WAGES AND HOURS OF LABOR OF COMMON STREET LABORERS, 1928

The entrance wage rates and regular hours of labor of unskilled street laborers directly hired by more than 2,600 cities and towns in the United States are here presented. The rates shown are those paid by the municipalities to common laborers when first engaged on the construction, repairing, or cleaning of streets. Higher rates may be paid for greater skill or after a period of service.

The questionnaires for this inquiry were sent out by the United States Bureau of Labor Statistics, under date of October 31, 1928, to all cities and towns having a population of 2,500 or over according to the 1920 census. About 93 per cent of these municipalities replied.

CLASSIFIED HOURLY WAGE RATES

In Table 1 are given classified entrance wage rates for common street labor, the number of municipalities in each State paying each classified wage rate, as well as the percentage of all municipalities paying each classified wage rate being shown. Of the 2,626 municipalities reporting, 593, or 23 per cent, were paying 40 and under 45 cents per hour and 553, or 21 per cent, were paying 50 and under 55 cents per hour. While 896, or about 34 per cent, paid under 40 cents per hour, only about 15 per cent paid 55 cents or more.

CLASSIFIED WEEKLY HOURS OF LABOR

In Table 2, classified working hours per week of unskilled street laborers are presented. The number of municipalities in each State whose laborers work each classified number of hours per week are shown, and the percentage of all municipalities whose street laborers work each specified number of hours per week are also set forth. Of the total cities and towns reporting, 1,053, or 40 per cent, had a 48-hour week and 13 per cent a working week of less than 48 hours. On the other hand, 46 per cent had a working week of over 48 hours. While the street laborers in 9 per cent of the cities worked 44 hours or less a week, in 13 per cent of the cities such laborers had a 60-hour week.
