STATEMENT OF THE MANAGERS ON THE PART OF THE HOUSE

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2108) to promote public health and welfare by expanding, improving, and better coordinating the family planning services and population research activities of the Federal Government, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The House amendment to the text of the bill following the enacting clause struck out all of the Senate bill after the enacting clause and inserted a substitute amendment. The committee of conference has agreed to a substitute for both the Senate bill and the House amendment to the bill. Except for technical, clarifying, and conforming changes, the following statement explains the differences between the House amendment and the substitute agreed to in conference.

The conference agreement is the same as the legislation passed by the House in every respect but one. The one departure from the House version is with respect to the authorization of appropriations for project grants and contracts for family planning services and for research grants and contracts. The Senate authorizations were accepted with respect to these areas. The need for these levels of authorization is reflected in the following letter from the Secretary of Health, Education, and Welfare, the Honorable Elliot L. Richardson.

THE SECRETARY OF HEALTH, EDUCATION, AND WELFARE,
Washington, D.C., December 1, 1970.

HON. HARLEY O. STAGGERS,
*Chairman, Interstate and Foreign Commerce Committee,
House of Representatives,
Washington, D.C.*

DEAR MR. CHAIRMAN: The Department and the Administration were very pleased with the passage of S. 2108, the Family Planning Services and Population Research Bill. I know how deeply involved you were with each step in its progress.

As you approach the conference with the Senate members, there is a matter of particular concern to the Department of which you should be aware. During the hearings before your Committee, the Department provided an estimate of the expenditures necessary in services and research to achieve the Administration's goals in family planning services and population research. In certain instances these estimates exceed the authorization levels contained in the Bill passed by the Senate. Therefore, we were particularly distressed by the cuts in authorizations for family planning services project grants and contracts. We would appreciate your giving this problem particular

consideration. For your convenience, I am enclosing a copy of the cost estimates which were previously provided the Committee.

With regard to another difference between the House and Senate Bills, we appreciate the action of your committee in removing the authorization of grants for the construction of population research facilities. We regret that the Committee did not delete the authorization for formula grants to the States for family planning services.

Thank you again, Mr. Chairman, for the actions of you and your committee in assisting the administration towards solutions to these important problems.

With best regards,

Sincerely,

ELLIOT L. RICHARDSON,
Secretary.

Enclosure.

SELECTED POPULATION AND FAMILY PLANNING ACTIVITIES—COST ESTIMATES¹

[In millions]

Organization	Authorizing legislation	Fiscal year				
		1971 budget	1972 estimate	1973 estimate	1974 estimate	1975 estimate

(2) Maternity and infant care project grants.	-----do-----	4.7	5.0	5.0	5.0	5.0
National Center for Family Planning Services, HSMHA:						
(1) Project grants for services, operational research and training.	-----do-----	33.5	34.0	-----	-----	-----

National Institutes of Child Health and Human Development—Center for Population Research.	Public Health Service Act.	28.3	50.0	75.0	100.0	100.0

¹ These figures represent only staff estimates of costs under these programs. They should not be construed as committing the Department or the Administration to requesting or spending such funds for fiscal years after 1971.

Adoption of the Senate's authorization levels with respect to project grants and contracts for family planning services and research grants and contracts will increase the authorizations in the conference agreement by \$120,000,000 over the authorizations in the House version. To place this amount in perspective it should be pointed out that the House version provided an authorization of \$267,000,000 over the three-year period covered by it. The Senate passed bill was a five-year program with authorizations aggregating \$991,250,000.

It is, and has been, the intent of both Houses that the funds authorized under this legislation be used only to support preventive family planning services, population research, infertility services, and other related medical, informational, and educational activities. The conferees have adopted the language contained in section 1008, which prohibits the use of such funds for abortion, in order to make clear this intent. The legislation does not and is not intended to interfere with

or limit programs conducted in accordance with State or local laws and regulations which are supported by funds other than those authorized under this legislation.
