

The President. Well, I think that's the question I've been asking Congress, because I think we need it. I think we can do it. And I'm going to be making a speech tomorrow night talking about my plan to make sure that everybody has access to affordable health care.

Part of what happened is that back in the 1940s and fifties, a lot of—most of the wealthy countries around the world decided to set up health care systems that covered everybody. The United States, for a number of different reasons, organized their health care around employer-based health insurance. So what happened was, is that you basically got your health insurance through your job. And you can see some problems with that. Number one is, if you lose your job, then you don't have health insurance. The other thing is, some employers may not want to do right by their employees by giving them health insurance, and then they're kind of out of luck.

And so what happened was, is that the majority of Americans still have health insurance through their job, and it's—most of them are happy with it, but a lot of people fall through the cracks. If you're self-employed, if you start your own business, if you are working in a job that doesn't offer health insurance, then you're—you have real problems.

So what we're trying to do is set up a system where people who have health insurance on the jobs, they can keep it, but if you don't have health insurance for the job, if you're self-employed, if you're unemployed, that you're able to get health insurance through another way. And we can afford to do it, and it will actually, I think, over time save us money if we set that up. So all right?

Well, listen, guys, these have been terrific questions. I can tell you guys are going to excel in high school. You guys are going to do great. And your teachers are lucky to have you. And just remember that—my only other piece of advice is, stay focused, do well, apply yourself in school, but also understand you're going to make some mistakes during your teenage years, and you can recover from them. Just make sure that if you do make a mistake that you learn from it, and you'll be fine.

All right. Thank you guys for taking the time.

Secretary Duncan. Thanks, guys. Have a great school year.

NOTE: The President spoke at 11:01 a.m. In his remarks, he referred to William H. Gates III, chairman, Microsoft Corporation. He also referred to his mother-in-law Marian Robinson; and his brother-in-law Craig M. Robinson.

Remarks to Students and Faculty at Wakefield High School in Arlington September 8, 2009

Hello, everybody. Thank you. Thank you. Thank you, everybody. All right, everybody go ahead and have a seat. How is everybody doing today? How about Tim Spicer? I am here with students at Wakefield High School in Arlington, Virginia. And we've got students tuning in from all across America, from kindergarten through 12th grade. And I am just so glad that all could join us today. And I want to thank Wakefield for being such an outstanding host. Give yourselves a big round of applause.

Now, I know that for many of you, today is the first day of school. And for those of you in kindergarten or starting middle or high school, it's your first day in a new school, so it's understandable if you're a little nervous. I imagine there are some seniors out there who are feel-

ing pretty good right now—[applause]—with just 1 more year to go. And no matter what grade you're in, some of you are probably wishing it were still summer and you could've stayed in bed just a little bit longer this morning.

I know that feeling. When I was young, my family lived overseas. I lived in Indonesia for a few years. And my mother, she didn't have the money to send me where all the American kids went to school, but she thought it was important for me to keep up with an American education. So she decided to teach me extra lessons herself, Monday through Friday. But because she had to go to work, the only time she could do it was at 4:30 in the morning. Now, as you might imagine, I wasn't too happy about getting up that early. And a lot of times, I'd fall asleep right

there at the kitchen table. But whenever I'd complain, my mother would just give me one of those looks, and she'd say, "This is no picnic for me either, buster." [Laughter]

So I know that some of you are still adjusting to being back at school. But I'm here today because I have something important to discuss with you. I'm here because I want to talk with you about your education and what's expected of all of you in this new school year.

Now, I've given a lot of speeches about education. And I've talked about responsibility a lot. I've talked about teachers' responsibility for inspiring students and pushing you to learn. I've talked about your parents' responsibility for making sure you stay on track and you get your homework done and don't spend every waking hour in front of the TV or with the Xbox. I've talked a lot about your Government's responsibility for setting high standards and supporting teachers and principals and turning around schools that aren't working, where students aren't getting the opportunities that they deserve.

But at the end of the day, we can have the most dedicated teachers, the most supportive parents, the best schools in the world, and none of it will make a difference, none of it will matter, unless all of you fulfill your responsibilities, unless you show up to those schools, unless you pay attention to those teachers, unless you listen to your parents and grandparents and other adults and put in the hard work it takes to succeed. And that's what I want to focus on today: the responsibility each of you has for your education.

I want to start with the responsibility you have to yourself. Every single one of you has something that you're good at. Every single one of you has something to offer. And you have a responsibility to yourself to discover what that is. That's the opportunity an education can provide.

Maybe you could be a great writer, maybe even good enough to write a book or articles in a newspaper, but you might not know it until you write that English paper—that English class paper that's assigned to you. Maybe you could be an innovator or an inventor, maybe even good enough to come up with the next

iPhone or the new medicine or vaccine, but you might not know it until you do your project for your science class. Maybe you could be a mayor or a Senator or a Supreme Court Justice, but you might not know that until you join student government or the debate team.

And no matter what you want to do with your life, I guarantee that you'll need an education to do it. You want to be a doctor or a teacher or a police officer? You want to be a nurse or an architect, a lawyer or a member of our military? You're going to need a good education for every single one of those careers. You cannot drop out of school and just drop into a good job. You've got to train for it and work for it and learn for it.

And this isn't just important for your own life and your own future. What you make of your education will decide nothing less than the future of this country. The future of America depends on you. What you're learning in school today will determine whether we as a nation can meet our greatest challenges in the future.

You'll need the knowledge and problem-solving skills you learn in science and math to cure diseases like cancer and AIDS and to develop new energy technologies and protect our environment. You'll need the insights and critical-thinking skills you gain in history and social studies to fight poverty and homelessness, crime and discrimination, and make our Nation more fair and more free. You'll need the creativity and ingenuity you develop in all your classes to build new companies that will create new jobs and boost our economy.

We need every single one of you to develop your talents and your skills and your intellect so you can help us old folks solve our most difficult problems. If you don't do that, if you quit on school, you're not just quitting on yourself, you're quitting on your country.

Now, I know it's not always easy to do well in school. I know a lot of you have challenges in your lives right now that can make it hard to focus on your schoolwork. I get it. I know what it's like. My father left my family when I was 2 years old, and I was raised by a single mom who had to work and who struggled at times to pay the bills and wasn't always able to give us

the things that other kids had. There were times when I missed having a father in my life. There were times when I was lonely and I felt like I didn't fit in.

So I wasn't always as focused as I should have been on school, and I did some things that I'm not proud of, and I got in more trouble than I should have. And my life could have easily taken a turn for the worse.

But I was lucky. I got a lot of second chances, and I had the opportunity to go to college and law school and follow my dreams. And my wife, our First Lady, Michelle Obama, she has a similar story. Neither of her parents had gone to college, and they didn't have a lot of money. But they worked hard, and she worked hard, so that she could go to the best schools in this country.

But some of you might not have those advantages. Maybe you don't have adults in your life who give you the support that you need. Maybe someone in your family has lost their job and there's not enough money to go around. Maybe you live in a neighborhood where you don't feel safe, or have friends who are pressuring you to do things you know aren't right.

But at the end of the day, the circumstances of your life—what you look like, where you come from, how much money you have, what you've got going on at home—none of that is an excuse for neglecting your homework or having a bad attitude in school. That's no excuse for talking back to your teacher, or cutting class, or dropping out of school. There is no excuse for not trying. Where you are right now doesn't have to determine where you'll end up. No one's written your destiny for you, because here in America, you write your own destiny. You make your own future. That's what young people like you are doing every day, all across America.

Young people like Jazmin Perez from Roma, Texas. Jazmin didn't speak English when she first started school. Neither of her parents had gone to college. But she worked hard, earned good grades, and got a scholarship to Brown University—is now in graduate school studying public health, on her way to becoming Dr. Jazmin Perez.

I'm thinking about Andoni Schultz from Los Altos, California, who's fought brain cancer since he was 3. He's had to endure all sorts of treatments and surgeries, one of which affected his memory, so it took him much longer—hundreds of extra hours—to do his schoolwork. But he never fell behind. He's headed to college this fall.

And then there's Shantell Steve from my hometown of Chicago, Illinois. Even when bouncing from foster home to foster home in the toughest neighborhoods in the city, she managed to get a job at a local health care center, start a program to keep young people out of gangs, and she's on track to graduate high school with honors and go on to college.

And Jazmin, Andoni, and Shantell aren't any different from any of you. They face challenges in their lives just like you do. In some cases, they've got it a lot worse off than many of you. But they refused to give up. They chose to take responsibility for their lives, for their education, and set goals for themselves. And I expect all of you to do the same.

And that's why today I'm calling on each of you to set your own goals for your education and do everything you can to meet them. Your goal can be something as simple as doing all your homework, paying attention in class, or spending some time each day reading a book. Maybe you'll decide to get involved in an extra-curricular activity or volunteer in your community. Maybe you'll decide to stand up for kids who are being teased or bullied because of who they are or how they look, because you believe, like I do, that all young people deserve a safe environment to study and learn. Maybe you'll decide to take better care of yourself so you can be more ready to learn. And along those lines, by the way, I hope all of you are washing your hands a lot and that you stay home from school when you don't feel well so we can keep people from getting the flu this fall and winter. But whatever you resolve to do, I want you to commit to it. I want you to really work at it.

I know that sometimes you get that sense from TV that you can be rich and successful without any hard work, that your ticket to success is through rapping or basketball or being a

reality TV star. Chances are you're not going to be any of those things.

The truth is, being successful is hard. You won't love every subject that you study. You won't click with every teacher that you have. Not every homework assignment will seem completely relevant to your life right at this minute. And you won't necessarily succeed at everything the first time you try.

That's okay. Some of the most successful people in the world are the ones who've had the most failures. J.K. Rowling, who wrote *Harry Potter*, her first *Harry Potter* book was rejected 12 times before it was finally published. Michael Jordan was cut from his high school basketball team. He lost hundreds of games and missed thousands of shots during his career. But he once said, "I have failed over and over and over again in my life, and that's why I succeed."

These people succeeded because they understood that you can't let your failures define you, you have to let your failures teach you. You have to let them show you what to do differently the next time. So if you get into trouble, that doesn't mean you're a troublemaker, it means you need to try harder to act right. If you get a bad grade, that doesn't mean you're stupid, it just means you need to spend more time studying.

No one's born being good at all things. You become good at things through hard work. You're not a varsity athlete the first time you play a new sport. You don't hit every note the first time you sing a song. You've got to practice. The same principle applies to your schoolwork. You might have to do a math problem a few times before you get it right. You might have to read something a few times before you understand it. You definitely have to do a few drafts of a paper before it's good enough to hand in.

Don't be afraid to ask questions. Don't be afraid to ask for help when you need it. I do that every day. Asking for help isn't a sign of weakness, it's a sign of strength, because it shows you have the courage to admit when you don't know something, and that then allows you to learn something new. So find an adult that you trust—a parent, a grandparent, or a

teacher, a coach, or a counselor—and ask them to help you stay on track to meet your goals.

And even when you're struggling, even when you're discouraged and you feel like other people have given up on you, don't ever give up on yourself, because when you give up on yourself, you give up on your country.

The story of America isn't about people who quit when things got tough. It's about people who kept going, who tried harder, who loved their country too much to do anything less than their best. It's the story of students who sat where you sit 250 years ago and went on to wage a Revolution, and they founded this Nation; young people, students who sat where you sit 75 years ago who overcame a depression and won a world war, who fought for civil rights and put a man on the Moon; students who sat where you sit 20 years ago who founded Google and Twitter and Facebook and changed the way we communicate with each other.

So today I want to ask all of you, what's your contribution going to be? What problems are you going to solve? What discoveries will you make? What will a President who comes here in 20 or 50 or 100 years say about what all of you did for this country?

Now, your families, your teachers, and I are doing everything we can to make sure you have the education you need to answer these questions. I'm working hard to fix up your classrooms and get you the books and the equipment and the computers you need to learn. But you've got to do your part too. So I expect all of you to get serious this year. I expect you to put your best effort into everything you do. I expect great things from each of you. So don't let us down. Don't let your family down or your country down. Most of all, don't let yourself down. Make us all proud.

Thank you very much, everybody. God bless you. God bless America. Thank you.

NOTE: The President spoke at 12:06 p.m. In his remarks, he referred to Tim Spicer, senior class president, Wakefield High School, who introduced the President. He also referred to his mother-in-law Marian Robinson. The

President's remarks were streamed live via the whitehouse.gov web site, broadcast live via C-

SPAN, and made available through live satellite feed.

Statement on the G-20 Summit in Pittsburgh, Pennsylvania September 8, 2009

Michelle and I look forward to welcoming world leaders to the wonderful city of Pittsburgh on September 24th and 25th, and we thank the people of Pittsburgh and Pennsylvania for opening their city as a showcase to the world.

The Pittsburgh summit is an important opportunity to continue the hard work that we have done in confronting the global economic crisis and renewing prosperity for our people. Together, we will review the progress we have made, assess what more needs to be done, and discuss what we can do together to lay the groundwork for balanced and sustainable economic growth.

Pittsburgh stands as a bold example of how to create new jobs and industries while transitioning to a 21st-century economy. As a city that has transformed itself from the city of steel to a center for high-tech innovation, including green technology, education and training, and research and development, Pittsburgh will provide both a beautiful backdrop and a powerful example for our work.

It's important to note how far we have come in preventing a global economic catastrophe. A year ago, our economy was in a freefall. Some economists were predicting a second great depression. Immediate action was required to rescue the economy. In the United States, we passed an historic Recovery Act that quickly put money in the hands of working families and is putting Americans to work all across the country, including in Pittsburgh and the surrounding area. That includes companies like East Penn Manufacturing, a third-generation family business which is now building batteries for the hybrid, energy-efficient vehicles of the 21st century. That includes Serious Materials manufactur-

ing plant outside of Pittsburgh that was shuttered last year, which is now rehiring the workers who lost their jobs and giving them a new mission producing some of the most energy-efficient windows in the world. And at medical laboratories in Pittsburgh, scientists are making advances in tissue regeneration which will help people across the globe, including our troops wounded in combat in Iraq and Afghanistan.

The steps that we have taken to jump-start growth have also been coordinated with our partners around the world. Industrial production throughout the G-20 has either stabilized or is growing. Global trade is expanding. Stresses in financial markets have significantly abated, and our financial institutions are raising needed capital.

But all of us must remember that our work is far from complete, not when our people are still looking for work. As the leaders of the world's largest economies, we have a responsibility to work together on behalf of sustained growth, while putting in place the rules of the road that can prevent this kind of crisis from happening again. To avoid being trapped in the cycle of bubble and bust, we must set a path for sustainable growth while steering clear of the imbalances of the past. That will be a key part of the G-20 agenda going forward, and the Pittsburgh summit can be an important milestone in our efforts.

In a place known as the city of bridges, we can come together to advance our common interest in a global recovery while turning the page to a truly 21st-century economy. By working with our friends and partners from around the world, the U.S. is ready to help lead this effort in Pittsburgh and beyond.
