CANADIAN RECIPROCTY

D. OF D.
JUL 5 1912

10

SPECIAL MESSAGE.

To the Senate and House of Representatives:

In my annual message of December 6, 1910, I stated that the policy of broader and closer trade relations with the Dominion of Canada, which was initiated in the adjustment of the maximum and minimum provisions of the tariff act of August 5, 1909, had proved mutually beneficial and that it justified further efforts for the readjustment of the commercial relations of the two countries. I also informed you that, by my direction, the Secretary of State had dispatched two representatives of the Department of State as special commissioners to Ottawa to confer with representatives of the Dominion Government, that they were authorized to take steps to formulate a reciprocal trade agreement, and that the Ottawa conferences thus begun, had been adjourned to be resumed in Washington.

On the 7th of the present month two cabinet ministers came to Washington as representatives of the Dominion Government, and the conferences were continued between them and the Secretary of State. The result of the negotiations was that on the 21st instant a reciprocal trade agreement was reached, the text of which is herewith transmitted with accompanying correspondence and other data.

One by one the controversies resulting from the uncertainties which attended the partition of British territory on the American Continent at the close of the Revolution, and which were inevitable under the then conditions, have been

eliminated—some by arbitration and some by direct negotiation. The merits of these disputes, many of them extending through a century, need not now be reviewed. They related to the settlement of boundaries, the definition of rights of navigation, the interpretation of treaties, and many other subjects.

Through the friendly sentiments, the energetic efforts, and the broadly patriotic views of successive administrations, and especially of that of my immediate predecessor, all these questions have been settled. The most acute related to the Atlantic fisheries, and this long-standing controversy, after amicable negotiation, was referred to The Hague Tribunal. The judgment of that august international court has been accepted by the people of both countries and a satisfactory agreement in pursuance of the judgment has ended completely the controversy. An equitable arrangement has recently been reached between our Interstate Commerce Commission and the similar body in Canada in regard to through rates on the transportation lines between the two countries.

The path having been thus opened for the improvement of commercial relations, a reciprocal trade agreement is the logical sequence of all that has been accomplished in disposing of matters of a diplomatic and controversial character. The identity of interest of two peoples linked together by race, language, political institutions, and geographical proximity offers the foundation. The contribution to the industrial advancement of our own country by the migration across the boundary of the thrifty and industrious Canadians of English, Scotch, and French origin is now repaid by the movement of large numbers of our own sturdy farmers to the northwest of Canada, thus giving their labor, their means, and their experience to the development of that section, with its agricultural possibilities.

The guiding motive in seeking adjustment of trade relations between two countries so situated geographically should be to give play to productive forces as far as practicable, regardless of political boundaries. While equivalency should be sought in an arrangement of this character, an exact balance of financial gain is neither imperative nor attainable. No yardstick can measure the benefits to the two peoples of this freer commercial intercourse and no trade agreement should be judged wholly by customhouse statistics.

We have reached a stage in our own development that calls for a statesmanlike and broad view of our future economic status and its requirements. We have drawn upon our natural resources in such a way as to invite attention to their necessary limit. This has properly aroused effort to conserve them, to avoid their waste, and to restrict their use to our necessities. We have so increased in population and in our consumption of food products and the other necessities of life, hitherto supplied largely from our own country, that unless we materially increase our production we can see before us a change in our economic position, from that of a country selling to the world food and natural products of the farm and forest, to one consuming and importing them. Excluding cotton, which is exceptional, a radical change is already shown in our exports in the falling off in the amount of our agricultural products sold abroad and a corresponding marked increase in our manufactures exported. A farsighted policy requires that if we can enlarge our supply of natural resources, and especially of food products and the necessities of life, without substantial injury to any of our producing and manufacturing classes, we should take steps to do so now. We have on the north of us a country contiguous to ours for three thousand miles, with natural resources of the same character as ours which

have not been drawn upon as ours have been, and in the development of which the conditions as to wages and character of the wage earner and transportation to market differ but little from those prevailing with us. The difference is not greater than it is between different States of our own country or between different Provinces of the Dominion of Canada. Ought we not, then, to arrange a commercial agreement with Canada, if we can, by which we shall have direct access to her great supply of natural products without an obstructing or prohibitory tariff? This is not a violation of the protective principle, as that has been authoritatively announced by those who uphold it, because that principle does not call for a tariff between this country and one whose conditions as to production, population, and wages are so like ours, and when our common boundary line of three thousand miles in itself must make a radical distinction between our commercial treatment of Canada and of any other country.

The Dominion has greatly prospered. It has an active, aggressive, and intelligent people. They are coming to the parting of the ways. They must soon decide whether they are to regard themselves as isolated permanently from our markets by a perpetual wall or whether we are to be commercial friends. If we give them reason to take the former view, can we complain if they adopt methods denying access to certain of their natural resources except upon conditions quite unfavorable to us? A notable instance of such a possibility may be seen in the conditions surrounding the supply of pulp wood and the manufacture of print paper, for which we have made a conditional provision in the agreement, believed to be equitable. Should we not now, therefore, before their policy has become too crystallized and fixed for change, meet them in a spirit of real concession, facilitate

commerce between the two countries, and thus greatly increase the natural resources available to our people?

I do not wish to hold out the prospect that the unrestricted interchange of food products will greatly and at once reduce their cost to the people of this country. Moreover, the present small amount of Canadian surplus for export as compared with that of our own production and consumption would make the reduction gradual. Excluding the element of transportation, the price of staple food products, especially of cereals, is much the same the world over, and the recent increase in price has been the result of a world-wide cause. But a source of supply as near as Canada would certainly help to prevent speculative fluctuations, would steady local price movements, and would postpone the effect of a further world increase in the price of leading commodities entering into the cost of living, if that be inevitable.

In the reciprocal trade agreement numerous additions are made to the free list. These include not only food commodities, such as cattle, fish, wheat and other grains, fresh vegetables, fruits, and dairy products, but also rough lumber and raw materials useful to our own industries. Free lumber we ought to have. By giving our people access to Canadian forests we shall reduce the consumption of our own, which, in the hands of comparatively few owners, now have a value that requires the enlargement of our available timber resources.

Natural, and especially food, products being placed on the free list, the logical development of a policy of reciprocity in rates on secondary food products, or foodstuffs partly manufactured, is, where they cannot also be entirely exempted from duty, to lower the duties in accord with the exemption of the raw material from duty. This has been followed in the trade agreement which has been negotiated. As an example, wheat is made free and the rate on flour is

equalized on a lower basis. In the same way, live animals being made free, the duties on fresh meats and on secondary meat products and on canned meats are substantially lowered. Fresh fruits and vegetables being placed on the free list, the duties on canned goods of these classes are reduced.

Both countries in their industrial development have to meet the competition of lower priced labor in other parts of the world. Both follow the policy of encouraging the development of home industries by protective duties within reasonable limits. This has made it difficult to extend the principle of reciprocal rates to many manufactured commodities, but after much negotiation and effort we have succeeded in doing so in various and important instances.

The benefit to our widespread agricultural implement industry from the reduction of Canadian duties in the agreement is clear. Similarly the new, widely distributed and expanding motor vehicle industry of the United States is given access to the Dominion market on advantageous terms.

My purpose in making a reciprocal trade agreement with Canada has been not only to obtain one which would be mutually advantageous to both countries, but one which also would be truly national in its scope as applied to our own country and would be of benefit to all sections. The currents of business and the transportation facilities that will be established forward and back across the border cannot but inure to the benefit of the boundary States. Some readjustments may be needed, but in a very short period the advantage of the free commercial exchange between communities separated only by short distances will strikingly manifest itself. That the broadening of the sources of food supplies, that the opening of the timber resources of the Dominion to our needs, that the addition to the supply of raw materials, will be limited to

no particular section does not require demonstration. The same observation applies to the markets which the Dominion offers us in exchange. As an illustration, it has been found possible to obtain free entry into Canada for fresh fruits and vegetables—a matter of special value to the South and to the Pacific coast in disposing of their products in their season. It also has been practicable to obtain free entry for the cotton-seed oil of the South—a most important product with a rapidly expanding consumption in the Dominion.

The entire foreign trade of Canada in the last fiscal year, 1910, was \$655,000,000. The imports were \$376,000,000, and of this amount the United States contributed more than \$223,000,000. The reduction in the duties imposed by Canada will largely increase this amount and give us even a larger share of her market than we now enjoy, great as that is.

The data accompanying the text of the trade agreement exhibit in detail the facts which are here set forth briefly and in outline only. They furnish full information on which the legislation recommended may be based. Action on the agreement submitted will not interfere with such revision of our own tariff on imports from all countries as Congress may decide to adopt.

Reciprocity with Canada must necessarily be chiefly confined in its effect on the cost of living to food and forest products. The question of the cost of clothing as affected by duty on textiles and their raw materials, so much mooted, is not within the scope of an agreement with Canada, because she raises comparatively few wool sheep, and her textile manufactures are unimportant.

This trade agreement, if entered into, will cement the friendly relations with the Dominion which have resulted from the satisfactory settlement of the controversies that have lasted for a century, and further promote good feeling

between kindred peoples. It will extend the market for numerous products of the United States among the inhabitants of a prosperous neighboring country with an increasing population and an increasing purchasing power. It will deepen and widen the sources of food supply in contiguous territory, and will facilitate the movement and distribution of these foodstuffs.

The geographical proximity, the closer relation of blood, common sympathies, and identical moral and social ideas furnish very real and striking reasons why this agreement ought to be viewed from a high plane.

Since becoming a nation, Canada has been our good neighbor, immediately contiguous across a wide continent without artificial or natural barrier except navigable waters used in common.

She has cost us nothing in the way of preparations for defense against her possible assault, and she never will. She has sought to agree with us quickly when differences have disturbed our relations. She shares with us common traditions and aspirations. I feel I have correctly interpreted the wish of the American people by expressing in the arrangement now submitted to Congress for its approval, their desire for a more intimate and cordial relationship with Canada. I therefore earnestly hope that the measure will be promptly enacted into law.

WM. H. TAFT.

THE WHITE HOUSE, *January 26, 1911.*

CORRESPONDENCE EMBODYING AN AGREEMENT BETWEEN THE
DEPARTMENT OF STATE AND THE CANADIAN GOVERNMENT
IN REGARD TO RECIPROCAL TARIFF LEGISLATION

AND

STATISTICAL DATA TO SHOW THE EFFECT OF THE AGREE-
MENT UPON THE COMMERCE AND REVENUES OF THE
UNITED STATES AND THE DOMINION OF CANADA

*Letter from the Canadian Ministers to the Secretary of State,
with schedules annexed.*

WASHINGTON, January 21st, 1911.

DEAR MR. SECRETARY:

1. The negotiations initiated by the President several months ago, through your communication to His Excellency the British Ambassador, respecting a reciprocal tariff arrangement between the United States and Canada, and since carried on directly between representatives of the Governments of the two countries, have now, we are happy to say, reached a stage which gives reasonable assurance of a conclusion satisfactory to both countries.

2. We desire to set forth what we understand to be the contemplated arrangement and to ask you to confirm it.

3. It is agreed that the desired tariff changes shall not take the formal shape of a treaty, but that the Governments of the two countries will use their utmost efforts to bring about such changes by concurrent legislation at Washington and Ottawa.

4. The Governments of the two countries having made this agreement from the conviction that, if confirmed by the necessary legislative authorities, it will benefit the people on both sides of the border line, we may reasonably hope and expect that the arrangement, if so confirmed, will remain in operation for a considerable period. Only this expectation on the part of both Governments would justify the time and labour that have been employed in the maturing of the proposed measures. Nevertheless, it is distinctly understood that we do not attempt to bind for the future the action of the United States Congress or the Parliament of Canada, but that each of these authorities shall be absolutely free to make any change of tariff policy or of any other matter covered by the present arrangement that may be deemed expedient. We look for the continuance of the arrangement, not because either party is bound to it, but because of our conviction that the more liberal trade policy thus to be established will be viewed by the people of the United States and Canada as one which will strengthen the friendly relations now happily prevailing and promote the commercial interests of both countries.

5. As respects a considerable list of articles produced in both countries, we have been able to agree that they shall be reciprocally free. A list of the articles to be admitted free of duty into the United States when imported from Canada, and into Canada when imported from the United States, is set forth in Schedule A.

6. As respects another group of articles, we have been able to agree upon common rates of duty to be applied to such articles when imported into the United States from Canada or into Canada from the United States. A list of these articles, with the rates of duty, is set forth in Schedule B.

7. In a few instances it has been found that the adoption of a common rate will be inconvenient and therefore exceptions have to be made.

8. Schedule C specifies articles upon which the United States will levy the rates therein set forth when such articles are imported from Canada.

9. Schedule D specifies articles upon which Canada will levy the rates therein set forth when such articles are imported from the United States.

10. With respect to the discussions that have taken place concerning the duties upon the several grades of pulp, printing paper, etc.—mechanically ground wood pulp, chemical wood pulp, bleached and unbleached, news printing paper and other printing paper and board made from wood pulp, of the value not exceeding four cents per pound at the place of shipment—we note that you desire to provide that such articles from Canada shall be made free of duty in the United States only upon certain conditions respecting the shipment of pulp wood from Canada. It is necessary that we should point out that this is a matter in which we are not in a position to make any agreement. The restrictions at present existing in Canada are of a Provincial character. They have been adopted by several of the Provinces with regard to what are believed to be Provincial interests. We have neither the right nor the desire to interfere with the Provincial authorities in the free exercise of their constitutional powers in the administration of their public lands. The provisions you are proposing to make respecting the conditions upon which these classes of pulp and paper may be imported into the United States free of duty must necessarily be for the present inoperative. Whether the Provincial Governments will desire to in any way modify

their regulations with a view to securing the free admission of pulp and paper from their Provinces into the market of the United States, must be a question for the Provincial authorities to decide. In the meantime, the present duties on pulp and paper imported from the United States into Canada will remain. Whenever pulp and paper of the classes already mentioned are admitted into the United States free of duty from all parts of Canada, then similar articles, when imported from the United States, shall be admitted into Canada free of duty.

11. The tariff changes proposed might not alone be sufficient to fully bring about the more favourable conditions which both parties desire. It is conceivable that Customs regulations which are deemed essential in some cases might operate unfavourably upon the trade between the United States and Canada and that such regulations, if made without due regard to the special conditions of the two countries, might to some extent defeat the good purpose of the present arrangement. It is agreed that the utmost care shall be taken by both Governments to see that only such Customs regulations are adopted as are reasonably necessary for the protection of the treasury against fraud; that no regulation shall be made or maintained which unreasonably hampers the more liberal exchange of commodities now proposed; that representations on either side as to the unfavourable operation of any regulation will receive from the other all due consideration, with the earnest purpose of removing any just cause of complaint; and that, if any further legislation is found necessary to enable either Government to carry out the purpose of this provision, such legislation will be sought from Congress or Parliament as the case may be.

12. The Government of Canada agree that, until otherwise determined by them, the licenses hitherto issued to United States fishing vessels under the provisions of Section 3 of Chapter 47 of the Revised Statutes of Canada, granting to such vessels certain privileges on the Atlantic coast of Canada shall continue to be issued and that the fee to be paid to the Government of Canada for such license by the owner or commander of any such United States vessel shall hereafter be one dollar per annum.

13. It is understood that upon a day and hour to be agreed upon between the two Governments the President of the United States will communicate to Congress the conclusions now reached and recom-

mend the adoption of such legislation as may be necessary on the part of the United States to give effect to the proposed arrangement.

14. It is understood that simultaneously with the sending of such communication to the United States Congress by the President, the Canadian Government will communicate to the Parliament of Canada the conclusions now reached and will thereupon take the necessary steps to procure such legislation as is required to give effect to the proposed arrangement.

15. Such legislation on the part of the United States may contain a provision that it shall not come into operation until the United States Government are assured that corresponding legislation has been or will be passed by the Parliament of Canada; and in like manner the legislation on the part of Canada may contain a provision that it shall not come into operation until the Government of Canada are assured that corresponding legislation has been passed or will be passed by the Congress of the United States.

Yours faithfully,

W. S. FIELDING.

WM. PATERSON.

The Honorable P. C. KNOX,
Secretary of State, Washington, D. C.

SCHEDULE A.—*Articles the growth, product or manufacture of the United States to be admitted into Canada free of duty when imported from the United States, and reciprocally articles the growth, product or manufacture of Canada to be admitted into the United States free of duty when imported from Canada.*

Live animals, viz: Cattle, horses and mules, swine, sheep, lambs, and all other live animals.

Poultry, dead or alive.

Wheat, rye, oats, barley, and buckwheat; dried pease and beans, edible.

Corn, sweet corn, or maize (except into Canada for distillation).

Hay, straw, and cow pease.

Fresh vegetables, viz: Potatoes, sweet potatoes, yams, turnips, onions, cabbages, and all other vegetables in their natural state.

Fresh fruits, viz: Apples, pears, peaches, grapes, berries, and all other edible fruits in their natural state.

Dried fruits, viz: Apples, peaches, pears, and apricots, dried, desiccated or evaporated.

Dairy products, viz: Butter, cheese, and fresh milk and cream. *Provided*, That cans actually used in the transportation of milk or cream may be passed back and forth between the two countries free of duty, under such regulations as the respective Governments may prescribe.

Eggs of barnyard fowl, in the shell.

Honey.

Cotton-seed oil.

Seeds, viz: Flaxseed or linseed, cotton seed, and other oil seeds; grass seed, including timothy and clover seed; garden, field, and other seed not herein otherwise

provided for, when in packages weighing over one pound each (not including flower seeds).

Fish of all kinds, fresh, frozen, packed in ice, salted or preserved in any form, except sardines and other fish preserved in oil; and shell fish of all kinds, including oysters, lobsters and clams in any state, fresh or packed, and coverings of the foregoing.

Seal, herring, whale, and other fish oil, including sod oil.

Salt

Mineral waters, natural, not in bottles or jugs.

Timber, hewn, sided or squared otherwise than by sawing, and round timber used for spars or in building wharves.

Sawed boards, planks, deals and other lumber, not further manufactured than sawed.

Paving posts, railroad ties, and telephone, trolley, electric light and telegraph poles of cedar or other woods.

Wooden staves of all kinds, not further manufactured than listed or jointed, and stave bolts.

Pickets and palings.

Plaster rock or gypsum, crude, not ground.

Mica, unmanufactured or rough trimmed only, and mica ground or bolted.

Feldspar, crude, powdered or ground.

Asbestos not further manufactured than ground.

Fluorspar, crude, not ground.

Glycerine, crude, not purified.

Talc, ground, bolted or precipitated, naturally or artificially, not for toilet use.

Sulphate of soda, or salt cake; and soda ash.

Extracts of hemlock bark.

Carbon electrodes.

Brass in bars and rods, in coil or otherwise, not less than six feet in length, or brass in strips, sheets or plates, not polished, planished or coated.

Cream separators of every description, and parts thereof imported for repair of the foregoing.

Rolled iron or steel sheets, or plates, number fourteen gauge or thinner, galvanized or coated with zinc, tin or other metal, or not.

Crucible cast steel wire, valued at not less than six cents per pound.

Galvanized iron or steel wire, curved or not, numbers nine, twelve, and thirteen wire gauge.

Typecasting and typesetting machines and parts thereof, adapted for use in printing offices.

Barbed fencing wire of iron or steel, galvanized or not.

Coke.

Rolled round wire rods in the coil, of iron or steel, not over three-eighths of an inch in diameter, and not smaller than number six wire gauge.

Pulp of wood mechanically ground; pulp of wood, chemical, bleached or unbleached; news print paper, and other paper, and paper board, manufactured from mechanical wood pulp or from chemical wood pulp, or of which such pulp is the component material of chief value, coloured in the pulp, or not coloured, and valued at not more than four cents per pound, not including printed or decorated wall paper.

Provided, That such paper and board, valued at four cents per pound or less, and wood pulp, being the products of Canada, when imported therefrom directly into the United States, shall be admitted free of duty, on the condition precedent that no export duty, export license fee, or other export charge of any kind whatsoever (whether in the form of additional charge or license fee or otherwise) or any prohibition or restriction in any way of the exportation (whether by law, order, regulation, contractual relation, or otherwise, directly or indirectly) shall have been imposed upon such paper, board, or wood pulp, or the wood used in the manufacture of such paper, board or wood pulp, or the wood pulp used in the manufacture of such paper or board:

Provided also, That such wood pulp, paper or board, being the products of the United States, shall only be admitted free of duty into Canada from the United States when such wood pulp, paper or board, being the products of Canada, are admitted from all parts of Canada free of duty into the United States.

NOTE.—It is understood that fresh fruits to be admitted free of duty into the United States from Canada do not include lemons, oranges, limes, grapefruit, shaddocks, pomelos, or pineapples.

It is also understood that fish oil, whale oil, seal oil and fish of all kinds, being the product of fisheries carried on by the fishermen of the United States shall be admitted into Canada as the product of the United States, and similarly that fish oil, whale oil, seal oil and fish of all kinds, being the product of fisheries carried on by the fishermen of Canada, shall be admitted into the United States as the product of Canada.

SCHEDULE B.—*Articles the growth, product or manufacture of the United States to be admitted into Canada at the undermentioned rates of duty when imported from the United States; and reciprocally the same articles the growth, product or manufacture of Canada to be admitted into the United States at identical rates of duty when imported from Canada.*

Articles.	Rates of duties.
Fresh meats, viz: Beef, veal, mutton, lamb, pork, and all other fresh or refrigerated meats excepting game.....per pound..	One and one-quarter cents.
Bacon and hams, not in tins or jars.....per pound..	One and one-quarter cents.
Meats of all kinds, dried, smoked, salted, in brine, or prepared or preserved in any manner, not otherwise herein provided for, per pound.....	One and one-quarter cents.
Canned meats and canned poultry.....	Twenty per cent ad valorem.
Extract of meat, fluid or not.....	Twenty per cent ad valorem.
Lard, and compounds thereof, cottolene and cotton stearine, and animal stearine.....per pound..	One and one-quarter cents.
Tallow.....per 100 pounds..	Forty cents.
Egg yolk, egg albumen and blood albumen.....	Seven and one-half per cent ad valorem.
Fish (except shell fish) by whatever name known, packed in oil, in tin boxes or cans, including the weight of the package:	
(a) When weighing over twenty ounces and not over thirty-six ounces each.....per package..	Five cents.
(b) When weighing over twelve ounces and not over twenty ounces each.....per package..	Four cents.
(c) When weighing twelve ounces each or less.....per package..	Two cents.
(d) When weighing thirty-six ounces each or more, or when packed in oil, in bottles, jars, or kegs.....	Thirty per cent ad valorem.
Tomatoes and other vegetables, including corn, in cans or other air-tight packages, and including the weight of the package.....per pound..	One and one-quarter cents.
Wheat flour and semolina; and rye flour, per barrel of 196 pounds.....	Fifty cents.
Oatmeal and rolled oats, including the weight of paper covering.....per 100 pounds..	Fifty cents.
Corn meal.....per 100 pounds..	Twelve and one-half cents.
Barley malt.....per 100 pounds..	Forty-five cents.
Barley, pot, pearled and patent.....per pound..	One-half cent.

SCHEDULE B.—Articles the growth, product or manufacture of the United States to be admitted into Canada, etc.—Continued.

Articles.	Rates of duties.
Buckwheat flour or meal.....per pound..	One-half cent.
Split peas, dried.....per bushel of 60 pounds..	Seven and one-half cents.
Prepared cereal foods, not otherwise provided for herein.....	Seventeen and one-half per cent ad valorem.
Bran, middlings and other offals of grain used for animal food, per 100 pounds.....	Twelve and one-half cents.
Macaroni and vermicelli.....per pound..	One cent.
Biscuits, wafers and cakes, when sweetened with sugar, honey, molasses or other material.....	Twenty-five per cent ad valorem.
Biscuits, wafers, cakes and other baked articles composed in whole or in part of eggs or any kind of flour or meal when combined with chocolate, nuts, fruits or confectionery; also candied peel, candied pop-corn, candied nuts, candied fruits, sugar candy and confectionery of all kinds.....	Thirty-two and one-half per cent ad valorem.
Maple sugar and maple syrup.....per pound..	One cent.
Pickles, including pickled nuts; sauces of all kinds, and fish paste or sauce.....	Thirty-two and one-half per cent ad valorem.
Cherry juice and prune juice, or prune wine, and other fruit juices, and fruit syrup, non-alcoholic.....	Seventeen and a half per cent ad valorem.
Mineral waters and imitations of natural mineral waters, in bottles or jugs.....	Seventeen and a half per cent ad valorem.
Essential oils.....	Seven and a half per cent ad valorem.
Grape vines; gooseberry, raspberry and currant bushes.....	Seventeen and a half per cent ad valorem.
Farm wagons, and finished parts thereof.....	Twenty-two and a half per cent ad valorem.
Ploughs, tooth and disc harrows, harvesters, reapers, agricultural drills and planters, mowers, horse-rakes, cultivators; threshing machines, including windstackers, baggers, weighers, and self-feeders therefor, and finished parts thereof imported for repair of the foregoing.....	Fifteen per cent ad valorem.
Portable engines with boilers, in combination, horse powers and traction engines, for farm purposes; hay loaders, potato diggers, fodder or feed cutters, grain crushers, fanning mills, hay tedders, farm or field rollers, manure spreaders, weeders and windmills; and finished parts thereof imported for repair of the foregoing, except shafting.....	Twenty per cent ad valorem.
Grindstones of sandstone, not mounted, finished or not, per 100 pounds.....	Five cents.
Freestone, granite, sandstone, limestone, and all other monumental or building stone, except marble, brachia, and onyx, unmanufactured, or not dressed, hewn or polished.....	Twelve and a half per cent ad valorem.
Roofing slates.....per 100 square feet..	Fifty-five cents.

SCHEDULE B.—Articles the growth, product or manufacture of the United States to be admitted into Canada, etc.—Continued.

Articles.	Rates of duties.
Vitrified paving blocks, not ornamented or decorated in any manner, and paving blocks of stone.....	Seventeen and a half per cent ad valorem.
Oxide of iron, as a colour.....	Twenty-two and a half per cent ad valorem.
Asbestos further manufactured than ground; manufactures of asbestos, or articles of which asbestos is the component material of chief value, including woven fabrics wholly or in chief value of asbestos.....	Twenty-two and a half per cent ad valorem.
Printing ink.....	Seventeen and a half per cent ad valorem.
Cutlery, plated or not, viz, pocket knives, pen knives, scissors and shears, knives and forks for household purposes, and table steels.....	Twenty-seven and a half per cent ad valorem.
Bells and gongs; brass corners and rules for printers.....	Twenty-seven and a half per cent ad valorem.
Basins, urinals and other plumbing fixtures for bath rooms and lavatories; bath tubs, sinks and laundry tubs, of earthenware, stone, cement or clay, or of other material.....	Thirty-two and a half per cent ad valorem.
Brass band instruments.....	Twenty-two and a half per cent ad valorem.
Clocks, watches, time recorders, clock and watch keys, clock cases, and clock movements.....	Twenty-seven and a half per cent ad valorem.
Printers' wooden cases and cabinets for holding type.....	Twenty-seven and a half per cent ad valorem.
Wood flour.....	Twenty-two and a half per cent ad valorem.
Canoes and small boats of wood, not power boats.....	Twenty-two and a half per cent ad valorem.
Feathers, crude, not dressed, coloured or otherwise manufactured.	Twelve and a half per cent ad valorem.
Antiseptic surgical dressings, such as absorbent cotton, cotton wool, lint, lamb's wool, tow, jute, gauzes and oakum, prepared for use as surgical dressings, plain or medicated; surgical trusses, pessaries, and suspensory bandages of all kinds.....	Seventeen and a half per cent ad valorem.
Plate glass, not bevelled, in sheets or panes exceeding seven square feet each, and not exceeding twenty-five square feet each.....	Twenty-five per cent ad valorem.
Motor vehicles, other than for railways and tramways, and automobiles, and parts thereof, not including rubber tires.....	Thirty per cent ad valorem.
Iron or steel digesters for the manufacture of wood pulp.....	Twenty-seven and a half per cent ad valorem.
Musical Instrument cases, fancy cases or boxes, portfolios, satchels, reticules, card cases, purses, pocket books, fly books for artificial flies, all the foregoing composed wholly or in chief value of leather.....	Thirty per cent ad valorem.

SCHEDULE C.—Articles the growth, product, or manufacture of Canada to be admitted into the United States at the undermentioned special rates of duty when imported from Canada.

Articles.	Rates of duties.
Aluminum in crude form..... per pound..	Five cents.
Aluminum in plates, sheets, bars and rods..... per pound..	Eight cents.
Laths..... per 1,000 pieces..	Ten cents.
Shingles..... per thousand..	Thirty cents.
Sawed boards, planks, deals and other lumber:	
Planed or finished on one side..... per M feet B. M. .	Fifty cents.
Planed or finished on one side and tongued and grooved, or planed or finished on two sides..... per M feet B. M. .	Seventy-five cents.
Planed or finished on three sides, or planed and finished on two sides and tongued and grooved..... per M feet B. M. .	One dollar and twelve and a half cents.
Planed and finished on four sides..... per M feet B. M. .	One dollar and fifty cents.
And in estimating board measure under this schedule no deduction shall be made on board measure on account of planing, tonguing, and grooving.	
Iron ore, including manganiferous iron ore, and the dross or residuum from burnt pyrites..... per ton of 2,240 pounds..	Ten cents.

Peanuts, unshelled..... per pound..	A half cent.
Coal, bituminous, round and run of mine, including bituminous coal such as will not pass through a three-quarter inch screen..... per ton..	Forty-five cents.

*Reply of the Secretary of State.*WASHINGTON, *January 21, 1911.*

The Honorable W. S. FIELDING and
The Honorable WILLIAM PATERSON,
Washington.

GENTLEMEN: I have the honor to acknowledge the receipt of your communication of this date in relation to the negotiations initiated by the President several months ago for a reciprocal trade arrangement between the United States and Canada, in which you set forth and ask me to confirm your understanding of the results of our recent conferences in continuation of these negotiations.

I take great pleasure in replying that your statement of the proposed arrangement is entirely in accord with my understanding of it.

It is a matter of some regret on our part that we have been unable to adjust our differences on the subject of wood pulp, pulp wood and print paper. We recognize the difficulties to which you refer growing out of the nature of the relations between the Dominion and Provincial Governments, and for the present we must be content with the conditional arrangement which has been proposed in Schedule A attached to your letter.

I fully appreciate the importance, to which you call attention, of not permitting a too rigid customs administration to interfere with the successful operation of our agreement, if it is approved by the Congress of the United States and the Parliament of Canada, and I desire to confirm your statement of our understanding on this point. I am satisfied that the spirit evinced on both sides gives assurance that every effort will be made to secure the full measure of benefit which is contemplated in entering into this arrangement.

The assurance that you give that the Dominion Government proposes to require only a nominal fee from the fishing vessels of the United States for the privileges in Canadian waters for which heretofore a charge of \$1.50 per ton for each vessel has been required is most gratifying.

I heartily concur in your statement of the purposes inspiring the negotiations and in the views expressed by you as to the mutual benefits to be derived by both countries in the event our work is confirmed, and I take this opportunity to assure you, on behalf of the President,

of his appreciation of the cordial spirit in which you have met us in these negotiations.

I have the honor to be, Gentlemen, your obedient servant,
P. C. KNOX.

Acknowledgment of the Canadian Ministers.

WASHINGTON, D. C., *January 21st, 1911.*

DEAR MR. SECRETARY: We have received with much satisfaction your letter of this date in which you have confirmed our understanding of the arrangement which is being made between us respecting trade relations between the United States and Canada.

In bringing the negotiations to a close permit us to express our warmest appreciation of the spirit in which the whole subject has been dealt with by the President and yourself and of the unvarying courtesy which we have received in Washington from all the officials of your Government with whom we have been brought in contact.

Yours faithfully,

W. S. FIELDING.
WM. PATERSON.

The Honourable P. C. KNOX,
Secretary of State, Washington, D. C.

TABLE A.—Articles included under the reciprocal trade agreement imported into the Dominion of Canada from the United States during the fiscal year ended March 31, 1910.

[Compiled by the Bureau of Trade Relations, Department of State, from "Trade and Navigation, 1910," issued by the Canadian Department of Customs.]
