6. Compounding Rules

(See also Chapter 7 “Compounding Examples”)

6.1. A compound word is a union of two or more words, either with or without a hyphen. It conveys a unit idea that is not as clearly or quickly conveyed by the component words in unconnected succession. The hyphen is a mark of punctuation that not only unites but also separates the component words; it facilitates understanding, aids readability, and ensures correct pronunciation. When compound words must be divided at the end of a line, such division should be made leaving prefixes and combining forms of more than one syllable intact.

6.2. In applying the rules in this chapter and in using the list of examples in the following chapter, “Compounding Examples,” the fluid nature of our language should be kept in mind. Word forms constantly undergo modification. Although it is often the case that hyphenated compound words eventually lose their hyphen, many of them start out unhyphenated.

6.3. The rules, therefore, are somewhat flexible. Exceptions must necessarily be allowed. Current language trends continue to point to closing up certain words which, through either frequent use or widespread dissemination through modern media exposure, have become fixed in the reader’s mind as units of thought. The tendency to merge two short words continues to be a natural progression toward better communication.

General rules

6.4. In general, omit the hyphen when words appear in regular order and the omission causes no ambiguity in sense or sound.

6.5. Words are usually combined to express a literal or nonliteral (figu-
ratl) unit idea that would not be as clearly expressed in unconnected
succession.

afterglow forget-me-not right-of-way
bookkeeping gentleman whitewash
cupboard newsprint

6.6. A derivative of a compound retains the solid or hyphenated form of
the original compound unless otherwise indicated.
coldbloodedness outlawry Y-shaped
footnoting praiseworthiness
ill-advisedly railroader

6.7. A hyphen is used to avoid doubling a vowel or tripling a consonant,
except after the short prefixes co, de, pre, pro, and re, which are gen-
erally printed solid. (See also rules 6.29 and 6.32.)

cooperation semi-independent shell-like
dehphasis brass-smith hull-less
preexistent Inverness-shire but
anti-inflation thimble-eye co-occupant

Solid compounds

6.8. Print solid two nouns that form a third when the compound has
only one primary accent, especially when the prefixed noun consists
of only one syllable or when one of the elements loses its original
accent.

airship cupboard footnote
bathroom dressmaker locksmith
bookseller fishmonger workman

6.9. Print solid a noun consisting of a short verb and an adverb as its sec-
ond element, except when the use of the solid form would interfere
with comprehension.

blowout builddfown flareback
breakdown cooldown giveaway
hangover runoff but
holdup setup cut-in
makeready showdown phase-in
markoff throwaway run-in
pickup tradeoff sit-in
6.10. Compounds beginning with the following nouns are usually printed solid.

6.12. Print solid *any, every, no, and some* when combined with *body, thing, and where*. When *one* is the second element, print as two words if meaning a single or particular person or thing. To avoid mispronunciation, print *no one* as two words at all times.

- anybody, everywhere, somebody
- anything, everyone, something
- anywhere, nobody, somewhere
- anyone, nothing, someone
- everybody, nowhere
- everything, no one

*but* any one of us may stay; every one of the pilots is responsible; everybody was accounted for

- herself, oneself, yourself
- himself, ourselves, yourselves
- itself, themselves, yourselves

6.14. Print as one word compass directions consisting of two points, but use a hyphen after the first point when three points are combined.

*also* north-south alignment

**Unit modifiers**

6.15. Print a hyphen between words, or abbreviations and words, combined to form a unit modifier immediately preceding the word modified, except as indicated in rule 6.16 and elsewhere throughout this chapter. 6.16. Where meaning is clear and readability is not aided, it is not necessary to use a hyphen to form a temporary or made compound. Restraint should be exercised in forming unnecessary combinations of words used in normal sequence.

atomic energy power  national defense appropriation
bituminous coal industry  natural gas company
civil rights case  per capita expenditure

The effects were far reaching.  The area is used for beet raising.
### 6.18. Print without a hyphen a compound predicate adjective the second element of which is a past participle. Omit the hyphen in a predicate modifier of comparative or superlative degree.
