note.
16 USC 460bbb.

SEC. 2. FINDINGS.

The Congress finds that—

(1) the Smith River, undammed and free-flowing from its headwaters to the Pacific Ocean, represents one of the last wholly intact vestiges of an invaluable legacy of wild and scenic rivers;

(2) the Smith River watershed, from the diverse conifer forests of the Siskiyou Mountains and unique botanical communities of the North Fork serpentine to the ancient redwoods along the river's lower reaches, exhibits a richness of ecological diversity unusual in a basin of its size;

(3) the Smith River watershed's scenic beauty, renowned anadromous fisheries, exceptional water quality, and abundant wildlife combine with its ready accessibility to offer exceptional opportunities for a wide range of recreational activities, including wilderness, water sports, fishing, hunting, camping, and sightseeing;

(4) careful development and utilization at mutually compatible levels of recreation, fisheries, and timber resources on public lands will ensure the continuation of the Smith River watershed's historic role as a significant contributor to the region's local economy; and

(5) protection of the Smith River's unique values can be enhanced by a cooperative effort by Federal, State and local governments to coordinate land-use planning, management, and development of Federal and non-Federal lands throughout the watershed.

SEC. 3. DEFINITIONS.

As used in this Act—

(1) the term "excluded area" means one of the four areas specifically excluded from the recreation area, as generally depicted on the map referred to in section 4(b);

(2) the term "forest plan" means the land and resource management plan for the Six Rivers National Forest prepared pursuant to section 6 of the Forest and Rangeland Renewable Resources Planning Act of 1974 (16 U.S.C. 1604);

(3) the term "recreation area" means the Smith River National Recreation Area established by section 4;

16 USC
460bbb-1.

(4) the term "Secretary" means the Secretary of Agriculture; and

SEC. 4. SMITH RIVER NATIONAL RECREATION AREA.

(a) **ESTABLISHMENT.**—For the purposes of ensuring the preservation, protection, enhancement, and interpretation for present and future generations of the Smith River watershed's outstanding wild and scenic rivers, ecological diversity, and recreation opportunities while providing for the wise use and sustained productivity of its natural resources, there is hereby established the Smith River National Recreation Area.

(b) **BOUNDARIES.**—(1) The recreation area shall consist of those lands within the area generally depicted on the map entitled "Proposed Smith River National Recreation Area" and dated July 1990. The map shall be on file and available for public inspection in the Office of the Chief, Forest Service, Department of Agriculture. The Secretary may, by publication of availability of a revised map and after public comment, make corrections or minor changes to the boundary of the recreation area.

(2) The exterior boundary of the recreation area, as generally depicted on the map, shall encompass the recreation area and the four excluded areas.

(c) **BOUNDARY MODIFICATION.**—The boundaries of the Six Rivers National Forest are hereby modified as generally depicted on the map referred to in subsection (b). A map and legal description of the boundary of the Six Rivers National Forest as modified by this subsection shall be on file and available for public inspection in the Office of the Chief, Forest Service, and the Office of the Forest Supervisor of the Six Rivers National Forest.

(d) **TRANSFER.**—The federally owned lands within the recreation area administered by the Secretary of the Interior on the date of enactment of this Act, comprising approximately 20 acres, are hereby transferred to the jurisdiction of the Secretary of Agriculture and shall be managed in accordance with the laws applicable to the National Forest System and this Act.

(7) Permit removal of trees within streamside protection zones along those rivers and river segments specified in section 11 of this Act only when necessary for human health and safety, to maintain trails or existing roads, for the development of recreation or other facilities, for the protection of the recreation area in the event of fire, or to improve fish and wildlife habitat.

(8) Consistent with applicable requirements of law, permit removal of trees in those management areas where timber harvest is not specifically authorized by subsection (b) when necessary for human health and safety, to maintain trails or existing roads, for the development of recreation or other facilities, for the protection of the recreation area in the event of fire, or to improve fish and wildlife habitat. Timber damaged or down in these areas as a result of fire, insects, disease, blow-down or other natural events shall otherwise be retained in its natural condition, with removal permitted only upon a written determination by the Secretary, based upon written findings, that such removal is necessary to provide for or maintain or enhance biological and ecological diversity, without regard for the commodity value of the timber. Such a decision shall not be delegable by the Secretary but shall be subject to administrative appeal and judicial review.
