(1) The United States declared war against Germany on April 6, 1917, to redress wrongs, including Germany's resumption of unrestricted submarine warfare, violation of United States neutrality, meddling in Mexican affairs, and denial of freedom of the seas to nonbelligerent nations.

(2) The United States associated itself with the allied powers of the United Kingdom and its Commonwealth, France and its colonies, Russia, Italy, and Japan to defeat the German Empire.

(3) The United States Army, consisting of the Regular Army, National Guard, and Reserve Corps, with the addition of volunteers and the draftees of the National Army, underwent a transformation from a frontier constabulary and coastal defense force to a modern land warfare force.

(4) Early 20th century military and technological advances resulted in the incorporation of motor transport, aviation, anti-aircraft artillery, tanks, chemical weapons, submarines and anti-submarine warfare, underwater mines, and other innovations into the military arsenal of the United States.

(5) The need to quickly build a military strength of four million soldiers and half a million sailors required the mobilization of the human resources of the United States, during which members of diverse ethnic groups, races, and creeds, both native-born and immigrant, forged a new American identity.

(6) The United States Army maintained its defense of American seacoasts, southern border, and overseas possessions, while the Army American Expeditionary Forces arrived in Europe in June 1917 and deployed for combat operations in October.

(7) By the end of World War I, almost 2,000,000 members of the Army served overseas in the American Expeditionary Forces.

(8) During World War I, the United States Navy increased in strength from approximately 67,000 sailors and marines to approximately 500,000 sailors and marines by the war's end, and the size of the Navy increased from around 200 ships at the outbreak of war in Europe in 1914, to 342 vessels by the time the United States entered the war, and 774 vessels by the day of the Armistice.

(9) The Navy operated in the Atlantic and Pacific Oceans, and the North and Mediterranean Seas in cooperation with allied navies.

(10) The Navy began the fight against the German U-boat menace by first dispatching 34 destroyers stationed specifically for such purpose, which by war's end grew to 110 total destroyers.

(11) Navy vessels escorted troop transports carrying 1,250,000 passengers and escorted supply transports carrying 27 percent of all cargo shipped to Europe.

(12) The Navy deployed five batteries of large-caliber battleship guns mounted on railroad trains to France for service as long-range artillery for the Army.

(13) The United States Coast Guard transferred to the operational control of the Navy and augmented that service with officers and sailors, vessels of all types, and shore stations.

(14) The United States Marine Corps, with an eventual wartime strength of 53,000 officers and men, detached the 5th and 6th regiments and a machine gun battalion to constitute an infantry brigade integrated into the Army's 2d Division for service in France.

(15) On July 4, 1917, Colonel Charles E. Stanton, one of the officers on the staff of General John Pershing, commander of the American Expeditionary Forces in Europe, famously announced the commitment of the United States to the fight when Colonel Stanton proclaimed upon his arrival in France, "Lafayette, we are here!"

(16) Whereas the American Expeditionary Forces formed three field armies, nine corps and 43 divisions, plus various units of the Services of Supply.

(17) The American Expeditionary Forces suffered 255,000 casualties and over 50,000 non-battle casualties while participating in 13 named campaigns in World War I.

(18) Participation in World War I resulted in the completion of a period of reform and professionalism that transformed the Armed Forces from a small dispersed organization to a modern industrialized fighting force capable of global reach and influence.

(b) SENSE OF CONGRESS.—Congress—

(1) Russia’s ongoing aggressive actions, including its invasions of Georgia in 2008 and Ukraine in 2014, threats to North Atlantic Treaty Organization (NATO) allies, rapid military modernization, advanced anti-access and area denial capabilities, increasing military activity in the Arctic region and Mediterranean Sea, evolving nuclear doctrine and capabilities, and violations of the Intermediate-Range Nuclear Forces Treaty Between the United States of America and the Union of Soviet Socialist Republics and the Treaty on Open Skies, constitute a major challenge to the security interests of the United States and its allies and partners in Europe.

(2) Russia’s ongoing malign influence activities, including misinformation, disinformation, propaganda, cyberattacks, election interference, active measures, and hybrid warfare operations pose not only a threat to the security interests of the United States and its allies and partners in Europe, but to the integrity of Western democracies and the institutions and alliances they support.

(3) Russia’s doctrine of “escalate to de-escalate”, along with its tactical nuclear capabilities, threaten United States forces and European allies and exacerbate the risk of miscalculation and escalation in a crisis.

(B) enhancing the indications and warning, interoperability, and logistics capabilities of United States allies and partners; and

(5) A strong NATO alliance is the cornerstone of transatlantic security cooperation and the guarantor of peace and stability in Europe.

(6) The steps taken at the NATO 2014 Wales Summit and the NATO 2016 Warsaw Summit, including the adoption and implementation of the Readiness Action Plan (RAP), the formation of the Very High Joint Readiness Force (VJTF), the Enhanced Forward Presence (EFP) multinational battalions deployed to Estonia, Latvia, Lithuania, and Poland, and the Tailored Forward Presence in Romania and Bulgaria, have strengthened NATO readiness and collective defense.

(7) Montenegro’s accession into NATO is a strong step toward strengthening the alliance, enhancing security and stability in Southeastern Europe, and reaffirming NATO’s commitment to an “Open Door” policy.

(8) Cooperation with non-NATO allies and members of the Partnership for Peace program enhances security and stability in Europe.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the United States should support a Europe whole, free, and at peace and the sovereign right of all European states to pursue integration into the Euro-Atlantic community through institutions such as NATO and the European Union;

(2) the United States should develop and implement a policy and strategy backed by all elements of United States

power to deter and, if necessary, defeat Russian aggression, which will require—

(A) enhancing United States military capability and capacity in Europe, including strong consideration of investments in increased permanently-stationed and continued rotational forces as well as the facilities and infrastructure necessary to support United States presence and training with its allies and partners; and

(B) strengthening United States capability and capacity to counter malign Russian influence, including Russian hybrid warfare operations short of traditional armed conflict, malicious Russian cyber activities, and Russia’s use of misinformation, disinformation, and propaganda;

(3) investments that support the security and stability of Europe, including the EDI, and support to European countries in further developing their security capabilities, are in the long-term national security interests of the United States, and as such, funds for such efforts should be included in the President’s base budget request for the Department of Defense in order to fully support United States combat capability in Europe, facilitate efficient planning and execution, and ensure budgetary transparency;

(4) the United States should maintain an ironclad commitment to its obligations under Article 5 of the North Atlantic Treaty, which declares that an “armed attack against one or more [NATO allies] shall be considered an attack against them all”;

(5) while NATO allies have made progress toward high levels of defense spending, it is important that all NATO allies fulfill their commitments to levels and composition of defense expenditures as agreed upon at the NATO 2014 Wales Summit and NATO 2016 Warsaw Summit in order to uphold their obligations under Article 3 of the North Atlantic Treaty to “maintain and develop their individual and collective capacity to resist armed attack”;

(6) NATO allies should continue to coordinate defense investments to both improve deterrence against Russian aggression and more appropriately balance defense spending across the alliance; and

(7) because the NATO alliance defends not only the common security of the United States and its NATO allies, but our common values as well, it is essential that all NATO allies uphold their obligations under the North Atlantic Treaty to “safeguard the freedom, common heritage and civilization of their peoples, founded on the principles of democracy, individual liberty and the rule of law”.

SEC. 1236. SENSE OF CONGRESS ON IMPORTANCE OF NUCLEAR CAPABILITIES OF NATO.

(a) FINDINGS.—Congress finds the following:

(1) The Warsaw Summit Communiqué, issued on July 9, 2016, by the North Atlantic Treaty Organization (in this section referred to as “NATO”) clearly defines the need for, and the importance of, the nuclear mission of NATO.

(2) The Warsaw Summit Communiqué states—

(A) with respect to the nuclear deterrence capability of NATO, “As a means to prevent conflict and war, credible deterrence and defence is essential. Therefore, deterrence and defence, based on an appropriate mix of nuclear, conventional, and missile defence capabilities, remains a core element of our overall strategy. . . . The fundamental purpose of NATO’s nuclear capability is to preserve peace, prevent coercion, and deter aggression. Nuclear weapons are unique. Any employment of nuclear weapons against NATO would fundamentally alter the nature of a conflict. The circumstances in which NATO might have to use nuclear weapons are extremely remote”;

(B) with respect to the nature of the nuclear deterrence posture of NATO, “NATO must continue to adapt its strategy in line with trends in the security environment—including with respect to capabilities and other measures required—to ensure that NATO’s overall deterrence and defence posture is capable of addressing potential adversaries’ doctrine and capabilities, and that it remains credible, flexible, resilient, and adaptable.”; and

(C) with respect to the importance of contributions to the nuclear deterrence mission from across the NATO alliance, “The strategic forces of the Alliance, particularly those of the United States, are the supreme guarantee of the security of the Allies. The independent strategic nuclear forces of the United Kingdom and France have a deterrent role of their own and contribute to the overall security of the Alliance. These Allies’ separate centres of decision-making contribute to deterrence by complicating the calculations of potential adversaries. NATO’s nuclear deterrence posture also relies, in part, on United States’ nuclear weapons forward-deployed in Europe and on capabilities and infrastructure provided by Allies concerned. These Allies will ensure that all components of NATO’s nuclear deterrent remain safe, secure, and effective. That requires sustained leadership focus and institutional excellence for the nuclear deterrence mission and planning guidance aligned with 21st century requirements. The Alliance will ensure the broadest possible participation of Allies concerned in their agreed nuclear burden-sharing arrangements.”.

(3) Secretary of Defense James Mattis, in response to the advance policy questions for his Senate confirmation hearing on January 12, 2017, stated that—

(A) “NATO’s nuclear deterrence posture relies in part on U.S. nuclear weapons forward-deployed in Europe and on capabilities and infrastructure provided by NATO allies. These capabilities include dual-capable aircraft that contribute to current burden-sharing arrangements within NATO. In general, we must take care to maintain this particular capability, and to modernize it appropriately and in a timely fashion.”; and

(B) the role of the nuclear weapons of the United States is “to deter nuclear war and to serve as last resort weapons of self-defense. In this sense, U.S. nuclear weapons are fundamental to our nation’s security and have historically provided a deterrent against aggression and security assurance to U.S. allies. A robust, flexible, and survivable U.S. nuclear arsenal underpins the U.S. ability to deploy conventional forces worldwide.”.

(4) On March 28, 2017, General Curtis Scaparrotti, Commander of the United States European Command and the Supreme Allied Commander, Europe, testified to the Committee on Armed Services of the House of Representatives that “NATO and U.S. nuclear forces continue to be a vital component of our deterrence. Our modernization efforts are crucial; we must preserve a ready, credible, and safe nuclear capability.”.

(5) The Russian Federation is currently undergoing significant modernization and recapitalization of all three legs of its nuclear triad, continues to field and modernize a large variety of non-strategic nuclear weapons, and is developing and deploying new and unique nuclear capabilities.

(6) Russia remains in violation of the INF Treaty due to the development, testing, and, most recently, the operational deployment of ground-launched cruise missiles in violation of the INF Treaty.

(7) On March 28, 2017, General Paul Selva, Vice Chairman of the Joint Chiefs of Staff, described the security consequences of the deployment of such INF Treaty-violating missiles, testifying to the Committee on Armed Services of the House of Representatives that “our assessment of the impact is that it more threatens NATO and infrastructure within the European continent than any other...area of the world that we have national interests in or alliance interests in.”.

(8) On March 28, 2017, General Curtis Scaparrotti, in testimony before the Committee on Armed Services of the House of Representatives, responded to a question asking if Russia intends to return to compliance with the INF Treaty by stating, “I don’t have any indication that they will at this time.”.

(9) Rhetoric from Russian officials has demonstrated that Moscow has sought to leverage its nuclear arsenal to threaten and intimidate neighboring countries, including members of NATO, as was the case when the Russian Ambassador to Denmark stated, “Danish warships will be targets for Russian nuclear missiles” in response to Denmark’s potential cooperation in the NATO missile defense system.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the nuclear and conventional deterrence capabilities of NATO are of critical importance to the security of the United States and of the NATO alliance, and must continue to adapt to the changed security environment in Europe;

(2) the ability of the United States to forward-deploy dual-capable aircraft and nuclear weapons, and of select members of NATO to participate in the nuclear deterrence mission of NATO by hosting forward-deployed nuclear weapons of the United States or operating dual-capable aircraft, is central to the credibility of the nuclear deterrence and defense posture of NATO;

(3) the strategic forces of the United States, the independent nuclear forces of the United Kingdom and the French Republic, and the dual-capable aircraft operated by the United States and other members of NATO constitute foundational elements of the nuclear deterrence and defense posture of NATO;

(4) NATO should modernize its nuclear-related infrastructure to ensure the highest-level of safety and security;

(5) effective deterrence requires NATO to conduct nuclear planning and exercises aligned with 21st century requirements and modernize nuclear-related capabilities and infrastructure, including dual-capable aircraft, command and control networks, and facilities; and

(6) to ensure the continued credibility of the deterrence and defense posture of NATO, the planned completion of F-35A aircraft development and testing, as well as the delivery of such aircraft to members of NATO, must not be delayed.

(c) **INF TREATY DEFINED.**—In this section, the term “INF Treaty” means the Treaty Between the United States of America and the Union of Soviet Socialist Republics on the Elimination of Their Intermediate-Range and Shorter-Range Missiles, commonly referred to as the “Intermediate-Range Nuclear Forces (INF) Treaty”, signed at Washington December 8, 1987, and entered into force June 1, 1988.

Subtitle E—Intermediate-Range Nuclear Forces (INF) Treaty Preservation Act of 2017

Intermediate-Range Nuclear Forces (INF) Treaty Preservation Act of 2017.

SEC. 1241. SHORT TITLE.

This subtitle may be cited as the “Intermediate-Range Nuclear Forces (INF) Treaty Preservation Act of 2017”.

22 USC 2551 note.

SEC. 1242. FINDINGS.

Congress makes the following findings:

(1) The 2014, 2015, and 2016 Department of State reports entitled, “Adherence to and Compliance with Arms Control, Nonproliferation, and Disarmament Agreements and Commitments”, all stated that the United States has determined that “the Russian Federation is in violation of its obligations under the INF Treaty not to possess, produce, or flight-test a ground-launched cruise missile (GLCM) with a range capability of 500 km to 5,500 km, or to possess or produce launchers of such missiles”.

(2) The 2016 report also noted that “the cruise missile developed by Russia meets the INF Treaty definition of a ground-launched cruise missile with a range capability of 500 km to 5,500 km, and as such, all missiles of that type, and all launchers of the type used or tested to launch such a missile, are prohibited under the provisions of the INF Treaty”.

(3) Potential consistency and compliance concerns regarding the INF Treaty noncompliant GLCM have existed since 2008, were not officially raised with the Russian Federation until 2013, and were not briefed to the North Atlantic Treaty Organization (NATO) until January 2014.

(4) The United States Government is aware of other consistency and compliance concerns regarding Russia actions vis-à-vis its INF Treaty obligations.

(5) Since 2013, senior United States officials, including the President, the Secretary of State, and the Chairman of the Joint Chiefs of Staff, have raised Russian noncompliance with the INF Treaty to their counterparts, but no progress has been made in bringing the Russian Federation back into compliance with the INF Treaty.

(6) In April 2014, General Breedlove, the Supreme Allied Commander Europe, correctly stated, “A weapon capability that violates the INF, that is introduced into the greater European land mass, is absolutely a tool that will have to be dealt with . . . It can’t go unanswered.”

(7) The Department of Defense in its September 2013 report, Report on Conventional Prompt Global Strike Options if Exempt from the Restrictions of the Intermediate-Range Nuclear Forces Treaty Between the United States of America and the Union of Soviet Socialist Republics, stated that it has multiple validated military requirement gaps due to the prohibitions imposed on the United States as a result of its compliance with the INF Treaty.

(8) It is not in the national security interests of the United States to be unilaterally legally prohibited from developing dual-capable ground-launched cruise missiles with ranges between 500 and 5,500 kilometers, while Russia makes advances in developing and fielding this class of weapon systems, and such unilateral limitation cannot be allowed to continue indefinitely.

(9) Admiral Harry Harris, Jr., Commander of the United States Pacific Command, testified before the Senate Armed Services Committee on April 27, 2017, that “[W]e’re in a multipolar world where we have a lot of countries who are developing these weapons, including China, that I worry about. And I worry about their DF-21 and DF-26 missile programs, their anti-carrier ballistic missile programs, if you will. INF doesn’t address missiles launched from ships or airplanes, but it focuses on those land-based systems. I think there’s goodness in the INF treaty, anything you can do to limit nuclear weapons writ-large is generally good. But the aspects of the INF Treaty that limit our ability to counter Chinese and other countries’ land-based missiles, I think, is problematic.”

(10) A material breach of the INF Treaty by the Russian Federation affords the United States the right to invoke legal countermeasures which include suspension of the treaty in whole or in part.

(11) Article XV of the INF Treaty provides that “Each Party shall, in exercising its national sovereignty, have the right to withdraw from this Treaty if it decides that extraordinary events related to the subject matter of this Treaty have jeopardized its supreme interests.”

SEC. 1243. COMPLIANCE ENFORCEMENT REGARDING RUSSIAN VIOLATIONS OF THE INF TREATY.

(a) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the actions undertaken by the Russian Federation in violation of the INF Treaty constitute a material breach of the treaty;

(2) in light of the Russian Federation’s material breach of the INF Treaty, the United States is legally entitled to

suspend the operation of the INF Treaty in whole or in part for so long as the Russian Federation continues to be in material breach; and

(3) for so long as the Russian Federation remains in non-compliance with the INF Treaty, the United States should take actions to encourage the Russian Federation return to compliance, including by—

(A) providing additional funds for the capabilities identified in section 1243(d) of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114–92; 129 Stat. 1062); and

(B) seeking additional missile defense assets in the European theater to protect United States and NATO forces from ground-launched missile systems of the Russian Federation that are in noncompliance with the INF Treaty.

(b) AVAILABILITY OF FUNDS.—Of the funds authorized to be appropriated by this Act for fiscal year 2018 for research, development, test, and evaluation, as specified in the funding table in division D, \$58,000,000 shall be made available for the development of—

(1) active defenses to counter ground-launched missile systems with ranges between 500 and 5,500 kilometers;

(2) counterforce capabilities to prevent attacks from these missiles; and

(3) countervailing strike capabilities to enhance the capabilities of the United States identified in section 1243(d) of the National Defense Authorization Act for Fiscal Year 2016 (Public Law 114–92; 129 Stat. 1062).

(c) DEVELOPMENT OF INF RANGE GROUND-LAUNCHED MISSILE SYSTEM.—

(1) ESTABLISHMENT OF A PROGRAM OF RECORD.—The Secretary of Defense shall establish a program of record to develop a conventional road-mobile ground-launched cruise missile system with a range of between 500 to 5,500 kilometers, including research and development activities with respect to such cruise missile system.

(2) REPORT REQUIRED.—Not later than 120 days after the date of the enactment of this Act, the Secretary of Defense shall submit to the congressional defense committees a report on the cost and schedule for, and feasibility of, modifying United States missile systems in existence or planned as of such date of enactment for ground launch with a range of between 500 and 5,500 kilometers as compared with the cost and schedule for, and feasibility of, developing a new ground-launched missile using new technology with the same range.

FOR FEDERAL CONTRACTS.**

(a) **FINDINGS.**—Congress finds that—

(1) since the passage of the Budget Control Act of 2011 (Public Law 112–25; 125 Stat. 240), many Federal agencies have started favoring longer-term Federal contracts, including multiple award contracts, over direct individual awards;

(2) these multiple award contracts have grown to more than one-fifth of Federal contract spending, with the fastest growing multiple award contracts each surpassing \$100,000,000 in obligations for the first time between 2013 and 2014;

(3) in fiscal year 2017, 17 of the 20 largest Federal contract opportunities are multiple award contracts;

(4) while Federal agencies may choose to use any or all of the various socioeconomic groups on a multiple award contract, the Small Business Administration only examines the performance of socioeconomic groups through the small business procurement scorecard and does not examine potential opportunities for those groups; and

(5) Congress and the Department of Justice have been clear that no individual socioeconomic group shall be given preference over another.

(1) the term “Administrator” means the Administrator of the Small Business Administration;

(A) a determination as to whether small business concerns and each category of covered small business concern are being utilized in a significant portion of the multiple award contracts awarded by the Federal Government, including—

(i) whether awards are reserved for concerns in 1 or more of those categories; and

(ii) whether concerns in each such category are given the opportunity to perform on multiple award contracts;

(C) any additional information as the Administrator may determine necessary.

Subtitle B—Program Authorizations, Restrictions, and Limitations

SEC. 3111. NUCLEAR SECURITY ENTERPRISE INFRASTRUCTURE MODERNIZATION INITIATIVE.

(a) FINDINGS.—Congress finds the following:

(1) On September 7, 2016, during testimony before the Subcommittee on Strategic Forces of the Committee on Armed Services of the House of Representatives—

(A) the Administrator for Nuclear Security, Frank Klotz, said—

(i) “Our infrastructure is extensive, complex, and, in many critical areas, several decades old. More than half of NNSA’s approximately 6,000 real property assets are over 40 years old, and nearly 30 percent date back to the Manhattan Project era. Many of the enterprise’s critical utility, safety, and support systems are failing at an increasing and unpredictable rate, which poses both programmatic and safety risk.”; and

(ii) “I can think of no greater threat to the nuclear security enterprise than the state of NNSA’s infrastructure.”;

(B) the President and Chief Executive Officer of Consolidated Nuclear Security, Morgan Smith, said, “Many key facilities at both [Pantex and Y-12] were constructed in the 1940s and were intended to operate for as little as one decade. Many facilities and their supporting infrastructure have exceeded or far exceeded their expected life, and major systems within the facilities are beginning to fail.”; and

(C) the Director of Los Alamos National Laboratory, Dr. Charlie McMillan, said, “One of the things that keeps me up at night is the realization that essential capabilities are held at risk by the possibility of such failures; in many cases, our enterprise has a single point of failure.”.

(2) In a letter sent on December 23, 2015, by the Secretary of Energy, Ernest Moniz, to the Director of the Office of Management and Budget, Shaun Donovan, the Secretary said, “A majority of the National Nuclear Security Administration’s (NNSA) facilities and systems are well beyond end-of-life.... Infrastructure problems such as falling ceilings are increasing in frequency and severity, unacceptably risking the safety and security of both personnel and material at NNSA facilities, as well as in some instances, potential offsite risks. The entire complex could be placed at risk if there is a single failure where a single point would disrupt a critical link in infrastructure.”.

(3) The Nuclear Posture Review published in April 2010 stated that “In order to sustain a safe, secure, and effective U.S. nuclear stockpile as long as nuclear weapons exist, the United States must possess a modern physical infrastructure.... Today’s nuclear complex, however, has fallen into neglect. Although substantial science, technology, and engineering investments were made over the last decade under the auspices of the Stockpile Stewardship Program, the complex still includes many oversized and costly-to maintain facilities built during the 1940s and 1950s. Some facilities needed for working with plutonium and uranium date back to the Manhattan Project. Safety, security, and environmental issues associated with these aging facilities are mounting, as are the costs of addressing them.”.

(4) In 2009, the bipartisan Congressional Commission on the Strategic Posture of the United States established by section 1062 of the National Defense Authorization for Fiscal Year 2008 (Public Law 110-181; 122 Stat. 319) stated, with regards to key production facilities, that “existing facilities are genuinely decrepit and are maintained in a safe and secure manner only at high cost”.

(5) Previous efforts to address the deferred maintenance and repair challenges within the nuclear security enterprise, such as the Facilities Infrastructure and Recapitalization Program and the recent halt in the growth of backlog metrics, are laudable but insufficient for the magnitude of the problem.

(6) Recent figures provided by the Administrator for Nuclear Security estimate the backlog of deferred maintenance

and repair needs of the nuclear security enterprise to be approximately \$3,700,000,000.

(b) INFRASTRUCTURE MODERNIZATION INITIATIVE.—

50 USC 2402
note.

(1) ESTABLISHMENT.—Not later than 30 days after the date of the enactment of this Act, the Administrator for Nuclear Security shall establish and carry out a program, to be known as the “Infrastructure Modernization Initiative”, to reduce the backlog of deferred maintenance and repair needs of the nuclear security enterprise (as defined in section 4002(6) of the Atomic Energy Defense Act (50 U.S.C. 2501(6))). In carrying out that program, the Administrator shall establish and execute infrastructure modernization milestones that reduce the deferred maintenance and repair needs of the nuclear security enterprise by not less than 30 percent by 2025.

(2) AUTHORITIES.—

(A) PROCESS.—

(i) IN GENERAL.—The Secretary of Energy shall provide to the Administrator a process that will enhance or streamline the ability of the Administrator to carry out the program under paragraph (1) in an efficient and effective manner, including with respect to—

(I) the demolition or construction of non-nuclear facilities of the Administration that have a total estimated project cost of less than \$100,000,000; and

(II) the decontamination, decommissioning, and demolition (to be performed in accordance with applicable health and safety standards used by the Defense Environmental Cleanup Program) of process-contaminated facilities of the Administration that have a total estimated project cost of less than \$50,000,000.

(ii) FUNDING.—Clause (i) may be carried out using amounts authorized to be appropriated for fiscal year 2018 or any subsequent fiscal year.

(B) APPLICATION OF CERTAIN REQUIREMENTS.—For purposes of the Management Procedures Memorandum 2015–01 of the Office of Management and Budget, or a successor memorandum, in carrying out the program under paragraph (1), the Administrator may—

(i) perform new construction during a fiscal year that differs from the fiscal year of corresponding facility demolition;

(ii) perform demolition of different facility category codes and have that demolition credit count towards the construction of new facilities with a different facility category code; and

(iii) have the net reduction in infrastructure footprint for the five fiscal years prior to the date of the enactment of this Act, and the demolition during the five fiscal years following such date of enactment, considered as a factor for the purpose of meeting the intent of such memorandum.

(3) INITIAL PLAN.—Not later than March 1, 2018, the Administrator shall submit to the congressional defense committees an initial plan to carry out the program under

paragraph (1) to achieve the goal specified in such paragraph. Such plan shall include—

(A) the funding required to carry out the program during the period covered by the future-years nuclear security program under section 3253 of the National Nuclear Security Administration Act (50 U.S.C. 2453);

(B) the criteria for selecting and prioritizing projects within the program under paragraph (1);

(C) mechanisms for ensuring the robust management and oversight of such projects;

(D) a description of the process provided to the Administrator to carry out the program pursuant to paragraph (2)(A); and

(E) a description of any legislative actions the Administrator recommends to further enhance or streamline authorities or processes relating to the program.

(4) REASSESSMENT.—Not later than February 1, 2024, the Administrator shall reassess the program under paragraph (1) and, as appropriate, develop and establish goals for the program beyond 2025.

(c) INCLUSION IN BIENNIAL DETAILED REPORT.—Section 4203(d)(4) of the Atomic Energy Defense Act (50 U.S.C. 2523(d)(4)) is amended—

(1) in subparagraph (B), by striking “; and” and inserting a semicolon;

(2) in subparagraph (C), by striking the period at the end and inserting “; and”; and

(3) by adding at the end the following new subparagraph:

“(D)(i) a description of—
“(I) the metrics (based on industry best practices) used by the Administrator to determine the infrastructure deferred maintenance and repair needs of the nuclear security enterprise; and

“(II) the percentage of replacement plant value being spent on maintenance and repair needs of the nuclear security enterprise; and

“(ii) an explanation of whether the annual spending on such needs complies with the recommendation of the National Research Council of the National Academies of Sciences, Engineering, and Medicine that such spending be in an amount equal to four percent of the replacement plant value, and, if not, the reasons for such noncompliance and a plan for how the Administrator will ensure facilities of the nuclear security enterprise are being properly sustained.”.

(d) REQUIREMENTS RELATING TO CRITICAL DECISIONS.—

(1) IN GENERAL.—Subtitle A of title XLVII of the Atomic Energy Defense Act (50 U.S.C. 2741 et seq.) is amended by adding at the end the following new section:

50 USC 2755.

“SEC. 4715. MATTERS RELATING TO CRITICAL DECISIONS.

“(a) POST-CRITICAL DECISION 2 CHANGES.—After the date on which a plant project specifically authorized by law and carried out under Department of Energy Order 413.3B (relating to program management and project management for the acquisition of capital assets), or a successor order, achieves critical decision 2, the Administrator may not change the requirements for such project

if such change increases the cost of such project by more than the lesser of \$5,000,000 or 15 percent, unless—

“(1) the Administrator submits to the congressional defense committees—

“(A) a certification that the Administrator, without delegation, authorizes such proposed change; and

“(B) a cost-benefit and risk analysis of such proposed change, including with respect to—

“(i) the effects of such proposed change on the project cost and schedule; and

“(ii) any mission risks and operational risks from making such change or not making such change; and

“(2) a period of 15 days elapses following the date of such submission.

(e) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the nuclear security enterprise, comprised of the infrastructure and capabilities of the laboratories and plants coupled with the dedicated and talented scientists, engineers, technicians, and administrators who form the backbone of the enterprise, are a central component of the nuclear deterrent of the United States;

(2) if left unaddressed, the state of the infrastructure within the nuclear security enterprise represents a direct, long-term threat to the credibility of the nuclear deterrent of the United States;

(3) both Congress and the President must take strong, sustained action to recapitalize and repair this infrastructure;

(4) the Administrator must continue to carry out expeditious demolition of old facilities of the Administration to reduce long-term costs and improve safety; and

(5) each budget of the President submitted to Congress under section 1105(a) of title 31, United States Code, for fiscal year 2019 and each fiscal year thereafter should include funding in an amount sufficient to carry out the program established pursuant to subsection (b)(1) to achieve the goal specified in such subsection.

SEC. 3118. NUCLEAR WARHEAD DESIGN COMPETITION.

(a) FINDINGS.—Congress finds the following:

(1) In January 2016, the co-chairs of a congressionally mandated study panel from the National Academies of Science testified to the following before the Committee on Armed Services of the House of Representatives:

(A) “The National Nuclear Security Administration (NNSA) complex must engage in robust design competitions in order to exercise the design and production skills that underpin stockpile stewardship and are necessary to meet evolving threats.”.

(B) “To exercise the full set of design skills necessary for an effective nuclear deterrent, the NNSA should develop and conduct the first in what the committee envisions to be a series of design competitions that integrate the full end-to-end process from novel design conception through engineering, building, and non-nuclear testing of a prototype.”.

(2) In March 2016 testimony before the Committee on Armed Services of the House of Representatives regarding a

December 2016 Defense Science Board report entitled, “Seven Defense Priorities for the New Administration”, members of that Board said the following:

(A) “A key contributor to nuclear deterrence is the continuous, adaptable exercise of the development, design, and production functions for nuclear weapons in both the DOD and DOE.... Yet the DOE laboratories and DOD contractor community have done little integrated design and development work outside of life extension for 25 years, let alone concept development that could serve as a hedge to surprise.”.

(B) “The Defense Science Board believes that the triad’s complementary features remain robust tenets for the design of a future force. Replacing our current, aging force is essential, but not sufficient in the more complex nuclear environment we now face to provide the adaptability or flexibility to confidently hold at risk what adversaries value. In particular, if the threat evolves in ways that favorably change the cost/benefit calculus in the view of an adversary’s leadership, then we should be in a position to quickly restore a credible deterrence posture.”.

(3) In a memorandum dated May 9, 2014, then-Secretary of Energy Ernie Moniz said the following:

(A) “If nuclear military capabilities are to provide deterrence for the nation they need to be relevant to the emerging global strategic environment. The current stockpile was designed to meet the needs of a bipolar world with roots in the Cold War era. A more complex, chaotic, and dynamic security environment is emerging. In order to uphold the Department’s mission to ensure an effective nuclear deterrent.... we must ensure our nuclear capabilities meet the challenges of known and potential geopolitical and technological trends. Therefore we must look ahead, using the expertise of our laboratories, to how the capabilities that may be employed by other nations could impact deterrence over the next several decades.”.

(B) “We must challenge our thinking about our programs of record in order to permit foresighted actions that may reduce, in the coming decades, the chances for surprise and that buttress deterrence.”.

(b) DESIGN COMPETITION.—

(1) IN GENERAL.—In accordance with paragraph (2), the Administrator for Nuclear Security, in coordination with the Chairman of the Nuclear Weapons Council, shall carry out a new and comprehensive design competition for a nuclear warhead that could be employed on ballistic missiles of the United States by 2030. Such competition shall—

(A) examine options for warhead design and related delivery system requirements in the 2030s, including—

(i) life extension of existing weapons;

(ii) new capabilities; and

(iii) such other concepts as the Administrator and the Chairman determine necessary to fully exercise and create responsive design capabilities in the enterprise and ensure a robust nuclear deterrent into the 2030s;

(B) assess how the capabilities and defenses that may be employed by other countries could impact deterrence in 2030 and beyond and how such threats could be addressed or mitigated in the warhead and related delivery systems;

(C) exercise the full set of design skills necessary for an effective nuclear deterrent and responsive enterprise through production of conceptual designs and, as the Administrator determines appropriate, production of non-nuclear prototypes of components or subsystems; and

(D) examine and recommend actions for significantly shortening timelines and significantly reducing costs associated with design, development, certification, and production of the warhead, without reducing worker or public health and safety.

(2) **TIMING.**—The Administrator shall—

(A) during fiscal year 2018, develop a plan to carry out paragraph (1); and

(B) during fiscal year 2019, implement such plan.

(c) **BRIEFING.**—Not later than March 1, 2018, the Administrator, in coordination with the Chairman, shall provide a briefing to the congressional defense committees on the plan of the Administrator to carry out the warhead design competition under subsection (b). Such briefing shall include an assessment of the costs, benefits, risks, and opportunities of such plan, particularly impacts to ongoing life extension programs and infrastructure projects.

SEC. 3136. PLAN FOR VERIFICATION, DETECTION, AND MONITORING OF NUCLEAR WEAPONS AND FISSILE MATERIAL.

(a) FINDINGS AND SENSE OF CONGRESS.—

(1) FINDINGS.—Congress finds the following:

(A) A January 2014 Defense Science Board report found that “The nuclear future will not be a linear extrapolation of the past... [and] [t]he technologies and processes designed for current treaty verification and inspections are inadequate to future monitoring realities.”

(B) Section 3133 of the Carl Levin and Howard P. “Buck” McKeon National Defense Authorization Act for Fiscal Year 2015 (Public Law 113–291; 127 Stat. 3896) required an interagency plan for monitoring of nuclear weapons and fissile material, and section 3132 of the National Defense Authorization Act for Fiscal Year 2017 (Public Law 114–328; 130 Stat. 2768) required an update of such plan. In both instances, the reports submitted failed to answer the congressional requirements, and instead provided only a brief summary of the National Security Council structure and processes.

(2) SENSE OF CONGRESS.—It is the sense of Congress that verification, detection, and monitoring of nuclear weapons and fissile material should be a priority for national security, and that the reports submitted to date do not reflect this priority, or the current and planned initiatives related to nuclear verification and detection.

(b) PLAN.—The President, in consultation with the Secretary of State, the Secretary of Defense, the Secretary of Energy, the Secretary of Homeland Security, and the Director of National Intelligence, shall develop a plan for verification and monitoring relating to the potential proliferation of nuclear weapons, components of such weapons, and fissile material.

(C) identifying and integrating roles, responsibilities, and planning for such verification, detection, and monitoring.

(2) A detailed international engagement plan for building cooperation and transparency, including bilateral and multilateral efforts, to improve inspections, detection, and monitoring.

(3) A detailed description of—

(A) current and planned research and development efforts to improve monitoring, detection, and in-field inspection and analysis capabilities, including persistent surveillance, remote monitoring, and rapid analysis of large data sets, including open-source data; and

(B) measures to coordinate technical and operational requirements early in the process.

(4) Engagement of relevant departments and agencies of the Federal Government and the military departments (including the Open Source Center and the United States Atomic Energy Detection System), national laboratories, industry, and academia.

(d) DESIGNATION OF DOE.—The President shall designate the Department of Energy as the lead agency for development of the plan under subsection (b).

SEC. 3151. SENSE OF CONGRESS REGARDING COMPENSATION OF INDIVIDUALS RELATING TO URANIUM MINING AND NUCLEAR TESTING.

(a) FINDINGS.—Congress makes the following findings:

(1) The Radiation Exposure Compensation Act (42 U.S.C. 2210 note) was enacted in 1990 to provide monetary compensation to individuals who contracted certain cancers and other serious diseases following their exposure to radiation released during atmospheric nuclear weapons testing during the Cold War or following exposure to radiation as a result of employment in the uranium industry during the Cold War.

(2) The Energy Employees Occupational Illness Compensation Program Act of 2000 (42 U.S.C. 7384 et seq.) formally acknowledged the dangers to which some employees of sites of the Department of Energy and its vendors during the Cold War were exposed. That Act also acknowledged that, although establishing the link between occupational hazards and specific diseases can be difficult, scientific evidence exists to support the conclusion that some activities related to Cold War nuclear weapons production have resulted in increased risk of illness and death to workers. That Act established a formal process for the submission of claims for medical expenses and lump sum compensation for former employees and contractors and survivors of those former employees and contractors.

(3) As of the date of the enactment of this Act, more than 145,775 claims have been paid out under the Radiation Exposure Compensation Act and the Energy Employees Occupational Illness Compensation Program Act of 2000, for a total of at least \$16,400,000,000 in lump sum compensation and medical expenses.

(d) **NORMALIZATION REQUIREMENTS.**—

26 USC 168 note.

(1) **IN GENERAL.**—A normalization method of accounting shall not be treated as being used with respect to any public utility property for purposes of section 167 or 168 of the Internal Revenue Code of 1986 if the taxpayer, in computing its cost of service for ratemaking purposes and reflecting operating results in its regulated books of account, reduces the excess tax reserve more rapidly or to a greater extent than such reserve would be reduced under the average rate assumption method.

(2) **ALTERNATIVE METHOD FOR CERTAIN TAXPAYERS.**—If, as of the first day of the taxable year that includes the date of enactment of this Act—

(A) the taxpayer was required by a regulatory agency to compute depreciation for public utility property on the basis of an average life or composite rate method, and

(B) the taxpayer's books and underlying records did not contain the vintage account data necessary to apply the average rate assumption method,

the taxpayer will be treated as using a normalization method of accounting if, with respect to such jurisdiction, the taxpayer uses the alternative method for public utility property that is subject to the regulatory authority of that jurisdiction.

(3) **DEFINITIONS.**—For purposes of this subsection—

(A) **EXCESS TAX RESERVE.**—The term “excess tax reserve” means the excess of—

(i) the reserve for deferred taxes (as described in section 168(i)(9)(A)(ii) of the Internal Revenue Code of 1986) as of the day before the corporate rate reductions provided in the amendments made by this section take effect, over

(ii) the amount which would be the balance in such reserve if the amount of such reserve were determined by assuming that the corporate rate reductions provided in this Act were in effect for all prior periods.

(B) **AVERAGE RATE ASSUMPTION METHOD.**—The average rate assumption method is the method under which the excess in the reserve for deferred taxes is reduced over the remaining lives of the property as used in its regulated books of account which gave rise to the reserve for deferred taxes. Under such method, during the time period in which the timing differences for the property reverse, the amount of the adjustment to the reserve for the deferred taxes is calculated by multiplying—

(i) the ratio of the aggregate deferred taxes for the property to the aggregate timing differences for the property as of the beginning of the period in question, by

(ii) the amount of the timing differences which reverse during such period.

(C) ALTERNATIVE METHOD.—The “alternative method” is the method in which the taxpayer—

(i) computes the excess tax reserve on all public utility property included in the plant account on the basis of the weighted average life or composite rate used to compute depreciation for regulatory purposes, and

(ii) reduces the excess tax reserve ratably over the remaining regulatory life of the property.

(4) TAX INCREASED FOR NORMALIZATION VIOLATION.—If, for any taxable year ending after the date of the enactment of this Act, the taxpayer does not use a normalization method of accounting for the corporate rate reductions provided in the amendments made by this section—

(A) the taxpayer’s tax for the taxable year shall be increased by the amount by which it reduces its excess tax reserve more rapidly than permitted under a normalization method of accounting, and

(B) such taxpayer shall not be treated as using a normalization method of accounting for purposes of subsections (f)(2) and (i)(9)(C) of section 168 of the Internal Revenue Code of 1986.
