

Remarks to the Staff of the Firing Room Prior to the Space Shuttle  
*Discovery* Launch in Cape Canaveral  
October 29, 1998

Thank you very much. I have so many things to thank you for today. But among other things, I have to thank you for making the First Lady very happy, because about a year ago she said, "You know, we need to make a list of all the things we want to do before we leave office." I said, "Okay, what's on your list?" She said, "You have to take me to a space launch. I want to go."

We didn't have the courage to come here; we had confidence in you and pride in America and a conviction that our space program is good for the United States and good for the world. And I want to thank you today, because you made all of us terribly proud.

Let me also say that because of the intense interest in this, in the media and among ordinary citizens, the American people have had a unique opportunity today to see what you do, not just at the moment of launch but in the weeks and months and years that precede it,

all the hard work and all the preparation. And now they will learn over the next few days all the things that are being done in space that advance not only our mission in space but the quality of our life here on Earth. And all of that, too, has been made possible.

The last thing I would like to say is, it has been immensely impressive and important to me to have the chance to work with NASA over the last 6 years and see the revolution which has been undertaken, so that now you can, on virtually the same budget you had 6 years ago, do 8 launches a year instead of 2 and continue to explore the outer frontiers of space. I thank you for all of that. America is very, very proud of you today.

Thank you, and God bless you.

NOTE: The President spoke at 2:42 p.m. in the Launch Control Center at the John F. Kennedy Space Center.

Remarks to the Staff of the Launch Control Center Following the Space  
Shuttle *Discovery* Launch in Cape Canaveral  
October 29, 1998

Thank you very much. I want to just add one little factual element to what Dan Goldin said about Hillary wanting to be an astronaut as a little girl. I just told a group up in the control room this. About a year ago we sat down and Hillary said, "You know, we're just going to be here 3 more years, and we need to make a list of every place we'd like to go and everything we'd like to do before we leave office." I said, "Okay, what's the first thing on your list?" She said, "I want to go to Cape Canaveral and see a launch." [Laughter]

I want to thank Dan Goldin and Roy Bridges, the Director of the Kennedy Space Center, all of you who work here. I want to thank Bob Cabana and Eileen Collins, two astronauts who accompanied us today, along with my Science Adviser, Dr. Neal Lane. I want to thank this

crew. And I'd like, with all the press here, one more time to call their names: Commander Brown; Pilot Steve Lindsey; Mission Specialists Stephen Robinson and Scott Parazynski; the two international astronauts, Dr. Mukai of Japan and Mr. Duque of the European Space Agency, the first Spanish citizen ever to fly in space.

I want to thank all of you who work on this, not just in that moment we all see on television or, in this case, we all saw from the rooftop, and we felt the ceiling rumble beneath our feet—[laughter]—because I know there are hours and weeks and months and years behind all this. I want to thank you. And of course I want to thank John Glenn, my good friend and a genuine American hero.

You know, a few days ago, I was in the White House working on something entirely different, and the phone rang and they said—no, no, no,
