

RULES AND ORDERS  
OF THE  
SUPREME COURT OF THE UNITED STATES.

---

FEBRUARY TERM, 1817.

WHENEVER it shall be necessary or proper, in the opinion of the presiding judge, in any circuit court, or district court exercising circuit court jurisdiction, that original papers of any kind should be inspected in the supreme court, upon appeal, such presiding judge may make such rule or order for the safe-keeping, transporting and return of such original papers as to him may seem proper, and this court will receive and consider such original papers in connection with the transcript of the proceedings.

In all cases of admiralty and maritime jurisdiction, where new evidence shall be admissible in this court, the evidence, by testimony of witnesses, shall be taken under a commission to be issued from this court, or from any circuit court of the United States, under the direction of any judge thereof ; and no such commission shall issue but upon interrogatories to be filed by the party applying for the commission, and notice to the opposite party, or his agent or attorney, accompanied with a copy of the interrogatories so filed, to file cross-interrogatories, within twenty days from the service of such notice. Provided, however, that nothing in this rule shall prevent any party from giving oral testimony, in open court, in cases where by law it is admissible.

PLANS AND ORDERS

NO. 1

PLANS AND ORDERS

PLANS AND ORDERS

The first part of the plan is to determine the general character of the work to be done. This is done by a preliminary survey of the field, and by a study of the various reports and documents which may be available. The second part is to determine the details of the work, and to make a plan of the work to be done. This is done by a study of the various reports and documents which may be available, and by a study of the various methods which may be used. The third part is to make a plan of the work to be done, and to make a plan of the work to be done. This is done by a study of the various reports and documents which may be available, and by a study of the various methods which may be used.

The second part of the plan is to determine the details of the work, and to make a plan of the work to be done. This is done by a study of the various reports and documents which may be available, and by a study of the various methods which may be used. The third part is to make a plan of the work to be done, and to make a plan of the work to be done. This is done by a study of the various reports and documents which may be available, and by a study of the various methods which may be used.
