

something Americans have always known: If we stay focused on the future and if we stay true to our values, there is no stopping the power and potential of the spirit of our people.

Now, 35 years from now, you Presidential scholars will be about my age. In this audience, we have students who may one day help us find a cure for AIDS, who may design cars that get hundreds of miles to the gallon, who help us unlock the mysteries of our deepest ocean depths and the dark reaches of outer space.

I think it very likely that your children will be born with a life expectancy of somewhere around 100 years. And I think it possible that you will be able to unite with others across the world, across all the lines—the racial, the ethnic, the religious lines—that divide us, not only because of the way technology and the Internet are bringing us together but because of one of the great lessons we have actually learned from the study of the human genome. Scientists have found already, in mapping the genes of people, that in genetic terms, all human beings, regardless of race, are more than 99.9 percent the same. Even more surprising, the genetic differences within people of the same race are greater than the differences of the genetic profile from group to group of people of different races.

Therefore, what we have learned, perhaps most important, from this stunning breakthrough of modern science, is something that ancient

faiths have already taught us: The most important fact of life on this Earth is our common humanity. I hope that understanding continues to guide all of you as you go out into the best days our country and, I hope, our world have ever known. I am very proud of you for your achievements. I congratulate you and your families. I wish you well.

I only hope that you will always remember this day and the fact that you came to the Nation's Capital and to the people's house at a time of great progress and prosperity. But that progress and prosperity imposes upon you, because of your gifts, a special responsibility to make the most of it.

Congratulations.

Now we're going to bring the Presidential scholars up.

Thank you.

[At this point, the Presidential scholars were introduced.]

The President. Ladies and gentlemen, this concludes our program, but if they don't make you feel better about the future of America, nothing will. Let's give them another hand. [Applause]

Thank you very much.

NOTE: The President spoke at 3 p.m. in a pavilion on the South Lawn at the White House. In his remarks, he referred to Thomas E. Britton, Chairman, Commission on Presidential Scholars.

Statement on the Supreme Court Decision on Partial Birth Abortion June 28, 2000

I am pleased with the Supreme Court's decision today in *Stenberg v. Carhart* striking down a Nebraska statute that banned so-called partial birth abortions. The Court's decision is consistent with my past vetoes of similar legislation. I will continue to veto any legislation restricting late-term abortions that lacks a health exception or otherwise unduly burdens a woman's right

to choose. A woman's right to choose must include the right to choose a medical procedure that will not endanger her life or health. Today's decision recognizes this principle and marks an important victory for a woman's freedom of choice.

June 28 / Administration of William J. Clinton, 2000

Statement on the Supreme Court Decision on Restriction of Protests Outside Health Care Facilities

June 28, 2000

I am pleased that the Supreme Court today, in *Hill v. Colorado*, upheld a Colorado statute balancing a person's right to protest certain medical procedures against another person's right to obtain medical treatment free from harassment, fear, and intimidation. The Colorado law was enacted in response to a real need to ensure safe access to medical treatment in light of increasing obstruction, harassment, and violence in front of health care facilities. To

preserve a woman's right to choose, we must protect access to reproductive health services. That is why I championed the Freedom of Access to Clinic Entrances Act (FACE), a Federal statute that protects women and doctors from violence at reproductive health clinics.

NOTE: The statement referred to Public Law No. 103-259, approved May 26, 1994.

Statement on House of Representatives Action on Private Insurance Prescription Coverage Legislation

June 28, 2000

Tonight, in a partisan vote, the Republican leadership succeeded in passing a flawed, unworkable private insurance prescription benefit that provides more political cover than insurance coverage for our Nation's seniors. If this unworkable private prescription drug benefit passes the Congress, I will veto it. The legislation was designed to benefit the companies who make

prescription drugs, not the older Americans and people with disabilities who need to take them. It puts special interests above the public interests. I urge the Congress to work across party lines and develop a bipartisan bill that ensures an affordable, available, and meaningful Medicare prescription drug benefit option for all seniors.

Remarks at a Reception for Senatorial Candidate Brian Schweitzer

June 28, 2000

Thank you. I'll tell you what, I'm glad he clarified that. [Laughter] He got into that next husband deal—I thought there were going to be three surprised people here—[laughter]—me, Hillary, and what's-her-name. [Laughter]

Anyway, let me say, first of all, I want to thank all of you for coming, and thank Beth again for her incredible generosity. She and Ron have been so wonderful to open their homes to people who share our causes. Unlike maybe most of the people in this room, I've actually been to Montana several times. In 1985 we had one of our best family vacations ever, there. And I think it may be the most beautiful place on the Earth. It is certainly one of the most

magnificent. And it deserves to have a magnificent, big, strong Senator, and we're about to get one here.

I loved the place. I felt immediately at home. It's so much like the place I grew up and the people I grew up with. But I have to tell you, this thing that Brian did with the prescription drugs and taking the people to Canada and then to Mexico, it really painted a picture of what we're up against.

And what I'd like to say is something you all know, but this is a very important election. And maybe I can say it with greater authority since I'm not on the ballot. There are profound differences between the two parties, starting
