Statement on the Death of Sister M. Isolina Ferre

August 3, 2000

Hillary and I were saddened to learn of the death of Sister Isolina Ferre. Her passionate fight, for more than 60 years, against poverty, violence, and despair earned her many awards and countless tributes from all around the world. Armed only with her faith, she taught gangs in New York City to solve their differences without violence. In Puerto Rico, her community service centers, the Centros Isolina Ferre, transformed ravaged neighborhoods by operating clinics and helping residents to empower themselves.

Almost a year ago today, I was honored to welcome Sister Isolina to the White House and present her with the Medal of Freedom. At that ceremony, I said, "Sister Isolina taught people to see the best in themselves and in their communities and made sure they had the tools to make the most of the gifts God has given them."

Her lifetime of selfless commitment to others will remain her greatest legacy. Our thoughts and prayers are with her family and many friends.

Statement on Action To Address Potential Electricity Shortages in California

August 3, 2000

Today I am directing all Federal agencies to take steps to reduce consumption of electricity in California to the maximum extent possible. As one of the largest power consumers in California, it is critical that the Federal Government take every possible step to reduce non-essential power consumption at Federal facilities in the State.

During power shortage emergencies, it also is important that we increase our generation of

power in the West, much of which is supplied to California customers. Therefore, I also am directing that Federal agencies that generate power, and the Federal Power Marketing Administrations, take all possible steps to maximize the amount of electricity that can be delivered to California.

These short-term measures will assist California utilities and consumers in meeting electricity needs during this critical period.

Memorandum on Potential Electricity Shortages in California

August 3, 2000

Memorandum for the Heads of Executive Departments and Agencies

Subject: Potential Electricity Shortages in California

The increased demand for electricity during summer heat waves can make it a challenge

for electric utilities to meet the demands of their customers. Currently, the supply of electric power is tight in California due to record demand for electricity. The State faces the possibility of rolling blackouts in some areas. These conditions put both consumers and businesses at risk.

The Federal Government is among the largest consumers of electricity in California. It is important that we lead by example in taking energy-conserving steps to reduce the risk and severity of power outages. Therefore, I direct that:

- Managers of Federal buildings in California take steps to reduce consumption of power to the maximum extent practicable consistent with the health and welfare of employees; and,
- Federal agencies coordinate with other State and local government agencies to minimize the use of electricity in all government buildings in California.

Further, although most of the electricity in the Western United States is generated and marketed by privately and publicly owned utilities, the Federal Government also generates and markets electricity in the region. For the duration of the current power shortage emergency, I direct that:

- Federal agencies that generate electricity take all possible measures, consistent with existing laws and regulations, to maximize

the amount of electricity that can be delivered to California; and,

- Federal Power Marketing Administrations take all steps necessary to maximize the availability of electricity in California.

I also direct Federal agencies to work with the State of California to develop procedures governing the use of backup power generation in power shortage emergencies.

Although these are important steps that can help reduce the risk of power shortages in the short term, we need a more comprehensive approach for the long term. I therefore further direct each of you to continue working towards the goals of Executive Order 13123, Greening the Government Through Efficient Energy Management, and to continue working with the Congress on comprehensive electricity restructuring legislation, which can promote greater investment in generation and transmission facilities, enhance the efficiency of the interstate transmission grid, and promote energy efficiency programs.

WILLIAM J. CLINTON

Letter to Congressional Leaders on Continuation of the National Emergency With Respect to the Lapse of the Export Administration Act of 1979

August 3, 2000

Dear Mr. Speaker: (Dear Mr. President:)

On August 19, 1994, in light of the expiration of the Export Administration Act of 1979, as amended (50 U.S.C. App. 2401 *et seq.*), I issued Executive Order 12924, declaring a national emergency and continuing the system of export regulation under the International Emergency Economic Powers Act (50 U.S.C. 1701 *et seq.*). Under section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), the national emergency terminates on the anniversary date of its declaration unless the President publishes in the *Federal Register* and transmits to the Congress a notice of its continuation.

I am hereby advising the Congress that I have extended the national emergency declared in Executive Order 12924. Enclosed is a copy of the notice of extension.

Sincerely,

WILLIAM J. CLINTON

NOTE: Identical letters were sent to J. Dennis Hastert, Speaker of the House of Representatives, and Albert Gore, Jr., President of the Senate. This letter was released by the Office of the Press Secretary on August 4. The notice of August 3 on continuation of the national emergency is listed in Appendix D at the end of this volume.
