

which allow legal actions to be brought against firms trafficking in confiscated properties in Cuba. I believe this action will enhance efforts by the United States to strengthen international cooperation aimed at promoting peaceful democratic change in Cuba.

For the past 5 years, the United States has pursued a strategy, coordinated by the Department of State, to increase international pressure on the Cuban Government to respect human rights and to begin political and economic reforms. Our friends and allies have joined us by taking concrete actions to try to hasten the day when Cuba will join the community of democratic nations. Encouraged by the results of our efforts to elicit the aid of our friends, I said in January 1997 that I expected to continue suspending this provision of Title III so long as our partners' stepped up pro-democracy efforts continued.

Over the past 6 months, the international community has continued to send a clear message to the Cuban Government on the need for greater respect for human rights and democratic reforms. For the second consecutive year, the Cuban Government experienced diplomatic isolation at the Ibero-American Summit, as other heads of state criticized Cuba's undemocratic government and abysmal human rights record. In the same vein, the Government of Canada has made clear that Cuba will not be invited to the 2001 Summit of the Americas, as the summit is for democratic nations only. The Cuban Government is hearing a consistent, firm message that it is time for peaceful, democratic change in Cuba.

I encourage our friends and allies to continue taking effective steps to promote democracy and human rights in Cuba.

Remarks on the Designation of New National Monuments January 17, 2001

Thank you very much, and good morning. I want to welcome you all here, but especially I would like to acknowledge Secretary Mineta; Senator Conrad Burns of Montana; all the descendants of Lewis and Clark; representatives of Sacagawea and York; Stephen Ambrose, from whom you will hear in a moment. And I also want to recognize my friends Ken Burns and Dayton Duncan, who did such a wonderful job on the Lewis and Clark film; and members of the Millennium Council who have supported this project with the Lewis and Clark Bicentennial and Trails groups. I thank you all for coming here.

And I would like to especially acknowledge and thank our administration's environmental team, including Secretary Babbitt; EPA Administrator Carol Browner, who is here; Chief of Staff John Podesta; George Frampton, the head of the Council for Environmental Quality; and Bob Stanton, who has led our Park Service so ably. Thank you all for your good work.

I am especially grateful to these people today, obviously, but every day because, thanks to their work, our air and water are cleaner; our food is safer; we've cleaned up twice as many toxic

waste sites in these 8 years as in the previous 12. We've protected more land in the lower 48 States than any administration since that of Theodore Roosevelt, and have supported research, development, and deployment of energy conservation, technologies, and clean energy sources, demonstrating, I believe convincingly, that we can have environmental protection and economic growth hand in hand.

We believe that our future and our land, air, and water are one; that we must preserve not only our historical treasures but our natural treasures, as well.

Today's ceremony is the last I will host as President here in the historic East Room, where First Lady Abigail Adams hung up the laundry to dry—[laughter]—where Union soldiers lived during the early days of the Civil War, and where a young idealist named Meriwether Lewis, summoned by President Jefferson to serve as his secretary, first unpacked his traveler's trunk and set up quarters in 1801.

The room looked quite different back then—no chandeliers, no parquet floors, no silk drapes, just the rough siding of walls awaiting plaster,

and two stone hearths to ward off the winter chill.

But what the East Room then lacked in grandeur was more than atoned for by the ideas that filled it. For it was here that Jefferson and Lewis first unfurled an unfinished map of a great continent and planned a bold expedition of discovery.

So it is fitting that we meet once more in this room, at the dawn of a new century and a new age of discovery, where a few months ago we announced the very first complete mapping of the human genome. We gather here to honor pathfinders of our past and protect their precious legacy.

Most of the landscape Lewis and Clark traversed nearly two centuries ago is changed beyond recognition—forests cut, prairies plowed, rivers dammed, cities built. That is the march of time. But still there are a few wild places left, rugged reminders of our rich history and nature's enduring majesty. Because they are more important than ever, after careful review and extensive public input, we protect them today by establishing them as national monuments.

The first of these monuments covers a remote stretch of the Missouri River in central Montana, now known as the Upper Missouri River Breaks. If you canoe these magical waters or hike their weathered cliffs, you may still encounter elk or bear, wolves, mountain lions, even bighorn sheep, just as Lewis and Clark did in 1805.

The second monument we designate is also in Montana. It is Pompeys Pillar, the sandstone outcrop named after the newborn son of Sacagawea, the expedition's Shoshone guide. Archeologists say this monolith has been a religious site and natural lookout for nearly 12,000 years. It bears the markings of many ancient travelers. Clark, himself, carved his name into the rock, and it's still there today.

Some years ago, Wallace Stegner observed that America has a fundamental interest in preserving wilderness because the challenge of wilderness forged our national character. He wrote that the wild places give us a "geography of hope" that sustains us in our busy lives, even in the largest cities.

Today we protect this geography of hope not just along the Lewis and Clark Trail but across our Nation in six other national monuments which Secretary Babbitt will discuss shortly. We

have another purpose here today, as well, righting some wrongs that have lingered about Lewis and Clark for 200 years now.

The first concerns William Clark. When Lewis recruited Clark to help lead the Corps of Discovery, he promised him the rank of captain. Unfortunately, issues of budget and bureaucracy intervened—some things never change—[*laughter*—and Clark never received his commission. A natural leader, great frontiersman, Lieutenant Clark risked his life across a continent and back, all for the good of this Nation. Today we honor his service by presenting his great-great-great-grandsons, Bud and John Clark, with the late William Clark Certificate of Appointment to the rank of captain in the United States Army.

[*At this point, the President presented the certificate.*]

We also have descendants of Meriwether Lewis here today, Jane Henley and Elizabeth Henley Label. I'd like to ask them to stand, as well. Thank you, and welcome.

The journals of Lewis and Clark record that the expedition's success also hinged on the courage and commitment of Sacagawea, an extraordinary 15-year-old Shoshone guide who made most of the trip with a baby on her back. Time and again her language skills, geographic knowledge, and tribal connections saved Lewis and Clark from disaster, even death. Despite her quite heroics, Sacagawea received no formal recognition after the expedition ended.

Last year we put her likeness on our new dollar coin. Today I am proud to announce her honorary promotion to the rank of sergeant in the United States Army, so that all Americans might recognize her critical role in Lewis and Clark's journey to the sea. Accepting her citation is Amy Mossett, a leader of the Mandan Hidatsa Arikara Nation, and Rose Ann Abrahamson, a leader of the Shoshone Nation. I'd like to ask them to come up.

[*The President presented the citation.*]

Finally, I want to recognize York, the slave who accompanied Lewis and Clark to the Pacific and back. Like Sacagawea, he shared all the risks but none of the reward. And while the rigors of the wilderness fostered a certain equality, camaraderie, and respect among York and his fellow explorers, that did not translate into freedom upon his return. Only years later did

he finally gain his liberty before fading into history.

Today, in recognition of York's selfless contributions to the Corps of Discovery and to his service to our country, he also receives an honorary promotion to the rank of sergeant in the United States Army. Accepting the citation on his behalf are York scholar Jim Holmberg and York sculptor Ed Hamilton. I'd like to ask them to come up and receive the citation.

[*The President presented the citation.*]

As we finally right these wrongs and celebrate the legacy of Lewis and Clark, we recognize the irony inherent in their expedition. Their historic journey of discovery opened up the American West, a mythic frontier that even today endures in the American mind as a symbol of freedom. But York was anything but free, and Sacagawea's people, like her neighbors, would eventually be swept away by a flood of American settlers determined to claim the Great Plains and the land beyond.

These hard truths do not fit comfortably within the narrow rhetorical boundaries of Manifest Destiny or square with modern notions of democracy and diversity. But as our Nation has grown physically, so we have grown as a people, and I believe the capacity for growth as a people, for deepening the bonds of community and broadening our vision of liberty and equality, has been just as important a voyage of discovery as the physical one Lewis and Clark took so long ago.

Nearly two centuries ago, Lewis and Clark used this compass—this very one—to navigate a continent of possibility. Now America is setting out to navigate a century of possibility, determined to explore the far frontiers of space, the ocean depths, the tiniest of genetic structures. But we must not forget our obligations to live in harmony with the Earth.

In the years to come, more areas will doubtless require our common protection. I'd like to mention just two, for example. First, the Owyhee Canyonlands in Idaho. This fractured maze of ancient canyons is a rugged paradise of leaping bighorn sheep and soaring birds of prey.

Second, we must continue, I believe, to safeguard the Arctic National Wildlife Refuge, one of the last truly wild places on Earth—the Serengeti of the Americas. Some of you and others around the country have urged that I

declare this a monument as well. I have declined because current law actually provides legislative protection for this refuge, identical to that which an Executive order would provide. But I still believe that those who propose, and who would now have to get legislative authorization to do so, to drill in the refuge are in error. In 1995 I vetoed a bill that would have permitted such drilling, and I believe we should continue to work together to meet the Nation's energy needs while we protect this environmental Eden.

I hope in the years ahead we can reach agreement on a policy of environmental protection and sustainable development appropriate to this new age in which we live and to the real condition of our natural resources. I hope it will unite Republicans and Democrats. Even more difficult, perhaps, I hope it will unite Westerners and Easterners—[*laughter*—people who live in the North and the South, people who make a living from the land and those who feel more alive when they're on it.

Senator Burns, I'm glad to see you here today in support of this. We are making some progress. After years of squabbles, this year by a huge bipartisan majority, the Congress for the first time set aside a committed, dedicated stream of funding, year-in and year-out, to preserve the natural legacy of America, from vast open spaces to small urban green spaces. It is a very hopeful beginning and perhaps the most important congressional conservation move in many decades.

So I hope, as I leave, that we will be able to continue to build on this and return to the point where the environment is not a point of either partisan or geographic explosion but a point of shared values and shared vision.

For 8 years I have done my best to prepare America for the 21st century. I have been, critics and supporters alike have acknowledged, virtually obsessed with all things modern, with trying to make sure America was at the center of all new trading networks, trying to modernize our economic and social policies, trying to alter the framework of global financial institutions so that everyone had a chance to participate in the best of what the future holds, trying to make sure that we stayed on the cutting edge in all areas of science and technology. This has occupied much of my time and attention.

But I grew up in a national park, and I have never forgotten that progress uprooted from harmony with nature is a fool's errand. The more perfect Union of our Founders' dreams will always include the Earth that sustains us in body and spirit. Today we have honored three who made it so. Thank you very much.

Now I would like to ask Stephen Ambrose to come to the podium. But as I do, I would like to thank him for many things: for teaching America about World War II; for, most recently, making sure we know how the railroad was built across the country; and for all the works in between. But I rather suspect, having heard him talk about it, that nothing has quite captured his personal passion and the story of his family life like the odyssey of Lewis and Clark and the beauties that they found—that he and his family later discovered for themselves.

Steve.

NOTE: The President spoke at 10:15 a.m. in the East Room at the White House. In his remarks, he referred to historian and author Stephen E. Ambrose; Ken Burns and Dayton Duncan, who wrote and produced the documentary "Lewis and Clark: The Journey of the Corps of Discovery"; and Amy Mosset and James J. Holmberg, board members, National Lewis and Clark Bicentennial Council. The proclamations on the Buck Island Reef National Monument, Carrizo Plain National Monument, Kasha-Katuwe Tent Rocks National Monument, Minidoka Internment National Monument, Pompeys Pillar National Monument, Sonoran Desert National Monument, Upper Missouri River Breaks National Monument, and Virgin Islands Coral Reef National Monument are listed in Appendix D at the end of this volume.

Remarks to a Joint Session of the Arkansas State Legislature in Little Rock, Arkansas January 17, 2001

Thank you very, very much, and good afternoon. This is the first time in over 20 years I've been here when I don't have to get asked for a racing pass. [Laughter] And I heard somebody utter that hated phrase, and I understand that, for a variety of reasons, you've all gotten rid of that burden. So progress continues. [Laughter]

Governor Huckabee, Lieutenant Governor Rockefeller, Senator Beebe, Speaker Broadway, General Pryor, Secretary Priest, Jimmie Lou, Charlie, Gus, my friends. I'm delighted to be joined by Senator Pryor, about whom I would like to say more in a moment; Congressman Snyder, Congressman Ross, and a large number of people who came here with me from Washington.

I want to say that I am honored that the last trip of my Presidency is to come home to Arkansas and home to the legislature where I spent so many happy days. [Applause] Thank you.

There are a lot of people in this body who got their start in politics, working with me, a few who got their start in politics working against me—[laughter]—and some who got their

start doing both—[laughter]—depending on the issue and the time.

I brought with me a large number of people from Arkansas today. And I would like to mention them and a few others because I would like to begin by telling you that in these last 8 years, over 460 people from our home State worked in this administration and helped to make America a stronger country, and I am very grateful to all of them.

Mack McLarty, my first Chief of Staff, my first Envoy to the Americas, is here today. When he led the White House, we made four of the most important decisions we made during the entire 8 years: The historic balanced budget agreement where Senator Pryor cast the tie-breaking vote—so did everybody else; it passed by one vote in both Houses—the NAFTA agreement, which joined us with Mexico and Canada; the family and medical leave bill, the Brady law, and many others. He did a superb job.

I want to thank the three Arkansans who have served in my Cabinet: Rodney Slater, who is here today, our Secretary of Transportation; Hershel Gober, who is Secretary of Veterans Affairs and started out helping me with veterans
