PART A—REQUIREMENTS

§ 21081. Voting systems standards

(a) Requirements

Each voting system used in an election for Federal office shall meet the following requirements:

(1) In general

(A) Except as provided in subparagraph (B), the voting system (including any lever voting system, optical scanning voting system, or direct recording electronic system) shall—

(i) permit the voter to verify (in a private and independent manner) the votes selected by the voter on the ballot before the ballot is cast and counted;

(ii) provide the voter with the opportunity (in a private and independent manner) to change the ballot or correct any error before

the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error); and

(iii) if the voter selects votes for more than one candidate for a single office—

(I) notify the voter that the voter has selected more than one candidate for a single office on the ballot;

(II) notify the voter before the ballot is cast and counted of the effect of casting multiple votes for the office; and

(III) provide the voter with the opportunity to correct the ballot before the ballot is cast and counted.

(B) A State or jurisdiction that uses a paper ballot voting system, a punch card voting system, or a central count voting system (including mail-in absentee ballots and mail-in ballots), may meet the requirements of subparagraph (A)(iii) by—

(i) establishing a voter education program specific to that voting system that notifies each voter of the effect of casting multiple votes for an office; and

(ii) providing the voter with instructions on how to correct the ballot before it is cast and counted (including instructions on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error).

(C) The voting system shall ensure that any notification required under this paragraph preserves the privacy of the voter and the confidentiality of the ballot.

(2) Audit capacity

(A) In general

The voting system shall produce a record with an audit capacity for such system.

(B) Manual audit capacity

(i) The voting system shall produce a permanent paper record with a manual audit capacity for such system.

(ii) The voting system shall provide the voter with an opportunity to change the ballot or correct any error before the permanent paper record is produced.

(iii) The paper record produced under subparagraph (A) shall be available as an official record for any recount conducted with respect to any election in which the system is used.

(3) Accessibility for individuals with disabilities

The voting system shall—

(A) be accessible for individuals with disabilities, including nonvisual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters;

(B) satisfy the requirement of subparagraph (A) through the use of at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place; and

(C) if purchased with funds made available under subchapter II on or after January 1, 2007, meet the voting system standards for disability access (as outlined in this paragraph).

(4) Alternative language accessibility

The voting system shall provide alternative language accessibility pursuant to the requirements of section 10503 of this title.

(5) Error rates

The error rate of the voting system in counting ballots (determined by taking into account only those errors which are attributable to the voting system and not attributable to an act of the voter) shall comply with the error rate standards established under section 3.2.1 of the voting systems standards issued by the Federal Election Commission which are in effect on October 29, 2002.

(6) Uniform definition of what constitutes a vote

Each State shall adopt uniform and non-discriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting system used in the State.

(b) Voting system defined

In this section, the term “voting system” means—

(1) the total combination of mechanical, electromechanical, or electronic equipment (including the software, firmware, and documentation required to program, control, and support the equipment) that is used—

- (A) to define ballots;
- (B) to cast and count votes;
- (C) to report or display election results; and
- (D) to maintain and produce any audit trail information; and

(2) the practices and associated documentation used—

- (A) to identify system components and versions of such components;
- (B) to test the system during its development and maintenance;
- (C) to maintain records of system errors and defects;

- (E) to make available any materials to the voter (such as notices, instructions, forms, or paper ballots).

(c) Construction

(1) In general

Nothing in this section shall be construed to prohibit a State or jurisdiction which used a particular type of voting system in the elections for Federal office held in November 2000 from using the same type of system after the effective date of this section, so long as the system meets or is modified to meet the requirements of this section.

(2) Protection of paper ballot voting systems

For purposes of subsection (a)(1)(A)(i), the term “verify” may not be defined in a manner

that makes it impossible for a paper ballot voting system to meet the requirements of such subsection or to be modified to meet such requirements.

(d) Effective date

Each State and jurisdiction shall be required to comply with the requirements of this section on and after January 1, 2006.

(5)(A) At the time that an individual casts a provisional ballot, the appropriate State or local election official shall give the individual written information that states that any individual who casts a provisional ballot will be able to ascertain under the system established under subparagraph (B) whether the vote was counted, and, if the vote was not counted, the reason that the vote was not counted.

(B) The appropriate State or local election official shall establish a free access system (such as a toll-free telephone number or an Internet website) that any individual who

casts a provisional ballot may access to discover whether the vote of that individual was counted, and, if the vote was not counted, the reason that the vote was not counted.

States described in section 20503(b) of this title may meet the requirements of this subsection using voter registration procedures established under applicable State law. The appropriate State or local official shall establish and maintain reasonable procedures necessary to protect the security, confidentiality, and integrity of personal information collected, stored, or otherwise used by the free access system established under paragraph (5)(B). (c) Voters who vote after the polls close

Any individual who votes in an election for Federal office as a result of a Federal or State court order or any other order extending the time established for closing the polls by a State law in effect 10 days before the date of that election may only vote in that election by casting a provisional ballot under subsection (a). Any such ballot cast under the preceding sentence shall be separated and held apart from other provisional ballots cast by those not affected by the order.

(2) Computerized list maintenance**(A) In general**

The appropriate State or local election official shall perform list maintenance with respect to the computerized list on a regular basis as follows:

(i) If an individual is to be removed from the computerized list, such individual shall be removed in accordance with the provisions of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg et seq.) [now 52 U.S.C. 20501 et seq.], including subsections (a)(4), (c)(2), (d), and (e) of section 8 of such Act (42 U.S.C. 1973gg-6) [now 52 U.S.C. 20507].

(4) Minimum standard for accuracy of State voter registration records

The State election system shall include provisions to ensure that voter registration records in the State are accurate and are updated regularly, including the following:

(ii) Special rule for applicants without driver's license or social security number

If an applicant for voter registration for an election for Federal office has not been issued a current and valid driver's license or a social security number, the State shall assign the applicant a number which will serve to identify the applicant for voter registration purposes. To the extent that the State has a computerized list in effect under this subsection and the list assigns unique identifying numbers to registrants, the number assigned under this clause shall be the unique identifying number assigned under the list.

(iii) Determination of validity of numbers provided

The State shall determine whether the information provided by an individual is sufficient to meet the requirements of this subparagraph, in accordance with State law.

(B) Requirements for State officials**(i) Sharing information in databases**

The chief State election official and the official responsible for the State motor vehicle authority of a State shall enter into an agreement to match information in the database of the statewide voter registration system with information in the database of the motor vehicle authority to the extent required to enable each such official to verify the accuracy of the information provided on applications for voter registration.
