

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby proclaim the week beginning May 13, 1979, as Small Business Week, and I call on every American to join me in this very special tribute.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of February, in the year of our Lord nineteen hundred seventy-nine, and of the Independence of the United States of America the two hundred and third.

JIMMY CARTER

**Proclamation 4642 of February 26, 1979**

## **Quantitative Limitation on the Importation of Certain Meat**

**By the President of the United States of America**

### **A Proclamation**

The Act of August 22, 1964 (78 Stat. 594; 19 U.S.C. 1202 note), provides for the limitation of certain meat imports if import estimates exceed 110 percent of an adjusted base quantity for that year. The limitation applies to fresh, chilled, or frozen cattle meat and fresh, chilled, or frozen meat of goats and sheep, except lamb.

The Secretary of Agriculture has determined in accordance with Section 2(b) (1) of the Act that the adjusted base quantity of meat for the calendar year 1979 is 1131.6 million pounds. The Secretary has estimated (in the 1979 first quarterly estimate, 44 FR 1202) that the aggregate imports of meat for 1979 will be 1570.0 million pounds. This estimate exceeds 110 percent of the adjusted base quantity for 1979.

In accordance with Section 2(c) of the Act, the President must limit the import of meat to the adjusted base quantity for 1979 of 1131.6 million pounds, unless he increases or suspends that limitation pursuant to Section 2(d) of the Act.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, by the authority vested in me by Section 2 of the Act, do hereby proclaim as follows:

1. The total quantity of the articles specified in item 106.10 (relating to fresh, chilled, or frozen meat) and item 106.20 (relating to fresh, chilled, or frozen meat of goats and sheep (except lamb)) of part 2B, schedule 1 of the Tariff Schedules of the United States, which may be entered, or withdrawn from warehouse, for consumption during the calendar year 1979, is limited to 1131.6 million pounds.
2. In accordance with Section 2(d) of the Act, I determine that the supply of meat described in Paragraph 1 hereof will be inadequate to meet domestic demand at reasonable prices.
3. The limitation proclaimed in Paragraph 1 hereof is suspended during calendar year 1979, which suspension shall remain in effect unless because of changed circumstances it becomes necessary to take further action under the Act, and I hereby determine that the suspension for such period is necessary in order to carry out the purposes of Section 2(d) of the Act.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-sixth day of February, in the year of our Lord nineteen hundred seventy-nine,

and of the Independence of the United States of America the two hundred and third.

JIMMY CARTER

**Proclamation 4643 of March 6, 1979**

**Cancer Control Month, 1979**

**By the President of the United States of America**

**A Proclamation**

Cancer strikes more than three-quarters of a million Americans a year.

Experts no longer believe that the disease occurs spontaneously, but suspect that it is largely a response to environmental factors. If these factors can be eliminated, substantially reduced, or counteracted, then some cancers may be prevented. Therefore, the trend toward increased emphasis in cancer prevention has accelerated during the past year.

Cause and prevention is not the entire story, however. Most cancers have a lengthy latent period. Over the next 20 or more years, the disease will manifest itself in millions of people who already have been exposed to cancer-causing agents. To overcome this serious threat, we must continue to seek effective methods of early detection and treatment.

The National Cancer Program, established in 1971, is being conducted devotedly and on a massive scale by both Federal agencies and non-Federal organizations under the aegis of the National Cancer Institute. A substantial portion of the Institute's research is in such areas as cell and molecular biology, virology, immunology and tumor biology. There is also growing attention and progress in continuing care activities, such as hospices and rehabilitation programs.

Despite our aggressive attack on cancer, current statistics reveal that about 395,000 Americans will die of the disease in 1979. Only through unbending support of cancer research and control can we reverse this trend, and eventually reduce this figure to a minimum.

As a means of giving continued emphasis to the cancer problem, the Congress, by a joint resolution of March 28, 1938 (52 Stat. 148), requested the President to issue annually a proclamation setting aside the month of April as Cancer Control Month.

36 USC 150.

NOW, THEREFORE, I, JIMMY CARTER, President of the United States of America, do hereby proclaim the month of April, 1979, as Cancer Control Month. I encourage the determination of the American people to meet the challenge of this critical health problem. And I ask the medical and health professions, the communications industries, and all other interested citizens to unite in public reaffirmation of our Nation's abiding commitment to control cancer.

IN WITNESS WHEREOF, I have hereunto set my hand this sixth day of March, in the year of our Lord nineteen hundred and seventy-nine, and of the Independence of the United States of America the two hundred and third.

JIMMY CARTER
