged the panel to impose strict controls on food prices, rents and interest rates. Speaking more harshly against the Nixon administration than has been his custom lately, the labor chieftain warned that if Congress fails to act, "workers and consumers will be stampeded by food prices, gouged by landlords, fleeced by money-lenders, and squeezed."

Mr. Meany listed several specific actions he said Congress should take in the wage-price legislation. These included a reimposition of rent controls and a rollback of recent interest-rate boosts, to be followed by ceilings on these rates and provisions to allocate available credit. He also insisted on "temporary direct controls on prices of raw agriculture products," which are currently exempt from controls.

Spiraling food prices could hurt the outcome of this year's wage settlements, Mr. Meany warned. If these prices "aren't brought down, there is no way union members are going to let their unions settle for a wage increase that won't even pay for their increased food bill," he declared.

He further contended that Congress should impose an excess-profits tax on corporations, though he conceded this doesn't fall within the Banking Committee's jurisdiction. He called for continuing congressional review of Phase 3 and also urged the House to adopt a Senate-approved amendment exempting all workers who make less than \$3.50 an hour from wage controls.

While insisting these changes are necessary to make Phase 3 equitable, Mr. Meany said, in response to questions, "I'd really like to get back to where we were before Phase 1." He strongly attacked the administration and Federal Reserve Board Chairman Arthur Burns for allegedly relying heavily on higher interest rates to curb inflation.

Mr. Meany also said he is "confused" over the actual Phase 3 wage control policies. Labor leaders have privately been told by administration officials that there isn't any "single wage standard" in Phase 3, but other officials have insisted that a 5.5% guideline remains in effect.

STORES, PACKERS, FARMS BEGIN TO FEEL IMPACT OF HOUSEWIVES' OUTRAGE—DEMAND IS FALLING MARKEDLY; SLAUGHTERING IS CURTAILED; HOG PRICES IN RECORD DROP—BUT HOW LONG WILL TUNA DO?

(By Mary Bralove)

"Let 'em eat tuna casserole."

The phrase may lack that old revolutionary ring, but it seems to be catching on nonetheless. It's the cry of the American housewife as she battles soaring meat prices.

Scattered groups around the country have launched a widely publicized effort—backed

by various politicians, economists and consumer groups—to get people to sacrifice meat next week in an "April Fool's" boycott in the hope of driving meat prices down.

But housewives have begun to demonstrate their power even before the boycott begins, and there's increasing evidence that their muscle is being felt where it hurts—in the pocketbooks of supermarkets, meat packers and livestock growers. Supermarket chains report consumers are buying less meat and cheaper cuts. A number of Midwest meat packers have curtailed their operations as a result of the decreased demand, wholesale beef prices have slipped a bit, and hog farmers are already panicky at plunging wholesale pork prices.

"The consumer resistance to present high prices of meat is real, and it's making itself felt in the marketplace," says Emerson E. Brightman, executive vice president of Grand Union Co., a supermarket chain. "Shoppers are buying thinner steaks, smaller roasts and stretching their meat over more meals a week."

"SITUATION WILL GET WORSE"

As housewives mix soybean fillers into their hamburger meat to stretch it further, supermarket chains report a sharp drop in meat sales. A survey of 16 major supermarkets conducted two weeks ago by The National Association of Food Chains showed, for instance, a 2% to 15% plunge in the weekly amount of beef sold. As a result, packers are being forced to cut back their operations. Iowa Beef Processors Inc., the Nation's largest beef packer, currently operates an eight-hour shift at most of its plants down from the 10-hour days worked recently at some of its slaughtering plants. Needham Packing Co. last week closed two of its four beef slaughtering houses, and Spencer Foods Inc. says it has cut back to "minimum" work hours at two slaughter plants.

"I think the situation will get worse before it gets better," says Gerald L. Pearson, president of Spencer. He reports a 25% to 30% drop in meat demand.

In reaction to the drop in demand from packers, hog farmers have hastily begun to liquidate stocks.

"A panic has set in among hog producers," comments Paul McNutt, an Iowa City farmer who says he sold some 210 pound hogs for \$35 each three days ago rather than waiting to sell them when they're heavier.

RUNNING FOR COVER

On Tuesday alone, live hog prices in the Midwest tumbled a record \$3.75 per 100 pounds, winding up \$6 to \$6.50 per 100 pounds below the historical highs of two weeks earlier. And they fell even lower yesterday, to as much as \$10 below recent highs in some markets. (For further details see Commodities column on page 26.)

The sudden plunge had old livestock hands shaking their heads with disbelief. "The drop in prices has been psychological—everybody's running for cover," says one hog producer who adds that he plans to wait out the panic.

More experienced packers, or more cynical marketers, think consumers will soon have their fill of peanut butter-and-jelly sandwiches and will return to buying meat no matter what the cost. Says one packer who views the current resistance to high meat prices as temporary: "Once people have had their fun and games, they'll go right out, restock their freezers and create higher demand."

In fact, no matter which way shoppers turn for a better buy, their demand creates a spiraling price. For instance, in the New York area, the Great Atlantic & Pacific Tea Co. last week featured 2½-to-3½ pound chickens for 39 cents a pound; A&P had paid a wholesale price of about 38 cents a pound. The chain sold a lot of chicken; but had to

discontinue the special when its wholesale price for chicken jumped to 44 cents a pound.

THREE HOURS FOR FISH

In the Washington, D.C. area, Giant Food Inc. advertised a special on fish. The supermarket chain was inundated with shoppers anxious to stretch their grocery money—so anxious that many waited as long as three hours in line.

But switching to tuna shortcakes or cheese souffles doesn't completely ease the pinch on the consumer's pocketbook. Wholesale prices of American cheese, for example, have jumped to 68 cents a pound from 63 cents a pound a year ago and extra large eggs have risen to 53 cents a dozen from 39 cents a year earlier.

"The real problem the housewife is facing is that there are no attractively priced meat alternatives," says Tim McEnroe of the National Association of Food Chains. "Meal money has got to go someplace, and everything is in short supply."

Because the housewife has nowhere else to turn and is receiving little satisfaction from her government representatives, she seems to be enthusiastically embracing the meat boycott movement. Although in a practical sense avoiding meat will lead to higher prices for fish and nonmeat products, the boycott seems at least to be providing an emotional outlet for pent-up shoppers' frustrations.

And the anger of the consumers is very real. Last Saturday, for example, Mr. McEnroe, after promising his children a rib roast for dinner, traipsed off to a local grocery store. With rib roast in hand, he lined up at the checkout counter. Spotting the roast, his fellow shoppers began muttering ominously and for a while there, Mr. McEnroe says, he wasn't sure whether he would get out safely.

In preparing for next week's official boycott, supermarket chains are keeping a tight rein on orders for meat products. They're cutting back particularly hard in areas such as Washington, D.C., and Los Angeles, where the boycott is expected to be particularly effective. Supermarket executives expect consumers on both coasts will be more receptive to the idea of boycotting meat than their traditionally less militant counterparts in Midwest and Southern areas.

No one, however, can predict how effective or widespread the April Fool's boycott will be. The first week in any month is when many people get their paychecks and are in a buying mood, and it's harder to pass up steak when there's cash in your pocket.

If the meat boycott is more successful and lasts longer than retailers counted on, supermarket chains will be stuck with a lot of fresh beef that will spoil fairly rapidly. Traditionally, meat sales account for some 25% of all grocery-store sales, and the industry—already in a profit squeeze—can ill afford another setback. One supermarket executive predicts: "If the supermarket chains are hurt by the boycott, they'll start marking up groceries. They'll mark up cheeses, fish and everything else. The money has to come from another source to keep the stores operating."

CAMBODIAN BOMBING CONTINUES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Ms. ABZUG) is recognized for 10 minutes.

Ms. ABZUG. Mr. Speaker, now that the long agony of Vietnam appears to be ending, it is tempting to sigh with relief and turn to the pressing problems of our own Nation.

Unfortunately, appearances are decep-

tive: the war is not over, and the United States is still deeply involved in the conflict in Southeast Asia. Every day our bombers devastate the lovely land of Cambodia, just as they devastated Vietnam for so long.

Defense Secretary Richardson calls Cambodia "kind of a lingering corner of the war," which we will continue bombing as long as the Lon Nol government "requests" our help. William Sullivan, a State Department official reportedly said that the justification for the bombing is "the reelection of President Nixon." People who voted for Mr. Nixon must be surprised to know that.

The President supposedly has two lawyers frantically trying to come up with a constitutional justification for the bombing. He would not find one. Like the rest of the Asian war, this intervention has never been authorized by Congress. With the last of our troops and POW's coming home from Vietnam, that excuse can no longer be made.

The real purpose, obviously, is to demonstrate American support for the military regime which controls Cambodia. In other words, we are now doing in Cambodia precisely what we did for so long in Vietnam—bombing and killing daily in order to prop up an unwanted government in an Asian country. How long can this go on?

The New York Times today editorializes on the same question. I include their editorial at this point:

OUT, BUT NOT OUT

The expected return today of the last American combat troops and prisoners from Vietnam should be an occasion for universal relief and rejoicing, marking the end of the long and anguished United States intervention in Indochina. To most Americans it is inconceivable that this country would again become militarily involved in a regime so remote from any vital national strategic interest.

And yet intervention persists. United States military aircraft based in Thailand continue to devastate the countryside of Cambodia in support of a shaky military regime. The White House says this bombing will continue until Communist forces in Cambodia stop their military operations and agree to a cease-fire, which at the moment appears to be an extremely remote possibility.

Any further American military action in Cambodia after the completion of disengagement from Vietnam would raise the most serious constitutional questions. Following repeal of the Tonkin Gulf Resolution, President Nixon's sole justification for operations in Indochina has been his alleged powers as President and Commander in Chief "to protect American forces when they are engaged in military actions." Even this dubious claim evaporates with the departure of the last United States combat soldier from Vietnam.

So far neither the Defense nor the State Department has been able to come up with a substitute justification for what is going on in Cambodia although a State Department official reportedly told Congressional aides that his department had two lawyers working on the problem. White House Press Secretary Ronald Ziegler has lamely explained that the heavy daily bombings are being conducted because "the Cambodian Government has asked for our air support."

That is a doctrine for Presidential intervention in foreign conflicts that must not be allowed to stand unchallenged. It would

mean, in effect, an assumption of Presidential authority to invoke the devastating power of American air forces wherever and whenever a government which enjoyed White House sympathy was in trouble.

Failure of Congress to assert its own constitutional prerogatives promptly and forcefully could result in continuing unauthorized bombing in Cambodia and would establish a perilous precedent for future Presidential intervention in trouble spots around the world, not excluding an already threatened resumption of American hostilities in Vietnam.

DOWNWARD AVERAGING—TAX EQUITY FOR THOSE WITH DIMINISHING INCOMES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ROSTENKOWSKI) is recognized for 5 minutes.

Mr. ROSTENKOWSKI. Mr. Speaker, I have taken this special order today to discuss legislation that I have introduced along with my colleague, the Honorable JAMES V. STANTON, which would amend the Internal Revenue Code to allow taxpayers who have had sharp declines in income to benefit from the same averaging provisions that are now available only for those individuals who have had significant increases in their income over previous years.

This legislation is embodied in two bills, H.R. 2416, and H.R. 3168, which we introduced in the opening weeks of this session. They would permit a taxpayer who suffers a reduction of income to, in effect, average his income for that year with his income from a 4-year base period. Such a taxpayer may be said to have overpaid his taxes during the 4-year base period. Under the bill, he would recover this "overpayment" through reduced taxes in the current year, and in some instances he might even be entitled to a refund. It is estimated that, if this bill had been in effect for calendar year 1971, Federal individual income tax liabilities would have been decreased by about \$335 million, assuming everyone eligible for downside averaging under the bill would have elected to use this procedure.

What we are trying to do here is restore reasonableness to the tax laws, which supposedly are based on the principle of progressive taxation—the more you earn, the more you pay. The obvious corollary is that, the less you earn, the less you should be obligated to pay.

It does not make sense to me that all the breaks in this area go to people who really should pay higher tax in a year when they can best afford it—while at the same time, others who can least afford it, because of bad breaks, get no consideration at all from the law.

Under our proposal, the tax is computed by (1) determining the average income for the base period; (2) computing the tax on 80 percent of that amount; (3) subtracting the current year's income from 80 percent of the average base period income to determine the amount of the reduction in income; (4) computing the marginal tax on one-fifth of the reduction in income and multiplying that tax by 5; (5) and by

subtracting the final figure in step (4) from the tax computed in step (2).

To be eligible to use these averaging provisions, the taxpayer would have to suffer a reduction in income of at least \$3,000, as compared to 80 percent of the 4-year base period average. Also, he would have to include in income unemployment benefits not otherwise taxable.

For example, if a worker with an average base period income of \$18,000 were laid off for part of the year, and his taxable income plus unemployment compensation amounted to \$10,000, his savings under the bill would be \$60. If he had no income—and no unemployment compensation—his tax savings under the bill would rise to \$668.

The following table illustrates the effect of the bill:

ASSUME TAXPAYER, FILING JOINT RETURN, WITH \$18,000 AVERAGE BASE PERIOD INCOME

Current year taxable income plus unemployment compensation	Tax under the bill	Regular tax	Tax saving from the bill
\$10,000	\$1,760	\$1,820	\$60
\$8,000	1,260	1,380	120
\$6,000	760	1,000	240
\$4,000	260	620	360
\$2,000 (credit)	228	290	518
0 (credit)	668	0	668

Persons who have a reduction in income due to retirement would not be eligible to use these provisions. Retired persons already receive a number of substantial tax breaks under the revenue laws such as the exclusion of social security benefits and the retirement income credit. Also, retired persons generally have diminished family responsibilities and an opportunity to plan for retirement.

The primary purpose of this bill is to help persons who have no opportunity to plan—for example; those persons out of work because of a plant shutdown; workers who are laid off; and families where a wife quits work in a given year to give birth to a child.

Persons who elect to take advantage of downside averaging would have to forgo certain other tax benefits, for example, the alternative capital gains tax and the exclusion of tax-exempt interest on bonds. In most cases these provisions will not affect persons whose primary source of income is wages from employment.

On the whole, the result of this bill would be to allow individuals who suffer a reduction in income to receive credit for taxes paid in years in which income was higher, thus lowering their taxes in the current year.

As a member of the Ways and Means Committee which is presently considering potential changes in the Internal Revenue Code, I am sponsoring this legislation because I feel that it will bring about greater equity in our tax system for those who have suffered sharp declines in income. I ask that my colleagues on the committee and in the Congress consider the possibilities of this legislation, both now and when my colleague Jim STANTON comes before the Ways and Means Committee on April 17, 1973, to testify on its behalf.

IN SUPPORT OF DOWNWARD AVERAGING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. JAMES V. STANTON) is recognized for 5 minutes.

Mr. JAMES V. STANTON. Mr. Speaker, I would like to associate myself with the remarks of the gentleman from Illinois (Mr. ROSTENKOWSKI) on the need for downward averaging to promote greater equity in the tax laws.

Although I will appear before the Ways and Means Committee next month to explain our proposal in greater detail, I would at this point, like to outline what I believe are some of the chief arguments in support of our proposal.

Our legislation would impart a reverse twist to income averaging. This tax-saving device, long enconced in the Internal Revenue Code, currently has a thrust only in one direction. It is available exclusively to those fortunate enough to suddenly enjoy a very good year—for example, movie stars and athletes who make it big, and ordinary persons whose income soars in a given year because of a promotion or transfer to a much higher paying job.

Under our plan, the benefits of averaging would be extended to other classes of persons—for example, those thrown out of work because of a plant shutdown; workers who are laid off; persons in their first year of retirement; and families where a wife quits work in a given year, say, to give birth to a child.

The IRS instructional booklet distributed with the 1971 income tax forms advises the reader that he or she can qualify for averaging "if after subtracting \$3,000 from your 1971 taxable income, the balance is more than 30 percent of the sum of your 4 prior years' taxable income". By averaging the high income from the current year with the lesser incomes from prior years, the well-heeled taxpayer thus is able to show for tax purposes, a lower figure in the current year than he actually earned. His tax is reduced accordingly.

Similarly, the less fortunate person could show through the averaging method that he had overpaid his taxes in the 4 prior years, since the low income from the current year would bring down his average for the prior years. Consequently, this taxpayer would pay less than otherwise would be required of him in the current year, so he could make up for the overpayment of the prior years. If the gap were wide enough, he could qualify for a refund of taxes withheld from his pay in the current year.

This proposal, as Congressman ROSTENKOWSKI pointed out, is an attempt to fully utilize the concept of progressive taxation. Those who are able to average their income to avoid going into a higher bracket should not be placed in a better position than those whose income has been on the decline, but are unable to recoup for higher taxes paid during their previous good years. In fact, it is my opinion that the principle of upward averaging should not be allowed to remain in the Internal Revenue Code unless

downward averaging is inserted in order to eliminate the discrimination which is inherent in any one-way averaging.

Our legislation, which, of course, would only apply to individual taxpayers as are defined under section 1303(a) of the Code, would cost far less than does the existing averaging provision. In addition, it would provide relief to a far more deserving segment of taxpayers, that is, those whose income is on the decline, rather than those who resort to averaging merely as a means of softening the impact of higher taxes which are the result of a far more productive year.

EXPERIENCE OF IRVINGTON, N.J., ON CODE ENFORCEMENT AND REHABILITATION PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. MINISH), is recognized for 5 minutes.

Mr. MINISH. Mr. Speaker, I rise to call the attention of the House to the experience of Irvington, N.J. with a very successful code enforcement and rehabilitation loan program.

In the housing field, as in a number of domestic program areas, the administration has chosen to employ a meat-ax approach which falls indiscriminately upon both the good and the bad.

Last week, Mr. James Zangari, executive-director of the Irvington South Ward Improvement Project, presented testimony to the Housing Subcommittee on efforts, with Federal assistance, to halt the spread of urban blight in Irvington.

I commend Mr. Zangari for his constructive presentation and I recommend the testimony to all Members of the House as an outstanding example of how Federal housing programs, competently administered, can and do work to improve a community and the lives of its residents:

SOUTH WARD IMPROVEMENT PROJECT Irvington, N.J.

Chairman Barrett, and Members of the Housing Sub-Committee:

I herewith submit, on behalf of the good people of Irvington, New Jersey a plea for the continuance of the HUD programs relating to rehabilitation with Federal Financial Assistance.

I would like to submit some information about Irvington, giving some pertinent facts and statistics. Geographically, we are set in a most desirable position, having the Garden State Parkway and the soon to be completed Route #78, which enables one to travel in all four directions with a minimum of time and effort. Although, we are but three (3) square miles, there are 60,000 inhabitants having thirty-four (34) persons residing on every acre of land; making Irvington the most densely populated Town in the Country. We have become a haven for senior citizens, numbering 20,000 and 15,000 are of ages to 18 years old. In effect, this represents 58% of our total population. Considering that the 1970 census lists Irvington as a lower middle income Community, you can appreciate the burden which lies on the productive part of our Community. Struggling to maintain our dignity, and yet, survive, we have tightened our belts to a point where it just cannot be asked for more, without further agony and despair to our residents.

We have been penalized in the distribu-

tion of Revenue Sharing Funds because our Community is called "Town of Irvington." We need your continued help in receiving funds, to stabilize our Community and to relieve the tax burden that has become a noose so tight that we cannot breathe.

At this point, I am giving documented evidence that justifiably, Irvington can boast with pride on matters where Federal Funding are concerned. We boast of one of the best administered Housing Authority's in the Country, and I am sure the records will verify my statement. I boast of our unique program known as the South Ward Improvement Project, N.J. E-11, with these documented figures as of March 9, 1973:

	Structures	Residential	Non-residential	Mixed	Dwelling units
Total in area and inspected to date.....	2,069	1,857	131	81	4,362
Total closed.....	1,730	1,554	118	58	3,546
Balance to be re-inspected or awaiting assistance.....	339	303	13	23	816

I would also like to insert, for the record, that I have a program that is run effectively, and to substantiate my statement, here is a breakdown of cost:

DIRECT FEDERAL REHABILITATION FUNDS FROM JULY 1, 1969 THROUGH MARCH 9, 1972

\$638,109.00 disbursed, \$.5392 cost per dollar to administer.

DIRECT FEDERAL REHABILITATION FUNDS FROM AUGUST 1, 1972 THROUGH MARCH 9, 1973

\$222,812.00 disbursed, \$.2900 cost per dollar to administer.

DIRECT FEDERAL REHABILITATION FUNDS FROM JULY 1, 1969 THROUGH MARCH 9, 1973

\$861,121 disbursed, \$.4763 cost per dollar to administer.

As you can see by the above figures, the administration cost in relation to Federal Financial Assistance to property owners in our program has been steadily reduced as we moved along with our project. This has been accomplished due to the fact that my staff has gained the needed expertise to handle and expedite all cases with experience gained in passage of time. We are gratified that our documented figures show, very clearly, that, the residents of the Project Area are getting dollars worth of service for every dollar's worth of Federal money (tax money) being spent in our project. We have had a remarkable public improvement program in the project area. Today, anyone can walk proudly through and see the physical change that has been transplanted in the area. This could only have happened through the good graces of the assistance that was provided by the Federal Government. I feel it would be disastrous to our Community, and to our Country, to curb the momentum we have generated in the past few years in the area of rehabilitation. It is imperative that Section 312 of the National Housing Act be continued beyond the current expiration date of June 30, 1973.

If you can appreciate the feeling of our urban community struggling to maintain its dignity, then we respectfully urge your continuing support for Irvington and the Nation.

Respectfully submitted,

JAMES ZANGARI,
Executive Director.

THE RHODESIAN CLOSING OF THE ZAMBIAN BORDER

The SPEAKER pro tempore. Under a previous order of the House, the gentle-

man from Michigan (Mr. Diggs) is recognized for 5 minutes.

Mr. DIGGS. Mr. Speaker, the situation on the Zambia/Southern Rhodesia border has recently been a subject of great concern to those interested in bringing freedom and democracy to the minority-ruled states of Southern Africa. In January the illegal regime in Southern Rhodesia arbitrarily closed the border to all Zambian traffic, in an attempt to sabotage the economy of this land-locked country. This proved in fact to have been a rash move. Zambia is finding alternative means of transportation for its vital copper exports, and has refused to accept this attempt at blackmail by the illegal regime.

It has gone further, in making arrangements for the permanent redirection of all its external trade away from Rhodesia. This can be achieved only at great cost and national effort, and it is vitally important that the Government should be ready to assist Zambia by all practical means to tighten the sanctions net around the rebel regime, just as we assisted Zambia in the early days of sanctions by participating in the British airlift. When the special UN mission to Zambia has reported on the needs, the United States should be ready to contribute toward the assistance given without delay.

We should not forget, however, that in allowing American business interests to import Southern Rhodesian commodities, especially ferrochrome—which is helping to depress domestic ferrochrome production—chrome and nickel, the United States is rendering worthless all the sacrifices made by Zambia and other poor countries in Africa in their observance of mandatory United Nations sanctions against the illegal regime in Southern Rhodesia.

It is vitally important that the U.S. Congress should repeal the notorious Byrd amendment, section 503 of the Military Procurement Act, and that the administration should throw its full weight behind this move. With the Byrd amendment on the books, the United States is seen in the international arena as a saboteur of a major collective security operation, at a point where the effects are becoming increasingly evident in Southern Rhodesia and exerting great pressure on the regime. The crisis situation on the Zambesi is in large part a panic response by the illegal regime to the economic pressures, combined with the resurgence of the liberation struggle inside the territory.

To clarify the gravity of this situation, we should take special note of the statements made at the meeting of the United Nations Security Council on the Rhodesian confrontation, January 29 through February 1, especially the following excerpts from the statements of the Zambian representative, Mr. Paul Lusaka, and the U.S. Representative, Mr. Christopher Phillips.

Mr. Speaker, I wish to insert the following excerpts from Mr. Lusaka's statement for the thoughtful attention of my colleagues:

STATEMENT OF PERMANENT REPRESENTATIVE OF ZAMBIA BEFORE THE SECURITY COUNCIL, JANUARY 29, 1973

This august body is meeting to consider an extremely dangerous situation which now threatens the whole of southern Africa. On 9 January this year the illegal régime of Southern Rhodesia closed its border with Zambia, demanding that my country abandon its support for the struggle of the oppressed majority to which Zimbabwe rightly belongs. That was an act of aggression carried out by a rebel régime which has no legal status or power, whose racist policies have been repeatedly condemned by the community of nations and against which the United Nations has imposed mandatory economic sanctions.

I am sure that the members of this Council will appreciate the seriousness of the aggressive acts which have been committed against Zambia. The illegal régime of Southern Rhodesia has declared an economic war against Zambia and supports this war with incidents of the nature of military aggression. It is using economic pressure to hold Zambia to ransom.

By closing the border the Smith régime hoped to inflict serious damage to our economy. The move was an act of desperation to undermine the Zambian economy in order to induce the Zambian people to surrender their rights and freedom and to submit to the authority of a rebel régime. My Government regards the action of the rebels as a siege designed to gain political concessions, that is to say, to stop Zambia from supporting the liberation movement and reduce it to the status of a puppet government.

The Smith régime has for some years faced internal trouble from the 5 million people of Zimbabwe. In 1967, 1968 and 1969 the struggle for independence in Zimbabwe was intensified. The lull in 1970 and 1971 was mistaken by the Smith régime as a defeat of the liberation forces, but the Pearce Commission rekindled nationalism and the people of Zimbabwe have shown their preparedness to make more sacrifices after shedding blood for their liberty during the Pearce Commission's visit.

There is a further and more ominous dimension to this crisis. The collusion of the Salisbury and Pretoria racist and fascist régimes is well known to the members of this Council. Since UDI in 1965, Zambia has warned that the southern African crisis is a threat to international peace and security. Indeed, in 1967 South Africa troops moved into Southern Rhodesia and have since remained there as an occupation force. Tension has been rising. Vorster has issued threats against Zambia; Smith has issued threats against Zambia; and both of them, that is Pretoria and Salisbury, have from time to time committed acts of aggression against Zambia, including violations of our territory by land, air and water. They have laid land mines on our side of the border and have engaged in acts of sabotage and subversion. Since 1964 some 45 agents of minority régimes have been arrested, tried and convicted by Zambia for espionage. Twenty-three of these were in 1972 alone. That is the picture that has emerged from the presence of South Africa forces in Southern Rhodesia.

Vorster himself has not denied the presence of South African forces in Southern Rhodesia. The Council will recall that Vorster has consistently declared and only recently reiterated that when a neighbour's house is on fire, one does not need an agreement to help that neighbour. I might add that the Smith régime has also confirmed this fact by admitting the death of at least two so-called South African policemen and a number of others injured during a confrontation with freedom-fighters inside Southern Rhodesia.

To date, and during this month alone, we have four Zambians killed by land mine explosions and several seriously injured. The numbers are likely to rise since there are land mines still undetected.

Those incidents are the most recent acts of aggression against my country. They are deliberately designed to augment the present siege, thereby creating a new and very dangerous situation.

This danger is in the logic of the situation. The real reason for the moves taken by South Africa and the Smith régime is to stem nationalist feeling which is sweeping through all the oppressed countries of southern Africa. Indeed in Southern Rhodesia it is now stronger than ever before, as the resounding "no" to the Pearce Commission clearly demonstrated in 1972. Freedom fighters have recently achieved important victories in Rhodesia, and the Smith régime has admitted that the freedom fighters are receiving unqualified support from the oppressed masses in their country. This is why it has arbitrarily introduced new and unprecedented inhuman and savage measures against individuals or communities suspected of sympathising with those who are struggling for the liberation of their motherland. What the Smith régime fears is that the liberation struggle will move from one success story to another and that it will become impossible to maintain white minority rule.

Only a few days ago, my Foreign Minister, the Hon. E.H.K. Mudenda, echoed this warning of my President when he referred to the fact that a situation very much like the one in Viet-Nam was developing in southern Africa because Southern Rhodesia and South Africa are evidently bent upon using force to maintain the *status quo*. This can bring nothing but tragedy. It would be a tragedy which could involve the whole world.

Judging by the present trends there is no reason to doubt that Southern Rhodesia would contemplate the bombing of targets in Zambia. At this point I want to make it abundantly clear that in the event of the rebels and/or their allies committing such a mad act other countries would be involved since Zambia reserves its right to call upon the assistance of friendly nations. I say this because we have a right to exist as a nation and to defend our independence and sovereignty.

Is it not obvious that as the liberation struggle gathers force these régimes will become more and more desperate? And is it not obvious that their perverted logic will drive them to even more extreme acts of violence? Southern Rhodesia and South Africa must be stopped now. The world cannot afford to allow this violence to continue.

Zambia supports the cause of majority rule in Zimbabwe. This Council and the General Assembly have passed numerous resolutions on Southern Rhodesia which explicitly support that cause. Indeed, the sanctions imposed by this Council against Southern Rhodesia—which I shall dwell upon later—were intended to bring the illegal régime to heel. Zambia's support for the liberation struggle in Zimbabwe is, needless to say, in conformity with the commitment of the United Nations. Southern Rhodesia has mounted a siege against my country because Zambia has sought to uphold the principles of the Charter. The present crisis is therefore one which directly involves the United Nations. It is therefore incumbent upon the United Nations to take effective action in order to achieve the objectives of the Charter and in conformity with the nu-

merous Security Council and General Assembly resolutions, and in particular the Declaration on the Granting of Independence to Colonial Countries and Peoples, resolution 1514 (XV) of 14 December 1960.

In the past the British Government has expressed concern about the adverse effects which comprehensive mandatory sanctions against the rebel regime in South Rhodesia would have on Zambia. Consequent upon the present siege, my Government decided once and for all to establish permanent alternative routes for its imports and exports and to abandon the southern route altogether as this route could no longer be relied upon. Thus Zambia can no longer be used as an excuse for the non-application of comprehensive mandatory sanctions. There is therefore now a golden opportunity for the international community to tighten the sanctions further in order to bring the Smith regime to heel.

STATEMENT OF U.S. REPRESENTATIVE MR. CHRISTOPHER PHILLIPS

Turning to the complaint raised by Zambia, it is clear that, in view of the economic relationships that existed between Zambia and Southern Rhodesia prior to the illegal declaration of independence, it would have imposed a heavy economic burden for Zambia to sever all of its links with Southern Rhodesia. Despite this, Zambia has since 1965 done its best to comply with the sanctions instituted against Southern Rhodesia. If Zambia was to reduce its dependence on Southern Rhodesia it was clear at the outset that Zambia would require outside assistance. This assistance was almost immediately forthcoming. Many Member States, including the United States, responded to Zambia's request for help during the early days of sanctions. The United States, for example, was quick to respond to Zambia's appeal. During the period January through April 1966 it provided, at a cost of \$4.5 million, a comprehensive airlift for the transport of petroleum products. During that period United States planes made some 500 round trips, transporting 4 million gallons of such products from other points in Africa to Zambia—a unique, costly, but very necessary, airlift.

In addition, the United States provided some \$38 million towards the construction of the great north road, which has enabled Zambia to transport by truck its copper to Tanzania for export to other parts of the world and to transport its imports.

Additional assistance was also provided by my Government as well as by other countries. This assistance has strengthened Zambia's ability to weather the adverse effects on its economy of the application of sanctions against Southern Rhodesia.

The United States has followed Zambia's plight with close attention, and we have been in close touch with the Zambia Government since the border was closed. We are very much aware of the problems for Zambia resulting from this act. It is unfortunate that the closing of the Zambia-Southern Rhodesia border has forced Zambia to take drastic measures and to seek alternate routes for its goods. The present difficult circumstances in which Zambia finds itself obviously underscore the need to examine carefully appropriate ways in which Zambia might be assisted.

REHABILITATION ACT OF 1973

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. BRADEMAS) is recognized for 5 minutes.

CXIX—641—Part 8

Mr. BRADEMAS. Mr. Speaker, on March 27, President Nixon dismayed many of us by vetoing, yet again, a measure that would have meant much to the 20 million handicapped adults in our land.

I refer, of course, to the Rehabilitation Act of 1973 which Congress sent back to the President, this month, after he had vetoed a similar, but more expensive, bill last October.

And my distress with reference to the President's actions, Mr. Speaker, is increased as I recall eloquent testimony, before my subcommittee just a few days ago, on another measure, dealing in the education of handicapped children.

That testimony came from Dr. Frances Connor, chairman of the Department of Special Education, Teachers' College, Columbia University.

Said Dr. Connor:

I know I am not here to talk about rehabilitation. But handicapped adults in this country, Mr. Congressman, are sitting rotting their lives away.

The doorkeeper at the Lexington School for the Deaf, happens to be a 70-year old man who is working these last years of his life because he has to care for his 37-year old son, at home, who is totally unable to talk, and barely able to walk.

But that father, Mr. Chairman, who should be at home enjoying what are, I am told, the enormous benefits of the Social Security Act, is now dying of cancer. And all of a sudden he has recognized that he had better do something to enable his crippled son to take care of himself when he is on his own.

I sent him to vocational rehabilitation and they are saying there is a long waiting list and they won't be able to do anything for the 37-year old "boy" for several months. The old man, Mr. Chairman, will not live beyond a few more weeks.

Yet, Mr. Speaker, the President has, once again, rejected a measure passed twice with overwhelming bipartisan support in both the House and the Senate, which might have been helpful in this tragic situation.

For the Rehabilitation Act of 1973, Mr. Speaker, could have helped the 37-year-old son attain some degree of self-reliance, and, thereby, eased the pain and worry of his father's last days.

It is not my intention here, Mr. Speaker, to take issue with the astonishing message that accompanied President Nixon's veto of the Rehabilitation Act.

But I want to remind my colleagues of the appalling human problems to which this legislation addresses itself, and of the enormous significance of this bill to the millions of crippled, and otherwise disabled, Americans in this great land.

Consider that this bill:

Extends and strengthens the 52-year-old vocational rehabilitation program for disabled adults;

Provides new emphasis for the severely disabled who have not been adequately served in the past; and

Strengthens and highlights our concern for existing programs for the elderly deaf-blind, and persons suffering from spinal cord injury or serious kidney disease.

Mr. Speaker, I insert in the RECORD at this point statements by several of my distinguished colleagues who express their shock and dismay at the President's unfortunate action.

These documents include statements by the distinguished chairman of the Committee on Education and Labor, Mr. PERKINS of Kentucky; the distinguished Senate sponsor of this measure, Senator ALAN CRANSTON of California; the distinguished Senator from West Virginia who is such an effective champion of the handicapped, Senator JENNINGS RANDOLPH; and the distinguished chairman of the Senate Foreign Relations Committee, Senator J. WILLIAM FULBRIGHT, who includes in his statement a resolution overwhelmingly approved by the Arkansas General Assembly applauding congressional passage of the Rehabilitation Act.

The statements follow:

STATEMENT BY HON. CARL D. PERKINS, OF KENTUCKY, CHAIRMAN, COMMITTEE ON EDUCATION AND LABOR, ON THE VETO OF THE REHABILITATION ACT OF 1973

I am dismayed and deeply disappointed over the President's unjustified action in vetoing the rehabilitation Act for physically and mentally disabled Americans. In disapproving the bill, the President has done serious damage to one of the great success stories in this Nation's effort to serve its people.

The vocational rehabilitation movement has developed the best blend of public and voluntary organization service and the most effective working relationships of any program in the field of human service. This humanitarian effort which was struck down today has been the literal salvation for millions of disabled Americans.

Instead of the expanded and improved program overwhelmingly approved by the Congress, the President's action will force thousands and thousands of those now disabled to live continued lives of dependency, unproductivity and uncertainty. Today's action will be felt the hardest by those who are the most severely disabled, for the vetoed bill would have concentrated resources on those with multiple disabilities—the blind-deaf, the severely physically handicapped, the spinal cord injured, and those afflicted with end-stage renal diseases.

It is alleged that the bill is fiscally irresponsible. First, this is an authorization bill—not a spending bill. Secondly, the revised bill is \$900,000,000 less in authorizations than last year's vetoed bill—a reduction of over 25%. Finally, the FY 1973 authorization in the vetoed measure is less than the authorizations for FY 1971 and FY 1972. Measured by any standard, this is a fiscally responsible bill. The only irresponsible action taken with respect to this measure was taken earlier today.

Great hopes have been turned into bitter disappointment and grave uncertainty—but only temporarily. I trust the Congress will act to correct this serious misjudgment on the part of the Administration.

STATEMENT BY SENATOR ALAN CRANSTON, PRINCIPAL AUTHOR AND SENATE FLOOR MANAGER OF THE REHABILITATION ACT OF 1973 ON THE PRESIDENTIAL VETO

I share President Nixon's desire for fiscal responsibility, a ceiling on spending, no new taxes and no broader deficits. But none of

these commendable concerns have any relevance to this bill.

The President clearly hasn't read this bill and doesn't know what's in it. I suggest that he fire whoever has again advised him to veto it.

President Nixon for the second time has vetoed a bill designed to give millions of severely handicapped Americans a decent chance for a job and for a dignified, more independent way of life than dependence on government handouts.

If the President meant to include people who are crippled, paralyzed or blind when he admonished the American people to ask not what the government can do for them but rather what they can do for themselves, then the President was not only heartless, but has shown himself to be budgetarily blind.

The programs under this bill have proven to be among the most cost-effective of any in the federal government. For every one dollar spent through these programs, \$3-to-\$5 is returned to the Treasury through taxes paid by rehabilitated workers and through savings in reduced public assistance, unemployment compensation, social security and Medicaid payments.

The Congress has met the President more than half way. We cut the amount authorized to be appropriated over the next three years by \$881 million from the previously vetoed bill. The authorization we requested for fiscal 1973 is actually \$97 million less than last year's figure. But our effort at reasonable compromise did not satisfy an Administration that is more obsessed with confrontation with the Congress than it is concerned about handicapped people.

Unhappily for fiscal common sense and for the conscience of America, prospects of a Congressional override are mixed. The Senate passed its measure (S. 7) Feb. 28 by an 86-to-2 vote, and it accepted the House compromise version Mar. 15 by voice vote. So the outlook for an override in the Senate is hopeful. The situation in the House is less encouraging. Though Members passed what was the final version of the bill (H.R. 17) by a vote of 318-to-57, they had previously defeated the Administration substitute (the Landgrebe Amendment) by a vote of only 213-to-166.

Nonetheless I have faith in the right thinking of the American people and their representatives and it is my profound hope that the Congress, in the name of common sense and of common decency, will vote to reject this cruel but—for this Administration—not unusual act.

[From the CONGRESSIONAL RECORD, Mar. 27, 1973]

SENATOR RANDOLPH URGES OVERRIDE OF THE SECOND VETO BY THE PRESIDENT OF THE REHABILITATION ACT

Mr. RANDOLPH. Mr. President, President Nixon has disapproved for the second time, the Rehabilitation Act. In doing so, he has dashed the hopes of millions of handicapped Americans who urgently need the services which would be provided by this measure.

Last October the 92d Congress unanimously approved the Rehabilitation Act, recognizing its importance in the transformation of handicapped individuals, many, many of whom are welfare recipients and drains on the tax dollar, into productive, self-sustaining, taxpaying citizens able to live in dignity, with hope and purpose in their lives. The President did not agree. He pocket vetoed the measure terming it "fiscally irresponsible."

On January 4, 1973, 19 colleagues joined me in introducing the measure again. Congress once more adopted S. 7, the Rehabilitation Act. This year, taking cognizance of the President's assertion that the act was "fiscally irresponsible," Congress reduced the level of authorizations by \$900 million over a 3-year period. We were genuinely trying to present

to the Chief Executive a bill he would approve. I believe that S. 7 as enacted by Congress would be such a bill. The authorization level for the first year is actually less than that of the existing Vocational Rehabilitation Act, which is narrower in scope.

I am very, very saddened by the action by the President on this vital measure, which has received the enthusiastic support and endorsement of every national group and organization working with handicapped individuals.

The President, in my opinion, has taken an ill-advised action in vetoing the measure. The vocational rehabilitation program has proven to be perhaps the most cost-beneficial effort in the Federal Government. For every dollar invested on rehabilitating a handicapped individual, at least \$3, and as much as \$70, is returned to the economy in reduced welfare payments, increased income, and increased tax revenues for Federal, State, and local governments.

As chairman of the Senate Subcommittee on the Handicapped, and as a citizen who is concerned with how this Nation treats its handicapped citizens, I earnestly hope that both the Senate and the House of Representatives will override President Nixon's tragic veto of this most important and urgently needed legislation.

[From the CONGRESSIONAL RECORD, Mar. 27, 1973]

THE PRESIDENT'S VETO OF THE VOCATIONAL REHABILITATION ACT OF 1973

Mr. FULBRIGHT. Mr. President, it is with much regret that I have just learned of the President's veto of S. 7, the Vocational Rehabilitation Act of 1973. S. 7 is the major piece of Federal legislation affecting the handicapped and is vitally needed by the millions of our citizens who are in the unfortunate position of requiring its benefits. Quite wisely, Congress made this legislation a matter of the highest priority in the 93d Congress, following the President's veto of essentially the same bill, H.R. 8395, at the close of the last Congress.

In his veto message on S. 7 President Nixon gives fiscal irresponsibility as his principal objection to this legislation, alluding to the "big spenders who sweep aside budgetary restraints." Mr. President, as I must say again, if this administration is seriously concerned about controlling spending, it should focus on the billions of dollars which we devote annually to exotic weapons systems, foreign aid, and military bases abroad, not to mention the massive outlays in Southeast Asia typified by our bombing strikes which, I understand, are still in progress.

Recently the Arkansas General Assembly overwhelmingly approved a resolution commending the Congress for its foresight in creating and passing the Vocational Rehabilitation Act Amendments of 1972, which were vetoed by the President, and urging repassage by the 93d Congress. This is a very good example of the encouragement I have received from my State about the value of the rehabilitation activities and the need for their continuance, and I ask unanimous consent that the resolution be included in the RECORD at the conclusion of my remarks.

It would be difficult, Mr. President, for me to name a legislative program more vitally needed by our people than that envisioned in S. 7, and I very much hope that my colleagues will join me in voting to override the President's ill-advised action.

HOUSE CONCURRENT RESOLUTION 16 COMMENDING THE CONGRESS OF THE UNITED STATES FOR ITS FORESIGHT IN CREATING AND PASSING THE VOCATIONAL REHABILITATION ACT AMENDMENTS OF 1972 WHICH WERE VETOED BY THE PRESIDENT AND TO URGE THE REPASSAGE THEREOF BY THE CONGRESS

Whereas, the Congress of the United States of America exhibited great foresight in creat-

ing the magnificent Vocational Rehabilitation Act Amendments of 1972 (H.R. 17 and S. 7 which were identical to H.R. 8395) which were passed unanimously by both houses of the Congress in October, 1972; and

Whereas, this legislation was vetoed by the President of the United States; and

Whereas, the Vocational Rehabilitation program in Arkansas has provided services for years that have assisted thousands of citizens in this State in overcoming their physical, mental, and vocational handicaps, and has permitted them to lead productive lives; and

Whereas, the 1972 amendments to the Vocational Rehabilitation Act, as passed by the Congress, would have been new milestone legislation to continue the outstanding progress under the original Vocational Rehabilitation Act, and in addition, would have provided comprehensive services to many severely disabled who do not now receive appropriate services, including the spinal cord injured, chronic kidney diseased, and the low-achieving deaf, whose needs require specialized centers and comprehensive programs of care; and

Whereas, for the first time, the Vocational Rehabilitation Act Amendments of 1972 would have provided funds for basic research directed toward resolving problems in the field of spinal cord injured, and would have provided vitally and critically needed funds to enable the states to continue present vocational rehabilitation programs, and to initiate the new urgently needed programs for the neglected severely handicapped;

Now, therefore, be it resolved by the House of Representatives of the Sixty-Ninth General Assembly of the State of Arkansas, the Senate concurring therein: That the Arkansas General Assembly respectfully requests the Congress of the United States to reconsider and reenact the Vocational Rehabilitation Act Amendments of 1972, and the President of the United States is urged to approve said legislation, which will continue the existing programs of vocational rehabilitation benefitting thousands of citizens of this State and Nation, and providing new programs of service and hope for the neglected severely retarded.

Be it further resolved that upon adoption of this Resolution the Secretary of State of the State of Arkansas is requested to furnish copies of this Resolution to (1) President Richard M. Nixon, Mr. Caspar Weinberger, Secretary of Health, Education, and Welfare, each of whom are urged to reconsider their position with respect to the Vocational Rehabilitation Act Amendments of 1972; and (2) each member of the Arkansas Congressional Delegation, each of whom are urged to use their influence to bring about the reenactment and ultimate approval of the Vocational Rehabilitation Act Amendments of 1972.

And I also include, Mr. Speaker, materials developed by the House Select Subcommittee on Education, and the distinguished majority whip, Mr. McFALL of California, which describe the provisions contained in the Rehabilitation Act of 1973, as well as the history of this measure.

[Select Subcommittee on Education, Mar. 28, 1973]

REASONS CONGRESS SHOULD OVERRIDE THE PRESIDENT'S VETO OF THE REHABILITATION ACT OF 1973

What the Bill Does: Extends and strengthens the existing Vocational Rehabilitation program and adds a new program for severely disabled persons, including the elderly deaf-blind, persons with spinal cord injury, and persons with serious kidney disease.

Support for the Bill: For over 50 years the Vocational Rehabilitation program has had broad bipartisan support. In 1972 both the

House and Senate passed the Rehabilitation Bill unanimously.

In 1973 the Senate (by a vote of 86-2) and the House (by a vote of 318-57) passed the Rehabilitation Bill with an authorization of over \$900 million below the amount in the 1972 vetoed bill. (The House Education and Labor Committee had reported the 1973 bill by a 33-1 vote).

Benefits of Vocational Rehabilitation: Benefits of the national rehabilitation program relative to costs are conceded by all to be extremely high. Over three million handicapped Americans have been returned to productive and meaningful lives because of assistance from the program. In fiscal year 1972 alone, the estimated annual earnings of the 326,138 individuals rehabilitated total \$1 billion, a net increase of \$750 million in earnings from the time the individuals entered the rehabilitation system.

The Rehabilitation Services Administration estimates that, in addition to this contribution to the GNP, these individuals, at a minimum, will be contributing approximately 5% of their income, or \$58 million, in taxes to Federal, state and local governments. And these figures do not reflect the approximately \$33 million in savings to Federal and State governments in 1972 caused by removal of many rehabilitated persons from the public assistance rolls.

Need for Rehabilitation Bill: There are an estimated seven to twelve million handicapped individuals in the nation who have not realized their vocational potential. With the level of funding authorized in the Rehabilitation Bill just vetoed, rehabilitation services could be provided to a total of approximately two million handicapped individuals over the next two fiscal years using today's per case cost. This would leave at least five million handicapped persons who, at today's spending level, would not be served.

The simple fact is that we have a long way to go to meet the needs of our disabled fellow citizens.

ADMINISTRATION OBJECTIONS AND ANSWERS

Objection: The few opponents of the Rehabilitation Bill argue it is "fiscally irresponsible."

Answer: In order to meet Administration objections, the authorization was reduced more than \$900 million—from \$3.477 billion to \$2.6 billion—a cut of more than 25%. Furthermore, the authorization for fiscal year 1973 (\$913 million), is lower than the authorizations for FY '71 and '72 (\$1,010 and \$1,010 billion respectively).

Objection: The few opponents of the bill argue that it duplicates services already available under Medicare or Medicaid.

Answer: The types of medical services available to the handicapped vary from state to state and usually do not include the specific help which the disabled person needs. In addition, the Medicaid program does not offer a disabled client the range of rehabilitation services, such as counseling and training, which handicapped people need to move back into the work forces. Still further, Medicare payments are made only to persons covered under the Social Security law. Many handicapped persons are not covered by social security.

Objection: The few opponents of the bill argue that it diverts rehabilitation from its basically vocational objective.

Answer: By the addition of a new title (Title II), this bill merely makes explicit a commitment to persons with severe handicaps which the Administration itself expressed during committee hearings. (Note: This new Title is authorized separately and amounts to less than five percent of the total Vocational Rehabilitation program).

Many severely handicapped people covered by the new program are today refused assistance under the present program because

they are difficult to rehabilitate for employment. The vocational goal for these people has not been eliminated by this modest new program for the severely handicapped. If a vocational goal is found possible, these individuals will be transferred and provided services under the regular state program. For the few who are incapable of employment, this new program will hopefully assist them in becoming more self-sufficient, often enabling other members of the family to re-enter the work force.

Objection: The few opponents of the bill argue that it would create a proliferation of new categorical grant programs and bureaucratic structures.

Answer: The truth is that Title II programs for severely handicapped are special project programs aimed at stimulating state and local effort with the idea that they will be absorbed into the basic program at a later date.

The bill does create several national commissions, such as The National Commission on Transportation and Housing for Handicapped Individuals, as well as a voluntary system of state advisory councils on problems of the handicapped. None of these commissions are to have any Federal budgetary or administrative authority. Nearly every witness before congressional committees has stressed the need for such commissions to insure that minimum standards, such as adequate bathroom facilities for the handicapped in public buildings, are adequately met.

OFFICE OF JOHN J. McFALL, MAJORITY WHIP— HISTORY OF THE REHABILITATION ACT OF 1973 (S. 7)

ACTION BY 92D CONGRESS

Passed House March 20, 1972, unanimously (327-0).

Passed Senate September 26, 1972, unanimously (70-0).

Pocket Vetoed by President October 27, 1972, after Congress adjourned.

ACTION BY 92D CONGRESS

Reported by Senate Labor and Public Welfare Committee February 26 by a 16 to 0 vote.

Reported by House Committee on Education and Labor February 27 by 33 to 1 vote.

Passed Senate February 23 by 86 to 2 vote.

Passed House March 8 by 318 to 57 vote.

Conference Report adopted by voice vote in both Houses March 16.

Sent to White House March 22.

Vetoed by President March 27.

BILL SUMMARY

The Rehabilitation Act of 1973 revises, extends and improves programs for the handicapped previously authorized under the Vocational Rehabilitation Act. Established by Congress in 1920 and extended six times since, the vocational rehabilitation program provides a variety of services as needed to physically and mentally handicapped persons to prepare them for employment. These continuing services include, among others: hospital diagnosis and care for the handicapped; placement services to assist handicapped individuals to secure and maintain employment; maintenance and transportation as appropriate during rehabilitation.

Title II of The Rehabilitation Act of 1973 creates a new formula grant program to assist States in establishing programs for blind persons and those suffering from spinal cord injury and kidney disease who may be unemployable. Title II amounts to approximately 5% of the total authorization under the Act.

Benefits of the Act relative to costs are conceded to be high. It is estimated that the total annual earnings of the 326,138 individuals rehabilitated in fiscal year 1972 are at about \$1 billion, a net increase of \$750,000,000 of earnings from the time the individuals entered the rehabilitation system.

AUTHORIZATION LEVEL

The revised 1973 version of the bill authorizes programs of \$2.6 billion over the next three years, which is \$930 million less than the vetoed bill of \$3.5 billion, but approximately \$200 million more than the President's fiscal '74 budget request.

APPROPRIATION LEVEL

The legislation is an authorization bill only. The actual level of spending will be determined later after thorough review by the Congress in the appropriations bills. In the current year the authorization level was \$913.2 million and the appropriations totaled \$676.5 million (under a continuing resolution).

Mr. Speaker, I also insert a statement by Mr. E. B. Whitten, executive director of the National Rehabilitation Association, with reference to the President's veto of S. 7, along with a listing of the national organizations that are urging Congress to override the President's veto of this critical legislation. And I include with Mr. Whitten's material, also, Mr. Speaker, his association's analysis of the Rehabilitation Act of 1973 and its importance to the handicapped people of America.

The material follows:

STATEMENT OF E. B. WHITTEN, EXECUTIVE DIRECTOR OF THE NATIONAL REHABILITATION ASSOCIATION, MARCH 27, 1973

The organizations of and for the handicapped listed at the end of this release join in urging Congress to override the Presidential veto of S. 7, the Rehabilitation Act Amendments of 1972.

Programs financed under this Act are the principal dependence of physically and mentally handicapped youth and adults who want to become employable. This legislation contains authority for the state-federal vocational rehabilitation program, rehabilitation facilities, research and training.

All of the organizations listed have appealed to the President to sign the legislation but without avail. In fact, it is not clear that the messages even got to the President.

The legislation was enacted by Congress in 1972 following lengthy hearings. The bipartisan nature of the legislation was demonstrated by the fact that it passed without a dissenting vote in either branch. The executive branch, now, seems to be attempting to make a partisan issue of legislation which has always been strictly bipartisan. The issues raised by the executive have little basis in fact. An attachment to this release will clarify these issues.

All of the organizations joining in this effort deplore the use of legislation for handicapped individuals for a confrontation with Congress, especially, since the issues have very little validity.

S. 7, NEW REHABILITATION ACT AMENDMENTS FEATURES NOT FOUND IN PRESENT LEGISLATION OR IN THE ADMINISTRATION PROPOSAL

This is not an analysis of S 7 or the Administration bill. It is designed to point out specifically features of the new legislation important to the vocational rehabilitation programs which are not in existing law or in the Administration proposed legislation.

1. There has been no appropriation authority for any program financed under the Vocational Rehabilitation Act since June 30, 1972. If S 7 is not passed, there will be a long period of existence under continuing resolutions which hold expenditures to the 1972 level, which is even lower than the amount the President has recommended. The need for appropriation authority is a paramount issue.

2. \$50 million appropriated for vocational rehabilitation in 1973 in the supplemental appropriation bill passed by Congress is being held up until the new legislation is passed. The supplemental appropriation bill referred to the Rehabilitation Act of 1972, which was vetoed. It will be noted that S 7 is called the Rehabilitation Act of 1972, and this is the reason. This \$50 million will be lost to the program, if the legislation is not passed. Since states have been spending at the higher rate provided for in the appropriation that was passed, a chaotic condition will exist, if the new legislation is not passed clearing up this matter.

3. The Administration bill has authorizations that are less than the amount that the President has recommended for the program in 1973 and 1974. The authority in S 7 is reasonable, but permits growth.

4. The new bill provides for advanced funding which is badly needed by the states as well as the voluntary agencies. The failure to have appropriations passed until months after the beginning of the year for which funds are to be used is resulting in great hardship and makes intelligent planning almost impossible.

5. The bill provides for an innovation and expansion program, with half of the sums appropriated to be controlled by state priorities, the remainder by the priorities of the Commissioner of the Rehabilitation Services Administration. In present legislation, there is an innovation program, but no appropriations are being made for it. The new legislation strengthens the concept, makes clear the objectives, and will be a very useful program.

6. The new bill includes an earmarked program for providing rehabilitation services

to individuals for whom a vocational goal may not be feasible in the beginning. This will be extremely valuable to the state agencies in allowing them to accept more severely disabled persons. It will in no way dilute the emphasis on vocational rehabilitation, since the goal is that as many of these very severely disabled persons as possible will move into the regular vocational rehabilitation program. Since money for this program is earmarked, it can do no damage to the regular vocational rehabilitation program.

7. An improved definition of scope of vocational rehabilitation services and an improved and expanded definition of the handicapped individual is found in the new legislation. Although the change in these definitions is not a matter of great emergency yet, it will be very helpful.

8. The legislation provides for a Rehabilitation Services Administration in the Department of Health, Education, and Welfare with a Commissioner in charge and gives the Commissioner the responsibility for the administration of Titles I, II, and III, except for Section 309, the renal disease program, where administration could be optional. This is a very important provision. It will prevent the diffusion of rehabilitation programs throughout the Department and the serious division of authority that has existed between SRS and RSA in the administration of the program.

The above items refer specifically to the state-federal vocational rehabilitation program. It must be remembered, however, that the state-federal program cannot do its job well without improved community rehabilitation programs and facilities. For this reason, the following supplementary programs provided for in S 7 are very important to the state-federal vocational rehabilitation program.

1. One section authorizes special project appropriations for rehabilitation of renal disease victims. The pressures on rehabilitation and other agencies to serve this needy group is terrific. Although rehabilitation does not assume that it has or should have full responsibility for a renal disease program, it can make a much more important contribution to the desired results.

2. One section authorizes special project programs for spinal cord injured individuals. We simply do not have at this time the facilities and personnel or money to serve this very severely disabled group of individuals. In fact, it is estimated that state agencies are not serving over one out of ten individuals that suffer spinal cord injury each year. While the rehab agencies would not get the money for such programs directly, try their success in dealing with spinal cord injured persons depends upon the adequacy of programs and facilities serving this group.

3. One section authorizes the development of special programs for the low achieving deaf. We have a liberal arts college for the deaf and a technical school for the deaf but we have no centers especially prepared to serve the run-of-the-mill deaf individuals. Secondary schools for the deaf are totally inadequate to provide the total services needed by the deaf. The state-federal vocational rehabilitation program will be improved immensely, if we can get a network of demonstration-type special centers for the low achieving deaf.

4. Two sections of the legislation authorize programs of mortgage insurance and interest subsidies to facilitate the construction of rehabilitation facilities. We have legislation for rehabilitation facilities now, but we cannot get any money for them. This legislation will facilitate communities getting loans with which they can build badly needed facilities. The state vocational rehabilitation agencies depend to a very great extent upon rehabilitation facilities to serve many of their clients.

REHABILITATION ACT AMENDMENTS (S. 7) FACT SHEET

WHAT S. 7 IS

1. S. 7 is the Rehabilitation Act Amendments of 1972, passed unanimously by Congress in 1972, vetoed by the President, and repassed this year by a vote of 318-57 after substantial reduction in appropriation authority.

2. This bill extends appropriation authority for programs under the Vocational Rehabilitation Act for 1973, 1974, and for some programs for 1975. All appropriation authority expired July 1, 1972. \$50 million in appropriations for the current year are being held up awaiting passage.

3. The major change in the concept of rehabilitation services under this act is added emphasis on vocational rehabilitation services to the very severely disabled.

4. The bill includes special project programs to serve the older blind, spinal cord injured, renal disease victims and the deaf. It also contains authority for a national commission on architectural barriers and an architectural compliance board, which will attempt to see that housing and transportation are accessible to handicapped and older people.

WHAT S. 7 IS NOT

1. S. 7 is not a "new society program of the sixties". The first Vocational Rehabilitation Act was passed in 1920 and has been in continual operation since that time. It is the act under which over 300,000 handicapped individuals were rehabilitated into employment in 1972. Vocational rehabilitation is a successful, respected program of services to disabled people of the nation, a model of state-federal cooperation.

2. S. 7 is not a "budget busting bill". This legislation carries no appropriations at all, only appropriation authority. The budgetary and appropriation process will determine the amount actually made available. Appropriation authority is quite reasonable in relation to actual appropriations as the following table will show.

[In millions]

President's recommendation:	
1973	615
1974	660
S. 7:	
1973	700
1974	800

It will be seen that the President's recommendation for 1973 is 87% of the appropriation authority under S. 7, and for 1974 the President's recommendation is 80% of the authority under S. 7. There are relatively few pieces of legislation under which actual availability of funds is more closely related to appropriation authority. How the idea of a "budget busting bill" got started is difficult to understand. Authorizations for existing special project programs are about the same level as in the preceding legislation, and appropriation authority for the new special project programs is quite modest.

3. The bill does not launch "new categorical programs duplicating other existing programs". The sections having to do with the older blind, spinal cord injured, renal disease victim and the deaf are special project programs aimed at stimulating state and local effort with the idea that they will be absorbed into the basic program at a later date. This is an accepted approach of Congress in getting special emphasis upon difficult problems. Who could possibly resent these special emphases on programs for the blind, the spinal cord injured, renal disease victims, and the deaf.

4. The bill does not "dilute the vocational rehabilitation emphases by making it just another social service agency". Both the legislation and the report emphasizes the need for extending vocational rehabilitation services to the very severely disabled. The

small new program which permits acceptance of severely disabled individuals who may not have vocational objectives in the beginning carry separate appropriation authority, so it cannot be a substitute for a vocational rehabilitation program. Even in the new program, every possible effort is to be made to help individuals get to the point that a vocational objective is feasible.

5. This legislation is not "impossible to administer". Administrative provisions of the act make clear the intent of Congress that authority for administering programs for handicapped individuals be focused in the Rehabilitation Services Administration and that funds appropriated for vocational rehabilitation programs be expended for the specific purposes Congress has in mind. Other administrative features emphasize coordination of all programs for handicapped people within the Department of Health, Education, and Welfare. To say that such legislation cannot be administered is absurd.

6. This bill is not partisan legislation and efforts to make it such are a disservice to handicapped people. Rehabilitation legislation is now and always has been totally bipartisan.

THE PRESIDENT OF THE UNITED STATES AND THE REHABILITATION ACT AMENDMENTS OF 1972 (S. 7), MARCH 17, 1973

This legislation extends for three years appropriation authority for all titles of the Vocational Rehabilitation Act and initiates certain new supplementary programs. Its provisions include the statutory basis for the state-federal vocational rehabilitation program and the special project programs that support its efforts and make them more effective. This memorandum is in the nature of a request to the President of the United States that he sign the legislation promptly, thus enabling the programs depending upon the legislation to begin functioning again in a normal manner.

IDENTIFICATION OF SPONSOR

The National Rehabilitation Association is an organization of 35,000 individuals and organizations, all of whom are concerned for the rehabilitation of handicapped people. Approximately one-third of its members are professionals working in various areas of rehabilitation, two-thirds are laymen with a public interest concern for the rehabilitation of handicapped individuals. The National Rehabilitation Association is the forum in which the professional, the lay citizen, and handicapped people themselves meet to identify issues and problems in connection with the rehabilitation of handicapped individuals and to plan and promote programs leading toward this end.

The National Rehabilitation Association was a sponsor of HR 8395, which was passed by Congress in October 1972, and vetoed by the President. S. 7, which is now awaiting the President's signature, is very similar to the bill vetoed last year, except that appropriation authority has been substantially reduced, this being done at the request of the Administration. The legislation finally passed by Congress is different in numerous ways from HR 8395, as it was originally introduced. In fact, some of the features most objectionable to the Administration were not in their original bill. Working on the basis that all legislation is the result of compromise, we have done our best to keep the legislation consistent with our own principles and Association policy, but we have been willing to go along with some features that others consider more important than we do. We think that all of the new parts of the legislation are potentially helpful to handicapped people, and we have supported the passage of the bill in its present form. Although the National Rehabilitation Association accepts full responsibility for its con-

tents, the statement reflects the viewpoint of numerous organizations of and for the handicapped who participated in the legislative process that resulted in the passage of the legislation.

GENERAL CONSIDERATIONS

Our considered judgment is that the departures in the legislation from Administration policies are relatively minor in their impact upon the very popular and useful program of vocational rehabilitation in the United States. Ordinarily, one would assume the signing of the bill by the President, since to do so would be consistent with his support of vocational rehabilitation programs throughout his career as a member of the House of Representatives, the Senate, the Vice Presidency, and the Presidency. In light of the President's veto of similar legislation in October 1972 and the fact that there has not been any statement issuing from the White House indicating the intent of the President with respect to the legislation just passed by Congress, these comments express our viewpoint that the legislation should be signed promptly by the President.

It appears to us that it would be a disservice to the President for anyone to recommend to him that he veto this legislation. It has the bipartisan support of Congress. It reflects the labors of many individuals inside government and outside of government. It is supported unanimously by organizations of the handicapped, for the handicapped, and many other organizations devoted to the public interest. A veto would certainly be interpreted by the media, the public generally, and by all of those who are devoted to the rehabilitation of handicapped people as an ill-humored, misguided action based upon relatively petty issues. There can be absolutely no political advantage to a veto, and it can be very hurtful to the image of the President. In the following paragraphs, we shall speak directly to some of the issues raised by the Administration in testimony before the Congress on this legislation and reasons why the legislation is in the public interest.

GOAL ORIENTED PROGRAM

The vocational rehabilitation program is widely acclaimed as one of the great successes in state-federal partnership. In fact, it is often pointed out as the most successful demonstration of an effective state-federal relationship. This fact has been confirmed by representatives of all recent Administrations, including the present one. Rehabilitation has clear-cut objectives; it has achieved these objectives in a substantial way; and it has developed a system of accountability which leaves little room for doubt about what it is trying to do, how it is trying to do it, and what it is accomplishing. This evaluation is confirmed by studies done both within the government and outside of the government.

REHABILITATION CONSISTENT WITH ADMINISTRATION OBJECTIVES

The philosophy of the rehabilitation program is consistent with the philosophy of this Administration that a prime concern of government should be to help people help themselves. The new legislation does not depart from this concept. Handicapped individuals apply for assistance in becoming employable. They are provided such assistance. Their names are removed from agency rolls when maximum self-support is attained, or when it is determined that such self-support is not feasible. No one is on a rehabilitation roll indefinitely, so no habits of dependency can be developed. Rehabilitating over 300,000 persons per annum, this program is the nation's greatest bulwark against dependency resulting from physical and mental disability.

BIPARTISAN SUPPORT

This program has always had bipartisan support. The most substantial program gains of recent times have come as a result of the 1954 Amendments, passed by a Republican Congress and signed by a Republican President. These 1954 Amendments initiated programs of research and training and improved financial base for the state-federal vocational rehabilitation program. Substantial amendments to the Act were made in 1965 and in 1968, again with bipartisan support. The present legislation has received the same kind of enthusiastic support from members of both parties. A Presidential veto would leave the impression on many people that rehabilitation has become a partisan program.

The aspects of the legislation which are not consistent with current Administration policies are not of sufficient importance to justify serious consideration of a veto which would almost certainly be overridden. The objections expressed by Administration spokesmen are discussed in the following paragraphs.

FISCAL IRRESPONSIBILITY

Much has been said by Administration representatives with respect to "fiscal irresponsibility" reflected by the legislation. This argument is hard to understand and does not take into account the facts of the situation. The total appropriation for 1973, 1974, and 1975 has been reduced by about \$850,000,000 from the amount authorized by HR 8395, which was vetoed. The authorization for 1973 for the state-federal program is identical with authorization in existing legislation for 1972. The increase in authorizations for 1974 and 1975 is a reasonable amount, if the program is to continue to increase and expand its efforts to reduce dependency among the nation's handicapped citizens, which is the Number One national priority for this program.

Appropriation authority for the newly established categorical programs is extremely modest. The amounts authorized for special projects shows little increase over previous appropriation authority. The new Research and Training title does include new appropriation authority for Research and Training Centers, biomedical engineering and spinal cord injury.

Not only is the appropriation authority not excessive in light of the history of the various programs and mission given to the agencies that administer it, the Administration has not recommended nor has the Congress historically appropriated all the money authorized.

THE TRADITIONAL GOAL OF VOCATIONAL REHABILITATION

Some Administration spokesmen have insisted that new programs provided for in the legislation will divert the state-federal vocational rehabilitation program from its traditional goal of preparing disabled people for employment. This seems to refer to the comprehensive rehabilitation services provided for in Title II. Congress has emphasized in its report that it is not establishing a "new program", simply a second financing mechanism. Although a vocational goal will not have to be established as a condition to beginning services, a vocational goal will remain the ultimate goal in every case. This provision with separate financing will encourage the state vocational rehabilitation agencies to accept many more severely handicapped individuals for whom vocational goals cannot be clear at the beginning. Undoubtedly, a high proportion of these will ultimately achieve vocational rehabilitation. The accounting system will identify those whose achievements are less than vocational competence. Congress as well as the Administration is determined that the new pro-

gram will not be used to dilute the effectiveness of the vocational rehabilitation program. The authorizations for this program are separate from authorizations for the basic vocational rehabilitation program, so the new program cannot eat up the regular program. There is no difference in legislative and executive objectives, or our own.

CATEGORICAL PROGRAMS

Another objection expressed is that the legislation establishes a new series of categorical programs. This is true. This is not a new area of conflict between the legislative and executive branches. The executive branch of the government, almost traditionally, has opposed the categorical approach to the solution of problems, while the Congress has preferred categorical programs. In this legislation, the major categorical programs are those in the areas of spinal cord injury, end-stage renal disease, and the older blind. All of these are *special project programs*. Certainly, it can be argued that some of the services which will be provided under these special programs could be provided on a non-categorical basis. The truth is that services for these groups of handicapped individuals are very difficult and expensive. Services for such individuals cannot compete with services to the general disabled population without special emphasis. The renal disease program is, in the main, a stop-gap program to serve until such time as a national health insurance program can pick up the tab for comprehensive services to all victims of this malady. The situation in the area of comprehensive rehabilitation services to spinal cord injured individuals is appalling. Although we have a few good programs, enough to serve as demonstrations, less than 20% of the spinal cord injured individuals are receiving the kind of services we know how to provide. A special push is going to be required to make a significant breakthrough. The situation of the older blind is a pitiful one. Money is available for pensions but not for the kind of rehabilitative programs which are appropriate for them. Social service funds may be available theoretically, but not actually. Eventually, we hope that these programs can be absorbed into the regular rehabilitation program without the special project approach.

Incidentally, it must mean something that the American Kidney Foundation thinks that rehabilitation is the best vehicle to provide services to end-stage renal disease victims, and the Congress of Rehabilitation Medicine thinks that rehabilitation is the best vehicle for providing special project services to spinal cord injured individuals. Rehabilitation is truly a viable, flexible program human service oriented and goal oriented, operating with a minimum of red tape. Incidentally, the funds authorized for these special project programs are relatively small.

NEW BOARDS AND COMMISSIONS

Another objection to the legislation is that it establishes new boards and commissions, including an Office of the Handicapped in the Secretary's Office. With respect to the latter, the legislation and report make clear that this newly established office will have no budgetary or administrative authority, simply be a mechanism to be used by the Secretary of HEW to keep him informed of all programs in the Department having to do with handicapped individuals and to make recommendations to him with respect to steps to be taken in improving and coordinating these programs. The argument can be made, of course, that this office is unnecessary, and it may be. We have mixed feelings about such bodies ourselves. Potentially, it may be useful, and the restriction on its activities should prevent it becoming a nuisance.

The new boards and commissions have to do with the employment of handicapped in-

dividuals in government and in meeting housing and transportation needs of handicapped individuals. These items are addressed to extremely important problems, which we do not appear to be able to solve in the context of our present operation. It is felt that we need the prestige of distinguished people inside and outside the government to take the leadership in developing public policy which can result in their solution. A good illustration of present futility is seen in the fact that ten years of work with the authorities of the District of Columbia have not yet assured us that the District of Columbia subway system will serve individuals having to use wheelchairs. Certainly, the inclusion in the bill of these boards and commissions with limited terms and very limited financing cannot be an important factor in whether the legislation shall become law.

RESTRICTIONS ON THE SECRETARY IN ADMINISTERING THE PROGRAMS

Another objection expressed is that the legislation restricts the Secretary in the administration of the programs covered under the Act. Administrators cannot be expected to like provisions of this kind, but such language in legislation is not unusual, and is not often a great obstacle to the effective administration of a program. In fact, sometimes such restrictions prove to be quite a good thing.

The language in the Rehabilitation Act Amendments pertaining to the administration of the program was not proposed by the National Rehabilitation Association. We can understand, nevertheless, the conditions that led Congress to insert it. It is by no means just an effort on the part of Congress to spite the Administration. Under the administration of SRS, responsibility for administration of vocational rehabilitation programs has been divided between SRS and RSA at both national and regional levels. There has never been a clear expression of policy on the point as to whether SRS is to be an agency to coordinate the programs of the various bureaus, or whether it is to be an agency to actually operate these programs. While talk, generally, has indicated that SRS is a coordinator and service agency to the bureaus, actually, personnel has been drained off the bureaus to SRS, and more and more administrative and policy decisions that previously have been made by the bureaus are now made by SRS. This, in itself, would not have been so objectionable, but funds appropriated for research and training under the Vocational Rehabilitation Act have been thrown into an SRS pool and expended, often, on programs having only peripheral, if any, values to the rehabilitation programs. Officials of SRS have stated numerous times that research and training funds when appropriated become SRS funds, not rehabilitation funds, aging funds, social service funds, etc. This situation has annoyed state vocational rehabilitation agencies, members of Congress, and others who have been concerned for these programs. The confusion that has prevailed at both national and regional levels has been detrimental to programs for handicapped individuals. Since the Administration did not act to clarify this situation, Congress, upon the suggestion of those that administer the programs, did so. Congress may have gone farther than necessary in its efforts to correct this situation. Since an RSA Administrator will be selected by the Secretary of HEW and be responsible to him, we cannot imagine that these provisions are going to cause any great difficulty to the Secretary in the administration of the programs. We do not want RSA to be anywhere else except in the Department of Health, Education, and Welfare. We do not want it administered in isolation to other HEW programs. We do want, however, monies appropriated for rehabilitation purposes to be spent on rehabilitation, and we want clear

lines of authority with respect to the administration of the programs.

ADMINISTRATION DELAYS

Finally, we must say that the Administration must bear a considerable part of the responsibility for the fact that the vocational rehabilitation legislation is inconsistent with Administration policies in several respects. Rehabilitation is a popular program with Congress, the states, and the general public. It was well known that appropriation authority for all titles of the Vocational Rehabilitation Act expired June 30, 1972. The House Committee on Education and Labor notified the Administration many months ahead of its projected hearing dates. It repeated the invitation to the Administration to appear well ahead of the hearing date set. It delayed its hearings in the hope that the Administration would make its proposals. Actually, an Administration proposal was not presented until the day before the date set to report the bill to the House floor. Then, Administration proposals did not indicate that a great deal of thought had been given to their development. Had the Administration been more alert, more prompt in its response to Congress' invitations, undoubtedly, its impact upon the legislation would have been greater. We have never sensed any effort on the part of the Committees of Congress to spite the Administration. Actually, majority and minority members of the Congress have worked in true harmony, and both House and Senate delayed their hearings this year to accommodate the Administration. Minority members will be the most disappointed, if the President does not sign the legislation.

CONCLUSION

In conclusion, we want to say that we recognize that this is not perfect legislation. It certainly does not conform to all policies of the National Rehabilitation Association. It is the result of many compromises. On the other hand, more members of Congress have participated in this legislation than any other previous version of the Vocational Rehabilitation Act in many years. Certainly, it provides a legal base for a sound and constructive advance in providing rehabilitation services for handicapped individuals. Differences of opinion on relatively minor parts of the legislation cannot be allowed to retard the progress of these constructive programs.

CONGRESSIONAL REFORM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. McFALL) is recognized for 5 minutes.

Mr. McFALL. Mr. Speaker, one of the most illustrious spokesmen for congressional reform, Representative MORRIS UDALL, recently addressed the issue in a discussion in Los Angeles at the Time Inc.-sponsored symposium on "The Role of Congress." The moderator of the discussion was Louis Banks, editorial director, Time Inc. I am pleased to insert the text in the RECORD.

DISCUSSION

Mr. BANKS. Congressman Morris Udall and I have a friend in common, a brilliant writer named Larry King, who has written for *Harpers*, *LIFE* and other publications, and in an article in *Harpers* in mid-1971, Larry King described, in loving detail, Mr. Udall's attempt to get reform in the House of Representatives by running against John McCormack for Speaker. Well, that didn't work. In fact, he was defeated rather brutally. But Udall represents the symbol of younger members in the House, who have hopes of changing its slow and cumbersome

processes which King characterizes as: "The seniority system, loose deceptive campaign laws, unsupervised lobbyists, general congressional anemia and harmful fuddy-duddyism."

King also notes that: "Despite Morris Udall's deceptive outward smoothness, you have to get inside his head to discover that coyotes howl in his soul."

Representative Udall of Arizona.

Representative UDALL. Thank you, Louis. Coyote lovers, fugitives from Arizona, candidates for mayor, fellow taxpayers:

Greetings from Washington, where our party is about to engage in its annual rites of purification and bloodletting. We in Arizona once had a presidential candidate—you may have remembered this trauma, some of you Republicans. I was thinking on election night when the thing was all over, what someone once said of that campaign: "Barry Goldwater's staff fought each other; he was constantly clarifying his position; everything went wrong; Barry wanted to run for President in the worst possible way. And he did." Perhaps that is what my party did this year. But don't give up on us.

You might remember the great old story in the 1930s about this Wall Street tycoon who hated Roosevelt. He would buy a paper from the boy each evening, look at the front page, curse and throw it in the trash can. After a week, the boy said: "Why do you do this, spend your money, look at it, mention the name of our Lord and Saviour in vain, and throw it in the can?"

The tycoon said: "Son, it's none of your business, but to be perfectly honest, I am looking for an obituary."

The boy said, "The obituaries are found in the back of the newspaper, not on the front page."

"Son, believe me, the obituary I am looking for will be on the front page."

Don't write the obituary of the Democratic Party, and don't write the obituary of the Congress because we are alive, and I hope that through discussions of this kind, and the attention of the American people, we can do some of the things that Bob Packwood has talked about.

If there was one thing that haunted the founding fathers 200 years ago, it was fear of concentrated power. They came from nations where executive tyrants, kings, dukes, barons of different kinds, could knock on the door, draft your sons, take your money, remove you from the land. Out of this, came a central thing in our Constitution; it is this strange, unique division of powers, a check and balance. This is the unique American division of government, and it worked pretty well for 150 or 160 years. Yes, it was inefficient. Yes, it was awkward to have different power centers contending with each other. It is more simple to have one man or one institution make decisions for the country. I think the founding fathers believed in a democracy. There are higher values than simple, cold efficiencies, and some of those values are a reconciliation and a spirit of unity and purpose among a people, which you lose when you have a very powerful leader, however noble his purposes may be. So, I say this worked rather well.

How did we get sidetracked from this system of checks and balances? If you went to Washington in the 1920's when Henry Luce started TIME, and you stopped the well-informed citizen on the sidewalk and said: "Give me the names of the 10 most powerful people in Washington," he obviously would list the President, although maybe not even first. I remember a clipping that said that there being no public business for a couple of months, President Coolidge went off to Vermont for the summer. But surely on the list of powerful people would have been the Speaker of the House of Representatives, the leader of the Senate, including powerful

committee chairmen and certainly some of the Cabinet members.

Today in most Administrations at most times, you cannot make that statement. Now, what happened? I think what happened is the convergence of two shattering convulsive events in the life of this nation—neither anticipated, both probably non-recurring over the long lifetime of a nation's existence.

In 1929 or the early '30s, we awakened to find that the great free enterprise system was in trouble, a third of the labor force out of work, half the plant capacity idle, serious questions as to whether this incentive system would work at all, serious doubt about all of this. Leading Americans thought of turning to socialism, to other economic systems that didn't have the injustices that apparently this one had. Along came Franklin Roosevelt. We said: "Give him power, he is going to do something."

There is a story that in the House of Representatives of 1933 or 1934, during the crisis of the Depression, someone held up a blank piece of paper and said the President wants a bill, so all in favor say "aye." And they sent the piece of paper to the White House where the legislation was filled in by Roosevelt.

Now, this was awkward and unwise. We were just coming out of that kind of extreme delegation of power to a President, which arose from the shattering economic experience, and Congress was beginning to reassert itself in the late 1930s, and early 1941 when, on top of this event, came World War II, probably in man's history the greatest global conflict we ever had, if we can avoid the nuclear danger that hangs over us. Here was a madman, Hitler, with strong allies trying to impose his will around the world. So we said to the President: "Whatever you want, if you want ships, you want bombers, you want power over prices, wage controls . . ." anything the President wanted, we gave him.

Necessary, yes, in that crisis situation, but out of this arose a whole generation of politicians, leaders in the Congress whose whole idea of foreign policy is to support the President.

In Lincoln's time, and again before World War I, and in the 1920s, there was nothing unpatriotic in differing with the President on foreign policy. A member of the House or Senate could have strong views, as Lincoln did in the Mexican War, against a President's foreign policy and express them without being considered unpatriotic or unwise.

But we never quite recovered from these two events—the depression and World War II—and I think a lot of the trouble the country has today is that we stumbled kind of secretly into a major Asian land war under Johnson, for reasons he thought were valid. He never came to the Congress and said: "Let's have a debate. Should we have a major Asian land war?"

Thirty billion dollars, half a million troops. We kind of slipped in, and the Congress acquiesced in this. And today I expect to be among the last to be consulted by Henry Kissinger and President Nixon, although I represent a half a million people, on the terms upon which we should get out of an Asian land war. While I am for the end of this war, and applaud what the President and Mr. Kissinger are doing in broad scope, would we have been better off if these decisions were made after debates in the Congress as the founding fathers obviously intended?

I agree with Bob Packwood. There is much to be done to revitalize Congress. The sun never goes down on Capitol Hill that a half a dozen speeches have not been made about the erosion of congressional power and cries of alarm about the extension of presidential power. And yet, as Bob said, to a large degree we have permitted this to happen.

One of the things we need in the House and Senate is strong leaders in order for there to be a check and balance. We need men with programs who will give us a focus upon which we can have power centers to oppose the President. We have had it a time or two. We had it in the 1950s, we had it when Lyndon Johnson was on the make, wanted to be President, and when Dwight Eisenhower had a landslide victory while we had a Democratic Congress. He gave a State of the Union speech and the next night Lyndon Johnson said: "Thank you, Mr. President, here's our program, here is the congressional program."

The current generation of congressional leaders would be horrified, I suppose, if someone would suggest that we have a congressional budget, that we have a congressional program, that we in the opposition party ought to come forward with the kind of documents and kind of broad scale attack that would reflect our conception of the country's needs. And that would provide an alternative to the President's report on the State of the Union and his budget message.

I leave you with these thoughts and with anticipation of exploring them further. I leave one other thought. It is my hope that the editors and publishers and people from all over the country will not ignore the role of the House. The Senate has been novelized, romanticized and glamorized. A lot of us around this country are in the House of Representatives. This was intended to be the primary legislative body. Henry Clay, 140 years ago, left the Senate to go to the House. Can anyone imagine John Tunney or Alan Cranston or Barry Goldwater giving up a Senate seat? Yet the House has the power to be, and it should be, a more important institution in the scheme of things.

Thank you very much.

Mr. BANKS. It falls to my good friend and colleague, Neil MacNeil, to provide a journalist's wrap-up of this situation. Neil has won his own weight in the ranks of scholars, for his thoughtful books and monographs, talks and TV panel shows; and if you don't have "Washington Week in Review" on Public Broadcasting, you are being shortchanged. It will be Neil's role to speak briefly, and then lead us into the panel session.

Neil MacNeil.

Mr. MACNEIL. Thank you.

I half expected Senator Packwood to say what he said. It's a familiar theme with him, and I agree with him totally. The relationship between what Dr. Polsby said in his paper and what Senator Packwood said, I suppose is a direct kind of relation.

In his paper, Dr. Polsby has properly laid emphasis on the present inadequacy of information that Congress receives in order to act with precision and decisiveness. He has made some imaginative suggestions on how this might be at least partially cured, notably by finding ways to utilize the intelligence of experts outside of Congress. I agree with Dr. Polsby that Congress doesn't know enough to legislate for the nation. This goes beyond the hesitation of Congress to spend the funds for computers, the absence of which leaves them substantial illiterates in the new language of computers.

As I see it, Congress instinctively is caught in two separate adversary relationships:

One, the President and the Executive Branch; and the other with the President and voters. It leaves Congress with a sense of helplessness and timidity. It is no secret that the President and his branch of the Government do not want intrusion on their running of the Government. Since time immemorial, Presidents have found dealing with Congress painful, perhaps best illustrated by what President Woodrow Wilson said of Senators. He said: "Senators have no use for their brains, except as knots to keep their bodies from unraveling." He didn't

like them, and he was offended by their hectoring. A similar dislike flows throughout just about every Administration, department and agency, and it results in a deliberate attempt to withhold information from Congress. The less Congress knows, the less Congressmen intrude.

In Washington, there is an old maxim on how to advise a downtown agency man about to testify before a congressional committee. It is: "Be polite, don't tell any lies, but for God's sake, don't go blabbing the truth."

With that administrative attitude, which seems pervasive in almost every administration, one wonders why Congress depends solely on information received from the Executive Branch as a basis for legislation.

This is especially true in appropriations. Until just this Congress, the appropriations committees of the Senate and the House heard no witnesses other than those from the incumbent Administration. But it is the adversary position Congress has with the President that seems to me to be largely responsible for Congress timidity in doing anything to correct its information gap.

Just the other night in Washington, I was speaking to a group of senior congressional staff aides, and one of them braced me on the nastiness of the press in pouncing on Congress for even adding a single aide to a Congressman's staff. What hope was there to get adequate staff with that kind of press attitude?

The problem, as I told him, is that when Congress wants to add a staff aide, the members try to sneak the necessary legislation through the chamber, concealing it from the press, and the gallery reporters catch them. Naturally enough, they write stories making Congress look guilty. Congress acts guilty. Congress should have the courage to make its claim for adequate staff both forthrightly and publicly.

My view is that such an open approach would be supported by the press and the voters. If nothing else, Congress can argue that Congress has a staff of only 32,000 people trying to ride herd on a huge civilian administration payroll of \$2.7 million. Congress has looked at the possibility of using computers in a meaningful way in order to match its own information capacity with that of the Executive Branch. It did so in debate on the congressional reorganization bill two years ago. Part of the failure to act at that time came from internal controversy within Congress. But a major part was the cost, a few million dollars; forgetting in the agonies of anticipated criticism as spendthrifts, that Congress is handling each year a national budget that is now over \$250 billion, and not handling it well. Congress is using a few computers, but not in such a way as to excite public confidence, using them for their own payroll, and for sending letters to constituents. This makes something less than a persuasive argument that members of Congress really are alive to the institutional needs of the Legislative Branch.

It is this attitude in Congress of helplessness and timidity that Senator Packwood was talking about. As I see it, that has in large part led to the imbalance between Congress and the Executive Branch. This is what has made President after President bolder and bolder in taking over the full operation of the Government at home and abroad. It is what has led to the total loss by Congress of the war power, and its reduced powers over the nation's business. Until the members of Congress themselves muster the will and the courage to insist on the institutional integrity of Congress, and to act to provide themselves with the proper means to do so, no set of imaginative proposals will do much to redress the balance between Congress and the President as coequals in the decisionmaking processes of the Government.

Mr. BANKS. I think I will allow you one question of each other. Then we will turn to the audience.

Mr. MACNEIL. I'd like to put a question to Congressman Udall who is an advocate of reform of the seniority system. It seems to me that even the most ideal system for determining congressional committee leadership will not solve the critical problem which we are talking about today, the nature and thrust of Congress as a viable political institution. It seems to me that the seniority issue that is now being brought forward, is something of a shadow. To me it is only a symptom of the disease, not the disease itself. A decade ago the problem was the House Rules Committee and the Senate filibuster. We were told; cure them and Congress can move along. The Rules Committee has been tamed and the filibuster has been broken. Isn't there more to the problem of Congress than the seniority system?

Representative UDALL. Those of us who advocate seniority as the key to all the difficulty ought to be a little more explicit because of the filibuster in the Senate has been broken and because we set out after the House Rules Committee, it has been changed too.

I think now we are talking about something of a different order because the evil of seniority is central to the problems of Congress, and these other difficulties you have mentioned were simply procedural.

We are concerned with the question of whether or not you can get a vote on a question. There are obstacles to voting, and as Neil says, these obstacles have been substantially removed and reduced over the last number of years. Democratic government works only because if I have power over your life, if I can draft your son, or run a freeway through your living room or raise your taxes sooner or later you are going to have a vote on whether I am to continue to have that power. But with the seniority system, we in Congress invest a limited number of public officials with the power to make national policy, a power in which they are not responsible to anybody.

Wilbur Mills, a very great American, is one of the able men in Congress. But the seniority system says to Wilbur Mills that as long as a narrow group of Americans, the 500,000 Americans of his congressional district, elect him to Congress, he is the man to make tax policy for the entire nation. In this role he is not Chairman for Little Rock. He is Chairman of Los Angeles and Long Beach and Prescott, Arizona, and for all of us. Seniority violates that fundamental system. If you had any kind of a system that said to the chairman of the Ways and Means Committee, the chairman of the Agriculture Committee and the other committees: "You owe your election to George Brown and Lionel Van Deerlin, to all of the 435 members of the House of Representatives," you probably would have the same men as chairmen, but they would become politicians. The committee chairmen would be coming to the House floor to ask: "Do you think we ought to have tax-reform hearings . . . do you think we should have new hearings before the Agriculture Committee?" or whatever.

Instead, you give national power to people who are responsible to a limited constituency, and it's as though you elected a mayor of Los Angeles on the basis of picking the city councilman who happened to be the oldest and saying: "You are mayor." That fellow would go immediately to his ward and say: "Friends, put me in power. I will get the goodies. There will be street lights and pavements here, whatever happens elsewhere."

I have seen this happen. We saw it in Arizona where we re-elected Carl Hayden until he was 90 years of age—to bring home the goodies.

When I go home and talk seniority, and I

find myself doing it now, what I am really saying is: "Friends, you know if they allocated air bases and federal contracts and buildings on a national, fair and square basis, you wouldn't get some things. But you elected me so you are going to get these things that you are not otherwise entitled to."

This goes to the very heart of what is wrong with Congress.

OKEFENOKEE SWAMP

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. STUCKEY) is recognized for 5 minutes.

Mr. STUCKEY. Mr. Speaker, today Congressman GINN and I are introducing a joint bill to designate certain portions of the Okefenokee Swamp as wilderness. The legislation would guarantee that the 373,860-acre wildlife refuge be given Federal protection against any development or other use that would damage the area.

This bill permits the vitalization of vehicles propelled by motors of 10 horsepower or less, the traditional means of transportation within the swamp. Those who have visited this vast wetland wilderness know that boats comprise a very important part of the swamp. Boats are the only means by which the swamp is accessible to visitors. Access will continue to be by way of three main entrances where boat tours, guide services, boat rentals, and fishing supplies are available.

This bill defines approximately 86 miles of existing and proposed boat trails, and it provides for the maintenance of these runs for proper management and public enjoyment. Unless these boat trails are maintained on a continuing basis, water plant growth, fallen trees, and the like would soon render these trails impassable.

This bill also recognizes the educational, scientific, and recreational values of this unique wilderness. Recreational uses include boat trips, various forms of nature study, sightseeing, and fishing. Fishing is possibly the greatest pastime in the Southeast. The Okefenokee Swamp provides an angler challenge that can be offered nowhere else in hundreds of miles.

Finally, Mr. Speaker, this bill will protect the swamp's present and future value as an economic asset to local communities as an outstanding tourist attraction. As one of the oldest and most primitive swamps in the Nation, "The Land of the Trembling Earth," is of great economic value to the surrounding area. Okefenokee's thousands of yearly visitors acclaim its primitive beauty.

The swamp is lined with moss-draped cypress, and it encompasses vast stretches of water "prairies" and hidden swamp areas. Its varied wildlife habitat includes more than 200 species of birds, bears, white-tailed deer, and otters, among others. It contains one of the largest concentrations of alligators remaining in the country.

The swamp has been threatened through the years by attempts to drain the area for logging operations and plans to run a huge barge canal through its length. The wilderness designation would

guarantee that no such actions can take place.

Mr. Speaker, I have been working with the Department of Interior for the past 4 years in order to draft a bill that would protect and preserve this unique wilderness while allowing for its continued use as a superb recreational area. I am convinced that this bill balances both of these objectives in such a way both can be reasonably achieved.

BURKE DECRIES ADMINISTRATION'S PROPOSED SURGERY ON MEDICARE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. BURKE) is recognized for 15 minutes.

Mr. BURKE of Massachusetts. Mr. Speaker, last January, President Nixon revealed in his budget message numerous proposals that I believe to be both farcical and tragic. Today, I am addressing myself to his plans for increasing the already heavy burden our senior citizens bear who are patients under medicare.

For the RECORD, I believe, I should summarize these cruel proposals. For those with plan A coverage, starting next January 1, the patient would pay the actual hospital room and board charges for the first day. After that the patient would pay 10 percent of the actual hospital charges every day. For those with plan B coverage, a patient would pay the first \$85 of his doctor bills and 25 percent of the remainder. These are a departure from the current regulations which provide that, under plan A, a patient pays \$72 the first day he stays in the hospital, \$72 being the national average, and nothing for the next 60 days. Beginning on the 61st day, he pays \$18 a day and from the 91st day, \$36 a day. For medicare plan B, a patient pays the first \$60 of his doctor bills and 20 percent of the remainder.

At first glance, Mr. Speaker, these changes seem rather minor. But in reality they represent a tremendous increase in the medical and hospital bills for our 23 million elderly and disabled, close to \$700 million a year.

These changes are necessary, the administration claims, because of the way medicare costs have risen out of control. They contend that patients are abusing the program and spending unneeded days in hospitals and running up unnecessary doctor bills. Apparently the administration is not reading the same figures I am, because it is public fact that since 1969 hospitalization rates have declined and the average length of stay for medicare patients has dropped.

The Department of Health, Education, and Welfare said that the changes are also aimed at establishing "a cost awareness on the part of the medical care consumer which, beside its effect on overutilization, should inhibit hospital price increases."

Mr. Speaker, this is one of the most ludicrous statements I have heard in my 14 years in the Congress. The implication of the statement is that our elderly and disabled are not cost-conscious at

all; rather, in fact, that they are spendthrifts who just look for the opportunity to place themselves in a hospital and run up a doctor's bill! It is beyond my understanding how someone, in these days when the facts of life are increasing food prices, rising rents, rising cost of living and a regressive tax structure, can intelligently call an elderly person, living on a fixed income of inadequate social security benefits, a spendthrift.

As for inhibiting hospital price increases, reduced utilization could raise per-patient costs in some hospitals, bringing about rate increases reflected in even higher expenses for the patient.

President Nixon takes great pride in claiming that his proposals would reduce the financial burden for those elderly struck with long-term illnesses which require hospitalization for more than 60 days. What the President neglected to say was that only 1 percent of our elderly are hospitalized longer than 60 days. The vast majority of all medicare patients would incur higher costs, since the average hospital stay for medicare beneficiaries is only about 12 days. Even Secretary Weinberger concluded, reluctantly so, that the patient's payment for the average stay would rise to \$189 from \$84, an increase of over 100 percent.

Mr. Speaker, this unconscionable placing of unnecessary hardship on our senior citizens is essentially a political decision. The administration feels it can, under its "unitary budget system," use money contained in trust funds, such as those for social security and medicare, to reduce the amount of the deficit shown in the budget, even though these funds cannot be spent for any other purpose than social security and medicare. This means that the budget deficit can be made to appear smaller than it actually is. I have been a protector and advocate of the elderly for many years and have seen them used as scapegoats a number of times. I had hoped that this type of activity had ceased with the legislation the Congress enacted in the 1960's. But this administration has set new records for exploiting the powerless and pampering the powerful. When the budget gets out of line and cuts have to be made, it is responsible and intelligent to eliminate waste. One of the problems with this administration, and there are many, is their distorted definition of waste. It is not waste when large enterprises and special-interest groups receive lavish subsidies from the Federal Government, and categorically mismanage the funds and receive "cost-overrun" payments. Nor is it waste when multinational corporations benefit from enormous tax loopholes and preferences, and rob the United States of productivity and its working force of jobs.

It is waste, however, when the ill and dying utilize Federal programs to cure their ailments. It is waste when the working poor file for day-care so they can keep working and retain some of their self-respect and human dignity. It is waste when our sick elderly hospitalize themselves and do not feel guilty for every day they remain there.

To the administration that is waste. But to me, Mr. Speaker, that is the prudent expenditure of Federal revenue. To

me that is the way our priorities should be oriented; toward social welfare, human prosperity and self-dignity and away from special interests and tax inequities.

It is easy to chastize the elderly for misuse of medicare benefits. The contributions they made to America have been forgotten by most. They do not make a lot of noise like so many lobby groups and special interest organizations do. All our elderly wish to do is live out their lives in peace, dignity, and comfort. But it appears the administration wants these wishes to be dependent upon the appropriations process and subject to budget-balancing pressures. The administration cites that medicare payments have gotten out of hand. But in reality medicare payments have risen, because all health costs have been on the rise, 40 percent in the last 10 years. The percentage of health costs covered by medicare has actually fallen from a peak of close to 50 percent in 1969 to 42 percent at the present time. If President Nixon's proposals are adopted it is estimated that this percentage would be reduced to a paltry 35 percent.

These proposals are clearly a step backward. When medicare was adopted in 1965, the intent was to increase the aged's access to proper medical care. Adding \$700 million a year to the elderly's health bills will only drive them away from, not to, medical care. Before we can discuss increased medicare costs to patients, we should have a long, hard look at the entire social security and health delivery and care systems. The result would be the realization that our elderly are not the spendthrifts and vagrants the administration feels they are. Older persons face significant out-of-pocket costs for their medicare benefits which must be paid from an income which is apt to be fixed or diminished. As it is, premiums on plan B alone have increased almost 200 percent since 1966. The inadequate and fixed level of social security benefits makes meeting even minimum premium payments a hardship to most of our senior citizens. Significant social security reform is long overdue. The mode of payment should be changed and the benefit level increased. My bill, H.R. 48, is a step in this direction and should be considered when any issue involving our elderly is discussed.

Mr. Speaker, it is time for an intelligent, compassionate, and responsible look at the health care needs of all Americans, young and middle-aged in addition to the elderly. The emotionalism surrounding the issue must be overcome and rational thought and consideration should prevail and not just be longed for. Health care delivery and service is highly inadequate in America today, for those of all ages. The need for a national health security plan of some sort is evident and we in the Congress should realize this and begin examining the appropriate steps necessary for attaining this goal. The administration's medicare proposals are not appropriate. They are shortsighted, backward, and oppressive. I urge all of my colleagues to stand in opposition to these proposals when they reach the Congress for debate

and consideration. Budget-balancing and fiscal responsibility are a basic need in the United States today, but I do not believe they should be achieved at the expense of the health and well-being of America's citizenry.

RULES OF PROCEDURE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. EILBERG) is recognized for 5 minutes.

Mr. EILBERG. Mr. Speaker, I am pleased to advise the Members of the House that the Committee on the Judiciary has readopted the rules of procedure governing consideration of private immigration bills. They are identical to the rules of the 92d Congress and read as follows:

RULES OF PROCEDURE

1. The regular meeting day of the Subcommittee will be Thursday or upon the call of the Chairman. The regular meeting days of the Subcommittee on private bills will be the first and third Thursday of each month or upon the call of the Chairman.

2. A quorum of the Subcommittee shall consist of two members for the purpose of holding hearings on private bills and five members for the purpose of making recommendations to the Committee.

3. The introduction of a private bill does not automatically act as a stay of deportation until the Committee requests a departmental report. Requests for reports on private bills from the Departments shall be made only upon a written request addressed to the Chairman of the Subcommittee or the Chairman of the Committee on the Judiciary by the author of such bill. That request shall contain the following information which shall be submitted to the Committee in triplicate.

(a) In the case of aliens who are physically in the United States:

The date and place of the alien's last entry into the United States; his immigration status at that time (visitor, student, exchange student, crewman, stowaway, illegal border crosser, etc.); his age; place of birth; address in the United States; and the location of the United States Consulate at which he obtained his visa, if any.

(b) In the case of aliens who are residing outside of the United States:

The alien's age; place of birth; address; and the location of the United States Consulate before which his application for a visa is pending; and the address of and relationship to the person primarily interested in the alien's admission to the United States.

(c) In the case of aliens who are seeking expeditious naturalization:

The date the alien was admitted to the United States for permanent residence; his age; place of birth; and address in the United States.

4. The Subcommittee shall not address to the Attorney General communications designed to defer deportation of beneficiaries of private bills who have entered the United States as nonimmigrants, stowaways, in transit, deserting crewmen, or by surreptitiously entering without inspection through the land or sea borders of the United States.

Exemption from this rule may be granted by the Subcommittee in cases where the bill is designed to prevent unusual hardship. However, no such exemption may be granted unless the author of the bill has secured and filed with the Subcommittee full and complete documentary evidence in support of his request to waive this rule.

5. No private bill shall be considered if an administrative remedy exists, or where court

proceedings are pending for the purpose of adjusting or changing the immigration status of the beneficiary.

6. No favorable consideration shall be given to any private bill until the proper Department has submitted a report.

7. Upon the receipt of reports from the Departments, private bills shall be scheduled for Subcommittee consideration in the chronological order of their introduction, except that priority shall be given to bills introduced earliest in any of the previous Congresses.

8. Consideration of private bills designed to adjust the status of aliens who are in the United States shall not be deferred due to nonappearance at Subcommittee hearings of the author of the bill or person authorized to represent him.

9. Bills previously tabled shall not be reconsidered unless new evidence is introduced showing a material change of the facts known to the Committee.

I would like to take this opportunity to call the attention of the Members of the House to rules 3 and 4 in particular. As many of you know, the introduction of private legislation does not have the effect of delaying an alien's departure from the United States. Under the agreement between the Commissioner of the Immigration and Naturalization Service and the Committee on the Judiciary, the Service withholds deportation if the committee requests a departmental report on a private immigration bill.

Consequently, if a Member believes a case has merit and introduces a bill, and if rule 4 is applicable, he should file with the committee documentation to support his request for a waiver of that rule. The committee will then consider such request expeditiously, but it is necessary to stress that it is incumbent upon the author of the bill to initiate such action on a private immigration bill which has been submitted to the House. If a request for a waiver of rule 4 is granted, reports on the bill will be requested from the Department of State and the Department of Justice, and the author will be so notified. If a request for a waiver of rule 4 is rejected, the bill will be sent to the full committee for tabling, but the author will also be notified in advance of such contemplated action.

After departmental reports are obtained, copies will be forwarded to the authors. Bills will then be considered by Subcommittee No. 1 on their merits in accordance with the provisions of rule 7. If the subcommittee decides to report adversely on the bill, the author will be notified in advance and given an opportunity to submit additional supporting documents or to request an opportunity to appear before the subcommittee in support of his bill.

When the subcommittee agrees to take favorable action, the author of the bill will be asked to submit a statement in support of his bill for inclusion in the committee report to the House.

Needless to say, members of the staff of Subcommittee No. 1, which has jurisdiction over immigration and nationality matters, will be happy to answer any questions the Members or staff members may have.

The subcommittee office is located in room 2139, Rayburn House Office Building—extension 55727.

IMPOUNDMENT

(Mr. PODELL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PODELL. Mr. Speaker, the President has ordered the Office of Management and Budget to impound, without explanation, billions of dollars which Congress appropriated last year for various social and environmental programs. America's most disadvantaged groups—the young, the poor, the elderly, the sick, the mentally ill, the unemployed—will be hardest hit by the administration's new spending policies. But impoundment affects all Americans, because it involves not only our domestic priorities, but also the separation of powers inherent in the Constitution of the United States.

The first sentence of the Constitution, following the Preamble, reads as follows:

All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives. [Emphasis added.]

Only the Congress may enact laws, and it is the President's duty, under article II, to "take care that the laws be faithfully executed." When the Congress appropriates money, the President may veto the bill; but he is not empowered to sign the bill and then substitute an amount of his own choosing for that specified in the law. Yet this is precisely what President Nixon has done; he has, quite simply, ordered the executive departments not to spend nearly \$15 billion which the Congress duly appropriated last year for programs as varied as mass transit, water pollution control, mental health facilities, higher education, job training, sewage treatment, and federally subsidized housing for low- and moderate-income families. These capricious "budgetary reserves" cannot be justified on grounds of sound fiscal management; rather, they represent a highly partisan attempt to flagrantly disregard the policies and priorities mandated by the elected representatives of the people.

In the past few years, the President has centered the Executive power in a small group of White House advisors, accountable to no one, who have taken over many of the duties of Congress, including legislative initiative, lobbying, appropriations, and oversight. In particular, Mr. Nixon has reorganized OMB into an elite cabal to run roughshod over other executive agencies. But the impoundment of funds by OMB has become an immediate and heated issue because it is a sudden and novel thrust at the "power of the purse," a prerogative which the Congress has jealously guarded even as it has allowed many of its other duties to slip into the Executive domain. James Madison, in urging ratification of the Constitution in 1788, pointed out with pride that the Congress was given sole authority over Federal spending. In the *Federalist*, No. 58, he said:

This power over the purse may, in fact, be regarded as the most complete and effectual weapon with which any constitution can

arm the immediate representatives of the people for obtaining a redress of every grievance, and for carrying into effect every just and salutary measure.

Ten years ago, as part of his applications for admission to the New York bar, another future President, Richard M. Nixon, wrote an essay on his conception of the principles underlying the American form of government. He said, in part:

Above all else, the framers of the Constitution were fearful of the concentration of power in either individuals or government. The genius of their solution in this respect is that they were able to maintain a very definite but delicate balance . . . between the executive, legislative and judicial branches of the Federal Government. . . .

Mr. Nixon went on to say:

Throughout American history there have been times when one or the other branches of government would seem to have gained a dominant position, but the pendulum has always swung back and the balance over the long haul maintained.

Because of my desire to restore this balance, I am today introducing legislation which would invalidate any impoundments except those specifically ratified by the Congress. The House should also give swift approval of the Senate-passed bill requiring confirmation by the Senate of the OMB director, whose power over the American economy is now second only to that of the President. Such legislation will serve as a warning that Congress will no longer tolerate executive usurpation of purely legislative functions. It will also start the pendulum moving back toward the balance of powers which is unique to our form of government and which has fostered its endurance for nearly two centuries.

CHANGING THE DATE OF THANKSGIVING

(Mr. PODELL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PODELL. Mr. Speaker, I am introducing today a bill which would change the date of Thanksgiving in those years when it would normally fall on November 22. As we all know, November 22 is the date on which President John F. Kennedy was assassinated almost 10 years ago. We are still sufficiently close to that painful day that November 22 is considered a date of sorrow and mourning.

This year, for the first time since the assassination, November 22 coincides with Thanksgiving Day, which by law is celebrated on the fourth Thursday in November. My bill would provide that when the fourth Thursday falls on November 22, Thanksgiving shall be celebrated on the fifth Thursday.

The effects of this change would be felt only three times in this century after this year: in 1979, 1984, and 1990.

Thanksgiving is the most joyful holiday of the year, when families come together to feast and to give thanks for their blessings. To celebrate Thanksgiving on the anniversary of John F. Kennedy's assassination would cast a pall over the holiday which, for many Amer-

icans, would greatly diminish their enjoyment of Thanksgiving. I hope my colleagues will give prompt approval to this bill.

RENT CONTROLS

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the RECORD notwithstanding the cost of \$510 and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, phase II of the control program in respect to rents never was really effective. In my area rents were enormously increased in many instances, sometimes 30 to 40 percent. There were many tragic instances of people who were turned out of their apartments because of rent increases they could not pay. Then came the complete lifting of rent controls July 11 by the President's directive. Rents again took a surge upward in countless places, often imposed upon the very poor, so that there is a tragic need today for effective rent controls to protect the people of this country who rent against excessive charges by money-hungry landlords. At least we should go back to, and freeze, the rents in effect January 11 until a system of controls can be reestablished that will give a fair measure of protection to the people who have to rent living facilities in this country.

I want to commend the Honorable WRIGHT PATMAN, chairman, and the members of the House Banking and Currency Committee for the hearings they began Monday of this week on the general subject of the extension of the authority to the President to impose controls upon the critical elements of the economy and especially for the consideration given by the committee for the necessity of giving some relief to the people who rent. From Miami two very able spokesmen for the renting population of our area appeared before the committee, one of whom was Shep Davis, president of the Tenants Association of Florida, Inc., embodying a membership of more than 10,000 people. Mr. Davis has been a gallant and militant warrior for the protection of people who rent against excessive charges by landlords in the Greater Miami area and in Florida. Mr. Davis, in his statement, pointed out some of the grievous injustices in the excessive rents imposed upon our people.

Mr. Speaker, I ask that the statement of Shep Davis, together with the exhibits he presented with the statement, appear in the RECORD immediately following my remarks. Other Members will, I am sure, find conditions similar to those Mr. Davis describes in their districts and will, I hope, join in the fight to give relief from excessive rents to the people in this country who have to rent.

PRESENTATION MADE BY SHEPARD W. DAVIS, PRESIDENT OF THE TENANTS ASSOCIATION OF FLORIDA, INC., ON MONDAY, MARCH 26, 1973

Mr. Chairman Patman and Honorable Representatives of the Committee:

Fifteen months ago the Tenants Association of Florida, Inc., was formed to provide a voice in dealing with the landlord-tenant abuses in our area of the country. It soon became apparent that the greatest concern

of apartment renters—and the greatest cause of confusion—was runaway rent increases.

Our Association has grown to over 10,000 members due to the frustration that exists and our membership is steadily increasing at a very rapid rate.

These tenants and many thousands more throughout the State were heartened by some stabilization, as weak as it was, by the Phase II Guidelines. The arm of the law was there and if necessary, complaints of injustices and unfair practices could be filed with the Internal Revenue Service.

The guidelines permitted the landlord to raise his rent 2½ percent over a base rent, up to 8 percent a year on a one year lease. Increased taxes were added to that. Capital improvements were added to that. Too many landlords decreased services thus adding additional income to themselves.

Statistics will show that under Phase II increases range from 12½ percent to over 50 percent plus the extras.

In many cases tenants were not permitted to question these increases for fear of eviction. The Internal Revenue Service will certify that about 50 percent of the tenants seeking advice refused to give their names. Many of those that filed complaints pleaded that their names not be used. They feared retaliatory action.

The prayers of many tenants were answered on September 29, 1972, when the Cost of Living Council prepared a brochure, "Rent Watch For Social Security Beneficiaries." It stated that President Nixon ordered that everything possible be accomplished to prevent excessive and unjustified rent increases. It further stated that rents are a large part of a citizen's living costs and they will protect renters against illegal rent practices.

So during Phase II, there was Uncle Sam keeping his faith with the elderly social security recipient.

Then along came the decontrolling of rents which was as bad as the breaking of a dam where the water ran down the hill without regard as to the injury and damage sustained.

In some parts of the country rent stabilization is of little importance where there are apartments and homes available they have freedom of choice. In Dade and Broward County with less than 1% vacancy rate, there is no freedom of choice. May I say gentleman, you would not allow your dog to occupy some rooms that rent for \$125 or \$150 per month in Dade County. Rooms that smell, haven't been painted for 5 to 8 years, broken and cracked windows, bare floors, plumbing that needs attention, etc. These filthy places now will be increased in rent because of the serious shortage and no stabilization. It would take hours to present individual cases of inequities both low income, medium income and a little higher income group, and it would make you sick.

I read recently, that a landlords association has petitioned the President to reimpose rent stabilization as they, the landlords, are aware of the abuses of decontrol by some of their own members. Although Mr. Nixon may have had hopes of self regulation by the landlords, I say, "Forget it, Mr. President," you have just put a fox in a chicken coop.

Gentlemen, please, fight with the courage you possess to roll rents back to Phase II (to January 11th) and with vigorous enforcement.

I hope you can see your way clear to impose a ceiling as of January 11th. This will prevent a "Gold Rush" which occurred on January 12th, a day after the catastrophe.

RETURN RENTS, COUNCIL TELLS 12
(By Robert D. Clark)

A dozen Greater Miami firms or individuals have been ordered by the Cost of Living Council in Washington to refund the

money to tenants who complained they had been victims of Phase 2 rent control violations.

The council said the violations involved raising rents by a greater percentage than allowed, or failure to notify tenants properly of the boosts. The raises in question came before President Nixon modified rent controls Jan. 31.

Maren Apartments, 1543 Michigan Ave., Miami Beach, was ordered to refund \$112 in a case involving seven tenants.

Other landlords, the number of tenants involved, and the amount ordered refunded in that order are: Irvin Apartments, 715 Michigan Ave., Miami Beach, 12, \$694; Shady Grove Motel Apartments, 1570 NE 117th St., 10, \$955; Derreck W. Povey, Miami, seven, \$1,595; Sam O. Jalvo, Miami, four, \$103; Stanley Apartments, Miami, one, \$459; Terrace Towne Apartments, Miami 10, \$962; Miller Hotel, 229 NE First Ave., Miami, three, \$15; Garnet Hall Apartments, seven, \$176; North Shore Apartment Association, North Miami Beach, 27, \$154; Max Pulver, Miami, one, \$105; and Albert A. Hernandez, Miami, one, \$459.

Few of the landlords named by the Cost of Living Council in this area could be reached.

The only two men listed as Max Pulver and Albert A. Hernandez in Greater Miami telephone and street directories said they rent apartments to tenants, and Pulver expressed mystification over the CLC's action.

Pulver, of 1741 SW 82nd Pl., said he hasn't raised rents. He said maybe they had been raised by former owners of his rental property.

Hernandez said he had raised some rents \$5 or \$10 "but we always checked with the Internal Revenue Service" (which acted as administrator of the Phase 2 rent controls) in doing so.

He said the owner of an apartment complex he used to manage at 3114 SW 14th St. already had returned the \$459 to tenant Thomas Kittinger.

"Kittinger was a man living there 10 years and when his long lease expired the owner raised it and then the Internal Revenue (Service) people came and told him he had to return the money and he did," said Hernandez.

"Kittinger made a heck of a stink about the raise and he finally got away from it; he is still paying the \$95 a week instead of the \$150 as everybody else in that building," said Hernandez.

Several Broward landlords also were ordered to refund money to tenants, said the CLC. It listed them as Country Golf Course Club, Fort Lauderdale, 14, \$105; Isaac Lifchez, Hollywood, three, \$900; Harrison Arcade, Hollywood, one, \$86; Ramgoh Marina, Fort Lauderdale, seven, \$123; and Mike Chaley, \$90 (no tenant number available).

In Key West the El Patio Hotel was ordered to refund \$35 in a case involving one tenant, the CLC said.

Altogether, 82 Florida landlords were ordered to refund a total of more than \$57,000 on Phase Two violations.

TENANTS NEED RENT CONTROLS

To The Editor:

Under a dateline of Dec. 29, Herbert Stein, chairman of the President's Council of Economic Advisors, was credited with the statement that "prolonged rent controls have a 'negative effect' on tenants as well as landlords. We ought to be out of the rent control business."

As an interested tenant actively interested in the Tenants Association of Florida, Inc., with access to the viewpoints of senior citizens affected by the ups and downs of rent I challenge Stein's statement in the strongest terms.

A major objective of the Tenants Association is strong rent control in the state

to counter many arbitrary landlord actions contrary to all reasonable applications of the Rent Stabilization Act.

Stein's statement could be and probably will be misconstrued in the usual lobbying tactics against a state rent control law and in all fairness should be clarified.

From our vantage point it would appropriately be more proper to yell from the rooftops that rent controls are profitable to landlords and in many cases disadvantageous to tenants. Examples are loopholes in the act that apparently permitted cancellation of ongoing leases; subtle threats of dire consequences after controls are off that inhibits senior citizens and widows from protesting actions by landlords; a building moratorium because of the lack of sewage disposal facilities.

It would be of interest to tenants to know why it would not be in their best interests to treat rentals under conditions of a construction moratorium in the same manner as utility monopolies are now treated.

CHARLES NEIDELMAN,
Miami Beach.

LANDLORD QUICK TO RAISE RENT

A few days after President Nixon lifted his price controls, I received an eviction notice stating that I must vacate my apartment by Jan. 31. Inquiring as to why the notice was sent, I was told that I would be allowed to remain if I accepted a \$20 increase (approximately 11 per cent) in rent.

What good has the wage and price freeze done in the area of rent controls if a landlord can raise rents to a level that would more than make up for any loss he may have incurred during the freeze? This seems to be a good indication that the voluntary price controls will not work due to the unpatriotic and un-American attitudes of the owners.

As the rich get richer, I get poorer. Maybe that's the new definition of the "American Way."

FRANK W. ROSE.

PUBLIC HOUSING CRITICAL, DADE LEGISLATORS TOLD

(By Ronald L. Sachs)

Dade County's public housing problems are critical and need a quick state solution, Dade legislators were told at a public hearing.

Florida's recently-resigned Secretary of Community Affairs, Athalie Range, pleaded with the legislators to beef up the state's public housing funds in the meeting Friday at the Dade County Courthouse.

The meeting was attended by State Reps. Barry Kutun, Bill Lockward, Tony Fontana, Alan Becker and Marshall Harris and Sens. Kenneth Myers, George Firestone and Jack Gordon.

"One of the reasons given for federal cuts in housing funds was the supposed failure of public housing in this country," said Sidney Aronovitz, former chairman of the Little HUD Advisory Board, who resigned last December because of fund slashing by the Nixon administration.

"That's not the case here in Dade County, where our program has been highly successful and has served a very useful purpose," he told the legislators. "You don't condemn an entire program because of problems in some areas."

Aronovitz urged the delegation to entice private contractors and bankers to get involved in public housing construction by offering lower interest rates on loans to those participating in such programs.

George Reed, Aronovitz' successor, said that although some 7,300 public housing units are currently occupied in Dade and another 1,550 are either under construction or being planned, "that's not nearly sufficient to the need we have here."

"We definitely need a state program of some sort . . . We've got 64,818 people on a waiting list for housing, some who've been waiting for as long as four years," he said.

Reed said that of a \$1 million county fund for public housing land acquisition, "only \$600,000 is left."

He said it is important that land to be used for public housing be purchased now, even if construction and funds are delayed, "because land prices are rising every day."

Harris, who said any campaign in Tallahassee for housing funds must be limited in scope in order to have any chance of success, pinpointed three main areas the Legislature might act upon. They are:

Landlord-tenant relationships—Sen. Myers has a prefiled bill coming up which would enumerate rights of both parties and responsibilities of each as well.

State-enabling legislation for rent control, perhaps setting ceiling limits on rates.

Funding for housing, with emphasis on securing monies for renovating existing housing units rather than trying to totally rebuild entire communities.

"This (Dade) delegation ought to sit down before the session and decide on 10 to 15 things we want and when we get to Tallahassee, we won't come home until we get them," said Harris.

SOME 1,500 JAM MEETING AS TENANTS BEG IRS TO ENFORCE RENT CURBS

(By S. Nathan Enfield)

More than 1,500 people turned out last night to hear the Tenants Association of Florida beg the Internal Revenue Service to "enforce federal rent controls so that gouging landlords can't continue to treat us like animals."

Sheep Davis, president of the group, which claims 6,000 members, blasted the IRS for haphazard handling of tenant complaints.

Joining him in the attack were U.S. Reps. Claude Pepper, Dante Fascell and William Lehman.

A year ago, President Nixon ordered the IRS to enforce controls on rent increases as an anti-inflationary measure.

Pepper told the angry audience, "Nixon's track record in this area has been grossly inadequate from the very beginning when Congress gave him sweeping powers to fight inflation."

"Just because elderly tenants got a few extra Social Security dollars, the landlords went crazy and raised the rents sky high."

Like Pepper, who said he too recently suffered a rent increase, in Washington, most of the audience was composed of middle and upper-income tenants who had walked to the Miami Beach Playboy Plaza meeting from nearby Collins Avenue high-rises.

TAF attorney and newly elected State Rep. Alan Becker said, "I've never been so frustrated in my life as I have with the IRS red tape."

"By the time any tenant goes through the Miami-Jacksonville-Atlanta-Washington IRS treadmill, he's already been evicted."

Becker singled out for special criticism: IRS failure to act on everyday tenant complaints "unless they're backed up by threats of a militant, active building organization, a letter to Congress or a phone call to the press."

IRS sluggishness in seldom referring cases to the Justice Department "when criminal violations are open and shut."

IRS tendency to disbelieve landlord retaliation against tenants outspoken enough to complain of rent control violations.

IRS practice of shrouding valuable case information behind a "disclosure rule" which prohibits discussion on pending cases.

IRS failure to include tenants in hearings on their complaints or to notify them when a case has been closed.

"You just can't continue to let the land-

lords gouge us like we're animals," Davis exclaimed amid loud applause.

"How much longer will the landlords be allowed to force us to sign new leases seven months in advance? We live in fear of landlord reprisals if we exercise our rights and speak out," he added.

IRS Assistant District Director Ira Loeb responded to the charges, not by apologizing, but by saying his department "does a pretty fine job" but is hampered by lack of sufficient personnel.

He told the audience of the IRS record in Florida: \$250,000 in tenant refunds, \$750,000 in refused rent hikes, 338 denials of rent control exceptions saving tenants \$2.3 million, and response to 100,000 inquiries in recent months.

Loeb was interrupted by a handful of tenants who disagreed with some of his statements.

He blamed tenants' anger on "large-scale misunderstanding of federal laws," and said, "You're got to realize rents are not frozen today. Landlords are allowed to up the rents in certain situations."

Unassuaged, Becker urged the IRS "not to try and pass anything off on the public. Your words sound good, sir, until we go home and see this month's rent bill."

Becker said he and fellow Rep. Gwen Cherry plan to introduce state legislation next year to aid tenants in dealing with landlords who violate federal rent controls.

"We have spent about \$40,000 to upgrade those apartments. We have refurbished the air conditioning and replaced old and worn appliances with new ones," he said.

"We never did raise rents during the freeze because we had to calculate the capital improvements to get the increase. We were in the process of doing that when the freeze was relaxed."

Ellis acknowledges that the different rent scales for old and new tenants probably would not have been approved under the guidelines in operation before Jan. 11.

"Why shouldn't we be allowed to give a better deal to an established renter?" Kory asked.

Some landlords in the county said they believe voluntary restraint in rent increases will halt demand for new controls.

The Miami Beach Apartment Association, an organization of small apartment owners, is trying to take that tack.

At a recent executive board meeting, the association decided to urge industry leaders not to increase rents.

Eugene Weis, president of the group said "We feel it is better business to maintain a harmonious relationship with our tenants. Increased rents at this point will simply invite government controls of some kind."

"The worst thing that could happen to this industry is to have government controls."

Weiss admitted that many of the association members are inactive and that they are not bound by the executive board's recommendation.

Other leaders in the apartment rental industry have expressed an equal distaste for taking advantage of relaxed controls.

Bonded Rental Agency, managers of about 8,000 low income apartment units in Dade County's ghetto areas, has informed its clients extraordinary rent increases will not be tolerated.

Art Greene, the agency's spokesman, said: "Our general rule is that in no event will rents be increased more than \$2 a week and then only if rents were unusually low during the time the freeze went into effect."

"We just got rid of a client who told his tenants they would be getting an increase to \$25 a week on apartments renting for \$16 before the controls were lifted," he said.

Carey's Rental Agency, one of Bonded's competitors, is less demanding of its clients.

"We follow the instructions of our clients," Oswald Smith, manager of Carey's said.

"Our increases are averaging about 10 per cent. That will eventually effect 200 to 300 units. The only time we'll recommend going over 10 per cent is if the rents were below the prevailing rate when the freeze hit," Smith said.

Dixie Rental Agency, another low income property management firm, has no firm policy on increases.

"Less than half of our clients have asked for rent increases," said manager Sam Lenoir. "Most of them are asking for between \$2.50 and \$3 increases."

The same dollar increases are being asked of tenants who rent on a weekly basis as those who rent on a monthly basis, Lenoir said.

Thus, tenants renting on a weekly basis, the majority are paying increases amounting to roughly 20 per cent of their freeze level rent.

Countywide the full impact of relaxed controls won't be apparent for several months, Wolf and Euringer said.

But the impact in many cases already has been stunning.

Mrs. Dorothy Postel, a Miami Springs duplex dweller, lived in the same modest apartment for 10 years and paid a modest rent of \$90 a month. A new landlord bought her apartment during the freeze. Then it was lifted.

"He sent us a letter giving us an option to start paying \$185 a month or to get out," Mrs. Postel recalled.

"With owners of this caliber, we need some kind of inflationary controls, I think."

"None of my friends has received a \$100-a-month raise in salary and that's where the rent money comes from."

MANY DADE RENTERS GETTING SOCKED— LIFTING OF FEDERAL CONTROLS BRINGS INCREASES

(By Doug Clifton)

For six years Max Grossman, a 76-year-old retired motel manager, rested in quiet tranquility in his \$135-a-month Coconut Grove apartment. Then, a week ago, a letter came.

Move in 15 days or sign a lease and start paying \$195 a month, the note from his landlord announced.

"I got a \$30 increase in my retirement," Grossman complained. "I can't give it all to the landlord. What does he think 'Im gonna do, go out and sell bananas?"

Philip Mendick was reasonably content paying \$136 a month for his one bedroom efficiency apartment at the Parkleigh Sutton Apartments at 530 Biscayne Blvd.

Today, Mendick is heading a tenants' organization at the Parkleigh because he and dozens like him have been hit with rent increases ranging from 48 percent to 68 percent.

"In my case the increase is only 48 percent," Mendick said. "But several of our members who are now paying \$119 a month for their apartments will have to start paying \$200 a month in February."

In southwest Miami, Jose Ronderon, of 47 S.W. 78th Pl, pays \$200 a month for his duplex apartment. On Jan. 13 Ronderon got a letter from his landlord informing him that his rent would go up to \$400 a month starting Jan. 15.

"I cannot pay it," Ronderon said dejectedly. "I have no lease, no contract, no nothing. I know the government said the landlord could raise the rent—but like this?"

"I must leave."

Grossman, Mendick and Ronderon are only three of many Dade apartment dwellers notified of increased rents in the two weeks since President Nixon announced the relaxation of guidelines in effect under Phase 2 of his anti-inflation economic plan.

Precisely how many of Dade's 190,000 renters are getting socked with increases is difficult to assess. But spot checks countywide by The Herald turned up dozens of cases, with increases of from 10 to 100 percent.

In the Miami offices of the Internal Revenue Service's wage-price division, until Jan. 11 the agency charged with enforcement of wage-price guidelines, there is a constant flow of complaints about increased rents.

"While there is no machinery now established to investigate complaints of rent increases," said Holger Euringer of the IRS regional office in Jacksonville, "we still welcome tenants to file complaints with us."

"After we accumulate enough of them to tell whether there are significant increases in the Dade and Broward area," he said, "we can send them off to the Cost of Living Council in Washington where they might decide to reinstitute some forms of control."

Although many Dade landlords are raising rents, many others are not.

"We probably will not do anything to raise rents until May when there may be a new set of guidelines issued," said Louis Veal, president of the Keyes Management Co., managers of about 4,500 rental units in Dade County.

"It is our feeling that if there is a new set of guidelines, they will be retroactive to the date the President made his speech. Imposing increases now that would later have to be adjusted would present too much of a problem," he said.

Veal, whose company manages rental properties nationwide, is not surprised that many Dade County landlords have asked for increases.

Here in Dade County the vacancy factor is very low and owners of smaller properties are probably taking advantage of the fact," he said.

It is the low vacancy factor which makes Dade County's rent scale the second highest in the nation. Its rents are surpassed only by those in neighboring Broward County. Broward's median rent is \$131 a month. Dade's is \$122, or one-third more than the national median.

A median, statisticians explain, is the "middlemost" value in any group of figures. That means half of Dade County's renters pay more than \$122 a month rent and half pay less.

Averages, though deceiving in their own right, reflect a more accurate picture of rent levels in Dade County.

According to a recent survey conducted by Dr. Reinhold Wolff's economic research firm, rents for one-bedroom apartments average \$215 a month and two-bedroom apartments average \$252.

"Hidden behind the average are the considerably higher rents in the beach areas where one-bedroom apartments average at between \$231 and \$355 a month and two-bedroom apartments average at between \$316 and \$448," Wolff said.

The low vacancy factor is also what is making Benda McMurray, like Max Grossman, a tenant in the Banyan apartments in Coconut Grove, stay in her two bedroom apartment despite a 24 per cent increase in rent.

Miss McMurray, a young career woman who lives in the unfurnished apartment with her sister, was paying \$190 a month for her second floor apartment.

She was among the several dozen tenants who received eviction notices shortly after President Nixon lifted the freeze. Starting Feb. 1 Miss McMurray and her sister will begin paying \$240 a month for the apartment they have occupied for three years.

"Because we have our own furniture, the landlord agreed to make the increase \$50 instead of \$60," she explained. "We'll stay. What else can you do?"

"I looked around and found some real rat traps at \$200 a month—besides, moving is such a hassle," she said.

She confirms what apartment manager James Ellis says is the reason for the increases.

"Our rents are competitive with others in the area," said Ellis.

His company, Jamestown in the Grove, managers of 11 rental apartment complexes, is seeking to get all renters on leases.

"The increases were fair in every case and we were perfectly within the law to send eviction notices to month-to-month renters. But why not look at the other side of the coin," he argued.

"Electricity went up 13.4 per cent during the freeze too, you know."

According to Euringer of the IRS, any rent increase in excess of the 2½ per cent suggested by the Cost of Living Council continues to be inflationary.

"Landlords were entitled to 2½ per cent plus 'pass throughs' for the cost of capital improvements," he said.

At the Banyan no major capital improvements have been made but tenants who agree to stay on at the increased rates will get their apartments painted and rugs installed if they are needed, Ellis said.

At the Parkleigh Sutton where increases were as high as 68 per cent, the landlord was unavailable for comment. But the tenants said that the apartment owner had made capital improvements and was contemplating a "pass through" of those improvements during the freeze.

President Nixon's removal of controls exempted the increase from scrutiny by the IRS.

Some Dade apartment owners are increasing rents in two steps. Established tenants get small increases but new tenants pay more for the same kind of apartment.

That practice is equally inflationary, Euringer said.

"The level of rent at an apartment house was based upon the rents charged on the property, not those charged to individuals. If identical apartments were renting at \$190 a month during the freeze, rents for new tenants would have to be set in terms of rents charged to old tenants," he explained.

Using that logic, Euringer said, landlords who are giving \$10 increases to established tenants and \$20 increases to new tenants, are violating the spirit of Phase 2.

At the Red Road Town House apartments, one of eight rental properties managed by Greater Miami Realty, old tenants are getting \$10 increases and new ones must pay \$20 above the freeze level rents.

Established rent of one-bedroom apartments in the Red Road property went from \$165 a month to \$175 a month after the removal of controls. New tenants pay \$185 for the same apartment.

Old tenants got 6 per cent increases while new ones, in effect, are paying 12 per cent more for the same apartment.

Don Kory, manager of Greater Miami Realty, says the increases are fully justified.

BARTLE BULL ON RONAN'S TOMB

(Mr. KOCH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. KOCH. Mr. Speaker, I would like to call to the attention of our colleagues a situation in New York which involves the expenditure of a large amount of Federal funds. I am a supporter of mass transit and am urging vastly greater expenditures for that vital service. However, in my judgment, Federal funds will be wrongly spent if the MTA is able to build a facility rivaling Grand Central Station when an expanded Grand Central Station itself could be used to accomplish the purpose.

A brilliant article authored by Bartle Bull appeared in the Village Voice of March 22, 1973, which sets forth the facts

and shows an extraordinary insight into city planning on the part of the author. I recommend it to our colleagues:

[From the Village Voice, Mar. 22, 1973]

RONAN'S TOMB

(By Bartle Bull)

With Rocky, Ronan, and Moses, New Yorkers are accustomed to the extravagant appetites of our three cement pharaohs. Already they've lavished over a billion on the Albany Mall in a town of only 116,000 and \$700 million on the World Trade Center when office space is vacant across New York, not to mention millions lost on the World's Fair and hundreds more proposed for the dreaded Oyster Bay Bridge. But even taxpayers jaded by these figures may be impressed by the latest Frankenstein, a beast monstrous enough to satisfy even Nelson Rockefeller; the plan to tear up Third Avenue and spend \$342 million (just for starters) on a new railroad terminal to be crammed under Third Avenue three blocks from the largely unused tracks of Grand Central Station.

If you're surprised by this news, it's because the planning and the application for federal funds have slipped by with the maximum stealth permissible under the law. An invisible public hearing, of the type perfected years ago by master planner Donald Elliott, was held last November 20 at Hunter College. To attend, you had to be either a legal notice freak or on the increasingly exclusive guest list of Dr. William Ronan, boss of the Metropolitan Transportation Authority.

Not even Edward Koch was invited to the hearing. (He is not only the area's congressman, but also a member of the congressional subcommittee on Mass Transit.) The Turtle Bay Association, which has represented the area's residents for 15 years and has its headquarters 100 feet from the proposed terminal, was not invited. But one Turtle Bay member spotted a discreet legal notice for the hearing, and James Amster, Turtle Bay's Chairman, appeared and testified. The MTA reports (inaccurately) that his was the only testimony opposing the plan. The "public hearing" was apparently designed to accommodate the diversity of views you would expect at a meeting of Stalin's cabinet. Could it be that hostile testimony was not welcome since all testimony given at the hearing was required by law to accompany Dr. Ronan's application for federal funds?

MTA sought federal funds for the project in October 1970 in an application to the Urban Mass Transportation Administration of the Department of Transportation. The amended application asks UMTA for \$228 million, two-thirds of the estimated cost. The other \$114 million will be paid by New York State. The source of the inevitable cost overrun money has not been designated. The \$342 million cost estimate is already a year old, and we can expect that the figure will go the way of the 10-cent subway fare. With the public hearing out of the way, UMTA is now considering the MTA's application, and if the project is approved, the next juicy step is the solicitation of bids (if that process is not already under way) and then the newest construction bonanza will start chewing up the city.

The proposal for the terminal is set forth, at least superficially, in UMTA's Draft Environment Statement for the project. This Statement, however, itself says that it is largely "based on data provided by the applicant," i.e. by the MTA itself. The basis for the project is the argument that a new mid-Manhattan terminal is needed for Long Island Rail Road trains to "increase the capacity of commuter rail lines into Manhattan," to relieve alleged overcrowding at Penn Station, and to improve "coordination between the Long Island Rail Road and the subway routes."

The new terminal would service Long Island Rail Road trains entering Manhattan from a tunnel now being built under the East River. The tunnel, which will also be used by the New York City Transit Authority and which is not included in the project's budget, will enter Manhattan under East 63rd Street. The underground terminal concourse will run from 47th Street to 50th Street. From 63rd Street to 55th Street the route will, theoretically, be constructed by tunneling. From 55th Street to 42nd Street, one of the most congested areas in the world, the route will be constructed by what the wrecking crews refer to euphemistically as "cut and cover methods."

Not surprisingly, the few disinterested New Yorkers who are aware of this scheme are horrified. A massive 14-block pit along Third Avenue, with years of drilling, dust, construction machinery, and obstructions to pedestrian and other traffic, will give the neighborhood a sustained pounding that the residential and commercial communities do not welcome. Like many other residential areas of the city from Canarsie to Corona, the East Side has been under siege by the eviction nightmares of "Urban Relocation, Inc.," by high-powered institutional expansion, and by massive government projects. The old-fashioned stew of construction interests, real estate manipulators, willing politicians, and visionary master planners is already at work on this one. Has anyone wondered why that valuable block-long lot next to Manny Wolf's on Third Avenue and 49th has been vacant all this time?

The Turtle Bay Association (of which this writer intends to be an implacable member) and other community groups are organizing to fight the project, now known in the area as "Ronan's Tomb." Turtle Bay's James Amster reports that the community is determined to stop the terminal and argues that its construction will threaten residential living on the East Side. Opposition to the project is spreading rapidly over the East Side as people learn what Ronan has in store for them. As Romaine Well, Chairman of East Side Residential Associations and the General Glap of East Side community organization, puts it, "We must kill this wasteful project before it kills us."

The essential argument of the project's opponents is that no serious consideration has been given to adapting Grand Central Station as a Long Island Rail Road terminal. The station now operates way below full capacity, with lots of OTB and not many trains. In 1929 there were 709 trains a day at Grand Central, now there are about 400. So why, ask the critics, can't the Long Island Rail Road come down Park instead of Third, and nestle into the lower level of the Grand Central?

The answer of the MTA is that the proposed terminal "is located more nearly in the centroid of mass transportation facilities in the area" and that the Grand Central subway system would become too congested, as it already operates at peak capacity during rush hours. Since the two stations would only be three blocks apart, the "centroid" argument is a hard one to follow, and the crowding at Grand Central should be reduced by the new Second Avenue subway line, which as the Environmental Statement notes, "will relieve congestion on the Lexington Avenue line." Presumably the Second Avenue subway could be linked to Grand Central. The MTA cites other problems with Grand Central, such as underpinning necessitated by further tunneling under Park Avenue, but the Environmental Statement concedes that "there are several possible locations within Grand Central that could be set aside for Long Island use," and that "there is some surplus station capacity in Grand Central and it would be physically possible to construct a route for the Long Island into Grand Central."

Opponents of the project face not only the

problem that they are making a late start and are taking on Rocky, Ronan, UMTA, and the construction interests, but also the public relations difficulty of attacking something that is presented as a mass transit project, a project to discourage commuters from driving into the city. Fortunately, the public is not as dumb as it looks to the planners. New York's voters were able to penetrate the misleading propaganda behind the Transportation Bond issue, which claimed to have a large mass transit component, and send that project back where it belonged.

With the present boondoggle, the point is that it does not help our desperate mass transit problems to squander limited resources on redundant facilities. The entire fiscal 1973 budget of the Urban Mass Transportation Administration is \$980 million for every mass transit project in the United States. Is it worth spending 25 per cent of the total federal mass transit budget to reduce over-crowding at one subway station? And yet no estimate was made of what it would cost to adapt Grand Central instead of building a new facility.

As attorney and mass transit advocate Myron Cohen puts it, "This scheme is a damned outrage. Money for mass transit is in such short supply. Behind it all is the very close relationship between Rockefeller and the construction trades." If the argument over the terminal is going to hinge on subway crowding, Cohen, recently Chairman of New York City's Subway Watchdog Committee, is a good man to talk to, but he wasn't asked to the November 20 hearing either. Cohen may have hit a nerve with the construction trades point, because Secretary of Labor Peter Brennan (the former boss of New York's construction unions) recently intervened to help Dr. Ronan with the Long Island Rail Road's labor problems, and it doesn't take much imagination to guess whether or not Brennan thinks this project is worth at least 25 per cent of UMTA's budget.

Congressman Koch argues that the terminal will destroy the residential character of the community east of Third Avenue. Koch and Councilman Carter Burden intend to fight the proposal vigorously. Koch plans to demand that the Department of Transportation prepare a new environmental impact statement that does not rely on self-serving material fed in by the MTA. He says that "the function of these experts is to state reasons for the goal that someone else wants to reach," and that an independent study is essential.

Hopefully, as the debate over the terminal develops, the sponsors will not pretend that their opponents, like Myron Cohen, Community Planning Board 6, and the threatened communities, are against mass transit. The issues are proper consultation, the validity of a Grand Central alternative, and the misallocation of limited public resources. The consultation point is critical, because the MTA has a special exemption from the requirement to get City Planning Commission approval for all terminals. As John Zuccotti, the new CPC Chairman, puts it, "It's unfortunate that authorities like the MTA or the Urban Development Corporation can avoid certain public hearings before the CPC or local community boards and so weaken their accountability."

Mass transit money is precious. Not only would the state and federal grants on this proposal starve needed projects in this city and elsewhere, but the federal grant alone (\$228 million) represents slightly more than the entire estimated operating loss of Amtrak for fiscal 1973 and 1974, in its first year, Amtrak, which serves 350 cities with more than 24,000 miles of track, suffered an operating loss of \$153 million. This year the loss is estimated at \$128 million, and next year at under \$100 million. These relatively modest

losses are being used by the Nixon administration to justify increasing cutbacks in national rail service, thereby diverting private and commercial traffic from the railroads to the highways and so further reducing the viability of the railroads in an unending spiral.

Civilized nations from Japan to Switzerland recognize that public money must support railroads and other forms of mass transit. West Germany and Italy last year subsidized railroad deficits of \$800 million each, and this year the Japanese National Railways expect a deficit of \$1.2 billion. Despite such losses, Japan is planning more super-express trains. Italy is spending \$7 billion on railroad improvements. France is spending \$420 million on new equipment this year alone, and Germany will spend \$10 billion to develop 180-mile-an-hour trains. But in this far richer country, the Department of Transportation is cutting back mass transit research, and the new Secretary of Transportation, Claude S. Brinegar, is preparing massive rail service reductions on the grounds of economy.

Even in this context, however, it seems that the Third Avenue terminal will only be reviewed intelligently if New Yorkers mobilize to fight the proposal at every level. Only Peter Pan could dream that the Department of Transportation would make an independent judgment, let alone that Nelson Rockefeller and Dr. Ronan might hesitate from a brief sense of public accountability.

AMERICA'S ENGAGEMENT IN ASIA AND THE WORLD

(Mr. GERALD R. FORD asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. GERALD R. FORD. Mr. Speaker, Under Secretary of State for Political Affairs William Porter was the principal speaker at a State Department regional foreign policy conference March 21 in my hometown of Grand Rapids, Mich., the principal city in the Fifth Congressional District of Michigan. The conference, which drew about 600 persons, was most successful.

During the conference, Porter reviewed the situation in Indochina. As part of that review, Porter revealed how the task of accounting for the 1,300 Americans listed as missing in action in Vietnam and Laos is being carried out. He said this job has been assigned top priority and spelled out the procedure being followed.

With the unanimous consent of the House, Porter's speech will appear at this point in the Record. The speech follows:

AMERICA'S ENGAGEMENT IN ASIA AND THE WORLD

(An Address by Under Secretary Porter)

The problem of giving a light luncheon speech on a weighty subject like foreign affairs is like an episode in "Tom Sawyer": Perhaps you remember that there was a sermon that droned along so monotonously and was so prosy that many a head began to nod—and even though it dealt in limitless fire and brimstone, so few remained awake among that predestined elect that they were hardly worth saving.

I can't talk to you about predestination because I have been told this distinguished audience is already a predestined elect. And I can't promise you salvation although I assume most of you have made your own arrangements. But I can make a short speech, and that I promise to do. And it will relate

to some of that international fire and brimstone that is a diplomat's stock in trade.

President Nixon opened his first inaugural address with these words: "Each moment in history is a fleeting time, precious and unique. But some stand out as moments of beginning, in which courses are set that shape decades or centuries."

The past few years have been such a moment. We are leaving the postwar world. Responding to our openings to the People's Republic of China and the Soviet Union, the major Communist nations are abandoning their policy of constant confrontation. New patterns of international relations are emerging.

The emergence of China, the growing strength of Japan and the collective voice of western Europe are transforming the political and economic scene. We encourage this process. We continue to support the European Community, its enlargement and strengthening. We welcome Japan's climb to the opportunities and responsibilities of a major country. We want good relations with the USSR. And the President has launched a relationship with China which both accepts and encourages its growing participation in the affairs of the international community.

NECESSITY OF ENGAGEMENT

The complexity and challenge of this more fluid environment have led some to counsel basic changes in our security and economic policies. Two developments have strengthened this view.

First, we have learned some hard lessons in international economics. Over the past two years, our imports grew by forty per cent while our exports increased only fifteen per cent—for the first time in this century the United States has a trade deficit.

And second, as Secretary Rogers recently stated, "After a long and frequently frustrating military conflict there may be some longing among Americans to withdraw from the burdens and responsibilities of an active role in world affairs. Twice before in this century our initial reaction was to pull back and concentrate on domestic issues."

After World War I, we isolated ourselves from international responsibilities, but we could not isolate ourselves from world depression and world war. After World War II, a man born in Grand Rapids exactly 89 years ago tomorrow, Senator Arthur Vandenburg, saved us from making the same mistake. He was in many ways the legislative father of those basic policies that have served us so well for the past quarter century—in 1945 the founding of the United Nations, in 1947 aid to Greece and Turkey, in 1948 the Marshall Plan, and in 1949 the establishment of NATO.

Once again our involvement in war is coming to an end. And once again a native son of this city is playing a major role in assuring that America remains realistically engaged in the world. Congressman Gerald Ford is a vigorous advocate of the view that—while we must avoid the overextension of the past—our own self-interest dictates an active American involvement in world affairs. In fact he is such a vigorous advocate, making some 200 speeches a year, that he puts cautious diplomats like me to shame.

I am undoubtedly preaching to the converted when I encourage this audience to support our continuing engagement in the world. Your very presence in a foreign policy conference indicates your opposition to an isolationist course. And while some have claimed the Middle West is a bastion of isolationists, I find quite the opposition to be the case. In the 1960's Michigan tripled its exports, which now exceed even the exports of New York. I understand from Mr. Brush that some 35 companies right here in Grand Rapids are exporting an increasing portion of their production. Naturally some 31% of all our crops and 14% of our manufactured

goods are exported. We now depend upon imports for 30% of our petroleum needs, and this dependence is growing.

TRADE LEGISLATION

Our welfare is inextricably linked with the economic health of the rest of the world. It is for that reason President Nixon has set a dual objective in economic policy this year—both to improve America's competitive position in world markets and to reform the international monetary and trade system.

Within the next few weeks the President will be submitting a request to Congress for the authority to negotiate an improvement in our trading position. For the past quarter century international trade has increased at a more rapid rate than world production—providing an essential stimulus to the most rapid global economic growth in man's history. America has shared in this growth. Our real per capita income has doubled in this period, and we are by far the most productive nation in the world today.

The recent devaluation of the dollar will greatly strengthen our competitive position. So will the lowering of European and Japanese barriers to our trade for which we are pressing. The United States is already competitive in many fields, from computers to agriculture to pharmaceuticals. Those Americans who doubt our ability to export should talk with the Japanese and Europeans, who are concerned that American goods may flood their markets. Freer trade—when reciprocated by other nations and with proper safeguards for adversely affected industries—is clearly in this nation's best interest. I hope you will all support the President's trade legislation.

DEFENSE BUDGET

Just as we must resist pressures to retreat from our outward-looking economic policies, so must we resist efforts to radically alter our national defense policies. It is the security provided by a strong national defense that has given us the confidence and ability to negotiate so successfully.

We all know the costs of maintaining a sufficient defense capability. What some people seem to forget are the greater long-term costs to ourselves and to our allies if we were to become a second-rate power militarily. Since 1969 we have reduced our armed forces by a third—from 3.5 million to 2.3 million men. The defense budget now consumes just seven per cent of our GNP, the lowest share since 1950.

The new Secretary of Defense, Elliot Richardson, has pledged to keep defense expenditures as low as is consistent with our essential needs. To go below this level of sufficiency would have seriously destabilizing effects in many parts of the world. It would prevent us from maintaining the momentum toward a more peaceful and open world so noticeable in recent years.

VIET-NAM

For my part I should like to devote the remainder of my remarks today to this problem which has occupied much of my time during the past eight years.

If all goes well, there will soon be no American combat troops in Viet-Nam for the first time since 1965. All of our known prisoners of war will have been released. By prisoners of war I mean those in Laos as well as in Viet-Nam, and we expect complete fulfillment of the promises that have been made about their release. These things will mark a day we have long awaited. We shall have reached it not by abandoning our friends but by opening the way to self-determination for all the people of South Viet-Nam.

There have been problems in Viet-Nam during these first sixty days of the peace agreement. We consider most of these problems to be a natural, almost inevitable, residue of decades of bitter conflict.

In general, the situation is stable; military activity has declined and the relative strengths of the two sides are unchanged. But it is easier to stop shooting than start talking, so solving South Viet-Nam's political problems may take place more slowly than was envisaged in the agreement. Nonetheless, the focus for both sides appears to be shifting to the political from the military.

This is the kind of evolution, if it continues, that we hoped would be a result of the cease-fire agreement and the new framework it provides for testing strengths at the polling place, rather than on the battlefield.

This can, of course, happen only if North Viet-Nam observes its undertaking to "strictly and scrupulously" fulfill the peace agreement. President Nixon has made clear our concern at North Vietnamese infiltration of large amounts of equipment into South Viet-Nam. If it continued, this infiltration could lead to serious consequences. The North Vietnamese should not lightly disregard our expressions of concern. But we hope it will not continue. Mutual restraint in the supply of arms by all outside parties, including the Soviet Union and the People's Republic of China, is of course an essential aspect of this situation.

A mechanism to monitor and supervise the cease-fire, the International Commission of Control and Supervision, consisting of Canada, Indonesia, Poland and Hungary, is in business. Spurred on by an energetic Canadian delegation, the Control Commission has got itself organized, deployed to the field, and has undertaken some investigations. Since Communist governments make legal arguments with politics, the Control Commission is still experiencing some difficulties. However, we believe that its performance to date has been creditable and holds the promise of greater impact as experience is gained.

We note also that high level political consultations have begun in France between the two South Vietnamese parties—this is the forum where complicated internal disagreements will be tackled and, we hope, resolved.

In South Viet-Nam morale has remained strong. President Thieu realizes the importance of the political struggle and is directing more of his Government's efforts to this area than ever before. There has been very little of the political and social unravelling that some have expected or hoped for. The Viet Cong, too, are concentrating on the political struggle which is in line with our aim of changing the nature of the struggle in that unfortunate land.

The United States will continue to support the efforts of the South Vietnamese people to achieve self-determination, as envisaged in the Peace Agreement and in the Act of the International Conference on Viet-Nam.

LAOS AND CAMBODIA

In Laos the cease-fire accords call for the withdrawal of all foreign forces and respect for the sovereignty and neutrality of the Kingdom. They were worked out and signed solely by the Lao parties. The United States respects the accords, and we very much hope that this time North Viet-Nam, and other nations, also will respect them. To achieve peace all outside parties must leave the Lao to settle their own problems. There are still cease-fire violations in Laos, although far fewer than in South Viet-Nam, but the parties are slowly working toward the formation of a provisional government to be named by March 23.

Cambodia was the last of the Indochinese states to be drawn into the Indochina conflict. It remains the only one without a cease-fire. At the time of the Viet-Nam cease-fire, President Lon Nol proclaimed a unilateral cessation of hostilities clearly designed to elicit an enemy response. After a few days of relative quiet, the answer was given in an upsurge of enemy attacks which has reached the highest level in over a year, and which

shows no sign of abating. Further efforts to open a dialogue with the insurgent leadership have received no reply except for threats of continued war. The situation in Cambodia must, therefore, be described as unsatisfactory at present.

POSTWAR AID

Throughout Indochina we must hasten the transition from the bitterness of war to the healing task of reconciliation and reconstruction. America's long tradition of humanitarian concern by itself calls for our active participation in a program of assistance. We are convinced that such a program will provide all parties a strong incentive to observe the peace. As compared to the heavy expenditure of the war, surely it is worth a small proportion of that amount to ensure that it is preserved. Preserving the peace will require a relatively modest outlay.

MIA'S

We have one other very important item on our agenda. With the return of our prisoners of war, we are giving the highest priority to the task of accounting for the 1,300 Americans listed as missing in action in Viet-Nam and Laos. This is a most serious responsibility. It is an obligation to those men and to their families who have waited for them through the long years, and we shall fulfill that obligation.

We are making a three-pronged approach to this subject:

—First, as each returning POW comes home, he is being debriefed to learn whatever information he may have on any Americans—and foreign nationals as well.

—Second, we are proceeding in the four-party Joint Military Commission composed of United States, South Vietnamese, North Vietnamese and Viet Cong representatives to secure an accounting for all our dead and missing. Article 8B of the peace agreement contains the most far-reaching language ever obligating the two sides in armed conflict to help each other to get information about the missing in action and the dead. Secretary Rogers and I raised this subject directly with North Vietnamese leaders in Paris during the international conference on Vietnam.

—And third, we have established in Thailand a Joint Casualty Resolution Center manned by American personnel solely responsible for searching for our missing in action personnel in Indochina. We will move as quickly as possible to secure the most thorough examination and reconciliation of each missing in action case.

I can bring you the assurance of this Administration that this subject of accounting for our missing in action will have the highest possible priority.

LESSONS OF NEGOTIATIONS

Let me complete this rather lengthy discussion of the situation in Indochina by sharing with you some of my thoughts about what working toward peace means. I think it is important to review the record of how we achieved a negotiated settlement in Viet-Nam and to consider some of the lessons learned along the way.

The negotiations lasted more than four years. During most of that time—through one sterile meeting after another—there was no appreciable progress toward a settlement. Early in the talks Hanoi demanded that we first withdraw all our forces unconditionally and throw out the South Vietnamese government as pre-conditions for serious negotiations. These demands were clearly unacceptable: had we withdrawn our troops, we would have had no leverage with which to pry out an agreement to release our prisoners; had we overthrown the Saigon government, we would have also sacrificed the principle of genuine self-determination by the South Vietnamese people.

Hanoi refused to alter its position, and the talks dragged on from one year to the next.

I can tell you it was not much fun. It was easy to get discouraged and, indeed, many at home did. Some critics of our policy urged our government to concede everything. Others advocated our breaking off the talks altogether.

However, the President remained dedicated to the belief that the only satisfactory way to resolve the conflict was by a settlement at the conference table and that, eventually, Hanoi would agree to undertake the serious negotiations necessary to bring this about. At the same time, the President fully understood North Vietnam's strategy of pursuing its goals by coordinated military and political actions—by fighting while talking.

He, therefore, developed and pursued a policy that would both encourage a negotiated settlement and maintain our commitment to assist the South Vietnamese people in their self-defense. By carefully keeping open the door to negotiations and by making a series of progressively forthcoming peace proposals of our own, we demonstrated our readiness to achieve a just compromise. At the same time, the President pursued the program of Vietnamization: This provided us with an alternative to the stalemated peace talks and simultaneously served as an inducement for the other side to negotiate seriously.

As you will recall, the Vietnamese communists agreed to forsake the battlefield in favor of the conference table only after their all-out invasion of the South in the spring of last year failed. In retrospect, the President's decision to resist that invasion by mining and bombing in the North was a critically important factor—indeed, perhaps the turning point—in bringing them to the negotiating table in a serious posture. The President again made clear his resolve when he resumed the bombing in December in response to Hanoi's decision to stall on reaching a final agreement. I am convinced that this action was both necessary and effective in bringing the war to an end.

I think there is an obvious, but very important point to be drawn from this experience—seemingly insurmountable obstacles to a just peace can, in fact, be overcome by the patient pursuit of policies which combine reasonableness and resolve, flexibility of approach, and firmness of purpose. These were the guidelines that enabled us to reach our goal in Viet-Nam. They should not be forgotten as we continue to move away from confrontation into an era of reconciliation both in Indochina and throughout the world.

ASIAN POLICY

In concluding, let me turn briefly to the larger problems of Asia. Why are we there and what are our objectives in the years ahead?

Some Americans still view Asia as an area of less vital concern than Europe. These are, however, certain realities which no one can question.

Half the world's people live in Asia.

Our trade with Asia now equals 85 per cent of our trade with Western Europe and is growing more rapidly.

Three times in a single generation we have been drawn into war in Asia.

Four of the world's major powers—the United States, Japan, China, and the Soviet Union—come together only in the Pacific.

We must and we will retain an active American presence in Asia. Our power there is an encouragement to our friends and is not provocative to our adversaries.

We will be guided in our approach to Asia's still uncertain future by two major policy objectives.

First, to enable our allies to assume the primary responsibility for their own security; and

Second, to persuade all Asian nations that

by not interfering in their neighbor's affairs, a new era of peace and prosperity is possible.

In 1972, we made extraordinary progress on both these fronts. The Nixon Doctrine of shared responsibilities and shared burdens is clearly succeeding. From South Vietnam to South Korea, our allies' growing military strength enables them to assume the major responsibility for their own defense. America's supporting role is rapidly becoming less onerous. Since 1969 we have reduced the number of our Armed Forces in Asia by seventy percent. In addition to the complete withdrawal of our forces from Vietnam, we have reduced our military presence by 70,000 men in Korea, Japan, the Philippines, and elsewhere.

However, as we review this record of progress, we must not lose sight of the substantial problems ahead. Asia is still far from achieving the delicate transition from turmoil to stability.

The goal that we have set for ourselves is the establishment of the kind of peaceful world that the Secretary of State has described as one in which:

"Dialogue and negotiation have replaced confrontation and conflict.

"People can move freely and easily across national borders.

"The sovereignty and independence of all countries is the first principle of international relations.

"Less reliance on force as an instrument of national policy."

The Secretary of State also noted that now "for the first time since the war such a world has become a practical possibility."

Senator Vandenberg once told the Senate that Theodore Roosevelt was right to say that the United States had no choice but to play a great part in the world and that the choice was whether to play it well or badly. He went on to say that no matter how much we might crave the easier path of lesser responsibility, we were denied that privilege. We had to play our part in the world in sheer defense of our own interests.

My thesis today has been that in bringing about a still-imperfect peace in Southeast Asia, in working toward the sort of world we want, we have played our part well. With your help, ladies and gentlemen, we shall keep on striving to do so.

VETO OF THE VOCATIONAL REHABILITATION ACT OF 1973

(Mr. DOMINICK V. DANIELS asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. DOMINICK V. DANIELS. Mr. Speaker, as a former sponsor of the Vocational Rehabilitation Act I rise to announce to all Members of this House that on Tuesday next I intend to be here on the House floor to cast my vote to override President Nixon's veto of S. 7, the Vocational Rehabilitation Act of 1973. I know I speak for all the Members of the New Jersey delegation on this side of the aisle and I hope some on the other side as well when I say that economy in Government is a good thing, but economy at the expense of handicapped Americans is false economy. And in this case there is no economy at all because this program—which has been in existence since 1920—takes people off the relief and welfare rolls and makes them taxpayers. Surely, Mr. Speaker, this is what Government is all about. Can Government at any level perform a nobler and more necessary service than restoring sick and crippled people to health?

Mr. Speaker, we have a long way to go in this area as we have between 7 and 12 million handicapped persons in this Nation who are not yet realizing their full potential.

I intend to vote to override President Nixon's veto and I urge all Members of this House to stand with the New Jersey Democrats who are united behind the principle that economy shall not be achieved by taking away the crutches of crippled people.

OEO AGENCY—CCC—BEGAN AIM

(Mr. DEVINE asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. DEVINE. Mr. Speaker, once again it has come to light that OEO has become involved in activities which have little effect on the poor, are purely political in nature, and result in violence and civil disturbance.

Among its other activities, the American Indian Movement—AIM—has taken over Alcatraz Island in San Francisco causing \$30,000 in damages; the Bureau of Indian Affairs in Washington causing \$3 million in damages; the Crazy Horse Museum in Pine Ridge, S. Dak., causing \$50,000 in damage; and is currently holding the town of Wounded Knee, S. Dak., in a reign of fear and terror.

The current leaders of AIM are Dennis Banks and Clyde Bellecount who are both Chippewas, both urban Indians, and both ex-convicts.

AIM began to develop in 1967 when Banks and Bellecount became employees of the Citizen's Community Centers—CCC—in Minneapolis, an OEO-funded agency. In January of 1968, Matthew Eubanks, leader of the Minnesota Black Panthers, and Douglas Hall, an activist lawyer, packed a CCC board meeting with gun-carrying Black Panthers and when the meeting ended early the next morning, the director had been replaced by Matthew Eubanks. The CCC program immediately shifted from helping the poor to creating turmoil within the black community and developing hatred toward the police. At this time, Banks and Bellecount were appointed to head up a new militant Indian group within the CCC framework.

The intentions of AIM now, as then, are consistent with the radical Black Panther-dominated CCC out of which it grew.

After Banks and Bellecount took control of AIM, they took great delight in telling everyone how AIM was going to be the Indians' Black Panthers. In June of 1972, they received OEO funding totaling \$113,000, much of which was spent on Indian survival schools. These schools taught the young many of the Black Panther doctrines and developed a hatred toward all non-Indians, both black and white.

When the AIM leaders decided to come to Washington last fall to take over the Bureau of Indian Affairs—BIA—they had become more sophisticated in their tactics. They veiled their plans by stating that they were coming to Washington to hold religious and cultural ob-

servances of various national monuments and convinced the Interior Department to allow them to use the auditorium of the BIA.

The National Council of Churches and various local religious groups offered housing and food which the Indians refused, since they knew where they would spend the following nights. While they were using the BIA auditorium, someone gained entry into the main building. When this occurred, the well thought out plans of Banks and Bellecount went into action, and the Indians immediately took control of the building and did \$3 million worth of damage.

The same group is now at Wounded Knee. To repeat what I have stated before, this militant, political, extreme and violently orientated group received its initial funding and has received subsequent funding from OEO.

It was not until Howard Phillips took over at OEO that such irresponsible funding has come to a stop. I am afraid that the case with AIM is not an isolated situation, but rather an example of how Federal funds, earmarked for the poor, have been directed to extreme revolutionary groups.

I ask that the following article from the Washington Post be printed in the RECORD.

[From the Washington Post, March 19, 1973]

HALF AIM INDIANS SAID TO RECEIVE U.S. FUNDS

DETROIT, MICH., March 18.—The Detroit News reported today more than half the members of the American Indian Movement are employees of social welfare agencies financed primarily by federal grants.

The News story by John Peterson said the organization whose leaders were instrumental in the takeover of Wounded Knee, S.D., has received more than \$400,000 in federal funds since its founding in 1968 as an offshoot of a Minneapolis antipoverty program.

The News said AIM has 258 members.

The paper quoted an unnamed federal official as saying: "When AIM took over Wounded Knee three weeks ago, the Justice Department was all set to move in and make arrests."

"But then AIM leaders threatened to call a press conference and disclose exactly how much financing they've had from the federal government in recent months. That's when the Justice Department backed off."

Peterson's story said a two-week investigation disclosed that last June 21, AIM received a \$113,000 grant from the Office of Economic Opportunity. Of that amount, Peterson said, \$60,000 was for "survival" schools in Minneapolis, St. Paul and Milwaukee to "instill American Indian culture" in grade school-age children.

WHO IS TO BLAME?

(Mr. DEVINE asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DEVINE. Mr. Speaker, I was cleaning out some old files last night and ran across an editorial which originally appeared in the Milwaukee Sentinel of August 24, 1971.

Since we hear many moans and groans from the Democrats in the House about how terrible everything is, perhaps they

will enjoy reading who is really responsible for what they cry about.

FRIENDS OF POOR?

Echoing the moguls of organized labor, the Democratic National Committee charges that President Nixon's new economic program favors big business at the expense of the common people.

This is the old political line that has worked so well for the Democrats for the last four decades in keeping, with few exceptions, the Republicans in the minority and out of power.

It is quite possible that this old political canard will fool the common people again, although some signs are cropping up in the opinion polls to indicate that the public is beginning to wise up to the fact that organized labor is interested only in feathering its own nest.

Working hand in glove with the Democratic Party, the national unions have acquired monopolistic powers which, with a public be damned attitude, they have exploited to their own advantage.

George Meanywhile (to coin a phrase), labor and the Democrats have been posing as the friends of the poor. Some friends! Most of the time since the 1933, Democrats and labor have controlled both Congress and the White House and yet, by their own admission, the poor are more than ever with us.

Going by the record, about the only periods of prosperity under Democratic rule in the last 40 years came under wartime conditions—which, speaking of economic game plans, is one the nation surely can do without for the next several generations.

What have the Democrats been doing for the poor between the times of blood stained prosperity? Among others, things like passing laws to increase the minimum wage, which destroys jobs, especially for the young, particularly for blacks.

Although Mr. Nixon appears bent on outdoing them in deficit spending, it was the Democrats, by and large, who got the nation hooked on the habit of year after year spending more than we earn. This is the root cause of inflation, which is a progressive tax, i.e., the poorer you are the harder it hits you.

It is possible, as the Democrats do, to interpret features of the Nixon economic program as favoring business. It should be recalled, however, that it is the private enterprise system that supports us all. The public enterprise system, the government, doesn't have anything that it doesn't take away from the people in the first place. A hefty chunk of what the government gets, not so incidentally, comes from taking up to about half of business' profits.

In seeking to encourage private enterprise through such things as the investment tax credit, therefore, the Nixon economic program is in reality seeking to benefit all of the people, and particularly the poor, the young and the disadvantaged minorities. They are the ones who stand to profit the most from any economic recovery.

FLOOD DISASTER PROTECTION ACT OF 1973

(Mr. WIDNALL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. WIDNALL. Mr. Speaker, I have introduced H.R. 6091, the administration's proposed amendments to the National Flood Insurance Act of 1968. This Flood Disaster Protection Act of 1973 is the first and most urgent of the administration's disaster assistance propo-

sals and is compatible with forthcoming disaster program recommendations.

The President has said that he intends to make 1973 a turning point in the quality of governmental response to natural disasters. Late in the 92d Congress, I introduced H.R. 16831, which is almost identical to this bill. Because of the press of time, the bill was not acted upon prior to adjournment.

The proposed amendments to the flood insurance program were written from the lessons learned in tropical storm Agnes. We discovered that, of \$3 billion in damage from Agnes, only \$5 million was covered under the current federally subsidized flood insurance program.

We have the opportunity this year to lessen the crushing economic blows that storms such as Agnes have dealt in the past.

This bill will, for example, increase single-family residential coverage limits from \$17,500 to \$35,000 on buildings and from \$5,000 to \$10,000 on contents. Non-residential building coverage would go from \$30,000 to \$100,000.

The bill would also accelerate identification of flood-risk zones. Upon identification, a community must either solve its flood problem or participate in the flood insurance program for it to be eligible in the flood-prone area for mortgage financing, which is extended by federally insured lenders. Likewise, an individual may be required to purchase flood insurance to be eligible for similar financing in a flood-prone neighborhood.

A section-by-section summary of the bill follows:

FLOOD DISASTER PROTECTION ACT OF 1973

SECTION BY SECTION SUMMARY

Sec. 1. Enacting clause.

Sec. 2. Findings and declaration of purpose.

Sec. 3. Definitions.

Sec. 101. Increased limits of coverage. Amends section 1306(b) of the Act to provide increased limits of coverage as follows:

	Subsidized coverage		Total coverage	
	Old limit	New limit	Old limit	New limit
	(1)	(2)	(3)	(4)
Single family residential.....	\$17,500	\$35,000	\$35,000	\$70,000
Other residential.....	30,000	100,000	60,000	200,000
Nonresidential.....	30,000	100,000	60,000	200,000
Contents, residential.....	5,000	10,000	10,000	20,000
Contents, nonresidential.....	5,000	100,000	10,000	200,000

Sec. 102. Requirement to purchase flood insurance. (a) Prohibits Federal financial assistance for acquisition or construction purposes for projects within special hazard areas previously identified by HUD and made eligible for flood insurance, unless the project will be covered by such insurance for its full development cost (less land cost) or the new limit of coverage (Col. 2 or 4 above), whichever is less. (b) Federal instrumentalities responsible for the supervision of lending institutions must direct such institutions to require flood insurance in connection with their real estate or mobile home and personal property loans in such identified areas, up to the same maximum limit or the balance of the loan, whichever is less. Both subsections would take effect July 1, 1973.

Sec. 103. Financing. Restores authority contained in 1956 Flood Insurance Act which permits Treasury borrowing authority to exceed \$250 million with the approval of the President.

Sec. 104. Increased limitation on coverage outstanding. Amends sections 1319 of the Act to raise limit on total amount of coverage outstanding from \$4 billion to \$10 billion.

Sec. 105. Flood insurance premium equalization payments. Would repeal the detailed formula for the sharing of losses between Government and industry and permit the necessary flexibility in loss-sharing to take into account longer-term loss experience trends and to compensate for the lack of precision in actuarial computations.

Sec. 201. Notification to flood-prone areas. (a) Requires HUD to public information on known flood-prone communities and to notify them within six months of their tentative identification as such. (List initially used would probably be Corps of Engineers list, based on 1960 Census data.) (b) Upon notification; community must either (1) promptly apply for participation in flood insurance program or (2) satisfy the Secretary within six months that it is no longer flood prone. A hearing may be granted to resolve disputed cases, but Secretary's decision is final unless arbitrary and capricious. (c) Additional flood-prone communities subsequently notified of their status must then meet the requirements of subsection (b) but are allowed at least one year in which to qualify for the flood insurance program before section 202 applies.

Sec. 202. Effect of non-participation in flood program. (a) Prohibits Federal financial assistance for acquisition or construction purposes within the identified flood-prone areas of communities that are not participating in the flood insurance program by July 1, 1975 (in most cases, about 18 months after the identification is made). (b) Directs Federal instrumentalities responsible for the supervision of lending institutions to prohibit such institutions from making real estate or mobile home loans after July 1, 1975, in areas identified as having special flood hazards unless the community in which the area is situated is participating in the flood insurance program.

Sec. 203. Repeals provision of existing Flood Insurance Act that would deny disaster assistance after December 31, 1973, to persons who for a period of a year or more could have purchased flood insurance but did not do so.

Sec. 204. Accelerated identification of flood risk zones. (a) Adds a new subsection (b) to section 1360 of the Act directing HUD to accelerate hazard area identification and rate studies. Specifically authorizes the Secretary to make grants, provide technical assistance, eliminate competitive bidding requirements, and make progress payments, if necessary to accomplish that objective. (b) Directs the agencies doing the technical work for HUD to give highest practicable priority to these studies, in order to assist the Secretary to meet existing August 1, 1973, statutory area identification deadline.

Sec. 205. Authority to issue regulations. Authorizes (a) the Secretary and (b) Federal agencies administering financial assistance programs and those supervising lending institutions, to issue any regulations necessary to carry out the Act.

ANNOUNCEMENT OF HEARING ON PROBLEMS OF THE INTERNATIONAL COMMUNITY

(Mr. MAZZOLI asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. MAZZOLI. Mr. Speaker, I would

like to announce a subcommittee meeting, to be held next Thursday, which I think will be of special interest to a great many of my colleagues.

As chairman of the District of Columbia Committee's newly formed Subcommittee on Labor, Social Services, and the International Community, I have scheduled an initial hearing to explore the rather unique problems which face members of the international community who come to this country to live and work in our Nation's Capital.

To the best of my knowledge, there has not previously been an attempt made to address the needs of these foreign visitors in a comprehensive or systematic way. I am hopeful that my subcommittee will be able to make a positive contribution in this important area.

The specific concerns to be explored at next week's hearing and subsequent meetings have been well summarized in previous testimony developed by our distinguished committee chairman, Congressman CHARLES C. DIGGS, JR.:

The District of Columbia with approximately 131 Foreign Missions, is host to the largest foreign diplomatic community of any national capital. (Heretofore) no legislative committee in the Congress (has been) responsible for the investigation, study and resolution of the myriad of non-diplomatic problems which beset members of this community.

The usual difficulties which arise in moving to a new city are complicated in this instance by language problems and cultural differences.

They involve such things as their children's education; municipal services to which they are entitled and where to go if such services are not forthcoming; dealing with local merchants; leasing and housing problems; immigration laws and customs regulations, and understanding of local criminal and civil laws and traffic regulations.

These problems are especially pressing to newly established Missions from developing countries who have not had the years of experience and background to guide them through our bureaucratic maze of agencies, departments and bureaus.

The District of Columbia is also the transitory home for a large number of members of our own Department of State Foreign Service and other Americans, as well as international organizations such as the World Bank, who share many of the same problems faced by the diplomatic community.

In closing, Mr. Speaker, I would like to invite any interested Members to attend our initial hearing on the problems of the international community. It will be held at 9 a.m., on Thursday, April 5, in room 1310 of the Longworth House Office Building.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. BURTON (at the request of Mr. McFALL), for today, on account of official business.

Mr. GUYER (at the request of Mr. GERALD R. FORD), for today, on account of official business.

Mr. McSPADEN (at the request of Mr. McFALL), for today, on account of official business.

Mr. THOMPSON of New Jersey (at the request of Mr. McFALL), for today and April 2, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. CULVER, for 30 minutes, today, and to revise and extend his remarks and include extraneous matter.

(The following Members (at the request of Mr. CRONIN) to revise and extend their remarks and include extraneous matter:)

Mr. YOUNG of Alaska, for 5 minutes, today.

Mr. WYATT, for 5 minutes, today.

Mr. BLACKBURN, for 5 minutes, today.

Mr. HEINZ, for 10 minutes, today.

(The following Members (at the request of Mr. STARK) and to revise and extend their remarks and include extraneous matter:)

Mr. O'NEILL, for 5 minutes, today.

Mr. COTTER, for 5 minutes, today.

Ms. ABZUG, for 10 minutes, today.

Mr. ROSTENKOWSKI, for 5 minutes, today.

Mr. JAMES V. STANTON, for 5 minutes, today.

Mr. MINISH, for 5 minutes, today.

Mr. DIGGS, for 5 minutes, today.

Mr. CASEY of Texas, for 5 minutes, today.

Mr. BRADEMAS, for 5 minutes, today.

Mr. McFALL, for 5 minutes, today.

Mr. STUCKEY, for 5 minutes, today.

Mr. BURKE of Massachusetts, for 15 minutes, today.

Mr. EILBERG, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. HUBER, to extend his remarks following those of Mr. GROSS on the bill H.R. 5293.

(The following Members (at the request of Mr. CRONIN) and to include extraneous matter:)

Mr. HANSEN of Idaho.

Mrs. HOLT.

Mr. ZION.

Mr. DERWINSKI in three instances.

Mr. PRICE of Texas.

Mr. CLANCY.

Mr. KETCHUM.

Mr. ESCH in two instances.

Mr. THOMSON of Wisconsin.

Mr. WHALEN.

Mr. RONCALLO of New York.

Mr. WYMAN in two instances.

Mr. CLEVELAND.

Mr. ARCHER in two instances.

Mr. HEINZ.

Mr. ZWACH.

Mr. BLACKBURN.

Mr. CRONIN.

Mr. TAYLOR of Missouri.

Mr. GOLDWATER.

Mr. YOUNG of South Carolina.

Mr. SHRIVER.

Mr. BOB WILSON in two instances.

Mr. THONE in two instances.

Mr. ABDNOR.

Mrs. HECKLER of Massachusetts.

(The following Members (at the request of Mr. STARK) and to include extraneous matter:)

Mr. NATCHER in two instances.

Mr. MINISH.
 Mr. MOSS.
 Mr. GONZALEZ in three instances.
 Mr. RARICK in three instances.
 Mr. HAMILTON.
 Mr. DRINAN in four instances.
 Mr. GAYDOS in 10 instances.
 Mr. DAN DANIEL.
 Mr. ASPIN in 10 instances.
 Mr. JAMES V. STANTON.
 Mr. NIX.
 Mr. LEGGETT in six instances.
 Mr. DOMINICK V. DANIELS.
 Mr. DENHOLM.
 Mr. WALDIE in five instances.
 Mr. BRASCO.
 Mr. HARRINGTON in two instances.
 Mr. STUDDS.
 Mr. EVINS of Tennessee in two instances.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1136. An act to extend the expiring authorities in the Public Health Service Act and the Community Mental Health Centers Act; to the Committee on Interstate and Foreign Commerce.

BILLS AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. HAYS, from the Committee on House Administration, reported that that committee did on March 28, 1973, present to the President, for his approval, bills and a joint resolution of the House of the following titles:

H.R. 5445. An act to extend the Clean Air Act, as amended, for 1 year.

H.R. 5446. An act to extend the Solid Waste Disposal Act, as amended, for 1 year; and

H.J. Res. 5. A joint resolution requesting the President to issue a proclamation designating the week of April 23, 1973, as "Nicolaus Copernicus Week" marking the quinquacentennial of this birth.

ADJOURNMENT

Mr. STARK. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 3 minutes p.m.), under its previous order, the House adjourned until Monday, April 2, 1973, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

677. A letter from the President and the National Executive Director of the Girl Scouts of the United States of America, transmitting the 23d Annual Report of the Girl Scout organization for the period ending September 30, 1973, pursuant to section 7 of the act of March 16, 1950, as amended by Public Law 272, 83d Congress (H. Doc. No. 93-74); to the Committee on the District of Columbia and ordered to printed with illustrations.

678. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to give effect to the International Convention on Conduct of Fishing Operations in the North Atlantic, signed at London under date of June 1, 1967, and for other

purposes; to the Committee on Foreign Affairs.

679. A letter from the Assistant Secretary of the Interior, transmitting the 16th Annual Report on the status of the Colorado River storage project and participating projects, pursuant to 70 Stat. 105; to the Committee on Interior and Insular Affairs.

680. A letter from the Deputy Assistant Secretary for Territorial Affairs, Department of the Interior, transmitting the annual report of the Government Comptroller for Guam of the fiscal condition of the Government of Guam for the year ended June 30, 1972, pursuant to the Organic Act of Guam (as amended); to the Committee on Interior and Insular Affairs.

681. A letter from the Attorney General, transmitting a draft of proposed legislation to amend section 101 and 902 of the Federal Aviation Act of 1958 and chapter 2, title 18, United States Code, to implement the Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation, and for other purposes; to the Committee on Interstate and Foreign Commerce.

682. A letter from the Secretary of Health, Education and Welfare, transmitting a draft of proposed legislation to extend for 3 years the programs for comprehensive State and areawide health planning, and for comprehensive public health service and health services development, and to repeal a requirement that at least 15 percent of a State's formula allotment for public health services be available only for mental health services; to the Committee on Interstate and Foreign Commerce.

683. A letter from the Secretary of Health, Education, and Welfare, transmitting a draft of proposed legislation to make permanent the program of research and demonstrations relating to health facilities and services; to the Committee on Interstate and Foreign Commerce.

684. A letter from the Secretary of Health, Education, and Welfare, transmitting a draft of proposed legislation to make permanent the authority to conduct national health surveys and studies; to the Committee on Interstate and Foreign Commerce.

685. A letter from the Secretary of Health, Education, and Welfare, transmitting a draft of proposed legislation to amend the Drug Abuse Office and Treatment Act of 1972 to modify the authorization of appropriations for the program of special project grants and contracts, and for other purposes; to the Committee on Interstate and Foreign Commerce.

686. A letter from the Attorney General, transmitting a draft of proposed legislation to amend section 215, title 18, United States Code (receipt of commissions or gifts for procuring loans), to expand the institutions covered; to encompass indirect payments to bank officials; to make violation of the section a felony; and to specifically include offerors and givers of the proscribed payments; and for other related purposes; to the Committee on the Judiciary.

687. A letter from the Attorney General, transmitting a draft of proposed legislation to prohibit the unauthorized possession within any Federal penal or correctional institution, of any substance or thing designed to damage the institution or to injure any persons within or part of the institution, and for other purposes; to the Committee on the Judiciary.

688. A letter from the Attorney General, transmitting a draft of proposed legislation entitled "Public Safety Officers' Benefits Act of 1973"; to the Committee on the Judiciary.

689. A letter from the Secretary of Transportation, transmitting a report on the utilization of authority to designate and rent inadequate quarters, lease family housing and hire quarters for Coast Guard personnel during the year 1972, pursuant to 14 U.S.C. 475(f); to the Committee on Merchant Marine and Fisheries.

690. A letter from the Chairman, U.S. Civil Service Commission, transmitting a draft of proposed legislation to provide for payments by the Postal Service to the Civil Service Retirement and Disability Fund for increases in the unfunded liability of the fund due to increases in benefits for Postal Service employees, and for other purposes; to the Committee on Post Office and Civil Service.

691. A letter from the Chairman, U.S. Atomic Energy Commission, transmitting a draft of proposed legislation to amend the EURATOM Cooperation Act of 1958, as amended; to the Joint Committee on Atomic Energy.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FRASER: Committee on Foreign Affairs. House Resolution 330. Resolution on U.S. oceans policy at the Law of the Sea Conference (Rept. No. 93-96). Referred to the House Calendar.

Mr. WALDIE: Committee on Post Office and Civil Service. H.R. 3798. A bill to amend subchapter III of chapter 83 of title 5, United States Code, to provide for mandatory retirement of employees upon attainment of 70 years of age and completion of 5 years of service, and for other purposes; with amendment (Rept. No. 93-97). Referred to the Committee of the Whole House on the State of the Union.

Mr. WALDIE: Committee on Post Office and Civil Service. H.R. 6077. A bill to permit immediate retirement of certain Federal employees (Rept. No. 93-98). Referred to the Committee of the Whole House on the State of the Union.

Mr. DIGGS: Committee on the District of Columbia. H.R. 342. A bill to authorize the District of Columbia to enter into the Interstate Agreement on Qualification of Educational Personnel (Rept. No. 93-99). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. DIGGS: Committee on the District of Columbia. H.R. 4586. A bill to incorporate in the District of Columbia the National Inconvenienced Sportsmen's Association (Rept. No. 93-100). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BADILLO (for himself, Ms. ABZUG, Mr. BINGHAM, Mr. BROWN of California, Mr. DRINAN, Mr. FISH, Mr. HARRINGTON, Mr. HELSTOSKI, Miss HOLTZMAN, Mr. MOAKLEY, Mr. NIX, Mr. POBELL, Mr. PRICE of Illinois, Mr. REES, Mr. ROSENTHAL, and Mrs. SCHROEDER):

H.R. 6299. A bill for the relief of certain distressed aliens; to the Committee on the Judiciary.

By Mr. BAKER (for himself and Mr. KUYKENDALL):

H.R. 6300. A bill to establish rational criteria for the mandatory imposition of the

sentence of death, and for other purposes; to the Committee on the Judiciary.

By Mr. BENNETT (for himself, Mr. BAKER, Mr. BEVILL, Mr. BLACKBURN, Mr. CLARK, Mr. DUNCAN, Mr. FISHER, Mr. GIBBONS, Mr. HALEY, Mr. MATSUNAGA, Mr. NELSEN, Mr. NICHOLS, Mr. NIX, Mr. PEPPER, Mr. QUIE, Mr. RARICK, Mr. SCHERLE, Mr. SIKES, Mr. WHITEHURST, and Mr. WILLIAMS):

By Mrs. SULLIVAN (for herself, Mr. DINGELL, Mr. MAILLIARD, and Mr. PRITCHARD):

H.R. 6396. A bill to amend the Anadromous Fish Conservation Act in order to clarify the duties of the Secretary of the Interior thereunder and to extend the authorization for appropriations to carry out such act; to the Committee on Merchant Marine and Fisheries.

By Mrs. SULLIVAN (for herself, Mr. DINGELL, Mr. MAILLIARD, Mr. GOODLING, Mr. DU PONT, Mr. PRITCHARD, and Mr. HANNA):

H.R. 6397. A bill to authorize the Secretary of the Interior to establish programs and regulations for the protection of the fishery resources of the United States, including the fresh water and marine fish cultural industries, against the dissemination of serious diseases of fish and shellfish; to the Committee on Merchant Marine and Fisheries.

By Mr. THONE:

H.R. 6398. A bill to amend the Communications Act of 1934 to provide that licenses for the operation of a broadcast station shall be issued for a term of 5 years, and to establish orderly procedure for the consideration of applications for the renewal of such licenses; to the Committee on Interstate and Foreign Commerce.

By Mr. WALDIE:

H.R. 6399. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income certain amounts of retirement benefits from public retirement systems; to the Committee on Ways and Means.

By Mr. BOB WILSON (for himself, Mr. BLACKBURN, Mr. MAYNE, Mr. CRANE, Mr. BAKER, Mr. SCHERLE, Mr. KETCHUM, Mr. WHITEHURST, Mr. FISHER, Mr. VEYSEY, Mr. VANDER JAGT, Mr. KEMP, Mr. MICHEL, Mr. RHODES, Mr. GOLDWATER, Mr. ESHLEMAN, Mr. HOSMER, Mr. HASTINGS, Mr. COLLINS, Mr. NELSEN, Mr. WARE, Mr. TREEN, Mr. BURGNER, Mr. HINSHAW, and Mr. DAVIS of Georgia):

H.R. 6400. A bill to promote the utilization of improved technology in federally assisted housing projects and to increase productivity in order to meet our national housing goals, and for other purposes; to the Committee on Banking and Currency.

By Mr. WINN:

H.R. 6401. A bill to amend the Occupational Safety and Health Act of 1970 to require the Secretary of Labor to recognize the difference in hazards to employees between the heavy construction industry and the light residential construction industry; to the Committee on Education and Labor.

By Mr. WOLFF:

H.R. 6402. A bill to prohibit the exportation of grain from the United States whenever the supply of grain is not sufficient to meet domestic needs; to the Committee on Banking and Currency.

By Mr. WOLFF (for himself and Mr. RANGEL):

H.R. 6403. A bill to amend the Internal Revenue Code of 1954 to provide an additional itemized deduction for individuals who rent their principal residences; to the Committee on Ways and Means.

By Mr. WYMAN:

H.R. 6404. A bill to amend the Communications Act of 1934 to establish orderly procedures for the consideration of applications for renewal of broadcast licenses; to the Committee on Interstate and Foreign Commerce.

H.R. 6405. A bill to provide that, after January 1, 1973, Memorial Day be observed on May 30 of each day and Veterans Day be observed on the 11th of November each year; to the Committee on the Judiciary.

By Mr. WYMAN (for himself and Mr. VEYSEY):

H.R. 6406. A bill to amend the Federal Trade Commission Act (15 U.S.C. 41) to provide that under certain circumstances exclusive territorial arrangements shall not be deemed unlawful; to the Committee on Interstate and Foreign Commerce.

By Mr. YOUNG of Georgia:

H.R. 6407. A bill to amend the Urban Mass Transportation Act of 1964 to require community representation and participation (including proportionate representation of minorities and low-income groups), through the appointment of State and local advisory councils, in policy and decisionmaking by State and local transit agencies seeking assistance under that act; to the Committee on Banking and Currency.

H.R. 6408. A bill to amend the Urban Mass Transportation Act of 1964 to require proportionate representation of minority and low-income groups on State and local transit agencies seeking assistance under that act; to the Committee on Banking and Currency.

By Mr. YOUNG of South Carolina:

H.R. 6409. A bill to extend for 5 more years the expiring provisions of the Agricultural Act of 1970; to the Committee on Agriculture.

By Mr. ZWACH:

H.R. 6410. A bill to amend the Fish and Wildlife Act of 1956, to protect game and wildlife resources by prohibiting the use of lead shot for hunting in marshes and other aquatic areas, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. BIAGGI (for himself, Mr. ROSENTHAL, Mrs. HECKLER of Massachusetts, Mr. BRASCO, Mr. BINGHAM, and Mr. HARRINGTON):

H.J. Res. 469. Joint resolution authorizing the Secretary of Health, Education, and Welfare to encourage and assist in the distribution of the "Patient's Bill of Rights" to patients in hospitals and other health care facilities; to the Committee on Interstate and Foreign Commerce.

By Mr. MAZZOLI:

H.J. Res. 470. Joint resolution proposing an amendment to the Constitution relating to the term of office of Members of the House

of Representatives and the eligibility of such Members to be elected to the Senate; to the Committee on the Judiciary.

By Mr. WHITEHURST (for himself, Mrs. HOLT, and Mr. TREEN):

H.J. Res. 471. Joint resolution proposing an amendment to the Constitution of the United States; to the Committee on the Judiciary.

By Mr. DON H. CLAUSEN:

H. Con. Res. 168. Concurrent resolution expressing the sense of Congress that our NATO allies should contribute more to the cost of their own defense; to the Committee on Foreign Affairs.

By Mr. CONABLE:

H. Con. Res. 169. Concurrent resolution providing recognition for Columbus; to the Committee on House Administration.

By Mr. LOTT:

H. Con. Res. 170. Concurrent resolution relating to the U.S. fishing industry; to the Committee on Merchant Marine and Fisheries.

By Mr. RUPPE:

H. Con. Res. 171. Concurrent resolution expressing the sense of the Congress that summer youth programs under the Economic Opportunity Act of 1964 should be continued; to the Committee on Education and Labor.

By Mr. RARICK (for himself and Mr. DOWNING):

H. Res. 335. Resolution maintaining U.S. sovereignty, Panama Canal Zone; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII,

118. The SPEAKER presented a memorial of the Legislature of the State of New Hampshire, relative to setting a starting date of the Vietnam conflict for administrative purposes; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Ms. HOLTZMAN:

H.R. 6411. A bill for the relief of Murray Swartz; to the Committee on the Judiciary.

By Mr. MCKAY:

H.R. 6412. A bill for the relief of Monique Olive; to the Committee on the Judiciary.

By Mr. RONCALIO of Wyoming:

H.R. 6413. A bill for the relief of Harry H. Hashimoto; to the Committee on the Judiciary.

By Mr. RUPPE:

H.R. 6414. A bill granting authority to the Secretary of the Army to renew the license of the Ira D. MacLachlan Post No. 3, The American Legion, Sault Sainte Marie, Mich., to use a certain parcel of land in Saint Marys Falls Canal project; to the Committee on Armed Services.

SENATE—Thursday, March 29, 1973

The Senate met at 10 a.m. and was called to order by the President pro tempore (Mr. EASTLAND).

PRAYER

Dr. Leonard H. Cochran, Methodist minister, retired, Perry, Ga., offered the following prayer:

Almighty God, may those who work here as servants of the Nation humbly acknowledge their dependence upon Thee

so that we may safely depend upon them.

As a great rock arrests the drifting sand of the desert, allowing vegetation to take root and grow at its sheltered base, so may these Senators put their backs against the drifting life of this day until noble virtues and lasting qualities of life can take root and flourish in the land.

Aid them in doing that which will assure the continuance of the Nation in a glorious future.

May some one of them be able to say

what other men will take note of, and long remember. May each of them have that perception and wisdom to see and to choose the best above the good, the highest above the ordinary, and the worthy above the popular. Amen.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of

Wednesday, March 28, 1973, be dispensed with.

The PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that all committees may be authorized to meet during the session of the Senate today.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. SCOTT of Pennsylvania. Mr. President, I yield back my time under the standing order.

The PRESIDENT pro tempore. Under the previous order, the distinguished Senator from Washington (Mr. JACKSON) is now recognized for not to exceed 15 minutes.

THE JACKSON AMENDMENT ON FREEDOM OF EMIGRATION

Mr. JACKSON. Mr. President, last week there were hints from Moscow that Soviet citizens wishing to emigrate would be granted permission to do so. The suggestion that Soviet citizens would at last be given their freedom was whispered to Western journalists by unnamed Soviet "sources." A handful of visas were distributed. The news was managed with unusual sophistication: The Soviets went so far as to invite a television crew to the Moscow offices where cutrate visas were being issued to educated Jews who had been waiting months and even years for permission to emigrate. And Victor Louis, the Moscow "journalist" who surfaces like an oil slick whenever the Kremlin needs a PR man, suggested in an Israeli newspaper that the Kremlin has decided to stop collecting the "education" tax on emigrating Jews, but the law will remain on the statute books.

That was last week.

This week, Mr. President, one courageous family, scattered on three continents, is risking starvation to obtain freedom and to make it clear to us what they already know: That there has been no genuine movement toward a policy of free emigration in the Soviet Union, that families are still being cruelly divided, and that, tax or no tax, there are innocent men and women in the Soviet Union who cannot buy a visa at any price.

Mr. President, I want to speak for a moment about Mark Yampolsky and his family. And I want my colleagues to know that as I speak, Mark Yampolsky is standing in front of the Soviet Embassy on 16th Street on the third day of a hunger strike; his wife, Eleanora, is in front of the Soviet Embassy in London, also on a hunger strike; and Eleanora's parents and sister are ill, perhaps gravely, after a 6-day hunger strike in Novosibirsk, Siberia. The inhuman suffering that these brave people have endured is sadly familiar.

Several months ago, and then only after a year-long campaign during which Mark, now 25, was twice arrested and

imprisoned, he and his young wife were permitted to buy their freedom from the Soviet Government. They paid more than 10,000 rubles for two exit visas and, along with Eleanora's grandfather, they left Kiev to go to Israel. Unhappily, Eleanora's parents, and her sister—the Poltinnikov family from Novosibirsk, Siberia—were not so fortunate. They have seen each of seven requests for an exit visa turned down cold by the Russian authorities.

Dr. Isaac Poltinnikov, Mark's father-in-law, is an outstanding ophthalmologist who retired 2 years ago. Since applying to emigrate from the Soviet Union last summer he has had his only income, his retirement pension, terminated. He and his family have suffered ceaseless ordeals and abuses including the imprisonment of his wife and daughter—Eleanora's sister—on charges of having petitioned the Soviet authorities for an exit visa.

Last week the Poltinnikovs were again denied permission to emigrate and, in desperation, they began a hunger strike at the central telephone office in Novosibirsk. Eleanora and Mark also resorted to a hunger strike—she in London, he in Washington—when Eleanora was told by the Russian authorities this week that:

Your parents will never be allowed to emigrate.

Yesterday the Poltinnikov family was refused medical attention at the central telephone office in Novosibirsk. After 6 days of starvation Eleanora's mother, who is a diabetic, suffered a medical crisis that required her to terminate her protest. The family, as far as ever from having the right to emigrate, is recuperating in the apartment of friends in Novosibirsk.

The Government of the Soviet Union has simply and clearly terrorized the Poltinnikov family. What sense is there in the cruel torture of these innocent human beings? What legitimate policy of the Soviet Government is served by keeping them, against their will, from emigrating to freedom?

Mr. President, it seems clear that the Soviet Government is terrorizing the Poltinnikov family in order to discourage others who wish to emigrate from applying for exit permits. Soviet citizens who apply for permission to emigrate are routinely fired from their jobs or relieved of their pensions—like Dr. Isaac Poltinnikov they are left destitute. Soviet authorities hope to deter through fear and intimidation, through harassment, through imprisonment in corrective labor camps, in jails, and in institutions for the mentally ill.

Last week's managed news of a significant shift in Soviet emigration policy was a fraud—and a transparent one at that. There is more truth in Mark Yampolsky and his hunger strike on 16th Street than in all the articles, all the broadcasts, all the Tass releases and diplomatic assurances that last week sought to extenuate, explain, and obscure. The Soviet Government has penned in the Poltinnikov family in Novosibirsk and it is doing the same thing to

thousands of other men, women, and children all over the Soviet Union.

Before last November's Presidential elections, as many Senators will recall, the Soviets permitted a number of families to emigrate without payment of the education ransom. Immediately after the election the ransom was reimposed. This followed the pattern that had been set before last year's Moscow summit when, again, a "tactical liberalization" of Soviet emigration policy was followed by a relapse into the old pattern of harassment and denial. I must say that I am amazed that the Soviet authorities thought, as apparently they did, that last week's selective release of a few families in Moscow at bargain basement prices would fool the American people. The fact is that for every Soviet citizen who was unable financially to pay the notorious education ransom, there were—and are—hundreds who cannot buy a visa at any price. The fact that some visas are being sold at discount prices is little comfort to the thousands who are not being permitted to buy. Only a policy of granting every legitimate applicant a visa within a fixed and reasonable period of time can alter that.

Mr. President, when one compares last week's hints from Moscow with this week's reality it becomes clear that there can be no effective substitute for the passage of my amendment—cosponsored by 76 Senators—to deny most-favored-nation treatment, credits, credit guarantees, and investment guarantees to States that deny their citizens the right or opportunity to emigrate. This amendment gives the Soviets an incentive to permit free emigration—and it provides a sanction if they do not, either now or at any time in the future. By requiring a semiannual report of compliance, we in Congress can be assured that any positive change in Soviet emigration policy could not be reversed without the loss of MFN and the other trade and credit benefits.

Mr. President, I wish to be clear: I will not put a dollar sign on freedom. I intend to keep faith, as I am certain my colleagues do, with young Mark Yampolsky and with the thousands of brave men and women whose watch he is keeping.

Mr. President, I ask unanimous consent that my remarks made at the National Press Club on Thursday, March 22, 1973, be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS BY SENATOR HENRY M. JACKSON ON EAST-WEST TRADE AND FREEDOM OF EMIGRATION, NATIONAL PRESS CLUB

Ever since the end of World War II the peace and stability of the world have been threatened by the walls that have divided East from West. Churchill recognized the danger to peace and the barrier to freedom drawn across Europe in his famous "Iron Curtain" speech in Fulton, Missouri. And along with an awareness of the danger that lies in division came a determination to do something about it, a resolve repeated by each successive American President to promote the free movement of men and ideas.

When the United Nations Declaration of Human Rights was unanimously approved in 1948, no one would have dreamed that 25 years later it would take a Congressional amendment to a trade bill to remind the

Russians that the Declaration includes the right to emigrate.

There is welcome evidence that the White House and the Kremlin now take seriously the determination of the Congress to withhold trade concessions from countries that deny their citizens the opportunity to emigrate. They cannot help but be impressed by the overwhelming support for my amendment to the forthcoming trade bill—fully three-quarters of the Senate and 275 members of the House are joined as cosponsors.

The amendment is a simple one. Under its provisions, the granting of most-favored-nation treatment and the extension of credits or credit guarantees or investment guarantees to nonmarket countries cannot take place until the President reports to the Congress that the country in question does not deny its citizens the right or opportunity to emigrate, either by imposing more than nominal taxes on emigration or by any other means.

This week we have seen some encouraging signs that the Soviets are being more generous in implementing emigration regulations that they have always claimed are consistent with free emigration. I am sure you have seen the reports that some tens of individuals have had the ransom tax waived and that still others will be permitted to emigrate without the payment of the so-called "education tax." It is my great hope that by the time our amendment is enacted into law—and we intend to see that it is—the practice in the Soviet Union will be such as to permit the President without hesitation to make the statutory report of compliance.

We wrote the reporting requirement into the amendment after observing how capricious Soviet emigration policy has been. We all remember that before the Moscow summit there was a relaxation that was followed, after the summit, by a relapse into the old patterns of harassment and taxation to discourage and deny emigration. So to make certain that, once started, the flow of free emigration will not be shut off, the amendment requires the President to make a report of compliance every six months for so long as MFN and the other trade benefits are made available. It is this provision that gives Congress the essential assurance we require of continuing compliance with the free emigration requirement.

Terminating the collection of the Soviet ransom tax would be a great first step in the direction of removing barriers to free emigration. An end to the Russian practice of firing visa applicants from their jobs would be another. Now, I have heard it said that the Soviets are going to keep the ransom tax on the statute books but they won't apply it in practice. I say that we are going to put the Jackson amendment on the statute books but in the hope that it won't apply to the Soviet Union because they will be in compliance with the free emigration provision.

I'm not against trade with the Soviet Union. Long before the President went to Moscow I was one of a handful of Senators who sponsored the East-West Trade Relations Act to promote trade with the Soviet Union. But I believe that we ought to use our vast economic power to help bring freedom and dignity to thousands of individuals who have been willing to stand up and fight for their right to leave Russia. I am proud that America is fighting to help them obtain their freedom.

Once we watched helplessly as barbed wire fences and walls with watchtowers were built—not to keep people out, but to keep them in. We've seen people machine gunned at the Berlin Wall or shipped off to prison camps. Their crime was the desire to be free.

The thousands of Soviet citizens who wish to emigrate aren't criminals—they're just plain human beings who want to make a better life for themselves in another country

where they are welcome. That's a very familiar story to Americans. I wouldn't be here myself if Norway—the country of my parents—had had a repressive emigration policy like the Soviet Union has now.

While we're bargaining with the Russians over dollars and rubles let's do some bargaining on behalf of helpless human beings. When we talk about free trade let's talk about free people, too.

Mr. JACKSON. Mr. President, at this point I wish to announce that the senior Senator from Hawaii (Mr. FONG) and the junior Senator from New Mexico (Mr. DOMENICI) have joined in cosponsorship since I placed the East-West trade and freedom of emigration amendment in the RECORD on March 15, bringing the total number of cosponsors of the amendment to 76, more than three-fourths of the Senate.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time be charged against my time under the order.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to reserve the remainder of my time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, how much time does the Senator from Washington have remaining?

The PRESIDING OFFICER. The Senator from Washington has 5 minutes remaining.

Mr. ROBERT C. BYRD. I ask unanimous consent that that time may be reserved to me.

The PRESIDING OFFICER. Without objection, it is so ordered.

Under the previous order, the Senator from Maryland (Mr. MATHIAS) is recognized for not to exceed 15 minutes.

TRUTH IN GOVERNMENT

Mr. MATHIAS. Mr. President, no danger that faces the United States today is more serious than the possibility that a significant number of our people are losing faith in the validity and purpose of our Government. The polls tell us of the growing distrust of the public in the honesty of public officials. That, in turn, leaches confidence in our institutions. I regard a temper of doubt or distrust as a great danger.

When a democratic government is imperilled by loss of confidence, it follows that the people must feel some lack of confidence in themselves. Corrosion attacks throughout the whole system. The challenge to leadership is then the restoration of trust in government and the renewal of faith in the Nation.

It is, therefore, useful to think a minute about the nature of loyalty and of simple patriotism. Each of us in Congress, and every other public official from the President to the most junior civil servant, has expressed his loyalty in its most elemental form when he took his oath to defend the Constitution. I believe that every one of us understood that the obligation of this oath was paramount to any other claim on us. No longer are we free to prefer the interest of a person or a party over the mandate of the Constitution. Loyalty in America is loyalty to the law of the land. The great inheritance from our Revolution is the freedom to choose this loyalty above all others.

Yet, it seems to me that at this moment the issue of conflicting loyalties is presented to us in three distinct cases that are pending in the Senate and demanding determination. The common question that must be answered in all three is whether the persons involved gave a greater loyalty to some lesser interest than to the Constitution. It is in this light that we have to make our separate judgment in the instances of the resurfacing of ITT as an influence on foreign policy, the nomination of L. Patrick Gray III to be Director of the Federal Bureau of Investigation, and in the investigation of Watergate election abuses.

The very fact that we are required to make judgments in these cases imposes upon us the identical choices that lay before the parties who are involved in each. We, ourselves, have to decide what is loyalty to the law, what is defense of the Constitution; and what is simply the strong pull of friendship, partisanship, or some veiled interest.

Such a choice seems simple when it is presented as an academic proposition; but each specific case bristles with practical problems and subordinate questions. Not the least of the cautions we must observe is the fact that loyalty to the law imposes adherence to the principle that every man is innocent until he is proven otherwise. Unjust accusations can no more be tolerated in the Senate than unjust actions can be condoned.

Our responsibilities are great, our difficulties are great, but whether our work will be great depends on whether we, ourselves, are inspired by the impartial spirit of the Constitution and whether we can accurately communicate it to our fellow countrymen.

In this task our only tool is truth. And it is truth that usually suffers first when loyalties are divided. No person who is involved or engaged in the life of his generation can avoid the competing demands of his family, his friends, his business or his State. If he gives equal priority to each, or revolving priority to the most pressing, his life will undoubtedly be chaotic. But if he, in his personal life, as we in our national life, establishes some order, he can expect to live in peace and security. It is when we are tempted to ignore the priorities of our obligations that we get into trouble. We trifle with the truth.

Some years ago, the official spokesman

for the Department of Defense, Assistant Secretary Arthur Sylvester, attempted to legitimize the practice, in which the Department had presumably been engaged, of lying to the people of the United States in the name of their Government. The result was as disastrous as it was predictable. Popular understanding and support for the war in Vietnam was not increased; on the contrary, it was seriously undermined. Even after several changes in administration in the Pentagon, its credibility has not been fully restored.

Consider, on the other hand, the example of Winston Churchill in the Battle of Britain. As Walter Lippmann has pointed out, Churchill demonstrated his faith in democracy by sharing the truth with his people.

No matter how bad the news, no matter how serious the situation, no matter how desperate the danger, Churchill not only faced the truth but he told it. The result was not despair in Britain but rather renewed confidence in the Prime Minister, in his government, and in the ultimate values of the British Constitution, which made winning worthwhile.

And so I say again that the pursuit of truth is the only direction in which we can go in search of the way to preserve our loyalty to the Constitution and the laws. A visible, unshakeable demonstration of that loyalty is the only way I know to restore the confidence, hope, and aspiration that many of us find missing in our national life today.

We are more likely to reach this goal if we candidly admit the obstacles in our way. It is very human to want to do a favor for a friend or an errand for an organization, or perhaps to keep our powder dry for another occasion which may or may not happen. But these are temptations that we share with all humanity and so we need not be ashamed of being tempted, but only of succumbing and betraying our prime loyalty.

It will be asked, I am sure, why I have taken the time to philosophize in this way without adding any new or dramatic element to the continuing debate. I did so because I think the pervasive problem of confusion of loyalties has poisoned public ethical behavior and hit at the heart of scepticism about Government and politics. I am tired of hearing about how "they all do it in Washington" and I want to hear more of "it may have been that way once, but it is not that way anymore."

The only way to restore confidence and trust throughout our society is for everyone who shares the privilege of leadership to obey the law, and to meet the small questions and the great issues with equal courage.

We shall need the encouragement of concerned citizens. We shall need the cooperation and the candor of those who share power with us at every level of government. We shall need to discipline ourselves to a kind of objectivity that rejects partisanship whether we are cast in the role of prosecutor or defender in any given case. We shall need to reaffirm the strength of our own moral fiber and the influence of conscience on the course of our lives.

But I have faith in the healing strength of truth. I have confidence that we can prove again that for men and women everywhere America is still the last best hope on Earth.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. MATHIAS. I am happy to yield to the distinguished Senator from Montana.

Mr. MANSFIELD. Mr. President, I have listened to the distinguished Senator from Maryland (Mr. MATHIAS), to his profound and moving statement on the national condition, in effect, his declaration of conscience.

I find that what he has said is profound, because the theme of his observation is of fundamental importance to the Nation. He deals with the erosion of the confidence of citizens, and especially of young citizens, in Government. He attributes this erosion, correctly, in my judgment to the increasing disregard of the constitutional base of our institutions by those with primary responsibility for upholding the Constitution, including ourselves. It is a disregard illuminated by the tragedy of a Vietnam, an Indochina, and by the cynicism of a Watergate—an ITT.

The Senator's statement is deeply moving, because he has the integrity to face the fact that, few, if any of us in Government have been entirely free of fault in the process. There is no self-serving superiority in his comments; there is no moralistic prattling. There is only honesty and trust in the healing power of truth. I commend the Senator for his candor no less than for his contribution to the Senate's understanding.

Mr. MATHIAS. Mr. President, I am grateful for the generous remarks of the distinguished majority leader. I do feel that we all share some responsibility in this situation in which we find ourselves today. I think, however, that perhaps it is appropriate that as we contemplate with great satisfaction and pleasure the fact that the last American in Vietnam left today, we should also look back on the mistakes that we made on the road that led us into Vietnam, and that we can try to find a better way to translate what we are trying to do in Government to something which is understandable and believable as an article of faith in the American people.

ORDER OF BUSINESS

The PRESIDING OFFICER. Under the previous order, the Senator from Oregon (Mr. HATFIELD) is recognized for not to exceed 15 minutes.

Mr. HATFIELD. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HATFIELD. How much time does the Senator from Maryland have remaining?

The PRESIDING OFFICER. The Senator from Maryland has no time remaining.

Mr. HATFIELD. Mr. President, I understand I have 15 minutes.

The PRESIDING OFFICER. The Senator has 15 minutes.

CONSTITUTIONAL RESPONSIBILITY AND THE WAR IN INDOCHINA

Mr. HATFIELD. Mr. President, before I go into the speech for which I asked that this time be allotted, I wish to commend the Senator from Maryland (Mr. MATHIAS) for his perceptive and excellent statement. He has emphasized truths that are absolutely essential to preserving the vitality and integrity of constitutional government.

The Senator from Maryland stated that the tragedy of Vietnam "has raised the large question once more, whether there is any reasonable way to prevent the United States from sliding into war again. A logical result of the search into the causes of the war in Vietnam," the Senator stated, "has been to force the Congress to reexamine the constitutional foundations of our Government."

Mr. President, those words have an especially timely relevance to the situation we are facing in Indochina this very day.

It has been my firm conviction that since the repeal of the Gulf of Tonkin resolution in 1970, that the administration has had no constitutional authority for pursuing any military action in Indochina other than the withdrawal of our troops and their protection. But as we know, our policy in these past years has been not only the withdrawal of our troops, but also the political objective of support for the regimes in South Vietnam, Laos, and Cambodia. It has been consistently maintained by many of my colleagues in this body, as well as by myself, that there has been no constitutional authority for military actions designed to achieve these political purposes, for Congress has never passed any resolution specifically authorizing such commitments.

When asked to comment on the constitutionality of our military actions in Indochina in the past few years, the administration has constantly cited the power of the Commander in Chief to protect his troops. July 1, 1970, Howard K. Smith asked the President, in a series of questions, what the legal basis was for our policy once the Gulf of Tonkin resolution was repealed. The President replied:

The President of the United States has the Constitutional right—not only the right but the responsibility—to use his powers to protect American forces when they are engaged in military actions; and under these circumstances, starting at the time I became President, I have that power and I am exercising that power.

Later, Mr. Smith pressed his question even further stating:

Do you have a legal justification to follow that policy (meaning the President's overall policy in Indochina) once the Tonkin Gulf resolution is dead?

The President replied:

Yes, sir, Mr. Smith, the legal justification is the one I have given, and that is the right of the President of the United States under the Constitution to protect the lives of American men. That is the legal justification.

I recall these matters for one crucial reason. Today, the last American soldiers stationed in South Vietnam will

come home. I rejoice in this. All Americans do. And I commend the President for achieving this goal.

Yet, one disturbing fact remains. Our B-52s are continuing, daily, to drop the bombs on Cambodia. We are told that this bombing is essential to support the Lon Nol regime there.

Since the beginning of this week the administration has been asked what the constitutional justification for such bombing is. Two administration spokesmen, Ambassador William Sullivan of the State Department, and the Secretary of Defense, have gone so far to suggest that the constitutional authority is linked, in some way, to the reelection of President Nixon. Yesterday, it was suggested that the authority rests with the SEATO Treaty, or with the claim that the North Vietnamese are violating article 20 of the peace agreement.

However, the government of Lon Nol in Cambodia has explicitly removed its country from the application of the SEATO Treaty. Further, our bombs are falling not simply on North Vietnamese troops remaining in Cambodia, but on the indigenous Cambodian insurgents fighting against Lon Nol. Thus, neither of those two speculated rationales can in any way provide the constitutional justification for such bombing.

Mr. President, the Senator from Maryland has pointed out eloquently that officials of this Government, as well as the Members of Congress, take the oath of office to "defend the Constitution."

But consider what has happened this week. Faced with the uncomfortable fact that the past constitutional justifications for our policy in Indochina will be lost with the last soldier that leaves today, the administration has merely suggested that lawyers are working on this problem. In the meantime, we hear Ambassador Sullivan suggest that the reelection of a President carries with it some kind of constitutional mandate to make war.

Never has it even been suggested, or speculated, that the defense of the Constitution may take priority over the defense of the Lon Nol regime.

It has been painful for anyone who is committed to the Constitution of the United States to see officials of this administration so obviously committed to pursuing the policy they have predetermined, and annoyed at the fact that they will have to go through some legal gymnastics and create some sort of constitutional rationalization for that policy.

This is not "defending the Constitution." This is treating our Constitution with disdain.

Mr. President, I am most deeply grateful for the return of the last American soldier from Vietnam today.

But I am also most distressed. For if our bombing now continues in Cambodia, we will be on our way to make the Constitution of the United States the last casualty of this war.

Mr. MATHIAS. Mr. President, will the Senator yield?

Mr. HATFIELD. I yield.

Mr. MATHIAS. I think he would agree that in the wake of war and destruction in Vietnam, which, happily for Americans, is ending today, even if it is not ending for others today, we begin the

process of introspection to try to ascertain what went wrong and why it went wrong. I think we have to say candidly that we in the Congress share a part of the responsibility for unwise decisions and for procedural failures on our part which would have led to making contributions to better decisions and more effective action.

I believe, if we continue this process in the constructive spirit in which the Senator from Oregon has expressed it today, we can find ways to avoid a repetition of those errors and again sliding into some of the folly and tragedy of the past.

Mr. HATFIELD. I thank the Senator. Mr. JAVITS. Mr. President, will the Senator yield?

Mr. HATFIELD. I yield.

Mr. JAVITS. I have read the speeches of both the Senator from Maryland and the Senator from Oregon with the deepest interest and concern, and I literally dashed over from an urgent committee hearing to express on the floor of the Senate my own feeling of solidarity and deep involvement in exactly what they have said.

The American crisis is a moral crisis. And it is a constitutional crisis. What are the powers of Congress? What are the powers of the President? It is a question of the confidence of Americans in our society and its moral integrity.

I deeply believe that, notwithstanding all modernisms and their tremendous attractions, the eternal verities remain, especially in the hearts of the young, who are the most modern.

I feel strongly that, as we strive to implement these concepts, in company with all our colleagues and my colleagues who have just spoken, Senator MATHIAS and Senator HATFIELD, speaking as they have to the young men and women of the new generation as well as to those in responsible positions of an older generation, they are striking a note of frankness and integrity which needs to be struck, without self-consciousness and with deep conviction. There is nothing sanctimonious about it or evangelistic. It is what our country needs if it is to be roused to greatness in terms of human achievements, and not merely in terms of bricks and mortar, and machinery, and all the paraphernalia of economic activity.

I am grateful to them for the eloquent words which they have spoken on the floor today.

Mr. HATFIELD. I thank the Senator from New York. I deeply appreciate his contribution to the colloquy this morning.

ORDER OF BUSINESS—INTRODUCTION OF BILLS

Mr. HATFIELD. Mr. President, how much time do I have left?

The PRESIDING OFFICER. The Senator from Oregon has 5 minutes remaining.

(The remarks Senator HATFIELD made on the introduction of S. 1418 to commemorate the 100th birthday anniversary of former President Herbert Hoover, are printed in the RECORD under Statements on Introduced Bills and Joint Resolutions.)

The PRESIDING OFFICER. Under the previous order, the Senator from Maryland (Mr. BEALL) is recognized for not to exceed 15 minutes.

(The remarks Senator BEALL made when he introduced Senate Joint Resolution 86, providing for a 2-year suspension of Federal support of projects involving psychosurgery, are printed in the RECORD under Statements on Introduced Bills and Joint Resolutions.)

THE CONTINUING WAR ON CRIME

Mr. ALLEN. Mr. President, there has been a lot of talk about the war on crime—that is good.

There has been some action and there has been some progress and that is good.

But let us face it—the problem is not under control and it will never be under control until it can be said that every citizen of this Nation is protected in the enjoyment of his God given right to feel secure in his home and community.

The law abiding, hard working, tax paying citizens of our Nation demand no less and are entitled to no less than adequate protection of life and property from the ravages of a marauding criminal element in our society. They demand no less and will accept no less than full enjoyment of the constitutionally protected right to live in peace and tranquility—and free to walk the streets of this Nation without fear or hindrance. The time is ripe now for less talk and more action.

In this connection my hat is off to the dedicated and long suffering law enforcement personnel who, at the risk of life and limb do their dead level best to protect us from the criminal element who stalk their prey from the shadows with savage and criminal intent.

But law enforcement personnel do not do the job alone. They need our help. We have saddled on them a near unbearable burden of responsibilities. They, along with the vast majority of our citizens, are fed up with toothless paper tiger penal statutes which do not deter. They are disgusted with brainwashed sociological judges who read the Constitution as though it were written to protect convicted criminals and not the rights of law-abiding citizens. They are sickened by jellyfish judges who seem content to sentence convicted criminals with a slap on the wrist, a tut-tut, and a bored wave of the hands.

Mr. President, it is time to get tough with the criminal element in our society. Permissiveness has failed. It is time to throw the book at degenerate psychopaths whose crimes of violence against persons are uninhibited by conscience or fear of punishment. Coldblooded murderers, demented assassins with deadly weapons, the savage rapists, the heartless kidnapers, skyjackers, terrorists, and dopepushers all must be made to receive mandatory sentences commensurate with the crime to remove them from the society which they reject.

Mr. President, that is the least we can do. But there is more that we can do and must do in the area of Federal criminal law enforcement. Too, there is more that we can do and must do to help in the area of local law enforcement

without succumbing to the temptation to create a Federal police force.

Mr. President, the fact that some progress in the war on crime has been made is encouraging evidence that we can achieve even more if we determine to do so.

In this connection, I wish to join my colleagues in noting the great significance of the statistics on crime released yesterday by the Justice Department. As a Senator from the State of Alabama, with a number of relatively large urban centers, I would like to cite particularly the data which indicates the progress which has been made in reducing crime in our major cities.

The preliminary year-end statistics pointed out that 94 major cities reported actual decreases in serious crimes, compared with 53 cities in 1971, 22 cities in 1970, and 17 cities in 1969. I am pleased to know that three of Alabama's largest cities are among the 94 cities showing decreases in crime in 1972. Huntsville had a 19.9 percent decrease; Mobile, 15.2 percent; and Montgomery, 3.2 percent. Each of these decreases is above the national average. Senators will be particularly interested to note that the Nation's Capital registered fewer crimes in almost every category. This national trend is no small feat, especially in view of the fact that the last measurable decrease in serious crime—and that is 2 percent—was recorded in 1955.

There is no doubt that this milestone in the fight to reduce crime is directly attributable to the frequently unrecognized and often maligned efforts of law enforcement officers throughout the Nation to turn back the unprecedented wave of crime which swept over us in the 1960s.

In comparing these figures to those of the 1960s, we find that the crime spiral peaked in 1968 when serious crime rose 17 percent above the previous year. In 1969 and 1970, crime decreased 11 percent, while in 1971 the increase had been cut back to 6 percent.

There can be no doubt that much of this progress is directly attributable to the sense of outrage which developed among law abiding Americans who, if they escaped the direct effects of crime themselves, nevertheless witnessed the riots, the mass violence, the wanton disregard of law and decency which in the 1960s were becoming so prominent a feature of American society.

Mr. President, many social theorists seem to believe that the American people are simply sheep—that the American people do not understand what is happening in society and what Government should do to improve it. On this issue of crime and violence, Mr. President, the American—the ordinary man in the street—has shown that he knows much more about what is really happening and what needs to be done than those social theorists sitting in their "think tanks" and their cloistered college communities.

I have agreed with most of the goals of this administration, and I have given my full support to its war on crime. If even there has been Government action which is truly responsive to the needs and desires of the people, the war on

crime is it. But the war is far from over. These figures show, if anything, that the fight must go on. We know we are winning, and it is no time for retreat. I commend President Nixon and his administration for their dedication to full support of law enforcement. Let us act promptly and favorably on the President's most recent proposals in the continuing war against crime.

Mr. President, I yield back the remainder of my time.

QUORUM CALL

Mr. MANSFIELD. Mr. President, I want to suggest the absence of a quorum and ask unanimous consent that the time be charged to the time remaining of the distinguished Senator from Washington (Mr. JACKSON) and up to 5 minutes of the time of the distinguished Senator from West Virginia (Mr. ROBERT C. BYRD).

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CHILES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Florida is recognized for not to exceed 15 minutes.

(The remarks Senator CHILES made on the introduction of S. 1414, the Congressional Budget Control Act of 1973, are printed in the RECORD under Statements on Introduced Bills and Joint Resolutions.)

ORDER OF BUSINESS

The PRESIDING OFFICER. Under the previous order, the Senator from Georgia (Mr. NUNN) is recognized for not to exceed 15 minutes.

PROPOSED ANTICRIME LEGISLATION

Mr. NUNN. Mr. President, I rise today to applaud the package of anticrime legislation proposed by the President of the United States, and by Senators McCLELLAN, HRUSKA, ERVIN, and others in our distinguished body.

I am indeed encouraged by the crime statistics released by Attorney General Kleindienst yesterday. Being from Georgia, I am particularly encouraged since three Georgia cities—Columbus, Macon, and Savannah—were among those reporting decreases in major crimes. I only wish that the statistics for all our cities in Georgia, and throughout the Nation, were as impressive.

Unfortunately, however, according to information I have just received from local Atlanta sources, Atlanta is experiencing an upsurge in major crimes as shown by a comparison between the first 2 months of 1972 and the first 2 months of 1973.

I would like to mention here that I

am very hopeful that those statistics do not indicate a trend for the entire year 1973, but here they are:

Homicides, which experienced an 11-percent increase in 1972, are up 43 percent for the first 2 months of 1973. Robberies increased 39 percent in 1972 over 1971, and increased a staggering 102 percent for the first 2 months of 1973.

Rapes, which decreased 4 percent in 1972, have increased 16 percent for the same 2-month period.

Assaults are up 17 percent, burglaries are up 7 percent, and grand larcenies are up 20 percent in the city of Atlanta.

At its inception our legal system recognized the doctrine that a man's home was his castle. Throughout our history the doctrine has been considered more a philosophical concept than a literal reality. Unfortunately, the proliferation of crime has caused us to turn this historical concept into practical necessity. The citizens of this Nation have been compelled to turn their apartments and homes into castles—surrounded by moats of electric burglar alarms, walls of steel bars, and by bolt-locked doors. No longer do we feel free to take an evening's walk through streets and parks our dollars have purchased.

Statistics also indicate that a substantial portion of the crime is being committed by drug addicts who commit these acts to raise money to feed their insatiable appetite for more drugs. In a recent study of six major cities conducted by the Bureau of Narcotics and Dangerous Drugs, almost 70 percent of those persons arrested for burglary showed evidence of being addicted to drugs. Well over 50 percent of those arrested for robbery were addicted to drugs. In the major crime category, including burglary and robbery, over 40 percent of those persons arrested were addicted to drugs.

In Atlanta, Ga., 25 to 35 percent of the major crimes are committed by such addicts.

I think this should give us cause for reflection.

DRUG ADDICTS AND PUSHERS

The President has recommended increased funding for the apprehension, rehabilitation, and treatment of drug addicts. He is also advocating increased mandatory sentences for drug pushers.

I am in agreement with these proposals.

Until we can bring the problem of drug addiction under control, our citizens will never regain the use of their streets and parks. While progress appears to have been made in the apprehension of drug traffickers and in the seizure of illegal drugs, we are not operating at maximum capacity in getting people off drugs. Not only must we interdict the drug supply routes but we must also provide solutions to decrease the demand for drugs.

In the drug field, we have massive problems of supply and demand, and we must attack both. Drug addiction is a multiple-faceted problem, not exclusively within the realm of the criminal process. It is also a medical problem. In addition to the President's proposals, we need to seriously consider the adoption of a sys-

tem of involuntary medical treatment for narcotic addicts before they are forced to resort to the commission of crime—prior to their apprehension while engaged in criminal activity. This system would be in addition to the Narcotic Addict Rehabilitation Act which has, for various reasons, not been fully implemented. We have an estimated 500,000 addicts in this country. We must interdict the addicts' path from addiction to criminal acts. I can think of no parent who would rather have his son or daughter languish in prison than receive medical assistance for his or her affliction. The President says we have the funds and resources available for such purposes. I say, let us use them.

CAPITAL PUNISHMENT

The President has also recommended the reintroduction of capital punishment for certain classes of crimes. He feels that the possible imposition of the death penalty acts as a deterrent to crime. I am in complete agreement with this philosophy. While many people both within and without Congress conscientiously believe that the death penalty does not deter crime, common sense dictates otherwise. Some have said that rehabilitation requires, not the severity of the punishment but its certainty. Although I agree with this philosophy, I would add an additional factor—not only must punishment be certain but it must also be commensurate with the background of the criminal and the seriousness of the crime. No armed bank robber will ever be deterred by the knowledge that if apprehended he will certainly receive an immediate sentence of only 6 months imprisonment. We must make punishment certain; we must let it fit the crime and the criminal; and we must insure its swift application.

Since the Supreme Court's decision outlawing the death penalty the homicide rate in Atlanta has jumped 45 percent. In the recent Prince Georges County vending machine robbery the perpetrators bragged that they could kill their hostages since they no longer faced the possibility of capital punishment. While these illustrations are by no means conclusive evidence, they are illustrative of the callous disregard for human life exhibited by today's criminal. The problem in trying to statistically analyze the deterrent effect of the death penalty is that we do not know whom to poll. We cannot determine which people or how many people did not commit murder because they feared the possibility of receiving capital punishment.

THE PROPOSED CRIMINAL CODE REVISION

I am also pleased that legislation has been introduced to comprehensively revise and simplify the Federal Criminal Code for the first time since its inception almost 200 years ago. Senator McCLELLAN, the sponsor of S. 1, and Senators HRUSKA and McCLELLAN, the sponsors of S. 1400 are both due our appreciation; and our strongest attention needs to be devoted to this, one of the most crucial matters facing the 93d Congress. We have seen too many criminals set free, their convictions set aside on legal loopholes and technicalities which have nothing to do with their guilt or innocence. S. 1400 contains a codification of a valid

insanity defense based on the long-recognized McNaughton rule—the right-wrong test. Heretofore the defense of insanity has varied on a case-by-case basis, with different Federal jurisdictions adopting differing rules for criminal responsibility. To say that a person suffering from some mental impairment could be guilty of a Federal crime in one Federal circuit, and not guilty in another circuit, only breeds contempt for such a legal system. Such situations demand correction if the system is to be viable and survive.

CONCLUSION

In conclusion, I must reiterate that we owe our fellow citizens and constituents the best legal system the mind of man can promulgate. They deserve and expect no less. We must insure that their rights to life, liberty and the pursuit of happiness, free from the fear of criminal attack are not merely catchwords and meaningless slogans without substance. Our congressional leadership and the President are to be commended for their actions in the war against crime. We must return the streets, parks and homes to those who toil and sweat have built them. We must sweep crime from our streets and neighborhoods, from our cities, suburbs and rural areas. We in the Congress must marshal our support and assistance to assure the passage of meaningful legislation in the area of criminal law. I submit that we have no higher priority.

ORDER OF BUSINESS

The PRESIDING OFFICER (Mr. McINTYRE. Under the previous order the Senator from Michigan (Mr. GRIFFIN) is recognized for not to exceed 15 minutes.

Mr. GRIFFIN. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time be charged against the time allotted to me.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HRUSKA. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GRIFFIN. Mr. President, I yield such time as he may require of the time remaining to me to the distinguished Senator from Nebraska.

The PRESIDING OFFICER. The Senator from Nebraska is recognized.

DECREASE IN SERIOUS CRIME IN THE UNITED STATES

Mr. HRUSKA. Mr. President, it was announced yesterday that, for the first time since 1955, serious crime in the United States had decreased. The nationwide statistics gathered by the FBI show that the crime rate declined by 3 percent in 1972. For each of the 16 years prior to 1972, however, serious crime had shown an increase. Therefore, the new statistics are heartening and show a welcomed improvement in our law enforcement efforts.

Seven serious crime classifications are used to establish an index to measure the trend and distribution of crime in the United States. These crimes are murder, forcible rape, robbery, aggravated assault, burglary, larceny of \$50 and over in value, and auto theft. From 1960 to 1968, serious crime had increased 122 percent.

It will be recalled that one major public opinion poll in 1968 considered lawlessness to be the top domestic problem facing the Nation. Another poll showed that four out of five Americans believed that "law and order has broken down in this country." There was a very real fear by thoughtful citizens everywhere that crime and violence were becoming a threat to the stability of our society. Some persons believed that it was a direct threat to our continued existence as a law-abiding Nation possessed of domestic tranquility.

It was obvious that a growing sense of permissiveness in America as well intentioned as it was poorly reasoned, existed in great degree over a prolonged period of time. It did not just happen that within a few years time America experienced that crime wave that threatened to become uncontrollable. However, many people were reluctant to take the steps necessary to control crime.

This increase in crime accelerated each year after 1960 until it reached the high annual rate of increase of 17 percent in 1968.

Then came 2 declining years—1969 and 1970—in each of which there was a lesser increase of only 11 percent. In 1971, the rate of increase dropped to 6 percent.

During 1972, when the 3-percent actual decrease was registered, 94 major cities reported actual decreases in serious crimes. This compared with 53 such cities in 1971, 22 cities in 1970, and 17 cities in 1969.

Now there are some who question the credibility of the FBI statistics gathered under the uniform crime reporting program. However, these same individuals were quick to embrace the gloomier side of statistics in years past. Hopefully, they will recognize the tremendous significance of these most recent trends.

The UCR program has statistical validity and the most recent data available signals the reversal of the crime growth pattern.

Mr. President, there is still too much crime in our Nation—to a point of unacceptability. The present efforts and resolution in the field of law enforcement, however, must not only continue, but must be increased, improved upon, and intensified.

The fact is, however, that the tone and the pitch of a countrywide drive against lawlessness has been geared up to a point of tremendous progress, with even greater promise ahead.

The wave of lawlessness and permissiveness which waxed and peaked in the cities did not just fade and start to go away by itself.

Active, deliberate, and massive forces were set in motion to counteract and to blunt it, and to finally turn it back.

Engaged in this massive effort are three principal forces: The law enforcement authorities in States and localities

which bear the chief responsibility for law enforcement and which are "on the firing line"; second, public understanding and support of the problem, of the entire situation, and of active concentration on their part; and third, the fact that the tone was set at the top in our Nation's councils and in our Presidential leadership.

Mr. President, law enforcement in America is the chief responsibility of State and local governments.

It follows that the progress made in these more recent years is chiefly due to the dedicated, vigorous, and tenacious followup of State and local law enforcement authorities.

To them the report of a 3-percent decrease nationwide will mean much by way of encouragement, by way of realization that their work is not in vain, that in striving as they have, new and even higher effectiveness is not impossible.

The force of public understanding and support is a tremendous one. The realization of the danger point which had been reached only 5 short years ago, did much to impart a tremendous momentum from this source. It is hoped that it will continue, now that such tangible results are reported.

In the third place, our Nation's Capital has experienced a firm grip and strong view of what was needed on its part.

A program of legislation and funding has been attained that is working. While much remains to be done, a great deal has already been accomplished. Imaginative legislation such as the Controlled Substances Act, the Organized Crime Control Act, the Omnibus Crime Control Act creating the Law Enforcement Assistance Administration and amendments thereto, and the District of Columbia Criminal Act has assisted significantly to this effect.

Also central to the national effort has been the leadership of President Nixon, who has evidenced a direct, driving, and meaningful personal interest and knowledgeability in the area of crime control. He has acted strongly. He has acted with vision and with sureness.

Because of all these factors, the wave of serious crime is being brought under control. Its trend has been reversed. We have turned the corner.

We are on the right road. The pattern has been set; the broad policies, and the specifics are working.

It is becoming widely established that the best way to attack crime is the same way crime attacks our people—without pity. National efforts are now based on this philosophy, and it is working.

Additional measures are in the making and pending in Congress, including:

Revision of the Federal Criminal Code;
Restoration of the death penalty;
The Heroin and Morphine Trafficking Act;

A Special Revenue Sharing Act in the area of law enforcement; and

A proposal to reorganize all narcotics and dangerous drugs enforcement agencies.

Every law-abiding American welcomes this achievement in crime reduction as announced yesterday.

But we must not rest at this point. We must continue to develop anticrime

programs and support the dedicated men and women who carry them out.

Mr. President, I ask unanimous consent to have printed in the RECORD a copy of the Department of Justice news release on this subject, dated March 28, 1973, including a table of statistics showing cities having a decrease in their crime index during the calendar year 1972, as compared with 1971.

There being no objection, the release and attached table were ordered to be printed in the RECORD, as follows:

FEDERAL BUREAU OF INVESTIGATION,
Washington, D.C., March 28, 1973.

NEWS RELEASE

Serious crime in the United States declined 3 percent in 1972, the first actual decrease in crime in 17 years, Attorney General Richard G. Kleindienst announced today.

The downturn in the volume of crime was disclosed in preliminary year-end statistics tabulated by the FBI and released today.

"This is a day that we have been looking forward to for many years," the Attorney General said. "It is an important milestone in the fight to reduce crime and is directly attributable to the strong efforts of law enforcement officers throughout the nation to turn back the wave of crime that rolled upward in the 1960's."

During 1972, 94 major cities reported actual decreases in serious crime. Mr. Kleindienst said, compared with 53 cities in 1971, 22 cities in 1970, and 17 cities in 1969.

Nationally, serious crime declined 8 percent in the final quarter of the year, after registering a 1 percent increase through the first nine months of 1972.

The last measurable decrease in serious crime—2 percent—was recorded in 1955, according to FBI crime records.

The crime spiral peaked in 1968 when serious crime rose 17 percent above the previous year. In 1969 and 1970, serious crime increased 11 percent, while in 1971, the increase was 6 percent.

"We enter this new period with an acute awareness that crime is still unacceptably high," Mr. Kleindienst said. "We pledge to renew our determination and efforts to make our communities safer places in which to live."

The preliminary figures are contained in the FBI's Uniform Crime Reports, a collection of nationwide police statistics supplied voluntarily by local, county, and state law enforcement agencies. The figures were released today by FBI Acting Director L. Patrick Gray, III.

Violent crime increased by 1 percent in 1972, compared with a 9 percent increase the year before. Robberies, however, which make up the largest number of crimes in the violent category, showed a 4 percent decrease in 1972. Murder was up 4 percent in 1972, aggravated assault increased 6 percent, and forcible rape increased 11 percent over the previous year.

Property crime decreased 3 percent, compared with a 6 percent increase in 1971. Auto theft declined 7 percent, larceny \$50 and over dropped 3 percent, and burglary was down 2 percent.

Cities over 100,000 population reported an average decrease of 7 percent in the volume of Crime Index Offenses. Crime in suburban areas increased 2 percent, compared to an 11 percent increase in 1971, while crime in rural areas went up 4 percent compared to a 6 percent rise in the previous reporting period.

Serious crime in Washington, D.C., continued to decline. The 1972 decrease was 26.9 percent, compared with the 1971 decrease of 13 percent.

The nation's capital registered fewer crimes in every category, except for a 16 percent increase in rape. Auto theft decreased 33 percent, burglary decreased 32 percent, robbery

decreased 31 percent, larceny \$50 and over decreased 18 percent, murder decreased 11 percent, and aggravated assault decreased 2 percent.

A copy of the preliminary crime figures for 1972 is attached. Final crime figures and crime rates per unit of population will be available in the detailed Uniform Crime Reports scheduled for release this summer.

Also attached is a list of the 94 major cities reporting crime decreases.

CITIES WITH DECREASE IN CRIME INDEX, JANUARY-DECEMBER, 1972 vs. 1971

Agency:	Index percent decrease
Akron, Ohio	9.5
Albany, N.Y.	23.8
Alexandria, Va.	2.1
Allentown, Pa.	15.4

Waterbury, Conn.	7.7
Wichita, Kans.	.7
Yonkers, N.Y.	11.7
Youngstown, Ohio	11.9

Mr. GRIFFIN. I thank the distinguished Senator from Nebraska. I commend him for a very important and thoughtful statement. It is one which will be welcomed, I know, by people all over the country as they realize that the war against crime is meeting with some success.

Time and time again in the past we have seen in the newspapers that there had been a drop in the rate of increase in crimes. While this was always encouraging, it was also disturbing that the number of crimes was still on the increase.

Now, as I understand it, we are talking about an actual decline in crime in these major cities. I certainly share the views so eloquently expressed by the Senator from Nebraska that first among those who deserve the credit are the law enforcement and other public officials at the local level because, as he said, they are on the firing lines. They are the ones who have to deal with the problem on a day-to-day basis.

I had to leave the Chamber briefly during the presentation made by the distinguished Senator from Nebraska, and I wonder if he made reference in his statement to particular cities. I know there are very encouraging statistics about some of the larger cities. While I imagine he will put the whole list in the record, I think it would be well to focus on some of the larger cities and what they have been able to achieve.

Mr. HRUSKA. If the Senator will yield, Mr. President, 94 cities experienced a substantial actual decrease in the crime rate in 1972. The entire tabulation has been placed in the RECORD, and it is a very gratifying one indeed.

I might say that in the Senator's State of Michigan there were at least four metropolitan areas in which a decrease occurred. Detroit was one of them, Dearborn was another, Lansing was the third, and Warren the fourth.

In the city of Washington, D.C., Mr. President, the rate of decrease was 26 percent in 1 year.

Mr. GRIFFIN. I think that is particularly encouraging, since we know that Washington, D.C., for too long has been referred to by many people as the crime capital of the Nation because the crime here was so extensive. A 26-percent decline in the rate of actual crime in the Nation's Capital is indeed a notable achievement.

Mr. President, I was remarking about the record made by some of the cities around the country, and the distinguished Senator from Nebraska did not have the statistics immediately available. Now he does, and I wonder whether the Senator from Nebraska would indicate some of the percentages in major cities around the country. I would also be interested specifically in those for some of the cities in Michigan.

Mr. HRUSKA. Mr. President, the fact is that in Michigan there are four cities in which there has been an actual and absolute decrease in the rate of crime in 1972: Dearborn, experienced an 8.8 percent decrease; Detroit, 15.8 percent; Lansing, 6.3 percent; and Warren, 2.8 percent—these were all net decreases in the rate.

I might say that in the Greater Metropolitan Washington area, for example, we have not only Washington, D.C., with 26.9 percent, but also Alexandria with 2.1 percent; Arlington with 15.4 percent; Baltimore, with 6.5 percent. Additionally, Hampton, Va.—a little further south, 6.9 percent; and Norfolk, Va., 18 percent. All those are net decreases. A total of 94 cities nationwide have participated in this very fine record of increasing the proficiency of their law enforcement agencies.

Mr. GRIFFIN. I thank the distinguished Senator from Nebraska for those references and his observations.

As he pointed out earlier, this record for 1972 marks the first time in 17 years that there has been an actual decrease in the crime rate in the United States. In every other year in the last 17 years there has been an increase. In fact, in 1968 serious crime in the United States increased 17 percent above the previous year.

The statistics show that across the Nation as a whole there was a decrease by 3 percent—with the significant decreases, percentagewise, in some of the major cities. This indicates that we must be doing something right and that we ought to stay on course.

It suggests, of course, that bills which will be considered later in the day on the Senate floor will be important in terms of fighting crime. Furthermore, President Nixon just recently proposed additional legislation dealing with drug trafficking and other serious crimes. I think his proposals should have the early consideration of the Congress.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Hackney, one of its reading clerks, announced that the House had passed a bill (H.R. 5610) to amend the Foreign Service Buildings Act, 1926, to authorize additional appropriations, and for other purposes, in which it requested the concurrence of the Senate.

HOUSE BILL REFERRED

The bill (H.R. 5610) to amend the Foreign Service Buildings Act, 1926, to authorize additional appropriations, and

for other purposes, was read twice by its title and referred to the Committee on Foreign Relations.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, without prejudice to the distinguished Senator from Kentucky (Mr. Cook), I ask unanimous consent that I may be recognized at this time to use a portion of the time allotted to me under the order.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATOR SAM ERVIN: A FIGHTER FOR FIRST AMENDMENT PRINCIPLES

Mr. ROBERT C. BYRD. Mr. President, those of us who serve in the Senate with Senator SAM ERVIN, of North Carolina, know very well of his determined commitment to the principles of the first amendment. Time and time again, my distinguished friend from North Carolina has reminded us that these great principles—freedom of speech, freedom of the press, freedom of religion, freedom to petition the government for redress of grievances—must be zealously guarded.

In recent years, Senator ERVIN has spoken out with particular concern about the state of freedom of the press in America. He has pointed to the historical fact that a vigorous, free press is an essential ingredient of any free society. As chairman of the Senate Subcommittee on Constitutional Rights, he has conducted two series of hearings over the past 2 years which have instructed us all as to current problems facing the press in America. He is now sponsoring legislation to protect newsmen from unwarranted government subpoenas.

I am delighted that Senator ERVIN is now receiving recognition outside the corridors of the Congress for his outstanding leadership with respect to this subject. At this time, I want to call to the Senate's attention several awards and honors which have been presented to Senator ERVIN in this connection.

The National Newspaper Association presented Senator ERVIN its Award of Merit for 1972 "in recognition of his efforts to articulate the true meaning and significance of the U.S. Constitution, especially first amendment rights, for the American people."

On June 28, 1972, Senator ERVIN was awarded a Special Citation of the National Press Photographers Association "in recognition of his concern that the right of a free press in this Nation shall not be eroded away, and in appreciation of his role in seeking to assure that the rights and privileges of newsgathering shall be accorded to the photojournalist."

Our colleague from North Carolina was presented on December 1, 1972, with The Paul W. White Award of The Radio Television News Directors Association "for the outstanding contribution to broadcast journalism."

As "the public official who has made an outstanding contribution for the defense

and preservation of the freedom of the news media," Senator ERVIN was awarded the Thomas Jefferson Award on February 16, 1973, by Texas Tech University, the Texas Daily Newspaper Association and the Texas Association of Broadcasters.

Finally, Mr. President, just this week, the National Association of Broadcasters recognized Senator ERVIN "for his tenacious devotion to the objectives of our American Society established by the Constitution of the United States" in a special citation.

I congratulate Senator ERVIN on these impressive and well-deserved awards. Even more, however, I commend him for his unyielding insistence that freedom of the press be preserved in our great country. He has reminded us that no people can be truly free without the freedom to know about the world in which they live and about those things which affect their lives. His leadership should be an inspiration to all Americans who love freedom and cherish liberty.

THE NEED FOR UTILIZATION OF OUR COAL RESOURCES

Mr. ROBERT C. BYRD. Mr. President, at one time, the fuel providing the most energy in the United States was coal. In recent years petroleum and natural gas have displaced coal in many of its uses. Now, it appears, coal is in position to make a comeback. Production from our domestic resources of petroleum and natural gas has not kept up with demand, and fuel shortages have hit many parts of the Nation. Our recoverable coal reserves are enormous, however, and could suffice for many decades to come.

There are two problems with this. One is that the environmental degradation caused by certain methods of coal extraction has been excessive. The solution to this problem is more careful attention to environmental factors when mining coal and the inclusion in the cost of coal of the expense of preserving mined areas.

The other problem is the conversion of coal into the liquid and gaseous hydrocarbon forms that our transportation system and appliances are designed for, and extracting the sulfur and other harmful constituents of the coal simultaneously. You cannot put coal into a gas stove or an automobile, but you can make synthetic natural gas or gasoline from it.

The gasification of coal is not science fiction. Indeed, coal gas was used for a century in cities all over the country before large deposits of natural gas were available. At least seven different methods of converting coal into pipeline-quality gas have been tested in the laboratory. Gas from commercial application of the most efficient of these processes could be available for as little as 70 cents per thousand cubic feet, including the costs of capital, operating expenses, and a 9-percent annual rate of return to the manufacturer. This price is in the range of prices for pipeline gas from natural gas wells in some areas.

It is far less than the price of imported natural gas, which comes in liquid form

from overseas at prices no lower than \$1 per thousand cubic feet, and poses problems of national economic security and balance-of-payment deficits.

It is also less than the price of substitute gas manufactured from petroleum liquids, which must be imported from refineries abroad, with similar balance of payments and national security considerations.

At present, pilot plants are being built to test the commercial potential of several coal gasification processes. Several firms are planning to implement the Lurgi gasification process in plants now under construction. This technology was developed years ago in Europe and is the only one commercially available now. The gas produced, however, has only half the heating value of natural gas and will cost about as much per thousand cubic feet. The more efficient means of conversion are those which still need research and development.

The Office of Coal Research of the Department of the Interior has jointly initiated projects exploring several of these processes. The most promising currently may be the CO₂ acceptor gasification process being attempted in South Dakota by Consolidation Coal Co. with support from the Office of Coal Research. Another is the HYGAS process being implemented in a pilot plant near Chicago by the Institute of Gas Technology. The American Gas Association and the Office of Coal Research have begun a program of sharing the costs of this research, two-thirds funded by the Government.

A more novel concept currently being investigated is the "in situ" gasification of coal: the formation of coal gas underground in the coal seam itself. This is a long way from commercial practicability but could eventually lead to less expensive gasified coal without the ill effects of mining.

Liquid fuels also can conceivably be manufactured from coal. The Office of Coal Research sponsored a pilot plant to produce gasoline from coal in Cresap, W. Va., constructed by the Consolidation Coal Co. This plant did not meet original design objectives, but is being reconverted to fuel oil output. Nonetheless, gasoline can be manufactured from a coal feedstock and the technology for commercial operation of such a process should be pursued. Char oil, useful for refining feedstock and as fuel in its own right, can be extracted from coal, and an Office of Coal Research project to do so is going on. Another project will use a solvent to dissolve the coal into a low-ash, low-sulfur boiler fuel.

Thus there are many potential applications of our most abundant fuel to our most vital uses, provided we have the technology to perform the conversions. Private industry has shown a ready willingness to do its part in development of these new processes. The importance of such research necessitates a Government involvement, however.

I am concerned that our efforts have not been strenuous enough. This should not be merely another lukewarm, long-range program—we must develop the

capability to use our coal resources as fast as is feasible. I am hopeful that the President's upcoming energy message will dwell at length on his plans for accelerating our efforts to achieve this capability. I urge my colleagues to join with me in supporting these very important activities.

Coal is not the only resource which might be amenable to speedier development. It is well known that billions of barrels of badly needed oil are locked in shale deposits in the West. The technology for producing this oil at prices competitive with other sources is not available. A concerted Government program would, however, help greatly in achieving this new technology, aiding present industrial efforts. If we are to solve our energy problem, these options must be pursued.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I may reserve the remainder of the time allotted to me without prejudice to the Senator from Kentucky.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States, submitting a nomination, was communicated to the Senate by Mr. Marks, one of his secretaries.

EXECUTIVE MESSAGE REFERRED

As in executive session, the Presiding Officer (Mr. HUDDLESTON) laid before the Senate a message from the President of the United States submitting the nomination of Marshall Wright, of Arkansas, a Foreign Service Officer of Class two, to be an Assistant Secretary of State, which was referred to the Committee on Foreign Relations.

ORDER OF BUSINESS

The PRESIDING OFFICER. Under the previous order, the Senator from Kentucky (Mr. COOK) is recognized for not to exceed 15 minutes.

THE 1972 CRIME STATISTICS

Mr. COOK. Mr. President, I am very happy to note that the most recent crime statistics which were released last night by the Department of Justice report the first actual decrease in serious crime in 17 years. The preliminary year-end statistics pointed out that 94 major cities reported actual decreases in serious crimes compared with 53 cities in 1971, 22 cities in 1970, and 17 cities in 1969. Two of these 94 major cities that reported a crime decrease for 1972 are in my own State. Lexington, Ky., had a 6.5 percent decrease in serious crime while Louisville, Ky., had an 11.3 percent decrease. In addition, Members of Congress will be particularly interested to note that the Nation's Capital registered fewer crimes in almost every category. This national trend is no small feat, especially in view of the fact that the last measurable de-

crease in serious crime—2 percent—was recorded in 1955.

Mr. President, the three percent reduction in crime last year is solid proof of the success of this administration's war on crime. I want to take this opportunity, on behalf of myself and the people of my State, to thank not only the President, for his leadership in this campaign, but also the tens of thousands of hard-working and often abused law enforcement officers throughout the Nation whose diligence and dedication have made this reversal possible. We all owe them a great debt of gratitude.

In comparing these figures with those of the 1960's we find that the crime spiral peaked in 1968 when serious crime rose 17 percent above the previous year. In 1969 and 1970, serious crime increased 11 percent, while in 1971 the increase had been cut back to 6 percent.

Although there is no question that crime remains unacceptably high, we all must cooperate with law enforcement efforts and renew our national determination to make America's communities safer places in which to live. It is now our task to see that this new trend continues. We at the Federal level must continue to provide the support which local officials need to deal with crime.

I commend the distinguished Senator from Michigan for reminding us that we have three measures on the calendar this afternoon which have been reported by the Committee on the Judiciary, of which the distinguished Senator from Nebraska is the ranking minority member; that we will take up these measures and hopefully will conclude action on them this afternoon, with a substantial majority of votes.

Once again, the President has taken the lead by proposing increased aid to the States and localities, reinstitution of the death penalty for the most heinous crimes, and adoption of strong new measures to curtail the illegal traffic and use of drugs which has promoted so many crimes and destroyed so many lives in recent years.

We in Congress should join the President in the war on crime in order that future years will likewise show reductions in crime and a return to the peace, order, and tranquility which the American people deserve—not only deserve, but which they absolutely must have, to the best of our ability.

Mr. HARRY F. BYRD, JR. Mr. President, what most Americans do not realize is that even if they have never felt a gun in their back, the explosion of crime in this country is costing them money. Crime is inflationary. It is an integral part of high prices.

Fed by fatheaded permissiveness, crime has swelled to the point where it:

Increases insurance rates, which increase the cost of doing business, which increases prices.

Empties out downtown areas after dark, forcing businesses to close down or spend the money to move to the suburbs where crime again catches up with them and begins the insurance cycle all over.

Boosts taxes to pay for increased police forces, court personnel, judges, prisons.

Drives up the price of real estate in the suburbs because of the demand by homeseekers fleeing the cities.

Requires Government to spend enormous sums trying to restore the abandoned downtowns of major cities.

President Nixon is trying to fight inflation and spending by fighting crime. It is beginning to look like he is having some success.

The latest FBI statistics show that for the first time since 1955, serious crime in this country decreased by 3 percent last year.

The President's declaration of war on crime deserves much credit. His newest proposals on capital punishment, drug crackdowns, and reform of the court system deserve much consideration.

We must win the war against crime and against inflation.

REDUCTION IN CRIME IN THE UNITED STATES

Mr. EASTLAND. Mr. President, I have just had the opportunity to review the latest statistics on crime which were released yesterday by the Department of Justice and the Federal Bureau of Investigation.

This report contains the welcome and heartening figures that indicate a decrease in crime during 1972. In a nation where ever-increasing crime has become commonplace, this is indeed good news. In fact, this is the first time in 17 years—since 1955—that there has been an actual decrease in serious crime.

It is a sad fact that, in recent years, we have almost become resigned to spiraling statistics. Criminals stalked the streets in ever-increasing numbers, and our citizens were literally at the mercy of this ruthless element. We were faced with danger not only in the streets—but in our own homes. There was no haven of safety.

While our citizens fell prey to criminals, the courts were turning free those who had been apprehended by the police. It was a time that saw many charged with serious crimes back on the street to rob and kill again and again.

Over a period of two decades, the number of major crimes skyrocketed year after year. We were literally living in an era of lawlessness.

Then, in 1968, the crime spiral peaked. It rose an unprecedented 17 percent above the previous year. But this was to be the highwater mark. In 1969 and 1970, the pace of the criminal was slowed—with serious crime increasing 11 percent—and in 1971, the increase was cut to 6 percent.

Now, comes 1972, and, for the first time, we see an actual decrease in major crime in the United States.

Mr. President, this is proof that the Federal Government can do something about crime.

It took a President who would state emphatically to the Nation that he intended to do something about "law and order." President Nixon set the wheels in motion that would lead to a reduction in crime.

These figures which have been presented here indicate that his efforts are

paying off. But there are others that are due credit. From the man in the White House to the policeman walking the beat, each has contributed significantly to reducing crime.

I know that the Attorney General of the United States, the Nation's chief law enforcement officer, is a man dedicated to eradicating crime. I am convinced that he has done his part and will now reintensify his efforts.

The Federal Bureau of Investigation has taken the leadership in meeting the challenge of the criminal element. Not only have the dedicated special agents of the FBI dealt with crime on a first-hand basis, but the numerous services offered by the FBI to local law enforcement—in the form of crime information, training, and expert laboratory work—have contributed most significantly toward the reduction of crime.

Credit, however, is due to many, many more dedicated law enforcement officers—State police, sheriffs, and local policemen—who have formed the first line of defense between the criminal and the citizen. These men and women, in a dedicated day-to-day effort, have performed ably and with a sense of dedication to their country and its citizens. It is a sad fact that in the last 3 years alone more than 350 law enforcement officers have given their lives in the battle against crime.

Last, but perhaps most important, the citizens of this country played a significant role in the reduction of crime. It was an aroused citizenry—a Nation fed up with crime—that demanded an end to lawlessness. And it was the citizen who was not afraid to become involved that provided the key to putting the criminal behind bars.

All in all, Mr. President, this has been a national effort—an effort that has met with success. To me, it is proof that we can meet the challenge of crime and overcome it.

It is my hope that this shall constitute a rededication of our Nation and its people to the principle of law and order. We now shall go forward with a renewed sense of pride in the United States and the great country it is.

Mr. President, I am convinced that only when this Nation is free of crime will we, as a Nation, be truly free.

CRIME AND THE SMALL BUSINESSMAN

Mr. JAVITS. Mr. President, all of us are undoubtedly aware of the unique dangers of criminal violence which daily confront the Nation's small businessmen.

The FBI has reported that 63 percent of all armed robberies are committed with firearms. As I have stated so often in the past, the arguments in favor of strong, Federal gun-control legislation requiring a national system of licensing and registration are overwhelming.

A brief, thoughtful statement on the need for remedial gun control legislation has been published by the National Small Business Association. I ask unanimous consent that its text be printed in the RECORD.

There being no objection, the article

was ordered to be printed in the RECORD, as follows:

IT'S YOUR BUSINESS
(By John Lewis)

Been shot at lately? Ever looked down the barrel of a .45? Experienced the thrill of a pistol whipping? Surrendered your cash receipts to thieves lately? If your answers to the above questions are "No," consider yourself fortunate. But for how long?

According to the most recent FBI Uniform Crime Reports, 385,910 merchants, manufacturers, professional offices, etc., were stuck up in 1971. To quote this Crime Report, "—63% of all armed robbery is committed with a firearm—". How many small businessmen, or their employees, or their customers were shot at, wounded, or killed? Most times for no reason other than the fact they happened to be there when the thieves arrived!

National Small Business Association, with its headquarters in Washington, has heard all the arguments and read all the literature for and against gun control. Furthermore, each plea based on the Second Amendment to the Constitution of the United States has been laid before us.

The Second Amendment of the "Bill of Rights" provides that "A well regulated militia, being necessary to the security of a free State, the right of the people to keep and bear arms shall not be infringed." When this was adopted in 1791, our forefathers had a justifiable fear that foreign nations might cast covetous eyes on American geography. They had just passed through a period when the government had been unable to provide sufficient muskets for all those fighting for freedom. Further, the frontier was just opening, and a "fowling piece" was a necessary piece of equipment to ward off hostiles of any type. Until the mid-1800's there were few gun shops, fewer manufacturers, and no time to wait around for "arms" shipments from abroad.

The legitimate hunter, sportsman, honest gun collector, or target shooter, should have no beef against gun control. Our concern is with the illegitimate bounty "hunter" and the ease with which he obtains a gun to strengthen his "bargaining" position when he demands the cash, valuables, possessions, and merchandise of you and the small businessman. The small businessman as a rule is uninsured, unprotected, and bears almost always 100% of the loss—in property, injury and sometimes his own life.

Since you and small business are the most frequent victims of the "bearer of arms" misusing and unlawfully exercising his constitutional rights, something must be done.

You and small business have a selfish interest in remedial legislation. American small business and all who depend upon it are one half of the total population of the United States! Small business employs almost 50% of the private work force. That plus the employers and the families adds to over 100 million people dependent upon the wages, salaries, profits, and benefits of small business.

Should a group of cruel and ruthless individuals be allowed to march into a business establishment, brandish an easily obtained gun, and march out with the sweat-earned receipts of the proprietor and his employees?

Fiction? Listen to your radio or TV news either on any Sunday night or Monday morning. Add up, if you will, the weekend's total of armed robberies, assaults, shootings, and holdups of small businesses across the nation and in your own community. Add up also, the total number of bodies which were left dead, maimed, or punctured because a trigger-happy thief had a gun. What are the odds for or against you as you walk down a street at night?

Give your views to your Senators and your

Congressman. They represent you. They want your opinion and they are responsive. As a constituent, it's your business to become involved.

ORDER OF BUSINESS

Mr. COOK. Mr. President, I yield back the remainder of my time.

Mr. ROBERT C. BYRD. Mr. President, would the Senator allow his time to be reserved?

Mr. COOK. Yes, I reserve the remainder of my time, and I suggest the absence of a quorum.

Mr. ROBERT C. BYRD. And have the quorum charged against that time.

Mr. MANSFIELD. Mr. President, will the Senator withhold his request, and will he yield?

Mr. COOK. Yes, I yield.

ORDER FOR VOTE ON THE PRESIDENTIAL VETO MESSAGE TO OCCUR AT 2 P.M. TUESDAY, APRIL 3, 1973

Mr. MANSFIELD. Mr. President, this has been cleared all around.

I ask unanimous consent that the vote on the Presidential veto of the vocational rehabilitation bill occur at 2 p.m. on Tuesday next.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. MANSFIELD. I ask unanimous consent that, beginning at 12 o'clock noon on Tuesday next, the time be equally divided between the distinguished Senator from California (Mr. CRANSTON) and the distinguished Republican leader, the Senator from Pennsylvania (Mr. SCOTT), or whomever he may designate.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The text of the unanimous consent agreement is as follows:

Ordered, That, effective on Tuesday, April 3, 1973, the Senate proceed to vote on the veto of S. 7, the Vocational Rehabilitation Act, at 2 p.m.

Ordered further, That the debate between 12 o'clock and 2 p.m. o'clock be equally divided and controlled by the Senator from California (Mr. CRANSTON) and the minority leader or his designee.

Mr. MANSFIELD. So the Senate is on notice that there will be a vote at 2 o'clock definitely on Tuesday next and there will be 2 hours of debate, the time to be equally divided.

QUORUM CALL

Mr. COOK. Mr. President, now, I suggest the absence of a quorum, the time to be taken out of the remainder of the time allotted to me.

The PRESIDING OFFICER. Without objection, it is so ordered, and the clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator from Kentucky yield to the distinguished Senator from North Carolina some of his time?

Mr. COOK. Mr. President, I yield whatever time the Senator may require within the limitations of time allotted to me.

Mr. HELMS. I thank the Senator.

The PRESIDING OFFICER. The Senator is recognized.

A REVERSAL IN THE RISE IN SERIOUS CRIME

Mr. HELMS. Mr. President, the statistics released yesterday by Attorney General Kleindienst reveal that last year, for the first time in almost two decades, there has been a reversal in the rise in serious crime. The FBI figures show an actual decrease in violent crime by some 3 percent—a decrease for which many Americans had almost ceased to hope during the violent years of the 1960's. These statistics are eloquent testimony to the policies espoused by the Nixon administration and by many Members of this Senate on both sides of the aisle. I join my colleagues in rejoicing at this announcement and in urging adoption of the most recent proposals which the administration has made to step up the war on crime and the criminals who perpetrate it.

But I would like to take this occasion to pause, Mr. President, and to reflect upon some recent American history, for the greatest guides for future action are the lessons we learn from the past. Specifically, I would like to take this occasion to reflect upon the permissive—indeed, the pernicious—policies which the Federal Government pursued during the 1960's. It was those policies which contributed so much to the shocking rise in crime and violence which we experienced in the latter half of the decade.

With these latest remarks by Attorney General Kleindienst in hand, I would reflect upon what we were hearing in the mid-1960's from his predecessor, Attorney General Ramsey Clark. I do not recall Attorney General Clark announcing that crime had been reduced. I do not recall his announcing that even the rate of increase in crime had been reduced.

But I do recall Attorney General Ramsey Clark lecturing Members of Congress and the American people on what he called the "rights" of violent, militant demonstrators at a time when our cities were being looted and burned. I do recall lecturing us on what he called the "rights" of accused criminals to be immediately set free on the streets and the rights of the convicted criminals to various kinds of dubious "rehabilitation" at a time when "rehabilitated" criminals paroled after short terms and accused criminals released on low bond were again indulging themselves in rapes, robberies, and murders. And I would like to take this occasion to remind Senators of the naivete, and the gross irresponsibility of those policies which Attorney

General Clark espoused and which, to such an unfortunate degree, were forced upon the American people.

Mr. President, it was not necessary for many of us to await Mr. Clark's trips to Hanoi, with associates like Miss Jane Fonda and Mr. David Dellinger, and his other curious excursions into the field of foreign affairs, to recognize innate intellectual ineptness. Mr. President, we recognized these qualities in him years ago when he had no solid accomplishments to report on behalf of his administration at the Department of Justice, but rather uttering the simplistic clichés in his advocacy of fairytales concepts of law and justice which churned such havoc upon the Nation.

Such reflection upon recent history, Mr. President, inspires in me an even greater appreciation for the tough-minded policies of the Nixon administration as the proper response to criminality.

Such reflection enables me to support with even greater assurance an uncompromising support of the war on crime.

ORDER OF BUSINESS

The PRESIDING OFFICER (Mr. HUDDLESTON). Under the previous order, the Senator from Louisiana is recognized for not to exceed 15 minutes.

CATASTROPHIC HEALTH INSURANCE

Mr. LONG. Mr. President, I ask unanimous consent that Mr. Michael Stern, of the staff of the Committee on Finance, have the privilege of the floor while this statement is being made.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The remarks of Senator Long on the introduction of S. 1416, to provide catastrophic health insurance coverage, are printed in the RECORD under Statements on Introduced Bills and Joint Resolutions.)

EXTENSION OF INTEREST EQUALIZATION TAX—CONFERENCE REPORT

Mr. LONG. Mr. President, I submit a report of the committee of conference on H.R. 3577, and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated by title.

The assistant legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendment to the bill (H.R. 3577) to provide an extension of the interest equalization tax, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report signed by all of the conferees.

The PRESIDING OFFICER. Is there objection to the consideration of the conference report?

There being no objection, the Senate proceeded to consider the report.

(The conference report is printed in the House proceedings of the CONGRESSIONAL RECORD of March 28, 1973, at pp. 10029-10030.)

Mr. LONG. Mr. President, the Senate made some 15 amendments to the interest equalization tax when it was before us. All but two of these the House has agreed to.

One of the amendments to which the House did not agree was our amendment extending this tax until April 1, 1975. The House version of the bill extended the tax until July 1, 1974. The House conferees indicated that they desired to reconsider this tax in depth before the end of this Congress. Your conferees believe that it did in fact make very little difference whether this reconsideration occurred before the end of June 1974 or before the end of March 1975. We plan to reconsider the tax, and it makes little difference to us as to which time this occurs. Because of the House conferees' insistence on this point, we accepted their June 30, 1974, date for the extension of this tax.

The other Senate amendment which I was unable to keep on the bill was the amendment offered here on the floor which would have required by the Secretary of the Treasury not later than 120 days after the date of enactment of this act to submit to Congress proposals for a comprehensive reform of the tax laws.

Chairman MILLS of the House Committee on Ways and Means informed the Senate conferees that the Secretary of the Treasury was already specifically committed to appear before the Ways and Means Committee on April 30, 1973, and possibly also on May 1, 1973, to present the administration proposals on tax reform. Since this opportunity for appearance had been offered by him to the Treasury and since the Treasury had already officially accepted and agreed to appear on that date, the House conferees thought that this amendment requiring the submission of tax reform proposals was no longer necessary and in fact was inappropriate.

It seems to me that we have accomplished everything that the Senate sought to do by this amendment. We have obtained specific assurance that the administration proposals on tax reform will be presented to the Congress well within the 120-day period provided by the Senate floor amendment. In addition, the House conferees resisted this amendment because, under the rules of the House, it would be nongermane to this particular bill.

In view of these considerations, the Senate conferees really could not further insist on retaining this amendment.

It is important that we act promptly on this conference report because the tax expires this Saturday night at midnight. In view of that, I urge the Senate to promptly agree to this conference report.

Mr. TOWER. Mr. President, would the Senator withhold that motion? The Senator from Utah (Mr. BENNETT) wanted to address himself to this matter. I would appreciate it if the Senator would defer his motion.

Mr. LONG. I am pleased to do so.

Mr. JAVITS. Mr. President, if the Senator would yield, I happened to be in the Chamber and heard the Senator's explanation of the reasons why the Senate conferees were willing to drop the 120-day amendment. I understand that and I do not think that we need to get into a row about that particular point.

The PRESIDING OFFICER. The time of the Senator from Louisiana has expired.

Mr. ROBERT C. BYRD. Mr. President, I believe that I have 11 minutes remaining.

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. Mr. President, I yield my time to the Senator from Louisiana.

The PRESIDING OFFICER. The Senator from Louisiana is recognized for an additional 11 minutes.

Mr. JAVITS. Mr. President, the Senator may recall that I had a similar amendment and that the administration assured us that a report would be out. For one reason or another it was not. The Senator may recall that we were also due to get a similar report at the end of the year. There was a big crisis involved then, and they did not submit it at that time.

The purpose of the Senate being so clear and the Senator from Louisiana being sympathetic to that purpose, would it be proper for the Senator to spread his interpretation of this matter on the record to the effect that this be done by April 30 and that if it is not done in the House Ways and Means Committee, it will be done in the Senate Finance Committee? The Senate is entitled to get its presentation of this tax package within this time.

Mr. LONG. Mr. President, that is what will happen. The chairman of the House Ways and Means Committee told us that the Secretary of the Treasury had agreed to come before his committee and explain the administration's position on tax reform, which I am sure will be to recommend certain measures and not recommend others. The chairman of the House Ways and Means Committee will give consideration to the administration's position on tax reform during this committee's hearings on tax reform. Under those circumstances, I asked the chairman of the House Ways and Means Committee if he believed they would do exactly that. The chairman of the House committee has not the slightest doubt about it. His view is, of course, that that is what the Secretary will do, tell us what the administration's recommendations are.

I am sure that like any other administration recommendation, it will make some people happy and other people unhappy. It will be between those two extremes.

My guess is that it will be a recommendation which the advocates of raising taxes for a group whom they believe to be favored will be disappointed. Others will be highly pleased. It depends upon which view one holds. In my judgment, tax reform means something different

for perhaps each Senator. Each Senator has his own idea on tax reform. However, we will have the administration's position stated on April 30, and perhaps it will be continued over to May 1. The administration will state it and explain it. And the House Ways and Means Committee from that point forward will determine how far they want to go with that matter. They have their own ideas on that. They will send us the bill when they complete their action, and it will then be our turn to vote upon the matter.

Mr. JAVITS. Mr. President, I understand that perfectly. My point is that, as on two previous occasions our hopes have been dashed in that regard, would the Senator from Louisiana assure the Senate that he, too, has a very important committee, and that while he cannot in his committee initiate tax reform, he certainly has the right to ask the administration to keep its promise?

If this hope fails over there, I would like to know whether the Senator thinks that it should fail here in view of the declared intention of the Senate.

Mr. LONG. No, I do not think it should. I do not think that is part of the problem. I think that is part of the reason why the House would not accept that, in view of the fact that he told them that he would be there then. It is a promise that the administration will be there by that date. The Secretary of the Treasury has already agreed to be up here much quicker than would otherwise be the case.

Mr. JAVITS. Mr. President, I only ask the Senator if he will join with the rest of us in seeing that this gets done.

Mr. LONG. Yes; I do not want it understood that my ideas on tax reform will be the same as those of the Senator from New York. He represents a great State that has enormous interests in the revenues of the Government because it pays a great deal of those revenues. I represent an average size State. The Senator's State is located in one part of the country and mine is located in another. Our States have different interests, as is the case with all States. But they will be worked out. Invariably I will have an idea on tax reform that varies from the ideas of the Senator from New York, and vice versa.

Mr. JAVITS. Mr. President, I know the Senator understands that I have no desire to load the deck in favor of my State. It is merely the fact that we want the administration at a given time to state its position.

Mr. LONG. The Senator is correct. I am sure that will be the case. And I have been assured by the House that that will be the case.

Mr. BENNETT. Mr. President, if the Senator will yield, as a member of the conference committee, I support the chairman in his interpretation of the situation. And I would like to say to the Senator from New York that a bill will come from the House. And when it does, he and other Senators will have the right to appear before the Senate Committee on Finance and indicate whether it satisfies their interpretation of what the bill should be.

I agree with the distinguished Senator from Louisiana that when the Secretary of the Treasury had already given the chairman of the committee assurance that he would be there to discuss the administration's position, we should at least give him that chance. If he fails, there will be other opportunities to attach a similar amendment to another bill.

I hope that the conference report will be agreed to.

The PRESIDING OFFICER (Mr. HUDBLESTON). The question is on agreeing to the conference report.

The conference report was agreed to.

ORDER OF BUSINESS

Mr. JAVITS. Mr. President, will the Senator yield me 3 minutes?

Mr. ROBERT C. BYRD. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from West Virginia has 3 minutes remaining.

Mr. ROBERT C. BYRD. Mr. President, I yield 3 minutes to the Senator from New York.

THE PRESIDENT'S QUESTIONED CONSTITUTIONAL AUTHORITY TO BOMB CAMBODIA

Mr. JAVITS. Mr. President, I wish to raise today a serious question respecting the authority of the President under the Constitution in the continuing air bombing in Cambodia.

The question is most serious for two reasons: First, it bears on the Senate's prospective action in again considering the War Powers Act which is designed expressly to deal with the twilight zone in the Constitution respecting the war-making powers; and second, it raises a major issue of policy concerning military operations in the Indochina area and the effect upon those operations of laws heretofore enacted dealing with Cambodia.

I wish to make it clear that the issue is not whether it is in the American interest that this bombing in aid of the central government's forces in Cambodia is substantively desirable but rather who is to determine that fact for the United States. It is my judgment that it must be determined by the Congress and the President acting together and not by the President alone, as is apparently being done now. Thus, I believe the President should submit to the Congress the reasons for these actions in Cambodia and seek concurrence of the Congress in them.

I say this also because I believe that these military actions under the circumstances are directly affected by specific provisions of law—one of which I authored—and are, in addition, clearly actions putting forces of the United States into hostilities without prior authorization of the Congress.

I wish to point out that there are no treaty questions involved, as the present government of President Lon Nol has removed Cambodia from the purview of the Southeast Asia Treaty Organization

Treaty. In this respect, then Acting Secretary of State Richardson wrote the Senate Foreign Relations Committee on May 30, 1970, "the SEATO Treaty has no application to the current situation in Cambodia."

Nor can air bombing in Cambodia be any longer justified on the same ground that President Nixon justified the move of U.S. forces into Cambodia. On April 30, 1970, when the operation began, he said that his actions were necessary:

To protect our men who are in Vietnam and to guarantee the continued success of our withdrawal and Vietnamization programs, I have concluded that the time has come for action.

And in July 1970, when describing the reason for this operation, he said:

The President of the United States has the constitutional right—not only the right, but the responsibility—to use his powers to protect American forces when they are engaged in military actions.

But, today is the day that the American military presence in Vietnam is officially at an end.

I am deeply concerned that none of the laws enacted by Congress affecting Cambodia allow the policy now apparently being pursued there and which policy was most accurately phrased by Secretary Rogers when he testified before the House Foreign Affairs Committee on March 14, 1972, in support of the Cambodian aid request, stating:

As you know, one of the reasons we have increased the request for Cambodia assistance is that we are anxious to see that the Government in Cambodia survives.

Nor do I find anything in article 20 dealing with Cambodia and Laos of the Agreement on Ending the War and Restoring the Peace in Vietnam signed in Paris on January 27, 1973, to authorize the hostilities being engaged in absent the concurrence of the Congress.

The pertinent provisions of the laws affecting air bombing in Cambodia were contained in the Supplemental Foreign Assistance Act of 1970, section 6 6(b), of which read as follows:

Military and economic assistance provided by the United States to Cambodia and authorized or appropriated pursuant to this or any other Act shall not be construed as a commitment by the United States to Cambodia for its defense.

I was myself the author of this section (6b). It has undergone some change in succeeding acts, but still reads as follows:

Enactment of this section shall not be construed as a commitment by the United States to Cambodia for its defense.

Accordingly, I believe it appropriate to ask if we are going to continue the bombing in Cambodia in support of the forces of the Central Government of that country. If so, then the President should seek the concurrence of Congress.

It is my considered judgment that if the War Powers Act as passed by the Senate by a vote of 68 to 16 in 1972 were now in effect, the President would be required to make such a request according to the procedures specified in that act. I believe it greatly in the interest of our country that a comparable request should

now be made by the President before proceeding further in Cambodia.

I would like to quote the majority leader, Senator MANSFIELD, who said recently, regarding the military action in Cambodia:

If we are not careful, we have got the makings of another Vietnam.

These words should be carefully heeded by all in Congress and the Executive, especially in light of the recent tragic chapter of history in Vietnam.

TRANSACTION OF ROUTINE MORNING BUSINESS

The PRESIDING OFFICER (Mr. HUDLESTON). Under the previous order, there will now be a period for the transaction of routine morning business of not to exceed 15 minutes, with statements therein limited to 3 minutes each.

THE CONTINUED BOMBING IN CAMBODIA—BY WHOSE LEAVE?

Mr. EAGLETON. Mr. President, I would like to join the sentiments and remarks just expressed by the distinguished Senator from New York. I likewise am troubled by the bombing in Cambodia, inasmuch as it has no legal or constitutional basis.

As the Senator from New York has stated, the SEATO Treaty cannot apply as a legal justification for our action in Cambodia. This treaty requires the unanimous agreement of all parties before it can be implemented in the defense of either a signatory or a protocol nation. In addition, of course, the SEATO Treaty, as is the case with other mutual defense treaties, can be used as a vehicle for engaging in hostilities only in accordance with the constitutional processes of each nation.

To even suggest that this treaty could be used to demonstrate legal authority for the bombing in Cambodia would be an insult to this Congress and to the American people.

The Gulf of Tonkin Resolution has long since been repealed. Since the repeal of that resolution in January 1971, the President has, in my opinion, been on very shaky legal ground in conducting offensive military operations in Indochina. Now, however, I do not think that, even using the broadest and most gargantuan interpretation of the Commander in Chief's authority, the President may unilaterally continue bombing in Cambodia. The one legal straw the President did have after the repeal of the Gulf of Tonkin Resolution—the protection of American forces—is no longer applicable.

The initial foray into Cambodia and the bombing in Cambodia, Laos, and Vietnam was considered at one time to be a part of the President's power to protect American troops there during the withdrawal process. Now that our troops have been totally withdrawn, that rationale for operation in Cambodia goes by the board.

I pay tribute to the Senator from New York for making these remarks on the floor of the Senate, and I agree with him

that had the War Powers Act been enacted by Congress last year—as he mentioned, it passed the Senate but an agreement could not be reached in conference with the House—we would have had an appropriate vehicle to determine whether the President had this authority. In my opinion he clearly does not.

As long as we have no legislation in the war powers area, the President is free to describe his power in the broadest possible way. Even before passage of our bill, however, we should not permit such broad interpretations.

What the State Department is now preparing as legal justification for our bombing in Cambodia should be a lesson to this Congress that, if we are to protect our own constitutional prerogatives in the war-making area, we must carefully delineate the powers of both the President and Congress.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. EAGLETON. I yield.

Mr. JAVITS. I wish to pose a rhetorical question to the Senator. There is nothing in the War Powers Act to prevent the President from asking immediately and getting action on the part of Congress immediately; there is no requirement, under the War Powers Act or whatever the methodology may be; he can ask immediately and get action immediately, is that not true?

Mr. EAGLETON. The Senator is correct.

Mr. JAVITS. I thank my colleague.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

PROPOSED LEGISLATION FROM DEPARTMENT OF AGRICULTURE

A letter from the Under Secretary of Agriculture, transmitting a draft of proposed legislation to prevent the unauthorized manufacture and use of the character "Woodsy Owl," and for other purposes (with an accompanying paper). Referred to the Committee on Agriculture and Forestry.

REPORT OF NATIONAL COMMISSION ON CONSUMER FINANCE

A letter from the Chairman, National Commission on Consumer Finance, transmitting, pursuant to law, a report of that Commission, dated December 31, 1972 (with an accompanying report). Referred to the Committee on Banking, Housing and Urban Affairs.

REPORT ON STUDIES OF DEATH, INJURIES, AND ECONOMIC LOSSES RESULTING FROM ACCIDENTAL BURNING OF PRODUCTS, FABRICS, OR RELATED MATERIALS

A letter from the Secretary of Health, Education, and Welfare, transmitting, pursuant to law, a report on studies of death, injuries, and economic losses resulting from accidental burning of products, fabrics, or related materials, for the fiscal year 1972 with an accompanying report). Referred to the Committee on Commerce.

REPORT ON UTILIZATION OF AUTHORITY TO DESIGNATE AND RENT INADEQUATE QUARTERS

A letter from the Secretary of Transportation, transmitting, pursuant to law, a report on the utilization of authority to designate and rent inadequate quarters, lease family housing and hire quarters, for the calendar

year 1972 (with an accompanying report). Referred to the Committee on Commerce.

REPORT OF COMPTROLLER GENERAL

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Need to Control Discharges From Sewers Carrying Both Sewage and Storm Runoff," Environmental Protection Agency, dated March 28, 1972 (with an accompanying report). Referred to the Committee on Government Operations.

REPORT ON STATUS OF THE COLORADO RIVER STORAGE PROJECT AND PARTICIPATING PROJECTS

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, a report on the status of the Colorado River storage project and participating projects, for fiscal year 1972 (with an accompanying report). Referred to the Committee on Interior and Insular Affairs.

REPORT OF GOVERNMENT COMPTROLLER FOR GUAM

A letter from the Deputy Assistant Secretary for Territorial Affairs, Department of the Interior, transmitting, pursuant to law, the annual report of the Government Comptroller for Guam of the fiscal condition of the Government of Guam, for the year ended June 30, 1972 (with an accompanying report). Referred to the Committee on Interior and Insular Affairs.

REPORT OF IMMIGRATION AND NATURALIZATION SERVICE

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, a report of that Service, for the year ended June 30, 1972 (with an accompanying report). Referred to the Committee on the Judiciary.

REPORT OF ACTION

A letter from the Assistant Director of ACTION Congressional Affairs, transmitting, pursuant to law, a report of that Agency, for the period July 1971, through June 1972 (with an accompanying report). Referred to the Committee on Labor and Public Welfare.

REPORT ON FUTURE PLANS FOR CERTAIN PUBLIC HEALTH SERVICE HOSPITALS

A letter from the Acting Secretary of Health, Education, and Welfare, transmitting, pursuant to law, a report on future plans for certain Public Health Service hospitals (with accompanying papers). Referred to the Committee on Labor and Public Welfare.

PROPOSED LEGISLATION FROM CIVIL SERVICE COMMISSION

A letter from the Chairman, U.S. Civil Service Commission, transmitting a draft of proposed legislation to provide for payments by the Postal Service to the civil service retirement and disability fund for increases in the unfunded liability of the fund due to increases in benefits for Postal Service employees, and for other purposes (with accompanying papers). Referred to the Committee on Post Office and Civil Service.

PROPOSED LEGISLATION FROM THE SECRETARY OF TRANSPORTATION

A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to amend the Highway Safety Act of 1966, title 23, United States Code, section 401 et seq., and for other purposes (with accompanying papers). Referred to the Committee on Public Works.

PROPOSED LEGISLATION FROM ATOMIC ENERGY COMMISSION

A letter from the Chairman, U.S. Atomic Energy Commission, transmitting a draft of proposed legislation to amend the EURATOM Cooperation Act of 1958, as amended (with accompanying papers). Referred to the Joint Committee on Atomic Energy.

LEGISLATIVE REVIEW REPORT OF COMMITTEE ON INTERIOR AND INSULAR AFFAIRS—REPORT OF A COMMITTEE (S. REPT. NO. 93-95)

Mr. JACKSON. Mr. President, in accordance with the provisions of section 118 of the Legislative Reorganization Act of 1970, I submit the legislative review report from the Committee on Interior and Insular Affairs.

The 1970 act requires that each standing committee of the Senate shall review and study, on a continuing basis, the application, administration, and execution of those laws, or parts of laws, the subject matter of which is within the jurisdiction of that committee.

The report I submit today covers the activities of the Committee on Interior and Insular Affairs during the 92d Congress, and I ask that it be printed at this point in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

OVERSIGHT FUNCTION AND REVIEW ACTIVITIES OF THE SUBCOMMITTEE ON INDIAN AFFAIRS FOR THE 92D CONGRESS

JURISDICTION

The Subcommittee carries jurisdictional responsibility for the oversight activities over the full range of social and economic issues inherent in the Federal relations of American Indians and Alaska Natives. In addition, the Subcommittee maintains an official interest in the programs and activities of the Bureau of Indian Affairs, the Indian Claims Commission, and the Indian Health Services of the U.S. Public Health Service.

No major Subcommittee oversight hearings were conducted into Indian Affairs during the 92nd Congress. However, Subcommittee staff, assisted by GAO supervisory auditors from the Washington, D.C. headquarters and Denver regional offices, conducted an investigation of the activities of Fort Belknap Builders, Inc., a tribal corporation conducting business on the Fort Belknap Reservation, Montana.

The issue on the Fort Belknap Reservation, in general, involved the following:

(1) The official tribal governing body established a corporation under State law whose major purpose was to enter the home construction field.

(2) It was proposed that this corporation, The Fort Belknap Builders, Inc., would assume construction of various Federally subsidized housing projects designated for this Reservation.

(3) The official tribal governing body and the corporation borrowed heavily from private banks in the State of Montana to finance their operation.

(4) The corporation contracted with a private consulting firm to provide general managerial support for the corporation's activities.

(5) Despite the fact that the corporation experienced a substantial cash flow, both from the loans from private banks and Federal funds to support the housing projects, the Builders' corporation subsequently faced a serious financial crisis and found itself behind schedule in completion of the required units in the housing project.

(6) Both the official tribal governing body and the corporation are faced with a heavy indebtedness with no prospect of meeting these obligations.

(7) This entire issue raises serious questions concerning the role and responsibilities of the Department of the Interior and the Department of Housing and Urban Development.

The Subcommittee staff investigation of this issue was incorporated into a formal Committee Print for the use of the full Committee and the public.

OVERSIGHT FUNCTION AND REVIEW ACTIVITIES OF THE SUBCOMMITTEE ON WATER AND POWER RESOURCES

The Subcommittee on Water and Power Resources has the legislative oversight responsibility for legislation and activities relating to irrigation, reclamation, water supply, and related power, recreation, and fish and wildlife conservation; interstate compacts apportioning water; the Federal desalting program; water resources research, planning, and development; and weather modification for increasing water supply. The subcommittee's jurisdiction includes all or part of the activities of the following Federal agencies:

Department of the Interior:
Bureau of Reclamation.
Bonneville Power Administration.
Southeastern Power Administration.
Southwestern Power Administration.
Office of Saline Water.
Office of Water Resources Research.
National Water Commission.
Water Resources Council.

Legislative actions

During the 92d Congress, the Committee undertook legislative oversight hearings of a number of programs on the occasion of considering specific legislation as follows:

Water resources research

In consideration of S. 219 (H.R. 10203), that portion of the program of the Office of Water Resources Research which supports the work of the research institutes in the several states was reviewed in detail. A number of administrative revisions were made in the program including a major increase in the annual level of funding (P.L. 92-175).

Saline water conversion program

A fundamental review of the Federal program for research and development in desalting was initiated by the Committee in the 91st Congress. In the 92d Congress, a report requested by the Chairman from the Office of Science and Technology was received. The enabling legislation authorizing the program was substantially redrafted to reflect the status of the technology and emerging new needs of society for desalting (S. 991). Major redirections and an extension of the authority were made (P.L. 92-60).

Small reclamation loan program

A number of changes were made in the procedures of the small reclamation projects loan program to correct problems which have been experienced in its administration thus far (P.L. 92-167). A complete review of the program's accomplishments was made.

Colorado River storage project

A review of the status of work by the Bureau of Reclamation on the comprehensive Colorado River Storage Project was made in connection with the authorization of additional appropriations (P.L. 92-370).

Missouri River Basin

A regular two-yearly review of the status of work by the Bureau of Reclamation in the Missouri River Basin was made in connection with the authorization of continued appropriations (P.L. 92-371).

Irrigation Distribution System Loan Program

A review was made of the accomplishments and performance of the Bureau of Reclamation under the loan program for construction of irrigation distribution systems. Changes in the administration of the program were made (P.L. 92-487).

Special actions

Southwest Powerplants

The Committee undertook a major study of the impact upon the desert regions of the Southwest of construction of a coal-fired powerplant complex involving a variety of Federal actions within the Committee's oversight jurisdiction. Hearings and inspections were held in the Southwestern States, and hearings were held in Washington, D.C. The Committee reported its findings and recommendations to the Senate on August 4, 1972 (S. Rept. 92-1015).

Rehabilitation and Betterment Projects

In accordance with the provisions of the enabling Act, four reports of the findings of the Secretary of the Interior concerning proposed plans for the rehabilitation and betterment of existing reclamation projects were received and reviewed by the Committee prior to initiation of the work.

Small Reclamation Projects

In accordance with the provisions of the enabling Act, findings of the Secretary of the Interior on two proposed loans for the construction of small reclamation projects were received and reviewed prior to initiation of the work.

Water Research Grants

Proposed grants for research under the provisions of the Water Resources Research Act were submitted to the Committee for review prior to commitment of the funds.

Periodic reports

Annual reports were received by the Committee as follows:

Status of the Colorado River Basin Project;
Quality of Water, Colorado River;
Activities of the National Water Commission;
Activities of the Office of Water Resources Research;
Activities of the Bonneville Power Administration;
Activities of the office of Saline Water;
Progress of Work on the Western U.S. Water Plan;
Reports of River Basin Commissions established under the Water Resources Planning Act;
Activities of the Water Resources Council;
Status of the Upper Colorado River Basin Fund;
Operation of Colorado River Basin Storage Facilities; and
Status of the Colorado River Storage Project and Participating Projects.

RE: OVERSIGHT FUNCTIONS OF THE PARKS, AND RECREATION SUBCOMMITTEE

Oversight hearings on snowmobiles and other off-road vehicles—May 15, 1971

Basically the following conclusions were reached at this session.

(a) Development and production of these vehicles have moved faster than our regulatory and legislative machinery.

(b) Existing State law and Federal regulations are not adequate for the job.

(c) Until recently, we have proceeded under the assumption that when a vehicle is not used on public highways, it need not be licensed. It is now known that this assumption is no longer valid. The proliferation of off-road vehicles is an immediate problem.

(d) An off-road vehicle is any motorized vehicle capable of being utilized off an established road. This definition encompasses a variety of four-wheeled vehicles including those with four-wheel drives, dune buggies, and amphibians, two-wheeled vehicles from trail bikes to motorcycles, snowmobiles, and a variety of specialized propelled vehicles. New air-cushioned machines are now appearing.

(e) Uses cover a wide range. There are individual activities including cross-country

tours, exploration, sightseeing, and transportation to hunt and fish. There are numerous group activities which encompass the types of use just mentioned plus competitive events which draw numerous participants and spectators.

Uses also cover a wide variety of lands. Vehicles can now travel over swamp, tundra, marsh, sand dunes, ice and snow fields, and steep terrain. They are often powerful enough to bring along sufficient supplies for lengthy stays.

(f) There are good and there are harmful aspects in the development of off-road vehicles. Public land managers actually pioneered in the use of some of these vehicles for administrative purposes. Search and rescue missions, firefighting, and other emergency work are obvious pluses. To the frustrated and harassed urban dweller, they provide both release and recreation. Properly operated, individual vehicles do only limited damage to the soil, water, vegetation, and fauna resources during most periods of the year. A major impact is from their sheer numbers: The multiplicity of small impacts. Intensive use on limited areas or on fragile sites leaves devastating scars. Heavy indiscriminate use may have substantial irreversible effects.

(g) In certain respects the vehicles are self-defeating. The two- and four-cycle engines used on vehicles, not licensed for highway use, present substantial noise problems. Areas which were once remote find their quiet shattered. The vehicle destroys the solitude sought.

Many drivers of off-road vehicles are in clubs or organizations that seek to establish safe and considerate practices.

(h) Groups such as the dune buggy operators often construct their own vehicles and proceed with a strong sense of camaraderie in what becomes a family enterprise. The snowmobilers have likewise shown a commendable interest in improved use and safety conditions. The pickup camper group is another highly organized group of users. Motorcyclists are likewise organized but exhibit more individualistic characteristics.

(i) Tragic accidents involving use of off-road vehicles are on the increase. A certain number of accidents is probably inevitable. However, a complicating problem on the public lands is the fact that many visitors are urban dwellers unfamiliar with the hazards of the open country. Another is the large number of dangers that exist on the public lands carrying over from the day when these lands were essentially remote and inaccessible. Abandoned mining shafts and pits are one example.

Specific recommendations were submitted at this hearing which reflected the convictions of a majority of the individuals in attendance. These were:

1. All off-road vehicles should be registered and licensed by the state through a system having appropriate national standards, such as that used for boats. Fees should be established and administered on the principle that the users pay for the services and accommodations they receive. Fees should be adequate to cover the total cost of the program, including land classification, trail or area designation and maintenance, effective education, and enforcement. Authority for enforcement must be clearly established. It is shocking that the Bureau of Land Management lacks anything approaching adequate enforcement authority although it administers the largest acreage of public lands where demands for the use of a variety of types of off-road vehicles are constantly increasing. Full flexible authority should be granted immediately to all federal, state, and local governmental land-managing agencies for handling these vehicles.

Use of off-road vehicles should be permitted only in designated areas or on spe-

cific trails at prescribed periods of time. Flexible authority should be granted to permit top-level administrators to close any area or trail upon one or two days notice to prevent erosion, curtail resource degradation, minimize irritating recreational conflicts, eliminate opposition to off-road vehicular activities with the primary purposes of an area, and enhance safety. The overall goal should be to permit reasonable use of off-road vehicles, while simultaneously preventing and minimizing degradation and destruction of (1) fragile soils and aquatic areas, (2) biotic communities, (3) fish and wildlife food and cover and forest seedlings, (4) other important landscape and economic values, and (5) citizen property and privacy rights.

Regulations should prohibit the pursuit, harassment, and taking of all wildlife with the aid of any off-road vehicle. Chasing and killing foxes, coyotes, and other creatures with the aid of snowmobiles and other vehicles, as has been done in past years, should be prohibited. Similarly, off-road vehicles should not be permitted in or near winter concentrations of wildlife. At least some snowmobiles may not realize that disturbing wildlife, such as deer or elk, during the critical winter months can cause additional stress that often means the difference between life or death. This is especially true toward the end of winter when deer and other yarding mammals may have small energy reserves. These reserves can be depleted quickly and the animals exhausted if they are forced to struggle through deep snow in attempting to escape curious pursuers. Concentration areas of wintering deer and other forms of wildlife should be non-use areas for off-road vehicles.

4. Perhaps, by attacking this problem in its early stages, it was concluded that we might avoid the complexities and enigmas which have characterized our experience with the close to 100 million automobiles and trucks that now operate on the streets and highways of this country.

General oversight hearings on the National Parks to cover such problems as traffic management, safety and vandalism were held on June 15, 1971

This was an effort to "take stock" of certain trouble spots that have developed within the national park structure and to ascertain from proper officials what the plans are for future developments or refinement in the Park System.

The concept of a National Park, originally designed for nature preservation, has evolved during the past 100 years with many mutations and innovations in response to national needs. For example, in 1906, largely in response to the depredations on the Indian ruins of the Southwest, the Congress authorized the President to establish—by Proclamation—National Monuments from lands owned or controlled by the United States to protect "historic landmarks, historic and prehistoric structures, and other objects of historic or scientific interest."

The Act of March 3, 1933, providing for reorganization within the Executive Branch, resulted in an Executive Order transferring to the Department of the Interior for administration by the National Park Service the national memorials and parks of our Nation's Capital, many national monuments, and historical and military parks administered by other Federal agencies.

Again, in 1935, the Congress authorized the Secretary of the Interior—by Secretarial Order—to establish National Historic Sites in either private or Federal ownership to preserve our national history.

In the meantime, the Congress adopted by law a wide variety of park concepts, such as "National Historical Park," "National Military Park," "National Memorial Park," "National Battlefield," "National Battlefield Park," and "National Battlefield Site."

In 1936, the Congress enacted the Park, Parkway and Recreation Area Study Act directing the Secretary of the Interior to make "a comprehensive study . . . of the public park, parkway, and recreational-area programs of the United States . . . such as will provide data helpful in developing a plan for coordinated and adequate public park, parkway, and recreational-area facilities for the people of the United States."

These studies developed the National Seashore and Recreation Demonstration Area concepts. (Some of these Recreation Demonstration Areas, such as Prince William Forest Park and Catotchin Mountain Park were retained in the National Park System while others were transferred to the States.)

This history is necessary in order to demonstrate the various development phases that took place during the formative stages of the System.

The principal concern presently with regard to the National Parks is the very high level of visitor usage—and the attendant automotive traffic that such usage brings to the Parks. The number of visitors in and of themselves is not threatening to the parks, but it is firmly believed that the number of automobiles presently funneled into park units are the cause of substantial damage. The Park Service recognizes this because it is presently banning automobiles from one or two congested parks, or parts of them, and is considering implementing this policy in other areas.

There is no conflict between protecting parks in their natural state and providing outdoor recreation for those who seek it. The need is for a combination of wilderness protection and increased recreation within the parks for the enjoyment and appreciation of these areas in both their natural and developed state. More recreational development outside the parks in the public and private lands of the surrounding regions is also necessary.

There have been heavy expenditures for roads to make it easier for millions to enter the parks. There have not been corresponding increases in expenditures for personnel to supervise the crowds and to protect the parks. This is best demonstrated by the increase in vandalism in some of the parks and the difficulty experienced in handling large volumes of traffic without sufficient personnel. This situation is also reflected in the troublesome safety condition that has sprung up in a few locations. This has caused serious public reaction, and again it is felt that increased ranger protection would lessen the problems measurably.

Consideration of steps that might be taken to increase the ratio of rangers to visitors ought to be approached on an emergency basis and then followed with regulations by the Secretary of the Interior.

Summer resort and carnival features within the parks can be cut back. Vehicles adapted to off-road use have multiplied at an alarming rate and should be restricted in all parks as soon as practical.

The oversight hearing also disclosed that the National Park Service has made some remarkable advancement in recent years in such important fields as general management, maintenance, law enforcement, and personnel development. The public has responded through an ever increasing patronage of the 290 units in the Park System and by an avalanche of commendatory letters. As an illustration of this improvement the Service points to:

Travel expenditures of \$7.8 billion by visitors in 1970 on their way to, and in the vicinity of, the areas of the National Park System, amount to more than ten percent of the total expenditures in the travel industry.

Significantly, this gross expenditure of park visitors resulted in personal income of \$5.9 billion to employees and businesses pro-

viding tourist services along the way and in the parks.

Of this personal income, an estimated \$1.2 billion was returned to the Federal Treasury in Federal taxes, to say nothing of uncounted taxes at the State and local levels of Government.

Another commendable practice which the National Park Service has adopted within the last year is to hold pre-master plan hearings, at which the Service does not present any plan but simply listens to the ideas offered by the public. Once it has heard the public, it develops its own recommendations and then later holds a public meeting (for master plans) or hearing (for wilderness plans) at which it presents the NPS proposal. Once it has taken the public's views into consideration it publishes its final plan (in the case of master plans) or sends its recommendations to Congress (in case of wilderness plans).

The pre-master plan hearing is a highly desirable step because it allows the public to formally present its ideas to the agency team before it has begun to crystallize its own ideas. Another step in this direction: include public members on all master planning and wilderness teams, and let the public be involved in the selection.

The Senate Subcommittee on Parks and Recreation feels strongly that oversight hearings on the operations and development of practically all Federal Agencies is a desirable practice. It provides both the legislators and the agency an opportunity to constructively review accomplishments and problems that have developed over a designated period.

OVERSIGHT FUNCTION AND REVIEW ACTIVITIES
OF THE SUBCOMMITTEE ON TERRITORIES AND
INSULAR AFFAIRS

The Subcommittee is primarily responsible for the oversight of legislation and activities relating to the Virgin Islands, Guam, the Trust Territory of the Pacific Islands, and American Samoa. On-site examination of activities at these jurisdictions is hampered due to time and distance factors. Numerous reports from the comptrollers of the Virgin Islands and Guam were received and reviewed during 1971-72.

Guam

The Chairman and staff of the Subcommittee attended the 1971 Conference of Pacific Legislators in Guam, and subsequent to the conference made a visual inspection of a number of facilities constructed in the territory pursuant to legislation enacted in the 88th Congress (Public Law 88-170) to provide for the rehabilitation and replacement of facilities that were destroyed by typhoons in 1963. Authorization for the rehabilitation program expires in fiscal year 1973. Upon return to Washington legislation was introduced to extend and expand the program to meet unanticipated needs following receipt of a complete audit of construction activities.

Other matters of continuing interest to the Subcommittee are:

(a) Needed revision of the tax code relating to equal treatment of U.S. firms doing business in Guam.

(b) The need for a forum before which Guamanians may appear to press their claims for fair value of lands acquired by the U.S. Navy immediately following the retaking of Guam from the Japanese in 1944.

Trust Territory of the Pacific Islands

The most significant legislation relative to the Trust Territory of the Pacific Islands enacted during the 92nd Congress provided for the establishment of the Micronesian Claims Commission to adjudicate both World War II and postwar claims of the citizens of the territory who were damaged by wartime activities.

A second piece of major legislation would expand the Economic Development Loan

Fund available to the territory in order to encourage further development and job opportunities through expansion of the business community.

During hearings on these two legislative proposals the Subcommittee had before it representatives of the administration of the territory and examined closely the background need for the bills, as well as the effectiveness of the already existing economic development program.

The Micronesian Claims Commission had just been appointed and begun to function at the conclusion of the 92nd Congress and will be the subject of further study by the Subcommittee in the carrying out of its responsibilities over the four-year span of life the Commission has been given.

The review of the economic development loan program resulted in the enactment of Public Law 92-257 which substantially strengthened the guidelines for the making of loans, the terms and conditions thereof, and other appropriate directives to administrators in order to make the program more effective than it has been in the past.

At the outset of the 93rd Congress it will be necessary to authorize funds for the continued administration of the Trust Territory. At that time close examination will be made into progress of the capital improvement program which has been steadily increased during the past four years.

The Subcommittee has held several informal meetings with members of the U.S. team of negotiators who are currently involved in working out a new political status for Micronesia. It is contemplated that legislation to terminate the existing trusteeship and to establish a new but as yet undetermined relationship with the territory will be forthcoming in the 93rd Congress.

Virgin Islands

The Chairman of the Subcommittee visited the Virgin Islands during the 92nd Congress, spoke with local officials, and has introduced legislation directed to solving minor problems in the territory.

A Constitutional Convention has been operating for several months in the Virgin Islands, and it is expected that at the beginning of the 93rd Congress proposed legislation will be submitted to the Congress to provide for a constitution for the territory, or, in the alternative, a revision of the 1954 Organic Act. At that time, the Subcommittee plans to hold extensive hearings on legislative and administrative issues.

The Committee has expressed concern to the Governor of the Virgin Islands about certain deficiencies in the proper accounting of the expenditure of local funds, as noted by the Virgin Islands Comptroller, and oversight in the matter is continuing.

American Samoa

A review of activities in American Samoa will be undertaken in the 93rd Congress when legislation relating to the election of the Governor and economic development of the territory is considered.

REPORT OF LEGISLATIVE REVIEW ACTIVITIES SUBCOMMITTEE ON MINERALS, MATERIALS AND FUELS, 92D CONGRESS

The Subcommittee on Minerals, Materials and Fuels of the Senate Interior and Insular Affairs Committee is responsible for all proposed legislation and other matters including legislative oversight relating to the mineral resources of the public lands, including public lands withdrawn as forest reserves and the Outer Continental Shelf; alien ownership of mineral lands; mining interests generally; mineral laws, including mining and leasing laws governing the disposition lease and sale of mineral interests owned by the United States and activities of the Bureau of Land Management, Geological Survey and the Bureau of Mines in administer-

ing such mineral laws; mining schools and experimental stations, supervision as trustee of mineral rights owned by the Indians and petroleum conservation and conservation of natural mineral resources.

Special Committee action included the following:

A review in March of 1971 of the Hellum Conservation program of the Department of the Interior, including the preparation of a printed record of the proceedings.

A review in November of 1971 of the Department of Interior's proposed prototype oil shale leasing program under the Mineral Leasing Act of 1920, including the environmental problems of oil shale, the economics of environmental protection and a review of the draft environmental impact statement under Section 102(2)(c) of the National Environmental Policy Act of 1969.

The Subcommittee also heard testimony on the opinion of the Solicitor dated October 28, 1971 (M-36839) which allowed the Department of the Interior to lease competitively oil shale lands covered by unpatented mining claims, pending ultimate judicial determination of the rights of the parties.

In August of 1971, the Subcommittee conducted an inspection and field hearing on the environmental impact of mining activities in the Custer and Gallatin National Forests in Montana. A specific problem was the effect of proposed Forest Service regulations on access roads for mineral activity.

In addition, the Subcommittee made field inspection trips of surface mining operations in Tennessee and Kentucky and Indian, private and public domain lands in Utah, Wyoming and Idaho. The inspection trips were an important background study to the surface mining legislation pending before the Committee and offered an opportunity to view surface mining activities covering a variety of minerals and under a wide range of differing geologic conditions nation wide.

The staff of the Subcommittee in cooperation with the staff of the Library of Congress prepared and published a background paper entitled the *Issues Related to Surface Mining*.

Legislative review of the activities of the Bureau of Mines included review of Bureau of Mines contracts for research in excess of \$25,000, submitted to the Subcommittee and the Congress pursuant to the provisions of Public Law 89-672 (Act of October 15, 1966).

OVERSIGHT FUNCTION AND REVIEW ACTIVITIES OF THE SUBCOMMITTEE ON PUBLIC LANDS

The Subcommittee on Public Lands has oversight jurisdiction which extends to the public lands generally, including forest reserves created from the public domain, and embraces all actions relative to such lands. Examples would be disposals, entries, easements, leases, patents, withdrawals, grazing activities, and wilderness and wild river designations.

The Senate Subcommittee on Public Lands during the 92nd Congress probed deeply into questions of timber management on Federal holdings.

Chairman Frank Church conducted hearings in mid-1971 that zeroed in on one of the most controversial questions ever to involve the nation's Federal timberlands—the practice of clear-cutting. More than 90 witnesses were heard in five days of testimony, including members of Congress, State officials, environmentalists, professional foresters and other scientists, and representatives from the timber and housing industries, the Forest Service, the Bureau of Land Management, and the Department of Housing and Urban Development.

The Subcommittee's attention was directed primarily to clear-cutting practices on the National Forests, especially on examples in Montana, West Virginia, Wyoming and Alaska. This was done because there had

been complaints of the practice on four specific National Forests. Such practices were attacked vehemently by the environmentalists, but clear-cutting as a method was strongly defended by representatives of the timber industry, the Forest Service and representatives of the professional Society of American Foresters. Some of those who opposed clear-cutting suggested a permanent moratorium on all clear-cutting on Federal timberlands. Those who defended the practice basically felt that no Congressional action was needed to limit the use of clear-cutting.

Some serious scientific questions were raised, such as possible long range adverse effects of clear-cutting on soil nutrients. Conversely, other professional forestry witnesses detailed the results of clear-cutting and the scientific research, mainly by the Forest Service through its Nation-wide system of forest experiment stations, demonstrating the need for clear-cutting of certain important tree species if they are to be reforested successfully.

Subcommittee report

Subsequent to the hearings, the Subcommittee issued a full report which was published as a committee print entitled "Clear-cutting on Federal Timberlands" (92nd Congress, 2nd Session; March 1972). The report concluded as follows:

"As indicated in the foregoing the Committee became aware of two major problem areas relating to the selection and conduct of timber harvesting operations on Federal forest lands. First, certain areas have been selected for cutting which should not have been subjected to any activity relating to timber harvesting for any of a number of reasons. These were areas of special scenic values, fragile soils, or other limiting physiographic conditions, areas where adequate regeneration could not be assured, and areas where the costs of special measures to avoid environmental damage or assure regeneration were so high that the activity was imprudent and relatively uneconomic.

"The second problem area relates to the manner in which harvesting operations are carried out. This involves selection of a harvesting method, the manner in which a sale is conducted and to minimize or avoid environmental injury, and careful supervision and enforcement of environmental conditions in road building and timber sale contracts.

"The Committee recognizes that the timber needs of the Nation are increasing at a rapid pace. The National Forests and other Federal forest lands will play a vital role in meeting those needs. Substantial testimony convinced us that measures to assure adequate timber supplies are essential if we are to house our people and serve other wood product needs at reasonable cost. The measure needed to help the Federal forests play their role must include intensified forest management practices such as reforestation, thinning, genetic improvement, salvage of dead timber, as well as the reforestation of nonstocked private forest lands.

"Accordingly, the Subcommittee believes it is timely and important to suggest guidelines for the conduct of timber harvesting activity on Federal lands which will assure that the problem areas are eliminated while important national needs for timber are being met. In stating these guidelines the Subcommittee does not presume to substitute its judgment for that of qualified professionals who have on-the-ground knowledge and familiarity with local needs and conditions. However, we believe overall policy direction is essential to make Federal forestry administrators aware of the concern and support of the Congress for stronger consideration of environmental impacts in timber management decisions. We are also aware that the Forest Service and the Bureau of Land Man-

agement have taken a number of steps to improve their timber management practices. The guidelines set forth by this Subcommittee should serve to strengthen and supplement these ongoing actions.

"Therefore, the Subcommittee believes timber management activities on Federal lands should be subject to the following policy guidelines:

"1. Allowable harvest levels

a. Allowable harvest on Federal forest lands should be reviewed and adjusted periodically to assure that the lands on which they are based are available and suitable for timber production under these guidelines.

b. Increases in allowable harvests based on intensified management practices such as reforestation, thinning, tree improvement and the like should be made only upon demonstration that such practices justify increased allowable harvests, and there is assurance that such practices are satisfactorily funded for continuation to completion.

If planned intensive measures are inadequately funded and thus cannot be accomplished on schedule, allowable harvests should be reduced accordingly.

"2. Harvesting limitations

Clear-cutting should not be used as a cutting method on Federal land areas where:

a. Soil, slope or other watershed conditions are fragile and subject to major injury.

b. There is no assurance that the area can be adequately restocked within five years after harvest.

c. Aesthetic values outweigh other considerations.

d. The method is preferred only because it will give the greatest dollar return or the greatest unit output.

"3. Clear-cutting should be used only where:

a. It is determined to be silviculturally essential to accomplish the relevant forest management objectives.

b. The size of clear-cut blocks, patches or strips are kept at the minimum necessary to accomplish silvicultural and other multiple-use forest management objectives.

c. A multidisciplinary review has first been made of the potential environmental, biological, aesthetic, engineering and economic impacts on each sale area.

d. Clear-cut blocks, patches or strips are, in all cases, shaped and blended as much as possible with the natural terrain.

"4. Timber sale contracts

"Federal timber sale contracts should contain requirements to assure that all possible measures are taken to minimize or avoid adverse environmental impacts of timber harvesting, even if such measures result in lower net returns to the Treasury.

"IN CONCLUSION

"The Subcommittee recommends that the Federal Government take prompt action toward bolstering the confidence and support of the American people for our nation's forestry program. The considerable testimony before the Subcommittee and the studies that have been completed or are now under way illustrate the necessity for establishing a prudent policy for regulating clear-cutting on our forest lands.

"It is the hope of the Subcommittee that the guidelines it has set forth will be quickly adopted and implemented by the Executive Branch."

Timber management hearings

Although the clear-cutting hearings did not consider legislation, the Subcommittee on Public Lands later conducted extensive hearings on general timber management measures introduced by Senators Metcalf and Hatfield, both members of the Subcommittee. Field hearings were held in Atlanta, Georgia; Portland, Oregon, and Syracuse, New York, with a final hearing for government witnesses in Washington. While no final committee action was taken on the measures, an

impressive hearing record was compiled which should provide important direction for any future legislation in this particular field.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session, the following favorable reports of nominations were submitted:

By Mr. WILLIAMS, from the Committee on Labor and Public Welfare:

Charles C. Edwards, of Maryland, to be an Assistant Secretary of Health, Education, and Welfare; and

William H. Kolberg, of Maryland, to be an Assistant Secretary of Labor.

(The above nominations were reported subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

Mr. THURMOND. Mr. President, as in executive session, from the Committee on Armed Services, I report favorably the nominations of 185 general officers in the Air Force and ask that these names be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations, ordered to be placed on the Executive Calendar, are as follows:

Brig. Gen. Ralph T. Holland, and sundry other officers of the Regular Air Force, for temporary appointment in the U.S. Air Force, in the grade of major general;

Maj. Gen. George J. Keegan, Jr., (brigadier general, Regular Air Force), U.S. Air Force, and sundry other officers, for appointment in the Regular Air Force, in the grade of major general;

Brig. Gen. Harold R. Vague (colonel, Regular Air Force), U.S. Air Force, and sundry other officers, for appointment in the Regular Air Force, in the grade of brigadier general; and

Col. Charles A. Veatch, Regular Air Force, and sundry other officers, for temporary appointment in the U.S. Air Force, in the grade of brigadier general.

Mr. THURMOND. Mr. President, in addition, there are 1,732 Navy nominations in the grade of captain and below and 2,980 nominations in the grade of colonel and below in the Air Force and Air Force Reserve. Since these names have appeared previously in the CONGRESSIONAL RECORD, in order to save the expense of printing on the Executive Calendar, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

The nominations, ordered to lie on the desk, are as follows:

Thomas G. Abbey, and sundry other officers, for promotion in the Regular Air Force; Vicente Martinez, and sundry other persons, for appointment in the Regular Air Force;

Walter H. Escue, and Charles W. Couch, Air Force officers, for reappointment to the active list of the Regular Air Force;

John C. Aasen, and sundry other officers, for promotion in the Air Force Reserve;

Thomas J. Abeln, and sundry other officers, for promotion in the U.S. Air Force;

Benjamin L. Aaron, and sundry other officers, for temporary promotion in the U.S. Navy;

Kenneth J. Bays, and sundry other officers, for promotion as Reserves of the Air Force; Daniel C. Cady, and sundry other officers, for appointment in the Reserve of the Air Force; and

James G. Sanders, and sundry other officers, for appointment as temporary officers in the U.S. Air Force.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. CHILES:

S. 1414. A bill to strengthen congressional control in determining priorities of appropriations and expenditures by requiring the Budget to be organized and submitted on the basis of national needs, agency programs, and basic program steps. Referred to the Committee on Government Operations.

By Mr. BUCKLEY (for himself, Mr. BAKER, Mr. BENNETT, Mr. BROOKE, Mr. DOMINICK, Mr. GRAVEL, Mr. JAVITS, Mr. SCOTT of Pennsylvania, and Mr. THURMOND):

S. 1415. A bill to amend the Small Business Act to assist in the financing of small business concerns which are disadvantaged because of certain social or economic considerations not generally applicable to other business enterprises. Referred to the Committee on Banking, Housing and Urban Affairs.

By Mr. LONG:

S. 1416. A bill to amend the Social Security Act to add a new title XX thereto which will provide insurance against the costs of catastrophic illness. Referred to the Committee on Finance.

By Mr. EAGLETON:

S. 1417. A bill for the relief of Maria Estela Lagus. Referred to the Committee on the Judiciary.

By Mr. HATFIELD (for himself, Mr. BEALL, Mr. BENNETT, Mr. BIBLE, Mr. BROCK, Mr. CLARK, Mr. CRANSTON, Mr. CURTIS, Mr. FANNIN, Mr. GOLDWATER, Mr. GRIFFIN, Mr. HANSEN, Mr. HOLLINGS, Mr. HUGHES, Mr. JAVITS, Mr. MANSFIELD, Mr. MCINTYRE, Mr. PACKWOOD, Mr. SCOTT of Pennsylvania, and Mr. TUNNEY):

S. 1418. A bill to recognize the 50 years of extraordinary and selfless public service of Herbert Hoover, including his many great humanitarian endeavors, his chairmanship of two Commissions of the Organization of the Executive Branch, and his service as 31st President of the United States, and in commemoration of the 100th anniversary of his birth on August 10, 1974, by providing grants to the Hoover Institution on War, Revolution and Peace. Referred to the Committee on Labor and Public Welfare.

By Mr. DOMENICI (by request):

S. 1419. A bill to designate the Aldo Leopold Wilderness, Gila National Forest, N. Mex. Referred to the Committee on Interior and Insular Affairs.

By Mr. FONG:

S. 1420. A bill for the relief of Erminia Ancheta Mandac. Referred to the Committee on the Judiciary.

By Mr. KENNEDY:

S. 1421. A bill to amend the administrative procedure provisions of title 5 of the United States Code to make the rulemaking provisions applicable to matters relating to public property, loans, grants, benefits, and contracts; to provide for payment of expenses incurred in connection with proceedings before agencies; to provide for waiver of sovereign immunity; to provide for the enforcement of standards in grant programs, and for other purposes. Referred to the Committee on the Judiciary.

By Mr. HUMPHREY (for himself, Mr. RANDOLPH, Mr. STEVENSON, Mr. MONDALE, Mr. PERCY, Mr. BIBLE, Mr. MOSS, Mr. BAKER, Mr. PASTORE, Mr. PELL, Mr. NUNN, Mr. INOUE, and Mr. BAYH):

S. 1422. A bill to establish a National Institute of Justice, in order to provide a national and coordinated effort for reform of the system of justice in the United States, and for other purposes. Referred to the Committee on the Judiciary.

By Mr. WILLIAMS (for himself and Mr. JAVITS):

S. 1423. A bill to amend the Labor Management Relations Act, 1947, to permit employer contributions to jointly administered trust funds established by labor organizations to defray costs of legal services. Referred to the Committee on Labor and Public Welfare.

By Mr. SCHWEIKER:

S. 1424. A bill to provide certain benefits for members of the armed forces and civilian employees of the United States who were in a missing status for any period of time during the Vietnam conflict. Referred to the Committee on Armed Services.

By Mr. MOSS:

S. 1425. A bill for the relief of Rosa Amelia Alba Mauricio. Referred to the Committee on the Judiciary.

By Mr. HRUSKA (by request):

S. 1426. A bill to amend sections 101 and 902 of the Federal Aviation Act of 1958 and chapter 2, title 18, United States Code, to implement the Convention for the Suppression of Unlawful Acts Against the Safety of Civil Aviation, and for other purposes. Referred to the Committee on the Judiciary.

S. 1427. A bill to prohibit the unauthorized possession within any Federal penal or correctional institution, any substance or thing, designed to damage the institution or to injure any persons within or part of the institution, and for other purposes. Referred to the Committee on the Judiciary.

S. 1428. A bill to amend section 215, title 18, United States Code, receipt of commissions or gifts for procuring loans, to expand the institutions covered; to encompass indirect payments to bank officials; to make violation of the section a felony; and to specifically include offerors and givers of the proscribed payments; and for other related purposes. Referred to the Committee on the Judiciary.

By Mr. STEVENSON:

S. 1429. A bill to amend the Federal Aviation Act of 1958 to authorize free or reduced rate transportation for severely handicapped persons and persons with sight attending such handicapped persons. Referred to the Committee on Commerce.

By Mr. PELL (for himself, Mr. CASE, Mr. MUSKIE, Mr. HOLLINGS, Mr. MAGNUSON, Mr. MOSS, and Mr. WILLIAMS):

S. 1430. A bill to establish within the Department of State a Bureau of Oceans and International Environmental Affairs to be headed by an Assistant Secretary of State. Referred to the Committee on Foreign Relations.

By Mr. BEALL (for himself, Mr. DOMINICK, and Mr. BUCKLEY):

S.J. Res. 86. Joint resolution to suspend, for 2 years, Federal support of projects involving psychosurgery. Referred to the Committee on Labor and Public Welfare.

By Mr. KENNEDY:

S.J. Res. 87. Joint resolution relating to the National Advisory Council on Indian Education. Referred to the Committee on Labor and Public Welfare.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CHILES:

S. 1414. A bill to strengthen congressional control in determining priorities

of appropriations and expenditures by requiring the budget to be organized and submitted on the basis of national needs, agency programs, and basic program steps. Referred to the Committee on Government Operations.

Mr. CHILES. Mr. President, on March 15, 1973, I offered testimony before the Joint Congressional Study Committee on Budget Control. At that time I stated that I was exploring ways in which to make vital budget information available to Congress through a restructuring of the way the Office of Management and Budget presents the budget to Congress.

I am today introducing the Congressional Budget Control Act of 1973. Through this proposed legislation, I hope to offer a framework to help the Congress regain the control it does not now have over the budget.

I suggest that the most effective way to get that control over programs is to control the early steps which actually determine the level of spending that Congress becomes concerned about later—when it is too late to do anything about it.

I believe that Congress ought to be setting the priorities within a budget target and must, therefore, have the visibility within individual programs to effect control over the dollars that these programs eventually command. I believe that Congress must have a clear picture of what separate public needs the Federal Government is trying to satisfy; and I believe Congress must have the capability to sort out and collect in sensible groupings all the programs and activities we annually budget.

The Joint Congressional Study Committee on Budget Control has cited the need for information which will show the effect on expenditures resulting from existing and proposed legislation. The Legislative Reorganization Act of 1970 directed the Secretary of the Treasury and the Director of the Office of Management and Budget, in cooperation with the Comptroller General, to develop a standardized information and data processing system for budgetary and fiscal data, and to develop also a standard set of classification of programs, receipts, and expenditures to be used in the budget system. The Comptroller General has now stated that—

The system contemplated by the executive branch will not fulfill the information needs of the Congress.

It is my hope that through the implementation of my bill, these congressional information needs might be met.

I do not think anyone here needs to be convinced that Congress lacks visibility over the budget as a whole and particularly the early phases of new programs. When we use words like "fragmentation," "atomization," and lack of "coordination," what we are really saying is that we in Congress have the responsibility to stay on top of a budget over which it is virtually impossible to stay on top of. Yet, it is Congress which ought to be setting the priorities within a budget target. It is Congress which should understand and confirm the missions or functions of executive agencies; and, most important, it is Congress which should have the visibility within

individual programs to effect control over the dollars that these programs eventually command. As I will explain in more detail later, it is at these beginning stages of any program, at the research and development level, that Congress ought to be directing most of its energies, because that 5 percent of the budget develops into 95 percent over the years, through small increases from budget to budget.

The President obviously recognizes the control problem as evidenced by his efforts to set up a "super cabinet" to oversee the programs of groups of agencies. How can we do that? How can we perform our responsibilities of oversight, control, and supervision over such a complex operation?

To answer that question we first must answer why Congress does not have the key elements of budget and program control right now. The basic answer is a lack of organization of budget and program-related information; the way it is presented to us, the information we have to work with; and the way we handle this information.

We simply do not have a clear picture of what separate public needs the Federal Government is trying to satisfy we do not have the capability to sort out and collect in sensible groupings all the programs and activities we annually budget.

Let me give the Senate some examples—

First. On March 14, 1973 I sat in on hearings on the new Federalism before the Senate Subcommittee on Intergovernmental Relations. At that hearing OMB Director Roy Ash presented a chart that would boggle the mind of the most sophisticated bureaucrat in our Government. What the chart showed, supposedly, was how 19 separate and distinct programs within HEW operate to prevent school dropouts. That is, 19 separate programs under at least four separate agencies compete with each other for funds to operate 19 different approaches to preventing school dropouts.

I am told that in the case of HEW there are more than 300 programs of which 54 overlap each other and 36 overlap programs of other Departments.

Second. One of the most alarming areas of disjointed information fed to Congress in fragmented fashion is in the area of defense—but no area is exempt, really. In the Department of Defense there are three Military Departments working under their own definitions of their missions, none of which matches the other. The procurement commission, which I served on, found that new weapon programs often start because one of the services feels they "need" a new aircraft or missile without adequate attention to why, what military mission capability is to be upgraded, how much it is worth and its relationship to other programs being proposed or in being to accomplish similar purposes.

In defense appropriations, Congress never gets the chance to make a real decision until we reach the high money figures—until we are "locked in" in an expensive program. For example, although the AH-56 Cheyenne helicopter, which Congress canceled last year,

appeared for large-scale funding in 1965, it began years earlier in exploratory development under a project titled "Aircraft Suppressive Fire." Another project called "Air Mobility" also helped to finance this early armed helicopter exploration. In about 1963, the project was moved into an advanced development activity identified as the "Aircraft Suppressive Fire System."

Following these early efforts, the Army held a competition and selected a developer and producer of that helicopter. In the years that followed, the helicopter encountered great difficulty in development, and the program was finally terminated after the expenditure of several hundred millions of dollars.

It is these kinds of cases which intensify congressional demands for information and justification. But the response has been so far to burden Congress with detailed reviews and deprive it still of workable information.

The examples are endless. What they all point to is the simple fact that Congress must stop merely shrugging its shoulders over its inability to take a whole, complete, and total look at the budget, and instead take action now to require that budget information is given to us in a workable fashion. It is an elementary observation but one that has evidently not been made or at least gone unheeded for far too long.

What shall we do? Congress must have an early opportunity to debate and understand a program's purpose to understand what problem it is we are trying to solve and the goals that we are trying to attain. That purpose ought to be carefully weighed by the appropriate congressional committees to determine its relationship to national needs and other related Federal programs and whether any new programs should be started at all.

Instead of spending hours looking at individual programs—we ought to be studying how programs fulfill best the missions or functions or priorities we have set; and whether or not this or that program unnecessarily duplicates another program or whether a particular activity might better achieve its mission if operated by another agency. Let me give a clearer example of what I mean—

I am including with my statement several budget structures. 1-A is the current budget structure for the space program of NASA and 1-B is an alternative structure designed around the principles I am advocating here today.

The current budget structure is built around activities and specific programs that have little or no relationship to the end-purpose for spending these funds—to national needs—national priorities—whatever they may be. The alternative budget structure shows how each activity of NASA could be related to specific missions—stated national needs or end-purposes. In other words, the activities performed by NASA would not be described in terms of what they were doing, but rather through accurate descriptions of why the work was being done, charted so as to key directly to national needs and priorities. Individual committees and Congressmen may feel

a bit uncertain as to whether to spend more or less for "research and development;" but they surely can better reflect the opinion of their constituents—and more sensibly control the budget—if they are given a chance to see and judge how much is spent for development of pollution monitoring capability.

The advantages of the alternative structure are obvious. If the Congress requires OMB to present to the Congress a budget whose programs are all keyed directly to accepted and understood national needs, Congress could obtain a clearer picture of whether or not it is approving a useless duplication or overlap. And, as I stated, there will be a more sensible basis for expressing congressional judgments on the budget than trying to decipher why all the budget line items for products and activities are being appropriated.

Taking again the NASA example, the committee before which this budget structure would be presented would have before it, at the same time, a total budget prepared by OMB to which it could relate easily and efficiently the specific NASA proposal.

Under "operational missions" for example there would be a program for developing pollution monitoring capability. Now I would assume EPA is also involved—and has direct responsibility for—pollution monitoring. Using the alternative budget structure, a committee member would be able to see that NASA is involved in monitoring pollution—and could check easily under "operational missions" in the total budget to see who else is involved in that same activity—how much it was estimated to cost in total, and so forth. Congress would then be in a much better position to have an understanding of what the Government was trying to do in all its departments and agencies to meet a specific national need.

Table 2-A shows, again roughly, how we today receive, analyze, and digest the budget for national defense. It is not a precise reproduction in every detail, but does show the major breakdown in the way the budget is organized.

I do not want to debate the details on these charts but rather to point out one simple fact: Looking at 1-A and 2-A it is difficult at best and nearly impossible for us in the Congress to answer the basic question, "Why are we spending these moneys? What are the end purposes in terms of national needs which are to be met?" As a consequence, it is impossible to use the current budget structure as a sensible handler for allocating resources to national needs—for setting priorities.

Table 2-B is likewise not intended to be an exact specification for a new budget structuring, but only used to demonstrate how a hierarchy of national needs can form the basis for budget review and authorizations. It is just an example of how it is possible to reformulate the budget so that the dollars we are spending and controlling bear a better correlation to the needs the Congress wants to see met.

Budgets are not controlled and priorities are not set just by pouring money into one account or another, increasing

one appropriation and decreasing another. We may know very well what we are spending, but we do not know what we are buying in terms of meeting any public need.

Congress must have the budget organized at the top level in terms of national needs. And then, money going to programs must be tied into these needs.

Finally, Congress must participate and have control over key program steps: First, the defining of program goals; second, the searching for different ways to meet these goals; third, the choosing of the way we will use to try to meet them; and fourth, the close supervision of how well an individual program is being implemented and is achieving its purpose.

It is these four steps I have just specified which, I believe, are the major turning points in any program. Each requires a key decision and the development of special information to make that decision. When one or more of the steps is not performed or the information to make that key decision is not acquired or is inadequate, programs invariably encounter difficulties in performance, schedule, and costs.

I believe the intent of the Legislative Reorganization Act of 1970 was to provide a more useful budget information system to serve all branches of the Government. The act called upon the Department of Treasury and the Office of Management and Budget to carry out its requirements in cooperation with the Comptroller General. The Comptroller General indicates that this purpose is not being accomplished. OMB and Treasury are, to my understanding, awaiting detailed congressional information requirements which will be considered in the context of overall budgetary considerations.

My purpose is offering the Congressional Budget Control Act of 1973 is to provide those detailed congressional information requirements.

The budget as presented to Congress today is not meaningful. It force-fits activities into program labels that are not real or actual, are not easily comparable to other similar or even identical programs in other Departments. What I am arguing for is a budget structure that is functional—and workable.

At a glance, Congress should be able to determine who is doing what—so that it can spend more time deciding whether or not we should be doing it at all.

It is at the research and development level—the beginning stages of any activity that Congress ought to be directing most of its energies—that 5 percent of the budget which inevitably determines how well or poorly the remaining 95 percent will be expanded years later. The usual mechanisms of legislative oversight—reporting, budget review, investigation tend to be ex post facto in nature and are, therefore, limited in usefulness.

There is, under the present budget structure a pitfall that draws the Congress to dwell excessively on trivial detail. We are challenged to confront the budget on the budget's terms, challenged to become specialists and technical ex-

perts on smaller and more detailed aspects of Federal expenditures. And even when we are successful in this battle, we have lost the war because we have fragmented our view and control over the basic thrust, direction, and purpose of Federal expenditures. Such issues are never exposed in our current budget; they are hidden.

In summary then, my purpose this morning is to make more vivid the problem we all know only too well. Budgeting for a modern Government is extremely complex and the armada of officials in executive agencies who prepare and justify the President's Budget far outnumber the congressional subcommittees and their small staffs. The question of how much money should be spent for a Government program is often without a determinate answer. And though the amounts of money that executive agencies request and Congress appropriates are not unrestrained, Congress is in no position to know whether those amounts are well spent.

Right now neither the executive nor Congress approaches the Defense Budget, for example, as an ad hoc problem, intent on a free-ranging examination of all possible alternatives before making a choice. Both branches of Government begin their thinking about the budget with a common and very narrow range of figures already in mind—based on last year's expenditures. I feel very strongly that if we do not "mission-orient" our budget we will continue to play the kind of game we have been playing—over-authorizing in committee in anticipation of cuts in conference.

Congress cannot practically set priorities until we know the missions—and we cannot know the missions until OMB presents the budget in mission form.

I am suggesting that the way OMB presents its budget to the Congress be changed. I have offered a framework for that change—the budget must be presented to Congress in a workable fashion for Congress to regain control. Individual programs must be keyed to functions and missions of Federal agencies and those functions and missions keyed to national needs and priorities. Congress must have that kind of understandable, coordinated information before it can realistically search for different ways to meet the set goals; choose the way we will try to meet them and closely supervise how well our taxpayers' money is being spent.

Until that requirement is placed upon Treasury and OMB, until the Congress receives a budget that is structured in practical and comparable fashion, Congress can talk all it wants to about reasserting itself. I fail to see how any budget can be controlled until it is fully understood.

Mr. President, I ask unanimous consent to have printed in the Record the text of my bill, as well as the tables to which I have referred.

There being no objection, the bill and tables were ordered to be printed in the Record, as follows:

S. 1414

Be it enacted by the Senate and House of Representatives of the United States of

America in Congress assembled, That this Act may be cited as the "Congressional Budget Control Act of 1973".

FINDINGS AND PURPOSES

SEC. 2. (a) The Congress hereby finds that—

(1) the Congress ought to be setting the priorities within a budget target; must have the visibility within individual programs to effect control over the funds that these programs eventually command; must have a clear picture of what separate public needs the Federal Government is trying to satisfy; and must have the capability to sort out and collect in sensible groupings all the programs and activities for which funds are provided;

(2) the Joint Study Committee on Budget Control has cited the need for information which will show the effect on expenditures resulting from existing and proposed legislation;

(3) the Legislative Reorganization Act of 1970 directed the Secretary of the Treasury and the Director of the Office of Management and Budget, in cooperation with the Comptroller General, to develop a standardized information and data processing system for budgetary and fiscal data, and to develop also a standard set of classification of programs, receipts, and expenditures to be used in the budget system; and

(4) the Comptroller General has now stated that the system contemplated by the executive branch will not fulfill the information needs of the Congress.

(b) It is the purpose of this Act—

(1) to reformulate the structure of the Budget to highlight national needs;

(2) to revise Congressional review of the Budget in a manner to let funds be allocated directly in accordance with national priorities; and

(3) to revise budget, authorization, and appropriation information to be based, first, on national needs, second, on programs, and, third, on basic program steps.

SUBMISSION OF BUDGET ON BASIS OF NATIONAL NEEDS, AGENCY PROGRAMS, AND BASIC PROGRAM STEPS

SEC. 3. (a) The Budget of the United States Government transmitted to the Congress by the President pursuant to section 201 of the Budget and Accounting Act, 1921, for the fiscal year ending June 30, 1977, and each fiscal year thereafter, shall be organized so as to present budget authority, proposed budget authority, outlays, and proposed outlays by—

(1) national needs,

(2) agency programs to meet these needs, and

(3) basic program steps.

(b) To assist the President in carrying out the provisions of subsection (a), each agency—

(1) shall develop its budget plans in accordance with the portions of the hierarchy of national needs for which it has assigned responsibility, and shall clearly delegate these responsibilities between the agency's component organizations, and

(2) shall relate all its programs to assigned national needs, shall organize each program by four basic steps (as prescribed in section 4 (b) (3)), and shall present to the Office of Management and Budget, for inclusion in the President's Budget message, information relating to the program step for which budget authority and outlays are being requested.

(c) Programs within an agency meeting similar national needs shall be coordinated by the agency head. Programs of two or more agencies meeting similar national needs shall be coordinated by the Director of the Office of Management and Budget so that the Executive branch and Congress both have a comprehensive overview of all programs meeting similar national needs.

MEANING OF TERMS

SEC. 4. (a) (1) "National needs": "functions of the Federal government"; "priorities": National needs are the basic and distinct first-order needs of the Nation, such as the needs for national defense, health, public education, energy, transportation, housing, income security, management of natural resources, and a national base of research and technology. The functions of the Federal government are to meet these national needs. Priorities determine, and are reflected in, the allocation of funds to meet each national need.

(2) "Supporting needs": In order to meet each national need, the Federal government must meet supporting needs associated with that national need, depending on national policy and strategy. To meet the need for national defense, supporting needs may include the needs for strategic offense, fleet air defense, and close air support. To meet the need for public education, supporting needs may include the needs for pre-school education, graduate education, and manpower training.

(3) "Hierarchy of national needs": The combined national needs and supporting needs from a hierarchy of national needs which are the end-purpose for which Federal funds are expended, without regard to the means chosen to meet those purposes.

(b) (1) "Agency missions": Responsibility for meeting national needs and supporting needs shall be assigned to the departments and agencies, and their component subdivisions, of the Executive branch (in this Act referred to as "agencies"). The missions of an agency are to meet those national needs for which they are assigned responsibility. Agency missions must be directly defined in terms of the hierarchy of national needs, and the hierarchy of national needs must be matched to the missions of all agencies.

(2) "Agency programs": In order to perform their missions, agencies will carry on one or more programs. A program is an organized set of activities that are, together, directed to providing goods and/or services that will meet a national need or part thereof.

(3) "Basic steps": Every program must progress through four basic steps, of varying duration, as follows:

(A) "Establishing needs and goals": The first step is defining the need to be met by the program and the objective measures of the end results, or goals, to be sought and attained as a consequence of the program. Goals are independent of the means to be used to achieve them. Goals describe the level of mission capability the agency is seeking, when it is to be made available, and the total program cost of providing that capability. Activities performed to execute this step include studies and analyses and do not generally require separate authorization or appropriation.

(B) "Exploring alternatives": The second step is the creation, definition, and evolution of competing means to meet the need. This step draws directly on the base of organized knowledge in the sciences (including social services) in order to identify and evolve those approaches that are promising, to eliminate those that are not promising, and to supply information on the expected costs and benefits of each approach. Activities performed to execute this step are research, development, testing and evaluation and require separate authorization and appropriations.

(C) "Choosing the preferred program approach": The third step is the evaluation and choice of the preferred program approach from among remaining alternatives. The evaluation will determine which approach will best meet the updated goals of the program and the costs and benefits accruing to each alternative in meeting the agency's

mission. Research, development, testing, and evaluation activities support this step.

(D) "Implementation": The fourth step is putting the preferred program approach into operation and monitoring its effectiveness. This includes final development preparation of the chosen approach. Activities that support this step include procurement of necessary equipment, operating, and maintenance activities.

EFFECTIVE DATES

SEC. 5. (a) Not later than June 30, 1975, the Director of the Office of Management and Budget, under the direction of the President, shall—

(1) specify a hierarchy of national needs, and

(2) reconcile and assign the responsibilities of the various agencies to meet the national needs so specified.

(b) Not later than June 30, 1976, the head of each agency shall reconcile the programs of his agency to the national needs assigned to his agency and shall organize program information by basic program steps.

By Mr. BUCKLEY (for himself, Mr. BAKER, Mr. BENNETT, Mr. BROOKE, Mr. DOMINICK, Mr. GRAVEL, Mr. JAVITS, Mr. SCOTT of Pennsylvania, and Mr. THURMOND):

S. 1415. A bill to amend the Small Business Act to assist in the financing of small business concerns which are disadvantaged because of certain social or economic considerations not generally applicable to other business enterprises. Referred to the Committee on Banking, Housing and Urban Affairs.

Mr. BUCKLEY. Mr. President, I rise to introduce a bill which is designed to help us achieve our goal of full equality of opportunity for all Americans by opening new sources of financing for minority enterprises. It is a bill which will hasten the development of the managerial skills and self-confidence which are so essential to the advancement of those minority groups which are still to have a full participation in our economic life.

The major victories in the march toward full equality have been accomplished through the striking down of laws which discriminated among Americans on the basis of race, and through the passage of others to guarantee that no one will be denied employment or advancement because of race. These laws against discrimination must be vigorously enforced, but they will not in themselves bring about the conditions of full equality among Americans of different origins. The legal barriers are down, but other barriers—social and psychological—still remain. These we cannot legislate away, but we can work to overcome them by creating the climate which will encourage the growth of mutual respect and self-respect among all Americans. I believe that nothing is more certain to bring this about than the rapid vertical integration of our minorities into the economic life of the Nation.

This economic integration is not something that can be accomplished by government edict. It must be achieved in fair competition. Self-respect requires the knowledge of earned success. Mutual respect will follow on the fact of achievement. But government, and our society at large, must recognize that certain handicaps still exist which make the road to achievement more difficult for some groups of Americans than for others.

Certain of these groups, notable black Americans, suffer from the psychological effects of generations of dependency. As a result, they are handicapped by a deficiency of business traditions and of the skills and self-confidence in commercial matters which have made it possible for other minority groups to take full advantage of the dynamics of the American system of free competitive enterprise.

On January 22, 1970, in his state of the Union message, President Nixon said:

We can fulfill the American Dream only when each person has a fair chance to fulfill his own dreams.

President Nixon's words go to the heart of the problem. Our system of free enterprise has brought to the people of this Nation economic and social gains unparalleled in history. The opportunity to

fulfill one's own dream through participation in the system has been an integral part of what America has always stood for. While the opportunity to test one's own ideas and resources and courage in the marketplace does not guarantee success, the denial of such an opportunity guarantees a loss of faith in the ultimate justice of our economic system.

When an American reaches the conclusion that our economic system is inequitable, he is making a philosophical as well as an economic judgment. He is criticizing ultimately basic principles rather than economic techniques. Such a criticism cannot be answered by references to the gross national product. It must be answered in the terms in which the criticism is framed. The member of a minority group who feels he has been left out of the American Dream says: "Show me." It is not enough to provide statistical data or inspirational rhetoric demonstrating the abstract fact of progress. He must be shown the worth of the American system in the only way that demonstrates that worth—by making sure that he has fair access to it. "A piece of the action" is not just a catch phrase; it is a shrewd and precise summing up of what is necessary to prove that our system works for all Americans.

The core of our national existence is the irrevocable and profound commitment to the individual. If an American is denied an equal opportunity to take his chances in the marketplace, he is, in effect, being denied not only as an "economic man" but in his totality as a human being.

The present administration has gone far in the work to expand the access of our minority groups to our economic system.

Since 1969, the Federal Government's procurement program for purchases from minority contractors has increased from \$12.7 to \$393.9 million. In the same period, from 1969 through 1972, the amount of SBA loans to minority entrepreneurs has increased from \$105 to \$258.2 million.

While I am gratified to see the progress being made in the creation and administration of programs intended to foster progress in this area, a great gap still remains unfilled. To date, virtually the entire emphasis on the financing of minority business has been through the extension of loans. These are made either directly by the Government or through private lending institutions, such as commercial banks and minority enterprise small business investment companies—organized pursuant to the Small Business Investment Act of 1958 and the Minority Enterprise Small Business Investment Act—which are provided special Government incentives in the form of loan guarantees.

These Federal programs recognize the fact that minority enterprises face certain inherent obstacles when seeking financing in the marketplace. The minority groups which these programs are designed to assist simply have too little in-built business experience and too limited a pool of managerial skills on which to draw.

Therefore the risk of failure in their

enterprises is necessarily higher on the average than is the case with others competing for available dollars. Thus either through direct preferences in the case of SBA loans, or through special incentives provided to commercial banks and to MESBIC's, Government policy has sought to equalize these risks.

The problem, however, is that these governmental efforts have concentrated on the device of facilitating debt financing while virtually ignoring the entire area of equality financing which is the more usual, desirable source of funds for high-risk ventures.

One result of this approach has been the large rate of defaults—more than 30 percent—which has been experienced on SBA-guaranteed bank loans which have been made pursuant to the legislation. Now there is nothing surprising or shameful in the fact that a significant percentage of new enterprises should fail, whether or not they are sponsored by members of minority groups. What is novel is that there should be so large a record of loss in loans extended by lending institutions, such as commercial banks, which usually have a very low bad debt experience because of the collateral and other safeguards they normally require. Therefore, an unusually large record of losses has the undesirable result of unfairly stigmatizing minority entrepreneurs.

What we must understand, in assessing the limitations of the present approach, is the consequence of placing too great a reliance on loans as a source of financing for minority entrepreneurs. Commercial banks and other such institutions are simply not in the business of assuming significant risks. They are accustomed to measuring collateral, demonstrated earning power and managerial experience as a precondition to the extension of credit. They are not in the business of weighing the dreams which are the stuff from which new ventures are built. Yet most of the minority enterprises in need of financing have little but future prospects to offer as security. Thus the granting of loans too often requires a willingness to risk beyond the boundaries normally permitted the ordinary commercial banker.

The unwillingness to risk is understandable considering that risk taking is prudent only when the risk/reward ratio is reasonable. Taking open-ended risks for a return of perhaps 10 percent—the approximate average interest rate charged on small business loans—is neither reasonable nor sensible. Recognizing this, the Government has tried to limit the lender's risk through mechanisms such as the SBA 90-percent loan guarantee. It was thought that this would do the trick by enhancing the risk/reward relationship. This device has helped, but not to the desired degree.

There is another problem in the attempt to route minority enterprise financing through conventional banking channels. It simply does not create the sort of relationship between the parties which is best designed to bring to the new venture the interested help of an experienced management. Yet it is the lack of managerial skills and of a broad

base of business experience which so often prove fatal to fledgling enterprises no matter how soundly based in concept. It is simply not the business of commercial banks to help supply these needs. Their prime interest is in the security of their loans; and to the extent that a commercial bank is protected against loss by a Government guarantee, to that extent is its concern for the basic economic health of the borrower diminished.

This fact may account in part for the high rate of default among the loans which they have extended to minority businesses, but there are other factors. Because of the moral suasion which has been applied to them, because of the genuine desire on the part of so many to lend a helping hand, and because the risk of loss has been made so low, lending institutions have too often been careless in the screening process which leads to making a loan; and once made, some have a tendency to write off the loan as a form of charity. In too many instances, this has had the effect of providing financing for ventures which are predestined to fail.

Finally, by channeling financing through the medium of loans, these Federal programs have the unfortunate effect of saddling new businesses with so heavy a burden of debt that it becomes even more difficult for them to succeed. The prior claim on working capital of excessive debt service obligations is a common cause for the failure of otherwise viable ventures.

These shortcomings in the current approach can be overcome by making equity financing more readily available to minority businessmen. Under current conditions, the higher degree of risk which is inherent in their ventures makes it infinitely more difficult for them to secure equity financing through normal business channels. The purpose of the bill which I am introducing today is to reduce that element of risk to a point where minority businessmen can be assured of an interested hearing, and of the needed capital in the event that their concepts are basically sound. My bill, which is cosponsored by 10 of my colleagues, would accomplish this goal by amending the Small Business Investment Act of 1958 so as to provide short-term guarantees limiting the size of potential losses while placing no limits on potential gains.

There are a number of institutions—investment banking firms and others—which are in the business of mobilizing venture capital for investment in the shares of new companies. Their relationship to the enterprises they finance is entirely different from that of the commercial banker. They are in the habit of dealing in futures. They are looking not for a return of capital plus interest, but for the chance to participate on the ground floor in new enterprises whose potential may be unlimited. In a very real sense, such an investor becomes a partner in the enterprise, and will bring to it not only a broad base of experience, but a high degree of commitment to its success.

Investment banking firms will usually be represented on the board of directors

of the companies which they help launch so as to safeguard their own investment and that of their clients. Through this relationship, investment firms develop a detailed knowledge of the special needs and problems of each of the companies in which they have made important financial commitments, and they are in a position to make specific recommendations as to a broad range of business needs. These firms have an intimate experience with the special problems faced by any new venture, and their advice can be of critical importance in assuring the maximum chance for success of a new minority business. Finally, they can provide inexperienced businessmen with expert advice on the best form of financing—straight equity, or debt, or a combination of both—for each stage in the organization and growth of a new enterprise. Such advice can help the founders preserve a maximum ownership in their business without incurring an extensive level of debt.

I believe it is important that any measure intended to encourage the establishment and growth of minority enterprises be designed to do no more than overcome the special handicaps to which I have already alluded. It will benefit no one if the element of risk is eliminated to such an extent that potential investors lower or abandon their standards in their assessment of the inherent merits of a business proposal. To encourage an abnormal rate of failure through careless screening procedures would retard the achievement of economic integration by destroying confidence and discouraging further investment.

What we must seek is an approach which will make certain that investment bankers and others engaged in the business of investing venture capital will welcome proposals from minority businessmen and assure that these will be examined on the basis of their inherent merits. Beyond adjusting the element of risk to reflect the special handicaps under which minority businessmen must too often operate, it is essential that the relationship between investor and entrepreneur be built on realistic, sound tested business principles. A business venture built on such a foundation will not only have the best chance for success, but the fact of success will have a tremendously important effect within the minority community itself. A man who succeeds not because he is a member of a minority who is a businessman, but because he is a good businessman who happens to belong to a minority, can do more for the pride and economic development of his community than a dozen Government programs that seek to shelter him from the realities of risk and reward that are at the heart of our economic system.

I have sought to accomplish this, in my bill, by granting qualified investors the right, sharply limited in time, to sell their investment to the SBA at 70 percent of cost. I believe that the risk of loss would thereby be sufficiently large to make certain that no investment is lightly made. By the same token, the investor's stake in the new enterprise is sufficiently large to make sure that any reasonable assistance will be extended to insure its success—especially as the in-

vestor will participate fully in that success. I would also hope that the provisions contained in the bill would encourage large manufacturers to assist in the organization and financing of minority subcontractors, thus forming a relationship which would have the greatest mutual benefits while benefiting the country at large by hastening the full participation by our minorities in our economic life.

Mr. President, as my bill is written, it will bring the SBA's authority to enter into equity guaranteed agreements within the overall limits on existing loans and guarantees which is established pursuant to section 7 of the Small Business Investment Act of 1958. I believe that in this manner the greatest flexibility is assured in enabling an investment firm or other qualified investor to tailor a financing package, including debt as well as equity, to the needs of the particular enterprise to be financed. By the same token, I believe that the overall ability of the SBA to incur contingent liabilities pursuant to section 4(c)(4) should be expanded so as to accommodate the higher risk equity investments which my bill is designed to encourage.

I have not, at this time, proposed an amendment to section 4(c)(4) to accomplish such an expansion because I believe that the extent to which the authorization should be expanded can be better determined after hearings have been held on my proposal. The opinions of firms experienced in equity financing, of the SBA and of others who may have had direct experience of the financing of minority businesses will be most useful in determining the optimum authorization with which to inaugurate the approach incorporated in my bill.

Mr. President, it seems to have become fashionable of late, at least in certain circles to make ritualistic attacks on our Nation's basic institutions. Among these is our system of free, competitive enterprise. I suggest that the best argument in favor of our system is the argument of opportunity.

I believe my bill will help reinforce that argument by encouraging access to our economic system. Mr. President, I send my bill to the desk and ask that it be appropriately referred. I also ask unanimous consent that it be printed in full at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1415

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 71 of the Small Business Act is amended by adding at the end thereof a new subsection as follows:

"(g)(1) Whenever the Administration determines that such action is necessary or desirable to assist small business concerns the participation of which in the free enterprise system is hampered because of social or economic considerations not generally applicable to other business enterprises to obtain the equity capital needed for viable and prudently managed business operations, it may guarantee equity investments in such concerns made by investment companies or other qualified investors. Any such guarantee shall be made pursuant to an agreement by the Administration to purchase equity secu-

titles evidencing the interest of an investor in such a concern in accordance with terms and conditions prescribed by the Administration subject to the following limitations and

"(A) No such agreement shall obligate the Administration to purchase securities covered by the guarantee after the expiration of two years following the date on which the agreement is entered into.

"(B) The small business concern issuing such securities is an eligible concern in accordance with standards and criteria prescribed by the Administration having regard to the purposes of this subsection.

"(C) The financing required by such concern cannot reasonably be obtained except with assistance provided under this subsection.

"(D) The Administration determines that the risks assumed pursuant to any such agreement are reasonable having regard to the purposes of this subsection.

"(2) A guarantee agreement entered into under this subsection by the Administration shall obligate the Administration to purchase securities covered by the agreement and held by an investor. An agreement may, having regard to whether the securities will be privately or publicly held, specify either one but not both of the following conditions giving rise to the obligation to purchase:

"(A) If at any time after the expiration of one year following the date on which a guarantee with respect to securities becomes effective the book value of such securities is less than 70 per centum of their book value at the time of purchase by an investor the Administration shall on demand of the investor purchase such securities from the investor at a price equal to 70 per centum of the price paid for the securities by the investor.

"(B) If at any time after the expiration of one year following the date on which a guarantee with respect to securities becomes effective the market price of such securities is less than 70 per centum of the price at which the securities were first offered for sale, the Administration shall on demand of the investor purchase such securities from the investor at a price equal to 70 per centum of the price paid for the securities by the investor.

"(3) The Administration shall fix a uniform fee which it deems reasonable and necessary for any guarantee issued under this subsection to be payable at such time and under such conditions as may be determined by the Administration. Such fee shall be subject to periodic review in order that the lowest fee that experience under the program shows to be justified will be placed into effect. The Administration shall also fix such uniform fees for the processing of applications for guarantees under this subsection as it determines are reasonable and necessary to pay administrative expenses incurred in connection therewith."

Sec. 2. Paragraphs (1), (2), and (4) of section 4(c) of the Small Business Act are amended by inserting "7(g)," after "7(e)."

By Mr. LONG:

S. 1416. A bill to amend the Social Security Act to add a new title XX thereto which will provide insurance against the cost of catastrophic illness. Referred to the Committee on Finance.

Mr. LONG. Mr. President, I am today introducing an amendment to the Social Security Act to establish a program of catastrophic health insurance coverage. This program would protect virtually all Americans against the devastating financial impact of catastrophic illness or accident.

Catastrophic illnesses and accidents strike at random, and the specter of such

a disabling or even fatal occurrence is a part of all our lives. However, in this age of medical and scientific progress, families live not only with the specter of disabling or fatal illness, but also with a haunting fear of the financial devastation accompanying these illnesses.

Astonishing medical progress has gone hand in hand with a skyrocketing increase in the costs of medical care—particularly the costs of the new and sophisticated techniques employed in the treatment of catastrophic illnesses or accidents. The costs of the complex medical care necessary for spinal cord injury, strokes, severe burns and cancer, to name only a few conditions, can be staggering and can easily go beyond the reach of the resources of nearly any family in America. Families can and do work for a lifetime, only to lose everything at the time they are struck by a catastrophic illness.

Every family in America needs and deserves protection against the costs of catastrophic illness and our Government's social insurance system should provide that protection. The overall cost of establishing a catastrophic health insurance program is not large, considering the fact that almost every working family and virtually all retirees in America would receive protection.

As Senators may recall that I sponsored a catastrophic health insurance program during the 91st Congress. That plan was approved overwhelmingly by the Committee on Finance in 1970 as an amendment to H.R. 17550; but was voluntarily withdrawn by me on the Senate floor in order to expedite passage of H.R. 17550, which was approved by the Senate in late December.

I reintroduced the same amendment in the 92d Congress as S. 1376. During Finance Committee consideration of H.R. 1, the social security and welfare bill last year, I contemplated offering my catastrophic amendment to the bill. However, as Senators may recall, the administration had made it very clear that any major increase in the cost of H.R. 1 would surely result in a Presidential veto. For that reason alone, I withheld my catastrophic illness amendment, although I did cosponsor with the Senator from Indiana (Mr. HARTKE) on the Senate floor an amendment to cover under medicare patients with chronic kidney disease who needed dialysis or transplantation. These patients with kidney disease not only needed financial assistance now, but many of them also were sure to die if such assistance were postponed another few years. This amendment, I am pleased to say, became law.

In the 93d Congress we should enact a bill providing protection for families against the financial effects of any catastrophic illness. Consequently, I am reintroducing a catastrophic health insurance plan, improved but very similar to the one which was passed overwhelmingly by the Finance Committee in 1970 and introduced in the 92d Congress as S. 1376.

Basically, my bill would provide protection to all those who are currently and fully insured under social security,

their spouses and dependents, and to all social security beneficiaries.

This very broad coverage includes about 95 percent of all persons in the United States, and the vast majority of those not covered are Federal employees and State and local employees. Federal employees are eligible for major medical catastrophic protection under the Federal Employees Health Benefit Act, and State and local employees could buy into the catastrophic program established under this bill.

The types of services covered under the catastrophic plan would be similar to those currently covered under parts A and B of medicare except that there would be no limitation on hospital days or home health visits. Present medicare part A coverage includes 90 days of hospital care, 100 days of post-hospital extended care, and 100 home health visits. Present part B coverage includes physician's services, laboratory and X-ray services, physical therapy services and other medical and health items and services. Unlike medicare which provides basic insurance coverage, people would be responsible for payment for the first 60 days of hospital care and the first \$2,000 in medical expenses in a year.

The heart of any catastrophic plan is there deductibles as this basically defines what will be considered a catastrophe, and distinguishes catastrophic coverage from basic health insurance. My proposal contains deductibles of \$2,000 per family for part B physicians' benefits and 60 days hospitalization deductible per individual for hospitalization benefits. In other words, benefits would be payable for a family's medical bills beyond \$2,000 and hospitalization would be covered from the 61st day of an individual's hospitalization. After the deductibles have been met, benefits will be payable as under medicare, which calls for a coinsurance payment of 20 percent on medical bills and \$17.50 per day for hospital coverage. These coinsurance payments would be limited to a maximum of \$1,000, at which point no further coinsurance would be charged.

Families would be expected to insure themselves through the use of present private health insurance arrangements against their basic health care costs, including the first 60 days of hospitalization and the first \$2,000 of medical bills. For those families without the resources to obtain this basic private health insurance coverage, I believe the Federal Government should play a role in assuring availability of such basic coverage, as we already do for many of the poor through medicaid, and I will be addressing that issue directly in a short time.

The catastrophic program would be administered along with medicare by the Social Security Administration, and it would incorporate all of medicare's quality, cost and utilization controls.

This avoids setting up a new bureaucracy, and relies instead upon a proven Federal agency which has progressively and visibly improved its performance in administering health insurance for 20 million aged citizens.

Mr. President, I ask unanimous consent that a more detailed explanation of

my proposal be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. LONG. Mr. President, while this bill is basically the same as that approved by the Finance Committee in 1970 and introduced in the 92d Congress as S. 1376, it contains several major improvements. First, the more than 20 million aged citizens now covered by medicare would also be covered under catastrophic health insurance. The major effect of this would be to give the aged added protection against the costs of long hospital stays and to treat them in the same fashion as all others covered under the bill. Along with this expanded hospital protection for the aged, the bill would maintain the present medicare 100-day limit on post-hospital skilled nursing facility services, since stays beyond that length do not, in the vast majority of cases, represent extended care as the term has been defined under medicare.

Another significant improvement incorporated in my bill this year would limit total coinsurance payments to a maximum of \$1,000 in a year since, in some cases of extremely high cost illnesses, the coinsurance payments themselves could represent a large financial burden. For example, a patient with \$20,000 in costs for covered services above the deductible amounts would, under the earlier bills, have been obligated to pay 20 percent of that amount, or \$4,000, and the program \$16,000. Under the present proposal, as I have noted, his liability would be limited to \$1,000 with the program paying \$19,000.

Mr. President, the amendment would become effective on January 1, 1975 and would cost an estimated \$3.6 billion in the first full year of implementation. It would be financed by a payroll tax of three-tenths of 1 percent each on employees and employers.

The cost estimate on my proposal in 1970 was \$3.2 billion a year. The net increase is due primarily to the inflation in medical care prices, which has occurred since that time. This increase highlights, to my mind, the need for Congress to act soon in this area of catastrophic illness as it means that the blameless victims of serious and costly illnesses are currently suffering greater financial losses than they were when Congress began considering my proposal in 1970. The additional costs of including the aged under this bill and the \$1,000 limit on a beneficiary's coinsurance liability are generally offset by reductions in the original cost estimate attributable to the coverage of the disabled and those with kidney disease under medicare as provided under H.R. 1.

Mr. President, I believe that of all the constructive legislation this 93d Congress might enact, none would be more appreciated by millions of Americans in all walks of life than providing them with catastrophic health insurance coverage which supplements basic private insurance or medicaid and erases the haunting fear of financial devastation brought about by catastrophic illness.

Mr. President, I send the Catastrophic Health Insurance Act to the desk and ask that it be appropriately referred.

The PRESIDING OFFICER. Without objection it is so ordered.

DESCRIPTION OF CATASTROPHIC HEALTH INSURANCE PLAN ELIGIBILITY

The amendment establishes a new Catastrophic Health Insurance Program (CHIP) as part of the Social Security Act financed by payroll contributions from employees, employers and the self-employed. Under the plan all persons who are fully or currently insured under the social security program; their spouses and dependents (and all Social Security beneficiaries) would be eligible for CHIP protection. All persons who are entitled to retirement, survivors, or disability benefits under Social Security, as well as their spouses and dependent children, would thereby be eligible for CHIP. This constitutes about 95 percent of the population.

The largest noncovered groups are Federal employees, employees covered by the Railroad Retirement Act, and State and local governmental employees who are eligible for Social Security but not covered due to the lack of an agreement with the State. (There are a small number of people who are still not covered by Social Security or other retirement programs; the majority of these are domestic or agricultural workers who have not met the necessary Social Security coverage requirements.)

Federal employees are, however, eligible for both basic and major medical catastrophic health insurance protection under the Federal Employees Health Benefits Act, with the Federal Government paying 40 percent of the costs of such coverage.

BUY-IN FOR STATE AND LOCAL EMPLOYEES

Under the amendment, State and local employees who are not covered by Social Security could receive coverage under CHIP if the State and local governments exercise an option to buy into the program to cover them on a group basis. When purchasing this protection, States would ordinarily be expected to include all employees and eligible annuitants under a single agreement with the Secretary. A determination by the State as to whether an individual is an annuitant or member of a retirement system or is otherwise eligible to have such coverage purchased on his behalf would, for purposes of the agreement to provide CHIP protection, be final and binding upon the Secretary. Each State which enters into an agreement with the Secretary of Health, Education and Welfare to purchase CHIP protection will be required to reimburse the Federal Catastrophic Health Insurance Trust Fund for the payments made from the fund for the services furnished to those persons covered under CHIP through the State's agreement with the Secretary, plus the administrative expenses incurred by the Department of Health, Education and Welfare in carrying out the agreement. Payments will be made from the fund to providers of services for covered services furnished to these persons on the same basis as for other persons entitled to benefits under CHIP. Conditions are also specified under which the Secretary of the State could, after due notice, terminate the agreement.

BENEFITS

The benefits that would be provided under CHIP would be the same as those currently provided under Parts A and B of Medicare, except that there would be no upper limitations on hospital days, or home health visits. Present Medicare coverage under Part A includes 90 days of hospital care and 100 days of post-hospital extended care in a benefit period, plus an additional life-time reserve of 60 hospital days; and 100 home health visits during the year following discharge from a

hospital or extended care facility. Part B coverage includes physicians' services, 100 home health visits annually, outpatient physical therapy services, laboratory and X-ray services and other medical and health items and services such as durable medical equipment.

The major benefits excluded from Medicare, and consequently excluded from this proposal, are nursing home care, prescription drugs, hearing aids, eyeglasses, false teeth and dental care. Medicare's limitations on extended care, on inpatient care in psychiatric hospitals, which limit payment to active treatment subject to a 190-day lifetime maximum, and the program's annual limitation on outpatient services in connection with mental, psychoneurotic and personality disorders are also retained. An additional exclusion would be for items or services which the Secretary of Health, Education and Welfare rules to be experimental in nature.

DEDUCTIBLES AND COINSURANCE

In keeping with the intent of this program to protect against health costs so severe that they usually have a catastrophic impact on a family's finances, a deductible of substantial size would be required. The proposal has two entirely separate deductibles which would parallel the inpatient hospital deductible under Part A and the \$50 deductible under Part B of Medicare.

The separate deductibles are intended to enhance the mesh of the program with private insurance coverage. In order to receive both hospital and medical benefits, both deductibles must be met. If a person were to meet the hospital deductible alone, he would become eligible only for the hospital and extended care benefits. Similarly, if a family were to meet the \$2,000 medical deductible, they would become eligible only for the medical benefits. There would be hospital and medical coinsurance requirements (as described below) but these would rise to a maximum of \$1,000.

HOSPITAL DEDUCTIBLE AND COINSURANCE

There would be a hospital deductible of 60 days hospitalization per year per individual.

After an individual has been hospitalized for a total of 60 days in one year, he would become eligible for payments toward hospital expenses associated with continued hospitalization. The program would thus begin payment with the 61st day of his hospitalization in that year. Only those post-hospital extended care services which he receives subsequent to having met the 60-day deductible would be eligible for payment.

After the hospital deductible has been met, the program would pay hospitals substantially as they are presently paid under Medicare, with the individual being responsible for a coinsurance amount equal to one-fourth of the Medicare inpatient hospital deductible applicable at that time. Extended care services which are eligible for payment would be subject to a daily coinsurance amount equal to one-eighth of the Medicare inpatient hospital deductible. In 1973, this coinsurance amounts to \$17.50 a day for inpatient hospital services and \$8.75 a day for extended care services. Thus, the coinsurance could rise yearly in proportion to any increase in hospital costs.

MEDICAL DEDUCTIBLE AND COINSURANCE

There would be a supplemental medical deductible initially established at \$2,000 per year per family. The Secretary of Health, Education and Welfare would, between July 1 and October 1 of each year (beginning in 1975) determine and announce the amount of the supplemental medical deductible for the following year.

The deductible would be the greater of \$2,000 or \$2,000 multiplied by the ratio of the physicians' services component of the Consumer Price Index for June of that year

to the level of that component for December, 1974. Thus, the deductible could rise yearly in proportion to any increase in the price of physicians' services.

After a family has incurred expenses of \$2,000 for physicians' bills, home health visits, physical therapy services, laboratory and X-ray services and other covered medical and health services, the family would become eligible for payment under the program toward these expenses. For purposes of determining the deductible, a family would be defined as a husband and wife and all dependents.

After the medical deductible had been met, the program would pay for 80 percent of eligible medical expenses, with the patient being responsible for coinsurance of 20 percent.

DEDUCTIBLE CARRYOVER

As in Part B of Medicare, the plan would have a deductible carryover feature—applicable to both the dollar deductible and the hospital-day deductible—under which expenses incurred (or hospital days used) but not reimbursed during the last calendar quarter of a year would also count toward the satisfaction of the deductibles for the ensuing year. For example, an individual admitted to a hospital with a cardiac condition on December 10, 1975, and continuously hospitalized through February 19, 1976, would not, in the absence of the carryover provision meet the hospital-day deductible unless he were to be hospitalized for at least another 10 days in 1976. With a carryover provision, however, the individual described above would meet the hospital deductible on January 30, 1976. Similarly, if a family's first eligible medical expenses in 1975 amount to \$1,200 and were incurred during the months of November and December, and an additional \$3,000 in eligible medical expenses are incurred in 1976, the family would, in the absence of a carryover provision, be eligible for payment towards only \$1,000 of their expenses in 1976. With a carryover provision, however, the family described above would be eligible for payment toward \$2,200 of their expenses in 1976.

ADMINISTRATION

Payments made to patients, providers, and practitioners under this program would be subject to the same reimbursement, quality, health and safety standards, and utilization controls as exist in the Medicare program. Reimbursement controls would include the payment of audited "reasonable costs" to participating institutions and agencies, and "reasonable charges" to practitioners and other suppliers. However, appropriate modifications will be made to take into account the special features of this program, including a modification to exclude "bad debts" from those costs eligible in computing reasonable cost payments to institutions.

The utilization of services would be subjected to review by present utilization review committees established in hospitals and extended care facilities and by the professional standards review organizations established under P.L. 92-603.

The proposal contemplates using the same administrative mechanisms used for the administration of Medicare, including, where appropriate, Medicare's carriers and intermediaries. Using the same administrative mechanisms as Medicare will greatly facilitate the operation of this program. The proposal also would encompass use of Medicare's statutory quality standards, in that the same conditions of participation which apply to institutions participating in Medicare would apply to those institutions participating in CHIP. These standards serve to upgrade the quality of medical care and their application under this program should have a similar salutary effect.

The Social Security Administration, utilizing its network of district offices, would determine the insured status of individuals

and relationships within families which are necessary to establish entitlement to CHIP benefits. The determination of whether the deductible expenses had been met would also be handled by the Social Security Administration in cooperation with carriers and intermediaries. The proposed administrative plan envisions establishing a \$2,000 minimum expense amount before individual bills would be accepted. This would protect the administrative agencies from being inundated with paperwork.

FINANCING

The amendment would finance the plan with the following contribution schedule: 1975-1977, 0.3 of one percent of taxable payroll on employees and 0.3 on employers; 1978-1981, 0.35; 1982 and after, 0.4. Rates for the self employed would also be 0.3, 0.35 and 0.4 respectively.

The contributions would be placed in a separate Federal Catastrophic Health Insurance Trust Fund from which benefits and administrative expenses related to this program would be paid. The complete separation of catastrophic health insurance financing and benefit payments is intended to assure that the catastrophic health insurance program will in no way impinge upon the financial soundness of the retirement, survivors, or disability insurance trust funds or Medicare's hospital and supplementary medical insurance trust funds. Such separation will also focus public and congressional attention closely on the cost and the adequacy of the financing of the program.

To provide an operating fund at the beginning of the program (in recognition of the lag in time between the date on which the taxes are payable and their collection), and to establish a contingency reserve, a Government appropriation would be available (on a repayable basis without interest) during the first 3 calendar years of the program. The amount which could be drawn in any such calendar year could not exceed the estimated amount of 6 months of benefit payments during that year.

RELATIONSHIP WITH MEDICAID

The catastrophic illness insurance program would be supplemental to the Medicaid program with regard to public assistance recipients and the medically indigent in the same way in which it will be supplemental to private insurance for other citizens. Thus, Medicaid will continue to be the program that is intended to cover the basic health needs of categorical assistance recipients and the medically indigent.

In addition, Medicaid will continue to play a substantial role in financing the cost of nursing home care, which represents a catastrophic cost to many people, especially the aged. The catastrophic health insurance program will, of course, lessen the burden on the Medicaid program to some degree, since those covered by Medicaid who are eligible would have a large proportion of their catastrophic expenses covered by this program, leaving only the deductible and coinsurance amounts for the Medicaid program to pay.

CONCLUSION

More than one million families of the approximately 49 million families in the United States annually incur medical expenses which will qualify them to receive benefits under the program. Of course, nearly all American families will receive the benefit of insurance protection against the costs of catastrophic illnesses. The program is not intended to meet the health costs which the population incurs for short-term hospitalization and acute illness. This program is intended to insure against those highly expensive illnesses or conditions which, although a potential threat to every family, actually strike only a relatively few. Individuals should, during their working years, be able to

obtain protection against the devastating and demoralizing effects of such costs.

These provisions and the taxes to pay for them would become effective January 1, 1975.

By Mr. HATFIELD (for himself, Mr. BEALL, Mr. BENNETT, Mr. BIBLE, Mr. BROCK, Mr. CLARK, Mr. CRANSTON, Mr. CURTIS, Mr. FANNIN, Mr. GOLDWATER, Mr. GRIFFIN, Mr. HANSEN, Mr. HOLLINGS, Mr. HUGHES, Mr. JAVITS, Mr. MANSFIELD, Mr. MCINTYRE, Mr. PACKWOOD, Mr. SCOTT of Pennsylvania, and Mr. TUNNEY):

S. 1418. A bill to recognize the 50 years of extraordinary and selfless public service of Herbert Hoover, including his many great humanitarian endeavors, his chairmanship of two Commissions of the Organization of the Executive Branch, and his service as 31st President of the United States, and in commemoration of the 100th anniversary of his birth on August 10, 1974, by providing grants to the Hoover Institution on War, Revolution, and Peace. Referred to the Committee on Labor and Public Welfare.

Mr. HATFIELD. Mr. President, I rise this morning to introduce a bill to commemorate the 50 years of extraordinary and selfless public service of Herbert Hoover, including his many great humanitarian endeavors, his chairmanship of two Commissions of the Organization of the Executive Branch, and his service as 31st President of the United States, and in commemoration of the 100th anniversary of his birth on August 10, 1974, by providing grants to the Hoover Institution on War, Revolution, and Peace.

Mr. President, I propose today that the Government may be authorized to contribute \$5 million as an appropriate memorial to President Hoover for the Hoover Institution on War, Revolution, and Peace that exists at Stanford University.

I have discussed this matter with the Hoover family. They feel that this would be a very appropriate memorial. We recognize that today the Hoover Institution on War, Revolution, and Peace is the largest such institution existing in the world for the study of war, revolution, and peace. I am very proud to have as cosponsors of my bill the senior Senator from Iowa (Mr. HUGHES), the junior Senator from Iowa (Mr. CLARK), the senior Senator from California (Mr. CRANSTON), the junior Senator from California (Mr. TUNNEY), the senior Senator from New York (Mr. JAVITS), the junior Senator from New York (Mr. BUCKLEY), the senior Senator from Montana (Mr. MANSFIELD), and the senior Senator from Pennsylvania (Mr. SCOTT), and other distinguished Senators.

Mr. President, at this time I send the bill to the desk for introduction.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

Mr. HATFIELD. Mr. President, on August 10, 1974, our country will mark the 100th anniversary of the birth of its 31st President, Herbert Clark Hoover. More than any other American leader of this century, President Hoover exemplifies for us a humanitarian commit-

ment to the needs of people not only in our Nation but throughout the world.

The religious convictions of President Hoover and a request from President Wilson caused him to relinquish a successful, worldwide business career to devote his tireless energies before, during, and after World War I to easing through European relief activities the suffering weighed upon millions of victims of that conflict.

President Hoover continued his efforts in the domestic sphere as Secretary of Commerce for Presidents Harding and Coolidge, and committed those convictions to the improvement of conditions in the fields of child labor and collective bargaining.

President Hoover began this modern success story as an orphaned boy in West Branch, Iowa, was raised by relatives in Newburg, Oreg., and worked his way through high school in Salem, Oreg., as well as through Stanford University in California.

Turned from office by worldwide economic conditions which no man could control, President Hoover offered us not bitterness but continued service to shape our Nation and the world into a better place in which to live.

Among those contributions he gave us were reform proposals written for President Truman increasing governmental efficiency and accountability, including the first all-encompassing general reorganization plan for national Government which continues to benefit us today. Through his efforts to make the organization of Government responsive to the people, President Hoover's name has become synonymous with modern management practices both in Government and in business.

Throughout his life President Hoover sought only a chance to serve his fellow man, and was granted a life and a career as a Presidential counselor and adviser for which all Americans can be thankful. He has truly earned a special niche in our history as a man of achievement and compassion, deserving the respect of his fellow men.

Mr. President, early in the 92d Congress, I introduced legislation, cosponsored by 53 Senators, establishing a commission to formulate plans for a permanent memorial to Herbert Hoover. However, as the anniversary of Mr. Hoover's birth drew nearer and Congress failed to act, it became apparent that insufficient time remained for a commission to be formulated and carry out its work. At that time I introduced the legislation which I am bringing to your attention again today.

This measure provides that a national memorial take the form of a special building at the Hoover Institution on War, Revolution, and Peace at Stanford University. The establishment of such a memorial, to directly further the impulses of humanitarianism and international justice that characterized his life, is a most fitting and appropriate national tribute to Herbert Clark Hoover.

HERBERT HOOVER MEMORIAL TO COMMEMORATE
THE 100TH ANNIVERSARY OF HIS BIRTH ON
AUGUST 10, 1874

The life and achievements of the 31st U.S. President have been told and retold

many times. Orphaned at age 9, he nevertheless became a great engineer, humanitarian, author, public servant, and world statesman. Herbert Hoover was also a warm and compassionate individual who championed the cause of peace both in Government and as a private citizen. His rare executive ability and talent for the ordering of institutional finance, his genius for organization and leadership found their outlets in these many and variegated pursuits.

HUMANITARIAN ACTIVITIES

Human suffering always stirred him to action. Herbert Hoover's compassion for the victims of civil strife had already led him to administer food relief during the Boxer Rebellion in China, where he arrived to work as a mining engineer from western Australia. His 50 years of public service did not begin, however, until the outbreak of World War I. August 1914 found Mr. Hoover organizing the American Relief Committee in London which financially helped 120,000 stranded U.S. citizens to return home from Europe. He subsequently coordinated the delivery of food supplies to that war-torn continent.

Of particular concern to Mr. Hoover was the plight of starving children. The Commission for Relief in Belgium was perhaps the best example of these activities. Organized by Mr. Hoover in response to urgent pleas by the Belgian people, it created a whole new pattern for humanitarian work. Its only real power was that of the spirit, of integrity, and of unselfish service.

President Woodrow Wilson called upon Mr. Hoover to become U.S. Food Administrator in April 1917. In this capacity, he established three boards and introduced pioneering methods for mobilizing food resources in time of war. When that conflict ended, Mr. Hoover returned to Europe with the American delegation to the Paris Peace Conference on which he served as alternate chairman of the Supreme Economic Council. Appointed Director-General of Relief and Reconstruction for Europe in 1918, he also headed the volunteer American Relief Administration which functioned in 33 countries and saved 17 millions of lives during the famine in Russia alone. Whenever war, famine, or flood brought disaster to multitudes of people, the first name that came to mind was that of Herbert Hoover.

At the request of President Harry S. Truman this relief activity was renewed in 1945 by Mr. Hoover, who coordinated the food supply for 800 million people and personally visited 37 countries. Again, starvation would have afflicted millions of people, especially in smaller democracies, had this program not been put into effect. During this period, Mr. Hoover also established Care, Inc., which still operates today and sends food packages from private American citizens to the needy overseas. He directed these humanitarian enterprises on a scale never before attempted, and he never accepted payment for his services.

GOVERNMENT CAREER

Apart from the special humanitarian missions enumerated above, Mr. Hoover

served as Secretary of Commerce, 1921 to 1928. He developed the U.S. Census Bureau statistical services to assist agriculture, business, and labor; began regulation of radio and aviation; introduced safety inspection by the Bureau of Mines; sponsored conferences on unemployment; and negotiated the seven-State compact for a Colorado River Commission as one of the measures for better utilization of water resources. In 1927, he directed relief for 1,500,000 people endangered by the Mississippi flood.

As 31st President of the United States, 1928 to 1932, Mr. Hoover urged the 1930 Conference on Limitation of Naval Armaments, which resulted in a treaty; initiated Federal Reserve Board restrictions on credit for speculation; reorganized the air-mail service; developed various conservation programs; and held White House conferences on child health as well as homebuilding and homeownership, which laid the ground for subsequent Federal policy. Mr. Hoover recommended extensive public work programs; organized Federal credit agencies—Reconstruction Finance Corporation and Home Loan Banks—expanded resources of the Federal Land Banks; organized relief to victims of the 1930 drought; and secured the Standstill Agreement that enabled European banks to function. While in the White House he never accepted any salary.

President Truman in 1947 again turned to Mr. Hoover who undertook a mission to Germany, which led to recommendations contributing to the economic recovery of that country. That same year, he was selected as Chairman of the bipartisan Commission on Reorganization of the Executive Branch of the Government. After the greatest 2-year inquiry ever undertaken into the workings of the U.S. Government, a substantial percentage of the Commission's recommendations for policy changes and reorganization were implemented. Mr. Hoover also chaired the second such Commission—1953 to 1955. The two Commissions published the results of their studies in 80 volumes. Congress three times adopted Joint Resolutions of Appreciation for Mr. Hoover's services, a unique distinction.

INTEREST IN SCHOLARSHIP

Less well known are Mr. Hoover's activities in support of universities. Residual funds from World War I relief operations went to various Belgian academic institutions, such as Brussels, Ghent, Liege, and Louvain, each of which received over \$3,800,000 from the Commission for Relief in Belgium.

The bill to establish the U.S. National Archives was introduced during Mr. Hoover's Presidency, and he later gave impetus to the concept of Presidential libraries. A trustee of various educational and scientific institutions, he authored 32 books and numerous articles.

Very close to his heart was a research center which he founded with personal funds in 1919 at his alma mater, Stanford University. It bears his name today as the Hoover Institution on War, Revolution, and Peace. Through its collections, research programs, and publications, it has become known as a

major national center for documentation and advanced research on the problems of political, social, and economic change in the 20th century.
