

Global Development Alliance has successfully built 400 worldwide alliances. That's good. You've leveraged about 1.4 billion of taxpayers' dollars to over \$4.6 billion. In other words, you've taken the money we're spending as kind of a—I wouldn't call it a downpayment, but it's part of a way to really leverage your generosity.

And you're making a difference in the lives of millions of people. I'm grateful for you. That's what I've really come to say. I've come to assure you that the effort to eliminate global poverty is an integral part of our foreign policy. And I think it needs to be a foreign—part of foreign policy after 2½ years, by the way. I think it needs to be a—I think it needs to be part of the calling of the United States in the 21st century.

One of the moral objectives of our time—the great moral objectives of our time is to reduce poverty. I like what Alexis de Tocqueville said about America. He's a pretty interesting observer. Back in 1832, he captured a lot of the spirit of this country. He said this, he said, "When an American needs the assistance of his fellows, it's very rare that it be refused. When some

unexpected disaster strikes a family, a thousand strangers willingly open their purses."

That was the America he saw in the 1830s. It's still got to be the America of the 21st century as well, but not only to help our fellow citizens here at home but for our national interests and our economic interests, and just to answer the call of our hearts, it ought to be our foreign policy. It ought to be the center of our foreign policy and the center of the social entrepreneurs in America.

I want you to know that when disaster strikes, we move. We moved hard for the tsunamis, with a military presence that helped organize relief. When the earthquake came in Pakistan, we didn't hesitate; we moved. We know that when a neighbor needs assistance, that we have an obligation to help provide it.

My assurance to you is that we will continue to stand with our brothers and sisters who are poor, to help as best as we possibly can, and I want to thank you for helping as well. God bless your efforts, and may God bless our country.

NOTE: The President spoke at 9:55 a.m. at the Willard InterContinental Washington.

Remarks on Signing the Broadcast Decency Enforcement Act of 2005 *June 15, 2006*

Thank you all. Please be seated. Thank you all for coming. In a few moments, I will sign the Broadcast Decency Enforcement Act. This is a good bipartisan bill. It's going to help American parents by making broadcast television and radio more family-friendly.

I appreciate the many citizens groups who are here, and I want to thank the Members of Congress who worked hard to get this bill passed. And I'm looking forward to signing it into law.

I want to thank Kevin Martin, who's the Chairman of the Federal Communications Commission, and I want to thank the other Commissioners who are here today.

I appreciate Senator Bill Frist joining us. He's the majority leader of the United States Senate. I want to thank Senator Ted Stevens for joining us as well. I thank Senator Sam Brownback, Senator George Allen. I want to thank the House majority leader, John Boehner, for being here. I want to thank Joe Barton, chairman of the House Energy and Commerce Committee.

The bill sponsor is with us, Fred Upton from the State of Michigan. Thank you for coming, Fred. I appreciate Congressman Bobby Rush from the State of Illinois, Chip Pickering from Mississippi, and Joe Pitts from Pennsylvania.

Every day, our Nation's parents strive to raise their children in a culture that too often produces coarse, vulgar, and obscene entertainment. In our free society, parents have the final responsibility over the television shows that their children watch or the web sites they visit or the music they listen to. That's a responsibility of moms and dads all across the country, to make sure their children are listening to or watching the right kind of programming.

The best way to do that is for parents to be vigilant, pay attention to what their children are doing. One thing they can do if they're worried about people watching a bad program is turn off the TV. That's why they put the on/off button there. *[Laughter]* Parents are the first line of defense, but broadcasters and the electronics industry must play a valuable role in protecting our children from obscene and indecent programming.

They provide the tools that empower parents to make good decisions, such as voluntary rating systems and the V-chip. And we applaud those. Broadcasters also have a duty to respect common decency, to take into account the public interest, and to keep the public airwaves free of indecent material, especially during the hours when children are most likely to be watching and listening.

Unfortunately, in recent years, broadcast programming has too often pushed the bounds of decency. One study found that during the hours between 8 and 9 p.m.—that's the time when most families are watching television—the use of profanity on television shows increased vulgar language by 95 percent from '88 to—1988 to 2002. In other words, the language is becoming coarser during the times when it's more likely children will be watching television.

It's a bad trend, a bad sign. Since 2000, the number of indecency complaints received by the FCC has increased from just hundreds per year to hundreds of thousands. In other words, people are saying, "We're tired of it, and we expect the Government to do something about it."

And so we believe we have a vital role to play. We must ensure that decency standards for broadcasters are effectively enforced. That's the duty of the FCC. That's why we've got the Chairman standing right here, which he understands. *[Laughter]* It's the duty of the FCC to impose penalties on broadcasters and stations that air obscene or indecent programming. It's one of their responsibilities. People expect us to adhere to our responsibilities. He's a part of the executive branch. And since I'm the head of the executive branch, I take responsibility, as well, for putting people in place at the FCC who understand, one of their jobs, and an important job, is to protect American families.

The problem we have is that the maximum penalty that the FCC can impose under current law is just \$32,500 per violation. And for some broadcasters, this amount is meaningless. It's relatively painless for them when they violate decency standards. And so the Congress decided to join the administration and do something about it.

And so the bill I'm about to sign, the Broadcast Decency Enforcement Act, increases tenfold the penalty that the FCC can impose, to \$325,000. The Congress got serious, and I appreciate their hard work on this measure.

The legislation does not change the broadcast decency standards that are already on the books. What the legislation does is it gives the FCC the means to enforce them more effectively. By allowing the FCC to levy stiffer and more meaningful fines on broadcasters who violate decency standards, this law will ensure that broadcasters take seriously their duty to keep the public airwaves free of obscene,

profane, and indecent material. American families expect and deserve nothing less.

And so I'm going to ask the Members of Congress who have worked hard on this piece of legislation to join me. I congratulate you for your good work. Thank you for coming. May God bless you.

NOTE: The President spoke at 11:07 a.m. in Room 350 of the Dwight D. Eisenhower Executive Office Building. S. 193, approved June 15, was assigned Public Law No. 109-235.

Remarks on Signing the MINER Act *June 15, 2006*

Thanks for coming. Welcome to the White House, and thank you for witnessing this bill signing ceremony. In a few moments, I'm going to sign into law the most sweeping overhaul of Federal mine safety law in nearly three decades. The MINER Act of 2006 has strong support of mine workers and the mining industry, and it was overwhelmingly passed by the Congress. I want to thank the Members of the United States Congress who have joined us here for their hard work on this important measure.

I thank the Secretary of Labor, Elaine Chao, who has joined us. I appreciate the Governors from three important coal mining States, Joe Manchin, Ernie Fletcher, and Ed Rendell for joining us here as well. I was struck by how the Governors handled the tragedies of the mine incidents. I thought they were able to convey a deep sense of compassion in an attempt to heal hearts, and I thank them for their courage.

I appreciate Bill Frist, who has joined us, and Mitch McConnell, Members of the United States Senate, as well as Mike Enzi, Senator Ted Kennedy. I'm particularly thrilled that Senator Robert Byrd is here. I don't know if you know this, but last Monday he achieved a milestone, and that is, he has served longer in the United States Senate than any other Senator in our Nation's history, and he's served with distinction. And we're glad you're here, Senator. Thank you for coming.

I thank Majority Leader John Boehner for joining us, as well as Congressman Buck McKeon and Shelley Moore Capito, Hal Rogers, Rick Boucher from Virginia. I appreciate all the Members of Congress who've joined us.

I appreciate the leaders of the mining industry. I appreciate the workers who are here. Thanks for taking time in your day to come.

I want to welcome the families of those—who mourn the loss of life. We share in your grief, and we honor the memories of your loved ones. I know it's hard. It's really hard for you, but we welcome you here, and we're honored you took time to be here.

I appreciate members of my administration who have joined us as well today. The hard work of American miners provides us with really important fuel. This economy is growing because of the work of our miners. Coal is an important part of our Nation's present and future.

Thanks to modern technology and equipment, we've come a long way from the days when a miner would take a canary into the coal mines. Passage—and since the passage of the Mine Safety and Health Act in '77—1977, America has seen significant decreases of injuries and fatal mining accidents.

Yet events in recent months have reminded us that mining is dangerous work. That's what we've seen. This year alone,
