EXPLANATIONS OF REGULAR STATISTICAL TABLES

The statistics of the foreign commerce of the United States include the trade of the customs districts of Alaska, Hawaii, and Puerto Rico with foreign countries, but not the trade of these Territories with the United States, which is shown separately in the section of "Commerce with noncontiguous Territories."

In the statistics of the foreign commerce of the United States the Philippine Islands are treated as a foreign country, while the collectors of customs in the islands are under the jurisdiction of the War Department. The trade of these islands with foreign countries is, therefore, not included in the foreign commerce of the United States, but is published separately by the Philippine Government.

General imports.—The statement of imports of merchandise in this publication is based on "*general imports*," embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from the statement of "*Imports for consumption*," embracing imports entered for immediate consumption and withdrawals from warehouse for consumption.

General imports and *imports for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the customhouse and implies that the goods have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion. Some of them may be afterwards exported.

The value of imported merchandise, as shown in the statistical tables, is the foreign value as shown on the entry and consular invoice, representing the market value or the price at which the merchandise, at the time of exportation to the United States is offered for sale in the principal markets of the country from which exported, including the cost of containers or coverings and all expenses incident to placing the merchandise in con-

dition ready for shipment to the United States, as defined in section 402 of the tariff act of 1930.

Domestic exports.—The statement of domestic exports exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is the actual cost or the value at the time of exportation in the ports of the United States whence they are exported, as declared by the shippers on the export declarations.

Foreign exports.—The statement of foreign exports, sometimes called reexports, exhibits exports of foreign merchandise previously imported. The value of such commodities exported from "warehouse" is their import value, and if "not from warehouse," comprising free goods mainly, the value at the ports of the United States whence they are exported.

Tonnage tables.—In the tables of vessels entered and cleared in the foreign trade the tonnage is stated in net tons of 100 cubic feet cargo-carrying space, not including space for crew, engine, etc.

Weights and measures.—The published measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds. Number of pounds to the barrel: Wheat flour, barley flour, rye flour, and corn meal, 196 pounds; rosin, tar, and pitch, 500 pounds gross; fish (pickled) and lime, 200 pounds net; cement, 376 pounds (counting four bags to the barrel). Number of pounds to the bushel: Wheat, beans, peas, and potatoes, 60 pounds; onions, 57 pounds; barley and buckwheat, 48 pounds; corn, rye, flaxseed, kafir, and milo, 56 pounds; oats, 32 pounds; malt, 34 pounds. Number of gallons to the barrel: Mineral oil, 42 gallons.

RESTRICTED FREE DISTRIBUTION OF PRINTED PUBLICATIONS

Drastic reductions in printing funds of the bureau for the present fiscal year have made necessary a curtailment in the already limited free distribution of printed publications.

This problem has been a difficult one to solve, because while faced with the absolute necessity of reducing free distribution the bureau was reluctant to take any steps that would materially restrict the useful circulation of its printed material or deprive any important group of this form of cooperation, which it has been a privilege to extend in the past.

The general distribution of the bureau's printed bulletins has been on a sales basis for a good many years, and the limited free distribution has been confined to certain general classes. In order to effect any material reduction in the free list it was necessary to omit entirely groups or classifications from that list. The bureau sincerely regrets that the state of printing appropriations makes it necessary to take this action. This announcement is for the information of a number of bureau contacts who have been receiving free publications but whose names will necessarily be omitted from the free distribution in the future.

It will be understood, of course, that copies of printed publications are available at nominal cost from the Superintendent of Documents, Government Printing Office, Washington, D. C., or through the bureau's district and cooperative offices in this country.
