BUILDING PERMITS IN THE PRINCIPAL CITIES OF THE UNITED STATES IN 1923¹

INTRODUCTION

This is the fourth annual report concerning building permits issued in the principal cities of the United States which has been published by the Bureau of Labor Statistics.

Immediately after January 1 the bureau mailed a questionnaire to the building inspectors of the 287 cities having a population of 25,000 or over. A large majority of these cities filled out and returned the questionnaires. To a number, however, it was necessary to send agents of the bureau who compiled the data either from records of permits issued or from the original applications for permits. The number of cities to which it was necessary to send agents was smaller this year than in any of the preceding years. Reports were finally obtained from 269 cities.

No report was obtained from 18 cities having a population of 25,000 or over. Most of these cities either do not have a building code or the one on the statute books did not require that a record of the number and cost of the different kinds of buildings be kept, as specified on the bureau's schedule. A few smaller cities are not included because they did not respond and it was impracticable to send an agent for the data. Reports were received for the first time from Elmira and Kingston, N. Y., and Lewiston, Me., new building codes having recently been adopted in these cities.

Table 1 shows the total number of new buildings and the estimated cost of each of the different kinds for which permits were issued in the 269 cities from which schedules were received for the year 1923, the per cent that each kind forms of the total number, the per cent that the estimated cost of each kind forms of the total, and the average per building.

¹ Earlier figures regarding building permits in the United States may be found in Bulletin Nos. 295, 318 and 347, and the Monthly Labor Review for July, 1921; April and October, 1922; July and October, 1923, and June, 1924. The two October Reviews contain reports for the first half of each year for cities of 100,000 or over.

TABLE 1.—BUILDING PERMITS ISSUED IN 269 CITIES IN 1923, BY KIND OF BUILDING

Kind of building	Buildings for which permits were granted				
	Number	Per cent of grand total	Estimated cost		
			Amount	Per cent of grand total	Average per building
RESIDENTIAL					
One-family dwellings.....	211,235	38.1	\$881,569,529	28.4	\$4,173
Two-family dwellings.....	45,067	8.1	362,652,290	11.7	8,047
One-family and two-family dwellings with stores combined.....	4,260	.8	42,400,120	1.4	9,953
Multi-family apartments.....	12,925	2.3	551,346,257	17.8	42,657

Stores and warehouses.....	14,551	2.6	192,912,895	6.2	13,258
All others.....	1,127	.2	7,533,054	.2	6,684
Total	279,720	50.4	1,082,147,416	34.9	3,869
Grand total.....	554,884	100.0	3,099,694,905	100.0	5,586

¹ Less than one-tenth of 1 per cent.

Table 1 shows that 49.6 per cent of all the new buildings erected in cities having a population of 25,000 or over were residential buildings, and that 65.1 per cent of the money spent in the erection of new buildings was for this class of structure.

This is the first year since the bureau has been collecting these data that more permits have been issued for nonresidential buildings than for residential buildings. This is largely due to the increase in the number of private garages erected. It will be seen that 221,825 permits were granted for private garages, being 40 per cent of all the new buildings projected. Next in number are the 211,235 permits for one-family houses. In 1920, 1921, and 1922 more permits were issued for one-family houses than for any other class of buildings. While the number of permits for nonresidential buildings passed that for residential buildings, the estimated cost of the latter class was considerably in excess of that of the former. The table shows that \$2,017,547,489, or 65.1 per cent of the total estimated cost of all new construction, was spent for residential buildings compared with \$1,082,147,416, or 34.9 per cent of the total cost, for nonresidential buildings.

Thus it will be seen that the primary object of builders the past year had been to relieve the housing shortage which undoubtedly still exists in many cities of the United States.

Quite a large sum of money was spent in the erection of buildings paid for by cities, counties, or State governments, practically all of the funds for the erection of buildings shown in general Table A under the headings of Institutions, Public buildings, Public works and utilities, and Schools, Libraries, etc., being raised from public sources.

The largest amount of money estimated to have been spent for any class of nonresidential buildings was for stores and warehouses, the estimated cost of these mercantile buildings being \$192,912,895.

The last column in the table shows the average cost per building of each of the different classes of buildings for which permits were issued.

To the average reader the most interesting of these figures will be those for one-family houses and those for two-family houses. It will be noticed that the average cost of the former was \$4,173 and of the latter \$8,047. This is not a very great difference in the cost per family.

The average amount of money spent for the erection per hotel was \$447,928, costing more per building than any other class of structure.

Schools and institutions were other groups where the average cost was high, that of the former being \$160,229 and of the latter \$152,944.

It must be borne in mind that the costs given in this and other tables in this bulletin are estimated costs taken from the application for a permit to build. The estimates are made by the owner or builder when he applies for his permit and can not be regarded as absolutely accurate. Often a change in the plans after the permit has been issued necessitates a change in the amount of money spent in the erection of the building. Again a man may give an estimate which he knows to be too low because he thinks by doing so he can keep down the assessed value of his property. Another reason for low estimates in some cities is that permits are charged for according to the cost of the building. On the other hand it is charged that some builders state the valuation above the correct figure for its effect on a prospective buyer.

The total estimated cost of all classes of new buildings for which permits were issued in the 269 cities was \$3,099,694,905, the largest amount ever spent in any one year as far as any known records show. As has been stated before, the number of cities from which reports were received differed in the different years. Information was received, however, from 258 identical cities for each of the three years, 1921, 1922, and 1923.

Table 2 shows the number and per cent of families provided for by each of the different kinds of dwellings in the 258 cities from which reports were received each of these years.

TABLE 2.—NUMBER AND PER CENT OF FAMILIES TO BE HOUSED IN DWELLINGS FOR WHICH PERMITS WERE ISSUED IN 258 IDENTICAL CITIES IN 1921, 1922, AND 1923

Kind of dwelling	Buildings for which permits were issued			Families provided for					
				Number			Per cent		
	1921	1922	1923	1921	1922	1923	1921	1922	1923
One-family dwellings.....	131, 148	179, 522	207, 971	131, 148	179, 522	207, 971	58.3	47.6	45.8
Two-family dwellings.....	16, 917	36, 229	44, 968	33, 834	72, 458	89, 836	15.0	19.2	19.8
One-family and two-family dwellings with stores combined.....	3, 444	4, 984	4, 204	5, 262	7, 808	6, 598	2.3	2.1	1.5
Multi-family apartments.....	4, 901	9, 564	12, 830	52, 000	110, 609	139, 211	23.1	29.3	30.7
Multi-family apartments with stores combined.....	570	1, 074	1, 258	2, 894	7, 107	10, 576	1.3	1.9	2.3
Total.....	156, 980	231, 373	271, 231	225, 138	377, 504	454, 192	100.0	100.0	100.0

The most important fact brought out by Table 2 is the large increase in the number of families provided for in 1923 as compared with either 1922 or 1921, there being 454,192 families provided with new housing accommodations in the 258 cities in 1923, contrasted with 225,138 in 1921 and 377,504 in 1922.

An illustration of how the American home is changing is shown by the fact that 58.3 per cent of the families provided for were housed in one-family dwellings in 1921. In 1922 this percentage shrank to 47.6 per cent and in 1923 to 45.8 per cent. On the other hand, the per cent of families provided for in apartment houses increased from 23.1 per cent in 1921 to 29.3 per cent in 1922 and 30.7 per cent in 1923. In other words, for every three families who found new living quarters in one-family houses two were housed in apartments. The widespread effect of this change is more apparent when one considers that this report includes cities with a population as small as 25,000. In many of the smaller of these cities, which had no apartment houses at all before the war, this class of dwelling is now being built. The percentage of two-family houses has also increased in each of the last two years.

There is a movement now, however, in many of the larger cities which partly offsets this trend toward dwellings designed for more than one family—that is, the large exodus to the suburbs. The high cost of real estate in the cities, the more prevalent use of automobiles, extended street-car lines, and better suburban schedules of railroads have caused many people to build at a considerable distance from their work, quite often outside the city limits. Undoubtedly the large majority of suburban homes are of the one-family type, but as most of them are outside the city limits they do not show in our report.

Table 3 shows the number and cost of each of the different kinds of buildings for the 258 cities from which reports were received in each of the three years—1921, 1922, and 1923—and the percentage of increase or decrease in the number and in the cost in 1923 as compared with 1921 and 1922.

TABLE 3.—NUMBER AND COST OF BUILDINGS FOR WHICH PERMITS WERE ISSUED IN 258 IDENTICAL CITIES IN 1921, 1922, AND 1923, BY KIND OF BUILDING

Schools and libraries.....	777	90, 214, 921	931	145, 463, 654	960	153, 669, 381	+23.6	+70.3	+3.1	+5.6
Sheds.....	27, 006	8, 887, 625	24, 123	7, 387, 906	22, 627	7, 970, 194	-16.2	-10.3	-6.2	+7.9
Stables and barns.....	10, 195	5, 428, 062	1, 364	1, 537, 650	1, 053	1, 294, 077	-89.7	-76.2	-22.8	-15.8
Stores and warehouses.....	11, 369	100, 727, 549	15, 069	168, 913, 212	14, 230	190, 930, 687	+25.2	+89.6	-5.6	+13.0
All others.....	5, 366	12, 872, 101	1, 648	7, 721, 841	1, 125	7, 480, 054	-79.0	-41.9	+31.7	-3.1
Total.....	184, 334	635, 775, 199	215, 768	876, 276, 707	275, 640	1, 070, 596, 718	+49.5	+68.4	+27.7	+22.2
Grand tota.....	341, 568	1, 573, 127, 938	447, 507	2, 488, 629, 628	547, 267	3, 071, 583, 618	+60.2	+95.3	+22.3	+23.4

The above figures show that there was an increase of 60.2 per cent in the number of permits issued for all classes of new buildings in the 258 cities in 1923 over the number in 1921 and an increase of 22.3 per cent over that of 1922. There was an increase of 95.3 per cent in the estimated cost of these buildings as compared with 1921 and of 23.4 per cent as compared with 1922.

For residential buildings the number increased 72.8 per cent in 1923 as compared with 1921 and 17.2 per cent as compared with 1922, while the estimated amount expended increased 113.5 per cent during the former period and 24.1 per cent during the latter period.

The number of nonresidential buildings increased 49.5 per cent from 1921 to 1923, and 27.7 per cent from 1922 to 1923. The estimated cost of nonresidential buildings shows an increase of 68.4 per cent in comparing 1923 with 1921 and 22.2 per cent in comparing 1922 with 1923.

EXPLANATION OF GENERAL TABLE

General Table A, pages 12 to 127, shows detailed information concerning building operations in specified cities in 1921, 1922, and 1923. This table is divided into three parts. Part 1 relates to the new residential buildings, giving the number and cost of each kind of dwelling, the number of families provided for, and the ratio of families provided for to each 10,000 of population.

It will be noted that the ratio of families provided for is based on both the population according to the 1920 census and on the estimated population for the specified year. The ratio was worked on the different bases because it was thought that many people would use the 1920 figures for each specified year since they are the latest enumerated population figures. The population figures given for 1921, 1922, and 1923 are estimates but they probably furnish a more nearly exact base for these years than the 1920 census figures furnish.

The estimates of population were made by the Census Bureau of the United States Department of Commerce. It will be noticed that for some cities no estimate was made. To obtain a total estimated population from which to work out the ratio for the entire country for the specified year, the actual population according to the 1920 census was of necessity used for these cities.

The table shows complete reports from 258 cities in 1921. These cities had a population according to the 1920 census of 36,643,576 and homes were provided in new buildings for 225,138 families, this being at the rate of 61.4 per 10,000 of population. In 1922 information was received from 266 cities having a population of 37,054,776. These cities provided new family accommodations for 380,163 families, the ratio being 102.6 to each 10,000 inhabitants. By 1923 this ratio had risen to 123.7 to each 10,000 of population in the 269 cities reporting for that year, there being 459,471 families housed in that year in these cities, which had a population of 37,158,648 according to the 1920 census.

Using instead the estimated population as published by the Census Bureau it is found that the ratio of families to each 10,000 of population was 59.7 in 1921, with 97.8 in 1922, and 115.3 in 1923.

Long Beach, Calif., continues to have the fastest rate of growth of the cities or over 25,000 population in the United States, at least as far as new homes are concerned. This city, having a population of 55,593 according to the 1920 census, has built in the last three years accommodations for over 18,000 families. In 1923 alone, 7,185 families were provided for in new buildings. This is at the remarkable ratio of 1,292.4 to each 10,000 of the city's population according to the 1920 census, or 1,038.1 according to the estimated population for 1923.

Long Beach is the only city where homes were provided for at the rate of 1 for each 10 of the city's population, but its large next-door neighbor, Los Angeles, made almost as remarkable a record. This fast-growing city provided for 43,842 families in 1923, or at the rate of 760.3 families to each 10,000 of population, according to the 1920 census, and at the rate of 657.4, according to the population as estimated for 1923.

Miami, Fla., and Irvington, N. J., were other cities that stood out as great builders of homes, the former city providing accommodations for 2,338 families in 1923 and the latter 1,313. In Miami this meant that for each 10,000 people in the city, according to the 1920 census, 790.6 families were provided with new quarters, or 611.1 families for each 10,000 persons in the city, according to the estimated population for 1923. In Irvington 515.3 families were provided for to each 10,000 of the city's inhabitants, according to the 1920 census, or 432.1, according to the population as estimated for the year 1923.

In New York City the ratio of families provided for to each 10,000 of population in 1923, according to the estimated population for that year, was 178.3. In 1921 the ratio based on the estimated population was 89.3, or only a little over half that of 1923. These figures apply only to buildings erected within the city limits. Undoubtedly the percentage increase would be even larger if records were obtained for all the residential buildings erected in the metropolitan district.

Chicago, too, provided for a greater percentage of families in 1923 than in preceding years. The ratio of families provided for to each 10,000 of the city's population was over 100 for the first time since the records have been compiled, being 124.1, based on the census of 1920, or 116.2 based on the estimated population for 1923.

A study of the table will show that the crest of residential building has been reached in some of the cities as a slight falling off is noted in a few cities, both large and small, in the number of families provided for in 1923, as compared with 1922.

Part 2 of General Table A gives the number and cost of new non-residential buildings for each city from which reports were received.

Part 3 shows the number and cost of additions, alterations, and repairs to old buildings, the number and cost of installations, and the grand total of all buildings both new and old.

The bureau attempted to classify additions, alterations, and repairs under headings of repairs, etc., for housekeeping dwellings, non-housekeeping dwellings, and nonresidential buildings. Many of the cities which reported by mail, however, grouped them. In 1921 permits were issued for 226,602 additions, alterations, and repairs in 258 cities, and \$273,439,727 was expended. In 1922 in the 266 cities reporting for that year 247,929 such permits were granted for \$286,723,251, while the 269 cities reporting in 1923 showed 272,514 permits and \$340,215,978 as the amount expended.

The number of installation permits and the construction cost was obtained whenever issued by the building inspector. In a number of cities, however, these permits were issued by offices other than that of the building inspector.

In 1923 the 269 cities covered in this report issued a grand total of 910,164 permits for new construction, repairs, and installation, \$3,471,366,667 being the estimated cost thereof.

Previous to the year 1920 the Geological Survey of the United States Department of the Interior collected and published data concerning the number and cost of buildings. The figures shown below are the total amounts of money spent in 130 identical cities from which information was obtained during the years 1914 to 1923, inclusive. From 1914 to 1919, inclusive, the figures are taken from the publications of the Geological Survey; for 1920, 1921, 1922, and 1923 from the records of the Bureau of Labor Statistics:

1914.....	\$748, 209, 763	1919.....	\$1, 258, 875, 108
1915.....	776, 228, 606	1920.....	1, 342, 630, 686
1916.....	980, 323, 685	1921.....	1, 602, 232, 041
1917.....	649, 961, 875	1922.....	2, 427, 734, 079
1918.....	401, 565, 104	1923.....	2, 959, 051, 393

These figures, giving the cost of buildings as shown by building permits, can not be interpreted to indicate the relative physical amount of building construction, because the costs of both materials and labor used in such construction have varied from year to year.

The following information taken from the Monthly Labor Review for January, 1924, shows in comparison the changes in the cost of building material, building wage rates, and the cost of living, from 1913 through the war period and down to 1923. The information is presented in the form of index numbers (percentages) in which 1913 is the base year.

Wholesale prices of building material are available for each month of the period. Union wage scales are available only as of May each year. Cost-of-living figures are available as of December each year down to 1918 and later semiannually or quarterly. The table following is abridged and contains index numbers for yearly averages or for certain months.

The group of all "building materials" includes all the major articles entering into building construction. In addition to the index numbers for building material as a whole, separate index numbers are given for two of the principal articles in the group, lumber and common brick.

Union wage rates obtain so generally in the building trades that such union rates are here accepted as representative of building wages. A composite figure is given for all building trades and for two of the principal trades included therein; namely, bricklayers and carpenters.

The cost-of-living figures include family expenditures for food, clothing, housing, fuel and light, and miscellaneous items.

Quoting from monthly figures, only in part appearing in the table, wholesale prices of building material went as low as an index of 88 in November and December, 1914, and January, 1915. From that time on the trend was upward with slight recession in the fall of 1917 and in the winter of 1918-19, until in April, 1920, prices reached an index of 300. In other words, the prices in that month were, on an average, three times the prices of 1913. Lumber went higher than the group as a whole, reaching an index of 373 in March, 1920. Then came the rapid slump in prices, with building material as a whole falling to 156 in August and September, 1921. Radical but not such meteoric changes occurred in wage rates and in cost of living. Figures for every month are not available, but it is believed that the index numbers shown in the table fairly represent the changes in wages and cost of living throughout the period.

Building has been active in recent years to catch up with the loss of building construction during the war period, and there has been a strong demand and at times keen competition for building labor. Building wage rates as a whole in May, 1921, reached a rate twice that of 1913. There was a slight recession in 1922 but in May, 1923, building wages as a whole reached an index of 207 as compared with 100 in 1913, making the highest level on record. It will be observed that neither bricklayers' nor carpenters' wages got to so high an index in 1923 as the general level of all building trades. Certain other building trades advanced above the general level for all trades combined. Wages of painters, stonemasons, building laborers, and helpers for several of the different trades, had advanced beyond the level of the group as a whole, steamfitters' helpers reaching an index of 240 in 1923. Cost of living reached its peak in 1920, the index for June of that year being 217.

Tracing the movement through the period 1913 down to and including 1920, it is seen that wages did not keep up with cost of living nor with building material after 1915. In the three years since 1920 wages have held above material prices and cost of living, and building mechanics have had some chance to make up for the adverse conditions in the earlier years.

In June, 1923, building material wholesale prices stood at an index of 194, with lumber and brick, however, at 212 and 216, respectively, the difference between the index numbers for these two items and for the group as a whole being due to the greater decrease in the price of other items within the group. In the same month cost of living stood at an index of 170, and at practically the same date, May, 1923, building wages had an index of 207, with bricklayers and carpenters at 191 and 204, respectively.

INDEX NUMBERS OF WHOLESALE PRICES OF BUILDING MATERIALS, OF UNION
WAGE RATES PER HOUR IN THE BUILDING TRADES, AND OF COST OF LIVING,
1913 TO 1923

SERIES OF BULLETINS PUBLISHED BY THE BUREAU OF LABOR STATISTICS

*[The publication of the annual and special reports and of the bimonthly bulletin was discontinued in July, 1912, and since that time a bulletin has been published at irregular intervals. Each number contains matter devoted to one of a series of general subjects. These bulletins are numbered consecutively, beginning with No. 101, and up to No. 236 they also carry consecutive numbers under each series. Beginning with No. 237 the serial numbering has been discontinued. A list of the series is given below. Under each is grouped all the bulletins which contain material relating to the subject matter of that series. A list of the reports and bulletins of the Bureau issued prior to July 1, 1912, will be furnished on application. The bulletins marked thus * are out of print.]*

Wholesale Prices.

- *Bul. 114. Wholesale prices, 1890 to 1912.
- Bul. 149. Wholesale prices, 1890 to 1913.
- *Bul. 173. Index numbers of wholesale prices in the United States and foreign countries.
- *Bul. 181. Wholesale prices, 1890 to 1914.
- *Bul. 200. Wholesale prices, 1890 to 1915.
- Bul. 226. Wholesale prices, 1890 to 1916.
- Bul. 269. Wholesale prices, 1890 to 1919.
- Bul. 284. Index numbers of wholesale prices in the United States and foreign countries. [Revision of Bulletin 173.]
- Bul. 296. Wholesale prices, 1890 to 1920.
- Bul. 320. Wholesale prices, 1890 to 1921.
- Bul. 335. Wholesale prices, 1890 to December, 1922.
- Bul. 367. Wholesale prices, 1890 to 1923.

Retail Prices and Cost of Living.

- *Bul. 105. Retail prices, 1890 to 1911: Part I.
Retail prices, 1890 to 1911: Part II—General tables.
- *Bul. 106. Retail prices, 1890 to June, 1912: Part I.
Retail prices, 1890 to June, 1912: Part II—General tables.
- *Bul. 108. Retail prices, 1890 to August, 1912.
- *Bul. 110. Retail prices, 1890 to October, 1912.
- *Bul. 113. Retail prices, 1890 to December, 1912.
- *Bul. 115. Retail prices, 1890 to February, 1913.
- *Bul. 121. Sugar prices, from refiner to consumer.
- Bul. 125. Retail prices, 1890 to April, 1913.
- *Bul. 130. Wheat and flour prices, from farmer to consumer.
- Bul. 132. Retail prices, 1890 to June, 1913.
- Bul. 136. Retail prices, 1890 to August, 1913.
- *Bul. 138. Retail prices, 1890 to October, 1913.
- *Bul. 140. Retail prices, 1890 to December, 1913.
- Bul. 156. Retail prices, 1907 to December, 1914.
- Bul. 164. Butter prices, from producer to consumer.
- Bul. 170. Foreign food prices as affected by the war.
- Bul. 184. Retail prices, 1907 to June, 1915.
- Bul. 197. Retail prices, 1907 to December, 1915.
- Bul. 228. Retail prices, 1907 to December, 1916.
- Bul. 270. Retail prices, 1913 to 1919.
- Bul. 300. Retail prices, 1913 to 1920.
- Bul. 315. Retail prices, 1913 to 1921.
- Bul. 334. Retail prices, 1913 to 1922.
- Bul. 357. Cost of living in the United States.
- Bul. 366. Retail prices, 1913 to December, 1923.

Wages and Hours of Labor.

- Bul. 116. Hours, earnings, and duration of employment of wage-earning women in selected industries in the District of Columbia.
- *Bul. 118. Ten-hour maximum working-day for women and young persons.
- Bul. 119. Working hours of women in the pea canneries of Wisconsin.
- *Bul. 128. Wages and hours of labor in the cotton, woolen, and silk industries, 1890 to 1912.
- *Bul. 129. Wages and hours of labor in the lumber, millwork, and furniture industries, 1890 to 1912.
- *Bul. 131. Union scale of wages and hours of labor, 1907 to 1912.
- *Bul. 134. Wages and hours of labor in the boot and shoe and hosiery and knit goods industries, 1890 to 1912.
- *Bul. 135. Wages and hours of labor in the cigar and clothing industries, 1911 and 1912.
- Bul. 137. Wages and hours of labor in the building and repairing of steam railroad cars, 1890 to 1912.
- Bul. 143. Union scale of wages and hours of labor, May 15, 1913.
- Bul. 146. Wages and regularity of employment and standardization of piece rates in the dress and waist industry of New York City.
- *Bul. 147. Wages and regularity of employment in the cloak, suit, and skirt industry.
- *Bul. 150. Wages and hours of labor in the cotton, woolen, and silk industries, 1907 to 1913.
- *Bul. 151. Wages and hours of labor in the iron and steel industry in the United States, 1907 to 1912.
- *Bul. 153. Wages and hours of labor in the lumber, millwork, and furniture industries, 1907 to 1913.
- *Bul. 154. Wages and hours of labor in the boot and shoe and hosiery and underwear industries, 1907 to 1913.
- Bul. 160. Hours, earnings, and conditions of labor of women in Indiana mercantile establishments and garment factories.
- Bul. 161. Wages and hours of labor in the clothing and cigar industries, 1911 to 1913.
- Bul. 163. Wages and hours of labor in the building and repairing of steam railroad cars, 1907 to 1913.
- Bul. 168. Wages and hours of labor in the iron and steel industry, 1907 to 1913.
- *Bul. 171. Union scale of wages and hours of labor, May 1, 1914.
- Bul. 177. Wages and hours of labor in the hosiery and underwear industry, 1907 to 1914.
- Bul. 178. Wages and hours of labor in the boot and shoe industry, 1907 to 1914.
- Bul. 187. Wages and hours of labor in the men's clothing industry, 1911 to 1914.
- *Bul. 190. Wages and hours of labor in the cotton, woolen, and silk industries, 1907 to 1914.
- *Bul. 194. Union scale of wages and hours of labor, May 1, 1915.
- Bul. 204. Street railway employment in the United States.

Wages and Hours of Labor—Concluded.

- Bul. 214. Union scale of wages and hours of labor, May 15, 1916.
- Bul. 218. Wages and hours of labor in the iron and steel industry, 1907 to 1915.
- Bul. 221. Hours, fatigue, and health in British munition factories.
- Bul. 225. Wages and hours of labor in the lumber, millwork, and furniture industries, 1915.
- Bul. 232. Wages and hours of labor in the boot and shoe industry, 1907 to 1916.
- Bul. 238. Wages and hours of labor in woolen and worsted goods manufacturing, 1916.
- Bul. 239. Wages and hours of labor in cotton goods manufacturing and finishing, 1916.
- Bul. 245. Union scale of wages and hours of labor, May 15, 1917.
- Bul. 252. Wages and hours of labor in the slaughtering and meat-packing industry, 1917.
- Bul. 259. Union scale of wages and hours of labor, May 15, 1918.
- Bul. 260. Wages and hours of labor in the boot and shoe industry, 1907 to 1918.
- Bul. 261. Wages and hours of labor in woolen and worsted goods manufacturing, 1918.
- Bul. 262. Wages and hours of labor in cotton goods manufacturing and finishing, 1918.
- Bul. 265. Industrial survey in selected industries in the United States, 1919. Preliminary report.
- Bul. 274. Union scale of wages and hours of labor, May 15, 1919.
- Bul. 278. Wages and hours of labor in the boot and shoe industry, 1907 to 1920.
- Bul. 279. Hours and earnings in anthracite and bituminous coal mining.
- Bul. 286. Union scale of wages and hours of labor, May 15, 1920.
- Bul. 288. Wages and hours of labor in cotton goods manufacturing, 1920.
- Bul. 289. Wages and hours of labor in woolen and worsted goods manufacturing, 1920.
- Bul. 294. Wages and hours of labor in the slaughtering and meat-packing industry in 1921.
- Bul. 297. Wages and hours of labor in the petroleum industry.
- Bul. 302. Union scale of wages and hours of labor, May 15, 1921.
- Bul. 305. Wages and hours of labor in the iron and steel industry, 1907 to 1920.
- Bul. 316. Hours and earnings in anthracite and bituminous coal mining—anthracite, January, 1922; bituminous, winter of 1921-22.
- Bul. 317. Wages and hours of labor in lumber manufacturing, 1921.
- Bul. 324. Wages and hours of labor in the boot and shoe industry, 1907 to 1922.
- Bul. 325. Union scale of wages and hours of labor, May 15, 1922.
- Bul. 327. Wages and hours of labor in woolen and worsted goods manufacturing, 1922.
- Bul. 328. Wages and hours of labor in hosiery and underwear industry, 1922.
- Bul. 329. Wages and hours of labor in the men's clothing industry, 1922.
- Bul. 345. Wages and hours of labor in cotton goods manufacturing, 1922.
- Bul. 348. Wages and hours of labor in the automobile industry, 1922.
- Bul. 353. Wages and hours of labor in the iron and steel industry, 1907 to 1922.
- Bul. 354. Union scale of wages and hours of labor, May 15, 1923.
- Bul. 356. Labor productivity in the common-brick industry, 1922-23.
- Bul. 358. Wages and hours of labor in the automobile-tire industry, 1923.
- Bul. 360. Time and labor costs in manufacturing 100 pairs of shoes.
- Bul. 362. Wages and hours of labor in foundries and machine shops, 1923.
- Bul. 363. Wages and hours of labor in lumber manufacturing, 1923.
- Bul. 365. Wages and hours of labor in the paper and pulp industry, 1923.

Employment and Unemployment.

- *Bul. 109. Statistics of unemployment and the work of employment offices.
- Bul. 116. Hours, earnings, and duration of employment of wage-earning women in selected industries in the District of Columbia.
- Bul. 172. Unemployment in New York City, N. Y.
- *Bul. 182. Unemployment among women in department and other retail stores of Boston, Mass.
- *Bul. 183. Regularity of employment in the women's ready-to-wear garment industries.
- Bul. 192. Proceedings of the American Association of Public Employment Offices.
- *Bul. 195. Unemployment in the United States.
- Bul. 196. Proceedings of the Employment Managers' Conference held at Minneapolis, Minn., January, 1916.
- Bul. 202. Proceedings of the conference of Employment Managers' Association of Boston, Mass., held May 10, 1916.
- Bul. 206. The British system of labor exchanges.
- Bul. 220. Proceedings of the Fourth Annual Meeting of the American Association of Public Employment Offices, Buffalo, N. Y., July 20 and 21, 1916.
- Bul. 223. Employment of women and juveniles in Great Britain during the war.
- *Bul. 227. Proceedings of the Employment Managers' Conference, Philadelphia, Pa., April 2 and 3, 1917.
- Bul. 235. Employment system of the Lake Carriers' Association.
- Bul. 241. Public employment offices in the United States.
- Bul. 247. Proceedings of Employment Managers' Conference, Rochester, N. Y., May 9-11, 1918.
- Bul. 310. Industrial unemployment: A statistical study of its extent and causes.
- Bul. 311. Proceedings of the Ninth Annual Meeting of the International Association of Public Employment Services, Buffalo, N. Y., September 7-9, 1921.
- Bul. 337. Proceedings of the Tenth Annual Meeting of the International Association of Public Employment Services, Washington, D. C., September 11-13, 1922.
- Bul. 355. Proceedings of the Eleventh Annual Meeting of the International Association of Public Employment Services, September 4-7, 1923.

Women in Industry.

- Bul. 116. Hours, earnings, and duration of employment of wage-earning women in selected industries in the District of Columbia.
- *Bul. 117. Prohibition of night work of young persons.
- *Bul. 118. Ten-hour maximum working-day for women and young persons.
- Bul. 119. Working hours of women in the pea canneries of Wisconsin.
- *Bul. 122. Employment of women in power laundries in Milwaukee.
- Bul. 160. Hours, earnings, and conditions of labor of women in Indiana mercantile establishments and garment factories.
- *Bul. 167. Minimum-wage legislation in the United States and foreign countries.
- *Bul. 175. Summary of the report on condition of woman and child wage earners in the United States.
- *Bul. 176. Effect of minimum-wage determinations in Oregon.
- *Bul. 180. The boot and shoe industry in Massachusetts as a vocation for women.
- Bul. 182. Unemployment among women in department and other retail stores of Boston, Mass.
- Bul. 193. Dressmaking as a trade for women in Massachusetts.
- Bul. 215. Industrial experience of trade-school girls in Massachusetts.
- Bul. 217. Effect of workmen's compensation laws in diminishing the necessity of industrial employment of women and children.
- Bul. 223. Employment of women and juveniles in Great Britain during the war.
- Bul. 253. Women in the lead industries.

Workmen's Insurance and Compensation (including laws relating thereto).

- Bul. 101. Care of tuberculous wage earners in Germany.
- Bul. 102. British National Insurance Act, 1911.
- Bul. 103. Sickness and accident insurance law of Switzerland.
- Bul. 107. Law relating to insurance of salaried employees in Germany.
- *Bul. 126. Workmen's compensation laws of the United States and foreign countries.
- *Bul. 155. Compensation for accidents to employees of the United States.
- *Bul. 185. Compensation legislation of 1914 and 1915.
- Bul. 203. Workmen's compensation laws of the United States and foreign countries.
- Bul. 210. Proceedings of the Third Annual Meeting of the International Association of Industrial Accident Boards and Commissions.
- Bul. 212. Proceedings of the conference on social insurance called by the International Association of Industrial Accident Boards and Commissions.
- Bul. 217. Effect of workmen's compensation laws in diminishing the necessity of industrial employment of women and children.
- Bul. 240. Comparison of workmen's compensation laws of the United States.
- Bul. 243. Workmen's compensation legislation in the United States and foreign countries.
- Bul. 248. Proceedings of the Fourth Annual Meeting of the International Association of Industrial Accident Boards and Commissions.
- Bul. 264. Proceedings of the Fifth Annual Meeting of the International Association of Industrial Accident Boards and Commissions.
- Bul. 272. Workmen's compensation legislation of the United States and Canada, 1919.
- *Bul. 273. Proceedings of the Sixth Annual Meeting of the International Association of Industrial Accident Boards and Commissions.
- Bul. 275. Comparison of workmen's compensation laws of the United States and Canada.
- Bul. 281. Proceedings of the Seventh Annual Meeting of the International Association of Industrial Accident Boards and Commissions.
- Bul. 301. Comparison of workmen's compensation insurance and administration.
- Bul. 304. Proceedings of the Eighth Annual Meeting of the International Association of Industrial Accident Boards and Commissions.
- Bul. 312. National Health Insurance in Great Britain, 1911 to 1920.
- Bul. 332. Workmen's compensation legislation of United States and Canada, 1920 to 1922.
- Bul. 333. Proceedings of the Ninth Annual Meeting of the International Association of Industrial Accident Boards and Commissions.
- Bul. 359. Proceedings of the Tenth Annual Meeting of the International Association of Industrial Accident Boards and Commissions.

Industrial Accidents and Hygiene.

- Bul. 104. Lead poisoning in potteries, tile works, and porcelain enameled sanitary ware factories.
- Bul. 120. Hygiene of the painters' trade.
- *Bul. 127. Dangers to workers from dust and fumes, and methods of protection.
- Bul. 141. Lead poisoning in the smelting and refining of lead.
- *Bul. 157. Industrial accident statistics.
- Bul. 165. Lead poisoning in the manufacture of storage batteries.
- *Bul. 179. Industrial poisons used in the rubber industry.
- Bul. 188. Report of British departmental committee on the danger in the use of lead in the painting of buildings.
- *Bul. 201. Report of committee on statistics and compensation insurance cost of the International Association of Industrial Accident Boards and Commissions. [Limited edition.]
- Bul. 205. Anthrax as an occupational disease.
- Bul. 207. Causes of death by occupation.
- Bul. 209. Hygiene of the printing trades.
- *Bul. 216. Accidents and accident prevention in machine building.
- Bul. 219. Industrial poisons used or produced in the manufacture of explosives.
- Bul. 221. Hours, fatigue, and health in British munition factories.
- Bul. 230. Industrial efficiency and fatigue in British munition factories.
- Bul. 231. Mortality from respiratory diseases in dusty trades.
- *Bul. 234. Safety movement in the iron and steel industry, 1907 to 1917.
- Bul. 236. Effect of the air hammer on the hands of stonecutters.
- Bul. 251. Preventable death in the cotton manufacturing industry.
- Bul. 253. Women in the lead industries.
- Bul. 256. Accidents and accident prevention in machine building. [Revision of Bul. 216.]
- Bul. 267. Anthrax as an occupational disease. [Revised.]
- Bul. 276. Standardization of industrial accident statistics.
- Bul. 280. Industrial poisoning in making coal-tar dyes and dye intermediates.
- Bul. 291. Carbon monoxide poisoning.
- Bul. 293. The problem of dust phthisis in the granite-stone industry.
- Bul. 298. Causes and prevention of accidents in the iron and steel industry, 1910 to 1919.
- Bul. 306. Occupation hazards and diagnostic signs: A guide to impairment to be looked for in hazardous occupations.
- Bul. 339. Statistics of industrial accidents in the United States.

Conciliation and Arbitration (including strikes and lockouts).

- *Bul. 124. Conciliation and arbitration in the building trades of Greater New York.
- *Bul. 133. Report of the industrial council of the British Board of Trade on its inquiry into industrial agreements.
- Bul. 139. Michigan copper district strike.
- Bul. 144. Industrial court of the cloak, suit, and skirt industry of New York City.
- Bul. 145. Conciliation, arbitration, and sanitation in the dress and waist industry of New York City.
- Bul. 191. Collective bargaining in the anthracite coal industry.
- *Bul. 198. Collective agreements in the men's clothing industry.
- Bul. 233. Operation of the Industrial Disputes Investigation Act of Canada.
- Bul. 303. Use of Federal power in settlement of railway labor disputes.
- Bul. 341. Trade agreement in the silk-ribbon industry of New York City.

Labor Laws of the United States (including decisions of courts relating to labor).

- *Bul. 111. Labor legislation of 1912.
- *Bul. 112. Decisions of courts and opinions affecting labor, 1912.
- *Bul. 148. Labor laws of the United States, with decisions of courts relating thereto.
- *Bul. 152. Decisions of courts and opinions affecting labor, 1913.
- *Bul. 166. Labor legislation of 1914.
- *Bul. 169. Decisions of courts affecting labor, 1914.
- *Bul. 186. Labor legislation of 1915.
- *Bul. 189. Decisions of courts affecting labor, 1915.

Labor Laws of the United States—Concluded.

- Bul. 211. Labor laws and their administration in the Pacific States.
- *Bul. 213. Labor legislation of 1916.
- Bul. 224. Decisions of courts affecting labor, 1916.
- Bul. 229. Wage-payment legislation in the United States.
- Bul. 244. Labor legislation of 1917.
- Bul. 246. Decisions of courts affecting labor, 1917.
- Bul. 257. Labor legislation of 1918.
- Bul. 258. Decisions of courts and opinions affecting labor, 1918.
- Bul. 277. Labor legislation of 1919.
- Bul. 285. Minimum-wage legislation in the United States.
- Bul. 290. Decisions of courts and opinions affecting labor, 1919-1920.
- Bul. 292. Labor legislation of 1920.
- Bul. 308. Labor legislation of 1921.
- Bul. 309. Decisions of courts and opinions affecting labor, 1921.
- Bul. 321. Labor laws that have been declared unconstitutional.
- Bul. 322. Kansas Court of Industrial Relations.
- Bul. 330. Labor legislation of 1922.
- Bul. 343. Laws providing for bureaus of labor statistics, etc.
- Bul. 344. Decisions of courts and opinions affecting labor, 1922.

Foreign Labor Laws.

- Bul. 142. Administration of labor laws and factory inspection in certain European countries.

Vocational Education.

- Bul. 145. Conciliation, arbitration, and sanitation in the dress and waist industry of New York City.
- *Bul. 147. Wages and regularity of employment in the cloak, suit, and skirt industry.
- *Bul. 159. Short-unit courses for wage earners and a factory school experiment.
- Bul. 162. Vocational education survey of Richmond, Va.
- Bul. 199. Vocational education survey of Minneapolis, Minn.
- Bul. 271. Adult working class education (Great Britain and the United States).

Labor, as Affected by the War.
