

stitution and laws of the United States, do hereby proclaim March 2003 as Irish-American Heritage Month. I call upon all Americans to observe this month by learning about and commemorating the contributions of Irish Americans to our Nation.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of February, in the year of our Lord two thousand three, and of the Independence of the United States of America the two hundred and twenty-seventh.

GEORGE W. BUSH

**Proclamation 7650 of February 28, 2003**

**National Colorectal Cancer Awareness Month, 2003**

*By the President of the United States of America*

*A Proclamation*

Colorectal cancer touches the lives of many Americans. This year, it is estimated that more than 148,000 new cases of colorectal cancer will be diagnosed. More than 56,000 people may die from this disease, making it a leading cause of cancer death in our Nation. We have achieved great progress in understanding what causes colorectal cancer, and how it develops and spreads. This fourth national observance once again helps increase awareness. Increased awareness can help us reach my Administration's goal, known as "Healthy People 2010," administered by the Department of Health and Human Services, to reduce the rate of colorectal cancer deaths by 34 percent by the year 2010.

Like many cancers, the development of colorectal cancer can take many years. Screening is an important tool to help detect colorectal cancer early by identifying precancerous growths or polyps, when treatment is more likely to be successful.

More than 90 percent of people who are diagnosed with colorectal cancer are over the age of 50. Yet, recent data indicates that less than 40 percent of adults age 50 or older have had one of the available colorectal cancer screening tests within recommended intervals. Researchers estimate that if everyone age 50 or older received regular colorectal cancer screenings, at least one-third of the deaths would be prevented.

Individuals must realize the importance of talking with their healthcare providers about when to begin screening, which tests to have, the benefits and risks of each test, and how often to schedule appointments. To help our citizens detect this disease, the Centers for Medicare and Medicaid Services (CMS) provides Medicare coverage for regular colorectal cancer screening tests to help detect precancerous conditions or colorectal cancer early.

The National Cancer Institute (NCI), a component of the National Institutes of Health, is the Nation's principal research agency in the fight against colorectal cancer. The NCI invested approximately \$245 million in 2002, and it will dedicate an estimated \$267 million this year to advance our understanding of this disease. The Centers for Disease Control and Prevention (CDC) also plays an important role in our ef-

forts to save lives and reduce the burden of colorectal cancer. Last year, the CDC allocated \$12 million to educate the public and health professionals about colorectal cancer screening, and to conduct and support research efforts related to increasing national colorectal cancer screening rates.

The CDC, CMS, and NCI are participating together in the Screen for Life: National Colorectal Cancer Action Campaign to educate Americans aged 50 and older, particularly minority groups, about the benefits of colorectal cancer screening. Another coordinated effort is the Health Disparities Collaboratives, a public-private partnership that involves the Health Resources and Services Administration, CDC, NCI, and the Institute for Healthcare Improvement. These groups are focusing on screening and follow-up care for people who traditionally lack access to quality health care.

During this month, I encourage Americans to join me in the crucial effort to save lives by taking action against colorectal cancer by talking with healthcare providers about screening, telling friends and family members about the importance of early detection, and providing support for those diagnosed with colorectal cancer. By working together to increase awareness and supporting research about this disease, we can make a difference in the lives of our citizens and people around the world.

NOW, THEREFORE, I, GEORGE W. BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim March 2003 as National Colorectal Cancer Awareness Month. I call upon all Americans to reaffirm our Nation's continuing commitment to controlling and curing colorectal cancer.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-eighth day of February, in the year of our Lord two thousand three, and of the Independence of the United States of America the two hundred and twenty-seventh.

GEORGE W. BUSH

**Proclamation 7651 of February 28, 2003**

**Women's History Month, 2003**

*By the President of the United States of America  
A Proclamation*

As our Founding Fathers worked to develop the framework of our Nation, Abigail Adams wrote to her husband: "I long to hear that you have declared an independency—and by the way in the new Code of Laws which I suppose it will be necessary for you to make I desire you would Remember the Ladies, and be more generous and favorable to them than your ancestors." An early advocate of women's rights, a farm and financial manager, and the mother of an American President, John Quincy Adams, Abigail Adams is one of many American women who helped establish the strength and vitality of our Nation. During Women's History Month, we recognize the generations of American
