

ultimately this dispute must be resolved. He has done his best to get that job done and will continue to do so.

As the owners and players meet in these last few days before the scheduled start of the season, I hope they will give it their best shot, that they will bargain in good faith and be flexible and willing to compromise so that America's

baseball fans again have a sport they can be proud of.

Like millions of other fans across the country, I want to see the Ripkens, Gwynns, Bonds, Mattinglys, and Cones in uniform on the playing field. We're getting down to the wire. Let's hope the owners and players see the light for the sake of the fans and bring back Major League Baseball.

Statement on Senate Action Confirming Dan Glickman as Secretary of Agriculture *March 30, 1995*

I am pleased the Senate today overwhelmingly voted in support of Dan Glickman as the new Secretary at the Department of Agriculture.

Dan Glickman will be a strong voice and advocate for farmers, working families, and American agriculture.

During the past 2 years, the Agriculture Department has broken new ground on expanding trade opportunities, developing empowerment zones for distressed rural areas, and streamlining a major Federal agency that now runs more

efficiently. However, our work is not done, and we must still tackle other important issues facing rural communities, farmers, and ranchers.

Next month will be especially important as we convene in Ames, Iowa, for the National Rural Conference to discuss the development of our Nation's economy, jobs, trade, and preservation of the family farm. It is important to hear firsthand from ordinary Americans, and I am pleased Dan is starting the job with his sleeves rolled up.

Message to the Congress on Science and Technology *March 29, 1995*

To the Congress of the United States:

This Nation's future depends on strong public and private support for science and technology. My Administration's decision to make sound investments in science and technology even as the Federal Government cuts other spending is premised on three basic assumptions:

- Technology is the engine of economic growth.
- Scientific knowledge is the key to the future.
- Responsible government advances science and technology.

The Congress and the American people can find evidence of the Administration's dedication to responsible government support for science and technology in our defense and economic policies as well as our management of the

science and technology enterprise. We have decreased the Federal deficit, helped to create millions of new jobs, and improved the tax treatment of small businesses and of investments in research and development. Hemispheric and global trade agreements as well as relaxation of outdated export controls have opened huge export markets to America's high-tech industries. My *National Security Strategy of Engagement and Enlargement* (February 1995) depends on farsighted and efficient science and technology investments. Our foreign policy and security interests are also supported by mutually beneficial international cooperation in science and technology.

We have consistently endorsed technology policies to increase prosperity and enhance environmental quality. In *Technology for America's*
