

Neither side has plans before April 1999 to flight test, against a ballistic target missile, TMD interceptor missiles subject to the agreement on demarcation with respect to higher velocity TMD systems. Neither side has plans for TMD systems with interceptor missiles faster than 5.5 km/sec for land-based and air-based systems or 4.5 km/sec for sea-based systems. Neither side has plans to test TMD systems against target missiles with MIRVs or against reentry vehicles deployed or planned to be deployed on strategic ballistic missiles.

The elements for the agreement on higher-velocity TMD systems are:

- The velocity of the ballistic target missiles will not exceed 5 km/sec.
- The flight range of the ballistic target missiles will not exceed 3500 km.
- The sides will not develop, test, or deploy space-based TMD interceptor missiles or components based on other physical principles that are capable of substituting for such interceptor missiles.
- The sides will exchange detailed information annually on TMD plans and programs.

The Presidents noted that TMD technology is in its early stages and continues to evolve. They agreed that developing effective TMD

while maintaining a viable ABM Treaty will require continued consultations. To this end, they reaffirm that their representatives to the Standing Consultative Commission will discuss, as foreseen under the ABM Treaty, any questions or concerns either side may have regarding TMD activities, including matters related to the agreement to be completed on higher-velocity systems, which will be based on this joint statement by the two Presidents, with a view to precluding violation or circumvention of the ABM Treaty. These consultations will be facilitated by the agreed detailed annual information exchange on TMD plans and programs.

The Presidents also agreed that there is considerable scope for cooperation in theater missile defense. They are prepared to explore integrated cooperative defense efforts, inter alia, in the provision of early warning support for TMD activities, technology cooperation in areas related to TMD, and expansion of the ongoing program of cooperation in TMD exercises.

In resolving the tasks facing them, the Parties will act in a spirit of cooperation, mutual openness, and commitment to the ABM Treaty.

Russia-United States Joint Statement on Chemical Weapons

March 21, 1997

President Clinton and President Yeltsin discussed issues relating to the entry into force of the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction. They stressed the commitment of the United States and Russia to full and effective accomplishment of the tasks and objectives of the convention.

The Presidents reaffirmed their intention to take the steps necessary to expedite ratification in each of the two countries. President Clinton expressed his determination that the United States be a party when the Convention enters into force in April of this year, and is strongly urging prompt Senate action. President Yeltsin noted that the Convention had been submitted

to the Duma with his strong recommendation for prompt ratification.

Mindful of their special role and responsibility in the matter of chemical disarmament, the United States and Russia understand that their participation in the Convention is important to its effective implementation and universality.

The Presidents noted that cooperation between the two countries in the prohibition of chemical weapons has enabled both countries to enhance openness regarding their military chemical potential and to gain experience with procedures and measures for verifying compliance with the Chemical Weapons Convention. The Parties will continue cooperation between them in chemical disarmament.

The United States will seek appropriation of necessary funds to build a facility for the destruction of neuroparalytic toxins in Russia as previously agreed.

Russia-United States Joint Statement on European Security *March 21, 1997*

Presidents Clinton and Yeltsin discussed the present security situation in the Euro-Atlantic region. They reaffirmed their commitment to the shared goal of building a stable, secure, integrated and undivided democratic Europe. The roles of the United States and Russia as powers with worldwide responsibilities place upon them a special requirement to cooperate closely to this end. They confirmed that this cooperation will be guided by the spirit of openness and pragmatism which has increasingly come to characterize the U.S.-Russian relationship in recent years.

Recalling their May 1995 Joint Statement on European Security, the Presidents noted that lasting peace in Europe should be based on the integration of all of the continent into a series of mutually supporting institutions and relationships that ensure that there will be no return to division or confrontation. No institution by itself can ensure security. The Presidents agreed that the evolution of security structures should be managed in a way that threatens no state and that advances the goal of building a more stable and integrated Europe. This evolution should be based on a broad commitment to the principles of the Organization for Security and Cooperation in Europe as enshrined in the Helsinki Final Act, the Budapest Code of Conduct and other OSCE documents, including respect for human rights, democracy and political pluralism, the sovereignty and territorial integrity of all states, and their inherent right to choose the means to ensure their own security.

The Presidents are convinced that strengthening the OSCE, whose potential has yet to be fully realized, meets the interests of the United States and Russia. The Presidents expressed their satisfaction with the outcome of the Lisbon Summit of the OSCE and agreed on the importance of implementing its decisions, both to define further the goals of security cooperation

and to continue to devise innovative methods for carrying out the growing number of tasks the OSCE has assumed.

They underscored their commitment to enhance the operational capability of the OSCE as the only framework for European security cooperation providing for full and equal participation of all states. The rule of consensus should remain an inviolable basis for OSCE decision-making. The Presidents reaffirmed their commitment to work together in the ongoing OSCE effort to develop a model for security in Europe which takes account of the radically changed situation on the eve of the 21st century and the decisions of the Lisbon Summit concerning a charter on European security. The OSCE's essential role in Bosnia and Herzegovina and its ability to develop new forms of peacekeeping and conflict prevention should also be actively pursued.

In their talks in Helsinki, the two Presidents paid special attention to the question of relations between the North Atlantic Treaty Organization and the Russian Federation. They continued to disagree on the issue of NATO enlargement. In order to minimize the potential consequences of this disagreement, the Presidents agreed that they should work, both together and with others, on a document that will establish cooperation between NATO and Russia as an important element of a new comprehensive European security system. Signed by the leaders of the NATO countries and Russia, this document would be an enduring commitment at the highest political level. They further agreed that the NATO-Russia relationship, as defined in this document, should provide for consultation, coordination and, to the maximum extent possible where appropriate, joint decision-making and action on security issues of common concern.

The Presidents noted that the NATO-Russia document would reflect and contribute both to
