Public Law 100–521
100th Congress

An Act

To provide for study and research on the decline in United States forest productivity and to determine the effects of atmospheric pollutants on forest environments, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.
This Act may be cited as the "Forest Ecosystems and Atmospheric Pollution Research Act of 1988".

SEC. 2. FINDINGS.
Congress finds that—
(1) the health and productivity of forests in certain regions of the United States are declining;
(2) there is a special concern about the decline of certain hardwood species, particularly sugar maples and oaks, in the eastern United States and the effects of atmospheric pollutants on the health and productivity of these forests;
(3) declines in the productivity of certain commercially important Southern pine species have been measured;
(4) existing research indicates that atmospheric pollution, including ozone, acidic deposition, and heavy metals, may contribute to this decline;
(5) there is an urgent need to expand and better coordinate existing Federal, State, and private research, including research by private industry, to determine the cause of changes in the health and productivity of domestic forest ecosystems and to monitor and evaluate the effects of atmospheric pollutants on such ecosystems; and
(6) such research and monitoring should not impede efforts to control atmospheric pollutants.

SEC. 3. ESTABLISHMENT OF RESEARCH PROGRAM.
Section 3 of the Forest and Rangeland Renewable Resources Research Act of 1978 (16 U.S.C. 1642) is amended by adding at the end the following:
"(c)(1) The Secretary, acting through the United States Forest Service, shall establish not later than 180 days after the date of the enactment of this subsection a 10-year program (hereinafter in this subsection referred to as the 'Program') to—
"(A) increase the frequency of forest inventories in matters that relate to atmospheric pollution and conduct such surveys as are necessary to monitor long-term trends in the health and productivity of domestic forest ecosystems;
"(B) determine the scope of the decline in the health and productivity of domestic forest ecosystems;
"(C) accelerate and expand existing research efforts (including basic forest ecosystem research) to evaluate the effects of at-
mospheric pollutants on forest ecosystems and their role in the
decline in domestic forest health and productivity;
“(D) study the relationship between atmospheric pollution
and other climatological, chemical, physical, and biological fac­
tors that may affect the health and productivity of domestic
forest ecosystems;
“(E) develop recommendations for solving or mitigating prob­
lems related to the effects of atmospheric pollution on the
health and productivity of domestic forest ecosystems;
“(F) foster cooperation among Federal, State, and private
researchers and encourage the exchange of scientific informa­
tion on the effects of atmospheric pollutants on forest
ecosystems among the United States, Canada, European na­
tions, and other nations;
“(G) support the long-term funding of research programs and
related efforts to determine the causes of declines in the health
and productivity of domestic forest ecosystems and the effects of
atmospheric pollutants on the health and productivity of domes­
tic forest ecosystems; and
“(H) enlarge the Eastern Hardwood Cooperative by devoting
additional resources to field analysis of the response of hard­
wood species to atmospheric pollution, and other factors that
may affect the health and productivity of these ecosystems.
“(2) The Secretary shall establish a committee to advise the
Secretary in developing and carrying out the Program, which shall
be composed of scientists with training and experience in various
disciplines, including atmospheric, ecological, and biological sci­
ences. Such scientists shall be selected from among individuals who
are actively performing research for Federal or State agencies or for
private industries, institutions, or organizations.
“(3) The Secretary shall coordinate the Program with existing
research efforts of Federal and State agencies and private indus­
tries, institutions, or organizations.
“(4) The Secretary shall submit to the President and to Congress
the following reports:
“(A) Not less than 30 days before establishing the Program,
the Secretary shall submit an initial program report—
“(i) discussing existing information about declining
health and productivity of forest ecosystems on public and
private lands in North America and Europe;
“(ii) outlining the findings and status of all current re­
search and monitoring efforts in North America and
Europe on the causes and effects of atmospheric pollution
on the health and productivity of forest ecosystems;
“(iii) describing the Program; and
“(iv) estimating the cost of implementing the Program for
each fiscal year of its duration.
“(B) Not later than January 15, 1990, and January 15 of each
year thereafter, during which the Program is in operation
following the year in which the initial program report is submit­
ted, the Secretary shall submit an annual report—
“(i) updating information about declining health and
productivity of forest ecosystems on public and private
lands in North America and Europe;
“(ii) updating the findings and status of all current re­
search and monitoring efforts in North America and
Europe on the causes and effects of atmospheric pollution
on the health and productivity of forest ecosystems, including efforts conducted under the Program;

"(iii) recommending additional research and monitoring efforts to be undertaken under the Program to determine the effects of atmospheric pollution on the health and productivity of domestic forest ecosystems; and

"(iv) recommending methods for solving or mitigating problems stemming from the effects of atmospheric pollution on the health and productivity of domestic forest ecosystems.

"(C) Not later than 10 years after the date on which the initial program report is submitted, the Secretary shall submit a final report—

"(i) reviewing existing information about declining health and productivity of forest ecosystems on public and private lands in North America and Europe;

"(ii) reviewing the nature and findings of all research and monitoring efforts conducted under the Program and any other relevant research and monitoring efforts related to the effects of atmospheric pollution on forest ecosystem; and

"(iii) making final recommendations for solving or mitigating problems stemming from the effects of atmospheric pollution on the health and productivity of domestic forest ecosystems.".

LEGISLATIVE HISTORY—H.R. 2399:

HOUSE REPORTS: No. 100–241 (Comm. on Agriculture).
CONGRESSIONAL RECORD:
Oct. 6, House concurred in Senate amendment.
