

REPORT
OF
THE SECRETARY OF THE NAVY,

COMMUNICATING

A letter from the Chief of the Bureau of Yards and Docks, with an abstract of offers for furnishing articles falling under the cognizance of that Bureau.

JANUARY 4, 1858.—Read.

APRIL 13, 1858.—Ordered to be printed.

NAVY DEPARTMENT, December 23, 1857.

SIR: I have the honor to enclose herewith a copy of a letter from the Chief of the Bureau of Yards and Docks, of the 21st instant, transmitting an "abstract of offers" received for furnishing articles falling under the cognizance of that bureau during the fiscal year ending on the 30th June, 1858, made in conformity to the act of Congress of March 3, 1843.

I have the honor to be, very respectfully, your obedient servant,
ISAAC TOUCEY.

Hon. JOHN C. BRECKINRIDGE,
President of the United States Senate.

BUREAU OF YARDS AND DOCKS,
December 21, 1857.

SIR: I transmit herewith, in duplicate, a list of contracts, made under the cognizance of this bureau, for furnishing naval supplies for the fiscal year ending June 30, 1858.

I have the honor to be your obedient servant,

JOS. SMITH.

Hon. I. TOUCEY,
Secretary of the Navy.

List of contracts for fiscal year ending June 30, 1858.

272 cubic feet-----

85 do

The face ends of these 10 headers to be dressed as first class rusticated rock-work, having a batter of 1 inch to the foot rise

The top surface of each header of the first bill is to be dressed to an even and true bed for 2 feet 4 inches inward from the face end, and for the width of 18 inches at 1 foot in from the back end.

LIST OF CONTRACTS—Continued.

Date.	Expiration.	Names.	Articles.	Rates.	Where deliverable.
1857. June 27	1858. June 30	Pierce & Rowe—Cont'd...	<p>The bottom bed of each stone to be truly and evenly dressed, parallel to the top bed for 2 feet inward from the face of each header, and for a width of 18 inches at one foot from the back end.</p> <p>The two side joints are to be truly and evenly dressed at right angles to the top and bottom beds for 2 feet inwards from the face end of each header, and for 18 inches wide at 1 foot in from the back end—that is, at 1 foot inward from the back end of each header a belt of the width of 18 inches on the top; the bottom and the two sides are to be truly and evenly dressed at right angles to each other, and in the same lines or planes as the front beds and joints. A draught of 1 inch is to be cut around each end of the stone, showing full corners and square edges, which must continue of full dimensions to the gauge within.</p> <p>The face end of each of the headers in the second bill is to have a clear draught 2 inches wide cut around it, with a batten of 1 inch to the foot rise. The back end is to be square to the beds, with a draught of 1 inch run round it. The top, bottom, and two sides of the 13th course are to be dressed for 26 inches inward from the face end, and for 18 inches wide at 1 foot inward from the back end, the same as those in the first bill. The top of the 14th course is to be dressed from the face end to within 1 foot of the back end of each header. The bottom and the two sides are to be dressed for 26 inches inward from the face end, and for 18 inches wide at 1 foot inward from the back end.</p> <p>The parts of the stone not specified to be dressed as above, may be left rough, as split from the quarry, being of full dimensions. The dressing on the beds and joints of these headers must conform to the samples of second class work.</p>	-----	Pensacola.

THIRD BILL.—FRONT AND BACK STRETCHERS AND COUNTERFORT
STONES FOR WORK UNDER WATER, VIZ:

60 front stretchers 8 feet long, 2 feet wide, 2 feet high ----
60 back stretchers 8 ft. long, 2 ft. high, 18 in. on the beds.
44 counterforts 6 ft. 6 in. long, 2 ft. high, 18 in. on the beds.
4,218 cubic feet -----

\$0 85 per cub. ft.

The stretchers to be dressed according to the sample for 2d class work on the top and bottom beds and on the 2 ends. The counterfort stones on the top and bottom beds and on one end. The face and back, or the two sides of all the stones, are to have a draught of 1 inch run round them, so as to show full corners and square edges, but the surface within the draught lines may be left rough as it was split from the quarry.

FOURTH BILL.—TWENTY FRONT STRETCHERS.

First class rusticated rock-work, battering 1 inch on the face to the foot rise, (667 cubic feet)-----

90 per cub. ft.

These 20 stretchers are to be 8 feet long, 2 feet high, 24 inches wide on the top bed, and 26 inches wide on the bottom bed.

The face of each stone is to be full, with a clean fine-cut draught 2 inches wide running round it, showing clean, even joints, with full corners and square edges, and battering one-twelfth. The back of each is to have a draught of 1 inch run round it, square to the beds, with full corners and square edges.

FIFTH BILL —FINE-CUT COPING.

50 lineal feet of fine-cut coping, 5 feet wide on the top, and 5 feet 2 inches on the bottom, in blocks of from 5 to 8 feet or more in length, and 2 feet in thickness dressed as described below -----

15 00 per lin. ft.

LIST OF CONTRACTS—Continued.

Date.	Expiration.	Names.	Articles.	Rates.	Where deliverable.
1857. June 27	1858. June 30	Pierce & Rowe—Cont'd...	<p>The vertical face of the coping is to have a batter of 1 inch to the foot, dressed according to the samples of "first class fine-cut work." The top surface is also to be truly and evenly dressed in the same style, with clean, sharp arris edges on the two side joints and back of the stone, with all the corners full and square.</p> <p>The front top line to be rounded on the arris edge 2 inches on each face, or to the quadrant of a circle of 2 inches radius. The bottom bed and the two sides are to be dressed truly, so as to form close even joints, with sharp even arris edges.</p> <p>All the stones, excepting only the first class coping embraced in the fifth bill, must be carefully drilled to receive a "key lewis" of such shape and size as may be directed.</p> <p>The coping stones in the fifth bill must be carefully drilled in the exact positions and of the sizes directed.</p> <p>SIXTH BILL.—RUBBLE GRANITE.</p> <p>420 perches of rubble or ballast stone -----</p> <p>All the dressed granite described in the foregoing class to be of good quality and free from sap or cracks</p> <p>The quality of the dressing of the headers, stretchers, and coping, must be equal in every respect to the best samples that can be selected from a similar description of stone already furnished for the permanent wharf and deep basin, and must be "<i>lewised</i>" according to a drawing to be furnished.</p> <p>The granite to be paid for, according to the net dimensions of the pieces when dressed.</p>	<p>-----</p> <p>\$6 50 per perch of 2,700 pounds.</p>	Pensacola.

The usual facilities of steam power for hoisting, cranes, cars, and laborers, will be afforded by the government to vessels discharging granite; but no demurrage will be allowed to any vessel that may be required to wait for its turn at the wharf, or for repairing the machinery which is furnished by the government in aid of vessels discharging.

The whole of the above described granite to be delivered within twelve (12) months from and after the date of the contract.
