Strike section 203 and insert the following:

SEC. 203. FIDUCIARY SAFE HARBOR FOR SELECTION OF LIFETIME INCOME PROVIDER.

Section 404 of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1104) is amended by adding at the end the following:

“(e) **SAFE HARBOR FOR ANNUITY SELECTION.**—

“(1) **IN GENERAL.**—With respect to the selection of an insurer for a guaranteed retirement income contract, the requirements of subsection (a)(1)(B) will be deemed to be satisfied if a fiduciary—

“(A) engages in an objective, thorough, and analytical search for the purpose of identifying insurers from which to purchase such contracts;

“(B) with respect to each insurer identified under subparagraph (A)—

“(i) considers the financial capability of such insurer to satisfy its obligations under the guaranteed retirement income contract; and

“(ii) considers the cost (including fees and commissions) of the guaranteed retirement income contract offered by the insurer in relation to the benefits and product features of the contract and administrative services to be provided under such contract; and

“(C) on the basis of such consideration, concludes that—

“(i) at the time of the selection, the insurer is financially capable of satisfying its obligations under the guaranteed retirement income contract; and

“(ii) the relative cost of the selected guaranteed retirement income contract as described in subparagraph (B)(ii) is reasonable.

“(2) **FINANCIAL CAPABILITY OF THE INSURER.**—A fiduciary will be deemed to satisfy the requirements of paragraphs (1)(B)(i) and (1)(C)(i) if—

“(A) the fiduciary obtains written representations from the insurer that—

“(i) the insurer is licensed to offer guaranteed retirement income contracts;

“(ii) the insurer, at the time of selection and for each of the immediately preceding 7 plan years—

“(I) operates under a certificate of authority from the insurance commissioner of its domiciliary State which has not been revoked or suspended;

“(II) has filed audited financial statements in accordance with the laws of its domiciliary State under applicable statutory accounting principles;

“(III) maintains (and has maintained) reserves which satisfies all the statutory requirements of all States where the insurer does business; and

“(IV) is not operating under an order of supervision, rehabilitation, or liquidation;

“(iii) the insurer undergoes, at least every 5 years, a financial examination (within the meaning of the law of its domiciliary State) by the insurance commissioner of the domiciliary State (or representative, designee, or other party approved by such commissioner); and

“(iv) the insurer will notify the fiduciary of any change in circumstances occurring after the provision of the representations in clauses (i), (ii), and (iii) which would preclude the insurer from making such representations at the time of issuance of the guaranteed retirement income contract; and

“(B) after receiving such representations and as of the time of selection, the fiduciary has not received any notice described in subparagraph (A)(iv) and is in possession of no other information which would cause the fiduciary to question the representations provided.

“(3) **NO REQUIREMENT TO SELECT LOWEST COST.**—Nothing in this subsection shall be construed to require a fiduciary to select the lowest cost contract. A fiduciary may consider the value of a contract, including features and benefits of the contract and attributes of the insurer (including, without limitation, the insurer's financial strength) in conjunction with the cost of the contract.

“(4) **TIME OF SELECTION.**—

“(A) **IN GENERAL.**—For purposes of this subsection, the time of selection is—

“(i) the time that the insurer and the contract are selected for distribution of benefits to a specific participant or beneficiary; or

“(ii) if the fiduciary periodically reviews the continuing appropriateness of the conclusion described in paragraph (1)(C) with respect to a selected insurer, taking into account the considerations described in such paragraph, the time that the insurer and the contract are selected to provide benefits at future dates to participants or beneficiaries under the plan.

Nothing in the preceding sentence shall be construed to require the fiduciary to review the appropriateness of a selection after the purchase of a contract for a participant or beneficiary.

“(B) **PERIODIC REVIEW.**—A fiduciary will be deemed to have conducted the periodic review described in subparagraph (A)(ii) if the fiduciary obtains the written representations described in clauses (i), (ii), and (iii) of paragraph (2)(A) from the insurer on an annual basis, unless the fiduciary receives any notice described in paragraph (2)(A)(iv) or otherwise becomes aware of facts that would cause the fiduciary to question such representations.

“(5) **LIMITED LIABILITY.**—A fiduciary which satisfies the requirements of this subsection shall not be liable following the distribution of any benefit, or the investment by or on behalf of a participant or beneficiary pursuant to the selected guaranteed retirement income contract, for any losses that may result to the participant or beneficiary due to an insurer's inability to satisfy its financial obligations under the terms of such contract.

“(6) **DEFINITIONS.**—For purposes of this subsection—

“(A) **INSURER.**—The term ‘insurer’ means an insurance company, insurance service, or insurance organization, including affiliates of such companies.

“(B) **GUARANTEED RETIREMENT INCOME CONTRACT.**—The term ‘guaranteed retirement income contract’ means an annuity contract for a fixed term or a contract (or provision or feature thereof) which provides guaranteed benefits annually (or more frequently) for at least the remainder of the life of the participant or the joint lives of the participant and the participant's designated beneficiary as part of an individual account plan.”.

The SPEAKER pro tempore, Mr. HULTGREN, laid before the House a communication, which was read as follows:

COMMITTEE ON TRANSPORTATION AND INFRASTRUCTURE, HOUSE OF REPRESENTATIVES,

Washington, DC, September 27, 2018.

Hon. PAUL RYAN,
Speaker of the House, House of Representatives,
Washington, DC.

DEAR MR. SPEAKER: On September 27, 2018, pursuant to section 3307 of title 40, United States Code, the Committee on Transportation and Infrastructure met in open session to consider 19 resolutions included in the General Services Administration's Capital Investment and Leasing Programs.

The Committee continues to work to reduce the cost of federal property and leases. The 19 resolutions considered include 11 alteration prospectuses, five lease prospectuses, and two construction prospectuses and represent \$700 million in savings from avoided lease costs and space reductions.

I have enclosed copies of the resolutions adopted by the Committee on Transportation and Infrastructure on September 27, 2018.

Sincerely,

BILL SHUSTER,
Chairman.

Enclosures.

Resolved by the Committee on Transportation and Infrastructure of the U.S. House of Representatives, that pursuant to 40 U.S.C. 3307, appropriations are authorized for the reconfiguration and renovation of space within government-owned and leased buildings during Fiscal Year 2019 to improve space utilization, optimize inventory, and decrease reliance on leased space at a total cost of \$70,000,000, a prospectus for which is attached to and included in this resolution.

Provided, that an Expenditure Plan be submitted to the Committee prior to the expenditure of any funds.

Provided, that consolidation projects result in reduced annual rent paid by the tenant agency.

Provided, that no consolidation project exceeds \$20,000,000 in costs.

Provided further, that preference is given to consolidation projects that achieve an office utilization rate of 130 usable square feet or less per person.

Provided further, that the General Services Administration shall not delegate to any other agency the authority granted by this resolution.

FY 2019 Project Summary

The General Services Administration (GSA) proposes the reconfiguration and renovation of space within Government-owned and leased buildings during fiscal year (FY) 2019 to support GSA's ongoing consolidation efforts to improve space utilization, optimize inventory, decrease reliance on leased space, and reduce the Government's environmental footprint.

Since inception of the Consolidation Activities Program in FY 2014, GSA has received \$263 million in support of the program. Through FY 2017, the Consolidation Activities Program has funded 78 projects. When complete, the 78 projects will result in more than a 1.67 million usable square foot (USF) reduction, reduce agency rental payments to GSA by \$66 million annually, and generate \$132 million in annual Government lease cost avoidance.

FY 2019 Committee Approval and Appropriation Requested\$70,000,000

Program Summary

As part of its ongoing effort to improve space utilization, optimize inventory, decrease reliance on leased space, and reduce the Government's environmental footprint, GSA is identifying consolidation opportunities within its inventory of real property assets. These opportunities are presented through surveys and studies, partnering with customer agencies, and through agency initiatives. Projects will vary in size by location and agency mission and operations; however, no single project will exceed \$20 million in GSA costs. Funds will support consolidation of customer agencies and will not be available for GSA internal consolidations. Preference will be given to projects that result in an office utilization rate of 130 USF per person or less and a total project payback period of 10 years or less.

Typical projects include the following:

- Reconfiguration and alteration of existing Federal space to accommodate incoming agency relocation/consolidation. (Note: may include reconfigurations of existing occupied Federal tenant space); and
- Incidental alterations and system upgrades, such as fire sprinklers or heating, ventilation, and air conditioning, needed as part of relocation and consolidation.

Projects will be evaluated using the following criteria:

- Preference will be given to projects that are identified as a reduction opportunity by both GSA and the subject agency, and that meet the other criteria.
- Proposed consolidation projects will result in a reduction in annual rent paid by the impacted customer agency.

GSA

PBS

**PROSPECTUS - ALTERATION
CONSOLIDATION ACTIVITIES PROGRAM

Prospectus Number: PCA-0001-MU19

- Preference is given to consolidations within or into owned buildings over consolidations within or into leased space.
- Consolidation of expiring leases into owned buildings will be given preference over those business cases for lease cancellations that include a cancellation cost.
- Co-location with other agencies with shared resources and special space will be given preference.
- Links to other consolidation projects will be given preference.

Justification

GSA continually analyzes opportunities to improve space utilization and realize long-term cost savings for the Government. Funding for space consolidations is essential so that GSA can execute those opportunities.

Projects funded under this authorization will enable agencies to consolidate within Government-controlled leased space or relocate from either Government-controlled leased or federally owned space to federally owned space that more efficiently meets mission needs. These consolidations will result in improved space utilization, cost savings for the American taxpayers, and a reduced environmental impact.

FY 2019 Project Summary

This prospectus proposes alterations to upgrade, replace, and improve fire protection systems and life safety features in Government-owned buildings during fiscal year (FY) 2019.

Since FY 2010, the General Services Administration (GSA) has received \$94,000,000 in support of this program. These funds supported 87 projects in over 72 Government-owned buildings.

FY 2019 Committee Approval and Appropriation Requested.....\$30,000,000

Program Summary

As part of its fire protection and life safety efforts, GSA currently is identifying projects in Federal buildings throughout the country through surveys and studies. These projects will vary in size, location, and delivery method. The approval and appropriation requested in this prospectus is for a diverse set of retrofit projects with engineering solutions to reduce fire and life safety hazards. Typical projects include:

- Replacing antiquated fire alarm and detection systems that are in need of repair or for which parts are no longer available.
- Installing emergency voice communication systems to facilitate occupant notification and evacuation in Federal buildings during an emergency.
- Installing or expanding, as necessary, fire sprinkler systems to provide a reasonable degree of protection for life and property from fire in Federal buildings.
- Constructing additional exit stairs or enclosing existing exit stairs to facilitate the safe and timely evacuation of building occupants in the event of an emergency.

Justification

GSA periodically assesses all facilities using technical professionals to identify hazards and initiate correction or risk-reduction protection strategies so that its buildings do not present an unreasonable risk to GSA personnel, occupant agencies, or the general public. Completion of these proposed projects will improve the overall level of safety from fire and similar risks in federally owned buildings in GSA's portfolio nationwide.

FY 2019 Project Summary

This prospectus proposes alterations to improve physical security in Government-owned buildings occupied by the Judiciary and the Department of Justice–U.S. Marshals Service (USMS) during fiscal year (FY) 2019.

Since FY 2012, GSA has received \$106,700,000 in support of this program. These funds supported 11 projects.

FY 2019 Committee Approval and Appropriation Requested..... \$11,500,000

Program Summary

The Judiciary Capital Security Program is dedicated to improving physical security in buildings occupied by the Judiciary and USMS. In most cases, these projects are in lieu of constructing new facilities, thereby providing cost savings and expedited delivery. These projects will vary in size, location, and delivery method and are designed to improve the separation of circulation for the public, judges, and prisoners. Funding provided for the security improvement projects will address elements such as adding doors, reconfiguring or adding corridors, reconfiguring or adding elevators and sallyports, and constructing physical or visual barriers.

Justification

This program provides a vehicle for addressing security deficiencies in a timely and less costly manner when constructing a new courthouse is unlikely in the foreseeable future. The projects in this program are based on studies undertaken by the Judiciary. This prospectus requests separate funding to address security conditions at existing Federal courthouses. The Judiciary's asset management planning process helps in the compilation of a preliminary assessment of potential projects that involve courthouses with poor security ratings nationwide.

FY 2019 Project Summary

The General Services Administration (GSA) proposes a repair and alteration project for a full modernization of Building 48 at the Denver Federal Center (DFC), located at West 6th Avenue and Kipling Street in Lakewood, CO. The project will convert Building 48 from a vacant warehouse building into a fully occupied Class A office building. The proposed project will upgrade building systems and the fire suppression system, repair structural and architectural deficiencies, install an elevator, abate hazardous materials, and improve landscaping and underground utilities. This project will provide an efficient office layout that both reduces agency utilization rates and allows for the backfill of approximately 149,000 rentable square feet (RSF) of vacant federally owned space. The renovated space will be occupied by the Department of the Interior (DOI) – Interior Business Center (IBC), which is currently housed in leased space. Relocation of IBC to Building 48 provides an annual lease cost avoidance of approximately \$4,600,000 and an annual agency rent savings of approximately \$1,200,000.

Building

Building 48 is part of the DFC's main campus and contains 154,422 gross square feet. The first section of the building was originally constructed in 1941 as part of the Denver Ordinance Plant, with additions made in the 1950s, 1960s, and in 1971. The building is predominantly warehouse space that was formerly occupied by the National Archives and Records Administration (NARA), which moved to a new location in 2013.

Tenant Agencies

Department of the Interior – Interior Business Center

Proposed Project

The project proposes a full modernization of Building 48 to renovate approximately 149,000 RSF of space, including the addition of a main entrance with an atrium to provide for daylighting. A below-grade courtyard will provide access and natural light for the basement-level office space with new windows and landscaping. This project will allow for a higher density open office environment and the relocation of the IBC from leased space.

Exterior walls will be insulated, repaired, and re-caulked, and the masonry will be repointed. All exterior windows will be replaced with efficient insulated glazing. Additional windows will be added to increase natural light. The entire roof and roof drain system will be replaced with skylights and solar tubes to provide top lighting, thereby increasing daylight penetration into the building's interior spaces. The project also will replace exterior stairs, railings, ramps, and sidewalks. A parking lot to accommodate approximately 500 parking spaces will be constructed. Site utilities will be replaced and relocated.

The basement will be built out and used for office space. To accommodate the use of the basement, a passenger elevator will be installed. Walls that do not provide structural support will be removed to create an open office area. Some loading docks will be removed, and the remaining docks will have new levelers, seal enclosures on doors, and electric vehicle charging stations installed. There also will be structural repairs and upgrades to provide sufficient support to the existing structure and additions.

The plumbing systems for hot water, chilled water, and sanitary sewer piping will be replaced, along with two domestic hot water heaters and gas piping. The project also includes an energy-efficient cooling and heating system with appropriate air distribution and building automation system, new electrical system, emergency power, a lighting

system, a telecom room and equipment, security access control equipment, and a lightning protection system. Fire protection upgrades, including fire sprinklers and new fire alarm, will be installed. Architectural Barriers Act Accessibility Standards requirements will be addressed by automatic entrances, audible and visual notification systems, egress doors, larger stairwells, and accessible restrooms and parking spaces. The project also will abate hazardous materials encountered during construction.

Major Work Items

Electrical Replacement	\$7,979,000
HVAC Replacement	8,486,000
Interior Finishes	5,453,000
Plumbing Replacement	4,171,000
Interior Construction	2,378,000

Demolition	3,962,000
Roof Replacement	455,000
Utilities Relocation	292,000
Total ECC	\$40,516,000

Justification

Building 48 was occupied by NARA for approximately 50 years and has been vacant for approximately 3 years. The building is predominantly warehouse space and is essentially a building shell that requires a complete modernization to facilitate the backfill.

Completion of this project reduces vacant space by approximately 149,000 RSF and eliminates approximately \$5 million in future annual lease payments to the private sector. IBC is currently housed in three leased locations and experiencing growth. GSA has been working closely with IBC since 2009 to create a solution that will allow it to consolidate its leases, provide more efficient work space, and upgrade its space to meet the modern day demands of running its business.

This project will provide IBC with a higher quality, more efficient work environment, progressive alternative workplace arrangements with shared resources, open office space, flexible conference rooms, and collaboration areas, in addition to telework and office

sharing. IBC will be closer to the other DOI bureaus and offices at the DFC, thereby providing easier access to its services.

The proposed full modernization of Building 48 will transform a deteriorating core asset at the heart of one of the country's largest Federal Government campuses into a high-performing LEED Gold facility capable of housing Class A office space for at least the next 30 years.

Summary of Energy Compliance

This project will be designed to conform to requirements of the *Facilities Standards for the Public Buildings Service*. GSA encourages design opportunities to increase energy and water efficiency above the minimum performance criteria.

FY 2019 Project Summary

The General Services Administration (GSA) proposes a repair and alteration project for a partial modernization and backfill of Building 53 at the Denver Federal Center (DFC) located at West 6th Avenue and Kipling Street in Lakewood, CO. The proposed project will upgrade building systems and backfill vacant space. This project will provide a more efficient layout that both reduces agency utilization rates and allows for the recapture of and backfill of approximately 164,000 rentable square feet of vacant federally owned space. The vacant space will be occupied by the Department of the Interior (DOI) – Business Integration Office (BIO), DOI – Fish & Wildlife Service (FWS), and DOI – Office of Chief Information Officer (OCIO). Justification

The building has not undergone significant reinvestment since originally constructed in 1941. Many of its systems no longer meet the current code requirements or have exceeded their useful life, and replacement parts are expensive and difficult to find. DOI is the largest tenant on the DFC and is actively working with GSA to reduce its footprint and eliminate multiple private sector leases. This project will provide a high-quality, more efficient work environment, the ability to embrace new technologies, and better space layout. This allows increased collaboration and coordination among DOI's bureaus to better fulfill their missions and goals. These moves are part of the GSA and DOI long-term strategic plan for the DFC and will transform a deteriorating core asset into a high-performing facility that will continue operating for at least another 30 years.

The lighting, electrical system, and various components of the HVAC system are beyond their useful lives and need to be brought up to current design standards. Currently, there is no emergency generator to support the building. The windows are outdated and do not meet required thermal and infiltration performance levels. The roof is in poor condition and beyond its useful life, and the building envelope needs to be sealed to prevent water infiltration into customer space and avoid further work outages. The fire protection system is outdated and will be upgraded in renovated space and common areas. The

sewer piping is at the end of its useful life and needs to be replaced. New domestic water supply and fixtures will be required for newly renovated areas, as well as common areas. An additional parking area is needed to accommodate the increased number of tenants. The floor is uneven in some areas and the floor slab is cracking and heaving. The existing elevators are in need of upgrades, in addition to a new passenger elevator to better distribute upper level access across the building.

Undertaking the necessary infrastructure improvements will reduce greenhouse gas emissions, improve energy efficiency, reduce maintenance costs, help facilitate long-term tenancy, and meet customer agency needs.

Summary of Energy Compliance

This project will be designed to conform to requirements of the *Facilities Standards for the Public Buildings Service*. GSA encourages design opportunities to increase energy and water efficiency above the minimum performance criteria.

Proposed Project

The project proposes to renovate and reconfigure floors 3, 4, 6, and 7 of the existing building, resulting in an open office environment with sufficient work and meeting space to meet Education's programmatic requirements in a much more efficient manner while consolidating personnel from leased space.

The majority of the building system capacities will meet the forecast demand after consolidation, but a few system upgrades are needed. These upgrades include the HVAC controls, new power distribution circuits and breaker ties, open mobile workspace construction, and a new generator.

The proposed project also includes life safety items, such as new fire alarm annunciators and replacement of equipment in fire control rooms, and items to improve energy efficiency. Additionally, the switchgear replacement project will replace the medium and low voltage switchgear and network transformers and protectors, and upgrade the monitoring devices within the switchgears to be compatible with GSA requirements for the advanced metering systems.

The Minton-Capehart Federal Building, built in 1974, is six stories above grade and includes a mezzanine and basement. The attached parking garage, which is original to the building, is two stories, with the first story partially below grade and partially exposed to the elements. The garage provides 464 parking spaces, which accommodates Government-owned, including law enforcement, vehicles, and 75 vehicles associated with the nearby Birch Bayh Federal Building and U.S. Courthouse tenants. The upper deck serves as a partial cover for the lower deck. The garage is elevated and entirely open to the atmosphere and elements. The garage's upper deck is joined to the Federal Building's first floor entry and plaza. The lower level has a dock area that is also attached to the Federal Building.

Proposed Project

The proposed project scope includes concrete repairs and upgrades to lateral load resistance, which will extend the life of the parking structure for several decades. The upper level slab will be replaced, and a new membrane for vehicle bearing surfaces will be installed over the top of the new slab. Existing beams will be repaired or replaced at locations where concrete has spalled. New concrete shear walls will be constructed. The project also includes improvements to the supporting columns, shear walls, and exterior stairwells, as well as improvements to the lighting and fire protection and installation of bollards at the garage entrance and exits.

**AMENDED PROSPECTUS – ALTERATION
MINTON-CAPEHART FEDERAL BUILDING
INDIANAPOLIS, IN**

Prospectus Number: PIN-0133-IN19
Congressional District: 7

Justification

The garage is over 40 years old and is in urgent need of a major renovation. The garage is suffering from multiple concrete-related failures including: delamination on the floor slabs and beams, and slab reinforcement with extensive section loss; concrete spalling and delamination at some column facades; water leakage on the underside of the supported level; and deteriorated expansion joints. The current electrical infrastructure will be upgraded/replaced to meet current codes. The installation of bollards on both the entrance and exit ramps of the garage will enhance security.

Interim short-term repairs have been undertaken with minor repair and alteration program funds over the past decade in an attempt to address immediate safety measures. The corrosion, spalling, and delamination of the structure are threatening tenant and property safety. Sections of the garage have been closed due to the risk. Currently, two parking spaces in the lower level are closed due to falling concrete. Ten additional parking spaces in the lower level are closed due to water leaks from the upper deck that have damaged several vehicles. Until a major repair is completed, tenant safety will continue to be threatened, closures of sections of the garage will need to be continued and expanded, and degradation of the garage deck will continue.

Summary of Energy Compliance

This project will be designed to conform to requirements of the *Facilities Standards for the Public Buildings Service*. GSA encourages design opportunities to increase energy and water efficiency above the minimum performance criteria.

Proposed Project

The proposed project involves alterations to consolidate USBC's space into the Potter Stewart Courthouse from leased space. The construction will create two USBC courtrooms and chambers, clerk space, and shared support spaces. primary function is to serve as a Federal courthouse. The Stokes Courthouse is located at the intersection of Superior Avenue and Huron Road. The existing plaza spans the front of the property along Huron Road and was originally designed to extend to the corner of Superior Avenue. The building acts as an anchor to the downtown area of Cleveland and is prominent in the city's skyline.

Tenant Agencies

Judiciary, Department of Justice, Senate, GSA

Proposed Project

The project proposes to repair the plaza at the Stokes Courthouse to eliminate water leaks and infiltration into the lower levels of the building. The scope includes refinishing and reinforcing the structural steel that supports the plaza, along with repairs to fireproofing and upgrading the surface parking lot.

The project also proposes to extend the currently incomplete plaza toward Superior Avenue as was envisioned in the original design. Due to a funding shortage when the building was originally constructed, a portion of the plaza was left unfinished.

Major Work Items

Sitework	\$16,515,000
Total ECC	\$16,515,000

Justification

The structural steel that supports the plaza is exposed to the elements and has been since the original construction. The steel has considerable rust damage, and the structural beams that support the plaza and connect into the parking garage are heavily corroded. Part of the unfinished plaza includes the base of the structural steel columns that are at grade with the Cleveland Regional Transit Authority train tracks and support beams that run above and across the train tracks. If the steel continues to be left unattended, it will become difficult to repair and will result in structural issues. The corroded steel is also very unsightly and detracts from the appearance of the courthouse.

The plaza has experienced excessive water infiltration in many areas that will worsen until repairs are completed. The leaks have been causing damage to the structure, interior finishes, and the fireproofing in the lower levels of the building.

The plaza surrounding the Stokes Courthouse remains incomplete from the time of the original construction in 2002. The sidewalk on the northwest side of the site is built on a portion of the city-owned and controlled Huron Road. This sidewalk is the only way to access the building from the southeast intersection of Huron Road and Superior Avenue. Once the plaza is completed, the sidewalk will be returned to the city, and this will restore a lane of traffic on Huron Road. Completion of the plaza will protect the structural steel from future damage, improve pedestrian access to the building, incorporate the building into the surrounding urban environment, and significantly improve the appearance of the Stokes Courthouse. The building's location within the city acts as a prominent gateway for those entering into the city from the west. Unfortunately, this impression is lost when visitors reach the intersection of Huron Road and Superior Avenue, where the steel installed for the completion of the plaza is rusting and the appearance of the facility at street level is that of a public building that is difficult to approach.

Summary of Energy Compliance

This project will be designed to conform to requirements of the *Facilities Standards for the Public Buildings Service*. GSA encourages design opportunities to increase energy and water efficiency above the minimum performance criteria.

Tenant Agencies

Proposed Project

The building is suffering from recurrent flooding caused by the aged domestic water piping system and significant temperature and indoor air quality issues caused by the insufficient and outdated HVAC system. Electrical system components will be replaced to support the HVAC systems. Mitigation of hazardous materials and associated sprinkler modifications will be accomplished in disturbed areas as part of the project.

To repair the building's domestic water system, the piping will need to be exposed, abated of asbestos, inspected, and repaired. Concurrently, the building's induction unit system will be removed, abated of asbestos, and upgraded to a four-pipe fan coil system. Due to the invasive nature of this work and the presence of hazardous materials, the majority of building tenants will be moved into internal swing space.

The less invasive aspects of the project include repairing the storm water system, replacing the building automation system, replacing the air handling units, partial conversion to variable air volume serving interior zones, replacing the heating and chilled water systems, and replacing the boilers.

As noted above, this renovation is in an occupied building so the proposed project includes allowances for internal swing space. The project minimizes tenant impact by using internal swing space and hazardous materials enclosures, as well as by completing the scope items together.

Electrical Upgrades	2,225,000
Fire and Life Safety Upgrades	852,000
Roof Upgrades	<u>110,000</u>
Total ECC	\$78,025,000

Justification

The project will address the failing domestic water piping system that has flooded the building three times in the past 4 years, creating millions of dollars in damage to the building and personal property. The damage has displaced tenants for months at a time and interfered with their ability to carry out their missions. The threat of another major flood is imminent, and there is a serious risk that additional flooding could potentially damage the historic rotunda, which would be enormously costly to repair. If left unaddressed, the building could potentially become uninhabitable and would need to be considered for disposal.

Due to the major disruption caused by the repair of the plumbing system, GSA determined that this project will provide the opportunity to upgrade the deficient HVAC systems. The HVAC systems in the building are approximately 20 years past their useful lives and are vulnerable to a large-scale failure in both the air handling units and the branch piping leading to the perimeter induction units. There have been longstanding temperature and indoor air quality issues caused by a system that was not designed for office space. In addition to affecting occupant comfort, poor dehumidification has caused the paint, plaster, and wall materials to peel at numerous locations in the building, including in the historic rotunda and in areas with lead-based paint. The two pipe induction system is highly inefficient, forcing entire building switchover between heating and cooling to address unseasonal temperatures (e.g., cooling in the winter and heating in the summer). Simultaneously completing these projects will save the Government approximately \$13 million in duplicative costs, while minimizing disruption to building tenants.

The 48-year-old building has undergone various renovation projects over the years, but never a complete modernization, including upgrades. The space, converted from light industrial to office use, does not include the appropriate lighting, HVAC, ceilings, or finishes for office space. Window replacement will provide energy efficiency and costs savings. The building systems are outdated and have reached the end of their useful lives. The old main switchboard needs replacement to comply with the National Electric Code. The control system and related electronic components need frequent repairs, and parts are no longer available. The original power distribution system is inadequate for the electrical loads that are now required. The HVAC equipment has reached or surpassed its life expectancy. The storm water and sanitary lines do not meet current code and need to be separated. Runoff from heavy rains often floods the loading dock's storm drain, causing flooding in the building when floor drains back up. All the domestic water lines are old and corroded and need to be replaced.

FY 2019 Project Summary

The General Services Administration (GSA) requests additional approval and funding for construction of Phase II of a two-phase project to reconfigure and expand the existing land port of entry (LPOE) in downtown Calexico, CA. The project includes new pedestrian processing and privately owned vehicle (POV) inspection facilities, a new head house to provide supervision and services to the non-commercial vehicle inspection area, new administration offices, and a parking structure. The expanded facilities will occupy both the existing inspection compound and the site of the former commercial inspection facility, decommissioned in 1996 when commercial traffic was redirected to the newly completed LPOE six miles east of downtown Calexico.

FY 2019 Project Summary

The General Services Administration (GSA) requests approval for construction of a new laboratory facility of approximately 68,000 gross square feet (GSF) to provide a long-term housing solution for the Department of Health and Human Services – Food and Drug Administration (FDA) at the Denver Federal Center (DFC), at West 6th Avenue and Kipling Street in Lakewood, CO. This project will allow FDA to occupy a laboratory building that meets modern standards for functional laboratory space that will accommodate a floor plan with the most optimal layout in support of its mission on a secure campus.

FY 2019 Committee Approval and Appropriation Requested

(Design, Construction, Management & Inspection)\$29,319,000

Overview of Project

GSA proposes the design and construction of a new Federal laboratory building on a 4-acre Government-owned site, just south of existing Building 20 at the DFC. This project will provide FDA a state-of-the-art laboratory facility with ancillary office space to support laboratory functions. The facility will be built to meet biosafety level 2 specifications. Laboratory layout will be modular and designed to create higher efficiency of workflow while maintaining agency chain-of-custody regulations. The office space will primarily consist of open workstations and a collaborative environment.

Justification

FDA is currently housed in laboratory and laboratory support space at the DFC in Building 20, a converted ammunitions plant building that also houses multiple Federal operations and offices. Building 20 is well past its useful life and experiencing major building system deficiencies. Due to current conditions, failing building systems are projected to cause a shutdown of its current space within 1 to 5 years.

The building uses excessive amounts of energy and struggles to maintain proper humidity and pressurization levels due to inadequacies in the heating, ventilation, and air conditioning system and building enclosure, which are critical components to prevent contamination within laboratories.

FDA processes evidence in court cases that must be tested and stored appropriately; some samples must be stored for up to 8 years. These samples are irreplaceable and failing infrastructure could place them at risk for contamination and spoilage. Costly laboratory equipment is at risk of being damaged due to severe roof leaks.

The current space is compartmentalized with hard wall offices and no capability of changing space to accommodate workflow or to facilitate collaboration. FDA has storage spaces and conference rooms that were built to accommodate program areas that no longer exist, and later built laboratory space around those areas. As its space has changed and evolved, the result is pockets of unused space sprinkled throughout the area. This situation has resulted in inefficient use of space that does not meet regulatory requirements to isolate laboratory space from office work areas.

This location is the regional regulatory arm of FDA and a critical part of its mission. Various departments include laboratories that analyze food, drugs, and cosmetics; a compliance department; investigators; and an administration team. For sections of the country west of the Mississippi River and east of Nevada, this facility is responsible for managing foodborne illness outbreaks. FDA uses this facility to analyze food samples to determine the source of the illness so the food can be immediately recalled to prevent further illness or death. This laboratory analyzes foods crossing State boundaries, as well as foods that are flown in from other countries to ensure it is safe for consumption.

Description

The General Services Administration (GSA) proposes to acquire, through a purchase option under an existing space lease, the building located at 1200 New Jersey Avenue SE, Washington, DC. The 1,900,000 gross square foot facility, currently leased by GSA, provides 1,350,000 rentable square feet (RSF) of space and 936 indoor parking spaces, and is occupied entirely by the Department of Transportation (DOT) and serves as its headquarters (HQ). The proposed purchase will reduce the Government's rental payment to the private sector by approximately \$49,400,000 annually.

FY 2019 Committee Approval and Appropriation Requested

(Building Acquisition)\$767,900,000

Situated on 10 acres of land to the southwest of the U.S. Capitol building, along the south side of M Street SE, between New Jersey Avenue SE on the west and 4th Street SE on the east, the building has served as the DOT HQ since its construction in 2006. The building houses approximately 5,000 employees. The office space is contained in two towers, referred to as the West Building and the East Building, each containing nine stories above grade and two stories below grade.

The site was originally part of the 18th century Navy Yard. Part of the Navy Yard was exscessed in the mid-20th century to GSA and became known as the Southeast Federal Center. GSA sold the parcel that is the subject of this prospectus to the developer specifically for the construction of the DOT HQ.

Overview of Project

GSA leased the building on behalf of DOT following completion of construction in 2006. The current lease agreement expires on October 19, 2021. GSA has an option to negotiate the purchase of the building and site at the end of the current lease term, provided 24 months' prior notice is given to lessor. A Notification of Intent to consider exercising the purchase option is required 36 months prior to the lease expiration. The estimated purchase price is based on a current fair market value appraisal of the property, escalated to the purchase date, multiplied by 95%.

Justification

DOT is a cabinet-level agency with a long-term requirement for a HQ facility. Exercising the purchase option will provide for a permanent, owned housing solution for DOT's mission execution, lowering the cost to the taxpayer. Upon purchase, GSA will work with DOT to improve the utilization of the space.

Approval of this prospectus constitutes authority to execute an interim lease for all tenants, if necessary, prior to the execution of the new lease.

Provided that, the Administrator of General Services and tenant agencies agree to apply an overall utilization rate of 230 square feet or less per person, except that, if the Administrator determines that the overall utilization rate cannot be achieved, the Administrator shall provide an explanatory statement to the Committee on Transportation and Infrastructure of the House of Representatives prior to exercising any lease authority provided in this resolution.

Provided that, except for interim leases as described above, the Administrator may not enter into any leases that are below prospectus level for the purposes of meeting any of the requirements, or portions thereof, in-

cluded in the prospectus that would result in an overall utilization rate of 230 square feet or higher per person.

Provided that, to the maximum extent practicable, the Administrator shall include in the lease contract(s) a purchase option that can be exercised at the conclusion of the firm term of the lease.

Provided further, that the Administrator shall require that the delineated area of the procurement is identical to the delineated area included in the prospectus, except that, if the Administrator determines that the delineated area of the procurement should not be identical to the delineated area included in the prospectus, the Administrator shall provide an explanatory statement to the Committee on Transportation and Infrastructure of the House of Representatives prior to exercising any lease authority provided in this resolution.

Executive Summary

The General Services Administration (GSA) proposes a lease of approximately 207,000 rentable square feet (RSF) for the Securities and Exchange Commission (SEC), currently located at 200 Vesey Street in New York, NY. SEC has occupied space in the building since April 1, 2006, under a lease that expires on March 31, 2021.

The proposed lease will enable SEC to provide continued housing as well as more streamlined and efficient operations. It will improve space utilization, as the office and overall space utilization rates will be improved from 189 to 139 usable square feet (USF) and 316 to 230 USF per person, respectively.

Description

Current Rentable Square Feet (RSF)	270,431 (Current RSF/USF = 1.32)
Estimated/Proposed Maximum RSF ¹ :	207,000 (Proposed RSF/USF = 1.35)
Expansion/Reduction RSF:	63,431 RSF (Reduction)
Current USF/Person:	316
Estimated/Proposed USF/Person:	230
Expiration Dates of Current Lease(s):	03/31/2021
Proposed Maximum Leasing Authority:	20 years
Delineated Area:	North: Chambers Street; East: East River; South: Battery Park; West: Hudson River
Number of Official Parking Spaces:	0
Scoring:	Operating
Current Total Annual Cost:	\$15,344,613 (lease effective 4/1/2006)
Estimated Rental Rate ² :	\$69.24/RSF
Estimated Total Annual Cost ³ :	\$14,332,680

¹ The RSF/USF at the current location is approximately 1.32; however, to maximize competition a RSF/USF ratio of 1.35 is used for the estimated proposed maximum RSF as indicated in the housing plan.

² This estimate is for fiscal year 2021 and may be escalated by 2 percent annually to the effective date of the lease to account for inflation. The proposed rental rate is fully serviced including all operating expenses, whether paid by the lessor or directly by the Government. GSA will conduct the procurement using prevailing market rental rates as a benchmark for the evaluation of competitive offers and as the basis for negotiating with offerors to ensure that the lease award is made in the best interest of the Government.

³ New leases may contain an escalation clause to provide for annual changes in real estate taxes and operating costs.

Acquisition Strategy

In order to maximize the flexibility and competition in acquiring space for SEC, GSA may issue a single, multiple-award solicitation that will allow offerors to provide blocks of space able to meet requirements in whole or in part. All offers must provide space consistent with the delineated area defined by this prospectus.

Background

The lease at 200 Vesey Street in New York, NY, comprises the New York Regional Office headquarters for SEC with jurisdiction in New York and New Jersey. The mission of SEC is to protect investors; maintain fair, orderly and efficient markets; and facilitate capital formation. SEC entered into the current lease using independent leasing authority granted by Congress. GSA proposes to use its leasing authority to secure new office space in New York City following the expiration of the current lease.

Justification

The New York Regional Office is unique to the SEC organization because it encompasses divisions typically represented in regional offices, as well as HQ-based divisions with staff who are assigned to the New York Regional Office. The current lease at 200 Vesey Street expires March 31, 2021. SEC requires continued housing to carry out its mission.

Summary of Energy Compliance

GSA will incorporate energy efficiency requirements into the Request for Lease Proposals and other documents related to the procurement of space based on the approved prospectus. GSA encourages offerors to exceed minimum requirements set forth in the procurement and to achieve an Energy Star performance rating of 75 or higher.

Interim Leasing

The Government will execute such interim leasing actions as are necessary to ensure continued housing of the tenant agency prior to the effective date of the new lease. It is in the best interest of the Government to avert the financial risk of holdover tenancy.
