

village, to the village computer, where there was someone there who helped her operate it. And she called up the health department and got instructions, with very good software, very good visuals, about how she should care for this baby for the first 6 months. And I reviewed it—it's just as good as anything she could get in the wealthiest community in America from the finest obstetrician—so that we're going to keep more babies alive because of the Internet.

So those are three examples of things that I think we should be focused on. And those of us in the wealthier countries should be providing the money and the technical support for

countries to do more of this, because it will move more people more quickly out of poverty, I think, than anything that's ever been out there, if we do it right.

NOTE: The President spoke at 12:10 p.m. in the Cabinet Room at the Chancellery. In his remarks, he referred to President Ricardo Lagos of Chile; and Prime Minister Jean Chretien of Canada. The transcript released by the Office of the Press Secretary also included the remarks of Chancellor Schroeder, President Cardoso, and President de la Rúa.

## Russia-United States Joint Statement on Cooperation To Combat Global Warming

June 4, 2000

President of the United States Clinton and President of the Russian Federation Putin reaffirm the commitment of the United States and the Russian Federation to cooperate in taking action to reduce the serious risks of global warming. They take note of the significant contributions to environmental protection made by the U.S.-Russian Joint Commission on Economic and Technical Cooperation under the co-chairmanship of Vice President Gore and the Prime Minister of the Russian Federation.

The Presidents declare their conviction that national and global economic growth can be achieved while continuing to protect the global climate. They note with approval the close cooperation of the two countries in multilateral negotiations to elaborate upon elements of the Kyoto Protocol to the U.N. Framework Convention on Climate Change. The Presidents stress the importance of fully developing the Protocol's flexibility mechanisms, including international emissions trading and joint implementation, which are essential to achieving countries' greenhouse gas (GHG) emissions reduction commitments under the Protocol. They believe transparent rules for these mechanisms must be developed.

The Presidents further note the potential of the Kyoto Protocol mechanisms to promote investment in all areas where it is possible to limit or reduce GHG emissions. They reaffirm

the opposition of the U.S. and Russian governments to proposals that limit the Kyoto Protocol mechanisms by placing quantitative restrictions on the transfer of Parties' assigned amounts. The Presidents reiterate the commitment of their governments to work for agreement on these and other issues at the Sixth Meeting of the Conference of the Parties taking place in The Hague in November of this year.

Building upon previous joint accomplishments, the U.S. and Russia plan to continue their cooperation on the problem of global climate change.

President Clinton declares the intention of the Government of the United States of America to continue cooperation with Russia in the measurement and reporting of GHG emissions, the development of market-based tools for managing those emissions, and the identification of specific opportunities in Russia to further reduce or sequester those emissions.

President Putin, noting the significant contributions made by the Russian Federation to reduce emissions of greenhouse gases, declares the intention of the Russian Federation to expand and strengthen the mutually-beneficial U.S.-Russian cooperation in the area of the fight against global warming, paying special attention to the activities of the Joint Russian-American Climate Policy Working Group.

Through these actions, Presidents Clinton and Putin express their conviction that effective steps can be taken by political leaders, and by leaders in scientific, business, and other circles, to protect the planet that we share from the threat of global warming.

## Russia-United States Joint Statement Concerning Management and Disposition of Excess Weapon-Grade Plutonium and Related Cooperation *June 4, 2000*

The Presidents of the United States and the Russian Federation announced today completion of the bilateral Agreement for the management and disposition of weapon-grade plutonium withdrawn from their respective nuclear weapon programs and declared excess to defense purposes. This Agreement will ensure that this plutonium will be changed into forms unusable for nuclear weapons by consumption as fuel in nuclear reactors or by immobilization rendering it suitable for geologic disposal.

Based on the 1998 Summit Joint Statement of Principles for Management and Disposition of Plutonium, this Agreement charts the course and sets the conditions for such activities. It reconfirms our determination to take steps necessary to ensure that it is never again used for nuclear weapons or any other military purpose and is managed and disposed in a way that is safe, secure, ecologically sound, transparent and irreversible. It reaffirms our commitment to nuclear disarmament.

This Agreement will ensure that the management and disposition activities are monitored and, thus, transparent for the international community. It provides for International Atomic Energy Agency (IAEA) verification once appropriate agreements with the IAEA are concluded.

This Agreement builds on the approaches to such plutonium management and disposition

agreed at the 1996 G-8 Moscow Nuclear Safety and Security Summit. We reaffirm our intentions to continue to work closely with other countries, in particular other G-8 leaders, who have provided strong support over past years for initiation and implementation of these programs. In this regard, we hope that significant progress will be made as well at the G-8 Summit this July in Okinawa.

This Agreement will enable new cooperation to go forward between the United States and the Russian Federation. We note that the United States Congress has appropriated 200 million USD for this cooperation and the U.S. Administration intends to seek additional appropriations.

This Agreement will soon be signed by Vice President Gore and Prime Minister Kasyanov.
