NOTE: The President spoke at 12:12 p.m. at the Lisner Auditorium. In his remarks, he referred to Albert Shanker’s widow, Eadie.

Message on the Rollout of the F-22 Raptor Fighter
April 9, 1997

Today marks a major milestone in the defense of our nation. The introduction of the F-22 Raptor air superiority fighter culminates over 10 years of dedicated hard work by thousands of people across the country, the vision and long-range planning of congressional leaders, and the leadership of three Presidents. But perhaps more than anything else, it is proof positive of the know-how and can-do spirit of America’s most valuable asset—the American work force.

Today’s ceremony is more than just the “roll-out” of a new fighter aircraft. It is a tribute to the American worker and testimony to the skill, training, and dedication of our people. Across 46 states and in hundreds of companies, large and small, these men and women have come together to produce this catalyst for a revolution in air power. I’m proud to salute all those who have gathered for this event and to wish everyone associated with the F-22 much success as it moves into the flight test phase of its development program.

BILL CLINTON

NOTE: This message was read at the rollout ceremony for the aircraft at Dobbins Air Force Base in Marietta, GA.

Message to the Congress Transmitting a Report on Science and Technology
April 9, 1997

To the Congress of the United States:

A passion for discovery and a sense of adventure have always driven this Nation forward. These deeply rooted American qualities spur our determination to explore new scientific frontiers and spark our can-do spirit of technological innovation. Continued American leadership depends on our enduring commitment to science, to technology, to learning, to research.

Science and technology are transforming our world, providing an age of possibility and a time of change as profound as we have seen in a century. We are well-prepared to shape this change and seize the opportunities so as to enable every American to make the most of their God-given promise. One of the most important ways to realize this vision is through thoughtful investments in science and technology. Such investments drive economic growth, generate new knowledge, create new jobs, build new industries, ensure our national security, protect the environment, and improve the health and quality of life of our people.

This biennial report to the Congress brings together numerous elements of our integrated investment agenda to promote scientific research, catalyze technological innovation, sustain a sound business environment for research and development, strengthen national security, build global stability, and advance educational quality and equity from grade school to graduate school. Many achievements are presented in the report, together with scientific and technological opportunities deserving greater emphasis in the coming years.

Most of the Federal research and education investment portfolio enjoyed bipartisan support during my first Administration. With the start of a new Administration, I hope to extend this partnership with the Congress across the entire
science and technology portfolio. Such a partnership to stimulate scientific discovery and new technologies will take America into the new century well-equipped for the challenges and opportunities that lie ahead.

The future, it is often said, has no constituency. But the truth is, we must all be the constituency of the future. We have a duty—to ourselves, to our children, to future generations—to make these farsighted investments in science and technology to help us master this moment of change and to build a better America for the 21st century.

WILLIAM J. CLINTON

The White House,
April 9, 1997.

Remarks on the Implementation of Welfare Reform and an Exchange With Reporters
April 10, 1997

The President. Welcome to the members of the Cabinet and their representatives as well as to the members of the press. One month ago, I directed the members of the Cabinet to do everything they can to hire people off the welfare rolls into available jobs in Government. And I asked the Vice President to lead and coordinate this effort. Today we are here to receive each agency's specific plans to do that.

We have the good fortune to begin with some encouraging news. Today I am pleased to report that over the last 4 years, from January of '93 to January of '97, America's welfare rolls declined by 2.8 million people. The welfare rolls have now declined by as much in the past 4 years as they increased in the previous 25 years. And that's a great tribute to all of those who worked on welfare reform as well as to the strength of the American economy.

In the next 4 years, we have to move another 2 million people off welfare to meet the targets of the welfare reform law. We have all got to take responsibility to see that the jobs are there so that people can leave welfare and become permanent members of the work force. Of course, the vast majority of these jobs will have to come from the private sector. And I will convene a meeting of business leaders here at the White House next month to talk about what more can be done to aid that endeavor. I also want to say that the members of the Cabinet who have special responsibility there will be doing more. And I'm glad to announce today that, at the initiative of Aida Alvarez, Betsy Myers, the Director of Women's Outreach here at the White House, will leave the White House and move to the Small Business Administration to coordinate a new effort there to encourage small- and women-owned businesses to hire people from welfare to work.

But the Government must do its share as well. The Federal Government, after all, is a large employer in the United States. We employ a little over one percent of the total work force of our country. Today I'm pleased to announce that we will hire at least 10,000 welfare recipients over the next 4 years, and we will urge private contractors that work with Government to hire people off welfare as well.

I'm especially pleased that six of those who will be hired from the welfare rolls will work right here in the White House. Now, let me be clear: These will not be make-work jobs. These will be jobs that actually need to be filled, work that needs to be done for the American people. We will demand the highest performance from the new employees and insist that they live up to their responsibilities. But we will also offer them a chance at a new beginning.

Today we have with us two former welfare recipients who have found that new beginning. The Vice President and I just had the honor of meeting with them in the Oval Office. They are on my left. To my far left is Rebecca Wilson of Clinton, Iowa. That has a nice ring to it. [Laughter] She is a single mother of two who was on welfare, working and attending and—then while she was attending Clinton Community College. Last year, she got a part-time job as a clerk in her local Social Security office.
