

Radio Remarks on Funding To Make Communities More Livable *February 14, 2000*

Across America, communities are struggling to protect precious lands so their children will have places to play, hike, and enjoy the great outdoors. Today I'm announcing nearly \$60 million in new grants to help communities in all 50 States create parks, preserve forests, and save open space.

And the lands legacy initiative in my new budget will provide permanent funding so that

communities can conserve additional lands year after year.

NOTE: The President's remarks were recorded at approximately 5 p.m. on February 11 in the Oval Office at the White House for later broadcast, and the transcript was released by the Office of the Press Secretary on February 14. These remarks were also made available on the White House Press Office Actuality Line.

Statement on the Bombing of a School in Sudan *February 14, 2000*

I am deeply concerned by reports that the Government of Sudan bombed a school in the Nuba Mountain region on February 8, killing and wounding many young children. It is an outrage that such egregious abuses against innocent Sudanese citizens have become commonplace in the ongoing civil war in Sudan, which has claimed over 2 million lives.

The United States calls on the Government of Sudan to cease all aerial bombardment and to refrain from any attacks on civilian targets. We also call for full and immediate access for humanitarian organizations seeking to provide relief to war-ravaged civilians in Sudan.

Remarks Prior to a Meeting With Technology Industry Leaders and Computer Security Experts and an Exchange With Reporters *February 15, 2000*

Internet Security

The President. The room is smaller than it looks on television. [*Laughter*] Usually I don't get so many of them coming in, except you guys are—[*laughter*].

Well, first of all, I want to welcome the leaders of the high-tech industry and experts on computer security to this meeting at the White House to talk about how to maximize the promise and minimize the risks to the Internet.

The disruptions at several websites last week highlight how important the Internet has become to our whole way of life in America and how vulnerabilities at one place on the net can create risks for all. Our administration has been working for years now to reduce vulnerabilities

in Government computers and to encourage the private sector to do more.

We know that we have to keep cyberspace open and free. We have to make, at the same time, computer networks more secure and resilient, and we have to do more to protect privacy and civil liberties. And we're here to work together.

Last month I released a draft plan to help do our part to meet these challenges. And in the budget, I asked Congress for \$2 billion for cybersecurity to safeguard Government networks, to detect attacks, to hire and train more security experts, to increase cooperation with the private sector. I want to jump-start this effort by providing \$9 million right away to begin some
