

time, to help somebody in need. As you said, the doctor from Wyoming benefited just as much as the woman in Guatemala did. And that's the beauty of giving.

And so I thank you all for joining today. Our panelists did a magnificent job, like I knew they would. I thank you all very much for your interest in coming. To my fellow citizens, I appreciate you taking time. I appreciate you being involved. Thank you for caring about the plight of our fellow human beings in the neighborhood in which we live. For those of you from other countries, welcome to America. You'll find this to be a loving country, full

of decent, caring, fine people. And it is an honor to be the President of such a country.

Que Dios les bendiga. May God bless you. Thank you.

NOTE: The President spoke at 10:30 a.m. at the Hyatt Regency Crystal City at Reagan National Airport. In his remarks, he referred to Mariano Canu, cofounder, Labradores Mayas; and President Luiz Inacio Lula da Silva of Brazil. The Office of the Press Secretary also released a Spanish language transcript of these remarks.

Remarks Following a Tour of GrafTech International Ltd. in Parma, Ohio July 10, 2007

Good, thanks. I'm proud to be with you all. It's great to be at GrafTech here in Cleveland. I've come to Cleveland to highlight a couple of important issues. First, energy independence is an important part of our Nation's future. And one way to achieve energy independence is to promote technologies that will enable us to drive our economy without the use of Middle Eastern oil, for example. And one such technology is hydrogen fuel cells. And GrafTech is on the leading edge of developing a technology that will work, that will be competitive with other forms of energy, and that will enable us, on the one hand, to be less dependent on oil and better stewards on—of the environment.

And so I'm glad to be with these entrepreneurs, these scientists, these thinkers. We've—as part of the hydrogen fuel cell initiative that I proposed to the Congress, this company got a grant. And I think it's a wise use of taxpayers' money to help the people in this company develop this new technology. This forklift right here is powered by a hydrogen fuel cell. Doesn't re-

quire any oil or products derived from oil, and the exhaust from this is water.

And so we're going to continue to promote these kinds of technologies. And so I want to thank you all for having me. I'm about to go to a—after lunch, go to a hospital to talk about the need for a health care system that is patient-driven. I will resist the idea of the Federal Government running the health care system. And I'm going to spend some time talking during a town hall meeting about the kinds of reforms that we ought to be promoting out of Washington that encourage there to be a consumer-driven health care system. I mean, we'll take care of the poor, and we'll help the elderly. But we believe health care is best run in the private sector, not by the government.

And finally, I'm going to spend some time talking about the war on terror and our need to succeed in Iraq. And I'm going to remind the people in the audience today that troop levels will be decided by our commanders on the ground, not by political figures in Washington, DC, and that we've got a plan to lead to victory. And I fully

understand that this is a difficult war, and it's hard on the American people. But I will once again explain the consequences of failure to the American people, and I'll explain the consequences of success as well.

And so I thank the people of Cleveland for welcoming me here. I'm glad to be in your city. Looking forward to a full day.

Thank you all.

NOTE: The President spoke at 10:59 a.m.

Remarks to the Greater Cleveland Partnership and a Question-and-Answer Session in Cleveland, Ohio

July 10, 2007

The President. Thank you, sir. Thank you, Fred. Thanks for having me. Thank you, Fred. Thanks for coming. Thanks for having me. It's a smart marketing tool, you know, all the cameras. *[Laughter]* I thought for sure the largest chamber of commerce was in Texas, but I guess not. *[Laughter]*

I'm thrilled to be back in Cleveland. I've had a fascinating day. I went to a small business that is on the cutting edge of changing the way we're going to consume energy. I just came from the Cleveland Clinic, which is one of the most fabulous hospitals in America.

I do want to spend a little time talking about our economy, talking about health care and energy policy that will be an integral part of making sure the economy continues to grow. I'd like to spend a little time talking about the war against extremists and radicals. And I'd like to answer some of your questions, if you have any.

Before I do, I want to tell you, Laura sends her best. She's arguably the most patient woman in America. *[Laughter]* She's a fabulous First Lady and a great mom. I love her dearly, and she told me to say hi to you all, so, hi. *[Laughter]*

I appreciate Joe Roman, who works with Fred. Thanks for setting this deal up. Appreciate the chance to come and visit with fellow citizens here in Cleveland. I'm the Commander in Chief; I'm also the educator in chief. Part of my job is to explain the philosophy behind the decisions that I have

made. I'm honored you'd give me a chance to do so.

I'm traveling with a good man, the Congressman from this area—one of the Congressmen from this area, Steve LaTourette. Proud to be with you, Congressman. Thank you for your time. State Auditor Mary Taylor is here. Thanks for being here, Mary. I met the mayor of Cleveland across the street at the hospital. I was proud to be with him. I thank him for his time, for taking time out of his day. I thank Toby Cosgrove of—doc, thank you for being here—from the hospital there across the street. I thank the docs, by the way, for taking time to show me some amazing technology.

Let me first talk about our economy. It's—our economy is changing, and it's strong. I remember back to—early on in my administration when we were confronted with some very difficult times. There was a recession; the economy had gotten overheated, and it was correcting. And then we got hit by an enemy that killed nearly 3,000 of our citizens which—such an attack obviously would have an effect on the economy. Then there were some corporate scandals that had a psychological effect on our economy. I mean, people were beginning to worry about the system where people were not upholding the law, taking advantage of the situation, taking advantage of shareholders.
