set forth in title V for the United States share of the cost of the North Atlantic Treaty Organization program must be increased, the Secretary may incur obligations in excess of such amount if the amount of the increase does not exceed by more than 25 percent the amount set forth in such title.

(e) **VARIATIONS IN INSTALLATION TOTALS—REPORTS BY THE SECRETARY OF DEFENSE.**—When the Secretary of Defense determines that any amount specified in title I, II, III, IV, or V must be exceeded by more than the percentages permitted in subsections (b), (c), and (d) to accomplish authorized construction or acquisition or for contribution by the United States as its share of the cost of the North Atlantic Treaty Organization infrastructure program, the Secretary of Defense or the Secretary of the military department or Director of the defense agency concerned may proceed with such construction, acquisition, or contribution after a written report of the facts relating to the increase of such amount, including a statement of the reasons for such increase, has been submitted to the Committees on Armed Services of the Senate and House of Representatives and either (1) thirty days have elapsed from the date of submission of such report, or (2) both committees have indicated approval of such construction, acquisition, or contribution. Notwithstanding the provisions in prior Military Construction Authorization Acts, the provisions of this subsection shall apply to such prior Acts.

(f) **COST AND SCOPE VARIATIONS OF INDIVIDUAL PROJECTS: REPORTS TO CONGRESS.**—No individual project authorized under title I, II, III, or IV for any specifically listed military installations for which the current working estimate is greater than the statutory upper limit for minor construction projects may be placed under contract if—

(1) the approved scope of the project is reduced in excess of 25 percent; or

(2) the current working estimate, based upon bids received, for the construction of such project exceeds by more than 25 percent the amount authorized for such project by the Congress; until a written report of the facts relating to the reduced scope or increased cost of such project, including a statement of the reasons for reduction in scope or increase in cost, has been submitted to the Committees on Armed Services of the Senate and House of Representatives and either thirty days have elapsed from the date of submission of such report or both committees have indicated approval of such reduction in scope or increase in cost, as the case may be.

The Secretary shall also include in such report each individual project with respect to which the scope was reduced by more than 25 percent in order to permit contract award within the available authorization for such project. Such report shall include all pertinent cost information for each individual project, including the amount in dollars and percentage by which the current working estimate based on the contract price for the project exceeded the amount authorized for such project by the Congress.

(h) **COST AND FLOOR AREA VARIATIONS—SOLAR ENERGY.**—The Secretary of Defense shall encourage the utilization of solar energy as a source of energy for projects authorized by this Act where utilization of solar energy would be practical and economically feasible. In order to equip any project authorized by this Act with solar heating equipment, solar cooling equipment, or both solar heating and solar cooling equipment, the Secretary of Defense may authorize increases in the cost limitations or floor area limitations for such project by such amounts as may be necessary for such purpose. Any increase under this subsection in the cost or floor area of a project authorized by this Act shall be in addition to any other increase in such cost or variation in floor area limitations authorized by this or any other Act.
