¹ The properties acquired by Capital Transit Co. from predecessor companies on Dec. 1, 1933, under the definitive unification agreement adopted pursuant to joint resolution of Congress authorizing the unification, are stated at the aggregate of corresponding accounts on the books of the predecessor companies at Dec. 1, 1933, including intangibles (with subsequent additions and deductions) in accordance with the company's interpretation of provisions for continuity of accounting in the unification agreement. Some adjustment of the amount may be required should the Public Utilities Commission of the District of Columbia issue a definite ruling in this respect at a later date based on its interpretation of the unification agreement. It is not possible to ascertain from the books of account the respective amounts of tangibles and intangibles because of lack of information, particularly with respect to the amounts recorded in property and plant account by predecessor companies prior to Jan. 1, 1909, when the first system of primary accounts was promulgated by the Interstate Commerce Commission and to the amounts recorded by predecessor companies at the time of merging or consolidating other companies. At public hearings held by the Public Utilities Commission of the District of Columbia from April to June 1937 to determine the valuation of the properties of Capital Transit Co. for rate-making purposes, the chief accountant for the commission submitted data giving historical cost, recorded or estimated (historical cost being defined as cost to the company first devoting the property to the public use) of the property of the company as of Apr. 30, 1937, used and useful for street-railway and bus operations as \$31,023,038.09, which total purported to include land and certain other nondepreciable properties but admittedly excluded other property expenditures not classified by the chief accountant as owned or used and useful. Similar data presented at the hearings by the company showed historical cost, as defined above, as of the same date in the aggregate amounts of \$38,710,210.87 for properties used and useful, and \$39,479,717.81 for all properties of the company (including in each instance approximately \$4,000,000 in respect of certain organization and development costs). However, the company's data were based on findings of historical cost as of July 1, 1919, by the Public Utilities Commission of the District of Columbia which findings were not accepted as correct at that date or since by the company or its predecessors, and were used by the company at this time solely for the purposes of the hearings.

² The properties acquired from Washington Railway & Electric Co. are subject to the lien of its consolidated mortgage under which \$7,118,100 principal amount of bonds is outstanding. By indemnity agreement dated Dec. 1, 1933, Washington Railway & Electric Co. has agreed to pay both principal and of interest on \$3,139,100 of such bonds and to indemnify Capital Transit Co. with respect thereto, and Capital Transit Co. has agreed to pay both principal and of interest on \$3,979,000.

³ Recquired securities consist of:

Principal amount

The Capital Traction Co. first mortgage 5-percent coupon bonds, due June 1, 1947.....	\$264,000
City & Suburban Railway of Washington 5-percent first-mortgage bonds, due Aug. 1, 1948.....	334,000
Total.....	598,000

⁴ The value based on market quotations at Dec. 31, 1937, of the marketable securities was:

U. S. Government securities.....	\$577,396.88
Other marketable securities.....	123,925.00
Total.....	701,321.88

⁵ By direction of the Public Utilities Commission of the District of Columbia the expense of property valuation is being amortized over 5 years commencing Nov. 1, 1937, by equal monthly charges against income.

⁶ The company has assumed and agreed to pay both principal and of interest on the first mortgage 5-percent coupon bonds of the Capital Traction Co., and \$455,000 principal amount of the 5-percent first mortgage bonds of the Anacostia & Potomac River Railroad Co. of Washington City, D. C., previously guaranteed by Washington Railway & Electric Co., but has not assumed or agreed to pay the remaining principal amount, \$2,097,000 of the latter bonds or the 5-percent first mortgage bonds of City & Suburban Railway of Washington. The properties acquired by the company from Washington Railway & Electric Co. are in part subject to the lien of such bonds not assumed and the company has agreed to indemnify the Washington Railway & Electric Co. with respect thereto.

In a certain case appealed to the United States Court of Appeals for the District of Columbia involving approximately \$9,000 the court decided that the company must obey the order of the Commissioners of the District of Columbia to remove certain track over which service has been abandoned and to replace all pavement that may be destroyed or damaged by such removal. The costs of track removal (net of salvage) and of repaving with respect to all abandoned track still in the streets have been estimated at a maximum of \$347,000; actual costs will become known as orders of the Commissioners are received and complied with. It is

estimated that the program of removals and repaving will extend over a period of not less than 3 years commencing in 1938, and the company intends to charge the cost of such work to the reserve for depreciation and retirement of property and plant.

The Commissioners of the District of Columbia have also claimed that the company is liable for the cost (approximately \$264,000 as stated by them) of paving areas in other streets where tracks were formerly located and were removed concurrent with the repaving of entire street areas by the District of Columbia. This the company denies.
