

Public Law 100-407  
100th Congress

## An Act

Aug. 19, 1988  
[S. 2561]

To establish a program of grants to States to promote the provision of technology-related assistance to individuals with disabilities, and for other purposes.

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,*

## SECTION 1. SHORT TITLE.

This Act may be cited as the "Technology-Related Assistance for Individuals With Disabilities Act of 1988".

## SEC. 2. FINDINGS AND PURPOSES.

(a) FINDINGS.—The Congress makes the following findings:

(1) During the past decade, there have been major advances in modern technology. Technology is now a powerful force in the lives of most residents of the United States.

(2) For all individuals, technology can provide important tools for making the performance of tasks quicker and easier.

(3) For some individuals with disabilities, assistive technology is a necessity that enables them to engage in or perform many tasks. The provision of assistive technology devices and assistive technology services enables some individuals with disabilities to—

(A) have greater control over their own lives;

(B) participate in and contribute more fully to activities in their home, school, and work environments, and in their communities;

(C) interact to a greater extent with nondisabled individuals; and

(D) otherwise benefit from opportunities that are taken for granted by individuals who do not have disabilities.

(4) Although the development of assistive technology devices designed to assist individuals with disabilities is still in its early stages, there already exist a substantial number of assistive technology devices, including simple adaptations to existing equipment, that could significantly benefit, in all major life activities, individuals of all ages with disabilities. Such devices, including adaptations, could be used in programs and activities such as early intervention, education, rehabilitation and training, employment, residential living, independent living, recreation, and other aspects of daily living.

(5) The use of assistive technology devices and services by individuals with disabilities can reduce the costs of the disabilities to society, individuals with disabilities, and families of individuals with disabilities by reducing expenditures associated with early intervention, education, rehabilitation, health care, transportation, telecommunication services, and other services required by individuals with disabilities.

(6) Many individuals with disabilities do not have access to the assistive technology devices and assistive technology serv-

ices that such individuals need to allow such individuals to function in society commensurate with their abilities. States do not have comprehensive programs for making available technology-related assistance to individuals with disabilities. There is a lack of—

(A) resources to pay for such devices and services;

(B) trained personnel to provide such devices and services and to assist individuals with disabilities to use such devices and services;

(C) information about the potential of technology available to individuals with disabilities, the families or representatives of individuals with disabilities, individuals who work for public agencies and private entities that have contact with individuals with disabilities (including insurers), employers, and other appropriate individuals;

(D) coordination among existing State human services programs, and among such programs and private agencies, particularly with respect to transitions between such programs and agencies; and

(E) capacity of such programs to provide the necessary technology-related assistance.

(7) There are insufficient incentives for the commercial pursuit of the application of technology devices to meet the needs of individuals with disabilities, because of limited markets.

(8) At the Federal level, there is a lack of coordination among agencies that provide or pay for the provision of assistive technology devices and assistive technology services. Also, the Federal Government does not provide adequate assistance and information with respect to the use of assistive technology devices and assistive technology services to individuals with disabilities, the families or representatives of individuals with disabilities, individuals who work for public agencies and private entities that have contact with individuals with disabilities (including insurers), employers, and other appropriate individuals.

(b) **PURPOSES.**—The purposes of this Act are as follows:

(1) To provide financial assistance to the States to help each State to develop and implement a consumer-responsive statewide program of technology-related assistance for individuals of all ages with disabilities that is designed to—

(A) increase awareness of the needs of individuals with disabilities for assistive technology devices and assistive technology services;

(B) increase awareness of policies, practices, and procedures that facilitate or impede the availability or provision of assistive technology devices and assistive technology services;

(C) increase the availability of and funding for the provision of assistive technology devices and assistive technology services for individuals with disabilities;

(D) increase awareness and knowledge of the efficacy of assistive technology devices and assistive technology services among individuals with disabilities, the families or representatives of individuals with disabilities, individuals who work for public agencies and private entities that have contact with individuals with disabilities (including insurers), employers, and other appropriate individuals;

(E) increase the capacity of public and private entities to provide technology-related assistance, particularly assistive technology devices and assistive technology services, and to pay for the provision of assistive technology devices and assistive technology services;

(F) increase coordination among State agencies and public and private entities that provide technology-related assistance, particularly assistive technology devices and assistive technology services; and

(G) increase the probability that individuals of all ages with disabilities will, to the extent appropriate, be able to secure and maintain possession of assistive technology devices as such individuals make the transition between services offered by human service agencies or between settings of daily living.

(2) To facilitate—

(A) the identification of Federal policies that facilitate payment for assistive technology devices and assistive technology services for individuals with disabilities;

(B) the identification of Federal policies that impede such payment; and

(C) the elimination of inappropriate barriers to such payment.

(3) To enhance the ability of the Federal Government to provide the States with—

(A) technical assistance, information, and training and public awareness programs relating to the provision of assistive technology devices and assistive technology services; and

(B) funding for model demonstration and innovation projects.

29 USC 2202.
