

§ 1542. Regulations

All regulations made with respect to this subchapter shall be promulgated no later than six months after June 30, 1980.

(Pub. L. 96-294, title VI, §644, June 30, 1980, 94 Stat. 770.)

Editorial Notes**REFERENCES IN TEXT**

This subchapter, referred to in text, was in the original “this subtitle”, meaning subtitle D of title VI of Pub. L. 96-294, June 30, 1980, 94 Stat. 768, which enacted this subchapter and former sections 1146 and 1147 of this title and amended former sections 1141 and 1143 of this title and sections 796, 824a-3, 824i, and 824j of Title 16, Conservation.

CHAPTER 28—MATERIALS AND MINERALS POLICY, RESEARCH, AND DEVELOPMENT

Sec.

- 1601. Congressional statement of findings; “materials” defined.
- 1602. Congressional declaration of policies.
- 1603. Implementation of policies.
- 1604. Program administration.
- 1605. Applicability to other statutory national mining and minerals policies.
- 1606. Mineral security.
- 1607. Critical minerals supply chains and reliability.

§ 1601. Congressional statement of findings; “materials” defined

(a) The Congress finds that—

(1) the availability of materials is essential for national security, economic well-being, and industrial production;

(2) the availability of materials is affected by the stability of foreign sources of essential industrial materials, instability of materials markets, international competition and demand for materials, the need for energy and materials conservation, and the enhancement of environmental quality;

(3) extraction, production, processing, use, recycling, and disposal of materials are closely linked with national concerns for energy and the environment;

(4) the United States is strongly interdependent with other nations through international trade in materials and other products;

(5) technological innovation and research and development are important factors which contribute to the availability and use of materials;

(6) the United States lacks a coherent national materials policy and a coordinated program to assure the availability of materials critical for national economic well-being, national defense, and industrial production, including interstate commerce and foreign trade; and

(7) notwithstanding the enactment of section 21a of this title, the United States does not have a coherent national materials and minerals policy.

(b) **DEFINITIONS.**—In this chapter:

(1) **CRITICAL MINERAL.**—The term “critical mineral” means any mineral, element, sub-

stance, or material designated as critical by the Secretary under section 1606(c) of this title.

(2) **MATERIALS.**—The term “materials” means substances, including minerals, of current or potential use that will be needed to supply the industrial, military, and essential civilian needs of the United States in the production of goods or services, including those which are primarily imported or for which there is a prospect of shortages or uncertain supply, or which present opportunities in terms of new physical properties, use, recycling, disposal or substitution, with the exclusion of food and of energy fuels used as such.

(Pub. L. 96-479, §2, Oct. 21, 1980, 94 Stat. 2305; Pub. L. 116-260, div. Z, title VII, §7002(b)(2), Dec. 27, 2020, 134 Stat. 2563.)

Editorial Notes**AMENDMENTS**

2020—Subsec. (b). Pub. L. 116-260 inserted subsec. heading, substituted “In this chapter:” for “As used in this chapter,” designated remainder of existing provisions as par. (2), inserted heading, and substituted “The term” for “the term”, and added par. (1).

Statutory Notes and Related Subsidiaries**SHORT TITLE**

Pub. L. 96-479, §1, Oct. 21, 1980, 94 Stat. 2305, provided: “That this Act [enacting this chapter] may be cited as the ‘National Materials and Minerals Policy, Research and Development Act of 1980’.”

Executive Documents

EX. ORD. NO. 13817. A FEDERAL STRATEGY TO ENSURE SECURE AND RELIABLE SUPPLIES OF CRITICAL MINERALS

Ex. Ord. No. 13817, Dec. 20, 2017, 82 F.R. 60835, as amended by Ex. Ord. No. 13953, §7, Sept. 30, 2020, 85 F.R. 62543, provided:

By the authority vested in me as President by the Constitution and the laws of the United States of America, it is hereby ordered as follows:

SECTION 1. Findings. The United States is heavily reliant on imports of certain mineral commodities that are vital to the Nation’s security and economic prosperity. This dependency of the United States on foreign sources creates a strategic vulnerability for both its economy and military to adverse foreign government action, natural disaster, and other events that can disrupt supply of these key minerals. Despite the presence of significant deposits of some of these minerals across the United States, our miners and producers are currently limited by a lack of comprehensive, machine-readable data concerning topographical, geological, and geophysical surveys; permitting delays; and the potential for protracted litigation regarding permits that are issued. An increase in private-sector domestic exploration, production, recycling, and reprocessing of critical minerals, and support for efforts to identify more commonly available technological alternatives to these minerals, will reduce our dependence on imports, preserve our leadership in technological innovation, support job creation, improve our national security and balance of trade, and enhance the technological superiority and readiness of our Armed Forces, which are among the Nation’s most significant consumers of critical minerals.

SEC. 2. Definition. (a) A “critical mineral” is a mineral identified by the Secretary of the Interior pursuant to subsection (b) of this section to be (i) a non-fuel mineral or mineral material essential to the economic and national security of the United States, (ii) the sup-
