Supra.

(b) Section 1502 is amended (1) by inserting "(a)" after "1502.", and 42 USC 300k-2.
(2) by adding at the end the following:

"(b)(1) The Congress finds that the effect of competition on decisions of providers respecting the supply of health services and facilities is diminished. The primary source of the lessening of such effect is the prevailing methods of paying for health services by public and private health insurers, particularly for inpatient health services and other institutional health services. As a result, there is duplication and excess supply of certain health services and facilities, particularly in the case of inpatient health services.

"(2) For health services, such as inpatient health services and other institutional health services, for which competition does not or will not appropriately allocate supply consistent with health systems plans and State health plans, health systems agencies and State health planning and development agencies should in the exercise of their functions under this title take actions (where appropriate to advance the purposes of quality assurance, cost effectiveness, and access and the other purposes of this title) to allocate the supply of such services.

"(3) For the health services for which competition appropriately allocates supply consistent with health systems plans and State health plans, health systems agencies and State health planning and development agencies should in the performance of their functions under this title give priority (where appropriate to advance the purposes of quality assurance, cost effectiveness, and access) to actions which would strengthen the effect of competition on the supply of such services."

"(4) The Secretary shall review on his own initiative or at the request of any Governor or designated health systems agency the appropriateness of the boundaries of the health service areas established under paragraph (3) and, if he determines that—

“(4) In issuing a certificate of need, the State shall specify in the certificate the maximum amount of capital expenditures which may be obligated under such certificate. The program shall, in accordance with regulations promulgated by the Secretary, prescribe the extent to which a project authorized by a certificate of need shall be subject to further review if the amount of capital expenditures obligated or expected to be obligated for the project exceed the maximum specified in the certificate of need.
