

11-1322-cv

Trustees of the Local 138 Pension Trust Fund v. F.W. Honerkamp Co. Inc.

UNITED STATES COURT OF APPEALS

FOR THE SECOND CIRCUIT

August Term 2011

(Argued: March 26, 2012 Decided: August 17, 2012)

Docket No. 11-1322-cv

-----X

TRUSTEES OF THE LOCAL 138 PENSION TRUST FUND,

Plaintiff-Appellant,

-- v. --

F.W. HONERKAMP CO. INC.,

Defendant-Appellee.

-----X

B e f o r e : WALKER, LYNCH and LOHIER, Circuit Judges.

Appeal from a judgment of the United States District Court for the Southern District of New York (Lewis A. Kaplan, Judge) granting defendant-appellee employer's motion for summary judgment dismissing claim by plaintiff-appellant -- trustees for a pension plan who sought certain pension contributions from the employer -- and denying the trustees' cross-motion for summary judgment. The trustees argue that the Pension Protection Act of 2006 prevented the employer from withdrawing from the pension plan after the plan entered critical status, and that the district court erred in concluding otherwise. We do not agree and thus AFFIRM the judgment of the district court.

1 LARRY CARY (Andrew M. Katz and
2 Charles Pergue, on the brief), Cary
3 Kane LLP, New York, NY, for
4 Plaintiff-Appellant.
5

6 KEVIN L. WRIGHT, Littler Mendelson,
7 P.C., McLean, VA (Deidre A.
8 Grossman, Littler Mendelson, P.C.,
9 New York, NY, on the brief), for
10 Defendant-Appellee.
11

12
13 JOHN M. WALKER, JR., Circuit Judge:

14 Plaintiff-appellant Trustees (the "Trustees") of the Local
15 138 Pension Trust Fund (the "Fund") appeal from a decision of the
16 United States District Court for the Southern District of New
17 York (Lewis A. Kaplan, Judge) granting summary judgment in favor
18 of defendant-appellee F.W. Honerkamp Co. ("Honerkamp") and
19 denying the Trustees' cross-motion for summary judgment.
20 Honerkamp withdrew from the Fund after the Fund had reached
21 "critical status" as defined by the Pension Protection Act of
22 2006 (the "PPA"), an amendment to the Employee Retirement Income
23 Security Act of 1974 ("ERISA"), and after the collective
24 bargaining agreements ("CBAs") requiring Honerkamp to contribute
25 to the Fund had expired. The Trustees sued, arguing that the PPA
26 prevented Honerkamp from withdrawing and required the company to
27 make certain ongoing pension contributions pursuant to the Fund's
28 rehabilitation plan. The district court agreed with Honerkamp
29 that the PPA did not forbid its withdrawal or require those
30 contributions. It therefore granted summary judgment to

1 Honerkamp and denied the Trustees' cross-motion for summary
2 judgment.

3 On appeal, the Trustees argue that the district court
4 misconstrued the PPA in denying their cross-motion and granting
5 summary judgment to Honerkamp. For the reasons that follow, we
6 reject the Trustees' argument and AFFIRM the judgment of the
7 district court.

8 BACKGROUND

9 I. Statutory Background

10 We begin with an overview of the pertinent statutory
11 framework, which provides necessary context for the events of
12 this case:

13 A. ERISA

14 ERISA is a comprehensive statutory scheme regulating
15 employee retirement plans. See generally ERISA § 2 et seq., 29
16 U.S.C. § 1001 et seq. Congress has amended the law periodically
17 since originally enacting it in 1974.

18 Among other things, ERISA "was designed to ensure that
19 employees and their beneficiaries would not be deprived of
20 anticipated retirement benefits by the termination of pension
21 plans before sufficient funds have been accumulated in the
22 plans." Connolly v. Pension Benefit Guar. Corp., 475 U.S. 211,
23 214 (1986) (internal quotation marks omitted). To that end, the
24 statute created an agency, the Pension Benefit Guaranty

1 Corporation ("PBGC"), to administer an insurance system by
2 collecting premiums from covered pension plans and paying out
3 accrued benefits to employees in the event a pension plan has
4 insufficient funds. See ERISA § 4006, 29 U.S.C. § 1306; Bd. of
5 Trs. of W. Conference of Teamsters Pension Trust Fund v. Thompson
6 Bldg. Materials, Inc., 749 F.2d 1396, 1399-1403 (9th Cir. 1984).

7 **B. The MPPAA**

8 One type of pension plan regulated by ERISA is the
9 multiemployer pension plan, in which multiple employers pool
10 contributions into a single fund that pays benefits to covered
11 retirees who spent a certain amount of time working for one or
12 more of the contributing employers. Plans of this sort offer
13 important advantages to employers and employees alike. For
14 example, employers in certain unionized industries likely would
15 not create their own pension plans because the frequency of
16 companies going into and out of business, and of employees
17 transferring among employers, make single-employer plans
18 unfeasible. Multiemployer plans allow companies to offer pension
19 benefits to their employees notwithstanding these practicalities,
20 and at the same time to share the financial costs and risks
21 associated with the administration of pension plans. See
22 Concrete Pipe & Prods. of Cal., Inc. v. Constr. Laborers Pension
23 Trust Fund for S. Cal., 508 U.S. 602, 605-07 (1993).

1 However,

2 [a] key problem of ongoing multiemployer plans,
3 especially in declining industries, is the problem of
4 employer withdrawal. Employer withdrawals reduce a
5 plan's contribution base. This pushes the contribution
6 rate for remaining employers to higher and higher
7 levels in order to fund past service liabilities,
8 including liabilities generated by employers no longer
9 participating in the plan, so-called inherited
10 liabilities. The rising costs may encourage -- or
11 force -- further withdrawals, thereby increasing the
12 inherited liabilities to be funded by an
13 ever-decreasing contribution base. This vicious
14 downward spiral may continue until it is no longer
15 reasonable or possible for the pension plan to
16 continue.

17 Pension Benefit Guar. Corp. v. R.A. Gray & Co., 467 U.S. 717, 722
18 n.2 (1984)(quoting Pension Plan Termination Insurance Issues:
19 Hearings before the Subcommittee on Oversight of the House
20 Committee on Ways and Means, 95th Cong., 2nd Sess., 22 (1978)
21 (statement of Matthew M. Lind)) (internal quotation marks
22 omitted).

23 ERISA as originally enacted did not adequately address and
24 even exacerbated these problems. This was because of certain
25 now-obsolete provisions, which we need not detail here, that had
26 the effects of (1) encouraging employers to withdraw from weak
27 multiemployer pension plans, which they often could do without
28 compensating the plans for the inherited liabilities that
29 remaining participants would incur; and (2) encouraging employers
30 who did not withdraw to terminate deteriorating pension plans
31 sooner rather than later. See Concrete Pipe, 508 U.S. at 607-08;

1 R.A. Gray & Co., 467 U.S. at 721; Bd. of Trs. of W. Conference of
2 Teamsters Pension Trust Fund, 749 F.2d at 1402. The potential of
3 widespread termination of pension plans caused by cascading
4 withdrawals threatened to impose too heavy a burden on the PBGC
5 (the insurer of protected pension benefits) and, in turn, to
6 “collapse . . . the plan termination insurance program.” R.A.
7 Gray & Co., 467 U.S. at 721.

8 In 1980, Congress responded to this concern by enacting the
9 Multiemployer Pension Plan Amendments Act of 1980 (the “MPPAA”),
10 Pub. L. No. 96-364, 94 Stat. 1208 (codified as amended in
11 scattered sections of 26 and 29 U.S.C.). Under this amendment to
12 ERISA, “an employer [that] withdraws from a multiemployer plan
13 . . . is liable to the plan in the amount determined . . . to be
14 the withdrawal liability.” ERISA § 4201(a), 29 U.S.C. § 1381(a).
15 Withdrawal liability is the withdrawing employer’s proportionate
16 share of the pension plan’s unfunded vested benefits. See R.A.
17 Gray & Co., 467 U.S. at 725 (citing ERISA §§ 4201, 4211, 29
18 U.S.C. §§ 1381, 1391). Under the MPPAA, the employer pays its
19 withdrawal liability in annual installments, which are calculated
20 based on the employer’s historical contribution amounts. See
21 ERISA §§ 4211(c), 4219(c), 29 U.S.C. §§ 1391(c), 1399(c). The
22 statute limits the employer’s obligation to make these payments
23 to 20 years, even if it would take more than 20 payments for the
24 employer to pay its full withdrawal liability. See ERISA

1 § 4219(c)(1)(B), 29 U.S.C. § 1399(c)(1)(B); Nat'l Shopmen Pension
2 Fund v. DISA Indus., Inc., 653 F.3d 573, 576 (7th Cir. 2011).

3 **C. The PPA**

4 By 2005, a confluence of economic circumstances -- including
5 the actual or forecasted termination of various large pension
6 plans and the erosion of many employees' retirement savings --
7 again threatened ERISA's system for federally insuring
8 multiemployer pension plans. See Janice Kay McClendon, The Death
9 Knell of Traditional Defined Benefit Plans: Avoiding a Race to
10 the 401(k) Bottom, 80 Temp. L. Rev. 809, 809-12 (2007). Thus, in
11 2006, Congress revisited the problems associated with underfunded
12 pension plans by enacting the Pension Protection Act of 2006,
13 Pub. L. 109-280, 120 Stat. 780 (codified as amended in scattered
14 sections of 26 and 29 U.S.C.). The law is far-reaching, totaling
15 approximately one thousand pages, and introduced a number of
16 mechanisms aimed at stabilizing pension plans and ensuring that
17 they remain solvent. See generally Sarah D. Burt, Note, Pension
18 Protection? A Comparative Analysis of Pension Reform in the
19 United States and the United Kingdom, 18 Ind. Int'l & Comp. L.
20 Rev. 189, 199 (2008); Douglas L. Lineberry, The Pension
21 Protection Act of 2006, S.C. Law. July 2007, at 16.

22 As relevant to this case, the PPA includes measures designed
23 to protect and restore multiemployer pension plans in danger of
24 being unable to meet their pension distribution obligations in

1 the near future. The statute created two categories for such
2 plans: "endangered" and "critical." Under the PPA, a pension
3 plan is endangered if, inter alia, it is less than eighty percent
4 funded, and it is in critical status if, inter alia, it is less
5 than sixty-five percent funded. ERISA § 305(b), 29 U.S.C. §
6 1085(b). If a pension plan falls into critical status, the plan
7 sponsor must notify the participating employers and unions, ERISA
8 § 305(b)(3)(D), 29 U.S.C. § 1085(b)(3)(D), and each participating
9 employer must contribute an additional surcharge of five to ten
10 percent of the contribution amount required under the applicable
11 CBA. See ERISA § 305(e)(7), 29 U.S.C. § 1085(e)(7).

12 Additionally, upon a multiemployer pension plan's entry into
13 critical status, the plan's sponsor must adopt a rehabilitation
14 plan to restore the Fund's financial health going forward:

15 A rehabilitation plan is a plan which consists of --
16

17 (i) actions, including options or a range of options to
18 be proposed to the [employers and unions], formulated,
19 based on reasonably anticipated experience and
20 reasonable actuarial assumptions, to enable the plan to
21 cease to be in critical status by the end of the [ten-
22 year] rehabilitation period and may include reductions
23 in plan expenditures (including plan mergers and
24 consolidations), reductions in future benefit accruals
25 or increases in contributions, if agreed to by the
26 [employers and unions], or any combination of such
27 actions, or
28

29 (ii) if the plan sponsor determines that, based on
30 reasonable actuarial assumptions and upon exhaustion of
31 all reasonable measures, the plan can not reasonably be
32 expected to emerge from critical status by the end of
33 the rehabilitation period, reasonable measures to
34 emerge from critical status at a later time or to
35 forestall possible insolvency

ERISA § 305(e)(3)(A), 29 U.S.C. § 1085(e)(3)(A). The rehabilitation plan must set forth new schedules of reduced benefits and increased contributions, from which participating employers and unions may choose when it is time to negotiate successor CBAs. See ERISA § 305(e), 29 U.S.C. § 1085(e). One of those schedules must be designated as the "default schedule," which "assume[s] that there are no increases in contributions under the plan other than the increases necessary to emerge from critical status after [benefits] . . . have been reduced to the maximum extent permitted by law." ERISA § 305(e)(1), 29 U.S.C. § 1085(e)(1).

Most importantly for present purposes, the PPA provides as follows:

(C) Imposition of default schedule where failure to adopt rehabilitation plan

(i) In general

If-

(I) a collective bargaining agreement providing for contributions under a multiemployer plan that was in effect at the time the plan entered critical status expires, and

(II) after receiving one or more schedules from the plan sponsor [under a rehabilitation plan], the bargaining parties with respect to such agreement fail to adopt a contribution schedule with terms consistent with the rehabilitation plan and a schedule from the plan sponsor . . . ,
the plan sponsor shall implement the default schedule [of the rehabilitation plan]

beginning on the date
specified in clause (ii).

(ii) Date of implementation

The date specified in this clause is the date
which is 180 days after the date on which the
collective bargaining agreement described in
clause (i) expires.

ERISA § 305(e)(3)(C), 29 U.S.C. § 1085(e)(3)(C). As will be
seen, it is this provision and the extent to which it bears on
the facts of this case that are at the core of this appeal.

II. Factual Background

The facts, which are not in dispute, are as follows:

The Fund is a multiemployer defined-benefit pension plan.
The Trustees are its sponsor.

Honerkamp is a distributor of wood chips operating out of
two New York facilities -- one in the Bronx and one in Central
Islip. In early 2008, Honerkamp and the Bakery Drivers Local
Union No. 802 (the "Union") were parties to CBAs that covered
Honerkamp's unionized employees in its two facilities. The CBAs,
which were set to expire in late 2008, obligated Honerkamp to
contribute to the Fund on behalf of the company's employees.

In March 2008, the Trustees announced that the Fund was in
critical status as defined by the PPA, see ERISA § 305(b)(2), 29
U.S.C. § 1085(b)(2). They therefore began drafting a
rehabilitation plan. But they did not expect to complete the
rehabilitation plan until late 2008, around the time the two

1 Honerkamp CBAs were due to expire. Because the rehabilitation
2 plan would figure prominently in any negotiations between
3 Honerkamp and the Union over successor CBAs, the two sides agreed
4 to extend the existing Bronx and Central Islip agreements through
5 February 10 and March 27, 2009, respectively.

6 In November 2008, the Trustees finalized the rehabilitation
7 plan, which, as required by the PPA, set forth several new
8 schedules of reduced benefits and increased contributions. See
9 ERISA § 305(e), 29 U.S.C. § 1085(e). According to the
10 rehabilitation plan, the Trustees had determined that the Fund
11 was unlikely to emerge from critical status within the statutory
12 ten-year rehabilitation period. See ERISA § 305(e)(4), 29 U.S.C.
13 § 1085(e)(4). This was because the employer contribution rates
14 required for such a result would have exceeded the amounts that
15 employers would have had to pay to withdraw from the Fund under
16 the MPPAA. As explained by the rehabilitation plan, the Trustees
17 “assum[ed] that employers would be unwilling to continue to
18 participate . . . if the cost of doing so were to exceed the cost
19 of withdrawing.” Joint Appendix (“J.A.”) at 84. The Trustees
20 therefore designed four primary, or non-default, schedules “to
21 impose approximately the same burden actuarially on employers
22 that a withdrawal from the [Fund] would produce.” Id. at 85.
23 Participating employers’ adoption of the non-default schedules
24 was estimated to push back the Fund’s projected date of
25 insolvency from 2021 to 2024.

1 The Trustees also included in the rehabilitation plan a
2 default schedule, which, in accordance with the PPA, outlined the
3 Fund's emergence from critical status. See ERISA § 305(e)(1), 29
4 U.S.C. § 1085(e)(1). But because the Trustees believed that the
5 contribution levels required for the Fund to emerge from critical
6 status were "unrealistic[ally high]," J.A. at 84, they expected
7 the default schedule to be implemented only if a participating
8 employer and union did not agree on one of the four non-default
9 schedules. Presumably, this expectation was due to the earlier-
10 excerpted portion of the PPA that requires a multiemployer
11 pension plan in critical status to "implement the default
12 schedule" in the event such deadlock persists for 180 days. See
13 ERISA § 305(e)(3)(C), 29 U.S.C. § 1085(e)(3)(C).

14 With the rehabilitation plan finalized, Honerkamp and the
15 Union proceeded to negotiate their successor CBAs. They
16 considered the rehabilitation plan's schedules as well as the
17 possibility of Honerkamp's withdrawal from the Fund. As part of
18 that consideration, Honerkamp requested and the Trustees provided
19 an estimate of Honerkamp's withdrawal liability under the MPPAA.

20 On July 22, 2009, Honerkamp sent the Union a "Last, Best,
21 and Final Offer" for each facility. Both offers provided that,
22 as of August 1 of that year, Honerkamp would withdraw from the
23 Fund and create instead a 401(k) retirement plan for the
24 company's employees. The Central Islip employees voted to ratify
25 the offer and, together with Honerkamp, entered into a new CBA on

1 August 1 reflecting this change. The Bronx employees initially
2 rejected Honerkamp's offer. With the parties then at an impasse,
3 Honerkamp unilaterally implemented its offer -- withdrawing from
4 the Fund in favor of the 401(k) plan -- as permitted by the
5 National Labor Relations Act, 29 U.S.C. § 151 et seq. The Bronx
6 employees and Honerkamp eventually entered into a new CBA in
7 April 2010. Like the agreement reached with the Central Islip
8 employees, the new Bronx CBA provided for Honerkamp's withdrawal
9 from the Fund in favor of a 401(k) plan.

10 On July 31, 2009, Honerkamp informed the Trustees that it
11 would be withdrawing from the Fund for both locations effective
12 August 1. The Trustees responded that the PPA required Honerkamp
13 to contribute to the Fund under the rehabilitation plan's default
14 schedule if the company and Union did not agree to a non-default
15 schedule within 180 days of the CBAs' expiration. Honerkamp
16 countered that withdrawal was permissible and that it would be
17 liable only to pay withdrawal liability as calculated under the
18 MPPAA.

19 **III. Procedural Background**

20 In February 2010, the Trustees brought this suit against
21 Honerkamp. They argued that the PPA prevented Honerkamp from
22 withdrawing from the Fund after the Fund entered critical status.
23 The Trustees sought to compel Honerkamp to make retroactive and
24 prospective contributions under the rehabilitation plan's default

1 schedule. Honerkamp moved and the Trustees cross-moved for
2 summary judgment. The magistrate judge submitted to the district
3 court a report and recommendation in favor of summary judgment
4 for Honerkamp. Following oral argument on the parties' motions,
5 the district court adopted the recommendation.

6 The Trustees appeal from the district court's grant of
7 summary judgment in favor of Honerkamp and denial of their cross-
8 motion for summary judgment.

9 DISCUSSION

10 I. Standard of Review

11 We review de novo the district court's grant of summary
12 judgment, which relied entirely on its construction of the PPA.
13 See Finkel v. Romanowicz, 577 F.3d 79, 84 (2d Cir. 2009) ("We
14 review de novo a district court's application of law to
15 undisputed facts").

16 II. The PPA's Effect on Withdrawal

17 At issue here is the extent to which the PPA, in these
18 circumstances, abrogates the ability of a participating employer
19 to withdraw from a multiemployer pension plan in critical status.
20 Honerkamp claims that it may withdraw from the Fund as long as it
21 pays withdrawal liability as calculated under the MPPAA. The
22 Trustees do not dispute that this would have been correct before
23 the enactment of the PPA. But they contend that under that more
24 recent statute, Honerkamp cannot withdraw and must continue

1 participating in the Fund while contributing in accordance with
2 the rehabilitation plan's default schedule. See ERISA
3 § 305(e)(3)(C), 29 U.S.C. § 1085(e)(3)(C).

4 To our knowledge, no other court besides the district court
5 in this action has considered whether the PPA prohibits employers
6 from withdrawing from multiemployer pension plans in critical
7 status. On this issue, the PPA itself is silent. But, as is
8 always the case in issues of statutory interpretation, the
9 "ultimate question" here "is one of congressional intent." In re
10 Lehman Bros. Mortg.-Backed Secs. Litig., 650 F.3d 167, 180 (2d
11 Cir. 2011) (internal quotation marks omitted). For the reasons
12 that follow, we agree with the district court and Honerkamp that,
13 in enacting the PPA, Congress did not intend to prevent employers
14 from withdrawing from multiemployer pension plans in critical
15 status.

16 "Because our task is to ascertain Congress's intent, we look
17 first to the text and structure of the statute" as the surest
18 guide to congressional intent. Lindsay v. Ass'n of Prof'l Flight
19 Attendants, 581 F.3d 47, 52 (2d Cir. 2009). While the text of
20 the PPA does not speak to the issue at hand directly, it does
21 evidence Congress's understanding that employers can and will
22 withdraw from plans in critical status. Although there is no
23 explicit statement of the right to withdraw, the statute appears
24 to assume withdrawals in these circumstances by revising the
25 calculation of withdrawal liability where the pension plan

1 withdrawn from is in critical status. See ERISA § 305(e)(9), 29
2 U.S.C. § 1085(e)(9). Specifically, the PPA provides that
3 calculations of an employer's withdrawal liability should not
4 take into account (1) contribution surcharges imposed
5 automatically once a pension plan enters critical status, or (2)
6 benefit reductions required by a rehabilitation plan. See id.

7 In enacting the PPA, Congress also amended other portions of
8 ERISA dealing with withdrawal and withdrawal liability without
9 the slightest indication that it intended to abrogate employers'
10 ability to withdraw from pension plans in critical status. See
11 PPA § 204(a)(2) (codified at ERISA § 4225(a)(2), 29 U.S.C.
12 § 1405(a)(2)) (changing the calculation of the limitation on
13 withdrawal liability where the employer company is sold); PPA
14 § 204(b)(1) (codified at ERISA § 4205(b)(2), 29 U.S.C. §
15 1385(b)(2)) (amending the imposition of partial withdrawal
16 liability when, inter alia, the employer's obligation to
17 contribute to a plan ceases under some but not all CBAs or
18 regarding some but not all facilities); see also PPA
19 § 502(b)(codified at ERISA § 101(l)(1), 29 U.S.C.
20 § 1021(l)(1))(redesignating and restating the requirement that
21 the plan sponsor provide an estimate of withdrawal liability upon
22 the employer's request). That Congress did not hint at -- let
23 alone explicitly state -- such an abrogation, despite clearly
24 having withdrawal and withdrawal liability on its mind, is

1 significant. This is so in part because, in at least one other
2 clause of the PPA, Congress unambiguously disclaimed an older
3 portion of ERISA that it wished no longer to apply in the context
4 of critical-status pension plans. See PPA § 202(a) (codified at
5 ERISA § 305(e)(8)(A)(i), 29 U.S.C. § 1085(e)(8)(A)(i)) (allowing
6 the retroactive cutting of certain benefits that typically would
7 be prohibited).

8 The Trustees respond that Congress, in considering
9 withdrawal and withdrawal liability when enacting the PPA, had in
10 mind only “involuntary withdrawals” from plans, such as those
11 caused by an employer’s going out of business or a pension plan’s
12 liquidation. But this interpretation is unpersuasive. Nowhere
13 in the PPA’s repeated references to withdrawal did Congress
14 suggest any voluntary/involuntary distinction, notwithstanding
15 the decades-long precedent of employers “voluntarily” withdrawing
16 from pension plans when financially expedient.

17 Our conclusion that Congress did not intend the PPA to
18 foreclose withdrawal in these circumstances finds further support
19 external to the statute’s text. The PBGC, the agency charged
20 with administering the withdrawal-liability provisions under
21 ERISA, is traditionally afforded substantial deference in its
22 reasonable interpretations of the statute. See Pension Benefit
23 Guar. Corp. v. LTV Corp., 496 U.S. 633, 647-48 (1990); Kinek v.
24 Paramount Commc’ns, Inc., 22 F.3d 503, 511 n.5 (2d Cir. 1994);
25 see also Cent. States Se. & Sw. Areas Pension Fund v. O’Neill

1 Bros. Transfer & Storage Co., 620 F.3d 766, 774 (7th Cir. 2010));
2 In its interpretation of the PPA, the PBGC has adopted
3 regulations for calculating employer liability for withdrawal
4 from plans in critical status. See 73 Fed. Reg. 79628-02, 79632-
5 33 (Dec. 30, 2008)(section titled "Withdrawal Liability
6 Computations for Plans in Critical Status--Employer Surcharges")
7 (explaining 29 C.F.R. § 4211.4). Like the PPA itself, these
8 regulations say nothing about mandatory contributions under
9 rehabilitation plans or prohibiting withdrawals. Nor do they
10 suggest a distinction between voluntary and involuntary
11 withdrawals. To be sure, the PBGC does not appear to have issued
12 an interpretation on the precise question at issue -- whether the
13 PPA forecloses withdrawal in these circumstances -- to which we
14 might defer if we found Congress's intent unclear. But from
15 every indication, the PBGC's understanding of the PPA accords
16 with our reading of Congress's intent in enacting the law.

17 It is noteworthy that the Trustees themselves, before
18 bringing this lawsuit, believed that participating employers like
19 Honerkamp had the option of withdrawing from the Fund after it
20 had entered critical status. The rehabilitation plan stated that
21 its goals would "be met if," inter alia, "withdrawal liability is
22 imposed and collected with respect to employers that withdraw
23 from the [Fund]." J.A. at 83. Moreover, the Trustees
24 contemplated the possibility of "voluntary" withdrawals. The
25 rehabilitation plan explained that it did not contain only the

1 high-contribution schedules necessary for the Fund to emerge from
2 critical status because such contribution rates "would
3 undoubtedly drive employers to withdraw from the [Fund]," given
4 the Trustees' "reasonable assumption that employers would be
5 unwilling to continue to participate in the [Fund] if the cost of
6 doing so were to exceed the cost of withdrawing." Id. Of
7 course, the ultimate question of statutory interpretation is for
8 the Court and not the Trustees. But we are reassured by the
9 plaintiffs' own expressed understanding that voluntary withdrawal
10 was permissible notwithstanding the operation of the PPA's
11 mechanism for dealing with pension plans in critical status.

12 Finally, to pursue the PPA's aims, it was not necessary for
13 Congress to forbid withdrawal, accompanied by MPPAA liability,
14 from pension plans in critical status. Both statutes aim to
15 protect beneficiaries of multiemployer pension plans by keeping
16 such plans adequately funded. Indeed, the Trustees designed the
17 rehabilitation plan's non-default schedules "to impose
18 approximately the same burden actuarially on employers that
19 withdrawal from the [Fund] would [have] produce[d]." Id. at 85.
20 Consequently, Honerkamp's withdrawal from the Fund while paying
21 liability under the MPPAA largely comports with the goals of the
22 PPA. It is true, as the Trustees point out, that the MPPAA caps
23 withdrawal liability such that in some cases the amount paid by
24 withdrawing employers may not fully refund a pension plan. See
25 ERISA § 4219(c)(1)(B), 29 U.S.C. § 1399(c)(1)(B) (withdrawn

1 employers are liable only for twenty years of withdrawal-
2 liability payments). But implementation of a rehabilitation plan
3 under the PPA may not restore a pension plan's solvency either.
4 Indeed, the Trustees here determined that the Fund was unlikely
5 to emerge from critical status, and therefore designed the non-
6 default schedules not to prevent but only to delay the point of
7 insolvency. In any case, it remains true that the MPPAA and PPA
8 pursue the same basic ends, broadly conceived.

9 Against the weight of these considerations, the Trustees
10 offer very little in support of their proposed interpretation of
11 the PPA. For example, in arguing that Congress sought to
12 foreclose withdrawal in circumstances of the sort presented in
13 this case, the Trustees rely largely on a 2008 amendment to the
14 PPA. See Worker, Retiree, and Employer Recovery Act of 2008,
15 Pub. L. 110-458 § 102, 122 Stat. 5092, 5100 (2008) (codified at
16 ERISA § 305(e)(3)(C)(ii), 29 U.S.C. § 1085(e)(3)(C)(ii)). The
17 relevant subsection previously stated that the default schedule
18 should be implemented at the earlier of a bargaining impasse
19 between an employer and union or 180 days after expiration of the
20 operative CBA. In 2008, Congress eliminated the former date, so
21 the default schedule now goes into effect 180 days after the
22 pertinent CBA expires. The Trustees argue that Congress enacted
23 this amendment to close a loophole through which employers, via
24 impasse and withdrawal, could escape contributing under
25 rehabilitation plans. However, if Congress had been trying to

1 eliminate the withdrawal option, one would think that it would
2 have done so explicitly -- not cryptically through a timing
3 amendment. Moreover, the Trustees' argument would prohibit only
4 a voluntary withdrawal upon impasse, and would not prohibit a
5 voluntary withdrawal agreed to by an employer and union (as
6 happened here with respect to the Central Islip employees).

7 **CONCLUSION**

8 Because we agree with the district court's conclusion that
9 the PPA does not forbid Honerkamp's withdrawal from the Fund, we
10 AFFIRM the judgment of the district court.
