Congressional Record

PROCEEDINGS AND DEBATES OF THE 93^d CONGRESS, FIRST SESSION

SENATE—Monday, March 26, 1973

The Senate met at 12 o'clock meridian and was called to order by Hon. JAMES ABOUREZK, a Senator from the State of South Dakota.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Almighty God, who has given us this good land for our heritage, grant to the people clean hands and pure hearts worthy of a nation whose trust is in Thee. Spare us from careless manners, compromising conduct, impure thoughts, unbrotherly ways, and unloving attitudes. In the penitential days of Lent make us honest in repentance and eager to accept Thy forgiveness and renewing grace. Make us new that we may be the peacemakers who are called the children of God and the pure in heart who see God.

We pray in the name of Thy Son. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,

Washington, D.C., March 26, 1973.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. JAMES ABOUREZK, a Senator from the State of South Dakota, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. ABOUREZK thereupon took the chair as Acting President pro tempore.

REPORT OF A COMMITTEE SUBMITTED DURING AJOURNMENT

Under authority of the order of the Senate of March 22, 1973, Mr. KENNEDY, from the Committee on Labor and Public Welfare, reported favorably, with an amendment, on March 23, 1973, the bill (S. 1136) to extend the expiring authorities in the Public Health Service Act and the Community Mental Health Centers Act, and submitted a report (No. 93-87) thereon, which was printed.

CXIX—592—Part 8

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Thursday, March 22, 1973, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States, submitting nominations, were communicated to the Senate by Mr. Marks, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore (Mr. ABOUREZK) laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(The nominations received today are printed at the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Berry, one of its reading clerks, announced that the House had passed the following bill and joint resolutions, in which it requested the concurrence of the Senate:

H.R. 5445. An act to extend the Clean Air Act, as amended, for 1 year;

H.J. Res. 5. Joint resolution requesting the President to issue a proclamation designating the week of April 23, 1973, as "Nicolaus Copernicus Week" marking the quinquacentennial of his birth;

H.J. Res. 210. Joint resolution asking the President of the United States to declare the fourth Saturday of September 1973 "National Hunting and Fishing Day";

H.J. Res. 275. Joint resolution to authorize the President to issue a proclamation designating the month of May 1973 as "National Arthritis Month"; and

H.J. Res. 289. Joint resolution to authorize the President to proclaim the last Friday of April 1973 as "National Arbor Day."

HOUSE JOINT RESOLUTIONS REFERRED

The following joint resolutions were severally read twice by their titles and referred to the Committee on the Judiciary:

H.J. Res. 210. Joint resolution asking the President of the United States to declare the

fourth Saturday of September 1973, "National Hunting and Fishing Day";

H.J. Res. 275. Joint resolution to authorize the President to issue a proclamation designating the month of May 1973, as "National Arthritis Month"; and

H.J. Res. 289. Joint resolution to authorize the President to proclaim the last Friday of April 1973, as "National Arbor Day".

ENROLLED BILL SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (H.R. 3298) to restore the rural water and sewer grant program under the Consolidated Farm and Rural Development Act.

The enrolled bill was subsequently signed by the Acting President pro tempore (Mr. ABOUREZK).

WAIVER OF THE CALL OF THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the call of the legislative calendar, under rule VIII, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that all committees, except the Committee on Commerce, may be authorized to meet during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ATLANTIC UNION DELEGATION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 83, Senate Joint Resolution 21.

The ACTING PRESIDENT pro tempore. The joint resolution will be stated by title.

The assistant legislative clerk read as follows:

S.J. Res. 21, to create an Atlantic Union Delegation.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution (S.J. Res. 21) was considered, or-

9377

dered to be engrossed for a third reading, read the third time, and passed.

The preamble was agreed to.

The joint resolution, with its preamble, is as follows:

S.J. RES. 21

Whereas a more perfect union of the Atlantic community consistent with the Charter of the United Nations gives promise of strengthening common defense, while cutting its cost, providing a stable currency for world trade, facilitating commerce of all kinds, enhancing the welfare of the people of the member nations, and increasing their capacity to aid the people of developing nations: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That—

(1) The Congress hereby creates an Atlantic Union delegation, composed of eighteen eminent citizens, and authorized to organize and participate in a convention made up of similar delegations from such North Atlantic Treaty parliamentary democracies as desire to join in the enterprise, and other parliamentary democracies the convention may invite, to explore the possibility of agreement on:

(a) a declaration that the goal of their peoples is to transform their present relation into a more effective unity based on Federal principles;

(b) a timetable for the transition by stages to this goal; and

(c) a commission to facilitate advancement toward such stages.

(2) The convention's recommendations shall be submitted to the Congress.

(3) Not more than half of the delegation's members shall be from one political party.

(4) (a) Six of the delegates shall be appointed by the Speaker of the House of Representatives, after consultation with the House Committee on Foreign Affairs and the leadership, six by the President of the Senate, after consultation with the Senate Committee on Foreign Relations and the leadership, and six by the President of the United States.

(b) Vacancies shall not affect its powers and shall be filled in the same manner as the original selection.

(c) The delegation shall elect a Chairman and Vice Chairman from among its members.

(d) All members of the delegation shall be free from official instructions, and free to speak and vote individually in the convention.

(5) To promote the purposes set forth in section (1), the delegation is hereby authorized—

(a) to seek to arrange an international convention and such other meetings and conferences as it may deem necessary;

(b) to employ and fix the compensation of such temporary professional and clerical staff as it deems necessary: *Provided*, That the number shall not exceed ten: *And provided further*, That compensation shall not exceed the maximum rates authorized for committees of the Congress; and

(c) to pay not in excess of \$100,000 toward such expenses as may be involved as a consequence of holding any meetings or conferences authorized by subparagraph (a) above.

(6) Members of the delegation, who shall serve without compensation, shall be reimbursed for, or shall be furnished, travel, subsistence, and other necessary expenses incurred by them in the performance of their duties under this joint resolution, upon vouchers approved by the Chairman of said delegation.

(7) Not to exceed \$200,000 is hereby authorized to be appropriated to the Depart-

ment of State to carry out the purposes of this resolution, payments to be made upon vouchers approved by the Chairman of the delegation subject to the laws, rules, and regulations applicable to the obligation and expenditure of appropriated funds. The delegation shall make semiannual reports to Congress accounting for all expenditures and such other information as it deems appropriate.

(8) The delegation shall cease to exist at the expiration of the three-year period beginning on the date of the approval of this resolution.

VISIT TO THE SENATE BY A DELEGATION OF PARLIAMENTARIANS FROM THE UNITED MEXICAN STATES

Mr. MANSFIELD. Mr. President, as the Senate is aware—as Congress is aware—since 1961, the Parliamentarians from the Congress of the United Mexican States and the Congress of the United States have been meeting on a yearly basis. In May of this year, we will meet for the 13th Mexican-United States Interparliamentary Conference at Guajuato, Mexico.

We have with us in the Chamber today a number of distinguished Mexicans whom I should like to introduce at this time.

We have, first of all, the distinguished Ambassador from the United Mexican States, Jose Juan de Olloqui.

We have the distinguished Minister from the United Mexican States, Minister Julian Saenz.

We have the two cochairmen of the Mexican Parliamentary Delegation in the persons of Senator Victor Manzanilla, and the President of the Mexican Delegation, Diputado Marcos Manuel Suarez.

They are accompanied by Licenciado Daniel Magana, the Official Mayor of the Camara de Diputados.

They are all in the Chamber now and we are delighted to meet with them. We are happy that they saw fit to come to Washington to discuss with Representative JAMES C. WRIGHT, JR., of Texas, and me the forthcoming Conference; to discuss the details which can be covered and to indicate further that there are vital interests between our two great Republics and that these interests, while they coincide in many instances, in others they are different and cause some difficulties.

It is because of these mutual interests and concerns that we have met from time to time to try to understand one another better, to thrash out our differences, and to try to find solutions to those things which come between us.

I am happy to say that the Mexico-United States Interparliamentary Group down through the years has played a very important part, in my opinion, not as much through legislation, because we are not empowered to legislate on the basis of these meetings, but through a recognition of the problems. Of course, the outstanding settlement was the settlement of Chamizal.

Mr. SCOTT of Pennsylvania. Mr. President, to our colleagues, the distinguished Members of the Congress of

Mexico, and to our friend the Ambassador from Mexico, my warm welcome.

Mr. DOMENICI addressed the delegation in Spanish and later supplied the following English translation of his remarks:

My name is PETE DOMENICI. I am a U.S. Senator from the State of New Mexico. In behalf of the sovereign State of New Mexico, its neighbors and in behalf of the U.S. Senate, I welcome you here. I do not speak Spanish fluently but I understand, and I hope you will consider my office as your headquarters for there are those from New Mexico in my office who speak your language and understand you well. Thank you for joining us and thanks for the friendly relationship that exists between your great country and ours.

Mr. MANSFIELD. Mr. President, I appreciate the remarks of my colleague, and I ask that Ambassador Olloqui, Minister Saenz, Deputy Suarez, Senator Manzanilla, and Licenciado Magana rise, so that we can pay our respects. [Applause, Senators rising.]

APPOINTMENT BY THE VICE PRESIDENT

The ACTING PRESIDENT pro tempore. The Chair, on behalf of the Vice President, and pursuant to Public Law 91-510, appoints the Senator from North Carolina (Mr. HELMS) to the Joint Committee on Congressional Operations in lieu of the Senator from Connecticut (Mr. WEICKER), who has resigned.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from North Carolina (Mr. HELMS) is recognized for not to exceed 15 minutes.

THE RESTORATION OF FISCAL SANITY IN FEDERAL SPENDING

Mr. HELMS. Mr. President, I have been made privy to some remarks to be made later today by the distinguished Senator from Michigan (Mr. GRIFFIN). In advance of his making those remarks, I commend him for a fine statement in support of efforts to restore fiscal sanity in Federal spending. Indeed, the Senator is correct in warning Senators that the American people will render a harsh verdict on those who, in the days and weeks ahead, continue to cast votes which unquestionably churn up a new spiral of inflation.

For Senators who may be unaware of it, I would like to call attention to a poll conducted last month by Lou Harris. By a margin of 59 to 28 percent, the people agree that "President Nixon is right in saying that inflation cannot be controlled unless Federal spending is cut to the bone." An earlier Harris poll found that 74 percent of the people believe Federal spending is the greatest single cause of inflation.

Obviously, Mr. President, the people know where the responsibility lies. They know that it is up to this Congress to hold the line on spending. The Harris

poll, in February, indicated that the public thinks, 51 to 37 percent, "Congress is wrong in opposing the President's spending program and should cooperate more with him." Senators should be mindful, in casting their votes this spring, that this same poll found the public giving Congress negative marks for its performance by a margin of 45 to 38 percent, while giving President Nixon positive marks for his first 4 years in office by 59 to 37 percent.

Mr. President, the American people are sick and tired of extravagant, wasteful Federal spending. They are sick and tired of seeing their tax dollars being squandered by the legions of Federal bureaucrats who administer those ineffective and other worldly programs which have been so heedlessly enacted over the years. And the people are sick and tired of their representatives in Congress who cling to the old bureaucracy-building philosophy of spend, spend, spend.

I said that the American people are going to render a harsh verdict on these Members. And I believe it follows, as the Senator from Michigan has often indicated, that the penalty they impose may very well be banishment from the Halls of Congress.

Mr. HANSEN. Mr. President, will the Senator yield?

Mr. HELMS. I am delighted to yield to the distinguished Senator from Wyoming.

Mr. HANSEN. Mr. President, in the current debate over the President's budget proposals, we continue to hear that military goals are being favored over human needs, despite the fact that this is patently untrue. Let us look at the record over the past decade.

The 1964 budget allotted \$53.5 billion, or 45 percent, to defense purposes, with \$34.5 billion, or 29 percent, to human needs. This administration's 1974 budget reverses that ratio. It would apportion approximately \$81 billion, or 30 percent, to defense, with \$125.5 billion, or 46.7 percent, to human needs. Furthermore, whereas the 1964 budget devoted 8.8 percent of our gross national product to defense and only 5.6 percent to human needs, in the 1974 budget 6.2 percent of the GNP is designated for defense and more than 9 percent for human needs.

These are the hard figures, and they correctly reflect the fact that military programs are not being favored over domestic social programs—that, actually, if there is favoritism in this budget, it is for domestic social programs at the expense of defense spending. And what of this defense budget? I believe that it pares defense spending down to the bare minimum. The fat has been cut away, and only the muscle is left. As the distinguished and knowledgeable junior Senator from Washington has often reminded us, we must retain our perspective in viewing the Nation's military needs. In our disillusionment over the war in Vietnam, in our general desire for relief from the tensions of the cold war, we must remain alert to the importance of national defense. We must recognize that the new era of diplo-

matic achievement which was opened to us last year has depended and will continue to depend upon negotiation from a position of strength.

Mr. President, I believe that this debate over the budget could be conducted in a more constructive vein if the true relationship between defense spending and spending for human needs were recognized and acknowledged. I urge that we abandon inflammatory rhetoric, which is belied in the budget itself, and devote ourselves to a positive consideration of the Nation's total needs—which certainly include the need for fiscal responsibility and restraint and the necessity of preserving an adequate defense capability.

Mr. President, I wish to compliment the distinguished junior Senator from North Carolina for calling attention to the fact that later in the day the distinguished minority leader will speak with respect to the budget considerations.

I hope that all Americans, as they consider the great urgency of cutting down on spending so as more nearly to approach a balanced budget, will not overlook the fact that the President has very wisely reordered the priorities in order to reflect the fact that the hostilities in Southeast Asia have essentially come to an end and has properly focused attention on spending dollars on the needs of highest national priority.

I commend my distinguished colleague from North Carolina for his leadership, and I thank him for giving me an opportunity to say a word.

Mr. HELMS. I thank the generous Senator for his comment.

I should like to pose a question to the Senator. In his contacts with the people of his State, has his experience been somewhat the same as mine, the very gratifying experience of discovering that the people—in my case, the people of North Carolina—are fully aware that what is needed in this country is a return to fiscal sanity by their Federal Government?

Mr. HANSEN. Mr. President, I suspect that the sentiment in my State, the Equality State, is very similar to that of the sentiment in the State of the Senator from North Carolina. I am certain that the people in Wyoming, as nearly as I can interpret their feeling from reading the newspapers and answering letters addressed to my office, have a very clear understanding of what causes inflation and what makes prices push upward. They are realists, as I know the people in North Carolina are realists. They want to see that we get a handle on spending, that we approach fiscal sanity, and that they thereby will be the recipients of all the myriad advantages that admittedly will come from a more even financial course, so as to insure the kind of balance that must undergird the progress that is in store for us if we can get this budget more nearly back in balance.

Mr. HELMS. Mr. President, I was in my home State of North Carolina this past Saturday evening, in the far eastern part, which, as the distinguished Senator is aware, has an agricultural econ-

omy. Most of the people at this meeting—they numbered some 400—are farmers or are engaged in farm-related occupations.

After the meeting was over, I spent an hour or more hearing them tell me that they understand what the President and some Members of Congress are trying to do in reducing the Federal budget. They do not like the idea of giving up any of their farm programs, but their attitude almost unanimously was, "If you are going to cut across-the-board it is all right to cut me, too, but do not single out farmers."

My pledge to the farmers of my State is that insofar as the junior Senator from North Carolina is concerned the farmers are not going to be singled out. I am convinced from frequent meetings with the Secretary of Agriculture that this is not going to happen, this is not the intent of the administration and, furthermore, if the Senate and the House would simply sit down with the administration and seek a common ground on the farm program and on other programs, then the best interests of all Americans will be served.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from New Mexico (Mr. DOMENICI) is recognized for not to exceed 15 minutes.

THE CONFRONTATION BETWEEN THE PRESIDENT AND CONGRESS

Mr. DOMENICI. Mr. President, I wish to join with my distinguished freshman colleague, the Senator from North Carolina, and our distinguished minority whip, the Senator from Michigan, to talk for a few moments to my fellow Senators about the confrontation which I think is taking place today between the President of the United States and Congress.

I would start by saying that a few short weeks ago I did not think I would come to this historic hall and so quickly stand in criticism of those who serve with me. But in a spirit of offering my views to my fellow Senators, let me start by saying that I do not think we need to confront the President, but rather that we had better confront the issue. It seems to me that we are giving a great deal of lip service to the problem of exercising fiscal responsibility, but what we are really saying is, "We do not think you ought to take our power away, Mr. President; we think the power to determine priorities and the power of the purse strings is ours." That is the confrontation that we bring to the administration today.

The American people do not want to be part of that confrontation because they do not care who has the power, but, indeed, they do care about results toward solving the problem of inflation which is robbing their pocketbooks and rendering productivity, which makes the American dream come true, almost a sham.

I would call it the futility of inflation. They are saying to us loud and clear, "We are not interested in your struggle

for power; we are interested in performance. If you have the power, Congress, take it and use it."

The American people say to us, "A few short months ago in December you said, congressional leaders, that we should not spend more than \$250 billion this year. You said it in the Senate and the Members of Congress said it in the House," say the American people. "Although you have agreed that that is what you should spend, you proceed to appropriate \$265 billion, and then you cannot agree, you and those in the House, on how to cut it by \$15 billion. So the President proceeds to cut, to impound, and to change some programs that you Senators and Representatives passed and you do not like it."

Yes, I join with those who say we do not like it because it is our responsibility to determine how funds should be spent; our President should not have to impound to get us down to the \$250 billion mark that we ourselves said should be our spending ceiling.

On the other hand, let me repeat, the American people want us to confront the issue; they do not want us to confront the President. They are not interested in the power struggle of constitutional dimensions between this Congress and our President over the power to impound and the power of the purse strings. But the American people are interested in stopping the cycle of inflation.

There are Americans taking second jobs, sending their wives to work, and yet at the end of the year they add up their new earnings and they are no further ahead, but perhaps further in debt than when the year began; they are not any more able to pay for the things they need for their children and their families and their homes than if they had not taken second jobs and worked overtime. They are saying loud and clear to us that this is our problem and they are saying to us that they do not want excuses, they want performance.

I ask my fellow Senators, those who campaigned in their own behalf and those who campaigned for others, if any of them campaigned for more inflation or higher taxes. I am certain none of them did. The facts of the matter are that their conduct here in the Senate would indicate that they do not think they can stop inflation and they think it will be enough to have a confrontation with the President rather than a confrontation with the issue.

The American people are aware that we are conducting business as usual. They are aware it was this business as usual that put us in the position we are in today, and they did not expect that this new Congress, with many new faces, and with many old faces who recognized the same problems, would conduct business as usual. They expected us to reform our budgetary practices and to do it quickly. They will not accept a confrontation with the President as a solution to a head-on collision with the issues of inflation, with the issue of ever-growing Federal programs that have high motives and which do little for the people that they are intended to help. I think we all know that the spirit of productivity is necessary for America to retain its eco-

nomie vitality, and this spirit of productivity will remain alive only so long as it is real.

When it becomes a hoax, Americans will stop producing, they will stop working; they will look to others to care for them.

I submit that when we hear the Japanese and the Europeans talk of our economy as if they are also wondering whether it is real or whether it is a paper tiger, their observations of concern about our economy are accurate, and I think our observations of our economy and the productive quality of collective America are real.

I think it is going to take courage on the part of myself and my fellow Senators to confront the issue of inflation as it is affected by excessive Federal spending, and I think we are going to have to have exceptional courage if we are going to cut programs and if we are going to do a better job with our Federal programs; and it is not going to suffice to attack the Executive, who, because we are in default, has sought one way.

Unless we find a way, the American public will not look with favor upon us, and, more importantly, American history will not look well upon us, for we will be serious contributors to an American economy that was once vital and robust, but which is now very, very delicate.

My closing comments have to do with the period that we are going through, which I think is a period of transition—the transition from an old way of doing business to a new way of doing business. I think the impoundments and the cutting of programs and the new budgetary approach put new strains on all of us, because we are going through the process of finding a better way. I submit it is our responsibility to substitute accommodation for confrontation, and I submit that if we are willing to accommodate, the Chief Executive of this country will respond. But I believe that there are those among us who think this is a partisan issue, and confrontation brings clamor and commotion; but I truly believe that the American people expect accommodation. They expect some change on our part, some give and take.

I submit, fellow Senators, that if we give the administration that opportunity, we will pass through this transition into a new era of fiscal responsibility, and indeed Americans of today and the years to come will be the benefactors.

If we use this period of transition as a coverup of the need for change, the need for consolidation of American poverty programs and domestic programs, and if we use it as an excuse for reform because indeed we will be satisfying ourselves with a lot of noise and clamor, then I submit the American economy will suffer, perhaps irreparably, and the spirit of the American people to work and to try to take care of themselves will get paler, and that burden will lie heavily on our collective shoulders.

Courage should be our motto, and reform our goal. Most certainly, confrontation is easier, but in this instance I believe its rewards are minimal and selfish, and certainly not in the best interests of all Americans.

Thank you, Mr. President.

Mr. GRIFFIN. Mr. President, I wish to commend and congratulate the distinguished Senator from North Carolina (Mr. HELMS) and the distinguished Senator from New Mexico (Mr. DOMENICI) who have made very eloquent statements today.

While the two Senators who preceded me are freshmen, they are also fresh from the political hustings, having been recently elected in their States. It is obvious, I suggest, that they are very wise in terms of knowing what the people think, and how the people perceive the great debate now going on in the Halls of Congress.

ORDER OF BUSINESS

The ACTING PRESIDENT *pro tempore*. Under the previous order, the Senator from Michigan (Mr. GRIFFIN) is recognized for not to exceed 15 minutes.

THE DEBATE OVER FEDERAL SPENDING

Mr. GRIFFIN. Mr. President, the current debate over Federal spending is truly a historic debate. It is historic, not because of a constitutional crisis, as many assert, but because the outcome is so important to the strength and future of the United States as leader of the free world.

During his first term, President Nixon took some historic initiatives in the area of foreign policy, initiatives which have revitalized American foreign policy and made it realistic and viable in the 1970's. Now, at the outset of his second term, the President has proposed some sweeping reforms here at home. He seeks to reorganize the executive branch to make Government more responsive—responsive to the people and to the demands of the future.

He seeks to phase out some tired, wasteful, and ineffective programs of the 1960's—and to replace those programs with a streamlined revenue sharing approach that shifts power to levels of government where the problems and the people are.

Most important, the President seeks to hold down Federal spending, so as to bring it more nearly in line with Federal revenues.

As he did in the international field, President Nixon is providing bold, imaginative initiatives on the domestic front. And Congress is challenged as never before—not for power—but to demonstrate an equal measure of responsibility.

Make no mistake about it, the American tax payers are watching closely to see what the response of Congress will be.

More and more, there is understanding among the people throughout the country that votes in Congress for the same old programs are really votes for more inflation or higher taxes, or both.

Ironically, observers overseas sometimes can be more objective and dispassionate in assessing action and inaction of the United States than we can do our-

selves. Recently the London Economist noted that Congress:

Has no mechanism for setting an overall budget target, its total expenditures simply being an aggregate of the cost of programs approved on a piecemeal basis. No effort is being made to relate expenditure to revenue . . . and no consideration is being given to the question of spending priorities.

Foreign observers have good reason to watch what the Congress does. They know that a new round of inflation in the United States will have far-reaching international implications. More inflation, generated by deficit spending, would further undermine confidence in the dollar. It would make our products less and less competitive in world markets, and it could precipitate still another international monetary crisis.

We can no longer afford to have American export prices rising faster than those of our competitors in the world market. The crunch has come, and now it is up to Congress, the elected representatives of the people, to impose some self-discipline upon and within the United States. We can no longer afford the philosophy of spend and elect, without regard for the economic health of the Nation.

If the spend and elect philosophy was good politics in the past, I suggest to political pragmatists that a new day is here. The American taxpayers who are watching Congress know that massive new Federal spending will mean more inflation or higher taxes. And they do not want either one.

Like those who spoke before me, I am convinced that a new day is at hand. And those in Congress who fail to recognize it will not only fail their country in its hour of need, but they may soon become part of the political past themselves.

Mr. DOMENICI. Mr. President, will the Senator yield?

Mr. GRIFFIN. Mr. President, I yield to the Senator from New Mexico.

Mr. DOMENICI. Mr. President, it seems to me that there is a real risk involved in the confrontation in which we now find ourselves. It seems that without the confrontation we go back to the middle of last year when there was a great feeling in the Congress about reforming Federal domestic programs, consolidating them and making them current, whether they be called revenue sharing or block grant programs. There was a sort of spirit of reform.

It seems to me that this confrontation could very well cover up that issue and we could go into next year kind of forgetful of reform, thinking the whole issue was the battle of the budget and impounding that we have just gone through.

Does the Senator have any feeling about that matter in light of my feelings?

Mr. GRIFFIN. Mr. President, I certainly agree with the analysis of the distinguished Senator. He perceives very well the difference between the views of the people and the views of some within the Congress who are focusing intently on the struggle for constitutional power as between the executive and legislative branches.

The people, as the Senator from New Mexico has so eloquently pointed out, are more concerned about the result—the outcome—in terms of the Nation and its good.

Those who get lost in the academic arguments about constitutional powers fail to see that the time for reform is ripe, that the people are demanding a reordering of priorities, and that the President has his finger on the pulse of the Nation.

This is not a matter of partisan politics. For the most part, the people do not care about party blame or credit. They are concerned about results and what will happen to the country.

In this particular situation, I believe the President deserves more support than he is getting from the Congress, because he is right in what he seeks to do for the country.

Mr. DOMENICI. Mr. President, would the Senator yield for one further comment?

Mr. GRIFFIN. I yield.

Mr. DOMENICI. Mr. President, I wholeheartedly agree with the Senator from Michigan.

For about a month between my election and my arrival in Washington, I traveled over my State because I wanted to discuss the Federal programs that pertained to the schools. I had the school people meet with me on the problems as they pertained to the cities. I also met with the mayors and councils in each community.

I can say to the Senator that every single elected and appointive leader said that he does not want so many strings attached to the Federal programs. One school man said that he kept 12 different sets of books because they are each audited differently.

My concern is that I have come here committed to trying to do a better job of putting the money where the problems are, in the communities that have to administer them, rather than here. However, I wonder, in the process of fighting this battle of impoundment, if there are not those who will forget that there is a great need for reform and for improvement. Even if we admit that some of the impoundments are wrong and even if we admit that some of the effects of the executive approach are not what we want, we certainly do not think that winning that battle will solve the problems.

I think we could win the battle of impoundment and get the programs that have been curtailed reinstated and the contracts with the HEW overturned, perhaps because they were not then in accordance with the Constitution. However, even if that were to happen, I do not think we would have done a better job with the domestic programs, those on which we are trying so hard.

Mr. GRIFFIN. Mr. President, the Senator makes an excellent point.

Mr. HELMS. Mr. President, will the Senator yield?

Mr. GRIFFIN. Mr. President, I yield to the distinguished Senator from North Carolina.

Mr. HELMS. Mr. President, I commend the distinguished minority whip,

the Senator from Michigan (Mr. GRIFFIN) for his budgetary analyses.

I want to comment on one point made here. There is certainly no partisanship about any of the comments that I have made or may make about the Federal budget. As a matter of fact, I am the first Republican to be elected from the State of North Carolina in the 20th century.

It is evident to me that I received more than twice as many votes as there are registered Republicans in my State. I have to tip my hat to the Democrats from North Carolina who, like all the rest, are concerned about the rising tide of inflation.

I have noticed here that every day the word "impound" is referred to. I received a letter from an old high school English teacher of mine who suggests that we look up the meaning of the word "impound" and ask ourselves whether it is possible for the President of the United States to impound something that does not exist.

What my old high school teacher is pointing out is that the Congress is striving to create a credit card government. I think she is quite accurate when she says that perhaps the word we should use is "save" rather than "impound."

Furthermore, I would say that if we look at the enormous Federal debt already run up that represents money borrowed and spent by Congress and by various administrations, the interest on the money already borrowed and spent is \$40,000 a minute, which comes to over \$666 a second.

I think that that in itself is cause for alarm.

Mr. GRIFFIN. Mr. President, I thank the Senator from North Carolina and the Senator from New Mexico for the excellent contributions they have made to this colloquy.

Mr. President, I yield back the remainder of my time and suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. Would the Senator withhold his request?

Mr. GRIFFIN. Mr. President, I withhold my request.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. At this time the Senator from Virginia (Mr. HARRY F. BYRD, JR.) is recognized for not to exceed 15 minutes.

DEDICATION OF THE LAUREL RIDGE CONSERVATION EDUCATION CENTER

Mr. HARRY F. BYRD, JR. Mr. President, on March 16 the National Wildlife Federation dedicated its Laurel Ridge Conservation Education Center in Fairfax County, Va. Fairfax County, incidentally, is the largest political subdivision in Virginia. It has a population of some 450,000 persons.

Mr. President, it was a high privilege for me to attend and an honor to welcome those assembled, including the gracious First Lady, Mrs. Richard Nixon, to the Commonwealth of Virginia.

The dramatic growth of the National Wildlife Federation over the last decade dictated the need for expansion to Laurel Ridge. In 1961, President John F. Kennedy dedicated the Federation's main building at 1412 16th Street NW., Washington, D.C. At that time it appeared that the space there would prove adequate for years to come. This was clearly not the case.

I was impressed by what I observed at Laurel Ridge. The center is encompassed by 20 acres of gentle rolling, wooded land. The structure is designed to blend in with its natural surroundings. The facilities will greatly enhance the educational programs of this national conservation organization, the largest private federation of its type in the world.

I was even more impressed by the vision of the National Wildlife Federation. This building project, conceived almost a decade ago, was financed entirely by private funds. Through memberships and private donations, the \$2.25 million necessary to finish the project was raised.

I think this type of private effort is commendable.

And I am proud that the National Wildlife Federation chose Virginia as a home for this conservation education center. Although the plan is still in the design stage, 17 of the 20 acres will eventually have nature trails and educational facilities which will serve as a national prototype of conservation education.

As a fitting tribute to the work of the Federation, Mrs. Nixon read the proclamation signed by the President on March 16, 1973, designating March 18 through 24, 1973, as "National Wildlife Week."

I know I join my fellow Virginians and the Nation in saluting the President, the First Lady and the National Wildlife Federation during the week of national recognition for the bounties of our national wildlife.

Mr. President, I ask unanimous consent that the program from the dedication ceremonies be printed in the RECORD in its entirety, showing the creed of the National Wildlife Federation, its distinguished directors and officers and the history of the organization. I ask unanimous consent also that the President's Proclamation No. 4200 be printed in the RECORD.

There being no objection, the program and proclamation were ordered to be printed in the RECORD, as follows:

BUILDING DEDICATION—NATIONAL WILDLIFE FEDERATION

(Kennedy dedicated 1961)

LAUREL RIDGE CONSERVATION EDUCATION CENTER
The National Wildlife Federation Creed . . .

I pledge myself, as a responsible human, to assume my share of man's stewardship of our natural resources.

I will use my share with gratitude, without greed or waste.

I will respect the rights of others and abide by the law.

I will support the sound management of the resources we use, the restoration of the resources we have despoiled, and the safekeeping of significant resources for posterity.

I will never forget that life and beauty, wealth and progress, depend on how wisely man uses these gifts . . . the soil, the water, the air, the minerals, the plant life, and the wildlife.

The Officers, Directors and Trustees of National Wildlife Federation and National Wildlife Federation Endowment, Inc., welcomes you to the dedication of the Laurel Ridge Conservation Education Center.

Federation President—N. A. Winter, Jr.; Endowment President—Judge Louis D. McGregor.

Vice Presidents: Walter L. Mims; Homer C. Luick; G. Ray Arnett.

Federation Directors

Region 1, Lester B. Smith—At-Large.

Region 2, Edmund H. Harvey—Dr. James H. Shaeffer.

Region 3, F. Bartow Culp—Judge Louis D. McGregor.

Region 4, Charles D. Kelley—Stewart L. Udall.

Region 5, Frederick R. Scroggin—M. A. Wright.

Region 6, O. Dwight Gallimore—Dr. Donald J. Zinn.

Region 7, Paul H. Wendler—Dr. Claude Moore.

Region 8, Walter S. McIlhenny—Courtney Burton.

Region 9, Everett R. Brue—Joseph D. Hughes.

Region 10, Fred A. Gross, Jr.—Robert Stack.

Region 11, A. W. "Bud" Boddy—Maynard P. Venema.

Region 12, C. Clifton Young—Turner W. Battle.

Region 13, Ernest E. Day—Trustee Dr. Greer Ricketson.

Federation Executive Vice President—Thomas L. Kimball.

Federation Treasurer—John Bain.

Endowment Executive Secretary—J. A. Brownridge.

Program

Dedication of National Wildlife Federation's Laurel Ridge Conservation Education Center, 8925 Leesburg Pike, Vienna, Virginia, March 16, 1973, 11:00 a.m.

Master of Ceremonies—N. A. Winter, Jr., NWF President.

Invocation—Thomas L. Kimball, NWF Executive Vice President.

Welcome to Virginia—Senator HARRY F. Byrd, Jr.

History of Federation—Judge Louis D. McGregor.

Address—John C. Whitaker, Under Secretary of the Interior.

Address—Earl L. Butz, Secretary of Agriculture.

Dedication of the Center—Mrs. Richard Nixon.

Presentation of Colors—U.S. Marine Color Guard Unit.

The National Anthem—U.S. Marine Band.

ABOUT THE FEDERATION

We have come a long way since those early days of 1936 when the National Wildlife Federation was founded during the first North American Wildlife Conference called by President Franklin Delano Roosevelt. The early days were plagued with problems that at times seemed to be almost insurmountable. Money was scarce, concern for the environment was negligible and the conservation crises were building rapidly.

During the next few years, problems multiplied to such an extent that only the truly dedicated stuck to the ship when it seemed that the Federation must founder and sink into oblivion. Those hardy pioneers did persevere, however, and after many years of struggle the National Wildlife Federation took its place as a powerful and effective voice speaking in the cause of conservation. We were among the first organizations to express concern about the deteriorating condition of our total environment: water pollution, air pollution, pesticides and all the many other activities that adversely affect our plant and animal eco-systems.

Having recognized early that man must learn to live in harmony with nature, the

leadership of the N.W.F. has consistently supported proper land planning with increasing attention focused in preserving the aesthetic, fish, wildlife, and outdoor recreation values in a developing, industrialized, mechanized and computerized nation.

We are committed to the philosophy that we should not permit any species within our national surroundings, be it flora or fauna, to become endangered or extinct, that total protection and surplus harvest are essential tools of the natural scientist, to be used with great wisdom in providing optimum numbers, variety, and bounty of nature for all to enjoy.

It has become Federation policy and the source of its strength to listen to all voices on all sides of every issue. Through its carefully reasoned approach to complex and difficult environmental problems, the Federation has gained the respect of millions of people, both those who have supported our position and those opposed. Out of this respect has grown the organization we see today, fully capable of acting as spokesman for 3,500,000 people, representing the greatest natural resource cross-section of "grass roots America." The educational services rendered the unprecedented public interest in conserving the natural environment is greater than ever before in history. Evidence of the growth of interest and awareness of the work of the National Wildlife Federation is the building we dedicate today, first step in launching the action program of the National Wildlife Federation's Laurel Ridge Conservation Education Center.

Here we have room to service the rapidly expanding demand for knowledge and information about wildlife and ecology. Here we have room to expand into a total wildlife and environmental educational organization that is capable of providing the space for workshops, training sessions, lectures, film and slide shows, nature walks, and demonstration areas.

Yes, it is a far cry from the organization that took its first faltering steps in 1936 to be the healthy, growing organization of today. Our services cut across every facet of wildlife and environmental interest, our staff is active in every corner of the country and the world. Our current leadership, as those of the past, are fully committed to educational service and the dissemination of knowledge to all those who ask. An enlightened citizenry can provide the decisions, policies, and action that will ensure the quality of living we all seek.

We welcome you here today as evidence of your interest and your support in all of these activities and we are grateful for your continuing interest and support of our programs.

Sincerely,

N. A. WINTER, JR.,
President.

PROCLAMATION 4200

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

Americans carved a nation out of the wilderness. Now we must preserve the wilderness for the Nation.

The theme of this year's National Wildlife Week is: "Discover Wildlife—it's Too Good To Miss." In a greater sense, Americans are rediscovering the natural animal world around them. Our concern for the fate of wild animals has increased. We have come to realize that the development of the human habitat has occurred at great cost to another kind of habitat. And we are seeking more effective ways to prevent and enhance our wilderness areas.

All men need refuges for their spirit. The wilderness invokes contemplation and provides recreation, and the animal wildlife of America provides a fascinating dimension to our natural heritage which we know must

be preserved for future generations to enjoy. Now, therefore, I, Richard Nixon, President of the United States of America, do hereby designate the week beginning March 18, 1973, as National Wildlife Week.

I ask all citizens to renew their efforts to preserve and enhance our natural environment, especially those areas now inhabited by our natural wildlife. Because the need is still great for better tools with which to do the job, I also urge the Congress once again to act promptly on my proposal to strengthen protection for hundreds of endangered species.

In Witness Whereof, I have hereunto set my hand this sixteenth day of March, in the year of our Lord nineteen hundred seventy-three, and of the Independence of the United States of America that one hundred ninety-seventh.

RICHARD NIXON.

QUORUM CALL

Mr. HARRY F. BYRD, JR. Mr. President, I suggest the absence of a quorum, the time to be taken out of the time allotted to the Senator from Virginia.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. HARRY F. BYRD, JR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

GOLD REVALUATION TO FORMALLY DEVALUE THE DOLLAR

Mr. HARRY F. BYRD, JR. Mr. President, sometime this week the Senate will consider legislation to revalue the Nation's gold supply. In another way of expressing it, the Senate will consider legislation to formally devalue the dollar.

When Under Secretary of the Treasury Paul Volcker appeared before the Senate Committee on Finance, he stated that the executive branch had taken radical action in regard to the American dollar. I had a short dialog with him on that subject.

As a prelude to the Senate debate which will begin the latter part of the week on dollar devaluation, I think it appropriate to read into the RECORD today a few questions which I put to Mr. Volcker in this regard, and Secretary Volcker's replies. I am reading now from pages 25 and 26 of the hearings before the Senate Committee on Finance, March 7, 1973:

Senator BYRD. Now you said in your dialog with Senator Hansen, that you found it necessary to take radical action. Would you indicate the radical action to which you referred?

Mr. VOLCKER. Well, we devalued the dollar twice and had a major exchange rate realignment in the last 14 months twice. I consider that radical action.

Senator BYRD. And it is, in your judgment, radical action to devalue the dollar twice in 14 months?

Mr. VOLCKER. It is indeed and this is nothing I look forward to repeating at all. It is radical action.

Those were the comments of the Under Secretary of the Treasury, Mr. Paul A. Volcker.

The reason that I have not opposed the radical action, formal devaluation of the dollar, is that it is merely formally doing what already has taken place: namely, there has been a deterioration in the value of the dollar. The dollar is less valuable, and it seems to be becoming increasingly less valuable each few months. It gets back, I am convinced, to the smashing government deficits that the Federal Government has been running.

The deficit during the current fiscal year will be the largest the Nation has ever had with the exception of World War II when we had 12 million men under arms and when the United States was fighting one war in Europe and another in the Pacific.

Mr. President, a few moments ago I said that the dollar was worth less. That is two words. Earlier I asked that that be stricken because I noted in the comments I made last week that it was published in the CONGRESSIONAL RECORD as one word; namely, worthless.

What I said last week was that the dollar was worth less—two words.

I do not imply that the dollar is worthless. Of course, it is not. But I do say that it is worth less.

After today, I shall try not to use that expression because it is susceptible to misuse particularly when the typesetters put those two words together instead of spacing them out.

But the dollar has become less valuable. It has become less valuable, in my judgment, because of the policies of the Federal Government in running these smashing Government deficits.

VACATING OF ORDER FOR SENATOR ROBERT C. BYRD TO SPEAK TODAY

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I may vacate the time that was allotted to me under the order.

The PRESIDING OFFICER (Mr. HASKELL). Without objection, it is so ordered.

TRANSACTION OF ROUTINE MORNING BUSINESS

The PRESIDING OFFICER (Mr. HASKELL). Under the previous order there will now be a period for the transaction of routine morning business for not to exceed 30 minutes, with statements therein limited to 3 minutes.

Is there further morning business?

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR SENATORS FANNIN AND GRIFFIN TO BE RECOGNIZED TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on tomorrow after the two leaders or their designees have been recognized under the standing order, the distinguished Senator from Arizona (Mr. FANNIN) be recognized for not to exceed 15 minutes; and that he be followed by the distinguished Senator from Michigan (Mr. GRIFFIN) for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider the nominations on the executive calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, for the information of the Senate five nominations were reported by the Committee on Foreign Relations. Four of them were reported approximately 10 days ago. The last one was reported on Friday. Unfortunately, I forgot to ask unanimous consent for the Senate to receive reports, nominations, messages, and the like over the weekend. Therefore, they are not on the calendar. However Senators on both sides of the aisle have been contacted—those who are in town—to see if there were any objections. There were no objections. The nominations will be taken up today and they will be taken up separately.

The PRESIDING OFFICER. The first nomination will be stated.

COMMODITY CREDIT CORPORATION

The legislative clerk read the nomination of Robert W. Long, of California, to be a member of the Board of Directors.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of Clayton Yeutter, of Nebraska, to be a member of the Board of Directors.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

U.S. AIR FORCE

The legislative clerk read the nomination of Lt. Gen. James V. Edmundson to be lieutenant general.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

U.S. ARMY

The legislative clerk read the nomination of Lt. Gen. William Joseph McCaffrey, to be lieutenant general.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of Maj. Gen. Gilbert Hume Woodward, to be lieutenant general.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

U.S. NAVY

The legislative clerk read the nomination of Vice Adm. James F. Calvert to be vice admiral.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

U.S. MARINE CORPS

The legislative clerk proceeded to read sundry nominations in the U.S. Marine Corps.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the nominations be considered en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

SELECTIVE SERVICE SYSTEM

The legislative clerk read the nomination of Byron V. Pepitone, of Virginia, to be Director of Selective Service.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

NOMINATIONS PLACED ON THE SECRETARY'S DESK

The legislative clerk proceeded to read sundry nominations in the Air Force and in the Army, placed on the Secretary's desk.

The PRESIDING OFFICER. Without objection, the nominations are confirmed en bloc.

ACTION

The legislative clerk read the nomination of Michael P. Balzano, Jr., of Virginia, to be Director of ACTION.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the confirmation of the nomination of Michael P. Balzano, Jr., of Virginia, be temporarily deferred only because I have forgotten to request that the Committee on Labor and Public Welfare be contacted to see if it is all right to bring up the nomination today.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. ROBERT C. BYRD. Mr. President, I do not think that the majority leader should have to take all of the burden for having forgotten to make the request. I usually do that. I believe it was my shortcoming rather than his.

Mr. MANSFIELD. I understand the Committee on Labor and Public Welfare

has not had its hearings on the nomination of Mr. Balzano. So I ask, without prejudice, that confirmation of this nomination be withheld for the time being until this nomination, which was referred jointly, and which has been reported by the Committee on Foreign Relations unanimously, is considered by the Committee on Labor and Public Welfare.

The PRESIDING OFFICER. Without objection it is so ordered.

Mr. MANSFIELD. Mr. President, to reiterate, the deferral of the nomination of Michael P. Balzano, Jr., is without prejudice, because it was agreed that the Committee on Labor and Public Welfare would have a hearing. That commitment must be honored.

DEPARTMENT OF STATE

The legislative clerk proceeded to read the nomination of V. John Krehbiel, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Finland.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of William B. Macomber, Jr., of New York, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Turkey.

Mr. MANSFIELD. Mr. President, I wish to say that I think that the nomination of Secretary Macomber to be Ambassador to Turkey is one of the best choices made by this administration and one of the best choices that could be made by any administration. The nomination was reported by the Committee on Foreign Relations by a vote of 17 to 0, which indicates the high regard in which Mr. Macomber is held.

Mr. MATHIAS. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. MATHIAS. Mr. President, I shall not detain the Senate but I wish to join the distinguished majority leader in saying that I think Secretary Macomber, who has discharged so many very delicate missions for the United States over a long period of time, is one of the finest diplomats this country has. His assignment to the very important and sensitive post in Turkey is appropriate. I know he will discharge that duty with the same distinction that he has given to other duties on behalf of this country over a long period of time.

Mr. MANSFIELD. Yes, indeed. He is a man of great integrity, patriotism, dedication, and understanding. A better choice could not be made.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of Eugene Paul Kopp, of Virginia, to be Deputy Director of the U.S. Information Agency.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of Marshall Green, of the District of Columbia, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Australia.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomi-

nation of Dr. Ruth Lewis Farkas, of New York, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Luxembourg.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

SUNDRY NOMINATIONS ON THE SECRETARY'S DESK

The legislative clerk proceeded to read the nominations of Robert A. Blake, of California, and sundry other persons, for appointment and promotion in the Foreign and Diplomatic Service.

The PRESIDING OFFICER. Without objection, the nominations are confirmed en bloc.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be notified of the confirmation of the nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to, and the Senate resumed the consideration of legislative business.

QUORUM CALL

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The ACTING PRESIDENT pro tempore (Mr. ABOWREZK) laid before the Senate the following letters, which were referred as indicated:

REPORT ON FINAL DETERMINATION IN CLAIM OF THE CREEK NATION

A letter from the Chairman, Indian Claims Commission, transmitting, pursuant to law, a report on final determination in Docket No. 273, the Creek Nation, plaintiff, against the United States of America, defendant (with accompanying papers). Referred to the Committee on Appropriations.

LIST OF CONTRACT AWARD DATES, DEPARTMENT OF DEFENSE

A letter from the Acting Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, a list of contract award dates for the period March 15-June 15, 1973 (with an accompanying report). Referred to the Committee on Armed Services.

PROPOSED LEGISLATION FROM DEPARTMENT OF THE ARMY

A letter from the Secretary of the Army, transmitting a draft of proposed legislation to amend title 37, United States Code, to authorize travel and transportation allowances to certain members of the uniformed services stationed outside the United States for dependents' schooling, and for other purposes (with an accompanying paper). Referred to the Committee on Armed Services.

PROPOSED LEGISLATION FROM DEPARTMENT OF THE NAVY

A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to amend section 5064 of title 10, United States Code, to remove the requirement that the Director and the Assistant Director of the Budget and Reports be officers in the line of the Navy (with an accompanying paper). Referred to the Committee on Armed Services.

REPORT OF DEPARTMENT OF DEFENSE PROCUREMENT FROM SMALL AND OTHER BUSINESS FIRMS

A letter from the Acting Assistant Secretary of Defense (Installations and Logistics), transmitting, pursuant to law, a report of Department of Defense Procurement from Small and Other Business Firms, for July-December 1972 (with an accompanying report). Referred to the Committee on Banking, Housing and Urban Affairs.

PROPOSED LEGISLATION FROM OFFICE OF MANAGEMENT AND BUDGET

A letter from the Director, Office of Management and Budget, Executive Office of the President, transmitting a draft of proposed legislation to provide authority to expedite procedures for consideration and approval of projects drawing upon more than one Federal assistance program, to simplify requirements for operation of those projects, and for other purposes (with an accompanying paper). Referred to the Committee on Government Operations.

PROPOSED GRANT TO DESERT RESEARCH INSTITUTE

A letter from the Deputy Assistant Secretary of the Interior, transmitting, pursuant to law, a proposed grant to Desert Research Institute, Boulder City, Nev., for a research project entitled "Mineral Recovery from Geothermal Brines" (with an accompanying paper). Referred to the Committee on Interior and Insular Affairs.

REPORT ON THE COLORADO RIVER BASIN PROJECT

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, a report of the Colorado River Basin project, for the fiscal year ended June 30, 1972 (with an accompanying report). Referred to the Committee on Interior and Insular Affairs.

PROPOSED LEGISLATION FROM DEPARTMENT OF THE INTERIOR

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to amend section 2 of the act of June 30, 1954, as amended, providing for the continuance of civil government for the Trust Territory of the Pacific Islands (with an accompanying paper). Referred to the Committee on Interior and Insular Affairs.

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to authorize the Secretary of the Interior to transfer franchise fees received from certain concession operations at Glen Canyon National Recreation Area, in the States of Arizona and Utah, and for other purposes (with an accompanying paper). Referred to the Committee on Interior and Insular Affairs.

REPORT OF NATIONAL COMMISSION ON MARIHUANA AND DRUG ABUSE

A letter from the Chairman, National Commission on Marihuana and Drug Abuse, transmitting, pursuant to law, a report of that Commission (with an accompanying report). Referred to the Committee on the Judiciary.

PROPOSED LEGISLATION FROM THE SECRETARY OF THE TREASURY

A letter from the Acting Secretary of the Treasury, transmitting a draft of proposed legislation to grant relief to payees and special indorsees of fraudulently negotiated

checks drawn on designated depositories of the United States by extending the availability of the check forgery insurance fund, and for other purposes (with accompanying papers). Referred to the Committee on the Judiciary.

PROPOSED LEGISLATION FROM THE ATTORNEY GENERAL

A letter from the Attorney General, transmitting a draft of proposed legislation to reform, revise, and codify the substantive criminal law of the United States; to make conforming amendments to title 18 and other titles of the United States Code; and for other purposes (with an accompanying paper). Referred to the Committee on the Judiciary.

DOCUMENT ENTITLED "COMPLIANCE, ENFORCEMENT, AND REPORTING IN 1972 UNDER THE LABOR-MANAGEMENT REPORTING AND DISCLOSURE ACT"

A letter from the Office of Legislative Affairs, Department of Labor, transmitting, for the information of the Senate, a document entitled "Compliance, Enforcement, and Reporting in 1972 Under the Labor-Management Reporting and Disclosure Act" (with an accompanying document). Referred to the Committee on Labor and Public Welfare.

PROPOSED LEGISLATION FROM DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

A letter from the Acting Secretary of Health, Education, and Welfare, transmitting a draft of proposed legislation to extend the authorization of appropriations for certain programs for the education of the handicapped, and for other purposes (with an accompanying paper). Referred to the Committee on Labor and Public Welfare.

PETITIONS

Petitions were laid before the Senate and referred as indicated:

By the ACTING PRESIDENT pro tempore (Mr. ABOWEZEK):

A resolution of the House of Representatives of the State of Montana. Referred to the Committee on Interior and Insular Affairs:

"RESOLUTION"

"Requesting the U.S. Senate and the U.S. House of Representatives to implement fully by statute the multiple use concept on Federal lands

"Whereas, the continuing increase in population of the United States, the increase in leisure time available to the public because of shorter work weeks, longer vacations and earlier retirement, and the steady increase in disposable income have combined to produce a vast growth of interest and participation in outdoor recreation by United States citizens, and indications are that this growth will continue at an accelerated rate in the future, and

"Whereas, varieties of outdoor recreation such as hunting, fishing, rockhunting, snowmobiling, backpacking, trail-riding, etc. at present and projected rates require that large expanses of land be available for such recreation, and

"Whereas, the increasing pursuit of such outdoor recreation on private lands has produced increasing animosity and resentment on the part of the owners of these private lands with resulting closure and posting of private lands to the public, and since this trend is obviously fated to continue to the point where very little private land will not be closed, and

"Whereas, the United States government holds title to large areas of grazing and forest land, especially in western states such as Montana, which are administered by the forest service and the Bureau of Land Management, and which under the multiple use concept are also available for recreational use, and

"Whereas, a large number of citizens, particularly in the western states, knowing that through their government they own these lands and consider that their free and untrammelled use of these federal lands is an historic, intrinsic and most valuable part of the American way of life, and

"Whereas, large areas of these federal lands are not directly adjacent to a public road or other public land and are accessible to the public only if the owners of adjoining or surrounding private lands allow trespass across their holdings, and

"Whereas, in the case of such secluded or de facto sequestered public lands in many instances the private landowners do not permit trespass and the public is being denied access, and whereas the number of such cases will continue to increase as friction between the public and the landowners grows, and

"Whereas, the trend to consolidation of ranch lands into larger units owned by corporations or more powerful individuals will undoubtedly exacerbate this situation, and

"Whereas, in many cases the property owner denying the public access to public lands is himself using these public lands for grazing as a permittee at an extremely favorable monetary cost as compared to rates on private land, and

"Whereas, the public must have access to these public lands in order to use them, and whereas ownership, use and access are inseparable by all rules of logic and equity, and

"Whereas, outdoor recreation, both by residents of Montana and tourists and visitors is an important source of income and is basically essential to fiscal stability and welfare of the state of Montana.

"Now, therefore, be it resolved by the House of Representatives of the State of Montana: That the Congress of the United States establish the following provisions by statute:

"(1) In the case of all federal lands used for grazing for forestry totaling six hundred forty (640) or more contiguous or adjacent acres, to which access to the public from public road or other public land is not possible because of intervening or surrounding private land owned directly or indirectly by the holder of grazing permit on public lands, the granting of future grazing permits shall require that as a condition of such permit the permittee shall grant, for the period of such permit, a right-of-way for vehicular traffic across his private lands to the public lands.

"This right-of-way need be no more than a trail used by the permittee himself, or twenty (20) foot wide lane along or near a fence line over terrain passable to a vehicle. At the discretion of the owner of the private land, the access trail or right-of-way may be posted with signs provided by the agency supervising the public lands indicating that it is an access route only, and that trespassing, hunting and shooting are prohibited on the private lands bordering the right-of-way and violations will be punished according to applicable state laws.

"The provisions above would also apply to federal land which is being used by a state grazing district or other organization or group of landowners.

"In the case of public lands surrounded by lands owned by a nonpermit holder, a lane twenty (20) feet wide passable to vehicles along or near section lines from the nearest public land or right-of-way would be condemned through eminent domain right.

"(2) In view of the obvious increasing need for public land for public recreation in the future, no federal land consisting of more than three hundred twenty (320) contiguous acres used for grazing or forestry should be allowed to pass from federal ownership by sale to any nongovernmental purchase except:

"(a) in connection with and as a part of the purchase of similar land of equal or greater value for recreation and grazing or forestry;

"(b) in connection with and as a part of public-private land exchanges or previously arranged purchase agreements intended to consolidate federal lands into larger blocks for more efficient use and administration;

"(c) in the case of lands that through location near urban areas, or because of utility for commercial or industrial use, have appreciated much above their value for agricultural or recreational use, provided that the monetary proceeds from such sale are earmarked for use to purchase replacement agricultural-forestry-recreational land.

"Be it further resolved, that a copy of this resolution be sent to the secretary of the United States Senate, the speaker of the United States House of Representatives, and to all of the Montana congressional delegation."

A resolution of the House of Representatives of the State of Montana. Referred to the Committee on the Judiciary:

"RESOLUTION

"Requesting the Congress of the United States to adopt an amendment to the U.S. Constitution which will reinstate the right of the States to protect the right of an unborn human being to life and offer the constitutional amendment to the States for ratification

"Whereas, the tradition of Montana law from its earliest statutes has been to provide legal protection to the fundamental rights of all human beings, including the right to life, and

"Whereas, the recent decisions of the United States Supreme Court has interpreted this protection to be contrary to the United States Constitution insofar as these decisions affect the right to life of unborn humans, and

"Whereas, Montana's traditions on behalf of human life and the protection of our human environment can best be continued only through appropriate constitutional protection.

"Now, therefore, be it resolved by the House of Representatives of the State of Montana: That the Congress of the United States is hereby urged and requested to adopt a constitutional amendment which will guarantee the right of the States to enact or preserve laws which protect the right to life of unborn human beings, and

"Be it further resolved, that copies of this resolution be forwarded to the Montana congressional delegation, the Secretary of the United States Senate, the Clerk of the United States House of Representatives, and the President of the United States."

A resolution of the House of Representatives of the State of Montana. Referred to the Committee on Labor and Public Welfare:

"RESOLUTION

"Beseeching the President of the United States, the Secretary of Health, Education and Welfare, and the Congress of the United States to protect and preserve the effectiveness and integrity of the regional medical programs

"Whereas, regional medical programs serving the people of Montana are fulfilling previously unmet rural health care needs, and

"Whereas, these programs are administered and managed at the local level with local nongovernmental personnel responsible to the regional advisory council, and the regional advisory council, as well as task force and/or committee members involved are donating their time on a voluntary basis to solve health problems at a local level, and

"Whereas, these programs build on existing strength and work with the private sector of health professionals to assist them in improving the quality and quantity of health

care closer to the patient's home, and have become the most effective local force to assist the existing system to improve health care, and

"Whereas, these programs have contributed significantly to improvement of health care throughout Montana by demonstration of more effective rural health care arrangements; by assistance to community planning and health care needs to hospitals and health care personnel in raising the quality of health care; by training new types of health manpower and improving the skills of existing health care practitioners and the understanding of health care consumers through public education activities, and

"Whereas, these programs in Montana have demonstrated a marked ability to improve health care in undeserved and rural areas by support and training of health workers by assisting in the development of intensive coronary care units, oral cancer clinics, and consumer education projects, diabetes management and stroke rehabilitation, heart-kidney prevention, early recognition of cancer and other health problems, and

"Whereas, the regional medical programs in Montana have effectively cooperated with each other, state health agencies, comprehensive health planning, voluntary health organizations, and public as well as private, education institutions to provide assistance and consultation and establish cooperative arrangements in the regions.

"Now, therefore, be it resolved by the House of Representatives of the State of Montana: That the president of the United States, the secretary of health, education and welfare, and the congress of the United States are requested to provide sufficient funding for the fiscal year 1973 to permit continuation of the effective regional medical programs in Montana, and

"Be it further resolved, that the legislature of the state of Montana calls upon the congress of the United States to pass appropriate legislation extending authority for the regional medical programs on a continuing basis and appropriating sufficient funds for the fiscal year 1974, and

"Be it further resolved, that the legislature of the state of Montana calls upon the congressional delegation from the state of Montana to work avidly for the implementation of this resolution, and

"Be it further resolved, that copies of this resolution be sent to the president of the United States, the secretary of health, education and welfare, to the senate and house of representatives of the United States and to the senators and representatives representing the state of Montana in the United States Congress."

REPORT ENTITLED "PATENTS, TRADEMARKS, AND COPYRIGHTS"—REPORT OF A COMMITTEE (S. REPT. NO. 93-88)

Mr. McCLELLAN, from the Committee on the Judiciary, pursuant to Senate Resolution 245, 92d Congress, second session, submitted a report entitled "Patents, Trademarks, and Copyrights," which was ordered to be printed.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session, the following favorable reports of nominations were submitted:

By Mr. FULBRIGHT, from the Committee on Foreign Relations:

Eugene Paul Kopp, of Virginia, to be Deputy Director of the U.S. Information Agency;

Marshall Green, of the District of Columbia, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary to Australia;

William B. Macomber, Jr., of New York, to be Ambassador Extraordinary and Plenipotentiary to Turkey;

V. John Krehbiel, of California, to be Ambassador Extraordinary and Plenipotentiary to Finland;

Dr. Ruth Lewis Farkas, of New York, to be Ambassador Extraordinary and Plenipotentiary to Luxembourg; and

Michael P. Balzano, Jr., of Virginia, to be Director of Action.

The above nominations were reported with the recommendation that the nominations be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

By Mr. FULBRIGHT, from the Committee on Foreign Relations:

Robert O. Blake, of California, and sundry other persons, for appointment and promotion in the Foreign and Diplomatic Service.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. PEARSON:

S. 1356. A bill for the relief of Linda She Li. Referred to the Committee on the Judiciary.

By Mr. MANSFIELD:

S. 1357. A bill for the relief of Mary Red Head. Referred to the Committee on the Judiciary.

By Mr. MANSFIELD (for himself and Mr. METCALF):

S. 1358. A bill to authorize the Secretary of the Interior to construct, operate, and maintain the Marias-Milk unit of the Pick-Sloan Missouri Basin program in Montana, and for other purposes. Referred to the Committee on Interior and Insular Affairs.

By Mr. McCLELLAN:

S. 1359. A bill to amend section 9 of title 17 of the United States Code. Referred to the Committee on the Judiciary.

S. 1360. A bill to amend title 35 and title 17 of the United States Code to provide a remedy for postal interruptions in patent, trademark, and copyright cases. Referred to the Committee on the Judiciary.

S. 1361. A bill for the general revision of the copyright law, title 17 of the United States Code, and for other purposes. Referred to the Committee on the Judiciary.

By Mr. McCLELLAN (for himself and Mr. SCOTT of Pennsylvania):

S. 1362. A bill to amend the act to provide for the registration and protection of trademarks used in commerce, to carry out the provisions of certain international conventions, and for other purposes. Referred to the Committee on the Judiciary.

By Mr. HUMPHREY:

S. 1363. A bill to transfer the functions of the Passport Office to a new agency of the Department of State to be known as the U.S. Passport Service, to establish a Passport Service Fund to finance the operations of the U.S. Passport Service, and for other purposes. Referred to the Committee on Foreign Relations.

S. 1364. A bill to amend the Elementary and Secondary Education Act of 1965 to provide a program of grants to States for the development of child abuse and neglect prevention programs in the areas of treatment, training, case reporting, public education, and information gathering and referral.

Referred to the Committee on Labor and Public Welfare.

By Mr. STEVENS:

S. 1365. A bill to amend the act prohibiting certain fishing in U.S. waters in order to revise the penalty for violating the provisions of such act. Referred to the Committee on Commerce.

S. 1366. A bill to amend the Fishermen's Protective Act of 1967 in order to provide certain protection for U.S. fishermen and fish resources. Referred to the Committee on Commerce.

By Mr. CHURCH:

S. 1367. A bill relating to the income tax treatment of charitable contributions of copyrights, artistic compositions, or a collection of papers. Referred to the Committee on Finance.

By Mr. CASE:

S. 1368. A bill to prohibit the use for public works projects of any lands designated for use for parks, for recreational purposes, or for the preservation of its natural values unless such lands are replaced by lands of like kind. Referred to the Committee on Interior and Insular Affairs.

By Mr. JAVITS (for himself and Mr. BUCKLEY):

S. 1369. A bill to reestablish and extend the program whereby payments in lieu of taxes may be made with respect to certain real property transferred by the Reconstruction Finance Corporation and its subsidiaries to other Government departments. Referred to the Committee on Government Operations.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. McCLELLAN:

S. 1359. A bill to amend section 9 of title 17 of the United States Code. Referred to the Committee on the Judiciary.

AMENDMENT TO COPYRIGHT ACT

Mr. McCLELLAN. Mr. President, as chairman of the Subcommittee on Patents, Trademarks, and Copyrights I introduce, for appropriate reference, a bill to amend section 9 of title 17 of the United States Code.

On February 27, the United Nations Educational, Scientific, and Cultural Organization announced the decision of the Government of the Union of Soviet Socialist Republics to adhere to the Universal Copyright Convention. The action of the Soviet Government was initially welcomed as a long-overdue acceptance of its responsibility toward the authors and other creators of works distributed and performed in the Soviet Union. The American intellectual community applauded the Soviet decision, because it will require the Soviet Union to extend to foreign nationals the same rights enjoyed by Soviet authors, including the payment of royalties.

Unfortunately, it now appears that the Soviet Government may contemplate using its adherence to the Universal Copyright Convention as a tool to tighten its control over the circulation of literature which does not meet with Communist approval. On February 21, the Supreme Soviet adopted a decree amending the Soviet copyright law in connection with that country's adherence to the Copyright Convention. According to an Associated Press dispatch from Moscow the law "could sharply restrict publication in the West of works by Russian authors

considered anti-Soviet." The news reports indicate that the new Soviet law apparently is designed to permit that country to prevent publication abroad of anti-Soviet works by bringing suits for infringement of United States or other copyrights, against publishers in foreign countries who issue these works. Presumably the Soviet Union under its domestic statute would claim proprietary rights in the United States or other foreign copyrights in the works of these authors.

The Authors League of America has expressed their serious concern at these developments and requested me to sponsor the bill which I am introducing today. A major objective of the international copyright community, and our domestic legislation, must be the protection of the rights of authors. The right to decide whether his work may be published in any country belongs to the author, or his heirs, or to the publisher or other person to whom he voluntarily has chosen to assign rights in the work. To assure that this fundamental right is preserved to the author, this legislation would amend section 9 of the U.S. Copyright Act to provide that a U.S. copyright secured to citizens of foreign nations shall vest in the author of the work, his executors or administrators, or his voluntary assigns. For the purposes of U.S. copyright law any such copyright shall be deemed to remain the property of the author regardless of any law of a foreign state which purports to divest the author or other persons of the U.S. copyright in his work. My bill further provides that no action for infringement of such copyright may be maintained by any nation claiming rights in such copyright by virtue of such foreign statute.

Before this legislation is processed by the Congress it will obviously be desirable to secure clarification of the intentions of the Soviet Government. I will also be interested in receiving the comments of the Department of State concerning the fears expressed by the Authors League, and others.

I ask unanimous consent that there be printed in the RECORD several editorials and articles from the New York Times, the Miami Herald, and the Washington Post.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the New York Times, Mar. 21, 1973]

REVERSE COPYRIGHT

When the Soviet Union announced several weeks ago that it was joining the Universal Copyright Convention, two schools of thought emerged on what the action meant. Optimists saw the Moscow move as part of a broader Soviet trend toward normalization of international relations and consequent improvement in the general atmosphere among nations. Pessimists contended, however, that the move was aimed at the very reverse of normalization, that Moscow sought primarily to use the copyright law as an additional bludgeon against its dissident writers with the aim of preventing the publication abroad of manuscripts the Soviet regime considered heretical.

On the evidence available now, the gloomier view was right. The Soviet Government seems to count on using the world copyright law to turn its tight domestic censorship into effective international censorship.

New Soviet legal regulations just made public pose the threat of putting, say, Aleksandr Solzhenitsyn, between two fires. If a future manuscript of his is published abroad, he can be prosecuted if he accepts responsibility for its extralegal export. But, if he claims the work left the Soviet Union without his consent, Moscow may be able to proceed against foreign publishers, using the convention's provisions as a legal basis for trying to block publication.

Ironically, the preface to the Universal Copyright Convention declares that "a universal copyright system will facilitate a wider dissemination of works of the human mind and increase international understanding." The apparent Soviet scheme now is to pervert the Convention into an instrument to hinder such "wider dissemination." That contradiction alone should make it possible for lawyers to frustrate the apparent Soviet intent to acquire international censorship privileges.

[From the New York Times, Mar. 18, 1972]
MOSCOW AMENDS LAW ON COPYRIGHT—OUTFLOW OF DISSIDENT WRITING IS APPARENT TARGET

Moscow, March 17.—The Soviet Union has amended its copyright law in an evident attempt to curb the unauthorized outflow of dissident literature.

Legal changes associated with Moscow's impending adherence to the Universal Copyright Convention also exempt from payment of royalties the reproduction of any writings for nonprofit scientific and educational purposes.

This provision seems to clear the way for continued free translation of much scientific and technical material in both the Soviet Union and the United States, if non-profit use can be demonstrated.

These were among the principal points that emerged this week when the Soviet authorities published the text of amendments to existing Soviet copyright legislation dating from 1961. The legislation is part of the Soviet civil code adopted in that year.

New provisions tightening official control over the use of a Soviet citizen's writings in foreign countries made it evident that the wish to halt the outflow of underground literature had been a main factor inducing the Soviet Union to join international copyright arrangements at this time.

EXPLANATION OF DECISION

The Government's intention to join the 1952 Geneva Copyright Convention was announced Feb. 27 by the United Nations Educational, Scientific and Cultural Organization and becomes effective May 27. Soviet spokesmen have officially explained their decision as in keeping with the current trend toward international relaxation of tensions.

Previously, by abstaining from membership in the Copyright Convention, the Soviet Union was able to translate foreign authors at will without assuming any obligation to pay royalties. Other countries had similar uncontrolled rights to the use of Soviet writings.

By joining the international convention, the Soviet Union undertook to extend to foreign authors the same rights enjoyed by Soviet authors, including the payment of royalties. At the same time, Moscow also would be able to enjoin foreign publishers from issuing unauthorized Soviet materials.

The new legislation curbing the outflow of literature without permission is evidently intended to prevent the publication abroad of such authors as the novelist Aleksandr I. Solzhenitsyn, whose work is deemed ideologically unacceptable in the Soviet Union.

The copyright amendments, adopted Feb. 21 by the Presidium of the Supreme Soviet, the nominal legislature, were published in the Presidium's Vedomosti, or Bulletin, dated

Feb. 28. The issue reached subscribers this week.

The new regulations appeared to open the way for prosecution of Soviet authors who knowingly bypassed official channels in sending their work abroad. If an author contends that the work found its way abroad without his consent, the Soviet Union may now be able to take action against foreign publishers under the convention in an effort to block publication.

A key provision relevant to the problem of dissident literature secures a copyright over any manuscript in the Soviet Union not only to the author and his heirs but also to any assignee, which could conceivably be a Soviet Government agency. This would have the effect of giving the Soviet authorities virtually complete control over unpublished manuscripts in this country.

Another important change in the copyright legislation is a new section covering authors' rights. It says: "The procedure by which an author, citizen of the U.S.S.R., can assign the right for the use of his work within the territory of a foreign state is established by Soviet legislation."

The detailed procedure is not defined, but would clearly involve official control over the assignment of rights to any foreign publisher.

PUBLISHERS' REACTION HERE

The American publisher of Mr. Solzhenitsyn's current best-selling novel, "August 1914," said yesterday that the reported Soviet measures might "lead or force" the author to leave the Soviet Union to have his work published abroad. And the chairman of the Association of American Publishers, Robert L. Bernstein, termed the measures "regrettable" and "depressing."

Mr. Solzhenitsyn's publisher, Roger W. Straut Jr., said in an interview, "It's historically true that when Russian policy dictates a relaxation of their posture outside the U.S.S.R., they then tighten inside, and this seems to follow that policy."

Mr. Straus is the president of Farrar, Straus & Giroux, which has published six of Mr. Solzhenitsyn's works, including an earlier best-selling novel, "The Cancer Ward," which won the Nobel Prize for Literature.

Mr. Bernstein said he had called an emergency meeting of the association's 21-man board of directors to discuss the new measures. The meeting is to be held here Wednesday after the association confers with State Department officials, authors and civil rights groups.

[From the Washington Post, Mar. 23, 1973]
CONCERN VOICED IN UNITED STATES AT SOVIET COPYRIGHT LAW

(By Anthony Astrachan)

NEW YORK.—A divided American publishing industry has made its first cautious response to what it calls "dismaying reports" that Soviet adherence to the Universal Copyright Convention "will be accompanied by repressive measures against Soviet authors."

The Soviets announced Feb. 27 that they would adhere to the international convention after centuries of ignoring western copyright practices under both czars and Bolsheviks. Last week they published a decree amending the domestic Soviet copyright law in connection with their adherence to the convention.

The decree makes it easier to punish dissident writers who send their works abroad. It does this by making the state the only legal channel for transmission abroad and by establishing three other provisions.

It extends copyright not only to published works but also to unpublished ones like the books of Aleksandr Solzhenitsyn, Nadezhda Mandelstam and scores of others that circulate in typed copies in the Soviet Union.

The decree also allows "compulsory purchase" by the state of a copyright from an author or his heirs. And it prevents translation for publication outside the Soviet Union without permission of the copyright holder.

In the past, samizdat (self-published) authors have contended that they did not authorize publication abroad, either because they genuinely had nothing to do with the transmission of a manuscript, or to protect themselves against state action.

If that happened under the new law, the Kremlin could theoretically sue the Western publisher of the work—though the Soviets almost never appear in a foreign court for any purpose.

Solzhenitsyn's American publisher—Roger Straus, Jr., president of Farrar, Straus and Giroux—said he would continue to publish the Nobel prizewinner's work no matter what Soviet law might say—unless it put Solzhenitsyn's life, liberty or family in danger.

The sequel to "August 1914" is expected to be finished this year.

Other American publishers of samizdat authors took a similar line. But publishers who have made deals with Soviet state publishing houses said they would be in a real dilemma if confronted with a choice between those deals and a samizdat. They obviously leaned toward the state deals.

An emergency session of the board of directors of the Association of American Publishers Wednesday divided into two groups—one favoring a strong position and one that wanted more factual data before proceeding, according to industry sources.

After a 2½-hour meeting, they agreed unanimously on a compromise statement pledging "to take all steps which may be necessary at home or abroad to fulfill the commitments of American publishers and authors to the spirit of the Universal Copyright Convention."

Representatives of PEN and the Authors' League took part in the meeting and endorsed the statement.

The only steps that the statement specified were consultation with the State Department, members of Congress and other bodies and a request for clarification of the Soviet measures from Boris I. Stukalin. Stukalin is chairman of the U.S.S.R. state committee for publishing and headed a recent delegation of Soviet publishers to the United States.

Robert L. Bernstein, president of Random House and chairman of the publishers' association, added that the group would establish a permanent committee that would report monthly on the situation.

The publishers could, in fact, ask suspension of cultural exchanges that they had agreed on with the Soviet publishers; lobby against the exemption from the 30 per cent withholding tax on royalties that the Soviets are seeking under the U.S.-Soviet trade agreement; and lobby for an amendment to the U.S. copyright law that would prevent application of the Soviet measures here.

Their most effective measure, some observers suggested, would be to get members of Congress to do something comparable to Sen. Henry M. Jackson's proposal to deny the Soviets most-favored-nation status in trading as long as they make it difficult for Soviet Jews to emigrate to Israel.

[From the Miami Herald, Mar. 17, 1973]

LAW COULD BE BARRIER TO BOOKS—SOVIETS MODIFY COPYRIGHT PACT

MOSCOW.—A new Kremlin law could sharply restrict publication in the West of works by Russian authors considered anti-Soviet.

The law is Decree No. 138 of the Supreme Soviet, passed Feb. 21 but distributed this week in the legislative body's weekly bulletin of new legislation. It was signed by President Nikolai V. Podgorny.

The decree modifies Soviet law in connection with Moscow's announcement of Feb. 14 that it will become a party to the Universal Copyright Convention effective May 27.

The law seemed aimed at stopping publication abroad of "samizdat" works critical of the regime. Samizdat, which means self-published, circulate clandestinely in typewritten copies and many such works eventually reach the West published there.

Authors of "samizdat" have ranged from Nobel * * * to hundreds of obscure dissident Soviet citizens whose writing—evoke more political than literary interest.

The decree said the copyright pact, adopted in Geneva in 1952, will apply to "works first published on the territory of the U.S.S.R.—or, not published, but found on the territory of the U.S.S.R. in any objective form."

This seemed a clear reference to any work not officially published but circulated clandestinely.

If the manuscript were smuggled abroad and published under the name of a Soviet citizen, the secret police could presumably summon the author and confront him with the published work.

If he denied he authorized publication abroad, the Soviet Union could bring legal action against the Western publisher for violating the copyright convention. If the writer did authorize foreign publication, he could be prosecuted under Soviet law.

Solzhenitsyn, for example, has denied he authorized foreign publication of such best sellers as "The First Circle" and "Cancer Ward", both banned here. In such cases, the copyright pact would be a handy means of putting pressure on author or publisher.

The new law also specified that the Soviet Union would recognize a foreign copyright for a Soviet citizen only if the work were sent abroad "by a procedure established by legislation" of the U.S.S.R.

The new law added that this "procedure" is the only way a Soviet citizen can legally send a work abroad.

Soviet refusal to recognize a foreign copyright for a Russian author would deny him royalties earned from the book.

Boris I. Stukalin, chairman of the State Committee on Publishing, Printing and Book Distribution, said at a press conference March 9 that the "appropriate Soviet organization"—the state bank—would not transfer royalties from abroad unless the author had used official channels to send his work out of the country.

Under previous practice, an author banned here but published abroad could receive at least a cut of his foreign royalties by bank transfer. But the government charged a 13 per cent income tax plus a 35 per cent surcharge for converting the hard currency into ruble certificates.

By Mr. McCLELLAN:

S. 1360. A bill to amend title 35 and title 17 of the United States Code to provide a remedy for postal interruptions in patent, trademark, and copyright cases. Referred to the Committee on the Judiciary.

Mr. McCLELLAN, Mr. President, as chairman of the Subcommittee on Patents, Trademarks, and Copyrights, I introduce, for appropriate reference, a bill to amend title 35 and title 17 of the United States Code to provide a remedy for postal interruptions in patent, trademark, and copyright cases.

During the 92d Congress, at the request of the Department of Commerce, I introduced S. 4028 to grant relief from delays in the postal service in patent and trademark cases. The patent and trademark laws of the United States contain

certain time periods, during which specified actions must be taken by patent and trademark applicants and owners or by their attorneys or agents. Failure to take a required action within the statutory time period generally results in a forfeiture of some or all of the patent or trademark rights involved. There has occurred in the past, and may well occur in the future, disruptions of postal service because of labor disputes or exceptional circumstances, such as floods, riots, and so forth. The purpose of this legislation is to permit the Commissioner of Patents to provide relief from injury sustained by patent and trademark applicants when there is an interruption in regular postal service.

Subsequent to the introduction of S. 4028, I was requested to include in the bill appropriate provisions covering disruption or suspension of postal or other services in copyright cases. Such language has been added to the bill which I am introducing today. This additional language has been approved by the Copyright Office.

Favorable action on this bill would relieve the Congress and the executive branch of the time-consuming process of considering the merits of individual private bills for relief in the event of an interruption of postal service.

By Mr. McCLELLAN:

S. 1361. A bill for the general revision of the copyright law, title 17 of the United States Code, and for other purposes. Referred to the Committee on the Judiciary.

Mr. McCLELLAN. Mr. President, as chairman of the Subcommittee on Patents, Trademarks and Copyrights, I introduce, for appropriate reference, a bill for the general revision of the copyright law, title 17 of the United States Code, and for other purposes. Title I of this legislation provides for the general revision of the copyright law, title II establishes the National Commission on New Technological Uses of Copyrighted Works, and title III provides for the protection of ornamental designs of useful articles.

Other than for necessary technical amendments relating to the effective dates of various provisions, the bill is identical to S. 644 of the 92d Congress. That bill, other than for minor amendments, is identical to the bill reported by the subcommittee in December 1969.

As is by now well known, any significant progress on general revision of the copyright law has been effectively precluded in recent years by the multifaceted cable television issue. A major section of the revision bill relates to the resolution of the copyright status of the cable television industry. Progress on the revision bill had to await the adoption by the Federal Communications Commission of a new cable television regulatory scheme. These rules became effective during 1972.

Section 111 of the legislation approved by the subcommittee contains a comprehensive resolution of the CATV question, including both regulatory and copyright matters. The subcommittee adopted such a comprehensive provision

in response to the recommendations of the then Chairman of the Federal Communications Commission. When Mr. Dean Burch became Chairman of the FCC he consulted the subcommittee concerning the development of coordinated procedures by the Congress and the Commission to facilitate a resolution of the CATV issue, and to permit the orderly development of the cable industry. Under the effective leadership of Chairman Burch substantial progress has been achieved in creating a constructive cable television policy for this Nation. The regulations adopted by the Commission are generally consistent with the recommendations made by the subcommittee in section 111 of the copyright bill. It is therefore anticipated that when the subcommittee processes the revision bill, it will eliminate those provisions of a regulatory nature that were the subject of the recent FCC rule-making proceedings.

The subcommittee determined that the public interest justified, and practical realities required, the granting in certain circumstances of a compulsory license to perform copyrighted works. The subcommittee approved such licenses as part of the cable television, mechanical royalty, jukebox royalty, and performance royalty sections of the revision bill. With respect to each of those issues the subcommittee decided that the Congress would determine the initial royalty rate, and that a Copyright Royalty Tribunal would be established for the purpose of making periodic review and adjustment of the rates.

It has been proposed that special treatment should be accorded the cable television royalty issue. The principal justification for this position is a private agreement developed by Dr. Clay T. Whitehead, Director of the Office of Telecommunications Policy. The Whitehead agreement has been generally interpreted as seeking to eliminate the Congress from any role in determining cable television royalty rates. Even though public law places copyright affairs exclusively in the legislative branch, neither the Copyright Office of the Library of Congress, nor the House or Senate subcommittees having jurisdiction in copyright matters, were represented at Dr. Whitehead's meetings.

Another major issue in the revision legislation that requires brief comment at the present time is the photocopying of copyrighted works. There has recently been an organized letter-writing campaign by presidents of universities and others in support of a substitute photocopying section of the revision bill. Certain of these letters reflect an incomplete and somewhat distorted understanding of the decisions taken by the subcommittee. For example, Dr. Jerome B. Wiesner, president of the Massachusetts Institute of Technology, has written me that the subcommittee position:

Seems likely to result in the imposition of a fee or a delay whenever a student or scholar wants to copy part of a copyrighted work in order to facilitate his study or research.

This is grossly inaccurate. The bill approved by the subcommittee, together with the draft of the report on that leg-

islation, has made adequate and reasonable provision for the needs of research and scholarship.

Dr. Wiesner says the payment of any copyright fees would "constitute a regressive tax on education and research to give a windfall to publishers." Authors, publishers, librarians, and educators share many common goals. It is still to be hoped that a satisfactory accommodation can be achieved, and that the discussions currently in progress will result in the presentation of recommendations to the subcommittee with the endorsement of both the copyright and academic communities.

Prior to the suspension of action on the revision bill, the subcommittee conducted 17 days of hearings during which there was testimony by 149 witnesses. Subsequent to the hearings a number of public and staff meetings have been held on issues involved in this legislation. The subcommittee has also requested on a number of occasions supplementary written statements on specified issues.

The subcommittee has now received several requests to conduct additional hearings because of events which have transpired since the original action by the subcommittee on this legislation. My personal view is that additional hearings are unlikely to produce any significant new information. There is also the possibility that public hearings would tend to polarize positions on some issues where efforts to secure accommodations are still in progress. Despite these reservations the subcommittee will reopen the hearings to hear supplementary presentations on selected issues where there have been significant developments since the previous action of the subcommittee. The subcommittee will allocate equal time on these issues to the principal spokesmen for the various points of view. These issues include:

First. Library photocopying—sections 107 and 108 of the bill.

Second. The proposed amendment of the ad hoc committee—of educational organizations and institutions—on copyright law revision, relating to a general exemption for education purposes.

Third. The cable television royalty schedule.

Fourth. The application of the compulsory license provisions of the cable television section 111 to the carriage of sporting events by cable television systems.

Fifth. The proposed exemption for the making of copies of tapes of religious broadcasts—section 112(c) of the bill.

Since efforts to achieve a resolution of certain of these issues are continuing, it would not be feasible to conduct hearings at the present time. I shall follow the progress of the current discussions, and review the situation at a later date. When it would serve a constructive purpose, I shall schedule the hearings as soon as my other legislative responsibilities permit.

By Mr. McCLELLAN (for himself and Mr. SCOTT of Pennsylvania):

S. 1362. A bill to amend the act to provide for the registration and protection of trademarks used in commerce, to carry

out the provisions of certain international conventions, and for other purposes. Referred to the Committee on the Judiciary.

Mr. McCLELLAN. Mr. President, as chairman of the Subcommittee on Patents, Trademarks, and Copyrights, I introduce, for appropriate reference, on behalf of myself and Mr. SCOTT of Pennsylvania, a bill to amend the act to provide for the registration and protection of trademarks used in commerce, to carry out the provisions of certain international conventions, and for other purposes. This legislation is known as the proposed Unfair Competition Act of 1973.

The bill would establish a uniform body of Federal unfair competition law by creating a Federal statutory tort of unfair competition affecting interstate commerce, and by establishing Federal jurisdiction over such tort claims within the framework of the Trademark Act of 1964. The crux of the bill proposes a new section 43(a) of the Trademark Act including in three subsections those torts generally acknowledged to give rise to the major part of the law of unfair competition. In a fourth subsection, provision is made for the Federal courts to deal with other acts which constitute unfair competition because of misrepresentation or misappropriation of goods or services.

The bill provides that all of the remedies set forth in the Trademark Act for infringement of trademarks would be available in respect to acts of unfair competition. However, the bill would not affect remedies which are otherwise available or preempt the jurisdiction of any State in cases of unfair competition.

Most of the provisions in the bill which Senator SCOTT and I are introducing today are identical to S. 647 of the 92d Congress. The bill, however, does incorporate several amendments which have been suggested by the National Coordinating Committee which has been established to seek the passage of this legislation. The purposes of the principal amendments are:

First. To clarify the intent of the legislation to establish a Federal cause of action for unfair competition in meritorious product simulation cases of a type as to which relief has been barred under State law by virtue of certain decisions of the U.S. Supreme Court.

Second. To clarify that the misrepresentation or disparagement of another person's goods, and so forth, which is proscribed by this bill relates to "a false or misleading representation or omission of material information."

Third. To clarify that the legislation is not intended to broaden the presently existing common law in respect to the protection of trade secrets or confidential information.

Fourth. To clarify the discretionary authority of Federal courts to require proof of intent to injure, and so forth, in awarding monetary relief "subject to the principles of equity" under section 35.

By Mr. HUMPHREY:

S. 1363. A bill to transfer the functions of the Passport Office to a new agency of the Department of State to be known

as the U.S. Passport Service, to establish a Passport Service Fund to finance the operations of the U.S. Passport Service, and for other purposes. Referred to the Committee on Foreign Relations.

A U.S. PASSPORT SERVICE WITHIN THE STATE DEPARTMENT

Mr. HUMPHREY. Mr. President, I introduce legislation to solve a problem of growing proportions. I am referring to the problem of providing quick, economical, and efficient passport service to the growing number of American travelers.

Americans enjoy a higher standard of living than any other people in the world. This has enabled many of our citizens to take advantage of the opportunity to travel. Moreover, special travel packages, chartered tours, and student fares are making foreign travel available to more people than ever before. Approximately 7 million Americans, by one means or another, traveled outside the United States last year.

Mr. President, the Passport Office is not equipped to handle the increased demand for passports. Every spring the Passport Office faces a huge influx of applications for passports. This service along with the many other significant and important work functions, studies and projects are directly related to the processing and issuance of passports make efficient service difficult, if not impossible.

In fiscal year 1972 the Passport Office issued a total of over 2½ million passports. This volume of passports represents an increase in workload of 12.7 percent over the passports issued the previous year. Personnel utilization increased by 12 percent in fiscal year 1972 from 702 man-years utilized in fiscal year 1971 to 786 man-years utilized in fiscal year 1972.

There have been great increases during the past year in services requiring many man-hours to process. For example, the man-hours required to service locator and status cards in the files rose by 15 percent.

To some of these increasing demands the State Department has expanded a program under which post offices across the country will accept passport applications from Americans intending to travel abroad. At this time over 600 post offices throughout the United States are now processing passport applications.

The State Department began this program in 1970 despite the problems the Postal Service was experiencing. It seems increasingly clear that the Postal Service is unable to provide quick and efficient mail service let alone passport service. The Senate Post Office and Civil Service Committee is now conducting an investigation of the poor quality of postal service.

The State Department has offered other stop-gap solutions to passport problems. Night shifts were established in Boston, Philadelphia, and San Francisco passport agencies. A further solution to the problem offered by the State Department was to propose that in the future passports be issued to persons applying all over the country through three centralized plants located in low-rent areas on a regional basis.

Both of these plans proved to be totally unrealistic. Instead of bringing passport services closer to the people, the State Department solutions worked in the opposite direction. For example, to make their night shift idea work the State Department ordered the Passport Office to shift applications willy-nilly from one agency to another and many times to a third. Such a procedure was bound to produce inordinate delays in the issuance of passports.

Mr. President, it is time that the Congress stepped into this mess and offered a long range, practical solution to this problem. Back in 1956 when I was on the Government Operations Committee, I had a great deal to do with modernizing and updating the operation of the Passport Office. Modern machines and techniques were introduced to provide the kind of service that the American citizen wanted and deserved. It is obvious that this kind of service is no longer possible under the present system.

The bill I am introducing today will, I believe, restore fast and efficient service to the Passport Office. It is not too different from the bill I offered in 1956. The most important provisions are similar to those found in S. 3340 which I introduced then.

Section 1 of the bill creates within the Department of State a "U.S. Passport Service," which would be comparable to the Immigration and Naturalization Service of the Department of Justice. It would be responsible to the Secretary of State. This status is commensurate with the growing importance of the service it performs to the American public.

Another section gives the Director of the Passport Service the authority to establish passport agencies or passport service offices wherever the needs of the public require and whenever they will be self-sustaining. By self-sustaining I mean that the revenue they bring in, in fees, will equal or exceed the cost of their operation. This provides a reasonable check on the proliferation of passport agencies which some people in the State Department and elsewhere seem to fear.

The most important provision of this new bill is almost identical to a similar provision in S. 3340. It would establish for the Passport Service what is called a revolving fund. In simple terms this means that the Service would be permitted to use a portion of the revenue it returns to the Treasury each year to modernize its methods, to establish the new agencies, and generally to provide more and better service to the American public.

This provision would not permit unbridled spending by the Service. The bill provides for elaborate accounting procedures, annual audits by GAO with reports furnished to the President and Congress, and the annual submission of a business-type budget. These procedures offer a very firm system of checks and balances which will provide ample opportunities for scrutiny by both the executive branches of the Government of every penny that is spent by the Service.

And finally, the bill I propose today would increase the execution and passport fees presently set by law to \$10 and \$15, respectively. It has long been my belief that not only should this service of-

ferred by the Federal Government be self-sustaining, but also that where local and State governments assist the Federal Government in its endeavors they should be fully compensated for their services.

Approximately half of the passport applications filed annually in the United States are executed before Federal and State clerks of court.

Mr. President, a Passport Office designed to meet the demands of 1956 will not meet the demands of 1976. It is estimated that 4 million passports will be issued in 1976. In order to meet this demand we need legislation which offers reasonable yet significant changes in the Passport Office. The bill I have presented today will provide American citizens with the kind of convenient, efficient, and economical service for which they pay, and to which they are entitled.

By Mr. HUMPHREY:

S. 1364. A bill to amend the Elementary and Secondary Education Act of 1965 to provide a program of grants to States for the development of child abuse and neglect prevention programs in the areas of treatment, training, case reporting, public education, and information gathering and referral. Referred to the Committee on Labor and Public Welfare.

NATIONAL CHILD ABUSE PREVENTION ACT OF 1973

Mr. HUMPHREY. Mr. President, I am today introducing the National Child Abuse Prevention Act of 1973. This legislation broadens and strengthens the efforts of Federal, State, and local governments to develop child abuse, child neglect treatment and prevention programs.

Mr. President, it may come as a surprise and shock to many of us to realize that the highest number of deaths among children are child abuse related. Some authorities place the number of child abuse related deaths to around 700 a year, and about 50,000 to 200,000 children suffer serious physical abuse each year.

In a recent letter to me, Jule M. Sugarman, the Administrator of the New York Cities Human Resources Administration said:

In our view the problems of child maltreatment in New York City have reached extraordinary proportions. Through October, nine thousand children have been reported as allegedly neglected and abused, with the 1972 annual total likely to reach ten or eleven thousand. Reported instances of suspected maltreatment resulting in child fatalities have averaged one per week with the actual incidence perhaps as high as 125 for New York City alone.

It is for this reason that I have joined with Congressman MARIO BIAGGI from New York in sponsoring this new legislation.

The National Child Abuse Prevention Act of 1973 would amend the Elementary and Secondary Education Act by adding a separate new title on child abuse.

This title provides for an authorization of \$60 million of grants over a period of 3 years. Any State wishing to qualify for a portion of these funds must submit to the Secretary of HEW a comprehensive plan for child abuse treatment and prevention which includes:

Adequate reporting laws—either on the books or pending in the legislature—which meet the standards specified in this bill;

Programs designed to train professionals in the appropriate techniques of child abuse treatment and prevention;

Public education projects which would serve to inform citizens of the high incidence of child abuse and neglect, as well as indicating the procedures for reporting suspected cases of maltreatment to the appropriate social service and law enforcement officials;

The establishment of a central registry to coordinate on a statewide level all information relating to convictions and other court actions within that jurisdiction.

The bill also creates a National Child Abuse Data Bank within HEW. This central agency will receive and evaluate confidential reports from every State in the Nation, with a view toward determining the actual incidence of abuse and neglect throughout the country and those trends in treatment and prevention which could serve as a rational basis for developing program standards and criteria in the future.

Mr. President, my colleague from Minnesota, Senator MONDALE, has just introduced a comprehensive child abuse bill. I joined in cosponsorship of that legislation. I would hope that when my colleague holds hearings on his legislation that he would also consider the legislation I am sponsoring today.

Mr. President, I ask unanimous consent that two articles on child abuse, written by Dr. Vincent Fontana, an authority on child abuse prevention and treatment, and the text of the National Child Abuse Prevention Act of 1973, be printed in the RECORD.

There being no objection, the articles and bill were ordered to be printed in the RECORD, as follows:

CHILD ABUSE—A SOCIAL DISEASE

(By Vincent J. Fontana, M.D.)

It has been estimated that at least 700 children are killed every year in this country by their parents or surrogates. Last year the New York Central Registry reported 54 deaths, attributable to suspected parental maltreatment. The Medical Examiner's office reported 48 child homicides of which 50% did not appear in the Registry. Furthermore, 150 children's deaths were attributed to a party other than the parent, bringing the total number of deaths due to probable abuse up to approximately 200 in New York City, alone. And this figure is most likely a good reflection of true incidence.

Thousands of other children are permanently injured, both physically and mentally, in New York City in 1971 there was more than a 500% increase in reported cases of abuse and neglect within the period 1966-1970. The New York Times, February 14, 1972 reported that this year's cases will be close to 7,000, an increase in 3,000 over 1971.

While there is reason to believe that the increase in part may be a reflection of article 10 of the Family Court Act which broadened the definition of those officials mandated to report abuse, the very high estimate is certainly cause for deep concern—especially since a large number of cases go unreported at all. In a recent survey in Rochester, for example, it was estimated that 10% of all traumas in children between infancy and 14 appearing in the emergency room of Rochester General Hospital were due to

abuse, another 10% to neglect. That is 20% of all traumas admitted to the emergency room fell into the category of maltreated children.

Violence is a social disease, of epidemic and endemic proportions, which is becoming more entrenched in our population. The future of our society and the entire fabric of our civilization rests on what can be done to avoid violence. Child abuse, a symptom of the violence running rampant in our communities results in social disorganization and disintegration. This generation's battered children, if they survive, will be the next generation's battering parents. Recent published reports suggest that hard core criminals and murderers in our society were formerly battered and abused as children. Hence, child abuse is not only a time limited phenomenon, to be seen as an age-specific social problem, but it is a dynamic phenomenon, both the cause and effect of a cyclical pattern of violence, indirectly reflected in all other statistics on crime.

The list of known injuries suffered by children at the hands of one or both parents has included parents throwing, shooting, stabbing, burning, drowning, suffocating, biting, sexually violating, and deliberately disfiguring their own infants and children. By far, the greater number of injuries resulted from beatings with various kinds of implements and instruments. In addition to bare fists, the more common instruments here included straps, electric cords, TV aerials, ropes, rubber hoses, sticks, spoons, pool cues, bottles, baseball bats, and chair legs. Some children have been strangled or suffocated with pillows held over their mouths, or plastic bags thrown over their heads. A number have drowned in bathtubs.

This disease of child abuse and neglect if not properly managed, leads to critical consequences. One out of every 2 battered children dies after being returned to his parents. Most authorities have agreed that the mortality rate of such children released after treatment is as high as 50%. If the case is not suspected and reported and if the community follow-up is not initiated or if the child is returned home, recurrent injuries and admissions to hospitals are frequently encountered, the child often arriving dead in the emergency room. In addition, a large percentage of children became lame, mentally retarded, blind, or show other evidences of permanent physical damage.

Of the 10,920 murders in this country in 1966, 1 in every 22 involved a child killed by his own parents. Dr. Resnick of Cleveland, Ohio, told the American Psychiatric Association that his investigation of child murderers, which included 88 mothers and 43 fathers, indicated that the killing of children could have been motivated by an altruistic crime in order to relieve the victim of suffering by an acutely psychotic parent under the influence of drugs. Parents also were noted to have unwanted children with extramarital difficulties and financial pressures and a spouse revenge attitude in abusing, neglecting, and often killing the unwanted child was also present.

Strong considerations should be given to the thesis that treating the syndrome of the battered child may be a means of preventing, not only possible permanent physical injury, death of the child, and psychological damage, but may also be a means of breaking the "violence breeds violence" cycle. The most important aspect of this entire disease and a fact that must be faced up to is that these children that have been abused and neglected and who survive physically will have emotional and psychological crippling which is passed on to succeeding generations with a sense of rejection and violence.

In a recent publication, Richard H. Hanson, a lawyer, wrote in the American Bar

Association Journal: "So much has been written about the 'battered child syndrome', that an observer might conclude that either nothing is being done about it or that everything that can be done has been done. The law in this area is still in its genesis regardless of the volume of printed words on the subject." He emphasizes: "Doctors, Social Workers, and Lawyers can take justifiable pride in the passage of child abuse laws in every state of the union, but the difficulties that remain in terms of education for diagnosis, more effective reporting and investigation, follow-up checks on the child, and family therapy cannot be minimized. Whether we get much further depends upon pursuing the intradisciplinary approach with ingenuity and persistence."

Paulsen in a study of the legal protections against child abuse expressed concern with the reporting laws: "Reporting is of course not enough. After the report is made, something has to happen. A multi-disciplinary network of protection needs to be developed in each community to implement the good intentions of the law. The legislatures which require reporting but do not provide the means for further protective action delude themselves and neglect children." Paulsen continued: "No law can be better than its implementation and its implementation can be no better than the resources permit." We feel that this is an important statement relating directly to the core of the problem of child abuse legislation in this country.

Certainly in the last decade, the most pressing problem of child abuse has been recognized by society by the passage of these child abuse laws in every state of the United States. However, a reluctance on the part of the physician, traditional yielding to parental authority by the courts, over-lapping of investigation by social service agencies, inadequate training of social workers and allied personnel in the field of child abuse, and very poor communication between the various disciplines responsible for protecting the abused child has resulted in the lack of protection for the abused and neglected child and has given an opportunity to the battering parents to continue these vicious actions.

Only through cooperative planning between the various agencies that are responsible for child protection can the child be properly cared for and the parents rehabilitated. These decisions must be made, not only to protect the child but also to help the parents. These decisions should be made with a cooperative effort on the part of the physician, social agencies, and the courts of the community. Protection of the child, the protection of parental rights should be the ultimate aim of all of these various disciplines. The physicians, the hospital administrators, social workers, and legal advisors should all have specific guidelines to direct them in delineating responsibility in the management of child abuse and neglect cases. These decisions are most important and cannot be left to personal feelings and bias of either physician, social worker, or judge. All humans are victims of making errors when encountering difficult decisions which in this grave disease may be responsible for the future welfare of a child who is injured again and oftentimes killed. The future of the abused child, in turn, is dependent on the education and enlightenment of all people concerned with child care, upholding the laws of the various states, and finding means of reporting that will make protection of the child and subsequent investigations of child abuse more realistic and more efficient. Further progress can only be made in the prevention of this disease by proper interdisciplinary, cooperative educational programs, delineating responsibilities of the specific disciplines involved and a realistic follow-up of the cases with the subsequent determination of the effectiveness of a pro-

gram by ultimate analysis of conclusions and decisions.

Community and personal involvement by all people will bring us closer to eradicating this social disease. The New York Child Abuse Law mandates that Physicians, Surgeons, Dentists, Osteopaths, Podiatrists, Optometrists, Chiropractors, Residents, Interns, Registered Nurses, Hospital Personnel, School Officials, Social Service Personnel, Medical Examiners, Coroners, and Christian Science Practitioners report all suspected cases of child abuse and neglect.

I would like to conclude this with a statement in a recent commentary in the medical journal, *Pediatrics*—"The death of a child may be a biologic event but pediatricians know better than most men that its etiology, prevention and treatment often fit more easily into a conceptual framework based on human behavior, environment, or society. It would seem, therefore, a single child's death, whether by public or private neglect, or by a fire or an air raid, in London or Vietnam, is always a finite biological event whose social significance must concern the pediatrician. Methods to prevent or treat the underlying social pathology impinge upon moral and ethical value systems in the power structures of human societies."

THE MALTREATMENT SYNDROME IN CHILDREN

(By Vincent J. Fontana, M.D.)

It is difficult to accept the fact that in our society today inhuman cruelty to children appears to be rapidly increasing and that the perpetrators of these crimes are, for the most part, not strangers but the parents themselves.

Only in the past decade has there been an apparent awareness of "battered" children. Kempe, in his report in 1962, gave results of a nationwide survey of hospitals and law enforcement agencies indicating a high incidence of battered children in a 1-year period. A total of 749 children were reported as being maltreated; of this number 78 died and 14 suffered permanent brain damage. In New York City alone in 1969, a total of 2,169 suspected child abuse cases were reported to the State Department of Social Services in New York City: 120% increase over the 1968 total of 987. The true incidence of this disease is unknown since only a fraction of the total number of neglected and abused children are recognized or come for medical attention.

The term "battered child syndrome" has served its purpose in the identification of a child who has been excessively abused and seriously battered. Unfortunately, it does not fully describe the true nature of this pediatric life-threatening condition. An all encompassing term that could be more appropriately applied is that of the "maltreatment syndrome in children." A maltreated child often presents with no obvious signs of being battered but with multiple minor physical evidences of emotional, and at times, nutritional deprivation, neglect, and abuse. In these cases, the diagnostic ability of the physician and other paramedical personnel can prevent the more severe injuries of inflicted trauma that are the significant causes of childhood deaths.

The maltreated child is often taken to the hospital or private physician with a history of "failure to thrive," malnutrition, poor skin hygiene, irritability, a repressed personality, and other signs of obvious neglect. The more severely abused children have been seen in the emergency rooms of hospitals with external evidences of body trauma, bruises, abrasions, cuts, lacerations, burns, soft tissue swellings, and hematomas. Inability to move certain extremities because of dislocations and bone fractures associated with neurologic signs of intracranial damage are additional signs of inflicted trauma. Abdominal signs and symptoms may also be

present. Signs and symptoms pointing to the maltreatment syndrome of children, therefore, range from the simple undernourished infant with poor skin hygiene, irritability (often reported as "failure to thrive") to the "battered child"—the last phase of the maltreatment spectrum.

Diagnosis of the maltreatment syndrome is dependent on a precise history, physical examination, x-rays of long bones and skull, and social service investigation. The history related by the parents is often at variance with the clinical picture and physical findings noted on examination of the child. Physical examination, x-rays of long bones and skull, and high index of suspicion on the part of the physician will assist him in his evaluation and differential diagnosis.

Maltreatment of children by parental abuse or neglect may occur at any age with an increase of incidence in children under 3 years of age. One parent, more often the mother, is the active batterer and the other parent passively accepts the battering. The average age of the mother who inflicts the abuse on her children has been reported to be about 26 years, the average age of the father is 30 years. The battered child is usually the victim of emotionally crippled parents. The battering parent appears to react to his own child as a result of past personal experiences of loneliness, lack of protection, unwantedness, and lack of love. Some of these mothers have been raised by several foster parents during their own childhood. Divorce, alcoholism, unemployment, financial distress, perversions, and drug addiction play leading roles as "triggers" causing the potentially abusing parent to inflict abuse on his or her own children. The problem of child abuse does not seem to be limited to any particular economic, social, or intellectual level, race, or religion.

This disease, if not properly managed, leads to critical consequences. It is estimated that 1 out of every 2 "battered" children dies after being returned to his parents. Many of these battered children, if they survive and approach adolescence, begin to show signs of psychologic and emotional disturbances reported as irreversible in most cases. Karl Menninger believed that every criminal was an unloved and maltreated child. There has been expressed concern that the probable future tendency of abused children is to become the murderers and perpetrators of crimes and violence in our society.

Efforts have been made throughout the country to protect the abused or battered child by the enactment of child abuse laws in every state of the nation. Fundamentally these child abuse laws are only the first step in the protection of the abused and neglected child. It is what happens after the reporting that is of utmost importance. A multidisciplinary network of protection needs to be developed in each community to implement the good intention of these child abuse laws. The physician's duty is not only to report the cases of child abuse but also to initiate steps to prevent further maltreatment. He must become intimately involved in the social and legal actions taken to protect the child and assist, if necessary, in the treatment of the parents.

PHYSICIAN'S INDEX OF SUSPICION

History

Parents often relate a story that is at variance with clinical findings.

Multiple visits to various hospitals.

Familial discord or financial stress.

Reluctance of parents to give information.

Physical examination

Signs of general neglect, poor skin hygiene, malnutrition, withdrawal, irritability, repressed personality.

Bruises, abrasions, soft tissue swellings, hematomas, old-healed lesions.

Evidences of dislocation or fractures of the extremities.

Radiologic manifestations

Subperiosteal hematomas
Epiphyseal separations
Periosteal shearing
Metaphyseal fragmentation
Previously healed periosteal reactions
"Squaring" of the metaphysis

Differential diagnosis

Scurvy and rickets.
Infantile cortical hyperostosis.
Syphilis of infancy.
Osteogenesis imperfecta.
Accidental trauma.

PREVENTIVE MEASURES

Medical

Awareness of the problem and the diagnostic criteria.

Consider physical abuse in differential diagnosis of suspected cases.

Report suspected cases to child protective agencies or law enforcement bureaus or both.

Medical education of the graduate, post-graduate, and practicing physician.

Fulfillment of the physician's medical, moral, and legal responsibilities in the management of maltreated children.

Social

Recognition of the problem by society.
Community cooperation for better child protection.

Support of child protective agencies:
Sufficient funds.
Administrative structure with authority.
Persistent and precise complete social service investigation in suspected cases of child abuse.

Family life, education, and rehabilitation of parental delinquents.

Cooperative efforts of all social agencies in combatting the problem of maltreatment in children.

Legal

Protection of parents by the courts when presented with invalid evidences.

Protection of child by laws making it mandatory for a physician to report cases of maltreatment in children.

Protection of the physician by legislation which would prevent possible damage suits by the parties involved in any court action.

S. 1364

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Elementary and Secondary Education Act of 1965 is amended by adding at the conclusion thereof a new title, to be referred to as the "National Child Abuse Prevention Act of 1973":

"TITLE X—CHILD ABUSE"

"SEC. 1001. The Secretary of Health, Education, and Welfare (hereinafter referred to as the 'Secretary') is authorized to make grants to designated State agencies for the purpose of assisting the States and their political subdivisions in developing and carrying out child abuse and neglect treatment and prevention programs as provided in this title.

"SEC. 1002. For purposes of this Title—

"(1) the term 'State' means the fifty States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, and Guam; and

"(2) the term 'designated State agency' means an agency or instrumentality of a State which has been designated by the chief executive of such State as responsible for carrying out this Title in such State, and which has the legal and administrative powers necessary to develop, submit, and carry out (itself or through arrangements with other public or private agencies and instrumentalities) a State child abuse prevention plan; and

"(3) the term 'child abuse' has such meaning as may be given it by or under applicable State or local laws; except that in any case it shall include the physical or mental injury, severe abuse, or maltreatment of a child under the age of eighteen by a person who is responsible for the child's care and protection or who is a member of the child's household, occurring under circumstances which indicate that the child's health or welfare is harmed or threatened thereby, as determined in accordance with regulations prescribed by the Secretary.

"SEC. 1003. (a) There are authorized to be appropriated such sums, not exceeding \$60,000,000 in the aggregate, as may be necessary to carry out this Act. There are authorized to be appropriated \$20,000,000 for the fiscal year beginning July 1, 1973 and \$20,000,000 for each of the two succeeding fiscal years.

"(b) Sums made available under subsection (a) shall be used by the Secretary for making grants to designated State agencies which have submitted, and had approved by the Secretary, State child abuse prevention plans fulfilling the conditions of section 1004.

"(c) The Secretary may allocate the sums made available under subsection (a) among the several States on the basis of their respective need for assistance in preventing and otherwise dealing with child abuse and their respective ability to utilize such assistance effectively.

"SEC. 1004. In order for the designated State agency of a State to qualify for assistance under this Title, such State must have in effect a child abuse prevention plan which embodies a program for effectively treating and preventing child abuse and neglect in the State. Such child abuse and neglect treatment and prevention plan shall not be limited to the following criteria and standards but will be required to:

"(1) demonstrate (A) that there are in effect throughout the State adequate State or local child abuse laws and related laws providing for the care and welfare of children, or that the State has initiated and is carrying out a legislative program designed to place adequate child abuse laws and related laws in effect throughout the State, and (B) that such laws are being or will be effectively enforced;

"(2) provide (under the child abuse laws referred to in paragraph (1) or otherwise) for the reporting of instances of child abuse, and for effectively dealing therewith through appropriate subsequent action and proceedings, in a manner complying with all of the conditions and requirements of section 1005;

"(3) demonstrate that there are in effect throughout the State, in connection with the enforcement of the laws referred to in paragraph (1) and the conduct of the activities described in paragraph (2), such administrative procedures, such personnel trained in child abuse and neglect treatment or prevention, such training procedures, such institutional and other facilities (public and private), such provisions for obtaining any required State, local and private funds, and such related programs and services as may be necessary or appropriate to assure that the State and its political subdivisions (through the program embodied in the plan and otherwise, with Federal funds made available under this Title) will be able to deal effectively with (and will in fact deal effectively with) child abuse and neglect in the State;

"(4) provide that the designated State agency will make such reports, in such form and containing such information, as the Secretary may from time to time require, and comply with such provisions as the Secretary may from time to time find necessary to assure the correctness and verification of such reports;

"(5) provide for dissemination of information to the general public with respect

to the problems of child abuse and neglect, and the facilities and methods available to combat child abuse and neglect; and

"(6) contain such other provisions as the Secretary may require to insure that the plan and the program embodied therein will to the maximum extent feasible achieve the objective of preventing or eliminating child abuse.

"SEC. 1005. (a) (1) As a condition of the approval of any State child abuse and neglect treatment and prevention plan, such plan shall provide for and require the reporting of cases of child abuse or neglect occurring in the State, with appropriate proceedings and other activities to deal with cases of child abuse or neglect so reported in the manner specified in this section.

"(2) In any case in which a doctor, nurse, schoolteacher, social worker, welfare worker, medical examiner, or coroner finds or has reason to suspect, on the basis of a child's physical or mental condition or on the basis of other evidence, that such child is or has been the victim of (or is threatened with) child abuse, he shall promptly submit a full report thereof to the police, social service administration, or judicial authority designated in the State plan.

"(3) Any doctor, nurse, schoolteacher, social worker, welfare worker, medical examiner, or coroner who knowingly and willfully fails to report a case of child abuse or suspected child abuse as required by subsection (a) shall be guilty of a misdemeanor.

"(4) Any doctor, nurse, schoolteacher, social worker, welfare worker, medical examiner, or coroner who in good faith submits a report under subsection (a) or participates in the making of such a report shall have immunity from any civil or criminal liability which might otherwise be incurred or imposed on account of his submitting or participating in the making of such report.

"(b) (1) If the individual making a report with respect to any child under subsection (a) determines that an emergency is involved, he may (subject to paragraph (2)) hold the child in temporary custody of another person or agency, pending action based on such report, in order to protect the child's health and welfare and prevent further abuse.

"(2) Unless applicable State or local law specifically provides otherwise, no child shall be held in or transferred to temporary custody under paragraph (1) except under an order issued by a court of competent jurisdiction pursuant to a petition filed by the individual making such report. Any such order shall include a finding by the court that the person or agency in whose custody the child would be placed is competent to care for such child during whatever period is specified in the order.

"(3) Any report made under subsection (a), and any petition filed or order issued under paragraph (2) of this subsection, with respect to a child who is alleged to be the victim of child abuse, may include and apply to any other child or children living in the same household and under the same care if it is shown that such other child or children may be or become the victim of similar abuse.

"(c) (1) The police, social service administration, or judicial authority to which a report of child abuse or suspected child abuse is submitted under subsection (a) shall promptly investigate the matters involved and, if it determines that child abuse has probably occurred or is threatened, shall take the necessary steps to bring the matter before a court of competent jurisdiction for appropriate action in order to protect the child's health and welfare, and prevent further abuse of the child. The court shall have power to appoint one or more legal representatives for the child, consider in evidence the results of any medical examinations (including color photographs showing the in-

juries received), require psychiatric examinations of the parents or other persons charged with the abuse, and expedite any appeal which may be filed by the child's legal representative.

"Sec. 1006. The police, social service administration, or judicial authority to which a report of child abuse or suspected child abuse is submitted as described in section 1005(a) shall immediately refer such report to the designated State agency, which (after depositing a copy in its files in the interest of developing and maintaining a coordinated and accessible central registry for use in carrying out its child abuse and neglect treatment prevention program) shall in turn submit such report to the Secretary for use by the Social and Rehabilitation Service in the Department of Health, Education, and Welfare. The information contained in all such reports so submitted to the Secretary shall be kept strictly confidential within the Department of Health, Education, and Welfare, but summaries which cannot result in the identification of individuals with particular cases shall be prepared and published in order to inform interested persons with respect to national trends.

"Sec. 1007. The Secretary shall prescribe such regulations as may be necessary or appropriate to carry out this title.

By Mr. STEVENS:

S. 1365. A bill to amend the act prohibiting certain fishing in U.S. waters in order to revise the penalty for violating the provisions of such act. Referred to the Committee on Commerce.

Mr. STEVENS. Mr. President, I am today introducing a bill which would amend subsection (b) of 16 U.S.C. 1082, the so-called Bartlett Act, to require that all fish on board any vessel apprehended fishing in American territorial waters be forfeited. Under the current law, only fish actually taken within our territorial waters need be confiscated.

The present statute does, indeed, provide a rebuttable presumption that all fish on board were in fact taken within our territorial waters. However, my bill replaces that rebuttable presumption with a conclusive presumption that they were so taken.

It is clear both from the statutory language and from the legislative history of section 1082(b) that fish can be ordered forfeited even though the vessel itself is not confiscated.

Mr. President, this bill is necessary in light of the present situation facing our coastal fishermen. Time after time, the same nations have been caught fishing well within the contiguous zone. Only last year, two Russian fishing vessels, the 362-foot *Lamut* and the 278-foot *Kolyvan* were caught fishing along with a number of other Russian fishing craft only 9.4 miles off St. Matthew Island in the Bering Sea, and well within the contiguous fishery zone. This well-publicized incident resulted in a classic sea chase which was only terminated by the threat of force. Even the presence of an armed Coast Guard boarding party on the bridge of the Soviet vessels was not sufficient to stem their flight. Such intrusions into American territorial waters and the contiguous fishery conservation zone must be dealt with harshly.

Last year when I first introduced this bill as S. 3299, I submitted a list of some 26 vessels apprehended in our contiguous

fishery zone. I am not again going to burden the RECORD with this extensive list, but I refer the committee to my previous remarks. Although penalties have been increased, because of the continuing nature of the violations by these same nations, it is clear that the need for this amendment to the Bartlett Act remains.

At the same time I introduced the bill, I also included letters from U.S. attorneys from all parts of the United States detailing the value of the fish on board those vessels caught in their portion of the contiguous zone. Since that list was printed, I have received a letter from Mr. G. Kent Edwards, U.S. attorney for the district of Alaska. This is my home State and is the district in the United States in which by far the majority of the violations have occurred. His office has been charged with the prosecution of most of these offenders. Because this letter is, I believe, extremely illuminating, I would like to insert it in the CONGRESSIONAL RECORD to further explain the need for this bill.

I would like to note that S. 1365 specifically provides that the monetary value of the fish may be forfeited in lieu of the fish themselves. In order to insure that there is no question but that the forfeiture of the monetary value rather than the fish is to be at the discretion of the offending vessel's owner, this bill has been amended.

I request that the bill be printed in its entirety in the CONGRESSIONAL RECORD and followed immediately by Mr. Edwards' letter.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 1365

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (b) of section 2 of the Act entitled "An Act to prohibit fishing in the territorial waters of the United States and in certain other areas by vessels other than vessels of the United States and by persons in charge of such vessels", approved May 20, 1964, as amended (16 U.S.C. 1082(b)), is amended by striking out all of such subsection following "subject to forfeiture and all fish" and inserting in lieu thereof "aboard such vessel or the monetary value thereof shall be forfeited; the election to forfeit the monetary value rather than the fish themselves shall be made by the United States Government."

U.S. ATTORNEY,
DISTRICT OF ALASKA AT ANCHORAGE,
March 13, 1972.

HON. TED STEVENS,
U.S. Senate,
Washington, D.C.

DEAR TED: As near as I can determine there has been only one case in this district wherein the entire catch aboard a foreign vessel was forfeited for violation of our fishery laws. That case involved the Canadian vessel *All Star* on August 9, 1971. Although the entire catch was forfeited, due to mercury content, a large percentage of the fish had to be destroyed and the government recognized only \$2,482.64 from the sale of the remainder.

Another forfeiture occurred in a case involving a violation of our International Pacific Halibut Convention regulations by the American vessel *Auk*. Enclosed is a copy of our memorandum to the Department of Justice outlining the disposition of this case.

It appears that forfeiture of cargo is nor-

mally not sought in these cases for several reasons, the primary one being the practical question of disposal. It must be remembered that normally the cargos in question consist of bottom fish for which there is little or no market in the United States. Even in those cases where the catch might be marketable, one must face the difficult problem of how to get it there. The cost of unloading and transporting it becomes not only expensive but sometimes impractical. This is particularly true when the vessels are being held in a port along the Aleutian Chain. It is true even when a portion of the cargo consists of canned fish as was the case with the Russian factory ship *Lamut*. We have found that such cans are not vacuum sealed and that there is reason to believe that the conditions under which the fish are processed and the lack of the vacuum sealing would probably prohibit marketing of the product in the United States for failure to meet FDA standards. In view of these facts, forfeiture of a catch would normally require its subsequent destruction. Yet even destruction is not an easy task since normally there is no readily available means of taking the catch out to sea for dumping. Certainly the Coast Guard is not equipped for such duty, and such services are usually not available near the area where the foreign vessels are normally moored. Consequently, disposal of the catch would be quite costly and burdensome to the government. Thus, in the past, the effort has been to try and obtain the same impact of economic loss through the government's monetary demand in settlement of its claims against the vessel, cargo and ship's master. Certainly the cases listed below are reflective of such an attempt.

You have also requested information regarding the estimated value of fish aboard each of the vessels involved in a fishery violation. A search of our files reveals that in only a few of those cases were notations made as to the estimated value of fish aboard the vessels in question. Those files containing such information reflect the following:

Vessel	Estimated cargo value	Civil and criminal penalty
Japanese Akebono Maru.....	\$33,000	\$33,000
Japanese Kaki Maru.....	2,000	35,000
Japanese Kiyo Maru.....	78,000	45,000
Russian Voldoloz.....	6,500	50,000
Japanese Kyusho Maru.....	108,000	115,000
Total.....	227,500	275,000

As you can expect, such estimates of cargo value are really no more than very rough guesses. According to my understanding, such information is usually not available because of the impracticality of obtaining an inventory of the cargo holds. For instance in the case of the Japanese longliner *Kyusho Maru No. 5* in November of 1971 efforts were made by the government to determine the approximate cost of inventorying the entire cargo. It appeared that such action would probably run as much as \$12,000. Since the ship was moored in a Southeast port rather than at one of the remote Aleutian ports, it can be assumed that such costs would be substantially higher in most cases.

None of the above is intended to indicate that this office would hesitate to push for the forfeiture of a catch or the inventorying of the holds under appropriate circumstances. We are intent in dealing firmly with such violations and believe that the results obtained during my tenure as United States Attorney are indicative of that fact. The statistics certainly reveal a steady increase in the amounts received by the government during that time with a dramatic rise having occurred in the last two cases (the \$115,000 received from the Japanese and the quarter of a million recovery from the Russians).

If I can be of further assistance to you on this or any other matter, do not hesitate to contact me.

Sincerely,

G. KENT EDWARDS,
U.S. Attorney.

By Mr. STEVENS:

S. 1366. A bill to amend the Fishermen's Protective Act of 1967 in order to provide certain protection for U.S. fishermen and fish resources. Referred to the Committee on Commerce.

Mr. STEVENS. Mr. President, on December 23, 1971, President Nixon approved legislation (Public Law 92-219, 85 Stat. 786) which added section 8 to the Fishermen's Protective Act of 1967. This law prohibits the importation of fish or fish products from countries engaging in certain illegal activities.

This act, as passed, differs to a certain extent from S. 2191 as I introduced it. For example, S. 2191 required the Secretary of Commerce to make certification directly to the Secretary of the Treasury who would then be required to prohibit the importation without granting the President discretion as he saw fit.

Upon subsequent examination of the subject, the committees, both House and Senate, in their collective wisdom came to the conclusion that it would indeed be best for the President to have the discretion to make the final decision in this important matter of international consequence. As the hearings and deliberations on this legislation progressed, I, too, was persuaded that the President of the United States must have the discretion to act wisely as he sees fit.

However, there was another substantial difference between S. 2191 and H.R. 3304, the companion House bill. S. 2191, my bill, expanded the acts constituting grounds for certification by the Secretary of Commerce to include:

First, conducting fishing operations in the territorial waters or the contiguous fisheries zone of the United States;

Second, destroying equipment owned by U.S. fishermen;

Third, engaging in any other activity which endangers U.S. fish resources.

These three grounds are, of course, in addition to the present basis for such a certification—conducting fishing operations in a manner or under circumstances which diminish the effectiveness of an international fishery conservation program.

Because H.R. 3304 was of such importance that action was immediately required, it was deemed best, and I did not protest, to provide immediate sanctions for foreign nationals violating international fishery conservation programs. I, therefore, did not at that time press for the inclusion of the additional three grounds for certification and importation prohibition. Because H.R. 3304 is now public law and we have implemented a program to deal with these countries which callously disregard international fish conservation programs, I should like to reintroduce the essence of these additional grounds for prohibition as contained in S. 2191. I am doing

so in order that Congress may consider the necessity of inclusion of these additional grounds for certification and prohibition.

I made it a regular practice last year to place in the CONGRESSIONAL RECORD figures indicating the number of foreign fishing vessels off of my State of Alaska alone. These figures change almost weekly, but at this point, I ask unanimous consent that exhibit 1, a table of foreign fishing vessels seized between March 1967 and November 1971, for violation of American territorial waters off all U.S. coasts, be inserted in the CONGRESSIONAL RECORD at the end of my statement.

The difficulties encountered by fishermen whose gear has been totally destroyed by foreign nationals, is also well documented. In 1971, two of Alaska's most valuable and modern fishing vessels were completely stripped of their gear by Soviet trawlers off the Alaska coastline. These vessels, the *Viking King* and the *Viking Queen* and another vessel, the *M/V Endeavor*, were the subjects of considerable Soviet harassment prior to their disablement. I am attaching as exhibit 2 several of the letters I received from the owners and from the Departments of State, Commerce, and Transportation on the subject. These letters graphically illustrate not only the occurrences in the Bering Sea on March 3, 1971, and the extent of the damage suffered by all three vessels, but more importantly, the total inability of the United States to deal with the Soviet fleet.

As the attached correspondence indicates, the United States was able to exert no legal compulsion against the offenders because the incident occurred in a fish sanctuary in international waters and because our present laws permit no unilateral recourse. The loss of this gear required both vessels to travel to Seattle to be refitted. Such repairs could only be effected after a long delay. The financial loss fell not only on the vessel owners themselves, but also upon their fishermen, employees and on those who were depending upon the processing and transportation of the catch for a substantial portion of their yearly income. Fortunately, the Soviet Union agreed to negotiate concerning reimbursement of the vessel owners. However, any reimbursement at all in these cases is extremely problematical and difficult. I commend the Soviet Union for their negotiation offer. However, I believe this incident does demonstrate the need for strict laws to prevent the recurrence of just such incidents.

In October 1971, I received a letter from Mr. Ed Fuglvog, a trawler captain from Petersburg, Alaska. This letter is one of the most amazing I have received in my entire public career. It indicates in detail with attached charts an amazing destruction of gear that he personally experienced at the hands of Russian trawlers. He even enclosed a piece of Russian trawl web which one of his bottom halibut hooks brought up near the scene of his gear destruction. This web clearly indicates that not only was

the Russian fleet destroying American fishing gear in the area, but that it was also trawling for halibut and other bottom fish in violation of good fish conservation practices.

Unfortunately, there is no way to reproduce the net itself, the most graphic evidence, in the CONGRESSIONAL RECORD, however, it, along with the original letter, is available in my office files for any of my colleagues and their staffs who might wish to view this evidence. I have attached a copy of Captain Fuglvog's letter exhibit 3.

Unfortunately, these two cases are not the only examples of destruction of American fishing gear by foreign fleets. To indicate the extent of the problem, I have attached a table indicating the total damage to U.S. fishing gear by foreign fishing vessels off Alaska in 1970. This I have identified as exhibit 4.

Other types of illegal fishing activity also present serious problems and should serve as grounds for prohibition. Such activities include harassment of American fishermen and illegal and unsportsmanlike fishing activities wherever they occur and which may or may not be specifically prohibited or destructive of fishing equipment. Additional activities in this category would include the violation of foreign fish-licensing laws resulting in the depletion of U.S. fish resources.

Mr. President, these serious problems will not solve themselves. Although for many years we have been party to numerous fish conservation conventions, most such treaties require enforcement by the violator's home country. Such nations have usually been notoriously lax in prosecuting their own citizens. There are, however, several means by which we can protect our own fish resources. The first is by the enactment of tougher treaties—treaties giving coastal nations control over their own fish resources and providing enforcement authority in the coastal state wherein the violation occurred rather than in the violator's home country. I have pressed for such action by the U.S. delegation to the law of the seas conference and am considering legislation on this subject.

The second step we must take is to increase our surveillance and protective activities off our own coast. I receive weekly reports from the Coast Guard on this subject. For example, last February 23, off Alaska alone, 100 Russian fishing vessels and 55 Japanese fishing vessels were spotted. These were not in U.S. territorial waters and there was no allegation that any of them were fishing illegally or in contravention of any international treaty. However, the need for enforcement remains. These vessels were spread out from the Bering Sea to the Canadian border. Of the total number 155, 101 were in the Bering Sea and the rest were in the Gulf of Alaska and the North Pacific. To patrol the Bering Sea, an area of 873,000 square miles, the Coast Guard allocated one ship and several aircraft. South of the Aleutians, the Coast Guard has allocated another vessel and a few additional planes. These few vessels and aircraft patrol an area with a coastline

greater than that of the entire contiguous United States and have jurisdiction over fish resources at least equal to those in the remaining 49 States combined, Exhibits 5 and 6 depict respectively the summaries of U.S. Coast Guard vessel fisheries patrols off Alaska in 1970 and U.S. aerial fisheries patrols off Alaska for the same year. These tables indicate the need for additional patrol and surveillance commitments to protect Alaskan fisheries.

A third solution is the one to which this bill is addressed—the stiffening of penalties for those nations committing illegal fishing practices. Public Law 92-219 provides the muscle to act under the situations covered—the violation of a multinational fish conservation program. I have used it as a legal basis to request the Secretary of Commerce to take appropriate action. On February 6, I requested the Secretary of Commerce to suspend Japanese imports and seize the fish products currently held in storage in the United States because the fish

were undersized. In response, I received a letter from the Department of Commerce under date February 21. I would like to attach copies of both of these letters in the RECORD as exhibit 7. The problems of proof in this area are great.

However, in those situations, the United States must have the ability to act. Public Law 92-219 gave this country the ability to act in certain situations. This legislation I am introducing today will permit us to act in other cases. The physical difficulties of apprehending and prosecuting the violators make even more necessary these amendments to Section 8 of Fisherman's Protective Act.

Mr. President, I believe this bill is of the utmost importance and request that my colleagues review my statement carefully as well as the exhibits attached to it. I request unanimous consent that the text of the bill be printed in its entirety in the CONGRESSIONAL RECORD at this point and followed by the several numbered exhibits.

There being no objection, the bill and

exhibits were ordered to be printed in the RECORD, as follows:

S. 1366

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first sentence of section 8(a) of the Fishermen's Protective Act of 1967, as amended (68 Stat. 883, as amended; 82 Stat. 729, 85 Stat. 786, and 86 Stat. 1182) is further amended to read as follows: "When the Secretary of Commerce determines that nationals of a foreign country are, directly or indirectly (1) conducting fishing operations in a manner or under circumstances which diminish the effectiveness of an international fishery conservation program, (2) conducting fishing operations which are prohibited in the Act entitled 'An Act to prohibit fishing in the territorial waters of the United States and in certain other areas by vessels other than vessels of the United States and by persons in charge of such vessels', approved May 20, 1964 (16 U.S.C. 1081 et seq.), (3) destroying equipment owned by the United States fishermen, or (4) engaging in any other activity which endangers United States fish resources, the Secretary of Commerce shall certify such fact to the President."

EXHIBIT 2

PETERSBURG FISHERIES, INC.,
Petersburg, Alaska, March 4, 1971.

HON. TED STEVENS,
Senate Office Building,
Washington, D.C.

DEAR TED: We have been having one hell of a problem in the eastern Bering Sea this past week. Our two crab boats, *Viking Queen* and *Viking King*, have been fishing north of Unimak Island since January 15th. The weather has been absolutely terrible and they have fished a total of seven days the first month they were out there. None the less our fellows have kept struggling and have been picking up a few crab.

Last Saturday a Russian fleet of four stern trawlers moved in the "pot sanctuary" area and started dragging right where our gear was. As of last night, March 4th, our two boats had lost a total of twenty-four crab traps with a value of approximately \$10,000. Yesterday they reported one fleet of ten Russians and a mother ship and another fleet of seventeen Russians and a third fleet of ten Japanese plus a mother ship, all north of Unimak Island approximately 20 to 30 miles off shore.

The Coast Guard cutter "Sorrel" was in the area on Saturday and then, for some reason of prior scheduling, went south of the peninsula and headed for Kodiak or Cordova. Immediately the foreign fleets moved into the area, which they are bound by international treaty to stay out of, and started dragging up our crab traps. The first part of the week, March 1st and 2nd, there was a tremendous storm up there so our boats had to

find shelter in the Unimak Pass area but on Wednesday, the 3rd of March, they returned to the grounds and found this great concentration of foreign gear.

Finally on Wednesday, March 3rd, the Coast Guard got a plane to the area and was able to fly over the foreign fleets and photograph them in action. I understand that there will be a cutter back in this area by this weekend and hopefully this will resolve the problem. Not, however, our terrific gear losses.

I do not know how many other boats are fishing in the area but I do know that Carl Moses's boat the *Oceanic* suffered gear losses and another boat, the *Flood Tide* is reported to have lost 15 pots this week.

I think this points out several things, Ted. One is that the foreigners are not overly concerned with international agreements if they do not think they will get caught. The second is that we do not have sufficient surveillance in this area to assure that they abide by their agreements.

I feel that we should have a Coast Guard cutter stationed in Unalaska year around. Unalaska is now one of our major fishing ports. The nearest cutters to that area presently are in Adak and Kodiak which leaves a tremendously large unprotected area, not only from surveillance but also from the search and rescue viewpoint. There are probably a hundred boats fishing in this area in the winter months, including the Sand Point crab fleet, the Squaw Harbor shrimp fleet and the King Cove-False Pass crab fleet as well as Dutch Harbor and Unalaska.

I have been working closely with Ernie on

this problem this week and he has been most helpful. Unfortunately Bud Weburg was replaced last Monday and Harold Hanson has not had very much experience in this field, in addition Harry Reetze, of the N.M.F.S., has been away from Juneau so we were not able to work directly with him.

I have been working with Lew Williams to get some good press coverage on this deplorable situation and hope, with your help, to bring the whole problem into focus.

It is a tough enough job to keep a fishing fleet working in the Bering Sea in the winter time without having the additional threat of being trampled by foreign fishermen on our shores.

I would appreciate anything you can do.

Very truly yours,

BOB THORSTENSON.

PETERSBURG FISHERIES, INC.,
Seattle, Wash., April 2, 1971.

Senator TED STEVENS,
Senate Office Building,
Washington, D.C.

DEAR SENATOR STEVENS: In connection with the recent violation by the Soviet vessel CPT 4538, our vessels the M/V "Viking King" and the M/V "Viking Queen" lost respectively 35 and 5 King crab pots.

We therefore enclose our invoice for 40 pots at \$426.16 or a total of \$17,046.40.

We also feel that we are entitled to charge for lost fishing effort, which we are including in our invoice.

Very truly yours,

RICHARD C. KELLY,
Controller.

INVOICE

Soviet Vessel CPT 4538,
Embassy of the U.S.S.R.,
Washington, D.C.

King Crab Pots costing as follows:

7 x 7 pot	\$165.00
Buoys 2 at \$10.50	21.00
Buoy 1	6.00
33 fathoms nylon line at \$1.00	33.00
100 fathoms poly-prop. line at \$1.27	127.00
4 fathoms poly. prop. line at \$1.27	5.08
1 bait decanter	.66
Labor for rigging pot	22.50
Shipping cost—Suttle to Dutch Harbor	90.00
Total	426.10
40 pots at \$426.16	17,046.40

Lost catch for the above pots March 22 to May 1, 1971 (scheduled departure of Viking King for Seattle. The vessel is returning to Seattle due to the gear shortage).

Present average of remaining pots is 25 legal King Crab per pot.

Pots are hauled every third day.

Average weight per crab is six pounds.

Pots are emptied and rebaited on the average of every third day.

39 remaining days divided by 3 equals 13 pot haulings.

40 pots x 25 King Crab x 6 pounds x 13 hauling equals 78,000 lbs. King Crab lost.

78,000 lbs. King Crab at 21¢ per lb. (current price) equals \$16,380.00.

Total Invoice, \$33,426.40.

Make check payable to Petersburg Fisheries, Inc. Fishermen's Terminal, Seattle, Wash. 98119.

PAN-ALASKA FISHERIES, INC.,
Monroe, Wash., March 24, 1971.

Hon. Senator TED STEVENS,
Senator from the State of Alaska,
Juneau, Alaska.

SIR: As you are no doubt aware, we have been having serious problems with the flagrant violations of the Japanese and Russians in the negotiations pot-sanctuary area in the Alaska Bering Sea.

Two days ago, one of our vessels, the M/V Endeavor, lost 42 king crab pots that were dragged off of their original locations by these foreign vessels. These pots have a value in excess of \$350.00 per pot, which made this vessel sustain a loss of over \$14,000.00.

Other vessels, such as the Viking King, Viking Queen and Sea Spray, have had similar experiences in the last three weeks which have been protested but have not seemed to produce results on the trawling operations in this area. Major concessions were given in the negotiations with the Russians to restrict the crab quota in the Bering Sea, raising the size limitations and prohibiting trawling operation in the pot-sanctuary area. Major concessions were given in the negotiations with the Russians to restrict the crab quota in the Bering Sea, raising the size limitations and prohibiting trawling operations in the pot-sanctuary area, but needless to say, the concessions that were given to them such as, calling at U.S. Ports for refueling, supplying and R & R have been one-sided as they have not stopped and obviously, do not intend to stop fishing with the illegal gear in this area. We as the largest packer or King Crab have wholeheartedly supported the Alaska Department of Fish and Game in all the conservation methods recently taken, such as (quotas, pot limits, registration area, and Season.)

Now, we find ourselves having to take necessary steps to protect the King Crab Fishing Industry being abused by these international violations.

This has got to stop. If we can't have protective measures, such as Coast Guard

Surveillance of these areas, then these fishermen should be reimbursed for their pot losses. It seems to us that protection of one's resources is equally as important as protecting one's Country.

I can only impress on you, that we need all the help possible and all the pressures brought to bear on stopping this problem, or the individual companies and fishermen will be forced to revert back to taking the matter into their own hands in protection of their property, which could lead to serious consequences.

May I please hear from you on behalf of Pan-Alaska Fisheries, Inc. and also, as President of Northwest Fisheries Association, which represents all the major fish processors in Alaska, Washington and Oregon.

Sincerely,

RONALD JENSEN.

President.

DEPARTMENT OF STATE,
Washington, D.C., March 19, 1971.

Hon. TED STEVENS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR STEVENS: The Secretary has asked me to reply to your letter of March 4 regarding fishing by foreign vessels in a sanctuary area north of Cape Sarichef on Unimak Island, Alaska.

The areas in question is that area of the southeastern Bering Sea described in paragraph 3 of the Appendix to the Agreement of February 12, 1971 between the United States and the Soviet Union relating to fishing for king and tanner crab. In that area, "Unless otherwise agreed by the two Governments, only pots may be used to capture king crabs and tanner crabs for commercial purposes and no trawling may be conducted for other species . . ." This area, commonly known for obvious reasons as the "crab pot sanctuary", is depicted in the small chart attached, it being understood that the sanctuary includes only the waters seaward of the 12-mile fishery limit. The provisions of the February 12 Agreement regarding this sanctuary are the same as those of the previous Agreement between the two Governments on the subject, that of January 31, 1969.

On February 27, a Coast Guard air patrol, acting on a report from the American fishing vessel *Viking Queen*, observed four Soviet vessels trawling in the sanctuary area. Message blocks were dropped advising these vessels that they were operating in violation of the Agreement. The message blocks were not retrieved but the Soviet trawlers brought aboard their gear and got under way. A Coast Guard surface vessel was on the scene the following day but detected no further violations.

On March 3 a Coast Guard air patrol observed nine Soviet trawlers fishing in the sanctuary. Again message blocks were dropped to all vessels observed in violation. During the operation three of the nine vessels attempted to obscure their identification, as had one of the vessels at the time of the observation on February 27. Coast Guard surface vessels in the area during this period informed two Soviet transport ships of the provisions of the Agreement and the violations observed.

On receipt of this information, the Department called in an officer of the Soviet Embassy on March 5 to protest these violations of the Agreement. We have had no specific response so far to our representations on the subject, but there have been no reported observations of violations since those of March 3.

The provisions of the Agreement are enforced by each Government against its own nationals and vessels; no authority is provided for enforcement against nationals and vessels of the other country. In view of this, and since the area in question is part of the

high seas beyond United States jurisdiction, the Coast Guard had no authority to seize the offending vessels.

We understand that the *Viking Queen* and perhaps other vessels have reported losses of fishing gear resulting from these trawling operations and that affidavits on this are in preparation. The Department will, of course, give careful consideration to any such documents with a view to such further action as may be appropriate.

I hope the foregoing will be helpful. If there is any further information we can provide, please let me know.

Sincerely,

DAVID M. ABSHIRE,
Assistant Secretary for Congressional Relations.

DEPARTMENT OF STATE,
Washington, D.C., April 1, 1971.

Hon. TED STEVENS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR STEVENS: The Secretary has asked me to reply to your letter of March 22 regarding the continuing problem of violations by Soviet trawlers of the so-called "pot sanctuary" area north of Unimak Island. I refer also to my letter of March 19 on this subject.

On March 19, pursuant to our earlier approach of March 5, we gave the Soviet Embassy a tabulation of such sightings up to that date. The Soviet representatives informed us that the information they had received from Moscow was to the effect that investigation has disclosed no evidence of violations by Soviet vessels. We pointed out that in view of the officially confirmed reports available to us this was obviously an unsatisfactory response.

On March 24 following two additional reports of sightings of Soviet vessels trawling in the area, we again protested this matter to the Soviet Embassy in vigorous terms. Simultaneously, the Regional Director in Juneau of the National Marine Fisheries Service, Mr. Harry Rietze, was attempting to establish communications with the Soviet fleet commander with a view to arranging a meeting of the two to discuss this problem. We understand that the Soviet fleet commander has now responded and has said that he would advise Mr. Rietze shortly concerning the proposal for a meeting. The Agreements between the United States and the Soviet Union contain provisions for such meetings between local representatives for the solution of various kinds of problems.

With respect to Japanese activities, we have informed the Japanese Embassy of sightings of Japanese vessels trawling in this area. Such activities by Japanese vessels are not a violation of the Agreements with the United States. However, the Japanese Government has in the past informed us that as a domestic measure it continues to prohibit trawling by its nationals and vessels, in a larger area of the southeastern Bering Sea which encompasses the "sanctuary" area. Thus, trawling by Japanese vessels is a violation only of Japanese Government regulations, although it is obviously a matter of concern to us and we seek to bring such incidents to the attention of the Japanese authorities.

The Japanese have the same rights, of course, as American fishermen to get crab pots in this sanctuary area for the purpose of taking king or tanner crab, and we have reports that Japanese vessels are in fact engaged in this activity at the present time. It is possible, therefore, that some of the reports of Japanese vessels in the area may reflect entirely legitimate activities under the Agreements.

We trust that the latest representations and the communications between United States and Soviet local authorities will lead to a speedy solution of this problem. Mean-

while, we intend to take all practicable steps to correct the situation.

Sincerely yours,

DAVID M. ABSHIRE,
Assistant Secretary for Congressional
Relations.

DEPARTMENT OF COMMERCE,
Washington, D.C., April 13, 1971.

HON. TED STEVENS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR STEVENS: Thank you for your letter regarding Soviet trawling in areas of the Bering Sea closed to fishing with mobile gear by a U.S.-Soviet agreement renewed February 12, 1971.

On March 31, 1971, a meeting took place between the Commander of the Soviet fleet in the Bering Sea, and officials of the U.S. Coast Guard and the National Marine Fisheries Service. The U.S. Delegation included Robert McVey, Associate Regional Director, National Marine Fisheries Service, Juneau, Alaska, and Commander Schneider, Chief, Intelligence and Law Enforcement Division, 17th Coast Guard District.

Mr. McVey presented written and photographic documentation of Soviet violations in the pot sanctuary area in the eastern Bering Sea. The Soviet fleet Commander said it had been his understanding that the agreement establishing the pot sanctuary area had expired January 31, 1971. He claimed that the renewal of the agreement on February 12, 1971, was not reported to the fleet on the fishing grounds until March 6, 1971. He indicated he would investigate all violations reported after March 6, 1971, and penalize the masters of any vessels involved.

He also indicated that the Soviet fleet in the eastern Bering Sea had been removed to an area west of 170° W., which is beyond the pot sanctuary area. He gave assurances that there would be no further violations of the sanctuary during 1971 and 1972 while the present agreement is in effect.

We are very concerned about the incidents that took place before the meeting with the Soviet fleet Commander was arranged. We will continue to work closely with the U.S. Coast Guard and the Department of State in efforts to insure that compliance with the agreement is maintained in the future.

Sincerely,

WILLIAM M. TERRY,
(Acting for Philip M. Roedel, Director).

THE SECRETARY OF TRANSPORTATION,
Washington, D.C., April 22, 1971.

HON. TED STEVENS,
U.S. Senate,
Washington, D.C.

DEAR TED: This is in response to your letters of March 11 and 22, 1971 concerning sightings of foreign vessels in the Unimak Island crab pot sanctuary.

As you are aware, the US-USSR King Crab Agreement of February 12, 1971 provides that no trawling may be conducted for any species in a described area north of Unimak Island and lying seaward of the nine mile fisheries zone contiguous to the territorial sea of the United States. This Agreement also specifies that each government will apply the measures of the Agreement to its nationals and vessels. Therefore, since the sanctuary in question is considered by the United States to be a high seas area, and the Agreement does not provide for coastal state enforcement, the Coast Guard's role in this regard is to conduct surveillance of the area, investigate reports of non-compliance and collect information to support appropriate action through diplomatic channels.

Since February 27 the date the *Viking Queen* reported foreign trawlers dragging in the crab pot sanctuary, Coast Guard vessels and aircraft have patrolled the area almost continuously. Message blocks dropped from aircraft, informing Soviet trawlers that they

were in violation of the Agreement, have been ignored. Therefore, it appears that this increased presence of Coast Guard forces has had no deterring effect and that the present patrol effort provides sufficient information for diplomatic protest, the only means of censure in this situation.

However, Coast Guard and National Marine Fisheries Service representatives did arrange for a meeting with the Soviet fleet commander. During this meeting, held on April 2, the fleet commander gave a verbal, personal and a written guarantee that there will be no further violations of the crab pot sanctuary for the duration of the Agreement.

Japanese trawling in the halibut nursery grounds north of Unimak Island is a matter of concern to the United States but, again, since this fishing is in an area which the U.S. government recognizes as high seas the Coast Guard has no authority to restrict these operations. However, the Japanese Government has enacted domestic regulations which prohibit trawling in this area and, again, the Coast Guard's role is to conduct surveillance of the area, investigate reports of non-compliance and collect information to support diplomatic protest.

The matter of assigning additional Coast Guard resources to the Aleutian area is, of course, one which must be weighed against overall requirements for the deployment of resources. This is an area of continual review but, although units from other Pacific Districts are regularly assigned to supplement Alaska patrol during periods of the greatest foreign fishing activity no redeployment of a high endurance cutter or reassignment of resources from other areas is anticipated.

I hope that this information will be of help. If you find the need for any additional information, do not hesitate to ask.

EXHIBIT 3

PEETERSBURG, ALASKA,
October 20, 1971.

HON. THEODORE F. STEVENS,
U.S. Senate,
Old Senate Office Building,
Washington, D.C.

DEAR SENATOR STEVENS: The afternoon of the 24th of September we were in the process of setting our halibut gear consisting of 4 sets with 13 skates in each set. We were setting in depths from 100 fathoms to 90 fathoms and was midway through the 2nd set when we noticed some large boats ahead of us. Upon determining that they were part of a foreign trawl fleet we turned a right angle to the starboard for 5 minutes and then made the same move again so that we were headed in the opposite direction. We continued in this direction with the remainder of our gear hoping we would be at a safe distance from the foreign trawlers.

We placed a blinking buoylight on the last end of the last set and then dropped the anchor nearby. About 0230 the next morning we awoke to begin hauling our gear back. We were surprised and concerned when we discovered we were surrounded by boats for there were lights all around us. Daylight does not appear until approximately 0700. There were boats moving by us at slow speeds, apparently towing their nets as there was activity on the decks.

We hauled one set back, 13 skates, and there was very little fish of any kind caught. The previous trip in the same area yielded considerable halibut plus assorted species such as gray cod, black cod and turbot. There was about 250 pounds of halibut or close to 20 pounds per skate average which is considered extremely poor. This average held up for the remaining gear that was hauled during the day.

The next set was very much the same, except that we hauled back only 10 full skates and half of another. Three and one-half skates were lost, plus one 45 lb. anchor, 150 fathoms of buoyline, one bag and flagpole.

The next end of the third set should have been close by but was not where it should have been.

We had to run to the other extreme end and haul from there and back. The entire set was hauled back without incident. During this time Russian trawlers were towing from the deep part of the edge and up towards shallower water. The next set had eleven and one half skates left on it, a loss of 2½ skates plus 1 anchor, 150 fathoms of buoyline, one bag and one flagpole.

We conducted an extensive search for our missing gear with no sightings of any flags. Altogether we lost five skates of gear, 300 fathoms of buoyline, two 45 lb. anchors, 5 fathoms of ½" galvanized chain, two 75' buoy bags and 2 flagpoles for a total value of \$764.50. In addition we were not able to use as much gear during the trip. We had 40,600 pounds and hauled 699 skates averaging 58.1 lbs. per skate and we could have more if we had our full string during the trip. We had some spare gear with us that we used to replace what was lost. However, if we had no losses we could have hauled a total of 728 skates and at a 58.1 lb. average would have given us a total of 1685 pounds more. At 39¢ per pound, which we received for our fish, would have meant an additional \$657. Therefore, our total loss considering gear and fish would come to approximately \$1,421.50.

When it was apparent that our gear was lost we were able to read numbers on three of the boats and these were recorded in the logbook. It is not known which boat was involved in our gear because of the distance between our ends and the various trawlers. There were at least seven Russian ships in sight most of the time. The name and number of one ship was the Ternery, no. 0987. The other two were 06981 and T6-1935.

The entries in the logbook includes the loran readings IL6 and IL7 at each end of each set. When all the gear was in I notified the Coast Guard in Kodiak and gave them the loran reading IL6-3291, IL7-2788 as the position where our gear was lost. I also stated the value of the gear lost as approximately \$1,000.

We were forced to leave this area and move somewhere else. We felt we were being escorted away from the area as ship number T6-1935 moved along with us for a considerable distance.

Information constantly given to the fisherman indicates that the foreign trawlers are towing their gear above the bottom for perch, thus not tampering with bottom fish. The obvious decrease in fish caught plus the fact we had a portion of trawl web brought up on one of our hooks near where one of our ends had parted clearly shows that trawls are bouncing along the bottom and scooping up everything in its path.

The efforts of the International Harbor Commission becomes more meaningless as a regulatory body because we cannot control the areas foreign fleets operate. We are no longer operating on a sustained yield basis but on successive seasons of diminishing returns and it will become worse before it ever improves. The very slow growth rate of halibut means that it will be years before the younger fish can replace those that have been caught by foreign fleets. With the effort on pollock in the Bering Sea and the high mortality rate of the hundreds of thousands immature halibut caught in their foreign trawls they are destroying entire yearly quotas had they been allowed to mature. What is there to look forward to?

We would appreciate any effort you make that will lead to the recovery of our loss.

Sincerely,

ED FUGLVOG,
Captain, MIV Symphony.

P.S.—I have pictures of several of the vessels that were in the area which will be sent to you as soon as they have been developed.

EXHIBIT 4

TABLE 13.—DAMAGE TO U.S. FISHING GEAR BY FOREIGN FISHING VESSELS, 1970

Date	Reported by—	Alleged offender	Location	Losses and remarks
Crab gear:				
Feb. 28	Glen E. Evans, F/V Relief	Soviet freezer-trawler SRTM 8426 and 4 unidentified freezer-trawlers.	Chiniak Gully off Kodiak, 57-32N. 151-37W.	8 pots lost, 1 buoy marker damaged. Observed the SRTM 8426 trawl through crab pot string. Severed and damaged buoys surfaced behind the Soviet trawler.
Mar. 5	Oscar Joos, F/V Mordic	2 unidentified Soviet freezer-trawlers	20 miles north northeast of Ugak Island and 15 miles off Cape Chiniak.	2 pots lost. Observed Soviet vessels fishing within ½ mile of where missing pots should have been.
Apr. 18	Gilbert J. Johnson, F/V Beluga	Soviet freezer-trawlers Sargassa, SRTM 8451 and 1 unidentified.	Chiniak Gully off Kodiak, 57-28N. 151-35W.	6 pots lost. Observed subject vessels trawling very near the Beluga's gear. Coast Guard helicopter with NMFS Agent sent to investigate found 7 Soviet freezer-trawlers in area of loss.
Apr. 23-30	do	Unknown (believed to be Soviet trawlers).	do	19 pots lost. No foreign vessels seen in area during subject period but Soviet trawlers caused earlier losses in same area.
Apr. 8-27	James R. Fogle, F/V Invincible	do	do	9 pots lost. On Apr. 8 unidentified Soviet trawlers were seen fishing very near the Invincible's gear.
Apr. 26	William K. Kukahiko, F/V Aleutian Queen.	3 unidentified foreign trawlers	Eastern Bering Sea, 56-15N. 161-51W.	3 pots lost. Observed 3 trawlers fishing near his pot gear. The trawlers moved off when approached. Found Japanese tangle net entangled in 1 of his crab pots.
Apr. 29	Malcolm S. McDonald, F/V Pacific Fisher.	Unidentified Japanese vessels of Shikishima Maru fleet.	Eastern Bering Sea, 55-51N. 165-21W.	5 pots lost. Several unidentified Japanese fishing vessels and the factory ship Shikishima Maru seen in area of pot gear.
May 1	do	Unidentified Soviet trawlers	Eastern Bering Sea, 56-12N. 161-51W.	3 pots lost. Observed Soviet trawler fishing in area of pot gear.
Halibut gear: Mar. 29	Dale M. Samuelsen, F/V Eclipse	Japanese stern trawler Akebono Maru No. 15.	Central Bering Sea, 57-00N. 173-30W.	12 skates and associated gear valued at \$1,220 lost. Subject vessel trawled through Eclipse's longline gear five times. Attempts by Eclipse to indicate the presence of her gear were not understood or were ignored.

EXHIBIT 7

FEBRUARY 6, 1973.

HON. FREDERICK B. DENT,
Secretary of Commerce, Department of Commerce,
Washington, D.C.

DEAR MR. SECRETARY: I am informed that Japanese fishermen have taken substantial amounts of halibut from the area of the Bering Sea east of the abstention line. The information I have received indicates that the Japanese have taken this halibut with trawling gear in areas designated for hook and line fishing only. Also, the information indicates that the Japanese have fished this area throughout the year when the area was officially open for halibut fishing only 21 days.

Imports of halibut filets from the Japanese indicate that the size of the fish being taken by the Japanese is also in violation of the International Convention for the High Seas Fisheries of the North Pacific Ocean.

From the information I have received the Japanese exported to this country over 19,000,000 pounds of halibut in the first eleven months of 1972. Yet, the amount of halibut

that they report being taken from west of the abstention line plus their reported catches east of the line indicate that it would be impossible for them to have exported this amount of halibut to this country.

I call upon you to utilize the authority of the amendments to the Fishermen's Protective Act (PL 92-219) by suspending imports from Japan and seizing the import filets which are currently in storage in Seattle as having been taken in violation of the International Convention for the High Seas Fisheries of the North Pacific Ocean.

Cordially,

TED STEVENS,
U.S. Senator.

U.S. DEPARTMENT OF COMMERCE,
Rockville, Md., February 21, 1973.

HON. TED STEVENS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR STEVENS: This is in response to your letter of February 6, 1973, regarding the alleged illegal fishery for halibut conducted by the Japanese.

Information from a Japanese trade source indicates that Japanese land-based trawlers did, in fact, retain halibut taken incidentally to other species in the eastern Bering Sea in contravention of the conservation recommendations of the International North Pacific Fisheries Commission (INPFC).

The Japanese fish the eastern Bering Sea (east of 175° W. longitude) throughout the year primarily for pollock and other ground fishes. However, they have agreed to an INPFC recommendation that halibut taken incidentally with trawl gear be discarded. They can fish halibut in the eastern Bering during the halibut season with longline gear but must observe the 26-inch size limit recommended by INPFC. The INPFC presently does not exercise authority over fisheries conducted west of 175° W., longitude, and in this area Japanese fishermen are free to fish for halibut with trawl gear.

Representatives of the halibut industry called to our attention the fact that sub-legal halibut were being imported into the United States from Japan. The Pacific Fisheries Products Technology Center of the National Marine Fisheries Service, located in

Seattle, which examined some fillets identified as halibut from Japan, has concluded that: (1) the fillets came from true halibut, and (2) they were from undersized fish. In view of the limited sampling, the Center is planning to conduct further tests to verify their preliminary findings. However, there is no way of identifying the origin of these fish, as to whether they came from the grounds east of 175° W. longitude or west of that meridian.

With respect to the statement in the third paragraph of your letter, this needs some clarification. A total of 19 million pounds of halibut was not imported into the United States during the first 11 months of 1972. The actual amount of halibut imported totalled 14.5 million pounds, consisting of dressed fish and fillets. The 19 million pounds represented an estimate of the equivalent quantity of dressed fish after mathematically converting pounds of fillets into pounds of dressed fish.

Japan has annually submitted to the INPFC data on halibut landings for its mothership trawl and longline/gillnet fisheries. The data show that in 1971 Japan landed 12,580 metric tons (27.7 million pounds) of dressed halibut from the Bering Sea west of 175°W. longitude. They show no halibut catches east of 175°W. longitude. Data for 1972 are not presently available but should become available in the fall of 1973 at the next annual meeting of INPFC. Please note that the Japanese data submitted to INPFC only show the catch of halibut made by the mothership trawl and longline/gillnet fisheries. They do not include data from the land-based fishery.

The retention of land-based trawl caught halibut by Japanese vessels east of 175°W. longitude was brought to the attention of the Government of Japan at the November 1972 meeting of the INPEC held in Vancouver, British Columbia. The Japanese officials assured us that they would seek to control this problem.

We hope this clarifies the situation in the Japanese fishery. We are currently studying further the implications of all aspects of this matter, including your suggestion concerning the amendments to the Fishermen's Protective Act (P.L. 92-219), and will keep you informed of any developments.

Sincerely,

ROBERT M. WHITE,
Administrator.

By Mr. CHURCH:

S. 1367. A bill relating to the income tax treatment of charitable contributions of copyrights, artistic compositions, or a collection of papers. Referred to the Committee on Finance.

CHARITABLE CONTRIBUTIONS EQUITY FOR GIFTS BY AUTHORS AND ARTISTS OF THEIR OWN PROPERTY

Mr. CHURCH. Mr. President, the legislation which I introduce today is similar in intent, though not in language, to S. 1212, which I introduced during the last session of the Congress. Changes have been made in the text of the bill which I introduced last year to rectify a serious technical flaw in the legislation which would have granted tax benefits beyond the scope intended.

This bill is designed to change the Tax Reform Act of 1969's inadvertent mistreatment of authors and artists under the tax law.

As some Members will recall, it was during the consideration of the 1969 Tax Reform Act that it came to light that some political figures, both Democratic and Republican, would reap large tax benefits by donating their public papers.

It was the feeling of the Congress that, inasmuch as the taxpayers had once underwritten the making of these papers, they should not again be asked to subsidize them, via the tax code, when they were given away by a public officeholder at the conclusion of his career.

In an attempt to solve that problem, Congress changed the tax law. However, in so doing, Congress swung too broad an axe. It not only eliminated the deduction allowable for the donation of public papers by politicians, but eliminated the deduction, based on fair market value, which had previously been granted to authors and artists.

The result has been that acquisitions by libraries, museums, and art galleries have been seriously harmed. All my amendment would do is to partially reinstate the tax treatment given to authors and artists prior to the passage of the Tax Reform Act of 1969 for up to 50 percent of the fair market value of their works. The amendment makes it clear that this tax advantage will not be granted to public officials.

The intent of the Congress will thus be carried out, and the oversight in the original act in part, at least, corrected.

Since the situation has not altered since I introduced my earlier legislation, I ask unanimous consent that my remarks in support of the change in the law which appeared in the CONGRESSIONAL RECORD at the time I originally introduced similar legislation, together with the supportive material which I presented at that time, appear at this point in the RECORD.

I further request that the text of my new bill, together with an in-depth study which was done by Mr. Mike Wetherell of my staff on the background of this problem and the need for a change in the law appear at this point in the RECORD.

There being no objection, the remarks, bill, and material were ordered to be printed in the RECORD, as follows:

GIFTS TO LIBRARIES INCENTIVE ACT

Mr. CHURCH. Mr. President, I introduce for appropriate reference a bill to amend section 170(e) of the Internal Revenue Code. This bill will equate the incentive to donate certain income property to specified nonprofit and governmental institutions with the incentive to sell those materials on the open market. Even though this bill will modify the restrictions contained in section 170(e), it does not weaken the reform purpose of the 1969 Tax Reform Act, and in some cases the restrictions in this bill strengthen that purpose.

Congress created an unfortunate hardship for its own Library when it enacted the Tax Reform Act of 1969. Through changes in section 1221(3) and in coordination with 170(e), that act eliminated one of the Library's most important incentives to donations of materials that the donor had created. That incentive was the right of the donor to deduct from his gross income the market value of his own original materials when given to a nonprofit institution. At this moment, the donor may deduct only the base value of those materials—the cost of their creation—and not their fair market value. Thus, it is much more profitable for authors, composers, and artists to sell their original works than to donate them. As a result, the ability of the Library of Congress to acquire original collections has diminished greatly. I believe this bill will furnish a solution without any untoward consequences.

The problem was brought to my attention by Archibald MacLeish, former Librarian of Congress, who wrote me that—

"The principal glory of the Library is its Manuscript Division and one of the great achievements of the Manuscript Division has been its acquisition of American literary manuscripts and related correspondence. Writers, public men and others were encouraged by the Internal Revenue Code as it stood prior to 1969 to give materials of this kind to the Library and its collections made significant gains. In 1969, however, the Tax Reform Act of that year * * * (made a) distinction between donors who themselves created literary and historic documents and others who collected them. The collector, commercial or academic or whatever, received tax advantages if he gave the materials to a library; the creator did not."

Therefore, Mr. President, in the form of this bill I would like to see Congress take corrective action which will enable our own Library, and her sister institutions, to enjoy at least an equal chance, along with private collectors, to obtain original manuscripts of great historical and cultural value.

The severity of the impact of the 1969 change is startling, particularly when one examines figures furnished to me by officials of the Library of Congress. In 1967, 1968, and 1969 the Manuscript Division of the Library received an average of 313,926 manuscript pieces.¹ In 1970, only 69,803 pieces were received and many of these were of negligible value. The Manuscript Division is not alone in suffering the impact of the law's change. Indeed, the Music Division of the Library reports a decline in the number of donors from an average of 36 in the 3 fiscal years prior to the law's change, to only six in the first fiscal year after the law went into effect. One extremely important collection denied to the Music Division has received recent public attention. Because of the change in the law, Igor Stravinsky has been forced to place his manuscript collection, valued at \$3.5 million, on the open market when, prior to the change, he could have donated it to the Library and not been penalized financially. The plight of Mr. Stravinsky, and this entire problem, is discussed in an article by Irving Lowens which appeared in the January 24, 1971, edition of the Saturday Star. I shall ask unanimous consent to place this article, and one by John J. Kominski which appeared in manuscripts, in the RECORD following my remarks.

TAX REFORM: A "HALF AX" EFFECT ON MANUSCRIPT CONTRIBUTIONS

(By John J. Kominski, General Counsel, Library of Congress)

Among other changes it made in the Internal Revenue Code, the Tax Reform Act of 1969 amended Section 1221(3) by providing that letters, memoranda, and similar property (or collections thereof) are not to be treated as capital assets if they are held by the taxpayer whose personal efforts created the property or for whom it was prepared or by a person who received the property as a gift from the one who created it. Accordingly, these materials are treated as ordinary income property. In addition, the Act gave new treatment, in Sections 170(b) and (e), to the amount allowed as a charitable deduction by making donations of such ordinary income property deductible only as to basis and not as to appreciation.

These two changes, perhaps more than any others, went a long way toward deferring gifts of manuscript materials to public institutions, such as the Library of Congress (which opposed these changes), or other

¹ When the 1969 Act became effective in July of 1960, by far the greatest number of donations in that year came before the effective date.

organizations eligible for charitable treatment.

The wording of both House and Senate bills raised an immediate clamor among the literary world, and the Library of Congress felt the full impact of the growing concern among writers and composers. Attorneys, accountants, authors . . . all wanted to discuss the changes, to get the Library's views, to express doubts, resignation, and worst of all, disinterest in making future gifts. It was a reaction the Library expected, and although the Library hoped it would not be the case with all such donors, it conceded that it would most certainly be the case with those motivated in part by tax advantages.

The first seven months following passage of the Act pretty much tell the story. While other institutions have expressed a belief that changes in the law would not severely reduce private gifts, the Library felt otherwise. *Not a single new gift of a manuscript collection has been received by the Library since January 1970.* Some donors who had already established rather large collections were resigned to continue adding to them, but there were others in the same status who stopped contributing altogether. Furthermore, some authors felt the urge to express to the Library their resentment about the legislation in such creative terms that those letters, alone, may be said to have added immeasurably to the Library's collections.

More important than levity at this time, however, is an examination of just what changes in the Internal Revenue Code have brought about this reaction from authors and what those changes mean to the collector of manuscript materials.

It should be understood, at the onset, that a major purpose of the Act was to equalize the benefit of cash contributions and contributions of property which had increased in value, such as manuscripts. Under the old law, contributions of appreciated property could garner greater advantages to the donor than could a cash contribution. The old law allowed a deduction in the amount of the fair market value of the donated property at the time of the contribution and no tax became due on the appreciated value. Thus, the Congress considered that changes were necessary as a matter of equity if nothing else.

Basically, the concern of authors results from two changes made in the Internal Revenue Code with respect to gifts of appreciated tangible personal property: (1) the allowable amount of a charitable contribution of such property now depends on the character of that property; the amount may be appreciably lower for ordinary income property than for capital gain property, and (2) the term "ordinary income property", as initially stated, now includes "letters or memoranda," held either by the preparer of the person for whom such property was prepared.

On the other hand, the collector or inheritor of manuscript materials need not be so concerned. Materials which are ordinary income property in the hands of the creator-author, in most cases may become capital gain property in the hands of the collector or inheritor, and these latter individuals need only concern themselves with the particular nature of the donee charity or the use to which that institution will put donations of these materials. We shall consider the major and most drastic change first.

Prior to enactment of the changes, all donors of literary property (authors as well as collectors) could declare as a charitable deduction the fair market of the literary property at the time of the gift. No longer is that always true. The prospective donor must now consider the status of the property (ordinary income property or capital gain property) because of his relationship to it.

If the property, while in the donor's hands, is ordinary income property (as in the case of

the author himself), the deduction is severely limited to cost basis alone. This rule is applicable in all cases, and the type of charitable recipient has no bearing on the amount of the allowable charitable deduction. Therefore, when the composer, artist, or author donates his original work, or the works of others given to him,¹ including letters received, the amount of his deduction may be little more than the cost of the paper and ink or the canvas and paint. It is important to note that these rules apply to contribution of ordinary income property made after December 31, 1969, with one exception: the effective date for contributions of letters, memoranda, or similar property prepared for or by the donor is July 25, 1969.

If the property is a capital gain property (as it would be in the hands of a collector), the deduction may be as much as the fair market value at the time of the contributions, i.e., the basis (cost) to the donor plus the appreciated value while he has held it. With respect to gifts of capital gain property, however, there are certain limitations on the allowable deductions. We shall consider these limitations next.

When a taxpayer donates tangible personal property which is not used by the donee charity directly in its exempt functions, the amount of the deduction for each donation of capital gain property is computed by subtracting 50 percent (62½ percent if a corporate donor) of the amount of the gain (that would have been long term capital gain had the donor sold the property) for the fair market value of the property at the time of the contribution. By way of example:

"Donor gives an eligible library a replica of a bronze French cannon (non-operative) 75mm. World War I vintage. For some reason, the library accepts this gift. The donor is a collector of artillery art pieces, and in his hands the cannon may be considered a capital gain property. However, it is not the type of material that particular library would collect or directly make use of. Donor is limited to a deduction of the cost to him of acquiring the art piece plus one-half the value said object has appreciated while in his possession."

On the other hand, if such property is used by the donee charity toward its exempt functions, it would appear that the donor will get the full fair market value as the amount of allowable deduction; consider:

"Donor is a collector of literary manuscripts. He wishes to donate some of these materials to an eligible library as well as several letters and memoranda which he has inherited from a deceased relative. Both types of property are considered capital gain property in his hands and both are materials which the library usually collects and directly uses. Assuming he proceeds with the gifts as planned, donor may deduct the full fair market value of these materials at the time of the gift."

The ceiling on gifts of cash was raised by the Act to 50 percent of an individual donor's adjusted gross income (it says at 5 percent for corporate donors) where the charity so qualifies, such as public charities (like the Library of Congress) and certain foundations. However, gifts of capital gain property to qualifying charities remain subject to a deduction ceiling of 30 percent of an individual donor's adjusted gross income. At present the only method by which the taxpayer may deduct contributions of appreciated property under the 50 percent maximum deduction ceiling is if he elects to take the unrealized appreciation in value into account for tax purposes—that is, "reduce the amount of the contribution".

¹ As used here, "gift" would not include inherited property. Inherited property is capital gain property. Thus, a widow of an author may get the full tax advantage if she inherits the manuscript material.

An individual taxpayer may still carry over excess capital gain property deductions to his next five years, and the carryover retains its 30 percent status for purposes of computing the allowable charitable contribution deductions in these carryover years.

There are many other considerations that should concern a prospective donor of manuscript materials, all of which give immediate credence to the recommendation that the donor should seek professional advice about his own particular situation and the status of the institution to which he intends to make a gift. For example, some manuscript materials ordinarily thought of as capital gain property may, because of the short period they have been held (less than six months), be considered ordinary income property. On the other hand, some manuscript materials may be used in a donor's trade or business; in which case, only that portion of the gain (if the property is sold at its fair market value at the date of contribution) which is subject to depreciation recapture rules would be considered ordinary income property, and any gain above this amount is treated as capital gain property.

At this point it should be clear that of two groups of prospective donors, collectors and authors, only the latter has experienced more acutely the "Congressional axe". In summary, then, the Tax Reform Act of 1969 has left us with three methods of treating charitable contributions:

1. *Cash contributions.* The new law now permits deductions of up to 50 percent of the donor's adjusted gross income, but gradually phases out the little-used "unlimited charitable deduction" provisions. This change should serve to increase cash contributions.

2. *Appreciated property of the ordinary income type.* The Act has created drastic change in this area; contributions of ordinary income property (such as literary property, including letters and memoranda) by creators are greatly discouraged. Early statistics appear to confirm this conclusion.

3. *Appreciated property of the capital gain type.* The new legislation has continued favorable treatment in this area; philanthropic inducement still permits a donor to deduct gifts of such property at their fair market value without recognizing any gain for tax purposes. There are two limitations; (1) to get the full fair market value, the donee charity must be able to use the gift directly in relation to its tax exempt purposes, and (2) the ceiling on such gifts is 30 percent of the donor's adjusted gross income. With respect to this latter limitation, however, a special option permits a donor to deduct gifts of such property up to 50 percent of his adjusted gross income if he reduces the value of his gift by one-half (½) of the appreciated portion. *Caveat:* if a taxpayer exercises this option, all deductions involving appreciated property for that year, including deductions carried forward from earlier years, must be similarly reduced. A donor may prefer this alternative when a gift property has a substantial fair market, but that part of the value which is appreciation is small.

MUSIC: WHY TAX REFORM SHOULD BE REFORMED

(By Irving Lowens)

A few months ago, Igor Stravinsky's original manuscripts and personal papers were put up for sale on the open market. The price tag was \$3.5 million, and considering their importance, anyone buying them would be getting a bargain.

These days, it costs \$25 million per mile or more to build a superhighway. Are the thousands of items offered by Stravinsky, including the manuscripts of compositions which altered the entire history of 20th century music, worth less than one-fifth of a mile of concrete?

The Stravinsky papers have not yet been sold as of this writing. If you want to snap them up, Lew D. Feldman (30 East 62 Street, New York 10021) will be glad to accept your \$3.5 million.

Meanwhile, the Library of Congress, to whom Stravinsky had been presenting his papers from year to year, sits on the sidelines biting its fingernails and hoping that some rich and civic-minded collector will buy them and donate them to the Library as a gift. The Library doesn't have \$3.5 million with which to buy the papers, in which the Soviet Union reportedly has shown a lively interest.

The appearance of the Stravinsky papers on the open market seems to have been a direct result of certain strange provisions of the Tax Reform Act of 1969. Formerly, donors of literary properties (authors and composers as well as collectors) could declare as a charitable deduction the fair market value of the literary property at the time of the gift.

In other words, if Stravinsky gave to the Library of Congress as a gift his own manuscripts which would bring \$3.5 million if sold, he could claim a deduction of that amount on his income tax return.

This is no longer true.

According to Section 1221(3) of the Internal Revenue Code, such things as music manuscripts, literary manuscripts, letters, memoranda and similar property, when still in the hands of the person whose personal efforts created the property, are no longer entitled to this treatment. If a composer wants to give them away to a library, law holds that these properties "cannot be considered capital assets. They must be considered ordinary income properties, and as such, their value is established on a cost basis."

Thus, Stravinsky's original manuscripts in his hands are worth little more than the cost of paper and ink, regardless of their fair market value.

Ironically, exactly the same materials are considered capital assets when they are in the hands of a collector. This means that their value is established on the basis of the market. Thus, the collector giving the Stravinsky materials to the Library of Congress as a gift could legitimately claim a \$3.5 million tax deduction, if that is what he paid for them; Stravinsky himself could claim nothing.

The Tax Reform Act, signed by President Nixon in December, 1969, was made retroactive to July 26, 1969. It was the intent of the amendments discussed here to make it impossible for former presidents (and especially Lyndon Johnson) and politicians to claim large income tax deductions by making gifts of their personal papers to presidential libraries.

The proponents of the Tax Reform Act had no special animus towards authors and composers, to say nothing of libraries, but the result of their work has been to penalize creators and to wreak havoc with acquisitions policies in scholarly institutions.

The Library of Congress formerly leaned heavily upon the tax advantage provisions of the old law in building up its magnificent collections of manuscript papers. Suddenly, their source of supply was shut off. Writing in July of last year, John J. Kominski, General Counsel of the Library, stated that "not a single new gift of a manuscript collection has been received by the Library since January, 1970."

The same story is being repeated in libraries across the country; the tax revision is looming as a major disaster.

Every January, a report on notable music acquisitions during the previous fiscal year (which runs from July through June) is printed in the "Quarterly Journal" of the Library of Congress. At first glance, the 1971 report, written by Edward N. Waters of the music division, looks very similar to that of

1970. But there is an ominous reference, in the second sentence, to the fact that "patterns of growth differed somewhat from the previous year," and a close reading of the section devoted to manuscripts of living composers shows how.

Discounting original manuscripts added to the collection as the result of commissions from the Coolidge and Koussevitzky Foundations (their legal status is still unclear), the division received as gifts manuscripts from only eight composers—Richard Adler, Radle Britain, Aaron Copland, Robert Evett, Don Gillis, Robert Parris, Igor Stravinsky and Edwin John Stringham—between July 1, 1969 and June 30, 1970. Several of these gifts were received before July 26, 1969.

Compare this to the Waters report on the previous year's acquisitions in the January 1970 "Quarterly Journal" and the change becomes painfully clear.

Between July 1, 1969 and June 30, 1969, the music division received gifts of manuscripts from 28 composers—Hugh Aitken, William Bergsma, Elliott Carter, Aaron Copland, Paul Creston, Alvin-Etler, Robert Evett, Johan Franco, Edmund Haines, Howard Hanson, Roy Harris, Alan Hovhaness, Karel Husa, Ulysses Kay, Meyer Kupferman, Ezra Laderman, Benjamin Lees, Nikolai Lopatnikoff, Teo Marcero, Peter Mennin, Robert Merrill, Darius Milhaud, Vincent Persichetti, David Raksin, Gardner Read, William Schuman, Robert Starer and Igor Stravinsky.

Perhaps even more alarming than the drastically curtailed list of donations during the first full years the Tax Reform Act was in effect is the degree to which the Library's search for new and important collections of papers and manuscripts has been hobbled.

When the Library does find a prospective donor whose papers it feels are important enough to warrant inclusion in the national collections, it is very careful to advise him that gift at this time of materials of his own creation may not benefit him taxwise. A copy of the General Counsel's "Memorandum on the Tax Reform Act of 1969" is furnished with the suggestion that he may want to discuss the matter with his accountant or lawyer.

Currently, the Library is urging prospective donors to consider placing their papers in the collections on a deposit basis. This means that the owner would retain legal title to them while, at the same time, they would be made available for research purposes.

It does not require much imagination to see this as a holding action until the problem caused by the new provisions of the Internal Revenue Code has been solved.

As serious as is the situation in the music division, it appears to be worse in the manuscripts division. The Tax Reform Act of 1969 strikes directly at many of that division's donors.

"The effects of the law have been damaging to the acquisition program of the manuscript division," stated Mary C. Lethbridge, the Library's information officer. "In 1969 several important collections were here on deposit pending the results of tax reform. When the provisions of the law were made known one playwright withdrew his papers immediately. An actor also withdrew material on deposit, although some of his papers remain as earlier gifts to the Library. A poet requested the return of his deposited materials but was persuaded at last to let them remain on deposit. A novelist wrote an angry letter of protest, implying that his periodic gifts to the Library were at an end."

"Although the collections cited are in the arts where self-creation of valuable material is more obvious, the chief loss was a political-judicial collection for which a gift in 1969-70 had been planned."

"In 1970 there have been virtually no gifts of self-created material, although material has been received on deposit. Such deposits

have come from long-term donors. No deposits of material for which there was no prior history of negotiation and/or earlier gift occurred. For example, one earlier donor deposited extremely valuable material in 1970 but gave nothing. A woman prominent in the theater gave only the segment of her papers identifiable as inherited; the remainder is on deposit."

The music division, too, has had its withdrawals of materials on deposits. It too has had its angry letters of protests. It too has received no deposits of material for which there was no prior history of negotiation.

No one in the Library is optimistic about future acquisitions of gift of manuscripts and personal papers belonging to live creators until the cost basis for tax deductions, established by the Tax Reform Act of 1969, can be returned to the fair market value basis of earlier years.

The ill-considered amendments to Section 1221 (3) of the Internal Revenue Code damage both creators and institutions of learning. If Stravinsky is to reap any financial benefit from his own manuscripts, he is forced to sell them. If the Library of Congress is to have such national treasures in its collections, it is forced to buy them. Neither of the principals involved does this willingly; the country as a whole loses because of the situation.

The National Music Library Association holds its annual meeting in Washington at the Dodge Hotel beginning next Wednesday. I hope that many of the librarians assembled here, whose institutions have been hurt just as much as the Library of Congress by the new tax provisions, will take advantage of their presence in the Nation's Capital to let their representatives in the Congress know their feelings in this matter.

S. 1367

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 170(e) of the Internal Revenue Code of 1954 (relating to certain contributions of ordinary income and capital gain property) is amended by adding at the end thereof the following new paragraph:

"(3) SPECIAL RULE FOR CERTAIN CONTRIBUTIONS OF COPYRIGHTS, PAPERS, ETC.—In the case of a charitable contribution of a copyright, a literary, musical, or artistic composition, a letter of memorandum, or similar property by a taxpayer described in paragraph (3) of section 1221 to an organization described in clause (ii), (v), or (vi) of subsection (b) (1) (A) the reduction under subparagraph (A) of paragraph (1) shall be only one-half of the amount computed under such subparagraph (without regard to this paragraph) but only if the taxpayer receives from the donee a written statement that (A) the donated property represents material of historical or artistic significance and (B) the use by the donee will be related to the purpose or function constituting the basis for its exemption under section 501 (or, in the case of a governmental unit, to any purpose or function described in subsection (c) (2) (B)). This paragraph shall not apply to letters and other papers collected by a public official during his term of office."

(b) The amendment made by this Act shall be applicable to charitable contributions made after the date of the enactment of this Act.

TAX TREATMENT OF DONOR-CREATORS UNDER THE TAX REFORM ACT OF 1969: THE CASE FOR REFORM

(By Mike Wetherell)

One of the major changes in the tax law accomplished by the Tax Reform Act of 1969¹ was in the field of charitable contributions.² One of the more interesting changes in the

Footnotes at end of article.

charitable contributions field was the new tax treatment afforded to "a copyright, a literary, musical or artistic composition, a letter or memorandum or similar property" held by the creator of such property⁵ or "in the case of a letter, memorandum, or similar property, a taxpayer for whom such property was prepared or produced."⁶ Little has been written in legal journals regarding this particular aspect of the Tax Reform Act of 1969.⁵

This paper will deal with this area of the Act and with its effect upon the creator-donor. It will also deal with the effect of the new provisions of the code upon charitable organizations which are especially interested in receiving donor created contributions: our libraries, museums and art galleries. In addition, it will pose several possible alternatives to the tax treatment currently afforded the donor-creator as a result of the 1969 changes in the tax code.

A BRIEF HISTORY OF THE TAX REFORM ACT OF 1969

"In 1967 155 individuals or couples with incomes in excess of \$200,000 paid no federal income tax. Of that group, 21 had incomes exceeding \$1 million."⁷ That statistical fact was released by Secretary of the Treasury Joseph Barr as he was about to leave that post with the outgoing Johnson Administration following the election of 1968.

Following close behind Secretary Barr's revelation was a report compiled by the Treasury Department in the last years of the Johnson Administration⁸ which explained that the no-tax-on-high-income phenomena was largely the result of the use of one or more of four tax provisions in the Internal Revenue Code.⁹ One of the areas singled out was the tax treatment of gifts of appreciated property to charity.

This concern over the tax treatment of charitable contributions of appreciated property was carried over when, in April of 1969, the Nixon Administration sent its tax reform proposals to Congress.⁹

The proposals of both the Johnson¹⁰ and Nixon¹¹ Administrations addressed themselves to the problem of the tax benefit that was derived from the contribution of ordinary income or short term capital gain property to charity. The studies pointed out that contributions of property of this nature granted the taxpayer a double advantage: (1) he was not taxed on the ordinary income earned with respect to the property when it is given to charity and, (2) the contributor received a tax deduction for the full fair market value of the property he contributed.¹²

Both the Johnson and Nixon Administration Treasury Departments recommended similar though not identical solutions to the problem.¹³

The House Ways and Means Committee agreed with the methods proposed by both the Johnson and Nixon Administrations in the treatment of gifts of ordinary income property or short term capital gain property to charity.¹⁴ However, the House Ways and Means Committee went a step further. The bill reported by the Committee eliminated the deduction of appreciation in value for all tangible personal property, not just ordinary income and short term capital gains property.¹⁵ The House bill also incorporated language which changed the definition of a capital asset to specifically exclude "a letter or memorandum, or similar property"¹⁶ thus subjecting such property to the same tax treatment which had been accorded to copyrights and "literary, musical or artistic composition(s)"¹⁷ under the Code.

When the Tax Reform Act¹⁸ came before the Senate Finance Committee, the treatment of gifts of appreciated property to charity was discussed at length. Senator Jacob

Javits of New York, in his testimony, pointed out:

"I am also concerned about the proposed treatment of gifts of appreciated property. This represents . . . one of the major inducements for gifts of valuable works of art and literature to our libraries, universities and museums. Frequently these provisions are the very reason why such works become available to the public rather than remaining in private collections where they can be enjoyed by only a few."¹⁹

Dr. Ernest L. Wilkinson, the President of Brigham Young University, expressed his opposition to the provisions of the House-passed bill as it affected contributions of manuscripts and art objects by stating:

" . . . The Bill not only forces the undesirable Hobson's choice, upon the donor who gives appreciated real or intangible 'capital gain' property in the future interest form, it requires the same bad choice for a present gift of tangible personal property which has appreciated in value. This would effectively eliminate gifts of valuable books to universities and college libraries and it would eliminate gifts of valuable art objects to museums supported by such institutions . . ."²⁰

In addition, the President of the American Association of Museums²¹ and the President of the Association of Art Museum Directors²² testified that the elimination of the tax advantage for contributors of art objects would have serious and detrimental effects upon their members. It was also pointed out that one of the most serious problems involved in tax deductions for this type of gift, that of valuation, had been overcome successfully by Internal Revenue Service endorsement of the Advisory Panel on the Valuation of Works of Art to the IRS. That panel of highly respected experts in the art world had proven to be instrumental in bringing under control the problem of determining just what a contributed work was worth for tax deduction purposes.²³

The bill as reported out by the Senate Finance Committee made changes in the House treatment of gifts of appreciated property to charity.²⁴ The Senate returned to the recommendation set forth in the Nixon Administration tax reform proposals.²⁵ The Senate version provided that to the extent gifts of property which had appreciated in value would be treated as ordinary income or short term capital gain, if the property were sold, the charitable deduction would be reduced by the full amount of the appreciation in value. The Committee pointed out that examples of this type of property would be "letters, memorandums, etc., given by the person who prepared them (or by the person for whom they were prepared)."²⁶ The Senate Committee also reinstated the tax deduction on the appreciated value of tangible personal property not donated by the creator.²⁷ In so doing, the Committee made a rather strong statement of its policy regarding the tax treatment of donations to charity of works of art, paintings and books not produced by the donor:

"The Committee considers it appropriate to treat gifts of tangible personal property (such as paintings, art objects and books not produced by the donor) to public charities and schools similarly to gifts of intangible personal property and real property . . ."²⁸

The Tax Reform Act of 1969, as finally enacted, carried over the Senate view of how to treat gifts of appreciated property which, if sold, would result in ordinary income (no deduction for the appreciated value)²⁹ and the allowance for the deduction of the full appreciation in value, with certain specified exceptions for gifts of tangible personal property produced by one other than the donor.³⁰

The difference in treatment experienced by the creator-donor in comparison to other contributors of appreciated property in this

situation is obvious. If an artist has a painting valued at \$500, he has three choices: (1) he can keep the painting; (2) he can sell it at its \$500 value; or (3) he can donate the painting to charity.

If he keeps the painting, he is taking the same risk you do if you were to buy it as an investment. He may feel he can get more than \$500 and, like any man holding property which he expects to rise in value, wait until he feels the price is right before selling. If he sells the painting, he receives an immediate \$500 of ordinary income upon which he must pay regular income tax rates as any wage earner does. If he gives the painting to a charity he can deduct the cost³¹ of his paint and canvas or other materials from his income tax as a charitable contribution. The last choice gives him nowhere near the return he might expect in the case of the first two alternatives. In short, the financial impetus for him to contribute his painting, or in the case of an author, his manuscripts, to a charity is much smaller under the Tax Reform Act than it was under the prior law.³²

On the other hand, if someone should purchase the painting at a price of \$500 and it increases in value to \$900, the third party can contribute the painting to an art museum and receive a \$900 tax deduction. The deduction that the third party can gain is totally denied the artist even though the identical piece of property is involved in both transactions.³⁴

In summation, the current status of the tax law as it affects the creator-donor is:

1. Section 170(e) of the Internal Revenue Code requires that any charitable contribution deduction claimed must be reduced by the sum of "the amount of gain which would not have been long term capital gain if the property contributed had been sold by the taxpayer at its fair market value (determined at the time of such contribution . . ."³⁵

2. Section 1221 of the Internal Revenue Code specifically exempts from the definition of Capital Asset (and thus prohibits capital gains treatment of) "a copyright, a literary, musical or artistic composition, a letter or memorandum, or similar property held by—(A) a taxpayer whose personal efforts created such property (B) in the case of a letter, memorandum, or similar property, a taxpayer for whom such property was prepared or produced, or (C) a taxpayer in whose hands the basis of such property is determined, for purposes of determining gain from sale or exchange, in whole or in part by reference to the basis of such property in the hands of a taxpayer described in subparagraph (A) or (B)."³⁶

3. Section 170(e) is keyed to the Capital Asset definition section. The result of exempting the materials included in Section 1221 (3) (A), (B) and (C) from the definition of a capital asset is to make income derived from their sale ordinary income and thus contributions of such material can be deducted as a charitable contribution only to the extent of the donor's basis in the property. No appreciation factor is allowed to be deducted.

THE EFFECT OF THE TAX REFORM ACT OF 1969 ON DONATIONS OF DONOR CREATED PROPERTY

Quite often, the dire effects predicted by those who oppose changes in the tax law do not materialize. The taxpayers affected seem to adjust remarkably well and business seems to carry on, if not as usual, at least tolerably well. Unfortunately, this has not been the case with donations of gifts by authors, artists, and public figures of their manuscripts, paintings, and papers respectively. From the evidence that I have been able to gather it appears that the dire warnings given regarding donations from these individuals to art galleries, museums, libraries and other charitable institutions

⁵ Footnotes at end of article.

were prophetic and that the effect feared by those who opposed the change appears to be materializing.

A news story in the Washington, D.C., Sunday Star, stated that as of January 24, 1971, the General Counsel of the Library of Congress had noted that "not a single new gift of a manuscript collection has been received by the Library since January 1970."³⁷

The main thrust of the article by Irving Lowens was the tremendous loss suffered by the Library of Congress and the nation's musical heritage, when the late Igor Stravinsky placed his musical papers and manuscripts up for sale on the open market for a reported price of \$3.5 million. In the past Stravinsky had made gifts of his papers to the Library of Congress and taken the fair market value of the papers as a deduction against his income tax.³⁸

Lowens maintained that the loss of the papers to the Library of Congress was probably "a direct result of certain strange provisions of the Tax Reform Act of 1969."³⁹

In addition, Lowens stated, "The same story is being repeated in libraries across the country; the tax revision is looming as a major disaster." The evidence would seem to bear Mr. Lowens' gloomy prediction out. The Library of Congress information officer was quoted as saying "The effects of the law have been damaging to the acquisition program of the manuscript⁴⁰ In 1970 there have been virtually no gifts of self-created material, although such material has been received on deposit. Such deposits have come from long-term donors. No deposits of material for which there was no prior history of negotiation and/or earlier gift occurred." Some individuals who had left material at the Library, intending to donate them later, withdrew the material.⁴¹

However, some humor did prevail even in the aura of disaster. As the general counsel of the Library of Congress put it, "some authors felt the urge to express to the Library their resentment about the legislation in such creative terms that those letters, alone, may be said to have added immeasurably to the Library's collection."⁴² The general counsel, however, made it quite clear that to his mind the effects upon donations to museums, libraries, art galleries and other charities had been serious under the law, "... contributions of ordinary income property (such as literary property, including letters and memoranda) by creators are greatly discouraged. Early statistics appear to confirm this conclusion."⁴³

A chart prepared by the general counsel for the Library of Congress dramatically illustrates the detrimental effect that has resulted from the change in the law. The chart traces gifts of musical and other manuscripts to the Library of Congress before and after passage of the Tax Reform Act of 1969.

Donations of self-generated manuscripts

Donations by year, 1965-1970

Music Division: Because of the nature of these gifts, emphasis is placed not only on the number of self-created musical manuscripts given but the number of donors as well.

Fiscal Year 1965-1966, 2 donors, 94 music mss.

Fiscal Year 1966-1967, 35 donors, 371 music mss.

Fiscal Year 1967-1968, 37 donors, 174 music mss.

Fiscal Year 1968-1969, 36 donors, 280 music mss.

Fiscal Year 1969-1970*, 6 donors, 62 music mss.

Manuscript Division: Although the number of donors is usually unaffected, many donors give one or two or just a few manuscripts;

therefore, the emphasis in this area must be placed on the number of pieces which usually evidence larger collections.

Calendar 1967, 34 donors, 177,347 mss.

Calendar 1968**, 43 donors, 180,804 mss.

Calendar 1969, 39 donors, 283,528 mss.

Calendar 1970** 34 donors, 69,803 mss.

(The above information is based on statistics compiled by the Music Division and the Manuscript Division in cooperation with the Library's Exchange and Gift Division.)

(Explanations are supplied by Counsel.)

JOHN J. KOMINSKI,

General Counsel.

The Library of Congress has been by no means the only institution to suffer from the changes in the tax law. In a memorandum circulated by the University of Oregon Library, located in Eugene, Oregon, the Librarian stated, "Gifts of manuscripts and art created by an author, composer or artist himself have been drastically reduced by the Tax Reform Act signed into law in December 1969."

A prominent artist informed the Bureau of Reclamation of the Department of the Interior which was gathering art for a major showing that he could not contribute to the show.

"A new law, whereby art collectors and speculators are privileged to such benefits (the fair market value deduction) and the creators of this wealth are denied, (sic) also the U.S. government suffers, the Institutions, Libraries, museums, Universities, and etc. Who profits by this unjust law? . . . You will find that other artists will turn you down also . . ."

Arizona State University's Librarian Karl B. Johnson noted, "There have been no author-donation of manuscripts to our manuscript collection since the passage of the above act."

The evidence indicates that serious damage may be done to our nation's art, museum and library system by restricting the right of artists and authors to contribute their paintings and papers to appropriate institutions and claim as a deduction the fair market value of these materials as they could prior to the enactment of the Tax Reform Act of 1969.

WHY WAS THE LAW APPLYING TO GIFTS GIVEN BY THE CREATOR CHANGED?

We have already seen in the brief history of the passage of the Tax Reform Act of 1969 that there was a great deal of concern expressed in the recommendations of the Treasury prepared by both the Johnson and Nixon Administrations over the tax treatment of gifts of appreciated property to charity. It is also clear that one of the reasons that appeared later were the revelations in the Wall Street Journal that prominent political figures, including former President Johnson and former Vice President Humphrey, were reaping or planned to reap tax benefits under the law.

Where prominent public figures are involved in the use of tax benefits considerations of a political nature cannot help but enter the picture. (Note, for instance, the recent concern over the fact that Governor Reagan of California took advantage of tax deductions which resulted in his paying no California income taxes.) There can be no doubt that in the case of this area of the law political considerations entered into the final treatment of gifts of ordinary income property to charity.

In addition, there was a tremendous amount of indignation expressed by Members of Congress over the fact that by making a gift of appreciated property to charity an individual could receive more "income" than if he were to sell the property and pay taxes on his gain. This concern was expressed in the Johnson Treasury Department recommendations,⁴⁴ in the Nixon Treasury recommendations,⁴⁵ in the House report on the bill,⁴⁶ in the Senate report⁴⁷ and in the final

analysis of the Tax Reform Act as prepared by the staff of the Joint Committee on Internal Revenue Taxation.⁴⁸

As the staff of the Joint Committee put it in its *General Explanation of the Tax Reform Act of 1969*:

"General Reasons for Change—The combined effect of not taxing the appreciation in value and at the same time allowing a charitable contributions deduction for the fair market value of the property given produced tax benefits significantly greater than those available with respect to cash contributions . . . As a result in some cases it was possible for a taxpayer to realize a greater profit by making a gift of appreciated property than by selling the property, paying the tax on the gain, and keeping the proceeds."⁴⁹

To cure this defect the law provided that ordinary income type property which was donated to charity by the creator could not be deducted to the extent of its appreciation in value.⁵⁰ But at the same time the law allowed a full deduction where the property was donated by someone other than the creator to a charity if the donation was related to the charitable donee's purpose. Even where the gift is made to a qualifying charity which would not use the material for its regular operations but would sell it for needed funds the non-creator donor can take a deduction of up to 50% of the appreciation in the value of the property.⁵¹

Certainly with regard to the artist the Congress has admirably fulfilled its hopes. He can no longer donate property which he has created and receive benefits greater than if he had sold it and paid taxes. The same is true of the author or certain holders of letters and memoranda with market value. However, with respect to the collector or speculator in these items the same tax benefit exists.

Thus the same type of property receives different tax treatment, based not upon the nature of the property but upon the status of the person who holds it. That in itself is not an inherently inequitable concept. For instance, the treatment of a painting held by the artist who created it as ordinary income property⁵² rather than granting it capital gains status would seem to be fair inasmuch as the sale of the property will obviously be "ordinary income" of the clearest kind to the artist.⁵³ That classification has been made in the Code for some time.⁵⁴

But while such an argument can be made for treatment of property of the creator as ordinary income for determining the rate of taxation applicable, is the same argument valid when applied to the charitable contributions section of the Code? When we discuss a charitable contribution deduction we are discussing an incentive to give to charity property which will be of assistance to the charity. It would seem that the guiding principle then should be the value of the gift to charity as determined by the fair market value standard and not the secondary value of the property involved to the donor as determined by his relationship to it. In the case of the treatment of the property as ordinary income, we are quite properly dealing with the relationship of the holder to the property. But it would seem that in the charitable contribution field the Code's concern should be the relationship of the property to the charity. Once it has been determined that our tax laws will be drawn so as to allow tax deductions for gifts to charity based upon fair market value, or some percentage thereof,⁵⁵ is it wise to superimpose upon that structure the distinction between ordinary income and long and short term capital gains which has its origin in another section of the tax code, drawn with an entirely different tax policy in mind? Since it has been determined that it is the nation's policy to promote gifts to charity, and since it has been determined that the gifts shall be

valued at fair market value.⁵³ It would certainly seem to follow that any gift to charity should be so valued, regardless of the status of the donor.

PROBLEMS IN THE VALUATION OF ART OBJECTS, MANUSCRIPTS AND MEMORANDA

One of the reasons which the House Ways and Means Committee gave for its rather drastic treatment of donations of art objects, manuscripts and memoranda was that this class of property was extremely difficult to value. The Committee stated that there was evidence of significant overvaluation for tax purposes and felt that it was best for the entire deduction structure in this field to be eliminated.⁵⁷

Art objects are difficult to appraise.⁵⁸ Even experts with long experience in the field can disagree on the value of a painting, and a painting determined at one time to be valueless can easily increase in value with the passage of time or the increased recognition of the artist.⁵⁹

However, at the very time Congress was considering the tax reform legislation, significant gains were being made by the Internal Revenue Service in solving the problem of the determination of value, for tax purposes, of art objects when, in February of 1968, the IRS formed the Art Advisory Panel to the Commissioner of Internal Revenue.⁶⁰

The standard of value which governs appraisal of art objects and similar property donated to charity is "fair market value." Fair market value, as defined by Section 1.170-1c(1) of the Income Tax Regulations is

"... the price at which property could change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or sell and both having reasonable knowledge of relevant facts. . ."

The standard of fair market value in appraising the value of gifts to charity seems eminently reasonable. Certainly some cash value must be placed upon objects which are claimed as a tax deduction and the value of the object in the marketplace would seem to be the logical standard.

However, determining the value of an art object on the open market is not as easy as one may think. For instance, how do you determine the price the "Mona Lisa" would bring at today's art prices? Is not each art object, in itself, unique by its very nature? Is the historical value of a painting by a great master properly a part of "fair market value?"⁶¹ What other standards of value may properly be applied as part of fair market value?⁶²

The problem of valuation of art objects is obviously a real one. It is not terribly difficult to visualize a harassed Internal Revenue Service employee attempting to determine the value of Aunt Bessie's still life which her great-nephew has decided to donate to the local historical society so it will not clutter his attic, and who has claimed at the same time a charitable deduction of \$500. Prior to the formation of the Art Advisory Panel to the Commissioner of Internal Revenue the valuation problem on art objects had been especially troublesome.

However, the Art Advisory Panel has provided an independent source, accepted by contributors and the IRS, whose valuations of art objects provide a guidepost both for the IRS and for the contributors of artistic creations. In 1969 alone the Art Advisory Panel examined 500 art objects which involved deductions claimed by 21 individuals and reduced total claimed valuation for the gifts from \$20 million to \$15 million—a savings to the taxpayer of \$5 million and untold savings in litigation which might otherwise had to have been carried out by the government.⁶³

As of August 27, 1971, no one has successfully challenged a valuation rendered by the panel.⁶⁴ Some of the reductions made by the panel have been drastic.⁶⁵ In one case, a claimed deduction of \$500,000 for contributed paintings was reduced to under \$10,000. In another a claimed deduction of \$100,000 for the donation of two paintings was reduced to \$5,000. The panel has received wide praise for its work.⁶⁶

It would appear on the basis of the panel's performance that the problem of valuation of gifts of art has been largely solved. Unfortunately, the same cannot be said for contributions of manuscripts, papers, letters and memoranda.

SPECIAL PROBLEMS INVOLVED IN VALUATION OF MANUSCRIPTS, PAPERS, LETTERS AND MEMORANDA

When you move from valuation of art objects to the valuation of manuscripts, papers, letters and memoranda, the valuation problem faced with regard to art objects still exists inasmuch as the setting of a fair market value is concerned. Beyond that similarity, however, the problems of setting value become considerably different.

One problem is quantity. The papers of a President can number in the millions, a successful author may have cartons of papers, as can a president of General Motors or other prominent figures.

Quite understandably, papers which may be extremely important to a future scholar and thus of interest to a library seeking to build collections of papers of prominent individuals may have little or no interest to a private collector. This makes market value extremely difficult to determine. As the head of the appraisal section of the Internal Revenue Service described the problem:

"Too often, I observe Appraisers or historians equating intrinsic values with the harsher economic term "market value" as required under the federal tax code . . . the simple fact remains that property does not always bring the price it should intrinsically. Under the law we can only be concerned with what the property would bring in terms of dollars in the open market place . . . it seems unrealistic and unreasonable to presume that the value of literary papers for tax donation purposes is considerably higher than the market prices actually paid for comparable papers, based on their intrinsic historical importance . . . what a library or educational institution might pay for a collection of papers in the ideal or unreal world of unlimited institutional budgets, is of less significance as an indication of value than the real world of budgetary limitations and the prices actually being paid for collections of papers."⁶⁷

It is noteworthy that Mr. Ruhue is careful in his remarks to address himself to the fair market value of collections. Another problem is also evident. For instance, a handwritten letter by President Kennedy may be worth \$500 to a private collector. But a Presidential Library may have several thousand handwritten letters and memoranda. Could one maintain that the fair market value of such a collection held in the library is a simple multiple of the fair market value of the individual papers sold on the open market to collectors? Could not the argument be made that if the library were to sell the papers it held in the open market that the value in the marketplace of such material would drop to perhaps \$100 per letter, or \$1.00, or less? Do the libraries by holding certain collections in fact have a considerable influence over what is fair market value with regard to papers and memoranda to a much greater extent than an art museum could possibly influence the price of an individual artist's works?

Is fair market value, in fact, a viable standard when we talk of charitable contributions of letters, papers and memoranda in

collection form? Or is the problem really one not of the concept of fair market value as a standard but of the weighing of the various factors which comprise a paper or collection's fair market value?

But regardless of the problems of valuation, a valuation must be made. Even though the guideposts are few and the value speculative, the Congress has determined that in cases where such papers are not contributed by the creator their appreciated value is properly taken as a charitable deduction. Perhaps the literary world would do well to look to the art world's example.⁶⁸

If the Art Advisory Panel is any indication, the formation of such a panel for the purpose of appraising papers or collections of papers would seem to be an invaluable asset and an economical addition to the valuation procedure.⁶⁹

In any event, it would certainly seem that if one accepts the concept of the charitable deduction for papers, memoranda and collections contributed by those other than the creator; and if he accepts the concept that the purpose of the contribution is to promote charitable giving; then he cannot properly assert the valuation problem as a bar to granting the deduction to the donor-creator.

SHOULD THE LAW BE CHANGED?

It is obvious from what has been pointed out earlier that serious problems are developing for libraries, museums and other charitable institutions as a result of the changes made by the Tax Reform Act of 1969. It is equally obvious that authors, artists and creators, or holders of papers created for them which have historical significance, are inequitably treated in comparison with other holders of such property where the charitable contribution deduction is concerned. What then, if anything, can be done to cure these inequities?

First of all, it must be admitted that there is a difference between the individual who purchases a painting and then contributes it to charity and the man who creates the painting and contributes it to charity. Whereas the "basis" of the artist or author in the work is his paint and materials or the pen and ink respectively, the basis of the purchaser is what he has paid for the painting or manuscript. The purchaser makes more of a cash investment in the property.

However, an author or artist, it is clear, puts more into a work than just paint and pen and ink. How do you value his talent, time and creativity for tax purposes? Even though these are intangible additions to the work, there is no doubt in my view that our tax law should in some way recognize that an artist's or author's "basis" in his work is far more than paint and ink.

At the current time, there are several proposals for revising the revisions made by the Tax Reform Act of 1969 with reference to the tax treatment of gifts of appreciated property by creator-donors.⁷⁰

The proposals fall into two broad categories: (1) reinstatement of the prior law, or (2) allowance for a deduction based upon some percentage of the fair market value of the gift.⁷¹ In addition, one proposal, S.1212, introduced by Senator Frank Church of Idaho, would restrict the deduction for letters, memoranda, and collections to deny a deduction to "any letter, memorandum, or similar property which was written, prepared, or produced, by or for an individual while he has held an office under the government of the United States or of any state or political subdivision thereof, and which was related to, or arose out of, the performance of the duties of such office."⁷² Thus the Church bill contains the same opposition to allowing political figures a tax deduction which was first expressed with regard to this class of creator-donor in the proposal of former Senator John Williams of Delaware.⁷³

Either approach would improve the tax

Footnotes at end of article.

status of the creator-donor.⁷⁴ Hopefully, such a change would reverse the current trend away from the contribution of donor-created gifts to charity.

One proposal which involves the percentage-of-market-value deduction concept would tie that percentage to the income of the donor-creator on a sliding scale. Depending upon the formulas used, such an approach would certainly seem to be feasible; however, there is a question as to how successful it would be in generating gifts to charity of the nature which charitable institutions could utilize. As I have pointed out before, the purpose of this section of the Code seems to be to promote gifts to charitable institutions of the nature they would find of assistance in their operations.

If the income figure were set too low, the tax deduction would not be allowed to many prominent men, and is it not the paper of prominent men which our libraries and museums so greatly desire for their collections? If the income level were high, the proposal would appear to defeat its own purpose in restricting the tax advantages of charitable giving to those with high incomes. Perhaps the contradictions within the Code are not made any clearer than in this proposal. On the one hand it attempts to generate this type of gift to charity and on the other it places a restriction upon such gifts based upon the income of the donor, not upon the need of the charity, which, it would appear, was the need the Congress wanted to serve in allowing the charitable contribution originally.⁷⁵

What then of simply reinstating the deduction as it existed prior to reform? This approach certainly has a great deal of appeal. If one accepts the argument that the major purpose of the charitable deduction is to promote gifts to charity, this would certainly be the most logical approach. It has the advantage of making tax treatment equal for both the creator-donor and the third party donor.⁷⁶ However, regardless of my personal feeling that this should be the sole purpose of this section of the Code, the Congress has dictated that the position of the donor shall also be a factor in this area of the law.⁷⁷

Under Section 170(e) as keyed to Section 1221(3), the Congress has expressed its view that the relationship of the donor to the property should be taken into account in determining the amount of deduction which the donor may take. It would appear, therefore, that unless the Congress was willing to rescind this Congressional policy with regard to this section of the law, total reinstatement of the prior law would be extremely difficult to achieve. It would involve not only allowing the deduction, but a change of Congressional policy to the effect that the relationship of the donor to the property shall no longer have a bearing in determining the value of the gift for tax deduction purposes. It is not unthinkable that the Congress would make such a change in the law, but it does appear that this approach might have a more difficult time than some form of percentage reinstatement which would still recognize the relationship but not in such a drastic way.

An approach which allows a percentage of fair market value as a deduction, but does not at the same time tie that percentage to the income of the donor, would seem to be the better view. This maintains the determination of the Congress that the creator-donor is a special class of contributor while at the same time it does not restrict the higher income creator from contributing his creations to charity, and in this respect it still fulfills, though to a lesser degree, the intent of the charitable contributions section by making desirable materials available to museums, libraries, art galleries and the like.⁷⁸

BY WAY OF SUMMING UP

In summation, the following points appear to be most evident to this writer:

(1) The Tax Reform Act of 1969 is causing serious and detrimental problems because of its treatment of contributions of donor-created property to charitable institutions. Especially hard-hit are libraries, museums and art galleries.

(2) Inasmuch as Congress has determined that gifts of appreciated property may be deducted to the extent of their fair market value from income for income tax purposes, there appears to be no reason to treat this class of appreciated property in the especially harsh manner provided in the Tax Reform Act of 1969.

(3) There are acceptable alternatives to current laws which would maintain the general intent which the Congress has expressed should govern the tax treatment of gifts to charitable institutions and, at the same time, not discourage donor-created gifts to charity.

(4) The best approach to revising the law would appear to be allowing a charitable deduction to the donor-creator, based upon a reasonable percentage of the fair market value of his gift separate from any considerations of his other income except inasmuch as that income affects his contributions' base.⁷⁹

FOOTNOTES

*Tax Reform Act, 1969, in effect.

**Tax Reform Act, 1969, in effect. The figure for 1969 could be misleading until one is informed that the majority of these gifts were received in the first six months of 1969 when the changes made by the Act were not yet in effect.

² I.R.C. Section 1221 (3) (B).

³ A survey of legal writings in preparation for this paper revealed only one article devoted exclusively to this area of the law. Even that article was more in the nature of a brief report than a close analysis. "Artists Seek to Reinstate Prior Law for Gifts," *Taxwise Giving*, May 1971, p. 7.

⁴ "Why Some People Pay Little or No Tax," *U.S. News and World Report*, 66:73 February 3, 1969.

⁵ *Tax Reform Studies and Proposals: U.S. Treasury Department, Joint Publication of the Committee on Ways and Means of the House of Representatives and the Committee on Finance of the U.S. Senate*, 91st Congress, First Session, February 5, 1969, in 3 parts.

⁶ *Tax Reform Studies and Proposals: U.S. Treasury Department*, February 5, 1969, Part 1, Page 14. The four reasons given were:

(1) The exclusion of one-half of the taxpayer's net long term capital gains, with the alternative of taxation of the entire gain at a maximum rate of 25 per cent.

(2) The exclusion of interest received on State and local government bonds.

(3) The exclusion resulting from percentage depletion in excess of the capital invested in the ownership of minerals and other natural resources.

(4) The exclusion of the appreciation on charitable gifts of appreciated property such as stocks, to the extent that this appreciation is taken as a deduction.

⁷ *Tax Reform Proposals Contained in the Message of the President of April 21, 1969 and Presented by Representatives of the Treasury Department to the Committee on Ways and Means*, Printed by the House Ways and Means Committee, Tuesday April 22, 1969, 91st Congress, First Session, pp. 72-73.

⁸ *Tax Reform Studies*, part 2, pp. 178-179, 187.

⁹ *Tax Reform Proposals*, p. 177.

¹⁰ *Tax Reform Studies*, part 2, pp. 178-179, 187. *Tax Reform Proposals*, p. 177.

¹¹ "To prevent this unwarranted tax benefit it is recommended that, in cases of this type, the amount of ordinary income or short-term capital gain which would have resulted if the property had been sold at fair market value be included in taxable income subject to a charitable contribution deduction equal to the fair market value of the property." *Tax Reform Studies*, part 2, p. 180.

The Nixon Administration proposal read: "To prevent this unwarranted tax benefit it is recommended that Section 170 be amended to provide that the allowable charitable deduction be reduced by the amount of ordinary income or net short term capital gain that would have resulted if the property had been sold at its fair market value rather than being donated to charity." *Tax Reform Proposals*, p. 178.

¹² The House bill allowed the contributor to elect between the two approaches. He could either add his gain or income to his income and then take the deduction, or he could reduce his deduction by the amount of the gain or income he would have received had the property been sold at fair market value. H.R. 13270, Section 201(c) and (d), 91st Congress, First Session.

¹³ H.R. 13270, Section 2012(c) and (d), 91st Congress, First Session.

The reason given in the House Report for this drastic change in treatment is noteworthy since it appears to impute a triple motive: 1) the large appreciation factor in gifts of art; 2) the difficulty of valuation; 3) the especially large appreciation factor when the creator donated the object.

"All charitable gifts of art, collections of papers and other forms of tangible personal property are to be subject to the treatment provided by the bill, regardless of the type of charitable organization receiving the gift . . . Works of art, such as paintings, are one of the types of items which frequently are given to charities, and in which there often is a substantial amount of appreciation. The large amount of appreciation in many cases arises from the fact that the work of art is a product of the donor's own efforts (as are collections of papers in many cases). Works of art are very difficult to value and it appears likely that in some cases they may have been overvalued for purposes of determining the charitable contributions deduction."

See *House Report 91-143*, 91st Congress, First Session, Part 1 at page 55.

¹⁴ H.R. 13270, Section 513, 91st Congress, First Session.

¹⁵ I.R.C. Section 1221(3). This change cannot be appreciated without some background on the political climate surrounding this special category of property. The House Ways and Means Committee completed its hearings on tax reform on April 24, 1969. I have been able to find no reference in those hearings alluding to any proposed change in the law relating to the tax treatment of gifts of letters and memoranda to charitable institutions. However, on May 22, 1969, the *Wall Street Journal* carried a front page news item entitled "Politicians' Loophole: Many Officeholders Cut Taxes by Donating Files to Various Institutions—Congressmen, Senators Use Device; Humphrey Gives Papers to Historical Society—Determining Value Is Tricky," which was written by Jerry Landauer. It detailed certain advantages realized by public figures who contributed papers and memoranda to various tax-exempt organizations and made use of the charitable deduction received to offset their income from other sources and reduce their tax liability. Since this property was not specifically exempted from the definition of capital assets, these taxpayers could, if they chose, sell their papers and have the income from the sale treated as capital gains rather than ordinary income.

The *Journal* article mentioned tax breaks either taken or contemplated by such prominent officials and political figures as former Vice President Hubert Humphrey, Bill Miller, the Vice Presidential running mate of Senator Barry Goldwater in 1964, former President Lyndon Johnson, Supreme Court Justice William O. Douglas and others from both political parties.

On July 23, 1969, former Senator John Williams of Delaware introduced Senate bill 2683 which would have specifically eliminated this deduction for papers contributed by persons employed by local, state, or federal governments, which were produced while they were so employed. (Congressional Record, vol. 115, pt. 15, p. 20461.)

Unlike the Williams proposal, the House bill treated all such memoranda and letters the same regardless of whether or not created by the person while he was employed by a governmental body at the local, state or Federal level. (Compare S. 2683, 91st Congress, First Session, and H.R. 13270, Section 201(c) and (d) and Section 513.) Since the House Committee heard no testimony on this subject, one must assume that the provision was added by the Committee after the hearings as a result of the *Journal* article and the public feeling against politicians making use of this provision of the Code. Since the House Committee had already determined that all holders of tangible personal property should be denied their previous right to deduct appreciation in value up to full market value of a gift, it is understandable that the Williams proposal to restrict the deduction only for public officials

was dropped. It was simply no longer necessary under the House version of the bill since all parties who donated such property were denied the deduction.

¹⁶ *Tax Reform Act of 1969*, Hearings before the Committee on Finance, United States Senate, 91st Congress, First Session, pp. 526, 569-571, 792-797, 998, 999, 1015, 1224, 1225, 1274, 1332, 1353, 1362, 1363, 1584, 1702, 1703, 2019, 2023, 2035, 2041-2045, 2064-2066, 2069, 2072, 2073, 2078, 2079, 2081, 2085, 2089, 2093, 2121, 2125, 2126, 2129, 2134, 2137, 2147-2150, 2153, 2154, 2164, 2165, 2168-2170, 2178, 2181-2183, 2186-2190, 2192-2205, 2210, 2220-2225, 2232, 2237-2247, 2250, 2263, 2264, 2266, 2267, 2269, 2270, 2495-2498, 2500, 2502-2508, 2513, 2514, 2517-2523, 2526-2528, 2531-2537, 2544-2546, 2549, 2556-2558, 2563-2566, 2568-2572, 2575-2578, 2581-2585, 2594-2597, 2600-2603, 2608-2611, 2616-2619, 2624-2631, 2634-2638, 2646-2648, 2651-2653, 2659, 3329, 3339, 3447, 4694, 4713, 4714, 4788, 5098, 5099, 5169, 5170, 5212, 5265, 5709, 5710, 5764, 5765, 6037-6041, 6193, 6194, 6269, 6274, 6275, 6278, 6279, 6426, 6427, 6429.

²² *Tax Reform Act of 1969*, Senate Report No. 91-552, November 1969, 91st Congress, First Session, pp. 81-82. H.R. 13270 as reported in Senate, Section 201(a).

²³ *Tax Reform Proposals*, p. 178.

²⁴ Senate Report, p. 81. It is interesting to note that the Senate Report specifically alludes to letters and memoranda contributions, but makes only a secondary reference to "(paintings, art objects, and books not created by the donor)." It is also interesting to speculate on why the Committee continued the exemption from the capital assets definition of a "letter or memorandum or similar property" which was held by the taxpayer for whom the property "was prepared or produced." Does this mean the papers held by a "creator-donor" that were prepared for him by his staff? If so, the language is obviously too broad for it would encompass the person who received a letter from taxpayer A as well. Is this a holdover from the concept of a public official's donations contained in the Williams proposal on the theory that the taxpayers have subsidized the creation of the property once and should not be required to once again subsidize the property in the form of a contribution? Why is a letter created by taxpayer A and sent to taxpayer B any different than a painting created at the request of taxpayer C and painted by taxpayer D? Why, since the Senator had rejected the House approach denying the deduction to all holders of tangible personal property, did it leave this particular restriction in the bill? Could it have been an oversight?

²⁵ H.R. 13270, as reported to the Senate, Section 201(a).

²⁶ Senate Report, p. 82.

²⁷ I.R.C. Section 170(a)(1)(A).

²⁸ *General Explanation of the Tax Reform Act of 1969*, H.R. 13270, 91st Congress, Public Law 91-172, prepared by the staff of the Joint Committee on Internal Revenue Taxation, December 3, 1970, p. 78. I.R.C. Section 170(e)(1)(A).

²⁹ A fourth option, it should be pointed out, is available under Section 1011(b) of the Code. This is the so-called bargain sale. Prior to the Tax Reform Act this was a popular charitable contribution mechanism. The holder of appreciated property sold it to charity at his basis and took the value of the appreciation as a deduction. Thus, A with a painting with a fair market value of \$10,000, for which he paid \$5,000, would sell that property to charity B for \$5,000. No gain would be recognized on the \$5,000 he received and he received a \$5,000 deduction for

the difference between the price paid and the fair market value.

The Tax Reform Act has changed that treatment. Under the new Section 1011(b), the contributor must allocate his basis between the portion sold and the portion donated. For example, in the case above, one-half of the \$5,000 basis must be allocated to the part sold and one-half to the portion contributed. As far as the tax law is concerned, two transactions have taken place: 1) a sale for \$5,000 of property with a basis of \$2,500, and 2) a contribution of \$5,000 with a \$2,500 basis. Thus, in this example, \$2,500 would be recognized as a gain for tax purposes when the bargain sale of the \$10,000 painting takes place.

Could the artist or author under this provision of the Code get more favorable tax treatment by making a bargain sale to charity and then take a deduction for appreciation in value which is denied him for an outright donation under 170(e)?

The new proposed regulation issued by the Treasury Department on April 30, 1971, would seem to foreclose this possibility. See Section 1.170-A-(c)(2) examples 5 and 6. The Treasury takes the position that no appreciation occurs for purposes of a bargain sale in this case and since that is the case there is no appreciation to be allocated under 1011(b).

It should be pointed out that the definition of cost is not without some difficulty. For instance, if the artist travels to France to create a painting, is the trip a part of his cost? Could it be deducted as part of his basis in the painting? If a sculptor must travel to Italy to choose marble for a statue, is the trip part of his cost or only the purchase price of the marble he selects? If an author travels in a country to write a book about it, are his travel expenses part of the cost of the literary composition he may later try to contribute to charity? Can the author properly claim the trip as part of creating the original manuscript, or must some type of allocation be made to the numbers of copies of books that may be sold?

For a good brief description of the effects of Section 170(e), note "The Charitable Deduction," John Y. Taggart, *Tax Law Review* 26:63 November 1970, p. 107, "How Does Section 170(e) Work?"

Here it would be well to note that even though the property is properly treated as ordinary income property to the creator, the reasons for treatment of property as capital gains or ordinary income should have no bearing on the contribution question. In the one case the Code is attempting to separate two classes of property for the purpose of levying a tax. In the case of the charitable contribution the Code is attempting to give an incentive to holders of certain desirable property of use of charity to give that property to charity. It would appear that there is no logical reason for treating the two types of property differently for contribution purposes after the decision to allow the deduction for such gifts is made. The two purposes are entirely different and relate to different policies within the Code.

²⁵ I.R.C. Section 170(e)(1)(A).

²⁶ I.R.C. Section 1221(3)(A), (B) and (C).

²⁷ "Music: Why Tax Reform Should Be Reformed," Irving Lowens, *The Sunday Star*, January 24, 1971, p. C-8.

²⁸ *Ibid.* As of August 25, 1971, the papers still had not been sold.

²⁹ *Ibid.*

³⁰ The manuscripts acquisition program of the Library of Congress is a large one. In a brochure entitled "Literary Papers and Manuscripts: Their Place in the National Collections" prepared by the Reference Department of the Manuscripts Division of the Library, it is stated "It is fair to say that virtually every person who has significantly influenced American life is represented in some way in the Manuscript Division of the Library of

Congress." *The Quarterly Journal of the Library of Congress*, Volume 27/1970 indicates in its survey of recent acquisitions by the Library (pp. 357-75) that the vast majority of acquisitions are by gift as opposed to purchase. Purchases of the Library are generally restricted to papers of deceased parties and such purchases are generally made from funds which were themselves gifts to the Library as opposed to other revenue sources. Some papers may be purchased at times by the Government, however, and then deposited with the Library.

³¹ *Ibid.* The individuals were not identified.

³² "Tax Reform: A Half-Axe Effect on Manuscript Contributions," John J. Kominiski, General Counsel, Library of Congress, *Manuscripts*, Fall 1970, p. 243.

³³ *Ibid.*, p. 246. In addition, the Annual Report of the Library of Congress, at page 6, stated:

"Effects of the Tax Reform Act of 1969, predicted by many libraries, are already being felt by the Library of Congress. Under the Act, personal papers—correspondence, speeches, diaries, manuscripts, compositions, and the like—are treated as ordinary income property and not as capital assets, if they are held by the one who created them, by the one for whom they were created, or by the one who has received them as a gift from the creator. In addition, the tax deduction allowed the donor of such ordinary income property is severely limited. As a result, many authors, composers, artists and public figures who formerly enriched the libraries of the Nation with gifts of their papers have either discontinued their gifts, deferred them, or deposited rather than donated their papers, pending a possible change in the law. As this report points out, however, some donors who have already established substantial collections of their papers in the Library of Congress have continued to add to them. On the other hand, it is significant that not one new gift of a manuscript collection was received by the Library from January 1970 to the close of the fiscal year. The Library's great collections of papers of statesmen, scientists, authors, musicians, artists, educators, and other figures form the raw material from which our history is reconstructed, strengthened, and embellished. The Tax Reform Act threatens to cut off the supply of that material and could well result in impoverishing our national heritage.

³⁴ *Tax Reform Studies*, 91st Congress, First Session, February 5, 1969, Part 2, p. 187.

³⁵ *Tax Reform Proposals*, 91st Congress, First Session, April 22, 1969, p. 177.

³⁶ House Report No. 91-413, Part 1, p. 53.

³⁷ Senate Report No. 91-552, p. 81.

³⁸ *General Explanation of the Tax Reform Act of 1969*, December 5, 1970. Prepared by the Staff of the Joint Committee on Internal Revenue Taxation, p. 78.

³⁹ *General Explanation*, p. 77-78. It should be noted that this possibility of a greater actual gain on a "gift": as opposed to a sale and payment of tax was based upon a highly specialized example. The example used was:

"... a married taxpayer filing a joint return with \$95,000 of income after allowing for deductions and personal exemptions is in the 60% marginal tax bracket and would have an after tax net income of \$52,820. If this individual sells an asset valued at \$15,000 which would produce \$12,000 of income taxable at ordinary income rate, his taxable income rate would be increased to \$107,000, and after payment of his tax, he would be left with \$60,480 of after tax income. On the other hand, by donating the asset to charity, he pays no tax on the \$12,000 income and also deducts the full \$15,000 value of the gift from his other income, thereby reducing his taxable income to \$80,000. After payment of Federal income tax, he would be left with \$61,660. Thus, under present law, by donating the asset to charity rather than selling the asset, the taxpayer makes \$1,180,

the amount by which he improved his after tax position."

The example obviously rests on a high appreciation element and a high income level. One wonders in practical terms how often the abuse could occur. However, the important fact is that the Congress was obviously influenced strongly by the possible occurrence to take some action to prevent it, not that the possibility of the occurrence was remote. Query also whether the abuse is now even more hypothetical in view of the 50% maximum tax now allowable on earned income under Section 1348 of the I.R.C. which removes the 60% marginal tax bracket used in the example.

⁴⁰ I.R.C. Section 170(e)(1)(A).

⁴¹ I.R.C. Section 170(e)(1)(B).

⁴² I.R.C. Section 1221(3)(A).

⁴³ Some countries do not seem to feel the same necessity for treating artists in the same manner as other taxpayers with regard to income received from the sale of their creations. Ireland, for example, in its *Finance Act of 1969*, at the same time the United States was creating a significant economic problem for its artists and writers, granted a total exemption from income taxes for income derived from artistic works. Creative materials such as books or other writings, a play, a musical composition, a painting, picture or sculpture qualify for the no income tax status. See "Tax Break for Artists: New Law in Ireland," Roland Gelatt, *Saturday Review* 52:28 November 15, 1969.

⁴⁴ House Report 91-413, 91st Congress, First Session, Part I, pp. 148-149. The rationale for the distinction is discussed at some length by the Committee at this point in reference to the reasons for the change in treatment of papers and memoranda.

⁴⁵ The policy of allowing deductions against income for charitable contributions by individuals has been a part of the income tax law since 1917 (now I.R.C. Section 170). Estate tax deductions for bequests to charity were granted in 1918 (I.R.C. Section 2055). Gift tax deductions have been allowed since 1932 (I.R.C. Section 2522) and corporations have been allowed to take a deduction since 1935 (I.R.C. Section 170). "Federal Tax Support of Charities and Other Exempt Organizations: The Need for a National Policy," Lawrence M. Stone, 1968 *So. California Tax Institute* 33, Note 15.

Of course, there are those who argue that there should be no deduction whatsoever for such contributions and a discussion of that topic could be made in some detail. Suffice it to say for the purposes of this paper that those advocates, until now, have been unsuccessful in eliminating the charitable contributions deduction.

⁴⁶ I.R.C. Section 170(e)(1)(A).

⁴⁷ House Report, Part 1, p. 55.

⁴⁸ Mr. Karl Ruhue, Chief of the Appraisal Section of the Income Tax Division for the International Revenue Service, suggested a set of broad rules for determining value "particularly for literary and art objects":

- (1) A clear statement of the premise or concept of value with the appraiser's definition of that value;
- (2) A notation of the effective valuation date;
- (3) An accurate description of the object, in detail, with its history or provenance, including record of sales, exhibitions, etc.;
- (4) Proof of authentication;
- (5) An assessment of its historical value for exhibition purposes; for research purposes, etc.;
- (6) Fully developed and detailed basis upon which value is placed:
 - (a) Sales record of other comparable material of like kind and quality at or near the valuation date;
 - (b) Factors and relevant conditions of the existing market for the valuation date.
- (7) Complete statement of the appraiser's

particular qualifications for determining the value of the particular property;

(8) In the case of paintings or art objects, a photograph by a competent commercial photographer to show the object at its most revealing and artistic advantage."

"Valuation for Federal Tax Purposes," Karl Ruhue, *Antique Bookman*, November 1968.

"For a fascinating and readable account of how even the best experts in the art world can be duped by a clever con man and his associates, a book dealing with the exploits of Elmyr de Hory, probably the greatest art forger of all time, makes interesting reading. It is said that his paintings, had they not been exposed, would have a current market value of over \$60 million. *Fake*, Clifford Irving, McGraw Hill, New York, 1968.

"The current members of the Panel are:

Dr. Richard F. Brown, Director, Kimbell Foundation, Fort Worth, Texas.

Mr. Charles E. Buckley, Director, City Art Museum, St. Louis, Missouri.

Mr. Bartlett M. Hayes, Director, American Academy, Rome, Italy.

Dr. Sherman A. Lee, Director, Cleveland Museum of Art, Cleveland, Ohio.

Mr. William S. Lieberman, Director, Drawings and Prints, Museum of Modern Art, New York, New York.

Mr. Anthony M. Clark, Director, Minneapolis Institute of Arts, Minneapolis, Minnesota.

Dr. Perry B. Colt, Chief Curator (Ret.), National Gallery of Art, Washington, D.C.

Mr. Charles C. Cunningham, Director, Art Institute of Chicago, Chicago, Illinois.

Mr. Kenneth Donahue, Director, Los Angeles County Museum of Art, Los Angeles, California.

Mr. Louis Goldenberg, Art Dealer, Wildenstein and Co., New York, New York.

Dr. George H. Hamilton, Professor, Williams College, Williamstown, Massachusetts.

Professor Charles F. Montgomery, University of Delaware, Newark, Delaware.

Mr. Frank Perls, Art Dealer, Perls Gallery, Beverly Hills, California.

Mrs. Esther W. Robles, Art Dealer, Esther Robles Gallery, Los Angeles, California.

Mr. Alexandre P. Rosenberg, Art Dealer, Paul Rosenberg & Co., New York, New York.

Mr. Theodore Rousseau, Vice Director, Metropolitan Museum of Art, New York, New York.

Dr. Merrill C. Rueppel, Director, Dallas Museum of Fine Arts, Dallas, Texas.

Mr. Eugene V. Thaw, Art Dealer, E. V. Thaw Co., New York, New York.

Past members of the panel have been:

Mr. Edward R. Lubin, Dealer, E. R. Lubin, Inc., New York, New York.

Mr. A. Hyatt Mayor, President, Hispanic Society of America, New York, New York.

Mr. Allan McNab, Art Consultant, La Point, Wisconsin.

Professor Charles Seymour, Jr., Yale University, New Haven, Connecticut.

Mr. Gordon Mackintosh Smith, Director, Albright-Knox Art Gallery, Buffalo, New York.

"Mr. Ruhue's remarks at note 58 supra, would seem to indicate that historical value can be a factor in the determination of fair market value.

"For instance, is the 'intrinsic value' of an object of any use in determining its fair market value? It may be difficult for the Director of an art museum to speak in terms of the money value of a painting. He may use such terms as 'invaluable' to describe an acquisition. Perhaps in terms of adding to the gallery's collection, of in adding to the know collection of paintings of a master (as where a previously unknown painting is uncovered), the acquisition is, indeed, 'invaluable to the art world, but that factor would seem to have little bearing on the hard reality of the tax law which de-

mands some money value be placed on the object at issue. Also see note 58 supra, and Revenue Procedure 66-49, Reprinted from the Internal Revenue Bulletin 1966-48 of November 28, 1966, which states at Section 2.02:

"As to the measure of proof in determining the fair market value, all factors bearing on value are relevant including, where pertinent, the cost, or selling price of the item, sales of comparable properties, cost of reproduction, opinion evidence and appraisals. Fair market value depends on value in the market and not on intrinsic worth." Query if the statement above is not inherently inconsistent. If the IRS is going to say all factors bearing on value are relevant, how may it then, in the same breath, say intrinsic value is not. The IRS may recognize its own problem inasmuch as Revenue Procedure 66-49 does not take the trouble to define the term "intrinsic value."

"IRS Panel to Weigh Claimed Values of Arts Gifts," Murray Seeger, *The Washington Post*, March 4, 1969, p. D-5.

"IRS Panel," *Post*.

"Although the panel has made significant reductions in the valuation of gifts for deduction purposes, it does not make advisory rulings. This would seem to be in line with IRS policy in this field. Mr. Ruhue, in his article in the *Antique Bookman*, supra, note 58 above, puts it in these terms:

"The Service will not approve valuations in advance of the filing of a tax return nor will they imply de facto recognition to an appraiser or appraisal group as to unquestioned advance acceptance of value determinations."

"IRS Panel," *Post*.

"Literary Papers and Tax Contribution Deductions," Speech by Karl Ruhue, Chief, Appraisal Section, Income Tax Division, IRS, before the American Society of Archivists, Madison, Wisconsin, October 1969.

"Indeed the indications are that they already have. The Appraisal Division of the Internal Revenue Service informed me in a telephone conversation that a meeting had been held in 1970 with representatives of the American Library Association to discuss the possibility of a panel similar to the Art Advisory Panel for the purpose of valuing papers, manuscripts, memoranda and collections of such materials.

"However, one may properly ask if such a panel could really determine values based upon the fair market value standard. Perhaps a purist might feel their valuations too speculative in light of the fact that the 'market' for such collections is difficult to determine and that, as a result, the panel could not possibly make objective determinations. But is there any real alternative that would be more equitable to both the taxpayer and the government?

"The proposals are 1) reinstatement of the prior law, an approach suggested by the Associated Council of the Arts (See "Art Agencies Urge Artists Tax Reform," a press release issued May 23, 1971 in Washington, D.C. by the Associated Council of the Arts); 2) reinstate the deduction up to 50% of the fair market value, except in the case of certain contributions by certain public officials, (see remarks of Senator Frank Church in the CONGRESSIONAL RECORD, vol. 117, pt. 5, pp. 6314-6317, on introduction of S. 1212); 3) reinstatement of the full deduction and changing the Code to treat this type of material as a capital asset upon sale (See H.R. 843, 92nd Congress, First Session, introduced by Representative Edward Koch of New York); 4) reinstatement of a percentage deduction based on fair market value but tying the percentage to the income of the donor on a sliding scale which would reduce the percentage deduction allowed as income increased.

"See note 70 above.

"S. 1212, 92nd Congress, First Session, Section (3) (B).

"See note 17 above.

"The most benefit to the creator-donor would result from acceptance of H.R. 843. Not only would the creator be allowed the full market value as a charitable contribution, he would be allowed to sell his creation on the market and pay tax on the proceeds at capital gains as opposed to ordinary income rates. Query whether this is wise. Would not allowing the creator-donor the advantage of capital gains treatment on sale accomplish just the opposite of what the charitable contribution envisions? Would it not mean that his economic advantage upon sale would be far greater than his economic benefit from a tax deduction for a contribution? Would not the tendency be to sell rather than donate if capital gains treatment were allowed on the proceeds of the sale? Indeed, if one accepts the idea that capital gains treatment was designed to stimulate investment in property, would not allowing the treatment for this class of property be inconsistent with the intent of this section of the Code? Is not a painting created by an artist created so he can realize income on the sale of a clearly ordinary nature as opposed to an investment in a property which may be later sold to realize a gain of a capital gains nature?

"For instance, under this approach might it not be argued that the Library of Congress still would have lost the Stravinsky collection? Would not an art gallery want its collection rounded out by the addition of an Andred Wyeth painting as opposed to the first attempts of an unknown artist in the low income category? Are we trying to add to the collections of our libraries, museums and similar institutions or grant a subsidy via the tax code to low income artists and writers?

"Query, however, if the treatment really is the same. For instance, given the fact that the collector donor's property is subject to capital gains taxation rates and the property of the creator-donor is subject to ordinary income tax rates, can it not be argued that the net impact upon tax collections is less when giving the full fair market deduction to the collector donor inasmuch as his income from the property would only have been taxable at capital gains rates whereas the donor-creator stands to gain a greater advantage for, if his property were to be sold, he would pay at ordinary income tax rates.

"I.R.C. Section 170(e).

"The legislation which takes this approach, however, is S. 1212 and, as pointed out earlier, it contains a provision restricting the deduction for certain public officials. It is certainly fair to ask why a political figure or public official, whose papers may be of the very nature which libraries and museums may well desire the most should be denied the same incentive to give as other creator-donors. Put another way, if our goal is to give incentives to give for the benefit of the charitable institution, is it fair to deny the incentive to the type of gift which they may be most desirous of obtaining? Another fact to consider, however, is that these papers have already been subsidized once by the taxpayer and have their value by virtue of the creator's public office. Is it fair to ask the tax structure once again to subsidize the material created?

"I.R.C. Section 170(b) (1) (b) (D).

By Mr. CASE:

S. 1368. A bill to prohibit the use for public works projects of any lands designated for use for parks, for recreational purposes, or for the preservation of its natural values unless such lands are replaced by lands of like kind. Referred to the Committee on Interior and Insular Affairs.

PARK LAND PROTECTION ACT

Mr. CASE. Mr. President, I introduce for appropriate reference a bill designed to insure that the steady advance of urbanization in this country does not overrun the present and future needs for parks, recreational areas, wildlife refuges and other open space.

Titled "The Park Land Protection Act," my bill will require replacement of any land that had been used for recreational purposes or the protection of its natural values if it is diverted to use in connection with a public works project that involves Federal financing. This means, as my bill says, replacement by land "comparable in value, quality and quantity."

Current law prohibits the taking of parks, wildlife refuges and recreation areas for highways unless the Secretary of Transportation finds there is no feasible and prudent alternative to the use of such land for a road. But there is nothing in the law to require replacement of the land if the Secretary finds there is no alternative to using it for a road.

My bill fills this gap, not only in regard to highways but to all public works projects using Federal funds.

The "replacement in kind" provision of my bill would apply both where a Federal agency seeks to utilize lands under Federal control and where the Federal Government assists the States, or their political subdivisions, in financing projects which involve the use of parks or open spaces under State or local jurisdiction.

In addition, it would require that offers of replacement must be made to the owners of private land that is being used for park or scenic purposes, for wildlife sanctuaries, or for protection of its natural values.

Should controversy arise over whether the replacement lands are of like kind, the dispute would be submitted to a "Park and Recreational Replacement Lands Review Commission," which would be established by my bill. This Commission would be composed of nine members appointed by the President—four from the executive branch of the Federal Government and five private individuals with recognized competence in real estate or conservation matters.

Several years ago, when I first introduced the original version of my Park Land Protection Act, I devoted a large portion of my remarks to pointing up the need to protect land to meet the Nation's recreational needs. Since then, I believe this need has become self-evident and accepted by the vast majority.

Many examples of the need for the bill could be cited but one should suffice at this time.

East Brunswick, N.J., recently dropped plans to develop a new park despite the fact that there was \$119,550 in Federal and State funds available for acquisition of the 65-acre tract.

One of the reasons cited for failure to take the opportunity to develop the park was that the Army Corps of Engineers has proposed a dam project nearby and the park land may be flooded by the Corps of Engineers project, even though that project is at least 10 years away.

If there had been assurance that the park land would have to be replaced if its use was destroyed by the dam project, the decision might have been different.

What still is needed is a legal mechanism to provide this protection. This is the purpose of my bill.

It will say simply that our national store of recreational land and open space must be preserved and that any land that is used for any public works project must be replaced by land "comparable in value, quantity and quality."

In my view, this is a step that is overdue.

It is a step that would complement any action Congress may take this year on land use planning.

Obviously, the best land use plans can be upset by unforeseen demands for land for public works projects. But there must be some assurance that these demands are not met at the expense of meeting the need for recreational and open space areas. Our store of these lands must not be depleted to meet the need for public works projects.

Therefore, I believe my bill should be considered in connection with land use planning legislation and I urge that it be referred to the Senate Interior Committee for that purpose.

By Mr. JAVITS (for himself and Mr. BUCKLEY):

S. 1369. A bill to reestablish and extend the program whereby payments in lieu of taxes may be made with respect to certain real property transferred by the Reconstruction Finance Corporation and its subsidiaries to other Government departments. Referred to the Committee on Government Operations.

Mr. JAVITS. Mr. President, on behalf of the junior Senator from New York (Mr. BUCKLEY) and myself, I introduce a bill concerning the transfer of real property having a taxable status from the Reconstruction Finance Corporation or any of its subsidiaries to another Government department.

I ask unanimous consent that a list of former RFC plants in inventory, together with the bill itself, be printed at this point in the RECORD.

There being no objection, the list and bill were ordered to be printed in the RECORD, as follows:

FORMER RFC PLANTS IN INVENTORY¹

Air Force Plant No. 43, Stratford, Connecticut.

Air Force Plant No. 13, Wichita, Kansas.

Air Force Plant No. 50, Halethorpe, Maryland.

Air Force Plant No. 28, Everett, Massachusetts.

Air Force Plant No. 63, Grafton, Massachusetts.²

Air Force Plant No. 29, West Lynn, Massachusetts.

Air Force Plant No. 59, Johnson City, New York.³

Air Force Plant No. 36, Evandale, Ohio.

Air Force Plant No. 27, Toledo, Ohio.²

Burlington Army Ammunition Plant, Burlington, New Jersey.

Tarheel Army Missile Plant, Burlington, North Carolina.

Riverbank Army Ammunition Plant, Stanislaus County, California.

Gateway Army Ammunition Plant, St. Louis, Missouri.

Saginaw Army Aircraft Plant, Saginaw, Texas.

Remington Rand Plant, St. Paul, Minnesota.

Naval Weapons Industrial Reserve Plant, Columbus, Ohio.

Naval Weapons Industrial Reserve Plant (LTV), Dallas, Texas.

Naval Air Turbine Test Station, Trenton, New Jersey.

GSA Administration Building (FOB), Kansas City, Missouri (GSA Inventory).

Mergenthaler Building (FOB), New York, New York (GSA Inventory).

National Lead Company (Portion), Tahawus, New York (GSA Inventory).^{2,3}

FOOTNOTES

¹ All properties originally in DoD inventory unless otherwise noted. Of the properties in GSA inventory, the two designated "FOB" have been converted from industrial use to Federal office building use.

² Designates buildings reported excess to GSA and currently under disposal action.

³ Agreement reached with National Lead Co. for sale of this property and an explanatory statement outlining proposed sale has been submitted to Congressional Committees on Government Operations. At the request of the Senate Committee, GSA is deferring the sale indefinitely. Deferral requested because of environmental concern expressed by State of New York.

S. 1369

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress recognizes the transfer of real property having a taxable status from the Reconstruction Finance Corporation or any of its subsidiaries to another Government department has often operated to remove such property from the tax rolls of States and local taxing authorities, thereby creating an undue and unexpected burden upon such States and local taxing authorities, and causing disruption of their operations. It is the purpose of this Act to furnish temporary measures of relief for such States and local taxing authorities by providing that payments in lieu of taxes shall be made with respect to real property so transferred on or after January 1, 1946.

SEC. 2. As used in this Act—

(a) The term "State" means each of the several States of the United States.

(b) The term "real property" means (1) any interest in land, and (2) any improvement made thereon prior to any transfer thereof occurring on or after January 1, 1946, from the Reconstruction Finance Corporation to any other Government department, if for the purpose of taxation such interest or improvement is characterized as real property under the applicable law of the State in which such land is located.

(c) The term "local taxing authority" means any county or municipality, and any subdivision of any State, county, or municipality, which is authorized by law to levy and collect taxes upon real property.

(d) The terms "real property tax" and "real property taxes" do not include any special assessment levied upon real property after the date of a transfer of such real property occurring on or after January 1, 1946, from the Reconstruction Finance Corporation to any other Government department.

(e) The term "Government department" means any department, agency, or instrumentality of the United States, except the Reconstruction Finance Corporation.

(f) The term "transfer" means—

(1) a transfer of custody and control of, or accountability for the care and handling of, any real property, or

(2) a transfer of legal title to any real property.

(g) The term "Reconstruction Finance Corporation" includes all subsidiaries of the Reconstruction Finance Corporation.

Sec. 3. Where real property has been transferred on or after January 1, 1946, from the Reconstruction Finance Corporation to any Government department, and the title to such real property has been held by the United States continuously since such transfer, then on each date occurring on or after January 1, 1971, and prior to January 1, 1975, on which real property taxes levied by any State or local taxing authority with respect to any period become due, the Government department which has custody and control of such real property shall pay to the appropriate State and local taxing authorities an amount equal to the amount of the real property tax which would be payable to each such State or local taxing authority on such date if legal title to such real property has been held by a private citizen on such date and during all periods to which such date relates.

Sec. 4. (a) The failure of any Government department to make, or to make timely payment of, any payment authorized by section 3 of this Act shall not subject—

(1) any Government department, or any person who is a subsequent purchaser of any real property from any Government department, to the payment of any penalty or penalty interest, or to any payment in lieu of any penalty or penalty interest; or

(2) any real estate or other property or property right to any lien, attachment, foreclosure, garnishment, or other legal proceeding.

(b) No payment shall be made under section 3 of this Act with respect to any real property of any of the following categories:

(1) Real property taxable by any State or local taxing authority under any provision of law, or with respect to which any payment in lieu of taxes is payable under any other provision of law.

(2) Real property used or held primarily for any purpose for which real property owned by any private citizen would be exempt from real property tax under the constitution or laws of the State in which the property is situated.

(3) Real property used or held primarily for the rendition of service to or on behalf of the local public, including (but not limited to) the following categories of real property: courthouses; post offices and other property used for purposes incidental to postal operations; and federally owned airports maintained and operated by the Civil Aeronautics Administration.

(4) Office buildings and facilities which are an integral part of, or are used for purposes incidental to the use made of, any properties described in paragraph (1), (2), or (3) of this subsection.

(c) Nothing contained in this Act shall establish any liability of any Government department for the payment of any payment in lieu of taxes with respect to any real property for any period before January 1, 1971, or after December 31, 1974.

Sec. 5. This Act shall take effect as of January 1, 1971.

ADDITIONAL COSPONSORS OF BILLS AND JOINT RESOLUTIONS

S. 368

At the request of Mr. STAFFORD, the Senator from Minnesota (Mr. HUMPHREY) was added as a cosponsor of S. 368, the Uniformed Services Special Pay Act of 1973.

S. 471

At the request of Mr. CHURCH, the Senator from Iowa (Mr. CLARK) was

added as a cosponsor of S. 471, a bill to encourage State and local governments to reform their real property tax systems so as to decrease the real property tax burden of low- and moderate-income individuals who have attained age 65.

S. 548

At the request of Mr. HUMPHREY, the Senator from Oregon (Mr. HATFIELD) was added as a cosponsor of S. 548, a bill to provide price support for milk at not less than 85 per centum of the parity price therefor.

S. 631

At the request of Mr. CHURCH, the Senator from Iowa (Mr. CLARK) was added as a cosponsor of S. 631, a bill to amend the Social Security Act to provide for the coverage of certain drugs under part A of the health insurance program established by title XVIII of such act.

S. 632

At the request of Mr. CHURCH, the Senator from Iowa (Mr. CLARK) was added as a cosponsor of S. 632, a bill to amend title II of the Social Security Act to increase the amount which individuals may earn without suffering deductions from benefits on account of excess earnings, and for other purposes.

S. 633

At the request of Mr. CHURCH, the Senator from Iowa (Mr. CLARK) was added as a cosponsor of S. 633, a bill to authorize the Secretary of Labor to make grants for the conduct of older Americans home-repair projects, and for other purposes.

S. 874

At the request of Mr. WILLIAMS, the Senator from Missouri (Mr. EAGLETON) was added as a cosponsor of S. 874, the Gifted and Talented Children's Educational Assistance Act.

S. 993

At the request of Mr. MONDALE, the Senator from South Dakota (Mr. McGOVERN), the Senator from Maine (Mr. HATHAWAY), the Senator from Wisconsin (Mr. PROXMIER), and the Senator from Illinois (Mr. STEVENSON) were added as cosponsors of S. 993, authorizing the issuance of right-of-way permits in the State of Alaska for certain purposes.

S. 1007

At the request of Mr. PEARSON, the Senator from Montana (Mr. MANSFIELD), the Senator from New York (Mr. JAVITS), the Senator from Utah (Mr. BENNETT), the Senator from Kansas (Mr. DOLE), and the Senator from Tennessee (Mr. BROCK) were added as cosponsors of S. 1007, to provide for increased foreign commerce involving small businesses.

SENATE CONCURRENT RESOLUTION 18—SUBMISSION OF A CONCURRENT RESOLUTION EXPRESSING OPPOSITION TO CERTAIN MEASURES FOR THE CURTAILMENT OF BENEFITS UNDER THE MEDICARE AND MEDICAID PROGRAMS

(Referred to the Committee on Finance.)

SENATE MAJORITY OPPOSES MEDICARE, MEDICAID CUTS

Mr. MONDALE. Mr. President, I am proud to act on behalf of a bipartisan majority of my colleagues in the Senate—in introducing a concurrent resolution rejecting cuts in medicare and medicaid benefits proposed in the budget submitted by the President last January 29.

The President has said that he will submit legislation to Congress making the following changes in medicare and medicaid programs:

Increase the charge to patients for the first day of hospitalization from \$72 to the full hospital charge.

Require the patient to pay 10 percent of actual hospital costs between the first and 61st days—now free under medicare.

Require those covered under part B of medicare to pay the first \$85 of bills for physicians' services—instead of the first \$60—and 25 percent of everything above that—instead of 20 percent.

Eliminate "low priority" medicaid services—including dental care for adults.

Under the present law, older Americans covered by medicare are assured that a stay in the hospital—even one as long as 60 days—will cost them no more than \$72. But under the administration proposals a 3-week stay would cost a minimum of \$200, and a stay of 60 days a minimum of \$500. These figures are based on the 1972 average daily hospital service charge of \$70 a day. But in many States—such as my own State of Minnesota, where daily hospital charges may run as high as \$500—the budget proposals would place an even greater and absolutely intolerable burden on medicare patients.

We all agree on the need for economy. But we can spare this additional burden on those least able to pay. There is enough fat in the budget—in Pentagon waste, in extravagant space programs, in continued special tax benefits for powerful interests—to make up the difference many times over.

With a majority of the Senate on record against the administration's proposed cutbacks, 23 million older Americans will not have to spend weeks and months waiting in fear to see what Congress will do with these proposals—which would increase their out-of-pocket costs for health care by over \$1 billion in 1974.

Mr. President, I ask unanimous consent that a copy of the concurrent resolution may appear at this point in the RECORD, together with an excellent article by Jonathan Spivak from last Friday's Wall Street Journal discussing the administration's medicare proposals.

There being no objection, the concurrent resolution and article were ordered to be printed in the RECORD, as follows:

S. CON. RES. 18

Whereas, in the National Budget proposed for the fiscal year ending June 30, 1975, the amount of expenditures allocated for the Medicare and Medicaid programs for such year is predicated upon the enactment into law of amendments to titles XVIII and XIX of the Social Security Act which would have the effect of—

(1) increasing the amount of the deductible, which is applicable (under part A of such title XVIII) with respect to the first day of inpatient hospital services received by a patient, to an amount equal to the average per diem cost of inpatient hospital services;

(2) imposing a coinsurance amount, with respect to inpatient hospital services (under part A of such title XVIII) received after the first day a patient receives such services and prior to the 61st day he receives such services, equal to 10 per centum of the actual costs imposed for such services;

(3) reducing coverage for physicians' services (under part B of such title XVIII) by increasing the deductible applicable thereto from \$60 to \$85, and by increasing the patient's share of such costs, above the deductible, from 20 per centum to 25 per centum; and

(4) eliminating (under such title XIX) Federal financial participation with respect to costs, incurred under a State plan approved under such title, attributable to the provision of certain low-priority services (including dental care) to adults; Now, therefore, be it

Resolved by the Senate (The House of Representatives concurring), That it is the sense of the Congress that no such amendments be enacted.

SHOULD OLD FOLKS PAY MORE FOR MEDICARE? WOULD THAT CURE THE MISUSE OF SERVICES?

(By Jonathan Spivak)

WASHINGTON. Mary W., 75 years old, entered Washington Hospital Center here last November with diabetes and cancer. Though her seven-day stay cost \$903.35, she paid only \$72; medicare took care of the rest.

But, under a Nixon administration proposal she would have to pay nearly twice as much, or \$152.13, for the same care.

That is a fair sample of the dollar-and-cents effect of one of President Nixon's most hotly disputed economy plans—one that proposes the elderly foot more of their health bills while the government pay less. The biggest change: Starting next January, the aged would have to pay 10% of their hospital bills. Their contributions now total far less than that. And though a few medicare beneficiaries would gain by the change, many would find their pocketbook burden doubled.

Against these presidential intentions, the elderly and their liberal friends in Washington are employing strong language. "Saveage cutbacks proposed for the medicare health insurance program . . . represent a shameful repudiation of a pledge made to older Americans by the President," charges Nelson Cruikshank, 70, president of the National Council of Senior Citizens.

But Nixon spokesmen, denying any breach of promise, are pouring forth soothing reassurances. Caspar Weinberger, Health, Education and Welfare Secretary, says: "We believe that the medicare reforms . . . won't invoke financial hardship on the program's beneficiaries."

EMOTIONAL DEBATE

In the often emotional debate, serious economic issues are being thrashed out. The administration, backed by congressional conservatives, believes the rapid escalation of medicare costs must be halted. The proposed changes would mean a cut of 10%, saving an estimated \$1.3 billion annually at the start and much more later on.

The advocates of the cutback argue, too, that the tightening-up would eliminate wasteful use of health services, make physicians more cost-conscious and tie medicare patients' payments closer to the actual cost of care.

"It seems clear that someone with a pension or even Social Security income can and

should pay a small percentage of his income if he is going to stay in a hospital bed that is going to cost other people as much as \$50 to \$100 a day," insists Nixon aide John Ehrlichman.

Critics complain that the changes would impose a financial burden on the aged, prevent them from getting necessary medical care, produce a medicare fund surplus without passing the savings along to taxpaying workers and do nothing to solve the problem of rising medical costs. One Democrat, Sen. Edmund Muskie of Maine, even suggests "this plan could in fact increase costs for all concerned—the elderly, the government and the health industry."

The critics do concede one point: Charges paid by patients would be more closely related to actual hospital costs. Currently the aged must pay the national average cost for their first day of hospital care, regardless of what the hospital charges and what the illness is. They, then get 59 days of free hospitalization. For the 30 days following they pay 25% of the average daily cost and for the 60 days following that they pay 50%. This arrangement plainly puts a burden on patients who are more seriously ill and stay in the hospital longer, and it ignores wide cost variation among individual institutions in different parts of the country.

Instead, the administration approach would have patients pay the actual charges for the first day of care. These range from \$15 in small hospitals to \$100 in big-city institutions. The national average is \$72 a day. After the first day, patients would pay 10% of all hospital charges.

Some patients, particularly the 1% hospitalized for more than 60 days, would have money by the change. But most patients would pay more than at present, since the average hospital stay for medicare beneficiaries is only about 12 days. Secretary Weinberger concedes that the patient's payment for the average stay would rise to \$189 from \$84.

Other burdens for medicare beneficiaries would also rise. Under the program's separate coverage of doctor bills, patients would have to pay a higher "deductible" amount before the government would start shelling out. These payments would increase in the future by the same percentage that Social Security benefits rose.

COUNTING ON MEDICARE

The savings resulting from the proposed changes would permit a reduction of 6% to 7% in the payroll tax that finances medicare and would allow a cut of 30 cents from the \$6.30 monthly premium for doctor-bill coverage. But the administration isn't proposing such adjustment. Instead, it is counting on the medicare cutbacks to help reduce the budget deficit.

Nixon men argue, moreover, that reducing medicare outlays would allow them to maintain spending for other health programs. But Congress likes to look on medicare and Social Security as a separate compartment of the budget and balance the tax revenue taken in and the benefits handed out.

Beyond that, Congress simply doesn't like the notion of curtailing basic benefits that so many voters count on. And this is one Nixon economy plan that would clearly require legislation to enact. Last year a much milder proposal to increase patients' hospital payments came to grief in the Senate Finance Committee. This year's tougher plan seems sure to meet even stiffer resistance, as Secretary Weinberger's stalwarts themselves concede. "There's a one-in-twenty chance to get the legislation," one HEW official says.

The clashing assessments of the Nixon proposal spring partly from conflicting views of medicare priorities. To those who see lowering of financial barriers to medical care as the overriding aim, any increase in pay-

ments to the elderly is a step backward. Certainly when medicare was adopted in 1965, Congress was more intent on increasing the aged's access to health care than on holding down the cost.

"The whole principle of medicare was that the elderly weren't getting the care they need because they couldn't afford to pay for it," insists Bert Seidman, Social Security director for the AFL-CIO.

To those more concerned about costs, the view is different. Since 1965 the price of medical care has skyrocketed, and the government has already imposed limits on physicians' fees and the length of hospital stays it will pay for. The proportion of the aged's total health expense covered by medicare has fallen to 42% from a peak of 45% in 1969. And by some estimates, the new Nixon plan would reduce the share to 35%.

Those eying medicare costs look also at the elderly's income and find it has risen sharply. Since 1965 Social Security benefits have increased 70%. The administration argues this rise should permit an increase of 70%, to \$35 from \$50, in the payment that a patient must make for doctor bills before the government pays. Thus, the aged wouldn't be any worse off financially under this part of the program than when it started in 1966, the economizers reason.

The proposed increase in patients' payments for hospital care is defended on the broad ground of promoting economy and efficiency in health care. Proponents contend that making patients share in the cost would deter needless treatment and increase price competition in the medical marketplace.

STOP-AND-LOOK ATTITUDE

Imposing a 10% patient payment for hospital care would act as "a reminder that these resources aren't free, and for a fair fraction of the aged it's probably a meaningful enough amount," Martin Feldstein, a Harvard economist, says.

"It achieves a stop-and-look attitude: Do I need to be in the hospital an extra day? Do I need this test?" argues Peter Fox, a HEW health expert.

Mr. Fox and colleagues contend that patients facing larger bills would seek to be admitted to lower-priced hospitals, to avoid costly tests and to shorten lengthy hospital stays. Admittedly the decisions are made by doctors, but proponents reason that patient pressure would make the medical men more cost-conscious and would minimize intervention by Washington. "My personal preference is to let doctors and patients make the decision, not the federal government," says Stuart Altman, a deputy assistant secretary at HEW.

There is little doubt that increasing charges to patients decreases their use of medical care. When a 25% patient payment was imposed by a Palo Alto, Calif., medical clinic, use by Stanford University employees covered by a university health plan dropped 24%. Studies of other health plans show similar effects. "If you put in a big enough financial barrier, you will have a diminution in use," concludes Howard West, director of the Social Security administration's division of health insurance studies.

Unfortunately, it is difficult to determine whether essential or nonessential medical services are cut back in such cases. Statistics are sparse and subject to differing interpretations. Moreover, there isn't any agreement on what is a proper amount of care for the aged or any other population group. Medicare enthusiasts tend to measure progress in dollars spent, but dollar amounts can't express the quality of care.

When medicare began paying the bills for the elderly, their use of health services jumped 25%. At the same time, use of health services by younger people fell, presumably because medical-care costs were vaulting.

But since 1969, hospitalization rates for the elderly have declined, the average length of stay has dropped sharply under pressure from medicare managers. "I don't see any evidence there is overutilization or underutilization now," says Herman Somers, a Princeton University health insurance specialist.

The idea of making the medical marketplace more responsive to price competition is appealing, but skeptics detect several drawbacks. How hard-headed can a worried, impoverished and medically unsophisticated patient be? Does a sick person want his doctor to skimp on the costs of his medical care?

Moreover, there are many of the aged who can hardly become more cost-conscious because of the administration's proposal. Some are so poor that medical-welfare programs take care of any payments they incur that medicare doesn't cover. Others are wealthy enough to buy supplementary private insurance to fill medicare's gaps. The existence of these groups weakens the case for the cut-backs.

The underlying question of how much individual patients should pay for their health care is an issue sure to arise in any future broad national health insurance program. Congress is already considering possibilities that range in generosity from an AFL-CIO proposal for paying the full cost of most care to an American Medical Association plan for providing limited financial help to low-income patients. The medicare outcome will show which way politics points.

AUTHORIZATION OF APPROPRIATIONS FOR THE DEPARTMENT OF STATE—AMENDMENTS

AMENDMENT NO. 55

(Ordered to be printed, and referred to the Committee on Foreign Relations.)

Mr. BAKER. Mr. President, for myself and Senators CASE, MAGNUSON, and MUSKIE, I send to the desk for appropriate referral an amendment to S. 1248, the State Department authorization bill, to create the Bureau of International Environmental Affairs in the Department of State.

The bureau would be headed by an Assistant Secretary of State and would combine the responsibilities and resources of the office of the Special Assistant to the Secretary for Fisheries, Wildlife, and Ocean Affairs and the Office of Environmental Affairs in the Bureau of International Scientific and Technological Affairs.

The functions of the Bureau would be as follows:

First. To formulate and implement policies and proposals for international environmental programs, including of course, fisheries, wildlife, and ocean affairs;

Second. To advise the Secretary of State in the consideration of environmental factors in the formulation of foreign policy;

Third. To represent the Department in international negotiations in the area of environmental affairs;

Fourth. To seek advice from and provide guidance to domestic environmental interests on activities affecting international relations; and

Fifth. To insure effective coordination of policy responsibilities between the Department of State and other departments and agencies of the Federal Gov-

ernment in the field of international environmental affairs.

In order that the bureau might be created without displacing other unrelated offices within the Department, I have recommended a slight increase in funds for the "administration of foreign affairs" as requested in the authorization. Such an increase should provide the necessary salary for the Assistant Secretary, as well as adequate funds for increasing the expertise of the Department in the area of international environmental affairs.

Mr. President, I make this recommendation after having served on the official U.S. delegation to the 1972 United Nations Conference on the Human Environment, and before that as Chairman of the Secretary of State's Advisory Committee on the Conference.

The U.S. contribution to that historic effort was second to none, but throughout my tenure as chairman of the Advisory Committee, I repeatedly recognized the need for better coordination and cooperation, not only within the Department of State, but within the executive branch as a whole. Moreover, it is my judgment that U.S. participation in future international environmental endeavors can only be enhanced by coordinating and elevating these respective offices within the Department of State.

The conference held in Stockholm last summer was only a beginning, and much work remains to be done if we are to succeed in preserving and protecting the human environment we all must share. It is for this reason that I recommend the creation of this bureau.

Also essential to the success of environmental efforts is a better awareness of the problems which confront the nations of the world. Accordingly I have listed as one of the functions of the bureau, to seek advice from and provide guidance to domestic environmental interests on activities affecting international relations." The intent of that statement is to prompt the Department of State to honor a commitment Secretary Rogers made in his letter to the Advisory Committee upon receipt of our final report. That commitment was to consider the establishment of a "mechanism for continuing consultation in this area between the Government and the public." Since I have received no further notice of the Department's action in this regard, I feel compelled to remind them of the Secretary's letter and to urge that the bureau to be established by this amendment set, as one of its goals, broader consultation with members of the interested public.

If such consultation is carried out and the other steps recommended in my amendment are taken, I am convinced that the U.S. contribution to international environmental matters will more accurately reflect our capabilities in this field and the interest of the world will be better served.

I ask unanimous consent that the text of my amendment be included in the Record at this time.

There being no objection, the amendment was ordered to be printed in the Record, as follows:

AMENDMENT NO. 55

At the end of the bill, add a new section as follows:

BUREAU OF INTERNATIONAL ENVIRONMENTAL AFFAIRS

SEC. 106. (a) There is established within the Department of State a Bureau of International Environmental Affairs. The Bureau shall be headed by an Assistant Secretary of State designated by the Secretary of State.

(b) Under the general direction of the Secretary of State the Assistant Secretary of State so designated shall have the responsibility for, and there are transferred to the Assistant Secretary, the following functions within the Department of State:

(1) to formulate and implement policies and proposals for international environmental programs, including hereafter fisheries, wildlife, and ocean affairs;

(2) to advise the Secretary of State in the consideration of environmental factors in the formulation of foreign policy;

(3) to represent the Department in international negotiations in the area of environmental affairs;

(4) to seek advice from and provide guidance to domestic environmental interests on activities affecting international relations; and

(5) to insure effective coordination of policy responsibilities between the Department and other departments and agencies of the executive branch in the field of international environmental affairs.

The Office of the Special Assistant to the Secretary of State for Fisheries and Wildlife and Coordinator of Ocean Affairs, the Office of Environmental Affairs in the Bureau of International Scientific and Technological Affairs, and any other office or any bureau, division, section, or other organizational unit of the Department of State, all of whose functions are transferred under this section, shall thereupon cease to exist.

(c) (1) The first section of the Act of May 26, 1949, as amended (22 U.S.C. 2652), is amended by striking out "eleven" and inserting in lieu thereof "twelve."

(2) Section 5315(22) of title 5, United States Code, is amended by striking out "(11)" and inserting in lieu thereof "(12)."

On page 2, line 2, strike out "\$282,565,000" and insert in lieu thereof "\$282,715,000."

EXTENSION OF EXPIRING AUTHORITIES IN THE PUBLIC HEALTH SERVICE ACT AND THE COMMUNITY MENTAL HEALTH CENTERS ACT—AMENDMENTS

AMENDMENT NO. 56

(Ordered to be printed, and to lie on the table.)

TO AMEND S. 1136 TO PROTECT RELIGIOUS PRECEPTS IN MEDICAL CASES INVOLVING ABORTION AND STERILIZATION

Mr. CHURCH. Mr. President, tomorrow the Senate will begin consideration on S. 1136, to extend for 1 year the expiring authorities in the Public Health Service Act and the Community Mental Health Centers Act. I commend the Senate Labor and Public Welfare Committee for their prompt attention to the extension of these health programs. Included are such programs as the Hill-Burton hospital construction funds, the regional medical program, migrant health, allied health training and community mental health—all of which have enjoyed immense popularity and support in Idaho, a sparsely populated State

which cannot afford a school of medicine.

In Lewiston, Idaho, they find it hard to believe that the President has recommended the elimination of Hill-Burton funds for the reason that there is "no longer a shortage of hospital beds nationwide." At St. Joseph's Hospital, it is not uncommon to find patients utilizing beds in the hall. Vacancies are rare in the adult medical and surgical wards. There were hopes that St. Joseph's could expand and modernize through the use of Hill-Burton funds. But, to date, they have only a commitment for funds under this program if and when they become available for this much needed construction. Meanwhile, patients are juggled from room to room and often dismissed early to provide space for new arrivals. If Hill-Burton is not continued, there is little hope in this north Idaho community for adequate health facilities.

As we are all aware, the President has not requested the continuation of many of the programs included under S. 1136, and Secretary Weinberger has expressed his disapproval that Congress should choose to consider these programs in a lump-package bill. Without doubt, much could be gained by a congressional evaluation of each of the 44 programs involved and I know that Senator KENNEDY, in his capacity of chairman of the Senate Health Subcommittee, is most receptive to this idea. However, the President gave no warning of his proposal to eliminate ongoing programs and time does not permit adequate committee hearings before the June 30, 1973, expiration date. Therefore, I feel it compelling for the Senate to act favorably on this legislation, in order to insure that programs which are so vital to so many in each of our States may continue. One year should provide Congress with ample time to make a careful review of each program in question.

We are all familiar with the recent Supreme Court ruling in *Roe, et al. v. Wade*, District Attorney of Dallas County (41 U.S.L.W. 4213), that State laws which prohibit an abortion during the first 3 months of a woman's pregnancy are contrary to the due process clause of the 14th amendment to the Constitution and, therefore, invalid. Because of this decision, and the important role the Federal Government plays in medicine and medical care, I recently introduced Senate Joint Resolution 64 to protect physicians, health care personnel, hospitals, and similar health care institutions in the exercise of religious beliefs which proscribe the performance of abortions or sterilization procedures. In view of the germaneness of this resolution to S. 1136 which continues several hospital-related programs, I intend to offer it in the form of an amendment to S. 1136.

Freedom of religion is one of the great gifts of our land. Congress must never allow Federal funding to be used as an excuse for eroding freedom of religious practice by forcing abortions or sterilizations on church-affiliated institutions.

I ask unanimous consent that the text of this amendment be printed at this point in the RECORD together with the

text of an article appearing in an Idaho newspaper concerning the abortion policy to be adopted by Latter-day Saints hospitals, a reprint from the Catholic publication, *Commonweal*, and newspaper accounts of another sterilization case currently before the Montana State courts, along with a synopsis of the Federal district case prepared by my staff.

A Supreme Court decision, of course, can neither be altered nor repealed by statute, since it rests upon the court's interpretation of the Constitution, the supreme law of the land; but Congress can and should fashion the law in such a manner that no Federal funding of hospitals, medical research, or medical care may be conditioned upon the violation of religious precepts. My amendment will safeguard the paramount right of church-affiliated hospitals to operate in conformity with their religious precepts.

I am certain each of us has in his State, hospital facilities which have been built, remodeled, enlarged, modernized, or equipped under the provisions of the Hill-Burton Act. Federal money made available for this purpose, has been extended on the condition that the hospitals shall comply with certain Federal regulations. These regulations need not be prescribed prior to the acceptance of the Federal grant or loan, but may be stipulated afterwards. Thus, hospitals which have in the past accepted Hill-Burton moneys could be made subject to Federal requirements that they perform abortions and sterilizations.

Already a case has arisen which should furnish us with ample grounds for legislative action. A Federal district court in Montana, in the case of Mike and Gloria Taylor against St. Vincent Hospital, has issued a temporary injunction compelling a Catholic hospital, contrary to Catholic beliefs, to allow its facilities to be used for a sterilization operation. The district court based its jurisdiction upon the fact that the hospital had received Hill-Burton funds.

There being no objection, the amendment and material were ordered to be printed in the RECORD, as follows:

AMENDMENT No. 58

At the end of the bill, insert the following new sections:

Section 6. It is hereby declared to be the policy of the Federal Government, in the administration of all Federal programs that religious beliefs which proscribe the performance of abortions or sterilization procedures (or limit the circumstances under which abortions or sterilizations may be performed) shall be respected.

Section 7. Any provision of law, regulation, contract or other agreement to the contrary notwithstanding, on and after the enactment of the Act, there shall not be imposed, applied, enforced, in or in connection with the administration of any program established or financed totally or in part by the Federal Government which provides or assists in paying for health care services for individuals or assists hospitals or other health care institutions, any requirement, condition, or limitation, which would result in causing or attempting to cause, or obligate, any physician, other health care personnel, or any hospital or other health care institution, to perform, assist in the performance, or make facilities or personnel available for or to assist in the performance, of any abortion or sterilization procedure on any individual, if the performance of such

abortion or sterilization procedure on such individual would be contrary to the religious beliefs of such physician or other health care personnel, or of the person or group sponsoring or administering such hospital or other institution.

ABORTION: NEXT ROUND

Among predictable developments following the January 22 Supreme Court decision striking down restrictive abortion laws in the United States were juridical problems for medical personnel and institutions with religious and ethical objections to easy and indiscriminate abortions. These developments have not been long in coming. A bill in the Oregon Legislature would require Catholic hospitals to admit patients for abortion operations; Wisconsin is faced with a measure threatening the license of a doctor or nurse who refused to perform an abortion; and Senator Frank Church told Congress of a federal district court action in Montana which compelled a Catholic hospital in Billings to allow its facilities to be used for a sterilization operation—quite a different medical procedure from an abortion, to be sure, but still contrary to traditional Catholic morality codes. What is significant in the latter instance is that the sterilization operation was ordered on legal grounds some would use to force reluctant hospitals to perform abortion services: it was the recipient of public funds under the Hill-Burton Act.

Thousands of hospitals throughout the country have been built, remodeled, enlarged, modernized or equipped under the provisions of the Hill-Burton Act, including a substantial number of the 718 Catholic general hospitals, institutions which last year treated more than 23 million patients. Equally large numbers of these hospitals have received funds for research and other projects under government-sponsored National Institutes of Health programs, a detail which could increase the legal jeopardy of these institutions should a precedent be established whereby courts or legislatures made receipt of public funds a determinant in what public services a medical institution performed. Hospitals that received Hill-Burton funds would seem to be particularly vulnerable, since these funds are extended on conditions which, surprisingly, need not be prescribed by the government prior to acceptance of the grant or loan. It is noted, for instance, that the requirement on hospitals funded through the Hill-Burton Act to provide set amounts of care for charity patients is a condition laid on most hospitals after they had obtained federal money. There is certainly nothing objectionable about that condition. However, its post-factum application points up the vulnerability of hospitals that have received Hill-Burton funds to government disposition and government mandate.

Legislative action to protect hospitals from provision of law of government regulation requiring them to perform services that violate religious precepts, such as abortion and sterilization, has been initiated by Senator Frank Church of Idaho. Church's measure—Senate Joint Resolution 64—would also protect the religious and ethical beliefs of doctors, nurses and health-care personnel, as these relate to their professional practices. The measure has been referred to the Senate Committee on Labor and Public Welfare, and public hearings are expected later in the spring, perhaps before the Subcommittee on Health headed by Senator Edward Kennedy.

Interestingly enough, the resolution is attracting supporters across a broad ideological spectrum, including liberals like Proxmire and Biden and conservatives like Eastland and Byrd. Some are attracted by the basic anti-abortion features of the resolution, but some also see it safeguarding religious freedoms and civil rights and perhaps heading off efforts in the direction of a Constitutional

amendment, a move which many on both sides of the abortion issue fear would protract divisiveness over abortion in state after state over many years.

Senator Church's resolution would provide protections for hospitals and medical personnel that are vital. At the same time, opponents of the abortion decision must be looking ahead. Difficult questions will inevitably be raised with respect to the exclusivity of policy in institutions and among health-care people that Senator Church's resolution would protect. Specifically, are religious and ethical policies to be applied the same in areas where Catholic hospitals are the only ones for miles around, as they would be in populous areas where broader choices prevail for those seeking an abortion or sterilization? And if they are to be so applied, are Catholics then open to charges of imposing a moral ethic on the society of a particular geographical area? Further, is it reasonable to abolish all maternity and obstetrical services in Catholic hospitals in order to counter the possibility of abortions being performed there, as is under consideration in the Diocese of Great Falls, Montana? These are the kinds of questions that will be raised. Answers will be needed soon—and they must be more nuanced than those thus far forthcoming.

[From the Twin Falls (Idaho) Times-News, Mar. 2, 1973]

LDS CONTINUE NO ABORTION

SALT LAKE CITY.—Hospitals operating under the Health Services Corp. of the Church of Jesus Christ of Latter-day Saints continue to follow a no-abortion policy despite a late-January Supreme Court ruling that the decision on abortion is solely that of a woman and her doctor.

"We are opposed to doing abortions in our hospitals," said Dr. James O. Mason, commissioner of the Health Services Corp.

"The Church opposes abortion and counsels its members not to submit to abortion except when the life of the mother is seriously threatened," he said.

Mason said he could see future problems with the no-abortion stand.

"In an area where there is only one hospital, we see that we might have problems come up," he said. "A woman may feel her rights are being violated because she can't get an abortion anywhere else, and the local hospital refuses to give one."

Sen. Frank Church, D-Idaho, has already introduced legislation to prohibit the federal government from requiring religious hospitals to perform abortions if contrary to their faith.

At St. Benedict's Hospital in Ogden, Mother Henrita Osendorf took a stand similar to Mason's.

"We will absolutely not permit abortions to be performed in our hospitals," she said. "We do let a doctor perform one if the pregnancy endangers the mother's life."

"The Order of St. Benedict takes the unequivocal stand to respect life," she added.

A national survey indicated that most hospitals are proceeding with caution in taking steps to implement the Supreme Court's decision, and a few are keeping their ban on abortions, Mason said.

He said the ruling "doesn't force a person to do an abortion or force an institution to do something against its standards."

Mason added that "freedom of conscience provides us the opportunity to make by-laws forbidding abortions."

Mason said the Mormon Church "with its position of trying to obey the laws, wants good laws. It is very tragic that we even have this type of a problem come up."

Essentially, the Supreme Court ruling of Jan. 22 means that a woman can ask her doctor for an abortion and can seek a doctor willing to perform it. The decision does not

say that it grants the right to abortion on demand, Mason said. Doctors are not compelled to oblige a woman who happens to request an abortion.

STERILIZATION UPSETS CATHOLIC HOSPITALS; ELIMINATING OBSTETRICS CONSIDERED

GREAT FALLS.—A court order directing a Roman Catholic hospital to allow its facilities to be used for a sterilization operation could cause some Catholic hospitals to do away with obstetrical and related services, a church leader said Wednesday.

The comment came from the Most Rev. Eldon B. Schuster, Great Falls, bishop of the diocese in which the Holy Rosary Hospital of Miles City is located.

The order against Holy Rosary, he said, has placed the church in a difficult position. Asked if Catholic hospitals might consider abolishing their maternity and obstetrical services if the ruling is applied to other Catholic institutions, the bishop replied, "Yes, in fact we're considering that now."

The order was issued Tuesday in Billings by State District Court Judge Charles B. Sande in response to a suit filed by Mr. and Mrs. Richard Kransky of Miles City. A federal judge dismissed the case last week on the grounds that no federal issue was involved.

The hospital bowed to the order by permitting Mrs. Kransky, 22, to be sterilized Wednesday simultaneously with the birth of a daughter, delivered by Caesarean section.

Bishop Schuster emphasized that while the hospital complied with the court order, the church did not condone the legal decision.

"We do feel," he said, "that civil law does not dictate our moral beliefs and it seems to me that court action involving the moral code of a sectarian hospital is an infringement." The bishop explained that the Catholic Church holds basically that sterilization is not permitted if it is purely for purposes of contraception.

The Kranskys and their lawyer had argued among other things that Holy Rosary Hospital was the only medical institution reasonably available for performance of the operation in that it is the only hospital in the area with the necessary facilities.

Bishop Schuster said the decision points to a need for the church to examine the services offered by its hospital, particularly in areas where there are no other hospitals.

"If we can't uphold our own moral values, we will have to reassess our services," he commented.

Although the suit was filed as a class action for the purpose of applying to all women under similar circumstances, Judge Sande's ruling applied only to Mrs. Kransky.

She has a 4-year-old son. A second child died two days after birth. Both were delivered by Caesarean section.

Holy Rosary Hospital is owned by the Presentation Sisters of Aberdeen, S.D., and is operated under authority delegated to an 11-member board of directors, which includes seven nuns and four lay persons.

A basic question in the case is whether the hospital is essentially a public institution. Billings lawyer Robert L. Stephens, Jr. of the American Civil Liberties Union argued for the Kranskys that the hospital is performing basically a public function and enjoys tax advantages granted to nonprofit institutions by the state.

The hospital's attorneys argued, however, that the hospital could not be forced to violate its religious principles and that it is a private institution not supported in any way by public money.

Also a plaintiff in the suit was Mrs. Kransky's physician, who claimed he was being denied the right to practice "acceptable obstetrical methods based entirely on religious and not upon valid medical reasons."

Although Judge Sande signed a temporary restraining order preventing the hospital

from refusing Mrs. Kransky's request for the operation, he reserved ruling on the merits of the case and said it may be a matter for scrutiny by the state supreme court.

A similar suit is pending in federal district court in Billings against St. Vincent's Hospital, also a Roman Catholic institution.

A major difference in the two cases is that St. Vincent's receives federal Hill-Burton funds.

Bishop Schuster said he is not aware of any similar cases in the United States.

David W. Patton, administrator of Holy Rosary Hospital, said that as a Catholic institution the hospital is operated in accordance with the church's ethical standards.

"We will have to study all of the ramifications of this case before deciding on what further action to take," he commented.

STERILIZATION TO BE APPEALED

BILLINGS, MONT.—The attorney involved in legal action aimed at forcing Catholic hospitals to allow sterilization operations said Tuesday he plans to appeal an adverse ruling to a higher court.

Robert L. Stephens Jr., Billings, commented on a summary judgment issued last week by State District Court Judge C. B. Sande which allows Holy Rosary Hospital of Miles City to continue its policy of forbidding sterilization operations for contraceptive purposes.

The judge had issued a temporary order earlier which forced the hospital to allow its facilities to be used for a sterilization operation on one woman.

Stephens, an American Civil Liberties Union attorney, said his planned appeal might not be filed until a somewhat related suit now pending before the state supreme court is settled.

That suit, Stephens said, involves a physician's right to practice accepted medical procedures. He said the action was brought against St. Vincent's Hospital of Billings and is aimed at forcing the hospital to allow physicians to deliver babies by use of a method which involves the father being present in the delivery room.

"We are thinking of possibly asking to join in that appeal," Stephens said.

Stephens also is the plaintiff's attorney in a suit pending in federal district court which seeks to prohibit St. Vincent's hospital in Billings from refusing to allow sterilization operations.

Two weeks ago The Most Rev. Bishop Eldon B. Schuster of Great Falls said Catholic hospitals might have to discontinue obstetrical services if forced by the courts to permit sterilization operations purely for purposes of contraception.

The Billings chapter of the ACLU contends the policies of Catholic hospitals, often the only medical facilities in a community, have denied non-Catholics of a right to reasonable and accepted medical services.

MIKE AND GLORIA TAYLOR VERSUS ST. VINCENT HOSPITAL

Facts:

1. The St. Vincent Hospital was the only hospital in Billings that provided maternity care and intensive fetal care.
2. Under its policies, St. Vincent Hospital would permit surgical sterilization only in cases of pathological disorders or to correct pathological disorders, and then only as an incident of corrective measures.
3. Gloria Taylor was a borderline diabetic. Previously she had a history of difficult pregnancies. In addition, she had prior major surgery for the female organs.
4. Gloria Taylor delivered a baby by caesarean, and then sought to be sterilized.
5. St. Vincent Hospital provided a procedure for the transfer to another hospital.
6. However, the plaintiff established that this procedure would create complications.

Action: Injunctive relief to prevent hospital from refusing to perform the sterilization.

Jurisdictional Basis: Suit was brought in the Federal District Court because the St. Vincent Hospital received funds under the Hill-Burton Act.

Decision: Temporary injunction to prevent the hospital from refusing Mrs. Taylor's request for a sterilization.

ADDITIONAL STATEMENTS

RESPONSE BY SENATOR HUGHES TO THE PRESIDENT'S MESSAGE ON CRIME AND DRUGS

Mr. MANSFIELD. Mr. President, on March 17, Senator HAROLD HUGHES, of Iowa, responded to the President's message on crime and drugs on behalf of the majority in Congress. Senator HUGHES' statement was outstanding. Not only did he respond effectively to the President on the question of crime and drug abuse but he raised additional questions concerning aspects of crime and criminal justice that the administration chose not to address.

Notably, Senator HUGHES referred to the need in the area of correctional reform, the reform of penal institutions so as to transform them from crime-breeding facilities into institutions that serve to rehabilitate criminals and eliminate crime. He noted, too, the need to recognize at long last the victims of violence in our criminal justice system. In this regard there is presently on the Senate Calendar the Omnibus Crime Victim proposal, a measure that will undoubtedly be passed this week by the Senate.

I commend Senator HUGHES' statement on crime and drug abuse to the Senate and to the attention of the American people. It was truly an outstanding address. I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

RADIO MESSAGE BY SENATOR HAROLD E. HUGHES

WASHINGTON, D.C., March 17, 1973.—One of the great tragedies of our time is that law-abiding citizens of this great land are spellbound from day-to-day by the fear of crime and violence.

It doesn't have to be this way.

Don't tell me that this powerful and affluent nation that has so recently poured \$150 billion on a marathon, undeclared war in Indochina can't mount an effective national program against illicit drugs and make its streets and homes and market-places safe for its citizens.

What is needed is a national commitment like the commitment we made a decade ago to put men on the moon. But a half-commitment won't do.

In his recent message to Congress on Crime and Drugs, President Nixon claims credit for his Administration for making what he terms "dramatic progress" against a crime wave that he says had "threatened to become uncontrollable" prior to his taking office.

When he speaks of "dramatic progress" in these areas, we must wonder what country he is talking about.

If anyone believes that things are looking up under this Administration on the drug and crime front, I suggest that some evening soon, he take a walk, alone and without benefit of protection, on the streets of any of our great cities, preferably in the poverty districts.

For any observer with eyes in his head, the evidence will be there. And he stands, I might add, an excellent chance of getting mugged as well as enlightened.

It is ironic that statistics of the FBI, the great law enforcement agency for many years impregnably non-political but now politicized by this Administration, are used to support Mr. Nixon's claims of progress.

The statistics, as usual, cut more than one way.

The President states with pride that the rate of growth of serious crime has slowed—to one percent in the first nine months of 1972. He overlooks the shocking fact that the incidence of violent crime is now over 33 percent above 1968. Whatever the rate of growth, the overall rate of crime is still unacceptably high, and FBI figures reveal persisting increases in violent street crime in cities ranging from New York to Denver. Crime in the suburbs is also escalating now at a startling rate.

I have found no convincing evidence to support the Administration's claims that the illicit drug smuggling into this country, particularly from Southeast Asia, has been appreciably diminished. The heroin addict population in the country has doubled since this Administration came into power and other forms of drug abuse have increased. I am sorry to say it, but our national effort to control dangerous drugs in the United States has a long way to go.

Mr. Nixon says his Administration draws the line on dangerous drugs this side of marijuana. In response to this debatable point, I can only ask: How about giving the Administration's full support to the Federal effort to control the abuse of the drug that accounts for more damage in terms of death, human misery and economic loss than all other dangerous drugs put together—alcohol—and the one addiction we really do know how to treat and control, alcoholism?

It is obvious that in dealing with a problem as massive and complex as crime in the United States, cooperation between the Democratically controlled Congress and the President is desirable, if not essential. We have, I believe, a foundation of agreement on which to build.

We agree that the control of the illicit drug traffic and other serious crimes in this country is a top priority of the nation.

We agree that law-abiding citizens in this country have a right to live in security from crime and that it is a mission of government to protect them from uncontrolled lawlessness.

I know of no responsible member of either political party who takes a "permissive attitude" on crime. The simple truth of the matter is that everyone hates crime.

The question is *what to do about it in terms of realistic, practical problem-solving?*

To me, the saddest part about Mr. Nixon's message was that it was primarily an appeal to the public fear of crime rather than a reasonable, tough-minded approach to solving a very complex social problem.

So far as the concrete proposals in his message are concerned, they represent a long voyage into the night of the past—a regression to punishments and sentencing methods that have long since been professionally discredited, so far as deterring criminal acts or correcting criminal tendencies are concerned.

What Mr. Nixon has proposed is a revision of the entire Federal criminal code along lines that would drastically increase the harshness of penalties and would limit the discretion of judges in imposing sentences.

This all goes into the face of professional judgment and world experience. Any qualified penologist will tell you that it is not the severity of the sentence that deters crime but the swiftness and certainty of the punishment.

For the good of all, it is the protection of society we must rationally seek in our crim-

inal justice system, not public vengeance against those who commit crimes.

I, for one, believe that the President's call for a restoration of the death penalty is a simplistic and illusory way to sidestep the real problems of deterrence and corrections. Whether or not you believe, as I do, that the death penalty is wrong on moral grounds as a violation of the sixth commandment, the overwhelming weight of evidence is that it is not effective as a deterrent. Moreover, if the death penalty is mandated for some crimes, juries will be less likely to convict than where some discretion is granted, and kidnappers and hijackers who have already been involved in killing, when closed in upon will see nothing to lose by further killing.

In the clear light of day, I believe the people of this country want to move forward, not backward, in developing a fair and effective system of law, order and justice.

I know that the Democratic leadership and majority in Congress will readily provide cooperation for any realistic, practical and forward-looking proposals the Administration may make. And it is obvious that in dealing with a problem as massive and complex as crime in the United States, we need maximum cooperation between the legislative and executive branches.

Here are a few of the areas in which such joint action, backed with strong public support, is needed if we really mean what we say about curbing crime in the country:

We urgently need action to speed up trials and sentencing. The Democratic Congress has initiated legislation to enforce the Sixth Amendment right to speedy trial—within 60 days as the ultimate goal.

We need adequate measures to control the improper use of handguns.

Contrary to the Administration's viewpoint, we need a more efficient method of setting up programs and allocating funds for the Law Enforcement Assistance Administration than the present bloc-grant system that has produced ineffectiveness, waste and corruption.

We need reform of our over-crowded, understaffed, rotting prisons where first offenders enter to become hardened criminals and recidivists.

We need correction of social conditions known to be conducive to criminality—conditions such as overcrowding, chronic unemployment, poverty, inadequate health care, and discrimination.

That such conditions contribute to the development of criminal behavior among the people affected is simply a self-evident fact of life. Yet it is these very programs that the present Administration is most intent on eliminating or cutting back to the point of ineffectiveness.

We need legislation—such as is now in the Congressional hopper—for assistance to innocent victims of violence.

On the drug front, we need more emphasis on treatment and prevention—a stepped up effort to control the demand for dangerous drugs as well as the supply. As long as the demand exists and the traffic is lucrative, it will continue to be difficult to suppress smuggling and distribution, however severe penalties may be applied. In order to make real headway, at some point, we must get at the source of the problem—the addiction itself, and this, unfortunately, is the point of least emphasis by this Administration.

We need to improve the whole federal drug traffic enforcement effort—by reorganizing to eliminate inter-agency rivalry and fragmentation of effort.

We must tighten up the legal machinery against white collar crime if we are to expect anyone to respect the law.

The last point was one gaping omission in Mr. Nixon's message on crime. It is not just the nameless law-breaker who robs or kills or pushes narcotics who should be brought to justice. White collar crime is just

as serious. Fraud, bribery, rent-gouging and price-fixing ought to be included, not to mention political espionage, burglary and sabotage such as were involved in the notorious Watergate case.

We have been concerned—and rightfully so—about crime in the streets. We should be equally concerned about crime in the corridors . . . the corridors of the high echelons of government and business. If executive privilege is invoked to prevent essential witnesses from testifying in criminal cases and if the FBI is restrained from making a full investigation of such flagrant crimes as occurred in the Watergate case, how can the average American believe in our justice system?

In the aftermath of the Vietnam War and years of domestic tensions, we all recognize the need to quell divisive influences and unify our people again.

One way to bring this about, I am convinced, is to attend to compelling and long-neglected priorities here at home such as crime control.

We need to begin with more, better-trained and better-paid police.

Can we afford it? Is it worth it? We say yes.

In the battle of the budget, Congress and the President agree that there should be an overall limit on federal spending. There is no dispute about this.

The point at issue is where and how the money within that overall budget should be spent—where the true national priorities are.

This Administration has spent over \$100 million to assist and train police and public safety officers in foreign lands. Meantime, here in our country, decent citizens are afraid to venture out on the streets.

It is time now to put our resources into controlling crime at home. We Democratic members of Congress are not advocating raising the overall level of spending. We are simply saying, let's put the money where our real priorities are.

If we employ anything like the energy and resources to keep the peace at home that we have expended in making war abroad, domestic tranquility and peace of mind are well within our reach.

POISON PREVENTION WEEK

Mr. SCHWEIKER. Mr. President, the week of March 18 through 24 is Poison Prevention Week. Each year there are more than 1 million cases of poisonings in the United States, including those from gases and vapors. About half of these deaths are accidental. But most tragically, fully one-third occur in children under 5 years of age.

In the Pittsburgh area of my State alone, two poison control centers, Children's Hospital and St. John's General Hospital, reported a total of 7,759 cases of poison ingestion in 1971, the last year figures were available. These figures indicate the cases taken to hospitals in the area and do not reflect ingestions treated privately by physicians or resolved by parents at home.

Since Congress passed a joint resolution in 1961 requesting that the President annually set aside the third week in March as Poison Prevention Week, countless numbers of civic, government, and business organizations in Pennsylvania have worked hard to educate parents on the handling of medicines, cleaning fluids, and other chemicals commonly found in the home. The Lancaster County Pharmaceutical Association last year

distributed materials through the stores and schools. Activities were also conducted by the Boy Scouts of Milesburg and Kittanning, American Telephone and Telegraph of Pittsburgh and the Reese Candy Co. of Hershey.

Of course the problem is nationwide and Dr. Jay M. Arena, president of the American Academy of Pediatrics and a member of the Medical Advisory Board of the Council on Family Health, tells us that poisoning is now the most common medical emergency that exists in modern pediatrics. Dr. Arena, who has had a long career as a pediatrician and who now heads the Duke University Hospital Poison Control Unit, says that children's deaths from poisoning exceed the total of those from polio, measles, scarlet fever, and diphtheria combined.

Each year some 70,000 children under age 5 are involved in accidental poisonings. And at least two children in the age group die of poisoning every 3 days. Most often, these accidents occur between the ages of 1 and 3, when the child is just beginning to explore his environment and needs close supervision.

Over the years, manufacturers have made great strides in improving the quality of their products, making them more effective and efficient. Government, for its part, has been providing the force to make these products safe and, through legislation, providing consumers with the means to increase the safety aspects of using the product by requiring information on the label, appropriate warning signals, rules regarding advertising, and special packaging to thwart the curiosity of inquisitive youngsters.

The manufacturers of proprietary medicines have sponsored the Council on Family Health to promote the safe use of medicines and all household substances throughout the year. The Council of Family Health reminds us to keep all household products and medicines out of reach of children, cap all medicines immediately after use, and store internal medicines separately from other household products.

I believe all Americans should support the goals of Poison Prevention Week. The problem of poisoning is often a family-sized tragedy that does not make page 1 of the papers or the TV screen, but the heartbreak is no less real. It is a daily problem of national magnitude that I urge everyone and organizations such as the Council on Family Health to deal with.

PAUL H. DOUGLAS' 81ST BIRTHDAY

Mr. PROXMIER. Mr. President, today is the 81st birthday of our friend and former colleague, Paul H. Douglas.

Paul Douglas came to the Senate in January, 1949, after the spectacular upset victory in that year in which he was elected to the Senate from Illinois. Adlai Stevenson was elected Governor of Illinois, and Harry Truman was reelected President of the United States. The wisdom and good judgment of the people of the State of Illinois has never been more in evidence than it was on that occasion.

Paul Douglas spent the early part of his life as a great economist. Then he became an alderman in the city of Chicago where he gained great acclaim for his courage and independence of mind. He followed that career by joining the Marine Corps at the age of 50 and distinguishing himself in combat in the Pacific.

His Senatorial career, a career encompassing 18 years of dedicated and intelligent service to the people of his State and Nation, was not his only but his crowning achievement.

Paul was literally the first Senator to fight the so-called pork barrel rivers and harbors budget. He applied cost-benefit analysis to the budget before there was such a thing as cost-benefit analysis.

In 1952, he and HUBERT HUMPHREY started the first major congressional attack on tax loopholes—a fact that has now been largely forgotten.

He was and is a champion of the consumer and of the environment.

And in addition to all this he was a great teacher and speaker in the debates on the Senate floor. The wit and spontaneity and knowledge he displayed is rarely equalled in debate today.

But most important of all, Paul Douglas is a warm hearted, humane, and marvelous human being.

Paul, we salute you on your birthday. We hope you have many, many more.

COMMUNITY MENTAL HEALTH CENTERS

Mr. MONDALE. Mr. President, one of the saddest failings of our national health policies has been our inability to care properly for and provide hope to the mentally ill. In 1963, President John F. Kennedy took a major step when he proposed creation of a network of centers to serve the mentally ill. As a result, Congress approved and Federal, State, and local governments worked together to establish the community mental health center program.

In 1971 alone, more than 600,000 citizens sought to help at these centers. In the short period of their existence, many of the centers have developed highly effective programs in the areas of community education and prevention of mental illness. They have served thousands of poor people—particularly in rural areas—who would otherwise have no access to mental health services they could afford. So far about 400 of the 1,500 centers originally projected for the program by 1980 have been created.

We face heartbreaking and frustrating problems in dealing with mental illness in this country. We know that there is a correlation between mental illness and poverty. We know there are thousands of children whose emotional or mental handicaps are going undetected until they have become a major deterrent to learning and to functioning in our society. We know that the use of drugs and the rate of suicide among young people have skyrocketed in recent years.

And now the administration has decided to phase out the community mental health centers program, which I believe holds great promise for solving some

of these problems which our society has only begun to confront.

In a recent article in the Minneapolis Tribune, contributing editor Geri Joseph described dramatically the accomplishments of this program and the loss we would all experience if it were to be phased out as proposed. I ask unanimous consent that a copy of this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE PHASING OUT OF COMMUNITY MENTAL-HEALTH CENTERS

(By Geri Joseph)

To President Nixon, it may be the "new federalism." To those concerned with the care of the mentally ill, it sounds like an old, familiar story. And a discouraging one at that.

Tucked away in the President's budget message a few weeks ago was a little-noticed mention of his plan to get the government out of the community-mental-health-centers (CMHC) business. There were so many programs on the marked-for-death list that special-interest groups are just beginning to find their favorites among those proposed for closing out or cutting back.

But it is fair to say that no other program is to be discontinued because of its success. The federal responsibility for the mental-health centers is being "phased out," the administration indicated, because it has been a successful demonstration project. (Never mind that the centers were not intended to be merely a "demonstration project.")

Administration spokesmen offered another reason for ending federal participation. The centers program, they said, created inequities, since people served by them receive better care than people in the rest of the nation!

That explanation has an Alice in Wonderland quality that puzzles and angers many mental-health workers. Why not eliminate the inequities, they are asking, and fulfill the original goal of 1,500 centers across the nation by 1980? Why stop now when there are only about 400 functioning programs?

For years, citizen groups and individuals, shocked by terrible conditions in state mental hospitals, campaigned for better public understanding and more money. Both were slow in coming. But the community mental-health centers program was an enormous step in the right direction. With the Nixon administration proposing to end federal funding, the stimulation provided by federal concern also would end, and the program could falter and diminish.

Mental-health volunteers and professionals have little confidence that revenue-sharing funds turned back to the states will provide the same support. Not only will competition for that money be intense, but much of the planning for health services will be directed by public-health experts. Traditionally, they have not been sympathetic to the needs of the mentally ill.

The CMHC program originated in 1963 with President John Kennedy, the only president to take official interest in the problems of the mentally ill. (Mr. Nixon has singled out cancer and heart disease and programs for both will be given increased funds. Without downgrading the need, one might ask how such priorities are determined.)

In a message to Congress, Kennedy proposed a network of community mental-health centers. "Every year," he said, "nearly 1.5 million people receive treatment in institutions for the mentally ill and the mentally retarded. Most of them are confined . . . within an antiquated, vastly overcrowded chain of custodial state institutions."

"This situation has been tolerated far too long. The federal government, despite the nationwide impact of the problem, has largely

left the solutions up to the states. . . . The time has come for a bold new approach."

And so, for the first time on a large scale, the federal government concerned itself with the care and treatment of the mentally ill. That was part of the "bold new approach." About 30 percent of money for staffing, construction and special programs for children came through the government's National Institute of Mental Health. The remainder, 70 percent, came from states and local communities.

Those figures make the federal role sound small. In actual dollars, it amounted to about \$624 million between 1964 and 1972. But those dollars were the all-important seed money that encouraged state and local matching funds. And that seed money also enabled the federal government to set standards.

Some of the horror and mystery about mental illness began to give way with the growth of the program. Better, more humane treatment followed, too. The light of community attention was healthy, and so was the help of local planning groups. A real alternative developed to the old-style treatment of "exile" in remote, poorly staffed institutions. That was another part of the "bold new approach."

The number of people seeking help in their community centers climbed steadily—from 372,000 in 1969 to 659,000 in 1971. Many of the centers are in areas of urban or rural poverty where those who can least afford quality mental-health care have easy access to them. Almost two-thirds of the centers' patients in 1970 had incomes of less than \$5,000.

No claims are made that the CMHC is a perfect system for diagnosis and treatment of mental illness or that it does all that might be done in prevention and community education. The programs vary from place to place, some are better than others, and some try to serve too many people. Most of the centers serve areas of 300,000 people or more. In addition, Ralph Nader's group has criticized the program for not having enough "grass-roots involvement."

But most of the criticism results from the fact that fewer than 100 of the centers have been in existence for as much as five years. And only two states, North Dakota and Kentucky, come close to providing near-total coverage for their populations. But where programs exist, there is hope for improvement. The biggest problem is that no centers at all exist for the majority of people in this country. Mental-health workers fear they never will if the Nixon budget is passed.

"This is a disastrous set-back for the mentally ill and their families," Mrs. J. Skelly Wright, president of the National Association for Mental Health, said. "At what cost will they cut costs?"

And Brian O'Connell, association executive director, said reaction from state mental-health groups is "almost desperation in many quarters, a feeling of hopelessness." But the association is mobilizing its million volunteers to urge Congress to continue the federal stake in the community-mental-health-centers program, at least until the 1,500-centers goal is reached. There is strong intention, too, to try to change the mind of the man in the White House.

But optimism is in short supply. And the promise of Kennedy's "bold new approach" seems, unreasonably, foreclosed.

GRANDPARENTS DAY

Mr. ROBERT C. BYRD, Mr. President, a West Virginia newspaper editor, Mr. Robert K. Holliday, of the Fayette Tribune, has brought to my attention the commitment of a fellow West Virginian, Mrs. Joe McQuade, of Gauley Bridge, to the designation of a date to be known

as "Grandparents Day." In this age of emphasis upon youth and neglect for the aging, I feel that Mrs. McQuade's sentiment is a worthy one, which will appeal to most thinking people.

I ask unanimous consent that Mr. Holliday's article concerning Mrs. McQuade's mission be printed hereafter in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MRS. MCQUADE TO GO DOWN IN HISTORY: FAYETTE RESIDENT HAS SPECIAL DAY PROCLAIMED FOR ALL GRANDPARENTS

Since West Virginia's Anna Jarvis of Grafton originated one of the most honored days of the year, Mother's Day, another West Virginian is responsible for creating another Day, that of Grandparents Day, which was officially set aside to be held May 27 of each year.

Mrs. Joe McQuade, Gauley Bridge, who is so closely connected with the elderly, the Senior Society of our area, county and state, said that the idea has been forming in her mind for some time, but its germination came about following a call from Gov. Arch A. Moore, Jr., just last week.

Mrs. McQuade, who serves on President Nixon's Council on Aging, said that she was writing to Gov. Moore about the idea of having an official Grandparents Day, late last week, when she suddenly decided to "just call him about it."

She said that one of the Department of Public Safety's state troopers answered the telephone at the Governor's office, telling Mrs. McQuade that his office was "literally swamped" with telephone calls, but informed the Gauley Bridge resident that he would try to help her if he could.

She explained her reason for calling, with the trooper telling her that he would relay her message and request to Gov. Moore.

She said that within 15 minutes, "just think, in 15 minutes, Gov. Moore called me in person to grant my request," Mrs. McQuade said. Gov. Moore stipulated that Grandparents Day not be set on his birthday, as it would "tell everyone just how old" he is.

So, between the two, Gov. Moore and Mrs. McQuade, they selected May 27 to be observed officially in West Virginia as Grandparents Day, this day to come between Mother's Day, the second Sunday in May, and Father's Day, the third Sunday in June.

Mrs. McQuade said that Grandparents Day will from now on be officially celebrated with May 27 set aside as the day of days for all grandparents.

She urged everyone, especially youngsters, to remember their grandparents, visit them, and think about them, not only on this day, but every day.

She feels also that Grandparents Day would be particularly appropriate to visit everyone in nursing and boarding care homes, with young people "adopting" grandparents to remember and work with.

"After all," Mrs. McQuade said, "we certainly owe our elderly and senior citizens a lot."

PROTECTION FOR SOURCES OF PUBLIC INFORMATION

Mr. CHURCH, Mr. President, recently I joined as a cosponsor of legislation sponsored by my distinguished colleague Senator ALAN CRANSTON of California which would provide a means by which newsmen could protect their confidential sources. Such a protection is vital to our society if the people's right to know is to be preserved. We cannot afford the

chilling effect upon free speech and free press presented by the spectacle of government agencies pressing for jail terms for reporters whose major crime has been to reveal to the public information which has embarrassed Government officials.

Recently, the legislature of the State of Idaho held hearings on this subject and Mr. Lyle Olson, the publisher of the Pocatello, Idaho, Idaho State Journal, testified in favor of legislation to protect newsmen's sources. Mr. Olsen makes an eloquent plea for the adoption of legislation of this nature.

Mr. Olson puts the argument for the legislation in a nutshell when he states:

This legislation is not a newsman's privilege law—although that is what it may be called by some, because it is not for newsmen. It is for the American citizen, on whose behalf the newsman acts.

Mr. President, I ask unanimous consent that the text of Mr. Olson's remarks, together with the text of the "Free Flow of Information Act," the proposal which I am cosponsoring, appear at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WHY NEWSMEN NEED PROTECTION

(EDITOR'S NOTE.—Following is the text of a statement by Lyle Olson, managing editor of the Idaho State Journal, before the Senate State Affairs committee in a hearing Wednesday night in Boise. It is printed below as an editorial in support of S.B. 1128, the so-called newsmen's protection law.)

I am pleased to appear here in support of S.B. 1128 on behalf of my newspaper, and as spokesman for the Idaho members of the Utah-Idaho-Spokane Associated Press Association. Those other members include the Idaho Falls Post-Register, the Blackfoot Daily News, the South Idaho Press at Burley, the Moscow Daily Idahoan, the Lewiston Morning Tribune, the Kellogg Evening News and the Idaho Daily Statesman.

Many of these newspapers have spokesmen here tonight, or will submit written statements, but I have the assurance of each they are solidly in support of S.B. 1128.

This solid support in Idaho reflects the concern expressed nationwide for similar so-called shield, or freedom of information laws. The American Newspaper Publishers Association has recommended passage by Congress of legislation which would block subpoena of reporters and unpublished news media materials in both federal and state proceedings, and there are some 30 measures currently before Congress which would give newsmen such protection.

According to Mr. Robert Notson, Publisher of the Portland Oregonian, 18 states had enacted shield laws as of 1972. Bills also have been put forward in legislatures of California, Oregon, Washington, Alaska and Idaho to legalize a newsman's right to protect his sources.

You may ask why, after nearly 200 years, such laws are now deemed necessary. That is because nearly all newsmen and judges believed the press enjoyed a cloak of protection under the first Amendment, guaranteeing freedom of speech. But a succession of decisions, including one by the Supreme Court of the United States, has recently made it clear the press enjoys no such protection. The Supreme Court said quite bluntly the First Amendment affords no privilege to a newspaperman over any other citizen, and in effect referred the issue back to the Congress

(and by extension, to state legislatures) with the statement: "Congress has freedom to determine whether a statutory newsman's privilege is necessary and desirable and to fashion standards and rules as narrow or broad as deemed necessary to address the evil discerned and, equally important, to refashion those rules as experience, from time to time, may dictate."

What has been the result of removing the cloak of protection afforded newsmen in the past?

Several reporters have gone to jail for refusal to divulge the source of stories, a high dedication to principle that is illustrative of the devotion which newsmen hold for their profession. They went to jail even though in no case has the public interest been compromised, nor wrong-doers protected by a reporter's silence. The most abused was Los Angeles Times reporter William T. Farr, who spent 48 days in prison on a contempt citation arising out of a story about the 1970 Charles Manson trial. He calls his open-ended sentence a form of "psychological barbarity" we do not mete out to our worst criminals.

A more important result of the Supreme Court's ruling is the danger to a free flow of information to the public. Editor and Publisher Magazine of January 6, 1973, quotes Mr. Davis Taylor, Publisher of the Boston Globe and Chairman of the ANPA, as saying: "... Our reporters have already reported a drying up of sources because of fears stemming from the recent wave of subpoenas of newsmen and their materials." In other words, persons who might come forward to volunteer information of wrong-doing in government, or of criminal acts, now hesitate because they fear harm or reprisals if their identity becomes known.

It is not the press which suffers most when reporters—or their useful sources—are intimidated. It is the public. Our readers depend upon a free, unfettered press to throw light into dark corners, to expose corruption in high places, to call attention to the chipping away of our personal liberties by an increasingly aggressive government. The public depends upon a nosy reporter, if you will, as one important check in the system of checks and balances. It is the reporter or the broadcaster, backed by his editor and his publisher, who sallies forth to represent the ordinary citizen in the councils of government, and to ask the questions which need to be asked. The reporter has no personal axe to grind; he simply takes his obligation very seriously to report what is going on as fairly and accurately as is humanly possible. And, in our society, he alone is uniquely qualified to do the job he does. It is significant that the reporter does not ply his trade in nations which have no free government.

I do not wish to suggest there is a sinister plot afoot to centralize power or curtail free speech and inhibit other freedoms. But there are powerful interests at work which tend to usurp authority, to concentrate power in their own hands. There is even now an impending struggle between the legislature and executive branches of the federal government in which the ordinary citizen feels helpless to intervene, or even understand. The role of the press will be vital in "referring" this power struggle, freely commenting along the way, and there must be no fear of reprisals in a judicial chamber. The press has the right, and a duty, to report its findings to a public in danger of growing too cynical, too withdrawn, too intellectually dishonest.

You may wonder if all this really has any bearing on whether Idaho needs a shield law, when there is no record of any Idaho newsman being cited or threatened with contempt of court for failure to reveal sources. We believe Idaho does need such a law to forestall such an occurrence. Judges have been em-

boldened in recent weeks to threaten Idaho newspapers with contempt on other grounds. There is a discernible trend toward challenging, if not intimidating, the press in Idaho.

There is another good reason as well. A shield law will encourage investigative reporters to dig out information about criminal activity, or abuse of public office. The Idaho press has been criticized by some for failure to pursue sensitive stories. It seems logical we should encourage, rather than discourage, more efforts in that direction. Senator Alan Cranston of California, sponsor of one newsman's protection bill now before the Congress, has stated: "I am convinced that an absolute press confidentiality privilege would do more for the cause of law and order and justice than would any limitation of that privilege."

There are added benefits of a shield law. Reporters have dug up hundreds of news stories over the years, which have led to criminal indictments and convictions. News stories may provide useful information to law enforcement agencies, even if some confidential sources are not identified by the reporter. It has been my experience that the press and the law enforcement agencies in Idaho have had a successful working relationship, and I believe a shield law would strengthen that relationship.

Certain objections to a shield law have been heard—that it would make libel more difficult to prove, and that it would give newsmen a privilege not extended to other citizens. As to the first, I see nothing in S.B. 1128 which would make it any more difficult to prove libel. The news media would continue to be responsible for stories exposing a person to hatred, contempt, ridicule or obloquy. Challenged it is the press which must always prove truth or lack of malice.

As to status of newsmen, that is conferred upon them by the nature of their public duties. They occupy a unique role in a democracy, as the result of their inquiries benefiting the public through a free flow of information. This legislation is not a newsman's privilege law—although that is what it may be called by some, because it is not for newsmen. It is for the American citizen, on whose behalf the newsman acts. In regard to that point, I can commend the form of S.B. 1128 as a broadly based act, free from qualifying amendments. It is significant that at least two newsmen were jailed last year in states where qualified shield amendments, they can be twisted so as to provide little protection.

In conclusion, it would be possible to cite the observations of many historic figures who have recognized the need for a free and untrammelled press in America. Permit me to quote only the eloquent words of the distinguished jurist, Judge Learned Hand, who said, many years ago:

"The newspaper industry . . . serves one of the most vital of all general interests: the dissemination of news from as many different sources and with as many facts and colors as is possible. That interest is closely akin to, if indeed it is not the same, as the interest protected by the First Amendment: it presupposes that right conclusions are more likely to be gathered out of a multitude of tongues than through any kind of authoritative selection. To many this is, and always will be, folly, but we have staked upon it our all."

S. 158

Amendments intended to be proposed by Mr. CRANSTON (for himself, Mr. KENNEDY, and Mr. CHURCH) to S. 158, a bill to insure the free flow of information to the public, viz: On page 1, strike out all after the enacting clause and insert the following in lieu thereof:

That this Act may be cited as the "Free Flow of Information Act".

FINDINGS AND DECLARATION OF PURPOSE

SEC. 2. The Congress finds and declares that—

(1) the purpose of this Act is to preserve the free flow of news to the public through the news media;

(2) a public fully informed about events, situations, or ideas of public concern or public interest or which affect the public welfare is essential to the principles as well as the effective operation of a democracy;

(3) the public is dependent for such news on the news media;

(4) those in the news media who regularly gather, write, or edit news for the public or disseminate news to the public must be encouraged to gather, write, edit, or disseminate news vigorously so that the public can be fully informed;

(5) such persons can perform these vital functions only in a free and unfettered atmosphere;

(6) such persons must not be inhibited, directly or indirectly, in the performance of such functions by government restraint or sanction imposed by governmental processes;

(7) compelling such persons to present testimony or produce material or information which would reveal or impair a source or reveal the content of any published or unpublished information in their possession dries up confidential and other news sources and serves to erode the public concept of the press and other news media as independent of governmental investigative, prosecutorial, or adjudicative process and functions and thereby inhibits the free flow of news to the public necessary to keep the public fully informed;

(8) there is an urgent need to provide effective measures to halt and prevent this inhibition in order to preserve a fully informed public;

(9) the practice of the news media is to monitor and report across State boundaries those events, situations, or ideas originally reported locally in one State which may be of concern or interest to or affect the welfare of residents of another State;

(10) the free flow of news to the public through the news media, whether or not such news was originally published in more than one State, affects interstate commerce;

(11) this Act is necessary to implement the first and fourteenth amendments to the Constitution of the United States and article I, section 8 thereof by preserving the free flow of news to the public, the historic function of the freedom of the press.

EXEMPTION

SEC. 3. No person shall be compelled pursuant to subpoena or other legal process issued under the authority of the United States or of any State to give any testimony or to produce any document, paper, recording, film, object, or thing that would—

(1) reveal or impair any sources or source relations, associations, or information received, developed, or maintained by a newsman in the course of gathering, compiling, composing, reviewing, editing, publishing, or disseminating news through any news medium; or

(2) reveal the content of any published or unpublished information received, developed, or maintained by a newsman in the course of gathering, compiling, composing, reviewing, editing, publishing, or disseminating news through any news medium.

PRESUBPENA STANDARDS AND PROCEDURES

SEC. 4. (a) No subpoena or other legal process to compel the testimony of a newsman or the production of any document, paper, recording, film, object, or thing by a newsman shall be issued under the authority of the United States or of any State, except upon a finding that—

(1) there are reasonable grounds to believe that the newsman has information which is (A) not within the exemption set forth in section 3 of this Act, and (B) material to a particular investigation or controversy within the jurisdiction of the issuing person or body;

(2) there is a factual basis for the investigation or for the claim of the party to the controversy to which the newsman's information relates; and

(3) the same or equivalent information is not available to the issuing person or body from any source other than a newsman.

(b) A finding pursuant to subsection (a) of this section shall be made—

(1) in the case of a court, grand jury, or any officer empowered to institute or bind over upon criminal charges, by a judge of the court;

(2) in the case of a legislative body, committee, or subcommittee, by the cognizant body, committee, or subcommittee;

(3) in the case of an executive department or agency, by the chief officer of the department or agency; and

(4) in the case of an independent commission, board, or agency, by the commission, board, or agency.

(c) A finding pursuant to subsection (a) of this section shall be made on the record after hearing Adequate notice of the hearing and opportunity to be heard shall be given to the newsman.

(d) An order of a court issuing or refusing to issue a subpoena or other legal process pursuant to subsection (a) of this section shall be an appealable order and shall be stayed by the court for a reasonable time to permit appellate review.

(e) A finding pursuant to subsection (a) of this section made by a body, agency, or other entity described in clause (2), (3), or (4) of subsection (b) of this section shall be subject to judicial review, and the issuance of the subpoena or other legal process shall be stayed by the issuing body, agency, or other entity for a reasonable time to permit judicial review.

SPECIAL LIMITATIONS

SEC. 5. (a) A finding under section 4 of this Act shall not in any way affect the right of a newsman to a de novo determination of rights under section 3 of this Act.

(b) If any provision of this Act or the application thereof to any person or circumstance is held invalid, the remainder of the Act and the application of the invalidated provision to other persons not similarly situated or to other circumstances shall not be affected thereby.

DEFINITIONS

SEC. 6. For the purposes of this Act:

(1) The term "information" includes fact and opinion and any written, oral, or pictorial means for communication of fact or opinion.

(2) The term "news" means any communication of information relating to events, situations, or ideas of public concern or public interest or which affect the public welfare.

(3) The term "newsman" means any person (except an employee of the Federal Government or of any State or other governmental unit while engaged in disseminating information concerning official governmental policies or activities) who is or was at the time of his exposure to the information or thing sought by subpoena or legal process an operator or publisher of a news medium, or who is or was at such time engaged on behalf of an operator or publisher of a news medium in a course of activity the primary purpose of which was the gathering, compiling, composing, reviewing, editing, publishing, or disseminating of news through any news medium; and includes a freelance writer who has disseminated

news on a regular or periodic basis to the public.

(4) The term "news medium" means any newspaper, periodical, book, other published matter, radio or television broadcast, cable television transmission, or other medium of communication, by which information is disseminated on a regular or periodic basis to the public or to another news medium.

(5) The terms "operator" or "publisher" mean any person engaged in the operation or publication of any news medium.

(6) The term "State" means any of the several States, territories, or possessions of the United States, the District of Columbia, or the Commonwealth of Puerto Rico.

Amend the title so as to read: "A bill to preserve the free flow of news to the public through the news media."

"THIRTY MINUTES WITH . . ."

Mr. ROBERT C. BYRD. Mr. President, on Thursday, March 22, I was the guest on "Thirty Minutes With . . ." a production of the National Public Affairs Center for Television which is hosted by Elizabeth Drew.

I ask unanimous consent that the transcript of that program be printed in the RECORD.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

"THIRTY MINUTES WITH . . ."

ANNOUNCER. People from Washington, across the nation and abroad, people of consequence are questioned on the issues of our time by Elizabeth Drew on *Thirty Minutes With . . .*

Tonight, Senator Robert Byrd, Democrat, of West Virginia.

Drew. Senator Byrd, you hold the important position of Majority Whip of the Senate, the position for which you defeated Senator Kennedy a few years ago; you may be the next Majority Leader of the Senate; and you're also on several important committees. One of them is the Judiciary Committee, and on that committee it's been highly significant that you have opposed the President's nomination of Pat Gray to be the head of the F.B.I. I'd like to put some questions to you about that.

First, what do you think is going to happen, do you think Mr. Gray is going to be confirmed by the Senate?

Senator BYRD. I think the situation in the Judiciary Committee is very tight right now, I think there'd be a very close vote. I think the time runs against Mr. Dean. And—

Drew. You mean Mr. Gray.

Senator BYRD. Mr. Gray.

Drew. Yes.

Senator BYRD. And Mr. Dean has been so much in the hearings that—

Drew. The White House aide—

Senator BYRD. Yes.

Drew. —whom you do want to testify.

Senator BYRD. Yes, yes. I don't know, I think it's about 60-60 right now, but within a day or so, or a few days, by the time the Committee has its executive mark-up, there may be another vote or two to solidify one way or the other.

Drew. What do you mean that time runs against him. Why should that count against him?

Senator BYRD. Because with each new hearing there seem to be new developments which impair the chances for his confirmation.

Drew. Now the—one of the issues that's troubled you and some of your colleagues is the fact that Mr. Gray does not seem to be independent enough of the White House, and that he turned documents over to them in the course of investigating. In

the current context though, in the current atmosphere, is it realistic to expect a director of the F.B.I. to be chosen who is not tied to the White House in some way?

Senator BYRD. Well, I'm sure that in the past, Mr. Hoover undoubtedly submitted to the President of the United States from time to time, regardless of what party was in power, a letterhead memorandum summarizing the facts in connection with some individual or some situation. And he may—

DREW. Well we used to hear that he actually gave them the files.

Senator BYRD. He may even have shown the President a raw file from time to time. But never, never would Mr. Hoover have obsequiously and subserviently turned over repeatedly raw files without questions to White House echelon people; I don't think it was in Mr. Hoover's makeup. So we see something here entirely different, with an F.B.I. acting director turning over to Mr. John Dean, the counsel to the President, raw files over a long period of time, involving even re-interviews with people who were affiliated with the Committee for the Re-election of the President, who asked for such re-interviews to be private and outside the presence of an attorney. And yet these re-interview reports were even turned over to Mr. Dean.

Now the President in August stated that the White House investigation had been completed, and that no one on the President's staff or in the government was involved. But even subsequent to that August statement in San Clemente by the President, Mr. Gray has continued to supply Mr. Dean with raw F.B.I. files, even as late as October 10, without asking any questions as to whether or not the investigation was continuing.

I am afraid that the presumption of confidentiality on which informants could heretofore depend in giving information to the F.B.I. can no longer be assured or assumed.

DREW. But you have said that Mr. Hoover did some of this too, perhaps, you said, not to the degree, perhaps. But we know, or we have heard that he did turn over files to the White House. There are stories that he turned over information to reporters and perhaps even to politicians on Capitol Hill. So did this presumption of confidentiality really exist before?

Senator BYRD. Yes, yes. As I say, Mr. Hoover, if there was any turning over of anything, he did it himself. And he—

DREW. Well what's the difference, as long as it was turned over?

Senator BYRD. And he went to the top. There's a great deal of difference in supplying Lyndon B. Johnson with a letterhead memorandum which is a digest of information. There's a great difference in doing that and in giving to someone on the White House staff raw, undigested, teletype information, interview reports, et cetera, et cetera.

DREW. We don't know for sure that this is unprecedented, either though, do we?

Senator BYRD. We have no reason to believe that it isn't. No reason whatsoever to believe that it isn't. There's been no indication that this has been done before.

DREW. The—you used the word acting director, and that's another question I wanted to ask you. Mr. Gray has been acting director since last May. In retrospect, do you think the Senate made a mistake in not insisting on examining his credentials at the time, and letting him be acting director for so long?

Senator BYRD. The Senate had no opportunity to examine his credentials.

DREW. Well couldn't—

Senator BYRD. There's—

DREW. Couldn't your committee have demanded that he be presented for confirmation?

Senator BYRD. I think the President made a mistake in not sending the name up immediately after the election. And we all presumed that this would be the case. Actually

the President could have made an interim appointment during the adjournment of the Congress, and Mr. Gray would have served until the close of this session this year.

DREW. But, why didn't the Senate insist on confirmation of someone for such an important post, when he was named?

Senator BYRD. The Senate went on the presumption that the President was going to send the name up, immediately after the election. The President indicated during the election that he would not submit a name for the office of director during the campaign because it might become political.

DREW. It sure did, didn't it?

Senator BYRD. Well, I accepted that, but I did think the name would come up immediately thereafter.

DREW. But from May to November, there was someone running the F.B.I. whom the Senate did not insist on examining or having any approval of.

Senator BYRD. Well, under the law the Senate doesn't act to confirm the acting director. The Senate under the statute acts to confirm the director. We had no name before the Senate.

DREW. One of the, one of the issues also that has come up, as you say, is Mr. Dean, the White House aide whom you would now like to call to testify. The President has said that he won't let him, that he, Mr. Dean, is covered by executive privilege. What really can you do about that?

Senator BYRD. I think that under the circumstances, the Senate ought to reject the nomination of Mr. Gray.

DREW. But that still doesn't get to the executive privilege.

Senator BYRD. I understand that.

DREW. Yes.

Senator BYRD. But if the President is going to shut the door on information to the Judiciary Committee that it needs to make a proper and well rounded and sound and considered judgment concerning the nomination, then the Judiciary Committee ought to close the door on the nominee.

Now what can the Senate do? The Senate Judiciary Committee could subpoena Mr. Dean. I don't think that it will, I don't think that it ought to in this case. I think that the battle ground for a subpoena action should be shifted to the Ervin select committee on the Watergate investigation. That committee has broader authority.

The Judiciary Committee can reject this nomination, the President can send up another name, and we can have a director of the F.B.I.

DREW. Do you agree with Senator Ervin's suggestion that White House aides who do refuse to appear ought to be gone down and arrested by the Sergeant-at-Arms of the Senate?

Senator BYRD. Mr. Ervin is not talking through his hat. I think that in a case that is properly framed, where the facts are appropriate, this could be done. The Senate can order the arrest of a United States Senator. The Sergeant-at-Arms can be ordered to arrest a United States Senator, this has been done. Now if this can be done, why can't the Sergeant-at-Arms arrest an attorney, even though the attorney is the attorney of the President.

DREW. So you'd send him down Pennsylvania Avenue and he would somehow get in the White House gate?

Senator BYRD. He doesn't have to go in the White House gate.

DREW. How would he arrest him?

Senator BYRD. A subpoena can be served on an individual, a warrant can be served on an individual, a citation can be served on an individual, outside the White House, where the person lives, at his residence, or at the hotel, or at the restaurant where he's eating. Now, I'm not saying that I would do this in this case, but I am saying that in a situation which required this, where the

facts and circumstances were such as to require the arrest of an individual on the White House staff, in order for a legislative committee to perform its duty, this can be done. It has been done, not with respect to someone on the White House staff, but the Sergeant-at-Arms has been ordered by the United States Senate to arrest an attorney and that was done.

The attorney was brought before the bar of the Senate, along with his clients, the Senate held a trial, sent the individual to jail, and the trial court upheld the Senate, the appeals court reversed the trial court, but the United States Supreme Court upheld the Senate, saying that in that particular case, there was a clear duty by the legislative committee to be performed, and that the act of the attorney for his clients was by its very nature and character, such as would obstruct the performance of that duty by the Senate committee.

DREW. And under the proper circumstances, you would go along with the idea of having this done to White House aides?

Senator BYRD. I would.

DREW. Now—but they're not appearing because their boss, the President, has told them not to, so would you arrest him?

Senator BYRD. No, no.

DREW. Well, then why arrest them, if they're obeying orders?

Senator BYRD. Well, I think that there is a doctrine of executive privilege, a very narrow doctrine that's never been clearly delineated. I think it's implied in the Constitutional powers of the President as Commander-in-Chief, and in his responsibility to faithfully execute the laws. But there's never been a Supreme Court decision in this area.

So, I think that where the President himself is concerned, and there are confidential communications, sensitive communications between the President and other individuals, the President I think can and ought to have the power to exercise executive privilege.

But to extend that doctrine to members of the White House staff, to lower echelon people, and say that they cannot come up before a committee and reveal communications involving a possible crime between themselves and third parties, someone else inside or outside the White House, I think is a ridiculous application of the doctrine.

DREW. To just finish out the Gray matter, as it were, just quickly, you said time is running out on Mr. Gray. As of now, would you then predict that he will be rejected?

Senator BYRD. I would not make any prediction.

DREW. All right. You've always been known as a tough law and order man, and that's why you're—

Senator BYRD. I was making tough law and order speeches before Mr. Nixon started making them.

DREW. And that's one of the reasons your role in this has been so interesting to people. Do you agree with the President's recent proposal that the death penalty, which the Supreme Court ruled unconstitutional, should be restored?

Senator BYRD. The Supreme Court did not rule the death penalty unconstitutional *per se*.

DREW. Right.

Senator BYRD. It merely said that the applications of it in the cases that were before it—

DREW. Said it was unevenly applied.

Senator BYRD. —were not uniform—

DREW. By the various states.

Senator BYRD. Yes, the application was not uniform, in which case it was unconstitutional, as being cruel and unusual punishment. I favor the death penalty, I have for many years, in certain cases; premeditated murder, treason. And I have some feeling that it ought to be applied certainly in some cases involving forcible rape, kidnapping. I don't think it ought to be made mandatory with

respect to hijacking, but I think there are certainly some hijackers who ought to be executed. But to make it mandatory I think might endanger passengers.

DREW. The President said that "the time has come for soft headed judges and probation officers to show as much concern for the rights of innocent victims of crime as they do for the rights of convicted criminals." Do you—

Senator BYRD. I said this a long time ago.

DREW. Oh, is he picking up on you then?

Senator BYRD. I don't—wouldn't say that, but that's not original.

DREW. Do you support the control of hand guns?

Senator BYRD. I have voted against registration and licensing of hand guns. I voted for the Bayh Bill last year, which dealt with the so called Saturday Night Specials. I think there has to be some way, if it can be found, to keep these cheap, easily secured weapons, out of the hands of the criminal. But I don't think that solves the problem.

I think if criminals know that punishment is sure, it's swift, and it will be severe, I believe that this is more of a deterrent. Criminals will get their guns if they have to steal them. If they can't kill with guns they'll kill with knives, so there are two sides to this question.

DREW. Did you say you supported the death penalty in certain rape cases?

Senator BYRD. I have felt that the death penalty ought to at least be there and be applicable in cases—

DREW. Which kinds of cases?

Senator BYRD. In cases involving forcible rape.

DREW. Any particular—or just any forcible rape?

Senator BYRD. Well I think it ought to be applicable in cases involving forcible rape.

DREW. The—responding to the President for the Democrats, Senator Harold Hughes of Iowa said that quote, "We need correction of social conditions known to be conducive to criminality, conditions such as over-crowding, chronic unemployment, poverty, inadequate health care, and discrimination." That "such conditions contribute to the development of criminal behavior among the people affected is simply a self-evident fact of life." Do you agree with Senator Hughes on that?

Senator BYRD. One of the great Justices of the Supreme Court once said something to the effect that the only thing that we can be certain of is that we're uncertain as to the causes of crime. I don't think anybody can be certain as to what causes crime.

DREW. Well there is a point of view, which he's expressing here, that social conditions and poverty are conducive—do lead to crime, and that those should be dealt with. He went on to say that it's these very programs that the President is—ending, or cutting back on, and the President should not, because that—they do help cut down crime. Now what do you—where do you come out? There's a fairly strong philosophical difference here.

Senator BYRD. I think many people have that viewpoint, including Senators. And there may be something to it. I'm not trying to debunk it. I don't think, however, anybody can ascribe crime to poverty. I lived during the Depression, when there were millions of people walking the streets of America out of work, and yet we didn't lock the doors at our house, in that coal-mining community at night.

A person doesn't commit rape because he has an empty stomach. I think it's too simplistic to say that poverty causes crime. I don't argue with the statement that crime can be found infesting areas where there's great poverty. But I would say that there can also be shown to be areas, poverty-stricken areas, in which crime is not so prevalent.

DREW. In a speech in 1967, you said, "Slums are not built, they develop as a result of the careless living of people. We can take the people out of the slums, but we cannot take the slums out of the people." Does that mean that you will—are not so concerned with the President's cutting back on some of the programs to rebuild the inner cities and to deal with slums?

Senator BYRD. No. It doesn't mean that at all. I think that the inner cities are in trouble, and we need Federal programs that will help people. We need manpower training programs. We need programs that will assist people, while they're trying to get on their feet. We need better educational programs. We need better health programs. But I draw a distinction between the need for these, and my support for these programs, and my objections to the President's reduction of, or elimination of, some of the programs—I draw a distinction between that and the other side of the coin which appears to say, that poverty causes crime.

DREW. The Democrats in the Senate are going to try to come up with a budget of their own to counter the President's. Would you go along with the move which they're probably planning, to cut about ten or twelve billion dollars from defense and put it to domestic social programs?

Senator BYRD. I think there are two questions here. I will probably go along with a move, when I consider it to be the right move, properly justified, and researched, for a lowering of the President's ceiling. I will probably go along with some cuts in defense. But I would not support ten, I believe you said a ten to twelve billion dollars—I would not support that kind of a cut in defense. We talk about the re-ordering of priorities. Our first priority has been, is, and ought to always be our survival as a nation.

DREW. Then it isn't very likely the Democrats can get together on an alternative budget, is it?

Senator BYRD. Oh, I think it's possible. But if it's all going to come out of defense, I—I'm not so sure that I can go along with that. We can't take everything out of defense. We've got—

DREW. Now I'm not saying everything, but the—the thinking now is that ten or twelve billion dollars could come out.

Senator BYRD. I think it's entirely too much. I think it's unrealistic. I think we better think this thing through. We've got to remember that 56 percent of the defense dollar goes to pay people. And Congress itself has raised this military pay and military retirement. And this will be paid. And if we make meat axe cuts in the budget, these military increases, which we ourselves have enacted, are going to be paid, at the expense of weaponry, research, bone and muscle, in the defense budget.

DREW. You—some of the Democrats are also critical of the President for abandoning his plan—family assistance plan, and income maintenance plan. Are you disturbed that he's no longer proposing that?

Senator BYRD. I think it was a bad proposal in the beginning. I think the Congress did him a favor in rejecting his proposal. Now his theory was right. Let's put people to work. Let's get them off welfare. But his proposal wouldn't have done it. It would have—as I recall, it would have doubled the welfare case loads. I may be wrong in my figures, but it would have resulted in greatly increased welfare case loads, greatly increased expenditures, and we don't reform welfare by putting more people on the rolls, and paying more money out of the Treasury.

This is not to say there shouldn't be welfare reform, but his was not welfare reform.

DREW. You were once a member of the Ku Klux Klan, which you've been very open about saying, that as you look back you find that that was a mistake. You voted against

the Voting Rights Act of 1965. Looking back, would you change that vote?

Senator BYRD. No.

DREW. You—

Senator BYRD. May I say, looking back, I might change my vote on the 1964 Civil Rights Act. I would like to recall that I voted for the 1957 Civil Rights Act, the 1960 Civil Rights Act, the 1962 Civil Rights Act, the 1963 Civil Rights Act. I voted against the 1964 Civil Rights Act. I voted against the 1965 Voting Rights Act. I probably would vote for the 1964 Civil Rights Act at this time.

DREW. You—

Senator BYRD. I might have voted for it at the time, had it not come to the Senate under the explosive, tense situation which really amounted to forcing the Congress to act with a cocked pistol at its temple. I didn't like this. I probably would vote for it today. I would not vote for the 1965 Voting Rights Act today.

DREW. We have very little time which is left, which is unfortunate, because there's a lot I want to ask you. I'd like to go into your own background for a moment, and coming from that into your current role. You were a poor boy in West Virginia, and you were working as a butcher, as I understand it, before you went into politics there. You put yourself through law school at night. Has this own—has your own background affected your view of what you think social policy ought to be in this country?

Senator BYRD. May I say first of all, with reference to the Voting Rights Act, I voted against it because I didn't think it was Constitutional. I don't think it's Constitutional today, even though the Supreme Court, the Warren Court, may have held otherwise.

Tennyson said, "I'm a part of all that I have met." I may be paraphrasing him. I suppose we're all a part, and influenced by, to some extent, our own conditions, the life which we've lived, circumstances which we've had to face, battles which we've had to fight. I wouldn't say that that isn't a part of my makeup.

DREW. It's said that you run the Senate by the Rule Book and the Bible. I can understand where the Rule Book comes in, but can you explain where you think the Bible pertains to running the Senate?

Senator BYRD. Well I have never heard that statement before.

DREW. I've seen it written about you, and I thought that they said that you—

Senator BYRD. I have heard the statement with respect to the Rule Book, and I think my so-called mastery of the rules is a myth. No Senator is a master of the rules. Only the Parliamentarian, and he perhaps isn't exactly a master of the rules and the precedents.

DREW. The Senate recently rejected a proposal to have its meetings open, the Committee meetings open, a proposal that the House did adopt. Why shouldn't the Senate Committees' business, when it's dealing with the public business, be open to the public?

Senator BYRD. I think that it's in the public interest, at times, to have closed meetings. The Senate is quite different from the House. In the Senate there's no rule of germaneness, there's no closed rule.

DREW. But we're talking about Committee meetings, so—

Senator BYRD. Yes.

DREW.—those are floor—

Senator BYRD. I know that.

DREW.—the things you're talking about?

Senator BYRD. Well any Senator in a Committee can offer any amendment he wishes to on the floor of the Senate and get a vote on it in public view. I think to have open meetings—particularly in the Armed Services Committee, and Appropriations Committee markups—now I'm not talking about hearings. The hearings are generally open, and they will continue to be. But I'm talking about markups, to have closed markups

in the Armed Services Committee, and Foreign Relations Committee, where there are very sensitive foreign relations matters, and in Appropriations Committee—I think would be a disservice to the public interest. It—

DREW. But those are where the critical decisions are made, aren't they?

Senator BYRD. It sounds good. But it doesn't work out that way.

DREW. Senator Byrd, your last question, we're about out of time, you're known for your faithful attendance on the Senate floor, for being there all the time. Do you feel that your colleagues spend enough time on the Senate floor, or they travel a bit much?

Senator BYRD. I think that most any Senator could, perhaps—well, let me say this in a different way. The Senate has not suffered very much from absenteeism. In other words, we haven't had to adjourn for lack of a quorum many times. We've been able to transact business. I do have a good record. It's partly because I am the Majority Whip and feel that it's my duty to stay on the floor. I think most Senators are conscientious about their duties. And the attendance record of most Senators is better than one might suppose.

DREW. I'm sorry, we're out of time. Thank you very much for coming.

Senator BYRD. Thank you.

PROPOSED SHIP CONSTRUCTION STANDARDS

Mr. CASE. Mr. President, the U.S. Coast Guard recently asked for comments on proposed ship construction standards which would require oil tankers built in the future to be equipped with double bottoms, providing space for taking on ballast water without using oil cargo tanks.

Because of the importance of the Coast Guard's proposal, I submitted a statement endorsing the general concept.

Since then, a similar statement submitted by the Center for Law and Social Policy on behalf of a group of environmental organizations has come to my attention.

Because the statement by the Center for Law and Social Policy details the issues involved so well, I believe it is worthy of the attention of all Members of Congress.

Therefore, I ask unanimous consent that the statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

CONSTRUCTION REQUIREMENT FOR TANK SHIPS—ADVANCE NOTICE OF PROPOSED RULE MAKING CGS 72-245P

CENTER FOR LAW AND SOCIAL POLICY,
Washington, D.C., March 15, 1973.
U.S. COAST GUARD,
Washington, D.C.

DEAR SIRS: We are writing in response to the Advance Notice of Proposed Rule Making (38 Fed. Reg. 2467 [January 26, 1973]) (the "Notice") on behalf of the Environmental Defense Fund ("EDF"), the Natural Resources Defense Council ("NRDC"), the National Parks and Conservation Association ("NPCA"), the Sierra Club, Friends of the Earth ("FOE"), the National Wildlife Federation ("NWF"), and The Wilderness Society to comment upon the tank ship construction standards which the Coast Guard is considering for proposal under Section 201 of the Ports and Waterways Safety Act of 1972, Pub. L. No. 92-340, 46 U.S.C. § 391a (the "Act"). We have acted as counsel for these groups on environmental matters in

the past, and we have been asked by them to coordinate the presentation of their comments.

The environmental groups which we represent are all national, non-profit membership organizations deeply concerned about the preservation and protection of the marine and coastal environments. Their combined membership exceeds 2,300,000 persons throughout the United States and abroad. The membership of each organization includes a substantial number of persons who reside in coastal areas which are increasingly directly affected by oil pollution, as well as scientists who have conducted and intend to continue to engage in research in coastal and estuarine areas and the marine environment.

All of the environmental organizations have made substantial efforts to improve the quality of the marine and coastal environments by means of litigation, testimony, policy analysis, and educational programs. For example, in the litigation field, EDF, NRDC and NPCA recently achieved a settlement with the Commerce Department under which it agreed to prepare environmental impact statements in connection with its program to subsidize the construction of United States oil tankers. And The Wilderness Society, FOE and EDF are now engaged in litigation regarding the adequacy of the Department of Interior's environmental impact statement for the proposed trans-Alaskan oil pipeline and its related marine transportation systems. In the area of international regulation of marine pollution, EDF, NRDC and the Sierra Club have taken an active role in commenting upon the proposed 1973 Convention for the Prevention of Pollution from Ships. These groups have also been actively involved in presentation of testimony on this subject. Thus, during the last session of Congress, EDF and the Sierra Club submitted comments to the Senate Commerce Committee on the Act; and earlier this month the Sierra Club, EDF, NRDC, NPCA and FOE presented testimony on deep water port policy at hearings held by that Committee.

We firmly support the proposed requirement for incorporation on oil carrying vessels trading in U.S. navigable waters of a segregated ballast capacity of not less than 45 percent of full load displacement, achieved in part through utilization of a double bottom of a minimum height of one-fifteenth of the beam. This proposal represents one of the most important efforts to date by any governmental agency to deal constructively and forthrightly with the growing threat posed by marine transport of oil to coastal and marine ecosystems. These fundamental changes in tanker design are long overdue and constitute necessary first steps toward an environmentally sound marine transportation policy. Indeed, segregated ballast and double bottom requirements are absolutely essential if the United States is to achieve the goal to which it, other nations and the environmental organizations we represent are committed of eliminating all intentional discharges of oil into the marine environment and of reducing to the greatest extent possible the risk of accidental spills. We also believe such requirements are integral to fulfillment of the Congressional mandate to the Coast Guard embodied in the Act to establish design and construction standards for oil carrying vessels "to prevent or mitigate the hazards to life, property, and the marine environment" which they pose.

In addition to supporting the segregated ballast and double bottom requirements, we favor the proposal to require all tank ships (new and existing) to have the capability of retaining all wastes, including tank cleaning residues, on board for shoreside disposal. We further believe that both the segregated

ballast-double bottom and waste retention capability requirements should be applied to tank barges.

However, we believe the proposals to limit the segregated ballast and double bottom requirements to large, future tankers and to tank barges of 300 feet or more, as well as to permit existing tankers to utilize load-on-top procedures in the face of environmentally preferable alternatives, will seriously undermine the pollution abatement objectives of the Act and should be abandoned.

I. THE ENVIRONMENTAL NECESSITY FOR SEGREGATED BALLAST AND DOUBLE BOTTOM REQUIREMENTS

There is no need to detail the increasing threat oil pollution from oil carrying vessels poses to the marine and coastal environments of this nation. Indeed, in Section 201 of the Act, Congress finds and declares:

"That the carriage by vessels of certain cargoes [including oil] in bulk creates substantial hazards to life, property, the navigable waters of the United States including the quality thereof and the resources contained therein and of the adjoining land, including but not limited to fish, shellfish, and wildlife, marine and coastal ecosystems and recreational and scenic values. . . ."

The significance of this threat is underscored by the recent findings of the National Oceanic and Atmospheric Administration that "oil globules . . . in massive proportions infect nearly 700,000 square miles of blue water from Cape Cod to the Caribbean Sea."*

Normal tanker operations—including discharge of cargo tank washings and oily ballast water—now account for almost 70 per cent of the total influx of oil into the oceans from oil carrying vessels, while tanker accidents—including groundings and strandings—account for almost 20 per cent of tanker oil pollution.† If seaborne imports of oil to the United States increase, and if oil tankers numbers and traffic increase, as government and industry project, the environmental degradation from oil pollution resulting from such vessels and their operation will increase proportionately:

"Not only will the probability of accidents increase . . . but pollution of the marine environment from normal tanker operations . . . are [sic] also likely to increase. "S. Rep. No. 92-841, 92d, 2d Sess. 22 (1972).

A requirement that oil carrying vessels possess the capability of carrying sufficient ballast for normal operations without recourse to cargo tanks such as the Coast Guard is considering is without doubt the most effective means for reducing damage to the marine environment from normal ballasting operations. The segregated ballast approach is effective because it eliminates the needs to mix oil and water, and to wash cargo tanks to hold ballast which may be clean enough to discharge at a loading port.

There can also be no question as to the environmental soundness of using a double bottom to achieve part of the required segregated ballast capacity. First, as the Notice points out: "double bottoms would provide . . . protection against accidental discharge caused by grounding incidents"—which are the most common kind of tanker casualty. Additionally, the redistribution of hull strength resulting from incorporation of a double bottom will reduce or at least delay breaking caused by stranding, thereby reducing the frequency of catastrophic oil spills. The double bottom is also likely to reduce operational pollution in at least two ways: (a) the smooth cargo tank bottom resulting from the double bottom design should eliminate sludge buildup and, thus, the need to clean cargo tanks to prevent this occurrence; (b) when tanks are cleaned to prepare for dry-docking and overhaul, less wash water will be required for cleaning because of the elimi-

Footnotes at end of article.

nation of structural members within the tanks. The United States, in urging IMCO to require segregated ballast systems including double bottoms, recently estimated the environmental benefits of double bottoms as follows:

- "1. Operational pollution reduced 95%.
- "2. Accidental pollution reduced 35%.
- "3. Total pollution reduced 67%."

II. THE CONGRESSIONAL MANDATE

The language of the Act and its legislative history make clear that Congress intended that the Coast Guard give full and serious consideration to requiring segregated ballast capacity achieved in part through a double bottom and fully support, if not mandate, the adoption of such design standards. In Section 201(1) of the Act, Congress concluded that—

"Existing standards for the design, construction, alteration, repair, maintenance and operation of . . . [oil carrying vessels] must be improved for adequate protection of the marine environment."

In reaching this conclusion, Congress implicitly rejected the prevailing single bottom design for tankers and the traditional practice of utilizing cargo tanks for ballast and discharging oily water into the sea. To remedy such environmentally unsound practices, Congress, in Section 201(7) of the Act, directed the Coast Guard to establish standards—

"As soon as practicable . . . to improve vessel maneuvering and stopping ability and otherwise reduce the possibility to collision, grounding or other accidents, to reduce cargo loss following collision, grounding or other accidents, and to reduce damage to the marine environment by normal vessel operations, such as ballasting and de-ballasting, cargo handling and other activities."

Clearly, the most effective way to "reduce cargo loss following . . . grounding" is to have a double bottom on the vessel involved in the grounding.⁸ Similarly, the most effective way "to reduce damage to the marine environment by normal vessel operations such as ballasting and deballasting" is to require the use of segregated ballast systems.⁹

The principal congressional report accompanying the hearings on the Act reveal a clear recognition of the importance of these features.¹⁰ For example, the Senate Commerce Committee in discussing possible methods for dealing with pollution from tanker groundings, cited double bottoms as "[p]erhaps the clearest instance of a standard presented at the Committee's hearings that must be seriously considered . . .", *Senate Report* at 2897, and concluded that "double bottom construction would lessen the likelihood of serious damage to the environment in those instances where groundings do occur." *Senate Report* at 2894. As regards prevention of pollution from deballasting operations, the Committee rejected industry's response to this problem (the load-on-top procedure) as "not an adequate solution", *Senate Report* at 2899, and concluded that "there seems little doubt that the adoption of segregated ballast could contribute significantly to protection of the marine environment. . . ." *Senate Report* at 2900.

In addition, Congress clearly intended that such standards be established by the United States for all ships entering its navigable waters whether or not progress is made toward their adoption in the international forum, concluding that the objective of protection of the marine environment should not be sacrificed on the altar of the principle of international regulation. *Senate Report* at 2903, 2908. In point of fact, it is our understanding that the present United States proposal to IMCO for segregated ballast systems, including double bottoms, is encountering opposition from several other IMCO members. Such opposition underscores the need

for prompt adoption by the United States of these vital design standards for vessels trading in its navigable waters.

Finally, it is essential to recognize that Congress determined that economic considerations should not preclude adoption of segregated ballast and double bottom requirements. *Senate Report* at 2897-2900. Moreover, any increase in vessel construction costs incident to such design changes is likely to be relatively small, e.g., 2 to 10 percent, and should be substantially offset in any event by reductions in operating costs. Any clean ballast system including double bottoms would reduce operating costs since no routine tank cleaning operations or complicated load-on-top procedures would be required during voyages. Cargo oil tank corrosion would be reduced since sea water would never be introduced to cargo tanks. Segregated ballast tanks would undoubtedly receive maintenance only in a shipyard, having only a minor effect on shipyard costs. And, operating costs would be reduced as a result of expanded segregated ballast capacity owing to resultant decrease in turn-around time in loading and discharge ports. In any event, as the Senate Commerce Committee recognized, oil carrying vessels have for too long been "designed and built exclusively for the economic benefit of their owners and customers, with little thought being given to their impact on the marine environment." *Senate Report* at 2897. Congress made a considered judgment in the Act that previously neglected environmental considerations are of paramount importance in devising new vessel design standards for the protection of the marine environment. Therefore, it is incumbent upon the Coast Guard to adopt segregated ballast and double bottom requirements for all vessels entering U.S. navigable waters as soon as possible.

III. PROBLEMS RAISED BY THE COAST GUARD PROPOSAL

The thrust of the Coast Guard's proposal is commendable and a necessary step towards improving the quality of the marine environment. However, there are certain basic problems in the proposal which may prevent achievement of this objective.

(a) Application to Future Tankers Only:

The Coast Guard's proposal would limit application of the segregated ballast and double bottom requirements to:

"(1) Tank ships delivered after January 1, 1976; and

"(2) Tank ships delivered before January 1, 1976, whose building contract is placed and whose construction is begun after January 1, 1974."

Nothing in the Act requires the Coast Guard to limit the proposed requirements in such a fashion. Indeed, the Senate Commerce Committee considered and rejected the legislative creation of such "grandfather rights" which, it was felt, would defeat the basic environmental protective purposes of the legislation. In so doing, the Committee reasoned: "Providing strict 'grandfather rights' [would] . . . become an artificial incentive for tanker operators to use their oldest and worst tonnage in United States trade in the knowledge that regulations for the protection of the marine environment would not apply." *Senate Report* at 2907.

In proposing to limit the segregated ballast and double bottom requirement to a defined class of new vessels, the Coast Guard would create the precise type of artificial incentive which Congress sought to avoid.

In addition, the grandfather rights approach proposed by the Coast Guard could, as a practical matter, render a double bottom and segregated ballast requirement ineffectual until some time in the mid-1990's. A recent survey by the Federal Maritime Administration shows that, as of January 1, 1973, there were 533 oil carrying vessels on order or under construction throughout the world, including 276 tankers over 175,000 DWT; and, that the world tanker fleet con-

tains an additional 750 tankers, including about 230 supertankers, all built within the last four years. The survey also shows that virtually none of these tankers will incorporate double bottoms or a segregated ballast capacity equal to 45 per cent of full load displacement.¹¹ The Coast Guard's proposal would leave this vast fleet of new oil tankers with useful lives of at least 20 years free to trade in the United States navigable waters.

In light of the problems raised by grandfather rights, but also recognizing the need for some grace period to allow for orderly adjustment to new design criteria, we recommend that the Coast Guard establish an absolute cut-off date within the near future after which no oil carrying vessel—regardless of its contract, construction or delivery date—would be permitted to trade in the United States navigable water unless it met the segregated ballast and double bottom requirement.

(b) Application of Double Bottom and Segregated Ballast Requirement to Small New Tankers:

We vigorously oppose the suggestion in the Notice that small, new tank ships be permitted to utilize the load-on-top procedure as a substitute for a segregated ballast system, including a double bottom. Not only is no justification for this distinction between small and large tankers found in the Act, (or the Notice itself), but it also appears inconsistent with the Coast Guard's own recent conclusions that segregated ballast systems, including double bottoms, are both pollution and cost effective for tankers at least as small as 20,000 DWT.¹²

(c) Authorization of LOT Procedure:

Despite the obvious environmental advantages of segregated ballast capacity, achieved in part through the use of double bottoms, the Notice states—without any explanation or analysis—that this would not be required on "[e]xisting tankships and small new tankships". Rather, according to the Notice, these vessels "would be permitted to engage in the practice of retention of oil on board (load-on-top) with specified discharge criteria". This so called "load-on-top" procedure involves in essence attempts to separate oil from dirty ballast water on board, thereby reducing—but by no means eliminating—the actual amount of oil discharged during deballasting operations.

While LOT procedure is superior to direct discharge of oil ballast to the sea, it is at best only 80 per cent effective in removing oil from overboard discharges and, thus, falls far short of meeting the no discharge criteria to which the United States and environmental groups are committed. Further, as noted above, the Senate Commerce Committee, rejected LOT as an acceptable operational procedure. In so doing, it noted the following "obvious, inherent shortcomings" of the load-on-top procedure:

"First, the rolling action of a ship in a seaway is not conducive to proper separation. Second, existing oil-water separators have generally proven inadequate for tanker ballast operation and even potential improvement in the technology of oil-water separators would certainly not seem capable of coping with various oils carried by tankers that have specific gravities close to that of water. Third, the economic or geographic features of a particular trade may not allow sufficient time for a tanker operator to fully utilize the load-on-top procedure and, since a procedure rather than design is involved, it is subject to de facto violations on a case-by-case basis." *Senate Report* at 2899.

In light of these considerations LOT procedures should only be permitted on existing tankers where other environmentally preferable alternatives, such as retrofitting for double bottoms and segregated ballast, are not possible, and, in those cases, should be required for such tankers.

(d) Retention of Wastes on Board:

Footnotes at end of article.

The Notice states that the Coast Guard is considering a requirement that all tank ships (new and existing) have the capacity to retain oily ballast and other wastes such as tank cleaning residues on board for shoreline disposal. We oppose such a requirement insofar as it might be construed as an alternative to fully segregated ballast systems for dealing with oil pollution resulting from ballast discharge.

Shoreline reception facilities appear, however, to offer substantial environmental benefits as regards disposal of tank cleaning residues, sewage and other wastes. We believe that such facilities, which are more effective than holding tanks on vessels and which are not subject to the same space and weight constraints or to varying weather conditions, should be used for treatment of these substances, provided that a no discharge standard is imposed and adequate efforts are made to enforce and police that standard. Thus, we favor standards requiring waste retention capability.

(e) Application of the Segregated Ballast and Double Bottom Requirement to Tank Barges:

The Notice invites comments as to the desirability of applying the proposed segregated ballast and double bottom requirement to tank barges 300 feet long or more engaged in ocean and coastwise service. We strongly support such application. However, there is no justification, in our view, for limiting such application to tank barges over 300 feet long; rather, the requirement should apply to all tank barges engaged in ocean and coastwise service. In particular, double bottoms are an essential requirement for these vessels which operate in relatively shallow and crowded coastal waters a large percentage of their time and therefore run a relatively high risk of groundings and collisions.

CONCLUSION

In conclusion, we emphasize the importance which the environmental groups attach to and the urgent need for prompt adoption of segregated ballast and double bottom requirements for all oil carrying vessels—regardless of size or type—which trade in this nation's navigable waters and commend the Coast Guard's initiative in this area. If you have any questions with respect to the comments presented above or desire any further assistance from the environmental groups in this matter, please feel free to contact either of the undersigned.

Very truly yours,

ROBERT M. HALLMAN,
ELDON V. C. GREENBERG,
Attorneys for Environmental Defense Fund, Natural Resources Defense Council, National Parks and Conservation Association, the Sierra Club, Friends of the Earth, the National Wildlife Federation and The Wilderness Society.

DEWITT AND LILA ACHESON WALLACE, PUBLISHERS OF READER'S DIGEST

Mr. TALMADGE. Mr. President, I rise to pay tribute to two Americans who have made one of the most significant contributions to America in the history of our Republic and have received a special recognition: DeWitt and Lila Acheson Wallace, publishers of the Reader's Digest.

This husband and wife team have contributed to the information and entertainment of hundreds of millions of people the world over for more than 50 years. They began their venture in 1922, and ever since, have made easily available to everyone a wealth of information on nearly every subject under the sun.

The Reader's Digest has become, in the words of President Nixon when he presented Medals of Freedom to the Wallaces, "a monthly university in print." It is used for resource material by professionals in the fields of government, theology, communications, and civics. It has become one of America's great institutions for the simple reason of its worth to so many. Between its covers can be found regularly a vast supply of concise, pertinent information, easy to understand and useful to all. In a society

whose continued existence depends on a well-informed citizenry, such a publication is invaluable.

As Dixie Business publisher, Hubert Lee, so aptly puts it:

Mr. and Mrs. Wallace are the world's greatest wife-husband publishing team.

I ask that Mr. Lee's account of the Great Americans Award of 1972, as originally published in Dixie Business, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

"GREAT AMERICANS" FOR 1972

(By Hubert F. Lee)

DeWitt and Lila Acheson Wallace, the founders in 1921 of Reader's Digest with \$1,800 borrowed from Mr. Wallace's father and brothers, have been named for the 18th annual "Great American" award by the editors of Dixie Business.

Their first issue came out Feb. 1922, 50-years ago.

They are the world's greatest wife-husband publishing team.

Mrs. Wallace was selected as "One of World's 10 Greatest Women" in 1952—twenty years ago—by the editors of Dixie Business.

Mrs. Patricia Nixon was named one of the "World's 10 Greatest Living Women" this year by Dixie Business.

President Nixon presented the Medals of Freedom, the highest honor that the United States can bestow on a civilian, to Mr. and Mrs. Wallace on January 28th at a dinner at the White House.

Following are the citations on the Medals, read by the President when he made the presentations:

To DeWitt Wallace: the cofounder with Lila Acheson Wallace of the Reader's Digest and partner in its direction for half a century, he has made a towering contribution to that freedom of the mind from which spring all our other liberties.

This magazine has become a monthly university in print, teaching 100 million readers worldwide the wonder of common life and the scope of man's potential.

In DeWitt Wallace America has a son to be proud of—one whose lifework shows American enterprise at its creative best, and the American ethnic in its fullest flower.

To Lila Acheson Wallace: cofounder with DeWitt Wallace of The Reader's Digest half a century ago and partner with him in its direction ever since.

Lila Wallace has helped make all America better read.

Her vision and drive have given wings to the workhorse printed word, fashioning a Pegasus of a magazine that carries insights to 100 million readers worldwide.

Her gracious touch at Pleasantville has shown the way to infusing industrial settings with culture and the joy of work.

President Nixon, who was elected on November 7, 1972 as their "Great American" at the polls by the people of America, said in presenting the Medal at the White House dinner: 1-28-72

"In this room (the State Dining Room) the Great of the world and of America have been honored—kings, emperors, princes, prime ministers, and other great men and women."

"I recall myself to toasts to Churchill, DeGaulle, Nehru, all in this room. 'And I think back a hundred years before when the room probably first began to be used for that purpose, to all the wonderful things that have happened here and the people who've been honored."

"But I can very truthfully say tonight we couldn't honor two people who deserve it more in this great first room of America than Lila and DeWitt Wallace."

Dr. Billy Graham, one of the speakers, said that Reader's Digest has served as source material "for sermons, for clergy, for political leaders, for speeches."

"I played golf with Bob Hope, Graham quipped," and when I would be praying about the putt, Bob had the Digest in his hands getting his next joke."

Secretary of State William Rogers noted that "in terms of international affairs, the Digest is a tremendous asset. It is published and read and respected in every country outside of the Communist bloc."

"And very few people in the world have been able to project the thoughts that we all respect the way Mr. and Mrs. Wallace have."

Bob Hope cracked jokes, including the line: "I am surprised Mr. Wallace is eating because it usually takes him a month to Digest anything."

Another: "I admire any man who made a fortune thinking small."

HOW IT ALL BEGAN

It all started in 1918 when Sgt. Wallace was in an Army hospital in France recovering from shrapnel wounds and had nothing to do but read magazines.

He realized that many articles were of enduring value were too long.

He became obsessed with the idea of condensing them and of publishing in a monthly magazine.

When he returned home the next year he spent his time at the public library condensing several dozen articles. He could not afford to buy the magazines.

Then he fixed up a full-scale dummy of Reader's Digest and mailed it to several publishers.

No publisher was interested.

In the meantime, Wallace lost his publicity job during the 1921 depression with Westinghouse.

So he decided to publish his own magazine.

That was the year I got out of the Army Air Service at Camp Benning, Ga., and went with the Atlanta Constitution as a reporter.

GORDON RULE: THE RIGHT OF CONGRESS TO OBTAIN TESTIMONY FROM GOVERNMENT OFFICIALS

Mr. PROXMIER. Mr. President, last week Gordon Rule was given his job back after being in a bureaucratic limbo for several months following his appearance before the Subcommittee on Priorities and Economy in Government of the Joint Economic Committee.

The Pentagon and the Navy are to be commended for the decision to reinstate Gordon Rule as Director of the Procurement Control and Clearance Division.

Just 3 weeks ago, 14 Senators and I wrote to Defense Secretary Elliot Richardson requesting that Mr. Rule's duties be restored.

The demotion and punishment of Mr. Rule as a consequence of his testimony before the Subcommittee on Priorities and Economy in Government was an unfortunate occurrence that could and should have been avoided.

The right of congressional committees to obtain information from individuals and the right of individuals to testify before Congress when invited to do so must not be tampered with.

Government officials who have facts or opinions that Congress needs to know must not be gagged or inhibited from communicating them.

I was convinced that a correct resolu-

tion of the controversy over Mr. Rule's testimony would be reached once all the facts were brought to the attention of Secretary Richardson.

The reinstatement order clears the record of a dedicated public servant whose efforts in the area of weapons procurement have saved the Government and the taxpayer millions of dollars.

In the New York Sunday Times magazine section of March 25, 1973, Brit Hume examined the Gordon Rule affair in a way that throws a great deal of light on the problems confronting individuals in the employ of the Pentagon who are devoted to the service of their country and who take literally their responsibility to eliminate the wasteful use of taxpayers' money. I recommend this insightful article to anyone concerned with the mismanagement of defense contracts.

This morning in the Washington Post, March 26, 1973, Morton Mintz reviews in the Gordon Rule affair and reports some comments by Mr. Rule in the aftermath of his reinstatement.

I ask unanimous consent to insert at the close of my remarks the articles from the New York Times magazine and the Washington Post be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

ADMIRAL KIDD VERSUS GORDON RULE

(By Brit Hume)

(NOTE.—Brit Hume, an associate of columnist Jack Anderson, is Washington editor of [More], a journalism review.)

When Ogden Corp., the company that owns the giant Avondale Shipyard in Louisiana, ran into trouble because of a suspiciously low bid on a Navy destroyer contract a few years ago, it did what other military contractors have often done: It demanded more money from the Government. At a high-level meeting in the office of then Under Secretary of the Navy John Warner, the company's chairman submitted a letter drafted by its Washington lawyer (himself a former General Counsel of the Navy). The company, the letter said, "neither willing nor able" to put up more money toward delivery of the destroyers. Therefore, it was "incumbent on the Department of the Navy" to come up with the needed cash or the shipyard would simply "stop work." When the company officials had been asked to leave the room, the admiral in charge of shipbuilding told Warner the contractor's demand for an extra \$10-million on the spot and \$4-million soon afterward was reasonable and ought to be paid. There seemed to be general agreement. But then a ruddy, expensively but conservatively dressed civilian interrupted. "Admiral," he said, "over my dead body will you reform that contract and give them \$10-million. This is the goddamnedest thing I ever heard of, a contractor coming in and throwing a piece of paper on the table and saying that to the Navy."

The voice belonged to a man named Gordon W. Rule. Since he was the Navy's director of procurement, with authority over the business terms of every major Navy contract, his opinion could not be taken lightly. The result was the company's ultimatum was rejected, the letter withdrawn and work on the destroyers went forward under the original terms.

It was not the first time, nor the last, that such a blunt reproach had been heard from Rule. In a bureaucracy not noted for outspoken civil servants, he has not only survived but thrived for 10 years. During that

time he has rejected contract claims worth tens of millions of dollars to huge corporations with enormous political influence. And he has spoken up, at times with astonishing irreverence, to a brigade of admirals and to civilian big shots ranging from the Secretary of Defense to the chairman of the House Armed Services Committee. His office has been the source of a stream of caustic memoranda, letters and telegrams, many of them both unsolicited and unappreciated.

How has he gotten away with it? "You've got to be right," he explains. "If you're wrong and you try something like that, goddamn, they'll clobber you. But if you're right and so right that it's a little obvious, I find that people respect the hell out of you although they may hate your guts. And believe me, I've got respect in the Department of Defense."

If that sounds boastful, it is. Gordon Rule is not a modest man. But it is also unquestionably true. For until recently, Rule's outspoken ways brought him not censure but the highest commendation. First, he won the Superior Civilian Service Award in 1967. In making the award, Adm. I. J. (Pete) Galantin, then Chief of the Naval Materiel Command, cited Rule for "courage in challenging the status quo, zeal, willingness to make innovations and, above all, your absolute integrity and ability to win cooperation and loyalty." It was high praise, but it was surpassed by the outpouring of panegyrics heard four years later when Rule was given the Navy's Distinguished Civilian Service Award, the highest honor a civil servant can receive. Assistant Secretary of the Navy Frank Sanders spoke of Rule as "the most salient point of a system of checks and balances" designed to insure that the business aspects of all Navy contracts got "independent, penetrating, objective review." Rule's job, said Sanders, was to "challenge, to question and to disapprove when such action is necessary, regardless of other considerations or consequences." The citation itself, presented by John Warner, by then the acting Secretary of the Navy, praised Rule for "extraordinary acumen, judgment, initiative and integrity . . . extreme professional skill . . . superior ability to reach the crux of problems quickly . . . outstanding service."

That was barely two years ago, but today Gordon Rule is in deep trouble with the Navy. He was ordered off his regular job and sent to a training school miles from the Pentagon to update the curriculum. It has taken several months, and now that it is done, more such assignments may be in store. His sudden demise was the result of his testimony before a Congressional subcommittee headed by Senator William Proxmire, the Wisconsin Democrat, last Dec. 19. Proxmire was inquiring into waste in military spending and was especially interested in the Navy's difficulties with two of its biggest contractors, Litton Industries Inc. and Grumman Aerospace Corp. Litton, the Navy's largest contractor, was seeking an extra \$390-million in connection with a contract to build five helicopter assault vessels. Grumman, which had won the contract to build the Navy's F-14 fighter jet with a bid widely considered unrealistically low, was balking at fulfilling it because it wanted more money. Both Secretary of the Navy John Warner and Adm. Isaac Kidd Jr., the new Chief of the Naval Materiel Command, had refused to testify, citing the "delicacy" of ongoing negotiations with both contractors as their reason. As he had often done in the past, Rule accepted. In answer to pointed questions from Proxmire, Rule was sharply critical of both Grumman and Litton. But his most biting comment came when Proxmire sought his opinion of President Nixon's appointment of Litton's president, Roy L. Ash, to head the increasingly powerful Office of Management and Budget.

"Well," said Rule, "I think first, that old General Eisenhower must be twitching in his grave. He was the one who first called attention to the so-called military-industrial complex, and I frankly think we have added a new dimension. . . . I think it is almost a military-industrial-executive department complex. I think it is a mistake for the President to nominate Mr. Ash, whom I have never met. I think it is a worse mistake for him to accept the job."

By the next morning, Admiral Kidd was at the door of Rule's suburban Washington apartment, near the Pentagon, where Rule was sick in bed, with laryngitis. Shown to his bedside, the hefty gruff Admiral handed Rule a letter of retirement that needed only his signature. Kidd said he wanted it signed by the end of the day. He gave no reason except "the good of the Navy." Feeling under-the-weather and overwhelmed, Rule at first agreed. But gradually his defiance began to return. The visit ended with Rule refusing to retire. Having failed to force him out of the Navy altogether, Kidd two days later simply dispatched him to the training school. Since it was technically only a temporary reassignment rather than a disciplinary demotion, there was nothing the Civil Service Commission could do about it. And Kidd indicated he had further such assignments in mind. Rule's only recourse was to file a grievance, which would ultimately be decided by Warner. Since the Secretary was in on the decision to reassign him, it was hardly likely that he would reverse it. Rule seemed beaten. At age 66, with full retirement benefits ahead of him and only himself and his wife to support, he might have been expected to give up under such adverse circumstances. But Rule, in the words of another Navy man, had not yet begun to fight.

If Gordon Rule is abrasive, and if he resists being pushed around by men like Kidd and Warner, it is in part because he doesn't consider himself just another civil servant. Conspicuously, he is one of the most fastidiously dressed men in Washington, and his wardrobe includes several blue neckties with gold stripes, which are not emblematic of the Navy, but of the Metropolitan Club, Washington's most aristocratic—and segregated—men's club. It is likely that Rule is the only career civil servant to belong to the club. He has been a member since 1940.

He was born in Washington in 1906 and went to Western High School in Georgetown, which in those days was attended by the sons and daughters of many of the city's most prominent families. He later went to George Washington University law school where he earned both a bachelor's and a master's degree in law. He spent seven years practicing at Covington & Burling, then, as now, the city's most prestigious and influential firm. He joined the Navy in 1942 as a lieutenant j.g. When he emerged in 1946, he had advanced to captain, a remarkably quick rise through the ranks, even in wartime. He returned to Covington & Burling, but left after a year to start his own practice. During the Korean war he returned to active duty and gained extensive experience in procurement, first as the deputy director, then as director of contracts for the Bureau of Ships. He negotiated contracts worth more than \$2-billion, including those for the construction of the first nuclear submarine, the Nautilus, and the first supercarrier, the Forrestal.

He also negotiated the first contracts the United States had ever signed with foreign countries for the construction of ships and won a commendation medal from the Secretary of the Navy for the job. These experiences left Rule with one of his most fundamental beliefs, namely that negotiation is not just a necessary sidelight to an administrative job, but a highly sophisticated art that should be practiced only by skilled and experienced professionals, espe-

cially where large sums of public money are at stake. This conviction was strengthened when he was sent to Europe in 1952 as chief negotiator for the Defense Department in securing bases for American military installations under NATO. The assignment was supposed to last a year, but Rule was back in his law office in Washington three months early, furious over the State Department's interference in the talks with the foreign governments. He published an article about the experience in *The Saturday Evening Post*, which demonstrated that his use of pungent language is not a recently acquired habit. "For nine months recently," Rule wrote, "I drew a handsome Government salary and allowances in Europe at the expense of the American taxpayers. They were gyped, and I feel they should know why. . . . It [was] my unhappy privilege to sit at the negotiating table and watch our State Department Foreign Service officers bungle major negotiations with our European allies. . . . I am convinced that the United States is woefully lacking in capable, experienced negotiators who can sit down at a conference table with representatives of other governments and at least hold their own."

Although Rule was principally occupied for the next 10 years with his prosperous law practice, which involved representation of major corporations and trade associations before Congress and the executive departments, the lack of professionalism in Government negotiating continued to trouble him. Ultimately, he wrote a 52-page booklet on the subject called "The Art of Negotiation," which was published in 1962 at Rule's expense and dedicated "To My Country." It has been used as a training text by the Army, the Navy and the Foreign Service Institute.

In 1963, the job of "Director, Contract Clearance Division, Naval Materiel Command," came open and Deputy Assistant Secretary of Defense for Procurement Graeme Bannerman, an old friend, asked Rule to leave his law practice to fill it. Rule accepted, and plunged into the job with his customary gusto. One of his tasks was to reform the use of so-called letter contracts, whereby the Navy simply gave a contractor a set of specifications and written orders to start work, with the full terms to be worked out later. Rule had soon annoyed one admiral with a blunt letter directing him to come to terms on a particular letter contract or see the contract disapproved. The admiral complained to the Chief of Naval Materiel and Rule received the first in a series of warning letters he got during his first year on the job. He got so many, in fact, that his probation period was extended an extra year. "I have received a number of what they call 'letters of caution,'" Rule explains. "Every one has been because of the tone of the letters that I write. I've never gotten a letter of caution for substance."

It took several years, but Rule succeeded in devising a new way of handling letter contracts that greatly improved the Government's bargaining position. In the past, when the Government could not reach agreement with a company on the terms of a letter contract, it had no option except terminating it and starting over again with another company, a process that was both costly and time-consuming. Under Rule's new procurement regulation, the Government could extend the deadline for coming to terms, and, if there was still no agreement, a Government contracting officer could fix the price. The contracting officer's decision could be appealed to higher authority, but the burden of proof was on the company.

The new system grew out of an effort in the 1967 to hold down the burgeoning costs of the celebrated F-111 fighter jet, an ill-fated Navy-Air Force project. At the direction of Secretary of Defense Robert McNamara, Rule led a year-long, on-site investigation of the efficiency of the Pratt & Whitney

aircraft plant, where the engines for the plane were being built on a letter contract. Rule's team concluded that the plant was operating well below its potential efficiency and used the data to project what the engines should cost.

This "should-cost" approach to pricing quickly became highly controversial. There were many, both inside and outside the Pentagon, who objected to it as a meddlesome attempt to tell a contractor how to run his business. Rule responded to such criticism in a tart letter to the head of Pratt & Whitney. "If," he wrote, "a contractor wishes to conduct a patently inefficient operation with excess indirect employees, poor estimating, labor that consistently fails to meet standards, lack of proper competitive subcontracting, abnormal spoilage and rework, etc., that is his business. It is the Government's responsibility, however, not to pay taxpayer's money for demonstrable inefficiencies. . . ." The letter outraged the contractor, but Secretary McNamara passed word to Rule that it was the best letter on procurement he had ever read. The controversy produced a dead lock over the price of the engines, but Rule had earlier persuaded the company to allow him to make a contracting-officer's decision setting a price if such an impasse were reached. Pratt & Whitney objected to Rule's price as too low, so Rule got together with Joel Barlow, a Covington & Burling partner and the company's lawyer, and settled the dispute in a matter of days. The engines ended up costing about \$100-million less than the contractor had predicted.

This and other such achievements kept Rule in good standing despite his abrasiveness and irreverence. At a time when military procurement was becoming a national scandal, the Navy could point with pride to its "system of checks and balances" in contracting, which neither of the other services have, and to a series of constructive procurement innovations. Rule was the key man in both and this may explain why he was chosen for the Distinguished Civilian Service Award. By honoring Rule, the Navy was honoring the idea of economy and quality in buying military hardware.

Similar public-relations considerations seem to have been involved in the appointment of Rule in late 1969 to head a new unit called the Contract Claims Control and Surveillance Group, which had authority over the Navy's proposed claim settlements in excess of \$5-million. The group's job was to investigate all negotiated claims to determine if they were justified. If not, the group was to disapprove them. Although Rule's job already seemed to give him such authority, the Chief of Naval Materiel, Adm. I. J. Galantin, explained that he wanted the group, and particularly Rule, to be a "strong, visible face to put before Congress, the General Accounting Office, the contractors and the public." Rule took him at his word. Eighteen months later, the group found itself faced with a politically explosive claim that had been negotiated for \$73.5-million with the Avondale Shipyard of Louisiana, the same yard whose earlier bid for more money on the same contract had been thwarted by Rule.

The claim had the full weight of the state's congressional delegation behind it, including then House Majority Leader Hale Boggs, House Armed Services Committee chairman F. Edward Hébert, Senate Finance Committee chairman Russell Long and then Senate Appropriations Committee chairman Allen Ellender. In the months preceding the tentative settlement, the Navy had been hearing regularly from this awesome Louisiana line-up. Navy officials had been summoned to a meeting in Boggs' office, where they were confronted by him, Hébert, top aides to Long and Ellender and representatives of the contractor. Shortly thereafter, the amount of the proposed settlement rose by almost \$2-million. On another occasion, the contracting

officer in charge of the case was called into Deputy Defense Secretary David Packard's office to meet with Avondale representatives. The session was set up by Boggs. The Louisiana four also wrote jointly to Navy Secretary John Chafee, saying that the contractor "has offered considerable evidence in support of its position" and urging that the matter be "promptly adjudicated." The pressure made the Navy hierarchy nervous, but it made Rule furious. In July, 1971, in a blistering memo declaring that the claim was inadequately documented and that pressure had been brought "to such an unreasonable extent that one begins to wonder about the merit of the claim," Rule announced that it had been unanimously rejected. Twelve days later, Rule was notified that his claims group was about to be "reconstituted" so that a lawyer from the Navy General Counsel's office could be installed as the head of it. Before he could be officially removed, Rule resigned from the group.

A few weeks later he was summoned to Capitol Hill by John Reddan, counsel for Rep. Hébert's Armed Services Investigating Subcommittee. Rule took a Navy Department lawyer with him but Reddan wanted to interrogate Rule alone. Rule refused to be questioned without the lawyer and Reddan gave in. Rule was placed before a recording microphone to answer questions about charges by columnist Jack Anderson of Congressional pressure in the Avondale case. He asked if he could have a transcript of the recording. Reddan said no, so Rule got up and left. That afternoon, he was called on the carpet by Warner, who scolded him for taking a department lawyer with him. In the future, Warner said, Rule would have to hire his own lawyer.

He was back on Capitol Hill the next month to testify before Senator Proxmire and he took the opportunity to elaborate on his charge of pressure by the Louisiana delegation. Hébert told a reporter afterward that "Mr. Rule will have every opportunity to prove his allegations under oath—and he knows it." When Rule saw the quote in the New York Times the next morning, he promptly sent Hébert a telegram reminding him of the incident with Reddan. "His star-chamber, Gestapo tactics and attitude on that occasion were most offensive to me as a citizen and taxpayer and his recording of our conversation will show the world that I requested the opportunity to appear before a public hearing and testify under oath and your Mr. Reddan denied that request. . . . For you to now say that I know I will have the opportunity to testify under oath . . . is certainly a great deal less than factual."

Rule believes the Avondale controversy started his downfall. In the past, he had been an asset in the Navy's relations with Congress. But now he had publicly accused four of the most powerful men on Capitol Hill of using improper influence and topped that off by calling one of them, in effect, a liar. In addition, Rule's exacting approach to contractor claims had helped create a backlog of unresolved disputes which were causing friction between the Navy and its major suppliers, especially Litton and Grumman. When Adm. Isaac C. Kidd left his command of the Sixth Fleet in the Mediterranean to become Chief of the Naval Materiel Command in 1971, the pending claims totaled about \$1-billion. Kidd was told upon taking his new job that he would have three major problems: the unresolved claims from Litton; the disagreement between the Navy and Grumman over the price of the F-14 jet; and Gordon Rule.

If anyone could have been expected to take a dim view of Rule, it was Kidd. The son of an admiral who became the first naval flag officer to die in combat when he was killed at Pearl Harbor, Kidd had been destined for a career in the Navy since birth. A burly, stern man of 53 who had compiled an outstanding

record in a variety of commands at sea, he regards Navy regulations as "the foundation upon which you approach any problem," including, it turned out, procurement negotiations, in which he had little experience. He sees his foremost responsibility as "the need for getting reliable equipment into the hands of our bluejackets." He is deeply worried about what he considers the growing strength and menace of the Soviet Navy.

Kidd set the tone for his administration of the materiel command with a speech to a group of industry men shortly after he took over. He spoke of the "ominous threat facing the world today" and told the audience that "quality, cost-consciousness and financial profit are indeed sound motivators. . . . But if you look back in your college psychology books, I think you'll find that 'survival' is perhaps the most basic motivator of all!" The title of the speech was "What Have You Done for the Fleet Today?" and soon thereafter, a series of posters bearing this slogan began being distributed by the thousands throughout the command. Some of them bore a picture of Kidd looking as if he were staring out from the bridge of a ship, his binoculars around his neck.

It was clear that Kidd was not about to change his ways. But neither was Rule, and it was inevitable that they would have differences. Kidd had Rule's job description changed so that he was no longer the "principal agent of the Secretary of the Navy" but instead was responsible to one of Kidd's immediate subordinates. Undaunted, Rule kept up his caustic commentary on procurement matters.

About six months after Kidd took over, for example, Rule sent him a curt memo on a particular claim. "The purpose of this gratuitous memorandum," it began, "is to apprise you that a mistake has been made in the approval of this claim." Kidd acknowledges that he didn't appreciate much of what Rule said, but their differences didn't burst into public view until Rule's Dec. 19 appearance before the Proxmire subcommittee. By that time, Kidd had taken personal charge of the negotiations with both Litton and Grumman and had kept Rule out of them.

The major element in the Navy's dispute with Litton was the price of a group of helicopter assault vessels. The Navy originally planned to purchase nine, but decided in 1971 to buy only five. The original ceiling price was \$133-million apiece, but after delays caused by production problems at the company's unorthodox, assembly-line shipyard in Pascagoula, Miss., and the Navy's reduced order, Litton demanded \$211-million each. While he was still the company's president, Roy Ash accused the Navy of a "built-in sense of righteousness about Litton's performance," according to the minutes of a June 6 meeting in Washington. Ash said he would discuss his demands with Warner, the minutes show, and then go "on to the White House" with his case. Because Litton had been the Navy's largest contractor, it was a sensitive matter, and Ash's appointment as director of the President's budget office made it more so.

The Grumman controversy was equally charged. The Navy had contracted with the company to build 86 of the F-14 fighter planes at \$16.8-million each with an option to buy at least 48 more at the same price. Grumman claimed it lost \$65-million last year building the original batch and stood to lose \$105-million more this year if it accepted the Navy's order for the additional 48. The company blamed the problem on "mutual" pricing errors and runaway inflation.

After Rule gave his headline-making testimony criticizing Ash, Grumman and Litton, and the Navy had moved against him, Proxmire invited Rule and Kidd to appear before his subcommittee together. Kidd declined,

citing the prospect of Civil Service Commission proceedings on the matter as his reason. But the commission's general counsel decided that Rule's assignment to the training school could not be classified an "adverse action" and said the commission could not act on it. This left Kidd without his excuse. The result was a spectacular confrontation on Jan. 10 with Rule and Kidd seated side-by-side at the witness table before the irate Proxmire. The Senator began by denouncing the Navy's action against Rule as "the harassment of an able, dedicated and courageous public servant. . . ." "The significance of this episode," he said, "goes far beyond the issue of shabby, unjust treatment of one outstanding employee. It goes to the very heart of the legislative process and the ability of the Congress to obtain information on the activities of the executive branch." Proxmire reminded Kidd that Federal law prohibited the obstruction of Congressional inquiry and noted that Richard Nixon, while a Senator, had once introduced legislation making it a Federal crime to intimidate public employees from testifying before Congress.

Kidd, understandably, was on the defensive. He found himself acknowledging on the one hand that Rule "was probably the most competent gentleman we had in matters of procurement," but insisting on the other that he had lost confidence in him because of his alleged loose attitude toward news leaks and his inability to abide by instructions as to what to say before Proxmire's subcommittee. But Kidd insisted he wasn't trying to withhold information from Congress. And despite his declining confidence in Rule, and the fact that Rule had been sent on an obviously trivial mission, Kidd maintained that he had not disciplined him. Flip-flopping again, Kidd insisted that Rule's comments before the subcommittee had damaged the negotiations with Grumman and Litton. Both Proxmire and Rule had a field day with these tangled explanations. How, demanded Proxmire, had Rule's remarks hurt the negotiations? "That would be a bit difficult to measure and quantify," replied Kidd. "In other words," said the Senator, "The Navy considered any discussion of Litton or Grumman taboo." "That is what I told him, Mr. Proxmire, yes, sir," answered Kidd. Rule broke in at one point to charge that since the rejection of the Avondale claim, the Navy had systematically been reducing his influence. "I know what is going on," he said. "And I know that Admiral Kidd probably thinks I am a burr up — and he wants me out." When Kidd recalled how he had been told that Litton, Grumman and Rule would be his three major problems, Rule replied, "I hope he is not as screwed up in the negotiations with Litton and Grumman as he is with Rule." At another point, Rule said of Kidd, "This man has been in procurement 12 months, 13 months. All of a sudden he is an instant expert." What, Proxmire asked, was Kidd's response to that? "He is right," said Kidd, "he is right. I have no corner on the market on brains."

The hearing may have succeeded in making Kidd and the Navy look foolish, but it did little to help Rule's standing with his superiors. Still, he is fighting to win back his job. He has withdrawn his grievance, leaving the next move up to the Navy now that his temporary assignment at the training school is complete. If there is no further action, he will automatically regain his old post. There seem to be two reasons for Rule's continuing the fight. One is that he enjoys the controversy with its attendant publicity and excitement. The other is that he likes his work. "You can practice law," he says. "You can have clients. You can make money. But you never get a feeling in your heart of having contributed a goddamned thing. In this job, boy, you really get that feeling. And what's so damned interesting

is that there are new questions every day in making these contracts and administering them and spending the taxpayer's money. These are fascinating questions, I love it." If he loved it, he was asked by a reporter, why did he risk his job with such bold comments about sensitive matters? "I got a kick out of talking about Grumman and Litton," he said, "because I really felt that those things had to be said. Those two companies had the Navy over such a barrel, sitting there negotiating with that guy who's so inexperienced."

The escalating costs of military contracts, of course, have been a problem for years. Rule believes there are two principal reasons why contractors so often submit unrealistically low cost estimates. One is that in a competitive bid, it is a good way to win the contract. This is known as "buying-in." But even in so-called sole-source procurement, where the Pentagon simply chooses the contractor it deems best suited to the job, Rule says there is also pressure for artificially depressed bids. It is caused by the desire of the military itself to keep the estimate low so that the program will be more palatable to Congress. Once the project is under way and millions have been spent, it is easier to get additional funds to keep it going. In any case, Rule believes, virtually everyone in a position to influence such matters stands to gain from high military appropriations. Rule once sat down and made a list of those with an influence on military spending. There are 10 classifications ranging from Congressmen, to the military, to the contractors themselves, to labor unions. "Everyone involved wants something," he noted. "When all these turn on their respective powers, where does that leave the taxpayer?"

Whatever becomes of Gordon Rule, his case put the Navy's dealings with Litton and Grumman on the front pages, and there can be little doubt that this was part of his objective. Soon after his testimony, Roy Ash was before Proxmire, being berated for the "palpable conflict of interest" in his Government job and relationship with Litton. That made the network news and caused more headlines. Whatever the Navy did now, it was a major story. Finally, it acted. Grumman, the Navy announced, would be held to the terms of its original contract for the additional 48 F-14's. And Litton would be paid \$22-million less per ship than it had demanded for the helicopter assault vessels. What's more, Litton would be required to pay back \$55-million in unearned construction progress payments under the contract. The decision involving Litton had been reached after negotiations failed and the system devised by Gordon Rule for dealing with such situations had been used. It was a contracting officer's decision, similar to the one Rule had made in the Pratt & Whitney case.

[From the Washington Post]

NAVY CRITIC RESUMES COST OVERRUN BATTLE (By Morton Mintz)

The Defense Department's leading critic on Capitol Hill found himself commending the Pentagon and the Navy last week. The occasion was the reinstatement of a man named Gordon W. Rule as the Navy's top civilian procurement official.

"The reinstatement order clears the record of a dedicated public servant whose efforts in the area of weapons procurement have saved the government and the taxpayer millions of dollars," Sen. William Proxmire (D-Wis.) said.

Adm. Isaac C. Kidd Jr., chief of the Navy Material Command, who had assigned Rule to what the procurement official regarded as a Siberia, called him in Wednesday to restore him as director of the Procurement Control and Clearance Division.

"He absolutely could not have been nicer or finer," Rule said later. "The guy was wonderful"—concerned only with how to avoid

"These claims and overruns" in procurement. "Believe me, I'll go all out to help him," Rule said.

The remarkable nature of the make-up session was underscored by the fact that it came while the Air Force and A. Ernest Fitzgerald, who was fired after disclosing a \$2 billion over-run in the C-5A transport program, continued—at a Civil Service Commission hearing—a 3½-year-old battle over whether Fitzgerald should have his job back.

Only a matter of weeks ago, it appeared that the Navy and Rule also were destined to engage in years of legal combat.

Appearing before Proxmire's congressional Joint Economic Subcommittee on Jan. 10, Rule—with Kidd only a few feet away—testified that the Admiral "probably thinks I'm a burr up his ass, and he wants me out."

"I hope," Rule said at another point, that Kidd is "not as screwed up in the negotiations" with two leading Navy contractors, Litton Industries and Grumman Corp., "as he is with me."

Kidd, less flamboyant but no more complimentary, said he had been warned on taking over the Navy Material Command that Rule, Litton and Grumman would be his three principal problems, and that he had been losing confidence in Rule for 13 months, partly because he would "go outside the system."

The flap began at a December hearing of the subcommittee when Rule responded to a request by Proxmire to comment on President Nixon's appointment of Litton's president, Roy L. Ash, as director of the Office of Management and Budget.

Rule first said that "old General Eisenhower must be twitching in his grave." Later, he apologized for this "verbal excess" by which he intended "no disrespect."

Rule's principal objection was that Ash, while head of Litton last June, had proposed a "ball-out" of the firm to senior Navy officials, had said he would go "on to the White House to explain" Litton's financial problem, and had told of a grand plan envisioned by then Treasury Secretary John B. Connally for Congress to rescue all financially troubled Navy shipbuilders.

The next day, Rule, who holds the Navy's highest civilian award, was visited at his sickbed by Kidd. The admiral asked him to sign a request for early retirement. Rule refused.

The day after that, Kidd assigned Rule to update the curriculum at the Navy Logistics Management School in Anacostia. Kidd put no time limit on the assignment.

Rule actually began the assignment on Jan. 29. He now has recommended that the school's concern with procurement be of greater depth and duration, he said last week.

Proxmire and Rep. Les Aspin (D-Wis.) had protested repeatedly that Rule was punished and demoted as a consequence of his testimony, and that a law forbidding harassment and intimidation of witnesses may have been violated. Kidd insisted at the January hearing that the mission to Anacostia was a "lateral" move.

Last week Proxmire said he had been "convinced that a correct resolution . . . would be reached once all the facts" were presented to Defense Secretary Elliot L. Richardson. Three weeks ago Proxmire and 14 other senators petitioned Richardson to restore Rule.

"The right of congressional committees to obtain information from individuals and the right of individuals to testify when invited . . . must not be tampered with," Proxmire said.

MARYLAND DAY 1973

Mr. MATHIAS. Mr. President, Maryland Day is the day set aside by law for the annual observance of the arrival of

the first colonists at St. Clements Island on March 25, 1634. It is a holiday within the Free State, and should be, because it commemorates the beginning of many important American contributions to mankind, the first seeds of which were planted in Maryland.

This year, Maryland Day was celebrated in a unique and splendid manner in a ceremony in the Washington Cathedral to dedicate the Maryland Bay in memory of Anna Campbell Ellicott, Charlotte Campbell Nelson, and Ella Campbell Smythe.

Those who participated in the service were:

The Very Reverend Francis B. Sayre, Jr., dean of Washington Cathedral.

His Excellency Marvin Mandel, Governor of Maryland.

The Reverend Lawrence J. Madden, S.J., director of campus ministry, Georgetown University.

Mr. Theodore H. Mattheiss, executive secretary, Baltimore Yearly Meeting Religious Society of Friends.

Bishop John Wesley Lord (retired), United Methodist Church.

The Right Reverend David K. Leighton, Sr., Bishop of Maryland, the Episcopal Church.

His Eminence Lawrence Cardinal Shehan, Archbishop of Baltimore, the Roman Catholic Church.

The Right Reverend William F. Creighton, bishop of Washington, the Episcopal Church.

The University of Maryland Chamber Singers and Chorus, Dr. Paul Traver, director, assisted by David Taylor.

The Cathedral Choir of Men and Boys.

The Maryland Bay and its symbolism has been described by Richard T. Feller, Clerk of the Works, and I ask unanimous consent that his guide be included at this point in the RECORD.

There being no objection, the guide was ordered to be printed in the RECORD, as follows:

THE ELICOTT MEMORIAL BAY

The areas between flying buttresses along the nave of the Cathedral Church of Saint Peter and Saint Paul are enclosed and designated as outer aisle memorial bays.

The Ellicott Memorial Bay, in the south outer aisle next to the Rare Book Library, is different from other bays in that it lacks a divider. Marble flooring at the same elevation as the nave floor is canopied with simple quadripartite vaulting. This part of the cathedral's fabric was made possible by the munificent bequest of Anna Campbell Ellicott, in memory of her sisters, Ella Campbell Smythe and Charlotte Campbell Nelson. By resolution of the Cathedral Building Committee, the bay was designated as a memorial to all three sisters. The inscription on the wall of the bay reads:

STONE CARVINGS

The three sisters were descendants of prominent Maryland families, hence this bay is enriched with symbols related to the state. At the peak of the arch where the vaulting ribs converge is an enlarged stone called a boss. Its function is similar to that of a key-stone in a round arch. The Ellicott Bay boss is carved with a background of oak leaves, reminiscent of the historic Wye Oak.

Among the leaves are several small creatures: a raccoon, a mother possum carrying her babies on her back, a Maryland terrapin, several denizens of the Chesapeake Bay—the Maryland crab, a starfish and an oyster. The

sculpture was designed, modeled and carved by Constantine Seferlis of the cathedral staff.

High on the east wall is the Maryland coat of arms, originally the family crest of Lord Baltimore. The shield was modeled and polychromed by cathedral sculptor Carl L. Bush and executed by cathedral master carver Roger Morigi.

THE STAINED GLASS

Many people came to the North American continent seeking refuge from religious persecution. In 1649 the Act of Toleration was adopted by the Maryland General Assembly. It was the first instance where trinitarian Christians made legal their efforts to live together in harmony. The large triangle at the top of the center lancet signifies the Act of Toleration. It is held by characteristic Maryland settlers, a gentleman cavalier and a tradesman or farmer. The two men stand on the Maryland coat of arms.

LEFT LANCET

Francis Asbury (1745-1816) was the first Methodist bishop consecrated in the United States, appointed by John Wesley in 1784. From 1784 until his death in 1816, he traveled on foot and horseback as a circuit rider, covering five to six thousands miles every year. Throughout his life he suffered from a disease of the throat which added greatly to the discomfort of his mission. However, he never relaxed his spartan self-control; the story of his life is one of triumph over hardship. Thus the artist has portrayed Asbury struggling up a mountain, leading his horse.

In the lower portion of the lancet is George Fox (1624-1691), principal founder of the Society of Friends. During his American trip in 1671-1672, he visited Maryland, where he preached to gatherings of settlers, winning many to the Quaker position.

RIGHT LANCET

The first American Roman Catholic bishop, John Carroll (1735-1815), was consecrated in 1790. He was founder of Georgetown University, which is sketched as it is seen today from Key Bridge. Below Bishop Carroll are the Dove and the Ark, the ships on which Lord Calvert's expedition came to Maryland in 1634. Father Andrew White, S.J. celebrated the first Roman Catholic mass in Maryland on March 25, 1634, under a great cross which had been hewn from a tree. His congregation included Governor Leonard Calvert. The single tepee indicates the wigams the settlers bought from the Indians to use until houses could be built.

CENTER LANCET

Thomas John Claggett (1734-1816) was the first Episcopal bishop consecrated in America. He became Bishop of Maryland in 1792. Bishop Claggett is shown holding a model of St. James Church, Lothian, Ann Arundel County, of which he was once rector. Captain John Smith, with fourteen companies, explored the Chesapeake Bay and its tributaries in the summer of 1608. He is said to have traveled three thousand miles in the open barge pictured, and he made a remarkable map of the area. Captain Smith is shown leading daily prayer.

The frieze across the base of the three lancets features the Maryland state flower (black-eyed susan), a Chesapeake Bay rock bass, a blue crab, a yellow perch, a sea nettle, a Baltimore oriole and an oyster. In the left lancet is the loblolly pine, while the center lancet features beech and white oak trees and on the right is mountain laurel.

Cathedral friends will have no trouble recognizing the luminous stained glass window as the creation of Rowan LeCompte, designer of some of the most beautiful glass in Washington Cathedral. It was fabricated and installed by his associate, Dieter Goldkuhle.

Mr. MATHIAS. Mr. President, it was appropriate that the service in the Maryland bay concluded with the prayer for

Maryland composed several years ago by the Very Reverend Francis B. Sayre, Jr., dean of the cathedral, and which I would like to repeat.

Blow, Lord, Thy clean winds upon the shores and shoals of Maryland. Blow gentle breeze of blessing across the earth, atop her stalwart hills, and over the greening fields. Blow, Holy Spirit, the freshness of liberty through the hearts of Thy people whose domain named for a queen, yet worships the King who is the Father of us all.

So may Thy children catch upon their hopes the breath of glory which Thou doth send to fill the spangled sky, the lofty sails of ships, and the faithful lives of men.

Fulfill then, O God, the promise once borne upon the wings of a dove of a land of peace and companionship, and courage enough ever to follow after Thee; through Jesus Christ our Lord. Amen.

CHILD ABUSE

Mr. MONDALE. Mr. President, last week I and 13 other Members of the Senate introduced S. 1191, the Child Abuse Prevention Act, which is aimed at improving the prevention, identification, and treatment of child abuse.

According to the National Center for Child Abuse Prevention and Treatment in Denver, 60,000 cases of child abuse—including beating and other physical abuse by adults—are reported in this country annually.

The Subcommittee on Children and Youth, of which I am chairman, has a longstanding interest in trying to find solutions to the complicated problems of preventing and treating child abuse. Last fall we printed a document containing selected readings on the subject. This year we continued our investigations into the causes and possible means of eliminating child abuse and subsequently introduced S. 1191, the Child Abuse Prevention Act.

This week the subcommittee is holding three hearings on this legislation. The first two hearings will take place in Washington on Monday and Tuesday, March 26 and 27, in room 4232 of the Dirksen Office Building.

The third hearing will be held on Saturday, March 31, in Denver, Colo. at the University of Colorado Medical School. The subcommittee scheduled this field hearing in Denver because the child abuse team operating out of the medical center has developed some very promising methods of working with the families of abused children.

I was therefore extremely pleased to read in last week's edition of the National Observer a thorough and informative article describing the activities of the Denver Center. I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE CHILD-BEATERS: SICK, BUT CURABLE

(By Richard S. Johnson)

They find a healing process in sharing their experiences—including the nightmarish aspects. So one night a week they gather, some with husbands or wives, some alone. Sharon, pretty, trim, and modishly dressed, is the wife of a successful young salesman; she shook her baby by the ankles until its leg snapped. Mary, fat, wearing a sack dress, is

the wife of a man who earned less than \$4,000 last year; she choked her little girl. Cindy is the personable young widow of an Air Force flier who died in a plane explosion; in recurring fantasies she saw herself throwing her children to their deaths from atop an office building.

These parents are members of Families Anonymous, an organization for parents who have knowingly injured their children or are afraid they might. They are parents determined to gain control over their occasional violent impulses toward their children, whom they love—but whom they also sometimes hate.

Tonight there is a new couple. Both sit like frightened children, politely refusing coffee or Sanka.

"Well," someone asks in a theatrical voice, "who beat their kids this week?"

The question was dropped to break the ice. A few smile or laugh. Not the new couple: stiff, suspicious, proper. But they look at Mary with intense interest as she tells them: "I'll always be a battering parent."

At once there is a hush, an expectation. Then Mary adds: "But as long as I have this group, my child is safe with me. I'll never hurt her again."

They nod or quietly agree, relieved at what for them is obviously a truth. And in fact none has—since joining the group—hurt his child. And those whose children the courts had placed in foster homes have their children back home again. Except for the new couple, whose struggle for understanding of themselves, control of themselves, is now beginning.

To Dr. C. Henry Kempe, Families Anonymous is one of the innovative therapeutic approaches that demonstrate new hope for the "cure" of battering parents. If widely applied, these innovations can, he believes, save many thousands of children each year from injury or death.

Kempe is perhaps this country's best-known authority on the physical abuse of children by parents. Though his specialty is infectious diseases of childhood, he began his serious research into child abuse when he joined the pediatrics department of the University of Colorado School of Medicine 17 years ago.

Now head of that department, Kempe also directs the newly created National Center for the Prevention and Treatment of Child Abuse and Neglect.

The center began operating last Jan. 1, established on the previous work of the medical school's child-protection team and funded by gifts from private institutions, notably a three-year grant of \$588,000 from the Robert Wood Johnson Foundation of Princeton, N.J.

It was Kempe who in 1961, at a meeting of the American Academy of Pediatrics, coined the term, "The Battered-Child Syndrome." Since then awareness has grown that the syndrome—the injury of a child through the nonaccidental hitting, kicking, throwing, or twisting by a parent or foster parent—is a significant cause of childhood disability and death in America and elsewhere.

Because there still isn't nationwide compliance with laws requiring the reporting of child abuse, experts agree that there is no accurate way to determine incidence. Kempe estimates there were about 60,000 reported cases in the United States last year.

"Child abuse is a sickening, largely overlooked problem in America," says Sen. Harrison J. Williams, the New Jersey Democrat who is chairman of the Senate Committee on Labor and Public Welfare. Last week Minnesota Democrat Walter F. Mondale, chairman of the committee's Subcommittee on Children and Youth, introduced the Child Abuse Prevention Act in the Senate. Williams and 13 other senators are cosponsors.

Mondale's subcommittee will hold hearings on the bill in Washington, D.C., beginning March 26. The bill would provide Federal funds for personnel and programs to prevent and treat child abuse. It would establish a National Center of Child Abuse and Neglect to be a clearinghouse for information and training materials. It also would set up a National Commission on Child Abuse and Neglect to examine, among other things, the effectiveness of existing laws affecting child abuse and neglect.

A WESTERN CULTURAL PATTERN

Studies suggest that the battered-child syndrome is only an extreme of a violent child-rearing pattern firmly established in Western culture. Two of Kempe's colleagues who have thoroughly studied the syndrome write:

There seems to be an unbroken spectrum of parental action toward children, ranging from the breaking of bones and fracturing of skulls through severe bruising to severe spanking and on to mild "reminder pats" on the bottom. To be aware of this, one has only to look at the families of one's friends and neighbors, to look and listen to the parent-child interactions at the playground and the supermarket, or even to recall how one raised one's own children or how one was raised oneself.

The amount of yelling, scolding, slapping, punching, hitting, and yanking acted out by parents on very small children is almost shocking. Hence we have felt that in dealing with the abused child we are not observing an isolated, unique phenomenon, but only the extreme form of what we would call a pattern or style of child rearing quite prevalent in our culture.

Those are the words of Drs. Brandt F. Steele and Carl B. Pollock, psychiatrists and professors at the Colorado medical school. For 5½ years they "studied intensively 60 families in which significant abuse of infants or small children had occurred." Battering parents, they found, are just like the rest of us in most respects. They come from farms, small towns, and cities. They are of Catholic, Jewish, and Protestant faiths—or of none, or are antichurch. They are intelligent and well educated and at the tops of their professions. They are unintelligent, poorly educated, and have poor job records. They are poor, middle-class, or wealthy.

TRAITS OF BATTERING PARENTS

And so Steele and Pollock and other researchers have disproved the belief "that child abuse occurs only among 'bad people' of low socioeconomic status."

Yet there are significant differences in the way battering parents and "normal" parents react to their children during crises. For example, say Pollock and Steele, a battering parent in a crisis is incapable of valuing a love object such as a child more than he values himself. Indeed, such parents characteristically turn to small children—even to infants—for nurturing and support and protection. When the children can't or won't co-operate, the parents—unable to cope by themselves with the emotional pressure they feel—sometimes respond in paroxysms of frustration and rage. At those times they cannot control the physical energy they use in "disciplining" or "punishing" or "training" their unrewarding offspring.

Apparently such behavior stems from the way the parents themselves were treated as children, say Pollock and Steele. Without exception the parents in their study group had been exploited, subjected to "intense, pervasive, continuous demand from their parents," and made to feel they could never do anything right.

Such child-rearing methods, say these psychiatrists, are "transmitted from parent to child, generation after generation."

Obviously such parents need help, these psychiatrists believe. But historically—and

even today—the tendency has been to punish them.

Vincent De Francis, a lawyer who is director of the Children's Division of the American Humane Association, has said that "the general attitude toward the problem of child abuse, and a common reaction of people when confronted with the brutal facts, is shock and anger. A natural consequence is the desire to exact retribution—to punish unnatural parents for their acts of cruelty."

Such punishment, says De Francis, doesn't achieve anything except surface compliance with criminal statutes. Prosecution frequently places the child in even greater danger when the battering parent comes home—a parent whose motivational forces have remained untreated and whose emotional damage has become greater due to the punitive experience.

ABUSERS NEED MOTHERING

What, then, should society provide for such parents? "Mothering," says Kempe, Pollock, Steele, and evidently most other researchers. Their studies show that, without exception, battering parents suffered, in the words of Steele and Pollock, from "deprivation of basic mothering—a lack of the deep sense of being cared for and cared about from the beginning of one's life."

Mothering is tender loving care—a cliché suddenly freighted with meaning in the context of the battered child and his family. Either sex can mother, and Kempe and company believe a parent of either sex must have mothering before he can mother, before he can nurture and protect his children and refrain from violent physical abuse.

These experts' theory, simply stated, is that a person must feel loved before he can give love. That is why, says Kempe, the traditional modes of social agencies—welfare departments and the like—aren't highly successful in helping battering parents. Those modes are centered, he says, in the supervisory, once-a-week or once-a-month home visits of overworked caseworkers who are concerned for the child but who lack the training and time to make the parent feel cared for.

THREE MAJOR CRITERIA

A battering parent, Kempe says, needs help at 2 a.m. when he is tired, his baby is crying, and his "abusive pattern" is taking shape.

"In order for a child to be physically injured by his parents or guardian," Kempe writes in his latest book, *Helping the Battered Child and His Family* (J. B. Lippincott, 1972), "several pieces of a complex puzzle must come together in a very special way. To date we can identify at least three major criteria."

First, the parent must have a potential to abuse. He lacks the "mothering imprint." He feels isolated, unable to trust others. He has no spouse, or a spouse too passive to be able to give. And he has very unrealistic expectations for his children.

Second, there must be a special child, one the parents see as different, who fails to respond as expected, or who really is different—"retarded, too smart, hyperactive, or has a birth defect."

Finally, there must be a crisis or crises to trigger the abusive act. "These can be minor or major crises—a washing machine breaking down, a lost job, a husband being drafted, no heat, no food, a mother-in-law's visit, and the like." The crisis precipitates the act of abuse; it isn't the cause.

INNOVATIONS SEEN SPREADING

Kempe thinks that within 10 years the nation's child-welfare departments will rather universally be using the innovations now employed or recommended by his center. When that happens, he says, the battered-child syndrome—"which can be a fatal disease"—will begin to disappear.

The center here will continue to use its child-protection team: four pediatricians, four part-time psychiatrists, two social work-

ers, a welfare-department representative, a co-ordinator, and one public-health nurse. The center also has a lawyer who represents it in court hearings and works toward reforms in the law. (The Colorado legislature last year amended the Colorado Children's Code to provide for a publicly paid law guardian with specific duties in protecting the rights of an abused child.)

Preventive and predictive services are also important in the center's work. Kempe says new and sophisticated means of prediction can reveal which persons ought not to become parents and which—if they become parents—need help. Prevention of child abuse includes a wide range of educational functions—reaching the public and officials—as well as practical things such as the 24-hour-a-day "hot line" over which any distraught parent can receive immediate support and counsel.

Finally, the center's treatment includes Families Anonymous, lay therapists called "parent aides," a day-care center where overwhelmed mothers can bring their children, a crisis nursery for infants, a mother-child unit where a mother and her child can live temporarily in a safe environment free from emotional pressures, and psychiatric care.

But Kempe isn't satisfied. He believes that nationally every county's protective-services department should be converted from the single-discipline approach of welfare departments to multidiscipline approaches applying expertise in social services, medicine, juvenile courts, and law enforcement. Such a change, Kempe says, would "cut across many of the traditions and unworkable rules and regulations that are built into most protective-services departments."

Thus Kempe conceives the nation's first defense of children as being a hospital-based child-protection team, such as that at the Denver center, in every county. The second line of defense would be the multidisciplinary protective-services units.

HEALTH ADVOCATES FOR CHILDREN

Ultimately Kempe would like established a nationwide corps of "health visitors," health advocates for children. Scotland has such a system now. Every child born is seen monthly by a health visitor, who follows the child's physical, emotional, and mental growth. One result, says Kempe, is that non-nurturing parents are identified and can be helped or, if they can't be helped, separated from their children.

About 10 per cent of the battering parents in America are psychotic or are aggressive psychopaths, Kempe says. He contends they cannot be helped while the child remains in the home. These parents' children, he says, should be placed permanently in foster homes, or, preferably, adopted into other families.

The other 90 per cent can be helped to become adequate parents, Kempe believes.

"A PARTICULARLY BRIGHT LIGHT"

He takes pride in his center's successes. The use of lay therapists, begun here four years ago, was a break-through that proved it is unnecessary to require years of training for persons to "mother" battering parents. The lay therapists make only \$2 an hour. A battering parent may call his lay therapist at any hour. If he calls when he is in crisis, experience shows he's unlikely to hurt his child.

Kempe calls Families Anonymous a "particularly bright light." Begun in January 1972 by Joan and Walt Hopkins, it is patterned after a similar California organization formed earlier—and still directed—by a woman who calls herself "Jolly K" and who was herself a battering mother.

The Denver area now has four Families Anonymous groups. Kempe's center pays the salary of Mrs. Hopkins, a public-health nurse. Her husband, a private psychiatric social worker, helps without charge.

FINALLY, WORDS OF LOVE

Entries from Mrs. Hopkins' diary indicate a kind of heroic struggle and growth:

Jan. 21, 1972. First meeting. . . . At the end of two hours all three girls found they had common problems: 1) No self-confidence 2) Felt terrible when criticized 3) Did not believe it when complimented 4) Afraid to discipline their children.

April 4. Mary stated she had never told [her little girl] she loved her. So she was assigned this for homework.

April 11. Mary stated she did tell [her daughter] she loved her—every night just as she shut the bedroom door. The night before this meeting she left the door open and told her. She said it was hard but that she felt good being able to do it.

That group now includes about 15 young mothers and fathers. Besides receiving from one another the support and mothering they missed as children, they have "self-help" projects:

How to involve a spouse in solving problems.

How to learn to relate to their children. (Example: providing for fussy eaters tiny hamburger patties, two or three peas, and a pinch of spinach so the meal becomes a game, fun for all.)

How to be unashamed and unafraid to ask for help over "little problems" in their relationships with their children.

How not to have unrealistic expectations of small children.

How to learn to trust others through sharing phone numbers with members of the group. (Mrs. Hopkins' diary quotes one young woman as saying that she had never before had a "safe" person to talk to.)

How to devise practical ways to get relief from the demands of children. (For example, each mother must bring to her second meeting a list of baby sitters upon whom she could rely.)

How to enjoy themselves. (Two women confessed that a party before Mother's Day last year was the first party they had ever attended.)

MARY'S REMEMBRANCE

Perhaps one of the most significant demonstrations of growth was an essay Mary brought to the meeting at which the new couple appeared. Titled "First Night Tremor," it was her recollection of her first meeting. Mary writes:

What am I doing here? . . . Probably all they'll do is sit and stare at me. I'm fat, and have long hair and dress differently. I wish I hadn't come! . . . Say, that gal has a problem that I had with mine. Wonder what would happen if I mentioned to her what I tried. Wonder if she'd get mad. Well, here goes. Gee, she thought that was a good idea. No one has ever really said I had good ideas on raising my daughter before. . . . It's sure a good feeling to realize these people need me. Sure I need them, but they also need me! . . . I'm still fat . . . but no one really cares. I don't think they are seeing what I wear. I think they see me. . . . I like it.

G. EVERETT MILLICAN

Mr. TALMADGE. Mr. President, it is with pleasure and admiration that I call your attention to a man I personally regard highly and a man whose service to the causes of freedom and brotherhood have been exemplary.

G. Everett Millican has served in many capacities. He has been a vice president of Gulf Oil Co. He has served for 18 years as a State senator in Georgia. He was an Atlanta alderman for many years. His involvement in community affairs has been extensive despite numerous other

responsibilities, and a list of the organizations and service agencies with which he is affiliated would grace anyone's record. And Mr. Millican's devotion and service to his beloved Morningside Baptist Church in Atlanta have resulted in an accelerated building program as well as a building of the spirit of fellowship and devotion to God.

Mr. Millican is the son of a Baptist minister. Although he never entered the ministry himself, he is active enough in his church and community to frequently deliver messages of inspiration. One such message has proven of such value to others that he has delivered it over 50 times to some of the largest civic clubs in the country.

The topic of this talk is freedom, and it is of such outstanding merit that I am nominating him for a Freedoms Foundation award. I know it will be of great interest to Members of the Senate, and I ask unanimous consent that it be printed in full in the RECORD.

There being no objection, the talk was ordered to be printed in the RECORD, as follows:

TALK BY EVERETT MILLICAN, MORNINGSIDE BAPTIST CHURCH, OCTOBER 22, 1972

May I express my appreciation for the honor of designating today's service in my name and I thank each of you for being present. Several years ago I had the privilege of talking from this pulpit on the subject of "stewardship" and I know of nothing in our daily lives more important. I believe it is customary to read some scripture, and I would like to read one verse. It is First Corinthians 4:2. "It is required in stewards that a man be found faithful. He may be intelligent, gifted, skillful, capable, but he must be faithful" . . . stewardship applies to property, personality, opportunity, amusements, tithing, to only mention a few. As much as I would like to talk on our stewardship, I have picked the subject, "Where are we going"? I possibly should say "What are we doing about it"? I honestly believe that we are in a great crisis in this country and it is going to be necessary that each one of us, who have a great love for this country, to stand up and be counted. Let's go back to the beginning.

The place is Carpenters Hall in Philadelphia.

The condition of the American colonies was intensely difficult on the summer day when Mr. Lee, one of the delegates from Virginia, rose in his place to submit, upon the instructions of the legislature of that state, a motion that was not unexpected.

For the American colonies there appeared some possibilities of respectable retreat in the face of the preponderant English military power. For although the American forces were insignificant, and their commanding officer, The Virginia Planter, with no experience except in guerrilla campaigns against the Indians that ended in the overwhelming defeat of General Braddock's men, had achieved no considerable success around New York. The political situation in Britain was such that considerable leniency could be made if the colonies submitted promptly enough and abjectly enough.

Mr. Lee, following the instructions known to have been given him by the Virginia legislature, arose in his place at the termination of the roll call and moved that "Those colonies are, and by right ought to be, free and independent states".

The great debate had begun.

The principals on the floor were Mr. Dickinson, from Pennsylvania, who opposed the propositions and Mr. John Adams of Mas-

sachusetts, who supported them. Eventually the Congress named a committee that was directed to draft a declaration presenting the viewpoint expressed in Mr. Lee's resolution. The members of the committee were Mr. Franklin, an elderly gentleman from Philadelphia with considerable reputation as an author and publisher; Mr. Adams of Quincy, a lawyer of wide repute and the principal champion of the resolution on the floor of the congress; and Mr. Jefferson, of Albemarle County, Virginia, a lawyer with some reputation as a writer of incendiary pamphlets.

Mr. Jefferson was a man of charm, known to be attached to the ideas of his fellow Virginian, Mr. Mason, and to those of Mr. Samuel Adams, a smart incendiary of Boston, who inflamed men's minds by talk of individual responsibility. There was some surprise among members of the congress when the two senior members of the committee entrusted the actual writing of the document to the young Virginian.

In the oppressive heat of Philadelphia, sitting at a plain table in simple lodgings, the young lawyer—not long past his thirtieth birthday—prepared a document designed to justify in the eyes of all mankind the revolutionary and unthinkable proposal that the aristocrat from the tidelands of his home state had submitted to the representatives of the thirteen colonies.

Certainly this band of patriots, a motley crowd if anyone had ever observed such, must find it necessary to comply with the properties and in the formal language that Mr. Jefferson prepared. They sought to meet this obligation:

"The decent respect to the opinions of mankind requires that they should declare causes. . . ."

It was a bold statement. It asserted that ideas were more important than guns.

Let's listen to John Adams, as he speaks in favor of his younger friend's resolution, while Jefferson sat silent in his place:

"Sink or swim, live or die, survive or perish, I give my heart and hand to this vote."

Quietly, in the corners, Mr. Samuel Adams and Mr. Benjamin Franklin performed their allotted task. It was not their job to defend the declaration on the floor with a steady flow of eloquence. Theirs was a practical task—a buttonholing of members and taking snuff with them and discretely cajoling them into acceptance of a way by less than a million souls, themselves badly divided against all the world.

196 years lies between that day and this. Across that gulf of time it is difficult to say whether it was the skill of Mr. Jefferson's writing or the eloquence of Mr. Adams, or the finagling of Mr. Franklin, that carried the day, but in the end the members voted "Aye," and walked solemnly to the table at which the presiding officer sat to affix their signatures to the document which was concluded with these words:

"And for the support of this declaration, with a firm reliance on the protection of divine providence, we mutually pledge to each other our lives, our fortunes, and our sacred honor."

They went and signed—Mr. Franklin, who though not a Quaker, in the somber brown that befitted a resident of the Quaker metropolis; Mr. Jefferson in the ill-cut clothes of the frontier lawyer—and then the old wit of Franklin must have bubbled over as he said:

"Well, gentlemen, now for sure we must all hang together or we will hang separately." A nation had been born. Our nation—yours and mine.

And may I say that on July 4, 1826 (146 years ago) both Mr. Jefferson "The Sage of Monticello" and Mr. Adams "The Colossus of Independence" died. Jefferson, too ill to take part in the 50th anniversary celebration in Washington wrote this—"Let the

annual return of this day forever refresh our recollection of these rights and an undiminished devotion to them."

And when a Quincy, Massachusetts committee called upon Adams to compose a toast for the celebration he said "Independence Forever", and when asked would he care to say more, his reply—"No, Not a word."

Let's look further—there was a young law student named Nathan Hale who went down to spy on Sir Henry Clinton's men at New York and got himself hanged. There was a shuffling old peddler of needles and matches named Abraham Marah, who concealed in his peddler's pack a subversive manifesto called "Common Sense" that was written at Valley Forge and distributed up and down the back woods of Pennsylvania and Virginia and New York. There was an angry young country bumpkin named Sallette who hid in the salt rivers and marshes between Savannah and Darien, Georgia, and slipped out in a canoe at night to blow up powder houses and to burn the supplies of Lord Cornwallis' Red Coats.

I could go on and on, but the foundation that these men and many others built is today in serious danger.

Have you ever wondered what happened to the men who signed the Declaration of Independence. Men, who the so-called Revolutionaries of today who would like to tear down our government, are trying to compare themselves with those who signed the Declaration 196 years ago.

I will not go into detail—some were captured and tortured—many had their homes ransacked and burned—nine fought in the war. Some of their wives and families were jailed and driven from their homes.

What kind of men were they? They included lawyers and jurists, merchants, farmers and large plantation owners, men of means, well educated. But they signed the Declaration of Independence knowing full well that the penalty would be death if they were captured.

Such were the sacrifices of those who signed the Declaration. They were not wild-eyed, rabble-rousing ruffians; They were soft-spoken men of means and education. They had security, but they valued liberty more.

I am sure those who signed our Declaration of Independence and those who wrote our Constitution had in mind a government that would not be overrun and destroyed by those things that we see today.

What is happening in America? Why do we indulge and permit these excesses and outrages; Why do so many continue to perpetrate and sanction them? The answers, while complex, are not as difficult and mysterious as they may seem.

At the heart of the problem is an age-old moral dilemma with which every healthy society must come to terms. It is that of balancing the rights of the individual against the good of society as a whole: of drawing a fine line between the function of government and the obligation of the citizen to himself and to his country. I believe a republic must preserve the proper balance between the duties of government and the responsibilities of its citizens—each must uphold its end of the bargain. When one is exaggerated at the expense of the other and the balance is lost, societies decay and eventually collapse from within.

In my opinion, there are certain rights in a free republic which are the function of government to guarantee and protect. Among these is the right to life, liberty and the pursuit of happiness. But there are other so-called rights, about which we hear a great deal lately, which are not really rights at all. They have taken on an air of credence as "rights" because of the myths surrounding them. In the process of perpetrating these myths, genuine rights—such as the right of the majority to freedom from fear,

to protection by the law and to the freedom to choose—have been so twisted and degraded that not only has its true meaning been obscured, but the acts committed in its name have made a mockery of its original intention. It is becoming fashionable today to justify almost anything by calling it a "right."

In the past several years we have seen our cities convulsed with destruction in the name of "civil rights".—Universities shut down by self styled Revolutionaries, both students and faculty members, in the name of "academic rights".—Sedition and draft evasion by cowards in the name of "morality"—Radicals openly advocating guerrilla warfare and anarchy in order to disrupt the Democratic process and overthrow the government in the name of freedom:—A youth culture anesthetized and sustained by drugs in with those friends in America, they "the Communists" can go forward to total victory.

I am much concerned about what's going on in our country today. It is certainly a parallel between the rise and fall of Rome and of our own Republic.

"Dr. Robert Straus-Hauppe recently published a series of articles based on the observations of a number of historians: among them "Spengler, DeReincourt, Ferraro, Gibbons and some others.

He told how Rome had known a pioneer beginning not unlike our own pioneer heritage, and then entered into two centuries of greatness reaching its pinnacle in the second of those centuries, going into decline and collapse in the third. Yet, the signs of decay were becoming apparent in the latter years of that second century.

It is written that there were vast increases in the number of the idle rich, and the idle poor. The latter were put on a permanent dole, a welfare system not unlike our own. As this system became permanent the recipients of public funds increased in number. They organized into a political bloc with sizeable power. They were not hesitant about making their demands known, not with increasing frequency. Would-be emperors catered to them. The great, solid middle class—Rome's strength then as ours is today—was taxed more and more to support a bureaucracy that kept growing larger, and ever more powerful. Surtaxes were imposed upon incomes to meet emergencies. The Government engaged in deficit spending. The denarius, a silver coin similar to our half dollar, began to lose its silvery hue. It took on a copper color as the government reduced the silver content.

Even then, Gresham's Law was at work, because the real silver coin soon disappeared. It went into the name of "self expression": Hippies and flower children aimlessly wandering and littering our streets in the name of "love and peace"—motorcycle gangs killing and torturing—pornography and obscenity running rampant and in many cases condoned and approved by our courts: Unprecedented rising crime rate (more than 12 times faster than population increase):—Radicals and those who advocate overthrow of our form of government being invited to speak on college campuses. Lawlessness in many areas in the name of "The right to equal shares for everybody".

We see parades and riots in our streets in the name of peace. Some who march carry the flag of a nation that has killed over 50,000 of our young men. Are those who organize these parades interested in peace or with the welfare of our enemy? Some time ago the premier of North Vietnam in Hanoi, then Van Dong, made it plain that he does receive comfort and aid from all the protests and parades. His letter has been made public in Hanoi. It is addressed to his "Dear American Friends" and is full of praise and gratitude for their efforts. It expresses the hope that together hiding.

Military service was an obligation highly honored by the Romans. Indeed, a foreigner could win Roman citizenship simply by volunteering for service in the legions of Rome. But, with increasing affluence and opulence, the young men of Rome began avoiding this service, finding excuses to remain in the soft and sordid life of the city. They took to using cosmetics and wearing feminine-like hairdos and garments, until it became difficult, the historians tell us, to tell the sexes apart.

Among the teachers and scholars was a group called the cynics whose number let their hair and beards grow, and who wore slovenly clothes, and professed indifference to worldly goods as they heaped scorn on what they called "middle class values".

I'm still talking about Rome.

The morals declined. It became unsafe to walk in the countryside or the streets. Rioting was commonplace and sometimes whole sections of towns and cities were burned.

And, all the time, the twin diseases of confiscatory taxation and creeping inflation were waiting to deliver the death blow.

Then finally, all these forces overcame the energy and ambition of the middle class.

Rome fell when its citizens lost their desire for freedom and lost sight of the good of the nation as a whole.

Here are some of the things that led to the decline and fall of the Roman Empire. How many of them do you recognize as happening in our country today?

- Permissiveness in Society.
- Immorality.
- The welfare state.
- Endless wars.
- Confiscatory taxation.
- Destruction of middle class.
- Cynical disregard of the established human virtues and principles and ethics.
- Pursuit of materialistic wealth.
- The abandonment of religion by many.
- Politicians who cater to the masses for votes, regardless of principle.
- Inflation.
- Deterioration of the monetary system.
- Bribery.
- Riots.
- Street demonstrations.
- Release of criminals on public.
- Loss of masculine sturdiness.
- Feminization of the people.
- Scandals in public office.
- Plundering of the public treasury.
- Deficit spending.
- Tolerance of injustice and exploitation.
- Bureaucracies and bureaucrats issuing "regulations" each week.
- Centralization of government.
- Public contempt for good and honorable men.

We are now approaching the end of our second century—it has been said that the days of a democracy are numbered once the stomach takes command of the head. When those who are less affluent feel an urge to break a commandment and begin to covet that which their more affluent neighbors possess they are tempted to use their votes to obtain instant satisfaction. (We see this in bloc voting in every election).

Under the phrase "the greatest good for the greatest number" we destroy a system which for 2 centuries has accomplished just that. *The greatest good for the greatest number.*

We see colleges divorcing themselves from participation in the defense of their nation due to demonstrations. We see riots in the streets—bombs being planted in factories, government buildings, defense, installations. We no longer walk the countryside or city streets without fear—draft dodgers at every turn—those who say it is no crime to break a law in the name of social protest—our moral code continues to erode—what happened to Rome can easily happen to us.

No city, state or nation rises to a higher level than the moral integrity and honesty of its leadership.

I ask you? What is happening to our leadership? Have the statesmen of former years been replaced by "politicians"?

Some time ago I read a comment by Senator John Williams upon his retiring as Republican Senator from Delaware. "When I first came to the Senate, I looked around and wondered how in the world I ever got elected to a body of such able and wise men. Now, I look around and wonder how the devil some of these men ever got there".

Do we ever hear the word "economy" mentioned?

This word, "economy", has been lost in government at all levels. I wonder if we should not heed the advice given by Thomas Jefferson when he said, "I place economy among the finest and most important virtues and public debt as the greatest to be feared. To preserve our independence, we must not let our rulers load us with perpetual debt. If we run into such debt, we must be taxed in our meat and drink, in our necessities, in our labor and in our amusements. If we can prevent the government from wasting the labor of the people, under the pretense of caring for them, they will be happy".

We are slowly sacrificing our legitimate rights. Liberty does not mean license from the law. The right to dissent means protest within the bounds of law, not mob rule. The right to the pursuit of happiness means equal opportunity, not guaranteed income or equal shares.

Democracy calls for equal opportunity under the law. It does not believe in guaranteeing equal results for everybody irrespective of effort. It is not the function of government to guarantee prosperity for everyone. It is the function of government to provide a climate in which everyone is free to prosper. The present outcry for "equal rights" is really a demand for "special rights".

In my opinion, there are some things which are beyond the realm of government and money to cure. In many cases, the underlying causes of poverty are lack of initiative or just plain laziness. The government cannot make a man learn a skill. It cannot keep a woman from having children for whom she is unable to care. Money will not buy incentive, the will to work or the desire to take advantage of educational and job-training programs. It will not buy the wisdom of prudence to use one's money for balanced foods, instead of a shiny new automobile or a color television set or a bottle of liquor.

It is time to put an end to the present soft-line response to violence. Too much disorder has been permitted for personal advantage under the guise of civil rights. Even if there were a just cause, no end could justify the means. Our first duty should be to uphold the law and to protect the rights of the majority. Decent, law-abiding citizens have a right to walk the streets without fear, a right to see their taxes spent for constructive purposes and, above all, a right to the preservation of their property. The current excuse for the permissive approach, that property is not as valuable as lives, is totally wrong. It not only establishes a dangerous precedent, which could result in complete anarchy, it is mistaken in principle. Property rights, along with the right to live, are among the oldest of all human rights. A man's property—his work—is an extension of himself. If you take away the product of his efforts, his life work, you destroy him as surely as if you had taken his mind and left his body as a live shell.

It is sheer folly to condone lawlessness in the belief that it is a form of social unrest which must have an outlet. This is to admit the criminal has become stronger than the law. To sacrifice the rights of the

majority for the sake of pacifying a small minority is the epitome of misguided humanitarianism at best.

The time is already past to begin to counter the trend of concepts such as freedom and rights to the point that they are no longer recognizable: Time to reestablish the balance between the role of government and the responsibility of the individual. We must affirm the ethics of individual strength and substitute them for collective dependence. We should remind ourselves again and teach our children and grandchildren that real power lies in moral strength and mental integrity. These qualities are hard won products of a long process.

I believe that honest poverty deserves the concerted and prayerful attention of all who are blessed with a better life, but today we hear very little about "the poverty of character, morality and courage".

"The American private enterprise system, although under constant attack, has proven through the years to be the greatest anti-poverty program the world has ever known. Ten million jobs have been created within the past several years. The qualities of character, courage, vision, ability, faith and understanding made the United States a great nation. These qualities can only be by dedication and loyalty with one's heart."

May I urge that we do a better job in our responsibility as citizens in voting than many of us have done in the past.

I hardly need labor this point but I would like to suggest its bearing on the small percentage of votes cast in most elections. Nothing is more frightening than this abdication of the right to vote by a large number of our citizens. It is frightening when we realize how many of our countrymen have laid down their lives to win for us this right from the American Revolution to the present. What they died for many of us won't even walk down the street for. Certainly we won't get wet for it, because if a little rain comes that always cuts down the number of voters. Nothing fades like a voter on a rainy day. Remember—pressure groups vote.

Some years ago a survey team examined voting habits of Chicago citizens for the period of four (4) years—This revealed among other things that qualified voters going to the polls included 99% of the tavern keepers and employees, 97½% of the gamblers and their employees, 16% of the housewives, 17% of the protestant ministers and 29% of the protestant church laymen.

Two weeks from now we have the privilege that citizens of many countries do not have—that of freedom of voting and I would urge you and every eligible voter in this country to exercise that priceless privilege.

We must stand up and be counted.

Many times "bad people are elected to office by good people who do not vote."

Edmund Burke many years ago wrote these words: "All that is necessary for the triumph of evil is that good men do nothing".

We might do well to remember the saying of Plato: "The punishment suffered by the wise who refuse to take part in the government is to live under the government of bad men".

I am a great believer in free enterprise. In my opinion free enterprise has nothing to do with politics, or wealth, or business, or class. It is a way of living in which you and I as individuals are important. Many little things make up this way of life . . . but think what we would lose if we ever surrendered it.

Some time ago, one of our TV commentators stated that some people are saying the bigger you are the better you are. Atlanta, in my opinion, can get all of the tall buildings, stadiums, colosseums, a liquor store and dance hall on every corner, and everything else to make it larger from a commercial and physical standpoint, but the one thing that

makes a great city is dedicated citizens. The greatest asset any company has is dedicated employees and the greatest asset any city could have is dedicated citizens, and we are losing them mighty fast.

Atlanta is big town? Big in office buildings—hotels—motel—colosseum—civic center—art center but also big in crime growth . . . racketeering . . . gambling . . . criminal elements finding a home . . . juke joints . . . cocktail lounges . . . murders . . . prostitutes . . . hippies . . . and we will continue this. Last year we had 243 homicides in Atlanta. Make up your mind we already have organized racketeers and gangsters in Atlanta.

Let's take a look at what's happening.

With the population increase being practically zero for the past 10 years, we find these increases:

Homicides 161%.
Rape 293%.
Assaults 157%.
Burglaries 147%.
Robberies 259%.
Auto thefts 53%.

The erosion of freedom is our paramount peril. Many people recognize that something is wrong with our country. There is a growing uneasiness that something tragic is happening to American life. American morals are at a new low. Some colleges and universities are teaching that morality is "relative" and "one person's opinion is as good as another's". There are no moral absolutes, we are told.

Alarming is the breakdown in family life and family discipline. Parents are pampering their children and they are becoming irresponsible and soft. Children are permitted to indulge in anything that the crowd does.

Our paramount peril, however, is the loss of our individual rights and freedoms. Our power of self determination continues to be impaired with the passing of each year and once a government gains control of the economic area of life it can control every facet of our life. When a free economy is gone it will not be long until all our other freedoms will also disappear.

What are we going to do about it?

No one ever stands still. Either we go forward or we slip backward. We are all seeking happiness and success and as Christians, spiritual growth. Wonderful blessings have been showered upon us by giving us the privilege of living in such a great country as these United States and I urge that each of you take a more active part in public affairs and in civic responsibilities and opportunities, and that you urge your children and grandchildren to do likewise. Each of us have a responsibility to government . . . and only by accepting that responsibility will we continue to enjoy the liberties given us in the Declaration of Independence and in our competitive free enterprise system.

Keep in mind that there is a large number of people who do not believe this—they want strict government control of all business—all people—all services.

We must never forget that freedom is not a gift, automatically bestowed, but something not easily attained and difficult to keep.

I am sure we all want to protect the liberties we have and make our communities, our state, and our nation a better place in which to live, and I would like to close with the words of John Ruskin:

"When we build let it not be for the present delight, nor for the present use alone. Let it be such work as our descendants will thank us for, and let us think, as we lay stone upon stone, that a time is to come when these stones will be held sacred because our hands have touched them, and that men will say, as they look upon the labor and wrought substance of them see, this our fathers did for us".

GENOCIDE CONVENTION WOULD NOT USURP STATE POWERS

Mr. PROXMIRE. Mr. President, one argument often advanced against ratification of the Genocide Convention is that it would wreak havoc in the administration of criminal justice by allowing a confusion of jurisdictions for crimes of homicide, kidnapping, and assault and battery.

This argument contends that there could be no clear initial assumption of whether a crime was committed with "genocidal intent" and should, because of the Genocide Convention, be tried in Federal courts; or whether it was committed without such intent and belongs under State jurisdiction. Problems could arise if the initial assignment of jurisdiction offered in the indictment for the crime was wrong. A typical case offered by opponents of the convention in which justice would allegedly be obstructed is this: A man commits several atrocious homicides and is accused of genocide and put on trial in Federal court. The court finds no "genocidal intent" and thus acquits. State courts are then powerless to try the murderer because of the prohibition of double jeopardy in the Constitution, and the murderer goes free because of the initial mistake in assigning jurisdiction.

There are several answers to this argument. One is that it overstates the likelihood of such confusion. Since the convention is non-self-executing in view of the requirement of article V to enact the necessary implementing legislation, no procedures to deal with these cases have yet been devised. The United States, according to the administration, will not deposit its ratification of the treaty before such implementing legislation is enacted, so these objections are moot at this point. We can presume, for instance, that implementing legislation would countenance the possibility of such problems as mentioned earlier by reserving the rights of the States to prosecute and punish as homicides those acts described in the Genocide Convention. In such a case, then, Federal charges of genocide would be brought only when the intent was clear; when the intent was not clear, proper and prudent prosecution would dictate that indictment be sought under State laws against simple homicide.

Furthermore, the alleged proscription of consecutive Federal and State trials for genocide and homicide under the double-jeopardy clause of the Constitution is open to doubt.

Also, it is clear that opponents of the convention are again indulging in hypothetical hyperbole by exaggerating the importance of cases which are most unlikely to arise.

Mr. President, it is time we affirm our stand against genocide by ratifying this convention.

ROLE OF THE SENATE COMMITTEE ON AGING

Mr. CHURCH. Mr. President, the Special Committee on Aging has been charged by the Senate with the responsibility of keeping watch over all Federal

activities related to aging, issuing recommendations, and then helping to make those recommendations become realities.

It is a demanding assignment, but a very necessary one. As chairman of that committee, I can attest to the very wide range of subjects which receive its attention. Within recent weeks, we have dealt at hearings with such subjects as the present and future of our social security systems, fires in highrise apartment houses for the elderly, administration proposals to raise costs paid by participants in the medicare program, and social service programs for the elderly.

Our interests are so numerous and diversified that we must select priority areas for our attention, but nevertheless we must somehow keep tabs on all that is happening.

A concise, but incisive, account of the committee's work is described in the March-April journals of the National Retired Teachers Association and the American Association of Retired Persons. Mr. Cyril F. Brickfield, legislative counsel for NRTA-AARP, is the author of the article, and he has done a splendid job of describing the committee. He also sums up the purposes of this year's major effort, hearings on "Future Directions in Social Security."

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

OUR SENATE FRIENDS (By Cyril F. Brickfield)

Many government bodies are working today for the interests of America's older citizens, but none more so than the Senate Special Committee on Aging. Established in 1961, the Committee is responsible for identifying and studying the special needs and problems of older persons and for making recommendations to the Senate based on its findings.

The Committee on Aging is not a legislative committee. Instead, it gathers the information needed by other committees when they write legislation affecting older persons.

A recent study described the role of the committee thus:

First, the committee proposes legislation to other committees in the Senate. It gathers information, analyzes possible solutions and presents data to show that legislation is needed.

Second, the committee works in the Senate to achieve passage of legislation benefiting older persons. It holds hearings to publicize the need for legislation and works to gather support among the Senators and the general public.

Third, the committee serves as a watchdog for the interests of persons over 65. It attempts to insure that the special needs of older persons are considered whenever legislation is enacted on any issue that might affect them.

For example, when housing legislation was considered in the Senate during 1972, committee members worked to include special provisions benefiting older persons. Senator Charles Percy of Illinois, who is a member of both the Special Committee on Aging and the Senate committee that considers housing legislation, was particularly active. He pressed especially for a provision to establish the office of Assistant Secretary on Housing for the Elderly. This official would be responsible for meeting the needs of older persons in the area of housing.

In addition, the committee oversees the

activities of the Executive Branch to determine the effectiveness of Federal programs for older persons.

The Special Committee on Aging, with 22 members—13 Democrats and 9 Republicans—is one of the largest committees in the Senate. The committee is divided into seven subcommittees. The areas they study are consumer problems; employment and retirement income; Federal-state-community services; health; housing; long-term care and retirement.

During the 92nd Congress, the members of the committee worked to promote legislation in each of these seven areas. The 20 members of the committee are particularly effective as advocates for the interests of older persons in their role as members of other Senate committees.

With the enactment of HR 1 and of the 20 per cent benefit increase measure during 1972, sweeping changes have been brought to the Social Security system. Committee Chairman Frank Church of Idaho ranks these changes as second only to the achievements of 1935, when the original Social Security Law was passed, and 1965, when the Medicare system was established.

With this in mind, the committee in the 93rd Congress has begun a new series of hearings on "Future Directions in Social Security."

"Our goal," says Senator Church, "is to take a reflective look at the significance of recent accomplishments as well as actions that must ultimately be taken to build upon those accomplishments."

Experts in the field of Social Security will present their views on how the Social Security system can be improved, how Medicare coverage can be expanded and how these improvements should be financed. Representatives of our Association will also testify at these hearings.

To date, attempts to establish a similar Committee on Aging in the House of Representatives have not been successful. The need for such a committee is clear, and its usefulness has been amply demonstrated by the important role played by the Senate Special Committee on Aging. Our Association has long urged the establishment of a Special Committee on Aging in the House; this will continue to be one of our major legislative objectives in 1973.

TAX RELIEF FOR SMALL BUSINESSMEN

Mr. SPARKMAN. Mr. President, I wish to note my cosponsorship and strong support of the small business tax simplification and reform bill introduced recently by the distinguished chairman of the Select Committee on Small Business (Mr. BIBLE).

For many years I have been active in the effort to gain meaningful tax relief for the many small businessmen of my State of Alabama and throughout the Nation. See, for instance, "Time for Congress to consider tax relief for Small Business," remarks which I made on the Senate floor, appearing in the CONGRESSIONAL RECORD, volume 117, part 11, pages 14343-14344.

During 1972, I met with leading members of the tax-legislation-writing House Ways and Means Committee to see what might be done to advance the cause of small business tax relief.

I have been active in the field of small business for the past 22 years. I was especially pleased to have had a part in guiding into law the Small Business Tax Act of 1958.

The Small Business Committee realized that the small business tax changes in the Internal Revenue Code of 1954 were helpful but not broad enough to remove many discriminatory features in the tax laws. So, we renewed our work in the tax field in 1955. For example, a graduated corporate income tax was proposed to the Congress in 1956 and 1957. In the fall of 1957, I directed the committee to conduct a major, nationwide investigation of small business tax problems. The investigation, more extensive even than the 1952 investigation, was concluded in December 1957.

In January 1958, I submitted the committee's tax report to the Senate and introduced a seven-point small business tax adjustment bill. In February, I appeared before the House Ways and Means Committee to testify in behalf of this bill. The bill that was passed by Congress in the summer contained four of the seven proposals in my bill and two other features that were endorsed by me and some other committee members.

Special features of the tax bill were:

First, the tax option permitting owners of small, closely held corporations to choose to be taxed as partners.

Second, the plowback provision, permitting 20-percent additional depreciation in the year of an asset's purchase. This was applied to used as well as new equipment and, therefore, endorsed a fifth recommendation of mine for equal tax depreciation treatment for new equipment and the used equipment so frequently purchased only by small firms.

Third, the estate tax option, permitting 10-year installment payment of estate taxes on family-run business assets.

Fourth, an increase in the minimum accumulated earnings credit of use to small corporations from \$60,000 to \$100,000. This means small firms which previously did not have to prove that a \$60,000 earnings surplus was reasonable would, under the new law, not have to prove reasonableness on as much as \$100,000.

No less an authority than financial writer Sylvia Porter termed the committee accomplishments for small business in 1958 "an impressive package of aid to small business."

I as very pleased to join with Senator BIBLE to cosponsor the Tax Simplification Act when it was first introduced in 1970. I feel that the Senator from Nevada is entitled to a great deal of credit for developing over the past 6 years what is the most comprehensive proposal for small business tax reform which has ever come before the Congress.

I am glad that the Senator has not become discouraged. It sometimes takes many years for a good bill to work its way through Congress and be enacted into law. I hope that the Bible-Evins bill has now become one of those pieces of legislation "whose time has come."

Many of the time-honored ideas about the American economy are now being changed. We have witnessed two revaluations of the American dollar in the past 14 months, and a trade deficit of \$6 billion in 1972—the worst trade performance since the 19th century. We have witnessed inflation so severe that price

controls were required, and the threat of renewed inflation clouds the economy again in 1973.

It seems to me this kind of economic performance is sending us a message, and we in Congress and in the executive branch of Government should be receptive to this message—that many of our fundamental economic policies need to be overhauled.

The area of taxation is, I believe, one where the adverse results to small business as a result of Federal, State, and local taxation and reporting requirements have accumulated over the years.

We do not expect a 2-month-old baby or a 2-year-old child to measure up to the same standards as an adult. Yet according to excellent hearings on paperwork conducted by the Senator from New Hampshire (Mr. McINTYRE), we expect a family restaurant business to pay the same \$800 in accounting fees as the 20-year-old restaurant, just to fill out government forms during its first year, whether it earns a dime's worth of profits or not.

The infant corporation is immediately subject to a 22-percent Federal tax rate. If the company earns a bit more than \$500 a week, it must pay Federal tax at the same statutory rate as a billion dollar a year profit corporation which earns 40,000 times as much.

According to the figures cited by the Senator from Nevada (Mr. BIBLE) burdens on small- and medium-sized business continue and intensify as the firm grows to maturity and attempts to preserve its independence when its founder dies or wishes to retire.

It seems to me the time has come to ask whether it is wise or fair for small corporations to pay taxes at double the rate of large corporations.

It has always seemed to me that a small owner-operated business has a vested interest in efficiency and productivity. I have felt that where a man's pride as well as his dollars are involved, he has a double incentive for good workmanship and good service to his customers. Traditionally, small and new firms have given us the innovation and flexibility to develop new products which make this country more competitive internationally. These are factors that keep prices down and keep quality up. Small businesses also keep our economy open for young people, and hardworking people, and people with better ideas. I therefore think we must ask whether a tax system which penalizes small business and rewards larger corporations is helping or hindering the Nation in reaching the economic goals which we all desire.

Small businesses—about 12 million businesses of them in the country—can be a large force in the economy if they receive equitable tax treatment. They are 97½ percent of all businesses and they account for 44 percent of total employment and more than one-third of the gross national product. I think it is remarkable that small firms, with all of the handicaps they have been carrying, have been able to do so much.

I hope it will be possible that this bill and other small business tax bills, which

have or soon will be introduced, be taken up as vehicles for considering the tax needs of small business in a systematic manner. I hope this will lead this 93d Congress to write into the law some practical and meaningful help for hard-pressed, new, small family, local, and independent business enterprises in Alabama and across the country so they may contribute to America's future as they have to its past.

THE OIL CRISIS

Mr. MONDALE. Mr. President, the public debate over the oil crisis which has manifested itself this past winter continues to intensify. Now that the coldest part of the winter is over, we face another potential crisis, this time in gasoline supplies.

Our Nation cannot continue to move from crisis to crisis. We need a comprehensive energy policy which takes into account the needs of consumers and the environment, as well as the urgent requirements for better and more reliable sources of energy.

The Midwest and Eastern States have been starved for energy resources, and will continue to be in difficulty unless changes are made. We in these sections of the country desperately need the oil and natural gas resources of the North Slope of Alaska. It is my firm belief that these resources can be delivered by a trans-Canadian pipeline with no greater delay than that which would result from a trans-Alaskan pipeline. In addition, such a pipeline would help to dramatically reduce currently inflated fuel prices in the Midwest and East.

The Alaskan oil and gas resources, however, are merely one facet of the much broader need for a comprehensive energy policy. Certainly, this need is greatest to help solve the near-term scarcity problems which cannot wait for the many possible long-term solutions in this field.

Mr. President, the St. Paul Pioneer Press recently published an editorial which accurately and wisely assessed the need for such an energy policy. This editorial urges vigorous congressional debate over the contours of our Nation's energy policy, and stresses the importance of developing such a policy as quickly as possible. I believe it presents a balanced and needed view of the need for rapid but effective action to meet our Nation's energy needs.

I ask unanimous consent that the Pioneer Press editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

NEW OIL POLICIES NEEDED

While the public is bombarded almost daily with pessimistic predictions of shortages in natural gas, gasoline and fuel oil there is a scarcity of specific programs for improving conditions, other than to permit big price increases in the petroleum industry.

President Nixon has promised a comprehensive message on energy problems, but it has not yet appeared. It would be most helpful if the Administration would produce its program without further delay. Its own

policies on restrictive oil import quotas since 1969 were a factor in permitting recent Midwest fuel oil shortages to develop. Congress and the public should now be given the Administration's specific recommendations for new programs.

A variety of proposals are pending in Congress. Sen. Thomas McIntyre, D-N.H., has a bill to abolish oil import quotas and substitute a tariff system which would permit greater competition and presumably increase supplies and lower or stabilize prices. In 1970 a Cabinet level task force of the Administration recommended this approach, but the proposal was discarded, apparently after opposition from the oil industry. This approach should be revived by congressional action.

Sen. Walter Mondale, D-Minn., and Rep. Les Aspin, D-Wis., have introduced a bill favoring construction of a trans-Canada pipeline to bring Alaskan oil to the Midwest. This is an alternative to the proposed trans-Alaska pipeline which would deliver the oil to the Pacific Coast, a region which already has adequate supplies. Mondale and Aspin charge that the trans-Alaska project "would keep Midwestern and Eastern fuel prices high and jack them up higher when oil supplies run low in the future."

Meanwhile, although the U.S. oil industry complains that no new refineries are being built in this country, plans have just been announced for establishing a \$300 million refinery in eastern Canada. Two other big new refineries already are in process of development in the same region. One in Nova Scotia will be completed in August and the other will start construction in May. All three are planned to refine crude oil from foreign sources.

The United States needs an overall program for dealing with its immediate, short-range oil scarcity problems. The Administration should produce its own recommendations, which then can be debated in Congress along with other proposals. And ways should be found to overcome the delays in plans for making Alaskan oil supplies available in the Midwest at the earliest possible time. Environmental considerations are important, but the necessity for bringing Alaska oil to American users is paramount.

FARMERS FEAR CROP SURPLUS

Mr. CHURCH, Mr. President, American housewives continue to agonize, and justifiably so, over the unending upward spiral in food prices. At the same time, farmers enjoyed their best income year in nearly two decades. Unfortunately, the combination of these two factors facilitates the conclusion that the American farmer is the bandit at the supermarket. Informing the American public that the realized net farm income for 1972 was still only about 10 percent above 1947 and that during this same period of time—1947 to 1972—corporate profits rose 250 percent is no medication for the deep cuts that are being made in every food budget. The plain truth is however, that the farmer receives only 40 cents out of every dollar that is spent at the grocery store. The other 60 cents disappears between the farm gate and the checkout counter.

While he is unfairly criticized by the hard-pressed consumer, the farmer is also feeling the razor's edge of the budget cutter's knife. The Nixon administration proposes to trim agriculture and rural programs by \$1.5 billion. The primary reason given for these budget cuts by Mr. Butz is that the farmer's income

has never been so high. Mr. David Mutch of the Christian Science Monitor recently provided the readers of the Washington Post with an informative analysis of the genuine fears of farmers that 1972 gains can be wiped out in 1973. I commend this article to my colleagues as a concise explanation of both the faulty assumptions that could quickly wipe out any gains made and the revealing relationship between the farmer's costs and his returns.

I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FARMERS FEAR CROP SURPLUS—IT COULD DROP 1973 PRICES FASTER THAN 1972 GAINS

(By David Mutch)

CHICAGO.—While housewives fret about food prices going through the roof, American farmers worry about crop prices going through the floor.

How can it be, the consumer asks, knowing that, in 1972, farmers had the best year in 20 years, with net farm income up by \$3.1 billion over 1971's \$16.1 billion.

Here is how farmer Vere Vollmers of Wheaton, Minn., explains it: "President Nixon's farm policies are a gamble that Russia will have another crop failure. He's put about 40 million acres of idle land back into production and wants to end subsidy payments on wheat, feed grain, and cotton, and other crops."

"Basically, the idea of the farmer earning his money from the marketplace is good, but Nixon's plans allow no provision for the government to step in if there is a crop surplus. And so prices could drop faster than they went up this year."

The President says his policies are aimed at cutting the food-price rise, expected to be 6 per cent in 1973.

Vollmers sees the same problem farmers in the U.S. have seen for more than 40 years: Food production is so vigorous in America that overproduction and consequent deflated prices hang constantly over their heads like the sword of Damocles. They see their economic happiness hanging by a hair whenever the government threatens to withdraw its pervasive support in favor of a free market.

The actual volume of farm marketings last year was barely larger than in 1971—it was higher prices and government payments that raised farm income. Therefore, a larger crop in 1973 is easily achievable.

Last year, the billion-dollar wheat sale to the Soviet Union mopped up a grain surplus, with the Russians getting a bargain price. Already, there are reports from Moscow that the weather looks better this year and that Soviet officials will not commit themselves early to large purchases of American wheat. Hence, planning in this country to avoid supply fluctuations is not yet possible.

At the same time, acreage goes up in this country and government payments to farmers are expected to drop by \$1 billion—a record—from \$4 billion last year. These factors, plus the high prices farmers in general received last year for their crops, could combine to produce a damagingly large surplus, many experts are beginning to say.

This point was made in a recent study by C. Edward Harshbarger for the Federal Reserve Bank of Kansas City, Mo. In that study, he warned that the "wheel of fortune in agriculture is a capricious device that is capable of producing sudden changes with little or no warning."

Farmers interviewed by the Christian Science Monitor News Service agree with another conclusion drawn by Dr. Harshbarger:

Production costs—for fertilizer, fuel, equipment and credit—have risen much faster than farm income for years and, if farmers push up the crop supply this year, production costs will rise even faster.

Balancing the concern of oversupply are the growing population and improved eating habits in this country as well as demands by consumers elsewhere, such as in Russia, Japan and Europe, for better diets. China, too, may become a large importer of U.S. agricultural goods. All of this bodes well for keeping demand for U.S. agricultural products strong. Exports are more than \$11 billion in this sector, a figure few would have believed possible only three or four years ago. Certainly, the U.S. balance of trade needs this help.

Farmers are as upset about the President's cuts in farm supports as are big city mayors about cuts in the poverty programs. Vollmers had a bad year due to spring floods and then found a loan program dropped just before he applied. Some of his neighbors got in just under the wire. He is also very concerned that, if the soil-conservation program is dropped, it will hurt the next generation of farmers worse than this one.

Bobby Grueben, a cotton farmer from Rotan, Tex., said that, if subsidy payments are dropped, all cotton farmers in the U.S. "will be put out of business."

Here is how he explains it: "The Department of Agriculture estimates that it costs a minimum of 32 cents a pound to produce cotton. Last year, I got 20½ cents a pound on the market and the subsidy brought it up to 35 cents, with a profit of only 3 cents a pound."

Grueben and Vollmers, along with other farmers, were in Washington recently to testify before Sen. Herman E. Talmadge's Senate Agriculture Committee. Senator Talmadge (D) of Georgia is highly critical of President Nixon's farm proposals. Grueben says he talked to a farmer from South Dakota who had thought "the subsidy for cotton was making us rich in Texas. So you see, even other farmers don't understand the subsidy program."

Consumers should—but don't—understand the economic position of farmers. In 20 years, the prices farmers get for crops have gone up only by 11 per cent, while retail food prices have gone up by 46 per cent. Sixty per cent of the family food dollar goes to transporting, processing and distributing food, and these sectors have risen fastest; in the same period, salaries of industrial workers went up by 129 per cent; food-marketing employees, 148 per cent. Farm costs in 20 years went up by 109 per cent, while taxes went up by 297 per cent.

NEW SCHOOL OF SOCIAL RESEARCH CENTER FOR NEW YORK CITY AFFAIRS

Mr. JAVITS, Mr. President, on Monday, March 19, 1973, I had the great honor of delivering an address before the New School of Social Research of the Center for New York City Affairs.

The Center for New York City Affairs, which is directed by Dean Henry Cohen and governed by a very distinguished board of directors, grew out of a rescue mission in the 1930's, when 167 European scholars, imperiled by totalitarian governments, were brought here by the university-in-exile program.

The new school sees adult education as its basic goal and provides a wide range of courses in the areas of education, the arts, and other areas. It is currently conducting a 2-year program leading to a master of arts degree in manpower

development; approximately 80 graduate students are now enrolled in this course, which will be so crucial to the future success of manpower policy.

The Subcommittee on Employment, Manpower, and Poverty of the Senate Committee on Labor and Public Welfare, of which I am the ranking minority member, is now considering comprehensive manpower legislation and my address sets forth in some detail my views with respect thereto. I ask unanimous consent that there be printed in the *RECORD* at this time a copy of my prepared remarks for that occasion together with a description of the 2-year program in manpower development which I mentioned.

There being no objection, the remarks and description were ordered to be printed in the *RECORD*, as follows:

FUTURE OF NATIONAL MANPOWER POLICY

The school has always been at the "cutting edge" of social change and I am most honored to be asked to participate in this meeting and to share my views with you on the "Future of National Manpower Policy".

At the present time the "cutting edge" is especially sharp, not only in the social sciences, but in politics, as the Administration moves quickly to attempt to implement what it considers to be the necessary reforms of the "Great Society" and other programs; these are very challenging times in the Congress for those of us who welcome change, but believe that it need not be carried out either abruptly or with such apparent disregard for the legislative branch.

Manpower training, like many other efforts that have found impetus in the war against poverty, is in the center of the action.

THE CURRENT SITUATION

One might ask the threshold question whether there is to be any "future" at all for manpower policy given the threats of the Administration last year to abandon manpower training altogether, the failure of the last Congress and the Administration to agree on comprehensive reform legislation, the "on again, off again" nature of recent federal administrative action—with freezes and rescissions—and the Administration's fiscal year 1974 budget for manpower training which dropped from \$1.6 billion in fiscal year 1972 to \$1.2 billion in fiscal year 1974—a cut of 25%.

The great shame is that as the Administration moves toward its goals of managerial efficiency, decentralization, and maximum benefit to the recipients in social programs, it is creating in the interim an almost intolerable situation marked by administrative chaos, undermining of the ability of State and local government to plan effectively, and the resulting "shortstopping" of benefits to the intended recipients.

To give you a startling example, the Administration began this fiscal year by requesting \$256.5 million for the funding of 575,000 opportunities in the Neighborhood Youth Corps summer program, a program that provides work experience during the summer months for disadvantaged teenagers. A number of us have placed the need much higher; based on a survey conducted at my request by the National League of Cities—U.S. Conference of Mayors, \$505.0 million is needed for a little over a million opportunities.

Joined by 26 Senators, I advised the Administration to that effect.

Now, the Administration has requested "rescission" of its original request so that no funds at all will be provided for the summer program, and States and cities are urged instead to meet the needs of youth by raiding funds for the Emergency Em-

ployment Act which were never intended for that purpose.

As this cannot be resolved for a number of weeks when we will seek these funds under a supplemental appropriations bill—which I shall do—planners are put into complete "limbo" with respect to the Neighborhood Youth Corps program and the public employment program both and the poor suffer.

COMPREHENSIVE MANPOWER TRAINING REFORM

These and other disrupting actions arise principally from the determination of the Administration to "go it alone" with respect to accomplishing manpower reform, that is, decentralization, decategorization, and consolidation of existing efforts but by administrative action alone.

This is most unfortunate and ironical because at the very same time that the Administration has abandoned its own "manpower revenue sharing" as a legislative proposal, the Congress stands ready to adopt that general approach. Indeed, Senator Nelson, Chairman of the Subcommittee on Employment, Manpower and Poverty and I intend to introduce in the next few weeks a proposal along those lines. Similar action may be expected in the House.

The basic difference between the Administration's approach and the one we will offer lies not in decentralization, decategorization or consolidation, but in what the federal role should be after these goals are generally achieved.

The Administration's proposals for special revenue sharing proceed on the assumption that States and cities are entitled to funds in almost any event.

We view shared funds as "trust funds" granted by the Federal government to States and cities as trustees charged with the duty of expending them wisely for the poor, the unemployed and the underemployed.

The federal government should not be in the position to tell the States, cities and counties what particular investments to make—that is the essence of decentralization and decategorization.

But the Federal government should guarantee that the funds are spent for the intended beneficiaries, that investments are generally prudent, and that they do not find their way directly or indirectly into the pocket of the "trustees"—the formal sponsor—generally a State or local unit of government or its nominee.

Translating these principles into the manpower area, respectively our bill will include very tough criteria to ensure coverage of the most disadvantaged, investments in programs where there is a job at the end of training, and criteria to ensure that worthwhile efforts now conducted by non-profit agencies—such as community action agencies—are not squeezed out by programs that serve only to build up the prime sponsor.

Accordingly, we propose that if the "trustee" fails in any of these respects, then the federal government may revoke the trust and find some other agency or organization to do the job that needs to be done, or do it itself, as it does now.

There is no matter of higher priority than manpower reform, and I hope very much that the Administration will join with us in accomplishing this item of "unfinished business" with a new legislative mandate that these efforts deserve.

But manpower training reform—as essential as it is—does not give us a national manpower policy; it is in essence a matter of "recycling" efforts of the past into new and more flexible containers.

To determine a national manpower policy, it will be necessary to look to options in respect to both the public and private sector that address themselves to the matter of "full employment" generally.

PERMANENT PUBLIC SERVICE EMPLOYMENT

There are many distinguished experts who want to wipe out all manpower problems and reach full employment through a massive program of guaranteed work relying on "permanent" public service employment. One of the advocates of this approach, the Socialist leader, Michael Harrington, wrote in the *New York Times Magazine* on March 26, 1972:

"There should be a formal Federal guarantee of a right to work for every employable citizen. . . . The right to work would operate in two ways: negatively in that the Government would be obliged to offer meaningful employment to all those who cannot find it in the private sector (this is employer of the last resort); positively in that the Government should undertake comprehensive manpower planning and wherever indicated establish itself as an employer of the first resort."

In the Congress, proposals have been introduced authorizing the appropriation of as much as \$9.0 billion annually for 1¼ million public service jobs.

In the long term, this approach may be the basis of a great leap to full employment, but let us not fool ourselves; it is not "in the cards" right now. We will not get that kind of fiscal commitment from either the Congress or the Executive in these times.

Even if we could it would be fraught with the danger that our manpower objectives would be lost in a form of "disguised revenue sharing" benefiting governments more than individuals.

TRANSITIONAL PUBLIC SERVICE EMPLOYMENT

But to say that a large scale permanent public service employment program is not imminent does not mean that we should abandon the commitment made to "transitional public service employment" under the Emergency Employment Act of 1971, which I co-authored with Senator Gaylord Nelson.

The Administration's posture is that the Act which authorized \$1.25 billion and created 228,000 jobs in fiscal 1973 should not be continued beyond its expiration in June; no funds are contained in the fiscal 1974 budget for that purpose.

This position is entirely inconsistent with the Administration's previous approach to public service employment—unrealistic in terms of the present situation, and a lost opportunity in respect to the future of manpower policy generally.

It is inconsistent with the President's approach because President Nixon on December 15, 1970, in vetoing a permanent public service employment program said:

"Transitional and short-term public service employment can be a useful component of the nation's manpower policies."

We tailored the Emergency Employment Act in response to that concept.

The employment under the Emergency Employment Act is as short-term as the Administration could expect because of the \$1.25 authorized, \$1.0 billion is available only if unemployment is above the 4.5 percent level, the very threshold that the Administration chose in its first proposal for triggered funds.

It is a most unrealistic position because unemployment is still at the 5 percent level with more than four million unemployed. The Administration need only come to this City and walk through many of its depressed areas to realize that this program—which is really a "crumb" compared with the overwhelming needs—is generally needed.

It represents a lost opportunity because I believe that the Emergency Employment Act could, in the context of an extension, be used as a vehicle to test out the use of transitional public service employment in meeting the needs of particular groups where the Administration, in its own manpower report, expresses great concern.

The key word in the Emergency Employment Act has been "transitional", that is that jobs are to lead to "regular" employment in the public or private sector.

If the Administration is not comfortable with a general job creation program, then I recommend that it consider supporting extension of the Act with particular attention to groups of the potential labor force, where the term "transitional" has the most meaning, and where the needs are most pressing.

First, the transition from school to the world of work. In fiscal 1971, the Nation expended a total of almost \$48.0 billion for elementary and secondary education; we spend almost \$7,000 for the education of each child finishing the 11th grade.

But as large as our commitment has been, it has not been completely successful. Education is not an end in itself, its purposes are frustrated if it does not lead to the opportunity to lead a productive and meaningful life. Nothing is more depressing and inconsistent with the "American dream" and "work ethic" than the fact that unemployment among teenagers ranges from two to six times the national norm, reaching 30%-40% in poverty areas. 541,000 young persons, 16-19 years of age were out of school and out of work last year.

In contrast, only 16 percent of the current enrollees under the Emergency Employment Act are disadvantaged youth under 21; while 70 percent are aged 22 to 44. Thus, we are still left with what the Manpower Report of the President has described as the "critical problem" of youth unemployment. This record must be improved under any extension of the EEA, and the educational establishment must be brought into it more than under the current authority.

Second, the transition from the Armed Services to work. Under the EEA, 43 percent of the participants have been veterans, 27 percent from Vietnam. But there are now over 300,000 veterans from Vietnam still unemployed and clearly even more attention can and must be given to this deserving group.

Third, the transition from the welfare rolls to work. It is a national malady that in contrast to our "workfare" rhetoric, we provided in this past fiscal year only 43,600 public service jobs for welfare recipients under the EEA and the Work Incentive programs conducted under the Social Security Act; in fact only one in ten of EEA participants were on welfare. In contrast the Department of Labor estimates that one to two million of the 12 million persons on welfare fall into the "employable" category. Indeed, the President's own welfare reform measure of last year, H.R. 1 as passed by the House, would have provided for the creation of 200,000 additional transitional public service jobs. The fact that the vehicle, H.R. 1, has stalled on the road does not negate the necessity of providing for that quotient in a new context; the EEA provides that context.

Fourth, the transition from national correctional institutions to the world at large. Each year more than 100,000 previously incarcerated leave State, federal or local correctional institutions and begin their search for employment and a productive life.

Ex-offenders have levels of unemployment three times the national norm. Two-thirds return to prison. At the present time, the number of public service jobs made available to offenders is so minuscule that there is no data on it.

A quotient of EEA funds must be used for this purpose as a model to show private employers as well as the public generally that the ex-offender can serve well as a regular employee.

Finally, the transition from manpower training to regular employment. Training should be designed to lead to a job. But 500,000 persons leave training each year without a job lined up and for many, a transitional employment opportunity may

be the necessary bridge between institutional and other training and regular employment.

With this emphasis to be considered along with manpower training reforms, I hope very much that the Administration will join with the Congress in an extension of the EEA, to that end, Senator Nelson and I intend to introduce, as a separate measure, a two year extension to be considered along with manpower training reform and in the process of consideration, I hope to focus it on the elements I have emphasized.

THE PRIVATE SECTOR

But again, let us not deceive ourselves. Public service employment, whether transitional or permanent, cannot be viewed as a "cure-all"; it is merely a tool in a broader national manpower policy.

The fact is that even if we doubled the authority under the Emergency Employment Act, the 440,000 jobs created would be but .5 percent of the 87.3 million persons employed annually.

The private sector is in essence the employer of both first and last resort and if we do not learn to run that sector in the interest of national manpower objectives then we might as well give up now.

Strengthening the economy, as the President has stressed, must continue to be one of our key objectives.

And we must continue on with successful efforts such as the JOBS program conducted by the National Alliance of Businessmen, and with tax credits, as now are available under the Talmadge Amendment to the Social Security Act.

But these are not enough in themselves and it is time that we developed new vehicles and initiatives to ensure that the private sector is operating to the maximum extent possible in the interest of a full employment policy.

Three new approaches should be considered:

First, I recommend that we establish a federal board or commission to put "teeth" into the concept of full employment, particularly in respect to the private sector.

We have no agency at the present time which may serve adequately and forcefully as an "advocate" for full employment. The Council of Economic Advisers established under the "Full Employment Act of 1946" has been given a broader, and wholly advisory function; its responsibility is to oversee the general economy, it should not and cannot be an advocate for full employment alone and it has not been.

Neither can the National Commission on Productivity serve that function, as it too, has a related but different focus.

The Department of Labor, while generally entrusted with the goal of full employment has no charter to make recommendations with respect to the many programs outside of its jurisdiction.

Today the Government has a whole range of powerful tools available to it to help control the economy and insure that employment goals are reached. Budgetary policy, tax policy, procurement policy, the timing and location of public works, control of interest rates, foreign trade and investment policy, and wage and price controls as well as manpower training programs, are all powerful levers on employment levels.

It is about time that we started pulling those levers in a planned way so as to achieve and maintain full employment as well as price stability.

Importantly, such a board could undertake manpower planning and long-range and short-term surveys, including a review of decisions of public and private employers as they effect full employment.

S. 3927 "The Full Employment and Job Development Act of 1972" which I introduced in the last Congress with 14 co-sponsors to establish such a Board will be re-

introduced shortly for consideration in this Congress.

Second, we should begin to develop a policy of continuing education as an employer responsibility. We are clearly way behind the European nations such as France and Germany, in making it possible for all workers to adapt to technological changes through continued education. As indicated in "Work in America", a study prepared by the Department of Health, Education and Welfare: "Many Americans may want to enlarge their choices through additional education and training."

Possibilities in reacting to these needs—following the European models—include funding from a kind of payroll tax, or unemployment insurance fund, or providing incentives for actions taken on by the employer, in concert with the educational establishment.

Third, an unexplored area in the manpower field which leans heavily on the private sector is the use of vouchers for the purchase of manpower training and related employment opportunities.

This is particularly useful in terms of the problems of youth employment. We now give scholarships with federal assistance to those who pursue higher education; more than a billion dollars was loaned to 1.2 million students last year under the guaranteed student loan program, there is no reason why a voucher system could not be used as a "work scholarship" for youth who need it in order to enter the labor market. This follows similar experiments in education and housing. Thus, in this controlled way we can experiment with direct subsidies to private employers.

I plan to introduce separate legislation in the near future to advance this concept.

In conclusion, while I have broken down this presentation in terms of the public and private sectors, whether or not we have a national manpower policy will depend to a large extent on the bridge between the two. We need to bring the private sector into the prisons; educational experts should join with manpower experts in addressing the problem of youth unemployment, and the future of public service employment may well depend upon the extent to which the private sector begins to draw on the new experienced manpower pool created through public service employment programs. Working together, I hope that we can build a new national manpower policy which will benefit our great strength as a Nation and be compatible with both the tenets of the free enterprise system and the further social commitment which these times dictate.

A 2-YEAR PROGRAM OF PART-TIME STUDY LEADING TO THE MASTER OF ARTS DEGREE IN MANPOWER DEVELOPMENT CENTER FOR NEW YORK CITY AFFAIRS

This new graduate degree program has been designed to meet the growing need of the manpower profession for highly trained and skilled personnel in administration, planning and training.

Manpower Development is a new profession. Its evolution parallels a quarter-century of Federal legislation aimed at combating unemployment and poverty. The Full Employment Act of 1946; the Vocational Education Acts of 1946, 1963, and 1968; the first Manpower Development and Training Act of 1962 (which gave the field its name); the War on Poverty in the mid-60's, and the spate of educational legislation enacted in the 60's and 70's—all contributed to the growth of a vast network of public and private organizations devoted to job development and training, and to the creation of greater employment opportunities for the poor, the unskilled, the illiterate and the under-educated.

As part of a local, regional or national effort to meet the needs of the labor force,

the manpower practitioner engages in a variety of vital tasks, among them job training, vocational guidance, testing and assessment, job development, job placement and follow-up counseling, as well as overall manpower planning, analysis, and administration.

There is a critical need to strengthen performance and to prepare people to assume positions of leadership in the field. A continuing need for manpower professionals has developed in government agencies, educational institutions, community organizations, labor and private industry. They are required at every level of operations, and there is a particularly significant shortage of trained planners and administrators capable of formulating long-term manpower policy of local, regional or national scope.

The need for professionals with graduate preparation will become even more critical in the 70's as Federal commitments to the eradication of unemployment are intensified. Congressional appropriations for manpower development and training amounted to 500 million dollars in 1962; they will exceed 4½ billion dollars in 1972, and may reach 10 billion dollars by 1975.

The establishment of this graduate degree program in Manpower Development has been made possible by the Louis Calder Foundation.

THE NEW SCHOOL

The new MA program in manpower development extends the rare tradition of educational innovation which has characterized the New School for Social Research throughout its history. Established in 1919, The New School was the first American university to evolve out of a deep commitment to meeting the intellectual and professional needs of mature citizens. This commitment has given birth to a variety of courses and programs designed to help the working professional increase his competency.

From its earliest years on, The New School program has included courses of interest to practitioners in urban related professions. In the inaugural year of 1919, the institution offered a course on municipal government, and in the 1930's it became the first school to introduce courses on housing. In the 1960's, The New School developed within the Center for New York City Affairs the nation's largest and most diversified program of urban studies for both professionals and laymen.

The New School is a diversified urban university offering a variety of day and evening programs of undergraduate, graduate and adult education. In addition to the Center for New York City Affairs, its major divisions are the Adult Division, the Graduate Faculty of Political and Social Sciences, the Senior College (an undergraduate liberal arts college), and Parsons School of Design.

THE CENTER FOR NEW YORK CITY AFFAIRS

New York's high intensity of urban problems and concentration of leadership and expertise are invaluable resources for education in urban affairs. The Center for New York City Affairs, established in 1964, utilizes these unique resources in educational, research, and community service programs which focus on, but transcend the bounds of the metropolitan region. The location of the Department of Manpower Development within the Center assures students of the availability of these resources to their preparation for manpower policy roles. It offers them advantageous proximity to research, action programs, forums, publications and lectures on pressing city problems. It places them within an urban educational community that is rich with relevant ideas and high level dialogue and debate.

In addition to this degree program, the Center offers a MA degree program in Urban Affairs and Policy Analysis.

SETTING THE RECORD STRAIGHT ON TAX REFORM, MORTGAGE INTEREST DEDUCTIONS, CHARITABLE CONTRIBUTIONS DEDUCTIONS, AND THE LITTLE GUY

Mr. CHURCH. Mr. President, recently on the ABC network news show, "Issues and Answers," Presidential Adviser John D. Ehrlichman said, in effect, that the only way to raise more tax revenue was to tax the little guy. Now that may be Mr. Ehrlichman's opinion, indeed, with the largesse this administration bestows upon big businesses such as the Penn Central Railroad and Lockheed Aircraft, it undoubtedly is Mr. Ehrlichman's opinion. Unfortunately for Mr. Ehrlichman, but fortunately for the American taxpayer, this opinion has no basis in fact.

In the Washington Post of March 15, 1973, Mr. Hobart Rowen points out where additional revenue could be raised by closing tax loopholes that are anything but beneficial to the average taxpayer.

I think its time that the Nixon administration stopped using scare tactics to head off the long needed move for tax reform that is currently underway in the Congress. Mr. Rowen's column goes a long way toward clearing up the distorted picture that Mr. Ehrlichman painted for the average American taxpayer last week. I ask unanimous consent that Mr. Rowen's article entitled "Loopholes and Little Guys" appear at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LOOHPHOLES AND LITTLE GUYS

(By Hobart Rowen)

On ABC's "Issues and Answers" last Sunday, presidential aide John D. Ehrlichman said that "there is a lot of misinformation around in this business of tax loopholes," and then he did his best to spread some more of it around.

The basic point that Ehrlichman was trying to make is that it's not possible to raise a great deal of money by tax reforms, "unless you start digging into the average taxpayer's exemptions, or charitable deductions, or mortgage credits, or something of that kind."

That, as Mr. Ehrlichman must know, is simply not true. He was just trying the usual scare tactics that have been this administration's old reliable weapon against tax reform.

What is true is that the exemptions or loopholes he mentions account for a considerable part of the erosion of the tax base. But there is plenty more that he didn't choose to mention.

Could it be that Ehrlichman failed to point to other loopholes because the chief beneficiaries are businesses and the most affluent taxpayers?

For example, the exhaustive analysis of erosion of the individual income tax base by Brookings Institution economists Joseph A. Pechman and Benjamin A. Okner in January, 1972, for the Joint Economic Committee of Congress shows that under a comprehensive tax system, the Treasury would pick up \$55.7 billion in revenue it now loses to the leaky tax structure.

Of this total, \$13.7 billion would come from taxing all capital gains, and gains transferred by gift or bequest; \$2.4 billion from "preference income" such as tax exempt, interest, exclusion of dividends, and oil depletion; \$2.7 billion from life insurance interest; \$9.8 billion from owner's preferences; \$13 billion

from transfer payments (welfare, unemployment compensation, etc.); \$7.1 billion for the percentage standard deduction; \$2.9 billion for deductions to the aged and blind; and \$4.2 billion for other itemized deductions.

On the corporate side, Ehrlichman made no mention of the \$2.5 billion in reduced tax burden that business will get this year through accelerated depreciation schedules (ADR); and another \$3.9 billion via the investment credit. From 1971 through 1980, ADR will be worth \$30.4 billion and the tax credit \$45.2 billion (all U.S. Treasury calculations). And in that span of time, there will also be some \$3 billion in give-aways through DISC—a tax shelter for export sales profits just created by the revenue act of 1971.

Another tax reform target Ehrlichman appears unable to see is income-splitting, which Pechman and Okner estimate causes a revenue loss of at least \$21.6 billion annually, almost half of which is a benefit to a relative handful of taxpayers in the \$25,000-\$100,000 income brackets.

But there's more to it than that. Ehrlichman pretends to be concerned about that "average householder" who would be hit if he couldn't take his mortgage interest as a deduction. But of the \$9.6 billion that Pechman-Okner show lost to homeowners' preferences, defined as deductions for mortgage interest and real estate taxes, \$5.3 billion goes to the tiny 5 per cent of taxpayers with reportable adjusted gross income of \$20,000 or more.

And how about Ehrlichman's warning that Uncle Sam can't raise tax-reform money in significant amounts "if you don't let the average householder . . . deduct charitable contributions to his church or to the Boy Scouts . . ."? Is he really worried about the little guy?

The Tax Reform Research Group (one of Ralph Nader's operations) showed last year that when you divide the number of taxpayers in each income group into the total tax preference benefits of charitable deductions, other than education, you find this:

Among taxpayers in the \$7,000 to \$10,000 income bracket, the average tax benefit for charitable contributions was \$17.44; for those in the \$10,000 to \$15,000 bracket, \$33.11; for those in the \$20,000 to \$50,000 bracket, \$199.09; for those in the \$50,000 to \$100,000 bracket, \$1,211.16; and for those making \$100,000 and over, a whopping \$11,373.56.

So who is Ehrlichman trying to kid? If the administration doesn't have a decent tax reform program, it's not because it could wring the money only out of the little guy, nor because there aren't outrageous loopholes waiting to be plugged. It's just because Mr. Nixon must believe that his constituency likes the inequitable tax system pretty much the way it is.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

PUBLIC HEALTH SERVICE ACT EXTENSION OF 1973

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 91, S. 1136.

The PRESIDING OFFICER. The bill will be stated by title.

The bill was stated by title as follows: A bill (S. 1136) to extend the expiring authorities in the Public Health Services Act and the Community Health Centers Act.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Labor and Public Welfare with an amendment to strike out all after the enacting clause and insert in lieu thereof:

That this Act shall be known as the "Public Health Service Act Extension of 1973".

SEC. 2. (a) Section 304(c) (1) of the Public Health Service Act (42 U.S.C. 201) is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(b) Section 305(d) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(c) Section 306(a) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(d) Section 309(a) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(e) Section 309(c) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(f) Section 310 of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(g) Section 314(a)(1) of such Act is amended (1) by striking "June 30, 1973" the first time it appears and inserting in lieu thereof "June 30, 1974", and (2) by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(h) Section 314(b)(1) (A) of such Act is amended by—

(1) striking the term "June 30, 1973" in the first sentence and inserting in lieu thereof the term "June 30, 1974"; and

(2) striking the phrase "for the fiscal year ending June 30, 1973" in the second sentence and inserting in lieu thereof "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(i) Section 314(c) of such Act is amended by—

(1) striking the term "June 30, 1973" in the first sentence and inserting in lieu thereof "June 30, 1974"; and

(2) striking the phrase "for the fiscal year ending June 30, 1973" in the second sentence and inserting in lieu thereof "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(j) Section 314(d)(1) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(k) Section 314(e) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(l) Section 393(h) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

years ending June 30, 1973 and June 30, 1974".

(m) Section 394(a) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(n) Section 395(a) of such Act is amended by striking "June 30, 1973" and inserting in lieu thereof "June 30, 1974".

(o) Section 395(b) of such Act is amended by striking "June 30, 1973" and inserting in lieu thereof "June 30, 1974".

(p) Section 396(a) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(q) Section 397(a) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(r) Section 398(a) of such Act is amended by striking "June 30, 1973" and inserting in lieu thereof "June 30, 1974".

(s) Section 601(a) of such Act is amended by striking the word "eight" and inserting in lieu thereof the word "nine".

(t) Section 601(b) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(u) Section 601(c) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(v) Section 621(a) of such Act is amended by striking "June 30, 1973" wherever it appears and inserting in lieu thereof "June 30, 1974".

(w) Section 625(2) is amended by striking out "for the fiscal year ending June 30, 1973" and inserting in lieu thereof "for each of the fiscal years ending June 30, 1973, and June 30, 1974".

(x) Section 631 of such Act is amended by striking the word "two" and inserting in lieu thereof the word "three".

(y) Section 791(a)(1) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(z)(1) Section 792(a)(1) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(2) Section 792(a)(2) of such Act is amended by striking "June 30, 1973" and inserting in lieu thereof "June 30, 1974".

(aa) Section 792(b) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(bb) Section 792(c)(1) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(cc) Section 793(a) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(dd) Section 794A(b) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(ee) Section 794B(f) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(ff) Section 794C(e) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(gg)(1) Section 794D(c) is amended (A) by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof "for each of the fiscal years ending June 30, 1973, and June 30, 1974", (B) by striking out "each of the two succeeding fiscal years" and inserting in lieu thereof "each of the three succeeding fiscal years", and (C) by striking out "July 1, 1973" and inserting in lieu thereof "July 1, 1974".

(2) Section 794D(e) is amended by striking out "1977" each place it occurs and inserting in lieu thereof "1978".

(3) Section 794D(f)(1) (A) is amended by striking out "each of the next two fiscal years" and inserting in lieu thereof "each of the next three fiscal years".

(hh) Section 901(a) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(ii) Sections 1001(c), 1002(d), 1003(b), 1004(b), and 1005(b) of the Public Health Service Act are amended by striking out "for the fiscal year ending June 30, 1973" and inserting in lieu thereof "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

SEC. 3. (a) Section 201 of the Community Mental Health Centers Act (42 U.S.C. 2681) is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(b) Section 207 is amended by striking out "1973" and inserting in lieu thereof "1974".

(c) Section 221(b) is amended by striking out "1973" each place it occurs and inserting in lieu thereof "1974".

(d) Section 224(a) of such Act is amended (1) by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974" and (2) by striking out "thirteen succeeding years" and inserting in lieu thereof "fourteen succeeding years".

(e) Section 246 of such Act is amended by striking "June 30, 1973" and inserting in lieu thereof "June 30, 1974".

(f) Section 247(d) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(g) Section 252 of such Act is amended by striking "June 30, 1973" and inserting in lieu thereof "June 30, 1974".

(h) Section 253(d) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(i) Section 261(a) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973 and June 30, 1974".

(j) Section 261(b) is amended (1) by striking out "nine fiscal years" and inserting in lieu thereof "ten fiscal years", and (2) by striking out "1973" and inserting in lieu thereof "1974".

(k) Section 264(c) of such Act is amended (1) by striking the words "June 30, 1973" and

inserting in lieu thereof the words "June 30, 1973 and June 30, 1974" (2) by striking out "eight fiscal years" and inserting in lieu thereof "nine fiscal years", and (3) by striking out "July 1, 1973" and inserting in lieu thereof "July 1, 1974".

(l) Section 271(d) of such Act is amended by striking the phrase "for the fiscal year ending June 30, 1973" and inserting in lieu thereof the phrase "for each of the fiscal years ending June 30, 1973, and June 30, 1974".

(m) Section 271(d) (2) is amended (A) by striking out "eight fiscal years" and inserting in lieu thereof "nine fiscal years", and (B) by striking out "1973" and inserting in lieu thereof "1974".

(n) Section 272 is amended by striking out "1973" and inserting in lieu thereof "1974".

Sec. 4. Section 601 of the Act entitled "An Act to amend the Public Health Service Act to revise, extend, and improve the program established by title VI of such Act, and for other purposes", is amended by striking "July 1, 1973" and inserting in lieu thereof "July 1, 1974".

Sec. 5. (a) Section 121(a) of the Developmental Disability Services and Facilities Construction Act is amended by striking out "for each of the next five fiscal years through the fiscal year ending June 30, 1973" and inserting in lieu thereof "for each of the next six fiscal years through the fiscal year ending June 30, 1974".

(b) Section 122(b) of such Act is amended by striking out "for the fiscal year ending June 30, 1973" and inserting in lieu thereof "for each of the fiscal years ending June 30, 1973, and June 30, 1974".

(c) Section 131 of such Act is amended by striking out "for the fiscal year ending June 30, 1973" and inserting in lieu thereof "for each of the fiscal years ending June 30, 1973, and June 30, 1974".

(d) Section 137(b) (1) of such Act is amended by striking "the fiscal year ending June 30, 1973." and inserting in lieu thereof "the fiscal years ending June 30, 1973, and June 30, 1974".

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF TIME FOR EULOGIES TO THE LATE FORMER SENATOR GUY M. GILLETTE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Record for eulogies to the late former Senator Guy M. Gillette remain open for an additional week.

The PRESIDING OFFICER (Mr. HASKELL). Without objection, it is so ordered.

RESUMPTION OF PERIOD FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a resumption of the period for the transaction of routine morning business, with statements limited therein to 5 minutes each, and the period not to extend beyond 20 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DOMESTIC RETREAT: NIXON BUDGET SUPPORT FOR RESEARCH AND RESEARCH TRAINING PROGRAMS

Mr. HUMPHREY. Mr. President, the Nixon administration's budget proposes drastic cutbacks in research and research training programs in our Nation's graduate schools. This represents not only misplaced priorities but extreme shortsightedness.

We may save a little in the short run, but we shall certainly lose heavily in the future.

The decision to terminate and phase out many research programs is not sound public policy. We will simply have to face the huge expense of restarting these programs 5 or 10 years from now, when we fall behind and confront another crisis as we did when the Soviets launched sputnik. This stop-go-policy is terribly inefficient and ineffective.

Two years ago, the President's Task Force on Education reported that during the next decade, resources available to colleges and universities must more than double if we are to meet our research needs and alleviate the inequalities in our education system. New discoveries are needed in the area of biomedical research, energy development, and environmental technology if the United States is to continue to be the world's leading industrial nation.

In the areas of social science, Government-sponsored researchers have found ways to allocate the costs of municipal services more rationally to promote balanced community growth. Economists are working on a project to link several national econometric models so that international trade and inflation may be studied. And, recently the benefits of federally sponsored research was clearly demonstrated by the announcement of a new discovery that could lead to effective solutions to the problem of drug addiction. This discovery was made at Johns Hopkins as the result of a grant from the National Institute of Mental Health. If this discovery should eventually result in a cure for drug addiction, the investment which we have made will have been repaid many times over. Yet despite results like this, the National Institutes of Health will receive little new support for research.

What is most disturbing is that the areas of NIH research to be funded are chosen by the Office of Management and Budget, without consulting the Scientific community. As Science magazine reported:

When it comes to the budget proposals for the National Institutes of Health (NIH) and, therefore, Federal support of research, there are few, if any, leaders of the biomedical community who are happy with the choices that the President, through his Office of Management and Budget, has made.

There is certainly a need for program evaluation in the area of research, but all members of society, and especially scientific experts, should take part in this evaluation. Finding indicators of social benefit from scientific research is too difficult a task to be left to OMB.

Unfortunately, it is still the case that college education is primarily the prerogative of the young person from an upper income family. I find this to be morally, socially, and economically wrong.

For too many low- and middle-income children who cannot afford to go to college, much less attend graduate school, the real cost is that of not getting a higher education. They are denied the opportunity to develop their talents and obtain appropriate, high-paying jobs.

The misguided nature of the proposed cutbacks can be found in the following examples:

First, a new graduate fellowship program for disadvantaged students is cut by 25 percent. Thus, our efforts to bring about a long-needed diversity in the student population of graduate schools are being frustrated.

Second, the National Science Foundation training grant program receives only phase-out money. This could have disastrous long-run consequences. Scientists and research specialists do not grow on trees. There must be trained professionals if quality research is to continue.

Third, funds for the Health Manpower Act are cut by almost 40 percent from 1972 levels. This includes a two-thirds reduction in funds for nursing schools. While the need is growing the effort is shrinking.

Fourth, Support for foreign language and area study programs is terminated. Some of our country's finest programs, particularly in the field of Asian studies, may be ended completely. And all at a time when Asian experts are desperately needed to deal with the increased importance of China and Japan in world affairs. How can we expect to maintain good relations and formulate sound policies toward these countries if we lack expertise in their languages and cultures?

Fifth, Finally, graduate schools throughout the Nation are beginning to feel the pinch of trying to make less funds go further. University after university has reported that graduate training programs are suffering massive dislocations as a result of the Nixon budget. Said the Dean of the University of California at Berkeley, Sanford Elberg:

The graduate education enterprise is being torn apart. It's a — disaster.

Dean Elberg noted that he will lose funds for almost a thousand of 8,900 students next year.

Dean Elberg's predicament is shared by graduate deans at other schools. A recent article in the Washington Post

by Andrew Barnes catalogs some of the cutbacks and the impending loss of fiscal support as it effects graduate training. Barnes notes that "enrollments are off, sharply at some schools, and all face financial trouble."

Mr. President, the American people stand firmly behind our Nation's commitment to be the world's leader in the field of research and education. Congress will not allow this commitment to be watered down. The investment in graduate research and education must be continued.

I ask unanimous consent that an article from Science, detailing these reductions in research commitments, and an article written by Andrew Barnes of the Washington Post entitled "Elite Graduate Schools Are in Trouble," be printed at this point in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

THE BUDGET OF THE U.S. GOVERNMENT—1974

The President's first peacetime budget is significant not only for the stamp it sets on priorities in the next fiscal year, but also as a guide to the general shape of spending in his second term. The message seems to be that many domestic programs will be cut, but science, with some qualifications, is to continue at steady state. The overall picture for federal investment in research and development is one of standstill, with a few new ventures made at the expense of fairly careful cuts in existing projects. The cost-cutters in the President's Office of Management and Budget (OMB) have gone over the science budget with a scalpel, not a hatchet.

Technology reached its apotheosis with the Apollo program, its nadir, some say, in Vietnam. Both adventures are now over, but the new budget unveiled last week seems to contain no backlash against either technology or pure science. Within the general standstill of science spending there is an evident, but limited, trend toward the focusing of research on specific objectives such as cancer and heart research and the prevention of natural disasters. What is notable is that basic research seems to have remained more or less inviolate, at least as judged by gross figures in the budgets of the leading science agencies. The National Science Foundation (NSF) will spend 5 percent more on research grants. The Atomic Energy Commission (AEC) supports physical and biomedical research at the same rate as before. And the National Institutes of Health appear to have more money available for research grants in fiscal 1974, although less for training and fellowships.

The "News and Comment" section this week is given over to an analysis of the budget as it affects science. Unlike other political statements, the budget message lays out the measures the President intends to support with hard cash as well as lip service. At the same time, the budget writers are not given to making things appear worse than they really are, and it is frequently hard to be sure just what is meant by a particular category of funds. The budget is explained in a set of four documents (the chief of which is known in the OMB as the "novel-sized" budget), but none defines exactly what is meant by research and development. The following articles attempt to sketch out the implications of the budget message for health, energy, defense, and the principal agencies responsible for federal support of science.

The President's budget is subject to change both by Congress and second thoughts in the OMB. Some of the programs slated for extinction have strong support in Congress or from constituencies outside government.

And what the President seems now to be giving with one hand he may later take away by having the OMB impound the funds that Congress has appropriated, as has happened to the NSF's technology incentives program. But the general outline of the science budget is unlikely to change much, despite the departure from the White House of the Office of Science and Technology.

The federal budget for fiscal 1974 (which runs from July 1973 to June 1974) totals \$268.7 billion, of which 6.25 percent is earmarked for R & D. In terms of obligations, the budget's \$17.4 billion for R & D breaks down into \$9.4 billion for military R & D, \$2.5 billion for space research, and \$5.5 billion for civilian R & D. Civilian R & D is up \$0.3 billion over the current year. But scientists may feel the draught from the budgeteers' heavy retrenchment in categorical programs, particularly in the areas of health and education).

That civilian R & D would escape the budget makers' knives is something that few would have predicted prior to last week. Science lies in the small category of budget items which are "controllable," or not already committed. The \$12.7 billion deficit expected for 1974 and the President's determination to control inflation and avoid a tax increase all pointed toward a savage slash in all of the controllables. As it turns out, the cutbacks in science-based activities amount to less than 4 percent of the \$17 billion the OMB hacked away from federal programs, even though civilian science represented a considerably greater fraction of the controllable expenditures. Science may not have done well but it could have done far worse.

NICHOLAS WADE.

BUDGET BACKGROUND: WHERE SCIENCE STANDS AND WHY

The recession in science which began in the middle 1960's was generally attributed to pressures on the budget from costs of the Vietnam war and Great Society programs. It was hopefully assumed in the scientific community that the setback was temporary, merely a short-term reversal of the trends established in the early 1960's. President Nixon's budget for fiscal year 1974 released on 29 January is based on the assumption that U.S. military involvement in Vietnam is over. The budget makers also seem fairly optimistic that inflation has been restrained and employment is expanding. But the growth curve for science retains its horizontal ways.

The immediate explanation is clear enough. The Administration is determined to hold the line on federal expenditures to keep inflationary pressures in hand and developments within the budget in the past decade have made R & D particularly vulnerable to budget-cutting activities. In other sectors of the budget, particularly in programs which commit the government to payments to individuals—social security, public assistance, veterans benefits, medical care for the aged and indigent, for example—limits on spending are virtually impossible to set. More than \$200 billion in the budget is estimated to be in this category of "uncontrollable" expenditures and the science budget, on the other hand, is eminently controllable.

In retrospect, the remarkable burst of growth in the science budget, beginning in the early 1960's, was produced by a very unusual combination of circumstances. The figures testify to the rapidity of expansion. In 1960 federal R & D expenditures amounted to about \$7.7 billion with some \$6.6 billion spent on military R & D. In 1963 the science budget was \$12.4 billion (\$8.6 billion military), and by 1966 the total was \$15.4 billion (\$6.8 military). The fiscal 1974 budget proposes an R & D budget of \$16.7 billion with expenditures of \$8.3 billion in the military sector. The first half of the 1960's, obviously, witnessed a boom in science spending with civilian R

& D growing at a much faster rate than military R & D. By the later 1960's the rate of growth has flattened, the proportion of military R & D began to increase, and inflation had taken hold.

The boom in science in the first half of the decade was made possible not only by policy decisions but by unusually favorable economic circumstances. The end of the 1958-1961 recession began a long period of uninterrupted expansion of the economy during which productivity rose steadily and prices remained relatively stable. Federal revenues rose rapidly and some economists worried about "fiscal lag"—the retarding effect on the economy of the government's lack of ways to keep federal expenditures up with revenues. Science was a logical beneficiary in this situation not only because R & D was looked upon as fitting in with the philosophy of the "investment" budgets put forward by President Kennedy, but also because science was politically palatable. Major spending of federal programs of aid to education and medical care to the aged, for example, encountered impassable opposition in Congress at that period.

Because the scientific enterprise was starting from a relatively small financing base, the percentage increases in funding were very large. The expansion of the space program—the NASA budget rose from under \$2 billion in 1962 to about \$5 billion in 1966—of course provided a major fillip. The 1960's was a period of unexampled expansion in higher education and there were jobs in universities and colleges as well as in industry for the rising tide of graduates of scientific manpower programs.

By the middle 1960's the buildup in Vietnam and the mounting cost of Great Society social and welfare programs had taken the discretionary slack out of the budget. President Johnson's fiscal 1967 budget submitted in January 1966 was the first budget in a decade not to carry a request for an increase in total spending for R & D. And from then on inflation took a mounting toll.

What are the post-Vietnam prospects for science? It is difficult to see the implications for science in the President's efforts to implement his concept of a "New Federalism." The budget indicates he will seek to strengthen state local governments by devolving responsibility for community programs currently administered by the federal government and by shifting federal funds directly to the operating governments through new "revenue sharing" programs. Most R & D programs presumably are "national" programs and would continue to be administered from Washington. Congress, however, is expected to take a protective stance toward many of the programs in question and the debate over revenue sharing is likely to become a major skirmish in the battle of the budget.

A better clue to the outlook for science is probably the evaporation of the so-called "peace dividend" which was anticipated at the end of the Vietnam war. The continuation of military spending at a high level and the rigors of the Administration's countercyclical budget, which incidentally has been projected into 1975, seem to leave little room for expansion of the science budget. A group of independent economists in a Brookings Institution study, *Setting National Priorities The 1973 Budget*, see this inelasticity built into the budget lasting into the next decade unless big tax increases are voted or a major reordering of priorities occurs.

This sort of an economic interpretation of the fortunes of R & D in the federal budget can be carried too far. Sputnik, for example, obviously helped give impetus to R & D in the late 1950's and early 1960's. But it is clear that science faces tough, long-term competition for funds in the budget. Looking back, the early 1960's were

a mini-golden age for science, cut short by long-term trends in the budget.—JOHN WALSH.

**PRESIDENT PROPOSES, CONGRESS DISPOSES—
TRUE OR FALSE?**

Congress's power of the purse is one that, like other powers, has come to be heavily shared with the executive branch. The President's new budget is subject to review by Congress, but, in practice, the legislators have limited possibilities for reordering the President's priorities. Internal disarray is one reason—Congress has no equivalent of a budget bureau to assess the overall budget only appropriations committees which do a piecemeal job. When Congress diverges from the dictates of the Office of Management and Budget (OMB), the Administration has a variety of devices for sidestepping congressional intent, ranging from a presidential veto to a simple refusal to spend the monies appropriated, a practice known as impoundment.

In the last session of Congress, for example, President Nixon twice vetoed appropriations bills containing more than he had requested for the Department of Health, Education, and Welfare (HEW). Congressional initiatives to set up a National Institute of Gerontology and a National Environmental Data System were also cut down by presidential veto. Probably the most pointed rebuff was Nixon's action on the water pollution bill, one of Congress' major legislative achievements, which provided money for waste treatment plants. The President vetoed the bill, Congress overrode the veto by overwhelmingly majorities of 52 to 12 in the Senate and 247 to 23 in the House, whereupon Nixon ordered that more than half of the funds—some \$6 billion—authorized for the program's first 2 years be withheld.

Such high-handed behavior by the President in an area Congress feels to be its own preserve is deeply resented by many legislators. Particular fury has been generated by impoundment, a device that allows the President to kill parts of a bill without the fanfare of a full veto. Resentment over impoundment policies is believed by White House officials to have been the decisive factor in their defeat on the SST in March 1971. And impoundment promises to be a significant issue between Nixon and the 93rd Congress. Senate majority leader Mike Mansfield noted in his speech to the Senate Democratic caucus last month that impoundment is a "dubious Constitutional practice" which "denies and frustrates the explicit intention of the Legislative Branch." Similar expressions of impotent rage have been heard in the House, notably from Representative Jake Pickle (D-Texas), who complained recently: "A budget drawn up by the OMB seems to carry here the force of law. An act of Congress signed by the President does not. At this rate, we might as well sit around and make paper airplanes out of the laws we pass."

Contrary to the impression these protests might give, Nixon did not invent impoundment, which proved equally convenient for Presidents Kennedy and Johnson. (Over the last decade, impoundments have run at about 6 percent of total federal outlays.) The issue has been helped to prominence now in part because of the pressure being put on Congress by institutions such as Common Cause and Ralph Nader to assert its prerogatives, including that of financial control. More important, the party difference between Nixon and the present Congress casts his use of impoundments in a more partisan context than that of his predecessors. As it happens, impoundments have fallen heavily on such Democratic causes as urban renewal and the model cities program.

The most recent list of impounded funds the OMB has made available, current to the end of fiscal 1972, shows a total of some \$10.5

billion withheld. Most impoundments are only temporary in that they are eventually released, sometimes up to a year later. Others, it seems, would revert to the Treasury if impounded until their appropriations, authority expired. The OMB is unable to say what percentage of impoundments are permanent.

IMPOUNDMENT AND PERMISSIVENESS

The constitutional issue of impoundment hinges on whether the President must or only may spend the sums appropriated by Congress. With some notable exception (such as the chairman of the House appropriations committee, George H. Mahon), Congress argues that he must, while the executive branch claims that appropriations are only permissive. OMB officials cite laws interpreted to mean that funds can be impounded for reasons of routine financial management (such as a project being delayed) or to combat inflation. The congressional comeback is the allegation that impoundments are made for reasons of policy. On one occasion the OMB withheld all the add-ons to the President's budget made by the House Public Works committee—a move that Congress sees as a denial of its right to set priorities.

Other impoundments include \$21 million for institutional support and \$9.5 million for graduate traineeships which were withheld from the National Science Foundation's 1972 budget. (Both were subsequently released, though the funds for graduate traineeships went into a general purpose fund.) Funds impounded from the NSF this year total \$75 million or 9 percent of a \$646 million budget. The funds, which may or may not be released before the end of the fiscal year, include \$16 million withheld from the much touted R & D incentives program, and \$43 million from science education.

Congress has sometimes tried to write language into a bill making it mandatory for the President to spend the full amount appropriated. Nixon vetoed one such bill, grounding his action in part of a legal memorandum drawn up by the then assistant Attorney General William H. Rehnquist, now a Supreme Court justice. But the Rehnquist memo, though useful against mandated appropriations, contained some rather unhelpful thoughts on impoundment. The memo states, in part:

"With respect to the suggestion that the President has a constitutional power to decline to spend appropriated funds, we must conclude that existence of such a broad power is supported by neither reason nor precedent. . . . It may be argued that the spending of money is inherently an executive function, but the execution of any law is, by definition, an executive function, and it seems an anomalous proposition that because the Executive branch is bound to execute the laws, it is free to decline to execute them."

The constitutional question of whether the President can decline to execute appropriations bills may soon reach the Supreme Court as the result of a suit filed by the state of Missouri. The suit challenges the President's right to impound highway trust funds voted by Congress. Some 23 Democratic senators have filed friend-of-court briefs supporting the state's case. But the Supreme Court, if the case gets that far, is likely to make the narrowest possible ruling in an effort to avoid, if possible, arbitrating so fundamental an issue.

Besides impoundment, there are other budgetary devices whereby congressional directives may be reinterpreted. Transfer authority, written into appropriations bills by Congress, allows a limited amount of money to be switched within an agency's budget—up to \$750 million in the Defense Department. Reprogramming is a device that permits funds to be shifted from one purpose to another within the same budgetary account; the procedure is for the agency con-

cerned to check with the chairmen of the relevant congressional committees. In fiscal year 1972, reprogramming in Defense approached \$1 billion. Other sorts of money over which congressional control tends to be feeble are secret funds—whose amount is unknown but may be on the order of \$10 billion a year—and deferred balances. The latter are special-purpose appropriations that may be carried over from one year to the next; if the original purpose falls through, the unexpended balance may, depending on the wording of the authorization language, be applied to new uses. In fiscal year 1971, Defense had \$43 billion in unspent authority from previous years, in addition to its \$71 billion budget.

Quite apart from the external mechanisms that erode the appropriations process, the process itself is none too well attuned to modern times. The persistent failure of Congress to pass appropriations bills before the beginning of the fiscal year—this year's HEW appropriation is a case in point—simply invites agencies to develop ways of circumventing Congress. The system of House and Senate appropriations subcommittees is not the ideal machinery for supervising a federal budget of present-day size and complexity. "We have no single, coordinated way in which we view the totality of our appropriations," Representative John A. Blatnik (D-Minn.) has observed. The creation of practically autonomous subcommittees within the appropriations committee has further split responsibility for total spending and overall management, he says. It remains to be seen whether the dissatisfaction of Blatnik and other congressmen will lead to any strengthening of Congress's appropriations system. The constitution may have given Congress what is called the power of the purse, but somehow the purse strings seem to lead round through the back door of the President's Office of Management and Budget.—N.W.

HEALTH

There are two generalizations that can be made about President Nixon's health budget for fiscal 1974. First, unless you are in an area that is one of the President's favorites—the White House calls them "high priority programs"—you will probably have less money than you did before, whether you are a research scientist or a sick person looking for medical care. Second, even if you are part of the in-crowd of the health establishment, increased funding in your field may not be as great as the Administration implies.

The President's budget for the Department of Health, Education, and Welfare (HEW) is one that reduces federal support for health delivery or service programs, sometimes to the point of extinction, and cuts basic research funds as well. Many observers see some merit in trimming some of the service programs under the Health Services and Mental Health Administration (HSMHA) and the National Institute of Mental Health (NIMH), agreeing with the President that they have either proved unsuccessful or have fulfilled their mission. Regional medical programs under HSMHA fall into the former category. They will be obliterated with little mourning. The NIMH's community mental health centers program, which will cost about \$134 million in 1973, fall into the latter. The Administration maintains they have demonstrated their value and should now be supported by local governments. Within NIMH, the only programs in line for major funding increases are those dealing with addiction and drug abuse. The 1974 budget calls for an expenditure of \$448 million in this area. The 1973 figure is given as \$204 million. Options about the merits of this selective boost are mixed.

When it comes to the budget proposals for the National Institutes of Health (NIH) and, therefore, federal support of research,

there are few, if any, leaders of the biomedical community who are happy with the choices that the President, through his Office of Management and Budget (OMB), has made.

Nixon's favorite, high priority programs reside within the NIH. As everybody knows, they are cancer and heart disease. Each will benefit from an increase in funds. According to OMB figures, the budget of the National Cancer Institute (NCI) will go up by \$74 million to \$500 million for fiscal 1974. Heart disease seems to be a lesser favorite. The allotment for the National Heart and Lung Institute (NHLI) will jump by \$19 million to \$265 million, again according to OMB figures. It is not exactly a staggering rise. It is, however, a big jump over the 1972 budget which was \$224 million. Sickle cell anemia has also been singled out as a priority program—NIH officials are beginning to refer to them as the President's "sacred cows"—and population research will go unhurt. As for everything else . . . According to NIH leaders, this is the first year that general research funds have suffered an absolute decrease, the first year that the emphasis on cancer and heart disease has actually cost other disciplines in dollars and cents. The President's budget is something they do not defend.

The first question anybody asks about the budget when it rolls off government printing presses at the end of January is, simply, is it up or down. Each year, the Administration, as one might expect, tries to emphasize places where its support of popular programs has grown. The press and other observers try to sort out the figures to see whether they will buy the government's analysis of itself. It is never an easy job. This year, with the health budget, it is particularly tricky, because the 1973 budget, which would normally be a standard reference against which to measure the upward and downward trends in the 1974 HEW money bill, does not really exist. It is the budget the President vetoed last summer. It has never been revived. Instead, NIH and all other agencies in HEW have been living on a "continuing resolution," which means that spending has been held, more or less, to 1972 levels.

As a result of this unusual and highly confusing situation, there are three different sets of 1973 figures one can use as a yardstick for measuring the 1974 budget. There are the figures in the original 1973 budget, the one Nixon sent to Congress last January just as he is sending the 1974 budget to the Hill now. There is the "revised" 1973 budget which is listed in the 1974 budget and which the Administration now considers the one that counts. It's figures are consistently lower than those originally presented for 1973. And, there is the 1973 budget according to the Congress of the United States. It's figures are consistently higher than either of the other two.

By looking at the various numbers as they apply only to the budgets for the NIH's institutes and research divisions, one can get an idea of the numbers games there are to be played. The total request in the 1974 budget is \$1.531 billion. The total request in the revised 1973 budget is \$1.483 billion. Thus, the new NIH budget is \$48 million more than the old one. However, if you compare the 1974 figure with the original 1973 request (\$1.570 billion), you get a different answer: \$1.570 (1973)—\$1.531 (1974) = —\$0.39.

Viewed that way, NIH comes out way behind, particularly because these figures do not include inflationary factors. If you look at NIH from the perspective of what Congress wanted, the situation is poorer yet. Congress passed a bill appropriating \$1.783 billion to NIH for 1973. By that measure, the President's 1974 request puts research \$252 million behind.

Whatever set of figures you use to evaluate the situation, it is obvious that federal spending for medical care and for biomedical

research is declining. Neither area was accorded any special treatment in the Administration's overall plan to trim federal spending. Certainly, this will offend those who used to be the recipients of federal largesse. Along these lines, the Administration will continue to push for development of controversial Health Maintenance Organizations which involve pre-paid care. However, it will bow out of graduate training and its concomitant institutional support altogether (*Science*, 26 January). Some institutional support will come through capitation grants, but they will be funded only at 1973 levels which many schools consider inadequate. Furthermore, the Administration has acted to reduce capitation. It will limit those funds to the country's 125 schools of medicine and osteopathy and 58 schools of dentistry. Nurses and other health professionals are now out of the capitation picture. Whether these budgetary actions will really have an irreparable and adverse affect on the progress of biomedical research and the quality of medicine is hard to gauge, to put it mildly. But one aspect of all this that the biomedical brass finds most distasteful is the fact that they are really not in on the decision-making any more. For political reasons, for example, cancer and heart disease are targeted to be conquered and the implication is that, with enough money and good management, they will be. The OMB apparently believes this. Most scientists still do not, but their opinions carry little weight.

—BARBARA J. CULLITON.

SCIENCE FOUNDATION

The proposed budget for the National Science Foundation (NSF) for fiscal 1974 will be going up and down at the same time. In terms of actual spending, there will be a 2 percent rise to \$584 million. In obligations, which include future spending, NSF will seek \$641.5 million, or \$33.2 million less than it did last year, and \$8.7 million less than Congress appropriated when it voted \$650.2 million for NSF's 1973 budget.

This has happened partly because this year NSF didn't get its full appropriation. The OMB held in reserve about \$62 million of NSF's budget during fiscal 1973. The Administration plans to spend that money instead during fiscal 1974. Hence it can seek a lower new appropriation. This system of reducing new appropriations is being used throughout the budget this year.

At a press briefing on the budget, NSF director H. Guyford Stever maintained that NSF's basic research was being sustained in fiscal 1974. Most NSF basic research is funded through the Science Research Project Support (SRPS) program which seeks a 5 percent increase to \$275 million. But if current 5 percent general inflation rates persist into fiscal 1974, this increase will be absorbed by inflation.

There are no new staff slots or funds for NSF to take over the functions of the now-abolished Office of Science and Technology. The White House announced on 26 January that Stever would be the new science adviser and NSF would assume OST's role. However, without new funds for this change, it is unclear how NSF can effectively do such a new, broadened role.

What will be cut back in fiscal 1974? The 1973 NSF budget was artificially swollen by about \$20 million which paid for three ski-equipped C 130 aircraft for Antarctic research. More important for the future, graduate student support will decline by \$4.8 million with the finish of the graduate traineeships. Institutional grants for science will decrease by \$2 million to \$6 million. NSF will seek \$3 million only in special foreign currency for international programs; last year it sought \$7 million.

There are some interesting increases reflecting NSF's interest in the newer so-called "practical" programs. The Very Large Array

telescope will need \$10 million in fiscal 1974 for construction. RANN, or Research Applied to National Needs, will get a healthy \$9 million boost—largely in its hardware-oriented advanced technology applications section. Most of the basic science areas in SRPS receive \$1 million raises; but engineering and social sciences did much better with \$2.6 million and \$2.1 million increases, respectively. The technology assessment program—one of the few relics of last year's Presidential Technology Message—will still be funded at \$2 million, and the money for the R & D incentives program, which for a time had most of its \$18 million 1973 appropriation held up by OMB, now expects to get \$15 million before the end of fiscal 1973 and \$18 million in fiscal 1974. Science education, which had \$30.8 of it funding held up last year by OMB, will receive that money during fiscal 1974 along with a smaller new amount of \$29 million—a clear example of how OMB holds on funds are being applied to the 1974 budget.

The NSF budget also illustrates the lesson that such documents cannot be read too skeptically. NSF's lead chart shows steady increases in NSF's "direct program funds" from \$600 million in fiscal 1972 to the \$641 sought for fiscal 1974. But in terms of budget authority—the ceilings on programs—NSF's share, with the exception of the airplanes—has been going down from \$618 million in fiscal 1972 to \$579.6 million in fiscal 1974.

What will become of the proposed NSF budget? If the past is any guide, the House and Senate will try to increase it, perhaps by as much as \$50 million.

OMB may well continue to impound funds or delay them. Asked about this, Stever said he had assurances that OMB was committed to the full fiscal 1974 amount. But he later added "I have my suspicions." OMB withholding could well cancel out any congressional increases.

Most important, however, is the three-way fight brewing over NSF's future mission. The Administration's announcement that Stever and NSF will take over the science advisory role clearly indicated a new dimension for the agency. Meanwhile Senator Edward M. Kennedy (D-Mass.) whose bill, S32, would establish a new, applied wing within NSF, can be expected to try to move it through Congress this session. And the Republican legislators this year intend to submit an alternate bill dealing with NSF's role to the Congress too. If any rash reorganization of NSF comes about, it could affect how much money it finally receives.—DEBORAH SHAPLEY.

INFLATION

No one should read the federal budget, or any R & D funding statistics, without bearing in mind the impact of inflation on all the numbers involved.

The federal budgets, with some exceptions in the Department of Defense, do not include inflation rates in their calculations of spending trends so readers must calculate them in as they proceed to evaluate the actual worth of the funding. The difficulty lies in knowing which inflation rates to apply.

In 1973, the country's general rate of inflation was frequently mentioned as standing near 5 percent. The Administration hopes to cut that rate to 3 percent by 1 July 1973—at the start of fiscal 1974.

However, there is no single rate of inflation that applies everywhere; different fields of science have different rates of inflation, according to Edward C. Creutz, assistant director (research) of the National Science Foundation. Some fields of science use more equipment than others, and he says the cost of equipment, particularly of very sophisticated equipment, inflates more rapidly than do salaries and expenses. Thus, funding for high-energy physics, inflates not at the general 5 percent rate but at about 2 percent higher, or 7 percent. Creutz says that a rate of 2 percent higher than the normal rate is a

sound, "across the board" number to use for inflation in equipment-intensive fields.

Funds for less equipment-intensive fields, such as mathematics and theoretical astronomy, inflate at the general rate, since the money is spent for salaries and expenses. Scientific salaries are not inflating as fast as they were a few years ago, however, because there is currently a surplus of scientists for some fields, Creutz says.

So for fiscal 1973, an inflation rate of 5 to 7 percent should be applied depending on the field of R & D. Should the Administration succeed in lowering the general rate in fiscal 1974, rates of 3 to 5 percent should be applied.—D.S.

ENERGY

With nationwide shortages of fuel oil this winter spurring public fears of an energy crisis, the Administration's new budget propiously asks Congress for \$772 million to support energy-related R & D—an increment over the current fiscal year of \$130 million. The new budget conveys continuing confidence on the part of the White House that the nuclear breeder reactor will meet the nation's long-term needs for electrical energy, but, for the short term, the budget carries quite a different message. In essence, the White House wants the nation's utilities to place more reliance on coal—as opposed to oil and natural gas—to meet energy demands through the mid-1980's. And the budget contains some sizable sums to buy the technology to make this new reliance possible.

As the budget's section on R & D puts it: "Improved technology cannot, by itself, solve all energy and related environmental problems. But it can contribute to substantial reduction of their impact, particularly by the production of clean energy from coal—our most abundant fuel source."

The nation's known coal reserves exceed 500 billion tons, enough to last at the current rate of production for 800 years or more. Much of this, however, is bituminous coal containing up to 10 percent sulfur, an amount that makes it wholly unacceptable for use in most urban areas, especially in the Northeast, where strict limits on emissions of sulfur oxides are enforced. The President's Council on Environmental Quality has estimated that between 1970 and 1985 coal's contribution to the nation's total energy supply will slip from 20 to 17 percent unless economical methods are developed to overcome the sulfur problem.

Accordingly, the 1974 budget asks Congress for \$129 million for fossil fuel R & D, an increase of nearly 20 percent over the current year. Most of this would be spent by the Interior Department through contracts to industrial firms; special emphasis would be placed on developing methods for "pre-combustion cleaning of coal to meet environmental standards." Such methods include gasification and liquefaction of coal and solvent extraction of sulfur from raw coal. A total of \$60 million is earmarked for development of this technology in fiscal 1974, an increase of \$15 million.

At the same time, the Administration will phase out a program in the Environmental Protection Agency that sought to develop means of scrubbing sulfur oxides from the stack gases of industrial and power plants. Thus industry is presented with a choice of pursuing stack gas technology on its own—an unlikely prospect, given current problems with the technology—or of banking on the success of "clean coal" technologies. The net effect may be a powerful inducement to accelerate coal mining in the vast and largely untouched deposits of the central plains and the Rocky Mountain states.

The rationale for accelerated coal production is not purely technological, however. In an energy message planned for later this winter, the President is expected to characterize increased coal production as a boon for

national security and the U.S. balance of payments, to the extent that clean coal can reduce U.S. reliance on foreign petroleum and natural gas of low sulfur content.

Other, alternative sources of energy also receive new support in the 1974 budget. Money for solar energy and geothermal R & D would double to \$16 million, and the Atomic Energy Commission is to receive \$323 million for its work on the breeder, raising the government's contribution by 20 percent. Non-military R & D on controlled fusion would increase \$7 million to a 1974 total of \$44 million. The Administration also lumps the millions it is spending on laser-triggered fusion weapons under the heading of "clean energy" programs, on the grounds that such work might produce spin-off of interest to the civilian effort.

The new budget also creates a \$25 million "central fund" for energy in Interior to support the "exploitation of promising technologies." This new money would seem to vest Interior with new authority over energy R & D, an arrangement that is consistent with the President's announced intention of transforming Interior into a Department of Natural Resources with central authority over national energy policy, both nuclear and nonnuclear.—ROBERT GILLETTE.

ENVIRONMENT

Is there anyone here who understands this book? These numbers don't make any sense to me. William Ruckelshaus, Administrator, Environmental Protection Agency (EPA), in discussing a portion of the budget with newsmen.

Mr. Ruckelshaus' tongue was planted firmly in cheek, but his complaint is nonetheless a common one. Federal budget documents are as much a masterwork of public relations as a proposal to Congress, and their lucidity sometimes rivals that of the Penn Central Railroad's annual report. But so far as one can divine from the voluminous documents released last week, the sector of the federal budget loosely described as "natural resources and environment" fared as well as any other category in a year when the watchword, more than ever, is inflationary control.

President Nixon has withheld about half the \$11 billion authorized last week by Congress—over his veto—for water pollution control. At the same time though, the White House proposes to more than double the amount actually to be spent on pollution abatement (mostly for municipal sewage plants). This amount would rise from \$727 million in fiscal 1973 to \$1.6 billion in fiscal 1974.

In addition, the White House places a figure of \$1.012 billion on its request for environmental R & D in fiscal 1974, an increase in obligations of \$60 million. Much of this increase apparently would go into energy R & D.

A billion-dollar figure for environmental R & D may be a bit misleading, however, in two respects. For one, the definition of R & D is stretched to include such government services as maintenance of a weather satellite system and topographic mapping by the Geological Survey. Moreover, a close reading of the budget reveals several significant reductions in areas classically defined as R & D. Not the least of these involves a major "redirection" of the EPA's research program that tends to shift the agency away from development of pollution control technology and toward a narrower mission of supporting the agency's regulatory functions.

Thus, in fiscal 1974, the EPA's obligations for R & D would drop by \$25 million to a level of \$148 million. The single greatest cut, and potentially the most controversial, is an 88 percent or \$15 million reduction in EPA's support of solid waste processing technology. In a news conference, Ruckelshaus maintained that this "new technology is in

hand" and that it was now up to local communities to adapt it to their solid waste problems. This view, however, is not universally shared within the agency. "Obviously," one EPA official said privately, "this is a devastating reduction."

At the same time, the White House budget office proposes to cut 30 percent or \$3 million from EPA's work on cleaner, alternative automobile engines and to terminate the agency's \$5-million program to develop devices for scrubbing sulfur oxides from industrial stack gases. Ruckelshaus said that the EPA has fulfilled its responsibility of nurturing this technology to a point where "only engineering problems remain," although he acknowledged that the severity of these problems is a matter of great controversy in industry.

Other EPA research programs in radiation, pesticides, noise, water quality, and the social effects of pollution would remain static or rise slightly in the new budget.

Elsewhere, the Interior Department cut \$24 million from its Office of Saline Water, marking the end of a desalination demonstration program. The \$2 million that remains will be applied to "basic" research in desalination. In what appears to be a pattern throughout the environmental sector of the budget, this reduction was offset by the creation in Interior of a \$25-million contingency fund for energy R & D. Thus, a few selective increases appear to balance out a few selective cuts, leaving the overall funding picture essentially static.—R.G.

MILITARY

With an initial "post Vietnam" budget of \$81.1 billion, the U.S. military establishment would have by far the largest peacetime budget ever, yet it is caught in an increasingly tight and troublesome fiscal situation. For the Pentagon the "peace dividend" comes largely in the shape of a struggle to meet huge payroll and retirement benefit costs, bear up under inflation, and, at the same time, modernize its forces by buying incredibly expensive new weapons—for instance, \$19-million fighter aircraft (the F-14) and \$1-billion submarines (the Trident).

In fiscal 1965, the last year before the massive U.S. involvement in Vietnam, the military budget was about \$50 billion. By fiscal 1969, at the peak of the Vietnam war, the military budget—all of these figures include military assistance to foreign nations and defense-related spending of the Atomic Energy Commission—had increased by \$31 billion to approximately its present size. Operational and force levels were of course much higher in fiscal 1969 than they are today. There were then 3.4 million uniformed personnel, some 1.2 million more than at present. Strategic forces then were at about the same strength as now except that today there are fewer B-52 bomber squadrons, but more missiles with multiple warheads. But conventional or "general purpose" forces—tactical air wings, attack and antisubmarine carriers, airlift and sealift forces, and so on—were all at higher levels 5 years ago.

Where, then, did the peace dividend go? There has been no decline in the military budget primarily because of two legacies of the Vietnam war—inflation and the "all-volunteer forces," with its extraordinary high payroll costs. Economists seem to agree that the wartime inflation, which zoomed upward to an annual rate of more than 6 percent in 1970 before it was finally checked, resulted from the government's failure to raise taxes promptly and avoid a deficit when military costs began escalating in 1965 and 1966. The price index for defense as well as other federal purchases is now up by more than a third of what it was in fiscal 1964. The idea of an all-volunteer army gained political currency as the military draft became one of the detested symbols of an unpopular war. Accordingly, the goal of phasing out the draft—this has just now been completed—and creating an all-volunteer force was adopted by Rich-

ard M. Nixon in his 1968 campaign platform as a way to defuse the war at home.

To attract the volunteers, the Administration and Congress set about to increase military pay and did so with a vengeance. In 1964 the basic pay of an Army recruit was \$78 a month; by 1972 it had risen to \$332 a month. A sergeant's basic pay during this period went from \$205 per month to \$467, a colonel's from \$985 to \$2057. The budgetary impact of the higher pay scales and allowances for active duty personnel, plus increasing benefits for retired personnel, was to be enormous. In fiscal 1968 the budget (actual outlays) for the Department of Defense was \$78 billion, and, of that total, 42 percent was allocated to manpower costs, 42 percent to "investment" (weapons procurement, research and development, and construction of facilities), and the remainder to costs of operations. Under the fiscal 1974 budget, however, the share of manpower has risen to 56 percent and the share for investment has declined to 29 percent. The one encouraging sign Pentagon officials have noted is that over the past year these percentages have held steady, with no further erosion in the investment category.

There is expected to be one modest peace dividend, part of which can be applied to modernization of forces. Preparation of the new budget was completed prior to the announcement of the peace agreement, but, by taking into account the continuing "Vietnamization" of the conflict, the budget does show a decline of \$3.3 billion from the \$6.2 billion to be spent during the current fiscal year in Southeast Asia. Whether there will be any additional "dividend" from the Vietnam peace is not yet known. Investment in weapons procurement, R & D, and construction of facilities will rise by about \$1.3 billion. Allocations for basic research will go up by about \$29.6 million, remaining at about \$0.5 billion overall, and the total for all R & D increases from \$6.5 billion to \$7.4 billion (this stated in terms of "obligational" authority rather than of outlays).

Development of three new strategic weapons would be continued under the new budget—the so-called antiballistic missile "Site Defense," the B-1 bomber, and the Trident ballistic missile submarine. The Site Defense is designed to defend U.S. Minuteman missile sites. The Strategic Arms Limitation Talks (SALT) agreement bans any deployment of such a system beyond the existing installation at Grand Forks, North Dakota, and one for the protection of Washington, D.C. (which the Administration apparently now has no intention of building). Further development of the system is referred to in the budget document as a "hedge" against possible abrogation by the Soviets of the SALT agreement.

The Air Force hopes to buy 244 B-1 bombers over the next 10 years, at a cost of about \$11 billion. The Navy intends to build 10 Trident submarines, at a cost of \$13.5 billion (unofficially, there have been reports that the Navy hopes to build perhaps as many as 15 or more of these submarines). The need for Trident and the B-1 has been disputed by the Federation of American Scientists, which includes among its leaders such strategic arms experts as Herbert F. York (former director of Defense Research and Engineering), and by the Center for Defense Information, a new group headed by a recently retired rear admiral who has held important sea commands. The 1974 budget document indicates that the real purpose of moves to deploy new systems such as Trident and the B-1 is to "provide the Soviet Union an incentive for meaningful negotiations" in the new round of SALT talks. This, in a word, is the "bargaining chip" argument.

As the enormous fiscal problems manifest in the proposed budget make clear, however, there is reason to question just how many new bargaining chips the United States can afford to put on the table. A projection for defense spending in fiscal 1975—still an-

other year ahead—shows outlays rising to \$85.5 billion or \$4.4 billion over the outlays now proposed for 1974, with military pay and retirement benefits again the major factor in the increase. It will be ironic indeed if the "all-volunteer force" that has emerged as a legacy of Vietnam should turn out to be a built-in inducement to arms limitation.—LUTHER J. CARTER.

SPACE

The space program seems to be alive and well as it makes the transition into the post-Apollo era, despite recent fears at the National Aeronautics and Space Administration (NASA) that its activities might be cut back severely. NASA's fiscal 1974 budget of \$3.1 billion is little more than half what its budget was at the peak of preparations for Apollo but is about the same size as this year's. Commenting on the new budget, NASA administrator James C. Fletcher pronounced the space program to be "balanced" and "surprisingly strong." Manned space-flight activities will remain important, but with the unmanned and scientific activities claiming a larger share of the NASA budget than they have in the past. The experimental space station Skylab will be launched on schedule, in May of this year; the Apollo-Soyuz Test Project, the joint flight with the Soviets, will take place in the summer of 1975; and the first orbital launch of the space shuttle—the reusable vehicle intended to cut the cost of carrying astronauts and heavy payloads into space—is to come in 1979.

In the field of unmanned planetary exploration, a Pioneer mission to Juniper and a Mariner Venus-Mercury mission will be launched later this year, to be followed by a Mariner Jupiter-Saturn mission in 1977. The Viking orbiter/lander mission to Mars is set for 1975-76. Other activities will include the launching of the Orbiting Solar Observatory in 1974, of two German-American solar probes in 1974 and 1976, and of a number of technological "applications" satellites (for earth resources reconnaissance, weather studies, and the like) between now and the end of 1977. With the foregoing manned and unmanned space activities, together with a modest program in aeronautics, NASA would have about 25,000 civil service employees throughout the 1970's and support about 100,000 contractor personnel (the later figure going somewhat higher at the peak of work on the space shuttle).

A clear indication that NASA's major programs were safe (certainly for the moment) came several weeks ago when the agency, faced with White House demands to do its part toward holding total federal spending for fiscal 1973 to a \$250-billion ceiling, escaped with a cut of only \$179 million. To make the cut, development of the shuttle was ordered slowed by somewhat less than a year off of its original schedule and the launch dates for two of the technological applications satellites were ordered delayed. In addition, there were decisions to suspend the High Energy Astronomy Observatory project (pending redesign of HEAO in a cheaper configuration), to phase out the communications satellites project (letting industry take over), and to terminate long-term projects for development of nuclear propulsion and large-scale nuclear power sources.

Should there ever come a decision to kill or indefinitely postpone the space shuttle, the agency's status may slip to that of an inconspicuous scientific and technological agency quietly doing interesting but not very exciting things. The shuttle is in fact critical to NASA's future, as that future is now envisioned. During this decade as much as a third of the agency's civil service personnel and up to one half or more of its contractor personnel will at times be working on this project. And, for the long term, once the shuttle becomes operational—at a total cost of at least \$6.5 billion—an ambitious pro-

gram of flights will have to be carried out to justify having built it. In terms of cost-effectiveness, the shuttle does not start breaking even unless at least 30 heavy scientific, military, or other payloads are launched annually over a 12-year period.

NASA officials probably are not going to be able to rest easy about the shuttle until a few billion dollars have been spent on it. Not more than about \$775 million will have been spent by the close of fiscal 1974—little enough that the Administration might be tempted to cancel the project should severe budgetary difficulties again arise.

Yet NASA officials seem confident that the shuttle will be built, and there perhaps is little reason to believe otherwise. President Nixon has supported the project—although his new budget message contained no mention of the space program whatever—and, in Congress, it has survived handily all past attempts to kill it. The fact that the project helps sustain an aerospace industry that has suffered grievously from layoffs is a point lost on no one. And, then too, NASA has going for it the fact that, both in Apollo and in the unmanned programs, it has generally met its goals and stayed within its budget.—L.J.C.

SUPERSONIC TECHNOLOGY

Ever since that day two years ago when the White House lost, by a close vote in the Senate, the battle to keep the supersonic transport alive, there has been speculation that President Nixon would ultimately seek to revive the project. The evidence now is that the President does indeed look to a possible revival of the SST, but not until later in the 1970's. The new NASA budget contains \$28 million—more than twice as much as last year's budget—for research and development on supersonic technology. The work will focus on problems of noise, pollution, and efficiency of configuration.—L.J.C.

ELITE GRADUATE SCHOOLS ARE IN TROUBLE

(By Andrew Barnes)

America's elite graduate universities, the top dozen or so that produce a quarter of the Ph.D.'s each year, are in trouble. Enrollments are off, sharply at some schools, and all face financial trouble.

"The graduate education enterprise is being torn apart. It's a goddamn disaster," says the dean of the University of California at Berkeley, Sanford Elberg. He will lose funds for 900 of his 8,900 graduate students next year, "and that's just the tip of the iceberg."

Harvard expects to be able to admit 550 new students in its graduate programs next fall, down from 900 a few years ago. Students angered at lower stipends, have formed a union.

The number of people studying for doctorate degrees across the country continues to inch up despite the well-publicized glut on the job market, but the most prestigious universities complain they are being cut off from the federal money.

Some deans report the best students have already begun to branch out beyond the traditional inner circle of graduate schools, searching for more money.

The prestige schools were the big gainers when federal money started pouring into advanced education after Sputnik in the early 1960's, and they are the big losers in the current pullback.

And they have fewer jobs to offer as teachers of undergraduates, the traditional mainstay for graduate students when the money gets tight. Because they have focused on the most advanced studies, they simply have fewer undergraduates.

Gone is a whole range of federal programs supporting the brightest students:

National Aeronautics and Space Administration fellowships have disappeared with cutback in the space program. The National Science Foundation is supporting 1,450 stud-

ents, down from 7,800 in 1968. Office of Education's support for the training of college teachers has dropped from \$47 million to \$3 million since 1970.

All were programs for the most able graduates, who chose to take their fellowships to the best universities.

The coming fiscal year budget calls for a drastic cut in health-related graduate studies, and elimination of language and area studies.

George Owen, dean of the graduate school of arts and sciences at Johns Hopkins, sees the withdrawal of federal money in such a way that it hits the top universities hardest as "meddling with the interests of the academic community."

PROPOSAL AT HEW

"I think it's a general anti-intellectualism," says Owen. "A demonstration of power. It's saying to us 'Behave, look what we can do.' It has a capricious aspect which is unforgivable."

The charge is denied by Charles B. Saunders, an official at the Department of Health, Education, and Welfare, who ascribes the difficulties that may be caused by changes in federal programs to the fact that "the federal government does not have a national policy for graduate education and it never has."

HEW has before it a proposal from a committee headed by Frank Newman of Stanford University that it give money to graduate students and let them spend it wherever they would like, but Saunders said the study has not yet been given serious consideration.

Meanwhile, in the words of Berkley's Elbert, "we are using up all of our reserves, to pour into the breach."

"We're not going to be able to recruit the finest (students) in the nation," he fears, and with less and less financial support to offer, the question is, "Will they come, if admitted?"

Elbert sees the impending dissolution of departments. "It's a question of how long they want us to remain a great national resource."

WORK VULNERABLE

At the University of Wisconsin, which granted more doctorate degrees in 1970-71 (915) than any other university, Dean Robert M. Bock sees "very costly dislocations" coming. Graduate enrollment is down 1,000 since 1968, and will continue to fall, because the way to pay for the programs "simply is not identified."

At the University of Illinois, acting dean George Russell sees the work "on the frontiers of knowledge" most vulnerable. Graduate enrollment has been cut back 20 per cent. If the enrollment of 8,000 had to be cut back to 4,000, Russell says he could do it intelligently, but that programs respond badly to the current "instability."

"There are certain things that worry me," Russell says, about the way federal contracts seem to be drawn so as to stifle publication. If that happens "then we're in real trouble." An attack on academic freedom would be "just as bad as the attack on free press."

The University of Michigan, another of the public giants usually included among the top ranks, Dean Donald E. Stokes complains that programs being cut now are ones that were instituted to meet national needs. Stokes talks about the "heated knife" of federal cutbacks.

"We are just going to have to withdraw support from students and terminate programs," Stokes says.

Among the private universities, the complaints are, if anything, more vociferous.

FURTHER CUTBACK

At Massachusetts Institute of Technology, Provost Paul Gray says the federal govern-

ment supported 800 to 900 students three years ago, 400 now, 250 next year and the decline is expected to continue. Students are switching to programs at less experienced universities because they can get teaching jobs.

Yale University's Dean Donald W. Taylor last week warned all graduate departments of a further cutback in the size of the graduate school next year, with an entering class of 425, well below the minimum of 500 he has written of in the past as forming a critical mass necessary to support specialized studies. "I see no reason for optimism at this point."

At the University of Chicago, Provost John T. Wilson reports enrollment stable despite sharp drops in federal graduate support. Chicago has concentrated on making loan money available as a substitute for grants. This may not work so well, Wilson says, for students who have already incurred many thousands of dollars of debt to pay for their undergraduate educations.

Princeton has seen a small cut in graduate enrollment, and a larger cut in the number supported by outside funds. "Students will be much less well supported," says Dean Charles Packard, and may decide not to come.

Harvard's reduction from 3,000 to 2,000 in graduate enrollment has meant "a lot of smaller, more specialized areas have had to be cut back," according to Richard Kraus, assistant dean.

As he was talking on the telephone last week, Kraus opened an envelope, containing only a torn piece of paper with a message, evidently from a disappointed scholar: "You should be ashamed of yourself."

QUALITY THREATENED

"Very high expectations are being eroded," commented Kraus, whose job is to parcel out the available money. "The pain is felt in extreme measure by the people who are here."

The Harvard Graduate Students Union argues that Harvard should spend more of the income of its \$1.34 billion endowment to support graduate studies, but the university has so far disagreed.

Overall, what is happening to America's top graduate programs is seen by the Newman report on graduate education as:

"A shift in enrollment of Ph.D. candidates from institutions of acknowledged quality to new institutions, giving rise to a threat to the overall quality of graduate training for scholarly research."

A central thrust of the Newman report is the encouragement of change among the 325 institutions which award doctorate degrees. This, it argues, can best be done with three new programs.

One would be direct grants to students, who would "vote with their feet," choosing the programs they believe to be best and being able to take their financial support with them.

A second would expand the federal role in making work and loan programs more available.

Third would be grants from the government to encourage promising innovations at colleges.

But this may be a long time coming, if it comes at all, and meanwhile the slogan of the Harvard graduate students remain "You can't eat prestige."

THE PRESIDING OFFICER. Is there further morning business?

Mr. HUMPHREY. Mr. President, I suggest the absence of a quorum.

THE PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President,

I ask unanimous consent that the order for the quorum call be rescinded.

THE PRESIDING OFFICER. Without objection, it is so ordered.

CONSULAR CONVENTION WITH POLAND (EX. U, 92D CONG., 2D SESS.); CONSULAR CONVENTION WITH RUMANIA (EX. V, 92D CONG., 2D SESS.); CONSULAR CONVENTION WITH HUNGARY (EX. W, 92D CONG., 2D SESS.); EXCHANGE OF NOTES WITH ETHIOPIA CONCERNING THE ADMINISTRATION OF JUSTICE (EX. B, 93D CONG., 1ST SESS.); AND CONVENTION WITH JAPAN FOR THE PROTECTION OF BIRDS AND THEIR ENVIRONMENT (EX. R, 92D CONG., 2D SESS.)

Mr. ROBERT C. BYRD. Mr. President, as in executive session, on tomorrow, the Senate will vote on the following treaties and conventions:

First. A consular convention with Poland.

Second. A consular convention with Rumania.

Third. A consular convention with Hungary.

Fourth. A treaty involving an exchange of notes with Ethiopia concerning the administration of justice.

Fifth. A convention with Japan for the protection of birds and their environment.

I shall now read extracts from the committee reports with respect to each of the foregoing treaties and conventions.

As to the consular conventions with Poland, Rumania, and Hungary, the provisions contained in these conventions follow the pattern of bilateral consular conventions in force with a number of countries. They deal with such matters as the establishment of consulates in the countries involved, the inviolability of land and buildings used for consular purposes, tax exemptions, and notification to the consulate when a national of the United States is being detained by authorities in Hungary, Poland, or Rumania.

Set forth below are excerpts from Secretary Rogers' letter of submittal on each of the pending conventions:

POLAND

I believe that the signing of this Convention testifies to the welcome improvement in our relations with Poland which has been taking place during the past year. The Convention formalizes the consular rights and privileges agreed upon by representatives of the two countries as a result of negotiations begun in 1964 and pursued intermittently since then. Like bilateral consular conventions already in force with numerous countries, it guarantees early notification of detention of a country's nationals and access thereto; describes consular functions and responsibilities in such fields as the issuance of visas and passports and the performance of notarial services; and provides for the inviolability of consular communications, documents, and archives, and for the immunity of consular personnel with regard to legal proceedings in the host country.

HUNGARY

I believe that this Convention will make possible improved consular services in both countries. It will afford American citizens in Hungary a fuller degree of consular protection than existed previously, particularly by its guarantee of quick and unhindered communication between a citizen and his consul and prompt notification to the consul of any detention or other limitation of the freedom of one of his countrymen.

ROMANIA

As a result of this Convention, American and Rumanian consuls will be better able to help their fellow citizens in numerous ways. Improved consular services will be possible in both countries. These include issuance of passports and visas, performance of notarial services, and representation of the interests of nationals in estate matters.

More importantly, the convention assures that consuls whose nationals are detained or whose personal freedom is limited will be notified promptly—in no event more than 2 days—48 hours—after detention—and will have the right to visit and communicate with such nationals. Visits may take place as soon as possible, and may not be refused after 4 days—96 hours—from the date of detention.

DATE OF ENTRY INTO FORCE

The conventions with Poland, Rumania, and Hungary will enter into force 30 days after instruments of ratification are exchanged. According to the Department of State, all three of the countries involved have completed their ratification processes.

COMMITTEE ACTION AND RECOMMENDATION

The Committee on Foreign Relations held a public hearing on the conventions with Poland, Rumania, and Hungary on March 6, 1973, at which time Mr. K. E. Malmberg, Assistant Legal Adviser for Management and Consular Affairs, Department of State, testified in support of the conventions.

The committee considered the consular conventions in an executive session held on March 7, 1973, and, by voice vote, ordered them reported with the recommendation that the Senate advise and consent to their ratification.

As to the exchange of notes with Ethiopia concerning the administration of justice, the purpose of this exchange of notes is to terminate the notes exchanged on September 7, 1951, when the treaty of amity and economic relations between the United States and Ethiopia was signed. The notes which it is proposed be terminated set forth commitments on the part of the Ethiopian Government.

According to the executive branch, the notes have never been invoked during the 21½ years they have been in force and, in view of the unilateral and unusual character of the commitments involved, it is considered appropriate and highly desirable that the notes be terminated. The termination would become effective on the date the United States sends the Ethiopian Government a note informing Ethiopia of the U.S. intention to terminate.

COMMITTEE ACTION AND RECOMMENDATION

The Committee on Foreign Relations held a public hearing on the exchange of notes with Ethiopia on March 6, 1973. At that time Byron Keith Huffman, Jr., Assistant Legal Adviser for African Affairs, Department of State, testified on behalf of the administration. His prepared statement is reprinted below.

During an executive session held on March 7, 1973, by a voice vote, the committee ordered the pending exchange of notes reported favorably with the recommendation that the Senate give its advice and consent to ratification thereof.

As to the convention with Japan for the protection of birds and their environment, the purpose of the convention is: (A) to provide for the protection of species of birds which are common to the United States and Japan or which migrate between them; and (B) to provide that each country will develop programs to preserve and enhance the environment of the birds protected by this agreement.

BACKGROUND

The convention marks the culmination of several years of international conservation effort. Its origins date back to the 12th World Meeting of the International Council for Bird Preservation held in Tokyo in 1960. At those meetings, a Japanese-sponsored resolution, proposing that countries of the Pan-Pacific area conclude a convention for the protection of migratory birds, was unanimously adopted.

Following these meetings, studies were undertaken by the Department of Interior, the Smithsonian Institution and their Japanese counterparts. It was determined that approximately 189 species of birds should be protected by such an agreement.

In October 1969, delegates from the United States and Japan met in Washington and negotiated a draft convention. The current text is substantially the same as that 1969 draft.

The convention was signed in Tokyo on March 4, 1972, and was submitted to the Senate on August 18, 1972.

PROVISIONS OF THE AGREEMENT

The convention consists of a short preamble and nine articles followed by an annex which lists the 189 different species of birds protected by the agreement.

The primary objective of the convention is found in article III, which prohibits the taking of all migratory birds and their eggs listed in the convention's annex. Articles IIb and IIc provide for appropriate review and amendment of this annex in order to keep it current with scientific knowledge.

COMMITTEE ACTION

The Committee on Foreign Relations held a public hearing on the Convention between the Government of the United States of America and the Government of Japan for the protection of migratory birds and birds in danger of extinction, and their environment, on March 6, 1973. At that time Ambassador Donald L. McKernan, Special Assistant to the Secretary for Fisheries and Wildlife and Coordinator of Ocean Affairs of the Depart-

ment of State, testified in favor of the convention.

On March 14, 1973, the committee met in executive session and, by voice vote, ordered the convention reported favorably to the Senate for advice and consent to ratification.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. JAVITS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. JAVITS. What is the pending business?

The PRESIDING OFFICER. The Senate is in a period for the transaction of routine morning business.

Mr. JAVITS. I thank the Chair, and ask to be recognized as within that period.

The PRESIDING OFFICER. The Senator from New York is recognized.

DR. BURNS AND INTEREST RATE BEHAVIOR

Mr. JAVITS. Mr. President, the behavior of interest rates during the past few weeks is a good example of the difficulty we shall have during the critical months ahead as we approach the top of the business cycle.

First and foremost I would like to commend the Federal Reserve Chairman, Dr. Arthur Burns, who also serves as the Chairman of the Committee on Interest and Dividends, for charting a secure course through the precarious issue of keeping interest rates in check, while continuing an appropriate monetary policy of moderate monetary expansion. He is just now in the way of making an extraordinary contribution to interest rate stability.

What we have read in the papers is that interest rates have gone up. This rise, incidentally, had been foreseen by virtually all economic analysts, for it is clear that with our economy under a full head of steam, the demand for credit is now running head-on with the need to keep the economy from going through the roof.

But now we have a change and the structure of interest rates in the financial markets is beginning to demonstrate the effect of Dr. Burns' Committee on Interest and Dividends. For example, the commercial paper rate, which consistently runs below the prime rate, was quoted today at 6½ percent to 7¾ percent, which is substantially higher than the 6½-percent prime rate which is being posted by most major banks. As we have read, that 6½-percent rate is the direct result of Dr. Burns having convinced a number of major banks that they should go down from a 6¾-percent prime rate

level, but it is pretty clear that even the higher 7½-percent level is below what the prime rate would be if free market conditions were allowed to prevail.

It would be politically tempting to advocate hard controls on interest rates, but the current experience shows how difficult and dangerous this could be. For the difficulty is that the money markets are auction markets, where the law of supply and demand reigns virtually supreme; controls simply do not apply to auction markets. The danger of imposing hard controls is that controlled rates would impose huge distortions in the credit markets, shifting their activity and much heavier competition for funds into the low-interest rate sectors. We have already seen this happen with regard to the prime, which has attracted a disproportionate amount of borrowing out of commercial paper and into the banks themselves.

Also, when we are dealing with money, we are dealing with a subtle situation, not just in the local market but in the world market, which can be withheld without any great cost to the withholder but is terribly disruptive to bear.

What is developing from this experience, as described in the Wall Street Journal this morning, is an initiative by Dr. Burns to find ways in which increased pressure on interest rates will still keep debt costs for borrowers of moderate means down, while also keeping adequate flows of credit for those firms with access to national money markets. Here Dr. Burns is breaking new ground, and the complexities—both political and economic—of his task are enormous. The goal, which I believe to be in his grasp, is an interest rate structure where mortgage, consumer, and other rates which apply to the man in the street will not feel the full heat of rising interest rates. This is as much as we should expect from an economy which must at all times maintain the delicate balance between public policy and private freedom. Dr. Burns deserves great credit for maintaining this balance as do those banks that have shown a patriotic spirit of cooperation during this difficult time; I believe that this approach to interest rate "control" will prove to be the most equitable and effective, and at any rate, far less injurious to the economy than the direct controls which have been proposed by some.

I ask unanimous consent that an article about this situation in today's Wall Street Journal be placed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Mar. 26, 1973]

ADMINISTRATION WANTS TO FREE PRIME RATE OF CONTROLS; URGES TWO-TIERED SYSTEM; SOME BANKS ROLL BACK BOOSTS

(By Edward P. Foldessy and James P. Gannon)

Although publicly chiding banks for boosting their minimum lending charges on corporate loans, the Nixon administration privately told bankers it wants to free the prime rate entirely from the control of the Committee on Interest and Dividends.

Despite the private disclosure, several banks bowed to the public criticism and partially rolled back their rate increases.

The administration's plan to decontrol the

prime rate was detailed last Thursday at a meeting with banks that earlier had boosted their base interest rates to 6¾% from 6¼%. The banks ostensibly were summoned to the meeting to "justify" their actions.

But informed sources said the discussions were "thoroughly political" with very little emphasis on the financial or economic side. The bankers were "severely warned" the sources stated, against making any public disclosure contradicting the committee's official statement after the meeting that the half-point increase in the prime rate "wasn't justified at this time."

Over the weekend, Arthur F. Burns, committee chairman, continued to press his public position. The committee summoned to meetings today three other banks that Friday announced increases to 6¾% in their prime rates: Chase Manhattan Bank, Chemical Bank and First National Bank of Chicago.

TELEPHONE CALLS TO BANKS

The action was followed up Saturday in telephone calls by Mr. Burns to banks posting 6¾% minimum rates. As a result of the calls, at least some banks, including Chemical Bank and First Pennsylvania Banking & Trust Co., Philadelphia, trimmed their rates to 6½%.

Chase Manhattan also lowered its prime rate to 6½% after its chairman, David Rockefeller, met with Mr. Burns in Washington Saturday afternoon. Mr. Rockefeller yesterday said Chase representatives will still meet with the CID staff today to present additional data. A spokesman for Chemical Bank, however, said its meeting was called off.

In the official statement last Thursday, Mr. Burns, who also is chairman of the Federal Reserve Board, suggested the banking industry adopt a two-tiered system for pricing corporate loans. Under such a dual system, large corporations that have access to national money and capital markets would receive one prime lending rate, while a second would apply to small businesses and "special moderation" would be observed.

On the question of the 6¾% prime rate, the statement went on: "It was the present judgment of the committee that, although costs of interest-sensitive funds to banks had risen considerably, an increase in the prime lending rate as large as one-half percentage point . . . wasn't justified at this time" on the basis of criteria the committee has previously set.

But according to sources at the meeting, Mr. Burns conceded the question of the prime rate was a "monkey on the back of the committee." That's "almost a direct quote," said one source. The committee chairman further told bankers that he'd rather prefer to see the prime rate itself treated as a money market rate and "outside the concern of the CID," the source related.

The interest committee is the watchdog group for so-called administered rates and hasn't any responsibility for open-market rates that fluctuate freely in response to supply and demand.

Another source said the CID isn't "particularly concerned with what General Motors has to pay. They're mainly worried about the corner drugstore."

UNHAPPY IN DUAL ROLE

It has been widely known in Washington that Mr. Burns has been unhappy in his dual role as chairman of both the CID and the Reserve Board. On one hand, the CID is obliged to keep the lid on interest rates. The Federal Reserve, however, for domestic and international considerations has had to foster higher market rates in an attempt to contain the nation's credit expansion.

By putting a lid on the prime rate, bankers have charged, the CID has distorted money flows and has made the Federal Reserve's monetary tasks more difficult.

Thus, setting the prime rate free, the Fed-

eral Reserve would have more latitude in carrying out credit policy.

But for political reasons the interest committee has had to pressure banks to moderate increases in the prime rate, analysts said. They noted the House Banking Committee starts hearings today on extending the President's wage-price authority for one year. And some administration critics have been pushing proposals to freeze all prices and interest rates for 60 days at their March 16 level.

If the CID didn't maintain the stern public position it has had on the prime rate, the analysts reason, it would hinder the administration's efforts at putting through a simple extension of the wage-price authority, unencumbered by mandatory freezes.

DOESN'T HAVE MASTER PLAN

According to bankers, Mr. Burns' dual-role proposal would be the key to setting the national prime rate free. But the CID doesn't have a master plan to determine how to set up or administer the lower tier rate structure for small business. At the Thursday meeting, Mr. Burns told bankers he hadn't even had time to think of a definition of small business and indicated he might seek help from the Small Business Administration on that score.

Basically, the CID will rely on banks to come up with a viable plan to handle rates on loans to small businesses, one source said. "It isn't going to be worked out here," he stated.

Whatever the case, the maneuvering through the weekend left the banking industry widely split on the prime rate with some banks posting 6¾%, others at 6½% and still others at 6¼%.

The scurrying was initiated last Monday by Manufacturers Hanover Trust Co., New York, when it boosted its prime rate to 6¾% from 6¼%. It was joined by other banks including First National Bank of Boston; Continental Illinois National Bank & Trust Co., Chicago; Marine Midland Bank-New York; Republic National Bank of Dallas; Franklin National Bank of New York, and First Pennsylvania Banking.

By last night, all those banks, except Manufacturers Hanover, had trimmed their rates back to 6½%.

A number of other banks used the opportunity to raise their prime rates to 6½% from 6¼%. These included Wells Fargo Bank, San Francisco; Philadelphia National Bank; Chicago's Harris Trust & Savings Bank, and Commerce Bank of Kansas City. These increases brought no public response from Mr. Burns or other members of the interest committee.

At least one bank, San Francisco's Crocker Bank, over the weekend went to a 6¾% rate despite CID pressure that was placed on other banks.

Manufacturers Hanover said it would leave its prime rate at the 6¾% level announced last Monday. It said it believed the rate was within the guidelines of the interest and dividends committee, and would wait for the final assessment of the committee before taking any action.

Almost all of the banks that made any announcements Friday or over the weekend praised the idea of a dual prime rate and a number of banks moved to implement a lower-tier structure for small businesses.

Among these was Chase Manhattan, which Friday announced a "graduated" 6¾% prime before backing off to a straight 6½% rate yesterday. Under the graduated system, Chase said interest on loans at or tied to the prime rate, up to a total of \$500,000 to any one borrower, would remain unchanged, linked to the 6¼% prime. All prime rate borrowings over that amount were to have earned a 6¾% rate.

"All loans tied to the prime rate will be covered by the new arrangements," Chase had said Friday. "The bank's prime rate will

be applied on a graduated basis in accordance with the amount outstanding to any single borrower."

In announcing yesterday the graduated system would be "temporarily" suspended, Chase said Mr. Burns "expressed considerable interest in the basic approach" the bank had taken. It added, however: "Mr. Burns said he felt the committee needed more time to study the various implications of the plan before making a definitive judgment."

First Pennsylvania took a different tack Friday. It said rates on consumer loans and residential mortgages would be frozen and that loan rates to small businesses that aren't contractually tied to the prime rate wouldn't be changed from pre-March 20 levels for at least a month.

The bank didn't make any mention of the freeze, however, after it rolled its prime rate back to 6½% Saturday.

In an interview, James F. Bodine, president of First Pennsylvania, said Mr. Burns called John Bunting, chairman of the parent company, "and asked Mr. Bunting to accommodate him (Mr. Burns). He fears that unless we roll back, every bank in the country would go to 6¼% (today). He asked us to stand fast temporarily, which was more or less defined as a period of about two weeks."

Asked if First Pennsylvania was likely to increase its prime rate after the cooling-off period, Mr. Bodine answered "sure." He added: "I believe the CID now concedes the point that we made the first time around—that the prime has to move with the money-market rates. Conditions could change in two weeks, but the environment of our discussions in the past few days has been such that we don't think it would be difficult to move to 6¼% at that time. It probably really ought to be 7% or 7¼%, but I don't think we'll get that level in two weeks time."

Franklin National, despite its rollback to 6½%, said it regarded 6¼% as justified. It added that it hoped there would be speedy clarification and implementation of the two-tier proposal. But, Franklin stated, it planned to reassess its position in the next week or two.

ORDER FOR SENATOR STEVENS TO BE RECOGNIZED ON WEDNESDAY, MARCH 28

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Wednesday next, after the two leaders or their designees have been recognized under the standing order, the distinguished Senator from Alaska (Mr. STEVENS) be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the program for tomorrow is as follows:

The Senate will convene at 10 a.m. Mr. FANNIN will be recognized for not to exceed 15 minutes, after which Mr. GRIFFIN will be recognized for not to exceed 15 minutes.

At 10:30 a.m., the first of five rollcall votes on treaties will occur—the treaties are not controversial and were reported unanimously from the Committee on Foreign Relations. The first yea-and-nay vote will require the usual 15 minutes, but the four successive following rollcall votes will be limited to not more than 10 minutes each.

The Senate will then take up the om-

nibus health program extension bill. Yea-and-nay votes will occur, and it is hoped that final passage of the bill can be secured tomorrow.

ADJOURNMENT TO 10 A.M.

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in adjournment until 10 a.m. tomorrow.

The motion was agreed to; and, at 2:02 p.m., the Senate adjourned until tomorrow, Tuesday, March 27, 1973, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate March 26, 1973:

DEPARTMENT OF STATE

Phillip V. Sanchez, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Honduras.

NATIONAL COUNCIL ON EDUCATIONAL RESEARCH

The following-named persons to be members of the National Council on Educational Research for the terms indicated; new positions.

For a term of 1 year:

James S. Coleman, of Maryland.

Vincent J. McCool, of Pennsylvania.

Vera M. Martinez, of California.

Carl H. Pforzheimer, Jr., of New York.

Wilson Riles, of California.

For a term of 2 years:

William O. Baker, of New Jersey.

T. H. Bell, of Utah.

Dominic J. Guzzetta, of Ohio.

Charles A. LeMaistre, of Texas.

W. Allen Wallis, of New York.

For a term of 3 years:

Patrick E. Haggerty, of Texas.

Ralph M. Besse, of Ohio.

John E. Corbally, Jr., of Illinois.

Ruth Hurd Minor, of New Jersey.

John C. Weaver, of Wisconsin.

IN THE AIR FORCE

The following officers for appointment in the Reserve of the Air Force to the grade indicated, under the provisions of chapters 35, 831, and 837, title 10, United States Code:

To be major general

Brig. Gen. Gordon L. Doolittle, xxx-xx-xxxx FG, Air National Guard.

Brig. Gen. Raymond L. George, xxx-xx-xxxx FG, Air National Guard.

Brig. Gen. George M. McWilliams, xxx-xx-xxxx FG, Air National Guard.

Brig. Gen. Robert S. Peterson, xxx-xx-xxxx FG, Air National Guard.

To be brigadier general

Col. John C. Campbell, Jr., xxx-xx-xxxx FG, Air National Guard.

Col. Winett A. Coomer, xxx-xx-xxxx FG, Air National Guard.

Col. William D. Flaskamp, xxx-xx-xxxx FG, Air National Guard.

Col. Leo C. Goodrich, xxx-xx-xxxx FG, Air National Guard.

Col. Cecil I. Grimes, xxx-xx-xxxx FG, Air National Guard.

Col. Ronald S. Huey, xxx-xx-xxxx FG, Air National Guard.

Col. Paul J. Hughes, xxx-xx-xxxx FG, Air National Guard.

Col. Grover J. Isbell, xxx-xx-xxxx FG, Air National Guard.

Col. Billy M. Jones, xxx-xx-xxxx FG, Air National Guard.

Col. Raymond A. Matera, xxx-xx-xxxx FG, Air National Guard.

Col. Patrick E. O'Grady, xxx-xx-xxxx FG, Air National Guard.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 26, 1973:

COMMODITY CREDIT CORPORATION

The following-named persons to be members of the Board of Directors of the Commodity Credit Corporation:

Robert W. Long, of California.

Clayton Yeutter, of Nebraska.

SELECTIVE SERVICE SYSTEM

Byron V. Peptone, of Virginia, to be Director of Selective Service.

DEPARTMENT OF STATE

Marshall Green, of the District of Columbia, a Foreign Service Officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Australia.

William B. Macomber, Jr., of New York, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Turkey.

V. John Krehbiel, of California, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Finland.

Dr. Ruth Lewis Farkas, of New York, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Luxembourg.

U.S. INFORMATION AGENCY

Eugene Paul Kopp, of Virginia, to be Deputy Director of the U.S. Information Agency.

(The above nominations were approved subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

IN THE AIR FORCE

The following officer to be placed on the retired list in the grade indicated under the provisions of section 8962, title 10 of the U.S. Air Force.

To be lieutenant general

Lt. Gen. James V. Edmundson, xxx-xx-xxxx AR (major general, Regular Air Force) U.S. Air Force.

IN THE ARMY

The following-named officer to be placed on the retired list in grade indicated under the provisions of title 10, United States Code, section 3962:

To be lieutenant general

Lt. Gen. William Joseph McCaffrey, xxx-xx-xxxx AR Army of the United States (major general, U.S. Army).

The following-named officer under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in grade as follows:

To be lieutenant general

Maj. Gen. Gilbert Hume Woodward, xxx-xx-xxxx AR Army of the United States (major general, U.S. Army).

IN THE NAVY

Vice Adm. James F. Calvert, U.S. Navy, for appointment to the grade of vice admiral, when retired, pursuant to the provisions of title 10, United States Code, section 5233.

IN THE MARINE CORPS

The following-named officer of the Marine Corps Reserve for temporary appointment to the grade of major general:

Louis Conti

The following-named officers of the Marine

Corps Reserve for temporary appointment to the grade of brigadier general:

Alan T. Wood
Hugh W. Hardy

The following-named officers of the Marine Corps for temporary appointment to the grade of major general:

Kenneth J. Houghton James R. Jones
Frank C. Lang Charles D. Mize
Robert D. Bohn Norman W. Gourley
Edward J. Miller

The following-named officers of the Marine Corps for temporary appointment to the grade of brigadier general:

Nolan J. Beat Noah C. New
Edward A. Parnell Harold L. Coffman
Thurman Owens Maurice C. Ashley,
Edward B. Meyer Junior
William J. White

IN THE AIR FORCE

Air Force nominations beginning Omar R. Adame, to be lieutenant colonel, and ending

Thomas F. Lowry, to be lieutenant colonel, which nominations were received by the Senate and appeared in the Congressional Record on February 15, 1973.

IN THE ARMY

Army nominations beginning Laverne H. Dahl, to be lieutenant colonel, Regular Army, and colonel, Army of the United States, and ending Michael A. Richardson, to be second lieutenant, which nominations were received by the Senate and appeared in the Congressional Record on February 15, 1973.

Army nominations beginning Joseph V. Brady, to be colonel, and ending Alberto W. Tio, to be second lieutenant, which nominations were received by the Senate and appeared in the Congressional Record on February 15, 1973.

Army nominations beginning Sara E. Baucom, to be captain, and ending Walter M. Zoller, to be second lieutenant, which nomi-

nations were received by the Senate and appeared in the Congressional Record on March 12, 1973.

Army nominations beginning Richard L. Absher, to be lieutenant colonel, and ending Armie K. Gruenewald, to be captain, which nominations were received by the Senate and appeared in the Congressional Record on March 13, 1973.

IN THE DIPLOMATIC AND FOREIGN SERVICE

Diplomatic and Foreign Service nominations beginning Robert O. Blake, to be a career minister, and ending John E. Reinhardt, to be a career minister for information, and beginning John Eaves, Jr., to be a consular officer of the United States of America, and ending M. Patricia Wazer, to be a consular officer of the United States of America, which nomination list was received by the Senate and appeared in the Congressional Record on March 13, 1973.

HOUSE OF REPRESENTATIVES—Monday, March 26, 1973

The House met at 12 o'clock noon.

The Very Reverend Vasil Kendysh, Byelorussian Autocephalic Orthodox Church, Highland Park, N.J., offered the following prayer:

In the name of the Father, and the Son, and the Holy Spirit.

Almighty Father, Thou art our Creator, Teacher, and Judge. We beseech Thee, free us of all human weakness and guide us in every step of our life on a rightful path.

Eternal God, bless this august House of Representatives of the United States of America. Strengthen the minds of its Members with wisdom, fortify their hearts with love, and their deeds with courage and justice.

Merciful God, we pray Thee on this 55th anniversary of the Proclamation of Independence of Byelorussia, have mercy upon her people. Strengthen their faith in Thy infinite goodness, support them in their sufferings, restore their freedom.

O God, accept this humble prayer of ours, bless the United States of America. Bless Byelorussia and her oppressed people. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed without amendment, a bill of the House of the following title:

H.R. 3298. An act to restore the rural water and sewer grant program under the Consolidated Farm and Rural Development Act.

The message also announced that the Vice President, pursuant to section 123 (a), Public Law 91-605, appointed Mr. RANDOLPH to the Commission on Highway Beautification in lieu of Mr. BAYH.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C., March 22, 1973.

HON. CARL ALBERT,

The Speaker, House of Representatives.

DEAR SIR: On this date I have been served a Summons and Complaint by the United States Marshal that was issued by the U.S. District Court for the District of Columbia. The summons and complaint are in connection with Robert L. Mauro v. W. Pat Jennings, Clerk of the U.S. House of Representatives, and Francis R. Valeo, Secretary of the U.S. Senate, Civil Action No. 447-73 (U.S.D.C. D. C.). I have also received this date by certified mail (987602) the Plaintiff's Application for a three judge court to hear this action.

The Summons requires an answer to the Complaint within sixty days after service.

It is my purpose to inform you that I intend to make arrangements for my defense as provided for the Officers of the U.S. House of Representatives under 2 U.S.C. 118.

The Summons, Complaint and Plaintiff's Application in question are herewith attached, and the matter is presented for such action as the House in its wisdom may see fit to take.

Sincerely,

W. PAT JENNINGS,
Clerk, House of Representatives.

SUMMONS

[U.S. District Court for the District of Columbia, Civil Action File No. 447-73]

(Robert L. Mauro, Plaintiff, v. W. Pat Jennings, Clerk of the U.S. House of Representatives; Francis R. Valeo, Secretary of the U.S. Senate, Defendants)

To the above named Defendant: W. Pat Jennings, Clerk of the U.S. House of Representatives.

You are hereby summoned and required to serve upon Robert L. Mauro, plaintiff, whose address is 20 Lippincott Avenue, Long Branch, N.J., an answer to the complaint which is herewith served upon you, within 60 days after service of this summons upon you, exclusive of the day of service. If you fail to do so, judgment by default will be taken against you for the relief demanded in the complaint.

JAMES F. DAVEY,
Clerk of Court.

MARY B. DEEVERS,
Deputy Clerk.

Date: March 7, 1973.

[U.S. District Court, District of Columbia, Civil No. —]

COMPLAINT FOR DECLARATORY JUDGMENT AND INJUNCTIVE RELIEF

(Robert L. Mauro, Plaintiff, v. W. Pat Jennings, Clerk of the U.S. House of Representatives, and Francis R. Valeo, Secretary of the U.S. Senate, Defendants)

Plaintiff Robert L. Mauro files this complaint under the Federal Declaratory Judgment Act, 28 U.S.C. Section 2201, and the Administrative Procedure Act, 5 U.S.C.A. Section 2201, stating that the bases for jurisdiction are that the matter in controversy arises under the Constitution and laws of the United States, diversity of citizenship exists, and the civil rights guaranteed to plaintiff under the Constitution and laws of the United States, particularly under Article XIV are being infringed.

Plaintiff petitions for a three judge court to hear the within complaint.

Plaintiff Robert L. Mauro, a citizen of the United States, and of the State of New Jersey, residing at 20 Lippincott Avenue, in the City of Long Branch, State of New Jersey, by way of complaint against the defendant W. Pat Jennings in his official capacity as Clerk of the U.S. House of Representatives, and whose office is at Room H-105, Capitol Building, Washington, District of Columbia, and the defendant Francis R. Valeo, in his official capacity as Secretary of the U.S. Senate, said defendant's office being in Room S-221, Capitol Building, Washington, District of Columbia, alleges that:

FIRST COUNT

1. Defendant W. Pat Jennings is the Clerk of the U.S. House of Representatives, and defendant Francis R. Valeo is the Secretary of the U.S. Senate.

2. Among the official duties of the aforesaid defendants are the receipt of official communications to the U.S. House of Representatives and the U.S. Senate, the defendant W. Pat Jennings having these duties in regard to the U.S. House of Representatives, and the defendant Francis R. Valeo having these duties in regard to the U.S. Senate. In addition, the defendants W. Pat Jennings and Francis R. Valeo, have among their duties the custody of said communications, and the reporting of same on the official calendars and journals of the U.S. House of Representatives and the U.S. Senate, respectively.

3. Among the official communications which the defendants W. Pat Jennings and Francis R. Valeo and their predecessors receive, keep or oversee the keeping of, and report to the bodies of which they are Clerk

and Secretary respectively, are applications from States Legislatures to Congress to call a convention for proposing amendments to the U.S. Constitution, pursuant to Article V of the U.S. Constitution.

4. Article V of the U.S. Constitution, Amendments to the Constitution—How Made, requires in part that "The Congress . . . on the application of the Legislatures of two-thirds of the several States, shall call a convention for proposing amendments, which in either case, shall be valid to all intents and purposes, as part of this constitution, when ratified by the Legislatures of three-fourths of the several states, or by conventions in three-fourths thereof, as the one or the other mode of ratification may be proposed by the Congress . . ."

5. Over two-thirds (over 34 of 50) of the State Legislatures of the several states have, pursuant to Article V, made application to Congress to call a convention for proposing amendments to the U.S. Constitution, among the States being the following:

Alabama, Alaska, Arizona, Arkansas, California, Colorado, Connecticut, Delaware, Florida, Georgia, Idaho, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Missouri, Mississippi, Montana, Nebraska, Nevada, New Hampshire, New Jersey, New Mexico, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, Wyoming.

6. The membership of the U.S. House of Representatives and the U.S. Senate is subject to change every two years, in whole or in part, and the present Congress has not, to the best knowledge and belief of the plaintiff, received an official report on the calendar from either the defendant W. Pat Jennings or the defendant Francis R. Valeo as to the fact that more than two-thirds of the State Legislatures have made applications to Congress to call a convention for proposing amendments to the U.S. Constitution pursuant to Article V of the Constitution.

7. Plaintiff has a right under the Constitution and laws of the United States to have the provisions of Article V of the U.S. Constitution adhered to, and his constitutional and civil rights are infringed upon when the fact that two-thirds of the State Legislatures have submitted applications to Congress to call a convention for proposing amendments to the U.S. Constitution is not officially reported to the Congress (the U.S. House of Representatives and the U.S. Senate) by the defendants W. Pat Jennings, Clerk of the U.S. House of Representatives, and Francis R. Valeo, Secretary of the U.S. Senate, so that the U.S. House of Representatives and the U.S. Senate may be officially apprised that the prerequisite of Article V's mandate to call a convention, the filing of applications by two-thirds of the states, has been satisfied.

Wherefore, plaintiff prays as follows:

1) For a Declaratory Judgment that two-thirds of the State Legislatures have made applications to Congress to call a convention for proposing amendments to the U.S. Constitution within the meaning of Article V of the Constitution.

2) For an injunction directing defendants W. Pat Jennings, Clerk of the U.S. House of Representatives, and Francis R. Valeo, Secretary of the U.S. Senate, to officially report for the calendar or to place on the Calendar of the U.S. House of Representatives and the U.S. Senate respectively, that two-thirds of the State Legislatures have, pursuant to Article V of the Constitution, made application to Congress to call a convention for proposing amendments to the Constitution.

3) For such other relief as the Court may deem just and proper in the present case.

ROBERT L. MAURO,

Plaintiff.

STATE OF NEW JERSEY,
County of Monmouth, SS:

Robert L. Mauro, of full age being duly sworn according to law, upon his oath deposes and says:

1. I am the plaintiff in the within action, and am a citizen of the United States and of the State of New Jersey, residing at 20 Lippincott Avenue, Long Branch, New Jersey.

2. I have read the complaint and its allegations are true to the best of my knowledge and belief.

ROBERT L. MAURO.

Sworn to and subscribed before me this 5th day of March, 1973.

MIRIAM T. BONFORTE,
Notary Public of New Jersey.

U.S. District Court, District of Columbia,
Civil No. 447-73

APPLICATION FOR THREE JUDGE COURT
(Robert L. Mauro, Plaintiff, v. W. Pat Jennings, Clerk of the U.S. House of Representatives, and Francis R. Valeo, Secretary of the U.S. Senate, Defendants)

Plaintiff Robert L. Mauro hereby makes application for a three judge court to hear the within action.

ROBERT L. MAURO,
Plaintiff.

WASHINGTON, D.C.,
March 22, 1973.

HON. HAROLD H. TITUS, JR.,
U.S. Attorney for the District of Columbia,
Washington, D.C.

DEAR MR. TITUS: I am sending you a certified copy of a summons and complaint in a Civil Action No. 447-73 (U.S.D.C. D. D.C.) filed against W. Pat Jennings, Clerk, U.S. House of Representatives and Francis Valeo, Secretary of the U.S. Senate in the United States District Court for the District of Columbia and served upon me in my official capacity as Clerk of the House of Representatives by a U.S. Marshal on this date. I have also received this date by certified mail (987602) the Plaintiff's Application for a three judge court to hear this action and am attaching a certified copy of the Application.

In accordance with Title 2, U.S. Code, Sec. 118, I respectfully request that you take appropriate action, as deemed necessary, under the "supervision and direction of the Attorney General" of the United States in defense of this suit against The Congress of the United States.

I am also sending you a copy of the letter that I forwarded this date to the Attorney General of the United States.

With kindest regards, I am

Sincerely,

W. PAT JENNINGS,
Clerk, House of Representatives.

WASHINGTON, D.C.,
March 22, 1973.

HON. RICHARD G. KLEINDIENST,
Attorney General of the United States, Department of Justice, Washington, D.C.

DEAR MR. KLEINDIENST: I was this day served with the attached copy of a Summons and Complaint by the United States Marshall that was issued by the U.S. District Court for the District of Columbia. The summons and complaint are in connection with Robert L. Mauro v. W. Pat Jennings, Clerk of the U.S. House of Representatives, and Francis Valeo, Secretary of the U.S. Senate, Civil Action No. 447-73 (U.S.D.C. D. D.C.). I have also received this date by certified mail (987602) the Plaintiff's Application for a three judge court to hear this action.

In accordance with the provisions of 2 USC 118, I have sent certified copies of the summons, complaint and application in this action to the U.S. Attorney for the District of Columbia requesting that he take appropriate action under the supervision and direction of the Attorney General. I am also sending

you a copy of the letter I forwarded this date to the U.S. Attorney.

Sincerely,

W. PAT JENNINGS,
Clerk, House of Representatives.

BYELORUSSIAN INDEPENDENCE

(Mr. PATTEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PATTEN. Mr. Speaker, another year has passed since I last addressed the House about Byelorussia. It is sad to say that we are not any nearer to seeing the people of Byelorussia obtain their freedom.

Here was a land so full of promise; here were a people so full of hope. Now each day brings them closer to being completely dominated by the Soviet Union as to not exist at all.

Byelorussia was formed by hardy people who took an active part in the world about them. It became a crossroads in commerce between Eastern and Western Europe. Gathering new ideas from both areas, Byelorussia was soon an artistic and cultural center in its own right. But others were jealous of Byelorussia's achievements, and she had to continually fight off outsiders. Finally, the Russians conquered her. The Byelorussians tried every chance they could to break the chains of Russian rule. Finally, after World War I, they succeeded. On March 25, 1918, 55 years ago yesterday, the Byelorussian Democratic Republic was established. A constitution was set up which guaranteed the following freedoms: direct and secret ballot open to all, freedom of speech, press, and assembly; national and cultural autonomy of all minorities; an 8-hour workday, and the right to strike. Truly the Byelorussians wanted to be free and independent.

Freedom was shortlived in Byelorussia, however, as the Red army once more came sweeping through. Since then the Byelorussian people have been subjected to oppression, terror, deportations, and an almost overwhelming program of russification. Still the Byelorussian spirit clings to hope, and they have faith that someday they will be free again.

Mr. Speaker, 55 years of servitude have failed to destroy the Byelorussian spirit, and it should be an inspiration to all of use who live in a free society. I urge my colleagues to do all they can to work for the freedom of Byelorussia so that the ideals we all share might be allowed to flourish again in this tiny nation.

THE 1973 JOINT ECONOMIC COMMITTEE REPORT

(Mr. O'NEILL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. O'NEILL. Mr. Speaker, today, the distinguished chairman of the Joint Economic Committee and dean of the House, Hon. WRIGHT PATMAN, has filed the annual report of the Joint Economic Committee. This report is submitted each year in accordance with the requirements of the Employment Act.

I want to take this opportunity to commend this report to my colleagues in the House. It is a sharp and realistic exposure of the mismanagement of our economy by the administration. Let me allude briefly to some of the findings by this committee, which is made up of distinguished and able Members of both Houses.

While the administration claims that inflation will be held to 2½-percent rate in 1973, the facts are that we are in the midst of a runaway inflation that destabilizes our economy and our financial markets and threatens to bring about another recession.

The administration congratulates itself for the partial recovery from the low point that they got us into but totally ignores the tragic fact that the recession should never have taken place and that it cost the United States about \$180 billion in lost output.

Typical of mismanagement is the incredible seesawing on stabilization policy. After steadfastly ignoring the need for a wage-price policy, for 2½ years, the administration made a 180-degree turn and pushed the country into an overnight freeze followed by a partially effective program. Then, when things showed some improvement toward the latter half of the year, they abruptly switched course again and adopted a totally ineffective phase III program. The result is that our living costs are going up at a frightening rate and there is a great loss of confidence both at home and abroad in the capability of the administration to manage the economic affairs of the Nation.

Nowhere in the President's economic program is there any believable proposal for achieving full employment. Evidently, the White House is little troubled by the notion that many Americans are out of work who might very well be gainfully employed to their own advantage and to the advantage of the Nation.

The administration has proposed a budget which ignores the urgent needs of our social sector while proposing substantial increases in military outlays—in spite of the fact that we have achieved a cease-fire in Vietnam.

As the report indicates, the administration's economic program offers no constructive agenda for the Congress or the American people. In addition to the defects that I have touched upon it fails to increase low- and middle-income housing; to provide adequate mortgage financing at reasonable rates; to reduce the great inequities in our tax system. It offers no proposals for reforming our costly and inequitable welfare system, a situation that was ably documented by another Joint Economic Committee report issued today under the leadership of MARTHA GRIFFITHS, the able chairwoman of the Joint Economic Committee's Fiscal Policy Subcommittee.

It cuts back on programs that would reduce poverty and offers no solutions for the deficiencies and rigidities that exist in our economy.

This is a most welcome document to those of us who are confronted daily with the grim realization that we must do the job here. The administration has failed and is failing to handle the job. It is up

to us to decide the priorities in our Federal programs. It is up to us to decide on the stabilization measures needed. It is up to us to reform the tax programs. It is up to us to reverse the drastic scuttling of our poverty programs and resume the course of equitable, decent, and humane public policy.

REPORT OF JOINT ECONOMIC COMMITTEE

(Mr. PATMAN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. PATMAN. Mr. Speaker, I filed with the Congress today the 1973 Joint Economic Report of the Joint Economic Committee. The committee is required by Public Law 304 to file a report on the President's economic policy and to make recommendations to the Congress by March 1. However, due to the late filing of the President's Economic Report this year, House Joint Resolution 299 extended the committee's filing date to March 31.

I commend to my colleagues the findings of our report. Given the resurgence of inflationary pressures and the possibility of a credit crunch later this year, our economic prospects toward the end of 1973 are highly uncertain. The Joint Economic Committee recommends a comprehensive policy to keep the economy on a course of economic growth with relative price stability that will reduce unemployment to 4 percent within 12 months.

A responsible fiscal policy that can be achieved with a budget ceiling of approximately \$268 billion should be accompanied by a monetary policy that accommodates continued growth and maintains or lowers current interest rates. The committee urges the Congress to reorder priorities within the budget ceiling as the spending mix proposed by the administration is totally unacceptable and ignores many of our most pressing human needs. We also recommend a more vigorous price-incomes policy. The recent inflation well in excess of a 6-percent annual rate is evidence that phase III has been an utter failure. The budget and incomes policy issues will be before the Congress in the immediate future and the analysis of the committee should be valuable to us.

The report, in addition to the majority recommendations, also contains supplementary views, minority views, and joint views on international economic policy.

INDIAN SELF-DETERMINATION ACT OF 1973

(Mr. MEEDS asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. MEEDS. Mr. Speaker, I am introducing today four bills designed for the better administration of Indian affairs, improved tribal government and economic progress, and greater participation of Indians in planning their own future.

The four bills are the "Indian Self-Determination Act of 1973" expanding

and facilitating the authority of Indian tribes to contract for BIA and Indian health services and programs; the "Indian Counsel Authority" proposed to increase the protection of Indian trust assets and eliminate conflicts of interest within the U.S. administration of Indian affairs; a bill to create an Assistant Secretary of the Interior for Indian Affairs; and a bill to amend or repeal inhibiting laws governing Indian affairs.

These bills are, in large part, adopted from the Indian legislative proposals submitted by the administration by executive communication of March 15. My four bills reach six of the seven areas covered by the administration's proposals. However, I have found it necessary to make several substantive changes in the proposals to make them conform to Indian requests and to better implement the oft-stated administration goal of Indian self-determination. In fact, my self-determination bill stands in lieu of three of the administration proposals which either fall short of the necessary tribal flexibility or endanger tribal stability.

I have introduced these bills primarily because the concept and intent of the proposals are good and is, in part, responsive to Indian-identified solutions to Indian problems and needs. As I said, I have made changes where appropriate and necessary. I will not, as yet, introduce a major important proposal expanding credit opportunities for Indians as I am not satisfied with many aspects of that administration proposal.

I also feel it necessary to introduce the legislation to gage the sincerity and will of the administration in moving forward with a sound, progressive Indian program. In a press conference of March 16 announcing the administration proposals, Under Secretary of the Interior John C. Whitaker stated that, had these bills been introduced and acted upon, the Wounded Knee seizure just might have been averted. He stated that—

We need congressional action—not inconclusive hearings or an expression of sentiment at a press conference.

I sincerely hope that Mr. Whitaker and this administration do not view these proposals, whatever their value, as a panacea for the problems which beset Indians. It is clear that they will not solve all of the problems which Indians experience. It is unfortunate that Mr. Whitaker should take that position. As he becomes more familiar with Indians and their problems, he will find that there is ample blame for the administration and the Congress—past and present—to share for the mismanagement of Indian affairs extending over 100 years.

To attempt to make this a political issue is a serious mistake. These are extremely difficult problems that will necessitate bipartisan efforts in the Congress and cooperation—not recrimination—from the administration. Little is served by political rhetoric or "an expression of sentiment at a press conference."

I want to assure the Members of the House and the Indian people that the Subcommittee on Indian Affairs intends to take aggressive action on these proposals and on the many other problem

areas in Indian affairs. I hope that the administration, having offered the proposals, will cooperate in arriving at the enactment of sound legislation and not forget the proposals. There follows the text of the first bill:

H.R. 6106

A bill to provide for the creation of the Indian Trust Counsel Authority, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in reaffirming the trust and treaty relationship between the United States of America and the American Indians, and between the United States and the Alaska Natives, which Indians and Natives are hereinafter referred to as "Indians", the purpose of this Act is to establish an Indian Trust Counsel Authority to provide independent legal counsel and representation for the preservation and protection of the natural resource rights of Indians.

SEC. 2. (a) The Indian Trust Counsel Authority, hereinafter referred to as the Authority, is established as an independent agency in the Executive Branch.

(b) The Authority shall be governed by a Board of Directors composed of three members to be appointed by the President by and with the advice and consent of the Senate.

(c) At least two of the members of the Board of Directors shall be Indians.

(d) The terms of office of members of the Board of Directors shall be four years, except that, of the first three members appointed, one shall be appointed for a two-year term, one shall be appointed for a three-year term, and one shall be appointed for a four-year term. A member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remainder of such term. Upon the expiration of his term of office, a member shall serve until his successor has been appointed and qualified. A member of the Board of Directors may be removed by the President only for inefficiency, neglect of duty, or malfeasance in office.

(e) The President shall designate one of the Directors to serve as Chairman at his pleasure.

(f) The members of the Board of Directors shall receive pay at the daily equivalent of the rate provided for grade GS-18 in section 5332 of title 5, United States Code, for each day they are engaged in the business of the Authority, and shall be allowed travel expenses, including a per diem allowance as authorized by section 5703 of title 5, United States Code, in connection with their services for the Authority.

SEC. 3. The Board of Directors shall convene at the call of the Chairman, but must convene at least once each quarter, to set policy for the Authority and review its activities. The Board of Directors shall report to the President and the Congress annually on the activities of the Authority.

SEC. 4. The Board of Directors shall, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, appoint and prescribe the duties of a chief legal officer for the Authority, who shall have the title of Indian Trust Counsel, and who shall be paid at a rate equal to that provided for in level V of the Executive Schedule (5 U.S.C. 5316), and a Deputy Indian Trust Counsel, who shall be paid at a rate not in excess of that provided for grade GS-18 in section 5332 of title 5, United States Code.

SEC. 5. (a) The Board of Directors shall appoint, fix the pay of, and prescribe the duties of such attorneys as it deems necessary after consulting with the Indian Trust Counsel.

(b) The Board of Directors shall appoint

and fix the compensation of such special counsel and experts as it deems necessary.

(c) Attorneys and special counsel appointed under this section may, at the direction of the Authority, appear for or represent the Authority in any case in any court, before any commission, or in any administrative proceeding.

(d) The Board of Directors may, in the event of a conflict between parties requesting the assistance of or the representation of the Authority under the provisions of section 8 or 9 hereof, hire special counsel or experts to assist or represent one or all of the parties.

SEC. 6. The Board of Directors shall, subject to the provisions of title 5, United States Code, appoint such employees as it deems necessary in exercising its powers and duties.

SEC. 7. The Authority, in the exercise of its functions, shall be free from control by any Executive Department.

SEC. 8. The Authority, with the consent of an aggrieved Indian, Indian tribe, band or other identifiable group of Indians, is authorized to render legal services in regard to rights or claims of the Indians to natural resources, including, but not limited to, rights to land, rights to the use of water, timber, and minerals, and rights to hunt or fish, within the United States' trust responsibility owing to the Indians, which services are now rendered by the Department of the Interior or by the Department of Justice, but nothing in this Act shall absolve the Department of the Interior and the Department of Justice of their responsibilities to the Indians, including those which derive from the trust relationship and any treaties between the United States and any Indian or Indian tribe: *Provided*, That the Department of Justice as of the effective date of this Act or as soon thereafter as practicable, is relieved of its responsibility to represent Indians or Indian tribes with regard to their rights or claims to natural resources, including, but not limited to, rights to land, rights to the use of water, timber, and minerals, and rights to hunt and fish. The legal services performed pursuant to this section may include, but shall not be limited to, the investigation and inventorying of Indians' land and water rights, and the preparation and trial and appeal of cases in all courts, before Federal, State, and local commissions, and in all administrative proceedings.

SEC. 9. The Authority, with the consent of an aggrieved Indian, Indian tribe, band or other identifiable group of Indians, acting in the name of the United States as trustees for the Indians, may initiate and prosecute to judgment in all courts of the United States suits against the United States, its officers and employees, and in all courts of the United States and of the States, suits against any of the States, their subdivisions, departments and agencies, or against persons and corporations, public or private, all actions in law and equity for the protection, preservation, utilization, conservation, adjudication or administration of natural resources or interests therein had or claimed by the Indians, including, but not limited to, rights to land, rights to the use of water, timber, and minerals, and rights to fish and hunt. The Authority is authorized to prosecute appeals in all courts of the United States and of the States, and to intervene in any Federal, State, or local administrative proceeding in order to protect the rights of the Indians. The United States waives its sovereign immunity from suit in connection with litigation initiated by the Authority under this section. Any suit against the United States, its officers, and employees shall be tried to the court without a jury.

SEC. 10. The powers granted to the Authority by this Act shall not extend to the filing or prosecution of or intervention in any action, claim, or other proceeding against the United States relating to any matter as

to which a claim has been filed or could have been filed under the Indian Claims Commission Act of 1946, as amended, or any other special statute authorizing a claims suit to be brought by Indians against the United States but shall extend to section 1346(a)(2) and 1491 of title 18, United States Code: *Provided, however*, That the Authority may assist any Indian tribe requesting such assistance in its claim pending before the Indian Claims Commission.

SEC. 11. The Authority is authorized to:

(1) Make such rules and regulations as it deems necessary to carry out its functions.

(2) Request from any department, agency, or independent instrumentality of the Government any information, personnel, services, or materials it deems necessary to carry out its functions under this Act; and each such department, agency or instrumentality is authorized to cooperate with the Authority and to comply with a request to the extent permitted by law, on a reimbursable or non-reimbursable basis.

(3) Receive and use funds or services donated by others.

(4) Make such expenditures or grants, either directly or by contract, as may be necessary to carry out its responsibilities under this Act.

SEC. 12. There are authorized to be appropriated to the Authority created herein such sums as may be necessary to carry out the provisions of this Act.

The Indian Trust Counsel Authority bill will establish an independent agency in the executive branch with three directors, two of whom would be Indian, appointed by the President with the advice and consent of the Senate. The Board of Directors would appoint a Trust Counsel, Deputy, and such other attorneys and special counsel necessary to carry out its functions. It would be free of control of any executive department.

Section 8 provides that the Authority, at the request of the Indian or Indian tribe, is authorized to provide the broadest range of legal service and representation with respect to Indian claims or rights to natural resources within the trust responsibility. Neither Justice nor Interior would be absolved of its trust responsibility to Indians except that Justice would no longer be required to represent Indians in natural resource cases.

Section 9 authorizes the Authority, in the name of the United States as trustee, to sue any party, including the United States, to protect the trust interest of the Indians and to appeal or intervene in any such case. The sovereign immunity of the United States would be waived for the purposes of the section.

Section 10 prohibits the Authority from representing Indians in claims before the Indian Claims Commission except that it could provide certain incidental assistance in this regard.

While there are provisions of the bill which have met with Indian objections or questions which may require amendment, the concept has received wide Indian support.

The text of the second bill follows:

H.R. 6103

A bill to promote maximum Indian participation in the government of the Indian people; to provide for the full participation of Indian tribes in certain programs and services conducted by the Federal Government for Indians and to encourage the development of the human resources of the Indian people; and for other purposes

Be it enacted by the Senate and House

of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Indian Self-Determination Act of 1973".

CONGRESSIONAL FINDINGS

SEC. 2. The Congress, after careful review of the Federal Government's historical and special legal relationship with, and resulting responsibilities to, American Indian people, finds that—

(1) the prolonged Federal domination of Indian service programs has served to retard rather than enhance the progress of Indian people and their communities by depriving Indians of the full opportunity to develop leadership skills crucial to the realization of self-government, and it has denied to the Indian people an effective voice in the planning and implementing of programs for the benefit of Indians which are responsive to the true needs of Indian communities; and

(2) the Indian people will never surrender their desire to control their relationships both among themselves and with non-Indian governments, organizations and persons.

DECLARATION OF POLICY

SEC. 3. (a) The Congress hereby recognizes the obligation of the United States to respond to the strong expression of the Indian people for self-determination through maximum involvement and participation in, and direction of, Federal services to Indian communities which are more responsive to the needs and desires of those communities.

(b) The Congress declares its commitment to the maintenance of the Federal Government's unique and continuing relationship with and responsibility to the Indian people through establishment of a meaningful Indian self-determination policy which will permit an orderly transition from Federal domination of programs for and services to Indians to effective and meaningful participation of the Indian people in the planning, conduct, and administration of those programs and services.

DEFINITIONS

SEC. 4. For the purposes of this Act, the term—

(a) "Indian" means an Indian, Eskimo, or Aleut person who is a member of a tribe, band, nation or community, including any Alaska Native Community as defined in the Alaska Native Claims Settlement Act, for which the Federal Government provides special programs and services because of their identity as Indians;

(b) "Indian tribe" means any Indian tribe, band, nation, or other organized group or community, including any Alaska Native community as defined in the Alaska Native Claims Settlement Act, for which the Federal Government provides special programs and services because of its Indian identity; and

(c) "tribal organization" means the elected governing body of any Indian tribe or any legally established organization of Indians which is controlled by one or more such bodies or which is controlled by a board of directors elected or selected by one or more such bodies (or elected by the Indian population to be served by such organization). Such an organization shall include the maximum participation of Indians in all phases of its activities.

CONTRACTS BY THE SECRETARY OF THE INTERIOR

SEC. 5. The Secretary of the Interior is authorized, in his discretion and upon the request of any Indian tribe, to enter into a contract or contracts with any tribal organization of any such Indian tribe to plan, conduct, and administer programs, or portions, thereof, provided for in the Act of April 16, 1934 (48 Stat. 596), as amended and any other program or portion thereof which the Secretary of the Interior is authorized to administer for the benefit of Indians under

the Act of November 2, 1921 (42 Stat. 208), and any Act subsequent thereto.

CONTRACTS BY THE SECRETARY OF HEALTH, EDUCATION, AND WELFARE

SEC. 6. The Secretary of Health, Education, and Welfare is authorized, in his discretion and upon the request of any Indian tribe, to enter into a contract or contracts with any tribal organizations of any such Indian tribe to carry out any or all of his functions, authorities, and responsibilities under the Act of August 5, 1954 (68 Stat. 674), as amended.

GRANTS TO INDIAN TRIBAL ORGANIZATIONS

SEC. 7. The Secretaries of the Interior and of Health, Education, and Welfare are each authorized, upon the request of any Indian tribe, to make a grant or grants to any tribal organization of any such Indian tribe for planning, training, evaluation, and other activities specifically designed to make it possible for such tribal organization to enter into a contract or contracts pursuant to section 5 and 6 of this Act.

DETAIL OF PERSONNEL

SEC. 8. (a) The Secretaries of the Interior and of Health, Education, and Welfare are each authorized, upon the request of any tribal organization, to detail any civil service employee serving under a career or career-conditional appointment for a period of up to one hundred and eighty days to such tribal organization for the purpose of assisting such tribal organization in the planning, conduct, or administration of programs under contracts or grants made pursuant to section 5, 6, or 7 of this Act. The appropriate Secretary may, upon a showing by a tribal organization of a continuing need for an employee detailed pursuant to this section, extend such detail for a period not to exceed ninety days.

(b) The Act of August 5, 1954 (68 Stat. 674), as amended, is further amended by adding a new section 8 after section 7 of the Act, as follows:

"Sec. 8. In accordance with subsection (d) of section 214 of the Public Health Service Act (58 Stat. 690), as amended, upon the request of any Indian tribe, band, group, or community, personnel of the Service may be detailed by the Secretary for the purpose of assisting such Indian tribe, group, band, or community in carrying out the provisions of contracts with, or grants to, tribal organizations pursuant to sections 5, 6, or 7 of the Indian Self-Determination Act of 1973: *Provided*, That the cost of detailing such personnel is taken into account in determining the amount to be paid to such tribal organization under such contract or grant, and that the Secretary shall modify such contract or grant pursuant to subsection (c) of section 9 of the Indian Self-Determination Act of 1973 to effect the provisions of this section."

(c) Paragraph (2) of subsection (a) of section 6 of the Military Selective Service Act of 1967 (81 Stat. 100), as amended, is amended by inserting after the words "Environmental Science Services Administration" the words "or who are assigned to assist Indian tribes, groups, bands, or communities pursuant to the Act of August 5, 1954 (68 Stat. 674), as amended."

ADMINISTRATIVE PROVISIONS

SEC. 9. (a) Contracts with tribal organizations pursuant to sections 5 and 6 of this Act shall be in accordance with all Federal contracting laws and regulations except that, in the discretion of the appropriate Secretary, such contracts may be negotiated without advertising and need not conform with the provisions of the Act of August 24, 1935 (49 Stat. 793), as amended.

(b) Payments of any grants or under any contracts pursuant to sections 5, 6, or 7 of this Act may be made in advance or by way of reimbursement and in such install-

ments and on such conditions as the appropriate Secretary deems necessary to carry out the purposes of this Act.

(c) Notwithstanding any provision of law to the contrary, the appropriate Secretary may, at the request or with the consent of a tribal organization, revise or amend any contract or grant made by him pursuant to section 5, 6, or 7 of this Act with such organization as he finds necessary to carry out the purposes of this Act.

(d) The appropriate Secretary may, in his discretion, enter into contracts pursuant to section 5 and 6 of this Act with tribal organizations, by negotiation, without advertising, for the construction or repair of buildings, roads, sidewalks, sewers, mains, or similar items: *Provided*, That nothing in this Act shall be construed as authorizing or requiring a tribal organization to enter into an agreement, directly or indirectly, with a non-Indian party for the construction of buildings, roads, sidewalks, sewers, mains, or similar items without compliance with requirements of advertising and competitive bidding if the same would have been required had the agreement with the non-Indian party been entered into directly by the United States.

(e) In connection with any contract or grant made pursuant to section 5, 6, or 7 of this Act, the appropriate Secretary may permit a tribal organization to utilize, in carrying out such contract or grant, existing school buildings, hospitals, and other facilities and all equipment therein or appertaining thereto and other personal property owned by the Government within his jurisdiction under such terms and conditions as may be agreed upon for their use and maintenance.

SEC. 10. The Secretaries of the Interior and of Health, Education, and Welfare are each authorized to perform any and all acts and to make such rules and regulations as may be necessary and proper for the purpose of carrying out the provisions of this Act.

SEC. 11. (a) The appropriate Secretary shall promulgate regulations relative to this Act no later than six months from the date of enactment of this Act.

(b) No later than sixty days prior to the promulgation of such regulations, the appropriate Secretary shall publish the proposed regulations in the Federal Register. No later than thirty days prior to the promulgation of such regulations, the appropriate Secretary shall provide, with adequate public notice, the opportunity for hearings on the proposed regulations, once published, to all interested persons.

SEC. 12. Nothing in this Act shall be construed as authorizing or requiring the termination of any existing trust responsibility of the United States with respect to the Indian people.

The Indian Self-Determination Act authorizes the Secretary of the Interior to contract with Indian tribes and organizations to carry out his functions and authorities under the Johnson-O'Malley Act, the Snyder Act, and any subsequent acts. The Secretary of HEW is similarly authorized to contract his Indian health functions to Indian tribes and organizations.

The bill also provides for grants to such organizations to aid them in planning and implementing such contracts. It authorizes the detail of certain BIA and IHS personnel, including commissioned PHS personnel, to such organizations for up to 270 days; provides for limited exemption of such contracts from certain Federal contracting laws which might prove too restrictive on Indian contractors; authorizes such contractor to use

Federal buildings, facilities, equipment, and personal property in carrying out the contract, and has a saving clause with respect to the continuation of the trust responsibility.

In testimony last year by Indian witnesses on the administration's "assumption and local control" proposal, it was apparent that the Indian people felt that this was another radical swing of the pendulum in Indian affairs without affording them the opportunity of experience in the middle ground. To them, Federal Indian policy seems to swing from rank paternalism to cruel termination. On the other hand, the proposed amendment of the Johnson-O'Malley Act does not go far enough. My proposal will provide this badly needed interim experience in Indian control of Indian programs.

The text of the third bill follows:

H.R. 6104

A bill to amend certain laws relating to Indians

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That any person owning or having in his charge or possession any horses, mules, burros, cattle, goats, sheep, or swine and who permits, drives, or otherwise conveys such livestock to range and feed on any trust or restricted land of any Indian or Indian tribe without the consent of said Indian or Indian tribe or otherwise to trespass thereon, shall be liable to a penalty of \$5 per day for each animal in trespass, together with the reasonable value of the forage consumed during the period of trespass and any cost of gathering, handling, and caring for said livestock and cost of collecting the amount due under the authority of this section. Any livestock trespassing on any trust or restricted land may be impounded by the Secretary of the Interior. Notice of the impoundment shall be given as prescribed by regulation of the Secretary. Any animals impounded may be claimed by the owner within the time specified in the notice, upon payment of \$5 per day for each animal impounded, the reasonable value of the forage consumed, and other costs allowed under authority of this section. An animal not so claimed shall be sold and net proceeds thereof, after payment of all necessary expenses and costs and the deduction of the \$5 per day penalty and forage charge, shall be paid to the owner if claim and proof of ownership satisfactory to the Secretary are submitted within six months after the date of sale. The \$5 per day penalty and forage charge, and the net proceeds of the sale if not paid to the owner of the animal, shall be deposited in the Treasury of the United States to the credit of the tribe, if tribal land is involved, or paid to the individual Indian owners, if individually owned land is involved. Any unbranded livestock over one year of age found running at large on trust or restricted land may be presumed to be in trespass and shall be subject to the provisions of this section.

Sec. 2. Indian tribal governments may enact laws and ordinances relating to the issuance of traders' licenses on their particular reservations. When a tribe has enacted such laws and ordinances, if it is so provided therein, the following Federal statutes relating to traders' licenses shall be inoperative as to that particular reservation: section 5 of the Act of August 15, 1876 (19 Stat. 200; 25 U.S.C. 261); section 1 of the Act of March 3, 1901, and section 10 of the Act of March 3, 1903 (31 Stat. 1066; 32 Stat. 1009; 25 U.S.C. 262); section 2132 of the Revised Statutes (25 U.S.C. 263, section 3 of the Act of June 30, 1834 (4 Stat. 729)); section 2133 of the Revised Statutes (25 U.S.C. 264, section 4 of

the Act of June 30, 1834 (4 Stat. 729)), except that no business transaction, property or use of property shall be subject to taxation by virtue of this provision or by any tribe's laws or ordinances making Federal statutes relating to traders' licenses inoperative on its particular reservation.

Sec. 3. The following statutes or parts of statutes are hereby repealed:

(1) Section 2117 of the Revised Statutes, as amended, (25 U.S.C. 179).

(2) Section 2078 of the Revised Statutes (25 U.S.C. 68) and section 14 of the Act of June 30, 1834 (4 Stat. 73).

(3) Section 437 of title 18, United States Code, (62 Stat. 703).

(4) The Act of June 19, 1939 (ch. 210, 53 Stat. 840) (25 U.S.C. 68a, 87a).

The bill "to amend certain laws relating to Indians" is offered to eliminate some of the day-to-day irritations and complaints of the Indian people on the reservation and to transfer authority from the Federal Government to the tribal government.

Section 1 reforms the 1902 Federal law prohibiting and penalizing livestock trespass on Indian lands which has proven inadequate to control this problem. It increases the penalty for livestock trespass from \$1 per day per head to \$5 per day per head; imposes forage charges and other costs; authorizes impoundment and sale of such animals if not claimed, and disposition of the proceeds.

It is interesting to note, in view of the administration's policy of Indian self-determination, that the power of consent to such trespass is placed with the Secretary of the Interior in the administration's bill while the obsolete 1902 law placed it in the aggrieved Indian tribe's hands. My bill restores this power to the Indians.

Section 2 authorizes tribal governments to enact their own laws or ordinances regulating trading on Indian reservations. In the event of such tribal regulation, Federal laws licensing traders on Indian reservations are suspended and made inoperative on that particular reservation with the proviso that such suspension will not affect the tax status of Indians on the reservation.

Section 3 repeals certain obsolete laws regulating trade between Indians and Federal employees. While this is generally desirable, paragraph (3) of that section repeals a law prohibiting a Federal employee from having an interest in government or Indian contracts on behalf of Indians. I intend to examine that very closely.

The text of the fourth bill follows:

H.R. 6105

A bill to establish within the Department of the Interior the position of Assistant Secretary of the Interior for Indian Affairs, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there shall be hereafter in the Department of the Interior, in addition to the Assistant Secretaries now provided for by law, an Assistant Secretary of the Interior for Indian Affairs, who shall be appointed by the President by and with the advice and consent of the Senate, who shall be responsible for such duties as the Secretary of the Interior shall prescribe, and who shall receive compensation at the rate now or hereafter prescribed by law for Assistant Secretaries of the Interior.

"Sec. 2. Section 5315, title 5, United States Code, is amended by striking the figure "(6)" at the end of item (18) and by inserting in lieu thereof the figure "(7)".

"Sec. 3. Section 1, title 25, United States Code (4 Stat. 564), is hereby repealed.

The Assistant Secretary legislation would create an additional Secretary of the Interior for Indian Affairs and abolish the position of Commissioner of Indian Affairs. Although the executive communication transmitting this proposal indicates that the duties of the new Assistant Secretary would be limited to Indian affairs, their proposed bill does not make this statutory.

We are eliminating a position whose sole responsibility and identity is Indian affairs. Indian witnesses have stressed the need to make this a matter of law to avoid the possibility that this position will become the catchall of miscellaneous functions within Interior. If the administration can make such a statement in their communication, they should have no objection to making it a matter of law. I have so proposed.

Mr. Speaker, with the appropriate revisions I have recommended and with my intent to hold comprehensive hearings on these proposals soon, I offer them for introduction and urge enactment.

INTENSIVE FOREST MANAGEMENT

(Mr. WYATT asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. WYATT. Mr. Speaker, intensive forest management is the key, not only to increasing U.S. timber production, but also to improving the forest environment for wildlife habitat, hunting, fishing, camping, and every conceivable form of forest recreation.

It is often easiest to define a term by saying what it is not. Intensive forest management is not a method of stripping our forests of their trees. Nor is it a concept which excludes all activities other than tree harvesting.

Lack of forest management implies letting the life cycle of a tree take its course, leaving the trees to the elements, to resist age, insects, disease, rot, wind, and fire and then to die wastefully, neglected, and unutilized.

Intensive management is one of the crowning achievements of the science of forestry. Many of its methods are those of the gardener. Weak and inferior trees are thinned to let in the sunlight and remove competition for hardier specimens. Seedlings are planted and given the benefit of fertilizers and chemical protection from forest pests. Genetic selection insures that only the hardiest and fastest growing species populate the new forest.

Intensive management also means that when a tree is harvested another is planted immediately to take its place and that the new growth is properly spaced to maximize the growth of wood fiber. When all methods of intensive management are properly applied, the result can be three to five times the production of wood fiber possible in an unmanaged forest.

We need intensive management on every acre of land capable of sustaining commercial forests.

SALUTE TO VPI, NIT CHAMPIONS

(Mr. WAMPLER asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and include extraneous matter.)

Mr. WAMPLER. Mr. Speaker, I want to call the attention of my colleagues to the wonderful victory enjoyed by the basketball team from my alma mater, the Virginia Polytechnic Institute and State University, Blacksburg, Va.

Yesterday, in tense and exciting overtime play, Virginia Tech defeated Notre Dame by one point, to win the National Invitational Tournament. This is the first national championship ever to be won by Virginia Tech in any sport.

Congratulations are in order for Coach Don DeVoe and the entire team. Their execution of the game was brilliant. They were good sports from start to finish, and showed remarkable persistence and discipline.

You can well imagine the sense of pride all Virginians feel in this great victory won through the proper application of skill and dogged determination. They have brought distinction in the best American tradition to Virginia Polytechnic Institute and State University. I salute them.

CRIMINAL CODE REFORM ACT OF 1973

(Mr. HUTCHINSON asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. HUTCHINSON. Mr. Speaker, last Thursday I introduced with 14 cosponsors H.R. 6046, the Criminal Code Reform Act of 1973, prepared by the Department of Justice to revise the Federal criminal code. This bill had its origin in Public Law 89-801 wherein Congress created the National Commission on Reform of Federal Criminal Laws to review the existing criminal code and make recommendations for its reform.

Following the report of the National Commission on January 7, 1971, the President instructed the Department of Justice to make an independent evaluation of the Commission's recommendations, analyze the existing criminal code, and thereafter prepare appropriate legislation encompassing comprehensive reform of Federal crime laws. The present bill is the result of that effort, over more than 2 years, by a team of experienced attorneys.

The bill is in three titles. Title I contains the essence of the bill. It consists of three parts setting forth, first, general principles of criminal law, second, a description of offenses and defenses, and third, sentencing. Among the innovations made by this title the foremost is the approach to the treatment of Federal jurisdiction.

Instead of including the facts establishing such jurisdiction as an essential element of an offense, as does present law, the bill defines the offense in terms

of the culpable misconduct alone, while listing separately the circumstances giving rise to Federal jurisdiction. This approach, similar to the one recommended by the National Commission, is designed to enable the factfinder to concentrate on the alleged criminal conduct, for example, fraud, without having simultaneously to consider whether that conduct involved a use of some Federal instrumentality, such as the mails or an interstate wire facility, so as to give the Federal court jurisdiction. That question would be determined independently.

The bill also makes basic changes in the pattern of existing law by defining, for the first time, certain general defenses to alleged criminal activity and by replacing the current crazy-quilt of sentences and fines with a system whereby offenses are classified for purposes of imprisonment and fines into nine categories. Titles II and III of the bill primarily contain technical provisions as to conforming amendments, severability, and effective date, but title II also includes some substantive sections with respect to sanity of the defendant, parole, and juvenile delinquency.

Mr. Speaker, the need for a thorough overhaul of the Federal penal code is, as a result of the National Commission's groundbreaking and valuable work, commonly recognized as beyond dispute. I am, therefore, pleased to have introduced H.R. 6046 as a means of furthering the Congress' long overdue consideration of that subject. Of course, by introducing this bill I do not intend to convey my concurrence in all or any specific part thereof. Indeed, it is too early for such a final appraisal which must come only at the end of extensive hearings, consideration and debate. Nonetheless the bill does represent a solid springboard from which to begin our labors and I urge the Judiciary Committee to commence holding hearings with regard to the bill as soon as possible.

THE NUECES RIVER PROJECT

(Mr. DE LA GARZA asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. DE LA GARZA. Mr. Speaker, the 15th Congressional District of Texas has serious water problems, some of which would be solved by the Nueces River project, which has been determined to be a feasible way of providing municipal and industrial water to the Coastal Bend area.

When the Bureau of Reclamation issued its feasibility report two alternate sites were presented for the project's major storage structure. One is identified as the Choke Canyon Dam and Reservoir, the other as the R & M Dam and Reservoir.

Extensive studies have shown Choke Canyon to be the more economically feasible in meeting the area's water needs. This project would be located on the Frio River, a tributary of the Nueces, about 70 miles north of Corpus Christi. It would consist of the dam and reservoir with associated recreation and sport facilities. The reservoir, extending upstream about 34 miles, would have a controlled

capacity of 700,000 acre-feet and a surface area of 26,000 acres.

The State of Texas has found the Nueces River project, with Choke Canyon Dam and Reservoir as the storage and regulatory facilities, to be feasible and in the public interest. The city of Corpus Christi supports the project with Choke River Dam and Reservoir.

In view of these facts, I have introduced a bill with my colleagues, Representatives JOHN YOUNG and ABRAHAM KAZEN, authorizing the Bureau of Reclamation to construct, operate, and maintain this project. I am requesting the chairman of the Interior and Insular Affairs Committee to hold on-site hearings on the Choke Canyon project.

Mr. Speaker, it is my hope that we can move forward expeditiously on this project, so vitally important to a growing section of south Texas.

COMPOSITION OF COMMITTEE ON BANKING AND CURRENCY

Mr. O'NEILL. Mr. Speaker, I offer a resolution (H. Res. 324) and ask unanimous consent for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 324

Resolved, That during the remainder of the Ninety-third Congress, the Committee on Banking and Currency shall be composed of forty members.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

The resolution was agreed to.

A motion to reconsider was laid on the table.

TO AMEND SECTION 14(B) OF THE FEDERAL RESERVE ACT

(Mr. WIDNALL asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. WIDNALL. Mr. Speaker, I have introduced today a bill H.R. 6092 to amend section 14(b) of the Federal Reserve Act, as amended, to extend for 2 years the authority of Federal Reserve banks to purchase U.S. obligations directly from the Treasury.

The proposed legislation would extend for an additional 2 years, from June 30, 1973 to June 30, 1975, the temporary authority under which Federal Reserve banks may purchase public debt obligations directly from the Treasury in an amount not to exceed \$5 billion outstanding at any one time. The present direct purchase authority was enacted during World War II and has since been extended from time to time on a temporary basis. The last extension was in 1971 and the authority will expire on June 30, 1973.

The authority has been used in recent years only in periods just prior to tax payment dates. Its existence permits the Department to operate with considerably lower cash balances than would otherwise be required. The authority was utilized once in both 1971 and 1972. The availability of the direct purchase au-

thority is also important as a standby means of providing a ready source of funds in the event of a disruption in the private financial markets due to a serious national emergency or a nuclear attack on the United States. The attached table demonstrates that the authority has been sparingly used in the past.

DIRECT BORROWING FROM FEDERAL RESERVE BANKS
1942 THROUGH 1972

Calendar year	Days used	Maximum amount at any time (millions)	Number of separate times used	Maximum number of days used at any 1 time
1942	19	\$422	4	6

1 None.

HELP FOR PREPARATION OF TAX RETURNS

The SPEAKER pro tempore (Mr. MATSUNAGA). Under a previous order of the House, the gentleman from Missouri (Mr. RANDALL) is recognized for 10 minutes.

Mr. RANDALL. Mr. Speaker, we are nearing the season when the preparation of income tax returns will occupy the time of a lot of our constituents and will try the patience of millions of American taxpayers.

In performing this tedious chore, our citizens have always in the past—and I am sure they will this year—cheerfully accept what we in America know as a unique institution, it is the American system of self-assessment for the taxes due the Federal Government.

However, in recent years more and more taxpayers—and the count is now up to 36 million—have felt the need to have to pay someone to complete their tax returns.

This situation arises from two roots. First, over the years it seems our tax forms have become terribly complex, defying the complete or accurate understanding of our ordinary taxpayers.

Then, second, taxpayer assistance as far as the Internal Revenue Service is concerned, is, in the over-all, just token or very minimal in nature. It does not even begin to meet the needs of the average taxpayer.

I point especially to the situation in non-urban or the rural areas of this country.

If I may digress for a moment I will mention one instance where in the past there was a part time Internal Revenue agent assigned to one county. Taxpayers would come to seek assistance from the two or three adjoining counties. Now this year the IRS agent will show up for a short period of time, but those seeking help travel further from more removed areas. As a result of this lack or failure of assistance by the Department, there is a whole new industry that has sprung up across this country to fill the void or meet the demand for assistance in tax return preparation.

We do have a complicated tax situation at the Federal level consisting of baffling sets of forms, and when one couples that with inadequate taxpayer assistance, my conclusion is that these factors hit hardest at those who can least afford it, and that means the low- and low-middle income taxpayers and pensioners, and some very small business people in the rural areas—and especially those taxpayers who live in the small towns of America.

In the 92d Congress the Legal and Monetary Affairs Subcommittee of the House Committee on Government Operations held 3 days of hearings at that time on a bill, H.R. 7590, which had two purposes: One, to require additional emphasis be placed on taxpayer assistance by the Internal Revenue Service; and, two, to propose the issuance of regulations to govern the army—and I use that word advisedly—army of commercial tax preparers that have grown and grown because of these complex tax laws and our difficult tax-reporting system. I do not know what the reason may be for their failure or omission but there has been no report as requested from the Internal Revenue Service. There was no departmental report submitted on H.R. 7590 prior to adjournment last year.

At the conclusion of the hearings last year the Treasury Department, recognizing the need for corrective action, advised that the problems concerning tax-return preparers were under study and that draft legislation was being prepared. Bear in mind, this is the Internal Revenue Service's own conclusion.

Many months elapsed in the last Congress and so far, nearly 3 months this year, without a report from IRS. Another tax season has rolled around, and still the promised specific legislative draft has not been received. Obviously then taxpayers this year must meet their deadlines again while the Department does nothing more than study the matter.

Today, now, we still have no relief in the form of better taxpayer assistance. Actually, we have less help from the Internal Revenue Service than we had last year.

Meanwhile there exists this army of tax preparers that I spoke of a moment ago. Bear in mind they are not all bad, but on the other hand there are a lot of them that are unscrupulous. Many of these so-called or self-styled "tax experts," are incompetent. Then too there is plenty of evidence to indicate there are some illegal practices. Such practices reflect unfavorably upon the careful and competent tax preparers and

accountants who are reputable and ethical.

So today, Mr. Speaker, as Chairman of the Legal and Monetary Affairs Subcommittee of the House Committee on Government Operations, for myself, and on behalf of our ranking member, the gentleman from Florida (Mr. FASCELL) the gentleman from Rhode Island (Mr. ST GERMAIN) the gentleman from Michigan (Mr. CONYERS) the gentleman from Virginia (Mr. PARRIS) and the gentleman from California (Mr. HINSHAW)—all of whom are members of the Legal and Monetary Affairs Subcommittee—I am reintroducing what was the substance of H.R. 7590 of the 92d Congress. We have no illusions. We recognize that our step today is but a minimal first step, but we trust that it may get the Treasury Department off of dead center and that it may move in the direction of some affirmative action.

Certainly our committee is sensitive to the needs felt by the average American taxpayer for some assistance from a Government agency that continues to unload on them these more and more complex tax forms each year, which is exactly what will be happening between now and April 15. We view this bill as a vehicle from which we can start discussions that will lead to a fair and workable recommendation to eliminate some of the unqualified and unscrupulous tax preparers from our midst.

I hope our subcommittee will begin deliberations on these matters and achieve some favorable results before another tax season arrives.

THE 55TH ANNIVERSARY OF BYELORUSSIAN INDEPENDENCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 10 minutes.

Mr. KEMP. Mr. Speaker, yesterday, March 25, marked the 55th anniversary of the declaration of national independence by the people of Byelorussia.

The history of Byelorussia statehood goes back to the ninth century when several Slav tribes founded independent principalities on the territory of what is now Byelorussia. In the 13th century a unification of lands took place around the cities of Navahradak and Vilnia and a powerful new state, the Grand Duchy of Litva—Lithuania—was created.

The Grand Duchy introduced the ideas and works of the Renaissance to the area and became a cultural and artistic center of Eastern Europe. In 1517, Dr. Francisak Skaryna translated and published the Bible, making Byelorussia the third people, after Germans and Czechs, to have a printed Bible in their native tongue.

From the 13th to the 18th century, the people of Byelorussia endured severe trials to preserve their precious independence. In 1795, the growing state of Russia forcibly annexed all Byelorussia and subjected the newly conquered land to intense russification. The struggle for independence continued, however, and during Napoleon's Russian campaign Byelorussia was temporarily proclaimed

a sovereign state under its former name, Litva.

Anti-Russian uprisings occurred again in 1830 and from 1863 to 1870. The weakened state of the Russian regime during the First World War provided the Byelorussian people with the long awaited opportunity to achieve independence and self-determination.

In December, 1917, the All-Byelorussian Congress met in the city of Miensk and on March 25, 1918, proclaimed the Byelorussian Democratic Republic. A provisional constitution was adopted which provided for: direct and secret ballot open to all; freedom of speech, press, and assembly; national and cultural autonomy of all minorities; an 8-hour workday, and the right to strike.

More than a dozen states accorded de jure recognition to the independence of the Byelorussian Democratic Republic and legations and consulates were set up in several capitals.

Unfortunately, the people of Byelorussia were not to enjoy their new found freedom long. The Russians once again invaded the Nation and by overwhelming force subjugated Byelorussia.

In 1944, in Miensk, a Second All-Byelorussian congress was convened and reaffirmed the desire of the Byelorussian people for independence and freedom.

The proud history of Byelorussia clearly demonstrates that all efforts to eradicate Byelorussian nationalism and the search of her people for self-determination are doomed to failure.

It is fitting that we who live in a nation which has achieved the goals for which the Byelorussian people have fought for so many centuries, should pause on this important anniversary and pay tribute to these brave people. May the hopes and prayers of the Byelorussian people for restoration of liberty for their beloved nation soon be granted.

Mr. Speaker, Dr. Roger Horoshko, president of the Byelorussian-American Association, has provided me with several interesting articles which describe the historic struggles of the Byelorussian people. I include at this time, one of these articles, "The Golden Age of Byelorussian Culture":

THE GOLDEN AGE OF BYELORUSSIAN CULTURE INTRODUCTION

Byelorussia, a charter member of the United Nations, and today a constituent Republic of the U.S.S.R., is a country of rich cultural and national heritage dating back a thousand years. Soviet Russia is using its "Operation Rewrite" to obscure this fact and in its place promotes its own thesis, namely that only with Soviet help did the Byelorussian people attain their nationhood.

In reality, the political and cultural role that Byelorussia played, especially during the time of its "Golden Age" in the 16th century, had a paramount impact on Eastern Europe. In Byelorussia this was an era characterized by advanced democratic basis of life and by religious and political tolerance hardly found anywhere else in Europe at that time. While most of Europe suffered from the effects of religious fanaticism, from persecutions and from inquisitions, the enlightened atmosphere in Byelorussia permitted Symon Budny, a philosopher, theologian and a disciple of Michael Servetus, to freely preach, publish and to disseminate his religious ideas. This took place at the time when in Geneva, Michael Servetus was

burned at the stake for his "heretic beliefs".

It was this tolerance of all ideas and an almost unlimited freedom of speech, conscience and faith, which led Todor Eulashevski, a Byelorussian writer of the late 16th century, to call that century golden.

Historically Byelorussia was known as Litva and the Byelorussian State as the Grand Duchy of Litva. The name Byelorussia was introduced during the Russian occupation of the Grand Duchy in the 18th and 19th centuries and has since then gradually gained acceptance. Litva should not be confused with the present day Lithuania, which under its historical name of Zhamoyc (Samogitia in Latin), was but a small part of the Grand Duchy to which it was semi-permanently annexed. On several occasions Zhamoyc was traded by the Grand Duchy in return for favorable military settlements.

BYELORUSSIA—THE CROSSROADS OF EAST AND WEST

During the last quarter of the 15th century, the Grand Duchy of Litva attained its maximum territorial expansion, encompassing vast territories from the Baltic to the Black Seas. To the east the boundary reached to within eighty miles of Moscow. Byelorussian lands formed the nucleus of this huge state and Byelorussian people were its masters both politically and culturally.

Simultaneously with the territorial growth of the Grand Duchy, commerce expanded. The rivers Nioman, Dzvinia, Dniapro, and various overland trade routes connected Byelorussia with countries of Western and Eastern Europe. Along these routes also came new cultural and spiritual ideas and influences of the Western and Byzantine civilizations. The synthesis of these two cultural elements occurring on the substrata of Byelorussia's own national traditions later became the cultural characteristic of the Byelorussian people.

Cultural ties of Byelorussia with the West were also maintained through the educational opportunities which Byelorussian youth found at the Universities in Prague, in Germany and in Italy. A great number of Byelorussian statesmen, officials and well-to-do citizens used this opportunity to educate their sons, and through them Byelorussia was exposed to a continuous stimulating flow of progressive and bold ideas of the Renaissance and the Reformation.

Especially fruitful contacts with Western Europe were in the arts—painting, architecture, and graphic arts. Churches, castles, palaces and city halls were being built or renovated in the Gothic style, in the styles of the Renaissance and later in the Baroque style. In the 16th century an original Byelorussian building style was developed which combined harmoniously the Gothic and Byzantine forms with local architectural traditions. Excellent examples of this "Byelorussian Gothic" style are the churches in Mazhelki, Synkavichy and Suprasl.

BYELORUSSIAN—AN INTERNATIONAL LANGUAGE

An important prerequisite for the fast pace of development of Byelorussian writing and literature during the "Golden Age", was the high level of development of the Byelorussian literary language attained previously. For centuries the Byelorussian language was not only the language of everyday use and religious writing, but also the official language of the Government of the Grand Duchy of Litva, and not only in Byelorussian lands, but also in all other lands comprising this state.

Byelorussian language was used widely by the Orthodox Church which served 80% of the population of the Grand Duchy. Only in liturgy and other prescribed services was Church-Slavonic retained. The Catholic Church of the Grand Duchy used Byelorussian side-by-side with Latin. Scholars and preachers of the Reformation used Byelorussian language in their writings and publications. In the 16th century, Byelorussian

was also introduced into the Holy Books (Koran) of a small but politically significant Muslim population of the Grand Duchy.

The dominant political and cultural position of the Grand Duchy in Eastern Europe inevitably led to the wide use of Byelorussian language beyond its borders. Trade and peace agreements with other states of Eastern Europe were written in Byelorussian. The great Dukes and Byelorussian language in their correspondence and relations with the rulers of states and regions of Eastern Europe, among them Muscovy (Russia), Great Novgorod, Tver, Pskov, the then German Riga, Poland, Moldavia, Wallachia, and the Tartar Khanates. The rulers of these states, as a rule, replied to Great Dukes of Litva also in Byelorussian.

Latin was the only other language used by the Grand Duchy in diplomacy, and its use was limited to relations with Western Europe.

Thus during the 15th and 16th centuries Byelorussian language played an international role in the diplomatic relations of Eastern Europe similar to that of Latin in the West. For example, when in 1646 a dispute arose between Poland and Moscow concerning the language which was to be used in their diplomatic relations, the settlement came only after they both agreed to return to the established tradition—the use of the Byelorussian language.

AN ADVANCE LEGAL SYSTEM

The ancient democratic traditions of the Byelorussian people and a mass of accumulated legal and judicial records, provided just the right conditions for a high level of development of law in Byelorussia during the "Golden Age."

Codification of law had already begun in the 15th century and 1468 the first compilation of laws of the Grand Duchy, entitled "The Judgement Book," was completed. However, it wasn't until the 16th century that the high level of Byelorussian legal system was reached with the publication of the judicial code of the Grand Duchy known as the "Litouski Statut." The basic principles embodied in this code were deeply rooted in the tradition norms of Byelorussian common law.

Following two handwritten editions of 1529 and 1566, the first printed edition of the "Litouski Statut" appeared in 1588, and because of its completeness became one of the most authoritative judicial codes in Europe. Byelorussia's neighbors, the despotic Moscow and the anarchist-aristocratic Poland did not at that time attain a similar achievement in the legal field.

The chief editor and publisher of the third edition of the "Litouski Statut" was the Chancellor of the Grand Duchy, Leu Sapieha (1577-1633). In all three of its editions, "Litouski Statut" was written in Byelorussian. Later it was translated into Latin, Polish, Russian and German. The "Litouski Statut" remained in use for three centuries, and was used even after the Russian occupation of Byelorussia. It was only in 1839 that the judicially binding force of the code was terminated by Czar Nicholas I and Russian laws were universally imposed.

CHRONOLOGY

Chronology was another field which reflected the vigorous political and national life of the Byelorussian nation. During the 16th century there appeared a large number of new editions of old chronicles as well as a host of new chronicles. The more important chronicles that have survived the turbulent events of history are the chronicles of Bykhavets, of the Great Dukes, of the Dukes of Slutsk, chronicles of Krasinski and Baczynski, and a whole series of lesser local chronicles.

BYELORUSSIAN PRINTING

A very important factor in the development of Byelorussian written "Golden Age"

was the birth of Byelorussian printing at the beginning of the 16th century. The foremost pioneer of Byelorussian printing was a renowned scientist and humanist of his time, Francisak Skaryna (1485-1540). After obtaining his Doctorate in Medicine from the Padua University in Italy, Francisak Skaryna set forth as his main goal the dissemination of knowledge and education among his own people with the aid of printed books, and in the language best understandable to them, that is in his native Byelorussian. In 1517-19 in Prague and later in 1522-25 in Vilna, Skaryna published the books of the Bible in Byelorussian translation. This was the first Bible printed in Eastern Europe and one of the first in the world.

Commentaries and introductions to Skaryna's books were filled with expressions of intense patriotism, love of the common people and with religious tolerance. Historians of printing refer to Skaryna's richly decorated and illustrated books as "slavic Elsevir". Skaryna's varied interests and activities, typical of the learned men of Renaissance, left a legacy in many areas of Byelorussian cultural life—in religion, literature, art, linguistics, as well as in printing.

Following in Skaryna's footsteps were such men as Symon Budny, Vasil Chapinski, Vasil Haraburda, Peter Mscislaviec, brothers Lukas and Kuzma Mamonich, Ryhor Chadklevich, and the Orthodox Brotherhood of Vilna. By the end of the "Golden Age" there were over ten publishing houses in Byelorussia. Their books could be found not only throughout Byelorussia, but also in the territories of the southern Slavs and even in Moscow despite the fact that there they were banned and often burned as "heretic".

Printed literature was used extensively by the Byelorussian Reformation movement, forcing the Orthodox and the Catholics into a lively debate in print. Consequently, an extensive religious and polemic literature had been accumulated by the second half of the "Golden Age".

The most prominent representative of the Byelorussian Reformation movement was Symon Budny (1530?-1593), a philosopher and a student of the Bible. Budny, first a Calvinist, and later the leader of Byelorussian Unitarians, was a prolific writer of polemic letters and theological treatises which he wrote in Byelorussian, Polish and Latin, and distributed in Switzerland, England, Prussia, Poland, Hungary, and in Byelorussia. Budny's main work in Byelorussian is a large theological treatise "Katykhizis" (Niasviz, 1562) which lays down the basis for his reformist ideas and expresses his views on the main social problems of that time.

Among the Orthodox, a notable activist and a reformer of the Orthodox Church of the "Golden Age" was the Metropolitan of the Grand Duchy, Jazep Soltan (Metropolitan in the years 1497-1519). A prolific contributor to Byelorussian Orthodox writing was Archimadrite Sjarhei Kimbar (1532-1565) of the Suprasl Monastery. The second half of the century marks important literary and editorial activity by Ryhor Chadklevich (1505-1572). In 1575 Orthodox books were being printed in Vilna by Peter Mscislaviec. Famous for both their quality and the number of religious books published, were the Vilna publishing houses of Mamonich Brothers and of the Holy Trinity Brotherhood.

EDUCATIONAL AND SECULAR LITERATURE

Along with the general rise of the educational level in Byelorussia, the need for textbooks and reference books also increased. Publishers of religious books of all denominations turned their attention to this need. Special credit goes to the Orthodox Brotherhood in Vilna which published Byelorussian grade school readers, Byelorussian grammar and textbooks, and in 1595 published the first Byelorussian dictionary and lexicon edited by Laurenci Zyzani, an educator, scholar and theologian. Zyzani's Byelo-

ussian grammar later became the primary source material for the Russian grammar of Michael Lomonosov.

In the field of secular literature both Byelorussian and Latin were used. In 1521, during his stay in Rome, Mikola Husouski wrote a poem for Pope Leo X, entitled "The Song of the Zubr". This poem of nearly 2000 stanzas was written with remarkable talent and presents vividly the beauty of Byelorussian wilderness and masterfully describes a relative of the bison-zubr, the king of Byelorussian forests. It further describes all the dangers of hunting the zubr, and clearly reflects poet's love for his country and his views on the major political events of his time. Also in Latin, Michael Litvanus published "The Habits of Tartars, Lithuanians (Byelorussians) and Muscovites (Russians)". In the years 1573-74, Filon Charnabylski of Orsha wrote in Byelorussian his "Vodpisy" (Reports). During the last quarter of the century poet John Radvan "glorified Byelorussian magnates, his benefactors, with his Latin poems. A Diary" describing a wealth of topical and historical events was written in Byelorussian by Todar Eulasheuski (1546-1604?).

CONCLUSIONS

This short survey points to a record of remarkable cultural and political achievements of the Byelorussian people and of the Byelorussian State, the Grand Duchy of Litva. In the 16th century, this level of accomplishment could not even be approached by Moscow, Poland or any other state in Eastern Europe. This is also the record which Soviet Russia tries to camouflage and falsify, thereby attempting to deny the cultural inheritance and historical achievements of the Byelorussian people. In this connection the change of names from the historical Litva to Byelorussia and from the historical Zhamoyc (Samogitia) to Lithuania, contributes to the confusion which the Russians exploit. However, a heritage of this scope and an abundance of documentary evidence from the era of the "Golden Age" still in existence, can not be suppressed either by might or by fraud.

BRINGING FEDERAL SPENDING UNDER CONTROL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Alabama (Mr. EDWARDS) is recognized for 15 minutes.

Mr. EDWARDS of Alabama. Mr. Speaker, bringing Federal spending under control is a subject on the mind of every Member of this body. In an arena which thrives on disagreement and the adversary process, for once there is no dispute. We must inject fiscal sanity and fiscal responsibility into the Federal budgetary system.

To reach this goal, we must face a few basic facts. First, we must recognize that the cloud of uncontrolled Federal spending casts its shadow over most if not all of the problems grappled within this Chamber. The state of the Union rests upon the state of the economy which in turn is determined by the state of our Federal budgetary process. Reckless Federal spending effects every citizen of our land every time he or she picks up a paycheck and every time he or she goes to the supermarket or tries to balance the family budget at the end of the month.

We must face the fact that to cure inflation, we must get at the causes of inflation. And the candidate leading the field of probable causes is the unruly Federal budget. We must acknowledge,

just as every American family acknowledges, that there is only so much money to go around. When the income is less than the outgo, expenses have to be cut or an additional source of income has to be found. Put simply, more money spent means more taxes, more inflation, or both.

We must face the fact that for every right there is a responsibility, that the right to spend is coupled inseparably with the responsibility to keep the budget in reasonable balance.

We must realize that the American people want a more efficient, more responsive, less expensive Government. They want, as the President has said, to get the Government off their backs and out of their pockets. And they expect the Congress to exercise the same care with their tax dollars as they exercise with their own family budgets. In fact, the strong feeling of the American people on this subject is probably the greatest cause for optimism in the fight to inject fiscal reason into the Federal budget. We can achieve this goal because we have the people squarely on our side.

Mr. Speaker, I am introducing today a bill which would provide Congress with the tools to set national priorities while at the same time controlling Federal spending. The bill would create a joint committee on the budget. This committee would develop a legislative budget each year, including estimated receipts and expenditures. The budget would recommend a reduction in taxes or in the public debt if estimated receipts exceed expenditures in any fiscal year.

My bill differs from others at this point. Rather than stopping with the unlikely prospect of a surplus in receipts, my bill requires a recommendation by the joint committee for increases in taxes or in the public debt when estimated receipts do not equal proposed expenditures. If the public debt is to be increased, the committee must provide an estimate of the effect upon inflation.

If we ignore the possibility of receipts not meeting expenditures and if we overlook the hard choices required if this occurs, we are engaging in the same old fiscal hypocrisy.

The bill sets up a system by which the costs of a given program will be realistically projected over a 5-year period so as to give the Congress a better idea of just what sort of monster it may be creating. It requires all major spending programs to be evaluated at least once every 3 years. This will allow the Congress to keep a firmer grip on the handle of programs than has been the case in the past.

Every new process will be tested by a limited pilot program to see if it is worthy of the taxpayer's dollar. This will prevent our throwing money at problems before we determine the best, most efficient way to solve them.

Under this bill, money for all Federal spending will have to be appropriated annually by Congress. This would cut down on the large percentage of the budget each year which is unreviewable by Congress and therefore unsuceptible to budgetary improvement.

These are just the highlights of the bill, but the primary thrust is what is im-

portant. We must turn the full light of fiscal responsibility on the congressional budgetary process. We must become aware of the consequences of each expenditure. And, most importantly, we must recognize that sometime, some place, we have to say no. We have to say that this program or that program, while a good one, is not good enough to warrant inflation or a tax increase.

I have previously introduced two bills which bear on the subject of budgetary reform. H.R. 1388 would make the fiscal year coincide with the calendar year, doing away with the confusion and the lack of synchronization with sessions of Congress. House Resolution 102 calls on the Committee on Appropriations to report all general appropriation measures for each fiscal year to the House before the beginning of that fiscal year so that the measures can become law before the beginning of the fiscal year. Under the current procedure, administrators in many cases have no way of determining how much money they will have for the fiscal year until long after the previous year has ended. This does not foster good planning and good continuity of programs.

Mr. Speaker, substantial portion of the debate on budget reform so far this year has concerned itself with alleged usurpation of power by the President and with long and intricate discussions about the separation of powers in our system of government. Certainly I may disagree with impoundment of funds for particular items or programs, but I cannot disagree with the President's overall objective of halting runaway Federal spending.

I am reminded, as I listen to the heated debate over impoundment, of the seventh chapter of Matthew, second and third verses:

Why do you look at the speck of sawdust in your brother's eye, with never a thought for the great plank in your own? First take the plank out of your own eye and then you will see clearly to take the speck out of your brother's.

The Congress should dedicate its energies to removing the plank of fiscal irresponsibility from its own eye rather than concerning itself with the passage of bills which will burst the seams of the President's budget. Once we get our budget house in order, then we can take steps to extract the speck of impoundment from the President's eye.

THE ROLE OF CONGRESS

THE SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. McFALL) is recognized for 5 minutes.

Mr. McFALL. Mr. Speaker, the relative strength of Congress as compared to other western legislatures is among the topics touched upon by several panelists in the recent Time, Inc.-sponsored Chicago symposium on the role of Congress. The moderator was Mr. Grunwald; the panelists were Henry Wilson, president of the Chicago Board of Trade; Senator WILLIAM SAXBE, of Ohio; Neil MacNeil, of Time magazine; John F. Bibby, of the University of Wisconsin; Senator WAL-

TER MONDALE, of Minnesota; and Dr. Charles Jones. I include their exchange in the RECORD:

Senator SAXBE. For one thing, these people are career people who usually survive the election, and I have seen this also operate in India, where they do not have this time to prepare. It is spontaneous there. Frankly, I have great admiration for the way this operates, because what a wonderful thing it would be to get Kissinger down on the floor of the Senate once a week simply to find out what is going on. Or to get Stans down to find out what went on at Watergate.

This whole thing makes the parliamentary system much closer to the people, it seems to me, even than our congressional system where we have to go out on the hustings and talk to them.

I think that a professional staff is not possible in the congressional system, as it is under the parliamentary system.

Mr. MACNEIL. Why not?

Senator SAXBE. I do not think it is possible because of the inability of the parties to be strong enough to attract and keep staff people.

Mr. MACNEIL. It was laid down in the Reorganization Bill of 1946, I believe, that the committee staffs be professional—

Senator SAXBE. All right.

Mr. MACNEIL.—which has not been followed except by a few committees.

Senator SAXBE. When Russell Long, for instance, presents a finance bill on the floor of the Senate, which is one of the most important periods in that respect, he has at his fingertips full access to all of the information. He has one or two men with him on the floor, as you know, and this is true of Magnuson, this is true of the other committee chairmen when they come in to present their bills.

On the other hand, the opposition people, usually the opposition people on the committee, are silenced before they ever get there because they have had their say, so we are talking about the opposition not within the committee. They can only single out one little area where they can be knowledgeable, and with our staffs so limited, we can't do a great deal more than that unless you have a staff like Senator Kennedy, who has 30 people or 40 people over and above his regular staff. I would guess he has got 60 or 70 people on his staff.

Mr. GRUNWALD. Gentlemen, I think it is approaching time for lunch, but I know that all members of the panel would like very much to hear questions from the floor. I think we do have time for a few questions from the audience now, and we will, of course, continue the questions if you do not mind, during lunch.

Yes, sir?

Mr. WILSON. My name is Henry Wilson, I am president of the Chicago Board of Trade, and I served for six and a half years on the White House staff, with responsibility for the relationship between the House of Representatives and the Executive.

May I ask whether I may make a comment rather than ask a question?

Mr. GRUNWALD. Yes, sir. By all means.

Mr. WILSON. I think that this extremely interesting discussion has really missed the nub of the problem. I think everything that has been said is valid, the problems of press criticism, the problems of procedures, the problems of inadequate staffing, patronage, courage in various areas. It seems to me that there is one and only one solution to it and that is to get abler members of Congress.

Now, there are some extremely able and some extremely courageous and hardworking members in both houses of Congress in both parties, but there are not enough of them. Two hundred years ago we had in this country, then a nation of 3,000,000 people, leaders of the quality of Washington, Jefferson,

Adams, John Marshall, and Alexander Hamilton. Just think how much abler our affairs would be conducted these days if we had that quality of political leadership.

It is ridiculous to suppose that there is not that kind of ability now in a nation of 200 million people, and it is ridiculous to suppose that there is anything inherent, particularly in an extremely well-educated country, which makes it impossible to revive such qualities of leadership.

What do we do to encourage it? Well, there are a lot of things, but this is a media-type meeting here. I think that Neil MacNeil ought to be permitted, far more than he is, to write about some of the heroes in the Congress, the people who stick their necks out, the people who work 12 and 14 hours a day, and bone up and become genuine experts in their fields. These people should be held up as an example to the young people entering and emerging from college and shaping their careers.

It is appalling to see the polls on "What would you want your son to be?" It is less than 1% in terms of going into politics.

Mr. MACNEIL. Henry, I would like to pick you right up there. I am permitted to write about the heroes, such as they are.

I want to respond a little bit to your idea of encouraging more people to run for Congress. I do not want to come out against it, but I think you made an unfortunate choice of the able members back at the time of the Revolution. You said Washington, Jefferson and Adams, Hamilton and Marshall. Only one of the men whom you named served in Congress. You would have done better mentioning Madison and some of the other men.

To me, today, however, the membership of Congress is more able than it has ever been, and it is a part of the process of the whole country being a more educated country. Fifty years ago, 100 years ago, there were members of Congress who literally could not read or write. We do not have such phenomena now.

The membership of Congress is abler today, college-educated, for example, than at any time in history. I think we always need abler people in government, but it is by no means the nub of the question, to me. It seems to me that during this very period when the membership has been increasing in its overall ability, the Congress has slid into its present difficulties vis-à-vis the Executive.

Mr. GRUNWALD. Would you like to comment on that, Senator, or has Neil said it for you?

Senator SAXBE. No. He said it. I am delighted that Fritz got here, because I am sure, being a member of the majority, he has a much better grasp of what happens inside than I do.

Mr. GRUNWALD. Senator Mondale, whom we welcome, has agreed to talk to us at somewhat greater length at lunch, rather than trying to wedge him in now. I think perhaps there might be time for one more question from the floor before we move into the other room. Yes, sir?

Mr. BIBBY. John F. Bibby, of the University of Wisconsin, Milwaukee. My question, I guess, is mainly directed to Chuck Jones.

I think one of the unusual things that he alluded to about Congress is that unlike the legislatures in the rest of the Western World, Congress is still relatively strong. It has not gone into the decline that others have.

I have always thought that one of the reasons for this was the diffusion of power, that it is virtually impossible not only for party leaders to get a handle on it, but also for Presidents. Seniority and other things elevate to positions of authority people whom Presidents really cannot control effectively.

I wonder, if we should strengthen party leaders in the way that Chuck was talking about, whether we would not perhaps unintentionally also strengthen the President's hand to control Congress?

The President is a much more powerful figure today than in the days of Uncle Joe Cannon, and Czar Reed, and I would think that his institutional resources would be such that he could probably dominate even a more united party, and the Congress would come perhaps even further under the thumb of the President, even if the legislative body asserted itself.

That is one of the things that concerns me about strengthening political parties in the Congress. The diffusion of power in Congress, I think, is a safe thing.

Dr. JONES. I think that puts it very well, John, but it is a matter of the swing of the pendulum, always, and the question is, for me anyway, how do you increase the authority for party leaders enough to make them accountable for something?

It is not reasonable for me to ask party leaders presently to account for what they are doing because of the diffusion of power. So how do you maintain enough authority for their accountability while maintaining the advantages of the committee system?

Mr. GRUNWALD. I think we might adjourn for lunch. We will take a little nourishment and refreshment, and then continue the discussion.

(Whereupon the symposium was recessed until 1:15 o'clock p.m.)

Mr. GRUNWALD. Ladies and gentlemen, I apologize for interrupting your meal, but Senator Mondale has just very speedily finished his own, and I am sure you will want to hear from him.

By way of introduction, briefly, I would like to tell you that the other night some of us were talking about the future and it occurred to us that if by any chance Senator Walter Mondale and Senator Charles Percy were to run for higher office, which at least has been discussed occasionally, the confrontation might become known as the Battle of the Eagle Scouts, because obviously they both were Eagle Scouts at one time or another, and I think they still are trying to live it down.

I will not take time to tell you about Senator Mondale's record, I am sure you are familiar with it, and his very vigorous fights for the causes he believes in. He has certainly been one of the President's strongest opponents in the Senate, which is by no means his only distinction. He has worked very hard for the poor, the hungry, he has worked for urban causes, civil rights and many other things.

I am sure some of you will disagree with many of his policies, but you cannot deny, I think, his energy, his devotion to what he believes in, and the fact that he has made, really, a very interesting figure in the Senate.

Having done a little bit more research about him, I think I would like to reveal to you, if you are not familiar with the fact already, that in his youth between college terms he once worked sorting peas for the Jolly Green Giant. I think anybody who has done that should find Congress almost easy by comparison.

Ladies and gentlemen, Senator Mondale.

Senator MONDALE. Thank you very much, Henry, for that kind introduction. Actually, I was a pea lice inspector, and that, I have found, comes in very handy almost daily in the U.S. Senate.

Senator Saxbe and friends. I thought I would speak very briefly about the Congress, but instead of that I have decided to devote my time to an attack on an airline. We had a very lovely two hours waiting to take off from Minneapolis. I won't say that our weather was bad, but when they finished deicing one wing, the other wing was iced up again, and we chased wings for about two hours, and I am very sorry that we were late.

I have been briefed by Neil on what has been said, and I will make just a very few comments about it. First of all, I think this movement, which is increasingly apparent by Time, Inc., demonstrated again in the

Stevenson-Mathias hearings now under way in Washington, the efforts by Common Cause and John Gardner and those by Ralph Nader in the recent congressional study, are long overdue, fundamentally important, and I hope are but the beginning of a long-term analysis and critique of the Congress and its role in American Government.

I understand a few points have been made that I would certainly like to endorse without dwelling on them. One is the need for more and better staffing, and for computer technology and other kinds of consultant aid.

I have been through many debates that required better staffing and more technical information than usually is available to us. Perhaps one of the classics was the one on the aircraft carrier, where I had myself and one college kid versus the U.S. Navy, and everybody who wanted to build an aircraft carrier, or who had a friend who was an ensign or above. It wasn't an even fight. It took literally days and months to prepare for it, to read the detailed documents and tables in order to try to deal competently with what turned out to be an extremely technical matter.

The same thing was true in the debate involving the space shuttle. In addition to all of NASA's resources, and all the industries that had space business, you may recall that a mysterious and magical group of full-page ads appeared in all the papers of the country. There was even a half-hour documentary, sponsored by the space industries, ridiculing those of us who questioned the space shuttle. The voices of people like Dr. Van Allen and Dr. Day and many of the other truly gifted space scientists were barely heard at all in that debate.

I am convinced that we foolishly handicap ourselves in the Congress by failing to properly staff ourselves. I find, unlike public resistance to salary increases for ourselves, very little public resistance to improvements and expansions in staff. I hope that this would be a readily agreed upon objective.

Second is the matter of computers. I have been in many debates, for example on the Education Committee, that dealt with complicated formulas and distributions. And I have found that whenever I am on the side of the Administration, I am surfeited with computer print-outs and data that comes within seconds, whenever I need it to prove how right I am. But if I am opposed to the Administration, computer print-outs always come late, prove the opposite point or always are on some other topic. So I think one of the rules is that he who controls the computers controls the Congress, and I believe that there is utterly no reason why the Congress does not develop its own computer capability, its own technicians, its own pool of information. I would hope that we do so.

I read Dr. Jones' excellent paper and I have been briefed, and I understand that Mike Mansfield has not had a good day.

I would like to provide what I think is some balance on the performance of the Congress. I think there is much that richly deserves criticism, the unquestioned rewards that go to seniority, the sometimes inexcusable delays, our apparent impotence in constitutional showdowns with the Executive. But I do not believe that the Congress is without a record that is worth looking at, a record that provides some balance to some of the criticisms that I have heard.

We might begin with the war in Viet Nam. What forum in this country first provided meaningful debate on the issue? Where did Americans first go for a hearing to ventilate the issues surrounding the tragedy of the war in Viet Nam? I think there is no doubt that they went to the Congress and particularly to the United States Senate.

The Senate, and particularly the Committee on Foreign Relations, did stand up in providing a public debate on the truth of that tragic war.

It is true that we did not succeed in pass-

ing amendments contrary to the wishes of the Executive to end that war. But I think that one of the contributing factors to the fact that the war may now be ended is that the Congress kept up a constant drum fire, repeatedly opened up the debate. Repeatedly offered in the Senate were McGovern amendments, Hatfield amendments, Mansfield amendments, and Cooper amendments. Senators tried consistently to keep that issue in the forefront of American political debates, and I believe that some credit should be given for that performance.

I think there are many other areas. Look at the issue of the environment. Where has the real leadership come to try to make progress in protecting the American environment? I think quickly the names of Gaylord Nelson, of Ed Muskie and of John Blatnik come to mind.

The first proposals to begin the assault upon pollution came from the Congress in the early 1950s. They were met with presidential vetoes, I think on two or three occasions. And this has been consistently true in the late 1960s and the early 1970s, including the last massive and fundamental Water Quality Act which the President vetoed, and which the Congress overrode, and apparently the President is vetoing again. It was the Congress that led in the field of the environment.

In the field of consumer rights we had some leadership during the Johnson Administration, but basically the consumers' movement has found its forum in the Congress.

The legislation for truth-in-lending, truth-in-packaging, auto safety, product safety, pipeline safety, flammable fabrics, the Consumers' Protective Agency, the movement for class actions; all these measures have found their support and movement largely within the Congress, and not from the Executive Branch.

I think in the last few years the civil rights movement of this country has depended upon the Congress and not upon the Executive Branch. We have tried to make the case, to develop the record, to argue in the Congress that the President's effort to dismantle this nation's longstanding objective to eliminate discrimination was wrong. And it has been the same with the President's effort to populate the Supreme Court with people deeply committed against the effort to enforce the 14th Amendment.

Those efforts came from the U.S. Senate, most of them with bipartisan support.

I believe that in many other areas such as education and alleviating poverty, areas in which I have been deeply involved, the Congress has acted effectively. It was Congress that developed such programs as those embraced in the recent Higher Education Act and the Child Development Act—programs which this nation desperately needs but which the President vetoed. There have been strong congressional efforts for emergency, stand-by employment measures as well.

I do believe it is unfair simply to dismiss the Congress as a totally inefficient, incompetent, unresponsive reactive institution. I believe it has many, many problems, but I believe we would be making a mistake just to dismiss it in those broad terms.

Now, having said that, I wish to say that I think there are many procedural changes that are needed. We have discussed here an addition to staff. I think we ought to take a tough look at the seniority proposals. I think we ought to take a look at the filibuster rules. We ought to take a look at the way the caucus selects committee membership, all sorts of things. But I think the underlying fact is that Congressmen usually do what they want to do. Often there are not just procedural reasons, but substantive reasons why things don't get done, political reasons.

The war in Viet Nam is a good example. We could have ended that war. All we needed

was the votes, but we did not have them. These people in the House went home time and time again, and they got elected, even though they voted against end-the-war amendments.

SPENDABLE EARNINGS INDEX CALLED MISLEADING AT BEST

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. Moss) is recognized for 5 minutes.

Mr. MOSS. Mr. Speaker, may I call to the attention of my colleagues an article by Phillip W. McKinsey entitled "Spendable Earnings Index Called Misleading at Best."

I want to share Mr. McKinsey's summary of the spendable earnings index which spotlights one more misrepresentation and the resulting havoc President Nixon's economic policies have created. The article follows:

SPENDABLE EARNINGS INDEX CALLED MISLEADING AT BEST

(By Phillip W. McKinsey)

Until late in 1972 Nixon administration economists rarely missed an opportunity to talk about how fast the index of real spendable earnings was rising.

It showed, they claimed, how well the average American worker was faring under Phase 2 of wage-price controls, and it was a major piece of ammunition used to rebut union critics who argued controls were stiffer on wages than on prices and profits.

Since last October, however, the index has declined 1.5 percent and not much is being said about it. Real wages have not declined by anything like that much, but when a tax change occurs—social security taxes went up in January—the index reflects it because it is an "after-tax" measure. Thus the index dropped sharply in January, the latest figures available.

Other changes affect the index, too, so that its use as an indicator of the financial situation of an individual worker can be highly misleading. In the current issue of the Brookings Papers on Economic Activity, Brookings Institution economist George Perry loses a blast at the series:

"The series . . . is one of the most misused economic statistics. One reason for its misuse is that it is one of the most misleading economic statistics receiving regular monthly publicity," writes Mr. Perry in an unmistakable dig at the administration.

LIKE A STOPPED CLOCK

"In recent years, the series showed no increase at all in earnings and was often cited as evidence that wages were suffering badly in the race against inflation. In recent quarters, it has risen sharply and has been cited as evidence of how spectacularly well wage earners have been doing," he adds. "Like a stopped clock, the earnings series occasionally tells a true story. But when?"

Mr. Perry, who is recognized as one of the nation's leading economists in the field of labor force composition and related areas, believes the earnings series can be useful only if it is adjusted in a variety of ways depending on what question is asked of the data. "In fact, it is hard to think of any interesting question it can answer without adjustment," he says.

Even if one wants a measure that incorporates the effects of tax and price changes on wages, the real spendable weekly earnings index can be distorted from month to month by three other factors: overtime pay, the employment mix, and the number of hours worked. The index, as published, does

not include sufficient information to allow one to sort out the effect of any of these.

If the length of the average work week increases, as it typically does during a recovery from recession and as it did last year, the index will rise even if wages do not and prices and taxes are unchanged. Likewise, if the amount of overtime pay increases and nothing else changes, the index will rise. And vice versa, of course.

In each case, a worker's pay will have risen because he has worked more hours not because he has gotten a pay increase. Mr. Perry cautions, however, "Once variations in average hours and overtime premiums are accounted for, the resulting measure of average hourly wages is still a distorted indicator of an individual's basic wage." He explains why:

"If every individual's wage were unchanged, but the employment of low-wage individuals expanded, the average wage and earnings would decline. Something like this has been happening in the U.S. economy for a long time, and the rate at which it happens varies from year to year."

Mr. Perry also disputes the usefulness of an index that lumps together even adjusted changes in real warnings and tax changes. "While measures of after-tax income are needed for many purposes, they are inappropriate in a measure of how well wages have been keeping up with prices, or even in a measure of well-being," he argues.

ADJUSTMENT TOOL PROPOSED

And last, the Brookings economist suggests that any earnings series of this type ought to be deflated—adjusted for price changes—using not the consumer price index (CPI), as is done, but using instead the deflator for consumption spending in the national income accounts. The CPI and the consumption deflator, which is a broader measure of price changes, have not moved together closely in recent years and Mr. Perry would opt for the latter.

Recognizing some of these problems, the Bureau of Labor Statistics (BLS) began more than a year ago to publish a real average hourly wage index that adjusts for changes in the employment mix and for overtime and use the CPI to deflate current-dollar wages.

Mr. Perry notes the existence of this new series but says something more is still needed. "We are [far] from having a combined measure of how much work a typical worker does and how much pay he receives per hour of work," he says, adding, "There is understandable interest in a measure of weekly take-home pay, too. While BLS does attempt to describe its series on real weekly spendable earnings carefully and to point out its shortcomings, a substantially improved series is urgently needed."

THE ENERGY CRISIS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. KASTENMEIER) is recognized for 30 minutes.

Mr. KASTENMEIER. Mr. Speaker, the American public has been inundated recently with messages from the oil industry about the energy crisis. The American Petroleum Institute keeps reminding millions of television viewers that "a nation that runs on oil cannot afford to run short" Continental Oil Co., in a double-page spread in several national magazines, warns us that "energy costs are bound to rise" and that "we need some practical trade-offs in the ecological area." And Mobil Oil Corp. wonders, in full-page newspaper ads, "Is anybody listening?" to its past and future warnings about the "energy crisis." But the

fact is, much of the so-called energy crisis is being concocted in the board rooms and public relations offices of the Nation's major oil companies.

That is not to deny that many parts of the Nation are experiencing serious fuel shortages: schools closed in Denver, factories shut down in West Virginia, Illinois, Mississippi, and elsewhere, jet fuel was scarce at John F. Kennedy Airport in New York and Iowa farmers were unable to dry their corn harvest. In my State of Wisconsin, the State government was coordinating the day-to-day juggling of supplies to meet needs. Now we are hearing predictions of a gasoline shortage this spring. But those problems were avoidable. The fuel shortages are a demonstration of, not an energy crisis, but a gross failure by the Nation's oil companies and by the Federal Government.

According to petroleum figures, the supply of known oil reserves—exclusive of the large supply in Alaska—would last 9 years at current rates of production. Granted, the recent decline in the reserve/production ratio in the lower 48 States is worrisome, but surely a 9-year supply could have gotten us through the winter. Indeed, the Office of Emergency Preparedness says that oil industry representatives—including those from the American Petroleum Institute, Continental and Mobil—assured OEP last fall that there would be no fuel shortage this winter. But a shortage did develop and with it a well-timed stepped-up industry ad campaign about the "energy crisis."

This public relations blitz by the oil companies is aimed at preparing the consumer for higher prices although prices already are artificially high;

It is aimed at convincing Government agencies to relax environmental standards, although the incalculable social costs still would have to be paid even if not by the oil companies;

It is aimed at persuading Congress to deregulate the price of natural gas, although that is the single major Government energy policy which protects the consumer instead of the oil industry;

It is aimed at preserving the oil import quota system, although it can be demonstrated that it has failed to achieve its purpose;

And it is aimed at preserving or enlarging oil industry tax loopholes, although no industry is the beneficiary of more corporate welfare.

One might think from the TV commercials of the American Petroleum Institute that the Nation is in danger of running out of oil and other energy resources. That certainly is not the case. A publication prepared for the Senate Committee on Interior and Insular Affairs, "Conservation of Energy," had this to say:

The potential for improving the domestic resource base for both oil and gas is considerable. For example, it has been estimated that the ultimate reserves of oil in the lower 48 states could be between 575 billion and 2,400 billion barrels. Present proved reserves are 36.5 billion barrels. The ultimate natural gas resources have been estimated to be between 1,250 trillion and 2,175 trillion cubic feet. Present proved reserves are estimated at about 275 trillion cubic feet.

The Department of the Interior, in a 1972 publication entitled "United States Energy, a Summary Review," outlined the vast wealth of energy resources in this country:

Our nation has been bountifully endowed with a large resource base of fuel minerals, which include petroleum, natural gas, coal, oil shale, uranium and thorium. The energy content of known resources of these fuel minerals amounts to 13,100 quadrillion BTUs, enough to last 190 years at the rate of energy use in 1970.

The potential resources of fuel minerals that are on the verge of use but await technological advance will last 16,500 years at the rate of energy use in 1970.

The industry itself acknowledges that the Nation's store of mineral wealth is immense. In its ad, Continental Oil says that the country has potentially recoverable oil reserves sufficient to meet present demand for 65 years, gas reserves for 50 years, coal reserves for 300 years, uranium reserves for 25 years and oil shale reserves for 35 years.

Why are not those vast resources being tapped? Amazingly, the oil companies contend that they need greater incentives for further exploration and production. But any projection of energy consumption for the next 25 to 30 years should furnish ample incentive to any company which hopes to grow and prosper. The Department of the Interior is predicting that the Nation's energy consumption will double before 1990, and others are predicting more rapid growth. That growth should be a boom for industry profits.

The oil companies would have us believe that these are difficult times for the industry in terms of profits. That, too, is not the case.

The 1972 National Petroleum News Factbook issue includes financial data on the Nation's largest oil companies, including profits in 1961 and 1971. The 24 companies for which figures are available for both years have more than doubled their combined profits, from \$2.9 billion to \$5.9 billion. The same publication shows that the Nation's domestic demand for all oil products jumped from 3.6 billion barrels in 1961 to 5.5 billion in 1971. Thus, while the Nation's oil consumption increased by just over 50 percent in a decade, the major oil companies' profits increased by just over 100 percent.

The country's largest oil company, Standard Oil of New Jersey, now Exxon, increased its profits from \$758 million to \$1,517 million during the decade. Second-ranking Texaco jumped from \$430 million in profits to \$904 million; third-ranking Gulf Oil from \$339 million to \$561 million; fourth-ranking Mobil Oil from \$211 million to \$541 million.

The same rosy profit picture emerges in comparing the oil industry to others. The M/G Financial Weekly, published by Media General Inc., reports a wealth of information on more than 3,400 major American corporations, including a compilation of earnings by industry groups. A recent issue showed that the 3,400-plus corporations reported total earnings of \$50 billion in the past year. Of that total, 42 corporations engaged in oil refining and marketing reported earnings of more than \$7 billion. In other words, roughly 1 percent of the corporations in the M/G

list, the major oil companies, earned 14 percent of the profits. Those 42 companies had an average profit margin of 6.9 percent, compared to 5.1 percent for all corporations; and their return on stockholders equity was 11.2 percent compared to 10.6 for all companies.

That the current fuel shortage is a concocted "crisis" does not diminish in any way the fact that the nation will face a real energy crisis if decisive action is not taken now. U.S. energy demand is doubling every 20 years; electrical consumption alone is doubling every 10 years. But reserve supplies of oil and natural gas, which now furnish three-quarters of the Nation's energy, have been declining for more than a decade; the development of the Nation's most abundant fossil fuel—coal—cannot proceed full-scale until we can avoid the hazards of air pollution and devastation of strip mining; nuclear power is considered the long-range energy answer, but it still poses safety and environmental problems; and such sources as geothermal and solar energy await further technologies before widespread use.

What is needed—and on this point all agree—is a national energy policy. Regrettably, many who have addressed this problem have placed great emphasis on an adequate energy supply and less emphasis on environmental protection and consumer costs. The oil companies, in particular, talk of "trade-offs" in the ecological area and of "balancing" environmental considerations and energy needs and—always—of higher prices. What I propose today is an energy policy in which environmental and consumers concerns are paramount.

My proposals are based on three principles:

That the Nation can meet its fuel needs by conserving huge amounts of energy now being wasted and by developing new technologies to tap our vast resources.

That the environment can and must be protected because any trade-offs which sacrifice environmental considerations merely shift the true costs to someone other than the user of the energy.

That energy costs can be held down by assuring competition between fuels and between energy companies, competition which is dwindling as the industry becomes more concentrated.

1. CONSERVE ENERGY

Much of the Nation's energy potential is lost either through inefficiencies in recovery of fuel resources or in converting energy to its ultimate use. The average amount of oil recovered from a reservoir, for instance, is only 30 percent of the amount in the ground. Only about 18 percent of the gasoline burned in the average car is converted to useful energy; the rest is wasted in start up, idling, deceleration, and elsewhere. A light bulb converts only 10 to 14 percent of its energy into light; the remainder is wasted as heat. The conversion of fossil fuels—oil, natural gas and coal—into electrical energy is enormous in terms of energy consumption, but the resulting electricity amounts to only 33 percent of the energy in the original fuels.

More efficient automobile engines or electrical generators obviously would conserve the limited supplies of fossil

fuels. Less obvious, but of equal importance, are the benefits to the environment and to consumers. If an automobile converts a greater percentage of gasoline to useful energy, less pollution fouls the air and the driver saves on fuel costs. The same is true for generation of electricity.

Even without the new technologies necessary for greater efficiencies, however, a number of steps can be taken to conserve energy.

In the transportation sector, where one-quarter of the Nation's energy is consumed, one of the top priority items should be a shift from energy-gulping automobiles to cheap, clean, and convenient mass transit systems. With the same energy used by one car driver, we can move four commuters to and from work by bus. It is time for the Congress to consider tapping the highway trust fund for mass transit financing in urban areas where that is a practical alternative.

In the commercial and residential sector, where one-fifth of the Nation's energy is consumed, improved insulation in homes, apartments, and offices could reduce energy consumption—and costs—for heating and air conditioning by 20 percent. This could be accomplished by upgrading FHA standards for insulation.

In the utility sector, where one-quarter of the Nation's energy is consumed, we should be working toward establishment of a national power grid to interconnect the country's electrical transmission lines. By taking advantage of seasonal and time variations in utility peakload requirements, a national power grid would reduce by 20 percent the country's need for future generating capacity, according to one estimate. One example of its benefits: while west coast residents are still sleeping, excess electricity could be shifted to the East where demand is greater.

In the industrial sector, where well over one-quarter of the Nation's energy is consumed, we should provide the incentive of higher energy costs to encourage companies to implement energy-conserving efficiencies. Figures compiled by the Federal Power Commission show that big industrial users pay less than half as much as homeowners for each kilowatt hour of electricity. Permitting utility monopolies to provide volume discounts to big users makes no sense, either in terms of energy conservation or economic equity.

2. RESEARCH NEW SOURCES

Those and other energy-conserving measures will give the country some lead time in developing the new technologies needed to meet the increasing energy demand. In the past, research and development expenditures by oil companies and utilities have been relatively modest, less than 1 percent of their revenues. One wonders whether we would be facing an energy problem if those companies had spent less telling us about the energy crisis and more solving it.

In order to meet the needs of the future, it will be necessary for the Government to become significantly involved in energy research in the next few years. Since this research eventually will be turned into profits by the oil companies

and utilities, the costs should be directly charged back to those companies rather than financed through general tax revenues. The research costs will, of course, be passed on to consumers by the oil and utility companies, but in proportion to each consumer's energy use.

Top priority for research to meet near-term energy needs should be on environmentally sound uses of the Nation's abundant coal resources. This should include methods to remove sulfur oxides from stack gas emissions and to convert dirty coal into clean fuels through coal gasification and coal liquefaction.

The most promising coal research—and one that deserves adequate funding—is being done on a process called magneto-hydrodynamics. An MHD generator converts heat directly into electricity, skipping the mechanical portion of the conventional turbine generator. It is a highly efficient process which produces little pollution. In addition, it requires comparatively small amounts of water and would be a boom in the West where low-sulfur coal is abundant, but water is not.

The biggest share of Government money now being spent for energy research is on development of nuclear power. The conventional fission reactor now in use would rather quickly exhaust the Nation's supply of low-cost uranium. But the liquid metal fast breeder reactor, now being developed, has the rather amazing ability to produce more fuel than it consumes and it would extend the life of uranium resources by 50 to 70 times.

But nuclear energy is not without its problems, not the least of which is disposal of nuclear wastes. I believe, however, that a recent newsletter of the Federation of American Scientists put this particular problem in proper perspective. The federation pointed out that a 1,000-megawatt nuclear plant now produces a cubic yard of nuclear waste each year which must be kept into perpetuity. But, the federation added, a comparable fossil fuel plant produces 10 million pounds of particulates, 46 million pounds of nitrogen oxides, 100 to 190 million pounds of sulfur dioxides and 300 to 380 million pounds of ash each year.

Fission reactors such as those now in use and the breeder reactor also pose dangers from low-level radioactive emissions and from the possibility—even if remote—of a catastrophic accident. I believe that research into development of the breeder reactor should continue. But because of the safety problems of the fission reactors, I also believe we should place great emphasis on research into nuclear fusion. We do not know for sure if we will be able to develop the technology for a fusion reactor, but its tremendous advantages make it well worth a major spending effort.

Unlike fission powerplants, there is no danger of an explosion or runaway chain reaction in a fusion plant. One fuel for the process, deuterium, is available from the oceans in almost unlimited quantities—at least a 20 billion year supply at current rates of energy consumption. Because the fuel is available from the seas, it would not be necessary to strip

mine vast acres of land as would be the case to obtain the uranium for the breeder reactor.

In addition to fusion, other long-term energy research funding should be aimed at developing solar and geothermal energy, two sources which have the potential for large amounts of clean energy.

3. PROTECT THE ENVIRONMENT

While the various research projects offer hope for clean energy in the long term, we cannot ignore environmental concerns in the short term. We cannot encourage strip mining or construct the Alaska pipeline or step up offshore oil leasing without assurances that we can prevent ecological disasters. Congress must take positive steps in the environmental area by enacting legislation on land use planning which, among other things, will regulate siting of powerplants, transmission lines, and refineries. Such legislation would not only protect the environment but would give the industry some planning guidelines to prevent delays in construction of needed energy facilities.

We must recognize that in some cases, environmental protection will mean more energy consumption, and thus higher consumer costs. The Environmental Protection Agency estimates, for instance, that the clean air standards for automobiles will mean an increase of more than 15 percent in gasoline consumption. We should be willing to pay the higher costs of environmental protection, but not the higher costs brought about by lack of competition in the energy industry, a point I will discuss later.

The important point is that those who consume the energy must pay the costs—the full costs—for it. That means the consumer who lights his Chicago home with electricity generated by burning coal strip mined in Montana or Wyoming must pay the cost of restoring the land. Otherwise, the rancher whose land is devastated subsidizes the true costs without receiving the benefits.

Any sound national energy policy must recognize the folly of subsidizing the energy companies, both through cost-free use of the Nation's air, water, and land as a garbage dump for industrial waste and through tax loopholes. Both shift the true costs of energy from the user to the general public.

4. ELIMINATE TAX LOOHPHORES

In his inaugural address, the President called for more self-reliance in the country. I think we should start by taking the oil companies off welfare. To paraphrase the President, let the oil companies ask not what their government can do for them, but what they can do for themselves. That means phasing out the various tax breaks which resulted in 1971 in the country's 18 largest oil companies paying only 6.7 percent of their net income in Federal income taxes.

One of the most amazing of those loopholes permits the oil companies to write off the royalties they pay to foreign governments dollar-for-dollar against their U.S. tax liability. Such royalties should be classified as normal deductible business expenses. That loophole not only robs the U.S. Treasury of millions of dollars, but it encourages foreign exploration for oil at the same time as the Gov-

ernment's import quota policy tries to discourage reliance on foreign oil.

5. END IMPORT QUOTAS

The whole oil import policy has been a sham. The limitation on imports is one of the major reasons for the shortages this winter. It is estimated that imports, which now account for one-fourth of the Nation's annual oil consumption, will account for one-half of all consumption by 1980. For the near-term, the Nation has little choice but to depend on imports to meet its growing needs.

The import system was established by Executive order in 1959 on the theory that quotas would protect the national security by insuring an adequate domestic supply. Quotas have been in effect for 14 years, but the fuel shortages of this winter are adequate testimony to the fact that the quota system has not worked.

Instead, the most significant effect has been to keep domestic oil prices artificially high by keeping out cheaper foreign oil. The 1970 Cabinet Task Force on Oil Import Control estimated that the quotas cost consumers more than \$5 billion a year in higher fuel prices.

The system really is not designed to solve the national security problems which supposedly justify the quotas. For one thing, import "tickets" have been allocated to refiners and, therefore, they have done nothing to encourage domestic exploration and production. Additionally, the quotas have even restricted imports from more secure Western Hemisphere sources, such as from Canada.

One cannot consider import policy without examining the implications of the formation of the Organization of Petroleum Exporting Countries—OPEC—a cartel of oil-producing nations which has succeeded in forcing up the price of its oil without regard to costs of production or to supply-demand considerations.

The failure by oil companies and importing nations such as the United States to head off this cartel has made the whole import question much more difficult. The lack of competition between oil-producing countries has closed the price gap between foreign and domestic oil. That makes it all the more important that we address ourselves to the entire problem of oil imports. We should consider the following actions:

Import policy should be established, not by Executive order, but by statute where it is subject to public and congressional review. A clear legislative policy also would remove much of the uncertainty which may discourage investment in some sectors of the oil industry.

Import quotas should be eliminated: First, because we need the oil and, second, because the competition of foreign oil will keep down domestic prices. If it can be documented that some form of protection would encourage domestic production, it should be through a tariff system rather than quotas. Under a tariff system, the difference between lower world prices and higher domestic prices would go to the U.S. Treasury rather than providing an incentive for OPEC to raise its taxes even further.

Oil should be stockpiled in sufficient quantities to discourage the threat of

at least a short-term shutoff of foreign supplies. Such stockpiling might be financed through money generated by a tariff on oil imports.

The U.S. Government should be involved in negotiating with foreign governments over oil prices, rather than leaving such negotiations to the oil companies. The failure of oil consuming countries and oil companies to band together in a consumers' cartel permitted OPEC to effectively "divide and conquer" in forming the producers' cartel.

It may even be necessary for consuming countries to take the drastic step of removing the international oil companies from their positions as marketers of foreign oil. M. A. Adelman, an economist and oil expert from Massachusetts Institute of Technology, has recently written an instructive article in foreign policy in which he points out that the producing nations cannot fix oil prices without using the multinational companies:

It is essential for the cartel that the oil companies continue as crude oil marketers, paying the excise tax before selling the crude or refining to sell it as products.

Were the producing nations the sellers of crude, paying the companies in cash or oil for their services, the cartel would crumble. The floor to price would then be not the tax-plus-cost, but only bare cost. The producing nations would need to set and obey production quotas. Otherwise, they would inevitably chisel and bring prices down by selling incremental amounts at discount prices. Each seller nation would be forced to chisel to retain markets because it could no longer be assured of the collaboration of all the other sellers.

U.S. tax policy should be restructured to encourage domestic rather than foreign construction of refineries. Foreign location makes the oil companies more vulnerable to an interruption in supply.

6. REGULATE GAS PRICES

With favorable tax treatment, import quotas and lax antitrust enforcement, oil companies seem to have the upper hand on consumers in all areas of government policy. All but one that is. And that one, Federal Power Commission control over the wellhead price of natural gas sold in the interstate market, is a main target in the oil industry's current public relations campaign on the "energy crisis."

The oil companies point out that the price of natural gas is lower than that of competing fuels. It is their contention that natural gas prices are too low and that deregulation would give them the "incentive" for further exploration. But it seems to me that the gap in prices between natural gas and other fuels is because the competing fuels are artificially high—because of lack of competition in the energy industry, among other things. In any case, it is not necessary to deregulate natural gas prices to increase them.

If a case can be made for higher prices, the companies presumably should be able to convince the FPC. Rates are set to insure companies a fair rate of return on their investment. Anyone familiar with regulatory agencies in this country knows that it is the industry, not the consumer which has the decided advantage in rate cases. The FPC now has before it a staff proposal to give companies an extremely lucrative 15 percent return on total in-

vestment. If wellhead prices are increased, the boosts should be passed on to the big industrial users who are now paying only a fraction of the per unit price paid by homeowners.

It also is imperative that the Federal Government obtain an accurate estimate of the Nation's natural gas reserves before any drastic step such as deregulation of prices. The industry tells us that the known supply of reserves is declining, but the specifics of industry estimates are a tightly held secret and one which has not been verified by an objective source. It does not take too much imagination to realize that the industry has a vested interest in creating the impression that reserves are lower than they really are.

7. PROMOTE ENERGY COMPETITION

Of the several recommendations I am proposing as part of a national energy policy, some, such as strict environmental protection and elimination of oil company tax loopholes, may have a tendency to push fuel prices higher; and others, such as continuing regulation of natural gas prices and elimination of the oil import system, will tend to keep prices down. This leads me to what I view as one of my key recommendations, one which will both insure an adequate fuel supply and keep prices down. That is to promote competition in the energy industry.

In the past decade, the energy industry has become concentrated in fewer and fewer hands, especially since oil companies started acquiring coal and uranium assets in their move toward becoming multifuel "energy companies."

Of the top 15 coal producers in 1970, four were oil companies, each of whom had purchased a major coal company in the past decade. Two others had assets in competing fuels, and a number were "captive" coal producers, owned by steel or nonferrous metals companies. Significantly, only three of the top 15 producers were independent coal companies which did not depend on competing fuels for an important share of their income.

Of the Nation's 25 largest oil companies, all 25 are involved in natural gas, 18 are in oil shale, 18 in uranium, 11 in coal and seven in tar sands, according to one study of the energy industry. Another study shows that the major oil companies account for 84 percent of U.S. refining capacity, 72 percent of natural gas production and reserve ownership, 30 percent of domestic coal reserves, 20 percent of domestic coal production, 50 percent of uranium reserves and 25 percent of uranium milling capacity.

Almost one-quarter of the coal reserve acreage being leased from the Federal Government is controlled by oil companies and, significantly, very few of those leases are producing. Oil companies—among them Humble Oil, Shell and Kerr McGee—also have been active in acquiring water, particularly in some of the coal rich western States where the water may be important in the development of that resource. Oil companies, including Union Oil, Standard Oil of California, Getty Oil, Phillips Petroleum, Gulf Oil, and Mobil Oil, are the major explorers for geothermal energy. The oil companies seem to have an insatiable

appetite for monopolizing the energy industry.

This trend toward economic concentration, as well as such other noncompetitive aspects of the oil industry as joint ventures, joint ownership of pipelines and vertical integration from wellhead to gas pump, are dangerous. Without competition in the energy industry, there is danger of collusion, price-fixing, and market sharing and there is little incentive for lower prices, greater efficiencies, and more research into better technology.

I am sponsoring legislation which would prohibit oil companies from acquiring coal and uranium assets and which would require oil companies which now have such assets to divest themselves within 3 years of passage of the bill. I am also planning to introduce legislation dealing with the anticompetitive aspects of oil company ownership of pipelines. I am hopeful that these pieces of legislation will provide a focal point for a major congressional investigation into competition in the energy industry.

8. COORDINATE ENERGY POLICY

Congress should consider centralizing the authority over energy policy, both in the executive and legislative branches. Congressional quarterly reports that energy policy is now scattered among 64 Federal departments and agencies. Most of those responsibilities should be combined into major agencies, one dealing with development of energy and the other with regulation. Energy is important enough to the future of the country to merit a separate congressional committee.

9. GIVE CONSUMERS ACCESS

Congress also should stop one of the most insidious practices which distorts energy policy. I am referring to the industry advisory councils, such as the National Petroleum Council which "advises" the Secretary of the Interior. These councils actually are built-in lobbies which give industry—but not the consumer—access to and input into Government policy. The National Petroleum Council has recently published several major studies aimed primarily at one thing: promoting the profits and welfare of the energy industry.

The makeup of the NPC's Committee on U.S. Energy Outlook is illuminating. It includes representatives from Continental Oil; Humble Oil and Refining; Kerr-McGee; El Paso Natural Gas; Gulf Oil; Big Chief Drilling Co.; Ashland Oil; Atlantic Richfield; Shell Oil; Marathon Oil; Sun Oil; Louisiana Land and Exploration Co.; Texaco; Union Oil; Phillips Petroleum; Standard Oil of California; Murphy Oil; Cities Service; Standard Oil, Ohio; Standard Oil, Indiana; and a handful of independent operators, Government officials, and trade association members. The advisory councils either should be eliminated or balanced with consumer and public power representatives.

In summary, my recommendations for a national energy policy fall into nine major categories: Conservation of energy, research into new sources, protection of the environment, elimination of oil industry tax loopholes, elimination of oil import quotas, continued regulation

of natural gas prices, promotion of competition in the energy industry, coordination of energy policy, and opening consumer access to Government energy policies.

In order to accomplish those objectives, the Congress will have to clear a number of hurdles, including the anticipated opposition from some of the Nation's more powerful interest groups, the oil, utility, and highway lobbies among others.

But the accomplishment of these policies would give proper emphasis to environmental protection and to consumer costs as well as the adequacy of fuel supplies.

ESTABLISHMENT OF AN ENERGY DEVELOPMENT AND SUPPLY TRUST FUND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 15 minutes.

Mr. VANIK. Mr. Speaker, this past winter, houses in Maine have gone without heat, schools in Denver, were closed for lack of fuel. Factories in my own State of Ohio have been warned against further industrial expansion by officials of the natural gas companies. In the Greater Cleveland area new industries requiring gas are limited to space heat supplies. Thousands of pages of Government studies have been produced on the energy crisis; but Government seems paralyzed. It is very clear that our shortage of energy is slowly—but certainly—weakening the Nation's capacity to survive.

We have energy reserves which could supply us for centuries. We have in this country 3 trillion tons of coal, 300 billion barrels of crude oil, and the equivalent of 2 trillion barrels of oil from shale—and yet, the petroleum and gas companies tell us they are running out of supplies. It is clear that we face a shortage crisis.

How can this be? How can the industry, which only 5 years ago filled our ears with the confident words of expansion and growth, now tell us, suddenly, that the health of the industry and the fate of the Nation's economy is at stake? Is it only coincidence that the crest of this wave broke at a time when Congress is considering tax reform—reform which could cost the oil companies billions of dollars in the elimination of inefficient and unnecessary tax subsidies?

How can we trust the integrity of industry efforts—industry which in the past decades manipulated the Nation into import quotas which kept cheap oil from coming to America so as to protect an intensive development and consumption of high-priced domestic supplies. The leaders of the domestic oil industry moved Government policy toward controlled markets, shortage, and higher prices. Today's energy crisis was substantially created by the leaders of the industry. Should we listen to them today?

Contrary to the barrage of the industry media campaign, the energy crisis is not, fundamentally, a crisis of supply. What is really at stake in this crisis is the profit margins of the petroleum in-

dustry. What is the bounty the American people must pay to insure their lights remain on and their house warm?

Our present energy problems could represent a windfall of billions of dollars in profits to the large oil companies—all at the expense of the American consumer and taxpayer. If a more forceful congressional role is not forthcoming, the industry will simply exploit our present shortages to reap billions of dollars in consumer and Treasury funds as profits.

The energy policies of the past were inspired by fear and governed by selfishness. For 60 years we have followed the recommendations of the industry. For too long the Federal Government has been merely a sounding box for industry demands. We protected them with the import quota and the system of State prorationing—both of which restricted supply and inflated prices. We did this all in the interest of national security. But this winter we saw how dramatically these policies have failed.

Now we are asked to rely on the industry to formulate a national energy policy to solve the energy crisis. How can we trust these self-serving experts to chart America's future when they have failed so badly in the past? How can we place the public welfare in the hands of short-sighted men propelled by economic greed?

It is the height of folly to hold that the oil industry really has the interests of the American people in mind when it suggests an increase in the depletion allowance or the decontrol of natural gas prices. The conclusion is inescapable: the policies of the past have been proven inadequate; new policies are required immediately.

RELiance ON PRIVATE DATA

A good deal of our present confusion was created by the splintered Federal effort in energy matters. With so many pressure points, industry influence on policy can be exerted in many covert and subtle ways. The dependence of our energy policy on industry and private information was revealed, tragically, when General Lincoln, former Director of the Office of Economic Preparedness, testified before the Senate that last fall he had been misled by industry sources with regard to the Nation's supply of fuel oil—and thus the economy of much of the Nation suffered enormous damage due to fuel shortages this winter.

On the most fundamental level, that of information collection, the Federal Government is entirely dependent on the private sector. The Department of Interior today quotes the industry oracle, the Petroleum Council, on reserves. Reliable sources indicate, however, these industry estimates of reserves are understated by perhaps 50 percent. The potential for abuse in this situation is tremendous: the petroleum industry controls the marketplace—holding the country ransom to their price and tax demands. The situation is rapidly getting worse: the petroleum industry is buying into the taking over the coal and uranium industries. Already the oil industry owns over 50 percent of the Nation's coal capacity and 45 percent of the uranium production. Government failure to en-

force antitrust policies is creating the frankenstein of a national energy monopoly.

A lack of impartial information represents one of the major obstacles to the formulation of an energy policy which truly reflects the public interests.

THE NEED FOR ENERGY CONSERVATION

The influence of industry on Government policy can be seen in other ways as well. It is interesting that the bulk of the present controversy is 'supply related'—that is, concerned with ways in which our domestic production can be improved, thus maintaining and increasing sales for the energy industry. Over the past two decades, we have developed incredibly extravagant patterns of energy consumption to the benefit of the petroleum industry. A truly balanced National energy policy, one concerned with the environment, would place a much greater emphasis on ways to lessen energy needs by improving the efficiency of energy transmission and utilization.

We waste fully one-third to one-half of all the energy we consume. A recent staff study from the Office of Emergency Preparedness estimates that by 1980 the Nation could conserve the equivalent of 7.3 million barrels of oil a day through implementation of a coherent program of energy conservation. The importance of this saving can be seen by the fact that crude oil production in 1970 was about 11 million barrels per day.

Yet despite the promising prospects of this course of action, it has received little debate on the National level. Instead, we are presently concerned with extending subsidies to the oil industry through an inequitable and wasteful system of tax preferences—preferences which permit the cost of an average oil well to be recovered 16 times over.

It is clear that hard decisions lie ahead if we are to meet our genuine energy needs in the future. In terms of curbing the demand for energy, feasible technologies now exist to accomplish significant conservation in industrial and residential energy use. Measures such as increased insulation in homes and more efficient industrial processes can and should be implemented immediately. Significant areas of research and development remain to be charted. The present internal combustion automobile engine is so inefficient that three-fourths of the gas it burns is wasted and the average miles per gallon delivered has decreased since World War II from 13.5 miles per gallon to 12.2 mpg; surely we are capable of improving the efficiency of our automobiles. I am sure that through a concerted effort we can cut our consumption of energy substantially without jeopardizing our economic and social well-being.

THE NEED FOR NEW RESEARCH FOR CLEAN ENERGY

At the same time a realistic assessment of future alternative energy sources must be undertaken. Present sources for energy research are misallocated and inadequate and are concentrated on energy sources which threaten the world's environment. Too much emphasis has been placed on the development of atomic energy at the expense of other, more reasonable, alternatives. A just-completed study conducted by the Rand Cor-

poration for the State of California on its electricity needs warns State officials against an over-confidence in the promise of atomic power:

The long awaited promise of abundant and inexpensive power from the atom has failed to materialize as rapidly as projected. Further plans for nuclear power plant construction are now beset with public controversy concerning nuclear safety and radioactive waste disposal.

We have placed an unwarranted faith in the atom to solve our energy needs. Meanwhile, research in other more realistic and less hazardous alternatives, such as solar energy and the gasification of coal, continues in relative obscurity. Ideally, funds for research would be generated internally from industry. But the large oil companies have found it more profitable to gear their capital expenditures to sales and promotion rather than research and development. The Washington Post revealed that the oil industry has spent over \$3 million informing the public of the crisis in our energy sources. At the same time, Senator METCALF has compiled statistics which reveal that the electric utilities expend 3.3 times as much capital on promotion as they do on research and development.

One major oil company has just spent millions telling the American people how they changed two "s"'s to "x"'s. The stripes of the energy industry have not changed: they are more interested in profits and sales today than in meeting the problems of the future. The American people cannot rely on the energy industry for the hard research required. A trust fund is needed; a trust fund is the only way to provide for the high level of steady effort that is required.

A TIME FOR A NEW POLICY

It is clear that the solution of our energy problems will not be found which sustains and aggravates past mistakes. We must coordinate the different agencies now involved with energy planning. We must work to insure that our energy policy does not fall within the orbit of any one economic or regional interest, but becomes a national energy policy working for all of our citizens. We must provide for a comprehensive program of research and development to enable us to utilize our precious, depleting resources more wisely than we have in the past. We must also explore alternative energy sources which will not only free us from the limitations of fossil fuels but also improve our commitment to a clean environment. All these requirements demand an imaginative response on the part of the Congress.

In an effort to develop this new policy, Mr. Speaker, I will introduce tomorrow legislation which takes a creative approach to our energy dilemma. My proposal will establish an energy development and supply trust fund. I will leave to another time a more complete discussion of the specific details of this legislation. However, I would like to emphasize that if we are to solve our energy problems, we must step away from old policies and old mistakes and toward new and imaginative solutions, supported with adequate funding and directed to the public interest.

THE NORTHEAST RAIL CRISIS: DOT REPORT IS NOT THE ANSWER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. ADAMS) is recognized for 5 minutes.

Mr. ADAMS. Mr. Speaker, the railroads are a vital part of the economic and social life of the Nation. Every day I receive letters and telegrams about the box car shortage—this year intensified by the heavy demands of the Russian grain shipment. I know what rail transportation means to my own region, the Northwest, and the Port of Seattle which I represent. This transportation system is national—touch it in any part and the effect is felt throughout. The railroads of the Northwest and the shippers they serve cannot well survive without a viable rail system in the East and the huge urban market it serves.

The administration proposal for the solution of the Northeast railroad crisis as outlined in Secretary Brinegar's report to the Congress is a sort of magical mystery tour. The concept is that a new corporation would be created with no money. Since it has no money, it would issue stock and use this stock to acquire certain assets of the bankrupt railroads. These assets would be those designated by the Secretary of Transportation as being necessary for a core rail service. In deciding what this core rail service would be the Secretary would be given arbitrary and dictatorial powers—his decisions would not be reviewable by the courts, the Interstate Commerce Commission or the Congress. The report gives lip service to the rights of shippers, affected communities and rail labor, but little more.

Despite the fact that the trustees of the Penn Central have stated that it will require \$600 million to restore the ravaged Penn Central system, the report assumes that the core rail service can be preserved and continued with no Federal money. This is a "do it with mirrors" proposal and is simply presented to Congress with the pious hope that the problem can be solved within the framework of the private sector—by cooperative and public spirited action by all the parties involved.

I agree with the Secretary of Transportation that nationalization would be neither the efficient nor the proper way out of the Northeast railroad mess. But I had hoped with the expert knowledge at his disposal he would have prepared for the Congress a report that had some basis in reality. In effect, the administration is proposing to do nothing about the rail crisis in the Northeast except to throw this vital transportation network into the arena and see what survives in a free-for-all of economic greed. The philosophy of the "public be damned" has been given Presidential sanction.

There is no question that railroads in the Northeast are overbuilt—there is too much track and there are too many competing lines to survive as they are now. There are the basic problems of short hauls and high terminal costs. I very much doubt if any now prosperous railroad would buy up a substantial portion

of the rail lines in the Northeast—even if they had the money, which they do not. As operating railroad men they would see the perils too well of taking it all; and if they only take part, the abandoned remainder, which may be uneconomic to a railroad balance sheet, can be economic life or death for the manufacturer, the shipper, or the worker or mean a complete abandonment of all railroad passengers.

A sound transportation system is vital to the social and economic life of any region. It has the quality of a public utility. From the foundation of this Nation, the Government has been directly involved in transportation—from the building of canals and waterways to the granting of land to railroads to the trust fund for highways. In America, public transportation in all the modes has always been a joint task of private enterprise and the Government. The public interest in the railroads in the Northeast was most recently demonstrated by the rapid and overwhelming vote on February 8 to postpone a strike on its largest railroad, the Penn Central. This action was taken not because of concern solely for labor or for management, for creditors or for stockholders, but because the Congress saw that this gigantic transportation system could not be shut down without creating chaos.

The public interest in the Northeastern railroads involves management and worker alike, it involves the shipper and the manufacturer; it involves the hundreds of communities who depend on rail service for both passenger and freight. The future of this service cannot be left to the arbitrary and capricious decision of the bankruptcy auction.

I believe that the Congress must determine a procedure whereby essential rail service can be continued and this procedure must consider the interest of all. I favor rationalization of the rail system in the Northeast; by this I do not mean nationalization but I do mean using a rational method to determine what a basic system should be. I think from the many proposals that Congress has before it, a good and rational plan can be created. This plan must include a means of deciding what rail service is essential which will give an opportunity for all interests to be considered; and it must recognize that some Federal investment in preserving this system is not only necessary, but proper and with ample precedent in our Nation's history.

REPORT FROM WASHINGTON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KOCH) is recognized for 5 minutes.

Mr. KOCH. Mr. Speaker, I am mailing to constituents my first newsletter of this Congress. For the interest of my colleagues, I would like to set forth the complete text of the newsletter. It follows: CONGRESSMAN EDWARD I. KOCH REPORTS FROM WASHINGTON

Dear Constituent and Fellow New Yorker: These are dreary days in Washington, and I am not talking about the weather. It's the Administration's attitude toward the

problems of our country that is distressing. When referring to the conditions of our urban centers recently, President Nixon said—

"The hour of crisis has passed. The ship of state is back on an even keel, and we can put behind us the fear of capsizing."

I suppose if one commutes between 1600 Pennsylvania Avenue and Key Biscayne, it is hard to see the problems, but if one lives in New York City one is in the eye of the storm and one sees that conditions have deteriorated in recent years.

The fundamental crisis facing the Congress is the President's refusal to spend money already appropriated for many domestic programs. The President's goals are two-fold. He wants the Congress to replace existing programs with "special revenue sharing" in various areas, such as housing and education; and he wants to reduce the budget. The President doesn't seem concerned about how long funding is suspended and people go without help while waiting for the enactment of revenue sharing—for the longer it takes, the greater the reductions in the budget.

We in Congress are concerned about the net amounts that will go to the states under revenue sharing compared to amounts appropriated under existing programs. The President has asserted that present funding levels will be maintained, but when the education revenue sharing proposal was recently announced, New York and other states readily saw they would lose millions of dollars.

The overture of the President's efforts to force Congressional approval of his revenue sharing proposals was the announcement of an 18 month housing moratorium. At first the moratorium was touted as a time to review existing programs, but now future funding is clearly tied to the enactment of the President's Community Development Revenue Sharing proposal.

In addition, the Nixon Administration has moved quickly to dismantle the Office of Economic Opportunity and has done its best to undermine the Legal Services program. President Nixon has even threatened to veto the Older Americans Act that provides such programs as nutritional services for the elderly.

The cutbacks have extended into the Labor Department while the unemployment problem continues and returning Vietnam Veterans are unable to get jobs. Approximately 4,500 veterans in New York City now draw welfare checks. They want to work, but cannot find employment. How can an Administration so quickly turn its back on the young men it sent to Vietnam?

The Nixon Administration has managed to combine both unemployment and inflation. Predictably, Phase III's "voluntary controls" have not worked. The Consumer Price Index for February showed the largest one month increase in 22 years with an unprecedented jump in food prices. I am co-sponsoring legislation to remove all restrictions on meat imports and to roll back and freeze food prices.

While cutting back our domestic programs, President Nixon is proposing that we aid Indochina's reconstruction. I am concerned about the devastation we have wrought in North and South Vietnam, but I would have a hard time justifying aid for our former enemy, as well as South Vietnam, while our own people suffer the consequences of domestic budget cuts. This is an issue that will be argued in Congress; and I would be interested in having your thoughts on it.

THE CIA AND THE FBI

In February, I brought under congressional scrutiny the CIA's involvement in local police enforcement matters. The CIA has provided training for police officers from a dozen police departments in the country de-

spite the stipulation in the National Security Act of 1947, establishing the CIA, that it "shall have no police, law enforcement powers or internal security functions."

I appreciate the need for upgrading local law enforcement departments. But, I believe this assistance should be provided through the Justice Department's programs, and not the CIA.

The CIA is an intelligence agency removed from public and regular Congressional scrutiny. Any intelligence agency that operates secretly has potential dangers to a free society. We must be alert to abuses of its authority so that we don't wake up some morning to find that an agency we established to protect ourselves from outside subversion has become a Trojan Horse in our midst invading the private lives of our own people.

On March 5, after preliminary investigations were conducted by the House and Senate Government Operations Committees, Chairman Chet Holifield (of the House Committee) announced that CIA Director James Schlesinger had terminated the disputed training program. However, in his memorandum to Chairman Holifield, Mr. Schlesinger went on to say that such activities would be "undertaken in the future only in the most compelling circumstances and with his approval. I believe the Director does not have this discretion and I have asked the General Accounting Office for a ruling on whether the 1947 law is still binding and prohibits such activities."

The matter of privacy has also been raised by the nomination of L. Patrick Gray as Director of the FBI. On November 1, Reps. Ben Rosenthal, Jonathan Bingham and I wrote to Mr. Gray requesting that we be allowed to examine the files maintained by the FBI on the three of us as part of its collection of dossiers on Members of Congress. In response, while indicating that the dossiers contained only "biographical" material obtained from public information sources, Mr. Gray turned down our request stating that access to the files was "only on a need-to-know basis." This policy runs contrary to the bill I have introduced (my Federal Privacy Act) to require federal agencies to inform persons of files maintained on them and allow individuals to examine their files except in cases of national security.

In testimony before the Senate Judiciary Committee on March 9, I urged that Mr. Gray's confirmation be denied because of, among other reasons, his apparent insensitivity to improper government surveillance in our country. While the FBI must collect information on individuals engaged in criminal activities, it should not be amassing political dossiers on private citizens or public officials.

HEALTH CARE

We are all concerned about the problems in our health care system, particularly its high cost and failure at times to reach those who need it. In an effort to secure quality health care for everyone, I have made several proposals in this field, as well as co-sponsored Senator Kennedy's National Health Security Act.

I have re-introduced my bill to extend federal assistance for the Children & Youth and Maternal & Infant Care projects funded under Title V of the Social Security Act. Last year these projects were extended for one additional year, although I had proposed a five year extension. I am working for another extension with Ways and Means Committee Chairman Wilbur Mills.

The Title V programs deliver excellent comprehensive, personalized health care to over one million mothers and children of low-income families. In the six years of their existence, they have increased the number of "well-registrants" by 50% and reduced infant mortality in some areas by as much as 50%. There are 23 such Title V projects in New York City.

As a result of the success of these projects and the alternative abuses the medicaid program has suffered in New York City, I have proposed that this type of program be developed for medicaid patients. I have introduced legislation to give cities like New York, whose medicaid programs are being undermined by abuses, the option of providing health services to medicaid patients through such neighborhood health centers, staffed by salaried physicians, rather than through private physicians on a fee-per visit or fee-per service basis. An exception would be made for persons with severe chronic disabilities.

In my research on this matter, I found that in New York City medicaid costs have doubled in the last two years to \$1.3 billion; only 4% of the City's doctors are collecting 85% of the medicaid payments; and the program is rife with abuses by some physicians overcharging, charging for services not rendered, and even putting patients through unnecessary tests and treatment. In short, under today's system, health care for New York City's medicaid patients is deteriorating while costs are soaring. This is particularly tragic when the Title V projects have demonstrated a successful alternative.

In another area, I have found that too many Americans are being subjected to unnecessary X-radiation exposure. Furthermore while 95% of the radiation we are exposed to comes from medical X-rays, there are few controls over X-ray equipment and persons operating it.

I have introduced H.R. 672 to apply federal performance standards recently promulgated for new X-ray machines used for diagnosis and treatment to all X-ray machines in use. The bill also mandates an annual inspection of the machines and the use of protective lead shielding on patients whenever X-rays are taken.

On March 9, the Senate Commerce Committee held hearings on radiation control. I testified on H.R. 672 and a companion measure, H.R. 673, that requires minimum federal standards for the training and licensing of radiologic technologists.

In some states we license car and TV mechanics. I feel it makes sense to license X-ray technologists who handle the most sophisticated of equipment—equipment that can provide extended life if properly used or shorten life if improperly operated.

CRIME

The problems of drug related crime continue to plague our country and particularly New York City.

Recently, Auguste Joseph Ricord, who was responsible for bringing at least a ton of heroin into this country every year since 1966, received the maximum federal penalty for unlawful distribution of narcotics: 20 years imprisonment and a \$20,000 fine. He will be eligible for parole in less than seven years. I have introduced legislation, H.R. 4235, to increase the federal penalty for drug pushing by an adult non-addict to life imprisonment with parole available only after at least 20 years of the sentence has been served. The bill would affect pushers of hard narcotics.

When the 93rd Congress convened, I re-introduced my bill, passed by the House and Senate last year, but stalled in conference, to require states receiving LEAA assistance for their correctional facilities to provide drug therapy for imprisoned addicts. I also re-introduced my "Light on Crime" bill, H.R. 5055, providing \$60 million annually through LEAA for five years to pay for two-thirds of the cost of installing high intensity street lighting. These lights, which turn night into day, are very effective in reducing crime, and are being installed on some New York City streets.

The Auxiliary Police Force, created in 1951, as a civil defense unit, has proved to be a valuable supplement to the City's regular po-

lice force. I have urged that the City's Auxiliary Police Force be quintupled over the next 4 years bringing its enrollment to 25,000. I also have recommended that the City provide Auxiliary Police with free uniforms and limited powers to issue summonses for parking and sanitation violations. The Defense Department has requested \$83.5 million for the nation's Civil Defense program. I have urged the House and Senate Appropriations Committee to earmark some of these funds as "dual purpose" funds to be used by localities as Auxiliary Police subsidies.

I continue to work for passage of my bill to give the federal Executive Protection Service the responsibility for guarding foreign missions and consulates in cities throughout the United States. If enacted, this bill will free City policemen from consulate guard duty so they can return to the streets and protect the public.

MASS TRANSIT

Two proposals of importance to transit riders are now being debated in Congress. One would open the Highway Trust Fund to mass transit expenditures; the other would provide localities with federal aid for the maintenance and operation of mass transit systems.

If these proposals are approved by Congress, New York City will receive millions more in mass transit aid from the federal government than it does today. As a Member of Congress and as a subway rider, I am pressing the "straphanger's" case on both proposals.

On February 6, I appeared before the Senate Housing Subcommittee in support of H.R. 2734, a bill I am sponsoring with other Members of my Committee, to provide \$400 million annually in mass transit operating subsidies and \$3 billion in construction assistance. The distribution formula in H.R. 2734, which has become known as the "Koch formula," allocates operating assistance on a per revenue passenger basis; this means that each locality's share of the \$400 million would depend on its proportionate share of the nation's total transit passengers. On this basis New York City would receive a large portion of the aid since its transit systems carry approximately 30% of the nation's transit passengers.

On March 15th the Senate approved the Federal Aid Highway bill making available \$850 million annually for either mass transit or highway projects in urban areas. \$850 million is a small portion of the total \$6 billion highway budget but it represents an historic modification of the Highway Trust Fund and a first step toward the goal of a single National Transportation Trust Fund.

The Senate bill also includes a transit package expanding the existing mass transit program: \$400 million annually in operating assistance and \$3 billion in new capital authority. And, the bill opens the Highway Trust Fund to bicycle lane and shelter construction, a provision I first proposed in 1971.

Having suffered a setback in the Senate, the highway lobby will try to roll back the mass transit uses of Highway Trust Fund revenues in the House. I am working through the DSG Transportation Task Force, of which I am chairman, to build a coalition of support for the transit amendments. And, I have testified before the House Public Works Committee in support of the Senate's transit provisions.

Last month the cause of mass transit was aided by the formation of a new Mass Transit Subcommittee in the House Banking and Currency Committee. I am now a Member of this Subcommittee.

If New York City is to meet the air quality standards mandated by the 1970 Clean Air Act, greater use will have to be made of mass transit in the metropolitan area. The pollution crisis underscores the City's need

for mass transit operating subsidies and more than \$1 billion in federal assistance requested by the MTA for capital improvement and construction projects.

NEW COMMITTEE AND SUBCOMMITTEE ASSIGNMENTS

In the first weeks of this Congress, I was appointed to the House Administration Committee. I continue to be a Member of the Banking and Currency Committee with assignments on its Mass Transit, Consumer Affairs, Small Business and International Trade Subcommittees.

Paraphrasing, I should note that I have been made Secretary of the New York Democratic Delegation which now meets two times a month. In the 91st Congress, I helped organize these meetings to increase our effectiveness as a delegation in the House and in our relations with the federal agencies.

Your comments on this newsletter and any proposals you might have on any subject are of interest to me. Please write to me c/o House of Representatives, Washington, D.C. 20515.

If you need assistance, call my New York City office at 264-1066 between 9:00 a.m. and 5:00 p.m. weekdays.

FEDERAL CRIME INSURANCE PROGRAM

If you are unable to get private insurance against burglary in your home, apartment, or place of business, you may wish to consider coverage under the Federal Crime Insurance Program. This insurance, at affordable rates, won't be cancelled because of losses. All of New York is covered under this program.

For information on rates and coverage, call any licensed insurance agent or broker in the state.

The newsletter also included three pictures. The captions for these pictures are as follows:

Recently, a thousand women with their children came to the federal office building in Manhattan to protest proposed day care regulations restricting eligibility in many federally assisted day care programs. The effect of the new regulations will be that an estimated 15,000 working women in the City, many of whom are paying taxes, will be forced to leave their jobs, stay home with their children, and go on welfare. I am co-sponsoring legislation to nullify the proposed regulations, and on March 21 the Democratic Caucus voted unanimously to fight the Administration's cutbacks in the day care program and other social services. (For pictures #1 and 2)

On February 28, I was the keynote speaker at the 1973 Bicycle Symposium sponsored by the National Park Service concerning my legislation to use Highway Trust Fund monies for the development of bicycle lanes and shelters. The Congressional Ad Hoc Committee on Bicycle Transportation, of which I am co-chairman, in coordination with the Department of Transportation and the NPS is sponsoring a National Bike Day tentatively scheduled for July 15.

IS OMB RUNNING THE VETERANS' ADMINISTRATION?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. SAYLOR), is recognized for 30 minutes.

Mr. SAYLOR. Mr. Speaker, on February 27 of this year, I addressed this body concerning the oversight responsibilities of the standing committees of the House with respect to the department or agencies coming within their jurisdiction. I also spoke of the recent address of the Administration of Veterans' Affairs, Mr. Donald E. Johnson, in which

he completely subordinates himself and the Veterans' Administration to the dictates of the Office of Management and Budget. Since my previous speech, additional evidence of such subordination has surfaced at recent hearings before the Subcommittee on HUD, Space, Science, Veterans and certain agencies of the House Appropriations Committee.

At these hearings Mr. Johnson introduced a letter addressed to him by the then Director of the Office of Management and Budget, Mr. Caspar Weinberger, dated January 26, 1973. The full text of the letter follows:

In reviewing the budget submission of all executive branch agencies, the President has been guided by his overriding commitment to avoid the need for a general increase in tax rates. As a result, the spending proposals set forth in the 1974 Budget for each Federal activity represent the maximum amounts that will permit the Administration to accomplish the following overall objectives:

For FY 1973, to hold total Federal outlays to \$250 billion.

For FY 1974 and 1975, to reach and preserve a modest surplus in the full employment budget without the necessity for proposing an increase in tax rates.

The President has approved budget allowances for your agency as shown in Enclosure A for 1973 and Enclosure B for 1974 and 1975. He expects you to develop detailed plans and operations for your agency in such a way that your 1973, 1974, and 1975 budgets will be held within the totals shown. These amounts and all other information in this letter are confidential and should be guarded with care until the President's budget is transmitted to the Congress.

The 1975 allowances represent an innovation made this year in recognition of the impact that one year's commitments exercise on subsequent years' financial resources. These resources have become so increasingly preempted by prior actions that advance budget guidance and responsible forward planning have become essential to prudent financial management and sound fiscal policy.

Although the 1975 allowances are intended to provide firm guidance, the degree of uncertainty surrounding such forward estimates is obviously much greater than in the case of shorter term estimates. Adjustments (down as well as up) will, of course, be made in next year's budget process as required to take account of certain developments now unforeseen: for example, the outcome of this year's legislative action, later and more accurate statistics, more informed appraisals of workload, and other changes in the external environment.

Nevertheless, it is expected that any 1975 budget requirements which may result from legislation proposed or favored by your agency will be within the totals provided.

SUPPLEMENTALS

Proposals for 1973 supplementals under existing legislation are being transmitted to the Congress with the 1974 Budget. For your agency, they include only the item and amount listed in Enclosure A. Other current year supplementals will be transmitted later only if they meet the policy tests of OMB Circular No. A-41 and the resulting outlays can be offset within the annual totals provided herein for your agency. In such cases, required materials will be submitted in accordance with Circular No. A-41.

CIVILIAN EMPLOYMENT CEILINGS AND JANUARY 1973 PAY RAISE

Enclosure C sets forth the ceilings on civilian employment established by the President for your agency. The revised 1973 employment ceilings do not take account of the hiring freeze currently in effect. You may lift the hiring and promotion freeze as

soon as you can be certain that your agency can absorb—within the present 1973 outlay and appropriation estimates—the full amount of the January 1973 pay increase. For this purpose, transfers between appropriations may be contemplated, consistent with the language proposed in Title II of Part III of the 1974 Budget Appendix.

SIGNIFICANT POLICY DETERMINATIONS

The allowance for Medical Care is intended to ensure high quality medical care to greater numbers of veterans to be achieved by continuing emphasis on nursing home and outpatient care as alternatives to hospitalization and by further reducing the length of patient stay as indicated in the budget document. You are encouraged to seek ways of increasing managerial efficiency such as coordination of patients admissions with the schedule of testing and elimination of duplication of services within medical regions.

The study of the projected bed needs for the VA hospital system now underway with OMB participation, carries high priority and should aim for interim results in time for the Spring Budget Preview. We request that the study specifically address itself to the extended care program as well as the hospital program and indicate the future directions for nursing care and domiciliary beds.

An intensive reorganization of VA field offices will be undertaken, to conform to the standard Federal regions, with a tight redistribution of staffs to improve services, attain economies, and enhance the role of local organizations and governments.

A revised Compensation Rating Schedule will be issued effective in FY 1974, based upon the approved guidelines.

The budget allowances assume housing loan asset sales of \$600 million in FY 1973 and \$416 million in FY 1974.

The approved legislative program has been outlined in the OMB guidance recently conveyed to you and anticipates intensive VA-OMB staff work on reforms of pension, compensation, and burial activities.

CIVIL RIGHTS ACTIVITIES

Within the employment and financing allowances established in this letter, you are to provide full staffing for activities attributable to contract compliance, enforcement of Title VI of the Civil Rights Act of 1964, and equal employment opportunity within the Federal service. Specifically, it is expected that you will support civil rights activities in 1974 at a level of at least \$340,000 in obligations and fifty full-time permanent positions for Contract Compliance and Title VI, and \$2,844,000 in obligations and 194 man-years for EEO activities. These amounts are included in the ceilings specified in this letter.

AUTOMATIC DATA PROCESSING SYSTEM

Within your agency's allowance, total obligations for acquisition and operation of ADP systems, excluding Salaries and Expenses, will not exceed \$16,905,000 in 1973 and \$11,295,000 in 1974. These obligations are based on your budget submission as specified under Section 27.2 (See Exhibit 27B) of OMB Circular No. A-11, Revised. You will shortly receive a request from this Office for submission of your revised plans for acquisition and operation of ADP systems, consistent with the selective moratorium on computer purchases and new leases, and field office reorganization plans.

The President expects each and every official in the Veterans Administration actively to support the budget set forth in this letter and its enclosures. This support should be given in testimony before congressional committees, in informal contacts with Members of Congress and their staffs, and in speeches and meetings with outside groups.

Sincerely,

CASPAR WEINBERGER,
Director.

1973 CEILING AND SUPPLEMENTALS PROPOSED VETERAN'S ADMINISTRATION

Within your ceilings as given below, separate allowances are approved as shown for supplementals now being requested.

[In millions of dollars]

	1973	
	Budget allowances	Outlays
Total allowance (ceiling).....	-12,566	-11,758
Supplementals being requested in budget (-):		
Readjustment benefits.....	-318	-248
Allowance minus supplementals and items proposed for separate transmittal above.....	-12,248	-11,510

Note.—Each of the above amounts constitute a limit that will not be exceeded without prior approval of the Office of Management and Budget. The supplemental estimate for the readjustment benefits appropriation will continue to be the subject of close analysis by our staffs in the next few months due to the many uncertainties caused by the enactment of the recent GI bill amendments. In addition, it is expected that VA will completely review and overhaul the estimating and projecting techniques for this program and will install them in time to be useful in developing the final supplemental estimates.

Items included above which require new legislation or supplemental appropriations will be included in the 1973 ceilings only to the extent approved by the Congress if and when the needed legislation and appropriations are enacted. Reductions below the amounts identified above for such items and any decreases in estimated outlays for other programs should produce savings in the totals. These savings will not be applied elsewhere in your agency without approval of the Office of Management and Budget. Such savings may be needed to offset unforeseen and mandatory requirements elsewhere in the Government.

BUDGET ALLOWANCES FOR 1974 AND 1975

[In millions of dollars]

	Budget allowances	Outlays
1974:		
Agency total.....	12,209	11,703
Amount included above for proposed legislation.....	(-357)	(-357)
1975:		
Agency total.....	12,161	11,875
Amount included above for proposed 1974-75 legislation.....	(-361)	(-361)

1 The above amounts constitute a limit that will not be exceeded without prior approval of the Office of Management and Budget.

Amounts included above which require new legislation or supplemental appropriations will be included in the agency ceiling only to the extent approved by the Congress if and when the legislation and/or appropriation are enacted. Reductions below the amounts shown for such items and any decreases in outlays for the other programs should produce savings in the totals. These savings are not to be applied elsewhere in your agency without approval of the Office of Management and Budget. Such savings may be needed to offset unforeseen and mandatory requirements elsewhere in the Government.

EMPLOYMENT CEILINGS, VETERANS' ADMINISTRATION

	June 1973	June 1974
Total employment, excluding disadvantaged youth and public service careers trainees.....	193,876	191,896
Full-time employment in permanent positions, excluding public service careers trainees.....	171,611	170,022

1 These ceilings represent the upper limits for June 1973 and June 1974 employment for your agency. They cover all employment in your agency except for disadvantaged youth and worker-trainees under the public service careers program.

At the same hearings Mr. Johnson was asked to present the budget figures the hospitals and clinics of the VA had originally requested for fiscal year 1974, and the amount he, as Administrator, had requested of OMB as opposed to the budget request OMB approved for sub-

mission to the Congress. It is interesting to note that if one only examines the fiscal year 1973 and fiscal year 1974 columns in the fiscal year 1974 congressional budget request, then the fiscal year 1974 figures do not look at all bad. However, if one goes back and examines the fiscal year 1973 appropriation and compares this with the fiscal year 1973 and fiscal year 1974 columns in this latter budget request then it is immediately apparent that not only is this a bad budget but it also clearly violates the intent of the Congress.

It is most significant that both Mr. Weinberger's letter and the enclosures thereto, talks of the fiscal year 1975 budget allowances. A close examination of the fiscal year 1975 allowance, as shown on the enclosure to the letter [B], will show it to be below the fiscal year 1974 figure for the entire VA by some \$48 million. Obviously OMB intends to decrease veterans benefits, including medical care, even further than the fiscal year 1974 budget would indicate. I believe the Congress needs to know more about this now rather than waiting on another crisis to be dumped into our laps as was the reduction in compensation payments to the severely disabled when the fiscal year 1974 budget was initially presented to the Congress.

In fiscal year 1973 the President's budget for the medical care appropriation encompassed levels of \$2,551,153,000, a full-time-equivalent-employment of 154,441 and a hospital census of 83,000. The Congress added \$54,580,000 and 3,725 full-time-equivalent-employment to raise the hospital census to 85,500.

The appropriation was signed by the President on August 14, 1972, and the Office of Management and Budget issued an apportionment of funds on September 15, 1972. However, the employment related to the \$54,580,000—3,725 FTEE—was not provided by the OMB.

Subsequent to these actions the OMB imposed employment ceilings which reduced the total employment by 5,799 positions and the full-time-equivalent-employment by 4,620; reduced the hospital census to 82,000; and reduced the funding level by \$64,080,000 to \$2,542,000,000. The \$64,080,000 was composed of the congressional add-on of \$54,580,000 plus on OMB reduction of \$9,500,000 related to the census reduction of 1,000 and the employment freeze initiated by the President on December 11, 1972. In addition, it was directed that the full cost of the January 1973 pay raise would be absorbed. The cost of the pay raise was \$35,000,000 which made for a total program reduction of \$99,080,000 in fiscal year 1973 in the medical care appropriation.

The medical and prosthetic research appropriation has also been affected by actions subsequent to the Appropriation Act of August 14, 1972. The congressional appropriation provided for \$76,818,000 and a full-time-equivalent-employment of 4,005. The Office of Management and Budget has reduced these levels to \$72,000,000 and 3,800 by directive to maintain an unobligated balance of \$4,818,000 as at June 30, 1973. Fiscal year 1973 program levels have been adjusted in accordance with these directives.

In fiscal year 1974 the medical care appropriation is proposed at a level of \$2,656,000,000, with a full-time equivalent employment of 153,546 and a hospital census of 80,000. This is an increase of \$49,920,000, a decrease in census of 2,000 and maintaining employment at the fiscal year 1973 level.

The \$49,920,000 increase would be insufficient to maintain the system at the fiscal year 1973 employment and workload levels. A 2,000 reduction in hospital census was made despite an increase of 698 census in new or replacement hospitals. To achieve this existing hospitals will need to be reduced by 2,698 average census. Since no new employment has been provided the employment necessary to care for the workload increases of 339 in VA nursing homes, 1,620,280 outpatient visits and specialized medical services started during fiscal year 1973, as well as the 698 census addition in new hospital activations will have, of necessity, to come from reductions in existing programs. These workload increases alone require better than 3,700 FTEE.

Just as important as the requirements for new workloads are to a responsive treatment system are those programs which cannot be provided for. For instance, in fiscal year 1974, a most essential program, that of education and training of health care personnel, will not receive the continuing impetus it must have in order to provide not only the VA needs but the whole Nation's increasing need for competent professional, paramedical, and administrative personnel.

This resource is invaluable if we are to continue to meet the health needs of the Nation's veterans. In the closing days of the 92d Congress we passed what became Public Law 92-541, Veterans Administration Medical School Assistance and Health Manpower Training Act of 1972. This law authorized the Veterans' Administration to assist eight new State medical schools in getting underway providing they were located adjacent to and become affiliated with VA hospitals.

It further authorized assistance to existing medical schools affiliated with VA hospitals, as well as other schools of allied health, affiliated with the VA to increase the production of professional and other health personnel. This bill authorized an appropriation of \$75 million a year for a period of 7 years to alleviate the acute shortage of health manpower. The bill was signed into law by the President on October 25, 1972.

No other institution or system in the free world can contribute as can the VA to train such personnel. Now I learn to my utter amazement that OMB has not allowed the VA to ask for any funds either in a fiscal year supplemental or the fiscal year 1974 congressional request. It is my hope that the House Appropriations Committee and then this entire body will vote to add the entire \$75 million to the fiscal year 1973 supplemental appropriation bill and the fiscal year 1974 appropriation. This is a matter that affects the health of not only veterans but the entire Nation.

Over the past 7 to 8 years the VA has made excellent progress in the activa-

tion of essential treatment modalities, which for budgetary purposes, have been labeled specialized medical services, such as alcohol and drug treatment units; blind centers; intensive/coronary care units; et cetera. These modalities totaling nearly 30 are essential components of any modern, responsive health system and to operate a system without them is to operate a second-class system. Due to budget restrictions no additional new medical services will be activated in fiscal year 1974.

The VA has continually tried to meet the challenges of an ever-changing program in the delivery of health care. Currently, programs related to hypertension screening, treatment of the aging, and sickle cell anemia are underway. However, the fiscal year 1974 budget will hold these efforts at no better than those started in fiscal year 1973 which at best are modest in scope and effect. In addition to the aforementioned programs are ones in dentistry, mental health and emergency care which should be pursued but cannot without budgetary assistance. None is available in fiscal year 1974.

The VA has over 5,000 buildings with a replacement value in excess of \$4.5 billion. The medical care appropriation is responsible for the care of these facilities through its maintenance and repair program. Since the majority of these structures are over 20 years old the cost of this maintenance program is ever increasing. In addition to the regular maintenance and repair costs are costs related to minor improvement projects which are essential in making the facilities more responsible to the furnishing of health care. In a period of constantly rising prices, continuing deterioration of aging facilities and the need to adapt current facilities to new treatment concepts the fiscal year 1974 budget provides for only the same level of operation as it did in fiscal year 1973.

In a similar vein any system as large and complex as the VA hospital system needs to constantly update its equipment, both by new purchases and by replacing old or outdated equipment. Due to budgetary restrictions in fiscal year 1974 over \$5,200,000 less will be spent for equipment. This will not only allow for less new equipment procurement but will cause the equipment replacement backlogs to rise to undesirable levels.

The thing that continues to bother me, and it certainly should bother every Member of this body regardless of his party affiliation, is the strong arm tactics of OMB. I again refer you to the last paragraph of Mr. Weinberger's letter to Mr. Johnson. It read as follows:

The President expects each and every official in the Veterans Administration actively to support the budget set forth in this letter and its enclosures. This support should be given in testimony before congressional committees, in informal contacts with Members of Congress and their staffs, and in speeches and meetings with outside groups.

When responsible officials are testifying before committees of Congress it is my belief they are there because of their particular expertise to impart important information and opinions to the Con-

gress. If they are there merely to express to the Congress the position of OMB then we are wasting our time in such an exercise in futility. When Mr. Johnson saw fit to request of the OMB \$2,829,408,000 with a full-time equivalent employment of 166,395 he must have had justification for it. Now he appears before the Subcommittee on HUD, Space, Science, Veterans and certain other agencies, House Appropriations Committee and knocks himself out to justify the amount of \$2,656,000,000 and full-time equivalent employment ceiling of 153,546, the figure given him by the OMB.

I believe I speak for the entire membership of the House Committee on Veterans' Affairs when I say that we will insist that the Department of Medicine and Surgery be appropriated sufficient funds and authorized sufficient staff to provide quality medical care for veterans. This has never been more important than at this time when VA hospitals are receiving more and more of the seriously disabled from the Vietnam war.

CITIES "NEED TO KNOW" ON REVENUE SHARING

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DANIELSON) is recognized for 10 minutes.

Mr. DANIELSON. Mr. Speaker, recently I received a letter from Mayor Gershon Lewis of Monterey Park, Calif., a city which is in my congressional district. Mayor Lewis has done an excellent job of delineating the questions and problems that face our smaller cities with respect to the various special revenue sharing programs which have been proposed by the administration—or, in the case of the manpower programs, created with the stroke of a pen.

One thing clearly pointed out by Mayor Lewis' letter is the fact that these drastic changes cannot be imposed with such suddenness, ignoring the need to provide the cities with adequate lead time to plan for changes. The cities must be given appropriate information for planning ahead. Cities such as Monterey Park must know what the administration's plans mean to them before they can even evaluate what the effect will be on their existing programs.

It is incumbent upon the administration and Congress to take early action that would provide the cities with this necessary information on which to base their future plans. I urge my colleagues to give the factors in the following letter every consideration as legislation for fiscal 1974 is developed. The letter from Mayor Lewis follows:

CITY OF MONTEREY PARK, CALIF.,
February 16, 1973.

The Honorable GEORGE E. DANIELSON,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN DANIELSON: After the submission of the President's Fiscal Year 1974 Budget to the Ninety-Third Congress last week, it is clear that the second Nixon Administration is moving toward a new orientation in domestic spending policies that could have serious effects upon the cities. Monterey Park must be included in this number. To assist you in your delibera-

tions during the upcoming budget sessions. I have endeavored to compile information that presents Monterey Park's position with regard to intergovernmental assistance.

The enclosed is a summary of our City's grant-in-aid activity during the last two calendar years. Two conclusions can be readily drawn from this summary. First, it is obvious that our City has not been able to pursue a great number of grants. Secondly, where we have been successful in obtaining grants, the major monies have come from the manpower programs.

With respect to the first conclusion, our City cannot draw upon sufficient staff resources to become skilled in the art of grantsmanship as some cities have done. We often encounter problems meeting detail requirements of several grant-in-aid programs. Whenever a program requires matching funds, our City is usually excluded due to a tight financial situation. Therefore, we support the concept of special revenue sharing to suit our needs. However, under those limited types of special revenue sharing being proposed by the Administration, it is still questionable that our City could qualify for aid. The \$6.9 billion proposed for four types of special revenue sharing is a small amount when compared to the needs of the cities. This is especially true when it is clear that these funds may come from a consolidation of present categorical grant programs.

The loss of funds from proposed cuts and eliminations of manpower programs will greatly impair our work force. The City currently has 42 authorized positions through the PEP Program including 15 permanent

positions that had to be deleted from the budget for austerity reasons just prior to the availability of EEA funds. Of the 56 persons hired by our City thus far through PEP, 37.5% have been Mexican-American (includes Spanish surnames), 5.4% Asian-American, and the remainder Caucasian. The unemployment rate, although lower than in previous months, continues to be high with a 4.8% rate and a 5.2% rate for Los Angeles County and the State of California, respectively, in January 1973. We are facing a dilemma with the eminent expiration of the program in June and final phase out by the end of the calendar year. In addition, our City utilizes the College Work Study and NYC Programs. The fate of the former is uncertain and the latter has been eliminated in the proposed budget. I do not have to tell you that NYC funds, in addition to providing manpower, provide jobs for young people in our area from disadvantaged families.

You have received under separate cover from me our position as regards the Administration freeze on housing programs. I will not dwell further here except to mention this for inclusion into the greater context of our situation.

We are hesitant to use our general revenue sharing funds to the extent of replacing these possible losses. It would not be possible for us to replace our entire PEP Program, as we received only \$253,338 from revenue sharing funds for 1972 as opposed to \$312,303 in federal EEA monies expended. At this time, the City Manager's recommendation to the Council is to use revenue sharing money to re-

place 15 positions from PEP that were originally deleted in the City's Fiscal Year 1972 budget. Moreover, the City is in dire need of many capital improvements, the cost of which far exceeds our revenue sharing allotment. General revenue sharing offers us only the chance to attempt to catch up with needs, not to provide new levels of service. Finally, the cities have always taken the position and had the understanding from the Administration and the Congress that general revenue sharing was not to substitute for present categorical grant-in-aid programs.

It seems that now more than ever the cities will have to depend on the members of the Congress to represent their views in Washington. We welcome attempts to bring about more decentralization of the Federal government that will allow the cities to determine their needs and how best to meet them. The Administration is calling for this, but at the same time it is also proposing an overall reduced role by the public sector in the solving of domestic problems. This philosophy would not appear workable.

Our City is aware, as are other cities, of Federal budget constraints. Part of this matter deals with the placing of priorities, but perhaps a more important element lies with much needed tax reform. Again, it will be up to Congress to make the steps in this area. The City Council and all of Monterey Park's citizens appreciate your interest and care for our problems and concerns. We support and encourage your efforts to that end.

Very truly yours,

GERSHON L. LEWIS, Mayor.

SUMMARY OF STATE AND FEDERAL GRANT-IN-AID ACTIVITY FROM JANUARY 1971 TO JANUARY 1973—CITY OF MONTEREY PARK

Program	Grant	Proposal name	Status
Intergovernmental Personnel Act, U.S. Civil Service Commission:			
Federal share.....	\$20,250	Employee career development, critical performance standards, and performance evaluation program.	Applied: June 29, 1972.
Local in-kind.....	8,161		Denied: Nov. 1, 1972.
Total.....	28,411		
Intergovernmental Personnel Act, U.S. Civil Service Commission:			
Federal share.....	12,237	Management development program.....	Applied: Oct. 21, 1971.
Local in-kind.....	4,079		Denied: Feb. 14, 1972.
Total.....	16,316		
Intergovernmental Personnel Act, U.S. Civil Service Commission:			
Federal share.....	8,099	Employee performance evaluation.....	Applied: Oct. 21, 1971.
Local in-kind.....	2,700		Denied: Feb. 14, 1972.
Total.....	10,799		
Intergovernmental Personnel Act, U.S. Civil Service Commission:			
Federal share.....	19,009	Organization study.....	Applied: Oct. 21, 1972.
Local in-kind.....	6,337		Denied: Feb. 14, 1972.
Total.....	25,346		
Emergency Employment Act, Department of Labor:			
Section 5 (October 1971 to January 1973):			
Federal share.....	342,427	33 positions.....	Original application approved October 1971 with later additions and modifications. Program is scheduled to end June 30, 1973.
Local in-kind.....	36,692		
Total.....	379,119		
Section 6 (November 1971 to January 1973):			
Federal share.....	50,117	4 positions.....	
Local in-kind.....	5,569		
Total.....	55,686		
Section 9 (December 1972 to December 1973):			
Federal share.....	41,708	5 positions.....	
Local in-kind.....	4,634		
Total.....	46,342		
Older Americans Act, Title III, California Commission on Aging, HEW:			
Federal share.....	11,890	Servicing our seniors.....	Applied: July 1972.
Local in-kind.....	3,963		Approved: November 1972, (renewable after first year).
Total.....	15,853		
Legacy of Parks, HUD:			
Federal share.....	98,505	Acquisition—open space.....	Application never formally submitted for failure to provide local match.
Local match.....	98,504		
Total.....	197,009		

SUMMARY OF STATE AND FEDERAL GRANT-IN-AID ACTIVITY FROM JANUARY 1971 TO JANUARY 1973—CITY OF MONTEREY PARK—Continued

Program	Grant	Proposal name	Status
College Work Study:			
California State Legislative Assembly, July 1, 1971 to June 30, 1972:			
Federal share	\$5,143		Agreements are renewed yearly as funds allow.
Local match	857		
Total	6,000		
July 1, 1972 to Mar. 17, 1973:			
Federal share	3,030		
Local match	1,492		
Total	4,522		
ELAC, July 1, 1972 to June 30, 1972:			
Federal share	17,581		
Local match	4,369		
Total	21,950		
July 1, 1972 to June 30, 1973:			
Federal share	16,986		
Local match	4,514		
Total	21,500		
Neighborhood Youth Corps, Department of Labor:			
City receives no actual cash but is recipient of personnel provided through Mark Keppel High School and Casa Maravilla:			
1972—65 employees			Agreements are renewed yearly as funds allow.
1971—30 employees			
Omnibus Crime Control and Safe Streets Act, California Council on Criminal Justice, Department of Justice:			
Federal share	71,747	Measurement of an in-depth crime prevention program.	Applied: Nov. 22, 1971. Denied: February 1972.
Local in kind	30,486		
Total (3 years)	102,233		
Water and Sewer, HUD:			
Federal share	147,308	18-inch waterline in Garvey Ave	Applied: May 4, 1970. Awarded: Apr. 12, 1971.
Local match	186,577		
Total	333,885		
Office of Traffic Safety, State of California:			
State share	44,955	Emergency medical aid development program.	Applied: July 1971. Denied: February 1972.
Total	44,955		
Topics 1970-71, State of California, Department of Transportation:			
Federal share	40,882	Traffic control on Atlantic Boulevard	Applied: Jan. 13, 1970. Awarded: Jan. 23, 1970, (yearly renewal).
Local match	11,150		
Total	52,032		
1971-72:			
Federal share	23,118		
Local match	6,350		
Total	29,468		
1972-73:			
Federal share	23,118		
Local match	6,350		
Total	29,468		
Traffic Safety Act, Office of Traffic Safety, State of California:			
State share	24,833	Traffic control devices	Applied: Nov. 19, 1971.
	9,600	Traffic records	
	13,900	Identification and surveillance of accident locations.	No projects were funded.
	65,000	Police traffic services	
	12,500	Emergency medical services	
State share (2 years)	55,666	Traffic control devices	Applied: Oct. 3, 1972.
	43,000	Traffic accident records	
	15,000	Identification and surveillance of accident locations.	Pending.
State share	23,500	Pedestrian and bicycle safety	
	176,000	Police traffic services	
	41,500	Emergency medical services	
	15,000	Identification and surveillance of accident locations.	Pending.

CAPT. GEORGE DIALS—DISTINGUISHED WEST VIRGINIAN

(Mr. HECHLER of West Virginia asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. HECHLER of West Virginia. Mr. Speaker, in the aftermath of the terrible tragedy of the collapse of the coal refuse pile on Buffalo Creek, W. Va., which killed 118 persons and left thousands homeless, the center of disaster operations was Man High School.

There are about 700 students at Man High School, and one of its outstanding graduates is George Edward Dials, son of a coal miner. I had the honor of nominating George Dials for appointment to the U.S. Military Academy in 1963. George was graduated from West Point in 1967 and went to Vietnam where he became a commander and earned a number of citations for honor and bravery under fire. George's distinguished military career and his love for West Virginia and for the people in the Buffalo Creek Area are underscored in the following

article which appeared in the March 8 Logan Banner:

MHS GRADUATE PRAISED AS SERVICEMAN AND WEST VIRGINIAN

(EDITOR'S NOTE.—Any list of outstanding graduates of Man High School would not be complete unless it included the name of George Edward Dials. He graduated in 1963 as valedictorian of his class and entered the U.S. Military academy at West Point later that year. While associated in an advanced educational program in the Nuclear Engineering Department of the Massachusetts Institute of Technology, he became acquainted with Thomas E. Eaton, who now

lives at 989 Memorial Drive, Cambridge, Mass. Eaton was from the "Lead Belt" lead and iron mining region of Southeast Missouri, so he and George had something in common.

(During the past Christmas season, Eaton came to Logan to visit two of his friends—Arwind (Ervin) Gore and his family and Nanu Ashar and his family. Gore and Ashar, both mechanical designers with Guyan Machinery Co., were graduate students with Eaton in the Mechanical Engineering Department of the Missouri School of Mines.

(Shortly after returning to his home, Eaton wrote the following article about George Dials and sent it to *The Banner*, hoping that it "will be of interest to your readers, not only because George is a distinguished American veteran, but also because he is a true West Virginian concerned with the problem of his people."

(The *Banner* thanks Eaton for the article and is happy to publish it in its entirety.)

(By Thomas E. Eaton)

Where have they all gone—all those young men from West Virginia who served their country in the Armed Forces in Vietnam?

Now that the war is over, these young men are likely to become the most quickly forgotten veterans in U.S. history. Certainly, Vietnam will continue to be in the news. Also the stories about those deserters or draft dodgers who failed to do their duty will increase in frequency. That is news, you see, for it is the exception to the rule.

But let us not forget those from this state who proudly served their country. As in the previous wars of this century, many West Virginians served in the Army and served with distinction. West Virginia, too, has its honor roll of those who gave their lives in Vietnam and those who returned badly wounded. All deserve our warm thoughts and admiration for performing their duties as proud Americans and West Virginians.

A young man from Greenville (Hunt), Logan County, is likely one of the most highly decorated West Virginians to emerge from the Vietnam War. During his tour of duty there, Captain George E. Dials was a company commander with the 199th Light Infantry Brigade. According to his commanding officer at that time, George's unit was one of the most aggressive and successful in the brigade.

"The morale and effectiveness of his company was due largely to Captain Dials' own bravery under fire. His men knew that he would take the same chances that they had to take, and they respected him for it," the officer said.

As a result of the many combat actions that he and his company were involved in, George was decorated many times for heroism. In all, he received two Air Medals, a Bronze Star for Valor and three Oak Leaf Clusters (three additional awards), and the nation's third highest award for valor in combat—the Silver Star.

When asked about the war, George never talks about his own heroics but dwells on the heroics and sacrifices of the men with whom he served.

"I have no regrets about fighting in Vietnam or about the job that I did there," he said. "I think that the U.S. had an obligation to combat the spread of communism in Southeast Asia. The U.S. stands for liberty and freedom in the world community. We, her citizens, must pay more than simple lip-service to these concepts; if need be, we must be willing to fight to uphold freedom and liberty when they are threatened. I feel that our involvement in Vietnam gave the South Vietnamese the time to develop the capabilities to defend themselves and to guard their own freedom. To me, that was a worthwhile cause."

George was born at Kistler, Logan County, West Virginia, on Feb. 22, 1945. His father,

Bill Edward Dials, and mother, Marion Perry Dials were both native West Virginians.

Tragically, George's father was killed in a coal-mining accident at Elk Creek when George was only four years old. Thus, he, his 18-month-old sister, Sarah, and his mother faced an uncertain and difficult future.

The family moved to Greenville in 1950 and remained there until George's mother and sister moved to Huntington in 1965.

But, it was in Greenville that George grew and developed into the man he is today. He attended the elementary school in South Man and the junior and senior high schools in Man. In 1963, George graduated as a valedictorian of his class.

Not only was he a good student, he was also a very able athlete. He had been captain of the football team and was an honorable mention guard and line backer on the All-State team.

Speaking of his childhood, George said:

"Well, we certainly were not well off financially, but I never thought of us as very poor. Sarah and I were always well-fed and had what we needed. My mother is a tremendous person. She held the family together.

"She was strong, tough and wise; anyway, that's how she appeared to me in those days. She was a good manager, too; she seemed to be able to stretch a nickel a mile. In fact, she can still do that. No, we never had a lot of money, but we had plenty of a much more important commodity—LOVE. Both Sarah and I owe a great deal to Mother."

Sarah now lives in Wayne, W. Va., with her husband, Charles Cornwell, and their one-year-old son, Donnie. Mrs. Marion Dials lives in Huntington where she works in the Dietary Department of the Cabell-Huntington Hospital.

In June, 1963, George entered the United States Military Academy through an appointment from Congressman Ken Hechler. At West Point he distinguished himself, also. In his senior year, George attained the permanent rank of Cadet Captain and commanded a cadet company.

In addition, he was chosen as a member of the All-East team of the 150-pound intercollegiate football league. On 7 June, 1967, George graduated from West Point and was commissioned as a second lieutenant in the Infantry, the beginning of a successful military career.

Presently, George lives near Boston, Mass., with his wife, Pamela, and two children—Bill, 4½, and Heather, 2. He is still in the Army and is attending the Massachusetts Institute of Technology under an Army-funded program. He will graduate in June, 1973, with master of science degrees in both nuclear engineering and political science.

What about the future?

"Pam and I both like the Army and, of course, I consider myself a professional soldier at this point," George said. "But, I am not sure that it will be a 30-year career for me."

When asked if he intends to return to West Virginia, George stated:

"If you mean permanently, I don't know yet. As I said before, I still like the Army and intend to stay in a few more years. I do visit West Virginia and Logan County quite often. In fact, I was in the Buffalo Creek area just after the tragedy in March last year. My grandparents, Lula and George Dials, lived in Kistler at the time. Shortly after the flood, my grandfather died of a heart attack. I was there to attend his funeral and back again in the summer to visit my grandmother, who now lives in Man."

He continued:

"I think about the region a great deal. I have great respect for the people and love the mountains that they call home. In all my travels, I have never known more hard-working, considerate and compassionate people. They—the people—represent the state's most valuable asset in my opinion."

"So, yes I've thought about leaving the service and going back, probably to get involved in state politics and government. That would provide the best mechanism for serving the peoples' interest and looking out for their welfare. But, I haven't made that decision yet."

This young man from West Virginia served his country in Vietnam and returned as a highly decorated combat leader. If he remains in the Army, he should go far, perhaps to become a general officer.

But, his ties to the state and the people are strong. It shows in his face when he speaks of his life and friends in the state. In addition, much of George's research has focused on developing quantitative measures of the social costs associated with surface and deep coal mining. This work was naturally prompted by his intense interest in his native West Virginia.

Perhaps, Captain George Dials and his family will return to his first home some day. Regardless, here certainly is a man worth remembering—not only for his services in Vietnam but also in anticipation of what he will accomplish in the future, in the Army or in West Virginia.

LYNDON BAINES JOHNSON— BY BOOTH MOONEY

(Mr. DE LA GARZA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DE LA GARZA. Mr. Speaker, memories of Lyndon Baines Johnson will abound as long as there are those around who touched the perimeter in which this great man lived.

One who knew him well and served him diligently for years was Booth Mooney—well-known author, newspaperman, and President Johnson's executive assistant while he was Democratic floor leader in the Senate.

One of the Nation's finest newspapers, the *Detroit News*, mindful of the Mooney connection with then Senator Johnson, asked him to do the main piece on a special section the paper put out after the President's untimely death. This is such a tender, understanding article that all who ever knew President Johnson would want to read it—and I would want to share it.

Mr. Speaker, here is what Booth Mooney wrote about the man whose first biography, "The Lyndon Johnson Story," he wrote:

LYNDON BAINES JOHNSON: AUGUST 27,
1908—JANUARY 22, 1973

(By Booth Mooney)

Lyndon Baines Johnson was always a man in a hurry.

Before he assumed the presidency, he had served 12 years in the United States Senate and 12 in the House of Representatives. Earlier, as a young congressional assistant, he witnessed, and on the fringes participated in, the first 100 days of Franklin D. Roosevelt. He entered the House as one of FDR's favorites.

He experienced the trying and sometimes traumatic years of Harry S. Truman's regime, the quiet and confident years with Dwight D. Eisenhower, the too-few years of hope culminating in anguished tragedy with John F. Kennedy and finally, his own administration, which ended for him and the country with a deep sense of frustration.

Running all the way.

Lyndon Johnson came into the world on Aug. 27, 1908, on a farm in the rugged hill country of Texas, the first of five children

born to Samuel Ealy and Rebekah Baines Johnson. His father was a member of the Texas legislature, so Lyndon was exposed to talk of politics from an early age.

After graduating from high school and Southwest Texas State Teachers College, he taught school for a year before going to Washington in 1931 to become secretary to a newly elected congressman, a family friend, Rep. Richard M. Kleberg.

In the capital city, he benefited from the friendship of Rep. Sam Rayburn, who had served in the Texas legislature with his father. Rayburn was rising to a position of great power in Washington.

Arthur C. Perry, an old Washington hand who at that time was secretary to Senator Tom Connally of Texas, recalled that the newcomer made an immediate impact on the group of established congressional secretaries.

"I remember when Dick Kleberg brought Lyndon around to our office and told me he wished I would teach his new secretary everything I knew and show him how to find his way around Washington," Perry said. "Lyndon started asking questions as soon as he knew my name. He followed the same procedure with everyone else he met. He set out to learn all he could and learn it fast."

"You never had to tell him anything a second time," Perry said. "This skinny, 6-foot-3 boy was as green as anybody could be, but within a few months he knew how to operate in Washington better than some who had been here 20 years before him."

After Roosevelt was elected President in 1932, Rayburn brought his young fellow-Texan into contact with key men in the New Deal and eventually with President himself.

Elected a member of the House on April 10, 1937, he was reelected for five successive terms. In 1941 he was a candidate for the U.S. Senate in a special election, but did not win. It was the only election he ever lost.

On Dec. 8, 1941, as war was declared between the United States and Japan, Johnson, a member of the Naval Reserve, asked to be placed on active duty. He was the first member of the House to go into uniform. He served for eight months, with the rank of lieutenant commander, before FDR ordered all members of Congress in military service to return to their duties in Washington.

In 1948 Johnson entered the Texas Democratic primary as a candidate for the U.S. Senate. He won the nomination by a majority of only 87 votes out of more than a million cast, and there were cries of fraud. But his nomination prevailed, and in the general election he defeated his Republican opponent by a two-to-one majority. On Jan. 3, 1948, he became a member of the Senate.

Assigned to a major committee, the one on Armed Services, the freshman senator gave close attention to the state of the nation's military establishment. In 1950, as the Korean police action began, he introduced and the Senate passed a resolution establishing the Preparedness Investigating Subcommittee.

Johnson became its chairman and conducted a series of investigations of defense costs and efficiency.

These investigations brought him to national attention for the first time. They also earned the respect of senior members of the Senate, in particular such southern veterans as Richard B. Russell and Walter George of Georgia, and this was most important to a young senator. It meant he was being accepted in the Senate's "inner club."

A side effect of Dwight D. Eisenhower's sweeping 1952 victory was the defeat out in Arizona of Senate Democratic leader Ernest McFarland. When the Democratic senators no longer a majority, met in their first-of-the-session conference in Washington in January 1953, Johnson was unanimously elected floor leader. At age 44, he was the youngest

man ever to be named to that position by either major party.

The Democratic Party was disorganized, deeply in debt, and without effectual national leadership. A schism had long existed between the southern and northern wings. Recriminations over the manner in which the losing presidential campaign had been waged were still being hurled back and forth.

Johnson set out to quiet the quarreling and to bring unity among his Senate Democrats. He succeeded. His tactics embraced a potent mixture of full consideration of all points of view, tact, persuasion, a policy of giving freshmen senators choice committee assignments, thus assuring their support of his leadership—and personal hard work.

At times he conducted business on the run—literally.

One afternoon, a staff member recalled, he and the senator left the Senate Office Building to go over to the other side of the Capitol to record a radio broadcast. Johnson's car was parked no more than a dozen feet from the door of the building. But he literally sprinted the short distance. It was that way with everything he did.

"Lyndon," his wife complained, although not bitterly, "acts like there's never going to be a tomorrow."

Johnson was reelected to the Senate in 1954, after having piled up a three-to-one majority over his opponent in the Democratic primary. In that year Democrats regained control of both houses of Congress, and he advanced from minority to majority floor leader in the Senate.

Friend and foe alike agreed that he turned in a dazzling performance in this role.

The "Johnson treatment" became a joyous byword in the congressional cloakrooms and at Washington cocktail parties. The gossips revelled in telling each other stories about Johnson—the compulsive talker, the waver of arms in the air, the wheeler-dealer of politics, the operator who could turn on charm and voice implied threats with equal facility. All to get the job at hand done.

He drove himself and his Democratic colleagues—and at times his Republican colleagues as well—in a way not previously known in the august Senate. And he became the most powerful majority leader in the history of that institution.

Much of his strength grew out of the fact that he was, in the largest sense, non-partisan. He cooperated fully with the Republican President Eisenhower.

One of his notable achievements was to bring about passage of the first civil rights bill to get through the Senate since Reconstruction. That feat came in 1957 at a time when racial unrest was rising throughout the nation.

Johnson and House Speaker Sam Rayburn consulted with Eisenhower to an extent unknown to few Democrats and perhaps to no Republicans. The two men from Congress often journeyed to the White House, a mile distant, to talk informally over drinks with the President. These easy sessions, nobody pressuring anybody else, paved the way for congressional approval of more than one important legislative measure.

Johnson poured greater physical energy into his job than any other man on Capitol Hill. Even after he suffered a massive heart attack in July 1955, he bounced back after a reasonable period of convalescence. He shed 45 of his 220 pounds and, six months after the attack, returned to work. And he worked as long and hard as ever.

His great success as Senate majority leader led to widespread mention of Johnson as a possible Democratic presidential candidate. He was Texas' favorite son at the party's national convention in 1956.

It was not until 1960, however, that he made a serious bid for the nomination. It failed. He received 409 votes for President on

the first and only ballot at the Los Angeles convention. John F. Kennedy was the choice of most.

On the following day, July 14, Johnson was nominated for vice president by acclamation, having been personally chosen by Kennedy as a running mate. The Kennedy-Johnson ticket was elected in November by the closest popular vote margin of any presidential election up to that time in the 20th century.

The years Johnson served as vice president were trying for the vigorous Texan. The glamorous Kennedys and their court were the rage in Washington. Johnson, out of style, did not have enough to do. He spent much time in unaccustomed and uncomfortable loneliness in his richly appointed office.

A compassionate newspaper correspondent recalled an hour-long visit there with the vice president. No one waited to see him in the anteroom, the newsman reported. He received precisely one telephone call during the hour the visitor was present. It was a painful letdown for a man who thrived on excitement, action and achievement.

The situation changed with stunning abruptness.

On a Friday afternoon, Nov. 22, 1963, John F. Kennedy became the fourth American President to die at the hands of an assassin. From the window of a warehouse in Dallas, a sniper fired two bullets into the President's head and body as the Chief Executive rode through the streets of the Texas city.

Ninety-nine minutes later, Johnson, his face heavy with grief, took the oath of office as President. The brief ceremony, with his wife and Mrs. Kennedy beside him, was held on Air Force One as it sat on the runway at Love Field in Dallas.

Flown immediately to Washington, Johnson spoke briefly at the airport in a message carried to the shocked nation by television.

This is what he said: "This is a sad time for all people. We have suffered a loss that cannot be weighed. For me it is a deep personal tragedy. I know the world shares in the sorrow that Mrs. Kennedy and her family bear."

"I will do my best. That is all I can do. I ask for your help and God's."

The new President moved swiftly to calm the fear that Kennedy's assassination had created. He was at once reassuring and commanding. He set the tone by entreating. "Let us continue," and the country responded.

"I have a feeling," Johnson wrote a friend, "that the tragedy of Nov. 22 marked a turning point in American history. The dissolution in our land will, hopefully, give way to a new unity—a new reasonableness that will mark the beginning of an era of progress."

The year of 1964 was supremely Lyndon Johnson's.

Congress, responding to the leadership of a man regarded by its members as one of their own, set a legislative record that is not likely soon to be matched. Measures affecting civil rights, voting, taxes, medical care, immigration, schools, environmental pollution, and other legislation designed to alleviate the country's problems were whipped through the legislative body and signed into law by a triumphant President.

Ebullient was the word for the President in those happy and fruitful months. Everything seemed to be going his way as he plunged zestfully into the job for which he had been in training all his adult life.

In that year of glory, Johnson also became President in his own right. He campaigned as no man seeking the presidency had ever done before him. He loved every minute of it, tearing into his speeches as if they were so many juicy steaks, plunging into adoring crowds to "press the flesh" of every hand that could reach him, shouting over a bullhorn as he drove through city streets. "Yawl come to the speakin'."

On Nov. 3, 1964, he defeated Barry Gold-

water of Arizona by 42,121,085 popular votes to 27,145,161. He carried all but six states. It was the most one-sided result of a presidential election since 1936.

Johnson was inaugurated for a full term on Jan. 20, 1965. Shortly afterward, things began to fall apart.

At home and abroad, Americans found themselves confronting problems that loomed large and menacing. They soon began to blame the President.

Johnson had talked soothingly about any difficulties in foreign lands during his reelection campaign in particular downplaying the seriousness of the fighting in Vietnam. He had promised that American boys would not be sent "nine or ten thousand miles away from home to do what Asian boys ought to be doing for themselves."

But U.S. involvement in Vietnam escalated. Live telecasts from bloody battlefields brought the war into the homes of horrified Americans, and American casualties mounted. The Senate Foreign Relations Committee and its chairman, William Fulbright, were raising critical questions.

Closer to home, an uprising in Santo Domingo caused the President to dispatch U.S. forces into the Caribbean for the first time since 1927. The initial popular approval of his move soon turned to general dismay.

Right at home, the civil rights movement reached a turning point. In Selma, Ala., for the last time, blacks and whites were joining together in massive protest. Violence replaced marching and demonstrations. The Watts riots showed a clear and ominous change in the racial picture. Other riots scarred Detroit and other cities.

Dissent on college campuses mounted over the ever-increasing bloodshed in Vietnam. A cruel and unfair chant was born: "Hey, hey, LBJ, How many babies did you kill today?"

Along with everything else, the President was now having trouble with a recalcitrant Congress. He was trying to move too fast, his critics said. His reply was: "I have so little time." The sympathy and sentiment he had commanded after Kennedy's assassination were running out. He needed time—more time than was to be given him.

His boasted—and effective—consensus was gone by the latter part of 1966. Republicans scored substantial gains in the fall congressional elections.

In the White House, Lyndon Johnson suffered. The Great Society of which he had dreamed and preached was dissolving before his eyes. Press criticism was widespread.

One bright spot amidst this was the wedding, in the White House, of the younger Johnson daughter, Luci. Her father wore striped pants and a cutaway, something he had not even done for his inaugural.

The revolt against Administration policies developed into direct political action in the presidential election year of 1968. The President was challenged in the primaries, first by Eugene McCarthy, then by Senator Robert F. Kennedy. The Democratic party reeled under the internecine warfare.

The assassinations of another Kennedy and of Dr. Martin Luther King, the leading Negro advocate of nonviolence, threw the nation into more turmoil. Unbearable tension found an outlet in renewed rioting, burning of whole sections of cities, including the nation's capital, and other mass acts of violence.

Even before the deaths of Senator Kennedy and Dr. King, Johnson had arrived at a decision about his future course. On March 31, 1968, speaking over national television, the President announced that he was calling a halt to the bombing of North Vietnam and beginning a process that he hoped would lead to an end to U.S. engagement in the war.

Then he had more to say. He said in a sin-

gle sentence. "I shall not seek and I will not accept the nomination of my party for another term." A large tear formed and rolled down his furrowed cheek.

Two days after this announcement, Johnson met with a small group of intimate friends to give them, as he said, "a fuller and personal explanation" of his action, which had stunned them as it had the nation.

"I'm just fed up to here," he said, placing his big hand at his neck, "with the way things have been going."

His tone was thoughtful, not self-pitying. "I think I've done more for the Negro people than any President since Lincoln," he continued. "And what happens? Negro militants precipitate riots and all the liberals says it's my fault."

"No administration has ever done more for education. But students boo the mention of my name and accuse me of killing babies."

"I was always taught to believe that love of country is a good thing. But patriotism isn't 'in' these days. I wake up in the morning and read in the papers that 50 or 63 American boys have been killed in Vietnam—And then I turn on TV and some senator or other is making a speech saying I'm to blame and we ought to just turn Asia over to the Communists."

"It looks like this country is badly divided and I've become a symbol of the division. I hope that by getting out of the race I can make moves during the next nine months without being accused of political motivations. I'm not going to come out for anybody for the Democratic nomination. I'm going to be working for the country the best way I can, and I hope you-all will help me."

During his last months in the White House, he continued his search for peace. His concern for the country had not lessened. Having had made his decision about his future, however, he was more relaxed, calmer, than he had been in years.

He was the old-time Lyndon when he gave a dinner party on the White House lawn one mid-summer evening for several hundred old friends, many of them Texans. In a long, rambling after-dinner speech, made without notes, he managed to mention by names, and with reference to some personal incident of the past, scores of his guests, bringing guffaws and shouts of approval from the uninhibited assemblage. It was a virtuoso performance, wholly in the LBJ tradition.

Peace did not come, and he left the White House on Jan. 20, 1969.

Four years later, one day after Johnson's death at his ranch on Jan. 22, 1973, a truce in Vietnam was announced by President Nixon.

This writer's last contact with President Johnson was on Sept. 9, 1969, when I paid a visit at the ranch. As we talked about the matter on which I had come, he drove over his acres in the well-publicized white Lincoln Continental.

He looked the part of a rancher, wearing a khaki shirt hanging outside khaki trousers, cowboy boots, and a blue, long-billed golfer's cap which he clearly treasured.

He drove—fast on paved roads, slowly over grass-covered furrows—with his left arm curved around the steering wheel, half-turned in his seat to face me. Occasionally he stopped to give instructions to ranch hands.

"I'm just trying to be suggestive," he told me, "and not give orders. But," he added, "Damn it, they're sure bollixing things up with the way they're spraying those cattle."

One would have thought he had never left the ranch as he rode over the land he loved. He was completely engrossed, as always with the immediate task at hand. That was Lyndon Johnson.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. RANGEL, for Monday, March 26 and Tuesday, March 27, on account of congressional business.

Mr. FRELINGHUYSEN (at the request of Mr. GERALD R. FORD), for March 23 through 30, on account of official business.

Mr. HELSTOSKI (at the request of Mr. McFALL), for today and the balance of the week, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mrs. GRIFFITHS, for 30 minutes, tomorrow, March 27, 1973, and to revise and extend her remarks and include extraneous matter.

Mr. RANDALL, for 10 minutes, today.

Mr. KEMP, for 10 minutes, today, to revise and extend his remarks and include extraneous material.

Mr. SAYLOR, for 30 minutes today, to revise and extend his remarks and include extraneous material.

(The following Member (at the request of Mr. KEMP) to revise and extend his remarks and include extraneous material:)

Mr. EDWARDS of Alabama, for 15 minutes, today.

(The following Members (at the request of Mr. JAMES V. STANTON) to revise and extend their remarks and include extraneous material:)

Mr. McFALL, for 5 minutes, today.

Mr. MOSS, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. KASTENMEIER, for 30 minutes, today.

Mr. VANIK, for 15 minutes, today.

Mr. ADAMS, for 5 minutes, today.

Mr. KOCH, for 5 minutes, today.

Mr. DANIELSON, for 10 minutes, today.

Mr. ALEXANDER, for 30 minutes, March 27.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. KEMP) and to include extraneous material:)

Mr. SCHERLE in 10 instances.

Mr. TREEN in 10 instances.

Mr. RINALDO in three instances.

Mr. PETTIS in five instances.

Mrs. HECKLER of Massachusetts.

Mr. HOSMER in three instances.

Mr. ROBISON of New York.

Mr. ARENDS.

Mr. ZWACH.

Mr. HEINZ.

Mr. ANDERSON of Illinois in two instances.

Mr. KEMP in two instances.

Mr. HOGAN in two instances.

Mr. QUIE.

Mr. THOMSON of Wisconsin.

Mr. HAMMERSCHMIDT.

(The following Members (at the request of Mr. JAMES V. STANTON) and to include extraneous material:)

Mr. CORMAN in 10 instances.

Mr. GONZALEZ in three instances.

Mr. RARICK in three instances.

Mr. WILLIAM D. FORD in two instances.

Mr. DRINAN in five instances.

Mr. ROSENTHAL in five instances.

Mr. DINGELL in two instances.

Mr. ROONEY of New York.

Mr. ROGERS in five instances.

Mr. TAYLOR of North Carolina.

Mr. REID.

Mr. WON PAT.

ENROLLED BILL SIGNED

Mr. HAYS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the

following title, which was thereupon signed by the Speaker:

H.R. 3298. An act to restore the rural water and sewer grant program under the Consolidated Farm and Rural Development Act.

ADJOURNMENT

Mr. JAMES V. STANTON. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 26 minutes p.m.), the House adjourned until tomorrow, Tuesday, March 27, 1973, at 12 o'clock noon.

CONTRACTUAL ACTIONS, CALENDAR YEAR 1972, TO FACILITATE NATIONAL DEFENSE

The Clerk of the House of Representatives submitted the following report for printing in the CONGRESSIONAL RECORD

pursuant to section 4(b) of Public Law 85-804:

ASSISTANT SECRETARY OF DEFENSE,
Washington, D.C., March 21, 1973.

HON. CARL ALBERT,
Speaker of the House,
Washington, D.C.

DEAR MR. SPEAKER: In compliance with Section 4(a) of Public Law 85-804, the calendar year 1972 report on Extraordinary Contractual Actions to Facilitate the National Defense is transmitted herewith.

Table I shows that 300 contractual actions were approved and that 89 actions were disapproved. Included in the number of actions approved are 176 actions for which a potential Government liability cannot be estimated.

Table II lists the actions which have an actual or potential cost to the Government of \$50,000 or more. Also included in this list are the 176 actions above for which a potential cost cannot be estimated.

Sincerely,
HUGH McCULLOUGH,
Acting Assistant Secretary of Defense
(Installations and Logistics).

TABLE I.—SUMMARY REPORT OF CONTRACTUAL ACTIONS TAKEN PURSUANT TO PUBLIC LAW 85-804 TO FACILITATE THE NATIONAL DEFENSE, JANUARY-DECEMBER 1972

[Dollar amounts in thousands]

TABLE II.—LIST OF CONTRACTUAL ACTIONS WITH ACTUAL OR POTENTIAL COST OF \$50,000 OR MORE TAKEN PURSUANT TO PUBLIC LAW 85-804 TO FACILITATE THE NATIONAL DEFENSE
JANUARY-DECEMBER 1972

Name and location of contractor	Actual or estimated potential cost	Description of product or service	Justification
---------------------------------	------------------------------------	-----------------------------------	---------------

FORMALIZATION OF INFORMAL COMMITMENT

Army: Alabama Forge & Machine, Inc., P.O. Box 131, Talladega, Ala.	\$235,000	155mm projectiles.....	The Army issued an REP for procurement of 155mm projectiles with the furnishing by the Government of production facilities. The facilities project request required approval at the DOD level which had not been obtained prior to issuance of the RFP. While the approval was being sought the contractor was requested orally, several times, to extend the expiration date of its proposal which added up to approximately 13 months. During this time the contractor obtained a plant and approximately 40 personnel which it maintained from Oct. 1, 1968, until the plant was finally closed in December 1969. The Government was at fault for repeatedly asking Alabama Forge to extend its proposal and should share in the expenses incurred by the company.
--	-----------	------------------------	---

TABLE II.—LIST OF CONTRACTUAL ACTIONS WITH ACTUAL OR POTENTIAL COST OF \$50,000 OR MORE TAKEN PURSUANT TO PUBLIC LAW 85-804 TO FACILITATE THE NATIONAL DEFENSE—JANUARY–DECEMBER 1972

Name and location of contractor	Actual or estimated potential cost	Description of product or service	Justification
AMENDMENTS WITHOUT CONSIDERATION			
Navy: Gap Instrument Corp., 110 Marcus Blvd., Hauppauge, N.Y.	\$650,000	MK-53 attack consoles.....	In April 1971 Gap Instrument Corp. requested relief in the amount of \$1,196,522 when only 3 of the MK-53 units had been delivered. At that time \$1,091,329 was approved since the Government's interest would be best served by funding GAP so that it could continue producing the remaining MK-53 attack console units. As of August 1972, 13 units still remained to be delivered. These units could not be completed without additional funding. Based upon prevailing circumstances, it was deemed that the Government's interest would again be best served by allowing GAP to continue production and therefore the additional funding was allowed.
CORRECTION OF MISTAKES			
Army: General Electric Co., Missile & Armament Dept., Lakeside Ave., Burlington, Vt.	87,123	GAU-2B/B aircraft machine guns.....	On Sept. 30, 1965, a letter contract was entered into which provided that the Value Engineering Incentive provision of ASPR 1-1707.2(b) would be incorporated into the definitized contract. GE submitted 8 value engineering change proposals (VECP's) which were approved and applied under the contract prior to definitization. The total savings from the VECP's amounted to \$174,246 of which 50 percent was due GE as its share. The definitized contract provisions failed to increase the contract price to cover this cost.
Keystone Micro-Scan, Inc., 151 Hallet St., Boston, Mass.	121,140	M48A3 fuzes.....	IFB DAAA09-72-B-0020 had a labor surplus set-aside quantity of 11,162,050 fuzes of which Keystone received 6,000,000. When all other eligible bidders refused the additional quantity, the set-aside was dissolved and Keystone received another 3,000,000 units. The transportation factor used in determining contract price was based on 80 percent delivery to Milan Army Ammunition Plant and 20 percent to Lone Star Army Ammunition Plant whereas all shipments were made to Milan. In addition the Government Furnished Equipment factor should have been computed on 9,000,000 units instead of 6,000,000 in order to arrive at the award price.
Northrop Corp., 2301 West 120th St., Hawthorne, Calif.	197,963	AN/ASH-19 voice warning systems.....	The voice warning systems gives crewmen an audio alert of an aircraft malfunction and was urgently needed in support of Southeast Asia. A letter contract was awarded for 350 systems with the option to purchase additional units. The Government exercised its option and purchased these additional units but inadvertently omitted the cost for special testing and ancillary items for the option quantity.

CONTINGENT LIABILITIES

Provisions to indemnify contractors against liabilities on account of claims for death or injury or property damage arising out of nuclear radiation, use of high energy propellants, or other risks not covered by the contractor's insurance program were included in 176 contracts (the potential cost of these liabilities cannot be estimated inasmuch as the liability to the Government, if any, will depend upon the occurrence of an incident as described in the indemnification clause). Items procured are generally those associated with nuclear-powered vessels, nuclear armed guided missiles, experimental work with nuclear energy, handling of explosives or performance in hazardous areas.

Name of contractor	Number of contracts		
	Army	Navy	Air Force
Aerojet General Corp.			2
Automation Industries, Inc.		1

Note—In addition to the above, indemnification clauses will be inserted into all air transportation contracts entered into by the Military Airlift Command for transportation services to be performed by air carriers which own or control aircraft which have been allocated by the Department of Transportation to the Civil Reserve Air Fleet.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

646. A letter from the Secretary of the Army and the Secretary of Agriculture, transmitting notice of the intention of the Departments of the Army and Agriculture to interchange jurisdiction of civil works and National Forest lands at Winochee Lake project in the State of Washington, pursuant to 16 U.S.C. 505 a and b; to the Committee on Agriculture.

647. A letter from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to amend titles 10 and 37, United States Code, to make permanent certain provisions of the Dependents Assistance Act of 1950, as amended, and for other purposes; to the Committee on Armed Services.

648. A letter from the Secretary of Commerce, transmitting a draft of proposed legislation to amend the act of August 10, 1956, as amended, to provide for more effective utilization of officers of the uniformed services; to the Committee on Armed Services.

649. A letter from the Consultant to the Secretary of Labor, transmitting a report on compliance, enforcement, and reporting in 1972 under the Labor-Management Reporting and Disclosure Act; to the Committee on Education and Labor.

650. A letter from the Chief Scout Executive, Boy Scouts of America, transmitting the organization's annual report for 1972, pursuant to the act of June 15, 1916 (H. Doc. No. 93-67); to the Committee on Education and Labor and ordered to be printed.

651. A letter from the Assistant Secretary of the Interior, transmitting the annual report of the Colorado River Basin project for fiscal year 1972, pursuant to 82 Stat. 885; to the Committee on Interior and Insular Affairs.

652. A letter from the Secretary of Commerce, transmitting his 60th annual report, covering fiscal year 1972, pursuant to 15 U.S.C. 1519; to the Committee on Interstate and Foreign Commerce.

653. A letter from the Acting Secretary of Health, Education, and Welfare, transmitting a draft of proposed legislation to pro-

vide for the extension of the Developmental Disabilities Services and Facilities Construction Act, and for other purposes; to the Committee on Interstate and Foreign Commerce.

654. A letter from the Secretary of Transportation, transmitting a plan for the preservation of essential rail transportation services in the northeast section of the Nation, pursuant to section 2 of Public Law 93-5; to the Committee on Interstate and Foreign Commerce.

655. A letter from the Vice President for Public and Government Affairs, National Railroad Passenger Corporation, transmitting, a report covering the month of February 1973, on the average number of passengers per day on board each train operated, and the on-time performance at the final destination of each train operated, by route and by railroad, pursuant to section 308 (a) (2) of the Rail Passenger Service Act, as amended; to the Committee on Interstate and Foreign Commerce.

656. A letter from the Acting Assistant Secretary of Defense (Installations and Logistics), transmitting a report covering calendar year 1972 on extraordinary contractual actions to facilitate the national defense, pursuant to section 4(a) of Public Law 85-804; to the Committee on the Judiciary.

657. A letter from the Administrator of Veterans' Affairs, transmitting a draft of proposed legislation to provide for the conversion of Servicemen's Group Life Insurance to Veterans' Group Life Insurance, and for other purposes; to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. PATMAN: Joint Economic Committee. The 1973 Joint Economic Report; (Rept. No. 93-90). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. WIDNALL:

H.R. 6091. A bill to expand the National Flood Insurance program by substantially increasing limits of coverage and total amount of insurance authorized to be outstanding and by requiring known flood-prone communities to participate in the program, and for other purposes; to the Committee on Banking and Currency.

H.R. 6092. A bill to amend section 14(b) of the Federal Reserve Act, as amended, to extend for 2 years the authority of Federal Reserve banks to purchase U.S. obligations directly from the Treasury; to the Committee on Banking and Currency.

By Mr. ASPIN (for himself, Mr. Moss, Mr. ADDABBO, Mr. BADILLO, Mr. BELL, Mr. BINGHAM, Mr. BRASCO, Mr. BUCHANAN, Mr. BURTON, Mr. CORMAN, Mr. ECKHARDT, Mr. FASCELL, Mr. FISH, Mr. FREY, Mr. HARRINGTON, Mr. HECHLER of West Virginia, Mr. HORTON, Mr. KEMP, Mr. KYROS, Mr. MATSUNAGA, Mr. MOLLOHAN, Mr. O'HARA, Mr. PODELL, and Mr. ROE):

H.R. 6093. A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 to authorize safety design standards for schoolbuses, to require certain safety standards be established for schoolbuses, to require the investigation of certain schoolbus accidents, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ASPIN (for himself, Mr. Moss, Mr. ROSENTHAL, Mr. SEIBERLING, Mr. VEYSEY, Mr. VIGORITO, Mr. WIDNALL, Mr. CHARLES H. WILSON of California, Mr. WRIGHT, and Mr. YATRON):

H.R. 6094. A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 to authorize safety design standards for schoolbuses, to require certain safety standards be established for schoolbuses, to require the investigation of certain schoolbus accidents, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. BIAGGI:

H.R. 6095. A bill to provide for a Federal loan guarantee and grant program to enable educational institutions and individuals to purchase electronic reading aids for the blind; to the Committee on Education and Labor.

By Mr. BOWEN:

H.R. 6096. A bill to amend title 38 of the United States Code to provide improved and expanded medical and nursing home care to veterans to provide hospital and medical care to certain dependents and survivors of veterans; to provide for improved structural safety of Veterans' Administration facilities; to improve recruitment and retention of career personnel in the Department of Medicine and Surgery; and for other purposes; to the Committee on Veterans' Affairs.

By Mr. BROYHILL of North Carolina:

H.R. 6097. A bill to amend the Tariff Schedules of the United States in order to suspend temporarily the duties on certain fresh, chilled, or frozen meats; to the Committee on Ways and Means.

By Mr. DANIELSON:

H.R. 6098. A bill to amend the Federal Food, Drug, and Cosmetic Act to include a definition of food supplements, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. EDWARDS of Alabama:

H.R. 6099. A bill to improve and implement procedures for fiscal controls in the U.S. Government, and for other purposes; to the Committee on Rules.

By Mr. HARRINGTON (for himself, Mr. ALEXANDER, Mr. BROWN of California, Mr. BURKE of Massachusetts, Mr. CARNEY of Ohio, Mr. DAVIS of South Carolina, Mr. DENHOLM, Mr. DRINAN, Mr. FROELICH, Mrs. GRASSO, Mr. HARVEY, Mr. HELSTOSKI, Mr.

KOCH, Mr. MAZZOLI, Mr. MOAKLEY, Mr. OBEY, Mr. PODELL, Mr. RANGEL, Mr. ROSENTHAL, Mr. SEIBERLING, Mr. STARK, Mr. SYMINGTON, Mr. VANDER JAGT, Mr. WON PAT, and Mr. YATRON):

H.R. 6100. A bill to authorize the Secretary of Labor to provide financial and other assistance to certain workers and small business firms to assist compliance with State or Federal pollution abatement requirements; to the Committee on Banking and Currency.

By Mr. KOCH (for himself, Mr. BADILLO, Mr. CONYERS, Mr. FAUNTROY, Mr. MITCHELL of Maryland, Mr. NIX, Mr. PODELL, Mr. RONCALLO of New York, Mr. ROSENTHAL, Mr. ROYBAL, and Mr. TIERNAN):

H.R. 6101. A bill to provide for family visitation furloughs for Federal prisoners; to the Committee on the Judiciary.

By Mr. MATSUNAGA:

H.R. 6102. A bill to amend title 5, United States Code, to allow credit for civil service retirement purposes for time spent by Japanese Americans in World War II internment camps; to the Committee on Post Office and Civil Service.

By Mr. MEEDS:

H.R. 6103. A bill to promote maximum Indian participation in the government of the Indian people; to provide for the full participation of Indian tribes in certain programs and services conducted by the Federal Government for Indians and to encourage the development of the human resources of the Indian people; and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 6104. A bill to amend certain laws relating to Indians; to the Committee on Interior and Insular Affairs.

H.R. 6105. A bill to establish within the Department of the Interior the position of Assistant Secretary of the Interior for Indian Affairs, and for other purposes; to the Committee on Interior and Insular Affairs.

H.R. 6106. A bill to provide for the creation of the Indian Trust Counsel Authority, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. O'BRIEN:

H.R. 6107. A bill to amend the Federal Food, Drug and Cosmetic Act to include a definition of food supplements, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. RANDALL (for himself, Mr. FASCELL, Mr. ST GERMAIN, Mr. CONYERS, Mr. PARRIS, and Mr. HINSHAW):

H.R. 6108. A bill to require the Secretary of the Treasury to gather and compile information with respect to the financial cost of assisting taxpayers to comply with tax laws of the United States, and for other purposes; to the Committee on Government Operations.

By Mr. REES:

H.R. 6109. A bill to amend the Interstate Commerce Act, with respect to recovery of reasonable attorney's fee and court costs in case of successful prosecution or defense of an action for recovery of damages sustained in transportation of property; to the Committee on Interstate and Foreign Commerce.

By Mr. RODINO:

H.R. 6110. A bill to amend the Urban Mass Transportation Act of 1964 to provide a substantial increase in the total amount authorized for assistance thereunder, to increase the portion of project cost which may be covered by a Federal grant, to authorize assistance for operating expenses, and for other purposes; to the Committee on Banking and Currency.

By Mr. RODINO (for himself and Mr. HOWARD):

H.R. 6111. A bill to establish Capitol Hill as a historic district; to the Committee on Interior and Insular Affairs.

By Mr. ROYBAL:

H.R. 6112. A bill to amend the Economic Stabilization Act of 1970, to stabilize food prices at their February 1, 1973, level, and for other purposes; to the Committee on Banking and Currency.

H.R. 6113. A bill to amend the Economic Stabilization Act of 1970, to stabilize rents at their January 10, 1973 level, and for other purposes; to the Committee on Banking and Currency.

By Mr. ST GERMAIN:

H.R. 6114. A bill to require the President to notify the Congress whenever he impounds funds, or authorizes the impounding of funds, and to provide a procedure under which the House of Representatives and the Senate may disapprove the President's action and require him to cease such impounding; to the Committee on Rules.

By Mr. WHITE:

H.R. 6115. A bill to authorize the construction of extensions of the American Canal at El Paso, Tex., operation and maintenance, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. BROOMFIELD:

H.J. Res. 461. Joint resolution proposing an amendment to the Constitution of the United States to provide for mandatory retirement of Members of Congress and the Federal judiciary; to the Committee on the Judiciary.

By Mr. COLLIER:

H.J. Res. 462. Joint resolution proposing an amendment to the Constitution of the United States to provide for direct popular election of the President and the Vice President of the United States; to the Committee on the Judiciary.

By Mr. ANDERSON of Illinois:

H. Con. Res. 165. Concurrent resolution authorizing and directing the Joint Study Committee on Budget Control to report legislation to the Congress no later than June 1, 1973, providing procedures for improving congressional control of budgetary outlay and receipt totals, the operation of a limitation on expenditures and net lending commencing with the fiscal year beginning July 1, 1973, and for limiting the authority of the President to impound or otherwise withhold funds authorized and appropriated by the Congress; to the Committee on Rules.

By Mr. BIAGGI:

H. Con. Res. 166. Concurrent resolution requesting the President of the United States to rescind Executive Order 11246 as amended; to the Committee on Education and Labor.

By Mr. ZWACH:

H. Con. Res. 167. Concurrent resolution express the sense of the Congress with respect to the withdrawal of American troops from Europe; to the Committee on Foreign Affairs.

MEMORIALS

Under clause of rule XXII, memorials were presented and referred as follows:

105. By the SPEAKER: Memorial of the House of Representatives of the State of Montana, relative to the multiple use concept on Federal lands; to the Committee on Interior and Insular Affairs.

106. Also, memorial of the Legislature of the State of South Dakota, relative to the Wagner unit of the Pick-Sloan Missouri River Basin project; to the Committee on Interior and Insular Affairs.

107. Also, memorial of the Legislature of the State of South Carolina, relative to daylight saving time; to the Committee on Interstate and Foreign Commerce.

108. Also, memorial of the Legislature of the State of South Dakota, relative to railway abandonments in South Dakota; to the Committee on Interstate and Foreign Commerce.

109. Also, memorial of the Legislature of the State of South Dakota, requesting Con-

gress to propose an amendment to the Constitution of the United States concerning abortion; to the Committee on the Judiciary.

110. Also, memorial of the Legislature of the State of Oklahoma, relative to "National Hunting and Fishing Day"; to the Committee on the Judiciary.

111. Also, memorial of the Senate of the Commonwealth of Massachusetts, relative to expanding the medicare program to include drug costs; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BURTON:

H.R. 6116. A bill for the relief of Gloria Go; to the Committee on the Judiciary.

By Mr. EDWARDS of Alabama:

H.R. 6117. A bill for the relief of Hernan Beteta; to the Committee on the Judiciary.

By Mr. KOCH:

H.R. 6118. A bill for the relief of Ramo Alvez; to the Committee on the Judiciary.

By Mr. McFALL:

H.R. 6119. A bill for the relief of Arturo Robles; to the Committee on the Judiciary.

By Mr. YOUNG of Illinois:

H.R. 6120. A bill to permit the vessel *Manatra II* to be inspected, licensed, and operated as a passenger-carrying vessel, and for other purposes; to the Committee on Merchant Marine and Fisheries.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

73. By the SPEAKER: Petition of the council, Maui County, Hawaii, relative to funds for certain social service programs; to the Committee on Appropriations.

74. Also, petition of the Fourth Mariana Islands District Legislature, Trust Territory of the Pacific Islands, relative to the Office of Economic Opportunity; to the Committee on Education and Labor.

75. Also, petition of the Assembly of Kenai Peninsula Borough, Alaska, relative to development of the oil industry in the Gulf of Alaska; to the Committee on Interior and Insular Affairs.

76. Also, petition of Arnold E. Tarr, Lincoln, N.C., relative to protection for law enforcement officers sued for damages in Federal court resulting from the performance of their duties; to the Committee on the Judiciary.

77. Also, petitions of various lodges of the Fraternal Order of Police, relative to protection for law enforcement officers sued for damages in Federal court resulting from the performance of their duties; to the Committee on the Judiciary.

78. Also, petition of K. Wallgora, Baltimore, Md., relative to redress of grievances; to the Committee on the Judiciary.

EXTENSIONS OF REMARKS

OBLIGATION TO OUR VETERANS

HON. JOHN C. CULVER

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. CULVER. Mr. Speaker, our satisfaction with the disengagement of our troops from Vietnam and our delight with the return of our prisoners of war must not overshadow our continuing obligation to all those who served this Nation during the war.

The administration's recent attempt to reduce benefits for disabled veterans, apparently defeated by a public outcry, is indicative of what may happen to returned veterans if we do not speak out and act in their behalf.

None of us would begrudge the former prisoners of war their offers of new cars, new wardrobes, and jobs. On the contrary, they earned everything they are receiving. But 2½ million other men served in the Vietnam war, and they too have earned a right to a fair deal from their country.

Within the Second Congressional District in Iowa, we have over 1,200 Vietnam era veterans registered as job ready with the Veteran's Employment Service but unable to find jobs. Additionally, there are 60 handicapped Vietnam era veterans listed as job ready; but they too are unable to find work.

Recently, the Des Moines Register published an editorial entitled "Don't Forget the Other Veterans" which states the case explicitly and which I would like to call to the attention of the House. I am including it as part of my remarks.

DON'T FORGET THE OTHER VETERANS

The first American prisoners of war to return from Vietnam were treated as heroes, their arrivals marked by red carpets, honor guards, brass bands and cheering onlookers. They were promised free vacations, a year's use of a new car and jobs with major industrial firms if they chose to leave the armed forces.

Operation Homecoming dramatized the end of a long and divisive war. The event was carried off with military precision as television cameras hovered over almost every stage of the return. It was not flawed by the

rancor that marked the prisoner exchange after the Korean War, but it lacked the spontaneous jubilation of the victory celebrations after World War II.

The POWs deserve a warm welcome back to their homeland. They endured much, both physically and mentally, during their imprisonment. But the public adulation given them must not be allowed to overshadow the less visible return of others who bore the battle in Indochina. The attention focused on the POWs could provoke jealousies among veterans who were not promised jobs, cars or free vacations.

Nearly 50,000 Americans were dead when they were brought home from Vietnam. About 300,000 were wounded, half of them seriously, and thousands of them have permanent, disabling reminders of their ordeal. Sixty thousand or more became addicted to drugs, but only about a third are getting adequate treatment.

Unemployment among Vietnam veterans is not as bad as it was several months ago, but about 8.5 per cent of the veterans aged 20 to 24 don't have steady jobs. That is about 50 per cent higher than the jobless rate for the whole population. Unemployment among black veterans is about 9.5 per cent.

President Nixon's proposed cuts in public payrolls and in federally funded vocational training programs could adversely affect the jobs and job prospects of as many as 100,000 Vietnam veterans.

Let's not forget the other veterans of Vietnam while we share the happiness of the POWs and their families.

NORTH GEORGIA COLLEGE CENTENNIAL

HON. HERMAN E. TALMADGE

OF GEORGIA

IN THE SENATE OF THE UNITED STATES

Monday, March 26, 1973

Mr. TALMADGE. Mr. President, in May of this year North Georgia College at Dahlonega, will celebrate the 100th anniversary of its founding. This is a very proud occasion for North Georgia College, the second oldest unit in the university system of Georgia and our first State-supported coeducational college.

I salute the college, its administration, faculty, students, and alumni and extend my sincere congratulations on this centennial.

Gov. Jimmy Carter, of Georgia, has proclaimed the week of May 6 to May 12, 1973, as North Georgia College Week, and I ask unanimous consent that his proclamation be printed in the Extensions of Remarks.

There being no objection, the proclamation was ordered to be printed in the RECORD, as follows:

NORTH GEORGIA COLLEGE CENTENNIAL

BY THE GOVERNOR

Whereas: North Georgia College, The second oldest unit of the University System of Georgia, opened its doors for class in 1873, one hundred years ago; and

Whereas: North Georgia College, inviting "Whoever will, may come," was Georgia's first state-supported coeducational college, and is today the State's only coeducational, military, liberal arts college; and

Whereas: North Georgia College has contributed significantly to education in Georgia, and through her alumni to the integrity and dignity of the State, the armed forces, and the nation at large; and

Whereas: North Georgia College stands on the site of the Old United States Gold Mint at Dahlonega, in Lumpkin County, the heart of one of Georgia's most historically important and colorful areas, the center of America's First Gold Rush; and

Whereas: The Faculty, Staff, Students, and Alumni of North Georgia College and the people of Dahlonega and of Northeast Georgia, who have supported the college and whom the college serves in turn, will commemorate the centennial anniversary of the founding of the college during the week of May 6 through 12; Now,

Therefore: I, Jimmy Carter, Governor of the State of Georgia, do hereby proclaim the week of May 6 to May 12, 1973, as North Georgia College Week in Georgia, and urge all the citizens of our State to join in celebrating this historic occasion.

THE DEFENSE BUDGET

HON. DAVID C. TREEN

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. TREEN. Mr. Speaker, the President's decision once again to direct America on a path of fiscal responsibility has been met by criticism from certain segments of our society. These crit-

ics are advocating a spend-now-pay-later policy which places a heavy burden on every hard-working family in this Nation, for programs which have proven to be fiscally irresponsible and socially unacceptable.

These critics argue that our national priorities are misplaced and that if we are to cut the Federal budget it should be cut in the area of defense. Well, I wish that we did not have to spend one single dollar on defense. But as the Poet Milton once observed:

Peace hath her victories (and price I might add) no less renowned than war.

I believe that President Nixon is aware of the emphasis which must be placed on our national priorities. For fiscal year 1974, for example, the shift in budget priorities, which began under the Nixon administration, has continued. Budget priorities for human resources are expected to grow at an annual rate of 15 percent from 1970 to 1974. Furthermore, by 1974 the budget for the Department of Defense will drop to 30 percent of the total budget at a time when human resources will rise to 47 percent.

In constant 1974 dollars the total figures for our defense budget are less than they were in fiscal year 1964, before the Vietnam buildup. Moreover, in the President's attempt to produce an effective and efficient all-volunteer military force—which I applaud—56 percent of the present budget goes for manpower costs. This means that we are now spending substantially less on weapon systems. In fact, if we consider inflation, spending for new weapons has decreased 24 percent in the last 9 years alone. Defense spending is thus at its lowest point—in constant dollars—since 1951.

I think, therefore, that it is important to keep these figures in mind when we talk about our national priorities. And, while I would be the first to say that we should save whatever and whenever we can, including in the area of defense, I think it is equally important to remember the words of British Air Chief Marshal Slessor:

It is customary in democratic countries to deplore expenditures on armament as conflicting with the requirements of the social services. There is a tendency to forget that the most important social service that a government can do for its people is to keep them alive and free.

I think most Americans feel this way and I am convinced that President Nixon is right, and that peace can only be achieved if we deal from a position of unquestioned military strength.

A recent editorial in the New Orleans Times-Picayune deals with this question and I am inserting it in the RECORD at this time to share with my colleagues:

DEFENSE BUDGET AND NEW "WAR GAMES"

As if to lay down a smokescreen to mask the nation's on-the-double march toward the social welfare state, high-pitched liberal blasts seem certain to bugle a counterattack on the 1974 Nixon budget.

One fiscal theater of operations to draw considerable flak will be the presumed preposterous budget for national defense.

"With American involvement in Vietnam at an end after 12 years," says paragraph two of an Associated Press news story on the subject, "proposed national defense spending for fiscal 1974 falls shy of the record \$81.6

billion national defense budget of 1945, the final year of World War II."

It's not till paragraph 14 that that bit of editorializing is put into perspective thus: "If the 1945 defense budget of \$81.6 billion were converted to current dollars"—constant dollars are the only means of legitimate comparison—"it would actually total more than \$160 billion, far above the amount contemplated for next year."

Put another way, President Nixon's defense proposal is half as large as the record \$81.6 billion budget of 1945—in actual purchasing power.

Dollar-for-dollar can be deceptive, moreover, for other reasons. Differences in technology, weaponry and strategic military planning preclude item-for-item comparisons between World War II defense budget days and today.

The \$4.1 billion increase over this year's defense spending is attributed largely to higher pay levels associated with all volunteer forces and raises for civilian and military workers in the Defense Department.

Then there's the relative size of the 2,288,000 armed forces, which will be trimmed by 55,000 to reach the "lowest level in 24 years." Again, if such military comparisons must be made—they're superficial exercises that ignore world conditions and changing modes of warfare—by extending such logic a nation of 210 million people today which was 150 million in 1950 should have a proportionately strong army of 3,100,000. Reasoning from either angle is obviously absurd.

The American people, we believe, are squarely behind the President's world strategy of negotiating for peace and stability from strength—the only stance that Communist militarists seem to understand or respect. As world tensions ease, further mutual reductions in weapons and military forces should be possible, as in Europe and elsewhere.

Considering the shortcomings of Moscow's new five-year plan for economic progress, including agricultural woes that led to record grain purchases from the United States, the time may be ripe for Russians to agree to convert more of their swords into plowshares.

L. R. HARRILL—"MR. 4-H" IN
NORTH CAROLINA

HON. JESSE A. HELMS

OF NORTH CAROLINA

IN THE SENATE OF THE UNITED STATES

Monday, March 26, 1973

Mr. HELMS. Mr. President, a few weeks ago a distinguished citizen of my State, a close personal friend of mine, was presented a certificate of appreciation signed by both Secretary of Agriculture Earl L. Butz and Mrs. Butz. The certificate read:

To L. R. HARRILL

For over 25 years of dedicated service and outstanding contributions to the development of the youth of our Nation through the 4-H Program of the United States Department of Agriculture.

Now, Mr. President, the brief text of that certificate tells something, but it by no means tells it all. In the first place, it should be noted that the certificate was signed by not only Secretary Butz, but by the charming Mrs. Butz as well.

There is a story behind that, Mr. President. Mrs. Butz is a native of my State. In 1930, she came to Washington with a group of other North Carolina 4-H youngsters. While here, she met—as Secretary Butz tells it—"a young 4-H

farm boy from Indiana." L. R. Harrill was the leader of 4-H in my State. In fact, he is known throughout my State as the "Father of 4-H." And on that occasion in 1930, when the group of young North Carolinians came to Washington, L. R. Harrill was the chaperone.

That is when and where Earl Butz met the future Mrs. Butz. Needless to say, he has a very special gratitude for Mr. Harrill.

Mr. President, I could not begin to describe the noble career of L. R. Harrill in any adequate sort of way. He has meant so much to so many. He has given countless thousands of young people a helping hand. He has given them direction and inspiration.

Mr. Harrill's association with 4-H began with the 2 years he served in Cleveland County, N.C., as a "Cotton Club Boy." That was in 1915-16. He became State 4-H leader for North Carolina on January 1, 1926, and he served in that capacity until his retirement in 1964.

Since retiring, he has compiled and written a 50-year history of 4-H Club work in North Carolina. Recently, Mr. Harrill told me some of the highlights of his 40 years of service. With a smile, he said:

I would love to do it again.

He may be retired, Mr. President, but he maintains an abiding interest in young people, and particularly in 4-H. He is a distinguished Rotarian, having served as president of the Rotary Club of Raleigh, and as district governor. He is an active churchman, a dedicated Christian. Without question, he ranks as one of the most beloved citizens our State has produced.

On a personal note, Mr. President, let me say that L. R. Harrill has had a profound influence upon my life. He is no fair-weather friend; he is the kind of man who stands up to be counted.

My late, great friend, Senator Dick Russell of Georgia, used to describe his very special friends as "nature's noblemen." If I may borrow that expression from Senator Russell, I should like to apply it to my friend L. R. Harrill. It fits him like a glove.

THE CONSUMER'S RIGHT TO KNOW

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. ANNUNZIO. Mr. Speaker, today's consumer is more sophisticated and more educated than ever before and is demanding to know what is in the prepared foods he is buying. Every day the Food and Drug Administration, the agency responsible for the regulation of food labeling, receives calls from consumers complaining that the ingredients are not listed on ketchup, ice cream, bread, mayonnaise, and dozens of other products. These are all members of a group of foods which are not required to list their ingredients.

This exemption from disclosure requirements is the result of that part of

the 1938 Federal Food, Drug, and Cosmetic Act regarding standardized foods. The law authorized the Secretary to issue standards of identity for any food when he feels it will "promote honesty and fair dealing in the interest of consumers." The label of such a standardized food is required to bear only the name specified in the standard of identity and certain optional ingredients. Standards of identity have been established for more than 350 products.

The food standards law was enacted to protect the consumer. Prior to 1938, there were numerous instances of manufacturers cheating on the ingredients of a product, using such things as starch for fill. It was felt that standards would help the consumer by establishing the ingredients which a product should contain. Violation of the standard could be dealt with speedily and effectively with the regulatory tools of the FDA.

However, exemption of standardized foods from listing of all ingredients is no longer valid in view of the change in lifestyles since 1938. At that time housewives knew that should be used in making such things as mayonnaise. Today's consumers are not familiar with preparation of many of these foods and there exists no practical way for them to find out what ingredients are in these products. Aside from the basic ingredients such as flour, milk, eggs, and so forth, advanced technology in food processing has resulted in the addition of many ingredients which even the most sophisticated consumer would be unaware of.

H.R. 1650, a bill which I cosponsored, provides a remedy to this very situation. It would amend the Federal Food, Drug, and Cosmetic Act to require a listing in the order of the predominance after processing, by their common or usual name, of all ingredients present in standardized foods along with an accurate statement of the amount of each ingredient present in the food—stated as a percentage.

The need for such legislation has been widely recognized. The FDA supports a program of disclosure for standardized foods but lacks the legislative authority to require such labeling. The White House Conference on Food, Nutrition, and Health recommended legislation to repeal the labeling exemption for mandatory ingredients in standardized foods. Numerous consumer groups are demanding more information in labeling.

In addition to requiring disclosure for standardized foods H.R. 1650 would require percentage listing of all ingredients in nonstandardized foods.

These measures are imperative not only to aid the consumer in shopping wisely but to protect him. Those with allergies or diet restrictions are threatened every time they eat prepared foods for which standards have been established. The consumer has the right to know what is in the food he is eating and it is the responsibility of the Congress to provide legislation requiring manufacturers to include the needed information on the label.

Mr. Speaker, H.R. 1650 is worthy of close attention by my colleagues and I urge bipartisan support for this much needed legislation.

THE NIBBLING AWAY OF THE WEST

HON. ALAN BIBLE

OF NEVADA

IN THE SENATE OF THE UNITED STATES

Monday, March 26, 1973

Mr. BIBLE. Mr. President, recently, the legislative chairman and publicity chairman of the White Pine County chapter of the Nevada CowBelles wrote to me and called my attention to an article, "The Nibbling Away of the West," which appeared in a recent issue of the Reader's Digest.

Nevada members of the CowBelles believe many important facts were overlooked by the author of the article and have composed a rebuttal which they feel deserves the attention of the public. I concur, in that I have always subscribed to presenting both sides of a given issue when possible.

As a result, Vivian Joy and Beth Robinson of Ely, Nev., have submitted an article to me for my consideration. I know both of these fine ladies and commend their article to Members of the Senate.

Ranchers in Nevada have always been cooperative with agencies of the Federal Government. They have a large investment in lands under jurisdiction of the Bureau of Land Management and the Forest Service. The CowBelles want the public to know of this interest and their financial support to good range practices and conservation of the public domain.

Mr. President, I request unanimous consent that the CowBelles' article be printed in the Extensions of Remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

REBUTTAL OF ARTICLE IN READER'S DIGEST

(By the White Pine CowBelles)

In an article in Reader's Digest, December 1972, "The Nibbling Away of the West" James Nathan Miller describes the alarming deterioration of our Public Range and Forest Lands. Mr. Miller places the major portion of responsibility on the shoulders of the Bureau of Land Management, the U.S. Forest Service, and livestock ranchers whose animals graze on these lands.

The following are some of the facts that we feel have been neglected or denied in Mr. Miller's article.

1. The Safford Grazing District in Arizona which he used as a typical example is not typical but one of the most extreme cases of range neglect and abuse. An accurate assessment of the problem could be arrived at only by consideration of a more reasonably typical example than Mr. Miller's choices. The Ely Grazing District and the forest lands adjacent to it provide such an example.

2. Even in the Safford District a combination of factors contributed to erosion and depletion.

3. Not all public domain was a continuous grassland dotted with flowers when the livestock industry began, as reported by early exploration accounts.

4. Cuts in range livestock numbers have been affected in many areas, in the Ely Grazing District as early as 1945 and as late as 1969. Over the years only 4 out of 19 units have had no reductions. In four units even greater second cuts were made after 20 years because the original cut was ineffective. Cuts have ranged from 5% to 70% in the 19 grazing units that comprise the Ely District.

Similar cuts have been made by the Forest Service in the past proving just as ineffective.

5. These livestock cuts have not proven the answer except in combination with other practices. In the Ely Grazing District at the present time there are 14 range allotments involving 992,000 acres under allotment management plans as well as 5 out of 15 cattle allotments with the Forest Service, all in cooperation with the ranchers which incorporate a grazing system such as rest rotation.

6. Cooperation on the part of ranchers is not the major factor any longer. As a matter of fact, this District office of the BLM has 17 firm requests for more management plans. Time has shown that management plans and a rest rotation system with consideration of the physiological needs of plant life allows for restoration of plant vigor, seed production and reproduction of plant and also allows for the harvesting of plant resources as forage. Of interest is the fact that money in the Ely District contributed by ranchers in sagebrush and juniper rehabilitation projects has amounted to \$655,000 since reseeding was started in this district. This is just towards plowing, chaining, and seed purchase. Fencing was cooperative in addition.

In the past most range improvement plans were on a financially cooperative basis with ranchers contributing around 50% in BLM units and 25% in Forest Service units. Under the more recent Range Management plans both agencies usually finance all or a major portion of the cost. The ranchers' investment comes in the form of management of their livestock to comply with management plans and grazing systems and routine maintenance of existing and new range improvements.

The present fee on the Forest is 72¢ per animal unit month (AUM) with a proposed raise to 91¢ AUM and an anticipated further increase up to \$1.23 per AUM. In the last year BLM fees were raised from 53¢ AUM to 66¢ AUM with still further increases proposed up to \$1.23.

7. Mr. Miller has failed to recognize the fact that time is required to do an extensive range practice and environmental analysis on each individual allotment as well as the time required to outline the new practice and implement it.

8. Mr. Miller stated that range management agencies have been negligent in recognizing the needs of wildlife. On the contrary, wildlife and recreational needs are given full recognition in the Forest Service and are an integral part of environmental analysis made by the BLM and the Forest Service preliminary to any allotment management plan system.

9. To a degree livestock can give complement to wildlife grazing. One example being that of a cow's tendency to crop the bitter brush branches thereby stimulating more tender shoots to sprout and ultimately providing more browse for wildlife. Improvement of water by livestock producers has benefited wildlife as well as the seedlings which give animals a diversity of forage.

10. Mr. Miller seems to have overlooked the growing counter balance of the sentiments of the general public over minority private interest lobby groups, also the fact that the livestock producer is becoming a decreasing minority, having even less impact on legislation.

If Mr. Miller's objective was to stir public interest and instigate action he undoubtedly has achieved his goal. On the other hand by neglecting to describe some factors and emphasizing others his article has presented a distorted picture of what is admittedly a problem. It would be unfortunate if any solutions were based on such evidence as he gives.

Mr. Miller has made a point that to effect a cure and add recreational facilities will require greater funds not only through increased fees but also appropriations. We would like to still some impatience he seems

to want to generate, for it will take time to effect good range management.

We would agree with him that the BLM does need more inclusive authority in addition to that of range management provided by the Taylor Grazing Act if it is to be totally effective. Hopefully a reasonable National Land Use Policy Act will be enacted in the present legislative session. Sportsmen, recreationists, vacationers, rockhounds, livestock people, and the general public who use public lands should be aware of regulation changes going in.

Since about 86% of Nevada is Public Domain, it would appear that it is economically wise to perpetuate the livestock industry which makes use of these lands and provides tax revenue to our state and contributes to a stable economy.

MORE COMPLAINTS ABOUT THE SNAIL SERVICE

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. ALEXANDER. Mr. Speaker, in the past I have shared with you the letters and complaints I have received from individuals about the U.S. Postal Service. Now this steadily deteriorating situation has reached the point where I am hearing from an entire town. Mr. Ralph C. Murray, city attorney for West Helena, Ark., sent the following letter to Postmaster General Klassen complaining about the inefficiency of the system in handling West Helena's mail. I would like to share that letter with you at this time. The letter follows:

MARCH 19, 1973.

Re: West Helena, Ark.
Hon. E. T. KLASSEN,
Postmaster General, United States of America Post Office Department, Washington, D.C.

DEAR SIR: On behalf of the City of West Helena, Arkansas, and its citizens, I would like to bring to your attention a situation concerning the mail service which this city and its citizenry are experiencing at the present time. First, let me state that the population in and for the City of West Helena, according to the last census, is greater than for the City of Helena, Arkansas. The situation regarding the mail service to which I refer is that, for example, mailings from the City Hall of West Helena, Arkansas, are picked up by a postal vehicle operated by employees of the Helena Post Office, are postmarked Helena, delivered to West Memphis, Arkansas, for processing and delivered back to the West Helena Post Office for delivery to a West Helena citizen. It is very difficult for the officials of the City of West Helena and its citizens to understand such a situation as this. There are a number of other like situations existing in the handling of mail service from our city. As another example, on certain occasions, mail from the City of West Helena to Helena or from Helena to West Helena is processed through West Memphis for delivery which in effect causes delay of two to three days. This has been experienced by myself as well as others and even though the two cities of Helena and West Helena are only four or five miles apart.

As concerned citizens of these United States, we are as concerned with the expenses of our government as anyone but feel that expenses should not be curtailed to the extent that it would be so detrimental to efficient mailing services.

Your assistance and advice in this situation would be greatly appreciated.

Sincerely,

RALPH C. MURRAY,
Attorney for the City of West Helena, Ark.

POSSIBLE ELIMINATION OF RURAL POSTMARKS

HON. HERMAN E. TALMADGE

OF GEORGIA

IN THE SENATE OF THE UNITED STATES

Monday, March 26, 1973

Mr. TALMADGE. Mr. President, in the midst of increasing protests about inefficiency in the U.S. Postal Service, there is growing concern about steps being taken that will eliminate rural postmarks.

There recently was brought to my attention an excellent column written by Prof. Spencer R. Gervin, of Southwest Virginia Community College about this problem, and I ask unanimous consent that it be printed in the Extensions of Remarks.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

[From the Lebanon (Va.) News,
Feb. 24, 1973]

SNOWBALLS FROM HELL

(By Dr. Spencer R. Gervin)

Perhaps to keep the mail zipping may be worth the deprivation. But many will regret the effacement from Americana of "Hell", "Bowlegs", "Santa Claus", "Paw Paw", and "Spencer". These names are soon to disappear from the mail, swallowed in the maw of automation.

In its elan to outzip the wind, the U.S. Postal Service is installing giant mail sorting and cancelling equipment at selected centers. Some 357 of these Area Mail Processing Centers are either now operating or being readied. Because these expensive machines must be kept busy, no longer can smaller post offices maintain their own postmark identity. Letters are to be hustled uncanceled from the mailing point to an AMPC, there to be processed for further zipping. All that will appear on the letter will be the state abbreviation and the last three digits of the area zip code.

Thus Tiptop (Virginia) will become something like VA242. Smartt (Tennessee) will emerge from automation as TN373. Crum (West Virginia) will disappear as WV660. Paw Paw (Kentucky) and Paw Paw (West Virginia) are headed for defruiting. Santa Claus (Indiana), Bow Legs (Oklahoma), and Tight Wad (Missouri) likewise are doomed to postmark extinction. Spencer (Virginia), Spencer (West Virginia), and Spencer (Tenn.) will be postally interred.

One group is distinctly displeased by this automated esurience. The Post Mark Collectors Club of America plans to take up the matter at its annual convention this summer in Findlay, Ohio. For 27 years now this organization has avidly collected postmarked envelopes from post offices with unusual names.

Some collectors specialize in topical, that is, names of a particular genre like animals or weather. In the first category are such fauna as Raven (Virginia), Wildcat (West Virginia), and Lamb, Kentucky. Of the latter type are Thunderbolt (Georgia) and Hurricane (West Virginia).

In addition this club has established a museum in Republic, Ohio. Enshrined there are some 500,000 post marks. Of course, after

the "expressive" postal names have been zipped into limbo, anyone may ask a post office to cancel his letter with an individual place-name stamp. Thus collectors may, so postal officials state, continue to pursue their hobby by personal contact with an individual post office. But it would take time and money, for example, to secure the postgraph of Long Bottom (Ohio) or Rabbit Hash (Kentucky) for this purpose.

So the Post Mark Collectors Club plans to fight. Its President Herbert H. Harrington, of Warren, Ohio, is planning to throw the club's weight into a campaign of letter writing to Congressmen and Senators. "These machines," he fulminates, "are taking all the romance out of postmarks. They're ruining a poor man's hobby. It's getting now so as you don't know where your mail is coming from. All the envelope has is a lot of cuckoo numbers." The club's address is P.O. Box 87, Warren, Ohio 44482. Dues are \$4 a year.

And just as hiked postal rates were a factor in the death of Life Magazine last year, so a thriving business in Michigan expects to suffer from these postal changes. No longer will it be possible to purchase "Snowballs from Hell" (Michigan)—with a postmark to prove it.

ABRIDGING THE RIGHT TO VOTE

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. RANGEL. Mr. Speaker in 1972, the Citizenship Education Department of the National Urban League, Inc., undertook a study of restrictions to black political participation that exist in the northern sector of this country. I recommend the booklet entitled "Abridging the Right To Vote" to all of my colleagues.

I now submit for your attention and the attention of my colleagues, the introduction to this booklet.

The Voter Registration Rights Act of 1973 (H.R. 4846) that I introduced in the House of Representatives will serve to eliminate many of the barriers placed in the way of eligible black voters:

ABRIDGING THE RIGHT TO VOTE: A STUDY OF STATE RESTRICTIONS AND BLACK POLITICAL PARTICIPATION¹

INTRODUCTION

Most analyses of barriers to black political participation inevitably focus on the South, since the more blatant measures to disenfranchise black people were adopted there. The "grandfather clause," the "white primary" and the unceasing acts of terrorism and violence to prevent black political involvement are still vivid in the minds of many Americans.

But this focus has had at least two unfortunate consequences. The first is that, with the passage of the 1965 Voting Rights Act, and the disappearance of many of the more odious forms of disenfranchisement, increasing numbers of Americans now believe the major battles for the black franchise in the South have been won and that official disenfranchisement is a thing of the past.

Secondly, this "Southern perspective" also

¹ This report was prepared by Robert B. Hill, Director, Research Department, National Urban League, with the assistance of George A. Jordan, Research Assistant, and Esther Plovna, Social Science Analyst.

permits the American public to believe the primary barriers to the political participation of minority groups in the North have been internal and not external: it is only their apathy that hinders them.

The fact is that most studies of American voting procedures agree that external impediments, and not apathy, are primarily responsible for the relatively lower participation of Americans, whether black or white, compared to many Western countries. For example, only 61 percent of the U.S. electorate voted in 1968, while recent elections in England, Canada, West Germany and Denmark had turnouts of 72, 76, 87, and 89 percent, respectively.

Of course, these external barriers, particularly those related to registration requirements, fall disproportionately on persons who are black or Spanish-speaking, low income, and less educated.

Minority groups are particularly plagued by antiquated residency requirements, inaccessible sites, inappropriate registration hours, literacy tests and disqualifying regulations.

GUN CONFUSION

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. DINGELL. Mr. Speaker, pursuant to permission granted I insert in the CONGRESSIONAL RECORD an excellent editorial entitled "Gun Confusion" appearing in the West Side Courier published by its editor, my distinguished friend, Mr. Harry H. Weinbaum.

This fine editorial points out the unwisdom of many of the gun control proposals now pending before the Congress. The editorial follows:

GUN CONFUSION

Persistent confusion concerning crime control and gun control lies at the heart of controversy over the more radical anti-firearms proposals. The confusion has been compounded by those near-zealots who pursue but a single goal—the disarming of law-abiding citizens and the branding of the millions of members of such organizations as the National Rifle Association, at least by indirection, as little better than thugs.

In response to a nationally-syndicated article that compared handguns to heroin as a threat to the quality of American urban life, a police commissioner of Buffalo, New York commented: "In the long run, there must be a sensible system which will protect citizens' rights and still curb the illegal use of firearms, but no one has come up with it yet." The commissioner added, "As to the 'myth' about the National Rifle Association blocking effective gun laws, I hope all gun owners belong to the NRA . . . most members are respectable people who know how to handle arms properly."

Commenting on the same antigun article, the sheriff of Erie County, New York presented a refreshing approach to gun control legislation when he said, "I believe it is important to safeguard that right (to keep and bear arms), but we must also explore every possibility to reduce injury caused by firearms, taking into serious consideration proposals for gun control legislation which encourage rather than discourage the safe and proper possession and use of any firearms by all Americans who choose to have them."

Statements like this help correct the confusion created by promotion of the fallacy that banning gun ownership by the law abiding is synonymous with controlling crime.

SUPPORT FOR FISCAL RESTRAINT

HON. HAROLD R. COLLIER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. COLLIER. Mr. Speaker, we have heard from the spenders as they have complained about the President's efforts to keep spending within bounds. It is time that we listened to those who support Mr. Nixon's campaign for fiscal restraint.

One of those who has spoken up for commonsense about the national budget is James A. Dunham, commissioner of accounts and finances for the city of Springfield, the capital of my State. In a recent appearance before the Springfield City Council, he made a very forceful statement in defense of the President. I am inserting it in the RECORD as part of my remarks.

FEDERAL SPENDING

Can a budget of approximately \$268.7 billion be termed a "penny pinching budget" or "Uncle Scrooge"? Of course not.

From all the talk one would not easily get the notion that the President plans to spend \$115.7 billion on "income security benefits" in the 1974 fiscal year. Or that this spending—on such things as old age benefits, medicare and medicaid, aid to families with dependent children, veterans benefits, and food stamps—is up 10% from the current year and 27% from the 1972 year.

Or that the share of the new budget such spending accounts for, 43.5%, is up from 42% this year and 39% in 1972. Or that the share of the budget that goes for most other purposes has been declining. National defense, for example, will account for 30.2% of the new budget, compared with 30.6% in 1973 and 33.8% in 1972.

So as you can see, social spending is still rising.

What the advocates of this resolution do not point out is that the Federal Government has not balanced its budget in the last 40 years. What has been the effect of this?

The Government expects to end the coming fiscal year more than half a trillion dollars in the red.

The total Federal debt is projected to climb to \$505.45 billion by June 30, 1974, from an estimated \$473.33 billion at the end of the current fiscal year.

Interest costs are expected to rise to \$24.67 billion in the coming fiscal year, from \$22.81 billion in the current year and \$20.58 billion in the year ended last June 30. Next fiscal year's interest burden amounts to about 9% of the budget total and is nearly double the \$12.59 billion paid in fiscal 1967, when the debt totaled \$344.68 billion.

Interest on the debt is the third-largest category of outlays in the budget, trailing only income-security programs, and national defense.

In conclusion, if the Congress and the "social theorists" cannot add, then the President must subtract or else our taxes will continue to multiply.

HIGHWAY HEARINGS TESTIMONY

HON. JOHN P. HAMMERSCHMIDT

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. HAMMERSCHMIDT. Mr. Speaker, on Tuesday of this week Clark McClinton appeared before the Transportation Subcommittee to testify on behalf of the National Crushed Stone Institute. Clark is a personal friend of mine and a distinguished Arkansas citizen.

He is a past president of the Arkansas Chapter of Associated General Contractors, past president of the Fayetteville, Ark. Chamber of Commerce, past chairman of the Fayetteville Planning Commission, and is now serving as a board director of the Arkansas State Chamber of Commerce.

In my judgment, Clark McClinton's statement is outstanding and I, therefore, want to share it with all of my colleagues:

STATEMENT OF CLARK C. MCCLINTON

Distinguished Chairman and Members of the Committee, thank you for giving us the opportunity to again appear before your committee.

I am Clark C. McClinton, President of McClinton Brothers Company, Fayetteville, Arkansas. I am also Immediate Past-Chairman of the Board of the National Limestone Institute. I am here today to speak on behalf of the National Crushed Stone Institute which is a federation of the National Crushed Stone Association and the National Limestone Institute. The federation consists of almost 800 individual member companies in some 40 states. The members of the two associations are responsible for a great majority of the crushed stone produced in our country. Sitting with me is Mr. S. James Campbell, Executive Vice President of Harry T. Campbell Son's Company, Division of the Flintkote Co. of Towson, Maryland. Mr. Campbell is the Immediate Past-President of the National Crushed Stone Association and also Immediate Past Co-chairman of the National Crushed Stone Institute. All of us—the members of the National Crushed Stone Institute—appreciate sincerely your hearing and consideration of our position on the subject of transportation for this Nation of ours.

Mr. Chairman, I don't believe that anyone in this room, or in this country, for that matter, can deny the outstanding success we have had with our Interstate System. It is very difficult to put a yard stick to this success because the benefits this Nation has reaped since its undertaking have been varied and tremendous. I think the committee will agree that the most important result of the Interstate System has been the thousands of lives which have been saved—modern roads do save lives—and when measured in millions of passenger miles traveled, the fatality rate of the Interstate System is less than half that on the rest of the road and street network.

Economically the Interstate System has been good not only to the Nation as a whole but also to local areas as well. In a recent study undertaken for the Federal Highway Administration, it was shown that National Interstate expenditures of \$2.6 billion annually have resulted in the generation of approximately 655,000 jobs and more than \$7.5 billion in total economic activity each year.

The Interstate System has become an essential and fundamental element of our na-

tional economy. Without Interstate routes, the production, assembly and distribution lines of industry and commerce would be fragmented to an impossible degree.

Mr. Chairman, the history and accomplishments of the Interstate program are indeed impressive; but now, as this success story nears its end with over 80% of the system completed, we must turn our efforts toward our ABC roads. Thousands of miles of these roads, which carry 70% of all highway travel, have been bypassed for improvement during the 17-year effort to build the controlled-access Interstate System. Many have become dangerous and unable to cope with today's greatly increased travel demands. And we are constantly demanding more and more of these roadways. For example, in the 17 years from 1956 our automobile population has grown from just over 65 million to nearly 118 million today. This is an unbelievable increase of over 80%. Also, under national policy prevailing today in regard to railroad transportation, hundreds of miles of track are being abandoned and dozens of rural communities are forced to rely on only one possible mode for their personal mobility and for all of their needs in hauling commodities. That one mode, of course, is the highway system. Since 1956 the railroads have abandoned over 15,000 miles of rail trackage. During that period only one state has shown an increase in rail trackage and that was only 20 miles. Add to this the fact that Penn Central has petitioned the courts to allow it to drop some 5,000 miles of track, and you have what amounts to quite an additional burden on our highways.

An outstanding example of the high price we pay in the lives of our citizens, because of our failure so far to adequately attack this problem, is Highway 27 in Florida, which runs between Miami and South Bay. In 1972 alone, twenty-nine human beings lost their lives on U.S. 27. What is the problem? Well, according to the safety director for Palm Beach County, the only problem is that Highway 27 is a two lane road. Years of pleading and demanding by public officials, private citizens and the news media to "do something" about U.S. 27 brought replies from state highway officials that there wasn't enough money to improve it. The tragic story of "Bloody 27", as it is now referred to, was graphically presented in the Miami Herald of February 18, 1973, and has been reprinted and included as part of this testimony.

Unfortunately this situation is not peculiar to Florida or U.S. 27—similar examples, I am sure, could be found in every other state. I know that out where I come from, we're driving on roads that were engineered and built forty and fifty years ago. Between my home town of Fayetteville and other parts of Arkansas, we badly need improved roads. And unless we do something to correct this deterioration of our primary and secondary roads, and do it now, the problem will continue to compound at an alarming rate.

The Department of Transportation has recognized and documented these needs in its 1972 Transportation Needs Study which it submitted to the Congress. In that report they indicated that the Nation's highway needs would require an expenditure of \$29.6 billion a year to meet the current public demand. And most of that fantastic figure is not for new road construction, but for needed improvements on existing roads.

Mr. Chairman, for the reasons I have outlined, we feel very secure in restating the position we took last year before this committee, that is, we strongly recommend that at least an additional billion dollars be devoted to ABC and Urban Extension systems. We do not feel that this recommendation is out of context with our highway needs. The trend in recent years has been toward a reduction in our Interstate expenditures and

we would suggest that money taken off the Interstate authorization be added to the ABC authorization. Another possible source is the billions of dollars currently held impounded by OMB.

Now I just talked in terms of billions of dollars, and it was easy to do so. It is not easy to understand the significance of a billion—it's not easy for me, it's not easy for most private citizens out around the country. All we know is that it is an awful lot of money, and it scares us to talk about spending that much. It goes against the innate thriftiness of most Americans, and that's one reason for some opposition to highway building. So let me put my point in a language and location which I do understand and which people out in the towns and cities of this country understand. This fiscal year, about \$9.9 million in Federal money is being spent in Arkansas on primary roads. This is matched on a 50/50 basis by the state, so we will have almost \$20 million total for those roads. Arkansas has 10 highway districts, so we have an average of less than \$2 million per district. Well, no matter where you go in Arkansas, the most of an upgraded primary road you can get for \$2 million is seven or eight miles. In most cases, furthermore, that is only a two-lane road. The point is, gentlemen, a billion dollars has not and will not buy much upgraded ABC road when looked at on a 50-state basis.

We have continually gone on record in support of adequate funding of our highway program so that we can meet the tremendous needs I have outlined. At our January convention the Board of Directors of the National Limestone Institute adopted a resolution which I believe would be appropriate to have inserted in the record at this point. The substance of this resolution was also adopted by the National Crushed Stone Association at their annual convention.

RESOLUTION

Whereas, American highways are a major and vital segment of our Nation's total transportation system and provide the greatest flexibility in the movement of people and materials within our mobile society; and

Whereas, the Federal-aid Highway Program was established by Congress in 1956 to initiate an ongoing program of highway development and to share with the various local governments the financial obligations necessary to secure an adequate highway transportation system in all sectors of our country; and

Whereas, the investment of funds in the Federal-aid Highway Program has perhaps generated more dollar movement in our economy through increased employment, greater industrial production and a heightened demand for goods and services throughout our economy, and has been financed entirely by a system of user taxation; and

Whereas, there still remains a tremendous need for highways to connect our major metropolitan areas and their suburban communities and outlying towns and villages, and for the improvement and upgrading of the already existing highways to a condition such that they can be used safely and efficiently by modern motor vehicles; now therefore

Be it resolved by the Board of Directors of the National Limestone Institute, Inc., this 17th day of January, 1973, that this Institute affirms its resolve to support and work for a Federal highway program that will most adequately serve the needs of all the American citizens; and

Be it further resolved that this Institute urges the elected representatives of the people to recognize the unfulfilled need for legislation to achieve implementation and continuation of highway building programs.

Another point to which we would like to address our remarks is that of diversion of

Trust Funds for mass transit purposes. As is well known, the Administration and others have been and are continuing to push hard for diversion of over \$1 billion from the Highway Trust Fund for mass transit use. It is also well known that the Senate last week narrowly passed a similar measure which opens up the \$850 million in the Urban Systems Fund for mass transit. What I find surprising is that they did this after voting an additional \$3 billion for mass transit contract authority out of the General Fund and \$800 million, also out of the General Fund, for operating funds for mass transit. There seems to be no end to the demand for mass transit money and I am afraid that if we do open up the Trust Fund it would only be a short time before they would be demanding and getting a much larger share.

I would like to make it clear that we at NCSI are not against mass transit. As we pointed out in our testimony before the Senate Public Works Subcommittee on Transportation, we fully realize the mass transit needs of our major metropolitan areas. We feel we have recognized those needs by going on record for the establishment of a Mass Transit Trust Fund and are supporting a one cent increase on taxes levied on all transportation fuels to help finance it. We do not see the logic of splitting and therefore weakening the Highway Trust Fund in order to finance two modes when by all standards it is not nearly enough to meet the needs of our highways alone.

Finally, Mr. Chairman, we would like to address ourselves to the immediacy of passing a highway bill. We are all well aware of the fate of last year's highway legislation. The problems caused by failure to pass a bill are reaching epidemic proportions in the states. Several states have had to stop highway lettings due to a lack of funds and by July of this year a total of 37 states will be out of funds. It is plain to see that the important work of providing a highway system so necessary to our economy and way of life is rapidly coming to a halt. This not only allows already dangerous highways to further deteriorate but also escalates the cost of their repair as well as the cost of constructing new roads.

Gentlemen, we strongly urge early enactment of a highway bill that will take us closer to meeting the great transportation needs of our Nation.

MAN'S INHUMANITY TO MAN— HOW LONG?

HON. WILLIAM J. SCHERLE

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. SCHERLE. Mr. Speaker, for more than 3 years, I have reminded my colleagues daily of the plight of our prisoners of war. Now, for most of us, the war is over. Yet despite the cease-fire agreement's provisions for the release of all prisoners, fewer than 600 of the more than 1,900 men who were lost while on active duty in Southeast Asia have been identified by the enemy as alive and captive. The remaining 1,220 men are still missing in action.

A child asks: "Where is Daddy?" A mother asks: "How is my son?" A wife wonders: "Is my husband alive or dead?" How long?

Until those men are accounted for, their families will continue to undergo the special suffering reserved for the rel-

atives of those who simply disappear without a trace, the living lost, the dead with graves unmarked. For their families, peace brings no respite from frustration, anxiety, and uncertainty. Some can look forward to a whole lifetime shadowed by grief.

We must make every effort to alleviate their anguish by redoubling our search for the missing servicemen. Of the incalculable debt owed to them and their families, we can at least pay that minimum. Until I am satisfied, therefore, that we are meeting our obligation, I will continue to ask, "How long?"

MR. AND MRS. HARRY STEVENSON
TO CELEBRATE GOLDEN WEDDING ANNIVERSARY

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES
Monday, March 26, 1973

Mr. WILLIAM D. FORD. Mr. Speaker, on April 8, Mr. and Mrs. Harry Stevenson, of my hometown of Taylor, Mich., will celebrate their golden wedding anniversary. I bring this to the attention of my colleagues in the Congress because the Stevensons are a very special couple.

Both Harry and his wife, Gertrude (Koths) Stevenson, are descendants of pioneer families in Taylor, which discarded township status only a few years ago to become one of the fastest-growing cities in the area.

Harry Stevenson, now 73 years old, worked in Detroit automotive plants until his retirement 12 years ago as a supervisor. During this period, he continued a tradition of public service that had been begun by his father early in this century. The elder Stevenson served as township highway commissioner from 1910 to 1912; his son, Harry, served as township treasurer from 1939 until 1949. In the early 1950's, he was chairman of the local planning commission and served also on the zoning board of appeals and the water and sewer commission.

He has also been active over the years in many civic and social groups in Taylor, and most recently, was the charter president of the Taylor Senior Citizens Club. In 1970, he was named Taylor's "Most Outstanding Citizen" in recognition of his many contributions to the community.

Harry recalls that he bought a Model T Ford in the early 1920's—one of the first in the community—and used it in his courtship of Gertrude Koths, who lived on a nearby farm. After their marriage, they built a home on part of the Koths farm, and have lived there since that time on a street which bears the Koths family name. While serving as township treasurer, he worked with Willard Koths, his wife's cousin, who was township supervisor for several years. Mrs. Koths has also been active in the Taylor Senior Citizens Club.

The Stevensons have three sons, Harvey, Melvin and Gervin, and five grandchildren—and an uncountable number of friends and admirers throughout Taylor and the surrounding area.

I am proud indeed to include this remarkable couple among my constituents—among my friends—and I am pleased to share their life's story with my colleagues in the Congress. I am sure you all join me and the Stevensons' many friends in wishing them a joyous golden wedding anniversary, and many more happy years together.

WHY CAN'T TROOPS COME HOME?

HON. JOHN M. ZWACH

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES
Monday, March 26, 1973

Mr. ZWACH. Mr. Speaker, today, I introduced a resolution calling for the President to vigorously press our NATO allies to assume a greater proportion of the cost of their own defense and to take whatever steps necessary to immediately withdraw 50 percent of our present troop commitment.

Gordon E. Duenow, editor of the Saint Cloud Daily Times, in our Minnesota Sixth Congressional District, recently wrote an editorial on this matter which merits publication in the CONGRESSIONAL RECORD where his views can be shared by all of the Members of Congress and the other people who read the RECORD.

Mr. Speaker, I insert Mr. Duenow's editorial in the RECORD:

WHY CAN'T TROOPS COME HOME?

Apparently we aren't looking for an easy way to cut our balance of trade deficit and at the same time help stabilize the dollar. If we were we certainly could take a close look at troops we have stationed around the world. This is a costly business.

For instance, according to preliminary calculations, it will cost the United States about \$17 billion in fiscal 1974 to maintain a land, sea and air force of some 300,000 men in the European area along with elements in the United States ready for quick deployment there. If this figure is accurate, it would mean a jump of almost \$3 billion in two years. The 1972 estimate came to \$14 billion.

Columnist Bob Considine reported in the Times last week that the Germans still want us there in strength for protection, but they want us in the next town, not theirs.

If cost of maintaining our armed forces in foreign lands continues to go up, Congress may have something to say. In fact, the Senate Democratic caucus last week, by a margin of 6-to-1, demanded broad cutbacks in forces overseas in an effort to slash the balance-of-payments deficit and hold down the federal budget. So maybe something will be done.

The Nixon administration has been standing firm against U.S. troop pullbacks from the NATO area unless there is agreement with Russia and their European allies on mutual and balanced reductions on both sides. Complex negotiations on this issue have a long way to go.

Secretary of Defense Elliott L. Richardson has expressed strong opinions against withdrawing troops from Europe. He contends that a troop pullback might result in a buildup of the West German army and air force to fill the gap with the result that this could disturb other European nations with long memories of World War II.

While standing firm in the European area, the Nixon administration has favored trimming American forces in Asia.

There are 600,000 American troops overseas. It does seem strange that we have to

maintain such a large armed force overseas when World War II has been over for more than 25 years.

LONG BEACH GIRL WINS NATIONAL VFW DEMOCRACY SPEECH CONTEST

HON. CRAIG HOSMER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES
Monday, March 26, 1973

Mr. HOSMER. Mr. Speaker, I am honored to present to the Congress the winning speech in the national Veterans of Foreign Wars "Voice of Democracy" contest.

The winner was Miss Cindie Priddy, daughter of Mr. and Mrs. Kenneth G. Priddy of Long Beach, Calif., and resident of my Congressional District. Cindie was the California State winner in this 26th national contest and the eventual winner over more than 500,000 other entrants across the Nation.

She is an A-student at David Starr Jordan High School in Long Beach, active in athletics, a former Foreign Exchange Student, and president of the school's Cosmopolitan Club.

Cindie's prize-winning talk, "My Responsibility to Freedom," reflects her deeply held belief in the future of the United States and a commitment to preserve and protect our freedoms.

She received a \$10,000 college scholarship from the VFW and its Ladies Auxiliary at a banquet here in Washington hosted by Vice President Agnew.

It is my pleasure to include in the CONGRESSIONAL RECORD at this point her outstanding talk.

MY RESPONSIBILITY TO FREEDOM (By Cindie Priddy)

This past summer, I spent two and one-half months in Denmark as a foreign exchange student, living with a Danish family. Fantastic would be a very mild adjective to describe the summer I experienced. But of all my memories, one stands out as kind of special. And I'd like to share that with you now. There were 148 of us together on a charter flight from Copenhagen to New York City and we of course had to go through customs upon entry into the United States. After having such a fantastic summer I think you can appreciate the feeling of misgivings some of us had about coming home. But you know, even as depressed as I was; as the plane circled over New York prior to landing a chill began to run down my spine. Below me, just a few 100 feet was the United States. After what seemed an infinite amount of time, the wheels finally touched the ground and I thought to myself, "I've made it; I'm home." But the best was yet to come. As we walked down a long corridor, we neared the customs inspection center where there were flags outside of the doors. As I caught my first glimpse of an American flag I felt the excitement mount inside me and I knew that this was to be the climax of my summer.

Now I could sit down and analyze this feeling that I had and come up with some very complicated, intelligent sounding answers as to symbolism and so forth. But the simple fact is that I really got charged up when I saw the American flag on American soil for the first time. Maybe it was a sense of pride, a calling out saying; "This is my flag . . . and this is my country." But whatever it was, when I look at an American flag now, I look at it through different eyes. And

when I'm given the honor of saying the Pledge of Allegiance, I'm proud.

But what you may wonder, does all this have to do with "My Responsibility To Freedom?" To me the American Flag stands for a very special kind of freedom. The kind of freedom that over 580,000 American men have died for in the Revolutionary War, two World Wars and Korean War; not to mention the hundred of thousands that have died in other smaller scale conflicts. These men died not only for their flag and country but for the freedom they both represent. Now if even one man can give his life for this freedom we have, doing it in the name of his country and flag then I should surely strive to take pride and show respect to my flag.

But this is only part of my responsibility. I could sit all day long and worship a flag but that would not insure this freedom that so many have bravely and sometimes vainly fought for. No, although showing pride and respect to my flag are part of it, there is still a much greater part remaining; the responsibility of not being satisfied with the status quo.

We must not and will not allow ourselves to become idle and satisfied with the way things are. If you say that our government is no good and we are not really as free as people say we are then we must strive together to form a better government and freer freedom. We must not be satisfied with wide extremes of poverty and wealth. If a man cannot honestly feed himself then we must help to feed him. If a man is true in his desire to work and be helped, then we must help him. If a man is sincere in his desire to become educated, then we must educate him.

You may have noticed that I have changed to WE instead of I, that's because "My Responsibility To Freedom" is your responsibility to freedom. For you see my friends freedom cannot run on hunger, idle desire, or illiteracy. Broken dreams are not mended by one but by many. I remember a verse that says "One man working alone can do many things; many men working together can do anything."

"My Responsibility To Freedom" is to show honor and respect to my country and flag so that those who fought and died will not have done so in vain; to work with my brothers and not become idle and satisfied with what has already been done before me; to hope that someday my sons and daughters will know a freedom and peace even sweeter than this one, always keeping in sight that freedom is a privilege and not a right; always working for the birth of a new freedom for the sons of men not only in America . . . but everywhere.

ATLANTA LEADERS CALL FOR CONTINUATION OF OEO, COMMUNITY ACTION

HON. ANDREW YOUNG

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. YOUNG of Georgia. Mr. Speaker, on March 5, under the leadership of Vice Mayor Maynard H. Jackson and Alderman Marvin Arrington, the Atlanta Board of Aldermen adopted a resolution calling upon the President of the United States to continue the U.S. Office of Economic Opportunity and the Community Action Program pursuant to the Economic Opportunity Amendments of 1972. Mayor Sam Massell signed the resolution on March 9.

Our OEO program, Economic Oppor-

tunity Atlanta, and the community action services in our city have been of great value to the thousands of impoverished people they have reached. Poor people have been meaningfully involved in such efforts as Headstart, legal services, manpower training, and economic development. Now these efforts are threatened with cruel and unwarranted extinction.

The action of the leadership of the city government in Atlanta is one more example of nationwide concern and protest against elimination of OEO and Community Action programs. The resolution is as follows:

RESOLUTION BY VICE MAYOR MAYNARD H. JACKSON AND ALDERMAN MARVIN ARRINGTON
DEPARTMENT OF CITY CLERK,
Atlanta, Ga.

Whereas the United States Office of Economic Opportunity was established in 1964, pursuant to the Constitution and laws of the United States of America, to eliminate the causes and effects of poverty in America by affording the poor themselves maximum feasible opportunity to design programs to deal with these causes and effects and effectively to mobilize and coordinate available federal, state and local resources; and

Whereas the Office of Economic Opportunity is the only major federal agency devoted exclusively to the plight of the poor American; and

Whereas local public officials, poor people and private organizations all over America jointly organized broadly based local community action agencies which were recognized and funded by OEO; and

Whereas those community action agencies not only operate headstart, legal services, manpower training and economic development projects and perform countless other services for the poor, but are important and valuable bridges of communication between the poor, local public officials and private agencies and have been instrumental in fostering the peaceful rather than the violent approach to long-standing poverty related problems; and

Whereas President Richard M. Nixon proposes to abolish and is in the process of abolishing the Office of Economic Opportunity and direct federal support to the local community action programs by June 30, 1973, without establishing realistic alternatives for continuation of these functions:

Now, therefore, be it resolved by the Mayor and the Board of Aldermen that we respectfully urge President Nixon that the Office of Economic Opportunity and the community action program be continued pursuant to the Economic Opportunity Amendments of 1972.

Be it further resolved that a copy of this Resolution be transmitted forthwith to President Richard M. Nixon, the majority and minority leaders of the United States Senate and the House of Representatives, the entire United States Congressional Delegation for the State of Georgia, the respective chairmen of the appropriations committees of the United States House of Representatives and the Senate, the House of Representatives Education and Labor Committee, and Mr. Howard Phillips, Acting Director, Office of Economic Opportunity.

LEGISLATION FOR PRISON REFORM

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. KOCH. Mr. Speaker, the incidence of crime continues to mount in our country. Unfortunately, there is no one simple

solution to the so-called crime problem. For, it is a problem whose many facets must be tackled through different programs before we can hope to be free of the criminal activities that engulf our cities.

While we press to eliminate the roots of crime—poverty and social alienation, we must also seek to rehabilitate those who have committed crimes. One area that directly affects such individuals is prison reform. I find this issue so important because of what can be done through the rehabilitation of offenders and the alternative of what happens to such individuals who are incarcerated under brutalizing prison conditions. I have introduced several bills on this subject and I would, at this time, like to bring them to the attention of my colleagues.

H.R. 677 is designed to provide for the development and operation of treatment programs for certain drug abusers who are confined to or released from correctional institutions and facilities. In 1970 the Omnibus Crime Control Act was amended to establish a program for the improvement of States and local correctional facilities. Under this law, grants for the upgrading of correctional facilities are made upon the submission and approval of a plan, meeting certain minimum requirements by a State. This bill adds a new requirement—that States make necessary provisions for the establishment and development of narcotic treatment programs in their correctional facilities and in their probation and parole programs.

Another bill I have introduced is H.R. 684 and is entitled the Family Visitation Act. It has 10 cosponsors, and would give prisoners in Federal institutions a minimum of 12 and up to 30 days of furlough during each year of his or her confinement, subject to his or her good behavior. This decision would be made by the chief executive officer of the institutions to which the prisoner is confined after consultation with the classification committee or treatment team, the mental health supervisor, and the individual's caseworker. Any violation of the furlough privilege would be deemed an escape and subject to penalties under existing laws.

H.R. 685 provides minimum standards for State and local correctional institutions receiving certain Federal financial assistance. H.R. 685 amends the Omnibus Crime Control and Safe Streets Act of 1968 by creating a Federal Prison Review Board. This Board shall establish minimum standards relating to: First, the construction, operation, and administration of correctional institutions and facilities, and, second, the training of personnel and the implementation of probation, parole, counseling, medical, psychiatric, vocational, and other rehabilitative programs with respect to correctional programs and practices. The Board may conduct studies and investigations, consult with Federal, State, and local personnel and hold any hearings which are necessary for the purpose of establishing and periodically revising the minimum standards and to determine the extent to which the standards are being implemented.

H.R. 686 and H.R. 687 both seek to reduce crimes committed by people who are

free on pretrial release, and those who are released after serving a prison sentence. The Pretrial Crime Reduction Act requires that criminal trials be held within 60 to 120 days after arrest. It provides a system of time limits and requires Congress to provide the money and personnel needed to clear up presently clogged dockets. It also establishes improved controls over probationers and parolees charged with crimes of violence. The Correctional Services Improvement Act attempts a sweeping reorientation of existing State and local jails and prisons. The Attorney General would be empowered to build, staff and turn over to the States model correctional facilities. They would be small in size with less than 300 inmates each, and would implement enlightened corrections techniques including work release, school release, and extensive personal counseling. Halfway houses would also be used to ease the transition from prison life back into normal society.

While these bills may not totally solve the crime problem, it is my belief that if passed and implemented effectively, we would be taking a significant step toward the goal which we all seek. I urge, therefore, favorable congressional action on these bills.

NATIONAL HUNTING AND FISHING DAY

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 22, 1973

Mr. KEMP. Mr. Speaker, again this year I was proud to be one of many cosponsors of the joint resolution to declare the fourth Saturday of September National Hunting and Fishing Day. This measure passed both Houses unanimously last year, and Hunting and Fishing Day, September 23, 1972, was celebrated throughout the country as a day of special recognition for more than 55 million hunters and fishermen.

In my own congressional district, the event was celebrated in Marilla by the Allied Sportsmen of Western New York as it was throughout the Nation by officially recognizing the role of America's sportsmen in conservation and outdoor recreation. Hundreds of clubs took the opportunity of this special day to lead the public in a rededication to the conservation and respectful use of our wildlife and natural resources.

Last year this special day was observed in some areas by adapting club facilities for conservation displays and exhibits and by showing conservation movies in clubhouses. Sportsmen's groups were assisted by civil clubs, schools, State game and fish departments, new environment clubs, and garden clubs in raising funds for conservation projects. Some clubs set up facilities to teach young people to shoot bows or rifles, pitch tents or catch fish.

Mr. Speaker, I am pleased my colleagues once again this year passed this measure unanimously to give our hunters and fishermen a special opportunity

to work in their communities with their neighbors and business associates to show the public that the American sportsman is the best friend fish and wildlife ever had.

GREAT LAKES FLOODING AND THE INTERNATIONAL JOINT COMMISSION

HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. VANIK. Mr. Speaker, throughout the Great Lakes Basin, communities and homeowners are suffering from unprecedented high water levels, flooding, and accelerated erosion. On Friday, March 23, and today, Monday, March 26, the Inter-American Affairs Subcommittee of the House Foreign Affairs Committee, chaired by the Honorable DANTE FASCELL, has been holding hearings on the reasons for these disastrous conditions as well as possible solutions.

Because of the intense interest in this subject throughout the Great Lakes area, Mr. Speaker, I would like to enter in the RECORD at this point a portion of the statement which I made before the committee today:

ACTIVITIES OF THE INTERNATIONAL JOINT COMMISSION

Mr. Chairman, Members of the Committee: I am sure that I speak for all my colleagues from the shoreline areas of the Great Lakes when I express my appreciation for your leadership in calling these hearings on the activities of the International Joint Commission.

DAMAGE FROM HIGH WATER LEVELS

I have just returned from my Congressional District. I have seen the fresh toll of damage from Lake Erie's high waters. I have seen devastated homes. One man described how he lost 50 feet of his property last week by flood and erosion damage. He has photographic evidence of where his land was, and where it is now—and he wonders about where it will be before we are through. The fishing industry, the recreation industry, the homeowners all suffer. How can we tell a person whose lifetime earnings are invested in a house washing into the Lake that he built too close to these waters which never before came so high.

The water which navigation so critically needs overwhelms the flooded resident. The erosion going on in Lake Erie today will all have to be dredged out when the Lake will have to be deepened for modern navigation. Preventing erosion now will save dredging later on.

Mr. Chairman, we recognize that there is very little that can be done about this disaster situation today, next week, next month, or even this year. But what this hearing can do is help determine why the situation became so bad this winter—and what we can do to prevent this from happening again.

A MORE VIGOROUS I.J.C.

First of all, Mr. Chairman, from a review of the testimony given by the two I.J.C. Commissioners Friday, I would agree with your statement that it is obvious that a deeper look at the whole situation is needed. Today, I would like to make a few comments about some of the answers given by the Commissioners. I would like to point out some areas in which I believe better planning could

have prevented some of the problems which we are facing today. I will try to point out some areas where man has affected the levels of the Lakes—sometimes with harmful side effects—and I would like to suggest some areas where better control of the range of Lake levels could be obtained. These issues are obviously too broad and too important to be covered in one day. I hope, therefore, that these discussions will raise some questions and ideas which can lead to further hearings and more thorough investigation of the issues involved.

I understand that Commissioner Herter pointed out that he was wearing "two hats"—not just an American hat; that it was a joint commission, a supra-national commission, in which almost all decisions made were unanimous. That is all very nice, Mr. Chairman, but who is looking out for the homeowners of my District and the other Districts along the Lakes? Where was the American representative when the Canadians unilaterally closed the Welland Canal? I would hope that in the future the American Commissioners could be a little more careful of the interests of the American public.

With regard to the question of the closing of the Welland Canal, I understand that the Commissioners said that they "do not want to cast aspersions" as to who was at fault for "the problems in liaison". Well, Mr. Chairman, the closing of the Welland increased the level of Lake Erie. It is increasing the damage to the people of my State. I would like to "cast aspersions"; I would like to know how this happened—and who is going to see that it doesn't happen again.

It seems to me that from Friday's testimony, the authority and the quality of the I.J.C. needs to be up-graded. Perhaps it is time that we had some full-time Commissioners. Perhaps it is time that we carried our full load of Commission responsibilities. I am embarrassed that the Canadians have assumed so much of the work of the Commission, when so much of the potential benefit falls to the American side. It is obvious from the delays in implementing the Ottawa Water Quality Agreement of last year that the Commission is under-staffed. Perhaps a more adequate budget and more adequate staffing will enable it to more adequately do its job. But I also feel that a little more public attention—such as this hearing—will help improve the performance of the Commission.

It increasingly appears that the authority of the Commission may be too limited.

It is time that we establish a Federal agency which could and would provide overall leadership of government activities on the Great Lakes. Since it is vital, by law and by common sense, to coordinate with Canada, an organization such as the I.J.C. is the logical group to take on leadership responsibility. At present, most of the agencies on the Great Lakes—especially the Corps of Engineers—are oriented too much toward navigation interests. What is needed is an agency which will watch out for and balance all of the various competing interests on the Great Lakes. The homeowner and city official deserve the same consideration as the power company and the big ore carrier. Pollution control activities and lake restoration efforts must be increased. The two governments should cooperate on public health issues and the maintenance of water quality.

For too long construction on the Great Lakes has been geared just to protect the shippers and power companies. The suits which have been brought against the Chicago diversion have all been one-sided, for the benefit of power generation and larger ships. It is past time that these interests were balanced against the interests of shore protection and the maintenance of beaches and recreational facilities. Today, ships have been and are being built on the Great Lakes which are so large that they cannot be fully

loaded at normal water levels and can only enter a few selected harbors. These shippers have an interest in high lake levels—but it is time that their interests be balanced against the needs of the shoreline communities.

A properly constituted I.J.C. could fulfill this responsibility to all the people of the region. It is the type of agency that we desperately need on the Lakes.

THE PRESENT HIGH WATER LEVELS: PARTIALLY A PRODUCT OF LACK OF PLANNING

The record high water levels which are causing so much distress are partially a fault of poor planning. In June of this past year, Hurricane Agnes dumped heavy rains on several of the lower Lakes. This followed the period January-May in which 15 inches more rain fell on the lower Lakes than in the comparable period in 1971. It just seems to me that those who study the Lakes for the government should have begun, at that time, to close off the Long Lake-Ogoki diversion, to keep the Welland Canal open, to plan for an early closing of the St. Mary's River. Better planning could have helped. Why was the Welland closed? Why was the first "special" action on the St. Mary's not taken until December 1 and the final necessary action delayed until January 30 of this year?

In their testimony Friday, the Commissioners indicated that these changes would only result in lowering the Lakes an "inch or two". Let me say here that a combination of changes can cause up to eight inches or more change in water levels. In other words, just as pennies add up to dollars, inches add up to feet. Lake Erie is about three feet above normal. An eight inch reduction then becomes quite significant. I might also point out here that the Commissioners said that one of the areas most susceptible to flooding was the western part of Lake Erie. This is because the Lake is very shallow throughout the area. Storm winds can easily whip up enormous waves in what is called a "sucer" effect. Thus in my area, particularly, a two inch increase in water levels can be transformed into an additional four inches in storm wave height. Thus in my area, every inch does count.

POSSIBLE WAYS TO CONTROL WATER LEVELS

In addition to better planning and use of existing controls, I would like to point out several areas where improvements in water controls could be made without undue expense.

LAKE SUPERIOR

For example, water can be diverted from the Hudson Bay Basin into Lake Superior, mostly for power generation purposes. This is the Ogoki-Long Lake Diversion. During high water periods on the Great Lakes, could not this flow of water be reversed. That is, the water could be pumped out of Lake Superior, through the power plants, and into the northern watershed.

CHICAGO DIVERSION

Second, the various court orders and Federal permits governing the Chicago Sanitary and Shipping Canal diversion seem to have grown together into a tangled web of red-tape which now denies us any flexibility in using the Chicago Diversion. I can certainly understand why the various states of the Basin, acting on behalf of their power companies and shippers, would want to restrict the flow of water out of Southern Lake Michigan during low water periods. But none of the States would have any objection now. What must be done, either through Congressional action or through modification of the court orders, is to permit the use of the Chicago Diversion on a flexible basis. When we have a low water cycle on the Lakes, keep the diversion to a minimum. When the water levels are high—and the situation on the Mississippi permits—let more water out. We must break our bondage to

these inflexible court orders which are senseless 50% of the time.

I might add here that the International Joint Commission could have and should have a major role to play in providing for the better use of the Chicago Diversion. The Commissioners said Friday that they have no jurisdiction over the Chicago Canal. Well, from a reading of the 1909 Treaty and the debate surrounding it, that is officially correct.

In fact, the I.J.C. could play a leading role in the rationale use of the Canal. The International Waterways Commission of 1902 recommended limits on U.S. diversions in 1907. The Federal government has intervened in the Chicago Diversion cases on the grounds—among other things—of its interest in maintaining good relations with Canada. Canada has contributed to the discussion in these cases and has even communicated with the Court's special master.

The spirit of the 1909 Treaty and subsequent Canadian objections have played a major role in limiting diversions from Lake Michigan. I would like to enter in the hearing record at this point several passages from Don Courtney Piper's recent study entitled, *The International Law of the Great Lakes*:

"A study of the treaty and analysis of the correspondence relating to the negotiations supports the conclusion that Article II of the treaty accords to the United States the legal right to make a diversion at Chicago, but it does not accord a right to divert an unlimited quantity of water. Canada may object to the diversion if it produces 'material injury' to navigation interests on its side of the line. Two difficult problems thus emerge that engender controversy. At what point does the diversion produce 'material injury' to Canadian navigation interests? The treaty provides no criteria for making this judgment. Second, what legal weight must the United States accord to Canadian protests? The treaty does not provide any guidance."

"Since 1912, when the Secretary of War was asked to permit a diversion greater than 4,167 c.f.s., the Canadian government has consistently opposed any proposed additional diversion of water from Lake Michigan. Its objections have varied but in general they are based on the potential injury to Canadian navigation and hydroelectric power interests."

"In 1926 Canada reminded the United States that 'neighborly goodwill' and the 1909 treaty led to the conclusion that no diversion from one watershed to another could be made without joint consideration and agreement."

It is obvious from a review of the history of the Chicago Diversion that consideration must be given to Canadian feelings on the issue, that diplomacy is required, and that the I.J.C. does in fact have a major role to play in obtaining Canadian agreement to changes in diversion rates.

Now the Canadians are up to their necks in the same water that we are, and I would feel that they would be willing to permit more flexible usage of the Chicago Canal. But in checking, my staff has found that the American side of the I.J.C. has not even raised the Chicago Diversion issue. Mr. Chairman, I feel that the unwillingness to become involved in this issue once again displays a lack of initiative and aggressiveness on the part of the American Commissioners. It is not too late for this issue to be raised, and I would hope that the Committee could encourage the Commissioners to do so.

NIAGARA RIVER

There are other areas where better water level controls could be obtained. It appears that the Niagara River could be modified so that controls could be installed similar to those on the St. Mary's River. The flow of water over the Falls is already carefully regulated.

In addition, there is already a diversionary

canal, similar to the Welland Canal, in existence. This Canal, called the Black Rock Lock, might be modified to permit an additional diversion of water out of Lake Erie. More careful planning of water flow out of the St. Lawrence could help alleviate problems on Lake Ontario.

On Friday, Rep. McClary pointed out that when some of the Lakes are regulated and the others are not, the whole system can become distorted, with adverse effects on the unregulated Lakes.

I feel that a classic example of this is seen in the heavy channel dredging which has occurred between the ore fields of Lake Superior and the ports of Lake Erie. By dredging shipping channels along the upper Great Lakes—and particularly in Lake St. Clair—we have permitted more water to flow out of the upper lakes and into Lake Erie. In essence, we have lowered their elevation—but we have not lowered Lake Erie's elevation. We have not provided a way for that extra water to get out! If one could imagine Lakes Superior, Huron and Michigan as large bathtubs full of water, what we have done is to increase the size of the plug or drain. Thus more water flows out more quickly into Lake Erie and Lake Erie acts as a sink for the other Lakes.

In conclusion, I recommend that the International Joint Commission be given a fresh mandate for action solving the commercial, pollution, erosion and recreational needs of the Great Lakes Basin;

That the Commission be directed to immediately take steps to curtail the rising levels of the Great Lakes, by recommending increased outflow from the Chicago Drainage Canal to its full potential (from 3,000 cubic feet per second to 10,000); that the flow of the Albany River diversion from Hudson Bay be curtailed until the Great Lakes reach a more normal level;

That the American members of the Commission be instructed to develop with the Canadians a range of maximum and minimum levels of the Great Lakes consistent with the needs of commerce, recreation, pollution control and shoreline protection.

LYNDON BAINES JOHNSON

HON. LESLIE C. ARENDS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. ARENDS. Mr. Speaker, Lyndon Baines Johnson was an extraordinary man—an extraordinary Congressman, an extraordinary Senator, an extraordinary President.

I served with Lyndon Johnson in the House of Representatives. I worked with him when he was in the Senate and while he was in the White House. His remarkable capacity for leadership was always evident.

When he set objectives, he was not to be deterred in trying to reach them. While I saw him at work in many settings, I especially recall observing him in bipartisan leadership meetings. He was a master in any debate or discussion—always a forceful factor to be reckoned with. I was able to cooperate with him on several occasions. Yet, no matter how much we might have disagreed—and we did from time to time—I could never find myself in diminished respect of him.

It was especially interesting to witness Lyndon Johnson as Senate majority leader, and former Speaker of the House Sam Rayburn in action together. Both of

them clearly exemplified a philosophy which they most certainly must have shared—"To be leaders, you must lead!"

I was in attendance at President Johnson's burial in Texas. Being there for that service, I could truly understand why Lyndon Baines Johnson loved his native Texas, his beautiful home along the Pedernales, and the people who were his neighbors. It was from there that he drew his great strength, the strength which made him a skillful leader whose indelible print is left upon history.

TRIBUTE TO OUR FIGHTING MEN

HON. ROY A. TAYLOR

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. TAYLOR of North Carolina. Mr. Speaker, now that the U.S. participation in the Vietnam war has almost ended and our prisoners are returning home, it is a fitting time to express our appreciation for their sacrifices and to let them know that we are proud of the courage with which they have endured a difficult and unpopular war.

The sacrifices these prisoners have been called upon to make have been made with deep respect for America. We should be grateful as a nation for their service and total dedication to God, family, and country. We know that these men will be facing many problems in the future months and years ahead in adjusting back to normal life. We must be ready not just to welcome them back, but to be willing to lend a helping hand at many points along the way as they return to the land they love and to which they sacrificed so much.

I have written or called each of the prisoners residing in the congressional district, which I represent, to let them know that I and my office will be available to them for any assistance that can be provided in resolving problems.

As we welcome back and pay tribute to our prisoners of war, who have served their country under difficult circumstances, let us not forget the more than 1,300 men still missing in Southeast Asia and the continued bravery of their families; nor the more than 46,000 Americans who made the supreme sacrifice; nor the 200,000 others who have been wounded, many of whom are in our Veterans' Administration hospitals. By the sacrifice of these men in a strange land in behalf of an alien people, they have helped strengthen the position of the free world.

I have been pleased to note that some of the counties and towns in my district are celebrating the return of our prisoners of war and are planning future programs paying tribute to those who are wounded and missing in action, and killed in action.

In some parts of this nation among some people it is not fashionable these days to honor our fighting men. These people have been so much against the unpopular war in Vietnam that they show no appreciation to the men who

served there. The very word "patriot" has almost disappeared from respectable use. It has somehow become sophisticated and liberal and altogether cool to dwell incessantly upon the tragic mistakes that are a part of any war, but thank God, I believe that the people of western North Carolina know what the word "patriotism" means and realize that this country is truly a great country.

THE CONFEDERATE MUSEUM ON BERMUDA

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. RARICK. Mr. Speaker, on the corner of Kings Square and Duke of York Street across from the Town Hall in Saint George, Bermuda, visitors find a well-kept building bearing the sign "Confederate Museum."

Few descendants of Americans, even those of the Old South, are aware of this museum or its bold reminder of the past from over 100 years ago.

During my recent trip to Bermuda, on nearby Featherbed Alley, I noted an old antique print shop operated beneath a main museum. The gentleman in charge was a Mr. Frewen, who resorted to his notes to refresh his memory.

It seems that history records that the English were disposed to tolerate gentlemen of the Confederacy so long as cotton or coin were made available for Enfield rifles powder, and the like which were needed for the South.

So the United Confederate States assigned a council to Bermuda, a Mr. Bourne, who took up residence at Rose Hill, now Globe Hotel. The charges d'affaires and chief Confederate agent in charge of blockade running was Maj. Norman Walker and his wife from Mississippi. Major Walker must have been a most dedicated and efficient man for the Southern cause since his record was of 2,054 attempts to run the Union blockade. He was successful on 1,735.

Another Confederate officer was a Lieutenant Chapman of the Navy, whose assignment was to import a custom-made seal and printing press from England to Bermuda and into the Confederate territory. Not until the fourth attempt to run the blockade was Lieutenant Chapman successful in getting the seal through to Wilmington, N.C. In 1912, the seal was placed in the Richmond museum.

The printing press never got to America and seems to have disappeared for a while, only to turn up when purchased at a public auction by John S. Dowell. From all reports, the press is now owned by Sir John Cox of Orange Grove Valley, Bermuda. A duplicate seal for the press had been obtained from England after Mr. Dowell came into control.

Major Walker did most of his work in the rooms above the present Confederate Museum and while it is reported that he left a detailed diary which should prove

to be interesting data and facts, unfortunately, the present whereabouts of the diary is uncertain.

Perhaps the most interesting yarn on Mr. Walker is this—a loyal Mississippian, the major had sworn that his children must be born on Mississippi soil. Unable to get his wife off Bermuda, he imported two barrels of Mississippi dirt and placed it under the bed on which his child was born.

A brief report on the Confederate forces being present at Bermuda is reported in a pamphlet by David F. Raine entitled "A Guide to the Historic Towne of St. George, Bermuda," published by Pomano Publications, "Lazy Corner" Flatts, Bermuda.

I insert the relevant portion of the Guide in the RECORD, as follows:

THE TOWN AND THE CONFEDERATE FORCES

When the American Civil War broke out on 12th, April 1861, it was almost inevitable that many Bermudians would sympathise with the Rebels. Strong economic and social ties were, after all, traditional with Virginia and her allied states. Therefore, when President Lincoln announced a blockade against the Confederate coast, the town of St. George soon became a focal point in the gun-running between Europe and the South.

These operations were directed from the kitchen section of the old Government House of Samuel Day. Built in 1699, it became the Headquarters of Major Norman S. Walker—Chief Political Agent for the Confederate States in Bermuda. Major Walker was dispatched to Bermuda in order to act as negotiator and supervisor of the blockade runs and, through the town, European guns, ammunition, clothing and money readily began to pass.

Major Walker worked in the main upstairs room of the building—now called "The Confederate Museum". His wife, Georgina, cooked their food in the nearby kitchen and they slept in an adjacent room. From his "office", he studied details of the war's progress, held conferences with suppliers and shipping agents, and wrote numerous letters and reports. Outside, in St. George's harbour, gun-running vessels—such as the "Fergus" and "Robert E. Lee"—became frequent visitors.

Since the prices of the goods were prone to wide fluctuations, he had to bargain for virtually each cargo individually; when the costs were extremely high, he consulted with his superiors in Georgia and awaited their decision. The price of one Enfield rifle, complete with bayonet, scabbard, ram-rod and snap-cap, stood at 80 shillings in 1863; but the price was by no means fixed and the next shipment would have to be renegotiated. It was Major Walker's task to arrange payment and shipping of the goods, either directly to the mainland or else down to the Bahamas for re-routing to other Rebel ports.

From here, he also tried to secure loans and credit-notes, for the Confederate armies. The conflict was, in fact, destined to cost the Southerners a grand total of \$3000 million—some of which passed through the hands and diplomacy of Major Walker.

At the conclusion of the war, Norman and Georgina Walker remained in Bermuda for a while and then eventually returned to America. The old Headquarters, however, still contain relics of his activities in St. George. There are buttons, badges and Confederate monies; bills and correspondence. Across the bannisters of the stairs which he had so often climbed a Rebel flag droops in grim remembrance of the defeat.

For the Confederate States, Bermuda's involvement was a vital link in their support system. For the privateers of these islands, it was an occasion to acquire additional wealth.

SOMETHING VERSUS NOTHING

HON. HOWARD W. ROBISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. ROBISON of New York. Mr. Speaker, the efforts of our President to cut back on Federal spending are certainly to be applauded, and though I may not agree with all that he has proposed or with the extent to which he wants to cut some existing Federal programs, I have seen little in the way of serious alternatives proposed. This dilemma is well expressed in the following timely editorial taken from the March 9, 1973, edition of The Evening Press, published in Binghamton, N.Y., in my congressional district.

I am often impressed with the thoughtful, to-the-point opinions expressed by this paper, and the following is no exception. I commend "Something Versus Nothing" to my colleagues' attention.

SOMETHING VERSUS NOTHING

One of the sounder principles of politics is that you can't beat somebody with nobody. It carries over into the area of political thought. You can't that is, beat something with nothing.

And that, it seems to us, is the predicament congressional Democrats have reduced themselves to in the Great Spending Debate of 1973.

Whatever else the Nixon Budget for next year represents, it also is a carefully conceived economic plan designed to alter or eliminate a good many of the Democratic programs that have grown up over the last 40 years.

The Democratic response to all of this has been discouragingly simple: Put them all back. Make the government keep on doing what it has been doing, no matter how useless or discredited.

The President, as it happens is on fairly sound ground in contending that many of the programs, especially those created in the '60s, failed in practice. Some, however, did not, and there probably are others that could be rescued with a little patience.

This isn't what the Democrats are saying, though. They apparently are unwilling to concede that any of the programs have been demonstrably unsuccessful, and then suggest an alternative approach.

In any event, political roles have been reversed. Democrats have become defenders of the status quo, whether it deserves defending or not. Republicans, thanks to Nixon, have become the innovators.

There has been no inclination on the part of Democrats to suggest that federal spending should be higher than the \$268.7 billion proposed by the President, or even to argue that the projected \$12.7 billion deficit is not about the right size.

National Democrats content themselves with insisting merely that the federal government keep on doing anything and everything it has been doing since Franklin Roosevelt came to office in 1933.

Democratic leaders at the state and local level are concerned for the most part only with whether their constituencies are getting an appropriate share of the federal pie.

All of this adds up to a position of sorts, but it hardly represents a policy, a clear alternative to the Nixon proposals.

There has been no effort, as an example, to question whether Nixon's revenue sharing approach will work in the fashion that he contends, and, for that matter, whether it is a particularly good idea anyway.

There has been no serious Democratic effort to suggest that a modest rise in the income tax would be an appropriate response to the harsh arithmetic of a federal budget that must pay heed to strong inflationary pressures at a time of rising economic activity.

The Congress has shown no inclination to draw up its own order of spending priorities to meet that of the President.

The Great Spending Debate thus is no debate at all. We are never going to know whether Nixon's answers are the right ones, largely because the Democrats don't have any counter-program, except of course, to keep on doing everything we have been doing for 40 years.

WHAT'S WRONG WITH THE U.S. POSTAL SERVICE?

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. HAMILTON. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include my March 26, 1973, Washington Report entitled "What's Wrong With the U.S. Postal Service?"

WHAT'S WRONG WITH THE U.S. POSTAL SERVICE?

Even the President has complaints about the mail service. Recently he sent a special congratulatory message by mail to a 175th anniversary celebration in East Windsor, New Jersey, and it arrived six days after the celebration.

Any Congressman can tell you that a brief stroll down Main Street in any town in his District will bring a few complaints on the postal service, like these:

Too much mail takes too long to reach its destination.

Some mail never gets delivered—it just "disappears."

Mail pick-ups are being cut.

Too many packages are damaged or ruined when they reach their destination.

Mail delivery is erratic and undependable.

It is not easy to determine just what the reasons are for the deteriorating service. Some experts point to these factors:

More mail with fewer postal employees to handle it. A freeze was put on hiring, reducing the work force by 40,000 in the last year.

Morale among postal employees is at an all-time low. Understaffing and unrealistic work loads have caused much friction, and labor-management relations are jagged.

Experienced postal managers and postmasters have been lured into retirement by bonuses, and the new postal executives, accustomed to private business, have not managed the postal system well.

Transportation problems abound. Railroads no longer carry much mail, and air transport has low priority.

At the heart of the problem is the question whether delivering mail in this country is a business or a service, and the relationship between costs and service. In recent months the U.S. Postal Service has viewed it as a business, sharply reducing costs in response to the Congressional mandate for the Postal Service to pay its own way in time. But, as costs are reduced, service deteriorates, the public becomes dissatisfied, and the pressure builds for better service. The Postmaster General has recently said the Postal Service may have "lost track of service in its quest for reducing costs."

I believe the key to improved service is to view the Postal Service not as a business, but

a service to be conducted in a businesslike fashion.

The more familiar one becomes with the size and complexity of the postal system, the less strident his criticisms are apt to be. The Postal Service is the largest enterprise in America, with 680,000 employees, 41,500 places of business, and handling 90 billion pieces of mail a year. Delivering mail efficiently at a reasonable cost to every home in America is a staggering task. In the "good old days," the mail service enjoyed, in the words of the Washington Post, "cheap labor, a widespread system of passenger trains, and an uncritical political climate that tolerated deficits in the name of public service and national unity." The postal system's problems stem from the absence of these factors.

Some improvements are being made. The deficit has been reduced from \$204 million in Fiscal Year 1971, to \$175 million in FY 1972; revenues were up by 18.3 percent, a postal rate increase was cancelled, and employee productivity climbed. The Postal Service has begun a \$400 million effort to modernize and rebuild its physical plant (28 new processing plants in 1972-1973), to install automated mail-handling equipment, and to make efforts to speed mail delivery (average time for delivery decreased from 1.7 to 1.6 days between 1971 and 1972), and to protect parcels from damage. But for every report of progress there is a refutation, and the complaints continue.

The Congress must keep a sharp eye on the quality of mail service and exert pressure on the postal managers to achieve excellent service. Every avenue of improved service must be explored, including better labor-management relations, high speed mail processing equipment, modernization of facilities, a top-flight management team, improved transportation, and good working conditions for postal employees.

Better service will not come easily, but it must come, because it is vital to the unity and the prosperity of the country.

FIFTY-FIFTH ANNIVERSARY OF BYELORUSSIAN INDEPENDENCE

HON. WILLIAM S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. BROOMFIELD. Mr. Speaker, yesterday was the 55th anniversary of Byelorussian independence. Accordingly, I rise to pay my respects and to express my admiration to the brave people of Byelorussia on this solemn occasion.

I say solemn for March 25 is not celebrated in Byelorussia. Soon after independence was declared the Soviet Union invaded and forcibly incorporated Byelorussia into the Soviet Union. No rhetoric, no rationalization, no alteration of history can excuse this brutal and savage show of force.

Today, the people of Byelorussia still long for the freedom which they lost 55 years ago. Despite the persistent efforts of the Russian Government to destroy the language and the culture of the Byelorussians, they have maintained their national and ethnic identity. No less than the captive peoples of Estonia, Latvia, and Lithuania, their determination to regain their freedom remains firm and strong.

Byelorussia has throughout her long history endured more than her fair share

of misery. Yet, on that day in March more than 55 years ago, centuries of perseverance against a succession of foreign rulers culminated in the victory of Byelorussian independence.

Measured in terms of history, the years of Soviet oppression that have followed are short indeed. Surely, they are much too short to extinguish the universal desire of all nations including Byelorussia to control their own destiny.

That is why I am confident that someday Byelorussia, like the other captive nations of Eastern Europe, will eventually throw off the chains of Soviet domination and join the community of free nations. At that time, March 25 will once more become a momentous and festive day to be celebrated not only by Byelorussians but by men of good will throughout the world.

RETIREMENT OF THE GREAT PATRICK CARDINAL O'BOYLE

HON. JOHN J. ROONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. ROONEY of New York. Mr. Speaker, on March 2 of this year the country in general, and the District of Columbia in particular, lost an invaluable church and civic leader when Patrick Cardinal O'Boyle stepped down as the archbishop of Washington after a quarter of a century of service. His loss will be felt deeply by those who knew him and by those lives he touched. I am sure all the members of this august body will join with me in wishing Patrick Cardinal O'Boyle peace, happiness and Godspeed in his retirement.

Under unanimous permission heretofore granted me I include at this point in the RECORD an article on Cardinal O'Boyle which appeared in the Washington Star-News shortly after his retirement:

O'BOYLE RECALLS HIS TRIALS

Young Patrick Louis O'Boyle had been warned that when he was ready to take exams to determine his eligibility for entering a Catholic seminary he should do everything in his power to avoid getting Msgr. Connell McHugh as his examiner.

McHugh, although Irish himself, was a decided anglophile. Things could be rough for an Irish lad from Scranton, Pa.

Well, it was the luck of the Irish for Patrick. First of all, the day chosen for his exam was the 4th of July. But, worst of all, who was the only examiner around that scorching day in Brooklyn? None other than the awesome McHugh.

O'Boyle related the story with a twinkle in his eyes yesterday as he reminisced over the career that led him to become the first and only archbishop of the Archdiocese of Washington.

Patrick Cardinal O'Boyle, 76, received word Friday that Pope Paul VI had accepted the resignation he had tendered 18 months earlier, "for reason of age."

The cardinal said that when he entered the room or the examination, the all-business McHugh shoved a Greek New Testament into his hands and demanded, "Read."

"I hadn't read two lines when he yelled to me, 'Stop!' I thought I had had it."

"Who taught you your Greek?" McHugh asked. Young Patrick replied that he had learned it while studying at St. Thomas College in the coal-mining city of Scranton.

"Are you sure your teacher didn't study at Oxford?" McHugh asked. It nonplused the lad. Why, he asked, was there concern?

"Well," McHugh responded, "it seems strange that a young man who was trained in St. Thomas College in Scranton should have an Oxford accent in Greek."

The Oxford accent did it. There is no surer way to the heart of an anglophile than to exhibit an Oxford accent. Young Patrick was on his way to seminary.

O'Boyle's career in Washington has not been without its share of continuing tests. In some of them he may not have fared as well as he did that day before McHugh. But his accomplishments far outweigh the criticism that has been leveled at him.

CONSERVATIVE IMAGE

The cardinal has been pictured as one of the more conservative American bishops, primarily because of his staunch stands on birth control, abortion and church discipline.

Yet, in the area of race relations, for instance, he desegregated the churches and schools he had inherited when he became archbishop 25 years ago.

Aside from the general spiritual tone of the archdiocese, with its 400,000 Catholics in the District, its Maryland suburbs and five Southern Maryland counties, O'Boyle takes considerable pride in the desegregation and race relations efforts.

When he came to Washington as archbishop in January 1948, segregationist policies were being practiced even at St. Matthew's Cathedral, which became the seat of the new archdiocese. And there was strong segregationist feeling in Southern Maryland. Without hesitation, O'Boyle ordered that segregation cease throughout the archdiocese.

60,000 BLACKS

There now are 60,000 blacks who are Catholics in the archdiocese, giving it the fourth largest black Catholic population of the nearly 290 American dioceses.

The archbishop said that of about 1,800 converts in the archdiocese annually, more than 1,000 of them are blacks. The percentage of blacks converting here is second among the U.S. dioceses, he said.

O'Boyle also was an early champion of open housing. One of his major accomplishments was establishment of the Urban Rehabilitation Corp., a nonprofit organization which reclaimed scores of houses for purchase by low-income families.

The archdiocese has been keeping pace with the growth of the metropolitan area, increasing from the 165,000 members when it was carved out of the Archdiocese of Baltimore, to its present level of 400,000. Then it had 74 parishes; O'Boyle has established 47 new ones.

He said there have been 317 buildings erected in the archdiocese since he took over—"all for a spiritual purpose."

"There is no use to put up a building . . . if it is not for a spiritual purpose," he said.

SCHOOLS CITED

There is other evidence of progressive attitudes. "I don't want to toot the horn," O'Boyle said, "but we've closed fewer schools than any other diocese in the country. We are keeping schools open that are a tremendous financial burden to us." Many of them, he said, contain a large number of children from poor families.

The cardinal, who was elevated to the rank in May 1967, also eliminated two orphan's homes when he came to the archdiocese and replaced them with 18 group homes, considered much more effective in meeting children's needs.

O'Boyle's fore, long before coming to Washington, was raising money to aid charitable

causes. When he came here the annual "Orphans' Collection" was netting \$39,000. He has burgeoned the annual fund drive into something which now nets more than \$800,000 annually for charity.

RAISED \$100 MILLION

When World War II ended, just a few years before O'Boyle came to Washington, he became executive director of War Relief Services. Before he came to Washington he had raised about \$100 million in private funds and distributed help to the needy in 48 countries.

Auxiliary Bishop John S. Spence said, "I think it true to say that no worldwide figure helped more nations to recover their independence and more people within those nations to recover their respectability than did the director of War Relief Services."

O'Boyle's sense of helping the poor is reflected in the archdiocese by the fact in the parishes 85 St. Vincent de Paul conferences have been set up "to give instant help to the needy." The Ladies of Charity, he said, also have been strengthened considerably to assist the needy.

It was O'Boyle who inaugurated the drive to raise \$12 million to erect the imposing Shrine of the Immaculate Conception adjacent to Catholic University. This he considers to be one of the landmarks of his career.

STERN HE IS NOT

Notwithstanding the accomplishments—and there are considerably more significant ones—the impression many people have gotten of O'Boyle is that he is conservative and a somewhat austere stern person.

Theologically conservative he might well be—judging by post Vatican II standards. But he is not austere or stern, at least not on the personal level.

It has been his stand on the birth control-abortion issue and his position of holding the hard-line authoritarian Catholic views that have created the image. In pre-Vatican II days his views would have been considered the normal Catholic way of looking at things. They still are the official way.

When "Humanae Vitae," the birth control encyclical, was handed down in 1968, controversy erupted. O'Boyle stuck to what he believed the Pope to be saying, namely that birth control by artificial means was not to be permitted Catholics.

When several of his priests joined the ranks of numerous liberal Catholic theologians and scholars at Catholic University and other institutions, he disciplined them on the ground that they were inveighing against Catholic doctrine which had not changed, despite popular demand that it should.

O'Boyle maintained that in good conscience to the task he had as a prince of the Church he could hold no other view and he could take no lesser action.

OUTSPOKEN ON ABORTION

The cardinal has been the most outspoken of the bishops on abortion. And his position is aggravated by the fact that some of American Catholicism's most liberal scholars teach in his archdiocese—at CU and Georgetown University. Conflicts of the same magnitude ordinarily do not erupt in less pivotal dioceses.

O'Boyle last year celebrated the 50th anniversary of his ordination into the priesthood. He said it was the example of some sisters in his Pennsylvania hometown and of a priest that made him want to enter the ministry.

When O'Boyle was 10 his father, a coal miner, died and he and the other children had to help keep the family together. He worked as a \$3-a-week messenger for Dun & Bradstreet. He also delivered morning and evening paper.

When he became archbishop he adopted the Latin motto "State in Fides"—stand fast in the faith. This, he said, was but a spirit-

ual extension of a cardinal rule he adopted early in his life: "When you've got a job to do, do it."

HE LOOKS AHEAD

So what is O'Boyle going to do now since he no longer is archbishop of Washington but officially the apostolic administrator until the Vatican names his successor?

"Well," he said, "I certainly don't want to be idle. But that's up to my successor. I propose to remain in Washington. The new ordinary is the one who will be in charge. It is simply my office to help him in every way possible. It is my obligation and duty, but I do it even beyond that . . . for the good of the Church."

Might a black become his successor? There is a strong move by blacks and others for this to happen.

"Whoever the Vatican wants to send to succeed me, if he's black or whatever, is fine with me," O'Boyle said.

Has he been disappointed in his tenure as archbishop?

"There have been difficulties, sure, but I can go to bed at night and say I tried my hardest."

"Or I like the way President Truman put it—but you can't quote that one—I did my damndest."

VOLUNTARY ARMY PLANS MEAN HUGE DEFENSE INCREASES WITH LESS MANPOWER

HON. JOE L. EVINS

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. EVINS of Tennessee. Mr. Speaker, Mr. Joseph A. Califano, Jr., formerly special counsel and assistant to President Johnson, has written a most illuminating article in the Washington Post concerning the administration's proposed budget for the Department of Defense for fiscal 1974.

Mr. Califano points out that increased pay recommended to assure a viable volunteer military force is a major factor in the proposed increase of \$5.4 billion in the Department of Defense budget over fiscal 1973. The defense budget goes on from \$76.4 billion to \$81.8 billion while Armed Forces strength from 1968 declines from 3,547,000—3½ million—to 2,233,000—2.2 million.

This analysis of the defense budget points out further that compared to the 1968 defense budget, the 1974 budget request will cost more than 30 percent more although the services will contain 1,314,000 fewer personnel.

Because of the concern of my colleagues and the American people in this most important matter, I place the article by Mr. Califano in the Record herewith.

The article follows:

A COSTLY ARMY OF VOLUNTEERS

(By Joseph A. Califano Jr.)

Lost in constitutional rhetoric and political bickering between the Hill and the White House may be the hope of any serious debate about some of the real choices that have quietly been made in the fiscal 1974 budget. Foremost among these is the decision to achieve an all-volunteer force through pay rates high enough to attract sufficient manpower.

An all-volunteer military is a very expensive proposition, since raising pay at the bottom requires increase in higher ranks and in retired pay as well. As in the case of so many weapons system, the Pentagon has already confronted a cost overrun.

Three years ago the President's Commission on an All-Volunteer Force, chaired by former Defense Secretary Thomas Gates, estimated that an all-volunteer force of 2 million men would cost the nation \$1.5 billion per year more than it was then paying; 2.5 million men would cost \$2.1 billion more.

The fiscal 1974 Nixon budget carefully avoids telling us precisely what the taxpayer will have to put out for the all-volunteer force; it nevertheless contains some interesting figures. The defense budget shows an increase of \$5.4 billion over fiscal 1973—from \$76.4 billion to \$81.8 billion. This increase, the budget message tells us, is "primarily as the result of an additional \$4.1 billion required to maintain military and civilian pay levels comparable to those in the private sector, to raise pay and benefit levels sufficient to achieve an all-volunteer force, to meet normal price increases, and to pay for higher military retirement annuities." The detailed manpower cost explanations are more revealing:

The proportion of the defense budget devoted to manpower costs in all-volunteer force fiscal 1974 will be 56 per cent; in fiscal 1968, the proportion for the combined draft and volunteer force was 42 per cent.

In 1968 manpower costs were \$32.6 billion; in 1974 they will be \$43.9 billion.

In 1968 the end strength of the armed forces was 3,547,000 men and women; in 1974 it will be 2,233,000.

Thus we will pay an additional \$12.3 billion for a military manpower force reduced by 1,314,000 men and women. Put another way, an all-volunteer force 37 per cent smaller than a combined volunteer and draft force will cost over 30 per cent more. True, some of the \$12.3 billion will go to higher retirement pay in line with new pay levels needed to attract the volunteers.

Thus even with a generous allotment for inflation, the nation will be spending some \$6 billion more in fiscal 1974 for only two-thirds of the number of soldiers, sailors, marines and airmen that it had on active duty in 1968.

By design and incentive an all-volunteer army is structured to bring into the armed forces the poor and near poor and to free of even the danger of military service the middle- and upper-middle-class young. The draft never achieved perfect egalitarianism in distributing the burdens of military service, but at least it made the attempt. The all-volunteer concept—and the investment of billions to make it a reality—is consistent with the overall thrust of the administration's budget for fiscal 1974: a budget designed to appeal to the more affluent majority.

It is appalling that so many antiwar congressmen have climbed and stayed on the volunteer army bandwagon. Many have done so because of their revulsion at the Vietnam war and because they can rationalize the concept as providing that only those who "volunteer" will have to go to war.

This is a gross misreading of one of the central historical lessons of the war in Southeast Asia. What turned this nation around on Vietnam was not demonstrations in the street nor the demagogic rhetoric of Delinger, Hayden and Spock. It was, in quite readable political terms to the Presidents who agonized over Vietnam, the realization that the vast middle class of America would not permit their sons to die in a war which they considered meaningless.

MARY CLARK RETIRES AS WELLESLEY TOWN CLERK

HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mrs. HECKLER of Massachusetts. Mr. Speaker, my hometown of Wellesley, Mass., has been extremely fortunate for the past 20 years to have had as its town clerk, Mrs. Mary C. Clark. Mrs. Clark retired from her office this month, and she will be sorely missed. Mary is a longtime friend of mine and well known to thousands of Wellesley residents. She is warm, understanding and thoughtful, and during her two decades as town clerk, she demonstrated an unqualified loyalty to the town. Her competence and integrity have been a constant source of pride to all the people of Wellesley.

Mary has seen great changes in the last 20 years—particularly in election laws. In an article by Nona Dearth in the Quincy Patriot Ledger of January 20, 1973, Mary Clark says:

The changes have created a greater workload but it's worth it—They lead to a fairer and more closely knit government.

We are greatly in need of dedicated public officials, and Mary Clark's career should serve as a model to those of us wishing to perfect the democratic process at all levels of Government. Mary has helped bring Government closer to the people. She will continue to live in Wellesley with her husband Kenneth now that she has retired, and we will all keep in touch with her.

Reprinted below is the Patriot Ledger article:

PROFILE: WELLESLEY'S MARY C. CLARK—20 YEARS AS TOWN CLERK

(By Nona Dearth)

WELLESLEY.—Probably the most respected person in the public eye in Wellesley is Town Clerk Mrs. Mary C. Clark. Her words carry weight, her opinions receive close attention.

A quiet spoken, reserved woman who prefers to remain inconspicuous, she has achieved her position of rare respect through her dedication to the town and her office.

When she retires a week after the election in March, she will have served Wellesley in the town clerk's office for 26 years—six years as assistant to the town clerk and the last 20 years as town clerk. It is obvious that she will miss the town hall at least as much as the town hall will miss her.

TIME TO CATCH UP

"But it is time I get caught up with my family and friends," she says.

Though she has watched the growth of the town since she was a little girl, she still finds it essentially the same friendly, lovely, intellectually stimulating community that it was when she was growing up.

She speaks fondly of the college atmosphere, the shopping facilities, the still gracious residential aspects of the town.

Born in South Natick, her family moved to Wellesley when she was just a few months old. She attended the Wellesley schools and went on for further studies in the liberal arts at the Boston Evening School.

Her devotion to the liberal arts is still a central interest in her life. Art and antiques are her consuming hobbies. She is an expert on the history of art.

"I enjoy the French painters of the 19th century, and I am especially interested in colonial American antiques," she says.

GOVERNMENT FIRST

But, obviously, her major interest for many years has been town government.

When she was still a young girl, she would attend town meetings with her father, James P. Keating, one of Wellesley's early businessmen who started his interior decorating and upholstery firm in 1899.

There were open town meetings then, upstairs in the town hall. The concern of residents, the give and take of discussion and the intricacies of town government held a fascination for the young Mary Keating that has not diminished.

When she decided to go to work, it was natural that she should gravitate to the town hall. She served as an assistant to Town Clerk John T. Ryan for six years, and when he died, she was appointed to fill the vacancy. She ran for the office the following March, won the election and has been re-elected for the past 20 years.

ELECTION LAWS CHANGED

She notes that the greatest change while she has held office has been in the election laws, changes she actively worked for. It pleases her that new residents in the state can now vote without a lengthy resident requirement. And she is especially pleased about the increase in absentee voting.

"The changes have created a greater workload but it's worth it," she comments. "They lead to a fairer and more closely knit government."

An active member of the International Institute of Municipal Clerks for 18 years, she has served on its advisory board and on its membership committee. She has also been secretary of the Massachusetts Town Clerks Association and served on the association's legislative committee.

SPACE NEEDED

For the past two years she has been putting the town's registered voters list on IBM equipment, a task that will be completed by the end of this year.

"That will be a real time-saver, helping to lighten the workload," Mrs. Clark remarks.

Asked if there are any changes she would like to see in her office, the answer is immediate.

"We need more space."

Twenty years ago there were three people working in the office. Today there are five, plus a part time worker—as well as reams upon reams of town records.

And what changes of significance would she like to see in the town government?

"That is a hard one to answer," she says, and pauses reflectively. "I feel Wellesley is well governed. There are very good people serving on town boards and committees. We are very fortunate."

However, she comments, with feeling, what she would not like to see—the town go to a town manager form of government.

"TOO MUCH POWER"

"It is too much power to give a man who is not elected," she states firmly.

Though she describes her job as "full time plus," Mrs. Clark makes it clear that she has not been chained to her desk.

"I have raised a son," she says with a twinkle, "and I am a past president of the Quota Club, for professional and business women, and years ago I was president of the St. Paul's Book Club."

Her son, Ralph Ditano, lives in Washington, D.C. where he works for the National Air Carriers Association. She remarried four years ago, becoming the wife of Kenneth F. Clark, a plant superintendent.

Even though she has enjoyed her years in office, Mrs. Clark is looking forward to more

relaxed years. There will be more time to devote to art and antiquing. There will be time for travel. She has traveled extensively in the United States and has made five trips to Mexico but there are always new places to see.

ENJOYING THE TOWN

And there will be the real pleasure of just enjoying the town she loves—seeing her friends more often, shopping leisurely in the stores she has frequented all her life.

"I do all my shopping in Wellesley," she admits. "It is so friendly and personal. I have known the managers for years, and everything is available."

It is all part of the special aura that is Wellesley. Mrs. Clark believes there are three reasons in particular that have made it possible for Wellesley to maintain its aura even though the population has grown considerably, from 20,876 in 1950 to more than 28,000 today.

"Wellesley has always enforced its very strict zoning laws, it is an educational and residential center and many residents are affluent. That combination produces the special quality of Wellesley," she says.

It is an atmosphere in which one can go willingly into retirement. Mary Clark is looking forward to it.

WELFARE SCANDAL II

HON. VERNON W. THOMSON

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. THOMSON of Wisconsin. Mr. Speaker, every day the Congress delays in enacting welfare reform legislation is another day marked by fraud, waste, and mismanagement of a totally ineffective system of public welfare. A series of articles by two investigative reporters of the Milwaukee Sentinel exposes the waste of an estimated 20 percent of the funds allocated for public welfare in Milwaukee County. Our system is unfair to the honest and needy recipients. It is unfair to the hard-pressed taxpayer. The only gainers in this system are the welfare cheats and the gold-bricking caseworkers who are exploiting a rotten system.

I call the Members' attention to this second installment by Stuart Wilk, one of the two reporters, in which he describes his application for welfare using an assumed name and identification. Within a 20-day period of his application, Mr. Wilk had fraudulently obtained \$145.20 from the Milwaukee County Welfare Department. All of the vouchers, checks, and other benefits Mr. Wilk received were returned upon publication of the exposé.

The article follows:

YOU CAN WALK RIGHT IN

(By Stuart Wilk)

It's true that you can simply walk in off the street and get on welfare in Milwaukee County.

I did it.

Within a 20 day period, the Milwaukee County Welfare Department gave me a series of vouchers, checks and bus tickets worth \$145.20.

[All vouchers, checks and bus tickets issued to the reporter are being returned by The Milwaukee Sentinel to the Milwaukee County

Welfare Department. This project cost the county nothing.]

All it took was patience. The wheels of the county's largest agency turn slowly as they convey clients from section to section and from case aide to case aide.

But basically getting on welfare is as easy as filling out a form and waiting for it to be processed.

Virtually everything on the form that I filled out was untrue. If the department had attempted to verify the "facts" on the application, it would have discovered that I had submitted a false application and was ineligible for general relief.

My experience with the department confirms what many people have believed for years.

Some persons receiving welfare assistance in Milwaukee County are ineligible.

The way the department claims it operates and the way it actually operates are two different things.

Going through the department's intake process can be agonizing and frustrating.

The first step for a single male to get on welfare is to visit the Wisconsin State Employment Service so the department is satisfied that the applicant has made an effort to find a job.

The "effort" turned out to be minimal, merely filling out a form and going through a perfunctory interview with an employment counselor.

My interview took place the afternoon of Jan. 15.

I used a borrowed Social Security card for identification at the employment service and registered under the name on the card.

I later used the Social Security card as my sole identification at the welfare department.

The card states: "For Social Security and tax purposes—not for identification."

Several days earlier I had rented a sleeping room at a rooming house at 1435 W. Kilbourn Ave. I used the Kilbourn Ave. address as my home address.

I never lived at the rooming house, although I showed up several times a week to chat with the landlord.

After going to the employment service, I went to the welfare department to get an application for general relief. I was given a declaration form and was told to return with the completed form before 8 a.m. the next day.

AREA CROWDED

I went back on Jan. 16. I stood in line to drop off my application and was then told to wait for my name to be called.

The waiting area was overflowing with applicants and other persons in various stages of the intake process. There were about 300 of us in all.

The lucky ones found seats. Others—some with infants in their arms—stood, sat on the floor or leaned against walls in various hallways.

Potential clients are given no indication how long they will wait before a case aide sees them. It is usually an eight hour process and applicants often have to come back two or three times.

Most applicants are afraid to go out to eat lunch or even to the rest room for fear that they will miss their call.

CARD SHOWN

The first case aide I saw read through my application and asked for "any kind of identification." She said it didn't matter what kind.

I showed her the borrowed Social Security card.

[This procedure did not jibe with what The Sentinel was later told by Frank Pokorny, financial assistance supervisor and head of the intake division.]

["From everyone who walks in I have to have a driver's license and Social Security

card. We require identification" for all categories of aid, Pokorny said.

[He added that "anybody coming in the front door better be who they (say they) are."]

After the interview, the aide said my name would be called again later in the day.

It was called again—10 minutes before the department closed at 4:30 p.m.

I was told by a different case aide that my file had not arrived from Record Control but that I could get a voucher for a meal. The voucher—for \$2.17—was redeemable at various Milwaukee County restaurants.

I was told to return at 9 a.m. the next day.

I went back on Jan. 17 and waited for my name to be called. It wasn't.

After an hour and a half I walked into the case aide's office.

She was involved in paper work.

"I haven't left my desk yet," she said, adding that my file still had not come back from Record Control.

I asked how often records were delayed. "Oh, it happens from time to time," said the aide.

I asked if it was possible that the record was sent to the wrong worker.

"Oh, I suppose it's possible," she said. "It's not supposed to happen but it happens. A lot of things happen around here that aren't supposed to happen."

STILL WAITING

At 1 p.m. I was still waiting.

The case aide said I could "take my chances" and continue to wait or that I could return the next day.

I said I'd come back later in the afternoon and asked for a voucher for a razor and soap. She issued a voucher for \$1.95 for personal use.

Then she returned to her paper work.

I went back later that day, directly to the case aide's office. She said the file had arrived from Record Control, but that, since I had registered as a nonresident, I had been transferred to another case aide.

[A nonresident is one who has not lived continuously in the state of Wisconsin for a year. If one has lived here for a year but was on welfare during that time—or the state was in some other way supporting him—he would still be considered a nonresident.]

AFFIDAVIT SOUGHT

I was told to wait and that my name would be called by the other case aide.

Later in the afternoon, the other aide called me and said I should come back on Jan. 19 to fill out an affidavit listing my addresses since 1968 and my last two employers.

She asked the name of my landlord so that arrangements could be made for the department to pay my rent. I was given a voucher for \$17.36 for eight days of meals and a slip for four bus tickets, which can be used for adult fares on Transport Co. buses.

When I returned on Jan. 19 I supplied the needed information for the affidavit and signed it.

Except for the Kilbourn Ave. address, none of the information I gave the department was true.

I made up past employers, former addresses, the names of schools.

INFORMATION RECEIVED

I was told by the case aide that my first grant would arrive at my home on Jan. 25. I asked for a clothing allowance and was told to come back on Feb. 1 to get a clothing voucher.

I was given a slip for four more bus tickets and also was given a photo ID card.

At this point I was officially on the Milwaukee County welfare rolls.

[According to Pokorny, however, all general relief applicants must see a counselor on the county's Work Experience and Training Program before receiving a welfare grant.

"I don't give them a sou—not one penny" until they do, Pokorny said.

[In most general relief cases, Pokorny said, a single male will be working within one or two days.

[Asked if this was in theory more than in practice, he responded, "Hell, no! It's in operation!"]

AIDE ARRIVED

I went to my rented room at 8 a.m. Jan. 25 to wait for the case aide to deliver my welfare grant.

Early in the afternoon, a case aide arrived—the fourth I had seen.

He asked my name and handed me two vouchers.

One was for food, to last from Jan. 23 until Feb. 20, made out for \$56.42.

The other voucher was made out for \$5 for personal use.

The aide asked me to sign a form for the request for clothing—socks, underwear and shirts. I signed the form and he left, less than a minute after his arrival.

On Feb. 1, I went back to the department for my clothing voucher. After I had waited several hours, my name was called by still another case aide, the fifth I had seen.

There had been some sort of "mixup," she told me, and it would be too late that day for the business office to prepare a clothing voucher.

She gave me a slip for four bus tickets and told me to return the next day.

When I went back Feb. 2, the clothing voucher was ready, made out for \$12.30, redeemable only at Marcus Discount Store, 1730 W. North Ave.

"You have to go to Marcus Discount," the case aide said.

[But, according to Pokorny, "the worker doesn't specify the name of the store. . . . Usually it (the voucher) is undesignated."

[Sometimes the client will tell the worker that "he usually shops at a certain store so the voucher is made out to that store," Pokorny continued.

[Or, he said, the worker may "suggest" three or four stores if the client does not know where to shop.]

The case aide then gave me a slip for four more bus tickets and I left the department.

Later that day I checked with my landlord to see if he had received a rent check.

He had received a \$42 check and had not cashed it. I bought the check back from him, explaining that I had found a job and would return the check to the department.

[The \$42 was another apparent error on the part of the welfare department.

[According to Pokorny, the maximum rent allowance for a single male living in a sleeping room is \$7 a week or \$28 a month.

"That's absolute tops," said Pokorny, except in cases with "extenuating circumstances." In those cases, the additional rent would be cleared with Pokorny.

[But the case aide said the rent allowance would be \$9 a week or 4.3 times \$9 for a month.

[Even if that formula were correct, the proper amount of the check would have been \$38.70 and not \$42.]

For all I know, I'm still on welfare.

As of Feb. 2, I had received:

A \$42 rent check.

\$75.95 in meal vouchers.

\$12.30 for a clothing voucher.

\$6.95 in vouchers for personal use.

\$8 worth of bus tickets.

Pokorny told The Sentinel:

"No one gets a penny unless he's eligible."

HOUSING MORATORIUM: REHABILITATION

HON. BELLA S. ABZUG

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Ms. ABZUG. Mr. Speaker, one of the housing programs affected by the administration's illegal and unconstitutional moratorium on Federal housing assistance in rehabilitation.

A picture of what this means in my home city of New York appeared in yesterday's New York Times, and I would like to share it with each of my colleagues.

This is what the Nixon program means down at the grassroots. We are not dealing here with abstract figures, but with attempts to provide decent homes for working people and their families.

The article follows:

U.S. FREEZE CURBS REHABILITATION PLAN

(By Robert E. Tomasson)

The efforts of some banks in the city to salvage their mortgages on financially troubled apartment buildings through rehabilitation and resale have been undercut by the Federal moratorium on housing subsidies.

More than two months after the Nixon Administration announced the subsidy moratorium, bank officials say they see no other alternative at present to the abandonment of several rehabilitation projects in the Bronx, upper Manhattan and Brooklyn.

"What you will see now is just more abandoned buildings, more foreclosures and vandalism in many of these neighborhoods," said George A. Mooney, president of the Washington Heights Federal Savings and Loan Association.

However, John B. Maylott, the area director for the United States Department of Housing and Urban Development, indicated that some of the buildings slated for rehabilitation may be granted special exceptions from the subsidy moratorium.

The subsidy program has provided the banks with an opportunity to recover millions of dollars on foreclosed mortgages and it has engendered extensive modernization projects. In the longer range, it has worked to stabilize some neighborhoods, a trend that helped protect mortgages on other buildings that seemed headed toward abandonment by their owners.

The experience of the Washington Heights institution illustrates what has been done. Starting some three years ago, the association acquired 28 apartment buildings in the Mott Haven section of the South Bronx—four of them through foreclosures and 10 when the owners simply turned back the mortgages after giving up on payments.

The remaining 14 buildings, several of them adjacent to the original properties, were purchased from private owners who were apparently on the verge of abandonment or from banks that had foreclosed on the structures.

The buildings, which contain about 1,000 apartments, are around St. Mary's Park, near the Bruckner Expressway and the approach to the Triborough Bridge. While all were classified as structurally sound, the five-story and six-story walk-ups were gradually sinking into disrepair, tenant abandonment and vandalism. Demolition of physically sound housing is often the end result of this process.

The mortgages on the four foreclosed and 10 abandoned buildings totaled about \$1.5 million, a sum that the bank apparently had little prospect of recovering. The 14 other structures were purchased outright for a total of \$700,000.

Today, the 28 buildings, known as the José de Diego-Beekman project, have been transformed into sparkling new apartment houses in which monthly rents average less than \$38 a room.

Many of the entranceways into the original structures have been bricked over and common lobbies have been created for clusters of four or six buildings. The plumbing, wiring and heating systems have been replaced. Elevators and trash compactors have been installed.

Diego-Beekman, which opened almost two years ago, is the largest renovation carried out under Project Rehab, a program begun less than three years ago by HUD to help upgrade poor areas in 10 cities.

During its brief life, Project Rehab has completed, begun or committed funds for the rehabilitation of 75 buildings containing almost 2,000 apartments. Seven other Bronx buildings containing 148 units are still being considered for funding and may be approved for the program, according to HUD officials.

But for 63 Bronx buildings with 1,852 units, three buildings in Brooklyn with 107 units and 28 in Manhattan with 711 apartments, the subsidy moratorium apparently marks the end of hope for rehabilitation. Without Federal subsidies, rents in the renovated buildings would be too high to make renting possible.

Renting was possible in the Mott Haven project only after a complex series of financial arrangements had been completed. When it has assembled the 28 buildings, Washington Heights Savings and Loan sold them to the Continental Wingate Company, Inc., of Boston for \$2.3-million, enough to cover its \$1.5-million mortgages and the \$700,000 it spent buying the 14 buildings on which it had not held mortgages.

"We simply don't have the people to process a complex deal like this," said Richard H. Grant, a senior vice president of the association.

Continental Wingate, a private development company that specializes in the rehabilitation of urban housing, was formed in 1966 by A. Carleton Dukes, a lawyer with extensive real estate experience. The company has been active in Boston, Detroit, St. Louis and Buffalo under a variety of Federal subsidy programs. The Federal moratorium has come as a blow to Continental Wingate.

"Instead of gut rehabilitation, we will now have to look more at other programs, such as the Mitchell-Lama programs, and plans for moderate rehabilitation," Mr. Dukes said.

In Mott Haven, the largest rehabilitation project in the country, Continental Wingate had to coordinate the efforts of private lenders and city and Federal agencies.

It applied for and received a total abatement of city real-estate taxes for 40 years. The abatement will have little financial impact for the city because the original properties had produced only minimal taxes.

Continental Wingate then recruited 30 private investors—individuals and companies—who pledged some \$5-million. The investment provided them with accelerated depreciation, a "tax shelter," which is important to those in high tax brackets.

The city tax abatement and the participation of private investors were dependent upon the guarantee of the new mortgages by the Federal Housing Administration and upon approval for Project Rehab aid.

The Project Rehab subsidies, which total about \$1-million a year for the Mott Haven buildings, reduce the effective interest rate from about 7 per cent to 1 per cent.

The new permanent mortgages for the buildings total \$25-million. The 40-year loans were provided by The Federal National Mortgage Association, the Government National Mortgage Association and a group of private investors.

While officials at Washington Heights Savings and Loan are hesitant about discussing profit and loss figures, Mr. Grant, the association vice president, said that the institution had suffered "a paper loss" of about \$500,000. It was, however, able to recover the \$1.5-million outstanding on the original mortgage.

The bank had been prepared to proceed with the rehabilitation of 14 other buildings containing about 600 units. The buildings, on East 141st Street between Cypress and St. Ann's Avenues, are about 60 per cent vacant.

"We assume this project is dead unless something happens," said Mr. Mooney, president of the bank.

Mr. Maylott, the HUD official who suggested the possibility of special exceptions to the subsidy moratorium, said:

"If any of these projects go ahead, it will be those connected with other Federal programs, such as Model Cities."

Both the completed Mott Haven project and the pending 600-unit program are in the Bronx Model Cities area, he noted.

North of the Mott Haven project—and outside the Model Cities area—nine buildings in the Morrisania section are being rehabilitated in a similar effort.

The structures, which were assembled by the Woodside Savings and Loan Association in Queens, are in the area bounded by 165th and 169th Streets and by the Grand Concourse and Webster Avenue.

Work on the nine buildings is nearly finished, but the Federal moratorium has thrown into doubt the next step of the program, in which 20 more structures would have been renovated.

"I just can't believe the subsidy program will stay frozen," said David Walentas, a partner in Two Trees, the development company on the Morrisania project. "If it does and nothing replaces it, it will mean there will be no more rehabs."

Alexander Frank, the president of Woodside Savings and Loan, said: "We are in some delicate talks with Federal officials and have not given up yet."

GOVERNOR ROCKEFELLER DESIGNATES APRIL AS CANCER CONTROL MONTH

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. KEMP. Mr. Speaker, over 16 per cent of all deaths in the United States are caused by cancer. This dread disease now ranks second on the list of the Nation's greatest killers.

Gov. Nelson A. Rockefeller of my State of New York has issued a proclamation making April 1973 Cancer Control Month. In his proclamation, the Governor points out New York State's long commitment to the conquest of cancer and the part that the American Cancer Society and the world-renowned Roswell Park Memorial Institute play in the war against cancer in New York State.

Although the institute is not in my district, many of my constituents owe a debt of everlasting gratitude to Roswell Park and its director, Dr. Gerald P. Murphy, for their outstanding programs

in cancer research, education, and service to cancer patients. Nobel prizewinners, Drs. Carl and Gerty Cori did some of their early work on carbohydrate metabolism there.

It has been estimated that many thousands of persons needlessly die of cancer because they neglect the warning signs of this dread disease. Governor Rockefeller is to be commended both for his long commitment to finding a cure for cancer and for setting aside the month of April as Cancer Control Month. The Governor honors those involved in the battle against cancer and urges that every citizen learn the potentially life-saving cancer danger signs.

Mr. Speaker, I include at this time for the RECORD Governor Rockefeller's proclamation concerning Cancer Control Month:

PROCLAMATION

Cancer is one of mankind's most vicious scourges. It strikes, in its many forms, both young and old. Currently, it ranks as the second leading killer disease in New York State.

New York State has long been committed to an unrelenting campaign to vanquish this destroyer. One of the primary weapons employed by the state is its world-renowned Roswell Park Memorial Institute, the State Health Department cancer research and treatment center at Buffalo. The Institute and its staff of 2,000 dedicated professionals have been responsible for numerous scientific breakthroughs.

The Institute, employing the latest surgical and technological advances, provides treatment in its 313-bed hospital to more than 4,000 cancer sufferers and outpatient services to an estimated 75,000 people each year. Its director, Dr. Gerald P. Murphy, is a member of the National Cancer Board and chairman of the National Prostate Cancer Task Force.

The American Cancer Society is playing a significant part in the war against cancer in New York State. In addition to numerous educational programs aimed at alerting the public to cancer's seven warning signals, the Society provides invaluable rehabilitative services to cancer patients and the financial support so crucial to the work of researchers and clinicians.

This fine organization deserves the support of every New York State citizen.

Now, therefore, I, Nelson A. Rockefeller, Governor of the State of New York, do hereby proclaim the month of April, 1973, as

CANCER CONTROL MONTH

in New York State.

Given under my hand and the Privy Seal of the State at the Capitol in the City of Albany this seventh day of March in the year of our Lord one thousand nine hundred and seventy-three.

NELSON A. ROCKEFELLER,
Governor.

KOREA GETS MUCH DESERVED CREDIT

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. DERWINSKI. Mr. Speaker, too often in the United States, public opinion tends to rush from headline to headline and the friendship of trustworthy allies is too often taken for granted.

Therefore, I am especially pleased to direct the attention of the Members to an editorial by the distinguished international correspondent of the Copley Press, Dumitru Danielopol, which appeared in the Aurora, Ill. Beacon-News of March 8, 1973, which I believe is a very factual commentary on the Republic of South Korea.

The article follows:

KOREA GETS MUCH DESERVED CREDIT

(By Dumitru Danielopol)

WASHINGTON.—House Minority leader Gerald Ford of Michigan took time out the other day to pay a much deserved tribute to the Republic of South Korea.

Too often, it has been stylish—and disturbing—for Washington figures to minimize the sacrifices of allies, like South Vietnam, South Korea, Greece, Portugal, Spain etc. Listening to some, one would think they were enemies, not friends.

"I take this occasion, to pay tribute to the South Koreans, a gallant people who stuck by us to the very end in the Vietnam conflict," Ford said.

He reminded the House of the vital role they played throughout the war, keeping two divisions, 40,000 men in Vietnam.

"No nation could have had a more capable and willingly ally," he said.

It was high time we gave credit to the Koreans. They fought side by side with the American GIs and the South Vietnamese since October 1965 in a war which was not their own and in a country which was as alien to them as to the Americans.

But the Koreans had one thing in common with their Vietnamese allies: they knew what communism was like. They had first hand experience when Communist armies overran most of their country early in the Korean War.

The Korean contribution in the Vietnam war involved a total of 310,000 men who took part in the fighting. At one time 50,000 Koreans were in action.

It was the first time in the history of Korea that its fighting men went to a foreign war. Their job was to pacify the heavily populated coastal plains. Between Nha Trang and Quang Ngai centering in Binh Dinh province—some 5 per cent of the South Vietnam land space.

Their performance, as might be expected, got no favorable press from Communist or leftist-liberal newsmen.

The Koreans were accused of "paying off" the United States for its military aid. That is so much nonsense. Their troops fought valiantly and bravely under tough circumstances. Some 3,700 were killed (about 10 per cent of the U.S. casualties) and another 8,300 were wounded in battle.

Another accusation brought against the South Korean troops was that they used terror against the South Vietnamese civilian population. The charges were never documented or substantiated, despite thorough investigation by joint American and South Vietnamese missions.

"The Viet Cong don't wear uniforms," one Korean veteran told this correspondent. "When they shoot at you and you shoot back, you are accused of shooting a civilian. That's the vicious nature of a guerrilla war."

During their stay in South Vietnam, the Koreans protected and helped some 4.5 million South Vietnamese. They built 1,755 homes, 357 classrooms, 245 miles of highway. They taught the art of self-defense—the Korean version of Karate—to nearly a quarter million South Vietnamese.

They supplied some \$71 million in Korean products.

"If there have been minor incidents, these must be expected in time of war," said a South Vietnamese official.

Even the critical, liberal Manchester Guardian of Britain concedes that "the Koreans are now going home to a hero's welcome."

"They were assigned some of the most difficult territory to control . . . they fought tenaciously and bravely. . . ."

POLITICAL SOLUTIONS PRODUCE REVERSE ECONOMICS

HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. RARICK. Mr. Speaker, as public attention is being mobilized into opposition to high food prices and energy shortages, many people are irrationally looking for political solutions, to economic questions.

Economists tell us that price is dependent upon supply and demand. If money is diverted through nonproduction into the marketplace, prices must rise. If production does not keep pace with supply, needs and demands, prices must rise. Supply and demand are further upset by well meaning "easy solutions" and government influences which threaten a natural condition.

Supply is dependent upon production. To gain more production people must work and capital must be attracted to increase output by the expectation of profit. The greater the incentive, the quicker production is increased and once supply meets demand prices level off or drop.

Another alternative is to reduce the demand by voluntary restraints and selective buying. But, the powers that exert the pressures of public opinion in our country seek not to solve the problem—not to encourage production, but to stagnate the short supply by imports and threats of price controls.

Reverse economics can only continue to turn our market prices upward and the accepted standards of living that we have achieved, upside down.

Again, we are watching the comforts and pleasures achieved by our free enterprise system being used as a political promise to destroy our system and change our country. There is nothing wrong with our system. The problem is that our system is not permitted to work by those who think a larger dose of socialism will improve on a little socialism.

I insert the related newsclippings, as follows:

[From the Evening Star and Daily News, March 23, 1973]

FARM PLANS DIM HOPE FOR MEAT PRICE CUTS

CHICAGO.—Midwestern cattle and hog raisers say they plan only modest expansions of their herds this spring, indicating that supplies of meat will be only slightly larger by fall and that retail meat prices will be little changed from today's record levels.

Their announced intentions contrast with Nixon administration promises of lower wholesale food prices in the second half of the year that might check the rising cost of supermarket beef and pork.

On the other hand Herbert Stein, chairman of the Council of Economic advisers, said yesterday consumer boycotts appear to

be slowing down the rise in wholesale meat prices.

In a news conference reviewing economic developments so far this year, Stein said that part of the slowing down might be due to an increased number of cattle going to market. But he added that consumers may be making their mark too.

PASSING DOWN PRICES

"So the boycott or consumer resistance, which doesn't necessarily take the form of parades, seems to be having an effect," Stein said.

Meanwhile, the Cost of Living Council announced yesterday that it will require meat processors, both smaller firms as well as the 21 largest meat packers already supervised by the council, to pass on to retailers any decreases in livestock prices.

The council, noting that such a requirement had not been effectively enforced in the past, warned it was going to crack down.

In a related development, the United Auto Workers said it would spearhead a nationwide meat boycott the first week in April to protest the "serious drain on the average American's take-home pay."

"It should be perfectly clear that in Phase 3 as in Phases 1 and 2, the average American family remains the chief victim of the administration's economic policies," said a resolution adopted by 3,000 delegates to the union's special collective bargaining convention, in Detroit.

Grain farmers in the Midwest, following new Agriculture Department urgings and policies, say they intended to plant a lot more soybeans and a little more wheat and corn this spring. This would insure a decline in feed grain prices after the fall harvest.

But this would be meaningless to consumers before the following spring unless there is an unforeseen surge in the number of hogs and beef cattle that farmers begin fattening now to market late this year and early in 1974.

To the great surprise of agricultural forecasters, Mid-western ranchers indicated this week that they are not rushing in to take advantage of today's record high live cattle and hog prices by increasing their herds.

Were they doing so, consumers could expect substantially lower pork and beef prices by Christmas, when this increased supply would pull ahead of consumer demand.

But the indicators farm economists have used in the past to forecast price trends were not working today, and the economists were at a loss to explain why farmers were not being encouraged by high market prices to expand meat production faster.

CONFIDENCE PUZZLING

They were equally puzzled by the Nixon administration's earlier confidence that meat prices would level off and perhaps decline by winter.

Despite a full year of increasingly profitable hog prices, there are only 2 percent more hogs on farms today in the Midwest than there were last year at this time. Hog raisers say they expect to increase their baby pigs by 5 percent in the March-May quarter and by only 4 percent in the June-August quarter.

But with exports to Japan expected to rise and American demand continuing, the economists expect only a slight decrease in wholesale prices that could be passed on to consumers.

The cattle report shows an increase of only 8 percent in the number of animals now on feed, fattening for market. But forecasters are predicting an increase in per capita consumption of beef that would largely offset this rise in supply.

Ranchers specializing in fattening hogs or beef cattle are already operating near the limits of their capacity and cannot put a great many more animals on feed, observers argue.

[From the Washington Post, March 24, 1973]

OIL IMPORT QUOTA CUT SECOND TIME

(By Thomas O'Toole)

Amid growing signs of an impending gasoline shortage, President Nixon for the second time this year relaxed the restrictions on oil imports into the United States.

The President yesterday issued an order from the Florida White House in Key Biscayne abolishing the limits placed on independent oil distributors that allows them to import no more than 60,000 barrels of oil a day.

The chairman of the White House Oil Policy Committee "has found that the national security will not be adversely affected," President Nixon said in a prepared statement. "I agree with his findings and recommendations."

The President's move comes at a time when the Interior Department is deluged with a record 220 petitions for oil import tickets from independent distributors, all pleading hardship. The petitions request imports of more than one million barrels of oil per day.

Under the current oil import policy, U.S. refiners are allowed to bring in 2.7 million barrels of foreign oil a day. The Oil Import Appeals Board is allotted another 60,000 barrels of oil per day for hardship cases, which are almost always small independents who normally get their oil from the large companies.

President Nixon's action yesterday does not affect the 2.7 million barrels a day allotted to the large refiners. What it does is abolish the 60,000-barrel-a-day limit for the hardship cases, in effect taking some of the pressure off the big refiners and putting more oil into the hands of the small independent who say they are unable to get crude oil to refine.

Yesterday's action marked the second time this year that President Nixon has moved to ease the fuel shortage in the United States by easing restrictions on oil imports. The first time was in January when he raised the import quota to its present 2.7 million-barrel-a-day level.

The White House move comes at a time when warnings of a gasoline shortage are cropping up around the country. The White House Office of Emergency Preparedness called on refiners to increase their gasoline output, declaring that oil companies are not producing enough to avoid shortages.

Earlier this year, the industry was jawboned into producing more heating oils and diesel fuels because of shortages of those two distillates. Typically, refineries produce heating oils before the winter season begins and gasoline before the spring motor season arrives.

OEP Acting Director Darrell Trent said gasoline production for the past five weeks averaged 42.5 million barrels per week, only one million barrels more than output during the same period a year ago.

"This increase is not enough to meet the need," Trent said, urging the industry to "immediately increase production of gasoline, both by operating refineries at near to capacity levels and by devoting a larger share of their yield to this product."

The shortage was already a reality to at least two distributors, one in New England and the other in the Middle West. One firm that sells gasoline to 13 service stations around Norwalk, Conn., said it had only one week's supply on hand. Another firm that operates a chain of 25 service stations around Minneapolis-St. Paul, reported it had to close all but six of them because it couldn't get any gasoline.

In Atlanta, the Gulf Oil Corp. told the city of Atlanta that it could not supply diesel oil for the city's buses past April 30. Gulf said its contract commitments will leave it

so short of diesel fuel at that time that it will be unable to supply fuel to Atlanta, with which it has a verbal contract for five million gallons of oil a year.

[From the Washington Post, Mar. 24, 1973]

SOVIETS MAY JOIN U.S. ICE PROBE; DRILLING FINDS ANTARCTIC FREEZE ERA

The National Science Foundation said yesterday that the Soviet Union was considering favorably joining America's deep sea drilling project and contributing \$1 million yearly.

If Russia joins, its contribution would cover about one-tenth the project cost.

The announcement followed by one day the announcement in New York that the project's drill ship, the Glomar Challenger, arrived in Christchurch, New Zealand, with discoveries about the Antarctic.

The expedition found evidence that the antarctic has been frozen at least 20 million years and that the Australian continent broke away from it 50 million years ago.

The frozen period is three to five times longer than had been believed, Dennis E. Hayes of Columbia University and Lawrence A. Frakes of Florida State University said. They were co-chiefs aboard the 400-foot ship.

Core samples taken by drilling into the ice confirmed the theory that Australia was part of the Antarctic until about 50 million years ago. Drilling samples also found traces of natural gas on the sea bottom.

LICENSE TO KILL

HON. LAWRENCE J. HOGAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. HOGAN. Mr. Speaker, I would like to call the attention of my colleagues to a recent article by Dr. Herbert Ratner, editor of Child and Family Quarterly, on the subject of abortion:

LICENSE TO KILL

It's kind of ironic that now that we've ended the killing in Vietnam, we have given the approval to killing right within our Country on a much larger scale. What I think is similar in both killings is that what makes the killing easy is you're not looking into the eyes of your victim, whether you're dropping a bomb from 30,000 feet or whether you're killing in the darkness of the womb.

Everybody recognizes that abortion involves killing and that this means the physicians of the Country will now be doing more killing than curing. It is a sad commentary on American medicine and foreboding for the future once we get started on this path. The original reason for the establishment of the learned profession of medicine was to distinguish real doctors from the sorcerers and witchdoctors who both killed and cured, and there was a basic need for society to make certain their healers weren't killers.

It's very distressing to see a decision, an opinion rendered which is based on data that is factually wrong. From this point of view, I think the justices were propagandized, either personally or by the mass media. As an example, over fifty percent of the women now getting abortions consist of young White women of college age. Contrary to Justice Blackmun's statement, abortion is much more dangerous than normal childbirth for this group both in respect to death and to the complications of abortion—which are very serious like perforation of the uterus, sterility, infection—than normal childbirth.

In claiming that they cannot determine

when human life begins because there is disagreement among scientists is like saying the Blacks and Orientals aren't human beings because in terms of prejudices, this is what some people are still saying. What Justice Blackmun is saying is that if some people decide to call a fish a bird or a man a monkey, for whatever propaganda reason, that just because some people say it, we no longer know the difference between man and monkey. But contrary to Justice Blackmun and his colleagues, all the scientific evidence is in on who is a human being and the answer to what a fetus is can be as clear to the justices as it is to a Montessori pre-school child.

Though I haven't seen the final text, it has been stated that the majority opinion has dismissed the Hippocratic Oath because one scholar has presented as an hypothesis—a tenuous one at that—that the Hippocratic Oath was written by a small religious group of Greeks in the fifth century B.C. who weren't representative of all of the thinkers of the time. What is completely ignored is that the Hippocratic Oath has been accepted and treasured by the profession of medicine for over 2,000 years, and following the Nazi holocaust, was reaffirmed by the World Medical Association in Geneva in 1947.

Certain historian alleged that the German Catholic Bishops and in particular, Pope Pius XII, were guilty of not speaking up against the slaughter of the Jews. It is a similar situation now, in which the Bishops, along with men of other faiths and the general public, are convinced that people are being killed and they have spoken up against what they think is murder. In this case they are told, "Stop imposing your morality on others." The critics cannot have it both ways. They have urged the Bishops and leaders of all religious faiths to speak against the killing in Vietnam, but at the exact same time, on another kind of killing, they tell these religious leaders to keep their morality to themselves. What nonsense!

Personally, I am shaken at the superficiality of the thinking that has gone into what is clearly an opinion that doesn't rise above the utilitarian and the pragmatic. It is also shocking to think, and as the two dissenting justices have pointed out, that the Supreme Court of this Land has introduced this license to kill over the wishes of the public and the majority of legislatures of the Country.

When Supreme Court Justice Douglas wrote a majority opinion dealing with Mineral Springs Valley last Spring, he didn't hesitate to attribute, in the ecological context, personhood to a grove of trees whose preservation he was concerned with. It is clearly a sign of the anti-humanity of the times when the Supreme Court urges personhood for a grove of trees but not for the child in the womb.

MINNEAPOLIS' NICOLLET MALL

HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. FRASER. Mr. Speaker, these days when the suburban boom is threatening many downtown retail centers with extinction, downtown is still alive and well in Minneapolis.

A recent story in the New York Times tells how our city has pumped new life into its central shopping district through the use of an imaginative new pedestrian and transit way, the Nicollet Mall.

I want to take this opportunity to insert the New York Times story in the RECORD:

MALL FOCUS OF DOWNTOWN MINNEAPOLIS RISE

(By Robert A. Wright)

MINNEAPOLIS.—In winter, snow melts upon touching the heated pavement of the Nicollet Mall, the eight-block-long hub of the downtown shopping district, raising small clouds of steam. Even without this convenience, it is unlikely that shoppers here—inured to hard winters—would find weather an obstacle. But, increasingly, shoppers never have to go out of doors, proceeding from auto parking lots to stores, offices and hotels via a network of second-story enclosed bridges.

This so-called skyway system, a kind of above-ground Rockefeller Center concourse, is the latest phase in a downtown revival here focused around the mall—the largest at its completion in mid-1968 and perhaps the most successful in the nation.

Delegations of concerned downtown merchants worried about the flight to the suburbs, including those involved with the proposed Madison Avenue Mall in New York, have beaten a path to the doors of the Minneapolis Downtown Council for advice.

The mall is pedestrian territory, the sidewalks having been extended into the former Nicollet Avenue, leaving just enough roadway to accommodate passing buses, which meander north and south along the gently curving street. Several plazas accommodate art, music and dance shows. One-way streets crossing the mall accommodate auto traffic and provide connections with suburban buses.

A minibus, serving just the mall area, carries some one million passengers a year. Passengers wait for their buses in heated shelters. Instead of the customary brilliance and obstruction of commercial signs, strollers along the mall encounter soft clusters of light, potted trees, flowers, sculpture and decorative fountains. Overhanging signs are prohibited.

Here are all of the city's major department stores—Dayton's, Donaldson's, J. C. Penney, Power's—and a wide variety of specialty shops, restaurants, hotels, banks and office buildings.

The mall cost \$3.8-million to build all of it coming from assessments against property owners in the Nicollet Mall area, except for \$800,000 in Federal Government grants.

"We believe we're the biggest mall in the U.S.," says O. D. Gay, executive vice president of the Downtown Council. "And we're by far the most successful. It's no trick to build a mall in Tampa or Laguna Beach. But we've done it in a cold climate."

Mr. Gay says he cannot calculate the amount of retail sales dollars that the mall has kept downtown and that might have been spent in suburban shopping centers, but, he points out, "there's not a vacant store on the mall."

"From the time the mall was planned to date I can trace over \$250-million in new construction or rehabilitation on the mall or within one block of it," he said.

How has the mall affected stores in the vicinity? Apparently it has improved their business. Howard Parent, the store manager of Three Sisters, an apparel shop at the corner of 6th Street and Nicollet Avenue, who recently moved to Minneapolis from Cleveland, had this to say:

"My wife and I walked the length of the mall, a distance of 10 blocks, between 8 and 8:30 in the evening. What impressed us was all the window-shoppers."

"I don't have to tell you that window-shoppers are potential customers. In Cleveland you don't dare go downtown at night, but here there were people milling around, looking in windows."

"It has made a big improvement for the store," he said. "We use no newspaper ads, just window ads, and it has been very successful. Business has been on the upswing for the past two years. It must have something to do with the mall."

BLACKS AND THE ADMINISTRATION: ADDRESS BY VERNON E. JORDAN, JR.

HON. ANDREW YOUNG

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. YOUNG of Georgia, Mr. Speaker, on March 16 Vernon E. Jordan, Jr., executive director of the National Urban League, made a reasoned and perceptive analysis of the Nixon administration's policies and budget.

In an address to the National Press Club, Mr. Jordan cited the devastating impact the administration's proposals would have on minorities, poor whites, and the society as a whole.

Vernon Jordan and the National Urban League have earned the respect of rich and poor, black and white, because of a constructive, nonpolitical approach to solving urban problems. When Mr. Jordan speaks of the seriousness and urgency of matters before the Congress, Mr. Speaker, I think we should listen. The full text of his speech is as follows:

BLACKS AND THE NIXON ADMINISTRATION: THE NEXT 4 YEARS

In his Budget Message to the Congress, the President once again called for "a new American Revolution to return power to the people." But the Message itself, and the provisions of a federal budget that hacks away at social spending with ruthless intensity, can only be seen as the first shots of a counter-revolution designed to destroy the social reforms of the 1960s.

Indeed, the proposed budget is the blueprint for the conversion of a national policy of "benign neglect" into a policy of active hostility to the hopes, dreams and aspirations of black Americans.

I do not believe this policy is intentional, nor do I believe that it is the product of conscious, anti-black, anti-poor reasoning. Rather it is the by-product of a view of society and of the proper role of government that is incompatible with the implementation of the precious rights won by minorities in recent years. The yawning gap between the philosophy of decentralized government marked by a passive domestic role for the federal Administration, and the effects of such a system on poor people and minorities vividly illustrates how honorable intentions can have disastrous results.

I am reminded of the famous lines by T. S. Eliot: "Between the idea and the reality/Between the motion and the act/Falls the shadow." Today that shadow falls on black Americans, minorities, and on the overwhelming numbers of poor people who are white. It is they who are being asked to carry the burdens imposed by the impending massive federal withdrawal from moral and programmatic leadership in the domestic arena. The shadow that falls upon them is deep and its darkness spreads a blight across our land.

The Administration's domestic policy, as revealed in its budget proposals and in a flurry of public statements, encompasses on the one hand, sharp cuts in spending on social services, and on the other, a massive shift in resources and responsibility from Washington to local governments. These are the two prongs of a pincer movement that entraps millions of Americans.

A brief examination of just a few of the federal actions both proposed and already taken, are enough to indicate that urban America is well on the way to becoming a free

fire zone doomed to destruction by the very forces it looks to for salvation.

In employment, the Emergency Act will be phased out, ending public service jobs for about 150,000 state and city employees, some forty percent of whom had been classified as disadvantaged. Job-creation and training programs already crippled by the refusal to spend appropriated funds, will be cut sharply. A wide variety of federally-backed summer and youth employment programs will be dropped, and special programs for high unemployment areas will be eliminated.

In housing, a freeze has been imposed on federally-subsidized housing affecting hundreds of thousands of low-income families and robbing construction workers of jobs.

In education, federal programs to provide compensatory educational services to disadvantaged children, and important vocational education programs will be dismantled, while day care student loans, special school milk programs and aid to libraries will be eliminated or reduced to a small fraction of their former size.

In health, 23 million aged and handicapped people will have an extra billion dollars torn from them in higher Medicare charges and lessened coverage, while funds for the successful community mental health centers and for new hospitals will be eliminated.

In addition to this listing of horror stories, there are further atrocities—the dismantling of the Office of Economic Opportunity and abolition of its over 900 community action programs; the end of the Model Cities program, and the effective end of urban renewal and a host of other federal programs of community development.

A number of arguments have been advanced to justify the far-reaching changes the new American counter-revolution seeks to establish. Taken together, they recall Horace Walpole's comment about the world: that it "is a comedy to those that think, a tragedy to those that feel."

It is said, for example, that the budget cuts are necessary to avoid new taxes and to control inflation. This neatly avoids mention of the imposition of a sharply increased social security payroll tax that falls disproportionately on the same low-income families that will be hurt most by social service cutbacks. I accept the need for a ceiling on federal expenditures, but I cannot accept the faulty priorities that raise military expenditures by just under five billion dollars while slicing funds for the poor and for the cities. The cost of one Trident Submarine would pay for the public service employment program. The requested increase in funds for the F-15 fighter is about equal to the amounts cut from manpower training funds. Federal disinvestment in human resources reflects an irrational choice of priorities.

Another reason for the cuts is the overly-optimistic view that many of the federal programs are no longer needed. The President himself seemed to be making this point in his Human Resources Message when he said: "By almost any measure life is better for Americans in 1973 than ever before in our history, and better than in any other society of the world in this or any earlier age." And the theme was repeated in the Message dealing with cities, which declared that "the hour of crisis has passed."

I cannot agree. I believe, instead, that the hour of crisis is upon us, and is intensified by the federal withdrawal from urban problems. I would hate to have to explain to a poor black family in Bedford-Stuyvesant that's chained to an over-crowded slum apartment because of the housing subsidy freeze that this is really the best of all possible worlds. I would hate to have to explain to a poor black farm worker in Mississippi that the record gross national product means he's living in a golden era. And I would hate

to have to explain to an unemployed Vietnam veteran who can no longer enter a federal manpower training program that he is being adequately repaid for his sacrifices.

Life in 1973 may be better for some people, but it is not better for black Americans. We are afflicted with unemployment rates more than double those for white workers. Black teenage unemployment is near 40 percent. Unemployment and under-employment in the ghettos of America is from one-third to one-half of the work force. The total number of poor people in this country has risen sharply in the past several years. No. This is no Eden in which we live and we cannot complacently agree that there is no longer a need for federal social service programs.

Another justification for ending some programs is arrived at by a method of reasoning I confess I am unable to comprehend. Such programs, it is said, have proved their worth and therefore the government should no longer operate them. Since they are so good, someone else should do them. I can only suppose that the next step will be to tell the Joint Chiefs of Staff that the armed forces have done such a good job that the federal government will stop funding them.

Another argument—a serious one of some substance—is that some programs have not worked and therefore should be abandoned. Such programs fall into two categories—those that appear to neutral observers to have accomplished their goals, and those that clearly have not been as effective as they should have been.

It is inaccurate and unfair to suggest that the community action programs or the Model Cities programs, to take two important examples, have failed. There is every indication that they have brought a new sense of spirit and accomplishment to many hundreds of cities. By fully involving poor people in the decision-making process they have contributed significantly to urban stability and to individual accomplishment. Federal evaluation studies endorse this view. Local political leadership has also insisted that the programs are successful. For years, the agony of the Vietnam War was justified on the grounds that we had made a moral commitment to the people there. Can we now abandon the moral commitment to our own cities and to our own people?

Some federal programs have been clear disappointments. Some of the housing subsidy programs, for example, were sabotaged not by poor people seeking a decent home, but by some speculators in league with some federal employees. Thus, although thousands of families have been sheltered by these programs; although scandal-free housing has been produced by effective non-profit organizations and although the need for low- and moderate-income housing is pressing, federal housing subsidies have been frozen and appear on their way to an early death. The victims of federal housing failures are being punished doubly—once by ineffective program control, and again by the moratorium on all housing subsidies. Ending all housing programs because some have shown signs of failure makes about as much sense as eliminating the Navy because some new ships have had cost over-runs.

The final justification of the Administration's policies, and the core of the new American counter-revolution, is that federal funds will be transferred to local governments in the form of bloc grants in four major areas—community development, education, manpower and law enforcement. It is proposed that the federal government end its categorical grant programs administered, financed and monitored by federal agencies and that local governments should now decide whether to spend federal monies on job-training or on roads, on compensatory education in the ghetto or on a new high school in the suburbs. This has been called "returning power to the people."

To black Americans, who historically had no choice but to look to the federal government to correct the abuses of state and local governments, that is very much like hiring the wolf to guard the sheep. It is axiomatic in American political life, with some exceptions, that the lower the level of government, the lower the level of competence and the higher the margin for discrimination against the poor and the powerless.

The power that has accrued to the central government is due to the failure of localities to be responsive to the needs of all but a handful of their constituents. Black Americans have looked to the federal government to end slavery, to end peonage, to restore our constitutional rights and to secure economic progress in the face of discrimination. Yes, we looked to Washington because we could not look to Jackson, to Baton Rouge or to Montgomery. White people looked to Washington too, for the federal programs that helped many of them survive the Depression, helped them move to suburbia and helped them to prosper economically. Now that Washington has finally embarked on programs that hold out some hope for minorities, we are told instead to look to local governments notorious for their historic insensitivity to the needs and aspirations of blacks and the poor.

Before falling prey to the siren song of local infallibility, the Administration should examine the use local governments are making of general revenue sharing grants already distributed. News reports from across the country repeat the same dismal story—federal money used to build new city halls, to raise police salaries, and to cut local taxes. All this is taking place at a time when school systems are falling apart, housing is being abandoned, and health needs are unmet. The record does not inspire confidence that lost federal social service programs will be replaced with effective local ones.

General revenue sharing is a fact. It is a reality. Thirty billion dollars is in the pipeline for state and local government. Rather than throw still more money at local governments at the expense of federal programs with proven track records, the Administration should be developing performance standards and effective compliance mechanisms that assure these local programs will work. Folding—or rather, crumbling—federal social service programs into no-strings-attached special revenue sharing packages seems to me to be a prescription for disaster.

Black Americans have been assured that anti-discrimination regulations will prevent local abuses. While the Treasury Department's guidelines have been revised and strengthened, we still cannot take heart from such assurances. They come just a few weeks after the Civil Rights Commission reported the persistence of "inertia of agencies in the field of civil rights," and after the government was subjected to a federal court order to enforce the laws against school segregation. It is hard to imagine that the politically-charged decision to withhold funds from states or cities that discriminate will be made. And without federal standards assuring that funds will be used in behalf of poor people in need of job-training, public housing, and special school and health programs, the money will once again find its way into the pockets of entrenched local interests.

The proposed special revenue sharing approach breaks faith not only with poor people, but with local governments as well. What Washington gives with one hand it takes with the other. Mayors who once hungered for no-strings-attached bloc grants are now panicked by the realization that the funds they receive will be inadequate to meet the needs of their communities and will be less than their cities get in the current categorical-aid programs. In addition, there is the

probability that future special revenue sharing funds will continue to shrink. Rather than shifting power to the people, the new American counter-revolution creates a vacuum in responsible power.

We must not forget, as so many have, that federal programs today do embody local initiatives and local decision-making. The myth of the Washington bureaucrat making decisions for people 3,000 miles away is false. The money often comes from the federal Treasury. The broad program goals and definitions of national needs come, as they should, from the Congress. But the specific program proposals, their implementation, and their support come from local governments, citizens and agencies. Those federal dollars that are now deemed tainted actually enable local citizens to meet local problems under the umbrella of national financial and moral leadership. To shift the center of gravity away from national leadership is to compound the drift and inertia that appear to categorize our society today.

It is in this context that the blast of white silence is so puzzling. Far more white people than blacks will be hurt by the budget cuts. Yet the responsibility for calling attention to their impact falls increasingly on black leadership. There are three times as many poor white families as there are poor black families. The majority of people on welfare are white. Of the black poor, more than half don't get one devalued dollar from welfare. Two-thirds of the families who got homes through the now-frozen 235 subsidy program were white. The majority of trainees in manpower programs, and three-fourths of the people who will lose their jobs under the public employment program are white.

But because black Americans have been the most vocal segment of the population in urging social reforms, there is the mistaken impression that only blacks benefit from them. The Battle of the Budget is a large-scale replay of the fight for welfare reform waged—and lost—last year. Then, as now, black leadership was out front in favor of a living guaranteed income for all. But we had few white supporters, although many more white people than black would have benefited. It is reasonable to ask, had we won that struggle would all of those poor white people have returned their income supplement checks? And it is fair to ask today that white people join us in the struggle to preserve the social services of the federal government that enable them, too, to survive.

The silent white majority that has been the prime beneficiary of the programs of the 1960s and is today the group most in need of further federal services will have to speak up. They are not stigmatized, as are blacks, by charges of special pleading by special Americans looking for special treatment. And their representatives in the Congress will have to act, too. They cannot complacently watch their constituents' welfare being trampled on, nor can they accept the shrinkage of their rightful constitutional role in our system of government.

Already, there have been signs that some Congressmen whose votes helped to pass progressive legislation a few short years ago are now of a mind to compromise with Administration power, to compromise the jobs and livelihood and needs of their constituents, to compromise the power of the Congress to control the purse and to influence domestic policies, and finally, to compromise their own principles. If this is so, it will be tragic for the Constitution, tragic for the country, tragic for the poor people, and tragic for the heritage of liberalism.

The gut issues of today—better schools, jobs and housing for all, personal safety and decent health care—are issues that transcend race. So long as they are falsely perceived as "black issues," nothing constructive will be done to deal with them. White America must come to see that its cities, its needs

and its economic and physical health are at stake. The needs of blacks and whites are too strongly intertwined to separate. As Whitney Young used to say, "We may have come here on different ships, but we're in the same boat now."

So White Americans must join with black people to rekindle the American Dream, and to sing, in the words of Langston Hughes:

"O, let America be America again—
The land that never has been yet—
and yet must be."

LEGAL SERVICES FOR THE POOR

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. RANGEL. Mr. Speaker, the need for legal services for the poor in this country is more widespread now than at any time in the past. But the President has not let this need affect his decision to dismantle the Office of Economic Opportunity, of which the legal services program is a part.

The legal services program has been providing invaluable legal assistance for the poor since its inception 8 years ago. Its 2,500 attorneys represented nearly a million poor people last year.

It is quite clear that the President is not overly concerned about the future of legal services. He has said that he would prefer to see it become an independent corporation so it would be excluded from political pressures. He vetoed such a bill 2 years ago. It is obvious that his real concern lies with constructing a program that would be under his control.

His Acting Director of OEO, Howard J. Phillips, has speculated that funds for legal services could come from individual cities by way of revenue sharing.

The differences in opinion suggest something less than a firm commitment to the survival of legal services.

But there are many people in this country who realize the importance of an independent program that would provide legal services for the poor. I am inserting into the RECORD the following resolution which was passed by the Student Bar Association of New York Law School. It will be a tragedy for America if the proposals they set forth, or similar proposals, are not enacted:

RESOLUTION

Whereas: There is a continuing need for legal services for the poor.

Whereas: There are federally funded Legal Services Programs to meet this need in each of the states.

Whereas: These programs are facing an expanding demand for legal services and increased operating expenses.

Whereas: This Association continues to support the need for adequate legal services to the poor and the need for vital and independent programs to provide this representation.

Now, therefore, it is resolved:

1. The United States government should increase the level of funding of Legal Services programs to enable them to provide adequate legal services to eligible clients and to prevent a serious deterioration of the quality and quantity of service because of increased expense and mounting caseloads.

OXIX—600—Part 8

2. Government at all levels and lawyers from both the public and private sectors should take every step necessary to insure that legal services remain independent from political pressures in the cause of representing clients.

3. The Congress of the United States should enact a legal service corporation of a design consistent with the foregoing principles and the need to maintain full and adequate legal services for the poor.

LET US ACT NOW ON CONGRESSIONAL BUDGETARY CONTROL

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. ANDERSON of Illinois. Mr. Speaker, this Wednesday, March 28, 1973, the House Committee on Rules, of which I am a member, will begin hearings on H.R. 5193 and related bills to restrict the authority of the President to impound funds appropriated by the Congress. While the bill introduced by the gentleman from Texas (Mr. MAHON) is commendable in many respects, the fact remains that it does not begin to come to grips with the problem that has prompted Presidential impoundments in the first place, and that is the inability of the Congress to exercise comprehensive, coordinated and responsible budgetary control. What we are being offered in that anti-impoundment bill is an antidote to neutralize an antidote which many Members justifiably find distasteful; but not only does this antidote not check the spreading poison of irresponsible and inflationary spending which is poisoning our fiscal system; in neutralizing the antidote used by the President it only guarantees the further spread of that poison.

What is clearly needed if we are serious about limiting the President's impoundment authority is a mechanism for at the same time setting our own fiscal house in order—an enforceable budget ceiling. That is the only rational and responsible approach to this problem. I therefore intend to support in the Rules Committee an amendment to H.R. 5193 which would make the provisions of that act contingent upon congressional adoption of an enforceable spending ceiling.

Last fall, in title III of the Public Debt Limit Act, this Congress established a Joint Committee on Budget Control and charged it with the responsibility of recommending appropriate budgetary control mechanisms and procedures no later than February 15 of this year so that these might be applied to our fiscal 1974 activities. Unfortunately, the Joint Committee was only able to make its preliminary recommendations by that date, and on February 27, 1973, Senate Concurrent Resolution 8 was slipped through the House, without prior warning, debate, amendment or a recorded vote, extending the final reporting deadline of the Joint Committee to the end of this session. Thus, any recommendations which finally emerged would obviously have no applicability to fiscal 1974.

I think this extension was a mistake, and to remedy this situation I am today introducing a concurrent resolution authorizing and directing the Joint Study Committee on Budget Control to report by bill or resolution no later than June 1, 1973, its final recommendations with respect to the operation of a spending ceiling for fiscal 1974 and procedures for limiting the impoundment authority of the President.

During our impoundment hearings this week, I intend to urge the Rules Committee to not only adopt the amendment to H.R. 5193 which I have earlier described, but also to report my concurrent resolution as a companion bill. If the Rules Committee rejects that amendment, I will urge that it provide a rule making my concurrent resolution in order as a substitute. This, in effect would postpone House action on impoundment legislation until it is brought to the floor by the Joint Committee as part of an overall budgetary control bill.

At this point in the RECORD, Mr. Speaker, I include the full text of my concurrent resolution along with an excellent letter to the editor from the Sunday, March 25, New York Times from Prof. Alpheus Thomas Mason of Princeton University on this subject:

H. CON. RES. 165

Resolved by the House of Representatives (the Senate concurring), That the Joint Study Committee on Budget Control is authorized and directed to report to the Congress, by bill or resolution, no later than June 1, 1973, its final recommendations with respect to any matters covered under its jurisdiction, provided that such report shall include, but shall not be limited to (1) procedures for improving congressional control of budget outlay and receipt totals, including procedures for establishing and maintaining an overall view of each year's budgetary outlays which is fully coordinated with an overall view of the anticipated revenues for that year; (2) procedures for the operation of a limitation on expenditures and net lending commencing with the fiscal year beginning July 1, 1973; and (3) procedures for limiting the authority of the President to impound or otherwise withhold funds authorized and appropriated by the Congress.

[From the New York Times, Mar. 25, 1973]
THE VIBRATIONS OF POWER

TO THE EDITOR:

President Nixon's impoundment of funds invades a peculiarly Congressional province. Two bills, one sponsored by Senator Ervin, another by Representative Mahon, are designed to restrain him (editorial March 18). The situation is serious generally. Despite constitutionally shared powers, the President has monopolized war-making and foreign affairs. It's about time Congress got its back up.

Separation of powers is a misnomer. National power is inextricably fused, not separated. The principle is "subverted," Madison tells us, "where the whole power of one department is exercised by the same hands which possess the whole power of another department."

In the abstract, Congress has a strong case, but it is difficult to achieve a corrective. Irrked by the President's non-unprecedented action, Congress accuses him of violating separation of powers. When Congress tries to recover what it has lost by acquiescence of executive usurpation, the President raises the same banner. History underscores Presidential aggrandizement. In retrospect, the Sen-

ate's triumph over Willson in 1920 and the come-uppance the Supreme Court dealt Truman in the Youngstown Steel case seem like aberrations.

Successful operation of the separation-of-powers principle depends now, as always, on mutual respect and sensitivity to the requirements of free government. Jefferson held that "each party should shrink from all approach to the line of demarcation, instead of rashly overleaping it, or throwing grapples ahead to haul to hereafter." The self-restraint Jefferson had in mind is not likely to be forthcoming from President Nixon.

The Founders put powerful weapons in the hands of Congress, available for both direct and oblique counterattack. To use them at this critical juncture might seem retaliatory and thus violative of the Jeffersonian prescription. A not-unreasonable reaction may be that we are faced with a condition, not a theory. If, for example, President Nixon persists in withholding testimony necessary for an informed decision on the qualifications of Patrick Gray, the Senate has a heaven-sent opportunity to demonstrate its role, without shrinking an inch from Jefferson's sometimes fuzzy line.

The most dramatic parallel with the present crisis is the 1937 impasse between Court and President. The Court, transcending the line set by the separation-of-powers principle, had become a superlegislature. The President counterattacked with his court-packing threat. The outcome was ambiguous. Both sides won; both lost. The President won judicial acceptance of his program. Congress defeated Court packing. If either had scored outright victory, the separation-of-powers principle would have been "subverted."

Congress itself, like the Court in the 1930's, has contributed to the deadlock. The Justices did so by transforming judicial review into judicial supremacy, Congress by default or surrender of its role. The proposed bills, even without enactment, constitute overdue action, creating the tension that is incident to the balance of national power. Hamilton called "vibration of power" the "genius" of our system. This means preservation of enough tension to discourage any one department from daring to bid for total control.

ALPHEUS THOMAS MASON.
PRINCETON, N.J., March 22, 1973.

THE REAL COST OF IT

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. GAYDOS. Mr. Speaker, year after year the American people were told by the Washington giveaway forces that foreign aid amounted to only a small fraction of the total Federal budget.

As the annual bills were presented, we heard figures of three or four billion and cuts in these down to an even more modest level, if anything it terms of billions could be considered modest.

Then, in 1971 as part of that year's foreign aid act, the Congress demanded that all the giveaway totals be lumped together in one document so the overall costs could be known.

So now we have the real picture of what was taken from our people in 1972 and scattered abroad under one program or another. Total foreign aid spending for that year was a staggering

\$11.3 billion in economic and military giveaways.

With this, then, as the 1972 figure, we only can wonder at what actually was given away in those years of the last quarter century in which foreign aid was in its heyday and generally unquestioned—the years in which our billions were used not only to resuscitate the war-damaged economies of Japan and Europe but to build up our present-day competitors who are preying on American jobs.

Surely, the \$11.3 billion total for 1972 shows conclusively that our people have been taken for a merry ride. And now they are paying an awful price for that experience as the dollar crisis and the recent devaluations document.

Many of the billions of dollars now clogging money markets around the world originally were giveaway dollars, hard earned by Americans and taken from them in taxes for distribution abroad with no strings attached. And, in the most callous of ironies, the giveaway still continues.

When is this thing going to stop? We should have learned by now the bitter lesson that no nation can be recklessly generous and long survive as a solvent, money-sound member of the world community. And yet we persist in the hand-outs as though there were no cuts in our dollar's value, no enormous payments balance against us, no monumental Federal deficits and no unfilled needs at home.

THE 55TH ANNIVERSARY OF BYELORUSSIAN DEMOCRATIC REPUBLIC

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. DINGELL. Mr. Speaker, the philosopher, Schopenhauer, said—

A people which does not know its past is living merely for the time being in the present of the existing generation, and only through knowledge of its history does a nation become truly self-conscious.

Americans with links to eastern European nations which are now submerged under the Red seas of Soviet domination strive to keep alive the knowledge of the roots, traditions, and culture of their ancestors, for from this knowledge comes the foundations upon which much of the strength of America is laid. March 25 is one of the occasions when this is done. On March 25, Americans of Byelorussian descent and all those who cherish freedom from bondage and tyranny observe the 55th anniversary of the founding of the Byelorussian Democratic Republic.

On that date in 1918, the Rada, representing the first All-Byelorussian Congress, issued a proclamation of the independence of Byelorussia, which read:

A year ago the peoples of Byelorussia, together with all the peoples of Russia threw off the yoke of Russian tsarism which, taking no advice from the people, had plunged our land into the blaze of war that ruined most of our cities and towns. Today we, the Rada of the Byelorussian National Re-

public, cast off from our country the last chains of the political servitude that had been imposed by Russian tsarism upon our free and independent land. From now on, the Byelorussian National Republic is to be a free and independent power. The peoples of Byelorussia themselves, through their Constituent Assembly, will decide upon the future relations of Byelorussia with other states. . . .

Tragically, independence for Byelorussia was short lived, for within a year, the forces of the Bolshevik army brought about the subjugation of the Byelorussian people, and once again they found themselves under the yoke of Russian oppression—enslaved this time by the very forces which had enabled them to declare their independence from the tsars.

Even today, while under the heel of Soviet imperialism, the fierce pride in national identity, begun some seven centuries ago, burns brightly in the hearts of the Byelorussians. On March 25, as we commemorate Byelorussian Independence Day, we join in the hope that the Byelorussian struggle for independence, dating back to the 13th century, will succeed as it did for so brief a period in 1918. Drawing on the strength of their people's endurance during these seven centuries, the Byelorussians remain truly self-conscious as a nation; and so long as they do, the bright light of freedom will again shine on them.

PRESIDENTIAL PRIORITIES AND POCKETBOOKS

HON. HAROLD R. COLLIER

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. COLLIER. Mr. Speaker, on January 31 WMAQ-TV, a Chicago station presented an editorial on President Nixon's budget priorities. John A. Kociolko, a graduate student of Loyola University, offered a rebuttal on February 7.

Mr. Kociolko's reply to the editorial was so well reasoned and so well worded that it merits an even wider audience. I am therefore inserting it in the RECORD for the benefit of my colleagues.

The editorial follows:

PRESIDENTIAL PRIORITIES AND POCKETBOOKS

(The following is a reply to the January 31, 1973 Editorial on President Nixon's budget priorities. The reply was presented by John S. Kociolko, a graduate student of Loyola University.)

WMAQ-TV has joined the chorus of critics who demand that Congress reduce the Presidential authority of Richard Nixon. In November, voters gave the President a resounding electoral triumph. It appeared that the American people approved of Mr. Nixon's stewardship, and wished that he continue his policies in a second term. Yet we are now told that the power of the White House is too great, that Congress must seize the reins of government, and that the President must be restricted.

America's liberal spokesmen tried to restrict Mr. Nixon last year. They ran their candidate, and they lost. Undaunted, they insist that the man whom they despise so intensely shall not govern, regardless of the election. They speak loftily of restoring pow-

er to Congress, although for years these same individuals asserted that the nation needed a strong Presidency. In the 1960's liberal analysts applauded the far-reaching programs of the New Frontier and Great Society. Then one day they found Mr. Nixon in the White House, and suddenly discovered that Presidential prerogatives were far too extensive.

The authority of the Presidency is not a political balloon that can be inflated or diminished depending upon who sits in the Oval Office. Franklin Roosevelt and Harry Truman, John Kennedy and Lyndon Johnson pursued their policies as vigorous Chief Executives. Richard Nixon is today entrusted with the Presidency. He is entitled to a full measure of the power of that office, in order to achieve his goals at home and abroad. His platform of strengthening national defense while reducing government meddling with the lives—and pocketbooks—of the American people was endorsed at the polls. Those who dispute this mandate should retrieve a November newspaper—and re-read the election returns.

(This editorial was broadcast at various times on February 7, 1973.)

NEW DECOY DEVICE

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. ASPIN. Mr. Speaker, as part of a bitter internal struggle within the Pentagon, the Air Force is covering up at least \$600 million in cost growth on a new Air Force decoy designed for bombers known as SCAD. The internal dispute which began in 1968 concerns whether the new decoy should be armed or not and whether the new device should be paced on old B-52 bombers, the new B-1 bomber, or both.

A showdown meeting between various factions was scheduled recently, but apparently no final decision has been made. The Air Force is covering up at least \$600 million in cost growth on this program and probably hundreds of millions of dollars more in new cost overruns that will occur in the near future. The Air Force currently estimates the cost of the new decoy device at \$926 million. But the Air Force does not include in its estimate the \$109 million it will cost to modify the B-52's to use the new decoy and at least \$500 million needed to arm the device.

The real cost of this new decoy is at least \$1.5 billion and probably much more—not less than a billion as the Air Force has tried to convince Congress and the public.

The General Accounting Office—GAO—in a general staff study to Congress, also warns that as a result of technical changes and problems, including an increase in the weight of the device, additional cost overruns will occur. GAO says, it is expected that these changes will increase the procurement cost estimate.

In addition, current Air Force estimates do not include the cost of placing the decoy device on the new B-1 bomber. If SCAD is placed on the new B-1 bomber, the cost of the program will be boosted hundreds of millions of dollars.

The Air Force has also violated Pentagon regulations by refusing to provide Congress with quarterly reports on the status of the program. In addition to covering up hundreds of millions of dollars of cost growth, the Air Force has ignored Congress right provided by the Pentagon's own regulation to receive regular reports on weapons systems.

As many of my colleagues know, if any weapons system will cost more than \$250 million, Pentagon regulations require that Congress be provided with a quarterly report known as a Selected Acquisition Report—SAR. The Air Force has refused to provide SAR's to Congress for several years.

Rather than create another gold-plated monstrosity causing massive cost overruns, the Pentagon should buy a cheap, effective decoy to protect our B-52 bombers.

The years of indecision, mismanagement, and internal haggling may prevent the B-52 from having the decoy devices it needs to penetrate the Soviet Union. The GAO in its report warns:

As a result of indecision and disagreement over basic issues, the program has experienced delays to the point that SCAD is now scheduled to be operational nearly 2 years after the threat it was intended to counter.

Secretary Richardson should put his foot down, stop the petty infighting among the brass, and opt for a cheap, inexpensive decoy to protect our B-52's. Otherwise our bombers, as a result of bickering and internal dissent, may not have the defenses they really need.

WHY AN ENERGY CRISIS?

HON. CRAIG HOSMER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. HOSMER. Mr. Speaker, Columnist Rus Walton of the Daily Pilot newspapers in Orange County, Calif., has put together a very entertaining, informative, and constructive article on why the Nation is facing an electric power shortage.

He points out that in our zeal to protect the environment, the "bug and bunny" people have successfully blocked many attempts to assure adequate supplies of electricity.

Mr. Walton's is one of the most cogent comments on the subject I have read in some time and I include it in the RECORD at this point:

[From the Daily Pilot, Mar. 8, 1973]

"BUG AND BUNNY" PEOPLE TO BLAME

(By Rus Walton)

There will come a day when the people of California will damn the Sierra Club and the Friends of the Earth and the other environmental extremists. And the politicians who have catered to them.

That day may come in the depths of a frigid winter—or in the middle of a broiling heat wave.

It will be a day when you flip the switch and there is no light. A day when you adjust the thermostat and there is no heat or air

conditioning. A day when you go to the factory or the office and there is no job because there is no juice to turn the wheels or run the computer.

This State faces a critical power shortage. And, it is not far away: 8 to 10 years as things go now.

Paul Clifton, project coordinator for the state Resources Agency and chairman of its Power Plant Siting Committee, wrestles with this problem and he is worried.

Clifton is part of a team that is about to release an inventory of power facilities and projected needs. It is a grim projection.

"California's power requirements will double in the next 8 or 9 years and there is reason to really wonder if the power supply will keep pace with that demand," says Clifton.

"Even if things were opened up and the utility companies start building facilities right now, it would still be nip and tuck. It takes time to plan and license and build a power plant."

The big problem is that the bug and bunny people persist in slowing down, or halting, almost all attempts to solve the power problem.

California faces a severe shortage of fossil fuels on a "near term" basis. Which means that unless new sources of oil and gas are found, the barrel will be dry. Yet, the so-called conservationists persist in blocking plans to expand the oil supply.

They demand a moratorium on offshore exploration and drilling; they are successfully delaying the Alaskan pipeline.

"That pipeline means millions of barrels of oil a day to California. It wouldn't solve our problem, but it would sure help."

One of the obvious answers to the power crunch is the nuclear reactor. But say "nuclear" anywhere near a posy plucker and he goes into orbit.

"Those people have the idea that a nuclear power plant might explode. That it might go off like a bomb. It doesn't and it can't."

Clifton doesn't like the term "conspiracy" but he does feel that unfounded fears, ignorance and extremism are depriving the public of a vital power source.

The likelihood of an accident at an atomic reactor is extremely remote. A UCLA study done for the Resources Agency found that "the public health risk from . . . (either oil or nuclear fueled plants) . . . is in the range of the very low hazards . . . such as being struck by lightning or bitten by a venomous animal (about one death per year in a million population)."

The same report found that workers are 10 times safer in a nuclear power plant than in one fueled by oil.

Clifton believes that nuclear power plants are the only way to meet the power demands of the future.

He is all for the development of "exotic" sources such as geothermal and solar energy. But, those are still a long way off.

"Geothermal power, fully developed from known resources, would supply maybe 10-15 percent of our needs."

As for solar energy, one engineer observed it would require "batteries as big as Arizona" to provide power in any significant amount.

Some of the back-to-nature folks are against the construction of any additional power sources. They want reduction, not production. One of their suggestions is a progressive power rate: the more heat and light and power you use, the higher your rate.

You know who would get it in the neck on that one—the working guy. Through higher utility bills, higher prices for food and clothes, and higher taxes (schools, hospitals and public buildings are major users of power).

The state legislature had better get cracking on removing obstacles to the construction of power facilities.

WALTER R. GRAHAM, NOTED SPORTS EDITOR OF THE SPRINGFIELD, MASS., REPUBLICAN AND DAILY NEWS, RETIRED EDITOR OF THE SUNDAY REPUBLICAN, AND CIVIC LEADER: 1899-1973

HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. BOLAND. Mr. Speaker, one of the finest journalists I have ever known, Walter R. Graham, retired editor of the Springfield Sunday Republican and sports editor of the Republican and the Springfield Daily News, died last Friday while vacationing in Florida.

Mr. Graham was a good and close friend of mine. Years ago I worked with him for several seasons managing the Springfield Daily News sandlot leagues and found him to be a tremendously understanding and warmhearted human being.

As the editor of the largest Sunday metropolitan newspaper in western Massachusetts, the Springfield Sunday Republican, Mr. Graham exercised his tremendous responsibilities in a fair, impartial, interesting, and knowledgeable manner. He had the wonderful ability to maintain marvelous communications with many hundreds of people with whom he came in contact and were privileged to know him.

Walter Graham joined the sports staff of the Springfield Daily Republican in 1923 following his graduation from Boston College, and was named sports editor of both the Republican and the Daily News in 1930. As both editor and columnist he understood the world of sports and its personalities as did few of his contemporaries in the newspaper business. He knew all of the great athletes of his era, and wrote about them with passion and consideration while utilizing his vast storehouse of information and knowledge of the world of sports.

He was named editor of the Springfield Sunday Republican in 1947, but he continued in his role as sports editor of the Sunday paper. During his years as sports editor of the Republican, he built up one of the finest sporting sections of any newspaper in the Nation, giving comprehensive coverage to all major national and international sporting events, and complete local and regional coverage to high school, prep school, college, sandlot league, and industrial teams.

Walter Graham's career in journalism spanned 43 years until his retirement in July 1966. Retirement did not put an end to his activity and personal involvement in the affairs of his community. He continued to display an intense interest and participation in the many civic, business, fraternal, and sporting organizations to which he belonged. They included: the Boston College Club of Western Massachusetts, which he founded; the Joint Civic Agencies of Greater Springfield, the Civic Action Committee, United Fund, Red Cross, Chamber of Commerce, Citizens Action Commission, the Springfield Area Development Corp., and as a trustee of the Naismith Memorial Basket-

etball Hall of Fame at Springfield College.

In 1965, Mr. Graham was honored at a testimonial dinner for his years of dedication to amateur sports and civic affairs in Greater Springfield. The board of directors of the Small School Basketball Tournament honored him that same year for his contributions to basketball and he was presented with the 25th Harold M., "Kid," Gore Award. In 1969 Mr. Graham received the John L. Sullivan Memorial Award for his contributions to amateur sports. He also received the Van Horn Parents Sportsmanship Award and a citation from the American Legion for his support of that organization's baseball program.

The Pioneer Valley Press Club in Springfield awarded one of its annual scholarships in Mr. Graham's name in 1965. The Walter R. Graham News Media Award is also given in his honor to outstanding supporters of amateur sports through the western Massachusetts news media. Upon his retirement in 1966, the Massachusetts Senate adopted a resolution commending Mr. Graham for his accomplishments in journalism.

Mr. Speaker, I include with my remarks at this point editorials on Mr. Graham published in today's Springfield Union, yesterday's Sunday Republican, and Saturday's Springfield Daily News:

WALTER R. GRAHAM: LIFE OF SERVICE

Walter R. Graham, retired editor of The Sunday Republican and sports editor of The Republic and The Daily News, who died Friday at 73, was widely known and highly regarded.

An unusually competent newsman, during his 43 years on the Springfield papers, he did much of value for Greater Springfield.

He was one of the most enthusiastic and successful influences in the development of many sports and recreational programs for young people. He was equally zealous and effective in the promotion of numerous worthy civic enterprises for the general community.

Thus his life truly was one of public service. His many good deeds were beneficial to countless people. The memory of Walter Graham, a kindly and generous man, will be treasured forever by all who knew him.

SO LONG, WALTER GRAHAM

Editors don't write about other editors. We don't make news.

Normally,

That was not the case with Walter Graham, retired editor of the Springfield Sunday Republican and sports editor of the Daily News.

He had a gift that most hard-headed newsmen aren't blessed with. He charmed people. He had a knack for relating to the young, the old, the deprived. He walked with kings and queens and paupers, too. If a situation was dark and dreary, Walter brought sunshine.

His ballpark was sports. His fans were every man.

To walk in his shadow, as Horace Hill, his right arm and now associate editor of these newspapers, said was "a profound thing."

Walter Graham is missed. To his widow and family and host of friends, we can only add that his legacy of encouraging sports at all levels, especially for the young, was, and is one of the cornerstones for which the Springfield Union and Sunday Republican exist.

Who says newspapermen don't make news?

WALTER R. GRAHAM, A NEWSMAN FIRST

Walter R. Graham was a newspaperman, first and foremost. He was a skilled editor

who made the sports pages of The Daily News and The Republican come alive for thousands upon thousands of sports fans throughout Western Massachusetts and for many readers outside of this area.

As sports editor of both papers for 36 years, and as managing editor of The Sunday Republican, Mr. Graham compiled a record of achievement that is tribute enough to his long service with The Springfield Newspapers.

But, Walter Graham was much more than a professional newsman. He was—to his many coworkers at the newspapers and to his countless friends in the world of sports and in the Greater Springfield community—a gentleman and a warm and friendly person.

In fact, during his more than three decades as a sports editor, Mr. Graham was probably the best known and most widely known representative of The Springfield Newspapers in Western Massachusetts. He served as toastmaster at banquets and sports functions on more occasions than probably even he could remember. And his "biographical poetry," with which he saluted many outstanding athletes and others in the community, came to be regarded as a Walter Graham "trademark."

Yet, it would be telling only part of his story to confine his accomplishments to his years as a reporter and then as an editor—a career that spanned 43 years from the time he joined the sports staff of The Republican in 1923 to his retirement in 1966. And the story is not complete if it stops with his many years of service in community affairs, or his reputation as a speaker and toastmaster.

For Mr. Graham was intensely interested in the people who populate the world of sports. He knew them all in this area and he was particularly interested in amateur sports. He was, as fellow newspaperman George Keefe point out, "The heart and soul of The Daily News sandlot baseball for 40 years."

He was, in point of fact, the "heart and soul" of whatever sport you care to name—baseball, hockey, basketball, boxing, and all the rest.

It is a measure of the great esteem and deep affection in which Mr. Graham was held by his coworkers that the first tributes—when the tragic news of his death reached us last night—came from the people who worked with him and knew him best at the newspapers.

As Sam Pompei, co-sports editor of The Daily News, summed up his feelings on learning of Mr. Graham's death in Florida: "He'd bend over backwards to be fair to anybody. He tried to be a good guy almost to a fault. I can't begin to list all the people he did things for. And he did them because he wanted to and for no other reason."

Walter Graham's death is a shock to all who respected him as an editor, admired him for his many, many contributions to sports programs and the concept of good sportsmanship, and loved him as a friend.

His death, at age 73, must also sadden the entire community because the Greater Springfield community is a better place today because of the personal imprint Mr. Graham left upon it.

We salute him for a job well done. And we mourn his passing.

HENRY GOUDY

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. WILLIAM D. FORD. Mr. Speaker, I would like to pay public tribute to one of my constituents, Mr. Henry Goudy,

who retired recently after 34 years as fire chief in the city of Wayne.

Mr. Goudy, who was born September 2, 1911, in Wayne, was the son of Charles Goudy, the city's fire chief from 1911 until his death in 1938, when Henry was named to the position. As a result, for the first time in 62 years, a Goudy is not serving as the head of Wayne's Fire Department.

Henry Goudy actually began his firefighting career as a high school student, in 1926, when he began working for the city as a Jack of all trades in the public works department. At that time, all city employees were automatically members of the volunteer fire department. When the fire siren sounded in the village hall—now the city's historical museum—young Henry rushed from his classroom to join his fellow firefighters. He had permission from his teachers and was the envy of the other students.

In 1929, the community established a formal fire department, and Goudy became half of the two-man force, working nights while the other man worked days. They were assisted by volunteers. The senior Goudy was still in command. Upon his death in 1938, the village council named Henry as chief.

Under his leadership, the department grew steadily. For more than 20 years, from 1941 until 1962, the Wayne Fire Department provided protection to both Wayne and the township of Nankin. In 1953, they moved to the present-day fire station.

By the time Goudy retired, the department listed 19 fulltime firemen, with a fleet of modern equipment including two rescue units.

During his long tenure, Goudy received many awards and citations for his service. He is especially proud that he served a year as president of the Great Lakes District of Firefighters, which includes fire chiefs in a nine-State area. He is also justly proud of his department's firefighting record. Although Wayne has had its share of fires, there has never been a major fire involving loss of life. No fireman was ever lost on the job during his years as chief.

Goudy and his wife, Genevieve, who taught in Wayne schools for more than 20 years, have been married 31 years. They live on Sims Street, next to the house in which he was born. The couple's daughter, Jane, is a senior at Eastern Michigan University.

Mr. Speaker, I share in the pride which every Wayne resident feels for this outstanding public servant, and I am happy to bring his story to the attention of my colleagues.

IN SUPPORT OF CONGRESSMAN
O'NEILL

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. WON PAT. Mr. Speaker, a few days ago our distinguished colleague and House majority leader, Congressman

O'NEILL, spoke out against the administration's tampering with farm policies which have resulted in some of the highest food prices in years.

As a result of unrealistic crop production controls and inept administration of our national farm output, families across the Nation are forced to pay prices which are often 20 percent or more than we paid last year.

I fully agree with Congressman O'NEILL that the administration's action in these matters deserves the full indignation of the American people. And, Congressman O'NEILL is to be highly congratulated for speaking out against the policies which have unnecessarily brought economic hardship to many persons, and in particular to the poor, the elderly and others who must subsist on fixed incomes.

The American citizens of Guam must suffer the fruits of our present farm policies also—policies which tell farmers to cut back on planting vital crops at a time when we need more output and not less. Guam imports a great deal of our foodstuffs from the mainland United States. Because of the considerable distance which these items are shipped, our cost of living is among the highest for any American community.

The cost of meat, eggs, milk, bread, and almost any other staple which we consider necessary for our daily diet will cost the consumer almost twice as much on Guam as it will in California, for example. It does not take much imagination, then, to understand what happens to food prices on Guam as a result of skyrocketing prices on the mainland.

But in the midst of this unprecedented rise in food prices, do we find succor in the statements of our Federal officials? Do we hear promises of action which will result in food prices being lowered and farm production being increased to meet the growing demands of both the American consumer and that of others to whom we sell great amounts of food?

Hardly. What we hear is administration spokesmen telling us that we should all be thankful that the food price increases will be a bit slower during the rest of the year.

And while we are also being lectured that price controls will not work, the Labor Department is stunning the consumer with the news that our cost of living, mainly thanks to higher food prices, increased more last month than in any other month since 1951.

There are many inequities in life which man is willing to bear with some degree of resignation. But farm policies which give the Russians cheap wheat and make the middleman rich, while forcing some American families to go without a decent meal, are not among the things in life which we should forebear willingly.

Across the Nation voices are rising in protest against the relentless march upward of food prices. How much longer is the American public to condone policies which seem to have no other purpose than to benefit the few and deny the many?

Mr. Speaker, I hope that the American consumer, whether he be on Guam or anywhere else in this great country, will continue to protest vigorously until those

who are making our farm policies understand that the time has come to put the interests of the average family first, before that of business or our foreign trading partners.

THE PONY EXPRESS—MAIL SERVICE
OR SNAIL SERVICE

HON. JOE L. EVINS

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. EVINS of Tennessee. Mr. Speaker, the operation of the U.S. Postal Service regrettably has become something of a bad joke—a return to the Pony Express mail service of the Old West days would be an improvement in many areas of the Nation.

For example, in Watertown, Tenn., in the Fourth Congressional District of Tennessee which I am honored to represent in the Congress, 6 days were required for urgently needed medicine mailed from Lebanon, Tenn., to reach Watertown, Tenn., some 15 miles distant.

The press, congressional hearings and my mail have provided many such examples.

The fact is that rather than providing an efficient mail service, the U.S. Postal Service has developed inefficiency into an art. One letter, for example, required 17 days to reach its destination 50 feet away in Charleston, W. Va. One citizen in Lantana, Fla., was outraged when 2 weeks was required to receive a letter from his next-door neighbor. In Atlanta, 10 days was required for a letter to reach its destination 4 miles away.

Recently I received a call from a friend and constituent, Mr. Cecil Elrod of Murfreesboro, Tenn., who related the instance of a resident of nearby Smyrna who called his dress shop on a Monday to order a pair of gloves for a wedding on the following Saturday. Smyrna is 12 miles from Murfreesboro.

The gloves failed to arrive in time for the wedding 5 days later—they were delivered the following Monday, precisely 7 days later.

As a result of this continuing and persistent pattern of inefficiency and poor management, I have reluctantly concluded that my vote in favor of establishing the Postal Service was a mistake. In my view, Congress should seriously consider reestablishing the Post Office Department as formerly constituted.

The Constitution, Article I, Section 8, declares:

Congress shall have the power to establish post offices and post roads.

Congress exercised its mandate and responsibility for almost 300 years—and achieved a much more efficient mail delivery service than the now highly-touted mail service, which has been called the "snail service."

However, we were led to believe that the Post Office Department should be turned over to management experts who could solve the isolated problems that existed at that time.

Frankly, it has been my suspicion all

along that much of this was a political ploy to replace career specialists with favored appointees—and a recent study showed that the hierarchy of the Postal Service is loaded with fat cat political appointments.

Twenty postal officials earn more than \$42,500 a year. I am advised that this equals the number of officials in this salary range in all other executive branches, Cabinet members excluded.

The American Postal Worker magazine in a recent article points out that executive positions in the \$15,000 to \$60,000 bracket in the Postal Service have increased in number from 84 to 1,846.

The magazine then lists a number of examples of little known patronage jobs created in the Postal Service.

These include Manager of Creative Services—\$25,183 to \$33,493; Social Priorities Specialist—\$18,634 to \$24,783; and Suggestions Award Administrator—\$22,767 to \$30,280—among many others.

It is no wonder then that the operation of the Postal Service under this type of management has been replete with miscalculations, poor judgment decisions, slowdown in service, blunders, and the projection of a false image of accomplishments that reportedly even deceived the top Postmaster General.

Indications are that many of the problems confronting the Postal Service stem from these basic mistakes:

A reduction in the postal work force of 40,000 employees with a job freeze at a time when the volume of mail is increasing by the billions of pieces each year.

Forcing postal workers to work overtime and long hours on a continuing basis, resulting in lost efficiency and low morale, and increased costs.

Offering bonus incentives to encourage veteran career employees and experienced management personnel to retire, which left great gaps in the management experience and capability of the Postal Service.

A breakdown in management in varying degrees caused by the inexperience of the new executives who, as one magazine charitably put it, are unfamiliar with the quirks of public service.

Rushing into an automated system without proper testing.

Reductions in mail service with elimination of many post offices, rural routes and other services in rural areas and small towns.

The general "public-be-damned" attitude by many officials of the Postal Service that relegated service to the people to a lower priority than effecting reductions in personnel and budget.

The refusal to heed advice and counsel from Congress.

Postmaster General Elmer T. Klassen recently, in a moment of candor, admitted that the Postal Service was so "hell bent" on reducing costs that we perhaps lost track of service, which is an amazing admission from the manager of the national postal service corporation. In another moment of candor, General Klassen said, as reported in the press, that he did not give a damn what publicly elected officials say about mail service.

Regrettably, the Postal Service has become an object of concern and ridicule, and much of the great service tradition of the Post Office Department has been lost.

Someone has suggested that the next Christmas stamp bear the words—"O Lord, Deliver Me."

It has also been suggested that all postal executives be required to see the movie "Deliverance" in the hope that they will get the point.

However, this subject is really not a joking matter—this relegation of a proud service to a symbol of bad management and inefficiency and the resulting impact on vital and needed mail deliveries.

In this connection, a sampling of the mail I have received from constituents concerning the poor Postal Service follows:

WATERTOWN, TENN.,
December 1, 1971.

MR. JOE L. EVINS,

DEAR SIR: I'm writing you in regard to our mail. We order medicine mailed out from Lebanon and we live at Watertown and the postmaster at Lebanon told me on the telephone that they send the mail that is to come from Lebanon to Watertown—He sends it to Nashville and they keep it there until he gets a sack full then is sent back thru Lebanon back to Watertown. It doesn't make sense to me. We ordered some medicine the other day was mailed on Thursday and we did not get it until the next Tuesday and I thought mail was always sent the quickest route.

If you will look around Lebanon you will find plenty complaints besides us. This happens very often but this is just one example. I told Mr. Wright that I was going to write you about it and he said I need not do that there was nothing you could do about it.

We have had this trouble for 5 or 6 years and I just hated to write you about it.

Yours,

HOMER JOHNSON.

LIVINGSTON, TENN.,
October 17, 1971.

HON. JOE L. EVINS,
House Office Building,
Washington, D.C.

DEAR MR. EVINS: I'm writing you this letter on a Sunday, but there's no good reason for it because it won't leave Livingston until Monday afternoon. Since one of the recent "efficiency" moves by the post office, there has been no mail going out or coming into Livingston on Sundays or holidays. This means that during the increased number of Monday holidays we have no dispatches of mail from Saturday afternoon until Monday afternoon . . . which is almost unbelievable in these days of supposed "rapid communication"!

All along, it seems that the postal rates have increased and our mail service decreased. This is a bad combination! Can you assist us in securing adequate mail service? I am sure that I speak for a large number of citizens of this town and the surrounding area in bringing this situation to your attention. All of us will greatly appreciate the help you are able to give us toward improvement of our mail service.

Sincerely,

RALPH A. PRATHER,
LEWISBURG, TENN.,

August 24, 1972.

Rep. J. L. EVINS,
Washington, D.C.:

Attached is a clipping that expresses my experience with the deteriorating Postal Service.

I have received 1st Class Air Mail double Cardboard protected that was punctured &

double bent, insured parcels broken & handled like pieces of cast iron.

Pass this along to the proper committee Chairman or other bureaucrat.

RALPH BEARD.

MAIL SERVICE DETERIORATES ACROSS UNITED STATES

The mail service in the U.S. just ain't what it used to be.

The old philosophy that the mail must get through doesn't mean much anymore. The new postal service, that is being run as a private corporation instead of as a branch of the government, seems to have a completely new theory about moving the mails.

Transportation in this country has improved considerably in the past few decades over what it used to be. Yet it takes longer to get a letter from Florida to California than it did 20 years ago. An airplane can fly from coast-to-coast in three or four hours but it may take as much as three or four days to send a letter across the country by airmail.

"We take our hats off to the post office people," Bill Stewart, president of D & S Color said. "They're doing their best to make an impossible system work."

"We have nothing against the people who work for the postal services, but we do believe the present system of handling the mail needs revision."

One of the major reasons for breakdown in efficiency since the system became a private corporation is that the thousands of postal workers who are retiring all the time are not being replaced. And despite the claims of automation in the post office these days, it's still not possible to move the mails without people.

Mail is being received at D & S Color without post dates or even the town it was sent from. The mail boxes in front of our local main post office have no pickup time on them anymore. Apparently the postal service isn't quite sure when the mail will be collected from the boxes.

As far as D & S photo packages are concerned, all of them leave our West Coast Florida lab stamped with the mailing date. Any of our customers who receive their photos late should have their local post office stamp when the box arrived at its destination and return the stamped portion of the box along with a letter protesting the mail service to D & S. We'll take care of the rest.

Stewart feels that now is the time to let the politicians know about the inefficiency of the postal service. It's an election year and if our elected officials get complaints from thousands of their constituents about the deterioration of the service they will undoubtedly take notice and possibly even do something.

Although the control of the postal service has been taken out of the hands of the politicians in Washington, it is still under the control of the Capitol bureaucracy and the elected officials still have some say. In fact, they have considerable say if they want to, because they allocate a portion of the money used by the new postal service to keep the mails moving.

So let your elected officials know how you feel about the service you've been getting. Whether it's the slow down in the packages from D & S or the inability to get a letter from place-to-place within a reasonable time—let them hear about it. That's the only way the mail service will be improved.

TULLAHOMA CHAMBER OF
COMMERCE, INC.,
Tallahoma, Tenn., June 8, 1971.

Mr. W. D. PARHAM,
Postmaster Tallahoma Tenn.

DEAR MR. PARHAM: As President of the Tullahoma Chamber of Commerce, with over 160 commercial, industrial and professional members, I request your assistance in realigning Tullahoma in the Area Mail Processing Sys-

tem. I understand that both Chattanooga and Nashville will be Sectional Centers and under the present alignment, all the Tullahoma out-of-town mail will go to Chattanooga for canceling and sorting and will then be rerouted. I also understand that you will be required to dispatch the out-of-town mail at 3:30 p.m. rather than 5:30 p.m.

If the proposed alignment becomes effective, one extra day and possibly two extra days will be involved in sending and receiving mail to and from Nashville. For example, if a business order from Tullahoma to Nashville is mailed after 3:30 p.m., it would not leave here until 3:30 p.m., the next day. It would then be canceled and sorted in Chattanooga, and then sent to Nashville and delivered probably on the third day after the mailing date. This situation would cause a very adverse effect on the residents of Tullahoma and on business activity here.

As you know, Tullahoma is economically and culturally aligned with Nashville instead of Chattanooga and the bulk of our out-of-town mail and commercial orders go to Nashville in the natural course of events. It is, therefore, very important that Tullahoma be aligned with the Nashville Center instead of Chattanooga.

Please advise us what we can do to accomplish this alignment.

Yours very truly,

DOYLE E. RICHARDSON,
President, Tullahoma Chamber of Commerce.

CUMBERLAND VALLEY
BROADCASTING CO., INC.,

McMinnville, Tenn., February 26, 1973.

HON. JOE L. EVINS,
Rayburn House Office Building,
Washington, D.C.

DEAR MR. CHAIRMAN: A recent article which appeared in an issue of the "American Postal Worker," a copy of which is enclosed, has infuriated employees of the McMinnville post office. Frustrated already as a result of the mounting complaints which are accompanying the handling of mail by the National Postal Service, one of them handed me the enclosed and suggested that I pass same along to you.

As I have earlier suggested, I do not believe the Post Office Department can long continue under its present method of operation. I further believe that 95 per cent of the employees of the local office would prefer to return to the former system.

The poor performance of the mails is a daily topic of conversation among business people, shippers and those who must rely on the service and because of this poor performance, many are turning to such agencies as U-P-S and others for delivery service. If present arrangements continue, it will not be long until such agencies as U-P-S will make the post office an almost total liability on the taxpayers.

"Where The Plums Are" is just another example of the false economy of the Nixon administration and its deception.

Ever your friend,

CHICK BROWN.

The Postal Service has established methods of processing mail that requires that much mail travel circuitous routes to reach a destination of only a few miles.

Mail deliveries have been reduced and cut back, collection boxes have been removed, small branch post offices have been closed, post offices are closed on Saturdays in many communities—all of these cutbacks in services are occurring despite increases in postal rates.

Our people have a right to demand and expect efficient mail delivery service and we must remember that the Post Office Department was not established as a profitmaking business venture, but as a

needed and necessary service—an essential service mandated by the Constitution.

If strong action to remedy these deficiencies requires the restructuring of the present Postal Service and the reestablishment of the U.S. Post Office Department—responsive to the public need—then Congress should act in the public interest.

DR. RALPH DAVID ABERNATHY TESTIFIES ON REVENUE SHARING

HON. ANDREW YOUNG

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. YOUNG of Georgia. Mr. Speaker, yesterday the Reverend Dr. Ralph David Abernathy, president of the Southern Christian Leadership Conference, testified at the U.S. Department of the Treasury, Office of the Secretary and Office of Revenue Sharing, on proposed regulations under the Revenue Sharing Act.

Dr. Abernathy gave a stern warning about a danger implicit in the concept of revenue sharing when he said:

... we cannot ignore the possibility that in the long run "Revenue Sharing" may prove to be merely the financial underpinning for a return to the infamous "states rights" doctrine, which, as we all know, so far in the history of this country has never been progressive.

Dr. Abernathy specifically called for strengthening of antidiscriminatory rules under revenue sharing, and guaranteeing compliance with the regulations.

I urge my colleagues, Mr. Speaker, to read this statement and take note of Dr. Abernathy's reminder that the victims of poverty and discrimination are taxpayers, too, and have a right to their full share of the funds disbursed under revenue sharing. Dr. Abernathy concludes—

Our movement to secure these rights, is in no mood to put up with the kind of trickery and cruel deception which was the experience of our people when Reconstruction was brutally ended 100 years ago.

His full statement follows.

STATEMENT BY DR. RALPH DAVID ABERNATHY

Mr. Chairman: These public hearings are being convened at a time of deep social crisis in our country. The evidence of this crisis is all around us. It need not be detailed by me at this time. Nevertheless, none of us can afford to be unmindful of the fact that the nature of the crisis in our country today threatens the important gains achieved by the American people through the Civil Rights Movement of the 1960's; gains which took much hard work and much sacrifice to make a reality.

Today, with unemployment and underemployment for millions of people who want jobs becoming a permanent feature of the economic life of this society; with deplorable housing conditions and declining social services, especially in the cities, a fact of everyday life, one must pose the question: Does this General Revenue Sharing Act represent a serious effort by the Congress to honestly meet its moral obligations as elected representatives of the people of this country? I, for one, having serious reservations about the very philosophy behind the Revenue Sharing proposals as a means of dealing with

the many problems facing our country today. For we cannot ignore the possibility that in the long run "Revenue Sharing" may prove to be merely the financial underpinning for a return to the infamous "states rights" doctrine, which, as we all know, so far in the history of this country has never been progressive. As a case in point, in the city of Atlanta, where the Southern Christian Leadership Conference maintains its national headquarters, and my home, it was once proposed by the City Fathers that Revenue Sharing funds be used to give rebates to utility companies.

At any rate, our three organizations: Operation PUSH, the National Welfare Rights Organization and the Southern Christian Leadership Conference, represented here today and supported by many other organizations, are registering our concern with various features of this legislation, which I understand is commonly known as the General Revenue Sharing Act of 1972 (public law 92-512).

As President of the Southern Christian Leadership Conference, an organization which over the past 18 years has some record of involvement in the struggle to end racist practices in our country, I want to call particular attention to that section of the General Revenue Sharing Act dealing with the problem of discrimination. This is Section 5132 in the Rules and Regulations covering the handling of Revenue Sharing funds. This Section of the General Revenue Sharing Act correctly adopts some of the language of Title VI of the Civil Rights Act of 1964, which was a landmark piece of social legislation prohibiting discrimination in the handling of federal funds.

However, Part 4-E in this Section of the Revenue Sharing Bill, dealing with the important point of guaranteeing compliance with the anti-discrimination clause, is very weakly and loosely worded. This Section, if it is to be of value, must be strengthened to require that the secretary monitor and determine compliance not only of "recipient government" as now stated in that bill, but also private banks, loan agencies, and other institutions receiving such federal Revenue Sharing funds. Given the long history of racist practices of the banking and other financial institutions in our country, any serious compliance and review procedure must make these agencies directly accountable to the federal government and on a regularized basis.

In addition, Mr. Chairman, we strongly urge that Title VII of the Civil Rights Act of 1964 be incorporated in letter and spirit into the General Revenue Sharing Act in order to guarantee much-needed safeguards against discriminatory practices. Under Title VII of the Civil Rights Act of 1964 the range of employment practices in which discrimination is prohibited include such things as hiring, firing, lay-off, recall, and promotional opportunities on the job. Furthermore, state and local governments, employment agencies and labor organizations are subject to the anti-discrimination rule under Title VII. The General Revenue Sharing Act of 1972 needs such provisions.

Mr. Chairman, the long dark night of discrimination is not yet over in our country and we are fully aware that there are those in high places who wish to increase and prolong the darkness. Yet, the millions in our country who have known poverty and discrimination are determined to share in the abundance which the gross national product of this country represents. This is a right which we are committed to see become a reality. And our movement to secure these rights is in no mood to put up with the kind of trickery and cruel deception which was the experience of our people when Reconstruction was brutally ended 100 years ago.

Blacks, Puerto Ricans, Mexican-Americans, together with millions of whites (who, by the way, are the majority of poor in Amer-

ica) pay billions of dollars in taxes to the federal government each year. "Revenue Sharing" is a mockery if the needs of this population are ignored or under-represented in the distribution of these funds.

Thank you, Mr. Chairman.

EULOGY TO STANLEY E. WAYMAN

HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. ROGERS. Mr. Speaker, Stanley E. Wayman, one of the Nation's outstanding photographers and a fifth generation Floridian, died here in Washington. Only 45 years old, Mr. Wayman had an outstanding career in the field of photography and was a staff member of Life magazine from 1957 until 1971. He won numerous awards, including the White House Press Photographers' Association Award, of which he was a member. Mr. Wayman's career carried him all over the world. He once lived for weeks in the Baffin Bay area of the Arctic photographing the white walrus, and on another occasion he swam with Jon Lindbergh under water off the coast of Peru to photograph whales. I would like to insert in the Record comments on Mr. Wayman as carried by the Miami Herald, the Washington-Star News, and the Washington Post:

[From the Miami Herald, March 1973]

STANLEY WAYMAN, 45, NOTED PHOTOGRAPHER
(By Earl Dehart)

Services for Stanley E. Wayman, 45, a former photographer for The Miami Herald and for Life magazine until it folded in 1972, will be at 10 a.m. Tuesday in the Metropolitan Methodist Church in Washington, D.C.

Mr. Wayman, a native of Moore Haven, Fla., who got his first camera when he was 12, died Saturday of a heart attack in Washington while driving a babysitter home.

Police said the car went out of control and struck a utility pole in Northwest Washington. The babysitter was not seriously hurt.

Mr. Wayman had worked for The Miami Herald from 1950 to 1955 before becoming a fulltime free-lance photographer for national magazines through the New York agency of Ralpho and Guillemette.

During his Herald career he covered many big news stories and gained both state and national awards for some of his outstanding pictures.

John Walther, the Herald's chief photographer, said Mr. Wayman came to the newspaper from Pan American World Airways, where he was a public relations photographer.

"He was just about the first photographer (at The Herald) to use 35mm cameras," Walther said.

"He really enjoyed outdoor stuff like fashion and nature assignments."

Mr. Wayman received national coverage in Newsweek in 1954 after taking pictures of the arrest and jailing of a local bookie suspect. The magazine used his photographs as a peg to review the gambling situation in Greater Miami and the part The Herald played in helping drive out big-time gambling operations.

After leaving The Herald, Mr. Wayman was named first prize winner in the series division of a nationwide contest conducted by the University of Missouri School of Journalism.

At Life, he worked in Washington, Moscow, Paris and Bonn until the magazine closed operations.

He had covered four presidents and was known for his cover stories and photo essays on wildlife.

Mr. Wayman was born 10 miles west of Moore Haven and was graduated from Moore Haven High School.

When he was 12, his dad bought him a camera and darkroom equipment. The trouble was, there wasn't any darkroom. The imaginative young Wayman looked about and set up his darkroom in a nearby abandoned outhouse.

The local newspaper said, "Despite these primitive surroundings, Wayman has done quite well with his photography."

He was the only official photographer correspondent assigned to Moscow by Life for several years, and was one of Life's photographers who covered Nikita Khrushchev's visit to the United States.

"Khrushchev is a good subject to photograph from any angle," Mr. Wayman said in 1960. He added that the Russian leader could be readily recognized, even from the back of his head.

"Most of Life's pictures are editorially honest," he once said.

"A photographer must be editorially honest and lean over backward so as not to inject his personality into the picture."

Mr. Wayman is survived by his wife, Diane; three children, Seth, Sara, and Katherine Ann; his mother, Rena; and a brother, Tom.

The family requests memorials be sent to the Heart Fund.

[From the Sunday Star and Daily News,
Mar. 11, 1973]

STANLEY E. WAYMAN, 45; PRIZE-WINNING
LENSMAN

Stanley E. Wayman, 45, a prize-winning photographer best known for his work with Life Magazine, died Friday after a heart attack. He lived on 44th Street NW.

Police said Mr. Wayman was driving his car in the 2100 block of Foxhall Road NW when he was stricken. The auto then struck a utility pole.

Mr. Wayman, highly acclaimed for his nature photography, joined Life in 1957, serving in Chicago, Paris, Bonn and Moscow. His picture of one of the National Zoo pandas appeared in the final issue of Life in December.

Mr. Wayman's career carried him literally to the ends of the earth. Once he lived for weeks in the Baffin Bay area of the Arctic with only wolves as his companions. On another assignment, he swam with Charles Lindbergh under water off the coast of Peru to photograph whales. He covered four presidents with his camera.

A native of Moore Haven, Fla., he took up photography at the age of 12.

He leaves his wife, Diane, and three children, Seth, Sara and Katherine Ann; his mother, Mrs. Rena Wayman of La Belle, Fla., and a brother, Tom Wayman, of Palm Beach, Fla.

Services will be at 10 a.m. Tuesday at Metropolitan Methodist Church, New Mexico and Nebraska Avenues NW.

The family suggests that expressions of sympathy be in the form of contributions to the Heart Fund.

[From the Washington Post, Mar. 12, 1973]

STANLEY WAYMAN, Ex-"LIFE" LENS MAN

Stanley E. Wayman, a former photographer with Life magazine whose last assignment was in its Washington bureau, died early Saturday following a heart attack. He was 45.

Police said Mr. Wayman was driving a baby-sitter home when he apparently suf-

fered the attack. The car went out of control and struck a utility pole. The babysitter was not hurt seriously.

Mr. Wayman was born in Moore Haven, Fla., and by the age of 12 he had decided to be a photographer. He bought his first camera with the proceeds he received from shooting squirrels and selling their pelts to Sears & Roebuck. When he finally bought the camera, he threw away the gun and never fired one again.

He joined Life magazine in 1957, after working for newspapers in Florida, and remained with Life until it folded last December. At the time of his death, he was free lancing out of Washington.

Mr. Wayman's specialty was nature photography and his pictures of wild animals from various parts of the world appeared numerous times on the magazine's cover. During his tenure with Life, he was assigned to bureaus in Paris, Bonn and in Moscow before coming to Washington. The family resided at 3212 44th St. NW.

He received numerous photography awards, including six first-place awards from the White House Press Photographers Association, of which he was a member.

He is survived by his wife, Diane, his children, Seth, Sarah and Katherine Ann Wayman; a brother, Thomas, of Palm Beach, Fla., and his mother, Rena Wayman, of La Belle, Fla.

VETERANS: THE TRUE WELCOME HOME

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. RANGEL. Mr. Speaker, in all the hoopla and ballyhoo over our returning veterans, we must not lose sight of what so many men are coming home to: unemployment and welfare. The situation in New York City is particularly serious, with few job openings and veterans with minimal job training. In this light, I commend Eleanor Holmes Norton, chairman of the City Commission on Human Rights, for initiating hearings on this subject. A New York Post editorial of March 6 entitled "Unheralded Veterans" is quite relevant and timely. I now submit the editorial for your attention and the attention of my colleagues.

The editorial reads:

UNHERALDED VETERANS

A warm national welcome has been accorded the men from the Vietnamese prison camps in recent days and it is assured those who will follow them home; the country has been far less generous to another kind of veteran—to whom POW could mean Put Out of Work.

As Chairman Eleanor Norton of the City Commission on Human Rights observed yesterday, "thousands of ordinary soldiers" have returned home without any recognition comparable to the reception for the captured men; on the contrary, they are no better trained for civilian jobs than they were when inducted, 4000 of them are now on welfare in this city alone and there may be many more added to the rolls in the coming months.

The CCHR plans to conduct hearings on the subject later this month. It is a matter of national interest—in common with the new report from the Center for the Study of Responsive Law which describes the many failures of the nation's veterans' hospitals in

meeting the needs of the men home from Vietnam. The difficulty, very often, is budgetary and administrative, not professional.

It has been noted frequently that the return of the Vietnam GI has often gone unnoticed—or even been guiltily ignored. The reception for the prisoners cannot compensate for the broader negligence.

ABORTION

HON. LAWRENCE J. HOGAN

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. HOGAN. Mr. Speaker, today I would like to insert again excerpts of medical evidence from the Massachusetts criminal abortion trial Commonwealth against Brunelle. As I said, it is tragic that the U.S. Supreme Court decided such a grave constitutional issue with an incomplete record because the trial court hearings, in the case decided, consisted only of oral arguments; no medical experts testified and no depositions were taken by the trial courts.

In the Massachusetts case, factual evidence was taken.

The excerpts follow:

CROSS EXAMINATION OF MALKAH T. NOTMAN, M.D., BY MR. IRWIN

Q. (by Mr. Irwin) How about when the surgeon removes the fetus? Is that killing a human being, in your judgment?

A. (Dr. Notman) I don't know that the issue of a human being comes into it.

Q. You don't?

A. It is a fetus.

Q. It is, and is it nonhuman, in your testimony?

A. The whole consideration of what is human, I think, is not really a medical issue. Is a tumor non-human?—because it grows. Is a toenail nonhuman because it is removed from a toe?

Q. Does a toenail breathe and think and have a pulse?

Q. Does a tumor?

A. No, not independently.

Q. A fetus does, doesn't it?

A. Breathe and think and have a pulse?

Q. Yes.

A. It depends on what age.

Q. Even as early as 12 weeks, does it not?

A. Think?

Q. Think.

A. No.

Q. At what age does it think?

A. After it is born.

Q. Does it react if it is touched in the womb of the mother?

A. I don't know.

Q. To stimuli?

A. I think it rarely has the occasion to do that.

Q. Have you ever heard of transplacental uterine transfusion?

A. Yes.

Q. That is a medical procedure whereby the fetus in the womb of the mother is transfused directly?

A. I don't know that it is the fetus.

Q. What is it at that point?

A. It may be the fetus. I am not familiar with the exact procedure. It is a transfusion of—sometimes it is fluid and sometimes it is blood.

Q. Into a human being?

A. It is into the fetus.

Q. With restoration?

A. Not necessarily.

Q. In 90 percent of the cases, does [it] have restoration?

A. I don't know.

Q. You're an M.D.

A. Yes. When I was training, this was not a procedure that was done, and it is not my area of specialization.

Q. Do you concede to the Court that this zygote—are you familiar with the term "zygote"?

A. Yes.

... if left in its own state and unhindered by any intervention except spontaneity, will mature into a human being?

A. No. Can I explain?

Q. You are not aware of that?

A. It won't. Not necessarily.

Q. Let's forget abortion.

A. Or fetal illness or maternal illness or maternal nutrition?

Q. Let's talk about abortionists. If we can keep abortionists away from the fetus, and all the other natural illnesses that kill fetuses, will you tell us whether or not that zygote will eventually be a human being?

A. I don't think that is a question I can answer, because the whole basis of the question is a misconception.

Q. Why don't you let me decide, or the Court decide, whether the whole basis of my question is a misconception.

Do you know what a zygote is?

A. Yes.

Q. Do you think it is relevant to the whole question of whether or not the law should allow somebody to invade the womb and kill this thing—and that's what you people refer to as a thing—do you refer to this as a "thing" or a growth?

A. Yes.

Q. Or a witless tapole, or something like that?

A. We don't call it names. We call it a fetus.

Q. You are not quite prepared to say to the Court whether or not that fetus is living or human or capable of existence, are you?

A. I think your form of the question is not answerable, because there are many, many things that are living that are not human.

Q. We understand that, but the abortionists are not working on that.

A. The surgeons may be.

Q. Do you want to tell us, if you would, please, whether or not you have an opinion as to when that growth becomes a human being, or do you have no opinion?

A. I think the concept of human being is not a medical concept.

Q. It becomes human only after the child is born, is that right?

A. That's right.

Q. You have no trouble labeling an infant two months old out of its mother's womb or two minutes old out of its mother's womb as a human being?

A. That's correct.

Q. What is it that makes it at that point a human being?

A. His capacity of existence.

Q. He has that capacity at five months, if you want to go in surgically and take him out of his mother's womb?

A. At six or seven months. I haven't heard of any at five or six.

Q. You haven't heard of any at six months who have lived?

A. It depends on the weight.

Q. Have you heard of any prematurely born infants who were five or six months old who lived outside of their mother's womb? Is it your testimony you don't know of that?

A. My testimony is that I don't know of that.

Q. Of anybody, any youngster who ever lived at that age, five or six months, outside of his mother's womb. How about seven months?

A. Seven is possible.

Q. Is it a human being?

A. After it's born.

Q. Only after it is born. Will you tell the Court what it is that makes this miracle of

passing from the womb out to this world, what is it that transforms that fetus, as you call it, into a human being at that point.

A. I think these are extremely vague kinds of things to answer. They are answered by different people in different ways. This is not medical.

Q. I understand; where the child is born dead naturally, and so on and so forth, because the nutritional...

A. Or mentally retarded.

Q. Let's suppose the case of the healthy woman who has no illness, who has a healthy zygote and eventually a healthy fetus, and has great nutrition: Will that eventually be a human being she gives birth to?

A. After she gives birth.

Q. Not until the moment she gives birth?

A. That's right.

Q. By that, do you mean 36 weeks?

A. Do you think this is something really relevant to my area of expertise?

Q. Do you know that, if uninhibited by natural disease to the mother or itself or without the intervention of an abortionist, will that zygote eventually mature into a human being?

A. It depends on the nutritional state of the mother, and there are large parts of the world where...

Q. Why don't you answer?

A. This is not a medical question. It is a religious one or...

Q. You said medically it is a human being at seven months?

A. After it is born. It is capable of independent existence.

Q. And it is capable of that long before it is born, is it not?

A. Not long before it is born.

Q. Is it a day before?

A. I don't know. I would like to make a comment about...

Q. I know, you would like to make a lot of comments. Mr. Oteri will allow you to make whatever comments you feel are necessary, and the Court will decide whether or not he feels they are appropriate.

REDIRECT EXAMINATION OF MALKAH T. NOTMAN, M.D., BY MR. OTERI

Q. (by Mr. Oteri) Now Doctor, at one point Mr. Irwin was talking to you about the difference between humanity or human beings and the fetus, and he asked you about the day before the birth it was a human being, and you attempted to answer him and were stopped.

Is there anything you want to add to that?

A. (Dr. Notman) I don't think the issue when the fetus is a human being, I don't think that I can answer and attempt to pin it down to the day before birth or six days before. I would have to say the same thing: There are many things in medicine there are no clear answers, or many things in biology where there is no clear answer, such as sometimes the difference between living and not living, and I don't feel that I can answer this issue of humanity.

Q. Is it your opinion that the issue of humanity is not a medical decision?

A. That's right.

Q. Mr. Irwin asked you at one point was the zygote a human being, and, if allowed to develop without interruption by the spontaneous abortion and nutrition failures and many other things which result in the fetus being expelled, it would develop into a human being.

Would you please tell us your feeling on the development of the zygote and its potential for birth?

A. My best informed judgment is that this concept of letting a zygote develop, or letting a fetus develop, is a misconception; that in order for a normal pregnancy, an ordinary role of pregnancy to occur, there has to be a very intimate relationship, nutritionally and many other ways—circulation, excretion of wastes and other ways—between the moth-

er and fetus. It is a misconception to consider it developing on its own, let alone. The mother has to have adequate nutrition, adequate psychological resources, in order for the pregnancy to go along in the ordinary way.

It is not that you water it and it grows like a plant. I think it is part of that concept, and I don't think it is a proper way to conceive of pregnancy.

Q. At least the pregnancy, until the seventh month the fetus is incapable of sustaining life?

A. That's right.

Q. And the fetus is attached to the mother and lives or does not live, depending on the mother sustaining it?

A. That's right.

Q. And it is attached in the same form, basically, as any other kind of tumorous growth or medical malfunction would be?

A. It is not attached, but it depends on her for nutrition.

AN EXAMPLE FOR THE NATION

HON. L. A. (SKIP) BAFALIS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. BAFALIS. Mr. Speaker, in these days when practically everyone is demanding that the Federal Government solve their problems, it is extremely pleasing to learn there are still some Americans who can and will take the initiative in attempting to solve their own problems.

It is particularly heartening for me because the problem-solving Americans of whom I speak are residents of Florida's 10th Congressional District.

But let me tell you exactly why I am heartened.

A few months ago, a group of Martin County, Fla., residents became worried over the rapid development along the ocean beaches of their area.

They had always enjoyed the beach and had considered unlimited access to the sand and surf as a way of life which would never change.

But expanding resorts and developing condominiums—not to mention the soaring cost of oceanfront real estate—threatened the public's access. The beach itself is public but, without access routes, it might as well be hidden behind high fences.

Determined to save for their children and grandchildren that great pleasure of life—enjoying miles of seashore—these residents formed the Martin County public beach fund.

First, they won a pledge from the county commissioners that the county would match, dollar for dollar, any amount which the group could raise through a public drive.

Next, they approached State and Federal officials and asked them to match the amount raised by the public and the county.

With these firm commitments, the public beach fund launched a "save our beaches" campaign.

It was truly a community effort. Businessmen gave willingly. So did professional men and women. Civic groups dipped deep into their treasuries. House-

wives went door to door with their appeal.

Even Martin County schoolchildren did their share. Classes were rearranged so youngsters could go into the community and work to raise funds for the "save our beaches" campaign.

They washed cars, ran errands, held bake sales, sold "save our beaches" sweat-shirts, anything to raise money for this community effort.

By the time the campaign ended, the Martin County public beach fund had surpassed its \$200,000 goal by more than \$12,000.

That money, coupled with matching funds from the county, State, and Federal Governments, will mean eight more access strips, insuring that Martin County residents and visitors will be able to enjoy Florida's beautiful beaches for generations to come.

I am immensely proud of these citizens. And, I am convinced this type of "people in action" program is one which could, and should, be emulated throughout the Nation.

THE WORKPLACE ENVIRONMENT IS THE MOST POLLUTED

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. REUSS. Mr. Speaker, a new paperback book is becoming a minor classic among working people and the environmental movement. It is called, appropriately, "The American Worker: An Endangered Species" and is billed by the publisher, Ballantine Books, as—

The first book to examine our most dangerous habitat—the workplace and the million occupational illnesses it causes every year.

The author of this new book, which goes into a second 30,000-copy printing on April 1, is Franklin Wallick, who spent productive years in Wisconsin as a labor editor and has been editor of the United Auto Workers' Washington Report since 1963.

This new book has been an eye-opener to many who still think of the environment as polluted skies and rivers, because for the first time our attention is directed toward the environmental horrors which beset millions of our fellow Americans at their place of work, be it a factory, an office building, or a public institution.

A thoughtful and comprehensive review of the book has been written for the March 1973, issue of *Not Man Apart*, the excellent publication of Friends of the Earth, and I include it in the *RECORD* along with comments from other reviews:

THE AMERICAN WORKER: AN ENDANGERED SPECIES

(By Franklin Wallick and reviewed by Jeff Stansbury)

During the stripmining debate in Congress last year, Representative Ken Hechler (D-W. Va.) pondered his primary election triumph over an entrenched foe, Representative James Kee, who had long done the coal

lobby's bidding. Kee had been heavily favored to win. Their mountainous election district had been gerrymandered in his behalf, and Kee had exploited Hechler's tough stand against the strippers as an alleged threat to the jobs of thousands of West Virginians.

Nevertheless, Hechler whipped Kee by a stout margin, ended a petty dynasty in West Virginia politics, and went on to reclaim his House of Representatives seat in November. After his primary upset, I asked this eloquent maverick why he thought he had won.

"The job issue never cut any ice," he said. "I told voters I was against the exploitation of land because it was also the exploitation of people. They saw the truth of it."

As tersely as that, Hechler offered up the ultimate environmental insight! And it was no mere piece of rhetoric. Over the years, Hechler had fought the strippers with deadly eloquence, had equated the ravaging of mountainsides with the economic blight of mountain people, had exposed the hidden subsidies which a few rapacious corporations extracted from West Virginians: subsidies of lost wildlife, lost streams, lost villages, lost economic futures, and lost freedoms. But just as forcefully, Hechler had also exposed the subsidies of flesh in the deep mines where men stooped, sickened, and died.

The 1969 Coal Mine Health and Safety Act was largely his work, and only Hechler and Senator Harrison Williams (D-N.J.) had kept the Nixon Administration's flabby enforcement of this law from becoming a pure farce. West Virginians knew this and voted accordingly.

The exploitation of land is the exploitation of people: Where is this truth raised to a higher pitch of tragedy than in the work places where millions of blue-collar employees spend half their waking hours? By conservative estimate, 25 million workers (mostly blue collar) suffer on-the-job injuries each year. Three hundred thousand cope with job-induced diseases of the lungs, heart, liver, brain, eyes, skin, stomach, intestines, and other organs. At least 18,000 die on the job, and countless millions more die from occupational diseases contracted years, even decades, earlier.

Just as surely as West Virginians subsidize the strippers, these men and women subsidize US corporations through doctor's bills, hospital fees, and shortened lives. Most industries could prevent most of the occupational injuries, diseases, and deaths that now occur, but it is economically sounder for them to pay workers or their widows a few crumbs in "compensation" than to prevent such mayhem in the first place.

Two years ago, for the environmental column I was then co-authoring with Stewart Udall, I visited the home of Robert C. Ferdinand in Hazleton, Pennsylvania. Ferdinand was 43 years old and had worked at the Kaweck-Beryllco Industries' beryllium plant in Hazleton from 1957 to 1968. He had not worked a day since.

"It is fair to say," we later wrote, "that KBI used Ferdinand's skills as a maintenance mechanic to increase its profits, and in return it gave him a modest wage and a death sentence. Pale, hazel-eyed, still stocky, Ferdinand cannot even do the dishes without sitting down to rest. He can barely climb a flight of stairs. He cannot roughhouse with his five kids. . . . Ferdinand has chronic systemic beryllium disease."

"That plant was a rathole and still is," he says. "The maintenance mechanics got the worst of it. We cleaned beryllium off the machines with sulfuric acid—what a combination that was. The company never let us know the results of its air-monitoring tests. After a bad leak or spill, they'd tell us to go back into the area before any new tests were run. When we complained, the safety director got angry and told us to wear our safety glasses, respirators, and hard hats. But we could still taste the beryllium."

In 1970 Ferdinand lost 40 pounds. A biopsy—or more precisely an assay—found 139 milligrams of beryllium in his lungs for every gram of lung tissue. Yet KBI refused to pay him workman's compensation.

Now comes a book written in homage to all the Robert C. Ferdinands of this country, the millions of men and women who endure America's most polluted environment: the industrial workplace. No environmentalist who has not made some pilgrimage, intellectual or literal, to this fume-ridden, dust-ridden world can consider his or her education complete—and Frank Wallick's *The American Worker: An Endangered Species* is an excellent place to start.

Wallick has been doggedly writing about—and lobbying against—the ravages of workplace pollution for years. As the editor of the United Auto Workers' "Washington Report," he has also covered plenty of conventional conservation issues and is one of the few living, breathing bridges between unions and environmental groups. He writes the following more in sorrow than anger:

"Most environmentalists who properly decry the fouling of America are oblivious to that more concentrated and hazardous pollution found at the workplace. . . . The books, the articles, the list of legislative priorities, the speeches, the conferences which bring the American environmentalists together and represent so much in the restoration of balance—all these efforts to redo and remake America's environment still bypass the most neglected environment of all. Only two current environmental books, *Our Precarious Habitat* and *Earth Tool Kit*, have given any mention to the workplace environment. The skills and insights of the environmental leaders of America are needed to . . . clean up and make safe the workplace environment."

Most of Wallick's criticisms rap other institutions, however. The medical profession, for one:

"It is a rare physician, indeed, who will take into account occupational exposures when making a diagnosis or even determining cause of death in an autopsy. The schools of medicine in the United States have not regarded occupational medicine as legitimate study . . . [and] the company doctor all too frequently is a castoff from the practice of medicine." In Hazleton, Pennsylvania, Ferdinand's company doctor told him: "The presence of beryllium in the lungs has no diagnostic significance."

The press, for another:

"The press coverage of the fight for the Occupational Safety and Health bill during 1970 was incredibly poor. The *Washington Post* spent more time discussing the perils of smog over Tokyo during 1970 than it did in reporting on the smog in America's own workplaces, including its own pressrooms."

The "safety" establishment, for another:

"Howard Pyle, the National Safety Council's director (and now chairman of the advisory committee to the Occupational Safety and Health Administration . . . believes that the path to worker safety lies in more slogans, more pep talks, more safety clam-bakes, and more protective clothing. Governor Pyle does not intend to ruffle any corporate feathers."

And, above all, the U.S. Department of Labor:

"The way Labor Department officials have tried to shunt most of the [1970 Occupational Safety and Health] law back into the hands of the states is another example of Labor's haphazard attitude toward worker safety and health. The prime reason for passage of a national law was the utter failure of states to act. Yet the Nixon Administration has moved heaven and earth to put as much of the program back into the laps of the states as they could get away with. . . .

There is no passion, no sense of vigilance, no flash of humanity which marks the behavior of most Labor Department personnel hired to protect the lives of millions upon millions of workers."

Wallick's *The American Worker* is no diatribe, however. It is a reasoned, surprisingly temperate essay on the causes and potential cures of occupational disease. Here the environmental reader will find ample evidence of the carcinogens, the suspected mutagens and teratogens, the pneumococcoses and other destructive agents that abound in the industrial workplace. Between 100,000 and 450,000 chemical compounds have been released into the environment since 1900, Wallick says. "Some eight-thousand chemicals are commonly used in modern industry. So-called safety limits (Threshold Limit Values or TLVs) have been set on 450 chemical substances used in the work environment. It is estimated that at least 600 new chemical compounds are introduced each year. . . . Little testing as to the human health effects is made; workers who use new chemicals are treated as human guinea pigs."

Here, too, readers will find guideposts along the path toward reforms; a worker's bill of rights, a fledgling coalition between radical doctors and workers, and a second needed coalition between workers and environmentalists to secure honest enforcement of the 1970 Occupational Safety and Health Act. In particular, I recommend Wallick's chapter, "Toward a Worker-Student Alliance," to environmentalists. Though written for students, its message about tactics, goals, and psychology applies just as well to environmentalists who may intellectually grasp the continuity of all pollution—inside the workplace and out—but whose class origins may poorly equip them to approach workers without hangups.

There is every reason for environmentalists to make common cause with workers and no good reason for them to forfeit the advantages of such an alliance. [See story elsewhere in this issue about FOE's support of Oil Workers' Strike.] In support of this brief, I offer the following evidence.

The environmental movement has been strong on momentary shifting coalitions (such as those lobbying for the 1970 clean air and 1972 clean water amendments) but weak on forging long-term alliances with other economic-political groups.

The hidden subsidy—whether of open space, clean air, or workers' flesh—lies at the root of all pollution, and it unites workers and environmentalists whether they perceive it or not.

Workplace pollution is the source of conventional outdoor pollution—but it is more deadly.

A deliberately restricted access to information, mostly corporate information about the degree and kinds of pollution, hampers both environmental groups and unions.

The Nixon Administration is attempting to hand both occupational health and environmental (especially water pollution) enforcement programs back to the states, who have demonstrated their incompetence to handle them.

Just as environmental groups have lost faith in the *ambient quality* approach to air and water pollution controls, so have unions lost faith in the ambient, or Threshold Limit Value, approach to workplace pollution. What is indisputably needed in both cases is a rigorous check on effluents—i.e., a *performance* standard.

The "economic infeasibility" argument is pushed by industry to slow down both workplace performance standards and effluent controls on air and water pollution.

Industry often tries to drive a wedge between workers and environmentalists on the "job issue"—real or threatened plant shutdowns following pollution cleanup orders.

Divided, workers and environmentalists cannot reform industry or break industry's control of the political process. United, they can handsomely increase their clout. This is not romantic daydreaming; it is a hard political fact.

FROM THE BOOK

Mike Lavelle in The Chicago Tribune says: "When anybody talks to me about the environment, I ask what environment? Mine, theirs, outside, inside, mines? And I recommend that all environmentalists read 'The American Worker: An Endangered Species' by Frank Wallick which tells it like it is and then some."

Harry Conn, Press Associates, Washington news service for the labor press: "It's about time someone came along and put the serious problem of a healthy workplace in perspective. Someone has come along—Franklin Wallick, the editor of UAW's Washington Report. His handy paperback book, *The American Worker: An Endangered Species*, looks at the problem squarely from the standpoint of a worker."

From Capitol Stuff, Jerome Cahill, New York Daily News: "President Nixon—meet Frank Wallick. With an assist from friends like Carl Carlson, Steve Wodka, Anthony Semeraro, Don Corn and Maurice Veneri, he is the driving force behind an effort to get Uncle Sam off dead center in the field of industrial health and safety."

Bill Becker, President, Arkansas AFL-CIO: "This book should be must reading for every local union officer and staff representative in the country."

Leonard Zubrensky labor lawyer in Milwaukee, Wisconsin: "I never dreamed that anyone could write such a fascinating book about occupational illness."

Gus Lumpe in The Missouri Teamster: "The greatest value of Wallick's book seems to be that he demonstrates that the clean-up of the workplace environment is not a task too big to tackle."

Pulitzer Prize Winner Nick Kotz in The Washington Post: "Frank Wallick has written a stirring, persuasive, fact-filled book about a mostly ignored national problem which should concern us all—health and safety in the workplace. If this book receives the attention it deserves, it will rank with Ralph Nader's 'Unsafe at Any Speed' and Rachel Carson's 'Silent Spring.' But it may well be ignored, as the problem has been, because most of us are thoroughly ignorant about what goes on within factory walls or about the quality of air circulated in air-conditioned office buildings."

IUE News: "For only \$1.50 Frank's book can show you how to become an expert on saving your life, your health, your limbs—and those of your shopmates."

Steel Labor: "The book is a call to arms of the 80 million persons employed in and on the nation's factories, stores, service industries, and farms to get involved in the fight against unhealthy and unsafe conditions on the job."

American Teacher: "A comprehensive, thoughtful, highly readable book, it can be used as a resource in the classroom and in the union hall and central labor council."

The Nation: "An excellent account of occupational illnesses among American workers; factual, informative, well-documented."

Longshoreman Dispatcher: "The book tries to simplify some of the bureaucrats' gobbledygook which has kept workers in the dark about occupational safety and health."

The Machinist: "Wallick's book provides the guidelines for workers and unions to get more leverage within the limit of the Occupational Safety and Health Act. He breaks down into shop language, terms like 'threshold limit values,' decibels, and others."

PERSPECTIVES ON IMPOUNDMENT

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. ANDERSON of Illinois. Mr. Speaker, it has been charged that the administration is impounding funds largely in the human resources area, yet the following figures attest to the invalidity of that claim: Thirty-seven percent of all impoundments came from the highway trust fund alone, another 25 percent of all impoundments are accounted for by the Defense Department; and an additional 6 percent of total impoundments are comprised of funds in the veterans' benefits and services, general government, and space research and technology areas. Thus, over 70 percent of all impoundments being made are not from human areas, but from defense, space, and highway funds. I find it somewhat ironic to note that these are precisely the traditional targets of attack by the very same group of liberals who are now decrying the impoundments being made.

To be sure, there have been impoundments of health, manpower, housing, and environmental funds. But when one examines the rationale for these actions, one sees that they are not deliberate policy maneuvers designed to thwart Federal aid to those in need, but generally wise and responsible policy decisions arising out of sound estimates of national needs and priorities.

INCOME MAINTENANCE IMPOUNDMENTS

Only 2 percent of total impoundments comes from income security funds—welfare, food stamps, social security, and so forth. Moreover, such impoundments constitute only 0.23 percent of the total outlays made for such programs: Put another way, less than one-fourth of 1 percent of expenditures designed to help those in need are currently being withheld by the administration.

Moreover, over 90 percent of the impounded funds under the income security category are attributable to the food stamp program. While it is tempting to cry that the administration is heartlessly withholding funds from the starving poor, it turns out that Congress ordered that impoundment in the appropriation act: It specifically instructed that \$158 million be placed in a contingency reserve to be used when needed (7 United States Code 2011-2025, Agricultural-Environmental and Consumer Protection Appropriation Act, 1973). The specific authority for holding this money in reserve (31 United States Code 665) specifies that if it is determined that such reserve funds are not needed to carry out the program, a rescission of the appropriation should be requested. The fiscal year 1974 budget contains no such rescission request, so it appears that the administration fully expects such funds may still be obligated—though not at this particular time.

Of the remaining \$17 million impounded by the administration out of the income security category, \$12 million is to be used for Social Security Administration construction trust fund purposes. Here again, the intent of the adminis-

tration is not to halt the use of these funds, but to spread them evenly over the years: This \$12 million will be available for expenditure after this fiscal year ends; it would be foolish for the administration to spend such a multiyear authorization all in 1 year and leave the remaining years high and dry.

Finally, \$4.8 million of the remaining \$5 million impounded from income security programs are Railroad Retirement Board funds. Here again, the motive is not malice or indifference, but fiscal responsibility. Every year the Railroad Retirement Board receives \$0.25 percent of the taxable payroll of railroad workers from the unemployment trust fund. This money is to be used for administrative expenses, but if the total amount is not required, the remainder is merely held in reserve—to be returned to the trust fund at the end of the year.

This is exactly what has happened: The board did not use its full allotment, so the rest goes back to the trust fund. In such a situation, is the President supposed to issue an administrative directive to require the board to spend the full amount, whether needed or not, just so he can avoid criticism for impoundment?

HEALTH ASSISTANCE IMPOUNDMENTS

Health is another vital human resource program area, yet the data indicate that in this case the administration is withholding a staggering 0.04 percent of the total health budget. Moreover, almost 67 percent of all the funds impounded under health services are from the Indian Health Service; and once again, it turns out that these funds are to be available for expenditure next year to build hospitals which are now only in the planning stages. As an alternative to impoundment, should the President have just committed funds to build hospitals without blueprints?

The other one-third—\$2 million—was for National Institutes of Health buildings and facilities—again withheld, because it will be available for expenditure next year. A hint of the administration's intention is shown in its request for a rescission of budget authority for some funds under this same program. The amount of the rescission request was only \$500,000, but it could have easily been \$2 million. If the administration really wanted a funding cutback on this program and was presently withholding funds with the intent that they should never be spent, why did it not simply make a slight increase in its rescission request rather than bear the brunt of criticism for impounding such funds? An alternative and more likely explanation is that the administration does intend to spend the funds, but with over a year left to spend them, why should it be in any hurry?

EDUCATION AND MANPOWER IMPOUNDMENTS

In the area of education and manpower, the administration has impounded a rather miniscule 0.74 percent of total outlays. Moreover, 82 percent of the \$78 million impounded in this category is accounted for by National Science Foundation salaries, expenses, and activities. While it is not my purpose here to debate the merit of such expenditures, it should be pointed out that such reductions can hardly be said to

somehow penalize the poor. After all, it is primarily affluent upper middle-class professors, scientists, and technicians who receive the preponderant share of direct benefits from NSF outlays.

The administration gives three reasons for these NSF impoundments: First, to save money by greater operating efficiency; second, to await the completion of plans, designs, and specifications; and third, to allow the President to meet the budget ceiling. These funds will be available next year, so they are not in jeopardy of expiring due to impoundment. The administration has specifically stated that impoundment for these particular funds is a temporary deferral of expenditure, and only if such funds continue to be impounded at this time next year, for example, does it seem fair to question the administration's good faith in this regard. The action to impound these funds only occurred on January 18 of this year.

Roughly 5 percent of education and manpower training funds now being impounded come out of the Howard University fund. On the surface this appears to be a delight to critics of the administration since they can simply point to the impoundment and say, "In spite of the crying need for more black education in this country, look what the administration has done."

However, to do so would be to ignore three important facts: First, the impoundment is temporary and is for purposes of allowing administrative mechanisms to be set up so that once funds are expended they will not be wasted; second, funding for Howard University by the Federal Government already constitutes 61 percent of total academic program operating costs; third, despite the President's alleged insensitivity to the needs of disadvantaged black Americans, Federal funding for Howard University was up 46 percent over last year.

The final 15 percent of impounded education and manpower training funds is accounted for by various Office of Education higher education programs. Of this about \$2 million is being withheld to be expended next year. The other \$10 million cannot be spent after June 30, but it should be underscored that the budget reflects no estimated lapse of budget authority under this program. If the administration intended to withhold these funds until the authority for expenditure expired, this would appear in its estimate of lapsed authority at the end of fiscal year 1973. Since it does not, it seems fair to believe the administration when it says that deferral is temporary and that the funds will be spent this year. The final proof of this lies in the fact that the administration has asked Congress for a budget amendment to allow an additional \$1.1 billion for higher education: A completely inexplicable action if one assumes that the administration is out to gut the higher education budget.

COMMUNITY DEVELOPMENT AND HOUSING IMPOUNDMENTS

Of the projected total fiscal year 1973 outlays for community development and housing, 13.4 percent are being held by the administration as reserves. Of this

amount, 99.5 percent is being held for two purposes: To control inflation, and to keep within the budget ceiling. However, all of these funds will be available for expenditure in the upcoming year.

Roughly 75 percent of all community development and housing funds now being withheld are for the basic water and sewage facilities grants program. I must admit that it would be a distortion of fact to imply that the administration intends to spend these funds, despite the fact that obligational authority will carry over in future years. In this case, it is the administration's view that this program has aided relatively few communities, yet all communities have an obligation to provide such services. The administration does not see why one community should benefit at the expense of another community by being fortunate enough to receive a grant while the other community, which perhaps has equal or greater needs, pays Federal taxes to provide that grant. As an alternative, the administration would like to see urban revenue sharing enacted so that all communities have Federal money to spend on this and other worthwhile projects. If Congress is concerned about the freeze on funds for this purpose, it should expeditiously approve the administration's community development revenue share bill—a legislative proposal made about 3 years ago.

Close to 9.5 percent of impounded funds for community development are accounted for by the rehabilitation loan fund, and a further 4 percent by public facility loans. Here again, the administration does not see the merit of aiding a select few—especially when subsidies have been disbursed without regard to income. Even so, the administration has left itself the option of continued financing of such projects since these funds will still be available next year. Finally, a little over 1 percent of community development funds which are now in reserves were drawn from the Housing Production and Mortgage Credit program—specifically, nonprofit sponsor assistance funding. This action is a temporary one, pending review of the entire Federal housing subsidy operation.

Before concluding in this area, I want to also emphasize that the administration's impoundment actions should be viewed in the wider context of its record during the entire last 4½ years. If you look at the budget data you will see that in fiscal year 1969 total outlays for community development and housing were \$2.3 billion. However, even allowing for the \$529 million that is being impounded in the current year, fiscal year 1973 outlays will still total almost \$4 billion—a 71-percent increase above the level which prevailed when the Nixon administration took office.

So I do not think it can be very accurately argued that the administration has been niggardly when it comes to the problems of our urban areas or the housing needs of low-income Americans. Indeed, its current efforts to force a review of some of the programs in this area are motivated by a genuine desire to do even more by restructuring these programs with a view to obtaining a greater return on each dollar of Federal outlay.

NATURAL RESOURCES AND ENVIRONMENT

Nearly \$1 billion has been impounded out of close to \$7 billion appropriated for natural resources and the environment. Twenty-nine percent of this amount comes from the Forest Service program to construct forest roads and trails, and is being kept in reserve to achieve the most effective and economical use of the funds, as they will be available for expenditure in fiscal year 1974.

I might make the parenthetical comment here that the primary beneficiaries of such forest roads and trails are not campers, tourists, and nature enthusiasts, but logging companies who have leases to cut timber on Federal lands. There is some question in my mind, therefore, as to why general taxpayers should be footing the bill for outlays which accrue to the benefit of profitmaking concerns in the first place. Perhaps some of my liberal friends on the other side of the aisle concerned that these funds be spent immediately can help me with an answer on that particular question.

In total, 35 percent of all resources and environment impoundments are being withheld for the purpose mentioned above. Only 2.8 percent of all impoundments in the resources and environment category will not be available for expenditure after June 30. Moreover, 80 percent of these nonavailable funds come from the Forest Service's forest protection and utilization program, yet these impounded funds represent only 6 percent of total funds already expended under this program. Clearly, then, these impoundments do not represent an attempt by the administration to eliminate entire programs in the natural resources area.

AGRICULTURE PROGRAM IMPOUNDMENTS

One of the more controversial areas of impoundments has been for agriculture programs. Sixteen percent of the Department of Agriculture outlays have been impounded by the administration, and this includes impoundments for programs which the administration fully intends never to reinstate. Fifteen percent of agriculture impoundments will not be available for expenditure beyond June 30, so the administration need only withhold such funds for a few more months to achieve its objectives.

Yet it should also be noted that the majority of such funds are in programs for which large outlays have already been made—evidenced by the fact that total impoundments in programs with funds not available beyond June 30 represent only 12 percent of outlays already made under these programs during the current fiscal year. In addition, in the case of three of the most controversial programs being eliminated by the administration, funds will be available in fiscal year 1974, so that there is a long leadtime for congressional reform of such programs as Rural Electrification Administration, rural environmental assistance, and the rural water and waste disposal programs.

It should be pointed out that the REA program is not being phased out: it is being restructured to reflect the change in the economy over the past 30 years.

The 2-percent interest rate formerly used in that program was set in 1944, when the Treasury bill rate was below that figure. Today, the Treasury bill rate is over 5 percent, and the administration has made the frank admission that it cannot see the necessity for continuation of the 2-percent rate when rural electric cooperatives for the most part can afford a 5-percent rate. The impoundment of funds under REA was done only because it was illegal to use REA funds to make 5-percent loans.

Moreover, the \$450 million in REA funds withheld will be more than matched by a net increase in loan authority next year of \$200 million above the amount of loans which would have been made under the old REA program in fiscal year 1973. The same is true of rural water and waste disposal grants, which have been shifted to the rural development insurance fund. While it is true that no separate authorization for this program is desired by the administration, the fact is that even now—despite impoundments—money is available for carrying out these projects: it is simply coming from another source. Finally, the rural environmental assistance program is being phased out, because the administration does not see the need for subsidizing practices which are profitable to farmers anyway. I strongly support its position on this program.

IMPOUNDED FUNDS AVAILABLE FOR FUTURE EXPENDITURES

A final point which should be made concerns the total amount of funds now impounded which will eventually be spent. It has been claimed in many quarters that present impoundments are far more insidious now than in the past, since they are allegedly being used to reorder priorities contrary to congressional intent. Somehow this perception does not square with the fact that less than 5 percent of all impounded funds will not be available beyond June 30, 1973, a total of less than half a billion dollars.

Yet even this is not a true reflection of the administration's intent, as authority for many programs will expire simply due to program savings and unneeded funds left over at the end of the year. Of all the rationales used for impoundment, the two dealing with inflation control and remaining within the debt ceiling have been the ones used to eliminate programs thought to be unneeded by the administration. Yet it turns out that only \$40 million of all impounded funds have been impounded for those two purposes alone and which, at the same time, will not be available for expenditure in the upcoming year. This represents 0.02 percent of all budget outlays.

VIETNAM AND MISUSED AMERICAN POWER

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. CRANE. Mr. Speaker, there will be discussions for many years to come about

the role of our country in the war in Vietnam.

I am confident that historians will conclude that this commitment was one on behalf of freedom and self-determination for the people of South Vietnam, and one against aggression.

It was an effort to show the world that such aggression would not be permitted to succeed and not to repeat the blunders of a previous generation which believed that peace might be achieved through appeasement. Munich showed conclusively that it could not.

Yet, if our goals in Vietnam were valid, and our purpose unselfish, the unfortunate fact is that the manner in which the war was conducted, from its very beginning, insured that the result would be less clear than the cost should have justified.

Discussing the conduct of the war, Charles J. Stephens, who visited Vietnam three times, once as a member of the Citizen's Committee for Peace With Freedom in Vietnam to study Vietnamization and report on its progress to President Nixon, notes that—

The tragedy of America's involvement in Vietnam is not that the U.S. chose to stand and fight against Communist aggression, but that we chose to stand and fight so badly.

Mr. Stephens points out that—

First, we virtually guaranteed the enemy that his homeland would not be invaded. Second, we did nothing, until the very end of our involvement, to deny the enemy continued access to vital imports through Haiphong harbor. Third, we foolishly delayed many years before cutting the enemy's supply lines in Laos and Cambodia.

In addition, states Mr. Stephens—

... we misused the only offensive element of our strategy, American airpower, by largely limiting it to "reconnaissance" rather than "strategic" bombing, and by unilaterally halting it in the midpoint of the conflict without securing any concessions in return.

It is the future which is important at this time. What have we learned from Vietnam? Charles Stephens expresses the view that—

Vietnam showed we lacked the will to use American power decisively. Vietnam has apparently also drained us of the will to maintain American power. In the next confrontation with the Communists we may not be able to safeguard even our survival.

If Americans learn the proper lessons from the war in Vietnam, we will be in a position not only to safeguard our own survival but also to fulfill our worldwide commitments. If we do not learn such lessons, the situation may be far more perilous.

I wish to share with my colleagues the thoughtful statement of Charles J. Stephens, which appeared as a letter to the editor of the New York Times on February 11, 1973, and insert it into the RECORD at this time.

[From the New York Times, Feb. 11, 1973]

Vietnam: FOLLY OF MISUSED POWER

To the Editor:

The tragedy of America's involvement in Vietnam is not that the U.S. chose to stand and fight against Communist aggression, but that we chose to stand and fight so badly. Never have such self-defeating restrictions been placed on the use of American military power.

First, we virtually guaranteed the enemy that his homeland would not be invaded. What greater incentive could we have possibly given Hanoi to continue the battle? Second, we did nothing, until the very end of our involvement, to deny the enemy continued access to vital imports through Haiphong harbor, imports constituting about 80 per cent of North Vietnam's war material. Third, we foolishly delayed many years before cutting the enemy's supply lines in Laos and Cambodia. Finally, we misused the only offensive element of our strategy, American airpower, by largely limiting it to "reconnaissance" rather than "strategic" bombing, and by unilaterally halting it in the midpoint of the conflict without securing any concessions in return.

It was argued that this was a "limited political objectives. Why then was it logical to bomb the docks at Campha and not the docks at Haiphong? Why was it right to cut the supply lines in Cambodia and Laos in 1970, '71, but not right in 1965, '66, '67, '68, '69? Why was it right to bomb certain strategic targets intermittently and not all continuously? Why was it right to mine Haiphong harbor in 1972, but wrong from 1965 on? These were the years when the Chinese were skirmishing with the Russians. This was also the time of the "Cultural Revolution" which plunged China into near anarchy. If ever there was a time when China was less prepared to ball out North Vietnam, this was it.

Not the "arrogance of power" but the hesitant and timid use of it created the U.S. fiasco in Vietnam. The polarization of our people, the new isolationism, the folly of thinking that we can build a beautiful America while small nations are engulfed in the flames of totalitarian aggression—these are the more ominous repercussions of our Vietnam folly.

For while it is true that President Nixon is extricating America from Vietnam, he cannot extricate us from the world in which we live. And this world will be a perilous one if we abdicate our international responsibilities and fail to reverse the alarming decline in our military power engendered by the disparagement of all things military which was bound to follow the protracted Vietnam agony. By grim contrast, the Russians are forging ahead of the United States in all categories of strategic weapons.

Vietnam showed we lacked the will to use American power decisively. Vietnam has apparently also drained us of the will to maintain American power. In the next confrontation with the Communists we may not be able to safeguard even our survival.

CHARLES J. STEPHENS,

SOMERS, N.Y., February 7, 1973.

CANCER CONTROL MONTH SEES ROSWELL PARK NEARING 75TH

HON. THADDEUS J. DULSKI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. DULSKI. Mr. Speaker, Gov. Nelson A. Rockefeller of New York has proclaimed April as "Cancer Control Month."

In his proclamation, the Governor very properly has cited the outstanding research and treatment work on cancer by the Roswell Park Memorial Institute in Buffalo, N.Y.

This great institution is world-renowned and one of the oldest of its kind.

Indeed, in just a couple of weeks, on May 2, Roswell Park Memorial Insti-

tute will be marking its 75th anniversary.

There has been great progress in the fight against cancer. As a result of research, there are many, many patients who can be cured today when diagnosis and treatment is timely. For many, many more patients, cancer can be controlled by continuing treatment.

But there is much yet to be learned. We must continue with full vigor and support the all-out backing of research and treatment such as goes on daily at Roswell Park and at other research centers around the world.

Mr. Speaker, the Congress has given its support to the fight against cancer. We have enacted progressive enabling legislation and we have backed it up with necessary appropriations.

That medical science is making significant and effective progress is quite evident. Hopefully, a broad-scaled answer is closer at hand.

Mr. Speaker, as part of my remarks, I include the text of Governor Rockefeller's proclamation.

PROCLAMATION

Cancer is one of mankind's most vicious scourges. It strikes, in its many forms, both young and old. Currently, it ranks as the second leading killer disease in New York State.

New York State has long been committed to an unrelenting campaign to vanquish this destroyer. One of the primary weapons employed by the state is its world-renowned Roswell Park Memorial Institute, the State Health Department cancer research and treatment center at Buffalo. The Institute and its staff of 2,000 dedicated professionals have been responsible for numerous scientific breakthroughs.

The Institute, employing the latest surgical and technological advances, provides treatment in its 313-bed hospital to more than 4,000 cancer sufferers and outpatient services to an estimated 75,000 people each year. Its director, Dr. Gerald P. Murphy, is a member of the National Cancer Board and chairman of the National Prostate Cancer Task Force.

The American Cancer Society is playing a significant part in the war against cancer in New York State. In addition to numerous educational programs aimed at alerting the public to cancer's seven warning signals, the Society provides invaluable rehabilitative services to cancer patients and the financial support so crucial to the work of researchers and clinicians.

This fine organization deserves the support of every New York State citizen.

Now, Therefore, I, Nelson A. Rockefeller, Governor of the State of New York, do hereby proclaim the month of April, 1973, as Cancer Control Month in New York State.

Given under my hand and the Privy Seal of the State at the Capitol in the City of Albany this seventh day of March in the year of our Lord one thousand nine hundred and seventy-three.

NELSON A. ROCKEFELLER.

BYELORUSSIAN INDEPENDENCE DAY

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. BIAGGI. Mr. Speaker, 55 years ago, on March 25, 1918, the proclamation of independence by the people of Byelo-

russia took place. I am honored to join with my colleagues in the House of Representatives in paying tribute on this occasion to the brave Byelorussians.

The history of Byelorussian statehood goes back to the ninth century when several Slav tribes founded independent principalities on the territory of what is today Byelorussia. The Byelorussians were forced to live under czarist rule for several centuries until they seized the opportunity afforded by the Russian Revolution of 1917, and proclaimed their independence on March 25, 1918.

They then formed their own democratic government in the capital city of Minsk and began to rebuild their war-torn country. Unfortunately, the Byelorussians did not enjoy their richly deserved freedom for very long. In December of 1918 the Red Army overran Byelorussia, annexed it to the Soviet Union, and all Byelorussians became the Soviet Union's helpless victims.

Since that time, for over five decades, the Byelorussians have been living under the oppressive yoke of the Communists. Present Moscow-Byelorussian relations are strictly colonial in nature and have two distinct aims. One is to exploit the Byelorussian natural resources for the benefit of Russian imperial expansion, and the other is to eradicate Byelorussian nationalism in the hope of fostering a homogenous Soviet empire. The Byelorussians are forced to endure the same bondage which shackles many other eastern and northern European states.

Today, all Americans join with citizens of Byelorussian ancestry in renewing our commitment to the principles of freedom. It is our deeply felt hope that the day is not far off when the people of Byelorussia will be able to enjoy the blessings of liberty.

AN INVITATION TO IMPROVE A GOVERNMENT SERVICE

HON. ALBERT H. QUIE

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. QUIE. Mr. Speaker, complaints have raised about the delay in obtaining final decisions from the National Labor Relations Board due to the backlog of cases pending before the Board.

Various proposals have been made to correct the situation. Two administrative law judges for the NLRB have collaborated on an article in the winter issue of the Administrative Law Review. These judges make some very far-reaching suggestions and I submit the article for printing in the RECORD so that my colleagues in the Congress may be apprised of this recommendation:

AN INVITATION TO IMPROVE A GOVERNMENT SERVICE OR HOW TO MAKE THE NATIONAL LABOR RELATIONS LAW MORE EFFECTIVE AT LESS COST

(By George L. Powell and Lowell Goerlich) *

Lest the reader think that the blunt challenge set forth in the title and the body

* The authors are administrative law judges on the staff of the National Labor Relations Board.

of our article reflects any disrespect to anyone on the payroll of the National Labor Relations Board, be he a member or any other employee, he should know at the outset that such thoughts should be put aside, for the contrary is the truth. Our years of experience in all aspects of the Board's operations have distilled the following essence.

The problem with which this discussion is concerned is obscured and compounded because the published concepts of the workings of the National Labor Relations Act do not always conform to what actually takes place. To illustrate the point, we have set forth immediately below a description of the National Labor Relations Board such as one might find in a government manual or an advanced civics book and thereafter a description of how the Board actually operates in dealing with unfair labor practices.

STATEMENT FOR PUBLICATION

The National Labor Relations Board, an independent federal agency established in 1935, administers the nation's principal labor relations law. This statute, the National Labor Relations Act, generally applies to all employers and employees in interstate commerce except the railroads and the airlines and their employees, which are under the coverage of the Railway Labor Act.

A complex statute, the NLRA has a simple purpose: to serve the public interest by promoting the free flow of commerce through encouragement of collective bargaining, protection of employees' participation or non-participation in employee organizations, and prohibition of specified unfair labor practices by employers or by unions. The achievement of this aim through administration and enforcement of the Act is the overall job of the National Labor Relations Board.

As an agency, the NLRB has five Board members and a General Counsel, each appointed by the President subject to Senate confirmation. The Board members are appointed to five-year terms, the term of one member expiring each year. The General Counsel is appointed to a four-year term. Reappointments may be made and have been made.

Headquartered in Washington, D.C., the NLRB has 31 regional offices and 11 smaller field offices throughout the country, with a Washington and field staff numbering approximately 2,400. The General Counsel has general supervision of the regional offices.

The NLRB has no statutory independent power of enforcement of its orders, but it may seek enforcement in the United States courts of appeals. Similarly, parties aggrieved by the orders may seek judicial review. Attorneys under the supervision of the General Counsel represent the Board in the courts of appeals in these cases.

In its statutory assignment, the NLRB has two primary functions: (1) to prevent and remedy unfair labor practices, by unions or by employers, and (2) to determine by conducting secret-ballot elections whether workers wish to have unions represent them in collective bargaining. The NLRB does not act on its own motion in either function. It processes only those unfair labor practice charges and petitions for employee elections which are filed with it at the 31 NLRB regional offices. Anyone may file—individual, employer or union.

This article concerns itself only with how the Board handles and should handle unfair labor practices.

BLUNT TRANSLATION OF ABOVE STATEMENT

By statute the National Labor Relations Board is established as an "agency of the United States." In this role through its General Counsel it prosecutes unfair labor practice complaints, and through its members it adjudicates unfair labor practice cases and proposes remedies which "will effectuate the policies of the Act." It then may be called

upon to defend its disposition of a matter in a case in a court of appeals. Thus the agency in respect to unfair labor practices acts as both prosecutor and judge. It is similar to a system which would provide that the Attorney General of the United States would be both the prosecutor and district judge in cases arising under the statutes of the United States—or a system under which the district judge handled the prosecution of cases before himself and thereafter defended himself before an appellate court. For the agency to judge, as it does, the cases which it has instituted seems offensive to the maximum *Iniquum est aliquem rei sue esse judicem*: "It is wrong for a man to be a judge in his own case." While this procedure, antithetical to most concepts of due process of law, is sometimes justified under the guise of administrative efficiency and competence (or expertise), it often achieves neither of these.

The obvious evils of this system have no doubt been tolerated because in actual practice the Board members never hear unfair labor practice cases and in a substantial number of cases perform acts only ministerial in nature which are acts tantamount to signature endorsement of the recommendations of their legal staffs. Such circumstance may not be laid to the fault of the members of the Board but results from the physical limitations beyond which five men cannot operate. Thus the Board members never hear an unfair labor practice case, seldom preside over an oral argument or read a record, and only infrequently do they actually review exceptions and briefs of counsel or actually write decisions.

What actually happens is that unfair labor practice cases are tried before administrative law judges, who hear the evidence, weigh it, decide the case and issue a written decision, fitting the facts they find into the previously decided case law and policy.

As for administrative efficiency, the system allows little. Delay is inherent in the system as it has evolved, since a case is never in the first instance submitted to the members of the Board. As a result, the Board members' decisional duty is delegated, in the first instance, to an administrative law judge. On appeal to the Board, his work, except for the taking of testimony, is duplicated for the greater part by the Board members' legal assistants, who operate anonymously and thus bear no responsibility for Board decisions. Moreover, Board decisions and orders are not self-enforcing, but must be enforced in the courts of appeals, a lengthy process.

As for expertise, many past members have become actively associated with labor-management affairs for the first time upon their appointment on the Board. Prior to their appointment few have ever actually represented either management or labor; few have actually negotiated a labor contract or tried or heard a labor case. For those members expertise has been a matter of academic vicariousness.

Thus the agency has been cloaked with a fiction because the system under which it operates is repugnant to administrative expediency or expertise. If there exists any administrative expertise it is lodged in persons who perform the Board members' prime functions for them. And to the extent that the system operates efficiently it can only be by this delegation of functions to others.

The statute provides that the Board is to issue complaints. The General Counsel has final authority "on behalf of the Board" to exercise that function. The statute provides that the Board or a member thereof shall hear unfair labor practice cases, but this function, as noted, is always performed by an administrative law judge as the trial judge. At this level some expertise has crept into the system, for of late the Civil Service Commission has certified for appointment only those persons who have possessed some

experience in the field of labor-management relations.

The statute also provides that the Board shall state its findings of fact and shall issue orders and grant affirmative relief in unfair labor practice cases, but in reality these functions, performed in the first instance by the trial judges, are for the most part administratively approved by the Board members. It is plain, therefore, that the administrative law judge is a necessary functionary in the system and is the very foundation on which the whole administrative process for the trial of unfair labor practices must rest. Without him the whole system would fall, for five members cannot physically perform the functions which presently require the endeavors of almost 100 administrative law judges. Moreover, if the Board members are to fulfill their total duties, they must devote some time to other than unfair labor practice cases.

STATISTICAL EVIDENCE

According to information obtained from an official letter of the Board, the administrative law judges issued 980 decisions in the fiscal year 1971.¹ The parties were satisfied with these decisions in approximately 30 percent of the cases, and no appeals from them were taken to the Board. Therefore, approximately 294 cases went no farther than the initial decision. (That this figure almost equals the total number of cases that went to the courts for enforcement of Board orders will be noted below.)

Comparing these figures to the success the Board has had in enforcing its decisions before the appellate courts, there is found a striking similarity. In cases decided in fiscal 1971, 371 Board orders were before the courts for enforcement. Of these 74 percent or 275 percent of the appeals the Board agreed with the judge's decision but added some comment; in 12 percent of the appeals the Board reversed in part; and in 8 percent the trial judge was completely reversed. Thus, 80 percent of the original decisions were completely affirmed by the Board and 92 percent were affirmed in whole or in part.

In cases that were appealed to the Board, 65 percent of the decisions of the judges were adopted *in toto* by the Board; in another 15 were enforced in full; 12 percent or 46 were enforced with modification; 4 percent or 15 were remanded; one was partially affirmed and partially remanded; and 9 percent or 34 were reversed and the Board order set aside. A comparative table shows:

FISCAL YEAR 1971

(In percent)

	Initial decisions on appeal to the Board	Board decisions on appeal to the courts
Adopted in full.....	80	74

Statistics are not available to show the percentage of cases wherein the appellate courts reinstated a decision of the administrative law judge that had been reversed by the Board.²

¹ Letter to Robert P. Weil from Acting Chief, Division of Judges, Charles W. Schneider, dated June 5, 1972.

² The great respect that the courts of appeals have for decisions of NLRB trial judges is illustrated by the recent decision in *Ward v. NLRB*, 68 Lab. Cas. 12,759 (5th Cir. June 5, 1972), reversing *Everett Construction Co.*, 186 N.L.R.B. No. 440 (1970). In that case the trial examiner (as he was called) found that the Act had been violated. The Board reversed and dismissed the complaint, and the in-

DOES THE BOARD DUPLICATE THE WORK OF THE TRIAL JUDGE AND IS IT PROFITABLE?

If no appeal is taken from an NLRB trial judge's order within 20 days, a Board order is issued automatically affirming the initial decision. Thus with respect to 80 percent (294) of the 980 decisions in fiscal 1971 issued by the trial judges, the parties did not exercise their right to appeal.

The corollary is that 70 percent of trial judges' decisions were appealed to the Board. A Board member simply does not have time to review each such appeal. Indeed it is doubtful that the record alone in an average case can be thoroughly reviewed in one day, much less the exceptions and the briefs of the parties and the judge's decision.³ The Board seldom hears oral argument.

Therefore, the Board members' statutory functions on appealed unfair labor practice cases must be assumed by other persons. That the Board can fulfill or is fulfilling its statutory function without substantial assistance is sheer fiction. Who then actually performs the statutory functions of the Board, which are to "state its findings of fact" and "issue and cause to be served an order requiring such person to cease and desist from such unfair labor practice, and to take such affirmative action as will effectuate the policies of the Act" where an unfair labor practice is found, and to "state its findings of fact" and "issue an order dismissing the complaint" where unfair labor practices are not found after the case has left the trial judge? These functions are performed with statutory approval by legal assistants to Board members who review the transcripts and prepare draft opinions. Here lies one of the vices in the system, for these assistants, lacking statutory decisional responsibility, are neither certified by the Civil Service Commission as competent, experienced persons in the field of labor-management relations, as are the administrative law judges, nor generally possessed of expertise in the field. Many are youngsters in the profession.

On appeal, the work of the trial judges is essentially duplicated by these legal assistants except that those reviewing the cases do not have the added benefit of actually hearing the witnesses testify and "feeling" the trials. A time factor is added in that the case is prolonged for many months on review, during which period the irritation from which the case springs continues to seethe.

Moreover, the Board members are exposed to the whims and caprices of this group of assistants, since the Board members, unable to make personal reviews of the record, must rely upon their presentations. Under this system, a litigant may never have his point of view actually submitted to a Board member. Thus the litigant never really has a day in court before the Board members, who by statute are commanded to make the decision. To a lawyer, practice before the Board is filled with frustrations and anxieties; the lawyer never knows whether his client's case has been heard by those who decide.

At the present time even after the duplication of effort set out above, the Board reversed the trial judges, in full, in only 8 percent of all the cases in fiscal 1971! And think of the months of delay that were needed to accomplish this!

dividual involved appealed at his own expense. The court of appeals concluded its opinion reversing the Board by saying that the trial examiner's result "is . . . the only result which the evidence permits."

"The petition for review is granted. The order of the Board is vacated and the case remanded for further proceedings consistent with this opinion and with the original findings and decision of the Trial Examiner." *Id.* at 24,427.

³ Transcript pages averaged 331 per case in fiscal 1971.

The legal assistants who did the review work for the Board members in fiscal 1971 numbered 105 and were specifically attached to individual members for payroll and supervision, with each member having approximately one-fifth of the total. The money spent for the Board members and their staffs was \$3,672,000 in fiscal 1971. Thus, \$3,480,000 was spent for Board staff and support services in addition to salaries of the Board members of \$192,000. (The annual salary of each of the four members is \$38,000 and that of the Chairman is \$40,000.) It is arguable that the very presence of Presidential appointees looming over the shoulder of the trial judge, and available to the parties themselves, tends to "keep in line" an independent judge, but it also is arguable that a competent person rises to fill his responsibilities. It is also arguable that people like to appeal from adverse decisions. But, as in all things, a compromise usually is struck in order to get "the most for the money." Isn't \$3,000,000⁴ really too much to pay for 78 decisions (8 percent of 980), a substantial number of which are themselves reversed by the circuit court of appeals?

SOLUTION TO DUPLICATION AND EXPENSE

Shorn of the fiction which surrounds the Board, the truth is that the only day in court a litigant may be assured of is the presentation of his case before the trial judge. Fiction therefore ought to be renounced and the judge's function should be recognized for what it has become and should be separated from the frustrations of the system. In view of the nature of the review and his certified competence in the field, it seems sensible that the decision of the judge who hears the testimony, makes findings of fact which as to credibility are final, finds and states the law and contrives the remedy, ought to be final and reviewable only in the court of appeals. If his decisions were final, they would patently constitute a more efficient and informed achievement of the purposes of the Act and contribute to the furthering of peaceful and harmonious relationships between management and labor. These administrative law judges, equipped with the know-how in the field and permitted personal contact with the litigants and enjoying a recognized status, may better promote settlements and render decisions with a rational understanding of the problems which face management and labor.

Administrative law judges are presently appointed from a roster furnished by the Civil Service Commission in conformity with Civil Service practices. They gain admission to the roster because they are seasoned lawyers, are qualified experts in the field of labor-management relations law, have had practical experience in the field and satisfy the prerequisites for decisional responsibility. No other persons who deal with the decisional process in connection with unfair labor practices are or must be so qualified. Considering the competency of the trial judges ensured by the Civil Service Commission, it is unreasonable that his decision should be subject to review by members of a Board who cannot do it or by legal assistants whose expertise and competency have not been accredited by the Civil Service Commission.

Moreover, the system has developed the proceedings before the judges to the point where they are akin to trials in district courts. They are no longer administrative proceedings conducted with the laxity or informality of an administrative agency. This has come about because the cases are of a type which require a strict observance of the well-established courtroom procedures. They deal with the guilt or innocence of the charged party and the consequences of error may have serious impacts not only on the litigant but

⁴ Not all of the \$3,480,000 was spent on unfair labor practice cases.

also on the entire field of labor-management relations. In these cases, in order that fair play and due process can be achieved, trials must follow the basic standards which regulate trials in district courts. The courts of appeals so require.

OUR PROPOSAL

We propose that what is practice should be acknowledged in theory. We propose that the administrative law judges become labor judges, whose decisions are final, subject to review by the appropriate appellate courts; that these judges shall be appointed by the Board from a roster of qualified personnel furnished by the Civil Service Commission; that these judges shall have exclusive jurisdiction over other labor-management cases except where a jury is involved; that the jurisdiction of the judges shall be nationwide; and that they shall be assigned to hear the case in the place where the cause of action arises. All other jurisdiction under the Act will be retained in the Board.

Our proposal not only gives legal effect to what in part is now practice but abolishes a fiction which has caused concern, turmoil and frustration among litigants and lawyers. It will propagate the purposes of the Act, one of which is to "provide orderly and peaceful procedures" in that:

(1) If labor courts with the jurisdiction suggested are established, able lawyers experienced in the field of labor-management relations, from both management and labor, will be encouraged to participate in labor-management affairs on a judicial level, and thereby a greater experience, competence and understanding will be brought to the field, all of which will contribute to the lessening of tensions between management and labor, an objective of the National Labor Relations Act.

(2) The additional expense to the government incurred as a result of the present duplication of the trial judges' work will be eliminated, resulting in substantial savings to the government.

(3) The time lag between the trial judges' decisions and the Board's decisions will be avoided and pending uncertainties and contentions will be more speedily resolved, with the result that the causes of labor disputes affecting interstate commerce will be more expeditiously removed.

(4) Expertise, indigenous to a blue ribbon type judge, will be available to litigants in all branches of labor-management relations.

(5) Decisions will result which will have a more compatible relationship with the problems of the litigants who appear before the labor judge, for, because he has been personally exposed to the litigants, his interests will not be wholly academic.

(6) The case load of Board members will be decreased, which will allow them a greater personal participation in the affairs of the Board and a more active surveillance of the administration of the Act.

(7) The Board will no longer be affected with a split personality which causes it to act as prosecutor and judge in the same case. Thus it may concentrate on the enforcement of the Act's purposes and policies unrestrained by its own past judicial pronouncements.

(8) Labor-management cases may be instituted before labor judges, experts in their field, whose knowledge of labor-management affairs will enable them to suggest rational settlements and render more speedily meaningful decisions.

(9) Relieving the district courts of significant labor-management jurisdiction will allow district judges more time for consideration and adjudication of the cases with which the district courts are more generally concerned.

(10) By reason of the expertise of the labor judge, an empathy may be created between the judge and the litigants which

will contribute to the settlements of disputes and issues before him.

(11) Confidence in the competence and impartiality of the adjudicating forum will be enhanced by the knowledge that the labor judge is chosen for his merit and achievements in the field of labor-management relations and not as a political accommodation.

(12) The Labor Court system will contribute to an appropriate consideration of stare decisis and to a stability and reliability in the field of labor-management relations now generally in doubt.

(13) The policy of the Labor Board is now a matter of decisional law as interpreted by the courts of appeals and the Supreme Court. Should the Board wish to establish new policy it can do so in either of two ways, i.e., by using its rule-making power, or by issuing a complaint based upon its new theory and testing the theory before the administrative law judge and the courts of review—just what it does now in total effect.

(14) The appointment of judges will be exposed to a minimum of politics with its attendant problems in that the judges will be chosen from a roster of qualified personnel furnished by the Civil Service Commission, yet the appointment of the judges by the Board will credit current public opinion as it is reflected in the Board.

SPECIFIC PROPOSALS

We propose that:

I. The Judges Division of the National Labor Relations Board shall be continued as an independent agency of the United States Government and shall be known as the Labor Court of the United States, the members thereof to be known as Judges of the Labor Court or Labor Judges.

II. The Labor Court shall have exclusive original jurisdiction of all actions involving unfair labor practices arising under Section 7 and 8 of the National Labor Relations Act, and original jurisdiction concurrent with the district courts of the United States of any civil actions arising under the National Labor Relations Act or involving a labor dispute as defined in Section 2(9) of the Act, or in which a labor organization is a party. The Labor Court shall also have original jurisdiction concurrent with the district courts of the United States and courts of the states of civil actions arising under the Fair Labor Standards Act of 1938, as amended, and the Labor Management Reporting and Disclosure Act of 1959, as amended.

III. Trial in the Labor Court shall be a labor judge without a jury. Civil actions within the jurisdiction of the Labor Court in which the right of trial by jury is preserved as declared by the Seventh Amendment to the Constitution, or as given by a statute of the United States, may be removed to a district court of the United States having jurisdiction of any party (other than the party who instituted the action who is deemed by instituting such action to have waived trial by jury) prior to the time required for him to file his responsive pleading in the Labor Court.

IV. Until rules of procedure are promulgated by the Labor Court and approved by the Board, the Court shall apply the Rules of Civil Procedure for district courts of the United States and the statutes of the United States relating to district courts of the United States, so far as practicable.

V. Appeals from final orders and judgments of the Labor Court shall be as provided in the Federal Rules of Appellate Procedure and the relevant statutes of the United States governing appeals from district courts of the United States.

VI. The labor judge, in respect to the administration of his duties and the enforcement of his orders, shall possess the same powers as the judges of the district courts of the United States, including the power to punish by contempt and to issue and enforce subpoenas *ad testificandum* and *duces tecum*.

VII. The Board, subject to the civil service laws, and upon certification for expertise by the Civil Service Commission, shall appoint as many additional judges of the Labor Court as the Board from time to time finds necessary for the proper performance of the Labor Court's duties, and they shall hold office during good behavior. Initially administrative law judges holding office may serve as labor judges for a period of two years, after which they may be reappointed by the Board, subject to the civil service laws and upon certification for expertise by the Civil Service Commission.

VIII. Judges of the Labor Court may be removed by the Board after notice and opportunity for a public hearing, for inefficiency, neglect of duty or malfeasance in office, but for no other cause. Appeal from such removal may be processed through the civil service procedures.

IX. Labor judges shall not engage in any other business, vocation or employment.

X. An administrative office of the Labor Court, under the direction of the Board, shall be maintained in the District of Columbia, where a director of administration of the Labor Court, appointed by the Board, shall be stationed. Deputy directors of administration of the Labor Court, appointed by the Board, may be stationed in such other cities as the Board may determine. The director shall receive and preserve pleadings and other papers filed with the Labor Court and shall maintain a docket of cases pending before the Labor Court. He shall assign cases to each labor judge for trial or other proceedings, secure suitable courtroom accommodations for the trial, publish and distribute the decisions, orders and judgments of the labor judges, provide clerical services generally for the Labor Court and perform such other duties as are from time to time required by the Court or the Board. The Board shall furnish the director and the Labor Court such personnel as will be adequate to meet their needs and functions. In assigning a case to a labor judge, due consideration shall be given to the geographic area of his assignment and to his current caseload with the objective of equalizing geographic assignments and caseloads among the several judges. Trials shall be conducted in the judicial district where the unfair labor practice in question was alleged to have been committed.

XI. Unless there is a controlling Supreme Court precedent, a labor judge shall follow and be bound by the precedent established by the court of appeals for the circuit wherein the unfair labor practice was alleged to have been committed or other cause of action arose.

XII. The National Labor Relations Board shall retain all other jurisdiction under the National Labor Relations Act.

A distinguishing feature of our proposal is that it contemplates that labor judges will be appointed for competency and expertise in the field without political intervention, except as it may be reflected in current public opinion as it is currently represented in the appointments of the Board members. Such appointments have generally been bipartisan.

DRUG TESTING PROGRAM

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, March 26, 1973

Mr. ASPIN. Mr. Speaker, the military is increasing the accuracy of its drug testing program, but much more improvement is needed before the program

is really a success. I recently released new statistics revealing an upward swing in the accuracy of the program. But the military still has a long way to go before the program successfully identifies all drug users within the military. For example, within a recent week at Tripler Army Medical Center in Hawaii, only 40 percent of the heroin users were correctly identified in its accuracy sample. Hundreds of GI's are still probably slipping through the drug testing screen.

Low accuracy ratings have also been recorded in recent weeks by the Air Force in San Antonio, Tex., the U.S. naval hospital in San Diego and Oakland, and one private laboratory—Washington Reference Laboratory in Washington, D.C. At present, the worst situation exists at the Air Force Base in San Antonio where only 62 percent of the heroin samples, 68 percent of the barbiturate samples, and only 40 percent of the amphetamine samples, are correctly identified.

However, the overall success rate has been improved in the last year.

The Pentagon has exceeded its goal of correctly identifying 90 percent of the samples of heroin and amphetamine users. But the drug testing program still incorrectly identifies 19 percent of the barbiturate users.

While progress has been made, more is needed until the drug screening program correctly identifies all drug abusers and offers them help.

HOUSE OF REPRESENTATIVES—Tuesday, March 27, 1973

The House met at 12 o'clock noon.
The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

Be of good courage and He shall strengthen your heart, all ye that hope in the Lord.—Psalms 31: 24.

Almighty God, unfailing source of light and life, whose glory is in all the world and who calls us to walk with Thee that we may truly live, prepare our hands and hearts for the work of this day. Help us to turn from the errors and mistakes of the past, treasuring only the wisdom and the humility they may have taught us.

Deepen within us a love for goodness, truth, and beauty. Renew in us the spirit which enables us to really live all our lives and which helps us to lead our citizens toward a more abundant life together.

Bless our Nation with Thy most gracious favor. Keep her firm in her faith in freedom, just in her exercise of power, generous in her protection of weakness and wise in her activities on behalf of mankind. May righteousness and good will mark our national life and may our deepest trust ever and always be in Thee.

In the spirit of Christ we pray. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Marks, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed a joint resolution of the following title, in which the concurrence of the House is requested:

S.J. Res. 21. Joint resolution to create an Atlantic Union delegation.

The message also announced that the Vice President, pursuant to Public Law 91-510, appointed Mr. HELMS as a member of the Joint Committee on Congressional Operations in lieu of Mr. WEICKER, resigned.

THE HONORABLE CORINNE C. BOGGS

Mr. O'NEILL. Mr. Speaker, I ask unanimous consent that the gentleman from Louisiana, Mrs. CORINNE C. Boggs, be permitted to take the oath of office today. Her certificate of election has not arrived, but there is no contest, and no question has been raised with regard to her election.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mrs. BOGGS appeared at the bar of the House and took the oath of office.

PROJECT VIETNAM

(Mr. HALEY asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. HALEY. Mr. Speaker, in these hopefully closing days of U.S. involvement in the war in Vietnam, I would like to pay tribute to two outstanding Americans from my congressional district who performed so well during this war although they were not wearing military uniforms at the time of their service. I am referring to Al and Del Ettinger who gave birth to an idea in 1966 called Project Vietnam which eventually was responsible for sending 12,175 gift packages to soldiers from the Sarasota County area who were stationed in South Vietnam.

Anyone who has ever served the Nation in wartime on foreign soil appreciates most fully the importance of mail call and will readily agree it was usually the most effective morale boosting event of their days in combat. Al Ettinger remembered this fact of service life from his experience during the First World War in the famed Rainbow Division and later in the Second World War as a marine. He became determined to make as many soldiers as possible know that they were remembered and appreciated during this country's most recent war. He and his wife started Project Vietnam alone, but as the months passed they began receiving help from volunteers, local civic organizations, and private contributors. Their humanitarian gesture stands proudly alongside the many other patriotic acts carried out by Americans during the war in Southeast Asia.

In recognition of their unselfish efforts, these two very special Americans were

named Citizens of the Year in Sarasota and became recipients of a national award from the Freedoms Foundation at Valley Forge. I would personally like to thank Mr. and Mrs. Al Ettinger, who with many others went beyond the call of duty to relieve some of the heavy burden our men in uniform were called upon to shoulder during the long Vietnam war.

IMPOUNDED FIRE CONTROL FUNDS RESTORED

(Mr. RARICK asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. RARICK. Mr. Speaker, I take this time to inform our colleagues that I have been advised that the \$4 million previously impounded from the cooperative forest fire prevention program has been restored by the Office of Management and Budget.

This will allow the fire protection program to continue at the \$20,027,000 level already contracted for in current fiscal year.

I have been assured by the Chief of Forest Service that the money will now be made available to State foresters for this vital program; and that the proper State authorities have been so informed.

PERMISSION FOR COMMITTEE ON RULES TO FILE REPORTS

Mr. MADDEN. Mr. Speaker, I ask unanimous consent that the Committee on Rules have until midnight tonight to file certain reports.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

FOREIGN GIVEAWAY TO ALGERIA

(Mr. WOLFF asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WOLFF. Mr. Speaker, while we sit here earnestly delving into means to tighten the reins of Federal spending—while the Office of Management and Budget cuts the heart out of needed domestic programs—the administration has the temerity to approve a foreign giveaway of monumental proportions to a country with which we do not even have diplomatic relations.

According to a report which I saw this morning, the Directors of the Export-Import Bank have approved a deal which, if we in the Congress have any fiscal integrity left, we will try to bring to an immediate halt.

Despite the fact that we do not have diplomatic relations with Algeria, the Export-Import Bank has approved a \$402 million financing package to construct an LNG plant in Algeria.

To put the icing on the cake, Algeria insisted on putting up the faith and credit of their Government instead of repaying the loan out of the proceeds from the gas. Faith and credit. Look at the history, here again our energy needs are to be put at the mercy of an unfriendly government. How stupid can we get?

The safety of liquefied natural gas transportation cannot yet be assured. My colleagues will recall that I have spoken on the floor about a Bureau of Mines report as well as a Coast Guard study both of which present serious questions regarding the safety of LNG transport.

I feel we must act to stop this deal because of the cash outflow from our country and because, in addition to a dollar drain, this is of questionable safety in the first place.

Mr. VANIK. Mr. Speaker, will the gentleman yield?

Mr. WOLFF. I yield to the gentleman from Ohio.

Mr. VANIK. The gentleman has made a very appropriate statement. I want to agree with him.

It is incredible that the Export-Import Bank has just authorized a \$157 million direct loan at 6 percent interest to Sonatrach, Algeria's state-owned gas and oil monopoly, for liquefied natural gas facilities to be constructed at Arzew. The action of the Export-Import Bank provides loans of \$157 million and guarantees of \$157 million in matching loans for the same project from the First National City Bank of New York and other lenders. To my knowledge, this is the first time the Export-Import Bank has guaranteed loans to a nation with whom America does not have diplomatic relations.

Another extraordinary feature of this project consists of an Export-Import Bank guarantee for \$52.5 million that Sonatrach—the Algerian monopoly company—expects to borrow from non-U.S. lenders to help cover "local costs" of the project. This constitutes a recent increment to Export-Import Bank policies since it guarantees a loan made by foreigners to foreigners.

I am fully aware of our need for energy resources—gas needs are critical—but it appears necessary to establish some reasonable limitations on what the American taxpayer must pay to get it. Under the present plan \$314 million will be exported to build a facility in a country with which we have no diplomatic relations. All of the risks and all of the interest subsidy is being thrust on the back of the American taxpayer.

Several weeks ago, the Export-Import Bank granted a 6-percent loan to a Japanese company for the purchase of American aircraft. How can we justify a

taxpayer-subsidized loan to a developed company already swamped with surplus dollars?

In fiscal year 1972 the Export-Import Bank loaned \$2.3 billion at subsidized interest rates which are not available to American enterprise. In addition, in fiscal year 1972, it has provided guarantees of \$1.2 billion, all of which are a contingent liability of the American consumers. Under present laws, the Export-Import Bank can do anything it likes provided the President says it is in the national interest. It can loan and guarantee loans to any citizen in any nation at interest rates which discriminate against comparable enterprise developed in America.

If the Export-Import Bank can continue unrestrained in subsidized loans and guarantees to dollar-heavy nations and high risk loans and guarantees to nations which despise us to the point of nonrecognition, the Export-Import Bank may well be on the way to exporting what little remains of national solvency and credibility.

Mr. WOLFF. I thank the gentleman.

REQUEST FOR APPOINTMENT OF CONFEREES ON H.R. 2107, RURAL ENVIRONMENTAL ASSISTANCE PROGRAM

Mr. POAGE. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 2107) to require the Secretary of Agriculture to carry out a rural environmental assistance program, with a Senate amendment thereto, disagree to the Senate amendment, and request a conference with the Senate thereon.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. TEAGUE of California. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

A SAD DAY AND A HAPPY DAY

Mr. HÉBERT. Mr. Speaker and Members of the House, today is a sad day and also a happy day. We have just witnessed a ceremony that recalls to us the sadness of the day when our majority leader, the gentleman from Louisiana, Hale Boggs left us. It is a happy day for us to welcome the gentlewoman from Louisiana, "LINDY" Boggs, to this body.

It was 33 years ago that LINDY came here with Hale and myself to begin our service in the Congress. It is a happy day, LINDY, for the Members of the Louisiana delegation. It is our pleasure at this time to welcome you to this body and to say we are glad because it is not as a stranger, but as an old-time friend and somebody who knows us, as we know her.

Mr. Speaker, may the days ahead in this body be as long and as happy for the gentlewoman from Louisiana as they were for Hale.

Our hand of welcome is out to the gentlewoman from Louisiana, and may God bless her.

Mr. SIKES. Mr. Speaker, it is with great pleasure that I join in extending a personal welcome to a courageous and lovely lady, a long time friend, and the newest Member of this body.

LINDY Boggs is no stranger to Washington. She came here with her able and distinguished late husband in 1941 and she has been well and affectionately known since that time not only for the effective and constant support and the love she gave to Hale Boggs, but for her own contributions to a stronger Democratic Party and a better America.

Through the years Hale Boggs was destined to become one of the Nation's great Congressmen and an outstanding leader of his party and LINDY was constantly at his side helping and encouraging in his important work.

Now that Hale has been lost to us, we are indeed fortunate that LINDY has picked up his fallen mantle and that she will carry it forward in the splendid tradition of her husband. We know also that LINDY Boggs will leave her own imprint on the pages of history. Her ability has long been recognized and I am confident her contributions will be many and they will be important.

I compliment the people of her district for exercising the good judgment to send her to Congress. They have a deserved pride in her, a pride which we in Congress also share.

Because of the long and warm friendship which Mrs. Sikes and I have had for LINDY and Hale, I am particularly happy to join in this welcome. I know that she brings courage and strength and ability which are needed in the deliberations of this body. I know also that this lovely and devoted lady will hold high the best traditions of good Americanism in the Halls of Congress.

Mr. MATSUNAGA. Mr. Speaker, I take this opportunity to join my distinguished colleagues in welcoming the Honorable LINDY Boggs to the House of Representatives. I am sure she will serve the citizens of Louisiana's Second Congressional District as effectively and honorably as did her husband, Hale, before his tragic disappearance in the Alaskan wilderness.

During Hale's distinguished service in the House, I developed a close friendship with the Boggs family and I am especially pleased to be able to welcome LINDY to the House. I wish her a long and rewarding term as Louisiana's Congresswoman. In the final analyses the people of her district, her State, and the Nation will prove the true beneficiaries because LINDY Boggs came to Congress.

Furthermore, Mr. Speaker, I am pleased to note that we are now assured of the continuation of the famous Boggs garden parties which have become a Capitol Hill tradition.

GENERAL LEAVE

Mr. HÉBERT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on this subject.

The SPEAKER. Is there objection to

the request of the gentleman from Louisiana?

There was no objection.

FOREST AND GAME MANAGEMENT

(Mr. WYATT asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. WYATT. Mr. Speaker, A well-founded, intensive forest management program is needed not only to meet increasing demands for wood fiber, but to meet increasing demands for other amenities of the forest, too.

Game populations, for instance, increase and thrive in managed young growth stands and this has been pointed out by a number of studies conducted by game experts at various universities scattered around the Nation.

Old growth stands have been described as "biological deserts" while the reverse is true of young growth timber stands. In young growth, say the experts, more sunlight reaches the ground because the canopy or "over-story" has been opened up. Sunlight is necessary, not only for trees, but for low-lying brush and shrubs vital in the food chain for many animals.

And any hunter knows that "edge effect" is important in big game habitat. "Edge" results in timber harvest areas when openings are created by removal of timber and hunters know that elk and deer feed in the openings where the browse and forbs are found but they like to have thickets and escape routes into the thickets available when danger approaches.

Log landings, secondary haul roads and skid trails not only produce a great deal of browse and forbs but are also excellent as escape routes.

Intensive forest management can, and does, provide for the multiple amenities of the forest.

INTERNATIONAL TRADE

(Mr. DENT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DENT. Mr. Speaker, this morning I had the opportunity to listen to a well-known international banker. He announced that by mid-summer the balance of trade would be in our favor and we would no longer be in a deficit position.

This is reminiscent of the period of 1960, 1961, and 1962, to my memory. It is nothing but the same old ploy that has always been pulled every time this Congress faces a problem of a deficit in our international trade. They will change it around; it is very simple; they will export less to the United States and import a little more from the United States for a while and change it to such a position that we will start to shout "hallelujah" and give them 5 more years of coming into the American market. If we do what the President wants us to do, as he suggested I believe a week ago, I can assure

this Congress that in the next 5 years you will not recognize this country.

ELECTION TO COMMITTEE ON FOREIGN AFFAIRS

Mr. MILLS of Arkansas. Mr. Speaker, I offer a privileged resolution (H. Res. 325) and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 325

Resolved, That Donald W. Riegle, Jr., of Michigan, be, and he is hereby, elected to the standing committee of the House of Representatives on Foreign Affairs.

The resolution was agreed to.

A motion to reconsider was laid on the table.

ELECTION TO COMMITTEE ON BANKING AND CURRENCY

Mr. MILLS of Arkansas. Mr. Speaker, I offer a privileged resolution (H. Res. 326) and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 326

Resolved, That Corinne C. (Lindy) Boggs, of Louisiana, be, and she is hereby, elected to the standing committee of the House of Representatives on Banking and Currency.

PROVIDING FOR STRIKING OF MEDALS IN COMMEMORATION OF ROBERTO WALKER CLEMENTE

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 3841) to provide for the striking of medals in commemoration of Roberto Walker Clemente.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. GROSS. Mr. Speaker, reserving the right to object, I shall not object, or at least I hope I shall not object.

Mr. MOORHEAD of Pennsylvania. Will the gentleman yield?

Mr. GROSS. I yield to the gentleman.

Mr. MOORHEAD of Pennsylvania. This is the bill I discussed with the gentleman from Iowa the other day.

Mr. GROSS. And there is almost no expenditure of funds?

Mr. MOORHEAD of Pennsylvania. There is no expenditure from the Treasury.

Mr. GROSS. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the bill, as follows:

H.R. 3841

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in recognition of the outstanding athletic, civic, charitable, and humanitarian contributions of Roberto Walker Clemente, the Secretary

of the Treasury is authorized and directed to strike and furnish to the Chamber of Commerce of Greater Pittsburgh, Pittsburgh, Pennsylvania, (1) one gold medal, to be awarded at the discretion of such organization, with suitable emblems, devices, and inscriptions to be determined by such organization subject to the approval of the Secretary of the Treasury, and (2) not more than two hundred thousand duplicate medals of sizes and alloys to be determined by such organization subject to the approval of the Secretary of the Treasury, to be made and delivered at such times as may be required by such organization in quantities of not less than two thousand. Any profits derived by such organization from the sale of such medals shall be contributed by such organization to the Roberto Clemente Memorial Fund, Pittsburgh, Pennsylvania. The medals are national medals within the meaning of section 3551 of the Revised Statutes (31 U.S.C. 368).

SEC. 2. The Secretary of the Treasury shall cause such medals to be struck and furnished at not less than the estimated cost of manufacture, including labor, materials, dies, use of machinery, and overhead expenses, and security satisfactory to the Director of the Mint, shall be furnished to indemnify the United States for the full payment of such costs.

SEC. 3. No medals shall be made under the authority of this Act after December 31, 1974.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

SEVENTH ANNUAL REPORT OF THE NATIONAL ENDOWMENT FOR THE HUMANITIES—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Education and Labor:

To the Congress of the United States:

I am pleased to transmit the Seventh Annual Report of the National Endowment for the Humanities, for fiscal year 1972.

It is essential that the disciplines of the humanities—languages, history, philosophy, literature and ethics among others—be brought to bear on problems of contemporary concern, both national and international. The Federal Government recognizes this need—and has been responsive to it.

I particularly commend to your attention the program of "Youthgrants in the Humanities," begun in fiscal year 1972, which provides needed support for young people doing scholarly work in the humanities. Another impressive effort is the Endowment's State-Based Program, which, in less than two years, has established committees in 38 States to encourage public education. The "Jefferson Lecture in the Humanities," aimed at bridging the gap between humanistic learning and public affairs, is also successfully underway.

The public's response to the work of

the National Endowment for the Humanities may be measured in part by the fact that public contributions to the Endowment have exceeded federally appropriated funds for the third year in a row. This is clear evidence of broad public support for the objectives of the National Endowment and, I believe, gives added justification to the steadily increasing funding which I have requested and which the Congress has provided for its very worthwhile endeavors.

RICHARD NIXON.

THE WHITE HOUSE, March 27, 1973.

WATER RESOURCES OF THE DELMARVA PENINSULA, A SUMMARY REPORT TO THE CONGRESS—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 93-68)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Interior and Insular Affairs and ordered to be printed with illustrations:

To the Congress of the United States:

I am pleased to submit the enclosed report, "Water Resources of the Delmarva Peninsula, a Summary Report to the Congress," by E. M. Cushing, I. H. Kantrowitz, and K. R. Taylor, which was prepared in compliance with Public Law 89-618 (S. 2287), October 4, 1966.

The Delmarva study was made in response to the specific act cited above, which was sponsored by Senator J. Caleb Boggs of Delaware (S. 2287) and Secretary of the Interior Rogers C. B. Morton (H.R. 9922) who was a Representative from Maryland in 1966. Public Law 89-618 authorized and directed the Secretary of the Interior to make a comprehensive investigation of the water resources of the Delmarva Peninsula. The principal objective of the study was to determine the availability of fresh-water supplies to meet future needs of the peninsula area. The summary report indicates that the amount of fresh water that can be developed perennially on the peninsula is about 1,500 million gallons per day. This amount is more than 10 times the use in 1970 and about six times the estimated use of water on the peninsula by the year 2010.

In addition to this summary report to the Congress, required by Public Law 89-618, the Geological Survey plans to compile and publish in 1973 a more detailed report on the study for use by public and private agencies and individuals. That report will provide information for use in long-range planning, development, and management of water supplies.

RICHARD NIXON.

THE WHITE HOUSE, March 27, 1973.

CALL OF THE HOUSE

Mr. CHARLES H. WILSON of California. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. O'NEILL. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

[Roll No. 58]

Abzug	Frelinghuysen	Minish
Andrews, N.C.	Gialmo	Mink
Armstrong	Gray	Nelsen
Aspin	Harsha	Nix
Badillo	Harvey	O'Brien
Bell	Hawkins	Price, Tex.
Bingham	Helstoski	Rangel
Blatnik	Hollifield	Reid
Burke, Calif.	Horton	Rooney, N.Y.
Carney, Ohio	Hudnut	Roybal
Chisholm	Karth	Sikes
Clark	King	Staggers
Derwinski	Koch	Stanton
Diggs	Kuykendall	J. William
Esch	Lent	Steiger, Wis.
Eshleman	Madigan	Tiernan
Flowers	Mann	Wilson, Tex.
Ford	Meeds	Young, Ill.
William D.	Milford	

The SPEAKER. On this rollcall 379 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

CHANGE OF LEGISLATIVE PROGRAM

Mr. O'NEILL. Mr. Speaker, I wish to announce to the House that H.R. 3153, the technical and conforming changes in the Social Security Act, has been taken off the calendar for today at the request of the chairman.

DEMOCRATS ASSUME LEADERSHIP IN RENT-PRICE CONTROLS

(Mr. O'NEILL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. O'NEILL. Mr. Speaker, House Democrats introduced yesterday a bill fixing rents and freezing all prices and interest rates for 60 days.

Once again, the Democrats have taken the initiative to fill the hiatus made by the Nixon administration's inability to provide effective leadership in controlling inflation.

Let us take a look at what the Nixon economy has brought us. Indeed, Nixon has terminated mandatory wage and price controls and given us rent increases as much as 30 percent in some of our major cities, a far cry from the 5.5 percent "voluntary guidelines" of phase III.

And President Nixon has told the American housewife that she must now pay 2.5 percent more this week to feed her family than she paid last week. That spells an annual cost increase of \$34 for madam consumer. Last month, beef increased 7 percent and pork 5.3 percent.

And all this represents the highest jump in food prices for a single month in a generation.

It is beginning to look as if we are entering a period of accelerated inflation. Phase III just is not working and the

American people are not buying the Nixon administration's "self-enforcing" game plan to take this Nation down the primrose path of economic malaise.

Immediate action is needed to halt the spiraling increase in food prices, rents, and interest rates.

But the White House has not yet come up with any meaningful proposal to curb inflation. So, Congress is taking the initiative to strengthen the stabilization program and put an end to inflation. The Democrats on the Banking and Currency Committee, under the aegis of Chairman WRIGHT PATMAN, and with the strong endorsement of the democratic leadership, have submitted their own proposal to work out a new economic stabilization plan to replace President Nixon's unacceptable phase III program.

Following the 60-day freeze, the President will be required to institute mandatory controls across-the-board on all elements of the economy when the rates of inflation exceed 3 percent for a 3-month period.

Rents will be stabilized at levels prevailing on January 10, 1973, the last day of phase II.

A consumer council will be established to serve as an ombudsman for the consumer's benefit.

GAO will be vested with the power to review all reports concerning prices, profits, wages, salaries, rents, and interest rates, which are submitted under the stabilization program.

And the democratic alternative will provide for greater public disclosure by companies seeking price increases.

Controls under phase II were not infallible. But the reluctant imposition of these controls by President Nixon has given this Nation by far the best record of any developed industrial nation of holding in check the forces of inflation.

And the Democratic Congress can assume the credit for that, just as the Democratic Congress is now offering an alternative to phase III that has teeth in it.

In introducing a strong rent-price control measure, Congress has gained the confidence of the American people and exercised the responsibility of economic review which will lead our Nation toward sound economic policy and well-being.

NEW TAX PLAN FOR CIVIL SERVICE PENSIONS

(Mr. PODELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PODELL. Mr. Speaker, civil service employees have for years been at a disadvantage with regard to the income tax treatment of their contributions to pension funds. Employees of private corporations generally have noncontributory pension benefits, and self-employed individuals can deduct their contributions to qualified retirement plans under the Keogh plan. Employees of tax-exempt organizations are granted special tax advantages with respect to annuities purchased for them by their employer.

Only the public employee is required to pay taxes on the money which is mandatorily withheld each year as his contribution to a retirement fund. While most other Americans need pay taxes on their pension benefits only when those benefits are received, the public employee's contributions are taxable in the year in which they are contributed, when the taxpayer is in a much higher income bracket than after retirement.

Several years ago, the Internal Revenue Service issued Revenue Ruling 69-650, which seemed to say that mandatory employee contributions to retirement were not includible in income in the year earned. Last year, however, in Revenue Ruling 72-250, the IRS indicated that the previous ruling did not apply to civil servants. Several groups of public employees have brought lawsuits in various parts of the country to resolve the issue, but no decisions have yet been handed down. I believe that it is up to Congress to end this discrimination against public employees, and I have introduced legislation today to accomplish that purpose. This bill amends the Internal Revenue Code to defer the payment of income tax on amounts deducted from a public employee's wages for purposes of retirement, until the amounts are actually received by the taxpayer. The enactment of this legislation will erase a glaring inequity in our tax laws, and will extend to our public employees the same advantages that are available to privately employed and self-employed individuals.

GREEK INDEPENDENCE DAY

(Mr. EDWARDS of California asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. EDWARDS of California. Mr. Speaker, March 25 marked the 152d anniversary of Greek Independence Day.

This observance is mocked by the fact that a backward-looking, repressive dictatorship has now ruled Greece for nearly 6 years.

The regime in power brings no honor either to Greece or to the Western Alliance. It has stifled the free and creative energies of the talented Greek people, and made the Greek police and army the jailers of their fellow citizens.

The Greek nation has thus been denied, in Churchill's phrase, "the health-giving controversy" that springs from democracy.

Only the most gullible or the most shamelessly cynical can contend today, after years of repression and deception, that the ruling junta is moving Greece toward a genuine democracy.

The question is sometimes asked, "Well, why don't the Greeks revolt?" American officials themselves have used this tactic to deter critics. To which Greeks respond, as, "So you want us to revolt?" And that usually ends the conversation.

Revolt? With what arms? All the weapons are in the hands of the police and army. In addition, there is the further, crippling weapon of fear based on a system of spies and informers and torture.

A coup from within, by those with weapons, is possible, especially if the situation deteriorates.

A sudden change could occur, for the seeming passiveness of the Greeks is misleading. Under the surface apathy is a feeling of permanent grievance similar to that which repeatedly exploded in Eastern European nations during the 1950's and 1960's.

Recently we have read of the student disturbances in Athens, Salonika, and Patras.

I regard these disturbances as significant, for it takes more guts for a Greek student to challenge the government than it does in most Western nations.

First, they are contending with a repressive dictatorship, with beatings, jailings, and an absence of due process as the tools of reprisals.

Second, it is very difficult to be accepted into a Greek university, for facilities are limited. In the polytechnical school, for example, only a small percentage of qualified applicants are accepted.

Third, once a student graduates jobs are scarce.

Fourth, the blacklist is common and a blacklisted student can have his career ruined.

So the risks are not light nor lightly taken. There was a certain desperation in the student action, a crying out in the wilderness to the civilized world.

A comprehensive article on the student protest, by foreign correspondent Dan Morgan, recently appeared in the Washington Post. It is set forth below.

In addition, under leave to extend my remarks in the RECORD, I insert a letter written by Mr. Emmanuel Kothris, former Minister and Deputy in the Greek Parliament, to the Creton newspaper Masochios.

Mr. Kothris, a political elder, has not sought the safety of the sidelines but has continued to speak out as a matter of honor and conviction. As a consequence he has been hounded by surveillance and has been called in for police interrogation. A few weeks ago he was denied a passport to come to Washington to attend, along with national and international representatives, the 21st Annual Presidential Prayer breakfast. An interesting counterpoint was provided by the regime when it issued a passport to Elias Ellou, a leftist former deputy, to attend a Communist gathering in Moscow.

It is believed that one reason Mr. Kothris was denied a passport was the letter reproduced below.

Solomos, the Greek "national poet," inspired generations of Greeks with his "Ode to Liberty," which became the national anthem. When the students of Athens sang this hymn on the grounds of the university earlier this month they were savagely beaten by the police.

Those who love freedom must honor those who take risks in freedom's cause.

Accordingly, the article and letter follow:

[From the Washington Post, Mar. 7, 1973]

PROTESTS SHOW CRACKS IN GREEK REGIME

(By Dan Morgan)

ATHENS.—"I don't understand where the foreign correspondents who visit this country

find all this opposition to the regime," an American diplomat here said a year ago. "I live here year-round but I'm darned if I can find it."

That assessment of a population's acquiescence in the military-backed dictatorship established by the April 1967 army coup expressed one of the puzzles of Greek life at that time. Despite the suspension of most civil and political liberties and repression of dissidents, Greece under martial law has projected an image of prosperity, stability and contentment.

After a months of widespread student unrest, however, some small cracks have appeared in the picture. At the universities themselves, the campus protests revealed a sizable opposition to policies that have eroded educational independence and imposed controls over many aspects of academic life.

Government assertions that the unrest was engineered by a tiny minority of "anarchists," "former politicians," and "Communists" seem unconvincing after sit-ins, protest meetings, and boycotts that involved a majority of the 80,000 Greek university students.

[The government closed the Athens University Law School for a week yesterday and banned a general student meeting, according to wire service reports from Athens. Police and uniformed military police patrolled the area, and witnesses said several demonstrating students were arrested.]

There is also at least some evidence that the drafting of 97 students into the army, and the beating of some of them inside university buildings, may have cost the government the confidence of segments of society that had been neutral or even in favor of its authoritarian rule.

Some 1,200 citizens signed a protest against the induction of students into the armed services. The presumably thoroughly pro-government Senate (Executive Council) of the embattled Athens Polytechnic University resigned in protest against police brutality.

The position of Prime Minister George Papadopoulos still seems unassailable. He commands the police, army and security services and has the support of Greece's business and financial groups. Even the government's most bitter critics have trouble presenting a credible scenario that would lead to its downfall.

Yet Papadopoulos conceded the essential difficulty he faces in governing a country that lacks any political mechanism for defusing tensions.

Although Papadopoulos promised the student-faculty group that he would heed legitimate student requests, few observers believe that the government is in any position to make essential compromises without jeopardizing its own status. Hints from officials suggest that the government may be preparing to use the unrest to justify further delays in moving toward more representative government.

Public opinion is difficult to measure in Greece. The vast majority of Greek citizens seem to a non-Greek eye to be preoccupied with enjoying their booming consumer society. But opponents of the government maintain that the outward indifference is artificial and that the real significance of the student protests was that they roused many Greeks from their political passivity.

"The image of inviolability has been broken," said a journalist. "The sense that the regime is in total control of everything is less strong than it was."

"Education is the essence of society and without free education you cannot develop a society," said a professor. "We are returning to the 19th century, when our fight was over academic freedom and the inviolability of the university."

"The events have made all Greeks sensitive to the deprivation of their basic liberties," said a young student interviewed in Athens last week. "The way the government handled

the demonstrations made the whole country conscious that they were living under a violent regime."

Such views clearly are a shock to a government that has energetically courted the younger generation in hopes of winning it over to the ideals of its so-called April revolution. Students have been pampered with free medical care, cheap meals, loans and free movie tickets.

While offering these blandishments, however, the government tightened its controls over Greece's universities. Through a series of decrees and new constitutional acts, it assumed powers to dismiss and appoint professors and named government commissars (usually generals) with broad powers to supervise universities. An estimated one-third of Greek professors are believed to have left their posts because of dismissal, resignation or early retirement since 1967.

In responding to a steadily growing student movement which was demanding a larger voice in educational matters, the government has followed a zigzag course. Under pressure from several thousand students, the government permitted students to elect their own boards last November.

But dissident sources claimed that pro-government forces tried to control the outcome with intimidation, procedural tricks and fraud.

Student demands include the release of the 97 drafted students, repeal of the special decree that withdrew their deferments, undergraduate participation in drafting a new law on higher education, new elections for student boards, and removal of police informers and suspected members of the former strongarm Fascist youth organization "EKOS" from the campus.

What happens next may depend on the depth of underlying tensions in Greek society and the strength of mass support for change. Student sources say their movement is independent of any political party. But for any opposition to be effective ultimately, it would have to offer some convincing alternatives to the present government. Such an alternative does not exist, and some Greeks fear that the opposition could become divided between leftists and social reformers on one side and conservatives who would like to restore the monarchy of exiled King Constantine.

At this stage, Greek prosperity may be working against social agitation. Greek per capita income exceeded \$1,000 in 1971 and national income grew by 8½ percent. Strikes are illegal in Greece but there has not even been a wildcat walkout of serious proportions in six years.

Opponents of the government insist that the euphoria is misleading and that worker unrest will soon appear over rapidly rising prices. More than 250,000 Greeks have gone abroad to seek better jobs. Economic critics say that corruption has increased under the dictatorship and that economic inequalities have widened as a result of special tax treatment for powerful economic groups.

They also maintain that such important economic indicators as private capital investments in manufacturing have dropped off since 1967.

Workers in Greece have seldom been an effective political force. For this reason, some government opponents put their hopes in the army, whose position toward the government's handling of the student issue is uncertain. However, student leaders say they are doubtful that the army could play a role in restoring democracy and more progressive policies.

"Since the Greek civil war, our army has become more and more reactionary and riddled with secret organizations," said one source. Nevertheless, the Papadopoulos government apparently worries more about opposition to it from the right than from the

left. Many retired army officers are still angry over the expulsion of King Constantine after an abortive royal counter-coup on Dec. 15, 1967.

"What unites us," said a former conservative politician this week, "is our contempt for the regime. We Greeks shall pursue the road that leads to our freedom."

MR. KOTHRIS PROPOSES GOVERNMENT OF NATIONAL UNITY

(Mr. Emmanuel Kothris letter to Messoghios)

DEAR MR. EDITOR: I am answering your questions:

You are wrong in believing—and I regret to state so publicly—that the Prime Minister and the majority of his collaborators sincerely wish to reach an understanding with the political leadership for the restoration of parliamentary Democracy and free institutions in our Country.

If they really wanted it, this would have been achieved because the political leaders would not refuse to make sacrifices if they were convinced that in this manner that national interest is served. However, I believe that in this case, through this policy, of supposed understanding with the "political world" and the alleged "march towards true democracy," only the humiliation and submission of the political leaders to the regime are being sought. But, in this respect the rulers underestimate the political maturity of our people. It has not been realized as yet by them, that there is no "old" and "new" political world, but a unique one, which is continuously being renewed according to the political life of our Country. Therefore, the creation of an artificial and unnatural political life, like the one they are pursuing, leads neither to true Democracy nor does it serve the Nation.

If the Prime Minister truly believes that return to political normalcy is a duty that serves the Nation's interests, he does not need to have any preliminary understanding with the "political world," least of all with its spokesmen.

He can, (and according to the Constitution, he has the right), invite exiled King Constantine to return to his throne with the possibility that the latter could exercise unhindered his Constitutional duties. Thus the process for the return of the country to normal political life would start smoothly and political leaders would be given the opportunity to contribute to National Unity under the leadership of the King. Similarly, the return of the exiled politicians, including Mr. Caramanlis, and with their participation, the formation of a transitional government of National Unity to face crucial problems and to conduct free elections in due time would be facilitated. In this manner the country would march steadily on the normal political course and any danger of anarchy as a result of the continuation of the current political anomaly will be averted.

We should not forget that the cooperation of the democratic political leaders with any regime must depend on its ideological goals and not on its longevity. Thus, the political leadership of our country reserves the right to enter a dialogue with the representatives of the present regime only when we are convinced that they too sincerely seek return to normal political life.

But when they declare that we do not exist and at the same time they do not permit the creation of new political forces in a normal way, that is, through the normal operation of democratic processes, when they do not implement the Constitution nor the institutional laws which they themselves formed. (i.e. as the law on political parties), when in essence they keep in force martial law throughout the country and when they attack a King and the system of Crowned Democracy through controlled press and forget that they promised to maintain of the

present form of government of Crowned Democracy, then how is it possible to believe that by such policies they aim at the return of political normalcy?

Is it a proof of political normalcy that we move "freely" in our cities, "thanks to the compassion of the government" and not on the basis of our lawful constitutional right? Or when the policing of the political and social life of the leaders who have offered numerous national services and of many of our followers increases day by day?

I agree that violent overthrow of the regime will have unfavorable repercussions on the security of the Country. This is an additional reason that all should contribute towards a speedy political normalization. But, no one can exclude unpleasant developments in our political life as long as the present political anomaly continues.

Sincerely,

EMMANUEL KOTHRIS.

PROPOSED LEGISLATION FOR POST OFFICE DEPARTMENT

(Mr. DU PONT asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. DU PONT. Mr. Speaker, the frustrations of trying to deal with the U.S. Postal Service have been well documented by both Houses of Congress, by the media, by word of mouth, and by Postal Service officials themselves. We have shared with our constituents the agony of trying to have mail delivered within a reasonable interval. Through it all, the post office management has pursued budget cutting to the point of irrationality without having to share in the financial losses they have caused their customers.

Today, I am introducing legislation which will require the Post Office to be held financially accountable for their ineffectiveness under a guaranteed insured delivery system. This will create a new class of mail which will allow patrons to purchase an assured date of delivery. If the Post Office Department does not fulfill its responsibility under the agreed upon terms, then it will be liable for provable damages up to statutory limit of \$2,500.

Today, the small businessman or average consumer is at the mercy of an unreliable and unpredictable Postal Service when conducting his financial dealings. I have documented cases of customers suffering real and potential losses as a direct result of the inadequacies present in the system. Also it seems to me that even under a usually reliable delivery schedule that there should be some means of the consumer protecting himself against a loss that is not his responsibility. However, my proposal goes beyond the factor of financial loss. It goes to the very root of what I believe is wrong with the management of the post office. They are insensitive to the attitudes and needs of their customers. I see this measure as one means of raising their level of concerns for those customers who are most affected by their poor performance. Hopefully, this legislation will also serve as a starting point for other services which are more fully responsive to the needs of their patrons.

In summary, I believe this proposed legislation fills a gap in the services offered to postal customers. It should also serve as means of overcoming the Postal Service management's oftentimes cavalier attitude toward customer service. I think these are goals worth pursuing under the best of conditions but absolutely necessary ones in view of the continuing inability of the Post Office Department to meet its responsibilities.

THAT CHAMPIONSHIP SEASON

(Mr. McDADE asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. McDADE. Mr. Speaker, on Sunday night in New York City, Mr. Jason Miller's play, "That Championship Season" received the Broadway theater's Tony Award as the best play of the season. It was an award that was richly deserved, and followed the Critics Award as best play of the season given to the same drama.

Jason Miller is a native of the city of Scranton, the son of John A. and Mary Miller, who reside at 118 South Fillmore Street in Scranton, and who must be overwhelmed with joy to see their fine son so honored by the most exacting drama critics in the world. To make it on Broadway is to walk into the history of the drama in perpetuity. Jason Miller has made his own mark on the history of American drama.

Jason was an outstanding young man in Scranton, where he attended St. Patrick's High School in West Scranton. He attended the University of Scranton, and it was there, and in the plays at Marywood College, that Jason has his first experience in the theater. He was, as all who knew him at the time agree, an intense student of drama, who spent long hours of studied concentration on the part assigned him, so that he would be believable from the first moment he walked on the stage. It is perhaps this concentration which has made "That Championship Season" a play so intense in individual characterization.

From Scranton, Jason went to the noted theater of the Catholic University of America, here in Washington. He met and married a wonderful young lady named Linda Mae Gleason, the daughter of one of the great action comedians in American television, the incomparable Jackie Gleason.

Now Jason has stepped far beyond those days when he was a student of the drama, and has become a formidable voice in the writing of American drama. Additionally, he has pursued his own career as an actor, and will shortly be seen in a motion picture that is also centered in this city of Washington, "The Exorcist," after the remarkable novel of the same name.

It is a delight for me to extend my own warmest congratulations to Jason Miller on this singular and most-deserved honor, and I know I speak for all my colleagues here in the Congress in so congratulating him.

ACTION TO STEM ALARMING RISE IN FOOD COST

(Mr. ROGERS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROGERS. Mr. Speaker, in light of yesterday's announcement of the most recent increase in the cost of food, I would like to bring to the attention of my colleagues action being taken by one of my constituents which is designed to help in part.

We have heard and seen accounts of various consumer groups and indeed individuals who are boycotting beef because of the steady and alarming price increase. But I could not think of any such action taken by a commercial establishment, until I received a letter from Philip Romano.

Mr. Romano owns a fine restaurant in Palm Beach. In fact, Romano's 300 has received several awards, including the Holiday Magazine Award in 1973 as one of the 190 finest restaurants in North America.

But as of April 1, Mr. Romano will not carry beef on his menu. In his letter to me, he says that he has no doubt that his clientele could afford the increase he would attach as a result of rising prices, but that instead of taking this action, his menu will simply be beefless.

Mr. Romano notes that he received help from the Government via a small business loan and his action is an attempt to help the Government in trying to bring beef prices back in line.

I would also note that I have heard that the students at the University of Maryland are planning to petition to have beef removed for at least 1 month from its menus in an attempt to accomplish the same goal. I understand that the university uses about a ton of beef a day.

I commend both for their action in doing their share to help stem the alarming rise in food which has caught this Nation by storm over the past 3 months, and I am passing on Mr. Romano's letter to the Secretary of Agriculture and the Cost of Living Council as a call for some immediate action on this inflationary problem. I also call on the President to establish guidelines if he remains firm in his conviction that a price control is unwise.

ISSUES FACING THE CONGRESS AND THE NATION

(Mr. McFALL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McFALL. Mr. Speaker, this morning the leadership of the House and the Senate met in another of the series of meetings on the issues facing the Congress and the Nation. At this time I would like to insert in the RECORD the press release on the meeting of March 27.

The House-Senate Democratic leadership held the third in a series of monthly meetings today in an office of the Speaker of the House. Attending the meeting were Speaker CARL ALBERT, Sen-

ate Majority Leader MIKE MANSFIELD, House Majority Leader TIP O'NEILL, Senate Majority Whip ROBERT BYRD, House Majority Whip JOHN McFALL, and Senator TED MOSS.

The deteriorating state of the national economy and the lack of firm and effective leadership on the part of the President in restoring stability to the Nation's economic life dominated discussion. There was consensus that the lifting of phase II controls was premature, and several factors contributing to the inadequacy of present administration economic policies were noted: rising inflation and cost of foods, lumber, steel, and other items; the recent devaluation of the dollar, the second such action in 15 months; the recent precipitous drop in the stock market; the continued adverse balance of trade and rapidly rising rents.

The joint leadership endorsed recent action taken by the House Committee on Banking and Currency concerning future economic policy and agreed that legislation providing anything short of phase II controls would be inadequate.

Other topics discussed at this morning's meeting were: Congressional spending and the budget ceilings; the scheduling of floor action of bills which were vetoed by the President in the last session; the scheduling of anticipated Presidential vetoes in the next few weeks, the status of impounding legislation and a general discussion of the legislative schedule in the House and Senate.

The leaders agreed that they would make every effort to clear the regular appropriations bills, at least through the House, before the first of July, and they jointly urged committee chairmen in both bodies to move their authorization bills as rapidly as possible in order to expedite the passage of the appropriations bills.

ANNOUNCING HEARINGS ON NIXON IMPOUNDMENTS LEGISLATION

(Mr. MADDEN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. MADDEN. Mr. Speaker, on tomorrow, Wednesday, March 28, the House Rules Committee will open hearings on the various bills pending pertaining to the impoundment programs of President Nixon. These hearings will open in room 2154, Rayburn Building, at 10:30 a.m. The hearings will be televised. On Thursday, the hearings will continue in the Foreign Affairs Committee room, No. 2170, at 10:30 a.m.

I think that a substantial majority of Members agree that we do have an immediate and pressing need for some form of anti-impoundment legislation.

President Nixon has abused the principle and the precedents of impoundment. The Congress knows that the law requires him to prevent deficiencies in specific accounts. The Congress recognizes the commonsense in holding back money when you can get the job done for less.

But we do not concede that the President has any right to use impoundment

to slow down a job or to halt it altogether, merely because he happens to disagree with that particular program. No theory of impoundment gives the President the right to thwart the will of the Congress.

Thus far, Mr. Nixon has used impoundment to curtail or to shut off a vast spectrum of programs that cut across the entire domestic scene and that affect the well-being of millions of Americans. Impoundments of 1973 funds have held up more than half a billion dollars for housing and urban development programs, more than \$159 million for the food stamp program, hundreds of millions of dollars for conservation programs and other programs to benefit the rural areas, almost \$2.5 billion in aid to highways, and \$6.6 billion in grants for construction of water and sewerage treatment facilities. Millions of dollars have been curtailed on educational programs.

Mr. Nixon has, in effect, substituted his wishes for the collective and deliberative judgment of 435 Members of the House of Representatives and 100 U.S. Senators.

What is at stake here is whether we are going to have one-man rule or whether we are going to continue our system of shared and balanced powers.

President Nixon seeks now to overstep his share of the powers distributed by the Constitution and to intrude upon the very fountainhead of congressional powers.

A recent poll taken by Oliver Quayle in St. Louis shows that the people are worried about trusting too much authority to a single individual.

Overwhelmingly, the people felt that the Congress—not the Executive—should set the ceiling on spending.

The people have not supported Mr. Nixon to the extent that they would give him a Congress of his own party—one which might be more responsive to his wishes. Mr. Nixon is the first President since Rutherford B. Hayes not to have had even one Congress of his own political persuasion.

Lacking a congressional mandate, President Nixon has gone ahead and taken power, including the power reserved to the Congress, and has used it as it has pleased him.

I think the people recognize President Nixon's unilateral impoundment actions as a growing threat to our democratic processes, and they are wary of those tendencies.

President Nixon is attempting to impose on this Nation his personal philosophy of a Federal Government remote from the people and uninvolved with their needs. He wants a retreat from social responsibility—a repudiation of the kind of humanitarian principles that have prevailed in Government for 40 years.

STUDY OF FEDERAL WELFARE PROGRAMS

The SPEAKER. Under a previous order of the House, the gentlewoman from Michigan (Mrs. GRIFFITHS) is recognized for 30 minutes.

Mrs. GRIFFITHS. Mr. Speaker, as chairman of the Subcommittee on Fiscal

Policy of the Joint Economic Committee I want to share with the Members the findings of a major study of that committee based on data gathered by the General Accounting Office at my request.

Our committee has been working away for more than a year now, describing and analyzing the whole range of welfare programs or income maintenance programs. We counted up 100 programs and found that they cost the Federal taxpayers more than \$100 billion a year.

But we wanted to know more. We wanted to show these programs in practice, not just in theory.

We asked the GAO: "Who is getting these benefits? How much are they getting, and from how many programs are they receiving them?"

Mr. Speaker, in a nutshell what we found makes the offerings of the two Georges—McGOVERN and WILEY—look like pikers.

The GAO at my request went into six low-income areas and drew samples of 1,758 households in all. They went to the records of 100 Federal, State, and local programs to see whether any members of these households have gotten benefits during the year.

They searched records of Federal, State, and local agencies sending out checks for programs such as AFDC, general assistance, social security, those passing out food, those which house people, those which pay health bills, and those which provide day care and other services. We added up the value of the benefits from all these programs, and for the first time we can give the Members a picture of what is really happening in welfare today.

Now, Mr. Speaker, our findings do not necessarily apply to the entire country or even to all of the poor. But I for one find that it makes a convincing case for drastic action.

This shows us how all income maintenance programs work in chart 3.

In chart 3 the sheer number of people who have contact with the public welfare bureaucracy is staggering. And I might add that it is far greater than one would guess by just looking at the number of AFDC recipients alone.

Sixty percent of our households receive benefits from at least one program, and the chances are very good that each receives more than one benefit; 40 percent receive benefits from two or more programs; 11 percent participated in 5 or more programs, on down to almost one percent involved in 9 to 11 programs. Our big winner was a household of 5 people which got benefits from 11 different programs. The benefits totaled 691 tax-free dollars, of which \$599 was in cash.

Now, Mr. Speaker, I want to keep pointing out to the Members and keep reminding the Members that not only are these benefits not taxable; they are not garnisheeable. This money is not like other money.

In chart 4 we can see that descriptive language rather than actual cities has been used for the sites: eastern city, south Atlantic city, southern city, northwestern city, western city, and rural counties.

Mr. Speaker, what is incredible to me is that if one lives in the two southern cities, one is apparently more likely to already have had contact with the public welfare establishment than if one lives in the three other urban sites. This is shown in chart 4.

A lot of people were very upset because the President's family assistance plan would have made so many people in the South eligible for benefits. Those people are too late. They are already getting them.

Mr. Speaker, who are these people who get so many benefits? Of course, many are members of large households or those with children or those with aged heads. But we have to look at some actual cases to understand how it can happen that households get five or more benefits and to understand the variety of situations. There is no general rule. But all of this is legal.

There is no fraud; no fraud is necessary to do very well under our present way of doing business.

Look at this couple in an eastern city, for example. They are supporting a young wife and a wife's teenage brother with AFDC, general assistance, food stamps, and medicaid benefits. They live in a public housing unit and the teenager is with the Neighborhood Youth Corps. They have tax-free benefits which are worth \$385 a month supplemented by the wife's earnings of \$429.

In B you find a young woman who has a total of \$460 a month in cash from AFDC and the Neighborhood Youth Corps and from private earnings. She also gets food, housing, and health care subsidies.

I want to point out to you we found other households in this same city each also having three people whose earnings were far less than this woman had in cash; yet they got not one penny of help from any program. Do you know why? In large part it is because the families were married couples. These four families were struggling along with earnings of less than \$350 a month—no food stamps, no medicaid, no public housing, no welfare to add to their earnings. The young woman with \$460 in cash plus everything else is far better off.

C. In this three-generation family of five in a southern city—and this is one of the big winners, also—they received 11 benefits, 5 of which were cash payments totaling \$599 a month. They also got food, medicaid, housing, and service benefits, bringing the grand total to \$691 monthly.

D. This mother of 10 children in a midwestern city received an average of \$793 in monthly benefits. This is over \$9,500 a year. A working man or woman would have to earn over \$11,000 gross to have the equivalent net income after taxes and work expenses. In the midwestern city, the low-income neighborhood where this woman lives, earnings for a woman working full time at the median wage are less than \$5,000; they are less than \$7,000 for men.

Now, some of you may be troubled because we put dollar values on benefits like food and medicaid and housing and

services. You may say goods and services are not as valuable as cash to people. This is probably true in many cases, but if you ignore these benefits altogether, you are really saying that these non-tax benefits have no value at all. I can tell you this is false, because we have heard from the recipients themselves when Congress or the administration has tried to tighten the food stamp eligibility requirements or increase the deductibility and copayment amounts under medicare.

In fact, in the State of Pennsylvania there is now pending a case. In that State you can be too poor to be eligible for the Department of Housing and Urban Development's section 236 subsidized rent programs. There is a minimum rent specified that cannot exceed a certain percentage of your income. The State of Pennsylvania in a class action suit charged that the HUD policy is illegal because HUD fails to include food stamp and medicaid benefits as income. In other words, the State believes that ability to pay should take into account all noncash benefits.

Chart 6: Make no mistake, the system is unfair. You can take two families with exactly the same income and of precisely the same size and you will find that what they get varies all over the place.

We have had some actual cases here that make this perfectly clear. In an eastern city we found a woman rearing her three children on \$355 a month and benefits of \$359, \$281 of which was cash from AFDC.

Household B here is another family of four, but it is headed by a man. He earned an average of \$346 a month and he had unemployment benefits averaging \$25 for a total of \$371. But this family is not eligible for AFDC, of course, so it has less than household A, even though the man's earnings are lower than those of the woman receiving AFDC.

Then in the lower part of chart 6 we have two elderly couples living in the rural counties site. Couple C gets welfare for the aged, called old-age assistance, because its social security check is small.

So these people, because they get old age assistance, automatically qualify for surplus food commodities and medicaid, both of which go along with public assistance in the rural counties site.

Couple D's income, on the other hand, is too high to draw old age assistance, and so they do not get free food commodities or medicaid either. Couple D does get medicare coverage, but medicaid would be more valuable to them. For example, if couple D wants physician's insurance under part B of medicare they must pay \$11.60 per month for it. Medicaid pays this premium for couple C. If couple D has hospital, doctor, and drug needs not covered by medicare, it must do without them or pay for the treatment, or seek charity care. Medicaid will pay for most such health care needs for couple C. So in effect for the elderly it would be better not to have too high social security so they could qualify for old age assistance so they can receive all the rest of these benefits.

We are taking care of the poor far better than we are taking care of people who have only social security.

Then chart 7: Of course, most of these programs were set up to help the poor. You would think that families lucky enough to receive benefits from five or even more programs would surely escape poverty. The truth is, some do not. Chart 7 shows just how much benefits these households receive, they receive a great many benefits.

The top bars in chart 7 show that most beneficiaries in fact are poor when they apply for their benefits. After they get their cash benefits, 67 percent of these households in the southern city and 29 percent in the eastern city are still poor. But when their food and housing benefits are added in too, as shown here in the third set of bars, the percentage in poverty falls to 31 percent in the southern city, and 8 percent in the eastern city.

I can assure you that this way of looking at these programs and how they can reduce poverty is far more accurate than the official counts of who is poor and how poor they are. The census surveys do not include the value of food and housing benefits at all. This means that the \$2 billion in food stamp bonuses, for example, are implicitly given a value of zero. Of course, even if the census did count these benefits in, this country would still have a serious poverty problem, but we would know far more about how well we are doing in eliminating poverty, and who is still poor. So before the President declares an end to the war on poverty, maybe we really need to know how many prisoners of war are left behind. You cannot just look at cash benefits such as AFDC or social security alone in judging whether benefits are adequate when recipients usually get other benefits too. It is a little like the woman getting alimony and child support who also got the family house, and everything in it, the savings account and a car and a settlement that requires the man to educate the kids and pay all their health bills. Believe me, that man and woman and their lawyers added it all together, the cash and everything else.

Finally, if we add in the Government costs of all benefits such as health and other services—as if they were income, we will still find some poor households. This is shown in the last set of bars in chart 7. But we also find that some people do very well.

For example, at two of the six sites the five-benefit households had total private incomes and benefits averaging over \$6,500 a year. In fact, benefit levels can easily exceed what people could earn in a full-time job and what their neighbors are currently earning.

Chart 8: Chart No. 8 shows just that. Here we compare the actual benefits of nonworking people with children, receiving five or more benefits, with what their neighbors in the low-income areas are earning. In eastern city food, cash, and housing benefits alone average \$426, none of which is taxable, and for which there are no work expenses. This amount for nonworkers exceeds the median wages for women who are working full-time in eastern city as well as in southern city, and benefits very nearly equal these

wages in South Atlantic and midwestern cities.

If we deduct \$60 a month for income taxes and work expenses, benefits are even close to the average workingman's wages in these areas.

We can see that benefits are significantly below men's wages only in midwestern and western cities.

Does it not seem time to make the system fairer to these people, to the workers?

Chart 9: Not only do some benefit packages compete with wages, but the programs themselves do not match our workfare rhetoric. They do not insure that recipients can better themselves financially by going to work. Quite simply, working can leave one little better off, and sometimes worse off, because his benefits are reduced if he does work.

After your benefits are reduced, and after you net out work expenses and payroll taxes, if you are a recipient who goes to work, you may see little change in your total income. Your AFDC grant falls; you pay more for food stamps and public housing; and there are steep social security taxes. Why break your back for even a reasonable \$3 an hour when you can keep only 75 cents of it?

In this chart it shows that 70 percent of these people with five benefits from \$1 earned would get either nothing at all or a high of 32 cents, so that they would work 8 hours for a little more than \$2.50.

Chart 9 shows, then, that some of them would get 33 cents up to 49, and so on, but this shows the difference in what we are saying and in what we are really doing. If we cut out all of these benefits when they go to work, they really do not realize anything from it.

Chart 9 shows the pitifully small gain that some beneficiaries get from these earnings. Since most of the households in chart 9 include AFDC, we may be tempted to assume that work incentives are irrelevant because AFDC recipients are either unemployable or unemployed. But here are the facts. Adults in urban AFDC households do work. The first bar for each site here in chart 10 shows the proportion of AFDC households having adult earnings for some part of the year. We see that about one-quarter to three-quarters of the AFDC households had an adult earner and, therefore, had income in addition to the AFDC grant for some portion of the year.

The second bar on each site applies only to AFDC households in which there is only one adult, generally a woman. We see that the AFDC parent was known to have worked in from 19 to 70 percent of these households. This means that the work-incentive features of AFDC and other programs are important—and they are important for women heading families.

Would AFDC recipients have worked more or reported more earnings if they did not lose benefits at such a high rate? We do not know, but it does seem unfair to recipients who work to be so little better off relative to those who do not.

These facts suggest to me that we ought to quit trying to divide people up into categories such as "employable" and "unemployable" on the basis of their

sex and other such characteristics. These theoretical categories exist in the minds—maybe our minds—but not in the real world of the poor.

If people are in need, perhaps we should help all of them uniformly and fairly.

Chart 11: The subcommittee has gone around the country looking into how all these programs are administered. I now have a great deal of sympathy for case workers who are struggling with constantly changing rules. They have an impossible job. And one of the most unfortunate things about having so many programs helping the same group of people is that we are wasting money duplicating administrative tasks. Meanwhile, these programs are stumbling all over each other and preventing one another from effectively carrying out our legislative intent. With all of these agencies checking on income and family circumstances, keeping records, mailing checks or paying vendors, and enforcing program rules while serving largely the same clientele, the amount of wasted motion must be fantastic.

We can get an idea of the administrative problems from this chart, No. 11. This is, of course, something of an extreme case. It shows the flow of benefits from 10 programs for one household over a 1-year period. These nine people got medical care from the Public Health Service and through medicaid; they received unemployment insurance, AFDC, and food stamps; they got free school lunches, special title I educational aid, and milk for the children; they participated in MDTA manpower training and the concentrated employment program; and they had some private income. I ask Members: would you want the responsibility of assuring that these people got exactly the amount they should—no more, no less—every week and every month of the year or, indeed, at the precise moment when the Federal auditors come around?

If I had to give you the conclusions I draw from all of this, it would be the following: For years we have been designing programs as if each had its own unique constituency and as if each operated all by itself. We have not paid much attention to coordinating them before now, and we have not added them all up. What is happening? We have ended up with so many programs that they cannot be run well. Some people are left out while others scoop up thousands—far more than we could possibly provide to everyone in similar circumstances on a fair basis, and no one is in charge of all this.

If we look at only the 21 major income maintenance programs with some Federal involvement, we find they fall under the jurisdiction of 10 legislative committees of the House and nine of the Senate, and they are administered by 11 Federal agencies. No one committee has the responsibility for viewing them all together. The executive branch, which has initiated a good share of these programs, is even blinder.

But the Congress at least is digging into the issues. In my judgment, studies such as this are crucial—we just have

never looked before at all the programs together.

This study has been very much a cooperative undertaking. The subcommittee and I greatly appreciate the expert assistance of the Comptroller General of the General Accounting Office, Elmer Staats, and his staff in helping to design this study and in gathering the data in a thoroughly competent way. Secondly, I want to thank Congressman WAYNE HAYS, chairman of the Committee on House Administration, for processing the data collected with the computer facilities of the House information systems center. I would also like to thank both the majority and the minority leadership of the House for making this study possible, the majority and minority members of the Ways and Means Committee and of the Joint Economic Committee and the Committee on Appropriations. All of them have cooperated.

I think this study is historic. It is the first time the Congress has collected this type of information and then run it through the computers and analyzed the data itself. I hope that this is only the beginning of congressional efforts in which we share resources to produce studies from which the entire Congress—and certainly the administration—will benefit.

If there are some questions and I have the time, I will be glad to answer them.

Mr. ARENDS. Mr. Speaker, I want to congratulate the gentlewoman from Michigan for this very informative presentation.

Will this be made available in a public document?

Mrs. GRIFFITHS. Yes, we have it available now. We even have the charts available and we will see to it that all Members have a copy.

Mrs. SULLIVAN. Mr. Speaker, will the gentlewoman yield?

Mrs. GRIFFITHS. I yield to the gentleman from Missouri.

Mrs. SULLIVAN. Mr. Speaker, I, too, wish to compliment the gentlewoman from Michigan on this very great study. It is something which has been needed for a long time.

I would like to ask this question: Has the gentlewoman from Michigan come to any conclusions on what might be done now that we have this information, even though we have no way of continuing it?

Mrs. GRIFFITHS. One of the things which I think we ought to do at once is that I feel we should set up some type of device in Congress where, if we are going to offer one of these programs or a Member offers one of these programs, it should first be analyzed by some experts to show us the effect on that program upon all other programs. It seems to me that would be the correct method if we do it at once, but I hope that before this study is over, we are going to be able to offer a substitute for the entire mess.

Mrs. SULLIVAN. If the gentlewoman from Michigan would continue to yield, I know that the gentlewoman has spoken of this often and we have often discussed the possibility of every recipient of any kind of program having a social security card and a number so that all of these benefits could be listed.

Mrs. GRIFFITHS. Yes, a social security number for everyone, in my opinion, is an absolute necessity.

For a long time the only people who did not have social security numbers were those who were getting something from the Government. If a person earned anything, the Government demanded that that person have a social security number because the Government wanted its share of his earnings. However, I think everyone should have a social security number. I think it should be given to a person and put on his birth certificate so that we can absolutely identify which of these programs help and which does not.

Mrs. SULLIVAN. There are two follow-up questions: Does the gentlewoman from Michigan feel that we would be able to introduce and pass legislation making this a requirement?

Mrs. GRIFFITHS. I have been trying this for 8 years. We have now gotten to the place where, if a person has any kind of benefit coming to him, he has to have a social security number.

I think a number should be given at birth.

Mrs. SULLIVAN. The second question I have is this: If such a thing were possible, if everyone had a social security number, at what time does the gentlewoman from Michigan think that these benefits then could be put onto the record of the individual in the same method as earnings are put on?

Mrs. GRIFFITHS. I presume it could be done, but what I think we need to stop this mess is a program that helps people more equitably than having 11 programs.

Mr. LONG of Maryland. Mr. Speaker, will the gentlewoman yield?

Mrs. GRIFFITHS. I yield to the gentleman from Maryland (Mr. LONG).

Mr. LONG of Maryland. Mr. Speaker, I, too, wish to congratulate the gentlewoman from Michigan. She has done a terrific job in pulling all this material together and presenting it in such a dramatic way.

In the minds of many people, the alternative to all of these programs is going to be a guaranteed annual income.

Mrs. GRIFFITHS. In place of 100 different guaranteed incomes, which is what we have.

Mr. LONG of Maryland. I would like to ask the gentlewoman from Michigan whether she thinks the same type of analysis ought to be applied to that. I looked into it in a very small way. I found that the guaranteed income as it was presented to us several years ago in the Nixon proposal also offered practically no incentives to work. Under that proposal, if a person added together the cost of going to work—such as transportation, lunches, work clothes, and the fact that he cannot paint the bathroom while he is working—the person who worked got almost nothing out of putting in 50 hours working and traveling back and forth to his job.

Mrs. GRIFFITHS. Before we have finished I hope that we will be able to analyze whatever program we suggest and present it to the Members, to show them exactly how it will work.

Mr. LONG of Maryland. I just want to

warn the gentlewoman that the alternative to this—a seemingly simple program—may have almost as many pitfalls.

Mrs. GRIFFITHS. Yes. There will be many problems, but not as much as for this.

The SPEAKER pro tempore (Mr. MAZZOLI). The time of the gentlewoman from Michigan has expired.

(On request of Mr. GROSS, and by unanimous consent, Mrs. GRIFFITHS was allowed to proceed for 1 additional minute.)

Mr. GROSS. Mr. Speaker, will the gentlewoman yield?

Mrs. GRIFFITHS. I yield to the gentleman from Iowa.

Mr. GROSS. I want to join other Members in commending the gentlewoman not only for the accumulation of the material but also for her excellent presentation of it. I wish to say to her that I now have an excellent reason for having voted for "Women's Lib."

Mrs. GRIFFITHS. I thank the gentleman. The gentleman can see that the place where the men are really being treated badly is in welfare. What we are really doing is breaking up families.

Mr. DON H. CLAUSEN. Mr. Speaker, will the gentlewoman yield?

Mrs. GRIFFITHS. I yield to the gentleman from California.

Mr. DON H. CLAUSEN. I, too, want to commend the gentlewoman from Michigan.

It is obvious that the gentlewoman has focused attention upon the duplication and fragmentation of programs. There are simply not enough in the way of incentives for this to work, and there is too much in the way of incentives for those who are on the benefit side of the welfare program.

Mrs. GRIFFITHS. I thank the gentleman.

Mr. DON H. CLAUSEN. Mr. Speaker, I want to commend most highly the lady from Michigan (Mrs. GRIFFITHS) not only for this special order she has taken today to discuss and inform us on the proliferation and overlap in our public welfare assistance programs, but to state for the record that the information she has collected and presented, with the assistance of the General Accounting Office, has been long overdue and in my view will indeed stand forever as an historic document. The time and hard work this dedicated legislator and her staff have devoted to compiling this study, in my judgment, merit our highest praise.

As Mrs. GRIFFITHS has so ably stated, her concern over the huge overlap in federally assisted public welfare programs did not just develop during the past few months. As chairman of the Joint Economic Committee's Subcommittee on Fiscal Policy, her in-depth study will, I am sure, receive thoughtful and careful analysis by her colleagues on the committee and hopefully by the whole House as well.

I have long shared Mrs. GRIFFITHS' concern for the widespread duplication and fragmentation that permeates our public welfare programs which, as she has documented here today, have offered more incentives for people not to

work and for families to split up, than they have for people to seek gainful employment or to keep their families together.

What this study reveals represents a tragedy and a travesty not only for the needy disadvantaged, but for all working men and women in America. While, over the years, the Congress has created program upon program in all good faith, and in spite of the many warnings, we never stopped long enough to survey the counterproductive giant we were actually creating. One of the most revealing aspects of this study, in my view, is the documented manner in which competing public welfare programs have completely undone the original intent of the Congress. As a result, I believe a tremendous disservice has been done to the very people we were trying to reach.

From this study and the followup action that is so desperately needed, I would hope that a joint legislative-executive effort along truly bipartisan lines can now go forward to completely overhaul and improve our public welfare programs in this country. Certainly, Mrs. GRIFFITHS has documented the need for reform here today and I do not believe there is any question that the time has come.

GENERAL LEAVE

Mr. DON H. CLAUSEN. Mr. Speaker, I ask unanimous consent that all Members be permitted to revise and extend their remarks at this point in the RECORD, because I believe they will want to associate themselves with the remarks the gentlewoman from Michigan has made.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

CONGRESSIONAL HANDLE FOR THE FEDERAL BUDGET

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. ALEXANDER) is recognized for 30 minutes.

Mr. ALEXANDER. Mr. Speaker, for a number of years, and particularly in recent months, there has been rising concern over congressional responsibility and ability to deal with the Federal budgetmaking process. I believe it is of vital interest to the Nation that the Congress recapture and maintain control of the national budget.

Congress has recognized the critical need for this by establishing the Joint Study Committee and Budget Control. The interim report of the joint committee has pointed clearly to the many facets of the complicated budgetary control problem which has arisen. Another point which should also be made is that failure to obtain control of the budget—from the raising of income, to the allocating of resources through spending of available funds—will continue to restrain the power of the Congress to reorder national priorities.

I would like to share with my colleagues today some of the views which I have expressed to the joint committee.

Congress must adopt a firm policy that will hold the line on spending. The Nation's taxpayers are already overburdened. A tax increase could be the straw that breaks the camel's back.

Congress must establish a firm policy of working within a fiscally sound budget. Individuals and companies adopt this as good business practice in order to avoid bankruptcy. Is it not also sound governmental policy?

Congress must establish a national policy that is designed to curb and end inflation. The crudest method of payment for Government services is through the allowance of inflation which indirectly taxes those who can least afford to pay—persons on the lower end of the income scale and persons on small fixed incomes.

Some very basic reform is needed in the Federal budgetary process.

Congress must establish a national fiscal policy directed at achieving maximum employment, productivity and purchasing power in nongovernmental activities, and maximum efficiency and effectiveness in using governmental financial resources.

Ceilings must be established on spending and on new obligatory authority. This is not to say that new activities should not be considered, or authorized, but that spending should not be mandated for them which would violate congressionally adopted fiscal policies.

A policy for appropriating funds to be available for a limited period of time should be adopted. If, in accordance with responsible fiscal policies, the funds have not been spent or definitely obligated at the end of the period the spending, obligatory or contracting authority should lapse. And, if Congress deems it necessary and wise, new appropriations should be made. The minimum time limit on this authority should be 1 year and the maximum period should be 2 years.

I recognize the workload this implies. But, I believe continuous and timely review of the spending, contracting, and obligatory policies of the Federal Government is absolutely necessary to the maintenance of budgetary control.

Trying to do the work required of Congress without the staff and equipment it needs is like trying to fly a jet aircraft on a washing machine motor.

A mechanism—informational system staffed by nonpartisan, professional personnel and provided with sufficient modern equipment—should be established to provide the Ways and Means and Finance Committees with accurate data on the income which will be available for Federal programs.

The Appropriations Committees of the House and Senate should be provided with a similar mechanism which can provide all Members of the Congress with clear, up-to-date information on financial obligations of the Federal Government.

There should be established within the House and the Senate budget committees charged with the responsibility of recommending to their respective Houses the level at which the Federal budget should be set. These committees should have the authority to recommend al-

locations for each of the committees of the House and the Senate telling them what portion of the budget they may use in authorizing the contribution, or the establishment, of programs over which they have jurisdiction.

The membership of the House budget committee should be composed of the Speaker, the majority leader, the minority leader, the minority whip, and the chairmen and ranking members of each standing committee.

In the Senate the budget committee should be composed of the majority leader, the majority whip, the minority leader, the minority whip, and the chairmen and ranking members of each standing committee.

The budget level recommendations of each House should become effective only after a vote of approval by the membership of that House. A joint committee of the membership of the House and Senate budget committees should be established and charged with the responsibility of reconciling the differences in the levels and allocations to committees of the budgets agreed on by the two Houses. When they have completed their work, their agreement should be brought to each House for acceptance or rejection.

A strict schedule for these committees to complete their work and the Congress to agree on budgetary levels and allocations to committees should be established.

Depending on the time schedule that is adopted, it would be possible for the other committees of both Houses of Congress to be carrying on their work of hearings, studies, and investigations at the same time that the first steps of the budgetary process are taken. By the time the budget levels and allocations are agreed upon by the Congress many, if not all, of the hearings in these committees should also have been completed.

A ceiling should be included in each appropriations bill. And, no individual appropriations bill should become effective until congressionally approved within the context of the total budget. At, or near, the end of each year, the Congress should meet specifically for the purpose of considering whether budget ceilings should be adjusted and whether taxes should be increased or deficit spending should be accepted.

The proposal that Congress regain and maintain control of the national budget means a significantly increased workload. But, it is a job that we as elected representatives of the people are morally and constitutionally bound to accept and carry out.

It is essential that the Congress gain and maintain control of the national budget. To do so will require increased efficiency of operation within the Congress. Vital to this is the development of a system of communication and coordination within each House and between the Houses of Congress. Congress is not now equipped to play in the same league with the Executive. The task of handling the national budget is a demanding one which cannot be carried out unless Congress is willing to equip itself with sufficient professional staff and equipment

to development and analyze the information required for budgetmaking.

Throughout the 20th century Congress has taken a backseat to the Executive. Now, more than at any other time in this century, we of the Congress have an opportunity to strive for the position of an equal legislative branch which would restore the balance of powers as intended by the Constitution.

I am convinced that Mr. Nixon has skillfully captured the feeling of the general public on the subject of Government spending. But, most every American would agree that it is far better to return the responsibility for the budget to the Congress than allow it to continue to concentrate in the Executive.

The task of responsible, knowledgeable, responsive budgetmaking is a demanding one. To do it properly will require significant congressional reform. I urge that the Congress meet this challenge head on and make the changes necessary for gaining and retaining control of the Federal budget process.

REESTABLISHMENT OF RENT CONTROLS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. WILLIAMS) is recognized for 5 minutes.

Mr. WILLIAMS. Mr. Speaker, today I urge all of my colleagues to join me in support for the reestablishment of rent controls on a nationwide basis. As we all know, these controls, which were flexible, were removed in phase III of the President's "new economic policy" because his advisers had assured him that the rental market was "soft." The rental market, Mr. Speaker, is about as "soft" as a block of case-hardened steel. The fact is, that in many areas, rents have gone up from 20 to 40 percent since the removal of controls.

Housing is one of man's most basic needs. We must act to assure all Americans that the cost of a roof over their heads will not be prohibitive. Our first step must be the immediate reinstatement of strong rent controls that will cover all rental units nationwide.

Mr. Speaker, there is another area with which the Congress should concern ourselves because it directly contributes to the high cost of housing. Lumber is one of the most expensive components in all types of housing, and the price of all lumber continues to soar.

I oppose the classification of lumber as an agricultural product. This erroneous classification allowed prices to climb steadily throughout phase II, and with the relaxation of controls in phase III, the cost of lumber has now nearly doubled. To remedy this situation, we must move quickly to control lumber prices. In fact, we must move to bring the prices of all agricultural products and meats under control.

One of the most urgent problems is the need for controls on the export of logs, particularly to Japan. Controls on this currently unrestrained exportation of a vitally needed resource will help meet our expanding needs for new housing starts here at home.

The Banking and Currency Committee is holding hearings on extending the Economic Stabilization Act, and any such extension must be such to bring inflation completely under control. It is expected that the committee will move rapidly to complete these hearings and report the extension of the Economic Stabilization Act to the House for consideration.

Congress must then act quickly to meet our responsibilities to the American people to control spiraling housing costs, keep rents within the reach of our people, and control inflation.

TAX-FREE LOTTERIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. MCKINNEY) is recognized for 5 minutes.

Mr. MCKINNEY. Mr. Speaker, last June I introduced a bill which would exempt State lottery winnings from an individual's taxable income.

Today I am reintroducing this legislation in the hope that the 93d Congress will be able to get around to enacting this proposal. I do not have to stand before you and detail the fiscal problems presently affecting many of our States. In recent years, the State-operated lottery has come to the fore as a chief means for many of these States to raise extra revenue. At present, seven States are operating lotteries and have already grossed over \$875 million. In its first month alone, the State of Michigan grossed over \$14 million.

The primary purpose of my bill is to encourage the growth of these lotteries and to remove a tax which stands as an obstruction to further growth. Last year, when I contacted the lottery commissioners concerning the idea of tax-free lotteries, they wholeheartedly welcomed this concept and many pointed out that a prime source of public dissatisfaction with lotteries is the exorbitant size of the Federal tax bite. Commissioner Joseph Burns of Connecticut forwarded information showing that in winning a top prize of \$75,000, the average family in my State would return \$39,780 to the Federal Government. Such a tax bite becomes even greater in States such as New York where winners still face payment of State and local taxes.

Mr. Speaker, I should also like to mention that this legislation would be very detrimental to one segment of society. The illegal numbers rackets, which gross staggering profits for organized crime, would be dealt a severe blow. In reporting on this legislation last year, Mr. Robert Waters, Washington correspondent for the Hartford Courant, pointed out:

In Connecticut and the five other states where lottery winners have faced this problem, McKinney's bill should draw heavy support.

But the professional gamblers won't like it—and for good reason. The popular practice of "piggybacking" the state lottery would lose part of its attraction. "Piggybacking" happens when bookmakers take bets on the winning lottery numbers. Why would anyone want to play the state lottery via a bookie?

Here's one good reason: The winnings are paid off in funds that aren't taxable. Legally, of course, all gambling winnings are taxable. But when you do business with a bookie he isn't about to tell the Internal Revenue Service how much you won. So, if you're a greedy winner, neither do you.

Thus, if you take home \$75,000 from a bookie, you get to keep it all.

The official state winners don't enjoy this anonymity. These lucky people get their pictures in the newspapers complete with names and addresses. And of course, they also get to share a fair share of their winnings with the IRS.

McKinney's bill would equalize this situation. On payoffs, at least, the state and the bookies would offer the same attraction: a tax free jackpot. And with an official IRS exemption for state lotteries, McKinney's bill has an edge over the bookies. The winners would have a "legal tax free prize."

I think Mr. Waters has advanced a good point which serves to highlight the fact that with over 30 States actively considering instituting lotteries, now is the time to change this archaic, counter-productive Federal policy. For anyone worried about the effect of this proposal on the Treasury, it is my feeling that there would be little loss of revenue should this bill be enacted into law. Taxes on lottery winnings already come under the category of unanticipated revenue, and I think it is very necessary that the Congress act now to adopt tax-free lotteries before the Federal Government becomes too dependent on their moneys.

In closing, I would like to call your attention to the fact that we have been speaking about tax reform in Congress for a number of years. It finally looks as if we will get around to initiating some reform during the 93d Congress. I would like to think that this bill deserves all due consideration in this regard. It is time that we closed the credibility gap of one segment of government promising the average American a chance for a small fortune, while, if he is lucky enough to win, another government entity comes along and takes half of it back.

I would like to take this opportunity to include in the RECORD some of the letters from the lottery commissioners which I hope my colleagues will take the time to review:

STATE OF CONNECTICUT,
COMMISSION ON SPECIAL REVENUE,
Wethersfield, Conn., March 2, 1973.

Hon. STEWART B. MCKINNEY,
Congress of the United States, House of Representatives, Cannon House Office Building, Washington, D.C.

DEAR STEWART: We were delighted to learn that you are planning to reintroduce your bill that will exempt lottery winnings from Federal income taxes. We certainly enthusiastically support this legislation.

Our argument is, of course, that the lottery itself will be considerably strengthened by this proposal and will encourage greater participation and thus provide greater income for the State. In addition, the money provided for winners will be funneled into the mainstream of our economic activity and should really net just as much money in Federal taxes as if they were taken at the source. Everything we can do to ease tax burdens on a local basis will, in our judgment, result in less demand from states to the federal government for support. We believe this is a sound argument.

During the period from February 15, 1972, when we began to sell lottery tickets and the end of January, 1973, we sold almost eighty million tickets at fifty cents each. The State of Connecticut received a net profit from this lottery of more than fifteen million dollars. If our prize structure were based on lottery free winnings, we believe we could considerably improve upon that performance.

For the same period, fourteen million dollars was awarded in prize money and thousands of Connecticut residents benefitted. We know that the Federal income tax received a good portion of this sum, but we also feel that the money would have performed more profitably, both for Federal and State Government, had it been received tax free.

The problem of convincing non-lottery states of this sales incentive may be difficult, but we do applaud your efforts.

Please let us know if we can furnish any more definite material for your use.

Sincerely,

JOSEPH B. BURNS,
Executive Secretary.

STATE OF MICHIGAN,
BUREAU OF STATE LOTTERY,
Lansing, Mich., March 5, 1973.

Hon. STEWART B. MCKINNEY,
Congress of the United States, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN MCKINNEY: Thank you for your recent letter and background materials dealing with your proposal to exempt lottery winnings from federal income taxes.

There is no question that your proposed revision of the tax code would be popular with residents of lottery states and others who participate in lotteries. We have found in our brief history that nearly everyone anticipates winning a big prize someday and expresses concern about the federal "tax bite." Lottery winnings are exempted from state and local taxation.

Michigan's lottery started last November 13 and has averaged sales of more than 5 million tickets each week in our first 15 weeks (through March 1). The Lottery Act provides that at least 45% of gross revenue shall be earmarked for prizes. Operating costs will be somewhere between 10-15%, leaving about 40% for the State's General Fund. Lottery revenues are not now earmarked for any particular use by the state.

We will attempt to keep you informed of our progress in the coming months and we wish you well in your attempt to change the tax code. If we can be of any assistance, please feel free to contact this office.

Sincerely,

GUS HARRISON,
Commissioner.

MASSACHUSETTS STATE LOTTERY
COMMISSION,
Newton, Mass., March 7, 1973.

Hon. STEWART B. MCKINNEY,
House of Representatives, Cannon House Office Building, Washington, D.C.

DEAR REPRESENTATIVE MCKINNEY: I wish to express appreciation on behalf of the Massachusetts State Lottery Commission for filing legislation which will exempt state lottery winnings from federal income taxes. We strongly support this bill.

We will be following the passage of this legislation with great interest and sincerely hope the outcome will be favorable.

Sincerely yours,

WILLIAM E. PERRAULT.

STATE LOTTERY COMMISSION,
Trenton, N.J., March 1, 1973.

Hon. STEWART B. MCKINNEY,
Member of Congress, Cannon House Office Building, Washington, D.C.

DEAR CONGRESSMAN: I thank you for your letter expressing your interest in the fur-

therance of State operated Lotteries by the introduction of legislation geared to exempt State Lottery winnings from Federal Income Taxes.

The New Jersey Lottery Commission is grateful to you for your activity in this regard. The New Jersey Congressional Delegation will be informed of our concern in this matter.

I am, also, taking the liberty of appropriately notifying the Executive Directors of all other State operated Lotteries of your proposed legislation.

Sincerely,

RALPH F. BATCH,
Executive Director.

SWEETSTAKES COMMISSION,
Concord, N.H., March 7, 1973.

Hon. STEWART B. MCKINNEY,
House of Representatives, Cannon House Office Building, Washington, D.C.

DEAR CONGRESSMAN MCKINNEY: We were very pleased to learn that you are planning to introduce another bill that would exempt state lottery winnings from federal income taxes. The enactment of this legislation would be received most enthusiastically by the public. Since the federal government has instituted revenue sharing programs for the States, it seems logical that Congress should take other reasonable steps that would further increase State revenue. In addition, by making the purchase of legal lottery tickets sold by sovereign states more attractive to the public, the goal of eliminating illegal forms of gambling operated by racketeers might be realized.

In 1972 over \$2,700,000 was distributed to the State School Districts in New Hampshire—about \$17 per student. An Income and Expense Statement is enclosed.

We shall urge our Congressional delegation to support your efforts. We also hope that you will give your support to pending legislation that would amend the present archaic federal antilottery laws and permits the use of the malls, radio and television for state legalized lotteries. We certainly are entitled to at least the same status that Congress has given pari-mutuel racing.

Very truly yours,

EDWARD J. POWERS,
Executive Director.

DEPARTMENT OF TAXATION AND
FINANCE, DIVISION OF THE
LOTTERY,

Albany, February 23, 1973.

Hon. STEWART B. MCKINNEY,
Member of Congress, House of Representatives, Longworth House Office Building, Washington, D.C.

DEAR CONGRESSMAN MCKINNEY: Thank you for your letter of February 16, 1973 stating that you were continuing your fine efforts to exempt State Lottery winnings from Federal Income Taxes.

The New York State Lottery is a Division of the Taxation and Finance Department under the direction of Commissioner Norman Gallman who is of the opinion that exemption of Lottery prizes from taxation would provide a real impetus to the New York State Lottery as well as many other state lotteries.

However, the Commissioner is concerned that a problem might arise as the New York State Personal Income Tax Law generally conforms with the Federal Income Tax Law and the New York State Division of the Budget might be inclined to oppose exempting Lottery prizes from State Income Tax, not so much for the revenue involved, but rather because this might result in potential further exemptions on pari-mutuel and other gaming profits.

However, the New York State Lottery Commission, which serves as an advisory body to the Commissioner of Taxation and Fi-

nance on Lottery matters, has filed a bill in the New York State Legislature to exempt winnings in the State Lottery from all local and state taxes.

We anticipate the New York State Lottery will raise over \$53 million for additional aid to education for the 12-month fiscal period ending March 31, 1973. Since the beginning of the Lottery in June of 1967 the State has received nearly \$198 million in revenue.

Please feel free to contact me if any further information is required.

Sincerely,

ERNEST T. BIRD,
Director.

ROLE OF CONGRESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. McFALL) is recognized for 5 minutes.

Mr. McFALL. Mr. Speaker, the question of procedural paralysis in Congress was discussed by Senator WALTER MONDALE, of Minnesota, in a recent Chicago appearance at the Time, Inc.-sponsored "Role of Congress" symposium. The gentleman from Minnesota's remarks are included in today's RECORD, along with some panel discussion, moderated by Henry Grunwald of Time, Inc.:

ROLE OF CONGRESS

Is the Congress somehow procedurally paralyzed? Or does the Congress represent what the people want? I think many times we get those two things confused.

Examine the impasse that is growing between the Executive Branch and the Congress over the impounding of funds. They have impounded highway funds, they have impounded housing funds, sewer and water treatment funds, auto-safety funds and so on. Many people say that that proves the Congress is incompetent and impotent. I do not think it is that simple. I think many of the Brahmins in the House and Senate agree with what the President is doing. And while they may object publicly, they kind of go along with him because he represents some of the priorities that they believe in.

It is not necessarily just procedural hang-up, although I agree that that is part of it.

I want to close with two points, as I see them. First, and I understand this was not dwelt on this morning, what I regard to be the fundamental importance of financing in campaigns. This is the dark side of the political moon. This explains a lot of the mysteries of the Congress, of the presidency, of the state legislatures, of the county boards, the school boards and the city councils.

This morning my friend, Senator Goldwater, said, "I detest the notion that people do things for money in politics," which is another one of Goldwater's great contributions to thought in American life.

I have a friend with whom I was discussing this issue of money and politics. He is a rich man, a wonderful man, and I said: "You know, we need to get your money off the backs of politicians. We need to make it possible for an honest man to be elected and remain honest if he wants to."

He said, "I understand that, but how would we control politics then?"

That was a perfectly honest question, and I think it expressed the standard operation of business and financial interests in this country today. And it is not getting better, it is getting demonstrably and tragically and dangerously worse.

I do not know what this last presidential campaign cost, but I would guess that when the two candidates and the other presidential nominees and candidates were involved, very close to a \$100 million, just at the

Presidential level. Then you had the Senators, Congressmen and the local officers, and you must have a bill close to \$200 or \$300 million.

How do you raise that money? There are a couple of ways you can't raise it. There's just not enough money in UNICEF boxes to raise it any more. You go places where people have money. That's how you raise money. There are, thank God, a lot of wonderful people in this country who I think do contribute generally for good government. But I think the subtlety and the corrosiveness of money in American politics is the most fundamental issue in Congressional reform. What is not explained is the financial arrangements, the influence of money, the influence of the large contributor. The power to get in and out of an office is, more than any of us here want to admit, influenced by money and those who have money. If you change all of the procedures of the Congress and leave the present corrupting system, I don't think you are going to see much change.

Now, I don't want to be misunderstood. I think the system is much more honest than we have any right to expect it to be. I think I am honest—I'm talking for myself—I know Bill Saxbe is, and I think most of my colleagues are. But there isn't a single one of us who does not detest the present system of having to run for office and raise these massive and growing amounts of money. It is a national scandal and it mortgages American politics to money.

The American people now know that. They see it. They read about it, whether it is the ITT case or the other cases we have heard about in both political parties. They know that increasingly politicians are being forced to respond to money. I think the biggest thing we can do to reform Congress and American politics is to have some system of public support for campaigns.

Now, some people say: "Well, let's solve it through public disclosure, through the timeliness of the disclosure of campaign expenditures." That is a good idea, but it does not work effectively. I think we are going to find, even with this new Campaign Disclosure law, that when the record is written and we look back at it, there was an awful lot of washing of money.

The whole idea behind the Campaign Disclosure law is to tell the American people where you are getting the money. We saw how some of it went through the Mexican banks, but a lot more of it went in different ways, I am convinced of that. I do not have any evidence, but I am convinced that if a person of doubtful stature wants to get some money into the campaign of a good friend, he can find plenty of ways of doing it without anybody except him, his donee and God knowing about it.

I think finally what we need to do in American politics is to do what Teddy Roosevelt urged us to do in 1906. That is to get some kind of system of public support, the dollar check-off, some kind of per-vote contribution, so that it is possible for an honest man to run for office, be elected and deserve the office once he is in. Today, regrettably, I think there is more doubt about that than any of us know or care to admit.

The final point is trying to encourage and help gifted young men and women seeking public office, and this is where I think the media are to be criticized.

You follow the star system. You over-cover the big names. You will play up the dumbest idea if it comes out of some mouths and you will ignore the most creative ideas if they come out of Saxbe's mouth.

You wait for the gifted young man or woman to get elected to the local school board, the local city council, the state legislature. You let him try to put together his team and his organization, you let him try to learn government, you let him try to stay free from corruption and then slowly work

his way up until finally some time he gets to Washington. And then, 10 or 15 years later, he somehow comes to your attention.

I think that one of the best things that the media of this country could do is to have an annual search to look for gifted and talented young men and women seeking office for the first time. A search for people who are making creative and courageous proposals, who are standing up for things that are important. And then try to give them some coverage when they most need it.

You can't keep Nixon out of the headlines. But there are today at least 5,000 wonderful, wonderful people trying to get elected to a state house or a state senate or a city council. I have seen hundreds of them in Minnesota quit because no one pays a darned bit of attention to them, never mentions the fine work they are doing or what they are saying. They can't get a story, they can't get any coverage and as a result they lose hope for their political careers. These are some of the things I hope we might do. Thank you.

Mr. GRUNWALD. Thank you, Senator Mondale. I think your idea of an annual, shall I say, talent search being conducted by the press is fascinating, and I promise you we will give it very serious attention.

I think Senator Saxbe deserves perhaps not equal time, but at least a chance for a comment.

Senator SAXBE. Thank you.

Fritz and I have been on the same side more often than we have been on opposite sides. For instance, this year I carried the ball against the aircraft carrier, with the same results that he had before, and if there ever was a bug hitting the windshield, it is when you try to tell them about the aircraft carrier.

But also I agree with him on most of the things he says. Now, money in politics is a problem that bothers all of us. But it always bothers me as to who is going to decide who gets the money. Who is the bright young man? As Irvin Cobb said one time: "Every time they talk about birth control, I remember I was the fourth child."

Now my experience on money is much like Fritz's. People who give you money for a campaign damn well want their money's worth. They are like the fellow that buys a girl a beer for a quarter and then tries to squeeze it out of her. They are going to get their money's worth.

Now, as to the effectiveness of Congress at the present time. Fritz talked about the great service we have done in regard to the Viet Nam War, that we have done in consumer areas, in ecology, and so on. What he is saying reminds me of the boxer that tells his opponent: "Look, I'll get even with you. I'll bleed all over you."

We are telling the President: "We can't top you, but we'll make you feel bad."

That to me, rather than dramatizing the power of Congress, dramatizes the weakness of Congress. We can't stop him, but we have built a backfire that has served to some extent the purpose which we intended.

Thank you.

Mr. GRUNWALD. Thank you. I wonder whether any of you would like to ask a few more questions of our panel, and especially the Senators here?

Mr. MARTIN. I am Louis Martin.

I would like to ask the Senator if he would comment on a cause that some of us are concerned about, and that is the abolition of some of the antiquated voting registration laws. These help to discourage a great many poor people from registering, because the process is outmoded and it is a bureaucratic mess to get them registered.

I was wondering if, perhaps, some reform of the registration process of qualified voters would not in turn improve the representative character of the Congress?

Senator MONDALE. I do not think there is

any question about that. I think it obviously would. I saw the figures, and I think that something like 45 million eligible people did not register, did not bother to qualify. And I would bet that 90% of them were below the poverty level, poor people, working people.

On election day in Minnesota I was having coffee in a hotel, and two waitresses came up and said, "Can I vote?" I said, "Certainly." The said, "We didn't register. Can we register today?"

Well, you may say they are certainly low in civic understanding. But they are working wives with families at home and husbands who work, and it is very hard to go down to City Hall to register during working hours because they can't afford it. I personally think that you ought to be able to register when you vote, sign up.

Mr. GRUNWALD. Are there any other questions?

Mr. STEELE. John Steele.

This morning we heard a good deal of talk from the panel about the congressional role in the spending process, and we also hear a good deal of talk about establishing national priorities in the fiscal field.

Is there any way the Congress can be brought into the business of budget making, or is that purely an executive function? Neil, I suggest perhaps several of our panel members might be willing to comment on that.

Mr. MACNEIL. I think it is critical that the Congress do exactly that.

I have lost my once-detailed knowledge of the creation of the Budget Bureau, but my recollection of it is that in the period prior to its creation—it was created in 1921—Congress and the Executive had come to a catastrophic stage in dealing with national spending. Not only did the Congress literally force on President Harding the creation of the Budget Bureau, but they also restructured their own committees for this purpose.

The appropriations committees sometime in the 1880s in effect lost control of the spending processes. The appropriations were distributed among the legislative committees.

The Budget Bureau was an agency, as I understood it, created in the 1920s to help Congress handle the budget in a meaningful way. In the years since it has been variously reshuffled. It was once in the Treasury Department. It is now a wing of the White House, under the direct control of the White House, but it was created initially to aid Congress in its approach to national financing.

The Congress now has no agency to make sense out of the federal budget. I think the Congress either should create its own budget bureau and approach the problem that Senator Saxbe mentioned this morning of relating spending to taxation, as it once did, or make the Budget Bureau a joint agency of the Congress and the President, so that the Congress can approach this critical area in American government, of who gets the cookies.

Mr. STEELE. This to me is such a critical question and so much to the point of our discussion that I wonder if the Senators might have a word on their reaction?

Mr. MACNEIL. I would like to add to your question. Why isn't the appropriation process a policy-making decision by Congress on where the money goes?

Senator MONDALE. I think it should be. In the last Congress we established a joint committee of the House and the Senate to study ways of enabling Congress to regain its control over federal spending.

With reference to the debate over the debt ceiling, I was strongly against the ceiling because I think it would have thrown all the congressional spending powers under the Constitution to the President, but it did raise the question of congressional responsibility over its own spending. Congress once did take a substantial role and did serve responsibly in trying to balance out individual

appropriations with an overall target, priorities and the rest.

This, I am afraid, we do not do very well, and I think we should. I strongly support the proposal and I hope the joint committee will come up with an approach for some sort of overall budget responsibility in the Congress and with the necessary staffing.

One of the proposals that Senator Javitz and I have led on, which has passed the Senate twice, is to set up an Office of Budgetary Priorities in the Congress, with computers, staffing and the rest, to help us analyze and sort out the problems and do a better job of discharging our responsibility there.

Senator SAXBE. The difficulty of trying to straighten this out from a spending-taxing concept is almost impossible to comprehend.

You have heard that New York is an ungovernable city, in other words, it has gone so far down the road that nobody can get the handle on what is happening in New York City. There is also this intimation in our national affairs. In other words, that the elected officials have abandoned to the civil servants the job of putting together the budgetary requirements of this government.

Now, one of the difficulties that always come up in this is the fact that so many of these things are frozen in. If you have a 5% annual wage increase, you have a 5% increase in the Department of Defense and all other areas. This is built in, you have no control over this at the present time, and 60% of the DOD budget is frozen into personnel. The only thing you can do is to lop off great numbers of personnel, because you cannot change that part of the budget that has to do with personnel. This is true in most of our other departments, and personnel takes an increasingly large amount of this budget.

Now, the problem we have today is that there is no common meeting place for spending and the taxing, so one goes its merry way and the other goes its way. The Bureau of the Budget is put in the catbird seat in saying to the Congress: "Well, you passed this and you appropriated this money, but there is not enough money to go around, so we are going to lop it off here and we are going to lop it off there." Then when Congress comes back to the President, we say: "You can't do this. We passed this money."

Well, that is not the issue. The question is, what is the priority, and this is what Fritz is talking about, establishing a priority of what we are going to do.

Now, I think I have given you enough of an intimation to ask, is it possible to straighten it out, or is this federal bureaucracy of unmanageable proportions?

Unless Congress puts the spending and the budgeting together, unless we can somehow get these two together in the Congress, we strengthen the Executive Branch. It can then be so righteous as to say: "O.K., you appropriated this but you didn't provide the money for it, so somebody has to stand in there in a position of reality." That makes us appear rather ridiculous to the public.

Mr. LEVI. Julian Levi, University of Chicago.

Time after time the relevant information as to the effectiveness of programs is in the hands of the bureau chiefs and the department heads in the Government, and in fact, it is a bitter contest, often not won, for the Executive himself to find out what is occurring.

I don't know why the appropriations committees of the Congress do not include a provision in the appropriation that a small sum, one-tenth of 1% or something of that sort, be set aside to be made available to the committees of the Congress for them to commission the studies that ought to be made to determine the effectiveness of the programs.

I can say to you that as to the programs which I know best, in the housing and the

education fields, surveys and studies of that kind, independent of the Office of Education, independent of Housing and Urban Development, would have long ago dictated the abandonment of programs that are totally ineffective and often, as a matter of fact, accomplishing the exact opposite of what anybody intends.

Mr. MACNEIL. The gentleman raises a whole area of concern that we have not touched, which is the overview responsibilities of the Congress in seeing to it that the decisions of Congress, the will of Congress, is in fact administered by the Administration.

There was a time, I think in his Inaugural Address, William Henry Harrison, who may be noted for nothing less than the making of an Inaugural Address, said that he was prepared to act on the decisions of Congress, and I think Presidents at that time did so.

The idea of providing the Congress with a few odd bob to check on whether the programs are effective is interesting, and could be useful. But to me the problem is not whether the program itself is effective. It is whether or not the Administration is following the will of Congress. The whole area of congressional overview is neglected and any idea to produce an overview is useful.

Mr. GRUNWALD. With your permission, I will now simply thank Senators Saxbe and Mondale and Dr. Jones, as well as Neil MacNeil, for being here, and for being so stimulating and provocative, and above all, I would like to thank all of you for giving us your time to join us here today.

It is impossible for a single meeting or a series of meetings to bring about fundamental changes, but I hope that in the future you will look back on this and feel that perhaps you have been present at the beginning of something fairly important.

As far as our publications are concerned, I can promise you that we will not, as far as we are able, drop the issue.

Thank you again, and goodbye.

THE OFFICE OF ECONOMIC OPPORTUNITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Ms. ABZUG) is recognized for 10 minutes.

Ms. ABZUG. Mr. Speaker, this morning, I was pleased to have the opportunity to present my views on the future of the Office of Economic Opportunity to Representative HAWKINS' Subcommittee on Equal Opportunities of the Committee on Education and Labor. The subcommittee is presently looking into the Nixon administration's plan to dismantle the OEO and destroy utterly the community action programs which have been the backbone of its work on behalf of the forgotten citizens of our country.

I believe that the OEO has proven its great value in the 8 years since it was established, and am a sponsor of legislation that would preserve it.

The text of my statement to the subcommittee follows:

STATEMENT OF REPRESENTATIVE BELLA S. ABZUG BEFORE THE SUBCOMMITTEE ON EQUAL OPPORTUNITY OF THE HOUSE COMMITTEE ON EDUCATION AND LABOR

The Nixon Administration has changed the war against poverty into a war against poor people, the elderly, small businessmen, unemployed veterans, the handicapped, mothers and working people.

In dismantling the Office of Economic Opportunity, the Administration is saving about \$350 million at a terrible human cost to

Americans. At the same time its new budget proposes to squander \$311 million for more military aid to Laos, a favor the people in that bombed and devastated country would no doubt prefer to be spared.

The Administration is cutting \$519 million in Emergency Employment Assistance and \$252 million on other manpower programs for its citizens at the same time that it is planning in fiscal 1974 to throw another \$750 million to \$1 billion into paramilitary aid programs for South Vietnam, Laos and Cambodia.

It is spending \$15 million on an Army contract awarded to its pet corporation, ITT, to provide a military communications system for the government of General Thieu. That is just \$5 million less than the total amount O.E.O. provided to the Human Resources Administration in New York City during the current year for community action programs.

These priorities are undoubtedly highly profitable for the defense contractors who have fattened off the taxpayers for decades and who use their profits to manipulate and further corrupt the Executive branch. But they are cruel and perverted when judged against the needs of our people.

You have heard in detail the kinds of programs that will be destroyed in the Nixon axe-cutting spree. In the 20th Congressional District, which I represent, the O.E.O. cuts alone mean a loss of \$2,413,665, about 359 staff jobs and 2800 summer jobs. These cuts, are, of course, only part of the Administration's attack on the living standards and quality of life of the more than 400,000 residents in the 20th C.D.

Under other Nixon budget cuts, mental health clinics, educational programs, medical research, housing subsidies, economic development for small business, child care, homemaker services for the elderly, legal assistance for the poor, aid to veterans, rehabilitation help for drug addicts and alcoholics—all are to be mercilessly slashed or completely abandoned.

Mr. Chairman, the most recent data available for the 20th C.D. show that more than half the families living there have incomes of less than \$10,000 a year. Twenty-three thousand families have incomes below \$5,000 a year. Compare this with the yearly income of almost \$11,000 which the Bureau of Labor Statistics estimates that a family of four needs to maintain a moderate standard of living. And then compare BLS figures with the real cost of living in this city, where food prices are shooting up at an incredible rate and the only help consumers get from the federal government is advice to buy slide rules or to eat less.

To eliminate the community action programs that help people survive and to eliminate jobs for the poor and the youth is particularly callous in view of the abnormally high unemployment rates among Puerto Ricans and Blacks in the low income areas of this city, including parts of the 20th C.D.

A survey of these low income areas for 1971 showed that 70 percent of their population are Blacks and Puerto Ricans and more than half of the families living there are headed by women. In these low income areas, the unemployment rate for Black men was 7.2 percent and 5.9 percent for Black women. For Puerto Rican men it was 8.8 percent and 10.2 percent for Puerto Rican women. The jobless rates for teenagers are shocking: 39.8 percent for Puerto Rican men and 30.1 percent for Puerto Rican women; 35.8 percent for Black men and 32.7 percent for Black women.

Now the Nixon Administration, which has the nerve to preach about the "work ethic" and self-reliance, is cutting the life-lines for thousands of people dependent upon community action programs for jobs and assistance.

I urge the members of this committee to

OXIX—602—Part 8

help reinstate the OEO program through decisive legislative action, and I urge it to act quickly before the OEO regional offices are shut down by the end of April.

Congress must call the President's bluff by developing its own Counter-Budget and by showing that the \$12 billion Mr. Nixon is squeezing out of programs to meet basic human needs can be more than made up by cutting military spending and closing tax loopholes that favor the rich.

I also urge the members of this subcommittee to lend their full support to speedy enactment of such measures as H.R. 1415, a bill that provides for the federal government to encourage and assist states and local communities to develop and implement comprehensive programs for public service employment in hospitals, schools, parks, recreation centers, public health, sanitation and other municipal and state services.

We are doing far too little for those in need. We must do more, not less. We must, at the very least, save the OEO and allow it to continue to serve the needs of individuals and communities.

CHURCH STOCKHOLDERS OF U.S. BUSINESSES IN NAMIBIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. Diggs) is recognized for 5 minutes.

Mr. DIGGS. Mr. Speaker, I wish to insert for the attention of my colleagues the press release of the Episcopal Churchmen for South Africa on American Metals Climax & Newmont Mining, their stockholder resolutions calling on two American mining corporations to wind up their involvement in Namibia, South West Africa.

The official policy of the United States is to discourage investment in Namibia. I wish to take this occasion to heartily applaud the efforts of those shareholders who are working to cause their corporation to review its involvement in Namibia. Mr. Speaker, I also wish to insert the text of resolution filed by ECSA with AMAX.

EPISCOPAL CHURCHMEN
FOR SOUTH AFRICA,
New York, N.Y., January 25, 1973.

CHURCH GROUP PRESSES U.S. CORPORATIONS TO WITHDRAW FROM NAMIBIA

Episcopal Churchmen for South Africa has filed stockholder resolutions calling on two American mining corporations to wind up their involvement in Namibia (South West Africa). ECSA charges they are part owners of a company which pays taxes to and accepts the apartheid laws of South Africa, which occupies Namibia in defiance of the United Nations. The U.S. companies are American Metal Climax, Inc. and Newmont Mining Corporation, each of which owns 29 percent of Tsumeb Corporation, a major component of Namibia's rich mining industry. Newmont operates Tsumeb. AMAX and Newmont are both listed on the New York Stock Exchange. ECSA holds three shares of AMAX and two shares of Newmont.

The United Nations General Assembly in 1966, by a vote of 114 to 2—the United States concurring, terminated the League of Nations mandate by which South Africa had governed Namibia. The U.N. set up the Council for Namibia to administer the country, but it has not been able to exercise its territory. General Assembly and Security Council resolutions and a 1971 advisory opinion of the International Court of Justice have consistently sustained the U.N.'s lawful rights in Namibia.

The Namibian people's determination for freedom has mounted over the past two and a half decades. Namibians have been shot, tortured, arrested, tried in South African courts and condemned to South African prisons. Last year Namibian workers, including those at Tsumeb mines, protested against South African rule and apartheid with a nation-wide strike. Leaders of the National Convention, which represents the bulk of Namibia's 800,000 inhabitants, reject South African rule and call for a U.N. presence there to assist their country to independence.

In 1972, ECSA, a non-profit organization of churchpeople, presented proposals at the AMAX and Newmont shareholder meetings asking for disclosure of information about Tsumeb's operations. At the AMAX meeting, Mr. Theo-Ben Gurirab, representative at the United Nations and in the Americas for the South West Africa People's Organization declared:

"The future legitimate government of Namibia will be most eager to deal with foreign interests in Namibia according to their prior exploitation and discriminatory and repressive practices in collaboration with the illegal occupying apartheid regime. . . I must remind you in the strongest possible terms that your company is reaping huge profits on the backs, sweat, tears and blood of my people."

RESOLUTION

Resolution filed with American Metal Climax, Inc. by Episcopal Churchmen for South Africa, a shareholder

Whereas, the United States Government has declared that its policy is to discourage any further investments in Namibia (South West Africa); and

Whereas, such investment serves to strengthen the illegal control the South African Government maintains over Namibia and increases South Africa's vested interest in continuing its occupation of Namibia;

Therefore, be it resolved that the stockholders request the Board of Directors to adopt appropriate resolutions to initiate the process of amending the Certificate of Incorporation of the Corporation by adding the following new subparagraph at the appropriate place:

"Notwithstanding the foregoing, the Corporation shall not conduct or be party to any operations in Namibia (South West Africa), either directly or through subsidiaries or affiliates, and shall use its best efforts to see to it that present operations in Namibia (South West Africa) in which it has an interest are wound up."

STATEMENT

Statement supporting resolution filed with American Metal Climax, Inc. by Episcopal Churchmen for South Africa, a shareholder

The South African Government refuses to yield control over Namibia (South West Africa) to the United Nations, the lawful authority. The United Nations in 1966 terminated a League of Nations mandate by which South Africa had governed Namibia. Since then resolutions of the General Assembly and the Security Council and an advisory opinion of the International Court of Justice have consistently sustained the United Nations' lawful right in Namibia. The United States Government has accepted the World Court decision and has stated a policy of discouraging further investments in Namibia. The Corporation is part owner of Tsumeb Corporation, one of the largest investors in Namibia, which pays taxes to and accepts the racially discriminatory laws of South Africa in Namibia. Such cooperation presents a danger to the Corporation by involving it in direct support of an illegal regime and the use of forced labor.

FOREIGN INVESTMENT IN THE UNITED STATES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 10 minutes.

Mr. REUSS. Mr. Speaker, on March 23 I spoke in New York before the Sixth Annual Institutional Investor Conference and emphasized the importance of attracting foreign direct investment in the United States. I would like to include in the RECORD the following excerpts from that speech:

FOREIGN DIRECT INVESTMENT COULD HELP THE DOLLAR AT HOME AND ABROAD

Everybody recognizes achieving balance in our international payments as a top priority. But we are overlooking what could be our best bet—vastly increased foreign direct investment in high-technology U.S. plants. For the past fifteen years, we have been exporting our capital and technology, to the great benefit of our multinational corporations and of most of the industrialized world. It is now time to look homeward and encourage the reverse process—direct U.S. investment, joint adventures, licensing agreements by productivity-conscious European and Japanese firms.

Direct foreign investment can aid our balance of payments in three important ways:

1. Increased capital inflows, spurred by the exchange rate realignments which make U.S. plant and equipment 20-30 percent cheaper than before. Some investing countries are shy of capital themselves, but even if the investment capital would need to be raised in this country, the incoming technology by itself would be a help.

2. The products made in the United States, particularly with the help of U.S. marketing methods, could further aid our balance of payments by displacing imports.

3. With our high wage scales, we need to concentrate on high-technology exports. It is about time we got a 'reverse lend lease' from Europe and Japan.

Take the case of the recently opened Kikkoman soy sauce plant in Elkhorn, Wisconsin. Local interests initially opposed this Japanese direct investment, despite the fact that the Japanese had been buying midwestern soy beans, shipping them to Japan, making the sauce, and exporting the sauce back to the middle west. Today, Kikkoman is a howling success. There are 50 new jobs; a brand new \$9 million plant will be on the local tax rolls; our balance of payments is helped; and the new Japanese families are much in demand at Rotary luncheons, and a delight to the local school system.

Even though foreign direct investment looks like our best road to balance of payments salvation, practically nobody in government is really beating the drums for it. The White House wants to remove all controls on U.S. capital investment abroad, on the somewhat fragile theory that our bread on the waters will be returned some day. The State Department is gung ho about foreign portfolio investment in Wall Street—which would be nice for our investment account, but not much help in making American jobs or upgrading American technology. The Treasury, with its very expensive and not very successful DISC tax bonanza, is all out for vastly expanded U.S. exports. The Department of Commerce is devoting a big budget toward enticing more tourists to the U.S.

Attracting foreign direct investment is a rare opportunity for American manufacturing firms, American banks, and the American

investment industry to make jobs, increase productivity, and boost our balance of payments.

The January 16, 1973, issue of World magazine contained an excellent article by Stefan H. Robock on the impact of foreign investment in the United States. Excerpts from the article, entitled "The Silent Invasion," follow:

THE SILENT INVASION (By Stefan H. Robock)

Silently but surely the United States is being invaded. . . . I am referring to the accelerated but little noticed trend of foreigners to establish or acquire business enterprises in the United States. European and Japanese direct investment in American business operations has been growing at a faster rate in the last few years than has American business investment abroad. Furthermore, this silent invasion promises to pick up even greater momentum.

The rapidly expanding foreign-business presence in the United States is neither narrow nor of limited interest. Much of it does not come into popular view: for instance, the vast array of industrial chemicals, industrial machinery, and agricultural fertilizers produced in the States by foreign-owned companies. But at the consumer level, the range and variety of products locally manufactured by foreign firms is almost endless.

As of 1970 the value of U.S. direct investments (i.e., investments that carry with them participation in management as contrasted with portfolio investments, which do not) in Europe reached almost \$25 billion, whereas the value of direct investments in the United States by Europeans was slightly less than \$10 billion. But as shown in the table (page 29), the growth rate of inflows of European direct investments increased to almost 13 per cent annually over the 1966-1970 period from only 5 per cent annually during the 1959-66 period, whereas the rate of U.S. investment in Europe dropped to 12.7 per cent from a level of 17.1 per cent over the earlier period.

When examined by type of business activity, the trend of European investments in the U.S. is even more impressive. Foreign investment in the insurance and finance field has not grown rapidly; but European investments in both petroleum and manufacturing have been at much faster rates than reverse flows to Europe by American companies.

The value of Canadian investment in the United States is large, totaling more than \$3 billion in book value as of 1970, but recent growth trends have been less dramatic than those of the European investors in the United States. Japanese investment is still small but growing rapidly. The Japanese have been shying away from direct investment in the U.S. except to build up sale and service organizations and to develop sources of supply for forest-product raw materials. Since the international financial crisis of late 1971 and the revaluation of the yen, however, the Japanese situation has changed radically.

The revaluation has made imports from Japan more expensive, and several Japanese companies are now assembling color television sets in the U.S.—Hitachi and Sony in California and Matsushita in Puerto Rico. By building sets in the U.S., the Japanese say they can make quicker deliveries, lower their transportation costs, and possibly enter the console market. But the most important reason is to hedge against any further revaluation of the yen, which would reduce even further the competitiveness of imports.

The continuing large balance of payments surplus of Japan and new government policies to encourage Japanese to reduce this surplus by increasing outflows of investment capital has accelerated still another trend toward buying into U.S. companies.

At least four major changes laid the foundation for a delayed European and Japanese response. First, a new world balance in the economic strength of the leading industrial nations had emerged. Secondly, by building on a venerable research capability that was disrupted by the war, the Europeans were able to close the technology gap and reassert technological leadership in a number of traditional fields. The Japanese also came to the fore as technological leaders by a highly effective program of quickly absorbing and building on top of the technology of the West. A third factor was a crash program supported by foreign governments to strengthen European and Japanese firms through mergers and through closing the gap in management skills. A fourth factor was the growing realization that the Americans were not necessarily unbeatable in the economic and business fields.

To emphasize the change in relative strength in international economic relations, the German and Japanese governments have begun to encourage the direct export of capital, in some cases by tax concessions, for private business investment abroad, while President Nixon, who had hoped to remove the restrictions on American investment abroad, was forced to ignore the subject and retain his predecessors' restrictive measures. Of course, the causes of the U.S. balance of payments difficulties go beyond the Vietnam War. The U.S. began to run a balance of payments deficit beginning about 1950, but the problem was not regarded seriously so long as we continued to hold most of the world's gold supply.

In any event, without reviewing all the complexities of the international financial situation and the recent difficulties of the international monetary system, a principal result of these events has been the strengthening of foreign currencies relative to the U.S. dollar. This development gave a double boost to foreign investment in the U.S. The cost of goods produced at home by foreign companies rose relative to those produced abroad.

At the same time, a revalued German deutsche mark, a Swiss franc, a Dutch guilder, and a Japanese yen were able to buy that much more in dollar assets. It should be no surprise, therefore, that the European countries with the three strongest currencies—the Swiss, the Dutch, and the Germans—are the same three countries that provided the bulk of the new direct investment in the U.S. during the late 1960s.

To explain the silent invasion as a result of foreign superiority in technology may come as a blow to the American ego. But the flood of imports from Europe and Japan based on technological advantages rather than simply on cheap foreign labor should have already brought home to Americans the reality that the technology balance has shifted. Also, it may be well to recall that before World War II the technological lead in such fields as pharmaceuticals and chemistry was held by Swiss and German firms with long traditions of R and D.

Early in the post-World War II reconstruction period, European governments and private companies adopted strategies to close the technology gap, in some cases through cooperative research efforts across national boundaries in such fields as space, nuclear research, and aircraft.

America's technology lead has been heavily military in origin but in such glamorous industries that the narrowness of its base was often unnoticed.

Servan-Schreiber, with his best-selling book *The American Challenge*, did much to persuade Europeans that they were lagging behind the Americans in business-management skills. Management skills, even more than technology, have been the driving force behind U.S. industrial expansion abroad. Europe's tardy appreciation of this fact has been largely offset by the zeal with which European legislators, educators, and a host of public and private organizations have turned to the promotion of management education in Europe.

Academic and other training courses may become the major source of management strength in the future. But in the immediate past the most effective institution for the management training of Europeans and Japanese has been the U.S. foreign subsidiary.

Concurrently with the push for management training, European and Japanese governments have actively encouraged business mergers so that their national firms would not lack size for competing internationally.

Probably the most fascinating of the ingredients supporting the silent invasion was the shrugging off by European and Japanese businessmen of a long-standing inferiority complex vis-à-vis dynamic American businessmen. Export success in labor-intensive products, such as shoes, apparel, and textiles, was easily explained as due to lower foreign wage rates. But foreign producers have also had dramatic success in exporting to the U.S. more sophisticated products, such as automobiles, industrial machinery, and electronics, which did much to shatter the image of American business superiority and increase foreign business confidence. Along with this factor, Nicholas Faith has added the effect of the Vietnam War in challenging at an even broader level the sense that the Americans were unbeatable. But not to be underestimated are the many success stories of foreign firms who were brave enough to invade the U.S. market and managed to survive and even prosper.

Such has been the overall setting for the silent invasion. At a more specific level, individual firms were able to find in the U.S. special opportunities related to their area of operations and capabilities. With growing self-confidence many foreign enterprises have taken over U.S. businesses, motivated mainly by the availability of dollars for investment; government encouragement to invest in the United States; and opportunities for profitable returns. In some cases the establishment of new plants was based on technological advantages. In other situations foreign firms had built up a large enough demand in the American market through exports to justify the establishment of an American plant that would offer locational advantages in transportation savings and in better servicing the market. One important motivation shared by a number of foreign companies operating in the United States is the opportunity to learn sophisticated advertising, marketing, and product-development techniques, which can be applied elsewhere in the world by other subsidiaries of the foreign enterprises. Such has been the justification in part of Unilever's operations in the United States.

Will the trend continue, and what are the implications of the silent invasion? * * * I expect Americans to continue relaxed about the foreigners in our midst. * * * And so long as our international balance of payments situation remains unfavorable, the U.S. official position is certain to encourage capital inflows in the form of direct or portfolio investments.

Even some of the American labor unions, while opposing foreign expansion by U.S. firms as a form of exporting jobs, have followed the governmental pattern of encouraging foreign firms to enter the United States. United Auto Workers President Leonard Woodcock visited Japan in October 1972; and one of his missions was to encourage Japanese auto producers to set up shop in this country. At least three state governments have set up offices in Europe for attracting new industries to their areas, and numerous state delegations have visited foreign countries to discuss future investment in their regions.

In those cases where foreign firms are willing to enter into joint ventures, or be somewhat silent partners, as in the aforementioned Japanese cases, American firms can profit through partnership in the United States with foreign corporations by gaining access to overseas distribution channels and to foreign technological developments.

Another interesting pattern now emerging is the proposal by capital-surplus Middle Eastern oil countries, Saudi Arabia in particular, to make major investments in the U.S. oil industry. As in most of the major oil-producing countries, oil royalties and taxes at new high rates are pouring into the government treasury much faster than the government can spend them. The strategy to invest in "downstream" facilities offers the hope of sharing even more in the profits reaped from their own natural resources. In the hope of improving their bargaining power and securing continued access to Middle Eastern oil, American international oil companies are likely to accede to the expressed wishes of Saudi Arabia.

So long as the silent invasion brings new products and increases competition in the American market, the American consumer will have little cause to complain. Even when acquisitions of existing companies, such as the Olivetti take-over of the old Underwood typewriter company, mean that existing sources of supply will be saved from extinction or operated more efficiently, consumers' interests are benefited.

Of course, the silent invasion will not be in those fields of production where low labor costs are the prime consideration, such as shoes, textiles, some lines of apparel, and electric components. But as students of locational economics are aware, the most efficient site for many industries is near the source of raw materials, such as industrial water in the case of chemicals and electric power in the production of aluminum. Despite the widely accepted notion that wage rates are the critical factor in the competitiveness of American industry, the silent invasion is ironic proof that for many foreign firms it is most advantageous to manufacture in the United States.

In large part the European-Japanese response was inevitable. * * * The silent invasion may be hard on the American ego. Yet through Vietnam we have learned to adjust to the new reality that we are not invincible in military affairs; now we will have to adjust to the reality that America's dynamic business capability is being successfully challenged. Fortunately, a successful silent invasion can have favorable, rather than unfavorable, results.

THE COST OF MEAT—THE PRICE SPIRAL CONTINUES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

Mr. VANIK. Mr. Speaker, there is really no need to repeat it—every shopper in America knows it: meat prices are soaring through the ceiling, and meat is soaring off the kitchen table.

During the last 18 months, a community committee on consumer prices, located in the eastern suburbs of Cleveland, Ohio, has done a brilliant job in providing me with data on changing food and consumer prices in the Greater Cleveland area. I would like to enter in the RECORD at this point, some of the latest sample data which the committee has provided me.

	Fall 1971	Mar. 1, 1973	Mar. 19, 1973	Percent change fall, 1971 to Mar. 19, 1973
Beef:				
Hamburger.....	\$0.69	\$0.92	\$0.99	43
Ground chuck.....	.68	.98	1.04	53
Roasts:				
Chuck, semi-boneless.....	.88	1.14	1.18	34
Pot roast.....	.74	1.09	1.18	59
Steaks:				
Chuck, semi-boneless.....	.98	1.24	1.35	37
Top round.....	1.09	1.68	1.78	70
Sirloin.....	1.34	1.64	1.68	25
Porterhouse.....	1.64	1.88	1.94	18
Poultry:				
Fryer, whole.....	.29	.52	.54	86

I would like to add here that the chairman of the committee, Mrs. Carolyn Suguchi, who along with the other volunteers has done such an excellent job, will be testifying before the Joint Economic Committee here in Washington, next Wednesday, April 4. It is my hope that her testimony—and the food price documentation which is pouring in from all over the Nation, will lead to substantial amendments to the administration's proposed phase III program.

It is imperative that when the Congress considers extension of the Economic Stabilization Control Act and the laws governing phase III, that direct controls be applied to foods. It is inflation in the food goods sector which most directly affects those on fixed and low incomes and those with large families.

Mr. Speaker, I would like to add at this point that I am heartily in support of the efforts which have sprung up, spontaneously throughout the Nation, to protest the price of meat. Meat boycotts are being organized throughout the Nation, including some in my own 22d Congressional District.

The uncontrolled food inflation over the past 19 months has devastated the budgets of all Americans. Millions of our citizens have been moved from self-sufficiency to dependency by the cruel impact of inflation. Even more seriously, the high price of meat is eliminating a proper share of this essential food from the diet of our young people who require more for growth and development.

While such boycott efforts are commendable citizen action and can play an important role in reducing the demand for meat and lessening price pressures, the American public expects more from its government leaders. It expects a government policy that will make meat boycotts unnecessary.

While the administration is to be commended for reducing the number of farm acres in the set-aside program—a type of "soil bank" program in which the farmer is paid to keep land out of production, there are still some 20 million acres of farmland which are not being fully used and for which the farmer is being paid to keep out of full production. These remaining acres should be brought into full use as soon as possible.

Finally, and in the meat sector particularly, permanent repeal of the meat import quota is needed. The Meat Import Quota Act of 1964—an anticonsumer bill which I opposed at that time—regulates the supply of foreign meat entering the United States, limiting the amount of foreign meat to about 3 percent of total U.S. meat consumption.

We all appreciate the need for an adequate income to American farmers. But the simple fact is that the supply of meat is inadequate at prices which large families and low-income families can afford. This shortage, which is worldwide, will become more acute in the years ahead.

Foreign meat is tougher, leaner, lower grade than U.S. meat. It is almost exclusively of the processing meat variety—hamburger, hot dog, and sausage. It is the type of meat primarily used by large and low-income families. As a recent Tariff Commission report pointed out, it is generally not competitive with domes-

tic meat which specializes in choice, tender steaks and roasts.

I might add here that American meat is just about the finest in the world—with the result that many of the most famous—and expensive—restaurants of Europe and Japan are importing American steaks and roasts. It now appears that while domestic prices continue to soar, we are exporting over 52 million pounds of the finest cuts of "Kansas City steaks" to the gourmet restaurants of the world. These exports further restrict supply at home, with the result that the shopper pays more.

Recognizing the crisis in meat prices, the administration temporarily suspended meat import quotas last June for a period of 6 months. In December of this year, it announced suspension of supply restrictions for another year.

But temporary suspension of meat supply restrictions does not appreciably increase the supply of this cheaper priced processing meat. Foreign producers will not substantially alter their production and shipping plans for what appears to be a temporary change in the American market—a market which may be suddenly restricted by the stroke of a pen. For example, Australia, one of our principal trading partners, requires its ranchers to sell 1 pound of meat in the world market for every 2.5 pounds sold in the American market—even though they would rather sell more in the American market. The temporary relaxation of import quotas will not substantially increase meat supplies since producers must plan years ahead to increase herds to meet American needs.

In addition to my legislation to provide for permanent repeal of the Meat

Import Quota Act of 1964, I will be introducing legislation tomorrow to provide for a repeal of the 3 cents per pound duty now being charged against every pound of fresh, chilled, or frozen beef imported into this country. Similarly, efforts must be made to repeal the tariff rates now applied against mutton and lamb—rates which are almost as high as the rates on beef. Mr. Speaker, it is unconscionable to maintain a tariff against meats when the price of domestic—and foreign—meats is skyrocketing and has gone beyond the regular purchase price of millions of American families.

ARE MEAT PRICES STARTING TO DECREASE?

During the past week, there has been considerable comment to the effect that, because of reduced demand, meat prices were beginning to decline. An analysis of the Chicago wholesale meat markets between Monday and Wednesday of last week could have supported that contention. But a study of the market's performance on Thursday and Friday and on Monday of this week indicates that the price decline in choice cuts is already being halted and is climbing upwards again. This price "turn-around" appears to be due to a decision by the ranchers to withhold livestock until prices stabilize or the boycott ends. In the live cattle markets in Omaha on Thursday, March 22, and Friday, March 23, "not enough steers and heifers [were] on offer for adequate price test."

Mr. Speaker, I would like to include the relevant Chicago meat price tables in the RECORD at this point. They are a clear warning that stronger Government action is needed and needed immediately.

MEAT PRICES¹

	August 1971 ²	December	Feb. 27	Mar. 16, 1973	Mar. 22, 1973	Mar. 23, 1973
Choice:						
Steers, 6/700	53½	57½	66½	69½	66½	68½/69
Trimmed loins, 40/50	98	86/87	96	1.02	1.05	1.05
Ribs, 30/35	74	79/80	82	85	86	86-87
Processing:						
Full carcass, bull, fresh	70	77½	94	1.00	99	99
Boneless beef, fresh, 90 percent lean	65	73/73½	92/93	94-95	92½/93½	91½/92½
Boneless chucks, fresh	66	75	91½	95	94	93/94
Trimmed, 85/90	61	67	38½	90½	89	87/88
Imported:						
Cow, 90 percent	61½	71	92½/93	92/93	89	87
Bull, 90 percent	63½	74½	94½	95/95½	93/94	92/93
Shank meat	64½	74/74½	94½/95	95/95½	92/93	91/92

¹ Domestic meats, f.o.b. Chicago. Imports ex dock, port-of-entry as listed, national provisioner yellow sheets about the middle of each month.

² Average prices during 30 days prior to Aug. 14, 1971.

Not only does the Choice meat market appear to be climbing back upward, but at the close of business Monday, March 26, Choice steers, 600 to 700 pounds, were being quoted in Chicago at 70 cents per pound.

It should also be remembered that the prices in this table are wholesale prices. Even the high prices of last March 16 have not yet been fully passed onto the retail stores.

Finally, it should be noted that there is some weakness in price in the imported meat categories—although they are still nearly 50 percent higher than

in August of 1971. Some of this price softness may be attributed to continuing uncertainty in the world money markets—an uncertainty that is likely to diminish in the weeks ahead—as well as to rumors that the administration may ask for a removal of the 3 cents a pound tariff on imported meats. Since this rumor has caused some downward pressure on these foreign meats—the type of meats so important for large families and those with fixed incomes—it is obvious that we should take positive action to change that rumor to fact: We should

take immediate action to repeal the tariff as soon as possible.

Finally, in an effort to help the American consumer during the present meat crisis, I would like to enter in the RECORD at this point, a brief analysis, released by the Department of Agriculture and printed in the Family Economics Review of December 1972, which lists the grams per pound of various products and the relative price of these products. These two figures can tell the shopper which products provide the most protein for the dollar. The U.S. Department of Agriculture table follows:

TABLE 1.—COST OF 3 OUNCES OF COOKED LEAN FROM SPECIFIED MEAT, POULTRY, AND FISH AT AUGUST 1972 PRICES

Item	Retail price per pound ¹	Cost of 3 ounces of cooked lean
Hamburger	\$0.76	\$0.20
Chicken, whole, ready-to-cook	.41	.20
Turkey, ready-to-cook	.55	.22
Beef liver	.80	.22
Ocean perch, fillet, frozen	.77	.22
Chicken breasts	.78	.27
Ham, whole	.78	.27
Pork, picnic	.63	.29
Haddock, fillet, frozen	1.07	.31
Ham, canned	1.23	.31
Chuck roast of beef, bone in	.85	.38
Pork loin roast	.92	.46
Rump roast of beef, boned	1.50	.51
Round beefsteak	1.51	.51
Pork chops, center	1.29	.58
Rib roast of beef	1.32	.59
Sirloin beefsteak	1.58	.68
Veal cutlets	2.76	.69
Lamb chops, loin	2.04	.94
Porterhouse beefsteak	1.87	.97

¹ Average retail prices in U.S. cities, Bureau of Labor Statistics, U.S. Department of Labor.

TABLE 2.—COST OF 20 GRAMS OF PROTEIN FROM SPECIFIED MEATS AND MEAT ALTERNATES AT AUGUST 1972 PRICES

Item	Retail price per pound ²	Cost of 20 grams of protein
Dry beans	\$0.25	\$0.06
Peanut butter (12 oz. jar)	.50	.12
Eggs, large (dozen)	.51	.13
Chicken, whole, ready-to-cook	.41	.15
Bean soup, canned (11½ oz. can)	.17	.16
Beef liver	.80	.19
Hamburger	.76	.19
Tuna fish (6½ oz. can)	.45	.20
American process cheese (8 oz. pkg.)	.54	.21
Ham, whole	.78	.22
Round beefsteak	1.51	.33
Frankfurters	.91	.33
Rib roast of beef	1.32	.44
Pork sausage	.86	.45
Bologna (8 oz.)	.63	.46
Bacon, sliced	.99	.52

¹ One-third of the daily amount recommended for a 20-year-old man.

² Average retail prices in U.S. cities, Bureau of Labor Statistics, U.S. Department of Labor.

THE DEMOCRATIC ALTERNATIVE ON THE ECONOMIC STABILIZATION PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. PATMAN) is recognized for 10 minutes.

Mr. PATMAN. Mr. Speaker, today 20 Democrats on the Banking and Currency Committee are introducing legislation to stiffen the economic stabilization program and to provide an effective alternative to President Nixon's altering phase III effort.

The bill was cosponsored by myself and WILLIAM BARRETT, Mrs. LEONOR SULLIVAN, HENRY REUSS, WILLIAM MOORHEAD, FERNAND ST GERMAIN, JOSEPH MINISH, RICHARD HANNA, TOM GETTYS, FRANK ANNUNZIO, THOMAS REES, JAMES HANLEY, FRANK BRASCO, Ed KOCH, WILLIAM COTTER, PARREN MITCHELL, WALTER FAUNTROY, ANDREW YOUNG, JOHN JOSEPH MOAKLEY, and PETE STARK.

The legislation will impose an immediate freeze on prices and interest rates at levels no higher than those prevailing on March 16, 1973. The freeze will remain in effect indefinitely, but the President is to immediately launch a program

designed to roll back prices and interest rates to reduce inflation.

The rollback plan is to be implemented and completed within 60 days after enactment.

The bill allows the President to make adjustments in the freeze order when it is necessary to prevent gross inequities. However, the President must publish a specific determination with a statement of considerations for the action in the event any adjustments are made. Any exemption from the rollback orders must be accompanied by a similar statement and justification.

At the end of the 60-day period, a "triggering mechanism" will go into effect which will allow the Congress and the public to monitor the progress of the stabilization program. If the rate of inflation, as measured by the Consumer Price Index, exceeds 3 percent for any 3 months—or 2.5 percent for any 12-month period—the President must revert to a mandatory set of controls over all elements of the economy.

Mr. Speaker, we believe that this three-step plan will apply pressure on the President to develop a firm stabilization program which will bring inflation under control and allow us to stabilize the economy.

It should be noted that what we are proposing are amendments to existing law. He will retain the broad powers he now has under the Economic Stabilization Act plus the additional powers and requirements granted and imposed under these amendments. Thus, the President will retain flexibility necessary to administer the program, but the Congress will have provided strong direction for any future stabilization program.

It is hoped that the President will be sufficiently firm under the freeze and rollback orders so that there will be no necessity for the trigger mechanism for mandatory controls to be placed into effect. But the triggering mechanism—the 3-percent guideline—does provide a strong incentive for all elements of the economy—as well as the administration—to support efforts to reduce inflation. If banks continue to insist on higher interest rates, if the business community pushes for higher prices, or if labor demands unwarranted wage increases, then there is danger that the trigger mechanism will be tripped and mandatory controls instituted across the board.

Incidentally, the guidelines—the 3 percent for a quarter and the 2½ percent for the year—basically track the claims which the administration has made for its own stabilization efforts. So we are simply holding the administration to its own word.

Mr. Speaker, this legislation assures that the administration cannot continue to allow the Nation to drift into more and more inflation. It sets up a timetable—with a monitoring device—which says that the President must either stabilize the economy or he must resort to mandatory controls across the board. This will put an end to the vagueness which has existed, particularly since the announcement of phase III.

In summary, it provides: First a freeze; second, a rollback; third, a continuing monitoring of stabilization programs;

and, fourth, mandatory controls without exception if the stabilization program falters again.

The legislation also includes these other major areas:

Stabilization of rents. This amendment stabilizes rents at levels prevailing on January 10, 1973, the last day of phase II. The President may allow rents to increase from the established level but only where there has been an increase in taxes imposed by a State or local government, a capital improvement during the period of occupancy and increases in the cost of services and materials. Only actual cost increases may be passed on. This amendment also allows the President to roll back rents beyond January 10, 1973.

Regulation of credit for commodity futures trading. This amendment allows the Federal Reserve to regulate credit in the commodity futures.

Consumer Counsel. This establishes an Office of Consumer Counsel. The Counsel is empowered to examine all records, information, and testimony relating to any matter before the President in respect to economic stabilization. The Consumer Counsel is empowered to require a public hearing and written decision by the Cost of Living Council in respect to any price, interest rate, or wage adjustment which is covered by the act. The Consumer Counsel is also directed to advise consumers in ways to make beneficial decisions to themselves in the purchase of goods and services so as to affect the cost-of-living economy. The Counsel is vested with subpoena power and standing to sue the Cost of Living Council whenever it fails to act in accordance with the law or with its own regulations.

General Accounting Office. This amendment empowers the Comptroller General to review all reports concerning prices, profits, wages, salaries, or interest rates submitted by any person to the President in the stabilization effort. The Comptroller also must inform the Congress whenever he discovers that a person has taken, or is about to take, action which departs from the standards for prices, profits, wages, salaries, or interest rates established under authority of the Act.

Public disclosure. This amendment would require business enterprises subject to reporting requirements of the Cost of Living Council to make public any report it is required to submit to the Council. It also requires any person who raises any interest rate to make public a report justifying such a raise. This amendment, however, would allow a business enterprise to exclude from any report made to the public any information which is proprietary in nature and which relates to the amount or sources of its income, profits, losses, costs, or expenditures. It may not exclude from that report data concerning its price for goods and services.

Reporting. This amendment requires the President to transmit a quarterly report to Congress describing changes in productivity, consumer prices, wholesale prices, corporate earnings, interest rates, wage earner rates and employment and

unemployment on an industry-by-industry basis.

Authority to allocate petroleum products. This amendment allows the President to establish priorities for the use and allocation of supplies of petroleum products to meet the needs of various sections of the country and to prevent any competitive effect resulting from the shortage of such products.

Definition of substandard earnings. This amendment requires the President to exempt all wages from controls which are \$3.50 per hour or less.

One-year extension of the act. This amendment extends the stabilization authority until April 30, 1974.

The legislation, as introduced, follows:

H.R. 6168

A bill to amend and extend the Economic Stabilization Act of 1970

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

Amendments to the Economic Stabilization Act of 1970

SECTION 1.—The Economic Stabilization Act of 1970 is amended by redesignating sections 204 through 220 as sections 209 through 224, respectively, and by inserting immediately after section 203 the following new sections:

"§ 204. Freeze of prices and interest rates.

"(a) Notwithstanding any other provision of this Act, all prices and interest rates are hereby frozen at levels no higher than those prevailing on March 16, 1973. The President may, by written order stating in full the considerations for his action, make adjustments with respect to prices and interest rates in order to correct gross inequities.

"(b) Immediately, but not later than 60 days after the date of enactment of this section, the President shall, by written order stating in full the considerations for his action, roll back prices and interest rates to levels lower than those prevailing on March 16, 1973, in order to reduce inflation and otherwise carry out the purposes of this Act. The President may make specific exemptions from the rollback by written order stating in full the considerations for his action determining that such rollback is unnecessary.

"(c) (1) Whenever the consumer price index (all items—United States city average) as compiled by the Bureau of Labor Statistics, United States Department of Labor, for a calendar month exceeds—

"(A) an annual rate of 3 per centum for any three consecutive months (the first such months of which begins after the sixtieth day after the date of enactment of this section), or

"(B) an annual rate of 2.5 per centum for any 12 consecutive months (the first such month of which begins after the close of December 31, 1972), then within thirty calendar days the President is authorized and directed to issue orders and regulations to establish a mandatory program to—

"(i) stabilize prices, wages, and salaries at levels not less than those prevailing on May 25, 1970, in order to reduce inflation; and

"(ii) stabilize interest rates and corporate dividends and similar transfers at levels consistent with orderly economic growth.

"(2) (A) Notwithstanding any other provision of this Act, no order or regulation may be issued under this subsection unless it is made on the record after opportunity for a hearing.

"(B) Notwithstanding any other provision of this Act, the public shall have access to all data and other information

which is the basis for or is used in any manner to formulate any standards issued by the President under this section.

"§ 205. Stabilization of rents.

"(a) Notwithstanding any other provision of this Act, the President is authorized and directed to stabilize rents at levels prevailing on January 10, 1973. Thereafter, the President shall only allow rents to increase by the actual amount of any increase in any tax, fee, or service charge levied by a State or local government and any necessary capital improvement after the beginning of the preceding period of occupancy (and not previously charged to any lessee) and allocable to that residence, and any reasonable increased costs of services and materials.

"(b) The President may roll back rents to levels lower than those prevailing on January 10, 1973, to carry out the purposes of this Act.

"§ 206. Regulation of credit for commodity futures trading.

"For the purpose of preventing the excessive speculation in and the excessive use of credit for the creation, carrying, or trading in commodity futures contracts having the effect of inflating consumer prices and industrial costs, the Board of Governors of the Federal Reserve System shall prescribe regulations governing the amount of credit that may be extended or maintained on any such contract. The regulations may define the terms used in this section, may exempt such transactions as the Board may deem unnecessary to regulate in order to carry out the purpose of this section, and may make such differentiations among commodities, transactions, borrowers, and lenders, as the Board may deem appropriate.

"§ 207. Consumer Counselor

"(a) There is established in the legislative branch the Office of Consumer Counselor, which shall be headed by the Consumer Counselor, who shall be appointed for a term of one year by the Temporary Emergency Court of Appeals established by section 216(b) (1) of this Act. The Consumer Counselor shall be compensated at the rate prescribed for level III of the Executive Schedule.

"(b) The Consumer Counselor may appoint such employees of the Office of the Consumer Counselor at such salaries as are necessary to carry out the provisions of this section.

"(c) Notwithstanding section 210, the Office of the Consumer Counselor, under the direction of the Consumer Counselor, shall have authority to investigate fully, on complaint from a consumer, or otherwise, all official actions of any board, commission, or similar entity charged with the duty to carry out the provisions of this title, and any such board, commission, or similar entity shall promptly upon request make fully available to the Office of the Consumer Counselor all records, information, and testimony relating to any matter which such Office investigates.

"(d) The Consumer Counselor, or his delegate, shall have authority for any purpose related to his official duties, to issue subpoenas for the attendance and testimony of witnesses and the production of relevant books, papers, and other documents, and to administer oaths. Witnesses summoned under the provisions of this section shall be paid the same fees and mileage as are paid to witnesses in the courts of the United States. In case of refusal to obey a subpoena served on any person under this subsection, the Consumer Counselor may apply to the district court for any district in which such person is found for appropriate relief to compel such person to obey such subpoena.

"(e) The Consumer Counselor may, as the result of an investigation under subsection (c)—

"(1) intervene by submitting a written statement of his objections and the reasons therefor; or

"(2) require a public hearing and decision on the record as provided in section 556 of title 5 of the United States Code;

In any rulemaking or adjudication or other decision of any board, commission, or similar entity, where the Consumer Counselor determines such intervention or requirement is necessary in order to prevent the making of a rule, the adjudication of a case, or the making of any other decision contrary to law, contrary to the intent of the Congress, contrary to the Constitution, or contrary to the rules of such board, commission, or similar entity.

"(f) If any board, commission, or similar entity makes any rule, adjudication, or other decision notwithstanding the objections of the Consumer Counselor under subsection (e), the Consumer Counselor may apply to the appropriate district court for all appropriate relief to compel such board, commission, or similar entity to act in accordance with law, the intent of the Congress, the Constitution, or the rules of such board, commission, or similar entity.

"(g) The authority conferred upon the Office of Consumer Counselor and upon the Consumer Counselor by this section with respect to any board, commission, or similar entity charged with the duty to carry out the provisions of this title shall also extend to any action of any officer, agency, or entity of the Federal Government which in any manner affects the stabilization of prices, rents, wages, salaries, dividends, or interest.

"(h) The Office of the Consumer Counselor shall take all necessary action to advise consumers of information necessary to make intelligent decisions on the purchase of consumer goods and services and so effect cost-of-living economies.

"§ 208. General Accounting Office

"(a) Notwithstanding any other provision of this Act, the Comptroller General of the United States (hereafter referred to in this section as the 'Comptroller General') shall have authority to review all reports concerning prices, profits, wages, salaries, or interest rates submitted by any person to any officer, department, agency, board, commission, or similar entity established pursuant to authority granted the President by this title.

"(b) The Comptroller General shall promptly inform the Congress whenever the review provided for in subsection (a) reveals that any person has taken or is about to take action which departs substantially from the standards for prices, profits, wages, salaries, or interest rates established under the authority of this title. Neither section 210 of this Act, nor section 1905 of title 18, United States Code, shall in any way limit the information which the Comptroller General may transmit under this section to the Congress."

PUBLIC DISCLOSURE

SEC. 2. Section 210 of the Economic Stabilization Act of 1970, as redesignated by section 1 of this Act, is amended—

(1) by striking out "All" and inserting in lieu thereof "(a) Except as provided in subsection (b), all"; and

(2) by adding at the end thereof the following new subsection:

"(b) (1) (A) Any business enterprise subject to the reporting requirements under section 130.21(b) of the regulations of the Cost of Living Council in effect on January 11, 1973, shall make public any report (except for matter excluded in accordance with paragraph (2)) so required which covers a period during which that business enterprise charges a price for a substantial product which exceeds by more than 1.5 per centum the price lawfully in effect for such product on January 10, 1973, or on the date twelve months preceding the end of such period, whichever is later. As used in this subsection, the term 'substantial product' means any single product or service which accounted for

5 per centum or more of the gross sales or revenues of a business enterprise in its most recent full fiscal year.

"(B) Any person who raises any interest rate shall make public a report justifying any such raise.

"(2) A business enterprise may exclude from any report made public pursuant to paragraph (1)(A) any information or data reported to the Cost of Living Council, proprietary in nature, which concerns or relates to the amount or sources of its income, profits, losses, costs, or expenditures but may not exclude from such report, data or information so reported which concerns or relates to its prices for goods and services.

"(3) Immediately upon enactment of this subsection, the President or his delegate shall issue regulations defining for the purpose of this subsection what information or data are proprietary in nature and therefore excludable under paragraph (2), except that such regulations may not define as excludable any information or data which cannot currently be excluded from public annual reports to the Securities and Exchange Commission pursuant to section 13 or 15(d) of the Securities Exchange Act of 1934 by a business enterprise exclusively engaged in the manufacture or sale of a substantial product as defined in paragraph (1)."

REPORTING

SEC. 3. Section 221 of the Economic Stabilization Act of 1970, as redesignated by section 1 of this Act, is amended by adding at the end thereof the following new subsections:

"(c) On the thirtieth day after the date of enactment of this subsection, and at monthly intervals thereafter, the President shall transmit to Congress a report describing any action taken by him or any delegate of his under this title and giving his assessment of the status of the program authorized by this title.

"(d) The President shall transmit reports to Congress not later than thirty days after the close of each calendar quarter describing changes in—

"(1) productivity, compensation per man-hour, and unit costs, by major industry;

"(2) consumer prices for all items and for major components;

"(3) wholesale prices for all items and for major components;

"(4) corporate earnings by major industry, including profits before and after taxes and profits before and after taxes as a percentage of stockholders' equity or investment and of sales;

"(5) interest rates for consumer and business loans;

"(6) average hourly earnings by major industry within the private nonfarm sector; and

"(7) employment and unemployment by major industry; which occurred when comparing such calendar quarter to the calendar quarter immediately preceding it (by percent and including index numbers)."

AUTHORITY TO ALLOCATE PETROLEUM PRODUCTS

SEC. 4. (a) The first sentence of section 202 of the Economic Stabilization Act of 1970 is amended by striking out the period at the

end thereof and inserting in lieu thereof the following: "and that in order to maintain and promote competition in the petroleum industry and assure sufficient supplies of petroleum products to meet the essential needs of various sections of the Nation, it is necessary to provide for the rational and equitable distribution of those products."

(b) The first sentence of section 203(a) of such Act is amended—

(1) by striking out "and" at the end of paragraph (1);

(2) by striking out the period at the end of paragraph (2) and inserting in lieu thereof "; and"; and

(3) by adding at the end thereof a new paragraph as follows:

"(3) provide after public hearing, conducted with such notice, under such regulations, and subject to such review as the exigencies of the case may, in his judgment, make appropriate for the establishment of priorities of use and for systematic allocation of supplies of petroleum products including crude oil in order to meet the essential needs of various sections of the Nation and to prevent anticompetitive effects resulting from shortages of such products."

DEFINITION OF SUBSTANDARD EARNINGS

SEC. 5. Section 203(d) of the Economic Stabilization Act of 1970 is amended by inserting at the end thereof the following new sentence: "The President shall prescribe regulations defining for the purposes of this subsection the term 'substandard earnings', but in no case shall such term be defined to mean earnings less than those resulting from a wage or salary rate which yields \$3.50 per hour or less."

ONE YEAR EXTENSION OF THE ACT

SEC. 6. Section 223 of the Economic Stabilization Act of 1970, as redesignated by section 1 of this Act, is amended by striking out "1973" both times it appears therein and inserting in lieu thereof "1974".

INFORMATION AND THE USE OF EXECUTIVE PRIVILEGE

(Mr. MOORHEAD of Pennsylvania asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, I would like to announce forthcoming hearings by the Foreign Operations and Government Information Subcommittee on the subject of so-called "executive privilege," a matter of vital interest and importance to the Congress.

Hearings will be on H.R. 4938, a bill introduced by the gentleman from Illinois (Mr. ERLBORN) and cosponsored by a number of members of the Government Operations Committee. It would amend the Freedom of Information (5 U.S.C. 552) to require that all information be made available to Congress or the

Comptroller General by the executive branch, except where executive privilege is invoked by the President himself. Hearings will commence at 10 a.m., Tuesday, April 3, in room 2154, Rayburn House Office Building. They will continue on April 4 and 5.

Our subcommittee held extensive hearings in the last Congress on the issue of executive privilege and its many ramifications that affect the right of Congress to information that is of vital importance in the exercise of our constitutional responsibilities. These new hearings will probe further into the ways in which the present constitutional crisis of power between the White House and the Congress may be dealt with in a rational and intelligent manner.

Members of Congress and others interested in the subject area of these hearings who wish to testify or submit statements should contact the subcommittee office, room B-371B, Rayburn House Office Building—225-3741.

BUDGET IMPACT ON HEALTH MANPOWER PROGRAMS

(Mr. PRICE of Illinois asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. PRICE of Illinois. Mr. Speaker, another measure of the impact of President Nixon's budget for fiscal year 1974 on important domestic programs is to consider the area of health manpower programs.

At my request, the following data on budgetary effects have been compiled on the consortium of health manpower programs, a partnership of all educational institutions and health care delivery systems in the St. Louis metropolitan area.

As the data indicate, the 17 non-Federal members of the consortium will be required to absorb an estimated \$1.6 million cutback in Federal support. Much of this reduction is in support for nurse training programs. At a time when health manpower shortages are cited as critical, I find it difficult to understand the administration's rationale for its budgetary recommendations in the health manpower field. Moreover, with increasing concern over the quality of health care received and the efficiency of health care delivery, it is inconceivable that the administration would make such recommendations.

At this point, Mr. Speaker, I include the following table summarizing the cutbacks and listing the institutions affected by the budget reductions:

School	Nurse Capita- tion	Nurse and allied Health Loan Trainee- ships	Division of allied Health Special Projects	Division of allied Health Special Improvements	National Institute of Mental Health	Other
Belleville Area College, Belle- ville, Ill.	\$27,996	\$14,420				\$56,957 Regional Medical Program Grant

School	Nurse Capita- tion	Nurse and allied Health Loan Trainee- ships	Division of allied Health Special Projects	Division of allied Health Special Improvements	National Institute of Mental Health	other
State Community College of East St. Louis, East St. Louis, Ill.	\$12,000	\$9,000		\$138,000		
Lewis and Clark Community College, Godfrey, Ill.	8,939	18,897				

School	Nurse Capita- tion	Nurse and allied Health Loan Trainee- ships	Division of allied Health Special Projects	Division of allied Health Special Improvements	National Institute of Mental Health	Other	School	Nurse Capita- tion	Nurse and allied Health Loan Trainee- ships	Division of allied Health Special Projects	Division of allied Health Special Improvements	National Institute of Mental Health	Other
Maryville College, St. Louis County	\$94,498		\$25,000				Southern Illinois University (Edwardsville), Edwards- ville, Ill.	\$27,000	\$144,264			\$30,032	\$54,120

1 Regional medical program grant.

2 Nursing special project.

3 Physician's assistant.

VENICE RED DEVILS—TRUE CHAMPIONS

(Mr. PRICE of Illinois asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PRICE of Illinois. Mr. Speaker, the Venice, Ill., Red Devils high school basketball team recently completed an outstanding season, culminating in a third-place win in the Illinois statewide class A competition.

Anyone familiar with Illinois high school basketball realizes the excellence required to make it through regional and sectional playoff competition to reach the final tournament at Champaign, Ill. The Red Devils led by their outstanding coach, Bill Ohlendorf, not only made it through the regionals and sectionals but fought their way to a third-place finish at Champaign.

Last Sunday, March 18, the citizens of Venice turned out to welcome their Red Devils home their great showing. The Granite City Press-Record, which serves the Venice area, covered the event. In joining the many loyal supporters in congratulating the team I include the Press-Record article:

VENICE THIRD IN STATE, FIRST IN FANS' HEARTS
(By Walter "Mick" Strange)

Signs and banners welcoming home the Venice High School cagers lined the streets of Venice as over 300 carloads of Red Devil fans began to gather at 12:30 p.m. Sunday at the stoplight intersection of Illinois Route 203 and Bend Road.

The team, it was clear, might be third in state class A (small high school) competition, but it was first in the hearts of many thousands of fans.

The autos—along with fire trucks, police cars and motorcycles—were decorated with red and white streamers and large signs reading "Venice Red Devils—Our Champions."

The parade traveled through the Eagle Park area, down Second Street in Madison and all around Venice, ending at the school.

Over 1,000 fans filled the Venice gym to pay tribute to the team.

"Needless to say, everyone in Venice, in fact everyone in the Tri-Cities, is proud of our team," Mayor John E. Lee told the gathering.

"Both the team and the cheerleaders on and off the floor at Champaign made everyone proud of them."

The team won Friday night and divided two Saturday tournament games to capture the third-place statewide trophy.

Venice School Superintendent John O. Pier, Lewis Sabin, high school principal, Leo Davinroy, president of the Venice board of

education, and Horace Calvo, state representative, all gave high praise to the team and the cheerleaders.

When Devil Coach Bill Ohlendorf was introduced to speak, he received a standing and enthusiastic round of applause that lasted several minutes.

Ohlendorf, filled with emotion, lauded not only the basketball talents of the team but its attitude and behavior during the entire season. The squad was described by the coach as "truly outstanding."

Following the 45-minute program in the gym, a social for the fans and team was held in the cafeteria.

ASSESSING DESIGN FOR DOMESTIC PROGRAMS

(Mr. PRICE of Illinois asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PRICE of Illinois. Mr. Speaker, many of us have expressed concern over the shape of President Nixon's domestic program structure. One of the most objective assessments of the new design appeared in a March 18 editorial in the Metro-East Journal, a Lindsay-Schaub newspaper in East St. Louis, Ill.

For the benefit of my colleagues who share my concern I include the editorial at this time:

NIXON TEARS DOWN BEFORE REBUILDING

President Nixon's design for a new structure of federal domestic programs still ignores too many of the barriers that stand between today's inadequate domestic situation and a better tomorrow and national life.

The President has not yet sent to Congress bills to implement his special revenue sharing programs. At the same time, he already is tearing down as fast as the law will allow, and in some cases faster, federal social programs that many people, especially low income people, need desperately even with their shortcomings.

That has made it impossible for state and local officials around the country to plan their budgets for the upcoming fiscal year. It is an invitation to much governmental fiscal chaos and more than a little individual human tragedy for the millions of minorities, poor white and elderly caught in poverty.

Nor has Mr. Nixon made it clear how the increasingly troubled central cities of the nation's large and medium sized metropolitan areas will make up for the revenues and social programs they will lose to suburbs and less troubled areas.

Equally disturbing is Mr. Nixon's failure to lead on the important issues of race relations and local government modernization and consolidation, issues that must be dealt with to achieve what the President is trying to achieve.

The still uncorrected flaw of both general and special revenue sharing is that both disperse a large, but relatively limited number of federal domestic aid dollars to existing local governmental units across the country without much regard for relative national importance of the many problems they face.

General revenue sharing, which the President sold last year as extra rather than replacement federal aid, made sense as it was originally proposed. But coupled with the President's outright cutbacks in many direct federal aid programs this year, at the moment it amounts to a retreat from efforts to deal with nationwide human problems on a national basis.

That's because political boundaries in most metropolitan areas of the country, and in many more rural regions as well, especially here in Illinois, make little sense. Neither do the local government structures that have grown up with them. The boundaries separate rich and poor, blacks and whites in ways that make much of local government exceptionally wasteful and unable to cope adequately with the problems that face people living in those areas.

Revenue sharing, general or special, almost surely will fall for these reasons, just as have many federal direct aid programs, which operate much more through state and local governments and much more on the initiative of officials of those governments than the President concedes or most people realize.

Unfortunately, revenue sharing as now constituted encourages those in effective governmental units to put off reform; it offers no incentive to consolidation or modernization.

The President's failure to provide leadership on the question of racial integration in education and employment, and most crucially in residential patterns, over the past four years, only makes this difficult situation even worse.

The fatal flaw in the Nixon domestic program as it now stands is not that it is heading in the wrong direction. The President's intentions are sound.

The real weakness is that it is a simplistic response to national problems that are intertwined and complex.

National opinion polls show that the majority of Americans oppose most of what Mr. Nixon has proposed to do domestically in his budget.

Most people don't disagree with the President's desire to put the national house in better order. Nor do we.

But all of us have a substantial stake in much of the old national house that has been built painfully even if inadequately over the years.

Mr. Nixon should heed the message, go back to the drawing boards and provide a lot more details of what he has in mind before he goes further in tearing down the old house before he has in hand a more detailed, comprehensive plan for a new one.

TEXAN NAMED OUTSTANDING HOME BUILDING REPRESENTATIVE

(Mr. PATMAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PATMAN. Mr. Speaker, each year the National Association of Home Builders selects one of its representatives as the "Outstanding Representative of the Year." The award honors the representative whose "leadership does the most in any year to support and advance the National Association of Home Builders and building industry objectives, locally, statewide and nationally."

This year the Outstanding Representative Award has been awarded to Harold P. Hill, an outstanding builder who has been a member of the National Association of Home Builders for 23 years.

Texas has long been a leader in home building and it is only fitting that a Texan, Harold Hill, ought to be honored by the National Association of Home Builders as its Outstanding National Representative for 1972.

THE COMMITTEE ON INTEREST AND DIVIDENDS' INTEREST RATE GAME

(Mr. PATMAN asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PATMAN. Mr. Speaker, the Nation has just watched another of the continuing interest rate charades which has resulted in higher prime rates.

The Committee on Interest and Dividends, an entity established under the Economic Stabilization Act, is supposed to be protecting the American people from the ravages of higher interest rates, but in reality it is serving as a mechanism to implement these higher rates.

Back on February 2, a group of bankers raised the prime rate from 6 percent to 6½ percent and Dr. Arthur Burns, chairman of the Committee on Interest and Dividends, went into a flurry of letters and telegrams, presumably aimed at forcing a rollback. We had the rollback for a few days, and then the Committee on Interest and Dividends suddenly announced that an increase to 6¾ percent was justified. We then had 6¾ percent interest rates across the board throughout the United States—with the official imprimatur of the Committee on Interest and Dividends.

We racked along at 6¾ percent until March 19, when another group of big banks announced that they were raising their interest rates to 6¾ percent. The Committee on Interest and Dividends then hurriedly summoned the bankers to Washington and now we have a new agreement that interest rates can be raised to 6½ percent. And today the prime rate stands at this higher 6½ percent at most banks throughout the United States—again with the official imprimatur of the Committee on Interest and Dividends.

—603—Part 8

To sustain the public relations of these CID-approved increases, there has been talk about the establishment of a so-called dual rate. Under this plan, as the Committee on Interest and Dividends has propagandized it, the prime rate for large corporations would fluctuate with market rates while the rates for small businesses and others would be under some kind of general surveillance.

The CID has not explained how this might help the small businessman, the farmer, and the consumers who are already paying rates two and three times those enjoyed by the large customers—the prime borrowers. It is difficult to determine from this latest propaganda just what a dual rate would mean for a consumer paying 36 percent on a small loan or for a small businessman paying 10 to 15 percent to maintain his operations. The truth is that the smaller borrowers never have the advantage of the prime rate. And the concept of a dual rate is just window dressing to try to make the interest rate increases more palatable.

Mr. Speaker, I sincerely hope that we do not see any more reenactments of the games which the Committee on Interest and Dividends and the banks played last week. Apparently, the banks have the feeling that they can freely announce large interest rate increases—far beyond any reasonable justification—and then when the pressure is applied, they can simply cut these increases in half. By halving the difference everyone is happy—as the banks and the CID see the world.

This way, the banks get what they wanted in the first place—an interest rate increase—and the Committee on Interest and Dividends look like it was tough by cutting the increases in half. But this little game has brought us steady increases in interest rates and has left the American public with no protection.

A large part of the public excitement—the telegrams and letters and public pronouncements about interest rates—stemmed from an administration effort to ward off congressional moves for mandatory interest rate controls. The CID, which has been dormant for most of its life, has appeared active in recent weeks in anticipation of congressional hearings on the Economic Stabilization Act. The effort is to make the CID appear to be vigorous in pursuing its "voluntary program" and to indicate there is no need for mandatory controls.

But underneath this public relations flurry, interest rates have been going up for all borrowers—not just for prime borrowers. The interest rate picture is going to get worse before the year is out and we may have a credit crunch approaching the magnitude of the high interest, tight money period of 1969 and 1970.

The real test now is whether the Congress will join the Committee on Interest and Dividends and the big banks in deluding the American public. It is essential that the Congress not join in this charade and that it stands up and de-

mands a full set of controls on money lenders to protect the American public.

The Congress has been fooled in the past by Administration claims on monetary policy and interest rates and I trust that the Members will not allow themselves to be deluded any longer on an issue which affects everyone in the Nation.

Mr. Speaker, I place in the RECORD an article from the Washington Evening Star-News for March 26 and the American Banker for March 26.

[From the Washington (D.C.) Star-News, Mar. 26, 1973]

BANKS, GOVERNMENT SETTLE PRIME RATE CONTROVERSY

(By Lee M. Cohn)

Banks around the nation today established a 6½ percent prime lending rate, up from 6¼ percent, with the Nixon administration's tacit approval—pending the removal of federal controls from rates charged on loans to big corporations.

The 6½ percent prime rate—the minimum interest on bank loans to the most credit-worthy corporations—was a compromise reached during the weekend between leading bankers and the administration's Committee on Interest and Dividends.

Several leading banks had raised their prime rate to 6¾ percent last week, provoking a confrontation with CID Chairman Arthur F. Burns, who also is chairman of the Federal Reserve Board.

After listening to the bankers' arguments, the CID said, Burns told them that "on the basis of the committee's present criteria a prime rate of 6¾ percent could not be justified."

The formal statement did not say specifically that a quarter-point increase to 6½ percent had been cleared, but a spokesman noted that the CID had not objected to that rate level and added "6½ percent is acceptable."

Banks which had raised the rate to 6¾ percent took the CID's hints and rolled it back to 6½ percent. Manufacturers Hanover Trust Co., New York, which had initiated the move to 6¾ percent, clinched the deal today by cutting its rate to 6½ percent.

Other banks, which had held at 6¾ percent while awaiting resolution of the argument, raised their rates to 6½ percent. That rate is expected to become universal within a few days.

There were clear indications that the banks settled for 6½ percent with the understanding that additional increases would be permitted soon, particularly on loans to big corporations.

Burns last week suggested and during the weekend specifically endorsed the idea of a "dual" prime rate.

"If such a plan can be developed, the interest rate on business loans to large corporations might well be left to the market," the CID said. "However, interest rates on loans to smaller businesses, farmers, home buyers and consumers would remain under strict surveillance" by the CID.

That is, the CID would abandon its effort to control the prime rate for big corporations, if the banks would agree to go slow in raising rates on loans to small businesses and the other categories of borrowers.

This does not mean that small businesses would pay lower interest rates than big corporations.

Few small companies qualify for the prime rate. In many cases, their rates are a specified percentage increment above the prime.

Thus, if the prime rate for big corporations should rise to 7 percent after removal

of controls, a small company might pay 7½ percent or more.

But the banks would undertake to raise the rate on small business loans more slowly than the prime rate for big corporations, instead of automatically maintaining the full amount of the traditional rate spread.

The CID said its staff will work on the dual rate idea in cooperation with banking experts and loan officers of the banks.

Meetings with several banks scheduled by Burns for today were canceled. The agreement was worked out at meetings Saturday and Sunday, supplemented by telephone conversations.

President Nixon has refused to impose mandatory controls on interest rates, relying instead on "voluntary" restraint backed up by Burns' pressure tactics.

While tightening credit and raising interest rates in his capacity as chairman of the Federal Reserve Board, Burns as chairman of the CID has tried to hold down the most visible and politically sensitive rates—on prime, small business, home mortgage, consumer and farm loans.

MORE CONTROL FEARED

The administration fears that rapid increases in these rates might lead Congress to impose mandatory controls on interest rates, and might undermine support for wage and price controls.

The new 6½ percent prime rate is the highest since January, 1971. The rate dropped to 4½ percent in early 1972, then began rising last March as the Federal Reserve started tightening credit. The increase from 6 to 6½ percent occurred last month.

Manufacturers Hanover said today it is trimming its rate to 6½ percent "for the time being." The bank said it will "look forward as a matter of some urgency to the formulation by the (CID) of an effective version of its dual rate proposal to help relieve the aggravated condition of money and credit markets."

[From American Banker, Mar. 26, 1973]

POLITICS MUST BE WEIGHED IN PRIME MOVES, BURNS TOLD BANKERS

(By Ben Weberman)

NEW YORK.—Arthur F. Burns, chairman of the Committee on Interest and Dividends and the Federal Reserve Board, acknowledged when he met with commercial bankers late last week that it is painful and disturbing for commercial banks to hold down the prime lending rate, but he insisted that it is necessary for them to assume that burden in order to avoid Congressional imposition of ceilings on interest rates.

Thus, he placed the context of the discussion primarily in political terms and warned that adherence to economic analysis and adjustment to market forces without concern for politics would bring consequences that could well obliterate operation of the free market in banking.

Under these conditions, he set down no guidelines to inform bankers exactly which level of prime rate would be acceptable at any particular time. The main thrust of the meetings last week among CID staff, Mr. Burns banks' staffs and executive officers was to discuss conditions under which it would be possible to increase the prime lending rate.

Conflict between two main forces precipitated the confrontation over plans by the \$13.9 billion-deposit Manufacturers Hanover Trust Co. and seven other banks to raise the prime rate to 6¾ percent from the 6¼ percent level established Feb. 26; how to eliminate distortions in the money market which accounted for an exceptionally rapid rise in short-term interest rates since bank loans began rising sharply in early February, and how to do so without bringing down the

wrath of Congressmen who want to impose ceilings on interest rates.

The Congressional temper was demonstrated last Tuesday when a proposal by Sen. Thomas J. McIntyre, D., N.H., to amend the Economic Stabilization Act by freezing interest rates at the highest point during the 30 days up to March 16 was defeated by the narrow margin of 41 in favor and 45 against. Mr. Burns cited this to bankers last week as an example of the political danger they were courting.

By the close of business Friday, the prime rate situation was thoroughly confused. Among the eight banks which had announced an increase in the prime initially, four remained at the 6¼ percent level they had originally established, and four shaved part of the increase and moved down to 6½ percent.

All agreed to hold unchanged the rates charged to small businesses, along with those for consumer installment and mortgage loans.

Remaining at 6¾ percent were Manufacturers Hanover Trust, the \$3.4 billion-deposit First Pennsylvania Banking & Trust Co., the \$3.4 billion-deposit Franklin National Bank, and the \$785 million-deposit Southern California First National Bank, San Diego.

Retreating to 6½ percent were the \$4.8 billion-deposit Marine Midland Bank-New York, the \$9.6 billion-deposit Continental Illinois National Bank & Trust Co., the \$2.7 billion-deposit Republic National Bank, Dallas, and the \$4.6 billion-deposit First National Bank, Boston.

In addition, the \$12.5 billion-deposit Chemical Bank, New York, announced an increase in its prime lending rate to 6¾ percent Friday, coupling this with a statement which management believed conformed to the criteria set down by Mr. Burns in a press release accompanying the Feb. 23 go-ahead to the \$2.5 billion-deposit Girard Trust Bank, Philadelphia, permitting an increase to 6¼ percent from 6 percent. These criteria were repeated in the statement released last Thursday afternoon when the meeting with the group of seven banks terminated.

Chemical said that "in line with the suggestion of the CID that the banking community consider a dual prime rate structure, this increase will not apply with respect to smaller businesses which are not contractually tied to the prime. On the loans to small businesses, future policy will be to moderate the extent of any increases and such adjustments would be delayed. No changes are contemplated in home mortgage consumer lending rates. He believes this new overall lending policy will help assure availability of credit to small businesses and consumers."

But Chemical soon received a telegraphed office at 2:30 p.m. Monday, bringing complete invitation from Mr. Burns to appear at his fact-finding information on costs and warning them to be prepared to clarify policy with respect to loans to small businesses.

Later Friday afternoon, the \$24.9 billion-deposit Chase Manhattan Bank announced that it, too, would raise its rate to 6¾ percent for prime rate borrowers but coupled this announcement with an outline of a "graduated prime rate structure." And this touched off a telegraphic invitation to meet with Mr. Burns.

The bank said that under the new rate pattern, interest on loans at or tied to the prime in size up to \$500,000 would remain unchanged and linked to the present 6¼ percent rate. The charge for larger credits would go up to the 6¾ percent base.

Unlike Chemical and Chase, the \$2.4 billion-deposit Philadelphia National Bank, the \$7.4 billion-deposit Wells Fargo Bank, San Francisco, and the \$642.6 billion-deposit Commerce Bank of Kansas City, Mo., announced increases in their prime rates to only 6½ percent during the day. They received no summons from the chairman of the Federal Reserve Board.

Virtually every bank which took prime rate

action stressed in its announcement that it would hold unchanged the rates charged to small businesses. These charges will remain—at least for the time being—at levels set when the prime was 6¼ percent, they explained.

But there was some confusion about the definition of a small business. "A corporation which earns \$500,000 in New York is small," one banker said, "but in my area, these are the giants."

One reference by Mr. Burns at his meeting on Thursday to loans of \$25,000 as typical of a small business need was derided by one banker who declared that such loans are hardly larger than consumer installment borrowings. . . .

THIRD HIGH SCHOOL CREDIT UNION OPEN IN CONNECTICUT

(Mr. PATMAN asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. PATMAN. Mr. Speaker, on past occasions I have discussed with Members of this House two high school credit unions that were being operated at Fort Knox, Ky., and Natick, Mass. Now there is a third high school credit union which opened just recently in Norwalk, Conn.

The credit union was organized after the school system's mathematics courses were updated to contain a unit on credit unions. During the development of the course, school administrators felt that the students could set up and operate their own credit union.

A group headed by Mr. Malcolm Austin, supervisor of the mathematics department of the Norwalk Board of Education, obtained permission from the Connecticut State Bank Department to allow the United Credit Unions of Norwalk, a credit union that serves all of the board of education employees, to include all registered high school students in the city.

The United Credit Union will underwrite all expenses of the student credit union until it becomes self-supporting. While United will supply management assistance, it will stay for the most part in the background allowing the students to run the credit unions themselves. The students have already elected their own board of directors and named their credit and supervisory committees.

While the credit union in Connecticut is the third student credit union in the country, it is the first student credit union to cover more than one school. In addition to Norwalk High School, the credit union covers students at Brien McMahon High School and the Center for Vocational Arts, Norwalk's two other high schools.

Not only will the credit union enable students to better understand our monetary system and to gain a firsthand look at how financial institutions are operated, but the credit union will also mean that the student can establish a credit rating while he is in school, and after he graduates, he can use that credit rating to good advantage.

It is, indeed, encouraging to see another student credit union in operation and I hope that in future months additional credit unions will begin operations throughout the country. As I have stated in earlier discussions of the student

credit union in every school system in the country.

ENERGY POLICY BLUEPRINT

(Mr. WAGGONER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. WAGGONER. Mr. Speaker, recently there appeared in the Oil Daily an article indicating that the General Mid-Continent Oil and Gas Association had produced a comprehensive position paper regarding the Nation's energy problems.

The report was prepared over a 2-year period during which time Nick Wheless of Shreveport, La. was president of the association. Without having read the report itself—although I will do so—I can tell you that it is a thorough and definitive job if Nick Wheless had anything to do with it. Nick is a farsighted individual who possesses as much expertise in his field as anyone I know. He has long been recognized as a leader in the oil and gas industry by his peers.

According to the Oil Daily article, the report outlined several recommendations to the current problem, which, I feel, have merit. Specifically, it urged the Federal Government to honor all bids at offshore leases sales which meet minimum, preannounced standards. In addition, it recommended that future import programs should be directed at improving increased domestic producing and refining capacity.

As one who is particularly concerned with finding solutions to the current energy problems, I noted with interest the statement from the report that "there is no justification for direct government participation in oil and gas exploration, drilling or development operation," as long as private enterprise is encouraged to do so on its own.

Mr. Speaker, I include the article which appeared in the Oil Daily for February 19, 1973 at this point:

ENERGY POLICY BLUEPRINT

(By Billy G. Thompson, editor, the Oil Daily)

HOUSTON.—The General Mid-Continent Oil & Gas Association has produced a position paper which should be a boon to industry and government, alike, as they grapple with the petroleum imports issue and the overall U.S. energy problem.

Adopted last week at the annual meeting of the Mid-Continent of directors, the "statement on national energy and petroleum imports policy" reflects the views of leading independent and major producers of oil and gas. Even so, it takes cognizance of the roles and woes of other segments of the domestic petroleum industry to the extent that they can be comfortable in lending endorsements.

Two years in the making, the Mid-Continent document traces broad guidelines within which industry, legislators and regulators can advance without difficulty toward an early and meaningful national energy policy.

The position paper deals with economic and political considerations, oil and gas imports, ecological issues, energy resources on public lands, and research and development activities aimed at bettering the U.S. energy base.

In numerous instances, the Mid-Continent paper is similar or embraces positions taken by other oil industry organizations in these areas. But, it appears to move deeper

and/or broader—oftentimes with a sharper thrust—to position.

In the section on oil and gas imports, for example, the association declared:

"Without a strong domestic petroleum producing and refining industry, the United States would be at the mercy of foreign cartels. These cartels would be in a position to raise oil prices even more rapidly than they are already being raised today."

Mid-Continent supported the mandatory oil import program as an instrument needed for national security. But the association found security needs to extend beyond military requirements to include sufficient oil supplies to sustain economic growth, provide essential civilian demands and to meet the need of industry.

Mid-Continent urged retention of quantity-restriction imports controls but it steered away from "peril-point" levels, saying, "any import level which is established should be designed to provide additional incentives for domestic energy production."

Elsewhere in the imports section, the association urged:

—Development of contingency plans to cope with emergencies resulting from import supply interruptions. Such plans should include a security storage program backed up by an emergency rationing system.

—Origins and destinations of imports should be as diverse as possible. Regional preferences should be contingent upon a clearly defined advantage to the U.S.

"To the extent that additional imports, such as LNG, are required, special attention should be given to diversifying the sources of these supplemental supplies and the destinations within the U.S. to which such supplies are to be delivered." Mid-Continent said. "Where petroleum feedstocks, such as naphtha or LPG, are required to produce substitute natural gas, these feedstocks should be refined in the U.S. to the maximum extent possible to avoid exporting domestic refining capacity."

—Future changes in the imports program should be aimed at improving the security of U.S. petroleum supply by promoting increased domestic producing and refining capacity. To this end, Mid-Continent said, "changes should include reducing the percent of total imports represented by products and unfinished oils, and placing increased emphasis on imports of crude oil, condensate and gas liquids."

On ecological considerations in developing an energy policy, the association urged "sensible long-range goals for environmental quality with regard both for the protection of public health and welfare and for society's need for increased production and consumption of energy resources."

Emphasizing that much of the U.S. energy resources is situated on publicly owned land, the association urged continuation of oil, gas and other mineral exploration and development in those areas "under the sound and long-standing principle of multiple use."

Mid-Continent called for larger and more frequent sales of outer continental shelf leases. "There should be a sufficient number of lease sales each year to support an annual leasing program of 3-5 million acres per year," the association said.

Mid-Continent found administration of the National Environmental Protection Act has delayed, beyond legislative intent, development of offshore petroleum provinces.

The association urged the federal government to honor all bids at offshore leases sales which meet minimum, preannounced standards.

"The government's recent practice of rejecting bids because they did not equal a figure held in secret, after disclosing the operator's evaluations, is discriminatory and prejudicial toward the bidders and could destroy their competitive position in future bidding," Mid-Continent asserted.

The current practice of awarding five-year leases in frontier and difficult operating areas may not be adequate, said the association in proposing longer leasing terms where difficulty of operations warrants.

Mid-Continent called on Washington to revise an announced position under which the U.S. would renounce all rights to seabed resources beyond 200 meters water depth.

Overall, Mid-Continent maintained, "there is no justification for direct government participation in oil and gas exploration, drilling or development operation," if an economic and political climate that encourages private enterprise prevails.

Preparation of the Mid-Continent position paper spanned the two-year tenure of N.H. Wheless Jr. of Shreveport, La., as president of the association. It is a sharp reflection of the philosophies of Wheless and many other independent operator-producers who stand tall in the domestic petroleum industry, even among the major companies.

The Mid-Continent paper, by almost any measure, is an excellent blueprint for the Congress and the White House to use in hammering out a national policy that will lift the U.S. from a wilderness of "vague objectives, fuzzy programs and policies, and the cumbersome machinery dealing with the nation's growing energy problems," as Wheless described the situation last week.

WALTER LIPPMANN AT 83

(Mr. WAGGONER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous remarks.)

Mr. WAGGONER. Mr. Speaker, a most thought-provoking article appeared in Sunday's Washington Post, which I would like to call to your attention. If you missed it, you will have a chance to see it in the RECORD, as I will include it following my remarks.

The article consists of an interview with the renowned political writer, Walter Lippmann, who at age 83 has some different ideas about society and Government than he has had at some times in the past.

Although I certainly do not agree with everything Mr. Lippmann has to say, there is a good deal that I do agree with.

Mr. Lippmann maintains that attempting—as the Government has—to do everything for everyone has historically proven to be an incorrect course to follow.

To attempt to improve society, Lippmann says, is the desirable and humane thing to do; however, he maintains that to attempt to "perfect an imperfectable society," as some from the new liberalism camp would do, is a mistake. Man cannot be perfected by changing his environment.

It's not possible by government action or any other action I know to create a perfect environment that will make a perfect man.

The fallacy lies in "the belief in human perfectability through Government action." The rejection of the radical ideas of the new left in the 1972 Presidential election was to be expected.

His interviewer, with reference to Lippmann's professed conservatism, queried, "It is effective to deal with the symptoms of poverty, for example rather than the causes?" Lippmann's reply deserves consideration: "Can anybody know what the causes are? There are many causes: laziness, wastefulness.

Those are traits inherent in human beings. Some make for poverty and some make for wealth."

According to Mr. Lippmann, part of the myth of the perfectability of man is that he can solve everything and that Government can provide solutions to all of our society's problems, that we in Government can answer all the questions and remedy all of the ills, and that everything will be taken care of if we can just spend more and more of the taxpayers' money. Mr. Lippmann terms this nonsense as "the American myth." In a word, Lippmann cuts out the heart of the new left philosophy.

We in the Congress cannot provide a panacea for every problem that confronts us. And I think that it would be refreshing, indeed, if more political leaders admitted as much.

I cannot agree with Mr. Lippmann's view that parliamentary democracy is a "doubtful experiment" that will become increasingly unworkable as the population continues to grow. Representative government is the hope of our civilization.

It is an interesting volte-face from Mr. Lippmann's early years as a political writer when he did espouse some of the same views as those he now criticizes. Nevertheless, coming from Walter Lippmann, it is as refreshing as a breath of fresh spring air.

WALTER LIPPMANN at 83: AN INTERVIEW WITH RONALD STEEL

Q: Nixon's been President for over four years. How would you assess his performance?

A: His role in American history has been that of the man who had to liquidate, defuse, deflate the exaggerations of the romantic period of American imperialism and American inflation. Inflation of promises, inflation of hopes, the Great Society, American supremacy—all that had to be deflated because it was all beyond our power and beyond the nature of things. His role has been to do that. I think on the whole he's done pretty well at it.

Q: Aside from his prolongation of the Vietnam war, which you've criticized, how do you feel about his domestic policies?

A: He will do anything he thinks is expedient.

Q: Is that necessarily a bad thing?

A: No, it isn't. He's a Keynesian when it suits him and he isn't when it doesn't suit him. That's the way public men have to act.

A: You see him as responsive to public mood?

A: He's very cunning.

Q: So you would give him rather high marks?

A: Yes. He has played a very disagreeable role, but a role imposed upon him by historical necessity.

Q: Do you look on Nixon's crushing defeat of McGovern as merely a personal victory, or as something deeper—a repudiation of the philosophy of the New Deal and of the Great Society?

A: My feeling is that what happened in the Nixon-McGovern election is what happens in all elections of advanced modern industrial societies when the basic policy of the Jacobin or Rousseauistic philosophy is repudiated. By that I mean the belief that man is essentially good and can be made perfect by making the environment perfect, and that the environment can be made perfect by taxing the mass of people to spend money for improving it. Modern society won't accept that philosophy and it is usually repudiated. Sometimes the repudiation takes the form of fascism, but

this rejection is morally and intellectually the equivalent of it, without some of the ugly features of fascism.

Q: What do you mean by the "moral equivalent" of fascism?

A: The equivalent of fascism in my view is the repudiation by the society, by the masses of people of the whole Rousseauistic belief in man's inherent goodness and perfectability. The mechanics of the repudiation is another matter. Whether the society takes the form of a dictatorship or a parliamentary system is a secondary question to what is being repudiated.

Q: Were these ideas repudiated because they were too ambitious or because they represented something incapable of achievement?

A: I think they represent something that is incapable of being achieved in human society. They are philosophically and morally untrue. Man is not naturally good, nor is his nature perfectable by economic means. The Jacobin philosophy is being repudiated in every advanced society because it involves attempting to do by taxation and appropriation things not possible to do. It's not possible by government action or any other action I know to create a perfect environment that will make a perfect man.

Q: Do you believe that those policies did in fact fail?

A: I don't think every detail of those policies, every reform, failed. But the idea that motivated them has failed.

Q: If the idea has been repudiated then what happens to the effort to achieve social change through government action? Is that repudiated too?

A: It goes on, but there are a lot of errors that have been discarded in the course of human history, and this is one of them.

Q: Do you think the effort to achieve any kind of social change through the government is undesirable?

A: Certainly it's desirable. It's not the effort to achieve reforms that's wrong, but the inner ideological or philosophical content of these particular efforts. This is where the fallacy lies—the belief in human perfectability through government action.

Q: Did McGovern represent this philosophy?

A: Yes. McGovern believed in all the corollaries that go with this philosophy and he espoused any one of them that seemed to him promising. In this election, the people themselves showed that they won't have it. This is a philosophy that has been more or less prevalent in the Western world since the 18th Century. People have fallen for it for generations. But now it is being repudiated almost everywhere. Sooner or later it always gets repudiated.

Q: How would you distinguish what you all call Jacobinism from the kind of liberalism represented by Lyndon Johnson?

A: The difference is that liberalism is a much more measured form of human improvement. It neither claims nor seeks the exaggerated results claimed by Rousseauism and Jacobinism. It regards man as improvable but not perfectable; it takes a much more modest view of what mortal man is capable of doing.

Q: Were the goals of the New Deal and the Great Society rooted in this Rousseauistic or Jacobin approach?

A: Yes. We have been in the grip of this general view of the nature of society at least since Woodrow Wilson.

Q: If this philosophy has been repudiated, does this mean there will be less government intervention in the lives of the people?

A: No, I wouldn't say it would mean less intervention, but the difference between perfectability and improbability is a very big one. The belief in government as the agent of perfectability is what has been repudiated. People have rejected the idea that you can use the government—by controlling it, by

getting the majority or physically seizing it—to do what I regard as what history has now shown to be impossible. Sometimes this repudiation can take the form of fascism. But it didn't here. Instead it took the form of Nixon Republicanism. But a corruption of that, or a more extreme form of it, could lead to fascism, just as fascism can lead to Nazism. The Jacobin-Rousseauistic view of society and human nature will lead to the most dangerous forms of fascism or even Nazism if it is not brought under control.

Q: So this administration should be welcomed by liberals because it's headed off a reaction that could have degenerated into fascism?

A: I supported Nixon in '68 and I preferred him vastly to McGovern in '72. In that sense, yes. That doesn't mean I'm enthusiastically pro-Nixon. What he's done is historical: Nixon has performed a service that historically had to be performed if American society was not to be blown up or disintegrate or crumble.

Q: Nixon has certainly appealed to self-reliance and attacked the social welfare programs of the past four years. Won't this lead to a cynical neglect of the poor, the disadvantaged and the abandoned?

A: I thought there was no hope for those abandoned, if you call them that, members of society in those programs. These programs had been greatly excessive, as occurs in every advanced society. But it was much exacerbated in our society because actually taking from those who had really meant taking from whites to give to blacks. That was a cause of deep division and bad feeling in this country.

Q: But if the government does not play a big role, what hope is there for the disadvantaged?

A: I'm not accepting Nixon's philosophy. But no government can bring people up. They have to achieve it themselves. The belief that the government can do it is one of the great illusions of our time.

Q: In the kind of society we have, can the disadvantaged achieve economic and social equality?

A: I don't know. Nobody knows enough now to say yes or no to that question. There are all kinds of hidden assumptions we don't know the answers to.

Q: Being opposed to what you call Rousseauian Jacobinism, do you consider yourself a conservative?

A: I am a conservative; I think I always have been. But that doesn't mean that I'm a conservative who agrees with William Buckley.

Q: What kind of conservative are you?

A: I never joined Barry Goldwater or anybody like that. I don't consider myself that kind. I hope and trust I am a conservative in the line of Edmund Burke. I believe in certain fundamental things in philosophy and constitutional law which are conservative as against the Jacobins.

Q: One of the definitions of conservatism is a belief in a hierarchical traditional society. Do you believe in that?

A: Well, I believe in what we used to call mellorism. You can make things better, but you can't make them perfect.

Q: Is it effective to deal with the symptoms of poverty, for example, rather than the causes?

A: Can anybody know what the causes are? There are many causes: laziness, wastefulness. Those are traits inherent in human beings. Some make for poverty and some make for wealth.

Q: The liberal would say we can isolate and eradicate the causes of poverty.

A: Does he know them? If he thinks he does, he's mistaken.

Q: Is this rejection of the Rousseauian philosophy also a repudiation of the goal of social equality and progress?

A: Social equality, if you carry it far

enough, is an absurdity. That doesn't mean that you have to be in favor of social privilege or inequality.

Q. I suppose the essence of Rousseau's thought is that man is corrupted by his environment and by social conditions—"Man is born free but he is everywhere in chains." It's this conception you consider false?

A. Yes, if you like, that's one thing.

Q. If you reject Rousseau's argument that man is born free, but is enchained by unjust laws, how do you achieve equality and justice?

A. Look, man isn't born everywhere free and equal. It's impossible that he should be born that way. The Rousseau-Jacobin doctrine was that he could be perfected by changing his environment.

Q. If you reject this, isn't the alternative simply to ride along with the status quo?

A. I don't think so. I don't think it does at all. It just makes you work very hard. You have to do things specifically and practically and in accordance with the possibilities of man. I read the other day a quotation from a Chinese which seems to me to sum up that Jacobin view. He said, "On television we watched the men the Americans put on the moon. We are going to be the first to put a new man on earth." That, I think, is exactly the Jacobin revolutionary philosophy.

Q. I suppose the idea that man is not perfectable is based on the belief in original sin. Do you believe in original sin?

A. In that sense, yes.

Q. Government is playing a much greater role in the lives of its citizens. Do you see this as irreversible?

A. Yes, I do. We're a mass society and a great many of our troubles and evils come from that. There are too many people alive in order to govern, control them and inform them. You have to have things that you wouldn't have dreamt about if you had a smaller population.

Q. So even though the people have rejected the idea of the government as an agent of perfectability, they've accepted that the government must play a powerful role in their lives?

A. We've accepted it, but we're very rebellious about it, too. I mean people hate filling out all the forms—I know we do in this house—and we have to employ lawyers and bank people and so on to fill out forms for us and tell us what they mean. That's a burden. There are a lot of people who have just resigned themselves, taken themselves out of what we would call the welfare state. They don't fill out the forms, they just don't live in it.

Q. As a result of this growing governmental role, do you see a danger of authoritarianism and repression?

A. There's always a tendency of the governing power to be repressive if it can be. That has to be resisted.

Q. What are the best means of resisting? Through the courts?

A. The role of people is crucial. We resisted Joe McCarthy in the 1950s by denouncing him. McCarthy didn't have enough power to arrest us, those of us who did denounce him, and so we revealed him for what he was. Finally a lot of people got angry with him.

Q. Do you see the government's prosecution of Daniel Ellsberg as an act of repression or intimidation?

A. No, I don't think it's an effort to do that. I think public papers which are classified and regarded as secret should not be stolen or revealed by anybody who is not willing to pay the price of doing it. It's the case of the Boston Tea Party: If the king's tea is there and you dump it in the harbor, then you expect to pay the penalty of dumping it in the harbor. One thing I like about Ellsberg is that he doesn't deny that he will take the penalty.

Q. If there's a higher loyalty than the law itself should those with the courage to defy it be applauded?

A: I think it was a good thing to reveal the Pentagon Papers because classification has become a vicious habit which needs to be resisted. But that doesn't mean that every paper should be stolen or revealed. The penalty for doing that must be enough to deter anybody from doing it frivolously or easily.

Q: There's a great controversy now about executive privilege and whether members of the President's personal staff and his Cabinet should be obliged to testify before Congress. Do you feel the President is abusing this prerogative?

A: While there obviously has to be some kind of executive privilege, it must be used with the utmost discretion and restraint. Our system of government will simply not work if any principle is pushed to an extreme. There must be respect for the rules on the part of everybody—the President, the Congress, the courts. The men who wrote the Constitution were rational gentlemen. They knew the system they were devising could not work unless the rules were respected. Their primary assumption was that the kind of people who were running the government would play by the rules. If the President refuses to do this, nothing works and you don't have our constitutional system. The President of the United States is actually a king, with all the powers and all the limitations inherent in a king. What is important is that there be respect for the unwritten law, which is an important part of the American constitutional system.

Q: It's been said that one of the effects of the Vietnam war has been the questioning of all forms of authority—the family, state, religion. Do you think this is happening?

A: I don't think it's the result of the Vietnam war. The breakdown of forms of authority is a much deeper and wider process in modern history than the Vietnam war. I wrote a book back in the beginning of the century about the dissolution of the ancestral order. Clearly, the ancestral order of the family, for instance, has been much more affected by the contraceptive pill than it has by anybody's speeches or by the war.

Q: Is this breakup of the ancestral order dangerous?

A: Well, yes. It's dangerous in the sense that the fabric of society is of a cellular structure, of families related to each other in tribes and nations. Of course the destruction of that threatens to produce the chaos of modern times.

Q: You see this as leading to authoritarianism or fascism?

A: It's absolutely one of the things that will occur. Yes, there'll be all kinds of repression.

Q: It is said that we live in an age of permissiveness in which all the old values pretty much have been destroyed, including the belief in patriotism and the state. Can people live with that kind of uncertainty in their lives without any focal point of attachment?

A: I think it's a good question, but there's no easy answer to it. Whether people can live without an organized life around authority and the belief in something is a question that the modern age has been experimenting with, and hasn't solved.

Q: I suppose it's in periods like this that people have created new religions in the past.

A: When they've been lucky.

Q: How do you feel about the future of parliamentary democracy?

A: I think it's increasing unworkable mechanically with the growth of population. Aristotle said long ago that there's a certain size a good city should have so that the human eye could see its limits. There is a limit which we have passed in these mass democracies. Societies are not capable of governing themselves if they're that crowded and that numerous.

Q: Then you look at parliamentary democracy as . . .

A: As a doubtful experiment.

Q: And a parenthesis in history perhaps?

A: Parliamentary democracy was the product of a much simpler, less numerous, stratified society, class system. Whether it can be applied to these massive modern democracies, I don't know. It's very doubtful.

Q: What do you see as the alternative?

A: I don't think anybody can see an alternative. I certainly haven't got a panacea for it. That's a very American question you asked. I'll tell you what: Part of this illusion of what I call Jacobinism for short is that there's a remedy for every evil and a solution for every problem. A lot of things are not solvable.

Q: If they're not solvable, what attitude can we take toward these problems—stoicism?

A: Stoicism, resignation, acceptance. Part of the myth of the perfectability of man is that he can solve everything.

Q: If we're forced to live in a world where we recognize that problems can't necessarily be solved and also that America may not have anything very special to give to the world, we're in for a very difficult process of adjustment. Isn't the basis of our society that we can create the future?

A: It is the American myth.

Q: Other societies have something to fall back on; the continuity of their history, a religion, a strong social structure. We have nothing like that.

A: No, and we have this feeling—this comes from the Puritans—that we are a chosen people with a mandate from God Himself to make a perfect world for ourselves and for everybody else. Of course that is a terrible myth.

Q: There's been a great concern over the freedom of the press recently—the right of newsmen to protect their sources, the effort of the government to intimidate the media. You've been concerned with this problem throughout your career. Do you think there is a serious threat to freedom of the press?

A: I think that very often troubles of the press come from a commercialized desire to get scoops, to be the first to print the news. These "sources" very often are places to get tips of what's going to happen. The desire of newspapers to be the first to print particular information is corrupting to the whole journalistic process. In the journalistic world I grew up in, it wasn't a question of law whether you had to divulge your sources. It was a question of whether the reporter had the guts to refuse to reveal where he got the information, whether he was willing to go to prison if necessary. That was regarded as the elementary code of a newspaper man. The reverse of that was—and this was always my practice—when someone told me something in confidence, I didn't pass it on to the reporters so we could get a scoop. I had a relationship with the man I was interviewing and I didn't want to print that.

Q: Does the press have a responsibility to to publish what it thinks is newsworthy at whatever cost?

A: I wouldn't make a generalization. I think raw news, raw fact, is not intelligible anyway to the public, and has to be explained. The explanation is as important as the fact itself. The duty of the press is to put forth no raw news but explained news.

Q: Does the press have a responsibility to the government to keep secrets, even if it thinks the government is doing something wrong—as in the Bay of Pigs or the Pentagon Papers?

A: I think that's a matter of conscience. I would decide only in specific cases.

Q: You've known many officials during your career. What is the proper relationship between reporters and government officials?

A: I certainly have. I feel that newspapermen cannot be the personal or intimate friends of very powerful people. They just can't. It won't work. They'll either end in corruption of the press or a quarrel, and I've

said that before. You cannot be in the confidence of a king.

Q: There is a lot of talk now about the press abusing its privileges and of government restraints on the press. Should the press monitor itself through a public commission, as a way of preventing the government from interfering?

A: The press should be responsibly edited. But it shouldn't edit itself by law, decree or fiat or anything like that. Commissions to monitor the press and things like that are artificial anyway. They never work.

Q: You have probably been the most successful political journalist we've ever had in this country. But if you had it to do over again would you have chosen a different kind of life?

A: Had I been gifted to do it—and I wish I had—I would like to have been a mathematician.

Q: Why?

A: I would have liked that kind of life. The precision, the elegance . . . there's something about it that attracts me esthetically.

Q: Did you consider the writing of books or your journalism more important?

A: I considered writing books the more important thing. I always viewed journalism as the place where I accumulated facts and information that I used for my books. Being a journalist was rather like the doctor, you know, who has to go and practice.

Q: Forty years ago you launched a new kind of column—serious political analysis—that had never been done before. But with the growth of TV and news magazines, do you think the political column still plays an important role today?

A: I think it plays an important role whether or not it's signed and presented as a column. The columnist is really a specialist writing editorials. The column is an editorial, and an editorial really should be an explanation of a fact. A good editorial is something which makes a fact much clearer.

Q: Are the newspapers performing that task adequately today?

A: No, but it's a very difficult task to perform.

PHASE II CONTROLS NEVER REALLY EFFECTIVE

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, phase II of the control program in respect to rents never was really effective. In my area rents were enormously increased in many instances, sometimes 30 to 40 percent. There were many tragic instances of people who were turned out of their apartments because of rent increases they could not pay. Then came the complete lifting of rent controls July 11 by the President's directive. Rents again took a surge upward in countless places, often imposed upon the very poor, so that there is a tragic need today for effective rent controls to protect the people of this country who rent against excessive charges by money-hungry landlords. At least we should go back to, and freeze, the rents in effect January 11 until a system of controls can be reestablished that will give a fair measure of protection to the people who have to rent living facilities in this country.

I want to commend the Honorable WRIGHT PATMAN, chairman, and the members of the House Banking and Currency Committee for the hearings they began Monday of this week on the general subject of the extension of the au-

thority to the President to impose controls upon the critical elements of the economy and especially for the consideration given by the committee for the necessity of giving some relief to the people who rent. From Miami two very able spokesmen for the renting population of our area appeared before the committee, one of whom was Alan Becker, distinguished member of the Florida House of Representatives, able attorney, and counsel for the Tenants Association of Florida, Inc., and the Florida Coalition of Mobile Home Owners. These two consumer-oriented tenant organizations have a combined south Florida membership of over 15,000 people. Mr. Becker is an able and aggressive attorney fighting for the rights of people who rent in the south Florida area against excessive charges by landlords. He presented in his statement glaring instances of such excessive charges.

Other Members of the House will, I am sure, find conditions similar to those Mr. Becker describes in their districts and will, I hope, join in the fight to give relief from excessive rents to the people in this country who have to rent. Therefore, Mr. Speaker, I include Mr. Becker's statement and exhibits in the Record following these remarks:

STATEMENT BY MR. ALAN BECKER

FLORIDA HOUSE OF REPRESENTATIVES,
Tallahassee, Fla., March 26, 1973.

I want to thank you for the opportunity to appear before you today to urge the mandatory reimposition of controls on rent.

Over the past two years I have been the attorney for the Tenants' Association of Florida and the Florida Coalition of Mobile Home Owners. These two consumer oriented tenant organizations have a combined South Florida membership in excess of 15,000 people. I am also an elected member of the House of Representatives of the Florida Legislature. In each capacity I have been deluged with the plaintiff cries of people now confronted with the seemingly endless escalation in the cost of rental housing. In Friday's Miami Herald, columnist Charles Whited reported that he had encountered many people who have to scrimp on food to pay the rent. As an emergency action the Miami Beach City Council last week passed an ordinance of doubtful constitutionality freezing rents for a 90 day period.

People are in trouble and are looking to this Congress for help. The abandonment of Phase II marked an unparalleled abandonment of the American people. We are all too well aware of what has happened since January 11th. I received a letter from a 76 year old lady which is typical. Living on her \$132 welfare check each month, her rent was \$100. The day after the President ended the freeze her rent was increased to \$120 a month leaving \$12 for her to live on. There are many such senior citizens in Florida. Their Social Security checks and meager income is continuously eroded by inflation. Then there is the example of a moderately luxurious apartment building whose rent range was from \$400 to \$600. On January 12th the range jumped to \$600 to \$900 per month.

The effect of such increases would obviously be disastrous to the preponderance of Florida retirees who, although in many cases are affluent in terms of net personal wealth, receive relatively small current incomes. The fears of the later years are certainly enough without adding the fear of living too long to afford a place to live.

Another group of citizens unique in their number of Florida is its almost one million residents of mobile homes. They consist

mostly of retirees and young couples just starting their lives together; all have limited means. They buy the mobile home and rent the lot it sits on. And their rents go up. From throughout the state we've heard reports of gauging beyond belief. A Miami mobile park immediately imposed a 20% increase. And the people asked for help. In Broward County one park raised the rent 57%, another 52%. These examples are not atypical.

Excessive increases in rent have plagued our South Florida Community in the last two months. Certainly Phase II controls were no model of efficient and fair stabilization of inflation. Enforcement was infrequent and inept. Complexity and loopholes allowed rent increases far in excess of wage increases. Those on the front lines in the battle against inflation thought the rent stabilization guidelines to be a meager governmental effort, hardly meaningful. But with the coming of Phase III every tenant was to learn just how bad things could be. In our area there has been a continuing rash of rent increases average over 30% for all types of accommodations.

What brought about these soaring rentals? South Florida leads the country in new housing construction but we cannot make a dent in the less than 1% vacancy rate for available housing, substandard dwellings included. According to the latest figures available Dade County Florida (which includes Miami and Miami Beach) has the second highest median rent in the country at \$122.00 per month. I don't think, however, that anyone here would live by choice in one of Miami's \$122 apartments. The highest rents in our nation are those of Broward County, Florida (including the cities of Hallendale, Hollywood and Ft. Lauderdale) just to the north. In Dade County, 41% of the population overpays for rent (over-payment being defined as more than 25% of income for rent). In my district of over 350,000 people the figure is higher with more than 50% of the population overpaying for their housing, as much as two thirds of their income among the 79% of the people on Miami Beach who are over 60 years of age.

In a market like this it is obvious that no voluntary controls are going to work. Greed and opportunity for exploitation will not subside for the sake of a healthy economy. Only reimposition of the Phase II controls will provide some small measure of relief. I think this Committee and Congress realize that what is needed is not only extended authority for the President to control inflation but a Congressional mandate to stabilize the most significant economic factor in the life of most Americans, the cost of housing.

In establishing effective guidelines for the regulation of rents I would suggest that the guidelines existing under Phase II were not unreasonable. If properly and diligently enforced and interpreted they would undoubtedly effectuate the goal of temporary control leading to a more permanent stabilization. I would only caution against rigidity in the promulgation of regulations. Specifically, I have in mind the definition of so-called "luxury" apartments. In Tallahassee last week I heard that defined as rental units in excess of \$200 monthly rental. In Dade County that amount would provide barely adequate shelter. The Miami Herald column I referred to earlier told of a lady who pays \$2,400 a year for a one room efficiency that was \$1,600 a few years ago. The room includes just bedding and dishes. I've seen many of these small, old apartments. They have no heat or air conditioning and more than their share of dirt. But the rents are high and getting higher.

I am, therefore, asking you as the ultimate representatives of the people for help. We are now told by some that it is patriotic not to eat meat. Without Congressional relief—and fast—there will soon be no patriotic place

to live. It is imperative that the Congress extends controls on the economy and impose controls on rent without delay.

MIAMI, FLA.,
February 7, 1973.

DEAR MR. BECKER: I am a widow 76 years old having had my second stroke and a nervous collapse recently. I am barely existing on aid to the aged (\$132.00 monthly) I have been living in this same apartment (No. 10) for 18½ years as of Feb. 1. When I came here in 1954 my rent was \$40.00 then it went to \$45 after 13 years. When the present landlord, Richard Cappeletti took over Feb. 1st, 1970 he raised my rent from \$45 to \$85 and then to \$100. Now he has given me notice as of March 1 my rent will be \$120.00 which will leave me \$12 to exist on. As you know, this is utterly impossible.

I trust you will be able to assist me. Thanking you: I am,

Sincerely yours,

Mrs. MARGARET A. TEEPLE.

P.S.—I get no social security.

MIAMI, FLA.,
February 3, 1973.

Representative ALAN BECKER.

DEAR SIR: All I want you to know is that since our dear President lifted the Rent Control he left the control to the Land Lords and they went to town fast.

I am at Little Farms Mobile Ct. and I was raised \$10.00 per mo. I own a 10 x 45 trailer and I paid \$70.00 per mo. and next mo. it will be \$80 per mo. What is this all about and where do we go from here. I am a senior citizen and is there no respect for us.

Thank you,

CHARLES ZARRIELLO.

[From the Daily Sun Reporter, Feb. 18, 1973]

DADE LEGISLATORS HEAR RENT, HOUSING ILLS
(By Walter Dozier)

Dade legislators conducting a forum on housing and landlord-tenant ills Friday heard calls for either rent control or more public housing based on a claim that nearly half the county's residents pay more than 50 per cent of their income in rent.

The meeting, called by Dade State Sen. Jack Gordon, took place in the county commission chambers and included a panel of Gordon, Senators George Firestone and Ken Meyer along with Representatives Alan Becker, Barry Kutun, Marshall Harris and Bill Lockwood. Athalie Range, former director of the state Department of Community Affairs, also attended.

George Reed of Dade County "Little HUD" (federally-funded housing and urban development) told the lawmakers, "we have 64,818 people in this county waiting for public housing."

"Some on that list have been there for over a year and some are elderly," Reed said.

He said that in light of the recent federal freeze on funds for low-income housing, state legislators should consider pressuring Washington into lifting the freeze or "help us with state funding."

Rep. Harris told the panel and audience that, "the state just doesn't have the money to finance public housing like this."

"There's a lot more opposition to housing on the state level than many people realize," he said.

Mrs. Range echoed Harris on that point. "Since we are dealing with a highly prejudiced legislature, and I say that without reservation, we just aren't going to get much public housing," she told the group.

The lawmakers were then confronted with an alternative in rent control by a legal services attorney and spokesmen from local tenant groups.

Legal Services attorney Howard Dixon told the lawmakers that between the current

sewer connection moratorium, a growing population and higher rents they should act.

"Here in Dade County tenants pay more rent out of their incomes than in any place in the country and that calls for action."

Dixon urged the panel to push the passage of an enabling act in Tallahassee that will give local governments the authority to institute emergency rent controls.

In 1969 the Florida Supreme Court ruled that without such an act, local governments cannot institute any form of rent control, regardless of the need.

Dixon pointed out that "if the state can't fund public housing, if the moratorium can't be lifted, the least you can do is give us this rent stabilization act."

He said it won't cost the state any money and added that if it wanted to the Dade delegation could get the bill passed.

Such a bill, in fact, has been filed by Becker and Rep. Gwen Cherry and has been assigned to the House Community Affairs Committee.

Lockward is a member of that committee and when asked about the chances of getting the enabling act passed, he said "it won't be easy."

"I'm afraid if we press on it too much they'll (legislators from northern and central Florida counties) try to throw out everything else on housing we want."

But Dixon and Eufala Frazier, of the Florida Tenants Association, said the problems of high rents, limited housing and low incomes are common throughout the state.

"Jacksonville, Tampa, Orlando—they got the same problems we do, so they're going to need this legislation too," Mrs. Frazier said.

[From the Miami News, Jan. 18, 1973]

HOLDING RENTS DOWN

Several local tenant organizations report that landlords are already knocking on tenants' doors for more money since President Nixon announced the end of rent controls.

Some sort of increase is probably justified in the face of higher maintenance costs. This assumes, however, that property owners will undertake necessary repairs, especially in the low income neighborhoods where landlords have a tendency to boost the rent and forget the maintenance.

Tenants have little recourse under Florida law, which makes no provision for placing rents in escrow until the property is brought up to minimum standards. One practice, also known as the rent strike, has been effective in cleaning up slum properties in other cities.

In the face of expected rent hikes, leases provide the only protection for tenants. But many tenants are not familiar with the legal terms of compliance in their leases. They can easily be intimidated into accepting a decrease in services or an increase in rent without offering resistance. (And in effect, a decrease in services or maintenance constitutes a rent increase.)

Tenant groups are talking about seeking court injunctions to prevent excessive rent hikes. But this process, as in most court cases, is long and expensive. By the time the courts can move, tenants are likely to find themselves in the street, the subjects of evictions.

Local rent controls have been declared illegal according to Florida's constitution. Yet increased pressures from tenants and tenant organizations in the last few years may give the Legislature the incentive to pass enabling legislation that would allow local governments to impose controls.

We hope local housing officials can deal with the compliance aspect while landlords work towards better tenant relations. Everyone would benefit if landlords resolved to provide decent living conditions and hold rents down.

RENT CONTROL URGENT

It is indeed appalling to read the latest edict of the President, the man who stated prior to election day in his order calling for a rent watch, that he would not tolerate any unconscionable rent gauging by property owners.

How in the name of common sense he can justify his words with his actions is something we must be shown. If the President is sincerely of the understanding that there will be no unusual rent increases, he is, I am afraid, in for a shock. I would indeed be pleasantly surprised and my faith in humanity will have been given a much needed boost, if no run-away increases begin to show up in our area, in fact in all of Dade County.

This action points up that much more how urgent it is that the state legislature give speedy approval to an enabling act as has been prefiled by Rep. Gwen Cherry. This act would authorize local government to determine the need for rent control in its own community.

I, for one, am strongly in favor of the county government giving this matter its immediate attention so that in the event the state legislature does grant the authority no time shall be unnecessarily lost. A city in this state is too small to effectively organize the force required and to budget such an enforcement agency.

I am urging all citizens to write to their respective legislators and demand that action be taken. It may be well that our esteemed governor consider the calling of a special session to meet this serious situation.

Unless our property owners meet this economic problem with compassion and fairness they may well create a mood which will result in a county-wide rent strike. As has been said: the best of wells runs dry.

LOUIS KROLL,

President, Miami Beach Retirees.

[From the Daily Sun-Reporter, Feb. 18, 1973]

HAS IT REALLY HAPPENED?

Was there a time when you had gone to bed with a free and clear mind; had a good night's sleep; awakened in the morning and in your newspaper you read an article which raised your eyebrows and you exclaimed, "has this really happened?"

This dilemma has probably happened to thousands and thousands of people who were shocked, disappointed, depressed and frustrated, because of one short sentence, "The President has decontrolled rents."

As one of those who became aware of the President's order, I certainly found myself muttering, "Is this a dream or is this true?" How could that happen? Only a week or so before the Jan. 11 order I, as president of the Tenants Association of Florida, had received bulletins from the Price Commission and from the Rent Advisory Board indicating their plans of increasing the force to compel compliance of the economic stabilization regulations.

Was it a joke when the administration issued a publication called "Rent Watch" in October of 1972, advising the senior citizens that their social security increase will be fully protected since they will monitor and spot check apartment buildings to be sure that landlords will not take advantage of the few extra dollars which the elderly will have to spend?

Maybe that extra dress for her; or maybe a few shirts for him; or maybe just a trip to Disney World on the bus; or maybe a trip to visit their daughter and see the grandchildren; it may take them a year to save these few dollars but they will have put it away.

Now that there is not protection for the tenant, some landlords have advised the social security recipient and those on fixed

incomes; your rent is being increased now that controls have been eliminated!

I wish I could ask our esteemed President, Why did you sell these people out? Why was it before your election, you indicated and promised, that under Phase II, all violators would be dealt with?

Mr. President Nixon, did you not in your heart know, that this was only a Political promise; as so many of our politicians have been doing for the past one-hundred years? Are we people still gullable?

Do these people who need places to live have to tread softly and must they still fear the wrath of their landlords? O! Mr. President Nixon, I have always said and you should agree, it is better to die on your feet than to live on your knees. I do not believe in militancy but if militancy achieves an objective, I am for it!

I am warning landlords; "your greed will be your downfall." We have just begun to fight and in my years on this earth I have never gone into a fight unless I know I can win and with the public being treated unfairly by these unscrupulous landlords they must join together.

People are human beings and we must have a feeling in our hearts that we cannot stand by and allow unfairness and inequities to continue. I wish to repeat that my message does not point the finger at every landlord, but from the stack of complaints that are being registered, there must be action, taken which will bring to light, who is responsible; and who is riding the crest of the wave of misery to the defenseless tenant!

SHEPARD W. DAVIS,
President, Tenants Association of Florida.

[From the Miami Herald, Mar. 1, 1973]

TRAGEDY OF BEACH'S ELDERLY POOR

(By John Pennekamp)

At least 15 of the United States have smaller total populations than Dade County, yet each has a problem that is particularly highlighted here—in Miami Beach:

What to do about the elderly who are poverty-stricken or nearly so?

Miami Beach has situations that place it apart from all the others.

It is a top-ranked resort area.

Many of its property owners want to demolish buildings placed on their lands in the 1920s, with their thoughts now on high-rise, big-money developments.

It is a city that is divided between those who live with federal, state and local welfare help and those whose wealth is great. In between are those who get along comfortably.

And, even more spectacularly, there is an almost absolute division of the areas marking the living places of these residents.

Much has been made of a growing morals question involved in Miami Beach's situation where elderly couples, unmarried, live together. In that way each receives the maximum of public funds; if they were married, the total would be less.

In most instances the situation is simply a practical solution, but immorality is the critics' charge.

Some receive help from their children, or other relatives, who see this as a simple solution; it eliminates bother, which is one of the evils of old age.

Quite a few are in disagreement with their landlords, who try to eke all the income the traffic will bear and neglect their places in the hope of a city order to tear them down, thus opening the way with the help of zoning variations to bigger and more remunerative buildings.

Structure for structure, Miami Beach's so-called slum area bears little adverse comparison with areas of similar identification in Miami and other Florida cities, with New

York, Chicago, Seattle, and a hundred others throughout the country, with one exception:

The promise of real-estate value increase here is greater, and money has a way of wiping out other considerations: it produces some severe judgments.

We don't want the poor and the elderly in Miami Beach, says a public official, his eyes trained on the one room housing units, often closet-like, with toilet facilities "down the hall."

The judgment is raw and harsh, more so than intended, and could be better stated.

Obviously, many of the people living in Miami Beach's slums don't belong in one of the world's foremost resort cities. Miami Beach itself cannot condone the development, nor can it finance change.

Neither can the state or federal government, while there are millions of younger people who want to come to Miami Beach—for a look at least—but who may not be able to do so in their lifetimes.

The Federal government, supplemented by the state, has moved far in the direction of caring for the poor and elderly, but with Miami Beach there is the constant question:

It is a preferred property. Should the federal, or any other government or agency, move in, buy property and prepare it for the elderly and poor? If so, who is to get the favor of resort-city living for which thousands hanker?

I don't know the answers, do you? Remember all of the time that this is only one of the problems that are repeated with variations, not quite as bleak or serious as those of Miami Beach.

You don't solve it by giving the poor and often destitute nice-sounding names. Those you can't eat or sleep on, although they might add a little dignity.

Few want that kind of dignity. All appreciate that they have given an average lifetime of service to their country and its institutions. They only feel that luck has done them in.

Which is, of course, true.

TENANTS FILE CLASS ACTION OVER INCREASE IN RENTS

(By Pat Gurosky)

Tenants of a downtown Miami apartment building, claiming their landlord violated Phase Two rent controls, have filed a class-action suit against him.

They say the alleged violations resulted in rent increases of up to 60 per cent.

Residents of the Parkleigh Apartments, 530 Biscayne Blvd., have asked in the suit that Howard Garfinkle, owner of the building, award them three times the amount their rents were increased, retroactively.

Tenants Maria Llerena, Annina Deutsch and Joseph Verses are listed as plaintiffs along with all residents "similarly situated." There are about 234 residents in the 90-unit apartment house.

About 15 of them, including the three above, who signed leases during Phase Two of the federal economic stabilization plan last year, were notified Nov. 30 that their rents would go up Jan. 1.

Rent controls were lifted Jan. 11. The Parkleigh rent increases were later postponed until Feb. 1.

Apartment manager Phil Comoro said in a letter that the building was exempt from the Phase Two rent curbs because it qualified as a "rehabilitated dwelling."

The controls exempted buildings in which the cost of rehabilitation exceeded half the fair market value of the dwelling. About \$800,000 worth of improvements were to have been made in the Parkleigh by Nov. 30.

The tenants, however, claim that many of the improvements have not yet been made, and that despite some redecorating, service has gone down in the building since rents went up.

Phil Mendick, active in the Parkleigh Tenants Association, said that his \$136 efficiency apartment will cost him \$200 a month when his lease expires in May.

"Some whose leases have already run out had to move because they couldn't afford the increase," he said. "And others have been paying under protest."

The tenants in question had a rider attached to their leases listing the increases that would take place in the event the building qualified for the exemption.

TENANTS ASK NIXON TO CUT RENT RISES

(By William A. Elsen)

Representatives of 150 area tenant associations voted unanimously yesterday to ask President Nixon for an immediate rollback of rent increases, some of which have approached 50 per cent here.

The 250 persons attending a meeting of the Washington Area Federation of Tenant Associations also recommended that tenants resist rent increases but did not call solely for rent strikes.

The group passed unanimously six resolutions in a four-hour meeting called in reaction to rent increases made after the President abolished Phase II rent controls Jan. 11.

Voting came after Del. Walter E. Fauntroy (D-D.C.) addressed four workshop sessions during the meeting at All Souls' Church, 16th and Harvard Streets NW.

Fauntroy told the sessions that he will produce a draft of rent-control legislation "by this time next week" and invited area tenants to submit to his office specific information on their problems with landlords since the end of Phase II.

"Unless the people affected (by rent increases) scream," they're going to get hurt, Fauntroy said.

Fauntroy also revealed that he and six other area congressmen will meet Wednesday or Thursday with representatives of the Cost of Living Council to discuss the legislators' request last week for reinstitution of Phase II rent sanctions against landlords who retaliate against legal activities by tenants.

The congressional group also includes Sen. Charles McC. Mathias (R-Md.), Sen. J. Glenn Beall (R-Md.), Rep. Marjorie S. Holt (R-Md.), Rep. Lawrence J. Hogan (R-Md.), Rep. Gilbert Gude (R-Md.) and Rep. Joel T. Broyhill (R-Va.).

"Any time you get Mr. Broyhill with us, you know it's time to move," said Fauntroy, apparently referring to Broyhill's probusiness reputation.

Asked if his legislation could be enacted in time to help area tenants fight rent increases due March 1, Fauntroy said: "Time is a function of the political pressure you build. Once you get it started, it depends on the kind of pressure brought on various congressmen."

As Fauntroy began to answer a question on immediate return to Phase II controls, he stopped in midsentence to inquire: "Is the press here?" The press was, and Fauntroy told his questioner: "I just can't get into that now."

Fauntroy did express confidence that a forced rent rollback may come after this week's meeting with the Cost of Living Council. "This is a holding action," he said, "until we can push through some legislation."

The group later passed a resolution supporting a bill already introduced by Sen. Clifford P. Case (R-N.J.) who called for a return to Phase II guidelines which limited rent increases to 2½ per cent.

The group approved three methods of tenant resistance—payment of the increase with a check saying "Paid under protest," initiation of partial rent strikes by placing the amount of rent increase in an escrow

account each month or initiation of total rent strikes by placing the entire rent due in an escrow account.

THE 26TH REPORT TO CONGRESS

(Mr. FASCELL asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. FASCELL. Mr. Speaker, the 26th report to Congress which was recently issued by the U.S. Advisory Commission on Information is a remarkable document in two respects. In the first place, it sums up the experience that this Government has had with overseas information and cultural programs for the past 25 years as seen through the eyes of an outside, independent advisory commission of five private citizens who are appointed by the President and confirmed by the Senate for 3-year terms.

As the House knows, together with my colleagues on the Foreign Affairs Subcommittee I tried for 5 years to disentangle the various overlapping strands and bureaus on the executive side which dealt with the ideological aspects of the cold war. The hearings that we held and the reports that were issued are matters of record but the progress that has been made on the executive side as a result of these hearings has been slim.

The value of the present report lies in its analysis of the growing importance of international communications as a potent new force in our foreign relations, and in the 18 recommendations for the improvement of USIA that it offers. The report also directs its comments to the President and to the Congress of the United States with the recommendation that this arm of our foreign policy be substantially strengthened in a new period of international detente and dialog.

Second, the Advisory Commission's report also signals the departure of the Commission's Chairman—Dr. Frank Stanton, vice chairman of the board of CBS—who has completed three terms in this capacity and spanning both Democratic and Republican administrations. The report contains his judgment and experience of 9 years with USIA coupled with the judgments, professional experience, and knowledge of his colleagues on the Commission.

I have had the opportunity, as have some of my colleagues in the House, to spend many hours with this Commission over the years in examining and discussing the USIA. We share a common interest in the potential of our country's public diplomacy. And we have benefited from their advice, counsel, and wisdom.

Dr. Stanton's present colleagues have summed up his contribution to this work in the following manner:

Finally, four members of this Commission wish to acknowledge with genuine appreciation the distinguished leadership of the Commission's Chairman, Dr. Frank Stanton, the former President and current Vice Chairman of the Board of the Columbia Broadcasting System, who is retiring from the Commission after having been its Chairman for almost nine years.

Dr. Stanton led his Commission with vigor and imagination. He gave of his time, thought and energy with unstinting generosity, and

left a record deeply etched by his personality, foresight and accomplishments. One of America's statesmen in mass communications, his advice and counsel to the Executive, to the Congress, and to Directors of USIA have helped substantially improve the U.S. Government's projection of the voice, pen and vision of America to the people of other countries. This we would like to record as colleagues and as witnesses in the enterprise.

I would like to join in this well-deserved tribute. I may add from personal knowledge that only recently Dr. Stanton took off 48 hours from his busy schedule to fly to Costa Rica in order to help inaugurate a new binational center in that country.

When Public Law 402 was written in 1948 the Congress was highly skeptical over the idea of a permanent foreign information program. To insure that it would develop in the most exemplary manner possible the authors of the legislation wisely provided for an outside advisory group which would be composed of five of America's most qualified citizens in communications for the purpose of overseeing the activity. This Commission is also authorized to give advice to the Congress and to the executive by sharing with them their professional experience in the field of communications and public opinion.

Throughout these years this Nation has benefited from the uniformly high caliber of the men and women who have served on this Commission. I have come to know and admire them and to respect their judgments and recommendations. Through written reports to Congress, periodic testimony before committees of Congress and personal consultation, the quality of their advice and their intensive commitment to the task of achieving greater international understanding of the United States has been made apparent to us all.

A glance at the present membership will bear out my remarks. The chairman has been known as a statesman in the broadcasting industry. Equally important, his interests have been as varied and encyclopedic as the scope of this country's public diplomacy and mission abroad. Mr. Hobart Lewis president and editor-in-chief of the most widely read magazine in the world, *Reader's Digest*. Mr. James Michener is an internationally renowned author of great distinction. Mr. John Shaheen's interests include broadcasting and newspaper publishing along with his worldwide interests in national resources development. And Dr. George Gallup, this Nation's leading authority in public opinion polling and a pioneer of this field throughout the world, is a recent appointee to the Commission.

These are the members who have produced the report which I hope will serve as policy guidelines as well as inspiration to Mr. James Keogh, the new Director of USIA, and to the new management team that has recently taken over at USIA, including our own former colleague from Utah, Sherman Lloyd. I will be looking forward to the Agency's response to the recommendations in this report.

For the report summons the USIA to

devote itself energetically and imaginatively to the task of perpetuating through communications the atmosphere of international detente that has been ushered in by the historic trips of President Nixon to the PCR and the USSR.

The Commission's report puts it this way:

President Nixon's historic achievements in opening channels of communications to the People's Republic of China and in improving them to the Soviet Union and the Eastern European countries provide the U.S. Information Agency (USIA), as the government's principal communications agency in foreign affairs, with an enormous opportunity. For USIA is an ideal agency in a time of detente and dialogue.

As a Member of Congress I would like to express appreciation and gratitude to the members of this Commission who, working without compensation, have labored in one of the most difficult yet important areas of our country's obligations—international communications, ideology, and foreign policy. In a world which has shrunk so much in the past 25 years the work of the U.S. Information Agency must not be allowed to falter or diminish. Indeed, in my mind its importance should increase as international detente, dialog, and negotiations gradually replace crisis, violence, and polemical diatribe.

I urge my colleagues to read the entire report. I believe it will add to your understanding of what USIA can do on behalf of the United States if it is properly equipped, properly managed, properly funded, and properly positioned in the Federal foreign affairs structure of the executive branch of the Government.

This report commemorates the 25th anniversary of the passage of Public Law 402, known as the Smith-Mundt Act, which established the legislative policy framework for the work of USIA. The report concludes with 18 recommendations for USIA which should help it improve further its organization, its policies, and its programs. I hope the Agency will respond positively to these recommendations and I hope that the House Foreign Affairs Committee will have an opportunity to examine them as well. I include with my remarks a copy of the release that accompanies the report, for the benefit of my colleagues in the House:

U.S. ADVISORY COMMISSION ON INFORMATION

"President Nixon's historic achievements in opening channels of communications to the People's Republic of China and in improving them to the Soviet Union and the Eastern European countries provide the U.S. Information Agency (USIA), as the government's principal communications agency in foreign affairs, with an enormous opportunity. For USIA is an ideal agency in a time of detente and dialogue."

This is the major conclusion of the 26th Report of the U.S. Advisory Commission on Information,* addressed to the Congress and released today.

*Frank Stanton (Chairman), Columbia Broadcasting System; Hobart Lewis, *Reader's Digest*; James Michener, Author; John Shaheen, Shaheen Natural Resources Company; George Gallup, American Institute of Public Opinion.

The Commission's Report summons USIA to meet the inherent challenge of the President's new foreign policies by formulating information policies and programs that are aimed at expanding dialogue and detente among the nations of the world. For "just as crisis tends to feed on crisis," the Commission said, "so detente can generate detente . . . (and) the communications of detente reinforce and help perpetuate atmospheres of detente."

The mission of USIA should be directed to the task of achieving the new objectives of the nation as enunciated by the President in his inaugural address:

"Let us continue to bring down the walls of hostility," the President said, "which have divided the world for too long, and to build in their place *bridges of understanding*—so that despite profound differences between systems of government, the people of the world can be friends. Let us build a structure of peace in the world in which the weak are as safe as the strong—in which each respects the right of the other to live by a different system—in which those who would influence others will do so by the strength of their ideas, not by the force of their arms."

Since this Report was completed the President has further spelled out these objectives in his speech of February 20, 1973 to the South Carolina legislature when he said,

"We will continue the dialogue with the Soviet leaders; we will continue the dialogue with the People's Republic of China, and in this year ahead, we will renew discussions that we have been having in the past with our friends in Europe and in other parts of the world, because as we talk to those who have been our adversaries in the past, we must not overlook the vital necessity of strengthening the bonds we have with our allies and our friends around the world."

The Commission believes that "an Agency dedicated to such policies and goals, thoroughly integrated in the government's foreign affairs structure cannot help but be acceptable to the Congress, to the President and to the American people. For it will then be operating in accordance with the best wishes and hopes of those who wrote the basic legislation (that authorizes this activity). Equally important, the U.S. as a force for peace will be brought home to the other nations of the world where competition between the ideologies and political systems of the major powers will continue for a long time."

This 26th Report to Congress commemorates the 25th anniversary of Public Law 402, the Smith-Mundt Act which has provided the statutory framework for this country's foreign information and cultural service.

In a broad, general review of USIA's mission and performance during the past 25 years (including its predecessor agencies in the Department of State) the Commission concludes that although an information agency cannot guarantee approval of U.S. policies through communications alone, it can strive to make them understood. This, the Commission believes, USIA has done successfully in many areas of the world, including countries where a direct U.S. presence is not possible.

The Commission's Report contains 18 major recommendations for improving the policies, programs, and organization of USIA and its position in the federal foreign affairs structure. They are:

1. The United States Information Agency's unique resources and knowledge of foreign public opinion should be communicated by its Director and his associates at the highest levels of government—the President, the Secretary of State and the President's Assistant for National Security Affairs. USIA

should be in on the takeoffs as well as the landings in foreign policy.

2. The President's active role in foreign communications calls for a more explicit utilization of the resources and personnel of USIA.

3. The U.S. should remain competitive with other nations in the information and cultural fields.

4. USIA should develop plans to orient both new and veteran U.S. Ambassadors to the Agency's mission and resources and to urge the closest relationship between Public Affairs Officers and their Ambassadors.

5. USIA should expand its practice of inviting U.S. Senators and Representatives to attend U.S. Information Agency regional conferences and exhibitions abroad.

6. USIA should substantially augment its programs in explaining U.S. economic policies and problems. It should develop further its personal capabilities in this complex but increasingly important area of American foreign policy.

7. USIA should bring into better balance its cultural and information programs. It should also appoint a prominent cultural affairs director to invigorate the cultural programs and to help achieve this balance.

8. USIA should avoid "press agency" in its programs to reach important foreign audiences.

9. USIA should focus as much of its time on improving the substance of its effort as it does on techniques and methods.

10. The Voice of America must be kept competitive. Today it ranks fourth behind the USSR, the People's Republic of China and the Arab Republic of Egypt in number of languages and in number of hours broadcast per week. VOA also lags in its capacity to deliver a signal.

11. Although USIA is compelled at present to live within its reduced budget by concentrating primarily on select audiences, it should not ignore or turn away from responding to interest in the U.S. that is expressed by the average citizen or by those "natural audiences" disposed to use USIS libraries abroad.

12. USIA must improve the coordination of its media programs.

13. USIA should reexamine the effectiveness, format and content of its magazines.

14. USIA must conduct a comprehensive review of its motion picture and television objectives.

15. USIA is ready to provide the fullest assistance to national plans for the celebration of the Bicentennial.

16. The Commission wishes to repeat a recommendation made in its 25th Report which called for a maximum information program in a test country in order to determine the effectiveness of the function in achieving U.S. objectives if that function is properly funded.

17. USIA top management, its senior officials in Washington and its Public Affairs Officers abroad, should subject its programs and policies to systematic appraisal.

18. The Commission once again renews its recommendation first enumerated in the 23d Report to Congress in February 1968 that there be instituted an independent, comprehensive reexamination of USIA's mission and operations by an outside organization.

The Commission stresses the crucial role played by communications today and notes that more people have expanded their focus of attention to include information about other countries including the United States.

The Commission concludes that "this increase in the people's attention zone all over the world is the major pivotal contribution of communications." As a result, all major nations of the world are engaged in foreign information work that has led to a tremendous exchange of ideas, products, life styles, and a gradual modification of attitudes.

USIA has used every conceivable communications technique to keep millions of people throughout the world more accurately informed about the people and policies of the U.S. The best estimates of those who struggle with methods of determining the reach of USIA's information and message about the U.S. is that it ranges "from a conservative figure of 150 million to 230 million people a year."

The Report highlights the Agency's two basic functions. The first, to disseminate information about the U.S., has been implemented despite a steadily declining financial base. The second, to serve as a reliable feedback of what people around the world think about the U.S. and its policies, has been used but sparsely by those who are responsible for formulating U.S. foreign policy and U.S. national security policy. In the Commission's judgment, USIA must not only strive to increase international understanding of the U.S. but to bring to the attention of top U.S. officials the attitudes and opinions of people around the world.

The Report focuses on the President as the most visible symbol of American foreign policy abroad. It recommends that USIA must be brought closer to the national security and foreign policy decisionmaking process in order that its unique insights and information can be made available at the place where American policy is forged. The Commission reasserts that USIA should be in at the takeoffs as well as the landings in foreign policy in order to accomplish its mission with maximum effectiveness.

Copies of the Commission's 26th Report may be obtained from the Commission's office at 1750 Pennsylvania Avenue, Room 1008. For further information contact Louis T. Olom, Staff Director, Telephones: 632-5211 or 632-5227.

The United States Advisory Commission on Information—a citizens group created by the Congress in 1948, appointed by the President and confirmed by the Senate—conducts a continuing overview of USIA operations, and in its annual report both assesses those operations and proposes recommendations for the future. Its current membership: Frank Stanton (chairman), vice chairman of the Columbia Broadcasting System, New York; Hobart Lewis, editor-in-chief of *Reader's Digest*, New York; James Michener, author, Pipersville, Pennsylvania; John Shaheen, president of Shaheen Natural Resources Company, New York; and George Gallup, chairman of the board, American Institute of Public Opinion, Princeton, New Jersey.

FEDERAL CHARTER FOR GOLD STAR WIVES OF AMERICA

(Mr. WALSH asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. WALSH. Mr. Speaker, today I have joined with our colleague, Mr. FORSYTHE, in seeking a Federal charter for the Gold Star Wives of America.

Mr. Speaker, I have long been active in the veteran's organizations and have had the privilege and pleasure of meeting with the Gold Star Wives on many occasions. They are such a dedicated group of women who have proven so many times in so many ways their devotion to the great cause for which they stand.

The national organization was founded in 1945 and its membership, now more than 2,000, is made up of the widows of our fighting men who lost their lives in service to this great Nation.

Their main objective is to serve the widows and children of those who made the supreme sacrifice for America. They provide moral and material support to them and generally help them through their anguish.

This is a most praiseworthy effort and I firmly believe the Gold Star Wives deserve the charter which they seek. I urge all of my colleagues in the House to support this effort.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. CRONIN) and to revise and extend their remarks and include extraneous matter:)

Mr. WILLIAMS, for 5 minutes, today.

Mr. MCKINNEY, for 5 minutes, today.

(The following Members (at the request of Mr. OWENS) to revise and extend their remarks and include extraneous matter:)

Mr. McFALL, for 5 minutes, today.

Ms. ABZUG, for 10 minutes, today.

Mr. DIGGS, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. REUSS, for 10 minutes, today.

Mr. VANIK, for 5 minutes, today.

(The following Member (at the request of Mr. STUDDS) and to revise and extend his remarks and include extraneous matter:)

Mr. PATMAN, for 10 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. MICHEL.

(The following Members (at the request of Mr. CRONIN) and to include extraneous matter:)

Mr. TREEN.

Mr. QUIE in three instances.

Mr. KEATING.

Mr. ASHBROOK in three instances.

Mr. CLEVELAND.

Mr. ANDERSON of Illinois in two instances.

Mr. TAYLOR of Missouri.

Mr. WYMAN in two instances.

Mr. HUNT.

Mr. PARRIS in five instances.

Mr. GERALD R. FORD in two instances.

Mr. BRAY in two instances.

Mr. THOMSON of Wisconsin.

Mr. MIZELL in five instances.

Mr. WAMPLER.

Mrs. HECKLER of Massachusetts.

Mr. BURGNER.

Mr. MINSHALL of Ohio.

(The following Members (at the request of Mr. OWENS) and to include extraneous matter:)

Mr. DE LUGO.

Mr. JAMES V. STANTON.

Mr. ALEXANDER in five instances.

Mr. GONZALEZ in three instances.

Mr. RARICK in three instances.

Ms. ABZUG in five instances.

Mr. BOLLING.

Mr. ROUSH in two instances.

Mr. EDWARDS of California in two instances.

Mr. REES in three instances.

Mr. McFALL.

Mr. VANIK.

Mr. HARRINGTON.

Mr. EVINS of Tennessee in six instances.

Mr. KASTENMEIER.

Mr. HANNA in three instances.

Mr. ULLMAN.

(The following Members (at the request of Mr. STUDDS) and to include extraneous matter:)

Mr. DAN DANIEL.

Mr. BIAGGI in five instances.

Mr. HUNGATE.

Mr. PATTEN in two instances.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 21. Joint resolution to create an Atlantic Union delegation; to the Committee on Foreign Affairs.

BILL PRESENTED TO THE PRESIDENT

Mr. HAYS, from the Committee on House Administration, reported that that committee did on March 26, 1973, present to the President, for his approval, a bill of the House of the following title:

H.R. 3298. An act to restore the rural water and sewer grant program under the Consolidated Farm and Rural Development Act.

ADJOURNMENT

Mr. STUDDS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 18 minutes p.m.) the House adjourned until tomorrow, Wednesday, March 28, 1973, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

658. A letter from the Secretary of the Air Force, transmitting a report on military construction contracts awarded by the Department of the Air Force without formal advertisement during the 6 months ended December 31, 1972, pursuant to section 804 of Public Law 90-110; to the Committee on Armed Services.

659. A letter from the Under Secretary of Agriculture, transmitting a draft of proposed legislation to amend title V of the Housing Act of 1949 to transfer certain farm labor housing and rural rental housing loans and related liabilities from the Agricultural Credit Insurance Fund to the Rural Housing Insurance Fund, and for other purposes; to the Committee on Banking and Currency.

660. A letter from the Secretary of Housing and Urban Development, transmitting a draft of proposed legislation to expand the National Flood Insurance program by substantially increasing limits of coverage and

total amount of insurance authorized to be outstanding and by requiring known flood-prone communities to participate in the program, and for other purposes; to the Committee on Banking and Currency.

661. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to Public Law 92-403; to the Committee on Foreign Affairs.

662. A letter from the Executive Director, American Academy of Arts and Letters and National Institute of Arts and Letters, transmitting the annual reports of the Academy and the Institute for 1972, pursuant to section 4 of their charters; to the Committee on House Administration.

663. A letter from the Secretary of Transportation, transmitting a report on activities during 1972 under the Ports and Waterways Safety Act of 1972, pursuant to section 203 of the act; to the Committee on Merchant Marine and Fisheries.

664. A letter from the Secretary of Transportation, transmitting a draft of proposed legislation to amend certain laws affecting the Coast Guard; to the Committee on Merchant Marine and Fisheries.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. POAGE: Committee on Agriculture. H.R. 5683. A bill to amend the Rural Electrification Act of 1936, as amended, to establish a Rural Electrification and Telephone Revolving Fund to provide adequate funds for rural electric and telephone systems through insured and guaranteed loans at interest rates which will allow them to achieve the objectives of the act, and for other purposes; (Rept. No. 93-91). Referred to the Committee of the Whole House on the State of the Union.

Mr. SISK: Committee on Rules. House Resolution 327. Resolution providing for the consideration of H.R. 5610, a bill to amend the Foreign Service Buildings Act, 1926, to authorize additional appropriations, and for other purposes; (Rept. No. 93-92). Referred to the House Calendar.

Mr. PEPPER: Committee on Rules. House Resolution 328. Resolution providing for the consideration of H.R. 5293, a bill authorizing continuing appropriations for the Peace Corps; (Rept. No. 93-93). Referred to the House Calendar.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALEXANDER:

H.R. 6121. A bill to amend title II the Social Security Act to increase the amount of outside earnings permitted each year without any deductions from benefits thereunder; to the Committee on Ways and Means.

By Mr. BIAGGI:

H.R. 6122. A bill to increase the subsistence payments to students at the State Marine schools; to the Commission on Merchant Marine and Fisheries.

By Mr. BLACKBURN:

H.R. 6123. A bill to amend the Uniform Time Act of 1966 to advance to the last Sunday in May the commencement of daylight saving time and to advance to the last Sunday before the first Monday in September the conclusion of daylight saving time period for the year; to the Committee on Interstate and Foreign Commerce.

By Mr. BLATNIK:

H.R. 6124. A bill to declare that the United States holds certain lands in trust for the Minnesota Chippewa Tribe, Minn.; to the Committee on Interior and Insular Affairs.

By Mr. BURKE of Massachusetts:

H.R. 6125. A bill to increase from \$240 to \$480 per year the amount of earned income which will be excluded in determining eligibility for and amount of benefits payable to individuals under the Federal program for supplemental security income for the aged, blind, and disabled, established by title XVI of the Social Security Act; to the Committee on Ways and Means.

H.R. 6126. A bill to amend the program of supplemental security income for the aged, blind, and disabled (established by title XVI of the Social Security Act) to provide for cost-of-living increases in the benefits provided thereunder; to the Committee on Ways and Means.

H.R. 6127. A bill to amend the Social Security Act to eliminate the requirement that a recipient of disability insurance benefits under title II of such act must wait for 24 months before becoming eligible for coverage under medicare; to the Committee on Ways and Means.

H.R. 6128. A bill to provide for repayment of certain sums advanced to providers of services under title XVIII of the Social Security Act; to the Committee on Ways and Means.

By Mr. BURTON (for himself, and Mr. DON H. CLAUSEN):

H.R. 6129. A bill to amend section 2 of the act of June 30, 1954, as amended, providing for the continuance of civil government for the Trust Territory of the Pacific Islands; to the Committee on Interior and Insular Affairs.

By Mr. CARNEY of Ohio:

H.R. 6130. A bill to amend title II of the Social Security Act to provide that when an individual under age 62 retires from covered employment after 30 or more years of service under an employees pension benefit plan, the period after such retirement and before his attainment of such age shall be excluded in determining the amount of his social security benefits if the exclusion of such period would increase the amount of such benefits; to the Committee on Ways and Means.

By Mr. CLARK:

H.R. 6131. A bill to provide for the enforcement of support orders in certain State and Federal courts, and to make it a crime to move or travel in interstate and foreign commerce to avoid compliance with such orders; to the Committee on the Judiciary.

By Mr. DON H. CLAUSEN:

H.R. 6132. A bill to authorize a national bicycle transportation system in accordance with title 23 of the United States Code; to the Committee on Public Works.

By Mr. COHEN (for himself and Mr. SARASIN):

H.R. 6133. A bill to provide a privilege for newsmen against the compelled disclosure of certain information and sources of information; to the Committee on the Judiciary.

By Mr. CRONIN:

H.R. 6134. A bill to amend title 37, United States Code, so as to extend from 1 to 3 years the period that a member of the uniformed services has following his retirement to select his home for purposes of travel and transportation allowances under such title, and for other purposes; to the Committee on Armed Services.

By Mr. DE LUGO:

H.R. 6135. A bill to place certain submerged lands within the jurisdiction of the governments of Guam, the Virgin Islands, and American Samoa, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. DORN (by request):

H.R. 6136. A bill to amend title 38 of the United States Code to provide increased awards of service-connected compensation to certain blinded veterans who are suffering from additional disabilities; to the Committee on Veterans' Affairs.

H.R. 6137. A bill to amend title 38 of the United States Code to provide an additional aid and attendance allowance to certain service-connected blinded veterans; to the Committee on Veterans' Affairs.

By Mr. DRINAN:

H.R. 6138. A bill to guarantee the free flow of information to the public; to the Committee on the Judiciary.

By Mr. DU PONT:

H.R. 6139. A bill to promote public health and welfare by expanding and improving the family planning services and population sciences research activities of the Federal Government, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 6140. A bill to amend title 39, United States Code, to provide a mail delivery insurance program under which a person who insures an article of mail could recover for losses occurring when there is late or no delivery of the article; to the Committee on Post Office and Civil Service.

By Mr. EILBERG (for himself and Mr. DRINAN):

H.R. 6141. A bill to amend title XVIII of the Social Security Act to authorize payment under the supplementary medical insurance program for annual flu shots; to the Committee on Ways and Means.

By Mr. EILBERG:

H.R. 6142. A bill making an urgent supplemental appropriation for the national industrial reserve under the Independent Agencies Appropriation Act for the fiscal year ending June 30, 1973; to the Committee on Appropriations.

By Mr. EILBERG (for himself and Mr. ROSE):

H.R. 6143. A bill to amend the Internal Revenue Code of 1954 to provide an additional income tax exemption for a taxpayer supporting a dependent who is mentally retarded; to the Committee on Ways and Means.

By Mr. FISH:

H.R. 6144. A bill to amend the Communications Act of 1934 to establish orderly procedures for the consideration of applications for renewal of broadcast licenses; to the Committee on Interstate and Foreign Commerce.

H.R. 6145. A bill to amend title II of the Social Security Act to eliminate the duration-of-marriage requirements (and other special requirements) which are presently applicable in determining whether a person is the widow of an insured individual for benefit purposes; to the Committee on Ways and Means.

H.R. 6146. A bill to amend title IV of the Social Security Act to allow a State in its discretion, to such extent as it deems appropriate, to use the dual signature method of making payments of aid to families with dependent children under its approved State plan; to the Committee on Ways and Means.

By Mr. FRASER:

H.R. 6147. A bill to amend the Public Health Service Act to establish a national program of health research fellowships and traineeships to assure the continued excellence of biomedical research in the United States, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. FREY (for himself, Mr. ANDERSON of Illinois, Mr. ARCHER, Mr. CONABLE, Mr. DERWINSKI, Mr. DUNCAN, Mr. EILBERG, Mr. FORSYTHE, Mr. HASTINGS, Mr. HOGAN, Mr. HORTON, Mr. LUJAN, Mr. VETSEY, Mr. WARE, and Mr. YATRON):

H.R. 6148. A bill to amend the Comprehensive Drug Abuse Prevention and Control Act

of 1970 to establish minimum mandatory sentences for persons convicted of offenses involving narcotic drugs, to provide emergency procedures to govern the pretrial and posttrial release of persons charged with offenses involving certain narcotic drugs, to provide procedures to reach large sums of money used for narcotic trafficking, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. GRAY:

H.R. 6149. A bill to extend through fiscal year 1974 the expiring appropriations authorizations in the Public Health Service Act, the Community Mental Health Centers Act, and the Development Disabilities Services and Facilities Construction Act, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mrs. GRIFFITHS:

H.R. 6150. A bill to amend title 32, United States Code, to provide that Army and Air Force National Guard technicians shall not be required to wear the military uniform while performing their duties in a civilian status; to the Committee on Armed Services.

By Mr. GUDE (for himself, Mr. WOLFF, and Mr. STEELE):

H.R. 6151. A bill to amend the Economic Stabilization Act of 1970, to direct the President to establish a Rent Control Board which, through the establishment of a cost justification formula, will control the level of rent with respect to residential real property, and for other purposes; to the Committee on Banking and Currency.

By Mr. HARRINGTON:

H.R. 6152. A bill to provide adequate mental health care and psychiatric care to all Americans; to the Committee on Interstate and Foreign Commerce.

By Mr. HILLIS:

H.R. 6153. A bill to assure the imposition of appropriate penalties for persons convicted of offenses involving heroin or morphine, to provide emergency procedures to govern the pretrial and posttrial release of persons charged with offenses involving heroin or morphine, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 6154. A bill to amend title 38 of the United States Code to remove the time limitation within which programs of education for veterans must be completed; to the Committee on Veterans' Affairs.

H.R. 6155. A bill to amend title 38 of the United States Code to provide that certain veterans who were prisoners of war shall be deemed to have a service-connected disability of 50 percent; to the Committee on Veterans' Affairs.

By Mr. HILLIS (for himself, Mr. LOTT, Mr. RAILSBACK, and Mr. HARRINGTON):

H.R. 6156. A bill to establish improved nationwide standards of mail service, require annual authorization of public service appropriations to the U.S. Postal Service, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. HOGAN:

H.R. 6157. A bill to encourage and support the dissemination of news, opinion, scientific, cultural, and educational matter through the mails; to the Committee on Post Office and Civil Service.

By Mr. HOWARD:

H.R. 6158. A bill to provide for improved labor-management relations in the Federal services, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. JARMAN:

H.R. 6159. A bill to protect the freedom of choice of Federal employees in employee-management relations; to the Committee on Post Office and Civil Service.

By Mr. LEHMAN:

H.R. 6160. A bill to amend the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act and

other related acts to concentrate the resources of the Nation against the problem of alcohol abuse and alcoholism; to the Committee on Interstate and Foreign Commerce.

By Mr. MCFALL (for himself, Mr. BROWN of California, Mrs. BURKE of California, Mrs. CHISHOLM, Mr. DANIELSON, Mr. DELLUMS, Mr. EILBERG, Mr. FRASER, Mr. HARRINGTON, Mr. HAWKINS, Mr. JONES of Oklahoma, Mr. LEGGETT, Mr. MACDONALD, Mr. METCALFE, Mr. MOLLOHAN, Mr. OBEY, Mr. PODELL, Mr. RANDALL, Mr. ROSENTHAL, Mr. STOKES, Mr. THOMPSON of New Jersey, Mr. CHARLES H. WILSON of California, and Mr. WON PAT):

H.R. 6161. A bill to amend the Economic Stabilization Act of 1970 to establish a temporary Price-Wage Board, to provide temporary guidelines for the creation of price and pay rate stabilization standards, and for other purposes; to the Committee on Banking and Currency.

By Mr. MCKINNEY:

H.R. 6162. A bill to amend the Internal Revenue Code of 1954 to exclude from gross income amounts won in State lotteries; to the Committee on Ways and Means.

By Mr. MILLS of Arkansas:

H.R. 6163. A bill authorizing the Secretary of Agriculture to carry out a program providing for the inspection of fish produced on fish farms in the United States; to the Committee on Agriculture.

By Mr. MILLS of Arkansas (for himself, Mr. VANIK, Mr. ANDREWS of North Dakota, Mr. BUTLER, Mr. DON H. CLAUSEN, Mr. DINGELL, Mr. PASSMAN, Mr. ROUSSELOT, Mr. SANDMAN, Mr. SATTERFIELD, Mr. SMITH of Iowa, Mr. THONE, and Mr. WRIGHT):

H.R. 6164. A bill to prohibit most-favored-nation treatment and commercial and guarantee agreements with respect to any non-market economy country which denies to its citizens the right to emigrate or which imposes more than nominal fees upon its citizens as a condition of emigration; to the Committee on Ways and Means.

By Mr. MONTGOMERY (for himself, Mr. ARCHER, Mr. BAFALIS, Mr. BAKER, Mr. BEVILL, Mr. BROYHILL of North Carolina, Mr. CORMAN, Mr. DAVIS of South Carolina, Mr. DENHOLM, Mr. DICKINSON, Mr. EILBERG, Mr. FISHER, Mr. GUYER, Mr. HANSEN of Idaho, Mr. HASTINGS, Mr. HENDERSON, Mr. HINSHAW, Mr. HUBER, Mr. JONES of North Carolina, Mr. MATHIS of Georgia, Mr. MATSUNAGA, Mr. MOLLOHAN, Mr. STEIGER of Wisconsin, Mr. TREEN, and Mr. WON PAT):

H.R. 6165. A bill to amend titles 37 and 38, United States Code, to encourage persons to join and remain in the Reserves and National Guard by providing full-time coverage under Servicemen's Group Life Insurance for such members and certain members of the Retired Reserve up to age 60, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. MONTGOMERY (for himself, Mr. ROBERT W. DANIEL, JR., Mr. ROBINSON of Virginia, and Mr. YOUNG of Alaska):

H.R. 6166. A bill to amend titles 37 and 38, United States Code, to encourage persons to join and remain in the Reserves and National Guard by providing full-time coverage under Servicemen's Group Life Insurance for such members and certain members of the Retired Reserve up to age 60, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. NEDZI:

H.R. 6167. A bill to amend the Central Intelligence Agency Retirement Act of 1964 for Certain Employees, as amended, and for other purposes; to the Committee on Armed Services.

By Mr. PATMAN (for himself, Mr. BARRETT, Mrs. SULLIVAN, Mr. REUSS, Mr. MOORHEAD of Pennsylvania, Mr. ST GERMAIN, Mr. MINISH, Mr. HANNA, Mr. GETTYS, Mr. ANNUNZIO, Mr. REES, Mr. HANLEY, Mr. BRASCO, Mr. KOCH, Mr. COTTER, Mr. MITCHELL of Maryland, Mr. FAUNTROY, Mr. YOUNG of Georgia, Mr. MOAKLEY, and Mr. STARK):

H.R. 6168. A bill to amend and extend the Economic Stabilization Act of 1970; to the Committee on Banking and Currency.

By Mr. PODELL:

H.R. 6169. A bill to amend the Internal Revenue Code of 1954 to defer the payment of income tax on amounts deducted from a public employee's wages for purposes of retirement until the amounts are received by the taxpayer; to the Committee on Ways and Means.

By Mr. RARICK:

H.R. 6170. A bill to provide a moratorium in which the payment of interest on U.S. obligations will be suspended, to provide that for this period interest-bearing obligations will be refunded with 20-year non-interest-bearing obligations, and to provide that the saving to the United States will be used to reduce the public debt; to the Committee on Ways and Means.

H.R. 6171. A bill to amend the Internal Revenue Code of 1954 with respect to the treatment of certain uncompensated services of attorneys and physicians; to the Committee on Ways and Means.

By Mr. REUSS (for himself, Mr. BREAU, Mr. BURTON, and Mr. ROE):

H.R. 6172. A bill to provide for programs of public service employment for unemployed persons, to assist States and local communities in providing needed public services, and for other purposes; to the Committee on Education and Labor.

By Mr. REUSS (for himself, Mr. BROWN of California, Mr. METCALFE, and Mr. THOMPSON of New Jersey):

H.R. 6173. A bill to amend the Internal Revenue Code of 1954 to raise needed additional revenues by tax reform; to the Committee on Ways and Means.

By Mr. ROE:

H.R. 6174. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits thereunder; to the Committee on Ways and Means.

By Mr. ROGERS (for himself, Mr. SATTERFIELD, Mr. KYROS, Mr. PREYER, Mr. SYMINGTON, Mr. ROY, Mr. NELSEN, Mr. CARTER, Mr. HASTINGS, Mr. HEINZ, and Mr. HUDNUT):

H.R. 6175. A bill to amend the Public Health Service Act to provide for the establishment of a National Institute on Aging, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ROONEY of Pennsylvania:

H.R. 6176. A bill to amend title 10 of the United States Code so as to permit members of the Reserves and the National Guard to receive retired pay at age 55 for nonregular service under chapter 67 of that title; to the Committee on Armed Services.

H.R. 6177. A bill to amend the Interstate Commerce Act to expedite the making of amendments to the uniform standards for evidencing the lawfulness of interstate operations of motor carriers; to the Committee on Interstate and Foreign Commerce.

H.R. 6178. A bill to amend the Interstate Commerce Act to extend coverage of such act to certain motor vehicles used to transport schoolchildren and teachers, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 6179. A bill to amend section 402 of title 23, United States Code, to extend certain deadlines relating to apportionment of

highway safety funds, and for other purposes; to the Committee on Public Works.

By Mr. ROONEY of Pennsylvania (for himself and Mr. ECKHARDT):

H.R. 6180. A bill to amend the Interstate Commerce Act to provide improved enforcement of motor carrier safety regulations; to protect motor carrier employees against discrimination for reporting violations of such regulations; and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ROY (for himself, Mrs. SULLIVAN, Ms. ABZUG, Mrs. CHISHOLM, Mr. DRINAN, Mr. FAUNTROY, Mr. HECHLER of West Virginia, Mr. HEINZ, Mr. HELSTOSKI, Mr. METCALFE, Mrs. MINK, Mr. MOSS, Mr. PODELL, and Mr. WON PAT):

H.R. 6181. A bill to establish a Consumer Savings Disclosure Act in order to provide for uniform and full disclosure of information with respect to the computation and payment of earnings on certain savings deposits; to the Committee on Banking and Currency.

By Mr. SISK:

87. Also, petition of the city council, Euclid, Ohio, relative to controlling the level of Lake Erie; to the Committee on Public Works.

SENATE—Tuesday, March 27, 1973

The Senate met at 10 a.m. and was called to order by Hon. JAMES ABUREZK, a Senator from the State of South Dakota.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Lord of our lives, in this quiet morning interlude help us to put aside all other thoughts and duties that for a moment we may know Thy nearness. Fill our lives with new meaning and purpose. Help us to grasp the truth that we labor not alone, for Thou art with us; we work not

in our own strength, for Thou dost support us. Rekindle the fire of faith our fathers gave us. Make our hours radiant with truth and our daily work resplendent with the faith which believes in the ultimate triumph of righteousness.

Through Jesus Christ, our Lord. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., March 27, 1973.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. JAMES ABOUREZK, a Senator from the State of South Dakota, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. ABOUREZK thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Monday, March 26, 1973, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that all committees may be authorized to meet during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

U.S. FOREST SERVICE REORGANIZATION—RUMORS

Mr. MANSFIELD. Mr. President, during the weekend, news reports appeared in Montana indicating possible changes and consolidations in the regional setup of the U.S. Forest Service. Senator METCALF and I do not like what we hear. We have not had verification, but we understand that consideration is being given to moving the regional offices from Missoula, Mont., Ogden, Utah, and Albuquerque, N. Mex., to the Denver, Colo., Federal region, including the closing of many national forest headquarters.

While we do not disagree with the effort to unify the regional setup for many national Federal programs, it is important to point out that there are exceptions. National forest activity is limited to certain areas of the Nation. Any plan to make the Forest Service conform to the Federal regional system is ridiculous. Missoula is the headquarters of region I, one of the most active of the Forest Service regions. It is centrally located and is within easy access of all the national forest headquarters. Missoula is the center of considerable administrative and research activity.

Region I is made up of the State of Montana, northern Idaho, eastern Washington, and the grasslands in North Dakota and northern South Dakota. Region I headquarters in Missoula administers 26,126,940 acres of National Forest lands. There are 16 national forests within its jurisdiction, 10 in my

State, five in Idaho, and one in Washington. The vast majority of the national forests in Montana are in western Montana and if we look at a map we can see that Missoula is the logical, central location. If region I is absorbed into region II in Denver, it will be some 800 to 1,000 miles away. Region II administers 20,000,000 acres of national forest. There are 186,000,000 acres in the entire national system of forest lands. The United States is a very large landholder and it does not seem unreasonable to ask that they continue to be administered from nine regional headquarters. Building up an even larger administrative monster in Denver, in addition to the one in Washington, D.C., is not going to simplify matters. Such action takes away more responsibility and action from local authority.

We also understand that this proposed reorganization involves a number of national forest headquarters consolidations and closures. If this is accurate, then it seems very inconsistent with what the administration would like us to believe on another front. We all know that national forest timber sales are way down, in fact below the annual allowable cut. This is due in part to an OMB enforced personnel cut. There is no way in which the Forest Service can efficiently offer timber sales without adequate personnel. To do otherwise would open up vast acreages to a rape of the timber resources.

All of this is being done at a time when the Nixon administration's Cost of Living Council indicates that they will increase temporarily the Nation's lumber supply in an effort to combat rising housing costs. The Council's recommendations reportedly will include increasing the Federal timber available for commercial harvest. How can this be done when they are reducing personnel?

The report indicates that the Council also wants to attack the railroad boxcar shortage as a contributor to high lumber prices. This is a very real problem and the Interstate Commerce Commission has through its regulatory authority, attempted to expedite the movement of railroad boxcars with new car orders and stiff penalties. However, the administration has severely limited the ICC personnel ceiling so that they cannot hire personnel to enforce and inspect the movement of cars.

In conclusion, Mr. President, Senator METCALF and I are very disturbed by these recurring reports. We thought we laid them to rest about a year ago. We wish to take this public opportunity to remind the current administration of the Miles City Veterans' Administration Hospital. Senator METCALF and I will not stand by and watch a viable and effective arm of the U.S. Forest Service in Missoula, Mont., dissipated and cut up. Region I should remain in Missoula and it should remain with its present activities and jurisdiction.

Mr. President, I ask unanimous consent to have printed in the RECORD, a series of communications my colleague, Senator METCALF, and I have received and initiated with the appropriate Federal agencies.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

MISSOULA, MONT., March 26, 1973.
Senator MIKE MANSFIELD,
Capitol Hill,
Washington, D.C.:

Alarmed by article in today's Missoulian indicating U.S. Forest Service will close regional headquarters in Missoula, Ogden, and Albuquerque within the next 1 to 3 months and consolidate them in Denver. Plan includes consolidating offices from Great Falls and Butte to Helena as well as other involved changes. News article referred to a high-ranking Forest Service official in region 4 making the announcement at Twin Falls to the Idaho Wildlife Federation Convention. This would be a major blow to Missoula and the already disrupted Montana economy. Please refer to my letter of September 3, 1971, in regard to economic and social impacts: 1. Would you please inform me to the accuracy of this news information and any details regarding this proposal. 2. Since this is a vital matter, your assistance and cooperation to strongly oppose the closing of the Missoula regional headquarters before the proposal becomes official would be greatly appreciated.

Sincerely yours,

GEORGE LAMBROS.

MARCH 26, 1973.

HON. EARL L. BUTZ,
Secretary, Department of Agriculture;
HON. JOHN MCGUIRE,
Chief, U.S. Forest Service:

Rumors have come to my attention that U.S. Forest Service region 1 headquarters now at Missoula, Mont., will be transferred to Denver. I object strongly to any such plan. Missoula is strategically located in the heart of timber resources in region. Regional concept as now established does not necessarily apply to several of our natural resources. Denver is remote on the fringe of the most active forest regions. I would like your reassurance that nothing will be done to dissipate Forest Service activity at Missoula. Any plan to move the Missoula headquarters will be met with strong opposition here in the Senate.

Regards,

Senator MIKE MANSFIELD.

HON. EARL BUTZ,
Secretary, Department of Agriculture,
Washington, D.C.:

Mr. JOHN MCGUIRE,
Chief, Forest Service, Department of Agriculture, Washington, D.C.:

Constituents have asked me to check a rumor that the Forest Service is considering moving its Missoula regional headquarters to Denver. Will appreciate your reassurance that this is not the case. The transfer of management from near the center of the resource to an area more than 800 miles away and on the fringe of the resource would be neither efficient nor economical and would work a very real hardship on Montanans sincerely concerned with the management of national forest resources.

LEE METCALF,
U.S. Senator.

Mr. MOSS. Mr. President, I rise to associate myself with the distinguished majority leader (Mr. MANSFIELD) in protesting the move now apparently under way in the Forest Service to reorganize its regional setup into the 10 standard offices of the standard regional concept of the Federal Government. This would mean splitting up the Intermountain regional office in Ogden, Utah, and scattering its work elsewhere in regional offices far removed from the scene of its action. Such a move would be unwise,

shortsighted, and environmentally indecisive.

The Forest Service admits that it is examining all regional boundary arrangements to see if it cannot pass its regional boundary arrangements into the Federal pattern. It has not yet admitted that such action will take place, but few of us are fooled that this is not what the Nixon administration wants the Forest Service to do, and will force it to do if it can get away with it.

Mr. President, it makes little environmental or administrative sense to force the Forest Service into the regional concept straightjacket. The philosophy underlying that concept is based upon centralizing regional offices of all Federal programs into 10 urban locations. Perhaps for those Federal programs whose objective is to raise the welfare of urban residents, this concept is sound.

But it is not sound for those agencies whose objective is to manage natural resources in an environmentally sound manner. The regional office should be maintained where the resources are. Ogden is in the middle of the resource area which serves Utah, southern Idaho, western Wyoming and Nevada. It is in the heart of the Intermountain national forests.

To try to administer the work in these forests from Denver, or from the Pacific coast, is unsound and unreasonable.

If we want efficiency and effectiveness in the management of our forest lands, we must administer the work close to where it is being undertaken. Effective resource management is on-the-ground management—not management a thousand miles away.

I realize that this action is being proposed because of current budget restraints, but I predict it will be proved pennywise and pound foolish so far as the future of our forests is concerned.

I strongly oppose it and will do everything in my power to prevent it.

PROCLAMATION DESIGNATING THE WEEK OF APRIL 23, 1973, AS NICOLAUS COPERNICUS WEEK

Mr. SCOTT of Pennsylvania. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on House Joint Resolution 5.

The ACTING PRESIDENT pro tempore laid before the Senate House Joint Resolution 5, which was read twice by its title, as follows:

H.J. Res. 5. Joint resolution requesting the President to issue a proclamation designating the week of April 23, 1973, as "Nicolaus Copernicus Week" marking the quinqucentennial of his birth.

Mr. SCOTT of Pennsylvania. Mr. President, I ask unanimous consent for the immediate consideration of the joint resolution.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

Mr. SCOTT of Pennsylvania. Mr. President, before moving for passage, I should like to note that the joint resolution is in celebration of this great scientist's 500th anniversary. It also re-

minds me of the story of Galileo, a devoted student of Copernicus' theory of the universe, who was tried for heresy, under a charge from the illiterati of the day that he recant his belief that the Earth and the planets moved in relation to the Sun.

As they forced Galileo to his knees for the recantation, the story goes that he was heard to say, in the ancient Italian of the time, "E pur si muove"—that is, "Nevertheless, it moves."

Now that is something that history should forever remember, that this man, the follower of Nicolaus Copernicus' theory which changed the course of scientific study and scientific thought for all the world thereafter, nevertheless was not changed by the rigidity of the illiterati.

At the end he said, "Nevertheless, it moves."

That is the spirit that I think should inform science today, and inform statesmen, as well. "If you believe it, say it; if you have it, flaunt it."

The ACTING PRESIDENT pro tempore. The question is on the third reading and passage of the joint resolution.

The joint resolution (H.J. Res. 5) was ordered to a third reading, read the third time, and passed.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Arizona (Mr. FANNIN) is recognized for not to exceed 15 minutes.

THE DOLLAR DEVALUATION

Mr. FANNIN. Mr. President, twice within 14 months we have had a formal devaluation of the U.S. dollar. Now the dollar is floating in the international money market. Despite these considerable adjustments, the dollar remains under attack.

Dr. James J. O'Leary, vice chairman of New York's U.S. Trust Co., was quoted in a recent Forbes magazine as saying:

"I'm not a prophet of doom, but the way things are going, this devaluation is just the second in a long series of devaluations."

I hope that Dr. O'Leary is wrong, but I believe that he is correct unless we can, using some of his words, change "the way things are going."

What we must do is to restore discipline and use some economic common sense if we are to stop the downward spiral of the dollar.

We cannot expect other nations to protect our dollar while we refuse to discipline wild Federal spending and while we take other congressional actions that skyrocket manufacturing costs and restrict our ability to compete in world markets.

Our balance of payments deficit sends more and more weakening dollars overseas each month, adding to the \$80 billion in American currency inundating the money markets of the world.

Mr. President, if we are to bring inflation under control at home, restore confidence in the American economy, and protect the dollar abroad, there are four steps that we must take:

First. We must bring Federal spending

under control immediately and also take other actions to stop inflation.

Second. We must stop the erosion of our position in world trade, not through protectionism, but through a rebirth of the competitive spirit within America and the renegotiation of trade agreements so that American goods can be offered on an equal footing in all world markets.

Third. We must have a new spirit of cooperation between management and labor to keep wages from further outstripping productivity.

Fourth. We must provide the economic climate within the United States to encourage the expansion of our industries.

Unfortunately, Mr. President, we have only scratched the surface in our attempts to deal with some of these problems.

Almost every move in Congress the past decade has been in the wrong direction.

We lowered taxes in 1969 and 1971 at a time when Congress was expanding Federal spending, thus increasing our already staggering national debt.

We added on to the more than 1,000 domestic assistance programs, many of which are extravagant, wasteful, and clearly ineffective.

An article, "A Clear Call to Congress—Control Spending Now," in the February 1973 Reader's Digest elaborates on this subject. I ask unanimous consent that this excellent article be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

A CLEAR CALL TO CONGRESS—CONTROL SPENDING NOW!

(By Caspar Willard Weinberger)

At the rate we're going, says the newly designated head of the government's biggest civilian agency, the tax bite will soon be so huge that the economy will stagnate.

It is time to say No—loud and clear—to the demands for ever greater federal spending. Failure by Congress to do so has produced a ballooning federal budget of more than a quarter trillion dollars, fueled inflation and weakened the dollar. Our national debt is now so staggering that interest on it alone costs taxpayers nearly \$24 billion a year. "The tax burden of the American people," says President Nixon, "has reached the breaking point."

When the President brought me to the Office of Management and Budget 2½ years ago, he gave me one assignment—to keep under control a federal budget that was threatening to get out of hand. He asked me to direct a sweeping examination of the entire federal government, to recommend those programs that can be eliminated and those that can be cut, to identify those agencies that are—in his words—"too bloated."

The more I probed, the more apparent it became that throwing the taxpayers' money at one problem after another does not guarantee solutions. From 1965 to 1972, per capita federal spending for education, manpower, health and income-security programs shot up from \$180 to \$445. The budget of the Department of Health, Education and Welfare soared to \$76 billion in 1972, will outstrip even the Defense Department in this fiscal year and go far ahead in fiscal 1974, largely because of huge increases in Social Security payments.

The 940-page Catalogue of Federal Domestic Assistance lists more than 1000 differ-

ent programs. Examine these programs and you often find little or no correlation at all between money spent and results achieved. Multimillion-dollar urban-renewal projects have left thousands homeless. Giant public-works projects have too often wreaked environmental havoc. Ever-rising payments under the existing welfare system have encouraged second and third generations to stay on the dole.

As *Fortune* magazine recently observed, "There is too much government money pouring into outmoded, unsuccessful or ill-conceived activities." Yet attempts to cut off these programs rarely succeed. Consider what happened two years ago when President Nixon asked Congress to restructure, reduce or eliminate 57 different federal activities and save the taxpayers nearly \$3 billion a year.

There was no longer a need, said the President, for the government to own a railroad in Alaska or a steamship line in Panama. Sell them to private industry. End the \$84-million-a-year program that pumps subsidized milk into some of the nation's wealthiest school districts. Let private yacht owners maintain their own marinas instead of using government largesse. Cut off "disability" payments to veterans with *arrested* tuberculosis, he recommended.

Reaction was fierce. Special-interest groups—from the Veterans of Foreign Wars to the National Education Association—bombarded Capitol Hill with letters, telegrams and petitions. Lobbyists roamed Congressional corridors rounding up opposition to the economy proposals. The President has been able to put into effect only \$675 million in savings out of the nearly \$3 billion he sought.

Time after time in recent years, Congress has failed to pay sufficient attention to the total effect of its individual program decisions. For example, the President asked Congress for \$6 billion to combat water pollution. Congress liked this to \$18 billion, and when the President vetoed the bill as inflationary, it easily passed over his veto.

No one is in favor of polluted rivers. But, as Sen. John McClellan noted, "The time has come when we must act to conserve our fiscal resources just as we have moved to conserve our natural resources." If we do not, the implications are ominous. The highly respected Conference Board, a nonpartisan research group, warned recently that "massive and almost continuous jumps in federal spending are posing a serious threat to the country's economic stability."

In the period 1969-1972—when military spending actually declined \$3 billion, or four percent—"income security programs," from welfare to Social Security, rose 71 percent, to \$65 billion. Outlays for pollution control increased 183 percent, for housing and community development 115 percent, for manpower training 94 percent.

Government—federal, state and local—now eats up about one third of the Gross National Product in taxes. We are moving toward the 40-percent mark—a point where the experts say it will be impossible to maintain a free-enterprise, incentive-oriented economy.

The Congress and the Executive, Working together, can halt this head-long plunge toward greater government control of the economy. At this point, however, it seems that Congress is lagging behind. In its closing hours last fall, the Senate rejected the President's plea for a rigid ceiling of \$250 billion for fiscal 1973—an increase of \$18 billion over 1972, and \$143 billion over 1962.

If the people are ever to get responsible fiscal policy, three things must be done:

Abandon the unworkable. Traditionally, federal programs increase in scope year after year. Economist Peter Drucker puts it this way: "The moment government undertakes

anything, it becomes permanent. Government really cannot abandon anything." But this Administration disagrees.

For months, the economists and technicians in the Office of Management and Budget have been conducting an intensive investigation of government programs. Armed with facts and figures, they will propose to Congress the termination of those programs that have not worked, the restructuring of those of marginal value. This will not be easy. Every President since Dwight Eisenhower has called for major revisions in the aid to impacted-areas school program, a boondoggle that funnels hundreds of millions of dollars into the wrong areas (Montgomery County, Md., the nation's wealthiest county, receives twice as much money under this program as the nation's hundred poorest counties).

The Administration will suggest cutbacks or revisions in program of federal housing subsidies that can only be called a multibillion-dollar failure. We want reform in the "compensatory education" program where money supposedly aimed at helping the underprivileged has gone for high-paid consultants and parking-lot paving. We will ask an end to certain anti-poverty programs whose "cost effectiveness" cannot be proved—programs that appear to benefit only those employees administering them.

In short, we will ask Congress to abandon those projects that have not worked. There will be anguished cries from special-interest groups. But only by slashing away at the dead wood can the money be found for new, workable approaches to our problems.

Consider long-range implications. Often programs with low first- and second-year costs are entered into with scant recognition that the country has been committed to massive funding before any benefits are realized. Thus in 1965 Congress voted to let the government sign rent supplement contracts stretching up to 40 years. Few legislators who approved \$72 million for the first four years of the program realized that they were obligating future Congresses to spend nearly \$3 billion by the year 2009.

Frequently, ill-conceived—and open-ended—matching programs enable states and localities to stage outright raids on the federal treasury. In 1967, Congress approved an amendment to the Social Security Act, requiring Washington to put up \$3 for every \$1 spent by state and local governments on undefined "social services." The amendment was a veritable bonanza and states were free to use the money for everything from paving roads to making movies. Outlays by Washington leaped 460 percent in four years. Twice, Administration officials pleaded with Congress to curb the runaway program. And twice Congress refused. Only last year, when Congress passed the \$6-billion-a-year revenue sharing bill, did it agree to place a \$2.5-billion-a-year lid on social services. But supporters have made clear they will try this year to remove the ceiling so that once again the program can grow like Topsy.

Overhaul the archaic budget process. The manner in which Congress handles the budget has become fragmented and fumble-some. At the root of the problem is that at no time does Congress adopt a comprehensive budget for the federal government. Never does it consider programs in light of what resources are available. Never does it set priorities through a systematic process.

When the President's budget reaches Capitol Hill in January, it is immediately parceled out among the various appropriation and authorization subcommittees. The subcommittees, concentrating on their own interests and concerns, give little consideration to the relationship that their actions might have on the overall budget. This manner of considering appropriation bills virtually forbids the development of sound fiscal policy.

There is also the matter of delay. Although

the fiscal year begins more than five months after the budget is submitted, Congress rarely gets around to enacting more than a few of the 14 major appropriation bills by that time. Instead, "continuing resolutions" are passed, enabling government agencies to continue the same old programs at the same old rate. Opportunities for economy, for reform, for restructuring inadequate programs, are lost.

Congress can learn several vital lessons from the way the states handle their budgets. Many adopt a fixed budget at the beginning of each legislative session. Only then do they determine what each program deserves in the way of funding. Many set absolute deadlines for budgetary enactment. Other legislative business is out of order until approval of the budget.

Rep. Paul Findley, Illinois Republican, has incorporated many of these ideas into a budget-reform package. Co-sponsored by distinguished members of both parties, the Findley proposal would enable Congress for the first time to approach the budget question sensibly.

It would require the House to adopt a comprehensive federal budget before it could begin appropriating funds. This budget would include an estimate of tax revenues, expenditure ceilings for each main appropriation bill, and a recommendation for making up any deficit—by raising taxes, increasing the debt limit, or both. Only then could Congress begin doling out the money.

This proposal provides a good starting point for Congressional review of the budget process. Such a review must be given high priority in the 93rd Congress. For only reform of the entire process will permit Congress once again to act as the guardian of the U.S. Treasury. It is not only the budget of the U.S. government that is broken by irresponsible Congressional actions—it is the budget of every American family.

EVERYBODY'S SPENDING SPREE

Until 1930, aside from periods of active war, residents of the United States never spent more than about 15 percent of their income on the expenses of government. Now, on the average, that fraction stands at about 40 percent. And the plain fact is that governments are spending that amount not because of war or fear of war, but of the role that we, as citizens, have assigned to government. The federal government was until 40 years ago viewed primarily as a keeper of the peace, an umpire. Today, we view it as responsible for treating every social and personal ill, as the source from which all blessings flow.

There is hardly one among us who believes that he is getting his money's worth. Yet so long as we simply blame waste and bureaucracy, but continue to believe in the omnipotence and beneficence of government, the trend toward ever bigger government will continue.

That trend will stop only when and if we recognize that government is the problem, not the solution; that the general welfare requires that we dethrone the federal government from its role of Big Brother and restore it to its historic role as keeper of the peace and umpire.—Economist MILTON FRIEDMAN in *Newsweek*.

Mr. FANNIN. Mr. President, Secretary Weinberger makes some very good points in this article. Congress has made a start toward budget control and I believe we should accelerate this effort.

We must put an end to the irresponsibility which has forced President Nixon to take the extreme action of impounding funds. We are fortunate have a President with the courage to step in and restrain spending when Congress has acted irresponsibly.

Now I would like to take up my second point—our foreign trade situation. We are just now coming to realize how closely related our domestic and foreign trade problems can be. Let us examine just how our foreign trade deteriorated, and how our dollar crisis came about.

In the 1950's, when the Marshall plan and other postwar reconstruction plans were being implemented, Europe and Japan were still busily rebuilding their war-torn economies. In contrast, the U.S. economy was the strongest in the world. But today our competitive strength is challenged by Japan and the enlarged European economic community in particular.

By 1970, our share of the world's Gross National Product had declined to 30 percent from almost 40 percent in 1950. Meanwhile, the European community's share had grown from 11 to 15 percent, and Japan's share had increased from 1.5 to 6.2 percent.

World trade in 1970 had increased to 5 times its 1950 level, but the increase primarily benefited the Common Market countries and Japan. The Common Market's share of the vastly expanded postwar trade volume just about doubled—from 15 percent in 1950 to 28 percent in 1970. The new expanded Common Market will account for half of world trade in industrial products. Japan's share rose from 1 to 6 percent. Japan's record of export growth has been unparalleled—an annual growth of 19 percent over the 20-year period 1950-70. In sharp contrast, the U.S. share of world exports declined slightly—from 16 to 14 percent.

Another important trade trend in this same time period has been the rising proportion of U.S. output in the form of services. Goods are becoming less important in our economy and employment is shifting to service occupations, such as transportation, communications, trade, education, medical services, and other professions and Government. This trend raises key questions about our future international trade position since most services are difficult to export and raising productivity in services is more difficult than in manufacturing.

During the 1960's, our exports and imports both grew faster than the economy, but because our imports outpaced our exports, our trade balance has swung from a favorable \$6.8 billion in 1964 to an unfavorable \$6.4 billion in 1972.

Mr. President, the trade statistics are even more disturbing when they are further distilled. The figures show a steady decline in our ability to compete internationally in high technology and manufacturing industries where America once reigned supreme.

U.S. Department of Commerce figures released in December showed that the United States had a \$7.1 billion deficit in the balance of trade for manufactured goods while Germany was producing a \$16.4 billion surplus and Japan had a favorable balance of \$19 billion. These particular exports are job sustaining.

The statistics show a steady plunge of the U.S. balance of trade in manufacturing from 1960 onward, while Germany and Japan have soared.

This sharp shift in our trade balance has generated increasing and understandable concern about the economic effects of our trade in general and imports in particular. It has been estimated that between 600,000 and 750,000 jobs were lost between 1964 and 1971 as our trade balance shifted from surplus to deficit. However, Department of Labor job impact studies show that trade has had a net favorable effect on our overall employment. The effect on incomes has been similarly favorable, since in general export-oriented jobs are better paying than import-competing jobs.

Of course, our balance of payments covers more than our merchandise trade. The United States has run a basic balance-of-payments deficit in almost every year since 1950, but our favorable trade balance kept the deficit rather small until 1971. If the international monetary mechanism had been responsive, our continuing payments deficits would have resulted in an effective devaluation of the dollar long before the formal devaluation in 1971. But this did not happen, because of the rather inflexible official exchange rate system inherited from the Bretton Woods agreements in 1944. In fact, due to devaluations of some other currencies, the official dollar value of the dollar, perversely, was slightly higher in 1970 than in 1960. The Smithsonian Agreement of December 1971 finally officially recognized the inadequacies of the current fixed foreign exchange rate system and provided some measure of relief to the United States through a 7.9-percent dollar devaluation. Further relief has been provided by our additional 10-percent devaluation on February 12 of this year. But the hoped-for favorable impact on our trade balance may be slow in coming and meager in amount. This is because of trade barriers imposed against our exports particularly in the European Common Market and Japan.

On September 25, 1972, President Nixon in speaking to the governors of the World Bank and the International Monetary Fund said:

We shall meet competition rather than run away from it. We shall be a stimulating trading partner, a straight forward bargainer.

He went on to say:

I want to see new jobs created all over the world, but I cannot condone the export of jobs out of the United States caused by any unfairness built into the world's trading system.

Our trade with the European Common Market—the world's most important trading area—has been substantial and rising, but our favorable trade balance has been shrinking. In part, this may be due to the EC's variable import levy system for agricultural products under which U.S. grain exports to the EC have declined 30 to 35 percent from their peak.

Another problem in our trade with the Common Market is the preferential tariff treatment granted imports from less developed countries thereby discriminating against similar imports from the United States such as citrus fruits.

We have had an adverse trade balance

with Japan since 1965 and the deficit has been growing. In part, this is because much of the Japanese export effort is aimed at the United States, since the Common Market has erected formidable barriers against imports from Japan. The bulk of our exports to Japan—exclusive of aircraft and a few high technology items—is agricultural products and industrial raw materials. In turn, Japan sells us increasing amounts of sophisticated products, such as cameras, tape recorders, calculating machines, radios, television sets, and sewing machines, as well as steel, textiles, and motor vehicles.

Here again, as in the case of the Common Market, there is a lack of equity in Japanese-American commercial relationships. For example, except for a modest tariff, Japanese autos enter the U.S. market unhindered. On the other hand, our auto manufacturers face a variety of restrictions in Japan. Commodity and road taxes are aimed at the larger cars from the United States. The result is that a \$9,000 Cadillac sells for \$30,000 in Japan, and even the Pinto sells for nearly \$5,500 there. When our auto firms seek to invest directly in Japan, they are faced with other restrictions, such as the stipulation that they may own only a minority share of a Japanese company and must conform to restrictions on the composition of a subsidiary's management.

It is unrealistic to believe the Japanese can expect to continue selling \$9.1 billion in the United States when they buy only \$4.9 billion. Americans are absorbing more than 41 percent of the Japanese exports.

The General Agreement on Tariffs and Trade was drawn up in the immediate postwar era of the 1940's and is unsuited to the realities of the 1970's. Trade negotiations in the early and mid-1960's did nothing to correct the imbalances. These negotiations, in fact, made our situation worse rather than better. It is time to correct the inequities in GATT.

Now I would like to consider the matter of productivity.

Our economy makes real gains when productivity measured by output per man hour, rises faster than hourly labor costs. This favorable relationship held true in the years 1961 through 1967. But when labor costs rise faster than productivity, as in the period 1969-71, "cost-push" forces prices up and makes our exports less competitive in world markets. It is not the absolute level of wage rates that matters, therefore, but the labor cost per unit of output. In her fastest growing export industries Japan experienced annual wage increases of 14 percent in the 1965-70 period, but her annual productivity gains of 15 percent or more outpaced wage gains. In steel the annual productivity gain was 18 percent. In the United States, on the other hand, wage gains exceeded productivity increases over the same period, widening the unit labor cost gap to our disadvantage.

What is happening in the United States that differs so much from Japan? Perhaps a letter-to-the-editor of the Arizona Republic has some food for thought. I ask unanimous consent that

the letter, which appeared March 9, 1973, be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

"CANCEROUS GROWTH" ANALYZED

Editor, The Arizona Republic:

A diagnosis made by Arthur F. Burns, chairman of the Federal Reserve Bank, stated: that the United States is suffering from a "cancerous growth" causing a steadily increasing balance of payment deficit.

Both the cause of the "cancer" is known and its cure available.

A few dismal statistics should jar some of us out of chronic lethargy: 30 per cent of our population work for all governments; 10 per cent are on public welfare; 15 per cent are retired; 10 per cent are engaged in the production of military supplies; and another 10 per cent are employed in rendering services.

This 75 per cent of our people are consequently not employed in the production of consumer products. Then it follows that such products must be supplied by the 25 per cent actually at work producing goods for the consumption of all. Since this seems to be an impossible task, we must resort to the importation of additional products to sustain our present high living standards.

If the 25 per cent producing force operated efficiently, they plus our technology might be able to fulfill our product needs. But the fact is that their performance is not only expensive but never up to par either qualitatively or quantitatively. The group is dominated by its "labor leaders" who in turn terrorize the politicians, and who in turn effectively stifle and kill any legislation aimed at even slight ameliorization.

All one need do is to contrast the foregoing with the situation in West Germany and Japan to conclude that unless some extreme changes occur here, we cannot compete with these countries which also possess equal technical know-how.

In the past 14 months it was not the dollar that was devalued 18.5 per cent; it was rather the United States itself.

ABRAHAM ENGELMAN.

Mr. FANNIN. Mr. President, we also should consider the fact that there are several unique aspects of the Japanese industrial worker.

First, the worker enjoys lifetime job security with his company. This makes him ready to accept technological change, since he knows his employer will retrain him if his old job is automated out of existence.

Second, although unions are relatively as important in Japan as in the United States, the unions are organized by company, not by trade. As a result, the union identifies its interests with the company and is less likely to strike than is its American counterpart.

Third, labor is treated as a fixed cost, so that in an effort to reduce its fixed costs per unit, the typical Japanese company operates at high capacity, resulting in extremely low export prices.

We also must consider the fact that not only the unions, but the Government works hand-in-hand with industry in Japan to promote exports and discourage imports. The Japanese Government fosters trade practices which are illegal under U.S. law and of doubtful legality under international trade agreements.

It is imperative that union strategy change in America. The dictatorial

power of union leaders over the years, along with the support of a majority of Members of Congress and without the objections of the administrations in power, resulted in devastating increases in wages without corresponding increases in productivity.

Generally speaking, productivity per dollar of wages continue falling more and more below other industrial countries, particularly Japan.

American workers must produce better to justify the high wages they receive in comparison with other workers in other countries of the world.

Even though foreign wages have been rising rapidly, they still are well below U.S. levels. The average hourly wage rate paid to U.S. workers, exclusive of fringe benefits, was \$3.80 per hour in 1972 according to the latest figures I have seen.

In West Germany, workers earned \$2.55 per hour last year.

In Japan, the rate was \$1.90 per hour.

And in Taiwan, workers in 1971 were being paid on the average of about 21 cents per hour for their work in manufacturing industries.

Our labor leaders must give some very serious thought as to what happens each time they demand extravagant wage increases, or when they interfere with the use of our technology, or when they oppose an end to outdated work rules and featherbedding.

Our industries can pay more than Germany only if our workers produce more than German workers. Our industries can pay two times the Japanese rate only if our workers outproduce the Japanese 2 to 1.

President Nixon's phase II brought some relief from the spiraling labor costs, but in October 1972, Price Commission Chairman C. Jackson Grayson, Jr., cited productivity as his biggest concern and brightest hope.

This certainly is a time of great concern in the United States in view of the fact that labor contracts for some 4.7 million workers are being negotiated this year. Productivity must be taken into consideration in determining any wage increases to be granted.

It is unlikely that we in America will emulate the Japanese in their highly successful efforts to become the world champions of trade. But we do know that as a nation we must raise our productivity faster than money wage, including wage supplements, if we are to improve our badly deteriorated balance of trade.

And it is obvious that we must have new trade agreements which will give American-made merchandise a fair shot at the Japanese and the European markets.

Mr. President, so far I have covered three of the four points I made at the outset. Now I will talk about the fourth point. The need to provide the economic climate within the United States to encourage the expansion of our industries.

The cost of production continues to rise. Raw materials are getting costlier as a result of extreme environmental controls. Almost unworkable and costly

regulations have been imposed for manufacturing and other business operations.

If we continue to ignore our precarious position in world trade—not recognizing our inability to continue one unrealistic decision after another that detrimentally affects our productivity—we will experience periodic devaluations perhaps of even greater magnitude than the 8 and 10 percent recently forced upon us. Some economists believe that unless Congress reverses the course it has traveled the last decade, eventually devaluations of an additional 30 to 40 percent in relation to gold will occur.

We cannot continue year after year passing legislation which ties the hands of our industry and reduces its ability to compete against the other great manufacturing nations.

We could end up with an ecological paradise that is an economic desert. We could have the safest plants in the world, because there is no demand for the overpriced goods they were designed to produce. We could have the highest paid workers in the world, without any work for them to do.

We should have stringent safety laws, we should have environmental protection, we should have good paying employment for everyone willing to work—but we must consider the impact that our every regulation can have on our economic future and then decide whether we can pay the price.

This is also true with taxation. It has been fashionable in the past few years to propose punitive taxes for business and industry. Currently we are faced with a great number of these proposals which could choke off the capital needed to create jobs and kill off the corporations which are the lifeblood of our economic system.

Congress already has erected huge barriers of redtape for our business and industry. There is no incentive for business expansion unless there are justifiable profits to be made. If we impose new tax schemes which discourage the investment of capital, we will be choking off the jobs needed by the millions of new workers entering our labor market each year.

A critical factor in the faster economic growth of our leading industrial competitors has been their higher rate of investment in new productive facilities and equipment. The rate of machinery and equipment investment in Japan—as well as in West Germany—was double ours in the 1968-70 period measured as a share of GNP—20 percent in those countries as against 10 percent here.

Profits are an important determinant of business investment. When profits decline as a percentage of GNP, U.S. investment in new plant and equipment suffers. Between 1950 and 1970, pretax corporate profits slumped from 15 to 7.6 percent of GNP. Even after last year's strong recovery, this relationship only rose to 8.1 percent. True, public investment may raise our national productivity through improved roads, education, or health, but our public investment has concentrated on defense, welfare and old-age medical benefits.

Retained profits help create jobs. In manufacturing, the average investment required per job is \$20,000. The amount varies according to industry. In the oil industry, it takes more than \$100,000 of capital to create one job; in the chemical industry the comparable figure is \$40,000.

Wages and profits go together: High-profit industries pay high wages; low-profit industries pay low wages.

We must have profitable industries during the coming decade and the remainder of this century if we are to meet the economic and social goals that have traditionally been a part of the American dream. Consider, for example, the need we will have in the immediate future for oil imports to relieve the energy crisis. Some experts have calculated a cost of \$36 billion per year for imported fuel by 1985, and this is based at the present price of fuel. The cost could be much higher. Even if we move strongly to develop our own fuel resources, we still will need a considerable amount of imported fuels in the coming decade. No one is going to give us this oil; we will have to pay for it; and the only way we can pay for it is to have a healthy economy with strong manufacturing industries competing in the world markets.

Mr. President, I do not want to leave the impression that nothing is being done to seek the answers to our dollar dilemma.

President Nixon sought a limit on Federal spending in the last Congress, and we in Congress now have a joint committee trying to come up with a budgeting system which will give us some control of Federal spending.

International trade and monetary agreements are being renegotiated and I am encouraged by the Nixon administration's determination to get a fair break for America. We can no longer afford to make economics subordinate to politics in international diplomacy.

The administration has struggled mightily to hold down pay increases so that they are somewhat in line with productivity increases.

But I am concerned as to whether we here in Congress are working with appropriate urgency concerning urgent issues.

And I am disturbed about what appears to be a lack of understanding among the American people as to the significance and the extent of our current economic problems both at home and abroad. It is the American people who are the victims of the economic miscalculations which have been made in the past and which could be made should Congress fail to act or should Congress move in the wrong direction.

Our people have been lulled into believing that a nation can enjoy the fruits of plenty without making the sacrifice of nurturing the trees.

We must restore discipline—in our work and in our Government.

If Congress is to be the leading force that most of us want it to be, then we should begin right here to impose the discipline necessary to rescue the Nation from our dollar crisis.

President Nixon in his message to Congress on February 22, spelled out our goals:

We must be restrained in Federal spending. We must show reasonableness in labor-management relations.

We must comply fully with the new Phase III requirements of our economic stabilization program.

We must continue our battle to hold down the price of food.

And we must vigorously meet the challenge of foreign trading competition.

It is clear to me that the American people stand firmly together in support of these policies. Their President stands with them. And as Members of the 93rd Congress consider the alternatives before us this year, I am confident that they, too, will join in this great endeavor.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Michigan (Mr. GRIFFIN) is recognized for not to exceed 15 minutes.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum. I ask unanimous consent that the time be charged against the time allotted to the Senator from Michigan.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate go into executive session.

There being no objection, the Senate proceeded to consider executive business.

CONSULAR CONVENTION WITH POLAND (EX. U, 92D CONG., 2D SESS.); CONSULAR CONVENTION WITH RUMANIA (EX. V, 92D CONG., 2D SESS.); CONSULAR CONVENTION WITH HUNGARY (EX. W, 92D CONG., 2D SESS.); EXCHANGE OF NOTES WITH ETHIOPIA CONCERNING THE ADMINISTRATION OF JUSTICE (EX. B, 93D CONG., 1ST SESS.); AND CONVENTION WITH JAPAN FOR THE PROTECTION OF BIRDS AND THEIR ENVIRONMENT (EX. R, 92D CONG., 2D SESS.)

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will proceed to consider and vote on the five treaties.

The Senate, as in Committee of the Whole, proceeded to consider Executive U, 92d Congress, second session, the Consular Convention with Poland, which was read the second time, as follows:

CONSULAR CONVENTION BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF THE POLISH PEOPLE'S REPUBLIC

The Government of the United States of America and the Government of the Polish People's Republic,

Desiring to regulate and develop consular relations between the two States,

Have decided to conclude a Consular Convention, and for that purpose the following Plenipotentiaries have been designated:

For the Government of the United States of America:

WILLIAM P. ROGERS, Secretary of State,
For the Government of the Polish People's Republic:

STEFAN OLSZOWSKI, Minister of Foreign Affairs,

who have agreed as follows:

PART I—DEFINITIONS

ARTICLE 1

For the purposes of the present Convention, the following terms shall have the meanings hereunder assigned to them:

(a) "Consular establishment" means a consulate general, consulate, vice consulate, or consular agency;

(b) "Consular district" means the area assigned to a consular establishment for the exercise of consular functions;

(c) "Head of a consular establishment" means a person directing a consular establishment with the rank of consul general, consul, vice consul, or consular agent;

(d) "Consular officer" means any person, including the head of a consular establishment, to whom the exercise of consular functions has been entrusted;

(e) "Employee of a consular establishment" means any person performing administrative, technical or service duties at a consular establishment;

(f) "Member of a consular establishment" means any consular officer or employee of a consular establishment;

(g) "Premises of a consular establishment" means buildings or part of buildings, as well as the grounds ancillary thereto, used exclusively for the purposes of a consular establishment;

(h) "Archives of a consular establishment" means official correspondence, documents, records, codes, and ciphers, as well as the office equipment assigned exclusively for their protection or safekeeping.

PART II—OPENING OF CONSULAR ESTABLISHMENTS AND APPOINTMENT OF OFFICERS AND EMPLOYEES OF THESE ESTABLISHMENTS

ARTICLE 2

1. A consular establishment may be opened on the territory of the receiving State only with the consent of that State.

2. The sending and receiving States shall determine by agreement the seat of the consular establishment as well as the limits of its consular district.

ARTICLE 3

1. The head of a consular establishment appointed by the sending State may exercise consular functions after presentation of letters of commission or similar instrument and after the issuance to him of an exequatur or other appropriate document of recognition by the receiving State.

2. The receiving State may grant to the head of a consular establishment provisional recognition permitting him to exercise consular functions until such time as the exequatur or other document of recognition has been issued to him.

3. Immediately after the issuance to the head of a consular establishment of an exequatur or one of the documents described in paragraphs 1 and 2, the competent authorities of the receiving State shall take the necessary measures to enable him to exercise his consular functions and to enjoy the rights, privileges, and immunities to which he is entitled.

ARTICLE 4

1. The sending State may, subject to the procedures established by Articles 3, 6 and 7 assign one or more members of its diplomatic mission in the receiving State to the per-

formance of consular functions. Except as provided in paragraph 5 of Article 31, a member of a diplomatic mission who has been so assigned shall continue to enjoy the privileges and immunities to which he is entitled as a member of the diplomatic mission.

2. The sending State may establish within its diplomatic mission a consular section, which may have a consular district in accordance with subparagraph (b) of Article 1 and paragraph 2 of Article 2.

ARTICLE 5

1. If the head of a consular establishment cannot carry out his functions or if the position of head of a consular establishment is vacant, and officer of the same consular establishment or another consular establishment, or a member of the diplomatic staff of the diplomatic mission of the sending State in the receiving State, may exercise his functions temporarily. In this case the fact he has been entrusted with the functions of head of the consular establishment shall be communicated in advance in writing to the foreign affairs ministry of the receiving State.

2. The person designated in paragraph 1 shall enjoy during the period of temporary exercise of the functions of head of the consular establishment the rights, privileges, and immunities of head of the consular establishment. In the event that this person is a member of the diplomatic staff of the diplomatic mission, he shall also enjoy the additional privileges and immunities to which he is entitled as a member of the diplomatic mission, in accordance with paragraph 1 of Article 4.

ARTICLE 6

1. Only nationals of the sending State may be consular officers.

2. Consular officers may be appointed from among the nationals of the sending State admitted to permanent residence in the receiving State only with the consent of the latter.

ARTICLE 7

1. The receiving State shall issue to each consular officer an appropriate document certifying his right to perform consular functions in the territory of the receiving State. For this purpose the sending State shall notify the receiving State in advance of the full name, functions, and class of all consular officers.

2. The sending State shall also notify the receiving State of the full name and duties of the employees of a consular establishment.

3. A consular officer notified to the receiving State in accordance with paragraph 1 shall be entitled to perform his consular functions after the receiving State has issued to him an appropriate document certifying his right to perform his functions.

ARTICLE 8

1. The receiving State may at any time, and without having to explain its decision, notify the sending State through diplomatic channels that a consular officer is persona non grata or that an employee of a consular establishment is unacceptable. In such a case the sending State shall accordingly recall such officer or employee.

2. If the sending State refuses or fails within a reasonable time to carry out its obligations under paragraph 1, the receiving State may refuse to recognize the officer or employee concerned as a member of the consular establishment.

ARTICLE 9

1. The sending State, acting either in its own name or through one or more natural or jurisdictional persons acting on its behalf, shall have the right to acquire under such tenure as may be authorized by the law of the receiving State, whether by purchase,

lease, or otherwise, lands, buildings, parts of buildings, and appurtenances which the sending State considers necessary and appropriate for consular purposes, including residences for members of the consular establishment.

2. The sending State shall have the right:

(a) to construct, reconstruct, or alter buildings and other appurtenances on land held in accordance with the provisions of paragraph 1, subject to compliance with the conditions prescribed by the regulations of the receiving State concerning construction, or concerning space, zoning, or town planning;

(b) to employ, by contract or otherwise, its nationals, or entities organized under its laws, to design, construct, reconstruct, or alter such buildings. The employment of nationals of the receiving State by such entities shall be subject to the law of the receiving State.

PART III—RIGHTS, PRIVILEGES AND IMMUNITIES

ARTICLE 10

1. A shield with the coat-of-arms of the sending State, the name of the consular establishment in the English and Polish languages, and signs explaining the designation of the offices may be placed on buildings in which the offices of the consular establishment are located.

2. The flag of the sending State may be flown at the building in which a consular establishment is located. This flag may also be flown at the residence of the head of a consular establishment and on his means of transportation while being used by him for official purposes.

ARTICLE 11

1. The premises as well as the archives of a consular establishment are inviolable.

2. Authorities of the receiving State shall not enter the premises of a consular establishment or the residences of consular officers without the consent of the head of the consular establishment, the chief of the diplomatic mission of the sending State, or a person duly authorized by one of them to give such consent. Such consent is presumed in the event of a fire or other disaster requiring immediate protective measures. In no case, however, are these authorities permitted to violate the principle of the inviolability of the archives of a consular establishment, and especially to examine or seize them.

3. The premises of a consular establishment and residences of members of the consular establishment located in the same building shall be appropriately set apart from each other.

ARTICLE 12

1. A consular establishment shall have the right to free communication with the authorities of its State, including diplomatic missions or other consular establishments of the sending State, regardless of their location, making use of all public means of communication.

2. A consular establishment may use diplomatic or consular couriers, diplomatic or consular pouches, and may use codes and ciphers.

3. The correspondence of a consular establishment, courier mail and sealed diplomatic or consular pouches bearing visible external marks of their official character, whether sent by the establishment or destined for it, shall be inviolable, and the authorities of the receiving State shall not examine or detain them. Nevertheless, if the competent authorities of the receiving State have serious reason to believe that a pouch has contents other than correspondence, documents, or articles of an official character designated exclusively for official use, they may request that such pouch be opened in their presence by an authorized representative of the sending State. If this request is refused, the pouch shall be returned to its place of origin.

ARTICLE 13

1. Consular officers and members of their families forming part of their households shall enjoy immunity from the jurisdiction of the judicial and administrative authorities of the receiving State.

2. Employees of a consular establishment shall enjoy immunity from the jurisdiction of the judicial and administrative authorities of the receiving State in respect of acts performed by them within the scope of their official duties.

3. The provisions of paragraphs 1 and 2 shall not, however, apply in respect of civil action:

(a) arising out of a contract concluded by a consular officer or an employee of a consular establishment in which he did not contract expressly or impliedly as an agent of the sending State;

(b) by a third party for damage arising from an accident in the receiving State caused by a vehicle, vessel or aircraft;

(c) arising out of acts performed under Article 31 as provided in paragraph 5 of that Article.

4. Persons mentioned in paragraphs 1 and 2 shall not, however, abuse the immunities enjoyed by them, and are expected to respect the laws and regulations prevailing in the receiving State, including traffic regulations.

5. The sending State may waive the immunities described in this Article. Such waiver shall always be expressed and transmitted in writing to the receiving State.

6. Waiver of immunity from jurisdiction in respect of civil and administrative proceedings shall not be held to imply waiver of immunity in respect of the execution of the judgment, for which a separate waiver shall be necessary.

ARTICLE 14

1. Members of a consular establishment may be called upon to attend as witnesses in the course of judicial or administrative proceedings. In the event of the refusal of a consular officer to give evidence at such proceedings, no coercive measure or penalty may be applied to him. An employee of a consular establishment shall not, however, decline to give evidence, except in the cases mentioned in paragraph 3.

2. The respective provisions of paragraph 1 concerning consular officers and employees of a consular establishment shall apply also to members of their families forming part of their households.

3. Members of a consular establishment are under no obligation to give evidence concerning matters connected with the exercise of their functions or to produce official correspondence or documents related thereto. They are also entitled to decline to give evidence as expert witnesses with regard to the law of the sending State. These rights shall not be invoked if the interest of justice so requires and the interests of the sending State are not affected.

4. The authorities of the receiving State, in taking the testimony of a member of a consular establishment, shall take all appropriate measures to avoid hindering his performance of official duties. Upon the request of the head of a consular establishment such testimony may, when possible, be given orally or in writing at the consular establishment or at the residence of the person concerned.

ARTICLE 15

1. Members of a consular establishment and members of their families forming part of their households shall not be subject in the receiving State to military service, to the duty of appearing as a member of a jury or lay judge, or in any other capacity of a compulsory nature, including the obligation to pay any equivalent fees for the nonperformance of such duties.

2. Members of a consular establishment, as well as members of their families forming

part of their households shall not be subject to the regulations of the receiving State regarding registration, reports, permits for alien residence, or any such regulations normally relating to aliens.

ARTICLE 16

1. The sending State shall have the right to import into the receiving State materials or equipment for the construction, reconstruction, alteration, repair, maintenance, and operation of the premises, buildings, and appurtenances referred to in Article 9.

2. All articles, including means of transportation, which are imported by the sending State for the use of a consular establishment or are necessary for the construction, reconstruction, alteration, repair, maintenance and operation of buildings or other structures held or occupied by a consular establishment in accordance with Article 9, shall be exempt on the territory of the receiving State from all customs duties and taxes or other taxes imposed by reason of importation.

ARTICLE 17

1. The baggage, effects, and other articles including means of transportation, imported exclusively for the personal use of a member of a consular establishment and members of his family forming part of his household, shall be exempt from all customs duties and taxes, or other taxes resulting from importation.

2. The exemptions defined in paragraph 1 shall be recognized with regard to property imported by a person authorized thereunder at his first entry and subsequent entries into the receiving State, as well as with regard to that property consigned to a member of a consular establishment while he is performing his consular functions or other defined duties at said establishment. However, this shall not apply to articles the importation of which is expressly forbidden by law. The receiving State may limit the number of automobiles imported free of duty by members of a consular establishment for their and their families' personal use.

3. It is understood, however, that

(a) This Article shall, except with respect to accompanying baggage at first entry, apply as to members of a consular establishment only when their names have been communicated to the foreign affairs ministry of the receiving State and they have been duly recognized in their official capacity; and

(b) in the case of consignments, the receiving State may, as a condition to the granting of exemption, require that a notification of any such consignment be given in a prescribed manner.

ARTICLE 18

1. The sending State shall be exempt from all taxes, assessments, or similar charges levied for public purposes, for the payment of which it would otherwise be legally liable in the territory of the receiving State, with respect to:

(a) the acquisition, sale, construction, and maintenance of immovable property of which the sending State is the legal owner or which is owned by one or more natural or juridical persons acting on its behalf when such property is used for the consular purposes specified in paragraph 1 of Article 9, or when such property has been acquired for such purposes and is not being used for other purposes;

(b) the occupation of immovable property of which the sending State is the lessee;

(c) the acquisition, sale and maintenance of movable property by the sending State which is used for consular purposes;

(d) the performance of consular functions, including the collection of consular fees and charges in accordance with the provisions of Article 37.

2. If the law of the receiving State does not authorize the sending State to acquire

immovable property for consular purposes, including residences, as the legal owners in its own name or in the name of one or more natural or juridical persons acting on its behalf, the exemption provided in subparagraph (a) of paragraph 1 shall apply to immovable property transferred to the sending State for perpetual use, or leased or rented for a stated period of at least ten years.

3. The exemptions specified in subparagraph (a) of paragraph 1 and in paragraph 2 shall not apply to taxes, assessments, or similar charges levied for specific services or for local public improvements by which the property is specially benefited.

ARTICLE 19

Movable property left upon the death of a member of a consular establishment or member of his family forming part of his household shall be exempt from taxes of any kind, such as state, inheritance, succession, or similar taxes, if the property was located in the receiving State, exclusively in connection with the sojourn in that State of the deceased as a member of a consular establishment or member of his family forming part of his household. Any part of such movable property which does not exceed in value twice the total of all official income received from the sending State in the year immediately preceding the death shall be deemed conclusively to constitute property located in the receiving State exclusively in connection with the decedent's sojourn there as a member of the consular establishment or a member of his family forming part of his household.

ARTICLE 20

1. The members of a consular establishment, as well as members of their families forming part of their households, shall, except as provided in paragraph 2, be exempt from the payment of all taxes or similar charges of any kind imposed by the receiving State or any local authorities thereof for the payment of which the officer or employee would otherwise be legally liable.

2. Exemption from taxes or similar charges may not be applied to taxes and charges imposed:

(a) by reason of or incident to the acquisition as the result of death of rights to property located in the receiving State, such as estate, inheritance, or succession taxes, with the exception specified in Article 19;

(b) by reason of or incident to the transfer in the form of a gift of property located in the receiving State;

(c) incident to the ownership or acquisition by purchase by members of a consular establishment or members of their families forming part of their households of real property situated in the receiving State, if they are acting in their own name and not in that of a consular establishment;

(d) for specific services rendered;

(e) on income derived in the receiving State from sources other than emoluments, salaries, wages, or allowances received from the sending State in connection with the discharge of official functions or duties.

ARTICLE 21

The privileges and immunities recognized by paragraphs 1 and 2 of Article 13, paragraphs 1, 2, and 4 of Article 14, Articles 15, 17, 19 and paragraph 1 of Article 20 shall not be enjoyed by members of a consular establishment and members of their families forming part of their households if they are nationals of the receiving State or have the status in the receiving State of an alien admitted to permanent residence. However, all members of a consular establishment shall enjoy the rights described by the provisions of paragraph 3 of Article 14.

ARTICLE 22

1. All means of transportation belonging to the sending State, to members of a consular

establishment, or to members of their families forming part of their households, and used for the needs of a consular establishment or of the persons mentioned above, shall be properly insured against civil claims by third parties.

2. The provisions of paragraph 1 shall not apply to members of a consular establishment and members of their families forming part of their households who are nationals of the receiving State or have the status in the receiving State of an alien admitted to permanent residence, who will be subject to the obligation of insuring their private means of transportation in accordance with the regulations of that State.

PART IV—CONSULAR FUNCTIONS

ARTICLE 23

1. To the extent that it is permitted by international law, a consular officer shall be entitled within his consular district, in accordance with the laws and regulations of the receiving State, to protect the rights and interests of the sending State, and of its nationals, both individuals and bodies corporate. To this end, he may address himself to the courts and other authorities of the receiving State in the consular district, and, if the receiving State does not object, to its central authorities.

2. A consular officer may, subject to the practice and procedures obtaining in the receiving State, represent or arrange appropriate representation for nationals of the sending State before the courts and other authorities or official persons of the receiving State for the purpose of obtaining, in accordance with the laws and regulations of the receiving State, the protection of the rights and interests of these nationals, if because of absence or any other reason they are not in a position at the proper time to assume the defense of their rights and interests.

ARTICLE 24

* A consular officer shall be permitted to cooperate in the development of economic, commercial, cultural, and scientific relations between both States as well as in furthering by other means friendly relations between them.

ARTICLE 25

A consular officer shall have the right to carry out the following functions within his consular district in accordance with the laws of the sending State:

(a) to register nationals of the sending State, to issue or amend their passports and other travel documents, and also to issue visas to persons desiring to travel to the sending State;

(b) to receive declarations from nationals of the sending State and to issue them appropriate certificates and documents based thereon;

(c) to prepare documents of vital statistics pertaining to births and deaths of nationals of the sending State, as well as receive statements concerning marriages in cases where both persons to marry are nationals of the sending State; however, this does not relieve the nationals of the sending State of the obligation to observe the laws and regulations of the receiving State concerning reporting or registering of births and deaths, and the performance of marriage;

(d) to authenticate the official signature and seal which appear on any legal act or other official documents drawn up before a notary or other officer of the receiving State or which appear on a copy or extract taken from any vital records books or other official records of the receiving State, with a view to making the document, when presented for any purpose, acceptable in administrative or judicial proceedings in the sending State;

(e) to prepare acts or documents of a legal nature, including commercial documents, wills and contracts, as well as to certify and

authenticate signatures on them, to receive acknowledgements, and in general to take such action as may be necessary to render them valid, when a national of the sending State requests the performance of these activities and when these acts and documents are to be used outside of the territory of the receiving State, or when requested by any other person when these documents are to be used in the territory of the sending State, provided that these activities are not contrary to the law of the receiving State;

(f) to issue certified copies of documents and extracts thereof from the archives and registers of the consular establishments;

(g) to translate any acts and documents and to certify to the accuracy of such translation;

(h) to receive from national of the sending State on a voluntary basis testimony or statements requested by courts and other authorities of that State, as well as receive from such nationals oaths or affirmations in accordance with the applicable law of the sending State;

(i) to deliver to nationals of the sending State any official documents from authorities of the sending State.

ARTICLE 26

1. Copies of the acts and documents mentioned under subparagraphs (d) and (e) of Article 25, duly authenticated or certified by the consular officer under official seal, shall be admitted in judicial and administrative proceedings in both the sending and receiving State, equally with the originals, and shall have the same force and effect as though they had been prepared or issued by or executed before a notary public or other public official of the receiving State.

2. All acts and documents prepared by courts and other authorities or officials of the receiving State properly authenticated in the territory of that State by a consular officer of the sending State shall have, in judicial and administrative proceedings in the sending State, the same force and effect as acts and documents prepared by the courts and other authorities or officials of the sending State provided such acts and documents have been drawn and executed in a manner not inconsistent with the laws and regulations of the sending State.

ARTICLE 27

1. A consular officer is authorized to transmit, upon request by a court of the sending State, letters rogatory to the authorities of the receiving State competent to act thereon.

2. A consular officer is authorized to receive voluntary testimony of citizens of the sending State, for use in that State.

ARTICLE 28

A consular officer, acting ex officio or on behalf of persons having a legitimate interest in the matter, may propose to the courts or other competent authorities of the receiving State appropriate persons to act as guardians or trustees for nationals of the sending State or to act as custodians of the property of such nationals when it is left without supervision.

ARTICLE 29

1. A consular officer shall have the right within his consular district to confer with any national of the sending State, to give him assistance or advice, and where necessary to arrange for legal assistance for him. If a national of the sending State desires to visit or communicate with his consular officer, the receiving State shall in no way restrict the access of the national to the consular establishments of the sending State or object to visits to such national by a consular officer of the sending State.

2. The appropriate authorities of the receiving State shall immediately inform a consular officer of the sending State of the detention or arrest of any national of the send-

ing State who has not yet been admitted to permanent residence in the receiving State. In the case of the detention or arrest of a national of the sending State who has been admitted to permanent residence in the receiving State, the appropriate authorities of the receiving State, on the request of such national, shall immediately inform a consular officer of the sending State of such detention or arrest.

3. The receiving State shall forward without delay any correspondence from a national of the sending State detained or arrested in the receiving State addressed to a consular officer of the sending State. A consular officer shall upon his request be informed of the reasons for the detention or arrest of any national of the sending State. A consular officer may visit such national at any time and may communicate in writing with him in the language of the sending State or of the receiving State for the purpose of safeguarding his interests, with the observance, however, of the laws and regulations of the receiving State.

4. In case of a trial of a national of the sending State in the receiving State, the appropriate authorities of the receiving State shall, at the request of the consular officer, inform such officer of the charges against such national, and shall permit the consular officer to be present during the trial of such national, with the observance, however, of the laws and regulations of the receiving State.

5. A consular officer of the sending State shall have the right, subject to local prison regulations, to visit and communicate with a national of the sending State who is serving a sentence of imprisonment in the receiving State.

6. The rights of visiting and communicating provided in paragraphs 2, 3 and 5 shall be exercised in conformity with the laws and regulations of the receiving State, including prison regulations; provided, however, that the application of those laws and regulations shall not prevent a consular officer from visiting his national without delay, communicating freely with him, and obtaining information of the charges against him.

7. The provisions of paragraphs 1, 2 and 3 have appropriate application also to any person employed on a vessel or aircraft of the sending State who is not a national of, or who has not been admitted to permanent residence in, the receiving State.

ARTICLE 30

Whenever the appropriate local authorities of the receiving State learn of the death in the receiving State of a national of the sending State, they shall without delay so inform a consular officer of the sending State. The consular officer shall be entitled, upon his request and for consular purposes, to receive from the appropriate authorities of the receiving State a copy of the certificate of death of such national.

ARTICLE 31

1. Whenever the appropriate local authorities of the receiving State learn of the opening of an estate resulting from death in the receiving State of a national of the sending State who leaves in the receiving State no known heir or testamentary executor, they shall as promptly as possible so inform a consular officer of the sending State.

2. Whenever the appropriate local authorities of the receiving State learn of the death of a person, regardless of nationality, who has left in the receiving State an estate in which a national of the sending State residing outside the receiving State may have an interest under the will of the decedent or otherwise in accordance with the laws of the receiving State, they shall as promptly as possible so inform a consular officer of the sending State.

3. A consular officer of the sending State shall have the right, directly or through his

representative, to protect the interests of a national of the sending State who is not a resident of the receiving State and who is not otherwise represented. In such circumstances the consular officer shall be permitted, in accordance with applicable laws and regulations, to request local authorities to supply information concerning holdings or interests of any such national especially shares in estates, pension rights, insurance or employees' compensation benefits.

4. A consular officer of the sending State shall be entitled to receive for transmission to a national of the sending State who is not a resident of the receiving State any money or other property to which such national is entitled as a consequence of the death of another person, including shares in an estate, payments made pursuant to employees' compensation laws, pension and social benefits systems in general, and proceeds of insurance policies, unless the court, agency, or person making distribution directs that transmission be effected in a different manner. The court, agency, or person making distribution may require that a consular officer comply with conditions laid down with regard to:

(a) presenting a power of attorney or other authorization from such national residing outside the receiving State;

(b) furnishing reasonable evidence of the receipt of such money or other property by such national; and

(c) returning the money or other property in the event he is unable to furnish such evidence.

5. Whenever a consular officer receives any money or other property for transmission to a national of the sending State pursuant to paragraph 4, he shall be subject, with respect to such function, to the laws and to the civil jurisdiction of the authorities of the receiving State in the same manner and the same extent as a national of the receiving State.

ARTICLE 32

1. A consular officer shall be entitled to give assistance to vessels under the flag of the sending State, as well as to their crews, and he may address himself for this purpose to the authorities of the receiving State. A consular officer may, where stipulated by the laws of the sending State, enjoy the right of supervision and inspection of vessels under the flag of that State and their crews, and he may take all measures to assure observance of the laws of the sending State with regard to navigation. For this purpose he may visit vessels and be visited by the masters and crews of vessels of the sending State.

2. Without prejudice to the right of the courts or other authorities of the receiving State to assume jurisdiction over crimes or offenses which disturb the peace or security of the port and to enforce the laws of the receiving State, all measures taken by a consular officer in accordance with the laws of the sending State concerning vessels under the flag of that State and their crews, including the signing on and discharge of the master and members of the crew, as well as the settlement of disputes of all kinds between the master and members of the crew, shall be respected by the authorities of the receiving State. For the execution of such functions, the consular officer may request assistance from competent authorities of the receiving State.

ARTICLE 33

1. If it is the intention of the authorities of the receiving State to arrest or otherwise detain in custody any person on board a vessel under the flag of the sending State who is not a national of the receiving State, including the master or crew member thereof, or to seize any property aboard such a vessel, these authorities, except in cases where it is impossible in practice because of ur-

gency, shall inform a consular officer in time to accord him an opportunity to visit the vessel before these measures are carried out. If it shall be impossible in practice to inform a consular officer in advance, the authorities of the receiving State shall inform him as soon as possible, according him full opportunity to visit and communicate with the arrested or detained person and to take appropriate steps to safeguard the interests of such person or vessel.

2. The provisions of paragraph 1 shall not apply to passport, customs, and health inspection, nor to measures taken by the authorities of the receiving State at the request of the master or with his permission.

ARTICLE 34

1. If a vessel under the flag of the sending State is wrecked or damaged in the territory of the receiving State, or if the continuation of its voyage shall in any way be rendered impossible, the authorities of the receiving State shall inform a consular officer immediately and shall take all practical measures for the preservation and protection of the vessel as well as the persons, cargo and property on board.

2. If the person who represents the interests of a vessel described in paragraph 1 is unable to make necessary arrangements in connection with the vessel or its cargo, a consular officer may make arrangements on his behalf. A consular officer may under similar circumstances take appropriate steps with regard to cargo and other property owned by the sending State or the nationals thereof, which belongs to a wrecked or damaged vessel of other registry, except when the vessel is under the flag of the receiving State.

3. No customs duties shall be levied against a damaged vessel under the flag of the sending State or its cargo or stores unless they are delivered for use in the receiving State.

ARTICLE 35

1. The term "vessel" as used in Articles 32, 33, and 34, means all types of vessels authorized to fly the flag of the sending State, with the exception of warships.

2. The provisions of Articles 32, 33, and 34 shall also apply in relation to civil aircraft and civil aviation to the extent that they are capable of such application.

ARTICLE 36

A consular officer shall be permitted to perform all other consular functions entrusted to him by the sending State, as long as their performance is not contrary to the laws of the receiving State.

ARTICLE 37

A consular establishment may levy in the territory of the receiving State the fees and charges provided by the laws and regulations of the sending State for consular acts.

PART V—FINAL PROVISIONS

ARTICLE 38

1. The present Convention shall be ratified and shall enter into force on the thirtieth day following the date of the exchange of instruments of ratification, which shall take place at Washington as soon as possible.

2. The present Convention shall remain in force until six months from the date on which one of the Contracting Parties gives notice of termination of the Convention in writing to the other Contracting Party.

IN WITNESS WHEREOF the respective Plenipotentiaries have signed the present Convention and have affixed thereto their seals.

DONE in Warsaw on May 31, 1972, in two copies, each in the English and Polish languages, both texts having the same force.

FIRST PROTOCOL TO THE CONSULAR CONVENTION BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF THE POLISH PEOPLE'S REPUBLIC

At the time of signing of the Consular Convention of this day between the Government of the United States of America and the Government of the Polish People's Republic, the undersigned Plenipotentiaries, duly authorized, have further agreed on the following provisions:

Without derogation of such additional rights and benefits as the sending State may be entitled with respect to its diplomatic and other official property on the territory of the receiving State, the provisions of Articles 9, 16, and 18 of the Consular Convention shall apply likewise with respect to movable and immovable property, including residences, owned or likewise held by the sending State and used for:

(a) diplomatic purposes, including those of permanent missions to international organizations; and

(b) for information and cultural activities not conducted within diplomatic missions or consular establishments.

The present Protocol constitutes an integral part of the aforesaid Consular Convention between the Government of the United States of America and the Government of the Polish People's Republic.

DONE in Warsaw on May 31, 1972, in two copies, each in the English and Polish languages, both texts being equally authentic.

SECOND PROTOCOL TO THE CONSULAR CONVENTION BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF THE POLISH PEOPLE'S REPUBLIC

At the time of signing of the Consular Convention of this day between the Government of the United States of America and the Government of the Polish People's Republic, the undersigned Plenipotentiaries, duly authorized, have further agreed on the following provisions:

1. It is agreed between the Contracting Parties that the notification to a consular officer of the detention or arrest of a national of the sending State not admitted to permanent residence in the receiving State, specified in Paragraph 2 of Article 29 of the Consular Convention, shall take place within three days from the time of detention or arrest.

2. It is agreed between the Contracting Parties that the notification to a consular officer of the detention or arrest of a national of the sending State admitted to permanent residence in the receiving State, specified in Paragraph 2 of Article 29 of the Consular Convention, shall take place within three days from the time of the request of such national that the consular officer be notified.

3. It is agreed between the Contracting Parties that the right to visit, specified in Paragraph 3 of Article 29 of the Consular Convention, shall be accorded to the consular officer within four days from the time of detention or arrest of any national of the sending State.

The present Protocol constitutes an integral part of the aforesaid Consular Convention between the Government of the United States of America and the Government of the Polish People's Republic.

DONE in Warsaw on May 31, 1972, in two copies, each in the English and Polish language, both texts equally authentic.

EXCHANGE OF NOTES CONCERNING POLISH CITIZENSHIP LAW AND PROCEDURAL PRACTICE No. 37.

The Embassy of the United States of America refers to the talks held between representatives of the Embassy and representatives of the Ministry of Foreign Affairs of the Polish People's Republic on the subject of reducing the possibilities of misunderstanding in the application of the citizenship laws of both countries, and has the honor to request that factual data related to the basic provisions of the citizenship law be conveyed and that points of procedural practice be explained.

1. In particular, the Embassy requests information concerning the formalities related to obtaining Polish recognition of loss of the citizenship of the Polish People's Republic by persons who have been naturalized abroad. The basic elements of this explanation of the Polish practice should contain information on the procedure to be followed by naturalized United States citizens to renounce nationality of the Polish People's Republic or obtain recognition of United States citizenship at Polish consular posts abroad, on the period normally required to complete these procedures, and the time at which loss of citizenship of the Polish People's Republic or recognition of the United States citizenship takes legal effect in Poland.

2. The Embassy also requests information concerning Polish interpretation of citizenship status during the temporary or permanent residence in Poland of persons mentioned in paragraph 1. It would also be helpful to have information about the types of identification documents issued to aliens residing in Poland who possess foreign passports and to aliens residing in Poland who do not possess foreign documentation, as distinguished from the documentation issued to citizens of the Polish People's Republic.

The Embassy also requests confirmation of its understanding that naturalized United States citizens whose United States citizenship has been legally recognized by the Polish authorities may reacquire the citizenship of the Polish People's Republic only through application for citizenship and official acceptance of this application by the appropriate Polish authorities.

The Embassy avails itself of this opportunity to renew to the Ministry of Foreign Affairs the assurances of its high consideration.

WARSAW, May 31, 1972.

(Translation)

Nr D.Kons.II.213/16/72.

The Ministry of Foreign Affairs of the Polish People's Republic presents its compliments to the Embassy of the United States of America and in reply to note No. 37, of May 31, 1972, has the honor to convey the following information:

1. According to Article 13 of the Law of February 15, 1962 concerning Polish citizenship/Dziennik Ustaw No. 10, poz. 49/ a Polish citizen may acquire foreign citizenship only by obtaining permission to change citizenship, issued by the appropriate Polish authorities. According to paragraph 1 Article 16 of that Law the appropriate authority is the Council of State. However, in regard to persons who reside abroad, the Council of State, on the basis of paragraph 3 of the cited Article, authorized the Minister of For-

Foreign Affairs to grant permission to change citizenship, and also concurred in the transfer of this authorization by the Minister of Foreign Affairs to some Heads of Consular Posts, including the Head of the Consular Division of the Embassy of the Polish People's Republic in Washington, D.C., as well as the Consul General of the Polish People's Republic in Chicago, in regard to persons who already acquired foreign citizenship.

In these circumstances, the Polish citizen residing in the United States and holding citizenship of that State acquired through naturalization, may apply for permission to change Polish citizenship to United States citizenship by submitting appropriate application to the Head of the territorially proper Consular Post of the Polish People's Republic in the United States of America. Such application should be personally signed by the person in question, should contain the main elements of his curriculum vitae, and should give reasons for changing citizenship.

Practically, in a substantial majority of the cases involving persons who besides their Polish citizenship hold also United States citizenship, this procedure is simplified and the decision is taken by the Head of a Consular Post within the period of two to three weeks. In the remaining cases, which are not numerous, this procedure may last longer due to the necessity to submit the matter to the Minister of Foreign Affairs. In any case the loss of citizenship of the Polish People's Republic in regard to the above mentioned persons takes place on the day of issuance of the decision on permission to change citizenship of the Polish People's Republic to citizenship of the United States of America. From that date the Polish authorities consider the person in question as a foreign citizen only.

Polish citizens who acquired a foreign citizenship during the period of validity of the Law on citizenship of the Polish State of January 20, 1920, that is to say, until January 18, 1951, automatically lost Polish citizenship upon acquisition of the foreign citizenship except in the circumstances described in that law and other provisions related to it.

2. Persons who were permitted to change the citizenship of the Polish People's Republic to the citizenship of the United States of America, in accordance with the procedure described in paragraph 1, are considered as aliens holding exclusively the citizenship of the United States of America during their temporary or permanent residence in Poland. The Polish authorities issue to such persons having permanent residence in Poland special documents called "cards of permanent residence". Naturalized United States citizens who were permitted to change the citizenship of the Polish People's Republic to the citizenship of the United States of America may reacquire the citizenship of the Polish People's Republic only and exclusively by submitting to the Council of State of the Polish People's Republic individual applications for granting citizenship of the Polish People's Republic as provided by Article 8 of the Law of February 15, 1962 concerning Polish citizenship/Dziennik Ustaw No. 10, poz. 49/. Such applications should be sent through the intermediary of the praesidia of people's councils on the county (powiat) level.

The Ministry of Foreign Affairs avails itself of this opportunity to renew to the Embassy of the United States of America the assurances of its high consideration.

WARSAW, May 31, 1972.

CXIX—604—Part 8

EXCHANGE OF NOTES CONCERNING PERSONS ENTERING THE POLISH PEOPLE'S REPUBLIC OR THE UNITED STATES OF AMERICA FOR TEMPORARY VISITS

EMBASSY OF THE UNITED STATES OF AMERICA,

Warsaw, May 31, 1972.

Note No. 38.

His Excellency ROMUALD SPASOWSKI, Vice Minister of Foreign Affairs, Warsaw.

EXCELLENCY: With reference to the signature today of the Consular Convention between the Government of the United States of America and the Government of the Polish People's Republic, I have the honor to confirm that both Parties have agreed to the following provisions:

1. Persons entering the Polish People's Republic for temporary visits on the basis of United States passports containing Polish entry visas will, in the period for which temporary visitor status has been accorded (in conformity with the visa's validity), be considered United States citizens by the appropriate Polish authorities for the purpose of ensuring the consular protection provided for in Article 29 of the Convention and the right of departure without further documentation, regardless of whether they may possess the citizenship of the Polish People's Republic.

2. Persons entering the United States of America for temporary visits on the passports of the Polish People's Republic containing United States entry visas will, in the period for which temporary visitor status has been accorded, be considered Polish citizens by the appropriate authorities of the United States of America for the purpose of ensuring the consular protection provided for in Article 29 of the Convention and the right of departure without further documentation, regardless of whether they may possess the citizenship of the United States of America.

3. Persons mentioned in paragraphs 1 and 2 do not lose the right to consular protection and the right of departure without further documentation if the period for which temporary visitor status has been accorded to these persons expired during judicial or administrative proceedings which prevented their voluntary departure.

I avail myself of this opportunity to renew to Your Excellency the assurances of my high consideration.

WALTER J. STOESEL, Jr.

(Translation)

Warsaw, May 31, 1972.

Mr. D. KONS. II/213/15/7.

His Excellency WALTER J. STOESEL, Jr., Ambassador Extraordinary and Plenipotentiary of the United States of America, Warsaw.

EXCELLENCY: With reference to the signature today of the Consular Convention between the Government of the Polish People's Republic and the Government of the United States of America, I have the honor to confirm that both Parties have agreed to the following provisions:

1. Persons entering the Polish People's Republic for temporary visits on the basis of United States passports containing Polish entry visas will, in the period for which temporary visitor status has been accorded (in conformity with the visa's validity), be considered United States citizens by the appropriate Polish authorities for the purpose of ensuring the consular protection provided for in Article 29 of the Convention and the right of departure without further documentation, regardless of whether they may possess

the citizenship of the Polish People's Republic.

2. Persons entering the United States of America for temporary visits on the passports of the Polish People's Republic containing United States entry visas will, in the period for which temporary visitor status has been accorded be considered Polish citizens by the appropriate authorities of the United States of America for the purpose of ensuring the consular protection provided for in Article 29 of the Convention and the right of departure without further documentation, regardless of whether they may possess the citizenship of the United States of America.

3. Persons mentioned in paragraphs 1 and 2 do not lose the right to consular protection and the right of departure without further documentation if the period for which temporary visitor status has been accorded to these persons expired during judicial or administrative proceedings which prevented their voluntary departure.

I avail myself of this opportunity to renew to Your Excellency the assurances of my high consideration.

(Signed) R. SPASOWSKI.

The Senate, as in Committee of the Whole, proceeded to consider Executive V, 92d Congress, 2d session, the Consular Convention with Romania, which was read the second time, as follows:

CONSULAR CONVENTION BETWEEN THE UNITED STATES OF AMERICA AND THE SOCIALIST REPUBLIC OF ROMANIA

The United States of America and the Socialist Republic of Romania, desirous of regulating consular relations between the two countries and of thus contributing to the development of their relations of friendship on the basis of respect for the principles of sovereignty and national independence, non-interference in internal affairs, equality in rights, and reciprocal advantage, have decided to conclude a consular convention and for that purpose have appointed their plenipotentiaries:

The President of the United States of America;

Mr. William P. Rogers, Secretary of State

The President of the Council of State of the Socialist Republic of Romania:

Mr. Corneliu Manescu, Minister of Foreign Affairs who, having communicated to each other their full powers, found to be in good and due form, have agreed as follows:

ARTICLE 1. DEFINITIONS

For the purpose of this Convention, the terms introduced hereunder shall have the following meaning:

(a) "consular establishment" means any consulate general, consulate, vice consulate or consular agency;

(b) "consular district" means the territory assigned to a consular establishment for the exercise of consular functions;

(c) "the head of the consular establishment" means the consul general, consul, vice consul, or consular agent directing the consular establishment;

(d) "consular officer" means any person authorized to perform consular functions, including the head of the consular establishment;

(e) "consular employee" means any person employed in administrative, technical, or service functions of the consular establishment;

(f) "consular premises" means the buildings or parts of buildings and the land ancillary thereto which are used exclusively for the purposes of the consular establishment;

(g) "members of the family" means the spouse, minor children and other relatives of a consular officer or consular employee, who form part of his household;

(h) "vessel" means any ship flying the flag of the sending state except warships;

(i) "law" means the laws, decrees, regulations, ordinances and similar provisions having the force of law.

ARTICLE 2. ESTABLISHMENT OF CONSULAR POSTS

1. Either High Contracting Party may, under the present Convention, establish consular establishments in the territory of the other High Contracting Party; the establishment of a consular establishment shall, in each case, be subject to the consent of the receiving state.

2. The location in which a consular establishment will be established, its classification, and the area of the consular district, as well as any subsequent change thereof, shall be fixed by agreement between the sending state and the receiving state.

ARTICLE 3. HEADS OF CONSULAR ESTABLISHMENTS

1. Before the head of a consular establishment is appointed, the sending state shall, through diplomatic channels, obtain the consent of the receiving state for that person.

2. The sending state shall, through diplomatic channels, transmit the consular commission of the head of the consular establishment to the receiving state.

3. The consular commission shall include the full name of the head of the consular establishment, his class, the consular district, and the location and classification of the consular establishment concerned.

4. The head of a consular establishment shall enter upon the exercise of his consular functions only after receipt of an exequatur or other authorization of the receiving state.

5. The receiving state may grant the head of the consular establishment provisional recognition to exercise his consular functions pending the receipt of his exequatur or other authorization.

ARTICLE 4. ACTING CHIEFS

1. In the event the head of a consular establishment is unable to exercise his functions or if the position is vacant, the consular establishment may be placed under the temporary charge of a consular officer of the consular establishment concerned, of another consular establishment of the sending state located in the territory of the receiving state, or of a member of the diplomatic staff of the diplomatic mission of the sending state to the receiving state. The receiving state shall be notified in advance of the full name of the person appointed as acting head.

2. While the acting head is in charge of the consular establishment, the provisions of the present Convention shall apply to him on the same basis as to the head of the consular establishment concerned.

ARTICLE 5. CONSULAR OFFICERS AND CONSULAR EMPLOYEES

1. The sending state may staff its consular establishments with the number of consular officers and consular employees it considers necessary. The receiving state, however, may request that the number of such officers and employees be kept within limits considered by it to be reasonable and normal, having regard to existing circumstances and conditions in the consular district and to the needs of the particular consular establishment.

2. The sending state shall communicate in advance to the receiving state the full name and class of each consular officer other than the head of the consular establishment, as well as the full names and the duties of the consular employees.

3. Consular officers must be nationals of the sending state and must not have been admitted for permanent residence in the receiving state. However, nationals of the sending state, who, in accordance with the

law of the receiving state, are also nationals of the latter, may be appointed as consular officers only with the consent of the receiving state.

4. Consular officers and consular employees who are nationals of the sending state may not carry on any other profession or undertake any activity for personal profit on the territory of the receiving state.

5. The receiving state shall, upon request, issue for each consular officer a document attesting to his consular capacity.

ARTICLE 6. PROCEDURES FOR TERMINATING THE ACTIVITIES OF CONSULAR OFFICERS AND CONSULAR EMPLOYEES

1. The receiving state may at any time, and without having to explain its decision, notify the sending state through diplomatic channels that a consular officer in *persona non grata* or that a consular employee is unacceptable. In such case, the sending state shall recall the consular officer or terminate the activities of the consular employee.

2. If the sending state refuses to fulfill this obligation within a reasonable period of time, the receiving state may, in the case of the head of the consular establishment, withdraw his exequatur or other authorization, or, in the case of another consular officer or of a consular employee, pursuant to notification to the sending state through diplomatic channels of the decision taken, cease to recognize that person in such a capacity.

ARTICLE 7. THE EXERCISE OF CONSULAR FUNCTIONS

1. Consular functions are exercised for the protection of the rights and interests of the sending state and of its nationals in relations with the receiving state, for the development of commercial, economic, cultural and scientific relations, and for furthering any other type of friendly relations between the two states.

2. Consular functions shall be exercised by consular officers of the sending state; they may also be exercised by members of the diplomatic staff of the diplomatic mission of the sending state in the receiving state. The full names of the members of the diplomatic staff who will perform consular functions shall be notified in advance to the receiving state. Except as otherwise provided in this Convention, members of the diplomatic staff of the sending state who have been notified to the receiving state as performing consular functions shall continue to enjoy their diplomatic privileges and immunities.

3. Consular functions are exercised within the limits of the consular district. The exercise of consular functions outside the consular district will be done only with the prior consent of the receiving state.

ARTICLE 8. FUNCTIONS RELATING TO RECORDS, REPRESENTATION OF NATIONALS, AND THE ISSUANCE OF VISAS

Consular officers have the right to:

(a) keep a register of nationals of the sending state who are domiciled in or are residents of their consular district;

(b) issue and amend passports and other travel documents to nationals of the sending state and visas to persons who wish to travel in the sending state;

(c) assure representation for nationals of the sending state before the judicial and other authorities of the receiving state, for the purpose of obtaining provisional measures for the preservation of the rights and interests of such nationals, to the extent that this is consistent with the law of the receiving state;

(d) request and receive copies of or extracts from documents of public registry;

(e) inquire of local authorities on behalf

of a national of the sending state concerning his welfare, property, or other interests.

ARTICLE 9. TRANSMITTAL AND RECEIPT OF DOCUMENTS

1. Consular officers have the right to serve, in a manner not inconsistent with the law of the receiving state, upon nationals of the sending state who are on the territory of the receiving state, official documents which are from authorities of the sending state.

2. Consular officers shall have the right to receive on a voluntary basis from nationals of the sending state declaration intended for judicial or administrative procedure in the sending state in accordance with international agreements in force or, in the absence of such international agreements, in any other manner compatible with the law of the receiving state.

ARTICLE 10. NOTABLE FUNCTIONS

1. Consular officers shall be entitled, upon request, to act as notary and in capacities of a similar kind, and to perform certain functions of an administrative nature, provided that there is nothing contrary thereto in the law of the receiving state.

2. The acts and documents resulting from the exercise of the functions described in paragraph 1 of this Article shall have in the receiving state the same force and effect as though they were done, authenticated, or certified by the competent authorities of the receiving state, provided that there is nothing contrary thereto in the law of the receiving state.

ARTICLE 11. FUNCTIONS RELATING TO VITAL STATISTICS

Consular officers are entitled to keep a register of births and deaths of nationals of the sending state and to issue certificates relating thereto. However, the provisions of this Article do not exempt any person from the obligations he may have under the law of the receiving state to notify the authorities of that state concerning births and deaths.

ARTICLE 12. FUNCTIONS RELATING TO ESTATES

1. Consular officers may perform in estates matters the following functions:

(a) safeguarding the interests of nationals, both individuals and bodies corporate, of the sending state in cases of succession *mortis causa* in the territory of the receiving State;

(b) subject to the practices and procedures obtaining in the receiving State, representing or arranging appropriate representation for national of the sending State before the tribunals and other authorities of the receiving State, for the purpose of obtaining, in accordance with the law of the receiving State, provisional measures for the preservation of the rights and interests of these nationals, where, because of absence or any other reason, such nationals are unable at the proper time to assume the defense of their rights and interests.

2. The competent authorities of the receiving State, if they have knowledge, shall without delay inform the consular establishment of the sending State, regarding:

(a) the existence of an estate left by a national of the sending State who died in the receiving State;

(b) the existence of an estate to which a national of the sending State who is not permanently resident in or represented in the receiving State has or claims an interest as legal inheritor, executor, or testamentary beneficiary, or with any other title.

3. In case a national of the sending State dies while located temporarily in or in transit through the territory of the receiving State, his personal effects, other than those acquired in the receiving State the export of which is prohibited at the time of his death, as well as sums of money left by him, shall be turned over to the consular establishment

of the sending State with provisional title and without any formality.

ARTICLE 13. FUNCTIONS RELATING TO MARITIME AND RIVER NAVIGATION

1. Consular officers are entitled to extend aid and assistance to vessels of the sending State which enter a port within their consular district.

2. Consular officers are entitled to communicate with the crews of vessels of the sending State, visit the vessels, verify and confirm the vessel's papers and the documents relating to the cargo and, in general, see that the shipping law of the sending State is complied with. To the extent it does not violate the law of the receiving State, consular officers may likewise take the necessary measures to ensure order and discipline on such vessels.

3. In case of damage, stranding or shipwreck in the national or territorial waters of the receiving State of a vessel of the sending State, the competent authorities of the receiving State shall promptly notify the consular establishment and inform it of measures taken for the rescue and protection of the vessel, its crew, passengers, cargo and stores. To the extent authorized by the law of the receiving State, these authorities shall facilitate the cooperation of consular officers of the sending State in these measures and the attendance of consular officers at any proceedings which are convened as a result of the damage, stranding, or shipwreck. Consular officers may request the authorities of the receiving State to take additional measures for the rescue and protection of the vessel, its crew, passengers, cargo and stores.

4. If the owner of the vessel or any other person authorized to act for him is not in a position to make the necessary arrangements in connection with the damaged, stranded or shipwrecked vessel, or its cargo or stores, the consular officers may make the necessary arrangements on the owner's behalf. The consular officers may under similar circumstances make appropriate arrangements in connection with the cargo or stores owned by the sending State or by nationals of the sending State which are found or brought into port from any stranded or shipwrecked vessel. No customs duties of any kind shall be levied against a shipwrecked vessel of the sending State or for its cargo or stores, provided that these are removed from the receiving State.

5. In case the competent authorities of the receiving state intend to take measures of attachment, forced sale, or detention against vessels of the sending state, they shall inform the consular establishment in advance so that a consular officer may be present when such measures are taken. If, because of the urgency of the matter, it has not been possible to inform the consular establishment, and the consular officer was not present when the measures were taken, the authorities of the receiving state shall promptly inform the consular establishment of measures taken. The consular establishment shall also be informed of the interrogation of any members of a vessel's crew by the authorities of the receiving state.

6. The provisions of paragraph 5 of this Article do not apply to customs, passport, or sanitary inspections.

ARTICLE 14. FUNCTIONS RELATING TO CIVIL AVIATION

The provisions of Article 13 shall also apply, to the extent that they are capable of such application, to civil aircraft and civil aviation, provided that this is not contrary to the provisions of any agreements in force between the High Contracting Parties.

ARTICLE 15. OTHER CONSULAR FUNCTIONS

Consular officers may exercise any other consular function, of the nature of those provided for in Articles 8-14 of the present

Convention or of any other nature, entrusted to the consular establishment by the sending state, which are not prohibited by the law of the receiving state or to which no objection is taken by the receiving state or which are provided for in international agreements in force between the sending state and the receiving state.

ARTICLE 16. USE OF THE COAT OF ARMS AND FLAG OF THE SENDING STATE AND OF THE INSCRIPTION DESIGNATING THE CONSULAR POST

1. The coat of arms of the sending state, with the inscription designating the consular establishment, may be affixed at the consular premises.

2. The flag of the sending state may be flown at the consular premises, at the residence of the head of the consular establishment, as well as on his means of transportation used in the performance of his official activity.

ARTICLE 17. ASSISTANCE IN PROCURING PREMISES AND RESIDENCES

1. The receiving state shall either facilitate the acquisition on its territory, in accordance with its law, by the sending state, of the premises necessary for the consular establishment, or shall assist the sending state in obtaining accommodation in some other way.

2. The receiving state shall also, where necessary, assist the consular establishment in obtaining suitable residences for its consular officers and consular employees.

ARTICLE 18. INVIOLENTIALITY OF CONSULAR PREMISES AND OF THE RESIDENCE OF THE HEAD OF THE CONSULAR ESTABLISHMENT

1. The consular premises and the residence of the head of the consular establishment shall be inviolable. The authorities of the receiving state may not enter the consular premises or the residence of the head of the consular establishment, except with the consent of the head of the consular establishment, or the chief of the diplomatic mission of the sending state, or of another person empowered by them.

2. The receiving state has a special obligation to take all appropriate measures to protect the consular premises against willful damage or intrusion, as well as against disturbance of the peace of the premises or impairment of its dignity.

3. The consular premises, their furnishings, the property of the consular establishment and its means of transport shall be immune from any form of requisition for purposes of national defense or public utility. If expropriation is necessary for such purposes, all possible steps shall be taken to avoid impeding the performance of consular functions, and prompt, adequate and effective compensation shall be paid to the sending state.

ARTICLE 19. FISCAL EXEMPTIONS RELATING TO PREMISES AND RESIDENCES

1. Lands and buildings situated in the territory of the receiving state which are owned by the sending state or are leased by it for the requirements of a consular establishment, or as residences for the consular officers or consular employees, shall be exempt from all taxes and charges in the receiving state, with the exception of charges for special services rendered.

2. The exemptions referred to in paragraph 1 of this Article shall not apply if, under the law of the receiving state, such taxes and charges are payable by the person who contracted with the sending state or with the person acting on its behalf.

ARTICLE 20. INVIOLENTIALITY OF CONSULAR ARCHIVES

Consular archives and documents are inviolable at all times and wherever they may be.

ARTICLE 21. FREEDOM OF COMMUNICATION

1. The receiving state shall permit and protect freedom of communication for official purposes between the consular establishment and the sending state, as well as with the diplomatic missions and other consular establishments of that state wherever situated.

2. In the course of its consular communications, the consular establishment has the right to use diplomatic or consular couriers, the diplomatic or consular pouch, all public means of communication, and messages in clear language or in code or cipher.

3. The official correspondence of the consular establishment, regardless of the means of communication used, and the consular pouch are inviolable. The consular pouch shall not be opened or detained. Nevertheless, if the competent authorities of the receiving state have serious reason to believe that the pouch contains something other than official correspondence, documents and the items described in paragraph 4 of this Article, they may request that the pouch be opened in their presence by an authorized representative of the sending state. If this request is refused by the authorities of the sending state, the pouch shall be returned to its place of origin.

4. The consular pouch or its packages, if it is composed of several packages, must be sealed, must have visible external marks of their official character, and must contain only official correspondence or documents and objects destined for the exclusive use of the consular establishment.

5. The consular courier may not be a national of the receiving state or an alien admitted for permanent residence in that state. He must possess an official document which indicates his capacity and the number of packages of which the consular pouch is composed. In the exercise of his functions, the consular courier is protected by the receiving state. He enjoys personal inviolability.

ARTICLE 22. PROTECTION OF NATIONALS OF THE SENDING STATE

1. In all instances when a national of the sending state is placed under any form of deprivation or limitation of personal freedom, the competent authorities of the receiving state shall inform the consular establishment of the sending state without delay and, in any event, not later than after two days.

2. The consular officer has the right to receive correspondence or other communications from a national who is under any form of deprivation or limitation of personal freedom and to take appropriate measures to assure him legal assistance and representation. Likewise, the consular officer has the right to visit him, to hold discussions, and to communicate with him. These visits shall take place as soon as possible, but in any event they shall not be refused after the lapse of a four-day period from the date when he was placed under any form of deprivation or limitation of personal freedom.

3. The competent authorities of the receiving state shall, without delay, inform the national of the sending state about the right accorded him by this Article to communicate with a consular officer.

4. The rights referred to in paragraph 2 of this Article shall be exercised in conformity with the law of the receiving state, subject to the proviso, however, that the said law must enable full effect to be given to the purposes for which the rights accorded under this Article are intended.

ARTICLE 23. COMMUNICATION WITH THE AUTHORITIES OF THE RECEIVING STATE

In the exercise of the functions provided for in the present Convention, consular officers may communicate with:

(a) the competent state or local authorities of their consular district;

(b) the federal authorities of the receiving state, to the extent this is permissible under the law and custom of the receiving state.

ARTICLE 24. FREEDOM OF MOVEMENT

Subject to its law regarding zones in which access is prohibited or regulated for reasons of national security, the receiving state shall assure members of the consular establishment freedom of travel and movement in its territory.

ARTICLE 25. CONSULAR CHARGES AND FEES

1. The consular establishment may levy, in the territory of the receiving state, charges and fees prescribed for consular services by the law of the sending state.

2. The sums collected in accordance with paragraph 1 of this Article are exempt from any taxes and dues in the receiving state.

ARTICLE 26. FACILITIES ACCORDED CONSULAR OFFICERS AND CONSULAR EMPLOYEES

The receiving state shall take the necessary measures to ensure that consular officers and consular employees will be able to carry out their functions and duties, respectively, and enjoy the immunities and privileges accorded by the present Convention and by the law of the receiving state.

ARTICLE 27. PROTECTION ACCORDED CONSULAR OFFICERS

The receiving state shall treat consular officers with the respect due their office and shall take all appropriate steps to prevent any injury to their person, freedom or dignity.

ARTICLE 28. JURISDICTIONAL IMMUNITY AND PERSONAL INVIOLEABILITY OF THE HEAD OF THE CONSULAR ESTABLISHMENT AND OF MEMBERS OF HIS FAMILY

1. The head of the consular establishment shall not be subject to the criminal, civil or administrative jurisdiction of the receiving state, except in respect of a civil action:

(a) arising out of a contract concluded by the head of the consular establishment in which he did not contract expressly or impliedly on behalf of the sending state;

(b) brought by a third party for damage resulting from an accident in the receiving state, caused by a vehicle, vessel or aircraft.

(c) The person of the head of the consular establishment shall be inviolable. No measure of execution may be taken against him, except where the provisions of sub-paragraph (a) or (b) of paragraph 1 of this Article apply and then only when the execution can be carried out without prejudice to the inviolability of his person or residence.

3. The members of the family of the head of the consular establishment shall be accorded personal inviolability and immunity from criminal jurisdiction in the receiving state, provided that they are not nationals of or permanently resident in the receiving state, and are not engaged in private occupation for gain in that state.

ARTICLE 29. JURISDICTIONAL IMMUNITY AND PERSONAL INVIOLEABILITY OF THE MEMBERS OF THE CONSULAR ESTABLISHMENT

1. Consular officers and consular employees shall enjoy immunity from the criminal, civil and administrative jurisdiction of the receiving state in respect of acts performed by them within the scope of their official duties.

2. The provisions of paragraph 1 of this Article shall not, however, apply in respect of a civil action:

(a) arising out of a contract concluded by a consular officer or a consular employee in which he did not contract expressly or impliedly as an agent of the sending state;

(b) by a third party for damage arising from an accident in the receiving state caused by a vehicle, vessel or aircraft.

3. With respect to activities carried on

apart from the functions of their office, consular officers shall not be subject to:

(a) measures of preventive restraint or detention, unless they commit a crime in the territory of the receiving state for which the law of that state provides a maximum penalty of five years or more deprivation of freedom and then only on the basis of a warrant issued by the competent judicial authorities of the state;

(b) any other measures of deprivation of freedom, except in the execution of a final judicial judgment.

4. When criminal proceedings are instituted against a consular officer, he must appear before the competent authorities of the receiving state. In such case, the proceedings shall be instituted in the shortest period of time possible and shall be conducted with the respect due him by reason of his official position and, except in the case specified in paragraph 3 of this Article, in a manner which will hamper as little as possible the exercise of consular functions.

5. In case any measures of deprivation of freedom are taken against a consular officer or a member of his family or against a consular employee, the competent authorities of the receiving state shall, without delay, inform the head of the consular establishment of the sending state of this.

ARTICLE 30. GIVING OF EVIDENCE AND EXPERT OPINIONS

1. Consular officers, other than the head of the consular establishment, and consular employees may be called upon by the competent authorities of the receiving state to give evidence in the course of judicial or administrative proceedings. If a consular officer refuses to appear or to give evidence, no coercive measures or other penalty shall be applied to him. Consular employees may not refuse to testify as witnesses except in the cases mentioned in paragraph 3 of this Article.

2. The authority requiring the evidence shall avoid interference with the consular officer in the performance of his functions. It may take such evidence at the consular establishment or at the residence of the consular officer or accept a statement from him in writing, whenever this is possible and permitted. In the case of a consular employee, the authority requiring the evidence shall take all appropriate measures to avoid interfering with his activities.

3. Consular officers and consular employees are not obliged to give evidence concerning matters connected with the exercise of their functions and are not obliged to produce official documents and material from the consular archives. They are also entitled to refuse to give evidence as expert witnesses with regard to the law of the sending state.

4. Consular officers called upon to give evidence may make a declaration without taking an oath.

ARTICLE 31. EXEMPTION FROM PERSONAL SERVICES AND OTHER OBLIGATIONS

Consular officers and consular employees, and members of their families who are not nationals of the receiving state and who are not aliens lawfully admitted for permanent residence in the receiving state, shall be exempt in the receiving state from obligations and services of a military nature, from any kind of compulsory services, and from any contributions that may be due in lieu thereof. They shall likewise be exempt from obligations relating to the registration of aliens, from obtaining permission to reside, and from compliance with other similar obligations applicable to aliens.

ARTICLE 32. EXEMPTION FROM CUSTOMS DUTIES AND INSPECTION

1. The receiving state shall permit the importation or exportation into or from its territory of articles intended for:

(a) the official use of the consular establishment;

(b) the personal use of consular officers and consular employees, and members of their families who are not nationals of the receiving state and who are not aliens lawfully admitted for permanent residence in the receiving state, including goods intended for furnishing their residences. Consumer goods shall not exceed the quantities reasonably necessary for the personal use of those concerned.

2. The receiving state shall exempt the consular establishment and consular officers and consular employees of the sending state from the payment of all customs duties or similar taxes and charges imposed on the articles referred to in paragraph 1 of this Article, or imposed upon the importation or exportation of such articles. The exemption provided by this paragraph does not apply to charges levied for storage, cartage, and other similar services.

3. The personal baggage of consular officers shall be exempted from customs inspection. Such baggage may be inspected only if there are serious reasons to believe that it might contain articles other than those indicated in paragraph 1 of this Article or articles the importation or exportation of which is prohibited by the law of the receiving state. Such an inspection must be carried out in the presence of the consular officer concerned, or of a member of his family, or of another consular officer from the nearest consular establishment of the sending state.

ARTICLE 33. FISCAL EXEMPTIONS

1. Consular officers and consular employees, and members of their families who are not nationals of the receiving state and who are not aliens lawfully admitted for permanent residence in the receiving state, shall be exempt from all dues and taxes, personal or real, national, regional or municipal.

2. The exemptions provided for in paragraph 1 of this Article shall not apply in case of indirect taxes of a kind normally incorporated in the price of goods or services, or in case of estate, inheritance, or gift taxes. Similarly, the exemptions provided for in paragraph 1 of this Article shall not apply in the case of taxes and similar charges relating to:

(a) the acquisition or ownership of private immovable property located in the territory of the receiving state;

(b) income received from sources in the receiving state;

(c) the rendering of specific services.

3. In the event of the death of a consular officer or consular employee, the receiving state shall:

(a) permit the export of the movable property of the deceased and exempt such property from all export taxes and similar charges, with the exception of any such property acquired in the receiving state the export of which is prohibited;

(b) exempt the movable property of the deceased from all estate or inheritance taxes and similar charges if this property is located in the receiving state exclusively in connection with the presence in that state of the deceased as a consular officer or consular employee.

ARTICLE 34. THE BEGINNING AND END OF IMMUNITIES AND PRIVILEGES

1. Consular officers and consular employees shall benefit from the immunities and privileges provided by the present Convention from the moment they cross the border of the receiving state to take up their posts or from the moment they enter on their duties if they are already in its territory.

2. Family members of the persons mentioned in paragraph 1 of this Article shall benefit from the immunities and privileges of this Convention in the following manner:

(a) from the moment the consular officers and consular employees begin to benefit from the immunities and privileges in conformity with paragraph 1 of this Article;

(b) from the moment of crossing the border of the receiving state, if they entered in its territory after the date foreseen by sub-paragraph a of this paragraph;

(c) from the moment they become family members of a member of the consular establishment.

3. When the activities of a consular officer or consular employee have come to an end, his immunities and privileges and also the immunities and privileges of his family shall cease at the moment he leaves the territory of the receiving state or upon the expiration of a reasonable period of time after the termination of his employment.

4. The immunities and privileges of consular employees who are nationals of the receiving state shall come to an end at the state who are permanently resident in the receiving state shall come to an end at the same time they lose their official capacities.

5. The immunities and privileges of family members shall also come to an end from the moment they no longer form part of the family of a consular officer or consular employee. However, if such persons make known that they intend to leave the territory of the receiving state within a reasonable period of time, their immunities and privileges shall remain in force until such time.

6. In the event of the death of a consular officer or consular employee, the members of his family shall continue to enjoy the immunities and privileges which are recognized by this Convention until they leave the territory of the receiving state or until the expiration of a reasonable period of time for this purpose.

ARTICLE 35. RESPECT FOR THE LAW OF THE RECEIVING STATE

Without prejudice to the immunities and privileges of the present Convention the persons enjoying these immunities and privileges must respect the law of the receiving state.

ARTICLE 36. THIRD-PARTY LIABILITY INSURANCE

All vehicles owned by the sending state and used by the consular establishment, and all vehicles belonging to consular officers, consular employees, or members of their families, must be adequately insured against third party risks. In the case of such persons who are nationals of the receiving state or persons admitted to permanent residence in the receiving state, insurance shall be obtained to the extent that insurance is required by the law of that state.

ARTICLE 37. PROVISIONS APPLICABLE TO JURIDICAL ENTITIES

The provisions of this Convention relating to nationals of the sending state shall apply, in like manner, to juridical entities which have the nationality of that state conferred according to its law.

ARTICLE 38. WAIVER OF IMMUNITIES AND PRIVILEGES

1. The sending state may, by a notification through diplomatic channels to the receiving state, waive the immunities and privileges enjoyed by a consular officer or consular employee pursuant to Articles 28, 29 and 30 of the present Convention.

2. The waiver of jurisdictional immunity in a civil or administrative proceeding shall not be regarded as implying a waiver of immunity with respect to the execution of the judgment, for which a separate renunciation is required.

ARTICLE 39. TERMINATION OF 1881 CONVENTION

The present Convention replaces the Consular Convention signed at Bucharest on June 5/17, 1881.

ARTICLE 40. RATIFICATION, ENTRY INTO FORCE, DENUNCIATION

1. The present Convention shall be subject to ratification and the instruments of ratification shall be exchanged at Washington as soon as possible.

2. The present Convention shall enter into force on the thirtieth day following the date of the exchange of the instruments of ratification. It shall remain in force for a term of ten years, and thereafter, unless terminated in accordance with the provisions of paragraph 3 of this Article.

3. Either High Contracting Party may terminate the present Convention at the end of the initial period of ten years or any time thereafter, by notifying the other High Contracting Party in writing, one year in advance.

IN WITNESS WHEREOF, the respective Plenipotentiaries have signed this Convention and affixed thereto their seals.

DONE at Bucharest on July 5, 1972, in two original copies in the English and Romanian languages, both texts being equally authentic.

PROTOCOL TO THE CONSULAR CONVENTION BETWEEN THE UNITED STATES OF AMERICA AND THE SOCIALIST REPUBLIC OF ROMANIA

At the time of the signing this day, July 5, 1972, of the Consular Convention between the United States of America and the Socialist Republic of Romania, the undersigned Plenipotentiaries, duly authorized, give the following assurances of their Governments in connection with the performance of consular functions in inheritance matters provided for in Article 12 of the Convention, and in connection with the exercise of inheritance rights by nationals of either High Contracting Party in the territory of the other High Contracting Party:

The Government of the United States of America assures the Government of the Socialist Republic of Romania that:

1. there is no Federal law or other legislation barring or restricting the rights of Romanian nationals to receive inheritances in the United States of America and have the sums derived therefrom transferred to them;

2. the courts or other authorities competent in inheritance matters are aware that the Socialist Republic of Romania is not included among the countries enumerated in 31 Code of Federal Regulations 211 to which United States Government checks are not sent, under authority of the Secretary of the Treasury. United States Government checks and warrants issued for any purpose whatsoever are being sent to payees in the Socialist Republic of Romania;

3. it will, should there be occasion for it, inform the courts or other authorities competent in inheritance matters of the assurances given by the Government of the Socialist Republic of Romania through this Protocol.

The Government of the Socialist Republic of Romania assures the Government of the United States of America that:

1. United States nationals may exercise their inheritance rights in the Socialist Republic of Romania on the same conditions as Romanian nationals and may transfer, in dollars or other foreign currency, the sums obtained from such inheritances, at the official rate of exchange with the most favorable premium established in this matter in accordance with Romanian law;

2. Romanian nationals will receive, in full, in dollars or other foreign currency, the sums resulting from estates probated and settled in the territory of the United States of

America and transferred to the Socialist Republic of Romania. Insofar as they are not permitted to retain the sums in foreign currency, such sums shall be converted into lei at the official rate of exchange with the most favorable premium established in this matter in accordance with Romanian law;

3. For sums representing inheritance shares received in the United States of America by Romanian heirs, no fees or taxes shall be charged, with the exception of consular fees.

The present Protocol forms an integral part of the Consular Convention between the United States of America and the Socialist Republic of Romania, signed at Bucharest on July 5, 1972.

For the United States of America:

WILLIAM P. ROGERS

For the Socialist Republic of Romania:

CORNELIU MANESCU

The Senate, as in Committee of the Whole, proceeded to consider Executive W. 92d Congress, 2d session, the Consular Convention with Hungary, which was read the second time, as follows:

CONSULAR CONVENTION BETWEEN THE UNITED STATES OF AMERICA AND THE HUNGARIAN PEOPLE'S REPUBLIC

The President of the United States of America and the Presidential Council of the Hungarian People's Republic;

Motivated by the desire to regulate consular relations and thereby contribute to the development of the relations between the two countries as well as the facilitation of the protection of the rights and interests of their nationals;

Have agreed to conclude a Consular Convention and for this purpose have appointed their Plenipotentiaries:

The President of the United States of America:

WILLIAM P. ROGERS, Secretary of State

The Presidential Council of Hungarian People's Republic:

JANOS PETER, Foreign Minister

Who have agreed on the following:

PART I. DEFINITIONS

ARTICLE 1

For the purposes of this Convention:

(1) the term "consulate" shall mean any consulate-general, consulate, vice-consulate or consulate agency;

(2) the term "consular officer" shall mean any person, including the head of a consulate, who has been appointed as such in accordance with the provisions of the Convention, and charged with the performance of consular duties;

(3) the term "consular employee" shall mean any person employed in the administrative, technical or domestic service of a consulate and notified as such to the receiving State in conformity with Article 5(1);

(4) the term "vessel of the sending State" shall mean any vessel registered in the sending State.

PART II. ESTABLISHMENT OF CONSULATES AND CONSULAR APPOINTMENTS

ARTICLE 2

(1) The establishment of a consulate by the sending State in the territory of the receiving State shall be subject to the consent of the latter State.

(2) The sending and receiving States shall determine by agreement the seat of the consulate, its classification and the consular district.

ARTICLE 3

(1) Prior to the appointment of the head of the consulate of the sending State it shall, through diplomatic channels, request the approval of the receiving State.

(2) The head of a consulate may enter upon the performance of his duties as soon as he receives an exequatur or other authorization from the receiving State after the

presentation of his consular commission or other document of appointment.

(3) The consular commission or other document of appointment shall specify the full name of the head of the consulate, his rank, the consular district and the seat of the consulate.

(4) After the presentation of the consular commission or other document of appointment, the receiving State shall issue to the head of the consulate the exequatur or other authorization as soon as possible and free of charge. A State which refuses to grant an exequatur or other authorization shall not be obliged to give the sending State reasons for such refusal.

(5) Pending delivery of the exequatur or other authorization, the head of a consulate may be admitted on a provisional basis to the performance of his duties.

(6) The authorities of the receiving State when granting the exequatur or other authorization or when granting their provisional approval, shall undertake the measures necessary in order that the head of the consulate may perform his tasks.

ARTICLE 4

(1) If the head of a consulate is unable for any reason to act as such or if the post is temporarily vacant, the sending State may appoint a consular officer belonging to the same consulate or to another consulate in the receiving State or a member of the diplomatic staff of its diplomatic mission in that State to act temporarily in his place. The name of the person concerned shall be notified as soon as possible to the ministry of foreign affairs of the receiving State.

(2) Such acting officer shall be accorded the same rights, privileges and immunities and shall be subject to the same obligations as if he had been appointed under Article 3.

(3) If, in accordance with the provisions of paragraph (1) of this Article, a member of the diplomatic staff of the diplomatic mission of the sending State is charged temporarily with heading the consulate, this assignment shall not affect his diplomatic privileges and immunities.

ARTICLE 5

(1) In the case of a consular officer to whom Article 3 does not apply, as well as in the case of a consular employee, the sending State shall notify in advance through the diplomatic channel the ministry of foreign affairs of the receiving State of the name, nationality, rank and function of the officer or employee.

(2) The receiving State shall, upon the request of the sending State, issue for each consular officer included in the provisions of paragraph (1) a document recognizing his right to exercise consular functions.

ARTICLE 6

(1) (a) A consular officer shall be a national of the sending State and not a national or a permanent resident of the receiving State.

(b) A consular employee may be a national of the sending State, a national of the receiving State or a National of a third State.

(2) The prior consent of the receiving State shall be required in the following cases:

(a) any appointment of a national of the sending State if the person concerned has already been authorized to enter, or reside in, the receiving State for other purposes. This limitation shall not apply, however, in the case of a person who is already a member of the staff of a consulate, or of the diplomatic mission, of the sending State in the receiving State;

(b) the appointment as a consular employee of a national or a permanent resident of the receiving State or a national of a third State.

ARTICLE 7

The receiving State may at any time and without having to explain the reason for

its decision, notify the sending State through the diplomatic channel that a consular officer or consular employee is unacceptable. The sending State shall thereupon cancel the appointment of the person concerned, or recall him, or terminate his duties at the consulate. If the sending State fails to carry out this obligation within a reasonable period, the receiving State may, in the case of the head of a consulate, withdraw the exequatur or other authorization or, in the case of a consular officer or consular employee, decline to continue to recognize him in such capacity.

PART III. FACILITIES, PRIVILEGES AND IMMUNITIES

ARTICLE 8

(1) The receiving State shall treat a consular officer with due respect and shall take all appropriate steps to prevent any attack on his person, freedom or dignity, or that of any member of his family residing with him.

(2) The receiving State is under a special duty to take all appropriate steps to protect the consular premises and the residence of a consular officer against any intrusion or damage and to prevent any disturbance of the peace of the consulate or impairment of its dignity.

ARTICLE 9

(1) The receiving State shall either facilitate the acquisition on its territory, in accordance with its laws and regulations, by the sending State of premises necessary for its consulate or assist the sending State in obtaining accommodations in some other way.

(2) It shall also, where necessary, assist the sending State in obtaining suitable accommodations for consular officers and for consular employees who are neither citizens nor permanent residents of the receiving State.

(3) The sending State shall have the right, in the territory of the receiving State and in accordance with its laws and regulations, to acquire, own, lease for any period of time, or otherwise hold and occupy such lands, buildings, and appurtenances as may be necessary and appropriate for consular purposes, including residences for officers and employees of the consulate who are not nationals of the receiving State.

(4) The sending State shall have the right, in accordance with the laws and regulations of the receiving State, to erect buildings, and appurtenances on land which it owns or leases in accordance with paragraph (3) of this Article.

ARTICLE 10

Land, buildings and parts of buildings, used exclusively for the purposes of a consulate, shall be inviolable. The authorities of the receiving State shall not enter the said land, buildings or parts of buildings except with the consent of the head of the consulate or of the head of the diplomatic mission of the sending State or of a person nominated by one of them. The provisions of this paragraph shall apply also to the residence of the head of a consulate.

ARTICLE 11

The consular premises, their furnishings, the property of the consulate and its means of transport shall be immune from any form of requisition for purposes of national defense or public utility.

ARTICLE 12

(1) The flag of the sending State and its consular flag may be flown and its coat-of-arms displayed on the building in which the consulate is installed and at the entrance door thereof, on the residence of the head of the consulate and on the means of transport used by him in the performance of his official duties.

(2) In the exercise of the rights accorded under this Article regard shall be paid to

the laws, regulations and usages of the receiving State.

ARTICLE 13

(1) The consular archives and documents shall be inviolable at all times and wherever they may be.

(2) Documents and objects of an unofficial character shall not be kept in the archives.

ARTICLE 14

(1) A consulate shall be entitled to exchange communications with the Government of the sending State and with the diplomatic mission, or other consulates, of that State in the receiving State or in a third State. The consulate may for this purpose employ all public means of communication as well as couriers, sealed pouches, bags and other containers, and may use codes or ciphers. However, the installation and use of a wireless transmitter by the consulate shall be subject to the consent of the receiving State.

(2) In respect of public means of communication, the same tariffs shall be applied in the case of a consulate as are applied in the case of the diplomatic mission.

(3) The official correspondence of a consulate (whatever the means of the communication employed) as well as the sealed pouches, bags and other containers deferred to in paragraph (1) of this Article shall, provided that they bear visible external marks of their official character, be inviolable and the authorities of the receiving State shall not examine or detain them. They shall contain only official correspondence and objects intended exclusively for official use.

(4) Persons charged with the conveyance of consular pouches, bags and other containers shall be accorded the same rights, privileges and immunities as are accorded by the receiving State to the diplomatic couriers of the sending State. Any such person shall be provided with an official document indicating his status and the number of packages constituting the consular pouch, bag or other container.

ARTICLE 15

(1) A consular officer shall be immune from the jurisdiction of the receiving State except in the cases referred to in Article 48 of this Convention and in paragraph (2) of this Article.

(2) The immunity provided in paragraph (1) of this Article shall not, however, apply in respect of civil actions:

(a) relating to private immovable property situated in the territory of the receiving State, unless he holds it on behalf of the sending State for the purposes of the consulate;

(b) relating to succession in which the consular officer is involved as executor, administrator, heir or legatee as a private person and not on behalf of the sending State;

(c) relating to any professional or commercial activity exercised by the consular officer in the receiving State outside his official functions;

(d) by a third party for damage arising from an accident in the receiving State caused by a vehicle, vessel or aircraft.

(3) The provisions of paragraphs (1) and (2) of this Article shall apply as well as members of the family of the consular officer, residing with him, provided in each case that the person concerned is not a national or permanent resident of the receiving State.

(4) (a) A consular employee, who is a national of the sending State and not a permanent resident of the receiving State and who has been notified under Article 5(1) as having administrative or technical functions, shall be immune from the criminal jurisdiction of the receiving State. He shall also be immune from the civil and administrative jurisdiction of that State in respect of any act performed in his official capacity, subject

to the exception described in paragraph (2) (d) of this Article.

(b) The provisions of the first sentence of subparagraph (a) of this paragraph shall apply as well to members of the family of such a consular employee who has been notified under Article 5(1), residing with him, provided in each case that the person concerned is not a national or permanent resident of the receiving State.

(5) A consular employee other than one described in paragraph (4) of this Article, provided that he is not a national or permanent resident of the receiving State, shall be immune from the jurisdiction of that State in respect of any act performed in his official capacity, subject to the exception described in paragraph (2) (d) of this Article.

ARTICLE 16

(1) In the event of the arrest or detention of, or the institution of criminal proceedings against, a consular employee described in Article 15(5), the receiving State shall immediately inform the head of the consulate accordingly.

(2) The provisions of paragraph (1) of this Article shall apply as well to those members of the family of a consular officer to whom the benefits of Article 15(3) do not apply and to members of the families of a consular employee to whom the benefits to Article 15(4) (b) do not apply.

ARTICLE 17

(1) (a) A consular officer or consular employee may be called upon to attend as a witness in the course of judicial or administrative proceedings.

(b) In the event of the refusal of a consular officer or a consular employee described in Article 15(4) to give evidence at such proceedings, no coercive measure or penalty may be applied to him.

(c) A consular employee shall not, however, decline to give evidence, except in the cases mentioned in paragraph (3) of this Article.

(2) The respective provisions of paragraph (1) of this Article concerning consular officers and consular employees shall apply also to members of their families, residing with them, who are not nationals or permanent residents of the receiving State.

(3) Consular employees are under no obligation to give evidence concerning matters falling within the official work of the consulate. They are entitled to decline to give evidence as expert witnesses with regard to the law of the sending State.

(4) The authorities of the receiving State shall not require the production of any official document or object.

(5) The authorities of the receiving State, in taking the testimony of a consular officer or a consular employee, shall take all appropriate measures to avoid hindering his performance of official duties. Upon the request of the head of a consulate, such testimony may, when possible, be given orally or in writing at the consular establishment or at the residence of the person concerned.

ARTICLE 18

(1) The sending State may waive any of the privileges and immunities provided for in Articles 15 and 17.

(2) Without prejudice to the provisions of paragraph (3) of this Article, the waiver shall in all cases be express and shall be communicated in writing to the receiving State.

(3) the initiation of proceedings by a person entitled to immunity from jurisdiction under Article 15 shall preclude him from invoking immunity from jurisdiction in respect of any counter-claim directly connected with the principal claim.

(4) Waiver of immunity for jurisdiction in respect of civil or administrative proceedings shall not be held to imply waiver of immunity in respect of execution of the judgment for which a separate waiver shall be required.

ARTICLE 19

Subject to its laws and regulations concerning zones entry into which is prohibited or regulated for reasons of national security, the receiving State shall ensure freedom of movement and travel in its territory to all officers and employees of the consulate.

ARTICLE 20

(1) A consular officer, as well as, provided that he is not a national or a permanent resident of the receiving State, a consular employee, shall be exempt in the receiving State from service in the armed forces and from other compulsory public service of any kind, e.g., jury duty, and military obligations connected with requisitioning, military contributions and billeting.

(2) The provisions of paragraph (1) of this Article shall apply also to members of the family of the consular officer or consular employee, residing with him, provided in each case that the person concerned is not a national or a permanent resident of the receiving State.

ARTICLE 21

(1) A consular officer, as well as, provided that he is not a permanent resident of the receiving State, a consular employee, shall be exempt from all requirements under the laws and regulations of the receiving State relative to the registration of aliens and permission to reside and from compliance with any other similar requirements applicable to aliens.

(2) The provisions of paragraph (1) of this Article shall apply also to members of the family of a consular officer or consular employee, residing with him, provided in each case that the person concerned is not a permanent resident of the receiving State.

ARTICLE 22

(1) No tax or other similar charge of any kind shall be imposed or collected by the receiving State or any state or municipal subdivision thereof in respect of—

(a) land, buildings or parts of buildings owned or leased by the sending State or by a natural or juridical person acting on behalf of that State and used exclusively for any of the purposes specified in Article 9;

(b) transactions or instruments relative to the acquisition of such premises.

(2) The provisions of sub-paragraph (1) (a) of this Article shall not apply with regard to payments due in respect of specific services rendered.

(3) The exemption accorded under paragraph (1) of this Article shall not apply to taxes or other similar charges payable under the law of the receiving State by a person contracting with the sending State or with a person acting on its behalf.

ARTICLE 23

No tax or other similar charge of any kind for the payment of which the sending State would otherwise be legally liable shall be imposed or collected by the receiving State or any state or municipal subdivision thereof, in respect of the acquisition (with the exception of indirect taxes of a kind which are normally incorporated in the price of goods or services), ownership, possession or use of movable property by the sending State for consular purposes.

ARTICLE 24

No tax or other similar charge of any kind shall be imposed or collected in the receiving State or any state or municipal subdivision thereof in respect of fees received on behalf of the sending State as compensation for consular services or in respect of any receipt given in connection with such a fee.

ARTICLE 25

(1) A consular officer or consular employee or a member of his family forming part of his household shall, provided in either case that he is not a national or per-

manent resident of the receiving State, be exempt in the receiving State from all taxes, or similar charges of any kind imposed or collected by the receiving State or any state or municipal subdivision thereof, except—

(a) on the acquisition, ownership, occupation or disposal of immovable property situated within the receiving State;

(b) without prejudice to the provisions of paragraph (2) of this Article, on income derived from private occupation for gain or from other sources, or on the appreciation of assets, within the receiving State;

(c) on transactions, or instruments affecting transactions, including stamp duties;

(d) without prejudice to the provision of Article 27, on the passing of property at death;

(e) indirect taxes of a kind which are normally incorporated in the price of goods or services;

(f) charges levied for specific services rendered.

(2) A consular officer or, provided that he is not a national or permanent resident of the receiving State, a consular employee, shall be exempt in that State from all taxes or other similar charges of any kind imposed or collected by the receiving State or any state or municipal subdivision thereof in respect of the official emoluments, salary, wages or allowances received by him as compensation for his official duties.

ARTICLE 26

(1) The receiving State shall, in accordance with such laws and regulations as it may adopt, permit entry of and grant exemption from all customs duties, taxes, and related charges other than charges for storage, cartage and similar services on:

(a) articles including motor vehicles for the official use of the consulate;

(b) articles including motor vehicles for the personal use of a consular officer or members of his family forming part of his household, including articles intended for his establishment.

(2) Consular employees and members of their families shall enjoy the privileges and exemptions specified in paragraph (1) (b) of this Article in respect to articles imported at the time of first installation.

(3) The personal baggage accompanying a consular officer, or a member of his family forming part of his household, shall be exempt from customs inspection, unless there are serious grounds for presuming that it contains articles not covered by the exemptions mentioned in paragraph (1) (b) of this Article, or articles the import or export of which is prohibited by the law or controlled by the quarantine regulations of the receiving State. Such inspection shall be conducted only in the presence of the consular officer, the member of his family concerned, or of the authorized representative.

(4) The provisions of paragraphs (1) (b), (2) and (3) of this Article shall not apply in the case of consular employees, or members of their families, or members of the families of consular officers when the person concerned is either a national or permanent resident of the receiving State or is engaged in the receiving State in private occupation for gain.

ARTICLE 27

If a consular officer, a consular employee or a member of his family, residing with him, dies and leaves movable property in the receiving State, no tax or other similar charge of any kind shall be imposed or collected by the receiving State or any state or municipal subdivision thereof in respect of that property and no limitation upon export shall be applied, provided,

(a) that the deceased person was not a national or a permanent resident of the receiving State;

(b) that the person entitled to receive the

property as a consequence of the death is not a national or a permanent resident of the receiving State;

(c) that the presence of the property in that State was due solely to the presence of the deceased in the capacity of a consular officer or consular employee or as a member of the family of a consular officer or consular employee.

ARTICLE 28

(1) Without prejudice to the provisions of paragraph (4) of this Article, a consular officer, as well as, provided that he is not a national or a permanent resident of the receiving State, a consular employee, shall, with respect to services rendered by him for the sending State, be exempt from the social security provisions of the receiving State.

(2) The exemption provided for in paragraph (1) of this Article shall apply also to members of the family of the consular officer or consular employee, residing with him, provided in each case that the person concerned is not a national or a permanent resident of the receiving State.

(3) In addition, the exemption provided for in paragraph (1) of this Article shall apply to a person in the private service of the consular officer or consular employee, provided in each case that the person concerned

(a) is not a national or a permanent resident of the receiving State; and

(b) is covered by the social security provisions of the sending State or of a third State.

(4) Any such consular officer or consular employee who employs a person to whom the provisions of paragraph (3) of this Article do not apply shall observe any obligations imposed upon employees under the social security provisions of the receiving State.

(5) The exemption provided for in paragraphs (1), (2) and (3) of this Article shall not preclude voluntary participation, insofar as such participation may be permissible, in the social security system of the receiving State.

ARTICLE 29

(1) A consular officer or consular employee shall receive the immunities and privileges due to him under this Convention as from the moment of crossing the frontier of the receiving State to take up his post or, if he is already present in that State, as from the moment of entering upon his duties.

(2) Members of the family of a person to whom paragraph (1) of this Article applies, residing with him, shall receive the immunities and privileges accorded to them under this Convention.

(a) as from the moment that the consular officer or consular employee become entitled to receive immunities and privileges in accordance with paragraph (1) of this Article;

(b) if they entered the receiving State after that date, as from the moment of crossing the frontier; or

(c) as from the moment of becoming members of the family of the person concerned, as the case may be.

(3) When the appointment of a consular officer or consular employee comes to an end, his immunities and privileges, as well as the immunities and privileges of members of his family, residing with him, shall cease as from the moment of his departure from the receiving State or upon the expiry of a reasonable period after termination of his appointment.

(4) In the case of a consular employee who is a national or a permanent resident of the receiving State immunities and privileges shall cease upon the termination of his appointment.

(5) Insofar as concerns any act performed in his official capacity by a consular officer or consular employee, immunity from jurisdiction shall continue to subsist without limitation of time.

(6) The immunities and privileges of

members of the family shall likewise cease as from the moment when they cease to be members of the family of the consular officer or consular employee in question. However, if the person concerned undertakes to depart from the territory of the receiving State within a reasonable period thereafter the immunities and privileges shall continue to be accorded until that date.

(7) In the event of the death of a consular officer or consular employee, members of his family shall continue to receive the immunities and privileges accorded to them under the Convention until the moment of their departure from the receiving State or until the expiry of a reasonable period granted for this purpose.

PART IV. CONSULAR FUNCTIONS

ARTICLE 30

The receiving State shall accord full facilities for the performance of the functions of the consulate.

ARTICLE 31

(1) In addition to the functions otherwise specified in this Convention, a consular officer may perform any other functions with which he is entrusted by the sending State, provided they are not prohibited by the laws and regulations of the receiving State.

(2) A consular officer shall be entitled to perform consular duties only within his own consular district. The performance by him of consular duties outside that district shall be subject to the consent of the receiving State.

(3) Upon notification to the receiving State, a consular officer shall be entitled to perform duties on behalf of a third State, provided that the receiving State does not raise objection.

(4) A consular officer may, on notification to the receiving State, act as representative of the sending State to an international organization. In this capacity he shall be entitled to receive any facilities, privileges and immunities accorded to such a representative by international law; however, in respect of the performance by him of any consular function, he shall not be entitled to any greater immunity from jurisdiction than that to which a consular officer is entitled under the present Convention.

ARTICLE 32

A consular officer shall be entitled,

(a) to protect and promote the rights and interests of the sending State and those of its nationals including juridical persons;

(b) to advance the interests of the sending State with regard to commercial, economic, scientific and cultural matters and tourism and to further the expansion of contacts and the development of friendly relations between the sending State and the receiving State in these and other fields;

(c) to ascertain by all lawful means conditions and developments in the commercial, economic, cultural and scientific life of the receiving State, to report thereon to the Government of the sending State and give information to persons interested.

ARTICLE 33

In connection with the performance of his duties, a consular officer shall be entitled to address

(a) the competent local authorities within his consular district; and

(b) the central authorities of the receiving State to such extent as the laws and usages of that State permit.

ARTICLE 34

A consulate shall be entitled to levy in the receiving State the fees and charges prescribed under the laws and regulations of the sending State for the performance of consular services.

ARTICLE 35

Subject to the practices and procedures obtaining in the receiving State, a consular officer shall be entitled to represent or ar-

range appropriate representation for nationals of the sending State before the tribunals and other authorities of the receiving State, for the purpose of requesting, in accordance with the laws and regulations of the receiving State, provisional measures for the preservation of the rights and interests of these nationals where, because of absence or any other reason, such nationals are unable at the proper time to assume the defense of their rights and interests.

ARTICLE 36

A consular officer shall be entitled to serve judicial documents and execute letters rogatory in accordance with international agreements in force or otherwise not inconsistent with the laws and regulations of the receiving State.

ARTICLE 37

(1) A consular officer shall be entitled,

(a) to keep a register of nationals of the sending State;

(b) to register or receive notification of the birth or death of a national of the sending State;

(c) to record a marriage solemnized under the law of the receiving State, or a divorce granted under the law, provided that at least one of the parties to such marriage or divorce is a national of the sending State;

(d) to solemnize a marriage, provided that both parties thereto are nationals of the sending State and provided also that the solemnization of such marriage is not prohibited under the law of the receiving State.

(2) Nothing in the provision of paragraph (1) of this Article shall exempt any private person from any obligation imposed by the law of the receiving State with regard to the notification to, or registration with, the competent authorities of any matter dealt with in those provisions.

ARTICLE 38

A consular officer shall be entitled to issue, revoke, renew, amend, and extend the validity of passports, entry, exit and transit visas and other similar documents.

ARTICLE 39

(1) A consular officer shall be entitled, provided that there is nothing contrary thereto in the laws and regulations of the receiving State,

(a) to draw up, attest, certify, authenticate, legalize or otherwise validate documents of a juridical character or copies thereof, whenever such services are requested.

(i) by a person of any nationality for use in the sending State or under the law of that State; or

(ii) by a national of the sending State or of the receiving State for use in a third State;

(b) to translate documents and to certify the accuracy of the translation.

(2) In any case where a document referred to in paragraph (1) of this Article is required for use in the receiving State, the authorities of that State shall be obliged to give it the same force and effect as though it had been drawn up or certified or translated by the competent authorities or officials of the receiving State; provided that such documents shall have been drawn and executed in conformity with the laws and regulations of the receiving State.

ARTICLE 40

(1) A consular officer shall be entitled to safeguard, within the limits imposed by the laws and regulations of the receiving State, the interests of minors, other persons lacking full capacity, and persons absent from the receiving State, who are nationals of the sending State, particularly where any guardianship or trusteeship is required with respect to such persons. He may propose to the competent authorities of the receiving State the names of appropriate persons to act as guardians or trustees.

(2) If it comes to the knowledge of the

competent authorities of the receiving State that measures are required to be taken for the appointment of a guardian or trustee of a national of the sending State, they shall promptly so inform the consular officer.

ARTICLE 41

(1) In any case where a national of the sending State has been placed under detention pending trial or subjected to any other deprivation of personal liberty, the competent authorities of the receiving State shall notify the appropriate consulate of the sending State accordingly. Notification shall be made without delay and in any event within three days.

(2) The consular officer shall be entitled to receive correspondence or other communications from a national who has been so placed under detention pending trial or subjected to any other form of deprivation of personal liberty and to take the necessary steps to provide him with legal assistance and representation.

(3) The consular officer shall likewise be entitled to visit, to converse with and to communicate with the national. Visits shall be permitted at latest after the expiry of four days from the date on which the national was placed under detention pending trial or subjected to any other deprivation of liberty.

(4) In any case where a national of the sending State has been subjected to detention pending trial, or any other deprivation of personal liberty, or has been convicted and is serving a sentence of imprisonment, the consular officer shall have the right to visit, to converse with and to communicate with him. Visits may be made on a recurrent basis and at intervals of not more than one month.

(5) The rights referred to in paragraphs (2), (3) and (4) of this Article shall be exercised in conformity with the laws and regulations of the receiving State, subject to the proviso, however, that the said laws and regulations must not nullify these rights.

(6) A national to whom the provisions of this Article apply may receive from the consular officer parcels containing food, clothes, medicament and reading and writing materials to the extent that the applicable regulations of the institution in which he is detained so permit.

(7) The competent authorities of the receiving State shall, without delay, inform the national concerned of the rights of visit and communication granted under this Article.

ARTICLE 42

Where it comes to the knowledge of the competent authorities of the receiving State that a national of the sending State has died in the former State they shall, without delay, inform the appropriate consular officer accordingly and shall transmit to him a copy of the death certificate or other document recording the death.

ARTICLE 43

(1) Where it is brought to the knowledge of the competent authorities of the receiving State that there is in that State an estate,

(a) of a national of the sending State; or
(b) of a deceased person of any nationality in respect of which a national of the sending State has an interest,

the said authorities shall, without delay, inform the appropriate consular officer accordingly.

(2) The provisions of this Article shall apply whatever the place of the death of the deceased person.

ARTICLE 44

(1) In all those cases in which an estate is left in the receiving State by a national of the sending State, or by any person when a national of the sending State has an interest in the estate, the consular officer shall be entitled to take steps, in accordance with

the laws and regulations obtaining in the receiving State, personally or through his authorized representative,

(a) for the protection and preservation of the estate;

(b) for the administration (including the distribution) of the estate.

(2) In all those cases in which an estate is left in the receiving State by a national of the sending State or by any person when a national of the sending State has an interest in the estate, the consular officer within whose consular district the estate is being administered, or if no administration is instituted, within whose consular district the property included in the estate is situated, shall be entitled to represent the interests of the national of the sending State concerned.

(3) The provisions of paragraphs (1) (b) and (2) of this Article shall not entitle the consular officer to act as an attorney at law, but he is entitled in such cases to give a power of attorney to an attorney at law.

(4) The provisions of this Article shall apply whatever the place of the death of the deceased person.

ARTICLE 45

The right of the consular officer described in Article 44 shall cease as from the time when a person who has received a power of attorney from the national concerned appears before the competent authority.

ARTICLE 46

(1) The consular officer shall be entitled, in accordance with the provisions of the laws and regulations obtaining in the receiving State, and in behalf of a national of the sending State:

(a) to take provisional custody of the personal property left by a deceased national of the sending State;

(b) to administer the property of a deceased national of the sending State who at the time of his death was not present in the receiving State, or has not appointed an executor of the estate in the receiving State, provided that the consular officer shall relinquish such administration upon the appointment of another administrator by the competent court;

(c) to receive such money and property to which the national of the sending State is entitled upon the death of a person of any nationality, including shares in an estate, payments made pursuant to pensions and social benefits systems in general, and proceeds of insurance policies;

(d) to deliver the monies and properties mentioned in paragraph (1) (c) of this Article. The receiving State may require that the liabilities of the estate, declared within the period prescribed by law, shall first be paid or guaranteed.

(2) In the cases included in paragraphs (1) (c) and (d) the court, or other component authority or the person distributing the estate, may require that the consular officer comply with the following conditions:

(a) present a power of attorney from the national mentioned in paragraph (1) (c) of this Article; or

(b) present within a reasonable time appropriate evidence which verifies the receipt of the money and property by the national concerned; or

(c) return the money and property if he is unable to present such evidence.

ARTICLE 47

(1) In any case where a national of the sending State who is not domiciled in the receiving State dies while temporarily present in that State, money and personal effects in his possession, provided that they are not claimed by a person who is present and entitled to claim them shall be turned over without delay on a provisional basis and for conservatory purposes, to the appropriate consular officer of the sending State. This provision shall be without prejudice to the right of the competent authorities of the

receiving State, to take charge of them in the interests of justice.

(2) If an authority of the receiving State is charged with the administration of the estate of the deceased person the consulate shall hand over the money and personal effects to the said authority.

(3) The exportation of the money and personal effects shall be subject to the laws and regulations of the receiving State.

(4) The provisions of this Article shall be without prejudice to the provisions of Articles 43 to 46.

ARTICLE 48

The consular officer in exercising the rights described in Articles 44 to 47, notwithstanding the provisions of Article 15 (1), is subject to the laws of the receiving State and to the jurisdiction of the judicial and administrative authorities of the receiving State in the same manner and to the same extent as a national of the receiving State.

ARTICLE 49

(1) A consular officer shall be entitled to render every assistance and aid to a vessel of the sending State which has come to a port or other place of anchorage within the consular district.

(2) A consular officer may communicate with the vessel and proceed on board, accompanied, if he desires, by other consular officers or by consular employees, as soon as she has been given permission to establish contact with the shore.

(3) The master and members of the crew shall be permitted to communicate with the consular officer and for this purpose they may also, subject to the laws and regulations of the receiving State with regard to the port area and the admission of foreigners, proceed to the consulate or to some other appropriate place designated by the consular officer.

(4) A consular officer may invoke the aid of the competent authorities of the receiving State in any matter relating to the performance of his duties with respect to a vessel of the sending State or to the master and members of the crew of such a vessel.

ARTICLE 50

(1) A consular officer shall be entitled,

(a) to investigate any incident occurring on board a vessel of the sending State during her voyage, question the master and any member of the crew, examine and confirm the vessel's papers, take statements with regard to her voyage and destination and generally facilitate the entry into, stay in and departure from, a port of the vessel.

(b) to arrange, provided this is not contrary to the law of the receiving State, for the engagement and discharge of the master or any member of the crew or for his return to the vessel;

(c) without prejudice to the powers of the receiving State, to settle disputes of any kind between the master and any member of the crew, including disputes as to wages and contracts of service, to the extent that this is permitted under the law of the sending State;

(d) to make arrangements for the medical treatment and for the repatriation of the master or any member of the crew of the vessel;

(e) to receive, draw up, notarize, and deliver any declaration or other document prescribed by the law of the sending State in connection with vessels.

(2) A consular officer may, to the extent that the law of the receiving State permits him to do so, appear with the master or any member of the crew of the vessel before the courts and authorities of the receiving State, render them every assistance (including the making of arrangements for legal aid) and act as or arrange for an interpreter in matters between them and these courts and authorities.

ARTICLE 51

(1) Where it is the intention of the courts or other competent authorities of the receiving State to take any coercive action or to institute any formal enquiry on board a vessel of the sending State, they shall so inform the appropriate consular officer. Except where this is impossible on account of the urgency of the matter, such notification shall be made in time to enable the consular officer or his representative to be present. If the consular officer has not been present or represented he shall, upon request, be provided by the authorities concerned with full information with regard to what has taken place.

(2) The provisions of paragraph (1) of this Article shall apply also in any case where it is the intention of the competent authorities of the port area to question the master or any member of the crew ashore.

(3) The provisions of this Article shall not, however, apply to any routine examination by the authorities in regard to customs, immigration, public health, the safety of life at sea, oil pollution, wireless telegraphy or any similar matter, or with the consent of the master of the vessel.

ARTICLE 52

In any case where a vessel of the sending State is wrecked, runs aground or otherwise sustains damage in the national or territorial waters of the receiving State, the competent authorities of that State shall, without delay, so notify the appropriate consulate of the sending State. The said authorities shall, likewise, notify the consulate of measures taken, or intended to be taken, for the purpose of safeguarding and preserving the lives of persons on board the vessel and her cargo.

ARTICLE 53

The provisions of Articles 49 to 52 shall apply also in relation to civil aircraft to the extent that such an application is feasible.

PART V. GENERAL PROVISIONS

ARTICLE 54

(1) All persons to whom privileges and immunities are accorded under this Convention shall, without prejudice to the said privileges and immunities, be under an obligation to respect the laws and regulations of the receiving State, including those relative to the control of traffic.

(2) Vehicles owned by the sending State and used by the consulate, and those of consular officers, consular employees, or members of their families, must be covered by insurance against third party risks.

ARTICLE 55

(1) Members of the diplomatic staff of the diplomatic mission of the sending State in the receiving State may be appointed to perform consular, in addition to diplomatic, duties. The name of any person so appointed shall be notified to the ministry of foreign affairs of the receiving State.

(2) A member of the diplomatic mission to whom paragraph (1) of this Article applies shall be accorded the same rights as a consular officer under this Convention. Without prejudice to the provisions of Article 48, he shall continue to receive the privileges and immunities accorded to him by virtue of his diplomatic status.

ARTICLE 56

(1) This Convention shall be ratified and shall enter into force thirty days after the exchange of instruments of ratification, which shall take place at Washington as soon as possible.

(2) The Convention shall remain in force for a period of five years. In case neither High Contracting Party shall have given to the other, twelve months before the expiry of the said period of five years, notice of intention to terminate the Convention, it shall continue to remain in force until the expiry of twelve months from the date on which no-

tice of such intention is given by one High Contracting Party to the other.

IN WITNESS WHEREOF, the respective Plenipotentiaries have signed this Convention and affixed thereto their seals.

DONE in duplicate at Budapest this seventh day of July, 1972, in the English and Hungarian languages, both texts being equally authoritative.

For the President of the United States of America:

WILLIAM P. ROGERS

For the Presidential Council of the Hungarian People's Republic:

JANOS PETER

The Chairman of the United States Delegation, in connection with the negotiation of what became Article 41 of the Consular Convention between the United States and Hungary, asked the Chairman of the Hungarian Delegation what the Hungarian practice was with respect to those persons whose detention pending trial or subjection to any other deprivation of personal liberty in Hungary would be notified to the United States Consul in Hungary and whom United States consular officer would be authorized to visit during the period of detention in Hungary.

The Chairman of the Hungarian Delegation referred the Chairman of the United States Delegation to American Legation Notes numbers 84 of September 11, 1963, and 178 of January 2, 1964, and to Hungarian Notes numbers S2/12/x/15-1/1963, dated November 30, 1963 and S2/12/x/1-1/1964 of February 7, 1964 in reply. The Chairman of the Hungarian Delegation stated that these notes reflected current Hungarian practice and that, out of the same humanitarian considerations, persons travelling to Hungary with valid American passports and Hungarian visas valid for a temporary stay in Hungary would be given in the benefits of Article 41 of the Consular Convention.

The Chairman of the United States Delegation stated that the Hungarian practice as thus explained by the Chairman of the Hungarian Delegation would constitute a sufficient basis for consular notification and access in accordance with the terms of Article 41 of the Consular Convention and that he was prepared to accept Article 41 on the basis of that understanding of the Hungarian practice.

The Chairman of the Hungarian Delegation then asked the Chairman of the United States Delegation what the American practice would be with respect to the application of Article 41 of the Consular Convention to persons travelling to the United States with valid Hungarian passports and American visas valid for a temporary stay in the United States. The Chairman of the United States Delegation replied that the American practice would be to give such persons the benefits of Article 41 of the Consular Convention.

The Chairman of the Hungarian Delegation stated that this American practice with respect to the persons mentioned in his inquiry would also constitute a sufficient basis for notification and access of the Consular officer in accordance with terms of Article 41 of the Consular Convention.

The Senate, as in Committee of the Whole, proceeded to consider Executive B, 93d Congress, 1st session, the exchange of notes with Ethiopia concerning the administration of justice, which was read the second time, as follows:

ADDIS ABABA, October 20, 1972.

His Excellency Dr. MENASSIE HAILE, Minister of Foreign Affairs, Imperial Ethiopian Government, Addis Ababa.

EXCELLENCY: I have the honor to refer to the Note of September 16, 1965 from the Ministry of Foreign Affairs which refers to the Treaty of Amity and Economic Relations between the United States of America and Ethiopia, signed at Addis Ababa on Septem-

ber 7, 1951, and proposes that the Notes of the same date accompanying that Treaty and concerning the Administration of Justice be terminated.

Upon instruction of my government I have the honor to state that the United States agrees to the termination of the above-mentioned exchange, such termination to be effected on the date of a Note of Confirmation to be presented to the Imperial Ethiopian Government by the Government of the United States of America at the earliest possible time.

The Government of the United States of America for its part has the honor to inform the Imperial Ethiopian Government that pending transmission of its aforesaid Note of Confirmation it would not expect these provisions to be invoked. The Government of the United States of America takes note of the Imperial Ethiopian Government's views thereon, agrees that these provisions do not accord with current international practice and would advise United States citizens wishing to invoke them accordingly, should the issue arise during the interim period.

I avail myself of this opportunity to renew to Your Excellency the assurances of my highest consideration.

E. ROSS ADAIR,
American Ambassador.

IMPERIAL ETHIOPIAN GOVERNMENT,

MINISTRY OF FOREIGN AFFAIRS,

Addis Ababa, September 16, 1965.

His Excellency EDWARD M. KORRY,
Ambassador of the United States of America,
Addis Ababa.

EXCELLENCY: I have the honour to refer to the Treaty of Amity and Economic Relations between Ethiopia and the United States of America, signed at Addis Ababa on September 7, 1951, and to propose that the notes concerning the administration of justice which were exchanged on the same date, and which are an integral part of that treaty, be terminated.

If the foregoing meets with the approval of the Government of the United States of America, it is proposed that this note and Your Excellency's reply agreeing thereto shall constitute an agreement between Ethiopia and the United States of America, which shall enter into force on the date of your reply.

I avail myself of this opportunity to renew to Your Excellency the assurances of my highest consideration.

KETEMA YIFRU,
Minister of State For Foreign Affairs.

The Senate, as in Committee of the Whole, proceeded to consider Executive R, 92d Congress, 2d session, the Convention with Japan for the Protection of Birds and Their Environment, which was read the second time, as follows:

CONVENTION BETWEEN THE GOVERNMENT OF THE UNITED STATES OF AMERICA AND THE GOVERNMENT OF JAPAN FOR THE PROTECTION OF MIGRATORY BIRDS AND BIRDS IN DANGER OF EXTINCTION, AND THEIR ENVIRONMENT

The Government of the United States of America and the Government of Japan,

Considering that birds constitute a natural resource of great value for recreational, aesthetic, scientific, and economic purposes, and that this value can be increased with proper management,

Considering that many species of birds migrate between areas of the United States of America and of Japan, where such birds live temporarily,

Considering that island environments are particularly susceptible to disturbance, that many species of birds of the Pacific Islands have been exterminated, and that some other

species of birds are in danger of extinction, and

Desiring to cooperate in taking measures for the management, protection, and prevention of the extinction of certain birds,

Therefore, have agreed as follows:

ARTICLE I

This Convention shall apply:

(a) For the United States of America, to all areas of the United States of America and its possessions including the Trust Territory of the Pacific Islands;

(b) For Japan, to all areas under the administration of Japan.

ARTICLE II

1. In this Convention, the term "migratory birds" means:

(a) The species of birds for which there is positive evidence of migration between the two countries from the recovery of bands or other markers; and

(b) The species of birds with subspecies common to both countries or, in the absence of subspecies, the species of birds common to both countries. The identification of these species and subspecies shall be based upon specimens, photographs or other reliable evidence.

2. (a) The list of the species defined as migratory birds in accordance with paragraph 1 of this Article is contained in the Annex to this Convention.

(b) The competent authorities of the Contracting Parties shall review from time to time the Annex and, if necessary, make recommendations to amend it.

(c) The Annex shall be considered amended 3 months after the date upon which the two Governments confirm, by an exchange of diplomatic notes, their respective acceptance of such recommendations.

ARTICLE III

1. The taking of the migratory birds or their eggs shall be prohibited. Any sale, purchase or exchange of these birds or their eggs, taken illegally, alive or dead, and any sale, purchase or exchange of the products thereof or their parts shall also be prohibited. Exceptions to the prohibition of taking may be permitted in accordance with the laws and regulations of the respective Contracting Parties in the following cases:

(a) For scientific, educational, propagative or other specific purposes not inconsistent with the objectives of this Convention;

(b) For the purpose of protecting persons and property;

(c) During open hunting seasons established in accordance with paragraph 2 of this Article;

(d) With respect to private game farms;

(e) Taking by Eskimos, Indians, and indigenous peoples of the Trust Territory of the Pacific Islands for their own food and clothing.

2. Open seasons for hunting migratory birds may be decided by each Contracting Party respectively. Such hunting seasons shall be set so as to avoid their principal nesting seasons and to maintain their populations in optimum numbers.

3. Each Contracting Party shall endeavor to establish sanctuaries and other facilities for the protection or management of migratory birds.

ARTICLE IV

1. Both Contracting Parties agree that special protection is desirable for the preservation of species or subspecies of birds which are in danger of extinction.

2. Whenever either Contracting Party has determined the species or subspecies of birds which are in danger of extinction and prohibited the taking thereof, the Contracting Party shall inform the other Contracting Party of such determination, and of any cancellation thereafter of such determination.

3. Each Contracting Party shall control

the exportation or importation of such species or subspecies of birds as are determined in accordance with paragraph 2 of this Article, and of the products thereof.

ARTICLE V

1. The Contracting Parties shall exchange data and publications regarding research on migratory birds and birds in danger of extinction.

2. The Contracting Parties shall encourage the establishment of joint research programs on, and conservation of, migratory birds and birds in danger of extinction.

ARTICLE VI

Each Contracting Party shall endeavor to take appropriate measures to preserve and enhance the environment of birds protected under Articles III and IV. In particular, it shall:

(a) Seek means to prevent damage to such birds and their environment, including, especially, damage resulting from pollution of the seas;

(b) Endeavor to take such measures as may be necessary to control the importation of live animals and plants which it determines to be hazardous to the preservation of such birds; and

(c) Endeavor to take such measures as may be necessary to control the introduction of live animals and plants which could disturb the ecological balance of unique island environments.

ARTICLE VII

Each Contracting Party agrees to take measures necessary to carry out the purposes of this Convention.

ARTICLE VIII

Upon the request of either Government, the two Governments shall hold consultations regarding the operation of this Convention.

ARTICLE IX

1. This Convention shall be ratified and the instruments of ratification shall be exchanged at Washington as soon as possible.

2. This Convention shall enter into force on the date of the exchange of the instruments of ratification. It shall remain in force for 15 years and shall continue in force thereafter until terminated as provided herein.

3. A Contracting Party may, by giving one year's written notice, terminate this Convention at the end of the initial 15 year period or at any time thereafter.

IN WITNESS WHEREOF the representatives of the two Governments have signed this Convention.

DONE in duplicate, in the English and Japanese languages, both equally authentic, at Tokyo, this fourth day of March, 1972. For the Government of the United States of America:

ARMIN H. MEYER

For the Government of Japan:

TAKEO FUKUDA

ANNEX

1 White-billed or Yellow-billed loon (*Gavia admsii*)

2 Arctic loon (*Gavia arctica*)

3 Red-throated loon (*Gavia stellata*)

4 Red-necked grebe (*Podiceps grisegena*)

5 Horned grebe (*Podiceps auritus*)

6 Short-tailed albatross (*Diomedea albatrus*)

7 Black-footed albatross (*Diomedea nigripes*)

8 Laysan albatross (*Diomedea immutabilis*)

9 Northern fulmar (*Fulmarus glacialis*)

10 Pink-footed shearwater (*Puffinus carneipes*)

11 Wedge-tailed shearwater (*Puffinus pacificus*)

12 Sooty shearwater (*Puffinus griseus*)

13 Slender-billed shearwater (*Puffinus tenuirostris*)

14 Christmas shearwater (*Puffinus nativitatis*)

15 Bonin Island petrel (*Pterodroma hypoleuca*)

16 Bulwer's petrel (*Bulweria bulwerii*)

17 Fork-tailed storm petrel (*Oceanodroma furcata*)

18 Leach's storm petrel (*Oceanodroma leucorhoa*)

19 Harcourt's or Madeiran storm petrel (*Oceanodroma castro*)

20 Tristram's storm petrel (*Oceanodroma tristrami*)

21 Wilson's storm petrel (*Oceanites oceanicus*)

22 Red-tailed tropicbird (*Phaethon rubricauda*)

23 White-tailed tropicbird (*Phaethon lepturus*)

24 Masked or Blue-faced booby (*Sula dactylatra*)

25 Red-footed booby (*Sula sula*)

26 Brown booby (*Sula leucogaster*)

27 Pelagic cormorant (*Phalacrocorax pelagicus*)

28 Red-faced cormorant (*Phalacrocorax urile*)

29 Greater frigatebird (*Fregata minor*)

30 Lesser frigatebird (*Fregata ariel*)

31 Cattle egret (*Bubulcus ibis*)

32 Plumed egret (*Egretta intermedia*)

33 Reef heron (*Demigretta sacra*)

34 Japanese night heron (*Gorsachius goisagi*)

35 Chinese little bittern (*Ixobrychus sinensis*)

36 Schrenck's little bittern (*Ixobrychus eurhythmus*)

37 Whooper swan (*Cygnus cygnus*)

38 Canada goose (*Branta canadensis*)

39 Brant (*Branta bernicla*)

40 Emperor goose (*Anser canagicus*)

41 White-fronted goose (*Anser albifrons*)

42 Bean goose (*Anser fabalis*)

43 Snow goose (*Anser caerulescens*)

44 Mallard (*Anas platyrhynchos*)

45 Gadwall (*Anas strepera*)

46 Pintail (*Anas acuta*)

47 Teal (including Green-winged teal)

(*Anas crecca*)

48 Falcated teal (*Anas falcata*)

49 Garganey (*Anas querquedula*)

50 Baikal teal (*Anas formosa*)

51 European widgeon (*Mareca penelope*)

52 American widgeon (*Mareca americana*)

53 Shoveler (*Spatula clypeata*)

54 Common pochard (*Aythya ferina*)

55 Canvasback (*Aythya valisineria*)

56 Tufted duck (*Aythya fuligula*)

57 Baer's pochard (*Aythya baeri*)

58 Common goldeneye (*Bucephala clangula*)

59 Bufflehead (*Bucephala albeola*)

60 Oldsquaw (*Clangula hyemalis*)

61 Harlequin duck (*Histrionicus histrionicus*)

62 Steller's elder (*Polysticta stelleri*)

63 Common scoter (*Melanitta nigra*)

64 Common merganser (*Mergus merganser*)

65 Red-breasted merganser (*Mergus serrator*)

66 Smew (*Mergus albellus*)

67 Rough-legged hawk (*Bufo Lagopus*)

68 Gray sea-eagle (*Haliaeetus albicilla*)

69 Steller's sea-eagle (*Haliaeetus pelagicus*)

70 Japanese sparrow hawk (*Accipiter virgatus*)

71 Black kite (*Milvus migrans*)

72 Osprey (*Pandion haliaetus*)

73 Gyrfalcon (*Falco rusticolus*)

74 Peregrine falcon (*Falco peregrinus*)

75 Sandhill crane (*Grus canadensis*)

76 Common gallinule or Moorhen (*Gallinula chloropus*)

77 Eurasian coot (*Fulica atra*)

78 Snowy or Kentish plover (*Charadrius alexandrinus*)

79 Little ringed plover (*Charadrius dubius*)

80 Ringed plover (*Charadrius hiaticula*)
 81 Greater sand plover (*Charadrius lesch- enaultii*)
 82 Mongolian plover (*Charadrius mon- golus*)
 83 Dotterel (*Eudromias morinellus*)
 84 American golden plover (*Pluvialis dominica*)
 85 Black-bellied plover (*Pluvialis squa- tarola*)
 86 Ruddy turnstone (*Arenaria interpres*)
 87 Common snipe (*Gallinago gallinago*)
 88 Swinhoe's snipe (*Gallinago megala*)
 89 Jacksnipe (*Limnospiza minor*)
 90 Long-billed dowitcher (*Limnodromus scolopaceus*)
 91 Bar-tailed godwit (*Limosa lapponica*)
 92 Wood sandpiper (*Tringa glareola*)
 93 Wandering or Polynesian tattler (*Tringa incana* including *T. brevipes*)
 94 Common sandpiper (*Tringa hypo- leucos*)
 95 Spotted redshank (*Tringa erythropus*)
 96 Greenshank (*Tringa nebularia*)
 97 Greater yellowlegs (*Tringa melano- leuca*)
 98 Whimbrel (*Numenius phaeopus*)
 99 Bristle-thighed curlew (*Numenius tahitiensis*)
 100 Least whimbrel or Eskimo curlew (*Numenius minutus* including *Numenius borealis*)
 101 Australian curlew (*Numenius mada- gascariensis*)
 102 Knot (*Calidris canutus*)
 103 Great knot (*Calidris tenuirostris*)
 104 Curlew sandpiper (*Calidris ferruginea*)
 105 Dunlin (*Calidris alpina*)
 106 Rufous-necked sandpiper (*Calidris ruficollis*)
 107 Long-toed stint or Least sandpiper (*Calidris minutilla* including *Calidris sub- minuta*)
 108 Temminck's stint (*Calidris tem- minckii*)
 109 Baird's sandpiper (*Calidris bairdii*)
 110 Sharp-tailed sandpiper (*Calidris acu- minata*)
 111 Pectoral sandpiper (*Calidris melanotos*)
 112 Spoon-billed sandpiper (*Eurynorhyn- chus pygmaeus*)
 113 Buff-breasted sandpiper (*Tryngites subruficollis*)
 114 Ruff (*Philomachus pugnax*)
 115 Broad-billed sandpiper (*Limicola fal- cinellus*)
 116 Sanderling (*Crocethia alba*)
 117 Northern phalarope (*Lobipes lobatus*)
 118 Red phalarope (*Phalaropus fulicarius*)
 119 Skua (*Catharacta skua*)
 120 Pomarine jaeger (*Stercorarius pomari- nus*)
 121 Parasitic jaeger (*Stercorarius parasiti- cus*)
 122 Long-tailed jaeger (*Stercorarius longi- caudus*)
 123 Glaucous gull (*Larus hyperboreus*)
 124 Glaucous-winged gull (*Larus glauce- scens*)
 125 Slaty-backed gull (*Larus schistisagus*)
 126 Herring gull (*Larus argentatus*)
 127 Black-tailed gull (*Larus crassirostris*)
 128 Black-headed gull (*Larus ridibundus*)
 129 Black-legged kittiwake (*Rissa tridac- tyla*)
 130 Sabine's gull (*Xema sabini*)
 131 Ivory gull (*Pagophila eburnea*)
 132 White-winged black tern (*Chlidonias leucopterus*)
 133 Aleutian tern (*Sterna aleutica*)
 134 Common tern (*Sterna hirundo*)
 135 Gray-backed tern (*Sterna lunata*)
 136 Bridled tern (*Sterna anaethetus*)
 137 Black-naped tern (*Sterna sumatrana*)
 138 Least or Little tern (*Sterna albibrons*)
 139 Sooty tern (*Sterna fuscata*)
 140 Brown noddy (*Anous stolidus*)
 141 Lesser or Black noddy (*Anous tenui- rostris*)
 142 Gray ternlet or Blue-gray noddy (*Pro- celsterna cerulea*)

143 White tern or Fairy tern (*Gygis alba*)
 144 Common murre (*Uria aalge*)
 145 Thick-billed murre (*Uria lomvia*)
 146 Pigeon guillemot (*Cephus columba*)
 147 Ancient murrelet (*Symphiboramphus antiquus*)
 148 Parakeet auklet (*Aethia psittacula*)
 149 Crested auklet (*Aethia cristatella*)
 150 Whiskered auklet (*Aethia pygmaea*)
 151 Least auklet (*Aethia pusilla*)
 152 Rhinoceros auklet (*Cerorhinca mono- cerata*)
 153 Tufted puffin (*Lunda cirrhata*)
 154 Horned puffin (*Fratercula cornicu- lata*)
 155 Snowy owl (*Nyctea scandiaca*)
 156 Short-eared owl (*Asio flammeus*)
 157 Common cuckoo (*Cuculus canorus*)
 158 Oriental or Himalayan cuckoo (*Cucu- lus saturatus*)
 159 Hawk cuckoo (*Cuculus fugax*)
 160 Jungle nightjar (*Caprimulgus indi- cus*)
 161 White-rumped swift (*Apus pacificus*)
 162 Wryneck (*Jynx torquilla*)
 163 Barn swallow (*Hirundo rustica*)
 164 Bank swallow (*Riparia riparia*)
 165 Hawfinch (*Coccothraustes coccoth- raustes*)
 166 Redpoll (including common and hoary redpoll) (*Carduelis flammea* including *C. hornemanni*)
 167 Bullfinch (*Pyrrhula pyrrhula*)
 168 Pine grosbeak (*Pinicola enucleator*)
 169 Brambling (*Fringilla montifringilla*)
 170 Rustic bunting (*Emberiza rustica*)
 171 Golden-crowned sparrow (*Zonotrichia atricapilla*)
 172 White-crowned sparrow (*Zonotrichia leucophrys*)
 173 Fox sparrow (*Passerella iliaca*)
 174 Skylark (*Alauda arvensis*)
 175 Water pipit (*Anthus spinoletta*)
 176 Indian tree pipit (*Anthus hodgsoni*)
 177 Red-throated pipit (*Anthus cervinus*)
 178 White or Pied wagtail (*Motacilla alba*)
 179 Gray wagtail (*Motacilla cinerea*)
 180 Yellow wagtail (*Motacilla flava*)
 181 Narcissus flycatcher (*Muscicapa nar- cissina*)
 182 Chinese gray-spotted flycatcher (*Mus- cicapa griseisticta*)
 183 Middenförf's grasshopper warbler (*Locustella ochotensis*)
 184 Arctic warbler (*Phylloscopus borealis*)
 185 Eye-browed thrush (*Turdus ob- scurus*)
 186 Siberian rubythroat (*Erithacus cal- liope*)
 187 Mountain hedge-sparrow or accentor (*Prunella montanella*)
 188 Violet-backed starling (*Sturnus philippensis*)
 189 Ashy starling (*Sturnus cineraceus*)

The ACTING PRESIDENT pro tem- pore. Without objection, the following five treaties will be considered as having passed through their various parlia- mentary stages up to and including the presentation of the resolutions of ratifi- cation:

The Consular Convention with Poland, Ex. U (92d Cong., 2d sess.);

The Consular Convention with Ro- mania, Ex. V (92d Cong., 2d sess.);

The Consular Convention with Hun- gary, Ex. W (92d Cong., 2d sess.);

The Exchange of Notes with Ethiopia Concerning the Administration of Jus- tice, Ex. B (93d Cong., 1st sess.);

A Convention with Japan for the Pro- tection of Birds and Their Environ- ment, Ex. R (92d Cong., 2d sess.).

The clerk will read the five resolutions of ratification.

The assistant legislative clerk read as follows:

Resolved, (Two-thirds of the Senators present concurring therein), That the Sen- ate advise and consent to the ratification of the Consular Convention between the Gov- ernment of the United States of America and the Government of the Polish People's Republic, with Protocols, signed at Warsaw on May 31, 1972 (Ex. U, 92-2).

Resolved, (Two-thirds of the Senators present concurring therein), That the Sen- ate advise and consent to the ratification of the Consular Convention between the United States of America and the Socialist Republic of Romania, with Protocol, signed at Bucharest on July 5, 1972 (Ex. V, 92-2).

Resolved, (Two-thirds of the Senators present concurring therein), That the Sen- ate advise and consent to the ratification of the Consular Convention between the United States of America and the Hungarian People's Republic, signed at Budapest on July 7, 1972 (Ex. W, 92-2).

Resolved, (Two-thirds of the Senators present concurring therein), That the Sen- ate advise and consent to ratification of a note of September 16, 1965, from the Govern- ment of Ethiopia and a reply note of October 20, 1972, from the Government of the United States which would terminate notes ex- changed on September 7, 1961, concerning the administration of justice and constitut- ing an integral part of the treaty of amity and economic relations between the United States and Ethiopia (Ex. B, 93-1).

Resolved, (Two-thirds of the Senators present concurring therein), That the Sen- ate advise and consent to the ratification of the Convention between the Government of the United States of America and the Gov- ernment of Japan for the protection of mi- gratory birds and birds in danger of extinc- tion, and their environment, signed at Tokyo on March 4, 1972 (Ex. R, Ninety-second Con- gress, Second Session).

Mr. ROBERT C. BYRD. Mr. President, I ask for the yeas and nays on the five treaties.

The yeas and nays were ordered.

CONSULAR CONVENTION WITH POLAND (EX. U, 92D CONG., 2D SESS.)

The ACTING PRESIDENT pro tem- pore. The question is, Will the Senate advise and consent to the resolution of ratification of Executive U, 92d Congress, 2d session, a Consular Convention with Poland?

On this question the yeas and nays have been ordered, and the clerk will call the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from Louisiana (Mr. JOHNSTON), the Senator from Maine (Mr. MUSKIE), the Senator from Cali- fornia (Mr. TUNNEY), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Arkansas (Mr. FULBRIGHT), are necessarily absent.

I also announce that the Senator from Mississippi (Mr. STENNIS), is absent be- cause of illness.

I further announce that, if present and voting, the Senator from Arkansas (Mr. FULBRIGHT), the Senator from California (Mr. TUNNEY), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Louisiana (Mr. JOHNSTON) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Maryland (Mr. MATHIAS) and the Senator from Texas (Mr. Tow- ER) are necessarily absent.

The Senator from Wyoming (Mr. HAN- SEN) and the Senator from Idaho (Mr.

McCLURE) are detained on official business.

If present and voting, the Senator from Wyoming (Mr. HANSEN), the Senator from Idaho (Mr. McCLURE) and the Senator from Texas (Mr. TOWER) would each vote "yea."

The yeas and nays resulted—yeas 90, nays 0, as follows:

The PRESIDING OFFICER (Mr. HATHAWAY). Two-thirds of the Senators present and voting having voted in the affirmative, the resolution of ratification is agreed to.

AN EXCHANGE OF NOTES WITH ETHIOPIA CONCERNING THE ADMINISTRATION OF JUSTICE (EX. B, 93D CONG., 1ST SESS.)

The PRESIDING OFFICER. The Senate will proceed to vote on Executive B, 2d session, 92d Congress, an Exchange of Notes with Ethiopia Concerning the Administration of Justice.

The question is, Will the Senate advise and consent to the resolution of ratification? On this question the yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from Louisiana (Mr. JOHNSTON), the Senator from Maine (Mr. MUSKIE), the Senator from California (Mr. TUNNEY), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I also announce that the Senator from Mississippi (Mr. STENNIS) is absent because of illness.

I further announce that, if present and voting, the Senator from Louisiana (Mr. JOHNSTON), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from California (Mr. TUNNEY) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Maryland (Mr. MATHIAS) and the Senator from Texas (Mr. TOWER) are necessarily absent.

The Senator from Wyoming (Mr. HANSEN) is detained on official business.

If present and voting, the Senator from Wyoming (Mr. HANSEN) and the Senator from Texas (Mr. TOWER) would each vote "yea."

The yeas and nays resulted—yeas 92, nays 0, as follows:

The PRESIDING OFFICER. On this vote, the yeas are 92, and the nays are 0. Two-thirds of the Senators present and voting having voted in the affirmative, the resolution of ratification is agreed to.

A CONVENTION WITH JAPAN FOR THE PROTECTION OF BIRDS AND THEIR ENVIRONMENT (EX. R. 92D CONG., 2D SESS.)

The PRESIDING OFFICER. The Senate will proceed to vote on Executive R. 2d session, 92d Congress, a Convention with Japan for the Protection of Birds and Their Environment.

Mr. MAGNUSON. Mr. President, it is a distinct pleasure for me to join my colleague from Arkansas (Mr. FULBRIGHT) on the matter of this important international convention to conserve endangered species. The Committee on Commerce, which I am privileged to chair, has recently conducted extensive hearings into the matter of endangered species as well as legislation to grant special protection to worldwide species of marine mammals.

I am convinced that the U.S. Government is providing international leadership in this area of wildlife conservation. As a delegate to the United Nations Conference on the Human Environment in Stockholm last summer, it was my pleasure to hear a speech by Dr. Robert M. White, Administrator of the Na-

tional Oceanic and Atmospheric Administration—NOAA—of the Department of Commerce. In my opinion, that speech—aimed at providing worldwide protection of our dwindling stocks of great whales—was the finest made at the entire conference. Dr. White received a standing ovation, one which was richly deserved. Dr. White is to be commended for his leadership at NOAA, not only in protecting and conserving the fish and marine mammals under his jurisdiction, but in creating a worldwide spirit of respect for NOAA's reputation for scientific expertise in the oceans resources.

President Nixon has just appointed Dr. White as the U.S. Commissioner to the International Whaling Commission. In this role, I am convinced that Dr. White will continue to bring pressure on those nations which continue their whaling operations to begin phasing them out as soon as possible. I am informed that even the Japanese, who were the ones responsible for blocking a 10-year whaling moratorium at the Stockholm conference, are beginning to have second thoughts about the impact of their actions.

For the information of my colleagues, the International Whaling Commission last year in London—because of American pressure—finally adopted some meaningful quotas on the fin whale. These quotas are in addition to the complete protection allegedly afforded to the white whales, the bowheads, the humpbacks, the grey, and the blue whales. The Japanese and Soviet whaling commissioners are attempting to resist this pressure. But I believe that the weight of world opinion eventually will force even these nations to cease their wasteful whaling practices.

The Marine Mammal Protection Act of 1972 was the result of many months of work by the Commerce Committee last year. This act, signed by President Nixon in October, is the most far-reaching animal protection legislation in the world. It establishes the most rigid standards of protection of all marine mammals, and it requires the Department of the Interior and the National Oceanic and Atmospheric Administration to prevent the killing, capturing, harassing, or importing of these animals except under certain provisions which will benefit the health and stability of the stocks.

On another matter, Mr. President, two existing international organizations involved in fishery management and conservation face difficult problems in the years ahead. They are the International Commission on North Atlantic Fisheries, ICNAF, and the International North Pacific Fisheries Commission. We have all heard with dismay of the dwindling stocks of finfish off the New England coast because of overfishing by fleets of vessels from East and West Europe and some from the Far East, notably Japan. But I would warn my colleagues today that a day of reckoning is ahead, not only for the fisheries of the North Atlantic, but in the North Pacific and Bering Sea as well. As a result of overfishing, our Nation's sadly depressed fishing industry faces darker days ahead. Many fishermen are beginning to wonder if any fish will be left by the time a satisfactory law of

the sea treaty is agreed upon in the United Nations. It will require all of the talent of our State Department negotiators to protect our Nation's fisheries resources.

We have a long way to go. I commend my distinguished friend, the chairman of the Foreign Relations Committee, for the work he has done in this area, too. In my opinion, the Congress has been far out front in recognizing this issue and in recommending and pushing legislation to solve these problems.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the resolution of ratification? The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from Louisiana (Mr. JOHNSTON), the Senator from Maine (Mr. MUSKIE), the Senator from California (Mr. TUNNEY), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I also announce that the Senator from Mississippi (Mr. STENNIS) is absent because of illness.

I further announce that, if present and voting, the Senator from Louisiana (Mr. JOHNSTON), the Senator from California (Mr. TUNNEY), and the Senator from New Jersey (Mr. WILLIAMS) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Maryland (Mr. MATHIAS) and the Senator from Texas (Mr. TOWER) are necessarily absent.

The Senator from Wyoming (Mr. HANSEN) is detained on official business.

If present and voting, the Senator from Wyoming (Mr. HANSEN) and the Senator from Texas (Mr. TOWER) would each vote "yea."

The PRESIDING OFFICER. On this vote, the yeas are 92 and the nays are 0. Two-thirds of the Senators present and

voting having voted in the affirmative, the resolution of ratification is agreed to.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate return to legislative session.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

EXTENSION OF CLEAN AIR ACT

Mr. MANSFIELD. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on H.R. 5445.

The PRESIDING OFFICER laid before the Senate H.R. 5445, an act to extend the Clean Air Act, as amended, for 1 year, which was read twice by title.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 5445.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana?

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is open to amendment.

If there be no amendment to be offered, the question is on the third reading of the bill.

The bill was ordered to a third reading, read the third time, and passed.

EXTENSION OF SOLID WASTE DISPOSAL ACT

Mr. MANSFIELD. Mr. President, I ask the Chair to lay before the Senate a message from the House on H.R. 5446.

The PRESIDING OFFICER laid before the Senate H.R. 5446, an act to extend the Solid Waste Disposal Act, as amended, for 1 year, which was read twice by title.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of the bill.

There being no objection, the Senate proceeded to consider the bill.

The PRESIDING OFFICER. The bill is open to amendment.

If there be no amendment to be offered, the question is on the third reading of the bill.

The bill was ordered to a third reading, read the third time, and passed.

LEAVE OF ABSENCE

Mr. GRIFFIN. Mr. President, I ask unanimous consent that the Senator from Massachusetts (Mr. BROOKE) be permitted leave from the Senate on official business for a visit to Indochina from Tuesday, March 27, to Monday, April 30, 1973.

The PRESIDING OFFICER (Mr. HATHAWAY). Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States were communicated to the Senate by Mr. Leonard, one of his secretaries.

REPORT ENTITLED "WATER RESOURCES OF THE DELMARVA PENINSULA, A SUMMARY REPORT TO THE CONGRESS"—MESSAGE FROM THE PRESIDENT

The PRESIDING OFFICER (Mr. HATHAWAY) laid before the Senate a message from the President of the United States, which, with the accompanying report, was referred to the Committee on Interior and Insular Affairs. The message is as follows:

To the Congress of the United States:

I am pleased to submit the enclosed report, "Water Resources of the Delmarva Peninsula, a Summary Report to the Congress," by E. M. Cushing, I. H. Kantrowitz, and K. R. Taylor, which was prepared in compliance with Public Law 89-618 (S. 2287), October 4, 1966.

The Delmarva study was made in response to the specific act cited above, which was sponsored by Senator J. Caleb Boggs of Delaware (S. 2287) and Secretary of the Interior Rogers C. B. Morton (H.R. 9922) who was a Representative from Maryland in 1966. Public Law 89-618 authorized and directed the Secretary of the Interior to make a comprehensive investigation of the water resources of the Delmarva Peninsula. The principal objective of the study was to determine the availability of freshwater supplies to meet future needs of the peninsula area. The summary report indicates that the amount of fresh water that can be developed perennially on the peninsula is about 1,500 million gallons per day. This amount is more than 10 times the use in 1970 and about six times the estimated use of water on the peninsula by the year 2010.

In addition to this summary report to the Congress, required by Public Law 89-618, the Geological Survey plans to compile and publish in 1973 a more detailed report on the study for use by public and private agencies and individuals. That report will provide information for use in long-range planning, development, and management of water supplies.

RICHARD NIXON.

THE WHITE HOUSE, March 27, 1973.

REPORT OF THE NATIONAL ENDOWMENT FOR THE HUMANITIES—MESSAGE FROM THE PRESIDENT

The PRESIDING OFFICER (Mr. HATHAWAY) laid before the Senate a message from the President of the United States, which, with the accompanying report, was referred to the Committee on Labor and Public Welfare. The message is as follows:

To the Congress of the United States:

I am pleased to transmit the Seventh Annual Report of the National Endow-

ment for the Humanities, for fiscal year 1972.

It is essential that the disciplines of the humanities—languages, history, philosophy, literature and ethics among others—be brought to bear on problems of contemporary concern, both national and international. The Federal Government recognizes this need—and has been responsive to it.

I particularly commend to your attention the program of "Youthgrants in the Humanities," begun in fiscal year 1972, which provides needed support for young people doing scholarly work in the humanities. Another impressive effort is the Endowment's State-Based Program, which, in less than two years, has established committees in 38 States to encourage public education. The "Jefferson Lecture in the Humanities," aimed at bridging the gap between humanistic learning and public affairs, is also successfully underway.

The public's response to the work of the National Endowment for the Humanities may be measured in part by the fact that public contributions to the Endowment have exceeded federally appropriated funds for the third year in a row. This is clear evidence of broad public support for the objectives of the National Endowment and, I believe, gives added justification to the steadily increasing funding which I have requested and which the Congress has provided for its very worthwhile endeavors.

RICHARD NIXON.

THE WHITE HOUSE, March 27, 1973.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer (Mr. HATHAWAY) laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(The nominations received today are printed at the end of Senate proceedings.)

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, what is the pending business?

The PRESIDING OFFICER. Rule VII provides that morning business be now in order.

PUBLIC HEALTH SERVICE ACT EXTENSION OF 1973

Mr. MANSFIELD. Mr. President, I move that the Senate return to the con-

sideration of Calendar No. 91, S. 1136; that it be laid before the Senate and made the pending business without benefit of a morning hour.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read the bill by title, as follows:

A bill (S. 1136) to extend the expiring authorities in the Public Health Service Act and the Community Mental Health Centers Act.

The Senate proceeded to consider the bill.

Mr. KENNEDY. I thank the Chair. I ask unanimous consent that Dr. Larry Horowitz have the privilege of the floor during the consideration of this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I rise to urge the enactment of S. 1136, a bill to extend those provisions of the Public Health Service Act and the Community Health Centers Act which expire June 30, 1973. Twelve of the most significant authorities of the act, including health services research and development, health statistics, public health training, migrant health, comprehensive health planning, medical libraries, Hill-Burton hospital construction, allied health training, regional medical program, family planning and population research, community mental health centers, and developmental disabilities are involved in this legislation.

This bill has broad bipartisan sponsorship in both Houses of Congress, including 15 of the 16 members of the Labor and Public Welfare Committee in the Senate and all of the members of the Subcommittee on Public Health and Environment in the House.

Mr. President, the Labor and Public Welfare Committee has tried repeatedly, since last May, to avert the monumental legislative logjam which this legislation responds to.

Last year, the committee included in S. 3327, the Health Maintenance Organization and Resources Development Act of 1972, a separate title which proposed to extend and improve several expiring Public Health Service authorities. The committee invited the administration to testify in respect to that title of S. 3327 on May 11, 1972.

Former Department of Health, Education, and Welfare Secretary Richardson stated at the time:

All these authorities are major components of the Department's health program and it is our preference to be able to address them all comprehensively on the basis of information we are currently analyzing in our planning, budget, and legislative review process. At the present time, our planning process is not sufficiently advanced to a point which would permit us to testify on May 17 on these expiring authorities.

Subsequently, the committee conducted a hearing on S. 3327 and heard the following organizations testify vigorously in support of the bill:

American Nursing Home Association;
American Dental Association;
American Public Health Association;

Association of Schools of Allied Health Professions;
American Hospital Association;
Association of State and Territorial Health Officers;
Comprehensive Health Planning Agency of Missouri;

American Nurses Association;
American Dental Assistant Association;

Association of Dental Hygienists;
American Association of Dental Schools;

California School of Dentistry, University of Southern California;

American Psychiatric Association;
National Association for Mental Health;

Committee Against Mental Illness; and
National Council of Community Mental Health Centers.

At the time the committee met in executive session to mark up S. 3327, it decided to separate the provisions contained within title V of that bill from the HMO bill, and to order those provisions favorably reported to the Senate as a separate bill. The new bill, S. 3716, the Health Facilities, Manpower, and Community Mental Health Centers Act of 1972 was favorably reported to the Senate by the committee by a vote of 16-0 on August 16, 1972.

In addition, in 1972 the committee acted on a number of other of the expiring Public Health Service authorities separately. For example, on July 27, 1972, the committee held a hearing on S. 3441, public health training and on S. 3752, medical libraries. All of the witnesses—except the administration—who testified on those bills supported prompt enactment of the legislation. The committee received testimony in support of those bills from the dean of the University of Michigan School of Public Health, the Association of American Medical Colleges, the American Academy of Family Physicians, the American Medical Association, the Student American Medical Association, the librarian of the Medical Library of the Washington Hospital Center, the Association of Research Libraries, and the Association for Hospital Medical Education.

For the administration, the Assistant Secretary of the Department of Health, Education, and Welfare for Health and Scientific Affairs, Dr. Merlin K. DuVal, testified:

Generally, Mr. Chairman, we are currently reviewing all public health service authorities that expire at the end of fiscal year 1973 with a view to identifying necessary and desirable amendments. This review, however, is not complete. We anticipate submitting our detailed legislative recommendations in connection with the 1974 budget. We request your cooperation in not extending any of these authorities until we have completed our review. Accordingly, we recommend against enactment of S. 3441, S. 3764, and S. 3752 at this time.

The Senate proceeded to the consideration of S. 3716 as well as S. 3441, S. 3752, and S. 3762, an extension of the expiring provisions of the Public Health Service Act in respect to migrant health, on September 20, 1972. After incorporating

the provisions of S. 3441, S. 3752, and S. 3762 into S. 3716, the Senate passed S. 3716 by a vote of 78-0.

Unfortunately, companion legislation never emerged from the House of Representatives.

Mr. President, on January 29 of this year, President Nixon's budget was submitted to Congress. But contrary to our expectations, no HEW legislative proposals accompanied the budget.

That budget did make clear, however, the President's intention to allow several important health authorities to expire—including regional medical programs, Hill-Burton, community mental health centers, Public Health Training and Allied Health.

Thus, the budget asked the Congress to accept the phasing out of several health programs without providing an overall indication of administration intentions for the entire Public Health Service Act.

On January 17, then Secretary-designate Weinberger testified at his confirmation hearings that detailed legislative proposals would be forthcoming in the February-March area.

By March 8 there was still no indication of any forthcoming legislative proposals. Thus, given the absence of any specific legislative proposals, the short time to the expiration of the health authorities, and the President's intention to let several of those authorities lapse, the Labor and Public Welfare Committee introduced S. 1136. Its intention was and is to give the Congress the time it requires to play its constitutionally guaranteed role in determining the substantive shape of legislation.

Mr. President, at the time S. 1136 was introduced it was placed directly on the Senate Calendar. Subsequently, the Senate unanimously agreed to the motion of the assistant minority leader, Senator GARRIN, to commit the bill to the Labor and Public Welfare Committee in order for Secretary Weinberger to have an opportunity to comment upon it. Further, the Senate directed the committee to report the bill within 2 weeks.

Secretary Weinberger testified in opposition to the bill on March 22. Once again the Secretary could produce no specific constructive legislative proposals. Once again, he said they would be forthcoming but refused to give a date. And in the course of the hearing, it became very clear that the dismantling of those programs currently out of favor with the administration had begun in earnest. The director of the regional medical programs had issued phaseout instructions to all the RMP's. Several of those phaseout plans were available to the committee at the time of the hearing. Each made it clear that orders to dismantle the program had been given.

In addition, the committee obtained a copy of a detailed personnel list which indicated when each of the central office RMP positions was to be abolished.

Under questioning, Secretary Weinberger conceded that no Hill-Burton grant money had yet been allocated to the States for this current fiscal year.

Mr. President, the Secretary's appearance before our committee confirmed our fears. The process of phasing out health programs has begun in earnest; and yet the Congress has had no opportunity to work its will.

Our committee is on record to take a fundamental look at the entire Public Health Service Act. I reiterate that commitment now. We will strive to consolidate, recodify and rationalize the legislative authorities in a manner which defines the most appropriate Federal role in meeting the health needs of the American people.

Mr. President, the administration is truly isolated in its position on S. 1136. Our committee has received supportive, written testimony from the following groups:

- American Academy of Pediatrics;
- American Association of Colleges of Pharmacy;
- American Association of Dental Schools;
- American Clinical Laboratory Association;
- American Dental Association;
- American Dental Hygienists' Association;
- American Dietetic Association;
- American Federation of Labor and Congress of Industrial Organizations;
- American Federation of State, County, and Municipal Employees—AFL-CIO;
- American Heart Association, Inc.;
- American Hospital Association;
- American Nurses' Association, Inc.;
- American Public Health Association;
- American Speech and Hearing Association;
- Association of American Medical Colleges;
- Association of Schools of Public Health, Inc.;
- Association of State and Territorial Health Officers;
- Association of University Programs in Hospital Administration;
- Boston University School of Nursing;
- Columbia Montour Mental Health Association;
- Federation of Associations of Schools of the Health Professions;
- Sandra R. Gill;
- Harvard University;
- International Union, United Automobile, Aerospace, and Agricultural Implement Workers of America—UAW;
- Joint Health Venture;
- Michigan Dental Association;
- National Association of Counties;
- National Council of Community Mental Health Centers, Inc.;
- The Network Staff;
- New York City Health and Hospitals Corp.
- New York State Association for Mental Health, Inc.;
- United Mine Workers of America;
- United States Catholic Conference;
- and
- The University of Michigan.

I ask unanimous consent to have printed in the Record, at the conclusion of my remarks all the written testimony from these groups.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. KENNEDY. Mr. President, in addition, evaluation studies done by HEW cast doubt on the basic premises of their position. The National Institutes of Health has developed an in-house rebuttal to the severe reduction in research training grants. Secretary Weinberger dismisses all of this opposition and blames it on the "growing education—health—poverty complex." Yet, under questioning he was unable to name one scientist or one health group supportive of his position.

Mr. President, Wilbur Cohen, one of Mr. Weinberger's distinguished predecessors sums up the differences this way:

It is a simple task to repeal and eliminate health programs. It is a hard and long task to create programs of excellence. Programs should not be wiped out without a careful examination by the Congress of alternatives, options, and the risks and benefits.

It is just such a careful examination that S. 1136 will enable us to make. I urge its enactment.

Mr. President, this statement, I think, indicates the position of the Senate Health Committee and myself as its chairman. We have been attempting for just about a year to draw from the administration its positions on the respective health bills, and have been unable to do so.

As my opening statement suggests to the Senate, Secretary Richardson indicated that the administration would make its legislative proposals available to the committee the latter part of this last year, but they were never forthcoming. Then, during the latter part of last year, when the Assistant Secretary for Health appeared before the committee, Dr. DuVal, he indicated that the recommendations would be made available at the time of the submission of the budget in January of this year, but they were still not forthcoming.

Then, at the time of the confirmation hearing of Secretary Weinberger, he indicated that legislative proposals would be available in February or March; then, when he appeared before the committee again only a week ago, he indicated that he was still unable to provide for the committee any legislative proposals. In contrast, he was able only to indicate which pieces of legislation the administration wants terminated. There was no submission of any alternative, really, for the committee to consider on any of the programs marked for termination.

Now we are at the end of March—and it is time for this committee to act. We have, over the period of the past year, met our responsibilities in the consideration of these pieces of legislation. We have passed a number of them, and the record will indicate such. Last year, the House of Representatives failed to act.

Now I think that it is appropriate that we give the kind of careful attention required to improve these various extensions. We have to determine what part of the act should be continued, where there is duplication, overlap inefficiency, and

wastage; and we have to deal with the various difficulties. We are pledged to do just that. While we consider the best course of action we must continue the various health programs which today, in a wide variety of different parts of the country, benefit millions of Americans from all walks of life.

So we are pledged to accept the challenge of the administration to make these various health programs more efficient, equitable, and to eliminate waste and duplication.

We would have welcomed statements and comments by the administration as to ways in which they think the existing programs could have been made more efficient; but we never received that information. The only information we did receive was that the administration intended to get several parts of this legislation; like the regional medical programs, Hill-Burton, community mental health centers and allied health.

Our health subcommittee is committed to use the period afforded by S. 1136 to examine in considerable detail, these various pieces of important legislation and to make them more efficient; we will make the act compatible with a future health insurance program, regardless of the final form that health insurance takes.

It is because of that understanding on the part of 15 of the 16 members of the Labor and Public Welfare Committee that we have received such strong bipartisan support for S. 1136. Senator SCHWEIKER, who is the ranking minority member of the Health Subcommittee, and Senator JAVITS, who is the ranking minority member of the full committee, have been enormously helpful.

That is our proposal, Mr. President. Our report goes into considerable detail as to the various provisions of the legislation itself and what each one of these pieces of legislation actually provides.

I can think, even at the outset, of a number of different changes that I myself would like to make in these various programs; others would make additional changes; but I think it was the feeling of the committee to propose a straight extension and then to do the kind of exhaustive work that should be done in consideration of these programs to make sure that they really are benefiting the American people and providing the best health care that they possibly can provide.

EXHIBIT 1

AMERICAN ACADEMY OF PEDIATRICS,
Evanston, Ill., March 22, 1973.

HON. EDWARD KENNEDY,
Chairman, Subcommittee on Health,
U.S. Senate,
Washington, D.C.

DEAR SENATOR KENNEDY: On behalf of the American Academy of Pediatrics, I wish to record endorsement of S. 1136 designed to extend the expiring authorities within the Public Health Service Act for one year. It is understood that this one year will be utilized by the Congress to extensively review our federal effort in the area of health planning, service, research and training so that a master plan for federal responsibility might be further developed.

The phase out of many existing programs

without adequate preparation for transition and alternative methods for innovation and basic support would cause many significant problems in pediatrics, particularly where these authorities are now being utilized as a cutting edge to find new solutions to existing problems. Among current authorities are programs which might be modified to enhance their effectiveness, such as the Regional Medical Program which has stimulated development of newborn intensive care units in many areas and have demonstrated dramatic reductions in infant mortality, Hill-Burton which might be directed toward modernizing outpatient facilities for primary care delivery, public health training support which is particularly important as states continue to assume a greater responsibility for planning and delivery of services. We hope to provide further commentary and suggestions in the coming months.

The American Academy of Pediatrics, in supporting S. 1136, would urge prompt action.

Sincerely yours,

ROBERT G. FRAZIER, M.D.,
Executive Director.

AMERICAN DENTAL ASSOCIATION,
Washington, D.C., March 21, 1973.
The Honorable EDWARD M. KENNEDY,
Chairman, Subcommittee on Health, Com-
mittee on Labor and Public Welfare,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The American Dental Association shares the concern of the sponsors of S. 1136 over the possibility that several health program authorities may be permitted to expire without appropriate review by Congress.

As previously noted in testimony before your Committee, the Association has a particular interest in the allied health training program which provides support for the education of dental hygienists and dental assistants who are essential in the efforts to deliver high quality dental care to our population.

The Association also has a special interest in the support of schools of public health which are relied upon to provide professional personnel to staff state and local departments of health throughout the nation.

Additionally, of course, the Association has a direct and vital interest in the medical library and comprehensive health program.

In view of the current demands upon the time of both the legislative and appropriations committees having jurisdiction over these programs, the Association concurs with and supports the one-year extension as provided in S. 1136.

We would appreciate the inclusion of this letter in the record of the hearings.

Sincerely yours,

PAUL W. KUNKEL, Jr., D.M.D.,
Chairman, Council on Legislation.

AMERICAN ASSOCIATION OF COLLEGES
OF PHARMACY,
Silver Springs, Md., March 22, 1973.

HON. EDWARD M. KENNEDY
Chairman, Subcommittee on Health, Com-
mittee on Labor and Public Welfare,
U.S. Senate, New Senate Office Building,
Washington, D.C.

DEAR SENATOR KENNEDY: This letter is to inform you that the American Association of Colleges of Pharmacy has recently acted to endorse S. 1136 which will extend for one year the various expiring health program authorities named therein.

Your comments on S. 1136 at the time of introduction have dramatically highlighted the need for this temporary extension of these important health programs. Your decision to extend these authorities to allow adequate consideration of possible changes is the only practical solution in view of the

short time before the programs expire and the time needed to establish adequate funding levels.

Pharmacy schools have been assisted by several of the expiring programs. For example, the regional medical program has provided funds which permitted several pharmacy schools to begin the development of drug information systems to aid pharmacies and physicians to quickly research complicated drug problems. The medical library assistance program also permitted acquisition of drug and medical journals and research data used in these drug information programs. Also the program has permitted fuller utilization of the National Library of Medicine resources.

Recent studies have identified drug misadventures, particularly adverse drug reactions, which may cost the American public between 1 and 6 billion dollars annually, pharmacy school faculty are vitally interested in pursuing health service delivery research to improve prescribing by interaction between pharmacists and prescribers. Health service research and development programs must be continued to permit this important research.

As you and the co-sponsors of S. 1136 give consideration to the revision of the included authorities over the next year, we hope you will call on the AACP for assistance, particularly on those programs which may bear on improved drug therapy and related needs of the public.

Sincerely yours,

CHARLES W. BLIVEN,
Executive Secretary-Treasurer.

ASSOCIATION OF DENTAL SCHOOLS,
Washington, D.C., March 15, 1973.

HON. EDWARD M. KENNEDY,
Old Senate Office Building,
U.S. Senate
Washington, D.C.

DEAR SENATOR KENNEDY: On behalf of the membership of the American Association of Dental Schools, I would like to offer the Association's support of Senate Bill 1136 and its companion bill in the House, which propose a one-year extension of the Public Health Training Act, Regional Medical Programs, the Allied Health Personnel Act, and other legislation.

The Association was pleased to learn that all members of the Senate Labor Committee, but one, are supporting the Bill and that the Senate is expected to pass it.

The AADS believes that the Public Health Training Act, Regional Medical Programs, and the Allied Health Personnel Act, should not be allowed to expire since they support programs which are an integral part of the national effort to provide better health care services for the people.

Further, the Association firmly believes that Congress should retain its Constitutional prerogatives to sustain legislative programs which it has created and which it believes are effective.

The Association would be pleased to assist you and your Health Subcommittee in any way it can.

Sincerely,

BEN F. MILLER, III,
Secretary-Treasurer.

AMERICAN CLINICAL LABORATORY
ASSOCIATION,
March 21, 1973.

HON. EDWARD M. KENNEDY,
Chairman, Subcommittee on Health, U.S.
Senate, New Senate Office Building,
Washington, D.C.

DEAR SENATOR KENNEDY: I am writing as counsel to the American Clinical Laboratory Association, and on its behalf, to urge the passage of S. 1136. The Association endorses this bill's underlying objective, to extend the

expiring authorities in the Public Health Service Act for a one year period. ACLA believes it appropriate that the Congress have the opportunity for careful consideration of the various programs covered by these acts, so that those programs worthy of continuation, whether with modification or not, be carried forth for the benefit of the public.

The Association further believes that the Clinical Laboratories Improvement Act of 1967 (CLIA), which is part of the Public Health Services Act, should also be the subject of Congressional attention during the next year. To the extent that the CLIA needs revision in order to afford even greater protection to the citizens of the United States than has resulted from the Act's passage, ACLA offers its assistance.

Sincerely yours,

H. ROBERT HALPER.

AMERICAN DENTAL
HYGIENISTS' ASSOCIATION,
Chicago, Ill., March 21, 1973.

HON. EDWARD M. KENNEDY,
Chairman, Subcommittee on Health, Com-
mittee on Labor and Public Welfare,
Washington, D.C.

DEAR MR. CHAIRMAN: On behalf of the American Dental Hygienists' Association I am pleased to present the Association's views on S. 1136, a bill to extend the expiring authorities in the Public Health Service Act and the Community Mental Health Centers Act.

The Dental Hygiene Profession has a vital interest in that section which extends the existing allied health professional law, providing federal support to dental schools of dental hygiene and assisting.

There are not now nor has there ever been sufficient numbers of dental auxiliaries. In fact, present manpower indicate that there is only one practicing dental hygienist for each 10,000 population in the United States. In contrast, adequate manpower needs were described to this Committee last year in terms of one dental hygienist per 4,250 population—more than twice the number presently available.

Should the related Allied Health Programs be allowed to expire, the negative effect would be compounded. Not only will our educational system (the source of manpower fulfillment) cease to expand, it will begin to regress.

Developing programs that were assured federal assistance cannot assume full financial responsibility and inevitably some will close their doors to students. This failure results in loss of manpower and wasted tax dollars which were invested in recent years.

As a direct consequence, we are in full support of the one-year extension as provided in S. 1136. We would appreciate the inclusion of this letter in the record of the hearing.

Sincerely yours,

MARY COSABOOM, R.H.D.,
Chairman, Committee on Legislation.

THE AMERICAN DIETETIC ASSOCIATION,
Chicago, Ill., March 19, 1973.

HON. EDWARD M. KENNEDY,
Chairman, Subcommittee on Health, Com-
mittee on Labor and Public Welfare, U.S.
Senate, Washington, D.C.

DEAR MR. CHAIRMAN: I am writing on behalf of the 24,000 members of The American Dietetic Association to express our full support for the enactment of S. 1136 that would extend for one year several expiring authorities under the PHS Act, including provisions for the training of allied health professions manpower at the undergraduate and graduate degree levels.

In recent years, the awareness of the general public of the importance of nutrition to health has expanded significantly. This pub-

lic interest is reflected in legislation approved by the Congress to expand and improve the school lunch program and the food stamp program as well as meal service for the elderly. These enactments have increased the demand for dietitians and nutritionists as will the proposed regulations of FDA pertaining to food labeling and the proposed HMO legislation that stresses preventive health services.

If Federal support for the training of dietitians and nutritionists is curtailed as of June 30, 1973, as proposed by the Administration, the training resources of colleges, universities, and schools of public health will necessarily be reduced. Such a reduction would sharply diminish the number of graduates in dietetics and nutrition. In time, the shortages of these health workers would become more severe, thereby giving an added dimension to the "health care crisis" that has been acknowledged on a bipartisan basis.

In our view it would be more efficient and economical to modify existing authorities for the Federal support of allied health manpower training programs as an alternative to the proposal of the Administration. It would take many years to overcome even a temporary curtailment of Federal support for the training of allied health personnel.

With best wishes, I am
Sincerely,

ISABELLE A. HALLAHAN, R.D.,
President.

AMERICAN FEDERATION OF LABOR
AND CONGRESS OF INDUSTRIAL
ORGANIZATIONS,

Washington, D.C., March 19, 1973.

HON. EDWARD M. KENNEDY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR KENNEDY: Over the years Congress has enacted many vital programs to fulfill the health needs of the people of our nation. Fifteen of these programs expire in 3½ months.

These health programs include among others the Hill-Burton Hospital Construction Act, the Community Health Centers Act, and the Allied Health Professions Education Act. We recognize that over the years priorities among health programs change and that Congress and the Executive must review such programs to see that the health needs of the nation are being adequately met. We fear, however, that there is insufficient time between now and June 30 to review and make desirable changes in these many programs to meet our changing health needs.

The AFL-CIO therefore supports the purpose of S. 1136 to extend the many categorical health programs for an additional year in order that they may be tailored to best serve the health needs of our nation.

Sincerely yours,

ANDREW J. BIEMILLER,
Director, Department of Legislation.

AMERICAN FEDERATION OF STATE,
COUNTY, AND MUNICIPAL EM-
PLOYEES, AFL-CIO,

Washington, D.C., March 15, 1973.

HON. EDWARD M. KENNEDY,
Chairman, Subcommittee on Health, Com-
mittee on Labor and Public Welfare,
U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The American Federation of State, County, and Municipal Employees is a labor union representing over 600,000 employees of state and local governments across the country. Over 120,000 of our members are professional and paraprofessional health personnel. We congratulate you and the fourteen other senators on the Labor and Public Welfare Committee, Republicans and Democrats, for your introduction of S. 1136, The Public Health Act of 1973. We urge its speedy adoption.

This Act gives Congress adequate time systematically to consider practical and necessary revisions in existing federal health programs. It provides a workable alternative to the ill-considered approach recommended by the Department of Health, Education and Welfare, of simply eliminating many of these programs and making no provision for continuing the services they furnish.

We are by no means slavishly devoted to continuation of every single categorical health program now being funded by the federal government. Indeed, we see many areas in which programs can be combined or made more efficient. We think, however, that Congress, not the Executive, is the proper branch of government to undertake a revision of these federal efforts—hearing testimony from the Executive, of course, but also hearing the views of people directly affected by these programs. Clearly, the best way to achieve this end is to give Congress sufficient time to examine all these programs. Therefore, we recommend passage of S-1136.

Sincerely yours,

JERRY WURF, International President.

AMERICAN HEART ASSOCIATION, INC.,
New York, N.Y., March 14, 1973.

HON. EDWARD M. KENNEDY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR KENNEDY: The present rapid dismantling of health research and delivery programs and facilities may be a major loss to the health of Americans. Senate Bill 1136 would provide opportunity for study during a period of one year so that the programs covered under that bill could each be adequately studied and, if necessary, revamped in a fashion best designed to provide the maximum cost-effectiveness for the future.

I would like to support the speedy passage of S-1136. The impact of announced changes in some programs has been such that delay imperils the functioning of agencies vital to the health of each of us. Simply discarding the programs, or dismantling them hurriedly, will mean that many groupings of skills will be dispersed. The one-year extension in S-1136 provides time for careful reappraisal of each program and such a reappraisal will serve the nation's health needs.

Very truly yours,

CAMPBELL MOSES, M.D.,
Medical Director.

AMERICAN HOSPITAL ASSOCIATION,
WASHINGTON SERVICE BUREAU,
March 21, 1973.

HON. EDWARD M. KENNEDY,
Chairman, Subcommittee on Health,
U.S. Senate,
Washington, D.C.

DEAR MR. CHAIRMAN: As you know, the American Hospital Association which represents some 7000 hospitals and other health care institutions throughout the country, is vitally concerned with the health programs of the federal government. This is to inform you that the American Hospital Association fully supports your bill, S. 1136, to extend for one year the following health programs: Health Services Research and Development, Health Statistics, Public Health Training, Migrant Health, Comprehensive Health Planning, Hill-Burton, Allied Health Training, Regional Medical Programs, Medical Libraries and Community Mental Health Centers.

At the Annual Meeting of the American Hospital Association here in Washington last month, the Association's Board of Trustees and House of Delegates approved a resolution expressing grave concern about the drastically reduced commitment to health programs in the Administration's FY 1974 budget. This resolution recognized the crucial need for improved and coordinated compre-
