#### § 24101. Findings, mission, and goals

(a) FINDINGS.—(1) Public convenience and necessity require that Amtrak, to the extent its budget allows, provide modern, cost-efficient, and energy-efficient intercity rail passenger transportation between crowded urban areas and in other areas of the United States.

(2) Rail passenger transportation can help alleviate overcrowding of airways and airports and on highways.

(3) A traveler in the United States should have the greatest possible choice of transportation most convenient to the needs of the traveler.

(4) A greater degree of cooperation is necessary among Amtrak, other rail carriers, State, regional, and local governments, the private sector, labor organizations, and suppliers of services and equipment to Amtrak to achieve a performance level sufficient to justify expending public money.

(5) Modern and efficient commuter rail passenger transportation is important to the viability and well-being of major urban areas and to the energy conservation and self-sufficiency goals of the United States.

(6) As a rail passenger transportation entity, Amtrak should be available to operate commuter rail passenger transportation through its subsidiary, Amtrak Commuter, under contract with commuter authorities that do not provide the transportation themselves as part of the governmental function of the State.

(7) The Northeast Corridor is a valuable resource of the United States used by intercity and commuter rail passenger transportation and freight transportation.

(8) Greater coordination between intercity and commuter rail passenger transportation is required.

(b) MISSION.—The mission of Amtrak is to provide efficient and effective intercity passenger rail mobility consisting of high quality service that is trip-time competitive with other intercity travel options and that is consistent with the goals set forth in subsection (c).

(c) GOALS.—Amtrak shall—

(1) use its best business judgment in acting to minimize United States Government subsidies, including—

(A) increasing fares;

(B) increasing revenue from the transportation of mail and express;

(C) reducing losses on food service;

(D) improving its contracts with operating rail carriers;

(E) reducing management costs; and

(F) increasing employee productivity;

(2) minimize Government subsidies by encouraging State, regional, and local governments and the private sector, separately or in combination, to share the cost of providing rail passenger transportation, including the cost of operating facilities;

(3) carry out strategies to achieve immediately maximum productivity and efficiency consistent with safe and efficient transportation;

(4) operate Amtrak trains, to the maximum extent feasible, to all station stops within 15 minutes of the time established in public timetables;

(5) develop transportation on rail corridors subsidized by States and private parties;

(6) implement schedules based on a system-wide average speed of at least 60 miles an hour that can be achieved with a degree of reliability and passenger comfort;

(7) encourage rail carriers to assist in improving intercity rail passenger transportation;

(8) improve generally the performance of Amtrak through comprehensive and systematic operational programs and employee incentives;

(9) provide additional or complementary intercity transportation service to ensure mobility in times of national disaster or other instances where other travel options are not adequately available;

(10) carry out policies that ensure equitable access to the Northeast Corridor by intercity and commuter rail passenger transportation;

(11) coordinate the uses of the Northeast Corridor, particularly intercity and commuter rail passenger transportation; and

(12) maximize the use of its resources, including the most cost-effective use of employees, facilities, and real property.

(d) MINIMIZING GOVERNMENT SUBSIDIES.—To carry out subsection (c)(12) of this section, Amtrak is encouraged to make agreements with the private sector and undertake initiatives that are consistent with good business judgment and designed to maximize its revenues and minimize Government subsidies. Amtrak shall prepare a financial plan, consistent with section 204 of the

Passenger Rail Investment and Improvement Act of 2008, including the budgetary goals for fiscal years 2009 through 2013. Amtrak and its Board of Directors shall adopt a long-term plan that minimizes the need for Federal operating subsidies.

“SEC. 208. METHODOLOGIES FOR AMTRAK ROUTE AND SERVICE PLANNING DECISIONS.

“(a) METHODOLOGY DEVELOPMENT.—Not later than 180 days after the date of enactment of the Passenger Rail

Reform and Investment Act of 2015 [Dec. 4, 2015], Amtrak shall obtain the services of an independent entity to develop and recommend objective methodologies for Amtrak to use in determining what intercity rail passenger transportation routes and services it should provide, including the establishment of new routes, the elimination of existing routes, and the contraction or expansion of services or frequencies over such routes.

“(b) CONSIDERATIONS.—Amtrak shall require the independent entity, in developing the methodologies described in subsection (a), to consider—

“(1) the current and expected performance and service quality of intercity rail passenger transportation operations, including cost recovery, on-time performance, ridership, on-board services, stations, facilities, equipment, and other services;

“(2) the connectivity of a route with other routes;

“(3) the transportation needs of communities and populations that are not well served by intercity rail passenger transportation service or by other forms of intercity transportation;

“(5) the financial and operational effects on the overall network, including the effects on direct and indirect costs;

“(6) the views of States, rail carriers that own infrastructure over which Amtrak operates, Interstate Compacts established by Congress and States, Amtrak employee representatives, stakeholder organizations, and other interested parties; and

“(7) the funding levels that will be available under authorization levels that have been enacted into law.

“(c) RECOMMENDATIONS.—Not later than 1 year after the date of enactment of the Passenger Rail Reform and Investment Act of 2015 [Dec. 4, 2015], Amtrak shall transmit to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Transportation and Infrastructure of the House of Representatives the recommendations developed by the independent entity under subsection (a).

“(2) allocates to each route the costs incurred only for the benefit of that route and a proportionate share, based upon factors that reasonably reflect relative use, of costs incurred for the common benefit of more than 1 route.

“(b) REVIEW.—If Amtrak and the States (including the District of Columbia) in which Amtrak operates such routes do not voluntarily adopt and implement the methodology developed under subsection (a) in allo-

cating costs and determining compensation for the provision of service in accordance with the date established therein, the Surface Transportation Board shall determine the appropriate methodology required under subsection (a) for such services in accordance with the procedures and procedural schedule applicable to a proceeding under section 24904(c) [now 24903(c)] of title 49, United States Code, and require the full implementation of this methodology with regards to the provision of such service within 1 year after the Board’s determination of the appropriate methodology.

INTERCITY RAIL SERVICE

Pub. L. 108-447, div. H, title I, §150, Dec. 8, 2004, 118 Stat. 3221, which provided that for the purpose of assisting State-supported intercity rail service, in order to demonstrate whether competition would provide higher quality rail passenger service at reasonable prices, the Secretary of Transportation, working with affected States, was to develop and implement a procedure for fair competitive bidding by Amtrak and non-Amtrak operators for State-supported routes, was from the Consolidated Appropriations Act, 2005, and was not repeated in subsequent appropriation acts.

Similar provisions were contained in the following prior appropriation act:

Pub. L. 108-199, div. F, title I, §151, Jan. 23, 2004, 118 Stat. 303.

“(1) intercity rail passenger service is an essential component of a national intermodal passenger transportation system;

“(2) Amtrak is facing a financial crisis, with growing and substantial debt obligations severely limiting its ability to cover operating costs and jeopardizing its long-term viability;

“(3) immediate action is required to improve Amtrak’s financial condition if Amtrak is to survive;

“(4) all of Amtrak’s stakeholders, including labor, management, and the Federal Government, must participate in efforts to reduce Amtrak’s costs and increase its revenues;

“(5) additional flexibility is needed to allow Amtrak to operate in a businesslike manner in order to manage costs and maximize revenues;

“(6) Amtrak should ensure that new management flexibility produces cost savings without compromising safety;

“(7) Amtrak’s management should be held accountable to ensure that all investment by the Federal Government and State governments is used effectively to improve the quality of service and the long-term financial health of Amtrak;

“(8) Amtrak and its employees should proceed quickly with proposals to modify collective bargaining agreements to make more efficient use of manpower and to realize cost savings which are necessary to reduce Federal financial assistance;

“(9) Amtrak and intercity bus service providers should work cooperatively and develop coordinated intermodal relationships promoting seamless transportation services which enhance travel options and increase operating efficiencies;

“(10) Amtrak’s Strategic Business Plan calls for the establishment of a dedicated source of capital funding for Amtrak in order to ensure that Amtrak will be able to fulfill the goals of maintaining—

“(A) a national passenger rail system; and

“(B) that system without Federal operating assistance; and

“(11) Federal financial assistance to cover operating losses incurred by Amtrak should be eliminated by the year 2002.”

“(a) INITIATION.—Not later than 15 days after the date of enactment of this Act [Dec. 2, 1997], the Secretary of Transportation shall contract with an entity independ-

ent of Amtrak and not in any contractual relationship with Amtrak, and independent of the Department of Transportation, to conduct a complete independent assessment of the financial requirements of Amtrak through fiscal year 2002. The entity shall have demonstrated knowledge about railroad industry accounting requirements, including the uniqueness of the industry and of Surface Transportation Board accounting requirements. The Department of Transportation, Office of Inspector General, shall approve the entity’s statement of work and the award and shall oversee the contract. In carrying out its responsibilities under the preceding sentence, the Inspector General’s Office shall perform such overview and validation or verification of data as may be necessary to assure that the assessment conducted under this subsection meets the requirements of this section.

“(b) ASSESSMENT CRITERIA.—The Secretary and Amtrak shall provide to the independent entity estimates of the financial requirements of Amtrak for the period described in subsection (a), using as a base the fiscal year 1997 appropriation levels established by the Congress. The independent assessment shall be based on an objective analysis of Amtrak’s funding needs.

“(c) CERTAIN FACTORS TO BE TAKEN INTO ACCOUNT.—The independent assessment shall take into account all relevant factors, including Amtrak’s—

“(1) cost allocation process and procedures;

“(2) expenses related to intercity rail passenger service, commuter service, and any other service Amtrak provides;

“(3) Strategic Business Plan, including Amtrak’s projected expenses, capital needs, ridership, and revenue forecasts; and

“(4) assets and liabilities.

For purposes of paragraph (3), in the capital needs part of its Strategic Business Plan Amtrak shall distinguish between that portion of the capital required for the Northeast Corridor and that required outside the Northeast Corridor, and shall include rolling stock requirements, including capital leases, ‘state of good repair’ requirements, and infrastructure improvements.

“(d) BIDDING PRACTICES.—

“(1) STUDY.—The independent assessment also shall determine whether, and to what extent, Amtrak has performed each year during the period from 1992 through 1996 services under contract at amounts less than the cost to Amtrak of performing such services with respect to any activity other than the provision of intercity rail passenger transportation, or mail or express transportation. For purposes of this clause, the cost to Amtrak of performing services shall be determined using generally accepted accounting principles for contracting. If identified, such contracts shall be detailed in the report of the independent assessment, as well as the methodology for preparation of bids to reflect Amtrak’s actual cost of performance.

“(2) REFORM.—If the independent assessment performed under this subparagraph reveals that Amtrak has performed services under contract for an amount less than the cost to Amtrak of performing such services, with respect to any activity other than the provision of intercity rail passenger transportation, or mail or express transportation, then Amtrak shall revise its methodology for preparation of bids to reflect its cost of performance.

“(e) DEADLINE.—The independent assessment shall be completed not later than 180 days after the contract is awarded, and shall be submitted to the Council established under section 203, the Secretary of Transportation, the Committee on Commerce, Science, and Transportation of the United States Senate, and the Committee on Transportation and Infrastructure of the United States House of Representatives.
