Nuclear Regulatory Commission

Semiannual Regulatory Agenda

NUCLEAR REGULATORY COMMISSION (NRC)

NUCLEAR REGULATORY COMMISSION

10 CFR Ch. I

Unified Agenda of Federal Regulatory and Deregulatory Actions

AGENCY: Nuclear Regulatory Commission.

ACTION: Semiannual regulatory agenda.

SUMMARY: The Nuclear Regulatory Commission (NRC) is publishing its semiannual regulatory agenda in accordance with Public Law 96-354, The Regulatory Flexibility Act, and Executive Order 12866, Regulatory Planning and Review. The agenda is a compilation of all rules on which the NRC has recently completed action or has proposed or is considering action. This issuance updates any action occurring on rules since publication of the last semiannual agenda on December 13, 2004 (69 FR 74244).

ADDRESSES: Comments on any rule in the agenda may be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Rulemakings and Adjudications Staff. Comments may also be hand delivered to the One White Flint North Building, 11555 Rockville Pike, Rockville, Maryland, between 7:30

a.m. and 4:15 p.m., Federal workdays. Comments received on rules for which the comment period has closed will be considered if it is practical to do so, but assurance of consideration cannot be given except as to comments received on or before the closure dates specified in the agenda.

The agenda and any comments received on any rule listed in the agenda are available for public inspection and copying for a fee at the Nuclear Regulatory Commission's Public Document Room, One White Flint North, 11555 Rockville Pike, Room O-1F21, Rockville, Maryland.

FOR FURTHER INFORMATION CONTACT: For further information concerning NRC rulemaking procedures or the status of any rule listed in this agenda, contact Michael T. Lesar, Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone 301-415-7163 (e-mail: mtl@nrc.gov). Persons outside the Washington, DC, metropolitan area may call, toll-free: 1-800-368-5642. For further information on the substantive content of any rule listed in the agenda, contact the individual listed under the heading Agency Contact for that rule.

SUPPLEMENTARY INFORMATION: The information contained in this

semiannual publication is updated to reflect any action that has occurred on rules since publication of the last NRC semiannual agenda on December 13, 2004 (69 FR 74244). Within each group, the rules are ordered according to the Regulation Identifier Number (RIN).

The information in this agenda has been updated through March 18, 2005. The date for the next scheduled action under the heading Timetable is the date the rule is scheduled to be published in the **Federal Register**. The date is considered tentative and is not binding on the Commission or its staff. The agenda is intended to provide the public early notice and opportunity to participate in the NRC rulemaking process. However, the NRC may consider or act on any rulemaking even though it is not included in the agenda.

The NRC agenda lists all open rulemaking actions. Four rules affect small entities.

Dated at Rockville, Maryland, this 18th day of March 2005.

For the Nuclear Regulatory Commission.

Michael T. Lesar,
*Chief, Rules and Directives Branch,
Division of Administrative Services,
Office of Administration.*

Nuclear Regulatory Commission—Proposed Rule Stage

Sequence Number	Title	Regulation Identifier Number
3970	Fitness for Duty Programs	3150-AF12
3971	Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants	3150-AG24
3972	Reevaluation of Power Reactor Physical Protection Regulations and Position on a Definition of Radiological Sabotage	3150-AG63
3973	Controlling the Disposition of Solid Materials	3150-AH18
3974	Large Break Loss-of-Coolant Accident (LB-LOCA) Redefinition	3150-AH29
3975	Elimination of Requirement To Submit Annual Financial Report	3150-AH39
3976	Collection, Reporting, or Posting of Information	3150-AH40
3977	National Source Tracking	3150-AH48
3978	Broadening Scope of Access Authorization and Facility Security Clearance Regulations	3150-AH52
3979	Post-Fire Operator Manual Actions	3150-AH54
3980	AP1000 Design Certification	3150-AH56
3981	Clarification of NRC Civil Penalty Authority Over Non-Licensees	3150-AH59
3982	Design Basis Treat	3150-AH60
3983	Incorporation by Reference of ASME Code Cases	3150-AH65
3984	Implementation of a Dose Standard Beyond 10,000 Years	3150-AH68

NRC

Nuclear Regulatory Commission—Final Rule Stage

Sequence Number	Title	Regulation Identifier Number
3985	Public Records	3150-AH12
3986	Incorporation by Reference of ASME BPV Code Cases	3150-AH35
3987	Export and Import of Nuclear Equipment and Materials	3150-AH44
3988	Administrative Changes	3150-AH49
3989	Export and Import of Nuclear Equipment and Material: Nuclear Grade Graphite	3150-AH51
3990	Protection of Safeguards Information	3150-AH57
3991	Revision of Fee Schedules; Fee Recovery, FY 2005	3150-AH61
3992	Conforming Administrative Changes	3150-AH62
3993	List of Approved Spent Fuel Storage Casks: NUHOMS-24PT4 Revision, Amendment 2	3150-AH63
3994	List of Approved Spent Fuel Storage Casks: HI-STORM 100 Revision, Amendment 2	3150-AH64
3995	Charges for Duplicating Records	3150-AH66
3996	Export and Import of Nuclear Equipment and Material; Exports to Syria Embargoed	3150-AH67

Nuclear Regulatory Commission—Long-Term Actions

Sequence Number	Title	Regulation Identifier Number
3997	Update Fuel Performance Considerations and Other Fuel Cycle Issues	3150-AA31
3998	Disposal by Release Into Sanitary Sewerage	3150-AE90
3999	Advance Notification to Native American Tribes of Transportation of Certain Types of Nuclear Waste	3150-AG41
4000	Integrated Rulemaking for Decommissioning Nuclear Power Reactors	3150-AG47
4001	Transfers of Certain Source Materials by Specific Licensees	3150-AG64
4002	Entombment Options for Power Reactors	3150-AG89
4003	Modifications to Pressure-Temperature Limits	3150-AG98
4004	Distribution of Source Material to Exempt Persons and General Licensees and Revision of 10 CFR 40.22 General License	3150-AH15
4005	Implement US-IAEA Safeguards Agreement	3150-AH38
4006	Exemptions From Licensing and Distribution of Byproduct Material; Licensing and Reporting Requirements	3150-AH41
4007	Performance-Based ECCS Acceptance Criteria	3150-AH42
4008	Decoupling of Assumed Loss of Offsite Power from Loss-of-Coolant Accidents (LOCA)	3150-AH43
4009	Reduce the Likelihood of Funding Shortfalls for Decommissioning Under the License Termination Rule	3150-AH45

Nuclear Regulatory Commission—Completed Actions

Sequence Number	Title	Regulation Identifier Number
4010	Risk-Informed Categorization and Treatment of Structures, Systems and Components for Nuclear Power Reactors	3150-AG42
4011	Emergency Planning and Preparedness for Production and Utilization Facilities	3150-AH00
4012	Security Requirements for Portable Gauges Containing Byproduct Material	3150-AH06
4013	Medical Use of Byproduct Material—Recognition of Specialty Boards	3150-AH19
4014	Acceptance Criteria for Emergency Core Cooling Systems for Light-Water Nuclear Power Reactors	3150-AH22
4015	Codification of EA-03-009 RPV Head and Penetration Inspection Requirements	3150-AH46
4016	Minor Correction Amendments for FY2004	3150-AH58

Nuclear Regulatory Commission (NRC)

Proposed Rule Stage

3970. FITNESS FOR DUTY PROGRAMS**Priority:** Substantive, Nonsignificant**Legal Authority:** 42 USC 2201; 42 USC 5841**CFR Citation:** 10 CFR 26**Legal Deadline:** None

Abstract: The proposed rule would amend the Commission's regulations to ensure compatibility with the Department of Health and Human Services guidelines, eliminate or modify unnecessary requirements in some areas, clarify the Commission's original intent of the rule, and improve overall program effectiveness and efficiency and establish threshold for the control of working hours at nuclear power plants to ensure that working hours in excess of the thresholds are controlled through a risk-informed deviation process. Because of the issues raised in response to the earlier affirmed (fitness for duty) rule, a new proposed rule will be published, including provisions to provide significantly greater assurance that worker fatigue does not adversely affect the operational safety of nuclear power plants. This new proposed rule is scheduled to be provided to the Commission by June 1, 2005. This proposed rule subsumes the proposed rule "Nuclear Power Plant Worker Fatigue (RIN 3150-AG99)." This rulemaking would address the petition for rulemaking submitted by the Virginia Electric and Power Company (VEPCO) (PRM-26-1) and a petition for rulemaking submitted by Barry Quigley (PRM-26-2) related to worker fatigue.

Related RIN: Related to 3150-AG62**RIN:** 3150-AF12**3971. EARLY SITE PERMITS; STANDARD DESIGN CERTIFICATIONS; AND COMBINED LICENSES FOR NUCLEAR POWER PLANTS****Priority:** Substantive, Nonsignificant**Legal Authority:** 42 USC 2201; 42 USC 5841**CFR Citation:** 10 CFR 2; 10 CFR 20; 10 CFR 50; 10 CFR 51**Legal Deadline:** None

Abstract: The proposed rule would amend the Commission's requirements for early site permits, standard design certifications, and combined licenses for nuclear power plants, and for other licensing processes. The amendments are based on the NRC staff's experience with the previous design certification reviews and on discussions with stakeholders about the early site permit (ESP), design certification, and combined license (COL) processes. This action is expected to improve the effectiveness of the licensing processes for future applicants. The rulemaking also would make conforming clarifications and corrections to the NRC's regulations.

The NRC is proposing to reorganize 10 CFR part 52 to establish a separate section for each of the seven licensing processes currently described in 10 CFR part 52 (early site permits, early site reviews, standard design certification, standard design approvals, combined licenses, manufacturing licenses, and duplicate design licenses). The purpose of this reorganization is to clarify that each licensing process has equal standing. In addition, several subparts would be reserved for future licensing processes. No substantive changes are intended by the incorporation of current appendices M, N, O, and Q into the new subparts in 10 CFR part 52.

The NRC is also proposing to retitle 10 CFR part 52 as Additional Licensing Processes for Nuclear Power Plants to clarify that the licensing processes in 10 CFR part 52 are in addition to and supplement the two-step licensing process in 10 CFR part 50 and the license renewal process in 10 CFR part 54, and are not limited to the early site permit, standard design certification, and combined license processes as the current title implies.

NPRM Comment Period End	09/16/03	
NPRM	08/00/05	

Regulatory Flexibility Analysis Required: No**Small Entities Affected:** No**Government Levels Affected:** None

Additional Information: The proposed rule would amend section 52.1 to clarify that all seven licensing processes are within the scope of 10 CFR part 52. Sections within current appendices M, N, O, and Q would also become new sections of the revised part. In addition, the proposed rule would reserve sections for future licensing processes. In doing so, the NRC hopes to convey that 10 CFR part 52 is the preferred location in 10 CFR for nuclear power plant licensing processes. The proposed rule subsumed the rulemaking, "Standardized Plant Designs, Early Review of Sites Suitability Issues; Clarifying Amendments" (RIN 3150-AE25), that would remove redundant appendices M, N, O, and Q from part 50. The part 52 rulemaking plan (SECY-98-282) was approved by the Commission on January 14, 1999.

Related RIN: Merged with 3150-AE25**RIN:** 3150-AG24**3972. REEVALUATION OF POWER REACTOR PHYSICAL PROTECTION REGULATIONS AND POSITION ON A DEFINITION OF RADIOLOGICAL SABOTAGE****Priority:** Substantive, Nonsignificant**Legal Authority:** 42 USC 2201; 42 USC 5841**CFR Citation:** 10 CFR 73**Legal Deadline:** None

NRC

Proposed Rule Stage

Abstract: The proposed rule would amend the Commission's regulations to require each power reactor licensee to establish and maintain an onsite security program and organization with the objective of providing high assurance that licensed activities do not constitute an unreasonable risk to public health and safety as a result of radiological sabotage by design basis threat (DBT). To achieve the general objective, the regulation requires that onsite security programs and security organizations be designed to prevent core damage and/or spent fuel damage. The rulemaking uses risk insights to determine which plant systems need protection.

RIN: 3150-AG63**3973. CONTROLLING THE DISPOSITION OF SOLID MATERIALS****Priority:** Substantive, Nonsignificant**Legal Authority:** 42 USC 2201; 42 USC 5841**CFR Citation:** 10 CFR 20**Legal Deadline:** None

Abstract: The proposed rule would amend the Commission's regulations to evaluate alternatives for controlling the disposition of solid materials with very low, or no levels of radioactivity. Current practice is to, on a case-by-case basis, either apply Regulatory Guide 1.86 surface contamination values or determine that there is no detectable activity using environmental measurements methods. In addition, there are no current release levels established generally for volumetrically contaminated materials. An examination of approaches to the control of disposition of solid materials would help the NRC staff evaluate the cost effectiveness of means to handle requests for clearance of materials

during both operation and decommissioning.

RIN: 3150-AH18**3974. LARGE BREAK LOSS-OF-COOLANT ACCIDENT (LB-LOCA) REDEFINITION****Priority:** Substantive, Nonsignificant**Legal Authority:** 42 USC 2201; 42 USC 5841**CFR Citation:** 10 CFR 50**Legal Deadline:** None

Abstract: The proposed rule would amend the Commission's regulations to allow for a risk-informed alternative to the present maximum loss-of-coolant accident (LOCA) break size. This rulemaking would also address a petition for rulemaking submitted by the Nuclear Energy Institute (PRM-50-75).

RIN: 3150-AH29**3975. ELIMINATION OF REQUIREMENT TO SUBMIT ANNUAL FINANCIAL REPORT****Priority:** Substantive, Nonsignificant**Legal Authority:** 42 USC 2201; 42 USC 5841**CFR Citation:** 10 CFR 50**Legal Deadline:** None

Abstract: The proposed rule would amend the Commission's regulations to eliminate the reporting requirement in 10 CFR 50.71(b), which requires that licensees for production and utilization facilities submit annual financial reports, including certified financial statements, to the Commission.

The proposed rule would eliminate the costs to licensees of submitting their annual financial reports and the costs to the NRC of processing those submittals. The cost savings are relatively small, but it is expected that the costs associated with the rulemaking will be justified by the cost savings from eliminating the reporting requirement. The elimination of the report will also serve to fulfill a Congressional mandate to address outdated or paperwork-oriented requirements.

Abstract: The proposed rule would amend the Commission's regulations to clarify or revise the regulations such

NRC

Proposed Rule Stage

that: (1) Licensees would not be required, unless a specific request was made by a worker, to provide an annual report to a worker of their radiation dose if a worker received less than two percent of the limits defined in 10 CFR part 20; (2) licensees for production and utilization facilities governed by 10 CFR part 50 would not need to label containers in accordance with 10 CFR 20.1904, "Labeling containers," if the containers met conditions such as being clearly identifiable as containing radioactive materials, being accessible only to trained individuals, and being located in an area posted pursuant to 10 CFR 20.1902, "Posting requirements"; and (3) licensees would no longer need to attempt to obtain records of a worker's cumulative radiation dose unless the worker was to be involved in a planned special exposure. In addition, the staff is considering using this opportunity to propose a change to 10 CFR 20.1003, "Definitions," to clarify the definition of total effective dose equivalent (TEDE).

3977. NATIONAL SOURCE TRACKING

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 20; 10 CFR 32; 10 CFR 150

Legal Deadline: None

Abstract: The proposed rulemaking would amend the Commission's regulations to establish the regulatory foundation for a new national source tracking system for high-risk sealed sources, as designated in the IAEA Code of Conduct (Category 1 and 2 sources). The tracking system is intended to track the high-risk sources

from cradle to grave. Licensees will be required to report manufacture of new sources, transfer of sources, receipt of sources and end-points for sources (e.g. export, and disposal).

3978. BROADENING SCOPE OF ACCESS AUTHORIZATION AND FACILITY SECURITY CLEARANCE REGULATIONS

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 2201; 41 USC 5841

CFR Citation: 10 CFR 25; 10 CFR 95

Legal Deadline: None

Abstract: The direct final rule would have amended the Commission's regulations to broaden the scope of the regulations applicable to persons who may require access to classified information, to include persons who may need access in connection with licensing and regulatory activities under the regulations that govern the disposal of high-level radioactive waste in geologic repositories, and persons who may need access in connection with other activities as the Commission may determine, such as vendors of advanced reactor designs. The Commission would have also amended its regulations to broaden the scope of the regulations applicable to procedures for obtaining facility security clearances, to include persons who may need to use, process, store, reproduce, transmit, transport, or handle NRC classified information in connection with the above-identified activities.

3979. POST-FIRE OPERATOR MANUAL ACTIONS

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 50

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations revising fire protection requirements in appendix R to 10 CFR part 50, along with associated guidance, to allow manual actions when those actions meet appropriate acceptance criteria. The staff developed an interim enforcement policy to deal with compliance issues until the rulemaking is complete and final revisions to the regulations and the guidance are effective (January 14, 2005; 70 FR 2577).

Nuclear Regulatory Commission (NRC)**Final Rule Stage****3985. PUBLIC RECORDS****Priority:** Substantive, Nonsignificant**Legal Authority:** 42 USC 2201; 42 USC 5841**CFR Citation:** 10 CFR 9**Legal Deadline:** None

Abstract: The proposed rule would amend the Commission's regulations to reflect changes in officials who initially deny access to records or deny access to records whose initial denial has been appealed, and to reflect a change in an appellate official due to a reorganization. The amendment would allow the Executive Assistant to the Secretary of the Commission, rather than the Assistant Secretary, to make the initial determination to deny NRC records in whole or in part under the Commission's regulations. Also, an appeal of a denial of a request for a waiver or reduction of fees, or denial of a request for expedited processing would be appealed to the Executive Director for Operations rather than the Secretary of the Commission.

3986. INCORPORATION BY REFERENCE OF ASME BPV CODE CASES**Priority:** Substantive, Nonsignificant**Legal Authority:** 42 USC 2201; 42 USC 5841**CFR Citation:** 10 CFR 50**Legal Deadline:** None

Abstract: The proposed rule would amend the Commission's regulations to incorporate by reference the latest revisions of two previously incorporated regulatory guides which address NRC review and approval of Code cases published by the American Society of Mechanical Engineers (ASME). The Code cases listed in these regulatory guides have been reviewed by the NRC and found to be acceptable for use as alternatives to requirements in the ASME Boiler and Pressure Vessel Code pertaining to the construction and inservice inspection of nuclear power plant components.

3989. EXPORT AND IMPORT OF NUCLEAR EQUIPMENT AND MATERIAL: NUCLEAR GRADE GRAPHITE

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 110

Legal Deadline: None

Abstract: The direct final rule amends the Commission's regulations by revising its export/import regulations to remove the NRC's export licensing requirements for nuclear grade graphite for non-nuclear end use. The purpose of this change is to remove from NRC export licensing jurisdiction nuclear materials which are not of significance from a nuclear proliferation perspective. The responsibility for the licensing of exports of nuclear grade graphite for non-nuclear end use will be transferred to the Department of Commerce (DOC). The DOC, which has concurred in this rule, will issue a direct final rule that will place these exports under its jurisdiction. The DOC direct final rule will be published concurrently and will become effective on the same date as the NRC's direct final rule.

3990. ● PROTECTION OF SAFEGUARDS INFORMATION

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 2, 10 CFR 30; 10 CFR 40; 10 CFR 50; 10 CFR 52; 10 CFR 63; 10 CFR 70; 10 CFR 72; 10 CFR 73; 10 CFR 76; 10 CFR 150

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations for the protection of Safeguards Information (SGI) to be consistent with recent Commission practices reflected in Orders and Threat Advisories, and Confirmatory Action Letters issued since September 11, 2001. The amendments also would provide the flexibility afforded the Commission for the protection of such information by the Atomic Energy Act of 1954, as amended (AEA). The proposed amendments would affect certain licensees, information, and materials not currently specified in the regulations, but which are within the scope of the AEA. The proposed amendments are intended to protect SGI from inadvertent release and unauthorized disclosure which might compromise the security of nuclear facilities and materials.

3991. ● REVISION OF FEE SCHEDULES; FEE RECOVERY, FY 2005

Priority: Economically Significant. Major under 5 USC 801.

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 170; 10 CFR 171

Legal Deadline: Other, Statutory, September 30, 2005, Omnibus Budget Reconciliation Act of 1990, as amended.

Abstract: The proposed rule would amend the Commission's licensing, inspection, and annual fees charged to NRC licensees and applicants for an NRC license. The rulemaking is necessary to recover, through the assessment of fees, approximately 90 percent of the NRC's budget authority for Fiscal Year 2005, less the amounts appropriated from the Nuclear Waste Fund and General Fund as required by the Omnibus Budget Reconciliation Act (OBRA) of 1990, as amended.

The FY 2001 Energy and Water Development Appropriations Act amended OBRA-90 to decrease the NRC's fee recovery amount by two percent per year beginning in FY 2001, until the fee recovery amount is 90 percent for FY 2005. The purpose of this amendment is to address the fairness and equity concerns related to charging NRC license holders for agency expenses that do not provide a direct benefit to the licensee. The dollar amount to be recovered for FY 2005 is approximately \$540.7 million. OBRA-90, as amended, requires that the fees for FY 2005 be collected by September 30, 2005.

Nuclear Regulatory Commission (NRC)

Long-Term Actions

3997. UPDATE FUEL PERFORMANCE CONSIDERATIONS AND OTHER FUEL CYCLE ISSUES**Priority:** Substantive, Nonsignificant**Legal Authority:** 42 USC 2011; 42 USC 2201; 42 USC 4321; 42 USC 5841; 42 USC 5842**CFR Citation:** 10 CFR 51**Legal Deadline:** None

Abstract: The proposed rule would amend the Commission's regulations by addressing uranium fuel cycle environmental data (Table S-3) and the environmental effects of transportation of fuel and waste data (Table S-4). In section 51.51, the environmental data would be reestimated and reflect changes in the structure and activities of the fuel cycle and the availability of better data. Estimates of releases of radon-222 and technetium-99 would be added to Table S-3. The addition of a specific value for radon-222 would address the outstanding portion of petition for rulemaking PRM-51-1, submitted by the New England Coalition on Nuclear Pollution. To provide immediate relief to the petitioners' request, the Commission published a final rule on March 14, 1977 (42 FR 13803), that removed the original value for radon-222 from Table S-3 so that it became subject to case-specific litigation. It was anticipated that the Commission would add a specific value for radon-222, but the Commission deferred action until a general updating of Table S-3 is undertaken. For section 51.52, the environmental impact estimates would be reestimated to reflect the use of more highly enriched fuel and

discharge of more highly irradiated fuels from a reactor, as well as many changes needed to update fuel cycle process and technologies.

This rulemaking would result in current and more accurate estimates of the environmental impact of licensing a new plant, and would eliminate the requirement to review the contribution to environmental impacts from radon-222 and technetium-99 in individual plant reviews. This rule is being reissued as a proposed rule, and would update the initial rulemaking effort to address newly emerging issues and research.

Abstract: The advance notice of proposed rulemaking (ANPRM) was published to request public comment, information, and recommendations on contemplated amendments to the Commission's regulations governing the release of radionuclides from licensed nuclear facilities into sanitary sewer systems. By incorporating current sewer treatment technologies, the contemplated rulemaking would improve the control of radioactive materials released to sanitary sewer systems by licensed nuclear facilities. Through the Interagency Steering Committee on Radiation Standards (ISCORS), the NRC and the Environmental Protection Agency conducted a joint survey of sewage treatment plants. The results of the final report of the joint survey were considered in the Commission's denial of the petition for rulemaking submitted by the Northeast Ohio Sewer District (PRM-20-22). A notice denying the petition was published in the Federal Register on January 27, 2005 (70 FR 3898). The staff is considering public comments and whether to withdraw this ANPRM.

3999. ADVANCE NOTIFICATION TO NATIVE AMERICAN TRIBES OF TRANSPORTATION OF CERTAIN TYPES OF NUCLEAR WASTE

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 71; 10 CFR 73

Legal Deadline: None

Abstract: The advance notice of proposed rulemaking (ANPRM) invited early input from affected parties and the public on the issues associated with the advance notification of Indian tribes of spent fuel shipments. The Department of Energy (DOE) has indicated that it intends to comply with NRC's physical protection requirements for shipments under the Nuclear Waste Policy Act; however, its current practices conflict with NRC regulations. For example, DOE has asked for and will continue to ask for exemptions from the shipment itinerary information requirements of foreign research reactor fuel. DOE, as a courtesy, provides Indian tribes with notification of spent fuel shipments. NRC's current regulations do not address notification of Indian tribes. Further, DOE has developed a satellite tracking system to monitor the status of spent fuel shipments at all times. Distribution of this status information to parties other than Governors' designees is also not compatible with NRC regulations. A rulemaking plan was approved by the Commission on February 20, 2001. This rulemaking was put on hold by the Commission pending review of NRC rules in response to events of September 11, 2001.

4000. INTEGRATED RULEMAKING FOR DECOMMISSIONING NUCLEAR POWER REACTORS

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 50

Legal Deadline: None

Abstract: A staff requirements memorandum dated June 23, 1999, directed the NRC staff to consider an integrated, risk-informed decommissioning rule rather than individual rulemakings to address emergency preparedness, insurance, safeguards, operator staffing, and backfit for nuclear power plants that are being decommissioned. SECY-99-168, dated June 30, 1999, recommended that the integrated approach be approved and outlined staff plans for pursuing such a rulemaking. Accordingly, the staff has subsumed previous rulemaking activities in the areas of emergency planning, insurance, safeguards, operator staffing, and backfit into one integrated rulemaking effort. This rulemaking would apply to licensees who certified, pursuant to 10 CFR 50.82(a), that they have permanently ceased facility operation(s) and have permanently removed fuel from the reactor vessel. The Commission approved this approach in an SRM dated December 21, 1999. This rulemaking also would address a petition for rulemaking submitted by the North Carolina Public Utility Commission (PRM-50-57).

NPRM	To Be Determined	

Regulatory Flexibility Analysis Required: No

Small Entities Affected: No

Government Levels Affected: None

Additional Information: In SECY-00-0145, dated June 28, 2000, the NRC

staff recommended a decommissioning rulemaking plan in the areas of emergency planning, insurance, safeguards, operator staffing, and backfit (the integrated decommissioning rulemaking plan). The rulemaking plan relied on a draft decommissioning risk study as the basis for its recommendations. The Commission returned the rulemaking plan to the staff for rework in September 2000, based on changes to the decommissioning risk study findings. The decommissioning risk study, NUREG-1738, was issued in January 2001. After assessing the findings in the risk study, the staff presented a policy options paper to the Commission, SECY-01-0100, dated June 4, 2001, that provided options and made recommendations on issues to be addressed in the integrated rulemaking. Following the terrorist events of September 11, 2001, the NRC staff recommended and the Commission approved the withdrawal of SECY-01-0101 because of the likely changes in the staff's position on decommissioning plant safeguards. The decommissioning policy position will be revisited when a broad-scope NRC safeguards policy is developed in response to potential terrorist acts at nuclear facilities. The schedule for the integrated rulemaking cannot be determined at this time.

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 20; 10 CFR 50

Legal Deadline: None

Abstract: The advance notice of proposed rulemaking (ANPRM) was published seeking stakeholder input on three proposed regulatory options and whether entombment was a viable decommissioning alternative. In SECY 02-0191 (October 25, 2002), NRC staff proposed deferring the rulemaking until the Office of Nuclear Regulatory Research has conducted research to develop a sound technical basis for an entombment option, estimated in 2005. The Commission, in a Staff Requirements Memorandum dated November 26, 2002, did not object to staff's proposal, and requested information regarding the scope and type of research needed to support any entombment option. This information was provided to the Commission on May 14, 2003. The Office of Nuclear Regulatory Research conducted research in 2004 and plans to issue an Interim Research Report in mid-2005.

The staff is continuing to defer this rulemaking activity.

4004. DISTRIBUTION OF SOURCE MATERIAL TO EXEMPT PERSONS AND GENERAL LICENSEES AND REVISION OF 10 CFR 40.22 GENERAL LICENSE

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 40

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations to improve the control over the distribution of source material to exempt persons and to general licensees in order to make part 40 more risk-informed. The proposed rule also would govern the licensing of source material by adding specific requirements for licensing of and reporting by distributors of products and materials used by exempt persons and general licensees. Source material is used under general license and under various exemptions from licensing requirements in part 40 for which there is no regulatory mechanism for the Commission to obtain information to fully assess the resultant risks to public health and safety. Although estimates of resultant doses have been made, there is a need for ongoing information on the quantities and types of radioactive material distributed for exempt use and use under general license. Obtaining information on the distribution of source material is particularly difficult because many of the distributors of source material to exempt persons and generally licensed persons are not currently required to hold a license from the Commission. Distributors are often unknown to the Commission. No controls are in place to ensure that products and materials distributed are maintained within the applicable constraints of the exemptions. In addition, the amounts of source material allowed under the general license in 10 CFR 40.22 could result in exposures above 1 mSv/year (100 mrem/year) to workers at facilities that are not required to meet the requirements of parts 19 and 20. Without knowledge of the identity and location of the general licensees, it would be difficult to enforce restrictions on the general licensees. This rule also would address PRM-40-27 submitted by the State of Colorado and Organization of Agreement States.

RIN: 3150-AH15**4005. IMPLEMENT US-IAEA SAFEGUARDS AGREEMENT****Priority:** Substantive, Nonsignificant**Legal Authority:** 42 USC 2201; 42 USC 5841**CFR Citation:** 10 CFR 40; 10 CFR 50; 10 CFR 60; 10 CFR 61; 10 CFR 63; 10 CFR 70; 10 CFR 72; 10 CFR 75; 10 CFR 76; 10 CFR 150**Legal Deadline:** None

Abstract: The final rule will amend the Commission's regulations to implement the additional reporting and complementary access requirements contained in the US/IAEA Additional Protocol for the application of safeguards in the United States of America.

RIN: 3150-AH38**4006. EXEMPTIONS FROM LICENSING AND DISTRIBUTION OF BYPRODUCT MATERIAL; LICENSING AND REPORTING REQUIREMENTS****Priority:** Substantive, Nonsignificant**Legal Authority:** 42 USC 2201; 42 USC 5841**CFR Citation:** 10 CFR 30; 10 CFR 31; 10 CFR 32**Legal Deadline:** None

Abstract: The proposed rule would use the results of the reevaluation of exemptions to make parts 30, 31, and 32 more risk-informed and less prescriptive and to better ensure safety. The proposed rule would eliminate unnecessary restrictions and obsolete provisions currently in the regulations. Improvements to distributor reporting requirements are also being considered. This rulemaking subsumes RM 526, "Use of Exempt Sources in Devices, 10 CFR 30.18."

RIN: 3150-AH41**4007. PERFORMANCE-BASED ECCS ACCEPTANCE CRITERIA****Priority:** Substantive, Nonsignificant**Legal Authority:** 42 USC 2201; 42 USC 5841**CFR Citation:** 10 CFR 50**Legal Deadline:** None

Abstract: The proposed rule would amend section 50.46 to develop performance-based acceptance criteria for fuel cladding performance during loss-of-coolant accidents. Existing provisions of section 50.46 applicable to certain zirconium-based cladding materials would be supplemented by performance-based standards for maximum peak cladding temperature and oxidation limit. The supplementary

performance standard would allow licensees to use alternative cladding materials, without seeking an exemption, provided that (1) testing demonstrated that adequate ductility would be maintained, and (2) ECCS analyses showed that the new performance criteria would be satisfied. This rulemaking would also address a petition for rulemaking submitted by the Nuclear Energy Institute (PRM-50-71).

RIN: 3150-AH42**4008. DECOUPLING OF ASSUMED LOSS OF OFFSITE POWER FROM LOSS-OF-COOLANT ACCIDENTS (LOCA)****Priority:** Substantive, Nonsignificant**Legal Authority:** 42 USC 2201; 42 USC 5841**CFR Citation:** 10 CFR 50**Legal Deadline:** None

Abstract: The proposed rule would amend the Commission's regulations to eliminate, based upon appropriate risk considerations, the assumption of a coincident loss of offsite power for postulated large-break (low frequency) loss-of-coolant accidents (LB-LOCA) in General Design Criterion (GDC) 35. The proposed rule would provide a voluntary alternative to existing requirements where specified acceptance criteria are satisfied, and also would address a petition for rulemaking submitted by Bob Christie Performance Technology (PRM-50-77).

RIN: 3150-AH43

4009. REDUCE THE LIKELIHOOD OF FUNDING SHORTFALLS FOR DECOMMISSIONING UNDER THE LICENSE TERMINATION RULE

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 2201; 42 USC 5841

CFR Citation: 10 CFR 20; 10 CFR 30; 10 CFR 40; 10 CFR 70; 10 CFR 72

Legal Deadline: None

Abstract: The proposed rule would amend the Commission's regulations by examining the addition and revision of requirements for (1) financial assurance and (2) licensee monitoring, reporting, and remediation to reduce the potential for sites that could have funding shortfalls or contamination that would complicate future decommissioning (i.e., create a future legacy site).
