The standards established under subparagraph (A) shall include uniform criteria for acceptable performance under a proficiency testing program, based on the available technology and the clinical relevance of the laboratory examination or other procedure subject to such program. The criteria shall be established for all examinations and procedures and shall be uniform for each examination and procedure. The standards shall also include a system for grading proficiency testing performance to determine whether a laboratory has performed acceptably for a particular quarter and acceptably for a particular examination or procedure or category of examination or procedure over a period of successive quarters.

**(C) Approved proficiency testing programs**

For the purpose of administering proficiency testing programs which meet the standards established under subparagraph (A), the Secretary shall approve a proficiency testing program offered by a private nonprofit organization or a State if the program meets the standards established under subparagraph (A) and the organization or State provides technical assistance to laboratories seeking to qualify under the program. The Secretary shall evaluate each program approved under this subparagraph annually to determine if the program continues to meet the standards established under subparagraph (A) and shall withdraw the approval of any program that no longer meets such standards.

**(D) Onsite testing**

The Secretary shall perform, or shall direct a program approved under subparagraph (C) to perform, onsite proficiency testing to assure compliance with the requirements of subsection (d)(5) of this section. The Secretary shall perform, on an onsite or other basis, proficiency testing to evaluate the performance of a proficiency testing program approved under subparagraph (C) and to assure quality performance by a laboratory.

**(E) Training, technical assistance, and enhanced proficiency testing**

The Secretary may, in lieu of or in addition to actions authorized under subsection (h), (i), or (j) of this section, require any laboratory which fails to perform acceptably on an individual examination and procedure or a category of examination and procedures—

(i) to undertake training and to obtain the necessary technical assistance to meet the requirements of the proficiency<sup>2</sup> testing program,

(ii) to enroll in a program of enhanced proficiency testing, or

(iii) to undertake any combination of the training, technical assistance, or testing described in clauses (i) and (ii).

**(F) Testing results**

The Secretary shall establish a system to make the results of the proficiency testing programs subject to the standards established by the Secretary under subparagraph (A) available, on a reasonable basis, upon request of any person. The Secretary shall include with results made available under this subparagraph such explanatory information as may be appropriate to assist in the interpretation of such results.

**(4) National standards for quality assurance in cytology services**

**(A) Establishment**

The Secretary shall establish national standards for quality assurance in cytology services designed to assure consistent performance by laboratories of valid and reliable cytological services.

<sup>2</sup>So in original. Probably should be "proficiency".

**(B) Standards**

The standards established under subparagraph (A) shall include—

(i) the maximum number of cytology slides that any individual may screen in a 24-hour period,

(ii) requirements that a clinical laboratory maintain a record of (I) the number of cytology slides screened during each 24-hour period by each individual who examines cytology slides for the laboratory, and (II) the number of hours devoted during each 24-hour period to screening cytology slides by such individual,

(iii) criteria for requiring rescreeing of cytological preparations, such as (I) random rescreeing of cytology specimens determined to be in the benign category, (II) focused rescreeing of such preparations in high risk groups, and (III) for each abnormal cytological result, rescreeing of all prior cytological specimens for the patient, if available,

(iv) periodic confirmation and evaluation of the proficiency of individuals involved in screening or interpreting cytological preparations, including announced and unannounced on-site proficiency testing of such individuals, with such testing to take place, to the extent practicable, under normal working conditions,

(v) procedures for detecting inadequately prepared slides, for assuring that no cytological diagnosis is rendered on such slides, and for notifying referring physicians of such slides,

(vi) requirements that all cytological screening be done on the premises of a laboratory that is certified under this section,

(vii) requirements for the retention of cytology slides by laboratories for such periods of time as the Secretary considers appropriate, and

(viii) standards requiring periodic inspection of cytology services by persons capable of evaluating the quality of cytology services.

**(g) Inspections****(1) In general**

The Secretary may, on an announced or unannounced basis, enter and inspect, during regular hours of operation, laboratories which have been issued a certificate under this section. In conducting such inspections the Secretary shall have access to all facilities, equipment, materials, records, and information that the Secretary determines have a bearing on whether the laboratory is being operated in accordance with this section. As part of such an inspection the Secretary may copy any such material or require to it<sup>3</sup> be submitted to the Secretary. An inspection under this paragraph may be made only upon presenting identification to the owner, operator, or agent in charge of the laboratory being inspected.

**(2) Compliance with requirements and standards**

The Secretary shall conduct inspections of laboratories under paragraph (1) to determine

their compliance with the requirements of subsection (d) of this section and the standards issued under subsection (f) of this section. Inspections of laboratories not accredited under subsection (e) of this section shall be conducted on a biennial basis or with such other frequency as the Secretary determines to be necessary to assure compliance with such requirements and standards. Inspections of laboratories accredited under subsection (e) of this section shall be conducted on such basis as the Secretary determines is necessary to assure compliance with such requirements and standards.

**(h) Intermediate sanctions****(1) In general**

If the Secretary determines that a laboratory which has been issued a certificate under this section no longer substantially meets the requirements for the issuance of a certificate, the Secretary may impose intermediate sanctions in lieu of the actions authorized by subsection (i) of this section.

**(2) Types of sanctions**

The intermediate sanctions which may be imposed under paragraph (1) shall consist of—

(A) directed plans of correction,

(B) civil money penalties in an amount not to exceed \$10,000 for each violation listed in subsection (i)(1) of this section or for each day of substantial noncompliance with the requirements of this section,

(C) payment for the costs of onsite monitoring, or

(D) any combination of the actions described in subparagraphs (A), (B), and (C).

**(3) Procedures**

The Secretary shall develop and implement procedures with respect to when and how each of the intermediate sanctions is to be imposed under paragraph (1). Such procedures shall provide for notice to the laboratory and a reasonable opportunity to respond to the proposed sanction and appropriate procedures for appealing determinations relating to the imposition of intermediate sanctions<sup>4</sup>

**(i) Suspension, revocation, and limitation****(1) In general**

Except as provided in paragraph (2), the certificate of a laboratory issued under this section may be suspended, revoked, or limited if the Secretary finds, after reasonable notice and opportunity for hearing to the owner or operator of the laboratory, that such owner or operator or any employee of the laboratory—

(A) has been guilty of misrepresentation in obtaining the certificate,

(B) has performed or represented the laboratory as entitled to perform a laboratory examination or other procedure which is not within a category of laboratory examinations or other procedures authorized in the certificate,

(C) has failed to comply with the requirements of subsection (d) of this section or the standards prescribed by the Secretary under subsection (f) of this section,

<sup>3</sup>So in original. Probably should be "require it to".

<sup>4</sup>So in original. Probably should be followed by a period.

(D) has failed to comply with reasonable requests of the Secretary for—

- (i) any information or materials, or
- (ii) work on materials,

that the Secretary concludes is necessary to determine the laboratory's continued eligibility for its certificate or continued compliance with the Secretary's standards under subsection (f) of this section,

(E) has refused a reasonable request of the Secretary, or any Federal officer or employee duly designated by the Secretary, for permission to inspect the laboratory and its operations and pertinent records during the hours the laboratory is in operation,

(F) has violated or aided and abetted in the violation of any provisions of this section or of any regulation promulgated thereunder, or

(G) has not complied with an intermediate sanction imposed under subsection (h) of this section.

**(2) Action before a hearing**

If the Secretary determines that—

(A) the failure of a laboratory to comply with the standards of the Secretary under subsection (f) of this section presents an imminent and serious risk to human health, or

(B) a laboratory has engaged in an action described in subparagraph (D) or (E) of paragraph (1),

the Secretary may suspend or limit the certificate of the laboratory before holding a hearing under paragraph (1) regarding such failure or refusal. The opportunity for a hearing shall be provided no later than 60 days from the effective date of the suspension or limitation. A suspension or limitation under this paragraph shall stay in effect until the decision of the Secretary made after the hearing under paragraph (1).

**(3) Ineligibility to own or operate laboratories after revocation**

No person who has owned or operated a laboratory which has had its certificate revoked may, within 2 years of the revocation of the certificate, own or operate a laboratory for which a certificate has been issued under this section. The certificate of a laboratory which has been excluded from participation under the medicare program under title XVIII of the Social Security Act [42 U.S.C. 1395 et seq.] because of actions relating to the quality of the laboratory shall be suspended for the period the laboratory is so excluded.

**(4) Improper referrals**

Any laboratory that the Secretary determines intentionally refers its proficiency testing samples to another laboratory for analysis shall have its certificate revoked for at least one year and shall be subject to appropriate fines and penalties as provided for in subsection (h) of this section.

**(j) Injunctions**

Whenever the Secretary has reason to believe that continuation of any activity by a laboratory would constitute a significant hazard to the

public health the Secretary may bring suit in the district court of the United States for the district in which such laboratory is situated to enjoin continuation of such activity. Upon proper showing, a temporary injunction or restraining order against continuation of such activity pending issuance of a final order under this subsection shall be granted without bond by such court.

**(k) Judicial review**

**(1) Petition**

Any laboratory which has had an intermediate sanction imposed under subsection (h) of this section or has had its certificate suspended, revoked, or limited under subsection (i) of this section may, at any time within 60 days after the date the action of the Secretary under subsection (i) or (h) of this section becomes final, file a petition with the United States court of appeals for the circuit wherein the laboratory has its principal place of business for judicial review of such action. As soon as practicable after receipt of the petition, the clerk of the court shall transmit a copy of the petition to the Secretary or other officer designated by the Secretary for that purpose. As soon as practicable after receipt of the copy, the Secretary shall file in the court the record on which the action of the Secretary is based, as provided in section 2112 of title 28.

**(2) Additional evidence**

If the petitioner applies to the court for leave to adduce additional evidence, and shows to the satisfaction of the court that such additional evidence is material and that there were reasonable grounds for the failure to adduce such evidence in the proceeding before the Secretary, the court may order such additional evidence (and evidence in rebuttal of such additional evidence) to be taken before the Secretary, and to be adduced upon the hearing in such manner and upon such terms and conditions as the court may deem proper. The Secretary may modify the findings of the Secretary as to the facts, or make new findings, by reason of the additional evidence so taken, and the Secretary shall file such modified or new findings, and the recommendations of the Secretary, if any, for the modification or setting aside of his original action, with the return of such additional evidence.

**(3) Judgment of court**

Upon the filing of the petition referred to in paragraph (1), the court shall have jurisdiction to affirm the action, or to set it aside in whole or in part, temporarily or permanently. The findings of the Secretary as to the facts, if supported by substantial evidence, shall be conclusive.

**(4) Finality of judgment**

The judgment of the court affirming or setting aside, in whole or in part, any such action of the Secretary shall be final, subject to review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28.

**(l) Sanctions**

Any person who intentionally violates any requirement of this section or any regulation pro-

mulgated thereunder shall be imprisoned for not more than one year or fined under title 18, or both, except that if the conviction is for a second or subsequent violation of such a requirement such person shall be imprisoned for not more than 3 years or fined in accordance with title 18, or both.

**(m) Fees**

**(1) Certificate fees**

The Secretary shall require payment of fees for the issuance and renewal of certificates, except that the Secretary shall only require a nominal fee for the issuance and renewal of certificates of waiver.

**(2) Additional fees**

The Secretary shall require the payment of fees for inspections of laboratories which are not accredited and for the cost of performing proficiency testing on laboratories which do not participate in proficiency testing programs approved under subsection (f)(3)(C) of this section.

**(3) Criteria**

**(A) Fees under paragraph (1)**

Fees imposed under paragraph (1) shall be sufficient to cover the general costs of administering this section, including evaluating and monitoring proficiency testing programs approved under subsection (f) of this section and accrediting bodies and implementing and monitoring compliance with the requirements of this section.

**(B) Fees under paragraph (2)**

Fees imposed under paragraph (2) shall be sufficient to cover the cost of the Secretary in carrying out the inspections and proficiency testing described in paragraph (2).

**(C) Fees imposed under paragraphs (1) and (2)**

Fees imposed under paragraphs (1) and (2) shall vary by group or classification of laboratory, based on such considerations as the Secretary determines are relevant, which may include the dollar volume and scope of the testing being performed by the laboratories.

**(n) Information**

On April 1, 1990 and annually thereafter, the Secretary shall compile and make available to physicians and the general public information, based on the previous calendar year, which the Secretary determines is useful in evaluating the performance of a laboratory, including—

(1) a list of laboratories which have been convicted under Federal or State laws relating to fraud and abuse, false billings, or kickbacks,

(2) a list of laboratories—

(A) which have had their certificates revoked, suspended, or limited under subsection (i) of this section, or

(B) which have been the subject of a sanction under subsection (l) of this section,

together with a statement of the reasons for the revocation, suspension, limitation, or sanction,

(3) a list of laboratories subject to intermediate sanctions under subsection (h) of this section together with a statement of the reasons for the sanctions,

(4) a list of laboratories whose accreditation has been withdrawn or revoked together with a statement of the reasons for the withdrawal or revocation,

(5) a list of laboratories against which the Secretary has taken action under subsection (j) of this section together with a statement of the reasons for such action, and

(6) a list of laboratories which have been excluded from participation under title XVIII or XIX of the Social Security Act [42 U.S.C. 1395 et seq., 1396 et seq.].

The information to be compiled under paragraphs (1) through (6) shall be information for the calendar year preceding the date the information is to be made available to the public and shall be accompanied by such explanatory information as may be appropriate to assist in the interpretation of the information compiled under such paragraphs.

**(o) Delegation**

In carrying out this section, the Secretary may, pursuant to agreement, use the services or facilities of any Federal or State or local public agency or nonprofit private organization, and may pay therefor in advance or by way of reimbursement, and in such installments, as the Secretary may determine.

**(p) State laws**

(1) Except as provided in paragraph (2), nothing in this section shall be construed as affecting the power of any State to enact and enforce laws relating to the matters covered by this section to the extent that such laws are not inconsistent with this section or with the regulations issued under this section.

(2) If a State enacts laws relating to matters covered by this section which provide for requirements equal to or more stringent than the requirements of this section or than the regulations issued under this section, the Secretary may exempt clinical laboratories in that State from compliance with this section.

#### (a) In general

Effective 2 years after October 24, 1992, each assisted reproductive technology (as defined in section 263a-7<sup>1</sup> of this title) program shall annually report to the Secretary through the Centers for Disease Control—

(1) pregnancy success rates achieved by such program through each assisted reproductive technology, and

(2) the identity of each embryo laboratory (as defined in section 263a-7<sup>1</sup> of this title) used by such program and whether the laboratory is certified under section 263a-2 of this title or has applied for such certification.

##### (2) Definition

In developing the definition of pregnancy success rates, the Secretary shall take into account the effect on success rates of age, diagnosis, and other significant factors and shall include in such rates—

(A) the basic live birth rate calculated for each assisted reproductive technology performed by an assisted reproductive technology program by dividing the number of pregnancies which result in live births by the number of ovarian stimulation procedures attempted by such program, and

**(2) Consultation**

In developing the certification program under paragraph (1), the Secretary shall consult with appropriate consumer and professional organizations with expertise in using, providing, and evaluating professional services and embryo laboratories associated with the assisted reproductive technology programs.

**(b) Distribution**

The Secretary shall distribute a description of the certification program to—

- (1) the Governor of each State,
- (2) the presiding officers of each State legislature,
- (3) the public health official of each State, and
- (4) the official responsible in each State for the operation of the State's contract with the Secretary under section 1395aa of this title,

and shall encourage such officials to assist in the State adopting such program.

**(c) Requirements**

The certification program shall include the following requirements:

**(1) Administration**

The certification program shall be administered by the State and shall provide for the inspection and certification of embryo laboratories in the State by the State or by approved accreditation organizations.

**(2) Application requirements**

The certification program shall provide for the submission of an application to a State by an embryo laboratory for certification, in such form as may be specified by the State. Such an application shall include—

- (A) assurances satisfactory to the State that the embryo laboratory will be operated in accordance with the standards under subsection (d) of this section,
- (B) a report to the State identifying the assisted reproductive technology programs with which the laboratory is associated, and

(C) such other information as the State finds necessary.

An embryo laboratory which meets the requirements of section 263a of this title shall, for the purposes of subparagraph (A) be considered in compliance with the standards referred to in such subparagraph which are the same as the standards in effect under section 263a of this title.

**(d) Standards**

The certification program shall include the following standards developed by the Secretary:

(1) A standard to assure consistent performance of procedures by each embryo laboratory certified under the certification program or by an approved accreditation organization in a State which has not adopted the certification program.

(2) A standard for a quality assurance and a quality control program to assure valid, reliable, and reproducible<sup>1</sup> procedures in the laboratory.

(3) A standard for the maintenance of records (on a program by program basis) on laboratory tests and procedures performed, including the scientific basis of, and the methodology used for, the tests, procedures, and preparation of any standards or controls, criteria for acceptable and unacceptable outcomes, criteria for sample rejection, and procedures for safe sample disposal.

(4) A standard for the maintenance of written records on personnel and facilities necessary for proper and effective operation of the laboratory, schedules of preventive maintenance, function verification for equipment, and the release of such records to the State upon demand.

(5) A standard for the use of such personnel who meet such qualifications as the Secretary may develop.

**(e) Certification under State programs**

A State may qualify to adopt the certification program if the State has submitted an application to the Secretary to adopt such program and the Secretary has approved the application. Such an application shall include—

- (1) assurances by the State satisfactory to the Secretary that the certification program within the State meets the requirements of this section,
- (2) an agreement to make such reports as the Secretary may require, and
- (3) information about any proposed use of accreditation organizations under subsection (g)<sup>2</sup> of this section.

**(f) Use of accreditation organizations**

A State which has adopted the certification program may use accreditation organizations approved under section 263a-3 of this title to inspect and certify embryo laboratories.

**(g) Inspections**

A State which qualifies to adopt the certification program within the State shall conduct

<sup>1</sup> So in original. Probably should be "reproducible".

<sup>2</sup> So in original. Probably should be subsection "(f)".

inspections in accordance with paragraph (2) to determine if laboratories in the State meet the requirements of such program. Such inspections shall be carried out by the State or by accreditation organizations used by the State under subsection (g)<sup>2</sup> of this section.

**(2) Requirements**

Inspections carried out under paragraph (1) shall—

- (A) be periodic and unannounced, or
- (B) be announced in such circumstances as the Secretary determines will not diminish the likelihood of discovering deficiencies in the operations of a laboratory.

Before making a determination under subparagraph (B), the Secretary shall make public, in such manner as to facilitate comment from any person (including any Federal or other public agency), a proposal indicating the circumstances under which announced inspections would be permitted.

**(3) Results**

The specific findings, including deficiencies, identified in an inspection carried out under paragraph (1) and any subsequent corrections to those deficiencies shall be announced and made available to the public upon request beginning no later than 60 days after the date of the inspection.

**(h) Validation inspections**

**(1) In general**

The Secretary may enter and inspect, during regular hours of operation, embryo laboratories—

- (A) which have been certified by a State under the certification program, or
- (B) which have been certified by an accreditation organization approved by the Secretary under section 263a-3 of this title,

for the purpose of determining whether the laboratory is being operated in accordance with the standards in subsection (d) of this section.

**(2) Access to facilities and records**

In conducting an inspection of an embryo laboratory under paragraph (1), the Secretary shall have access to all facilities, equipment, materials, records, and information which the Secretary determines is necessary to determine if such laboratory is being operated in accordance with the standards in subsection (d) of this section. As part of such an inspection, the Secretary may copy any material, record, or information inspected or require it to be submitted to the Secretary. Such an inspection may be made only upon the presentation of identification to the owner, operator, or agent in charge of the laboratory being inspected.

**(3) Failure to comply**

If the Secretary determines as a result of an inspection under paragraph (1) that the embryo laboratory is not in compliance with the standards in subsection (d) of this section, the Secretary shall—

- (A) notify the State in which the laboratory is located and, if appropriate, the ac-

creditation organization which certified the laboratory,

(B) make available to the public the results of the inspection,

(C) conduct additional inspections of other embryo laboratories under paragraph (1) to determine if—

- (i) such State in carrying out the certification program is reliably identifying the deficiencies of such laboratory, or
  - (ii) the accreditation organization which certified such laboratories is reliably identifying such deficiencies,<sup>3</sup> and
- (D) if the Secretary determines—

- (i) that such State in carrying out the certification program has not met the requirements applicable to such program, or
- (ii) the accreditation organization which certified such laboratory has not met the requirements of section 263a-3 of this title,

the Secretary may revoke the approval of the State certification program or revoke the approval of such accreditation organization.

**(i) Limitation**

**(1) Secretary**

In developing the certification program, the Secretary may not establish any regulation, standard, or requirement which has the effect of exercising supervision or control over the practice of medicine in assisted reproductive technology programs.

**(2) State**

In adopting the certification program, a State may not establish any regulation, standard, or requirement which has the effect of exercising supervision or control over the practice of medicine in assisted reproductive technology programs.

**(j) Term**

The term of a certification issued by a State or an accreditation organization in a State shall be prescribed by the Secretary in the certification program and shall be valid for a period of time to be defined by the Secretary through the public comment process described in subsection (h)(2)<sup>4</sup> of this section. The Secretary shall provide an application for recertification to be submitted at the time of changes in the ownership of a certified laboratory or changes in the administration of such a laboratory.

(i) the failure or violation was intentional; or

(ii) the failure or violation presents a serious risk to human health.

**(B) Hearing**

If the Secretary suspends a certificate under subparagraph (A), the Secretary shall provide an opportunity for a hearing to the owner or operator of the facility not later

#### PART G—QUARANTINE AND INSPECTION

### § 264. Regulations to control communicable diseases

#### (a) Promulgation and enforcement by Surgeon General

The Surgeon General, with the approval of the Secretary, is authorized to make and enforce such regulations as in his judgment are necessary to prevent the introduction, transmission, or spread of communicable diseases from foreign countries into the States or possessions, or from one State or possession into any other State or possession. For purposes of carrying out and enforcing such regulations, the Surgeon General may provide for such inspection, fumigation, disinfection, sanitation, pest extermination, destruction of animals or articles found to be so infected or contaminated as to be sources of dangerous infection to human beings, and other measures, as in his judgment may be necessary.

**(b) Apprehension, detention, or conditional release of individuals**

Regulations prescribed under this section shall not provide for the apprehension, detention, or conditional release of individuals except for the purpose of preventing the introduction, transmission, or spread of such communicable diseases as may be specified from time to time in Executive orders of the President upon the recommendation of the Secretary, in consultation with the Surgeon General.<sup>1</sup>

**(c) Application of regulations to persons entering from foreign countries**

Except as provided in subsection (d) of this section, regulations prescribed under this section, insofar as they provide for the apprehension, detention, examination, or conditional release of individuals, shall be applicable only to individuals coming into a State or possession from a foreign country or a possession.

Such regulations may provide that if upon examination any such individual is found to be infected, he may be detained for such time and in such manner as may be reasonably necessary. For purposes of this subsection, the term "State" includes, in addition to the several States, only the District of Columbia.

(2) For purposes of this subsection, the term "qualifying stage", with respect to a communicable disease, means that such disease—

Except as provided in title II of the Act of June 15, 1917, as amended [50 U.S.C. 191 et seq.], the Surgeon General shall control, direct, and manage all United States quarantine stations, grounds, and anchorages, designate their boundaries, and designate the quarantine officers to be in charge thereof. With the approval of the President he shall from time to time select suitable sites for and establish such additional stations, grounds, and anchorages in the States and possessions of the United States as in his judgment are necessary to prevent the introduction of communicable diseases into the States and possessions of the United States.

**(b) Hours of inspection**

The Surgeon General shall establish the hours during which quarantine service shall be performed at each quarantine station, and, upon application by any interested party, may establish quarantine inspection during the twenty-four hours of the day, or any fraction thereof, at such quarantine stations as, in his opinion, require such extended service. He may restrict the performance of quarantine inspection to hours of daylight for such arriving vessels as cannot, in his opinion, be satisfactorily inspected during hours of darkness. No vessel shall be required to undergo quarantine inspection during the hours of darkness, unless the quarantine officer at such quarantine station shall deem an immediate inspection necessary to protect the public health. Uniformity shall not be required in the hours during which quarantine inspection may be obtained at the various ports of the United States.

**(c) Overtime pay for employees of Service**

The Surgeon General shall fix a reasonable rate of extra compensation for overtime services of employees of the United States Public Health Service, Foreign Quarantine Division, performing overtime duties including the operation of vessels, in connection with the inspection or quarantine treatment of persons (passengers and crews), conveyances, or goods arriving by land, water, or air in the United States or any place subject to the jurisdiction thereof, hereinafter referred to as "employees of the Public Health Service", when required to be on duty between the hours of 6 o'clock postmeridian and 6 o'clock antemeridian (or between the hours of 7 o'clock postmeridian and 7 o'clock antemeridian at stations which have a declared workday of from 7 o'clock antemeridian to 7 o'clock postmeridian), or on Sundays or holidays, such rate, in lieu of compensation under any other provision of law, to be fixed at two times the basic hourly rate for each hour that the overtime extends beyond 6 o'clock (or 7 o'clock as the case may be) postmeridian, and two times the basic hourly rate for each overtime hour worked on Sundays or holidays. As used in this subsection, the term "basic hourly rate" shall mean the regular basic rate of pay which is applicable to such employees for work performed within their regular scheduled tour of duty.

**(d) Payment of extra compensation to United States; bond or deposit to assure payment; deposit of moneys to credit of appropriation**

(1) The said extra compensation shall be paid to the United States by the owner, agent, consignee, operator, or master or other person in charge of any conveyance, for whom, at his request, services as described in this subsection (hereinafter referred to as overtime service) are performed. If such employees have been ordered to report for duty and have so reported, and the requested services are not performed by reason of circumstances beyond the control of the employees concerned, such extra compensation shall be paid on the same basis as though the overtime services had actually been performed during the period between the time the employees were ordered to report for duty and did so report, and the time they were notified that their services would not be required, and in any case as though their services had continued for not less than one hour. The Surgeon General with the approval of the Secretary of Health and Human Services may prescribe regulations requiring the owner, agent, consignee, operator, or master or other person for whom the overtime services are performed to file a bond in such amounts and containing such conditions and with such sureties, or in lieu of a bond, to deposit money or obligations of the United States in such amount, as will assure the payment of charges under this subsection, which bond or deposit may cover one or more transactions or all transactions during a specified period: *Provided*, That no charges shall be made for services performed in connection with the inspection of (1) persons arriving by international highways, ferries, bridges, or tunnels, or the conveyances in which they arrive, or (2) persons arriving by aircraft or railroad trains, the operations of which are covered by published schedules, or the aircraft or trains in which they arrive, or (3) persons arriving by vessels operated between Canadian ports and ports on Puget Sound or operated on the Great Lakes and connecting waterways, the operations of which are covered by published schedules, or the vessels in which they arrive.

(2) Moneys collected under this subsection shall be deposited in the Treasury of the United States to the credit of the appropriation charged with the expense of the services, and the appropriations so credited shall be available for the payment of such compensation to the said employees for services so rendered.

#### CERTIFICATION OF ORGAN PROCUREMENT ORGANIZATIONS

Pub. L. 106-505, title VII, § 701(b), Nov. 13, 2000, 114 Stat. 2346, and Pub. L. 106-554, § 1(a)(1) [title II, § 219(a)], Dec. 21, 2000, 114 Stat. 2763, 2763A-28, provided that: “Congress makes the following findings:

“(1) Organ procurement organizations play an important role in the effort to increase organ donation in the United States.

“(2) The current process for the certification and recertification of organ procurement organizations conducted by the Department of Health and Human Services has created a level of uncertainty that is interfering with the effectiveness of organ procurement organizations in raising the level of organ donation.

“(3) The General Accounting Office [now Government Accountability Office], the Institute of Medicine, and the Harvard School of Public Health have

identified substantial limitations in the organ procurement organization certification and recertification process and have recommended changes in that process.

“(4) The limitations in the recertification process include:

“(A) An exclusive reliance on population-based measures of performance that do not account for the potential in the population for organ donation and do not permit consideration of other outcome and process standards that would more accurately reflect the relative capability and performance of each organ procurement organization.

“(B) A lack of due process to appeal to the Secretary of Health and Human Services for recertification on either substantive or procedural grounds.

“(5) The Secretary of Health and Human Services has the authority under section 1138(b)(1)(A)(i) of the Social Security Act (42 U.S.C. 1320b-8(b)(1)(A)(i)) to extend the period for recertification of an organ procurement organization from 2 to 4 years on the basis of its past practices in order to avoid the inappropriate disruption of the nation’s organ system.

“(6) The Secretary of Health and Human Services can use the extended period described in paragraph (5) for recertification of all organ procurement organizations to—

“(A) develop improved performance measures that would reflect organ donor potential and interim outcomes, and to test these measures to ensure that they accurately measure performance differences among the organ procurement organizations; and

“(B) improve the overall certification process by incorporating process as well as outcome performance measures, and developing equitable processes for appeals.”

#### STUDY REGARDING IMMUNOSUPPRESSIVE DRUGS

“(1) IN GENERAL.—The Secretary of Health and Human Services (referred to in this subsection as the ‘Secretary’) shall provide for a study to determine the costs of immunosuppressive drugs that are provided to children pursuant to organ transplants and to determine the extent to which health plans and health insurance cover such costs. The Secretary may carry out the study directly or through a grant to the Institute of Medicine (or other public or nonprofit private entity).

“(2) RECOMMENDATIONS REGARDING CERTAIN ISSUES.—The Secretary shall ensure that, in addition to making determinations under paragraph (1), the study under such paragraph makes recommendations regarding the following issues:

“(A) The costs of immunosuppressive drugs that are provided to children pursuant to organ transplants and to determine the extent to which health plans, health insurance and government programs cover such costs.

“(B) The extent of denial of organs to be released for transplant by coroners and medical examiners.

“(C) The special growth and developmental issues that children have pre- and post-organ transplantation.

“(D) Other issues that are particular to the special health and transplantation needs of children.

“(3) REPORT.—The Secretary shall ensure that, not later than December 31, 2001, the study under paragraph (1) is completed and a report describing the findings of the study is submitted to the Congress.”

**§ 274k. National Program****(a) Establishment**

The Secretary, acting through the Administrator of the Health Resources and Services Administration, shall by one or more contracts establish and maintain a C.W. Bill Young Cell Transplantation Program (referred to in this section as the “Program”), successor to the National Bone Marrow Donor Registry, that has the purpose of increasing the number of transplants for recipients suitably matched to biologically unrelated donors of bone marrow and cord blood, and that meets the requirements of this section. The Secretary may award a separate contract to perform each of the major functions of the Program described in paragraphs (1) and (2) of subsection (d) of this section if deemed necessary by the Secretary to operate an effective and efficient system that is in the best interest of patients. The Secretary shall conduct a separate competition for the initial establishment of the cord blood functions of the Program. The Program shall be under the general supervision of the Secretary. The Secretary shall establish an Advisory Council to advise, assist, consult with, and make recommendations to the Secretary on matters related to the activities carried out by the Program. The members of the Advisory Council shall be appointed in accordance with the following:

(1) Each member of the Advisory Council shall serve for a term of 2 years, and each such member may serve as many as 3 consecutive 2-year terms, except that—

(A) such limitations shall not apply to the Chair of the Advisory Council (or the Chair-elect) or to the member of the Advisory Council who most recently served as the Chair; and

(B) one additional consecutive 2-year term may be served by any member of the Advisory Council who has no employment, governance, or financial affiliation with any donor center, recruitment organization, transplant center, or cord blood bank.

(2) A member of the Advisory Council may continue to serve after the expiration of the term of such member until a successor is appointed.

PART M—NATIONAL PROGRAM OF CANCER REGISTRIES

§ 280e. National program of cancer registries

(a) In general

(1) Statewide cancer registries

The Secretary, acting through the Director of the Centers for Disease Control, may make grants to States, or may make grants or enter into contracts with academic or nonprofit organizations designated by the State to operate the State’s cancer registry in lieu of making a grant directly to the State, to support the operation of population-based, statewide registries to collect, for each condition specified in paragraph (2)(A), data concerning—

- (A) demographic information about each case of cancer;
- (B) information on the industrial or occupational history of the individuals with the cancers, to the extent such information is available from the same record;
- (C) administrative information, including date of diagnosis and source of information;
- (D) pathological data characterizing the cancer, including the cancer site, stage of disease (pursuant to Staging Guide), incidence, and type of treatment; and
- (E) other elements determined appropriate by the Secretary.

(2) Cancer; benign brain-related tumors

(A) In general

For purposes of paragraph (1), the conditions referred to in this paragraph are the following:

- (i) Each form of in-situ and invasive cancer (with the exception of basal cell and squamous cell carcinoma of the skin), including malignant brain-related tumors.
- (ii) Benign brain-related tumors.

(B) Brain-related tumor

For purposes of subparagraph (A):

(i) The term “brain-related tumor” means a listed primary tumor (whether malignant or benign) occurring in any of the following sites:

- (I) The brain, meninges, spinal cord, cauda equina, a cranial nerve or nerves, or any other part of the central nervous system.
- (II) The pituitary gland, pineal gland, or craniopharyngeal duct.

(ii) The term “listed”, with respect to a primary tumor, means a primary tumor that is listed in the International Classification of Diseases for Oncology (commonly referred to as the ICD-O).

(iii) The term “International Classification of Diseases for Oncology” means a classification system that includes topography (site) information and histology (cell type information) developed by the World Health Organization, in collaboration with international centers, to promote international comparability in the collection, classification, processing, and presentation of cancer statistics. The ICD-O system is a supplement to the Inter-

national Statistical Classification of Diseases and Related Health Problems (commonly known as the ICD) and is the standard coding system used by cancer registries worldwide. Such term includes any modification made to such system for purposes of the United States. Such term further includes any published classification system that is internationally recognized as a successor to the classification system referred to in the first sentence of this clause.

**(C) Statewide cancer registry**

References in this section to cancer registries shall be considered to be references to registries described in this subsection.

**(b) Matching funds**

**(1) In general**

The Secretary may make a grant under subsection (a) of this section only if the State, or the academic or nonprofit private organization designated by the State to operate the cancer registry of the State, involved agrees, with respect to the costs of the program, to make available (directly or through donations from public or private entities) non-Federal contributions toward such costs in an amount that is not less than 25 percent of such costs or \$1 for every \$3 of Federal funds provided in the grant.

**(2) Determination of amount of non-Federal contribution; maintenance of effort**

(A) Non-Federal contributions required in paragraph (1) may be in cash or in kind, fairly evaluated, including plant, equipment, or services. Amounts provided by the Federal Government, or services assisted or subsidized to any significant extent by the Federal Government, may not be included in determining the amount of such non-Federal contributions.

(B) With respect to a State in which the purpose described in subsection (a) of this section is to be carried out, the Secretary, in making a determination of the amount of non-Federal contributions provided under paragraph (1), may include only such contributions as are in excess of the amount of such contributions made by the State toward the collection of data on cancer for the fiscal year preceding the first year for which a grant under subsection (a) of this section is made with respect to the State. The Secretary may decrease the amount of non-Federal contributions that otherwise would have been required by this subsection in those cases in which the State can demonstrate that decreasing such amount is appropriate because of financial hardship.

**(c) Eligibility for grants**

**(1) In general**

No grant shall be made by the Secretary under subsection (a) of this section unless an application has been submitted to, and approved by, the Secretary. Such application shall be in such form, submitted in such a manner, and be accompanied by such information, as the Secretary may specify. No such application may be approved unless it contains assurances that the applicant will use

the funds provided only for the purposes specified in the approved application and in accordance with the requirements of this section, that the application will establish such fiscal control and fund accounting procedures as may be necessary to assure proper disbursement and accounting of Federal funds paid to the applicant under subsection (a) of this section, and that the applicant will comply with the peer review requirements under sections 289 and 289a of this title.

**(2) Assurances**

Each applicant, prior to receiving Federal funds under subsection (a) of this section, shall provide assurances satisfactory to the Secretary that the applicant will—

(B) comply with appropriate standards of completeness, timeliness, and quality of population-based cancer registry data;

(C) provide for the annual publication of reports of cancer data under subsection (a) of this section; and

(D) provide for the authorization under State law of the statewide cancer registry, including promulgation of regulations providing—

(i) a means to assure complete reporting of cancer cases (as described in subsection (a) of this section) to the statewide cancer registry by hospitals or other facilities providing screening, diagnostic or therapeutic services to patients with respect to cancer;

(ii) a means to assure the complete reporting of cancer cases (as defined in subsection (a) of this section) to the statewide cancer registry by physicians, surgeons, and all other health care practitioners diagnosing or providing treatment for cancer patients, except for cases directly referred to or previously admitted to a hospital or other facility providing screening, diagnostic or therapeutic services to patients in that State and reported by those facilities;

(iii) a means for the statewide cancer registry to access all records of physicians and surgeons, hospitals, outpatient clinics, nursing homes, and all other facilities, individuals, or agencies providing such services to patients which would identify cases of cancer or would establish characteristics of the cancer, treatment of the cancer, or medical status of any identified patient;

(iv) for the reporting of cancer case data to the statewide cancer registry in such a format, with such data elements, and in accordance with such standards of quality timeliness and completeness, as may be established by the Secretary;

(v) for the protection of the confidentiality of all cancer case data reported to the statewide cancer registry, including a prohibition on disclosure to any person of information reported to the statewide cancer registry that identifies, or could lead to the identification of, an individual cancer

patient, except for disclosure to other State cancer registries and local and State health officers;

(vi) for a means by which confidential case data may in accordance with State law be disclosed to cancer researchers for the purposes of cancer prevention, control and research;

(vii) for the authorization or the conduct, by the statewide cancer registry or other persons and organizations, of studies utilizing statewide cancer registry data, including studies of the sources and causes of cancer, evaluations of the cost, quality, efficacy, and appropriateness of diagnostic, therapeutic, rehabilitative, and preventative services and programs relating to cancer, and any other clinical, epidemiological, or other cancer research; and

(viii) for protection for individuals complying with the law, including provisions specifying that no person shall be held liable in any civil action with respect to a cancer case report provided to the statewide cancer registry, or with respect to access to cancer case information provided to the statewide cancer registry.

**(d) Relationship to certain programs**

**(1) In general**

This section may not be construed to act as a replacement for or diminishment of the program carried out by the Director of the National Cancer Institute and designated by such Director as the Surveillance, Epidemiology, and End Results Program (SEER).

**(2) Supplanting of activities**

In areas where both such programs exist, the Secretary shall ensure that SEER support is not supplanted and that any additional activities are consistent with the guidelines provided for in subsection (c)(2)(C) and (D) of this section and are appropriately coordinated with the existing SEER program.

**(3) Transfer of responsibility**

The Secretary may not transfer administration responsibility for such SEER program from such Director.

**(4) Coordination**

To encourage the greatest possible efficiency and effectiveness of Federally supported efforts with respect to the activities described in this subsection, the Secretary shall take steps to assure the appropriate coordination of programs supported under this part with existing Federally supported cancer registry programs.

Pub. L. 108-377, §2, Oct. 30, 2004, 118 Stat. 2202, provided that: "The Congress finds the following:

- "(1) Asthma is a chronic condition requiring lifetime, ongoing medical intervention.
- "(2) In 1980, 6,700,000 Americans had asthma.
- "(3) In 2001, 20,300,000 Americans had asthma; 6,300,000 children under age 18 had asthma.
- "(4) The prevalence of asthma among African-American children was 40 percent greater than among Caucasian children, and more than 26 percent of all asthma deaths are in the African-American population.

“(5) In 2000, there were 1,800,000 asthma-related visits to emergency departments (more than 728,000 of these involved children under 18 years of age).

“(6) In 2000, there were 465,000 asthma-related hospitalizations (214,000 of these involved children under 18 years of age).

“(7) In 2000, 4,487 people died from asthma, and of these 223 were children.

“(8) According to the Centers for Disease Control and Prevention, asthma is a common cause of missed school days, accounting for approximately 14,000,000 missed school days annually.

“(9) According to the New England Journal of Medicine, working parents of children with asthma lose an estimated \$1,000,000,000 a year in productivity.

“(10) At least 30 States have legislation protecting the rights of children to carry and self-administer asthma metered-dose inhalers, and at least 18 States expand this protection to epinephrine auto-injectors.

“(11) Tragic refusals of schools to permit students to carry their inhalers and auto-injectable epinephrine have occurred, some resulting in death and spawning litigation.

“(13) No school should interfere with the patient-physician relationship.

“(14) Anaphylaxis, or anaphylactic shock, is a systemic allergic reaction that can kill within minutes. Anaphylaxis occurs in some asthma patients. According to the American Academy of Allergy, Asthma, and Immunology, people who have experienced symptoms of anaphylaxis previously are at risk for subsequent reactions and should carry an epinephrine auto-injector with them at all times, if prescribed.

“(15) An increasing number of students and school staff have life-threatening allergies. Exposure to the affecting allergen can trigger anaphylaxis. Anaphylaxis requires prompt medical intervention with an injection of epinephrine.”

(B) The development of on-site access to services to address the safety, medical, mental health, and economic needs of patients either by increasing the capacity of existing health care professionals and behavioral and public health staff to address domestic violence, dating violence, sexual assault, and stalking, by contracting with or hiring domestic or sexual assault advocates to provide the services, or to model other services appropriate to the geographic and cultural needs of a site.

**(d) Authorization of appropriations**

There is authorized to be appropriated to award grants under this section, \$5,000,000 for each of fiscal years 2007 through 2011.

(July 1, 1944, ch. 373, title III, §399P, formerly §399O, as added Pub. L. 109-162, title V, §504, Jan. 5, 2006, 119 Stat. 3026; renumbered §399P, Pub. L. 109-450, §4(1), Dec. 22, 2006, 120 Stat. 3342.)

FINDINGS

Pub. L. 109-162, title V, §501, Jan. 5, 2006, 119 Stat. 3023, provided that: "Congress makes the following findings:

"(1) The health-related costs of intimate partner violence in the United States exceed \$5,800,000,000 annually.

"(2) Thirty-seven percent of all women who sought care in hospital emergency rooms for violence-related injuries were injured by a current or former spouse, boyfriend, or girlfriend.

"(3) In addition to injuries sustained during violent episodes, physical and psychological abuse is linked to a number of adverse physical and mental health effects. Women who have been abused are much more likely to suffer from chronic pain, diabetes, depression, unintended pregnancies, substance abuse and sexually transmitted infections, including HIV/AIDS.

"(4) Health plans spend an average of \$1,775 more a year on abused women than on general enrollees.

"(5) Each year about 324,000 pregnant women in the United States are battered by the men in their lives. This battering leads to complications of pregnancy, including low weight gain, anemia, infections, and first and second trimester bleeding.

"(6) Pregnant and recently pregnant women are more likely to be victims of homicide than to die of any other pregnancy-related cause, and evidence exists that a significant proportion of all female homicide victims are killed by their intimate partners.

"(7) Children who witness domestic violence are more likely to exhibit behavioral and physical health problems including depression, anxiety, and violence towards peers. They are also more likely to attempt suicide, abuse drugs and alcohol, run away from home, engage in teenage prostitution, and commit sexual assault crimes.

"(8) Recent research suggests that women experiencing domestic violence significantly increase their safety-promoting behaviors over the short- and long-term when health care providers screen for, identify, and provide followup care and information to address the violence.

"(9) Currently, only about 10 percent of primary care physicians routinely screen for intimate partner abuse during new patient visits and 9 percent routinely screen for intimate partner abuse during periodic checkups.

"(10) Recent clinical studies have proven the effectiveness of a 2-minute screening for early detection of abuse of pregnant women. Additional longitudinal studies have tested a 10-minute intervention that was proven highly effective in increasing the safety of pregnant abused women. Comparable research does not yet exist to support the effectiveness of screening men.

"(11) Seventy to 81 percent of the patients studied reported that they would like their healthcare providers to ask them privately about intimate partner violence."

PURPOSE

Pub. L. 109-162, title V, §502, Jan. 5, 2006, 119 Stat. 3024, provided that: "It is the purpose of this title [enacting this section, sections 294h and 13973 of this title, and provisions set out as a note above] to improve the health care system's response to domestic violence, dating violence, sexual assault, and stalking through the training and education of health care providers, developing comprehensive public health responses to violence against women and children, increasing the number of women properly screened, identified, and treated for lifetime exposure to violence, and expanding research on effective interventions in the health care setting."

#### FINDINGS AND PURPOSES

Pub. L. 107-280, §2, Nov. 6, 2002, 116 Stat. 1988, provided that:

“(a) FINDINGS.—Congress makes the following findings:

“(1) Rare diseases and disorders are those which affect small patient populations, typically populations smaller than 200,000 individuals in the United States. Such diseases and conditions include Huntington’s disease, amyotrophic lateral sclerosis (Lou Gehrig’s disease), Tourette syndrome, Crohn’s disease, cystic fibrosis, cystinosis, and Duchenne muscular dystrophy.

“(2) For many years, the 25,000,000 Americans suffering from the over 6,000 rare diseases and disorders were denied access to effective medicines because prescription drug manufacturers could rarely make a profit from marketing drugs for such small groups of patients. The prescription drug industry did not adequately fund research into such treatments. Despite the urgent health need for these medicines, they came to be known as ‘orphan drugs’ because no companies would commercialize them.

“(3) During the 1970s, an organization called the National Organization for Rare Disorders (NORD) was founded to provide services and to lobby on behalf of patients with rare diseases and disorders. NORD was instrumental in pressing Congress for legislation to encourage the development of orphan drugs.

“(4) The Orphan Drug Act [Pub. L. 97-414, see Short Title of 1983 Amendments note set out under section 301 of Title 21, Food and Drugs] created financial incentives for the research and production of such orphan drugs. New Federal programs at the National Institutes of Health and the Food and Drug Administration encouraged clinical research and commercial product development for products that target rare diseases. An Orphan Products Board was established to promote the development of drugs and devices for rare diseases or disorders.

“(5) Before 1983, some 38 orphan drugs had been developed. Since the enactment of the Orphan Drug Act [Jan. 4, 1983], more than 220 new orphan drugs have been approved and marketed in the United States and more than 800 additional drugs are in the research pipeline.

“(6) Despite the tremendous success of the Orphan Drug Act, rare diseases and disorders deserve greater emphasis in the national biomedical research enterprise. The Office of Rare Diseases at the National Institutes of Health was created in 1993, but lacks a statutory authorization.

“(7) The National Institutes of Health has received a substantial increase in research funding from Congress for the purpose of expanding the national investment of the United States in behavioral and biomedical research.

“(8) Notwithstanding such increases, funding for rare diseases and disorders at the National Institutes of Health has not increased appreciably.

“(9) To redress this oversight, the Department of Health and Human Services has proposed the establishment of a network of regional centers of excellence for research on rare diseases.

“(b) PURPOSES.—The purposes of this Act [see Short Title of 2002 Amendments note set out under section 201 of this title] are to—

“(1) amend the Public Health Service Act [this chapter] to establish an Office of Rare Diseases at the National Institutes of Health; and

“(2) increase the national investment in the development of diagnostics and treatments for patients with rare diseases and disorders.”

### § 283i. Rare disease regional centers of excellence

#### (a) Cooperative agreements and grants

##### (1) In general

The Director of the Office of Rare Diseases (in this section referred to as the “Director”), in collaboration with the directors of the other relevant institutes and centers of the National Institutes of Health, may enter into cooperative agreements with and make grants to public or private nonprofit entities to pay all or part of the cost of planning, establishing, or strengthening, and providing basic operating support for regional centers of excellence for clinical research into, training in, and demonstration of diagnostic, prevention, control, and treatment methods for rare diseases.

##### (2) Policies

A cooperative agreement or grant under paragraph (1) shall be entered into in accordance with policies established by the Director of NIH.

#### (b) Coordination with other institutes

The Director shall coordinate the activities under this section with similar activities con-

ducted by other national research institutes, centers and agencies of the National Institutes of Health and by the Food and Drug Administration to the extent that such institutes, centers and agencies have responsibilities that are related to rare diseases.

#### (c) Uses for Federal payments under cooperative agreements or grants

Federal payments made under a cooperative agreement or grant under subsection (a) of this section may be used for—

(1) staffing, administrative, and other basic operating costs, including such patient care costs as are required for research;

(2) clinical training, including training for allied health professionals, continuing education for health professionals and allied health professions personnel, and information programs for the public with respect to rare diseases; and

(3) clinical research and demonstration programs.

#### (d) Period of support; additional periods

Support of a center under subsection (a) of this section may be for a period of not to exceed 5 years. Such period may be extended by the Director for additional periods of not more than 5 years if the operations of such center have been reviewed by an appropriate technical and scientific peer review group established by the Director and if such group has recommended to the Director that such period should be extended.

(July 1, 1944, ch. 373, title IV, §404G, as added Pub. L. 107-280, §4, Nov. 6, 2002, 116 Stat. 1990; amended Pub. L. 109-482, title I, §103(b)(6), Jan. 15, 2007, 120 Stat. 3687.)

#### AMENDMENTS

2007—Subsec. (e). Pub. L. 109-482 struck out heading and text of subsec. (e). Text read as follows: “For the purpose of carrying out this section, there are authorized to be appropriated such sums as already have been appropriated for fiscal year 2002, and \$20,000,000 for each of the fiscal years 2003 through 2006.”

#### EFFECTIVE DATE OF 2007 AMENDMENT

Amendment by Pub. L. 109-482 applicable only with respect to amounts appropriated for fiscal year 2007 or subsequent fiscal years, see section 109 of Pub. L. 109-482, set out as a note under section 281 of this title.

L. 106-505. Such section 409D was renumbered section 409H of act July 1, 1944, ch. 373, by Pub. L. 107-109, § 3(2), Jan. 4, 2002, 115 Stat. 1408. Another section 409D of act July 1, 1944, ch. 373, as added by section 1001 of Pub. L. 106-310, is classified to section 284h of this title.

FINDINGS AND PURPOSE

Pub. L. 106-505, title II, § 202, Nov. 13, 2000, 114 Stat. 2325, provided that:

“(a) FINDINGS.—Congress makes the following findings:

“(1) Clinical research is critical to the advancement of scientific knowledge and to the development of cures and improved treatment for disease.

“(2) Tremendous advances in biology are opening doors to new insights into human physiology, pathophysiology and disease, creating extraordinary opportunities for clinical research.

“(3) Clinical research includes translational research which is an integral part of the research process leading to general human applications. It is the bridge between the laboratory and new methods of diagnosis, treatment, and prevention and is thus essential to progress against cancer and other diseases.

“(4) The United States will spend more than \$1,200,000,000,000 on health care in 1999, but the Federal budget for health research at the National Institutes of Health was \$15,600,000,000 only 1 percent of that total.

“(5) Studies at the Institute of Medicine, the National Research Council, and the National Academy of Sciences have all addressed the current problems in clinical research.

“(6) The Director of the National Institutes of Health has recognized the current problems in clinical research and appointed a special panel, which recommended expanded support for existing National Institutes of Health clinical research programs and the creation of new initiatives to recruit and retain clinical investigators.

“(7) The current level of training and support for health professionals in clinical research is fragmented, undervalued, and underfunded.

“(8) Young investigators are not only apprentices for future positions but a crucial source of energy, enthusiasm, and ideas in the day-to-day research that constitutes the scientific enterprise. Serious questions about the future of life-science research are raised by the following:

“(A) The number of young investigators applying for grants dropped by 54 percent between 1985 and 1993.

“(B) The number of physicians applying for first-time National Institutes of Health research project grants fell from 1226 in 1994 to 963 in 1998, a 21 percent reduction.

“(C) Newly independent life-scientists are expected to raise funds to support their new research programs and a substantial proportion of their own salaries.

“(9) The following have been cited as reasons for the decline in the number of active clinical researchers, and those choosing this career path:

“(A) A medical school graduate incurs an average debt of \$85,619, as reported in the Medical School Graduation Questionnaire by the Association of American Medical Colleges (AAMC).

“(B) The prolonged period of clinical training required increases the accumulated debt burden.

“(C) The decreasing number of mentors and role models.

“(D) The perceived instability of funding from the National Institutes of Health and other Federal agencies.

“(E) The almost complete absence of clinical research training in the curriculum of training grant awardees.

“(F) Academic Medical Centers are experiencing difficulties in maintaining a proper environment for research in a highly competitive health care marketplace, which are compounded by the decreased willingness of third party payers to cover health care costs for patients engaged in research studies and research procedures.

“(10) In 1960, general clinical research centers were established under the Office of the Director of the National Institutes of Health with an initial appropriation of \$3,000,000.

“(11) Appropriations for general clinical research centers in fiscal year 1999 equaled \$200,500,000.

“(12) Since the late 1960s, spending for general clinical research centers has declined from approximately 3 percent to 1 percent of the National Institutes of Health budget.

“(13) In fiscal year 1999, there were 77 general clinical research centers in operation, supplying patients in the areas in which such centers operate with access to the most modern clinical research and clinical research facilities and technologies.

“(b) PURPOSE.—It is the purpose of this title [see Short Title of 2000 Amendments note set out under section 201 of this title] to provide additional support for and to expand clinical research programs.”

OVERSIGHT BY GAO

Pub. L. 106-505, title II, § 207, Nov. 13, 2000, 114 Stat. 2330, provided that, not later than 18 months after Nov. 13, 2000, the Comptroller General was to submit to Congress a report describing the extent to which the National Institutes of Health had complied with the amendments made by title II of Pub. L. 106-505.

The Secretary, acting through the National Institutes of Health, shall award funds to entities that have the expertise to conduct pediatric clinical trials or other research (including qualified universities, hospitals, laboratories, contract research organizations, practice groups, federally funded programs such as pediatric pharmacology research units, other public or private institutions, or individuals) to enable the entities to conduct the drug studies or other research on the issues described in subsection (a). The Secretary may use contracts, grants, or other appropriate funding mechanisms to award funds under this subsection.

**(c) Process for proposed pediatric study requests and labeling changes**

**(1) Submission of proposed pediatric study request**

The Director of the National Institutes of Health shall, as appropriate, submit proposed pediatric study requests for consideration by the Commissioner of Food and Drugs for pediatric studies of a specific pediatric indication identified under subsection (a). Such a proposed pediatric study request shall be made in a manner equivalent to a written request made under subsection (b) or (c) of section 505A of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 355a], including with respect to the information provided on the pediatric studies to be conducted pursuant to the request. The Director of the National Institutes of Health may submit a proposed pediatric study request for a drug for which—

(A)(i) there is an approved application under section 505(j) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 355(j)]; or

(ii) there is a submitted application that could be approved under the criteria of such section; and

(B) there is no patent protection or market exclusivity protection for at least one form of the drug under the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 301 et seq.]; and

(C) additional studies are needed to assess the safety and effectiveness of the use of the drug in the pediatric population.

**(2) Written request to holders of approved applications for drugs lacking exclusivity**

The Commissioner of Food and Drugs, in consultation with the Director of the National Institutes of Health, may issue a written request based on the proposed pediatric study request for the indication or indications submitted pursuant to paragraph (1) (which shall include a timeframe for negotiations for an agreement) for pediatric studies concerning a drug identified under subsection (a) to all holders of an approved application for the drug under section 505 of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 355]. Such a written request shall be made in a manner equivalent to the manner in which a written request is made under subsection (b) or (c) of section 505A of such Act [21 U.S.C. 355a], including with respect to information provided on the pediatric studies to be conducted pursuant to the request and using appropriate formulations for each age group for which the study is requested.

**(3) Requests for proposals**

If the Commissioner of Food and Drugs does not receive a response to a written request issued under paragraph (2) not later than 30 days after the date on which a request was issued, the Secretary, acting through the Director of the National Institutes of Health and in consultation with the Commissioner of Food and Drugs, shall publish a request for proposals to conduct the pediatric studies described in the written request in accordance with subsection (b).

**(4) Disqualification**

A holder that receives a first right of refusal shall not be entitled to respond to a request for proposals under paragraph (3).

**(5) Contracts, grants, or other funding mechanisms**

A contract, grant, or other funding may be awarded under this section only if a proposal is submitted to the Secretary in such form and manner, and containing such agreements, assurances, and information as the Secretary determines to be necessary to carry out this section.

**(6) Reporting of studies**

**(A) In general**

On completion of a pediatric study in accordance with an award under this section, a report concerning the study shall be submitted to the Director of the National Insti-

**(B) Availability of reports**

Each report submitted under subparagraph (A) shall be considered to be in the public domain (subject to section 505A(d)(4) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 355a(d)(4)]) and shall be assigned a docket number by the Commissioner of Food and Drugs. An interested person may submit written comments concerning such pediatric studies to the Commissioner of Food and Drugs, and the written comments shall become part of the docket file with respect to each of the drugs.

**(C) Action by Commissioner**

The Commissioner of Food and Drugs shall take appropriate action in response to the reports submitted under subparagraph (A) in accordance with paragraph (7).

**(7) Requests for labeling change**

During the 180-day period after the date on which a report is submitted under paragraph (6)(A), the Commissioner of Food and Drugs shall—

(A) review the report and such other data as are available concerning the safe and effective use in the pediatric population of the drug studied;

(B) negotiate with the holders of approved applications for the drug studied for any labeling changes that the Commissioner of Food and Drugs determines to be appropriate and requests the holders to make; and

(C)(i) place in the public docket file a copy of the report and of any requested labeling changes; and

**(8) Dispute resolution**

**(A) Referral to Pediatric Advisory Committee**

If, not later than the end of the 180-day period specified in paragraph (7), the holder of an approved application for the drug involved does not agree to any labeling change requested by the Commissioner of Food and Drugs under that paragraph, the Commissioner of Food and Drugs shall refer the request to the Pediatric Advisory Committee.

**(B) Action by the Pediatric Advisory Committee**

Not later than 90 days after receiving a referral under subparagraph (A), the Pediatric Advisory Committee shall—

(ii) make a recommendation to the Commissioner of Food and Drugs as to appropriate labeling changes, if any.

**(9) FDA determination**

Not later than 30 days after receiving a recommendation from the Pediatric Advisory

Committee under paragraph (8)(B)(ii) with respect to a drug, the Commissioner of Food and Drugs shall consider the recommendation and, if appropriate, make a request to the holders of approved applications for the drug to make any labeling change that the Commissioner of Food and Drugs determines to be appropriate.

**(10) Failure to agree**

If a holder of an approved application for a drug, within 30 days after receiving a request to make a labeling change under paragraph (9), does not agree to make a requested labeling change, the Commissioner of Food and Drugs may deem the drug to be misbranded under the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 301 et seq.].

**(11) No effect on authority**

Nothing in this subsection limits the authority of the United States to bring an enforcement action under the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 301 et seq.] when a drug lacks appropriate pediatric labeling. Neither course of action (the Pediatric Advisory Committee process or an enforcement action referred to in the preceding sentence) shall preclude, delay, or serve as the basis to stay the other course of action.

**(d) Dissemination of pediatric information**

Not later than one year after September 27, 2007, the Secretary, acting through the Director of the National Institutes of Health, shall study the feasibility of establishing a compilation of information on pediatric drug use and report the findings to Congress.

EFFECTIVE DATE OF 2007 AMENDMENT

Amendment by Pub. L. 109-482 applicable only with respect to amounts appropriated for fiscal year 2007 or subsequent fiscal years, see section 109 of Pub. L. 109-482, set out as a note under section 281 of this title.

FINDINGS

Pub. L. 106-505, title V, § 502, Nov. 13, 2000, 114 Stat. 2342, provided that: “The Congress finds that—

- “(1) lupus is a serious, complex, inflammatory, autoimmune disease of particular concern to women;
- “(2) lupus affects women nine times more often than men;
- “(3) there are three main types of lupus: systemic lupus, a serious form of the disease that affects many parts of the body; discoid lupus, a form of the disease that affects mainly the skin; and drug-induced lupus caused by certain medications;
- “(4) lupus can be fatal if not detected and treated early;
- “(5) the disease can simultaneously affect various areas of the body, such as the skin, joints, kidneys, and brain, and can be difficult to diagnose because the symptoms of lupus are similar to those of many other diseases;
- “(6) lupus disproportionately affects African-American women, as the prevalence of the disease among such women is three times the prevalence among white women, and an estimated 1 in 250 African-American women between the ages of 15 and 65 develops the disease;
- “(7) it has been estimated that between 1,400,000 and 2,000,000 Americans have been diagnosed with the disease, and that many more have undiagnosed cases;

“(8) current treatments for the disease can be effective, but may lead to damaging side effects;

“(9) many victims of the disease suffer debilitating pain and fatigue, making it difficult to maintain employment and lead normal lives; and

“(10) in fiscal year 1996, the amount allocated by the National Institutes of Health for research on lupus was \$33,000,000, which is less than one-half of 1 percent of the budget for such Institutes.”

**§ 285d-7. Advisory Board**

## AMENDMENTS

2007—Subsec. (d). Pub. L. 109-482 struck out subsec. (d) which related to appropriations for fiscal years 2001 to 2003.

## EFFECTIVE DATE OF 2007 AMENDMENT

Amendment by Pub. L. 109-482 applicable only with respect to amounts appropriated for fiscal year 2007 or subsequent fiscal years, see section 109 of Pub. L. 109-482, set out as a note under section 281 of this title.

## EFFECTIVE DATE

Pub. L. 106-580, §4, Dec. 29, 2000, 114 Stat. 3092, provided that: “This Act [enacting this subpart, amending section 281 of this title, and enacting provisions set out as notes under this section and section 201 of this title] takes effect October 1, 2000, or upon the date of the enactment of this Act [Dec. 29, 2000], whichever occurs later.”

## FINDINGS

Pub. L. 106-580, §2, Dec. 29, 2000, 114 Stat. 3088, provided that: “The Congress makes the following findings:

“(1) Basic research in imaging, bioengineering, computer science, informatics, and related fields is critical to improving health care but is fundamentally different from the research in molecular biology on which the current national research institutes at the National Institutes of Health (“NIH”) are based. To ensure the development of new techniques and technologies for the 21st century, these disciplines therefore require an identity and research home at

the NIH that is independent of the existing institute structure.

“(2) Advances based on medical research promise new, more effective treatments for a wide variety of diseases, but the development of new, noninvasive imaging techniques for earlier detection and diagnosis of disease is essential to take full advantage of such new treatments and to promote the general improvement of health care.

“(3) The development of advanced genetic and molecular imaging techniques is necessary to continue the current rapid pace of discovery in molecular biology.

“(4) Advances in telemedicine, and teleradiology in particular, are increasingly important in the delivery of high quality, reliable medical care to rural citizens and other underserved populations. To fulfill the promise of telemedicine and related technologies fully, a structure is needed at the NIH to support basic research focused on the acquisition, transmission, processing, and optimal display of images.

“(5) A number of Federal departments and agencies support imaging and engineering research with potential medical applications, but a central coordinating body, preferably housed at the NIH, is needed to coordinate these disparate efforts and facilitate the transfer of technologies with medical applications.

“(6) Several breakthrough imaging technologies, including magnetic resonance imaging (‘MRI’) and computed tomography (‘CT’), have been developed primarily abroad, in large part because of the absence of a home at the NIH for basic research in imaging and related fields. The establishment of a central focus for imaging and bioengineering research at the NIH would promote both scientific advance and United States economic development.

“(7) At a time when a consensus exists to add significant resources to the NIH in coming years, it is appropriate to modernize the structure of the NIH to ensure that research dollars are expended more effectively and efficiently and that the fields of medical science that have contributed the most to the detection, diagnosis, and treatment of disease in recent years receive appropriate emphasis.

“(8) The establishment of a National Institute of Biomedical Imaging and Bioengineering at the NIH would accelerate the development of new technologies with clinical and research applications, improve coordination and efficiency at the NIH and throughout the Federal Government, reduce duplication and waste, lay the foundation for a new medical information age, promote economic development, and provide a structure to train the young researchers who will make the pathbreaking discoveries of the next century.”

#### ESTABLISHMENT OF INSTITUTE AND ADVISORY COUNCIL

Pub. L. 106-580, §3(b)-(d), Dec. 29, 2000, 114 Stat. 3091, provided that:

“(b) USE OF EXISTING RESOURCES.—In providing for the establishment of the National Institute of Biomedical Imaging and Bioengineering pursuant to the amendment made by subsection (a) [enacting this subpart], the Director of the National Institutes of Health (referred to in this subsection as ‘NIH’)—

“(1) may transfer to the National Institute of Biomedical Imaging and Bioengineering such personnel of NIH as the Director determines to be appropriate;

“(2) may, for quarters for such Institute, utilize such facilities of NIH as the Director determines to be appropriate; and

“(3) may obtain administrative support for the Institute from the other agencies of NIH, including the other national research institutes.

“(c) CONSTRUCTION OF FACILITIES.—None of the provisions of this Act [enacting this subpart, amending section 281 of this title, and enacting provisions set out as notes under this section and section 201 of this title] or the amendments made by the Act may be construed as

authorizing the construction of facilities, or the acquisition of land, for purposes of the establishment or operation of the National Institute of Biomedical Imaging and Bioengineering.

“(d) DATE CERTAIN FOR ESTABLISHMENT OF ADVISORY COUNCIL.—Not later than 90 days after the effective date of this Act [Dec. 29, 2000] under section 4 [set out above], the Secretary of Health and Human Services shall complete the establishment of an advisory council for the National Institute of Biomedical Imaging and Bioengineering in accordance with section 406 of the Public Health Service Act [section 284a of this title] and in accordance with section 464z of such Act (as added by subsection (a) of this section) [this section].”

## FINDINGS

Pub. L. 106-505, title III, §302, Nov. 13, 2000, 114 Stat. 2330, provided that: “Congress finds that—

“(1) the National Institutes of Health is the principal source of Federal funding for medical research at universities and other research institutions in the United States;

“(2) the National Institutes of Health has received a substantial increase in research funding from Congress for the purpose of expanding the national investment of the United States in behavioral and biomedical research;

“(3) the infrastructure of our research institutions is central to the continued leadership of the United States in medical research;

“(4) as Congress increases the investment in cutting-edge basic and clinical research, it is critical that Congress also examine the current quality of the laboratories and buildings where research is being conducted, as well as the quality of laboratory equipment used in research;

“(5) many of the research facilities and laboratories in the United States are outdated and inadequate;

“(6) the National Science Foundation found, in a 1998 report on the status of biomedical research facilities, that over 60 percent of research-performing institutions indicated that they had an inadequate amount of medical research space;

“(7) the National Science Foundation reports that academic institutions have deferred nearly \$11,000,000,000 in renovation and construction projects because of a lack of funds; and

“(8) future increases in Federal funding for the National Institutes of Health must include increased support for the renovation and construction of extramural research facilities in the United States and the purchase of state-of-the-art laboratory instrumentation.”

## § 287a-3. Construction of regional centers for research on primates

(a) With respect to activities carried out by the National Center for Research Resources to support regional centers for research on primates, the Director of NIH may, for each of the fiscal years 2000 through 2002, reserve from the amounts appropriated to carry out section 287a-2 of this title such sums as necessary for the purpose of making awards of grants and contracts to public or nonprofit private entities to construct, renovate, or otherwise improve such regional centers. The reservation of such amounts for any fiscal year is subject to the availability of qualified applicants for such awards.

(b) The Director of NIH may not make a grant or enter into a contract under subsection (a) of this section unless the applicant for such assistance agrees, with respect to the costs to be incurred by the applicant in carrying out the purpose described in such subsection, to make available (directly or through donations from public or private entities) non-Federal contributions in cash toward such costs in an amount equal to not less than \$1 for each \$4 of Federal funds provided in such assistance.

(July 1, 1944, ch. 373, title IV, §481B, as added Pub. L. 103-43, title XV, §1503, June 10, 1993, 107 Stat. 178; amended Pub. L. 105-392, title IV, §411, Nov. 13, 1998, 112 Stat. 3590; Pub. **§ 287a-3a. Sanctuary system for surplus chimpanzees**

**(a) In general**

The Secretary shall provide for the establishment and operation in accordance with this section of a system to provide for the lifetime care of chimpanzees that have been used, or were bred or purchased for use, in research conducted or supported by the National Institutes of Health, the Food and Drug Administration, or other agencies of the Federal Government, and with respect to which it has been determined by the Secretary that the chimpanzees are not needed for such research (in this section referred to as “surplus chimpanzees”).

**(b) Administration of sanctuary system**

The Secretary shall carry out this section, including the establishment of regulations under subsection (d) of this section, in consultation with the board of directors of the nonprofit private entity that receives the contract under subsection (e) of this section (relating to the operation of the sanctuary system).

**(c) Acceptance of chimpanzees into system**

All surplus chimpanzees owned by the Federal Government shall be accepted into the sanctuary system. Subject to standards under subsection (d)(4) of this section, any chimpanzee that is not owned by the Federal Government can be accepted into the system if the owner transfers to the sanctuary system title to the chimpanzee.

**(d) Standards for permanent retirement of surplus chimpanzees**

**(1) In general**

Not later than 180 days after December 20, 2000, the Secretary shall by regulation establish standards for operating the sanctuary system to provide for the permanent retirement of surplus chimpanzees. In establishing the standards, the Secretary shall consider the recommendations of the board of directors of the nonprofit private entity that receives the contract under subsection (e) of this section, and shall consider the recommendations of the National Research Council applicable to surplus chimpanzees that are made in the report published in 1997 and entitled “Chimpanzees in Research—Strategies for Their Ethical Care, Management, and Use”.

**(2) Chimpanzees accepted into system**

With respect to chimpanzees that are accepted into the sanctuary system, standards

under paragraph (1) shall include the following:

(A) A prohibition that the chimpanzees may not be used for research, except as authorized under paragraph (3).

(B) Provisions regarding the housing of the chimpanzees.

(C) Provisions regarding the behavioral well-being of the chimpanzees.

(D) A requirement that the chimpanzees be cared for in accordance with the Animal Welfare Act [7 U.S.C. 2131 et seq.].

(E) A requirement that the chimpanzees be prevented from breeding.

(F) A requirement that complete histories be maintained on the health and use in research of the chimpanzees.

(G) A requirement that the chimpanzees be monitored for the purpose of promptly detecting the presence in the chimpanzees of any condition that may be a threat to the public health or the health of other chimpanzees.

(H) A requirement that chimpanzees posing such a threat be contained in accordance with applicable recommendations of the Director of the Centers for Disease Control and Prevention.

(I) A prohibition that none of the chimpanzees may be subjected to euthanasia, except as in the best interests of the chimpanzee involved, as determined by the system and an attending veterinarian.

(J) A prohibition that the chimpanzees may not be discharged from the system.

(K) A provision that the Secretary may, in the discretion of the Secretary, accept into the system chimpanzees that are not surplus chimpanzees.

(L) Such additional standards as the Secretary determines to be appropriate.

**(3) Restrictions regarding research**

**(A) In general**

For purposes of paragraph (2)(A), standards under paragraph (1) shall provide that a chimpanzee accepted into the sanctuary system may not be used for studies or research, except that the chimpanzee may be used for noninvasive behavioral studies or medical studies based on information collected during the course of normal veterinary care that is provided for the benefit of the chimpanzee, provided that any such study involves minimal physical and mental harm, pain, distress, and disturbance to the chimpanzee and the social group in which the chimpanzee lives.

**(B) Additional restriction**

For purposes of paragraph (2)(A), a condition for the use in studies or research of a chimpanzee accepted into the sanctuary system is (in addition to conditions under subparagraph (A) of this paragraph) that the applicant for such use has not been fined for, or signed a consent decree for, any violation of the Animal Welfare Act [7 U.S.C. 2131 et seq.].

**(4) Non-Federal chimpanzees offered for acceptance into system**

With respect to a chimpanzee that is not owned by the Federal Government and is of-

ferred for acceptance into the sanctuary system, standards under paragraph (1) shall include the following:

(A) A provision that the Secretary may authorize the imposition of a fee for accepting such chimpanzee into the system, except as follows:

(i) Such a fee may not be imposed for accepting the chimpanzee if, on the day before December 20, 2000, the chimpanzee was owned by the nonprofit private entity that receives the contract under subsection (e) of this section or by any individual sanctuary facility receiving a subcontract or grant under subsection (e)(1) of this section.

(ii) Such a fee may not be imposed for accepting the chimpanzee if the chimpanzee is owned by an entity that operates a primate center, and if the chimpanzee is housed in the primate center pursuant to the program for regional centers for research on primates that is carried out by the National Center for Research Resources.

Any fees collected under this subparagraph are available to the Secretary for the costs of operating the system. Any other fees received by the Secretary for the long-term care of chimpanzees (including any Federal fees that are collected for such purpose and are identified in the report under section 3 of the Chimpanzee Health Improvement, Maintenance, and Protection Act) are available for operating the system, in addition to availability for such other purposes as may be authorized for the use of the fees.

(B) A provision that the Secretary may deny such chimpanzee acceptance into the system if the capacity of the system is not sufficient to accept the chimpanzee, taking into account the physical capacity of the system; the financial resources of the system; the number of individuals serving as the staff of the system, including the number of professional staff; the necessity of providing for the safety of the staff and of the public; the necessity of caring for accepted chimpanzees in accordance with the standards under paragraph (1); and such other factors as may be appropriate.

(C) A provision that the Secretary may deny such chimpanzee acceptance into the system if a complete history of the health and use in research of the chimpanzee is not available to the Secretary.

(D) Such additional standards as the Secretary determines to be appropriate.

**(e) Award of contract for operation of system**

**(1) In general**

Subject to the availability of funds pursuant to subsection (g) of this section, the Secretary shall make an award of a contract to a nonprofit private entity under which the entity has the responsibility of operating (and establishing, as applicable) the sanctuary system and awarding subcontracts or grants to individual sanctuary facilities that meet the standards under subsection (d) of this section.

**(2) Requirements**

The Secretary may make an award under paragraph (1) to a nonprofit private entity only if the entity meets the following requirements:

(A) The entity has a governing board of directors that is composed and appointed in accordance with paragraph (3) and is satisfactory to the Secretary.

(B) The terms of service for members of such board are in accordance with paragraph (3).

(C) The members of the board serve without compensation. The members may be reimbursed for travel, subsistence, and other necessary expenses incurred in carrying out the duties of the board.

(D) The entity has an executive director meeting such requirements as the Secretary determines to be appropriate.

(E) The entity makes the agreement described in paragraph (4) (relating to non-Federal contributions).

(F) The entity agrees to comply with standards under subsection (d) of this section.

(G) The entity agrees to make necropsy reports on chimpanzees in the sanctuary system available on a reasonable basis to persons who conduct biomedical or behavioral research, with priority given to such persons who are Federal employees or who receive financial support from the Federal Government for research.

(H) Such other requirements as the Secretary determines to be appropriate.

**(3) Board of directors**

For purposes of subparagraphs (A) and (B) of paragraph (2):

(A) The governing board of directors of the nonprofit private entity involved is composed and appointed in accordance with this paragraph if the following conditions are met:

(i) Such board is composed of not more than 13 voting members.

(ii) Such members include individuals with expertise and experience in the science of managing captive chimpanzees (including primate veterinary care), appointed from among individuals endorsed by organizations that represent individuals in such field.

(viii) Such members include an additional member who serves as the chair of the board, appointed from among individuals who have been endorsed for purposes of clause (ii), (iii), (iv), or (v).

(ix) None of the members of the board has been fined for, or signed a consent decree for, any violation of the Animal Welfare Act [7 U.S.C. 2131 et seq.].

(B) The terms of service for members of the board of directors are in accordance with this paragraph if the following conditions are met:

(i) The term of the chair of the board is 3 years.

(ii) The initial members of the board select, by a random method, one member from each of the six fields specified in subparagraph (A) to serve a term of 2 years and (in addition to the chair) one member from each of such fields to serve a term of 3 years.

(iii) After the initial terms under clause (ii) expire, each member of the board (other than the chair) is appointed to serve a term of 2 years.

(iv) An individual whose term of service expires may be reappointed to the board.

(v) A vacancy in the membership of the board is filled in the manner in which the original appointment was made.

(vi) If a member of the board does not serve the full term applicable to the member, the individual appointed to fill the resulting vacancy is appointed for the remainder of the term of the predecessor member.

#### (4) Requirement of matching funds

The agreement required in paragraph (2)(E) for a nonprofit private entity (relating to the award of the contract under paragraph (1)) is an agreement that, with respect to the costs to be incurred by the entity in establishing and operating the sanctuary system, the entity will make available (directly or through donations from public or private entities) non-Federal contributions toward such costs, in cash or in kind, in an amount not less than the following, as applicable:

(A) For expenses associated with establishing the sanctuary system (as determined by the Secretary), 10 percent of such costs (\$1 for each \$9 of Federal funds provided under the contract under paragraph (1)).

(B) For expenses associated with operating the sanctuary system (as determined by the Secretary), 25 percent of such costs (\$1 for each \$3 of Federal funds provided under such contract).

#### (5) Establishment of contract entity

If the Secretary determines that an entity meeting the requirements of paragraph (2)

does not exist, not later than 60 days after December 20, 2000, the Secretary shall, for purposes of paragraph (1), make a grant for the establishment of such an entity, including paying the cost of incorporating the entity under the law of one of the States.

#### (f) Definitions

For purposes of this section:

##### (1) Permanent retirement

The term “permanent retirement”, with respect to a chimpanzee that has been accepted into the sanctuary system, means that under subsection (a) of this section the system provides for the lifetime care of the chimpanzee, that under subsection (d)(2) of this section the system does not permit the chimpanzee to be used in research (except as authorized under subsection (d)(3) of this section) or to be euthanized (except as provided in subsection (d)(2)(I) of this section), that under subsection (d)(2) of this section the system will not discharge the chimpanzee from the system, and that under such subsection the system otherwise cares for the chimpanzee.

##### (2) Sanctuary system

The term “sanctuary system” means the system described in subsection (a) of this section.

##### (3) Secretary

The term “Secretary” means the Secretary of Health and Human Services.

##### (4) Surplus chimpanzees

The purposes for which funds reserved under the preceding sentence may be expended include the construction and renovation of facilities for the sanctuary system.

##### (2) Limitation

Funds may not be reserved for a fiscal year under paragraph (1) unless the amount appropriated under this chapter for such year equals or exceeds the amount appropriated under this chapter for fiscal year 1999.

##### (3) Use of funds for other compliant facilities

With respect to amounts reserved under paragraph (1) for a fiscal year, the Secretary may use a portion of such amounts to make awards of grants or contracts to public or private entities operating facilities that, as determined by the board of directors of the non-

profit private entity that receives the contract under subsection (e) of this section, provide for the retirement of chimpanzees in accordance with the same standards that apply to the sanctuary system pursuant to regulations under subsection (d) of this section. Such an award may be expended for the expenses of operating the facilities involved.

Subsec. (l). Pub. L. 109-482, § 103(b)(44), struck out heading and text of subsec. (l). Text read as follows: “For the purpose of carrying out this subpart, there are authorized to be appropriated \$100,000,000 for fiscal year 2001, and such sums as may be necessary for each of the fiscal years 2002 through 2005. Such authorization of appropriations is in addition to other authorizations of appropriations that are available for the conduct and support of minority health disparities research or other health disparities research by the agencies of the National Institutes of Health.”

#### EFFECTIVE DATE OF 2007 AMENDMENT

Amendment by Pub. L. 109-482 applicable only with respect to amounts appropriated for fiscal year 2007 or subsequent fiscal years, see section 109 of Pub. L. 109-482, set out as a note under section 281 of this title.

#### FINDINGS

Pub. L. 106-525, § 2, Nov. 22, 2000, 114 Stat. 2495, provided that: “The Congress finds as follows:

“(1) Despite notable progress in the overall health of the Nation, there are continuing disparities in the burden of illness and death experienced by African Americans, Hispanics, Native Americans, Alaska Natives, and Asian Pacific Islanders, compared to the United States population as a whole.

“(2) The largest numbers of the medically underserved are white individuals, and many of them have the same health care access problems as do members of minority groups. Nearly 20,000,000 white individuals live below the poverty line with many living in nonmetropolitan, rural areas such as Appalachia, where the high percentage of counties designated as health professional shortage areas (47 percent) and the high rate of poverty contribute to disparity outcomes. However, there is a higher proportion of racial and ethnic minorities in the United States represented among the medically underserved.

“(3) There is a national need for minority scientists in the fields of biomedical, clinical, behavioral, and health services research. Ninety percent of minority physicians educated at Historically Black Medical Colleges live and serve in minority communities.

“(4) Demographic trends inspire concern about the Nation’s ability to meet its future scientific, technological, and engineering workforce needs. Historically, non-Hispanic white males have made up the majority of the United States scientific, technological, and engineering workers.

“(5) The Hispanic and Black population will increase significantly in the next 50 years. The scientific, technological, and engineering workforce may decrease if participation by underrepresented minorities remains the same.

“(6) Increasing rates of Black and Hispanic workers can help ensure a strong scientific, technological, and engineering workforce.

“(7) Individuals such as underrepresented minorities and women in the scientific, technological, and engineering workforce enable society to address its diverse needs.

“(8) If there had not been a substantial increase in the number of science and engineering degrees awarded to women and underrepresented minorities over the past few decades, the United States would be facing even greater shortages in scientific, technological, and engineering workers.

“(9) In order to effectively promote a diverse and strong 21st century scientific, technological, and engineering workforce, Federal agencies should expand or add programs that effectively overcome barriers such as educational transition from one level to the next and student requirements for financial resources.

“(10) Federal agencies should work in concert with the private nonprofit sector to emphasize the recruitment and retention of qualified individuals from ethnic and gender groups that are currently underrepresented in the scientific, technological, and engineering workforce.

“(11) Behavioral and social sciences research has increased awareness and understanding of factors associated with health care utilization and access, patient attitudes toward health services, and risk and protective behaviors that affect health and illness. These factors have the potential to then be modified to help close the health disparities gap among ethnic minority populations. In addition, there is a shortage of minority behavioral science researchers and behavioral health care professionals. According to the National Science Foundation, only 15.5 percent of behavioral research-oriented psychology doctorate degrees were awarded to minority students in 1997. In addition, only 17.9 percent of practice-oriented psychology doctorate degrees were awarded to ethnic minorities.”

#### REPORT REGARDING RESOURCES OF NATIONAL INSTITUTES OF HEALTH DEDICATED TO MINORITY AND OTHER HEALTH DISPARITIES RESEARCH

Pub. L. 106-525, title I, § 105, Nov. 22, 2000, 114 Stat. 2504, which required the Director of the National Center on Minority Health and Health Disparities to submit to Congress, the Secretary of Health and Human Services, and the Director of the NIH a report, not later than Dec. 1, 2003, containing recommendations for the methodology to be used to determine the extent of NIH resources dedicated to minority health disparities research and a determination of whether there had been an increase in the level of NIH resources dedicated to minority health disparities research, was repealed by Pub. L. 109-482, title I, § 104(b)(3)(G), Jan. 15, 2007, 120 Stat. 3694.

#### PUBLIC AWARENESS AND DISSEMINATION OF INFORMATION ON HEALTH DISPARITIES

Pub. L. 106-525, title V, § 501, Nov. 22, 2000, 114 Stat. 2510, provided that:

“(a) PUBLIC AWARENESS ON HEALTH DISPARITIES.—The Secretary of Health and Human Services (in this section referred to as the ‘Secretary’) shall conduct a national campaign to inform the public and health care professionals about health disparities in minority and other underserved populations by disseminating information and materials available on specific diseases affecting these populations and programs and activities to address these disparities. The campaign shall—

“(1) have a specific focus on minority and other underserved communities with health disparities; and

“(2) include an evaluation component to assess the impact of the national campaign in raising awareness of health disparities and information on available resources.

“(b) DISSEMINATION OF INFORMATION ON HEALTH DISPARITIES.—The Secretary shall develop and implement a plan for the dissemination of information and findings with respect to health disparities under titles I, II, III, and IV of this Act [see Tables for classification]. The plan shall—

“(1) include the participation of all agencies of the Department of Health and Human Services that are responsible for serving populations included in the health disparities research; and

“(2) have agency-specific strategies for disseminating relevant findings and information on health disparities and improving health care services to affected communities.”

#### TERMINATION OF ADVISORY COUNCILS

Advisory councils established after Jan. 5, 1973, to terminate not later than the expiration of the 2-year period beginning on the date of their establishment, unless, in the case of a council established by the President or an officer of the Federal Government, such council is renewed by appropriate action prior to the expiration of such 2-year period, or in the case of a council established by Congress, its duration is otherwise provided by law. See sections 3(2) and 14 of Pub. L. 92-463, Oct. 6, 1972, 86 Stat. 770, 776, set out in the Appendix to Title 5, Government Organization and Employees.

#### (b) Required use of funds

An award may be made under subsection (a) of this section only if the applicant involved agrees that the grant will be expended—

(1) to train members of minority health disparity populations or other health disparity populations as professionals in the area of biomedical or behavioral research or both; or

(2) to expand, remodel, renovate, or alter existing research facilities or construct new research facilities for the purpose of conducting

##### (1) In general

For purposes of this section, a designated biomedical and behavioral research institution is a biomedical and behavioral research institution that—

(A) has a significant number of members of minority health disparity populations or other health disparity populations enrolled as students in the institution (including individuals accepted for enrollment in the institution);

(B) has been effective in assisting such students of the institution to complete the program of education or training and receive the degree involved;

(C) has made significant efforts to recruit minority students to enroll in and graduate from the institution, which may include providing means-tested scholarships and other financial assistance as appropriate; and

(D) has made significant recruitment efforts to increase the number of minority or other members of health disparity populations serving in faculty or administrative positions at the institution.

##### (2) Consortium

**(1) Protection of human research subjects**

(A) In the case of any application submitted to the Secretary for financial assistance to conduct research, the Secretary may not approve or fund any application that is subject to review under section 289(a) of this title by an Institutional Review Board unless the application has undergone review in accordance with such section and has been recommended for approval by a majority of the members of the Board conducting such review.

(B) In the case of research that is subject to review under procedures established by the Secretary for the protection of human subjects in clinical research conducted by the National Institutes of Health, the Secretary may not authorize the conduct of the research unless the research has, pursuant to such procedures, been recommended for approval.

The report shall include the information considered in making the findings.

(C) An ethics board shall be composed of no fewer than 14, and no more than 20, individuals who are not officers or employees of the United States. **§ 289a-2. Inclusion of women and minorities in clinical research**

**(a) Requirement of inclusion**

**(1) In general**

In conducting or supporting clinical research for purposes of this subchapter, the Director of NIH shall, subject to subsection (b) of this section, ensure that—

(A) women are included as subjects in each project of such research; and

(B) members of minority groups are included as subjects in such research.

**(2) Outreach regarding participation as subjects**

The Director of NIH, in consultation with the Director of the Office of Research on Women's Health and the Director of the Office of Research on Minority Health, shall conduct or support outreach programs for the recruitment of women and members of minority groups as subjects in projects of clinical research.

**(b) Inapplicability of requirement**

The requirement established in subsection (a) of this section regarding women and members of minority groups shall not apply to a project of clinical research if the inclusion, as subjects in the project, of women and members of minority groups, respectively—

(1) is inappropriate with respect to the health of the subjects;

(2) is inappropriate with respect to the purpose of the research; or

(3) is inappropriate under such other circumstances as the Director of NIH may designate.

**(c) Design of clinical trials**

In the case of any clinical trial in which women or members of minority groups will under subsection (a) of this section be included as subjects, the Director of NIH shall ensure that the trial is designed and carried out in a manner sufficient to provide for a valid analysis of whether the variables being studied in the trial affect women or members of minority groups, as the case may be, differently than other subjects in the trial.

**(d) Guidelines**

**(1) In general**

Subject to paragraph (2), the Director of NIH, in consultation with the Director of the Office of Research on Women's Health and the Director of the Office of Research on Minority Health, shall establish guidelines regarding the requirements of this section. The guidelines shall include guidelines regarding—

(A) the circumstances under which the inclusion of women and minorities as subjects in projects of clinical research is inappropriate for purposes of subsection (b) of this section;

(B) the manner in which clinical trials are required to be designed and carried out for

purposes of subsection (c) of this section; and

(C) the operation of outreach programs under subsection (a) of this section.

**(2) Certain provisions**

With respect to the circumstances under which the inclusion of women or members of minority groups (as the case may be) as subjects in a project of clinical research is inappropriate for purposes of subsection (b) of this section, the following applies to guidelines under paragraph (1):

(A)(i) In the case of a clinical trial, the guidelines shall provide that the costs of such inclusion in the trial is not a permissible consideration in determining whether such inclusion is inappropriate.

(ii) In the case of other projects of clinical research, the guidelines shall provide that the costs of such inclusion in the project is not a permissible consideration in determining whether such inclusion is inappropriate unless the data regarding women or members of minority groups, respectively, that would be obtained in such project (in the event that such inclusion were required) have been or are being obtained through other means that provide data of comparable quality.

(B) In the case of a clinical trial, the guidelines may provide that such inclusion in the trial is not required if there is substantial scientific data demonstrating that there is no significant difference between—

(i) the effects that the variables to be studied in the trial have on women or members of minority groups, respectively; and

(ii) the effects that the variables have on the individuals who would serve as subjects in the trial in the event that such inclusion were not required.

**(e) Date certain for guidelines; applicability**

**(1) Date certain**

The guidelines required in subsection (d) of this section shall be established and published in the Federal Register not later than 180 days after June 10, 1993.

**(2) Applicability**

For fiscal year 1995 and subsequent fiscal years, the Director of NIH may not approve any proposal of clinical research to be conducted or supported by any agency of the National Institutes of Health unless the proposal specifies the manner in which the research will comply with this section.

**(f) Reports by advisory councils**

The advisory council of each national research institute shall prepare biennial reports describing the manner in which the institute has complied with this section. Each such report shall be submitted to the Director of the institute involved for inclusion in the biennial report under section 283 of this title.

**(g) Definitions**

For purposes of this section:

(1) The term "project of clinical research" includes a clinical trial.

#### FEDERAL FUNDING OF FETAL TISSUE TRANSPLANTATION RESEARCH

Memorandum of President of the United States, Jan. 22, 1993, 58 F.R. 7457, provided:

Memorandum for the Secretary of Health and Human Services

On March 22, 1988, the Assistant Secretary for Health of Health and Human Services (“HHS”) imposed a temporary moratorium on Federal funding of research involving transplantation of fetal tissue from induced abortions. Contrary to the recommendations of a National Institutes of Health advisory panel, on November 2, 1989, the Secretary of Health and Human Services extended the moratorium indefinitely. This moratorium has significantly hampered the development of possible treatments for individuals afflicted with serious diseases and disorders, such as Parkinson’s disease, Alzheimer’s disease, diabetes, and leukemia. Accordingly, I hereby direct that you immediately lift the moratorium.

You are hereby authorized and directed to publish this memorandum in the Federal Register.

WILLIAM J. CLINTON.

CHANGE OF NAME

Committee on Commerce of House of Representatives changed to Committee on Energy and Commerce of House of Representatives, and jurisdiction over matters relating to securities and exchanges and insurance generally transferred to Committee on Financial Services of House of Representatives by House Resolution No. 5, One Hundred Seventh Congress, Jan. 3, 2001.

FINDINGS

Pub. L. 106-310, div. B, title XXXVI, §3662, Oct. 17, 2000, 114 Stat. 1241, provided that: "Congress makes the following findings:

"(1) The illegal importation of 3,4-methylenedioxy methamphetamine, commonly referred to as 'MDMA' or 'Ecstasy' (referred to in this subtitle [subtitle C (§§3661-3665) of title XXXVI of div. B of Pub. L. 106-310, see section 3661 of Pub. L. 106-310, set out as a Short Title of 2000 Amendment note under section 201 of this title] as 'Ecstasy'), has increased in recent years, as evidenced by the fact that Ecstasy seizures by the United States Customs Service have increased from less than 500,000 tablets during fiscal year 1997 to more than 9,000,000 tablets during the first 9 months of fiscal year 2000.

"(2) Use of Ecstasy can cause long-lasting, and perhaps permanent, damage to the serotonin system of the brain, which is fundamental to the integration of information and emotion, and this damage can cause long-term problems with learning and memory.

"(3) Due to the popularity and marketability of Ecstasy, there are numerous Internet websites with information on the effects of Ecstasy, the production of Ecstasy, and the locations of Ecstasy use (often referred to as 'raves'). The availability of this information targets the primary users of Ecstasy, who are most often college students, young professionals, and other young people from middle- to high-income families.

"(4) Greater emphasis needs to be placed on—

"(A) penalties associated with the manufacture, distribution, and use of Ecstasy;

"(B) the education of young people on the negative health effects of Ecstasy, since the reputation of Ecstasy as a 'safe' drug is the most dangerous component of Ecstasy;

"(C) the education of State and local law enforcement agencies regarding the growing problem of Ecstasy trafficking across the United States;

"(D) reducing the number of deaths caused by Ecstasy use and the combined use of Ecstasy with other 'club' drugs and alcohol; and

"(E) adequate funding for research by the National Institute on Drug Abuse to—

"(i) identify those most vulnerable to using Ecstasy and develop science-based prevention approaches tailored to the specific needs of individuals at high risk;

"(ii) understand how Ecstasy produces its toxic effects and how to reverse neurotoxic damage;

"(iii) develop treatments, including new medications and behavioral treatment approaches;

"(iv) better understand the effects that Ecstasy has on the developing children and adolescents; and

"(v) translate research findings into useful tools and ensure their effective dissemination."

### § 290bb-25b. Programs to reduce underage drinking

#### (a) Definitions

For purposes of this section:

(1) The term “alcohol beverage industry” means the brewers, vintners, distillers, importers, distributors, and retail or online outlets that sell or serve beer, wine, and distilled spirits.

(2) The term “school-based prevention” means programs, which are institutionalized, and run by staff members or school-designated persons or organizations in any grade of school, kindergarten through 12th grade.

(3) The term “youth” means persons under the age of 21.

(4) The term “IOM report” means the report released in September 2003 by the National Research Council, Institute of Medicine, and entitled “Reducing Underage Drinking: A Collective Responsibility”.

#### (b) Sense of Congress

It is the sense of the Congress that:

(1) A multi-faceted effort is needed to more successfully address the problem of underage drinking in the United States. A coordinated approach to prevention, intervention, treatment, enforcement, and research is key to making progress. This chapter recognizes the need for a focused national effort, and addresses particulars of the Federal portion of that effort, as well as Federal support for State activities.

(2) The Secretary of Health and Human Services shall continue to conduct research and collect data on the short and long-range impact of alcohol use and abuse upon adolescent brain development and other organ systems.

(3) States and communities, including colleges and universities, are encouraged to adopt comprehensive prevention approaches, including—

(A) evidence-based screening, programs and curricula;

- (B) brief intervention strategies;
- (C) consistent policy enforcement; and
- (D) environmental changes that limit underage access to alcohol.

(4) Public health groups, consumer groups, and the alcohol beverage industry should continue and expand evidence-based efforts to prevent and reduce underage drinking.

(5) The entertainment industries have a powerful impact on youth, and they should use rating systems and marketing codes to reduce the likelihood that underage audiences will be exposed to movies, recordings, or television programs with unsuitable alcohol content.

(6) The National Collegiate Athletic Association, its member colleges and universities, and athletic conferences should affirm a commitment to a policy of discouraging alcohol use among underage students and other young fans.

(7) Alcohol is a unique product and should be regulated differently than other products by the States and Federal Government. States have primary authority to regulate alcohol distribution and sale, and the Federal Government should support and supplement these State efforts. States also have a responsibility to fight youth access to alcohol and reduce underage drinking. Continued State regulation and licensing of the manufacture, importation, sale, distribution, transportation and storage of alcoholic beverages are clearly in the public interest and are critical to promoting responsible consumption, preventing illegal access to alcohol by persons under 21 years of age from commercial and non-commercial sources, maintaining industry integrity and an orderly marketplace, and furthering effective State tax collection.

**(1) Interagency coordinating committee on the prevention of underage drinking**

**(A) In general**

“(1) More children and young adults die from suicide each year than from cancer, heart disease, AIDS, birth defects, stroke, and chronic lung disease combined.

“(2) Over 4,000 children and young adults tragically take their lives every year, making suicide the third overall cause of death between the ages of 10 and 24. According to the Centers for Disease Control and Prevention, suicide is the third overall cause of death among college-age students.

“(3) According to the National Center for Injury Prevention and Control of the Centers for Disease Control and Prevention, children and young adults accounted for 15 percent of all suicides completed in 2000.

“(4) From 1952 to 1995, the rate of suicide in children and young adults tripled.

“(5) From 1980 to 1997, the rate of suicide among young adults ages 15 to 19 increased 11 percent.

“(6) From 1980 to 1997, the rate of suicide among children ages 10 to 14 increased 109 percent.

“(7) According to the National Center of Health Statistics, suicide rates among Native Americans range from 1.5 to 3 times the national average for other groups, with young people ages 15 to 34 making up 64 percent of all suicides.

“(8) Congress has recognized that youth suicide is a public health tragedy linked to underlying mental health problems and that youth suicide early intervention and prevention activities are national priorities.

“(9) Youth suicide early intervention and prevention have been listed as urgent public health priorities by the President’s New Freedom Commission in [probably should be “on”] Mental Health (2002), the Institute of Medicine’s Reducing Suicide: A National Imperative (2002), the National Strategy for Suicide Prevention: Goals and Objectives for Action (2001), and the Surgeon General’s Call to Action To Prevent Suicide (1999).

“(10) Many States have already developed comprehensive statewide youth suicide early intervention and prevention strategies that seek to provide effective early intervention and prevention services.

“(11) In a recent report, a startling 85 percent of college counseling centers revealed an increase in the number of students they see with psychological problems. Furthermore, the American College Health Association found that 61 percent of college students reported feeling hopeless, 45 percent said they felt so depressed they could barely function, and 9 percent felt suicidal.

“(12) There is clear evidence of an increased incidence of depression among college students. According to a survey described in the Chronicle of Higher Education (February 1, 2002), depression among freshmen has nearly doubled (from 8.2 percent to 16.3 percent). Without treatment, researchers recently noted that ‘depressed adolescents are at risk for school failure, social isolation, promiscuity, self-medication with drugs and alcohol, and suicide—now the third leading cause of death among 10–24 year olds.’

“(13) Researchers who conducted the study ‘Changes in Counseling Center Client Problems Across 13 Years’ (1989–2001) at Kansas State University stated that ‘students are experiencing more stress, more anxiety, more depression than they were a decade ago.’ (The Chronicle of Higher Education, February 14, 2003).

“(14) According to the 2001 National Household Survey on Drug Abuse, 20 percent of full-time undergraduate college students use illicit drugs.

“(15) The 2001 National Household Survey on Drug Abuse also reported that 18.4 percent of adults aged 18 to 24 are dependent on or abusing illicit drugs or alcohol. In addition, the study found that ‘serious mental illness is highly correlated with substance dependence or abuse. Among adults with serious mental illness in 2001, 20.3 percent were dependent on or abused alcohol or illicit drugs, while the rate among adults without serious mental illness was only 6.3 percent.’

“(16) A 2003 Gallagher’s Survey of Counseling Center Directors found that 81 percent were concerned about the increasing number of students with more serious psychological problems, 67 percent reported a need for more psychiatric services, and 63 percent reported problems with growing demand for services without an appropriate increase in resources.

“(17) The International Association of Counseling Services accreditation standards recommend 1 counselor per 1,000 to 1,500 students. According to the 2003 Gallagher’s Survey of Counseling Center Directors, the ratio of counselors to students is as high as 1 counselor per 2,400 students at institutions of higher education with more than 15,000 students.”

#### TEEN SUICIDE PREVENTION STUDY

Pub. L. 106-386, div. B, title VI, §1602, Oct. 28, 2000, 114 Stat. 1538, provided that:

"(a) SHORT TITLE.—This section may be cited as the 'Teen Suicide Prevention Act of 2000'.

"(b) FINDINGS.—Congress finds that—

"(1) measures that increase public awareness of suicide as a preventable public health problem, and target parents and youth so that suicide risks and warning signs can be recognized, will help to eliminate the

ignorance and stigma of suicide as barriers to youth and families seeking preventive care;

"(2) suicide prevention efforts in the year 2000 should—

"(A) target at-risk youth, particularly youth with mental health problems, substance abuse problems, or contact with the juvenile justice system;

"(B) involve—

"(i) the identification of the characteristics of the at-risk youth and other youth who are contemplating suicide, and barriers to treatment of the youth; and

"(ii) the development of model treatment programs for the youth;

"(C) include a pilot study of the outcomes of treatment for juvenile delinquents with mental health or substance abuse problems;

"(D) include a public education approach to combat the negative effects of the stigma of, and discrimination against individuals with, mental health and substance abuse problems; and

"(E) include a nationwide effort to develop, implement, and evaluate a mental health awareness program for schools, communities, and families;

"(3) although numerous symptoms, diagnoses, traits, characteristics, and psychosocial stressors of suicide have been investigated, no single factor or set of factors has ever come close to predicting suicide with accuracy;

"(4) research of United States youth, such as a 1994 study by Lewinsohn, Rohde, and Seeley, has shown predictors of suicide, such as a history of suicide attempts, current suicidal ideation and depression, a recent attempt or completed suicide by a friend, and low self-esteem; and

"(5) epidemiological data illustrate—

"(A) the trend of suicide at younger ages as well as increases in suicidal ideation among youth in the United States; and

"(B) distinct differences in approaches to suicide by gender, with—

"(i) 3 to 5 times as many females as males attempting suicide; and

"(ii) 3 to 5 times as many males as females completing suicide.

"(c) PURPOSE.—The purpose of this section is to provide for a study of predictors of suicide among at-risk and other youth, and barriers that prevent the youth from receiving treatment, to facilitate the development of model treatment programs and public education and awareness efforts.

"(d) STUDY.—Not later than 1 year after the date of the enactment of this Act [Oct. 28, 2000], the Secretary of Health and Human Services shall carry out, directly or by grant or contract, a study that is designed to identify—

"(1) the characteristics of at-risk and other youth age 13 through 21 who are contemplating suicide;

"(2) the characteristics of at-risk and other youth who are younger than age 13 and are contemplating suicide; and

"(3) the barriers that prevent youth described in paragraphs (1) and (2) from receiving treatment.

"(e) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to carry out this section such sums as may be necessary."

[For definition of "youth" as used in section 1602 of Pub. L. 106-386, set out above, see section 1002 of Pub. L. 106-386, set out as a note under section 3796gg-2 of this title.]

PART E—CHILDREN WITH SERIOUS EMOTIONAL  
DISTURBANCES

**§ 290ff. Comprehensive community mental health services for children with serious emotional disturbances**

**(a) Grants to certain public entities**

**(1) In general**

The Secretary, acting through the Director of the Center for Mental Health Services, shall make grants to public entities for the purpose of providing comprehensive community mental health services to children with a serious emotional disturbance.

**(2) "Public entity" defined**

For purposes of this part, the term "public entity" means any State, any political subdivision of a State, and any Indian tribe or tribal organization (as defined in section 450b(b) and section 450b(c)<sup>1</sup> of title 25).

**(b) Considerations in making grants**

**(1) Requirement of status as grantee under part B of subchapter XVII**

The Secretary may make a grant under subsection (a) of this section to a public entity only if—

(A) in the case of a public entity that is a State, the State is a grantee under section 300x of this title;

(B) in the case of a public entity that is a political subdivision of a State, the State in which the political subdivision is located is such a grantee; and

(C) in the case of a public entity that is an Indian tribe or tribal organization, the State in which the tribe or tribal organization is located is such a grantee.

**(2) Requirement of status as medicaid provider**

(A) Subject to subparagraph (B), the Secretary may make a grant under subsection (a) of this section only if, in the case of any service under such subsection that is covered in the State plan approved under title XIX of the Social Security Act [42 U.S.C. 1396 et seq.] for the State involved—

(i) the public entity involved will provide the service directly, and the entity has entered into a participation agreement under the State plan and is qualified to receive payments under such plan; or

(ii) the public entity will enter into an agreement with an organization under which the organization will provide the service, and the organization has entered into such a participation agreement and is qualified to receive such payments.

(B)(i) In the case of an organization making an agreement under subparagraph (A)(ii) regarding the provision of services under subsection (a) of this section, the requirement es-

tablished in such subparagraph regarding a participation agreement shall be waived by the Secretary if the organization does not, in providing health or mental health services, impose a charge or accept reimbursement available from any third-party payor, including reimbursement under any insurance policy or under any Federal or State health benefits program.

(ii) A determination by the Secretary of whether an organization referred to in clause (i) meets the criteria for a waiver under such clause shall be made without regard to whether the organization accepts voluntary donations regarding the provision of services to the public.

**(3) Certain considerations**

In making grants under subsection (a) of this section, the Secretary shall—

(A) equitably allocate such assistance among the principal geographic regions of the United States;

(B) consider the extent to which the public entity involved has a need for the grant; and

(C) in the case of any public entity that is a political subdivision of a State or that is an Indian tribe or tribal organization—

(i) shall consider any comments regarding the application of the entity for such a grant that are received by the Secretary from the State in which the entity is located; and

(ii) shall give special consideration to the entity if the State agrees to provide a portion of the non-Federal contributions required in subsection (c) of this section regarding such a grant.

**(c) Matching funds**

**(1) In general**

A funding agreement for a grant under subsection (a) of this section is that the public entity involved will, with respect to the costs to be incurred by the entity in carrying out the purpose described in such subsection, make available (directly or through donations from public or private entities) non-Federal contributions toward such costs in an amount that—

(A) for the first fiscal year for which the entity receives payments from a grant under such subsection, is not less than \$1 for each \$3 of Federal funds provided in the grant;

(B) for any second or third such fiscal year, is not less than \$1 for each \$3 of Federal funds provided in the grant;

(C) for any fourth such fiscal year, is not less than \$1 for each \$1 of Federal funds provided in the grant; and

(D) for any fifth and sixth such fiscal year,<sup>2</sup> is not less than \$2 for each \$1 of Federal funds provided in the grant.

**(2) Determination of amount contributed**

(A) Non-Federal contributions required in paragraph (1) may be in cash or in kind, fairly evaluated, including plant, equipment, or services. Amounts provided by the Federal Government, or services assisted or subsidized to

any significant extent by the Federal Government, may not be included in determining the amount of such non-Federal contributions.

(B) In making a determination of the amount of non-Federal contributions for purposes of subparagraph (A), the Secretary may include only non-Federal contributions in excess of the average amount of non-Federal contributions made by the public entity involved toward the purpose described in subsection (a) of this section for the 2-year period preceding the first fiscal year for which the entity receives a grant under such section.

**(c) Nondiscrimination against religious organizations**

**(1) Eligibility as program participants**

Religious organizations are eligible to be program participants on the same basis as any other nonprofit private organization as long as the programs are implemented consistent with the Establishment Clause and Free Exercise Clause of the First Amendment to the United States Constitution. **(b) Nondiscrimination**

In determining whether personnel of a program participant that has a record of successful drug treatment for the preceding three years have satisfied State or local requirements for education and training, a State or local government shall not discriminate against education and training provided to such personnel by a religious organization, so long as such education and training includes basic content substantially equivalent to the content provided by nonreligious organizations that the State or local government would credit for purposes of determining whether the relevant requirements have been satisfied.

### § 291b. State allotments

#### (a) Computation for individual States; formulas for both new construction and modernization

(1) Each State shall be entitled for each fiscal year to an allotment bearing the same ratio to the sums appropriated for such year pursuant to subparagraphs (1), (2), and (3), respectively, of section 291a(a) of this title, and to an allotment bearing the same ratio to the sums appropriated for such year pursuant to section 291a(b) of this title, as the product of—

- (A) the population of such State, and
- (B) the square of its allotment percentage,

bears to the sum of the corresponding products for all of the States.

(2) For each fiscal year, the Secretary shall, in accordance with regulations, make allotments among the States, from the sums appropriated for such year under section 291a(c) of this title, on the basis of the population, the financial need, and the extent of the need for modernization of the facilities referred to in paragraphs (a) and (b) of section 291a of this title, of the respective States.

#### (b) Minimum allotments

(1) The allotment to any State under subsection (a) of this section for any fiscal year which is less than—

(A) \$50,000 for the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, or Guam and \$100,000 for any other State, in the case of an allotment for grants for the construction of public or other nonprofit rehabilitation facilities,

(B) \$100,000 for the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, or Guam and \$200,000 for any other State in the case of an allotment for grants for the construction of public or other nonprofit outpatient facilities,

(C) \$200,000 for the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, or Guam and \$300,000 for any other

State in the case of an allotment for grants for the construction of public or other nonprofit facilities for long-term care or for the construction of public or other nonprofit hospitals and public health centers, or for the modernization of facilities referred to in paragraph (a) or (b) of section 291a of this title, or

(D) \$200,000 for the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, or Guam and \$300,000 for any other State in the case of an allotment for grants for the modernization of facilities referred to in paragraphs (a) and (b) of section 291a of this title,

shall be increased to that amount, the total of the increases thereby required being derived by proportionately reducing the allotment from appropriations under such subparagraph or paragraph to each of the remaining States under subsection (a) of this section, but with such adjustments as may be necessary to prevent the allotment of any of such remaining States from appropriations under such subparagraph or paragraph from being thereby reduced to less than that amount.

(2) An allotment of the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, or Guam for any fiscal year may be increased as provided in paragraph (1) only to the extent it satisfies the Surgeon General, at such time prior to the beginning of such year as the Surgeon General may designate, that such increase will be used for payments under and in accordance with the provisions of this part.

#### (c) Allotment percentages; definitions; determination

For the purposes of this part—

(1) The “allotment percentage” for any State shall be 100 per centum less that percentage which bears the same ratio to 50 per centum as the per capita income of such State bears to the per capita income of the United States, except that (A) the allotment percentage shall in no case be more than 75 per centum or less than 33½ per centum, and (B) the allotment percentage for the Commonwealth of Puerto Rico, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Virgin Islands shall be 75 per centum.

(2) The allotment percentages shall be determined by the Surgeon General between July 1 and September 30 of each even-numbered year, on the basis of the average of the per capita incomes of each of the States and of the United States for the three most recent consecutive years for which satisfactory data are available from the Department of Commerce, and the States shall be notified promptly thereof. Such determination shall be conclusive for each of the two fiscal years in the period beginning July 1 next succeeding such determination.

(3) The population of the several States shall be determined on the basis of the latest figures certified by the Department of Commerce.

(4) The term “United States” means (but only for purposes of paragraphs (1) and (2)) the fifty States and the District of Columbia.

#### (d) Availability of allotments in subsequent years

(1) Any sum allotted to a State, other than the Virgin Islands, American Samoa, the Trust Ter-

ritory of the Pacific Islands, and Guam for a fiscal year under this section and remaining unobligated at the end of such year shall remain available to such State, for the purpose for which made, for the next two fiscal years (and for such years only), in addition to the sums allotted to such State for such purposes for such next two fiscal years.

(2) Any sum allotted to the Virgin Islands, American Samoa, the Trust Territory of the Pacific Islands, or Guam for a fiscal year under this section and remaining unobligated at the end of such year shall remain available to it, for the purpose for which made, for the next two fiscal years (and for such years only), in addition to the sums allotted to it for such purpose for each of such next two fiscal years.

**(e) Transfer of allotments**

(1) Upon the request of any State that a specified portion of any allotment of such State under subsection (a) of this section for any fiscal year be added to any other allotment or allotments of such State under such subsection for such year, the Secretary shall promptly (but after application of subsection (b) of this section) adjust the allotments of such State in accordance with such request and shall notify the State agency; except that the aggregate of the portions so transferred from an allotment for a fiscal year pursuant to this paragraph may not exceed the amount specified with respect to such allotment in clause (A), (B), (C), or (D), as the case may be, of subsection (b)(1) of this section which is applicable to such State.

(2) In addition to the transfer of portions of allotments under paragraph (1), upon the request of any State that a specified portion of any allotment of such State under subsection (a) of this section, other than an allotment for grants for the construction of public or other nonprofit rehabilitation facilities, be added to another allotment of such State under such subsection, other than an allotment for grants for the construction of public or other nonprofit hospitals and public health centers, and upon simultaneous certification to the Secretary by the State agency in such State to the effect that—

(A) it has afforded a reasonable opportunity to make applications for the portion so specified and there have been no approvable applications for such portion, or

(B) in the case of a request to transfer a portion of an allotment for grants for the construction of public or other nonprofit hospitals and public health centers, use of such portion as requested by such State agency will better carry out the purposes of this subchapter,

the Secretary shall promptly (but after application of subsection (b) of this section) adjust the allotments of such State in accordance with such request and shall notify the State agency.

(3) In addition to the transfer of portions of allotments under paragraph (1) or (2), upon the request of any State that a specified portion of an allotment of such State under paragraph (2) of subsection (a) of this section be added to an allotment of such State under paragraph (1) of such subsection for grants for the construction of public or other nonprofit hospitals and public

health centers, and upon simultaneous certification by the State agency in such State to the effect that the need for new public or other nonprofit hospitals and public health centers is substantially greater than the need for modernization of facilities referred to in paragraph (a) or (b) of section 291a of this title, the Secretary shall promptly (but after application of subsection (b) of this section) adjust the allotments of such State in accordance with such request and shall notify the State agency.

(4) After adjustment of allotments of any State, as provided in paragraph (1), (2), or (3) of this subsection, the allotments as so adjusted shall be deemed to be the State's allotments under this section.

**(f) Request by State to transfer portion of allotment**

In accordance with regulations, any State may file with the Surgeon General a request that a specified portion of an allotment to it under this part for grants for construction of any type of facility, or for modernization of facilities, be added to the corresponding allotment of another State for the purpose of meeting a portion of the Federal share of the cost of a project for the construction of a facility of that type in such other State, or for modernization of a facility in such other State, as the case may be. If it is found by the Surgeon General (or, in the case of a rehabilitation facility, by the Surgeon General and the Secretary) that construction or modernization of the facility with respect to which the request is made would meet needs of the State making the request and that use of the specified portion of such State's allotment, as requested by it, would assist in carrying out the purposes of this subchapter, such portion of such State's allotment shall be added to the corresponding allotment of the other State, to be used for the purpose referred to above.
