

tablished the principle of hiring according to merit in the Federal service, and although the system has been modified and refined through the years, it continues to play an essential role in ensuring the stability of the world's largest and most successful democracy. Our ability to function effectively in times of trial and upheaval and to prosper when various national crises have passed depends in no small degree upon the contributions of those who make up our civil service system.

The American civil service system succeeds because of several factors. It is built upon the concept that selection of career government employees must be based upon merit principles, the goal being to hire the most capable and qualified people to do the public's work. It also provides for a vital partnership between political leaders, who bring with them policies and programs endorsed by the electorate, and career civil servants, who provide the expertise and continuity which are essential to the effective operation of a government as large and varied as ours.

To commemorate the Centennial and to show our appreciation to Federal employees past and present, public agencies and private groups throughout America will sponsor events highlighting the history and accomplishments of the civil service system during January 1983 and in succeeding months.

96 Stat. 2093.

In recognition of the tremendous contributions of public employees to our Nation's government, the Congress, by House Joint Resolution 619, has designated January 17, 1983, as "Public Employees' Appreciation Day" and has requested the President to issue a Proclamation in observance of that day.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, in recognition of the Centennial of the Federal civil service system, do hereby proclaim January 17, 1983, as Public Employees' Appreciation Day.

I urge all Americans to join with members of the Federal civil service system, and the many professional associations and employee unions which represent them, in commemorating the centennial anniversary of the institution to which they belong and in appreciation of the countless contributions they have made on behalf of all Americans over the past one hundred years.

IN WITNESS WHEREOF, I have hereunto set my hand this 10th day of January, in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

RONALD REAGAN

*Editorial Note:* The President's memorandum for heads of executive departments and agencies, dated Jan. 10, 1983, on the centennial of the Federal civil service is printed in the *Weekly Compilation of Presidential Documents* (vol. 19, p. 28).

### Proclamation 5013 of January 12, 1983

### National Inventors' Day, 1983

*By the President of the United States of America*  
*A Proclamation*

Almost two hundred years ago, President George Washington recognized that invention and innovation were fundamental to the welfare and strength of the United States. He successfully urged the First Congress to

enact a patent statute as expressly authorized by the U.S. Constitution and wisely advised that "there is nothing which can better deserve your patronage than the promotion of science . . ." In 1790, the first patent statute initiated the transformation of the United States from an importer of technology to a world leader in technological innovation.

Today, just as in George Washington's day, inventors are the keystone of the technological progress that is so vital to the economic, environmental, and social well-being of this country. Individual ingenuity and perseverance, spurred by the incentives of the patent system, begin the process that results in improved standards of living, increased public and private productivity, creation of new industries, improved public services, and enhanced competitiveness of American products in world markets.

In recognition of the enormous contribution inventors make to the nation and the world, the Congress, pursuant to Senate Joint Resolution 140 (Public Law 97-198), has designated February 11, 1983, the anniversary of the birth of Thomas Alva Edison, one of America's most famous and prolific inventors, as National Inventors' Day. Such recognition is especially appropriate at a time when our country is striving to maintain its global position as a leader in innovation and technology. Key to our future success will be the dedication and creativity of inventors.

96 Stat. 120.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim February 11, 1983, as National Inventors' Day and call upon the people of the United States to observe this day with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this 12th day of Jan., in the year of our Lord nineteen hundred and eighty-three, and of the Independence of the United States of America the two hundred and seventh.

RONALD REAGAN

#### Proclamation 5014 of January 20, 1983

### Tricentennial Anniversary Year of German Settlement in America

*By the President of the United States of America  
A Proclamation*

On October 6, 1683, a group of thirteen Mennonite families, coming from the city of Krefeld, now in the Federal Republic of Germany, founded Germantown, Pennsylvania, today a suburb of Philadelphia. Since then, more than seven million German immigrants have entered the United States and made extraordinary human, economic, political, social, and cultural contributions to the growth and success of our great country.

Today there are more than sixty million Americans of German descent, a number about equal to the total population of the Federal Republic of Germany. More Americans claim German ancestry than any other nationality. During my address to the Bundestag in Bonn in June of last year, I spoke of the importance which the United States attaches to the Tricentennial year of 1983 commemorating German settlement in America. Despite the legacy of two world wars which found us on opposing sides, West Germany and
