(3) Studies estimate that precision agriculture technologies can reduce agricultural operation costs by up to 25 dollars per acre and increase farm yields by up to 70 percent by 2050.

(4) The critical cost savings and productivity benefits of precision agriculture cannot be realized without the availability of reliable broadband Internet access service delivered to the agricultural land of the United States.

(5) The deployment of broadband Internet access service to unserved agricultural land is critical to the United States

economy and to the continued leadership of the United States in global food production.

An Act

To award a Congressional Gold Medal, collectively, to the crew of the USS Indianapolis, in recognition of their perseverance, bravery, and service to the United States.

Dec. 20, 2018
[S. 2101]

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

USS Indianapolis Congressional Gold Medal Act. 31 USC 5111 note.

SECTION 1. SHORT TITLE.

This Act may be cited as the "USS Indianapolis Congressional Gold Medal Act".

SEC. 2. FINDINGS.

Congress finds the following:

(1) The Portland-class heavy cruiser USS Indianapolis received 10 battle stars between February 1942 and April 1945 while participating in major battles of World War II from the Aleutian Islands to Okinawa.

(2) The USS Indianapolis, commanded by Captain Charles Butler McVay III, carried 1,195 personnel when it set sail for the island of Tinian on July 16, 1945, to deliver components of the atomic bomb "Little Boy". The USS Indianapolis set a speed record during the portion of the trip from California to Pearl Harbor and successfully delivered the cargo on July 26, 1945. The USS Indianapolis then traveled to Guam and received further orders to join Task Group 95.7 in the Leyte Gulf in the Philippines for training. During the length of the trip, the USS Indianapolis went unescorted.

(3) On July 30, 1945, minutes after midnight, the USS Indianapolis was hit by 2 torpedoes fired by the I–58, a Japanese submarine. The resulting explosions severed the bow of the ship, sinking the ship in about 12 minutes. Of 1,195 personnel, about 900 made it into the water. While a few life rafts were deployed, most men were stranded in the water with only a kapok life jacket.

(4) At 10:25 a.m. on August 2, 1945, 4 days after the sinking of the USS Indianapolis, Lieutenant Wilbur Gwinn was piloting a PV–1 Ventura bomber and accidentally noticed men in the water who were later determined to be survivors of the sinking of the USS Indianapolis. Lieutenant Gwinn alerted a PBY aircraft, under the command of Lieutenant Adrian Marks, about the disaster. Lieutenant Marks made a dangerous open-sea landing to begin rescuing the men before any surface vessels arrived. The USS Cecil J. Doyle was the first surface ship to arrive on the scene and took considerable risk in using a searchlight as a beacon, which gave hope to survivors in the water and encouraged them to make it through

another night. The rescue mission continued well into August 3, 1945, and was well-coordinated and responsive once launched. The individuals who participated in the rescue mission conducted a thorough search, saved lives, and undertook the difficult job of identifying the remains of, and providing a proper burial for, those individuals who had died.

(5) Only 316 men survived the ordeal and the survivors had to deal with severe burns, exposure to the elements, extreme dehydration, and shark attacks.

(6) During World War II, the USS Indianapolis frequently served as the flagship for the commander of the Fifth Fleet, Admiral Raymond Spruance, survived a bomb released during a kamikaze attack (which badly damaged the ship and killed 9 members of the crew), earned a total of 10 battle stars, and accomplished a top secret mission that was critical to ending the war. The sacrifice, perseverance, and bravery of the crew of the USS Indianapolis should never be forgotten.

SEC. 3. CONGRESSIONAL GOLD MEDAL.

(a) AWARD AUTHORIZED.—The Speaker of the House of Representatives and the President pro tempore of the Senate shall make appropriate arrangements for the award, on behalf of Congress, of a single gold medal of appropriate design to the crew of the USS Indianapolis, in recognition of their perseverance, bravery, and service to the United States.

(b) DESIGN AND STRIKING.—For the purposes of the award referred to in subsection (a), the Secretary of the Treasury (referred to in this Act as the "Secretary") shall strike the gold medal with suitable emblems, devices, and inscriptions, to be determined by the Secretary.

(c) INDIANA WAR MEMORIAL MUSEUM.—

(1) IN GENERAL.—Following the award of the gold medal referred to in subsection (a), the gold medal shall be given to the Indiana War Memorial Museum in Indianapolis, Indiana, where it will be displayed as appropriate and made available for research.

(2) SENSE OF CONGRESS.—It is the sense of Congress that the Indiana War Memorial Museum should make the gold medal received under this Act available for display elsewhere, particularly at other locations and events associated with the USS Indianapolis.

SEC. 4. DUPLICATE MEDALS.

Under such regulations as the Secretary may prescribe, the Secretary may strike and sell duplicates in bronze of the gold medal struck under section 3, at a price sufficient to cover the costs of the medals, including labor, materials, dies, use of machinery, and overhead expenses.

SEC. 5. STATUS OF MEDALS.

(a) NATIONAL MEDALS.—Medals struck under this Act are national medals for purposes of chapter 51 of title 31, United States Code.

Defending Economic Livelihoods and Threatened Animals Act. 22 USC 2151p note.

SECTION 1. SHORT TITLE.

This Act may be cited as the "Defending Economic Livelihoods and Threatened Animals Act" or the "DELTA Act".

SEC. 2. FINDINGS.

Congress finds the following:

(1) The greater Okavango River Basin, which ranges from the highland plateau of Angola to northeastern Namibia and northern Botswana, and also provides critical natural resources that sustain wildlife in Zambia and Zimbabwe, is the largest freshwater watershed in southern Africa.

(2) The greater Okavango River Basin is the main source of water and livelihoods for over 1 million people, and the effective management and protection of this critical watershed will help advance important conservation and economic growth objectives for Angola, Botswana, Namibia, local communities, and the broader region.

(3) The greater Okavango River Basin is home to the largest remaining elephant population in the world, as well as other threatened wildlife species.

(4) Poaching and trafficking of threatened wildlife species in the greater Okavango River Basin has increased in recent years, and has the potential to undermine regional stability by disrupting local governance and management of resources, and supplanting key economic opportunities for community members.

(5) Governments in the region have taken important steps to coordinate through existing conservation frameworks to combat trafficking, ensure responsible resource management, support local livelihoods, and protect threatened wildlife species.

SEC. 3. SENSE OF CONGRESS.

It is the sense of Congress that it is in the interest of the United States to engage, as appropriate, with the Governments of Angola, Botswana, Namibia, and neighboring countries, and in partnership with donors, regional organizations, nongovernmental organizations, local communities, and the private sector, to advance

SEC. 4. STATEMENT OF POLICY.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

Innovations in Mentoring, Training, and Apprenticeships Act.
42 USC 1861 note.
42 USC 1862i note.

SECTION 1. SHORT TITLE.

This Act may be cited as the "Innovations in Mentoring, Training, and Apprenticeships Act".

SEC. 2. FINDINGS.

Congress finds the following:

(1) To remain competitive in the global economy, foster greater innovation, and provide a foundation for shared prosperity, the United States needs a workforce with the right mix of skills to meet the diverse needs of the economy.

(2) Evidence indicates that the returns on investments in technical skills in the labor market are strong when students successfully complete their education and gain credentials sought by employers.

(3) The responsibility for developing and sustaining a skilled technical workforce is fragmented across many groups, including educators, students, workers, employers, Federal, State, and local governments, civic associations, and other stakeholders. Such groups need to be able to coordinate and cooperate successfully with each other.

(4) Coordination among students, community colleges, secondary and post-secondary institutions, and employers would improve educational outcomes.

(5) Promising experiments currently underway may guide innovation and reform, but scalability of some of those experiments has not yet been tested.

(6) Evidence suggests that integration of academic education, technical skills development, and hands-on work experience improves outcomes and return on investment for students in secondary and post-secondary education and for skilled technical workers in different career stages.

(7) Outcomes show that mentoring can increase STEM student engagement and the rate of completion of STEM post-secondary degrees.

Section 3 of the Scientific and Advanced-Technology Act of 1992 (42 U.S.C. 1862i) is amended—

SEC. 2. FINDINGS.

Congress makes the following findings:

(1) The Indo-Pacific region—

(A) represents nearly 50 percent of the global population;

(B) is home to some of the most dynamic economies in the world; and

(C) poses security challenges that threaten to undermine United States national security interests, regional peace, and global stability.

(2) The core tenets of the United States-backed international system are being challenged, including by—

(A) China's illegal construction and militarization of artificial features in the South China Sea and coercive economic practices;

(B) North Korea's acceleration of its nuclear and ballistic missile capabilities; and

(C) the increased presence throughout Southeast Asia of the Islamic State (referred to in this Act as "ISIS") and other international terrorist organizations that threaten the United States.

(3) The economic order in the Indo-Pacific region continues to transform, presenting opportunities and challenges to United States economic interests.

(4) The United States has a fundamental interest in defending human rights and promoting the rule of law in the Indo-Pacific region. Although many countries in the region have improved the treatment of their citizens, several Indo-Pacific governments continue to commit human rights abuses and place restrictions on basic human rights and political and civil liberties.

(5) Without strong leadership from the United States, the international system, fundamentally rooted in the rule of law, may wither, to the detriment of United States, regional, and global interests. It is imperative that the United States continue to play a leading role in the Indo-Pacific region by—

(A) defending peace and security;

(B) advancing economic prosperity; and

(C) promoting respect for fundamental human rights.

(6) In 2017, the Subcommittee on East Asia, the Pacific, and International Cybersecurity Policy of the Committee on Foreign Relations of the Senate held a series of hearings on United States leadership in the Indo-Pacific region, in which—

(A) experts, including Representative Randy Forbes, Ambassador Robert Gallucci, Ms. Tami Overby, Dr. Robert

Orr, Ambassador Derek Mitchell, Ambassador Robert King, Mr. Murray Hiebert, and others detailed the security challenges, economic opportunities, and imperatives of promoting the rule of law, human rights, and democracy, in the Indo-Pacific region; and

(B) Dr. Graham Allison, the Douglas Dillon Professor of Government at the John F. Kennedy School of Government at Harvard University, testified, "As realistic students of history, Chinese leaders recognize that the role the United States has played since World War II as the architect and underwriter of regional stability and security has been essential to the rise of Asia, including China itself. But they believe that as the tide that brought the United States to Asia recedes, America must leave with it. Much as Britain's role in the Western Hemisphere faded at the beginning of the twentieth century, so must America's role in Asia as the region's historic superpower resumes its place.".

(7) The United States National Security Strategy (referred to in this Act as the "National Security Strategy"), which was released in December 2017, states—

(A) "A geopolitical competition between free and repressive visions of world order is taking place in the Indo-Pacific region. The region, which stretches from the west coast of India to the western shores of the United States, represents the most populous and economically dynamic part of the world. The United States interest in a free and open Indo-Pacific extends back to the earliest days of our republic."; and

(B) "Our vision for the Indo-Pacific excludes no nation. We will redouble our commitment to established alliances and partnerships, while expanding and deepening relationships with new partners that share respect for sovereignty, fair and reciprocal trade, and the rule of law. We will reinforce our commitment to freedom of the seas and the peaceful resolution of territorial and maritime disputes in accordance with international law. We will work with allies and partners to achieve complete, verifiable, and irreversible denuclearization on the Korean Peninsula and preserve the non-proliferation regime in Northeast Asia.".
