

Ladies and gentlemen, the Vice President.

NOTE: The President spoke at 2:10 p.m. in the East Room at the White House.

Statement on Senate Finance Committee Action on Fast-Track Trading Authority Legislation

October 1, 1997

I am pleased that the Senate Finance Committee, with overwhelming bipartisan support, has reported out legislation that renews the partnership between the President and the Congress in reaching trade agreements, a negotiating authority every President has had since 1974. To keep the American economy strong, we must continue to break down unfair foreign trade barriers to our goods and services. This legislation

will allow us to tear down those barriers and help American businesses and workers compete and win in the global marketplace. I look forward to working with the congressional leadership to build on the bipartisan spirit we saw in the Senate Finance Committee today and to secure passage of this important legislation this year.

Remarks Announcing a Food Safety Initiative and an Exchange With Reporters

October 2, 1997

The President. Thank you, Mr. Vice President, Secretary Shalala, Deputy Secretary Rominger, Cathie Woteki, Dr. Friedman, all the representatives of the groups that have helped us come to this day.

Our Government made a fundamental promise to the American people of a bountiful and safe food supply way back at the beginning of this century. It is a promise that we have had to renew our commitment to periodically over the years and a promise that needed a lot of work when I became President. From the day I took office, I worked very hard to honor that commitment, to make our food supply the world's safest, even safer.

In 1993 the Vice President's National Performance Review recommended an overhaul of our food safety procedures so that we could use the best scientific technology available in inspection methods to make sure that we had put in the best preventive controls to keep our food supply the world's safest.

Since then, we have taken major steps. We first put in place rigorous new safety standards for seafood, meat, and poultry products, throwing out archaic and ineffective methods of in-

spection that had not been updated for nearly a century. We've required slaughterhouses to test for deadly *E. coli* and salmonella bacteria. We've begun developing new safety standards for fruit and vegetable juices. We've strengthened our system of guaranteeing that our drinking water will remain safe and improved public health protections for pesticide uses on food. And we brought a host of Federal agencies together to boost food safety research, education, and surveillance efforts around our Nation. In so doing, we're using the world's best science to help prevent food contamination tragedies before they happen, to make sure our supply of food is as safe as it can be.

Today, our food supply remains the world's safest, but we can't rest on those accomplishments. We have to do more. At the time when Americans are eating more and more food from around the globe, we must spare no effort to ensure the safety of our food supply from whatever source. Today I want to tell you the new steps we're taking to ensure that our fruits and vegetables, including those imported from other countries, meet the highest health and safety standards.
