

Apr. 21 / Administration of William J. Clinton, 1994

You might have heard the line that teaching kids to count is fine but teaching them what counts is best. Sandy McBrayer has done even more than that; she's taught her children that they count. Over 25 of her students who started out on the streets are now in college.

So I want to thank her for her dedication to the students of the Homeless Outreach School, for being a model for all teachers

throughout the country, and for the whole idea of education reform. And I'm proud to present her the 1994 Apple Award as America's Teacher of the Year. I'll hold your apple for you. I'll polish your apple for you. [*Laughter*]

NOTE: The President spoke at 2:13 p.m. in the Rose Garden at the White House.

Statement on the Advisory Committee on Human Radiation Experiments *April 21, 1994*

I commend the work already done by Secretary O'Leary, other members of the Cabinet, and the many other agency officials on the issue of Government-sponsored human radiation experiments which took place during the past 50 years. Today's first meeting of the Advisory Committee on Human Radiation Experiments is another step by the administration to have an honest and open approach to its investigation of the cold-war-era experiments.

The Advisory Committee has an important task in determining whether the U.S. Govern-

ment treated its own citizens wrongfully through human experimentation. Both those Americans who were the subject of these questioned experiments and the scientists who performed them deserve a fair and thorough investigation.

Only by dealing honestly with the past can we hope to build a better future.

NOTE: The Executive order of January 15 which established the Committee is listed in Appendix D at the end of this volume.

Statement on the School-to-Work Opportunities Legislation *April 21, 1994*

I am gratified by today's final passage of the "School-to-Work Opportunities Act." I am particularly pleased that this vital economic opportunity legislation passed with such broad bipartisan support.

This legislation will help millions of our young people enter the middle class and secure the American dream for themselves and their families. It will give them the opportunity to receive advanced, academically rigorous technical training. And it will help them obtain the knowledge and skills they need to get jobs that pay well and offer real chances for career advancement.

School-to-work is central to our efforts to guarantee lifetime learning for every citizen. In a rapidly changing world economy, what you earn increasingly depends on what you learn. We are putting in place an ambitious agenda

to prepare our people. Last year Congress enacted my proposal to make college loans more affordable for middle class students. Just 3 weeks ago, I signed into law the Goals 2000: Educate America Act, which set national educational standards. And by the end of this year, I look forward to signing legislation that will reform and expand Head Start, reconfigure Federal aid to elementary and secondary education, and transform our outmoded unemployment system into a world-class reemployment system.

This is a time of real ferment and real achievement for America's workers and students. Working together, we can continue to break gridlock and build new opportunities for American families to prosper in a rapidly changing economy.
