

BRUSH *v.* COMMISSIONER OF INTERNAL
REVENUE.

CERTIORARI TO THE CIRCUIT COURT OF APPEALS FOR THE
SECOND CIRCUIT.

No. 451. Argued February 4, 1937.—Decided March 15, 1937.

1. The water system of the City of New York was created and is conducted in the exercise of the City's governmental functions, and the salary of the Chief Engineer of the City's Bureau of Water Supply is immune from federal taxation. Pp. 360, 366.

The Chief Engineer holds his office by statutory authority with a fixed annual salary. He exercises supervision over the engineering details connected with the supplying of water for public purposes and for consumption by the inhabitants of the City; supervises the protection of the water supply from pollution; and generally exercises control over the operation of the water system, its personnel, expenditure of money, and other matters relating thereto. The opinion sketches the history of the system, developed under legislative authority, and indicates its vital importance from both public and private standpoints.

2. This activity may be deemed an essential governmental function of the State. P. 362.
3. The rule that forbids the United States to tax the governmental instrumentalities of the States, and *vice versa*, is necessarily implied in the Constitution as essential to the preservation of our form of government; its application is a question of national scope to be resolved by principles of general application. P. 364.
4. Local rulings attempting to separate governmental from corporate activities in determining whether municipalities are suable for the torts of their agents, should be applied with caution as a test in determining what municipal activities are subject to federal taxation. P. 363.
5. The conclusion that the acquisition and distribution of a supply of water for the needs of New York City involve the exercise of essential governmental functions is fortified by a consideration of the public uses to which the water is put, and the dependency of the health and comfort of the inhabitants upon an adequate supply of pure water. P. 370.

6. The fact that in former times the business of furnishing water to urban communities, including New York, was left largely or entirely to private enterprise is not a reason for holding that the function, when performed by the City, is not governmental. P. 371.
 7. Governmental functions are not to be regarded as non-existent because they were held in abeyance and have but recently been called into use. P. 371.
 8. The fact that the City makes a charge for water service to private consumers does not stamp the function of supplying water as a private one. P. 372.
 9. *South Carolina v. United States*, 199 U. S. 437, 461, 462, and *Flint v. Stone Tracy Co.*, 220 U. S. 107, 172, distinguished. *Dicta* in an opinion by way of illustration do not control in subsequent cases in which the precise point is presented for decision. P. 373.
- 85 F. (2d) 32, reversed.

CERTIORARI, 299 U. S. 536, to review a judgment affirming an order of the Board of Tax Appeals, which sustained a deficiency income tax assessment on the salary of the petitioner in this case.

Messrs. Boykin C. Wright and Paul Windels for petitioner.

The question presented: The supplying of water to Greater New York for use by the City itself and its inhabitants being a usual governmental function and an undertaking which cannot be efficiently or safely left to private enterprise, and having been conducted by the Government for over a century, should not the salary of a municipal employee serving as engineer to the Department of Water Supply be exempt from federal income taxes? The petitioner contends the court below adopted an erroneous criterion for immunity, in that the court laid down the test that the activity in question must be "necessary to its [the municipality's] existence as a government."

The test to be applied is whether supplying water is a "usual governmental function." *Helvering v. Powers*,

293 U. S. 214; *Flint v. Stone Tracy Co.*, 220 U. S. 107; *United States v. California*, 297 U. S. 175, 185.

The supply of pure water, in adequate amounts, to urban centers of population has been consistently regarded as a sovereign or governmental function from an early date. *New Orleans v. Morris*, 105 U. S. 600; *New Orleans Water Works v. Rivers*, 115 U. S. 674, 681-682; *Columbus v. Mercantile Trust Co.*, 218 U. S. 645, 658. Distinguishing: *South Carolina v. United States*, 199 U. S. 437; *Ohio v. Helvering*, 292 U. S. 360, 369. See *Ashton v. Cameron County Water District*, 298 U. S. 513; *Rochester v. Rush*, 80 N. Y. 302; *Leonard v. Brooklyn*, 71 N. Y. 498; *Massena v. St. Lawrence Co.*, 126 Misc. 524.

The necessity of public operation of waterworks is so widely recognized that such operation has become usual, with private operation rare in practice and confined to the smaller cities.

In defining "usual governmental function," the courts should not confine their attention to the situation prevailing when the Union was formed. *Hoskins v. Commissioner*, 84 F. (2d) 627.

The analogy of the tort cases is impertinent and misleading. Exemption from liability in tort might have led to widespread individual suffering and other deplorable consequences. The courts might well have decided that to leave uncompensated all persons injured through the negligent operation of waterworks would produce more widespread social evils than would flow from holding cities liable to persons injured.

Radically different considerations assume control when the discussion shifts to the matter of tax exemption of waterworks' employees from federal taxes. To deny exemption hinders the performance of what this Court regarded as the highest of police duties (*Columbus v. Mercantile Trust Co.*, 218 U. S. 645) by either leaving employees dissatisfied with reduced salaries or cities bur-

dened with the duty of increasing those salaries to levels adequate to leave a fair and just net salary after paying taxes.

That the traditional dichotomy of the tort cases is not universally valid has been acknowledged by this Court itself. *Trenton v. New Jersey*, 262 U. S. 182.

The petitioner's contentions do not lead to a withdrawal of any field from federal taxation. The field we are concerned with has never previously been invaded by the Federal Government. Cf. *Metcalfe & Eddy v. Mitchell*, 269 U. S. 514, 519.

That revenues are derived from the municipal waterworks is of no consequence. *Commissioner v. Ten Eyck*, 76 F. (2d) 515, 519; *New York ex rel. Rogers v. Graves*, 299 U. S. 401; *United States v. Coghlan*, 261 Fed. 425, 426.

The taxation of the petitioner's salary impedes and burdens the municipality in performing governmental functions. *Collector v. Day*, 11 Wall. 113; *New York ex rel. Rogers v. Graves*, 299 U. S. 401; *Metcalfe & Eddy v. Mitchell*, 269 U. S. 514, 524; *Miller v. McCaughn*, 27 F. (2d) 128.

We discern far-reaching consequences if the decision below is allowed to stand. For, if the Federal Government can tax the petitioner's salary, it will presently assert the right to tax the bonds issued for aqueduct and reservoir construction and, having succeeded so far, will impose an income tax on the revenues of operation. In order to enjoy the protection which an adequate supply of pure water gives against fires and against disease, the citizens of New York will be compelled to pay tribute to the Federal Government.

If the Government's contentions are upheld, the various States in which the Tennessee Valley Authority carries on its operations might well seek to tax its revenues and its real estate, on the ground that to do so

would not impede any activity essential to the existence of the Federal Government as a government.

By leave of Court, *Mr. Julius Henry Cohen* made an argument, and *Messrs. John J. Bennett, Jr.*, Attorney General, and *Henry Epstein*, Solicitor General, filed a brief, on behalf of the State of New York as *amicus curiae*.

The Department of Water Supply, Gas and Electricity of the City of New York represents and performs a normal and necessary governmental function, meeting the standards laid down by this Court.

The Federal taxation of New York City's water supply will constitute a direct burden on the State of New York.

If the water supply function is immune, the salaries of the city's officers and employees engaged therein are likewise immune.

Mr. J. P. Jackson, with whom *Solicitor General Reed*, *Assistant Attorney General Jackson*, and *Messrs. Sewall Key* and *Berryman Green* were on the brief, for respondent.

Since the rule is aimed at the protection of the operations of government, the immunity does not extend "to anything lying outside or beyond governmental functions and their exertions." *Fox Film Corp. v. Doyal*, 286 U. S. 123, 128; *Board of Trustees v. United States*, 289 U. S. 48. It is entirely clear that the operation by a municipality of a public utility such as a waterworks system is not a governmental function.

A municipal corporation acts in a dual capacity. In the one character it is a governmental subdivision of the State, and exercises, by delegation, a part of the sovereignty of the State. In the other character it is a mere legal entity or juristic person and stands for the community in administration of local affairs. *Vilas v. Manila*, 220 U. S. 345, 356; *Winona v. Botzet*, 169 Fed. 321, 332; *Galveston v. Rowan*, 20 F. (2d) 501, 502.

It is well settled that in the maintenance of a water supply system, the municipality acts in a corporate or proprietary and not in a governmental capacity. McQuillin, *Municipal Corporations*, (2d ed.), §§ 1962, 2852; Borchard, *Government Liability in Tort*, 34 *Yale L. J.*, pp. 1, 252, 254. We have found no authority to the contrary. [Citing many state cases.] This is the settled rule in New York, the highest court of that State holding that the very function here involved—the operation of the New York City water system—is a private and not a governmental function, and holding, moreover, in applying the doctrine of *respondeat superior*, that an employee of the City, engaged in such proprietary activity, is not an officer or employee of the State of New York, but an agent of the City performing services for the local advantage and benefit of the City and not for the State at large. [Citing New York cases.]

That the rule of immunity has no place in this proceeding, see *Flint v. Stone Tracy Co.*, 220 U. S. 107, 172; *South Carolina v. United States*, 199 U. S. 437, 461, 462; *Helvering v. Powers*, 293 U. S. 214; *Blair v. Byers*, 35 F. (2d) 326; *Denman v. Commissioner*, 73 F. (2d) 193.

The fundamental reason for denying federal authority to tax is found in the necessary protection of the independence of the respective governments within their respective spheres under our Constitution. *Helvering v. Powers*, *supra*; *Collector v. Day*, 11 Wall. 113, 125, 127; *Ambrosini v. United States*, 187 U. S. 1, 7. These reasons outline the limits of the rule of immunity. *Board of Trustees v. United States*, 289 U. S. 48; *Indian Motorcycle Co. v. United States*, 283 U. S. 570, 575, 576. The principle of immunity has inherent limitations. *Helvering v. Powers*, *supra*; *Metcalf & Eddy v. Mitchell*, 269 U. S. 514, 522-524; *Willcuts v. Bunn*, 282 U. S. 216, 225, 226; *Fox Film Corp. v. Doyal*, 286 U. S. 123, 128.

The successful working of our dual governmental system requires that the principle of immunity be applied so as to interfere as little as possible with the important functions of federal taxation, and, therefore, the rule is to be applied restrictively. *Willcuts v. Bunn*, 282 U. S. 216; 225; *Educational Films Corp. v. Ward*, 282 U. S. 379, 391.

The necessary independence of the States requires that the rule be applied only to those functions "strictly" or "essentially" governmental in character. *South Carolina v. United States*, *supra*, p. 461; *Flint v. Stone Tracy Co.*, *supra*, pp. 157, 172. Just what those functions are that are strictly and essentially governmental and necessary to preserve the separate independence of the States is difficult to state in terms of general application. See *Metcalf & Eddy v. Mitchell*, 269 U. S. 514, 523. Apparently they include only the operations of the legislative, executive, and judicial branches of state government in the making and enforcing of laws. See *Flint v. Stone Tracy Co.*, *supra*, pp. 157, 172; *Liggett & Myers Tobacco Co. v. United States*, 13 F. Supp. 143, 145; *aff'd* on other grounds, 299 U. S. 383. It is clear that the operation by a municipality of a waterworks is not a strictly and essential governmental function, necessary to the preservation of independent state governments. In fact, the State has no interest, governmental or otherwise, in the activity in question. *Bailey v. Mayor*, 3 Hill (N. Y.) 531, 539.

The rule of immunity is further limited by the settled principle that the States may not withdraw sources of revenue from the federal taxing power by engaging in activities to which, by their nature, the federal taxing power would normally extend. *Helvering v. Powers*, *supra*; *South Carolina v. United States*, 199 U. S. 437; *Murray v. Wilson Distilling Co.*, 213 U. S. 151, 173; *United States v. California*, 297 U. S. 175, 184-185; *Ohio*

v. *Helvering*, 292 U. S. 360, 368, 369. See also *United States Bank v. Planters Bank*, 9 Wheat. 904, 907.

In the purveying of water for a price, the City is engaged in a profitable business enterprise. It is engaged in an activity which, at the time of the adoption of our Constitution, was carried on by private companies. In New York City at the present time water is furnished and sold by private companies in certain areas.

The duties of the taxpayer as Chief Engineer are no different from those of similar engineers employed by private concerns engaged in a similar enterprise. We see no reason for putting the sale of water in a different category from the sale of liquor (*South Carolina v. United States*, 199 U. S. 437; *Ohio v. Helvering*, 292 U. S. 360) or from the operation of a street railway (*Helvering v. Powers*, 293 U. S. 214). And, if a State may not, by entering into these activities, thus withdraw sources of federal revenue, *a fortiori* a municipal corporation may not.

By leave of Court, briefs of *amici curiae* were filed as follows: by *Mr. J. Joseph Lilly*, on behalf of Thaddeus Merriman et al.; by *Messrs. Paul Windels, Oscar S. Cox, and Paxton Blair*, on behalf of the City of New York; and by *Messrs. James H. Howard and Charles C. Cooper, Jr.*, on behalf of Frank E. Weymouth, General Manager and Chief Engineer of the Metropolitan Water District of Southern California, all urging reversal of the judgment below.

MR. JUSTICE SUTHERLAND delivered the opinion of the Court.

The question brought here for determination is whether the salary of petitioner as Chief Engineer of the Bureau of Water Supply of the City of New York is a part of his taxable income for the purposes of the federal income-

tax law. The answer depends upon whether the water system of the city was created and is conducted in the exercise of the city's governmental functions. If so, its operations are immune from federal taxation and, as a necessary corollary, "fixed salaries and compensation paid to its officers and employees in their capacity as such are likewise immune." *New York ex rel. Rogers v. Graves*, 299 U. S. 401, 408.

Petitioner holds his office as Chief Engineer by statutory authority, with a fixed annual salary of \$14,000. He exercises supervision over the engineering details connected with the supplying of water for public purposes and for consumption by the inhabitants of the city; supervises the protection of the water supply from pollution; and generally exercises control over the operation of the water system, its personnel, expenditure of money and other matters relating thereto.

In the early history of the city, water was furnished by private companies; but a century or more ago, the city itself began to take over the development and distribution. In 1831, the Board of Aldermen declared its dissatisfaction with the private control, and resolved that the powers then vested in private hands should be repealed by the legislature and vested exclusively in the corporation of the City of New York. This, in effect, was initiated in 1833 (L. 1833, c. 36); and, soon thereafter, the city constructed municipal water works, and, with slight exceptions, private control and operation ceased. The sources of water supply furnished by such companies as remain are approaching exhaustion, and the water furnished is of a quality inferior to that supplied by the municipality. From 1833 to the present time, additions to the water supply and system have been steadily made until the cost has mounted to more than \$500,000,000; and it is estimated that additional expenditures of a quarter of a billion dollars will be necessary.

The cost of bringing water from the Catskills alone amounted to approximately \$200,000,000. The municipal outstanding bonded indebtedness incurred for supplying the city with water amounts to an enormous sum. More than half the entire population of the state is found within the municipal boundaries. The action of the city from the beginning has been taken under legislative authority.

The Commissioner of Internal Revenue having assessed a deficiency tax against petitioner in respect of his salary, petitioner sought a redetermination at the hands of the Board of Tax Appeals. That board sustained the commissioner and decreed a deficiency against petitioner of \$256.27 for the year 1931. Upon review, the court below affirmed the decree of the board. 85 F. (2d) 32. While the sum involved is small, we granted the writ of certiorari because of the obvious importance of the question involved.

The phrase "governmental functions," as it here is used, has been qualified by this court in a variety of ways. Thus, in *South Carolina v. United States*, 199 U. S. 437, 461, it was suggested that the exemption of state agencies and instrumentalities from federal taxation was limited to those which were of a *strictly* governmental character, and did not extend to those used by the state in carrying on an ordinary private business. In *Flint v. Stone Tracy Co.*, 220 U. S. 107, 172, the immunity from taxation was related to the *essential* governmental functions of the state. In *Helvering v. Powers*, 293 U. S. 214, 225, we said that the state "cannot withdraw sources of revenue from the federal taxing power by engaging in businesses which constitute a departure from *usual* governmental functions and to which, by reason of their nature, the federal taxing power would normally extend." And immunity is not established because the state has the power to engage

in the business for what the state conceives to be the public benefit. *Idem.* In *United States v. California*, 297 U. S. 175, 185, the suggested limit of the federal taxing power was in respect of activities in which the states have *traditionally* engaged.

In the present case, upon the one side, stress is put upon the adjective "essential," as used in the *Flint v. Stone Tracy* case, while, on the other side, it is contended that this qualifying adjective must be put aside in favor of what is thought to be the greater reach of the word "usual," as employed in the *Powers* case. But these differences in phraseology, and the others just referred to, must not be too literally contradistinguished. In neither of the cases cited, was the adjective used as an exclusive or rigid delimitation. For present purposes, however, we shall inquire whether the activity here in question constitutes an essential governmental function within the proper meaning of that term; and in that view decide the case.

There probably is no topic of the law in respect of which the decisions of the state courts are in greater conflict and confusion than that which deals with the differentiation between the governmental and corporate powers of municipal corporations. This condition of conflict and confusion is confined in the main to decisions relating to liability in tort for the negligence of officers and agents of the municipality. In that field, no definite rule can be extracted from the decisions.¹ It is true that

¹This is brought out in a careful and detailed review by Professor Borchard in that portion of his general discussion of "Government Liability in Tort" dealing with municipal corporations, to be found in (1924-5) 34 Yale L. J. 129-143, 229-258, in the course of which he says (p. 129): "Disagreement among the courts as to many customary municipal acts and functions may almost be said to be more common than agreement and the elaboration of the varying justifications for their classification is even less satisfying to any demand for principle in the law. Indeed, so hopeless did the effort of the courts

in most of the state courts, including those in the State of New York, it is held that the operation of water works falls within the category of corporate activities; and the city's liability is affirmed in tort actions arising from negligence in such operation. But the rule in respect of such cases, as we pointed out in *Trenton v. New Jersey*, 262 U. S. 182, 192, has been "applied to escape difficulties, in order that injustice may not result from the recognition of technical defenses based upon the governmental character of such corporations"; and the rule is hopelessly indefinite, probably for that very reason.

This is not, however, an action for personal injuries sounding in tort, but a proceeding which seeks in effect to determine whether immunity from federal taxation, in respect of the activity in question, attaches in favor of a state-created municipality—an objective so different in character from that sought in a tort action as to suggest caution in applying as the guide to a decision of the former a local rule of law judicially adopted in order to avoid supposed injustices which would otherwise result in the latter. We have held, for example, that the sale of motorcycles to a municipal corporation for use in its police service is not subject to federal taxation, because the maintenance of such a service is a governmental function. *Indian Motorcycle Co. v. United States*, 283 U. S. 570, 579. And while it is true that the weight of authority in tort actions accords with that view, there are state decisions which affirm the liability of a municipality for personal injury resulting from the negligence of its police officials under the circumstances presented in the respective cases dealt with.² Nevertheless, our

to make an appropriate classification of functions appear to the Supreme Court of South Carolina that they determined to abandon the distinction between governmental and corporate acts."

² See *Herron v. Pittsburgh*, 204 Pa. 509, 513; 54 Atl. 311; *Jones v. Sioux City*, 185 Iowa 1178, 1185; 170 N. W. 445; *Twist v. Rochester*,

decision in the *Indian Motorcycle* case did not rest in the slightest degree upon a consideration of the state rule in respect of tort actions, but upon a broad consideration of the implied constitutional immunity arising from the dual character of our national and state governments.

The rule in respect of municipal liability in tort is a local matter; and whether it shall be strict or liberal or denied altogether is for the state which created the municipality alone to decide (*Detroit v. Osborne*, 135 U. S. 492, 497-498)—provided, of course, the Federal Constitution be not infringed. But a federal tax in respect of the activities of a state or a state agency is an imposition by one government upon the activities of another, and must accord with the implied federal requirement that state and local governmental functions be not burdened thereby. So long as our present dual form of government endures, the states, it must never be forgotten, “are as independent of the general government as that government within its sphere is independent of the States.” *Collector v. Day*, 11 Wall. 113, 124. And, as it was said in *Texas v. White*, 7 Wall. 700, 725, and often has been repeated—“the preservation of the States, and the maintenance of their governments, are as much within the design and care of the Constitution as the preservation of the Union and the maintenance of the National government.” The unimpaired existence of both governments is equally essential. It is to that high end that this court has recognized the rule, which rests upon necessary implication, that neither may tax the governmental means and instrumentalities of the other. *Collector v. Day*, *supra*, p. 127. In the light of these considerations, it follows that the question here presented is not controlled by local law but is a question of national scope to be resolved in harmony with implied constitutional prin-

55 N. Y. Supp. 850. Compare *Kunz v. Troy*, 104 N. Y. 344, 348; 10 N. E. 442, with *Altvater v. Mayor of Baltimore*, 31 Md. 462.

ciples of general application. Compare *Workman v. New York City*, 179 U. S. 552, 557. This indicated dissimilarity constitutes a distinction which is fundamental; and we put aside the state decisions in tort actions as inapposite. Compare *Atlantic Cleaners & Dyers v. United States*, 286 U. S. 427, 433 *et seq.*

We thus come to a situation, which the courts have frequently been called upon to meet, where the issue cannot be decided in accordance with an established formula, but where points along the line "are fixed by decisions that this or that concrete case falls on the nearer or farther side." *Hudson Water Co. v. McCarter*, 209 U. S. 349, 355. We are, of course, quite able to say that certain functions exercised by a city are clearly governmental—that is, lie upon the nearer side of the line—while others are just as clearly private or corporate in character, and lie upon the farther side. But between these two opposite classes, there is a zone of debatable ground within which the cases must be put upon one side or the other of the line by what this court has called the gradual process of historical and judicial "inclusion and exclusion." *Continental Bank v. Chicago, R. I. & P. Ry.*, 294 U. S. 648, 670, and cases cited.

We think, therefore, that it will be wise to confine, as strictly as possible, the present inquiry to the necessities of the immediate issue here involved, and not, by an attempt to formulate any general test, risk embarrassing the decision of cases in respect of municipal activities of a different kind which may arise in the future. Cf. *Euclid v. Ambler Realty Co.*, 272 U. S. 365, 397; *Metcalf & Eddy v. Mitchell*, 269 U. S. 514, 523. In the case last named we had occasion to point out the difficulty, albeit the necessity, as cases arise within the doubtful zone, of drawing the line which separates those activities which have some relation to government but are subject to taxation from those which are immune. "Experience has shown,"

we said, "that there is no formula by which that line may be plotted with precision in advance. But recourse may be had to the reason upon which the rule rests, and which must be the guiding principle to control its operation. Its origin was due to the essential requirement of our constitutional system that the federal government must exercise its authority within the territorial limits of the states; and it rests on the conviction that each government, in order that it may administer its affairs within its own sphere, must be left free from undue interference by the other."

The public interest in the conservation and distribution of water for a great variety of purposes—ranging from ordinary agricultural, domestic and sanitary uses, to the preservation of health and of life itself—is obvious and well settled. For the modern city, such conservation and distribution of water in sufficient quantity and in a state of purity is as vital as air. And this vital necessity becomes more and more apparent and pressing as cities increase in population and density of population. It has found, so far, its culminating point in the vast and supreme needs of the City of New York.

One of the most striking illustrations of the public interest in the use of water and the governmental power to deal with it is shown in legislation and judicial pronouncement with respect to the arid-land states of the far west. In some of them, the state constitution asserts public ownership of all unappropriated nonnavigable waters. In Utah, while it was still a territory, a statute conferred the right upon individual land owners to condemn rights-of-way across the lands of others in order to convey water to the former for irrigation purposes, and declared that such condemnation was for a "public use." This court upheld the statute. *Clark v. Nash*, 198 U. S. 361. We said that what is a public use may depend upon

the facts surrounding the subject; pointed out the vital need of water for irrigation in the arid-land states, a need which did not exist in the states of the east and where, consequently, a different rule obtained; and held that the court must recognize the difference of climate and soil which rendered necessary differing laws in the two groups of states.

Many years ago, Congress, recognizing this difference, passed the Desert Land Act (c. 107, 19 Stat. 377), by which, among other things, the waters upon the public domain in the arid-land states and territories were dedicated to the use of the public for irrigation and other purposes. Following this act, if not before, all non-navigable waters then on and belonging to that part of the national domain became *publici juris*, subject to the plenary control of the arid-land states and territories with the right to determine to what extent the rule of appropriation or the common-law rule in respect of riparian rights should obtain. *California Oregon Power Co. v. Beaver Cement Co.*, 295 U. S. 142, 155 *et seq.* And in *Kansas v. Colorado*, 206 U. S. 46, 94, this court entertained and decided a controversy between two states involving the right of private appropriators in Colorado to divert waters for the irrigation of lands in that state from a river naturally and customarily flowing into the State of Kansas. It was held (p. 99) that such a controversy rises "above a mere question of local private right and involves a matter of state interest, and must be considered from that standpoint." Cf. *Hudson Water Co. v. McCarter*, 209 U. S. 349, 355; *New Orleans Gas Co. v. Drainage Comm'n*, 197 U. S. 453, 460; *Houck v. Little River District*, 239 U. S. 254, 261.

In *New Orleans v. Morris*, 105 U. S. 600, 602, the city had conveyed its water works to a corporation formed for the purpose of maintaining and enlarging them.

The city received as consideration shares of stock, which a state statute declared should not be liable to seizure for the debts of the city. It was held the statute did not impair the obligation of any contract, since the shares represented the city's ownership in the water works which had, before the enactment of the statute, been exempted from seizure and sale. This ruling was put upon the ground that the water works were of such public utility and necessity that they were held in trust for the use of the citizens the same as public parks and public buildings.

While these cases do not decide, they plainly suggest, that municipal water works created and operated in order to supply the needs of a city and its inhabitants are public works and their operation essentially governmental in character. Other decisions of this court, however, more directly support that conclusion.

We recently have held that the bankruptcy statutes could not be extended to municipalities or other political subdivisions of a state. *Ashton v. Cameron County Water District*, 298 U. S. 513. The respondent there was a water-improvement district organized by law to furnish water for irrigation and domestic uses. We said (pp. 527-528) that respondent was a political subdivision of the state "created for the local exercise of her sovereign powers, . . . Its fiscal affairs are those of the State, not subject to control or interference by the National Government, unless the right so to do is definitely accorded by the Federal Constitution." In support of that holding, former decisions of this court with respect to the immunity of states and municipalities from federal taxation were relied upon as apposite. The question whether the district exercised governmental or merely corporate functions was distinctly in issue. The petition in bankruptcy alleged that the district was created with power to perform "the proprietary and/or corporate function of fur-

nishing water for irrigation and domestic uses . . ." The district judge held that the district was created for the local exercise of state sovereign powers; that it was exercising "a governmental function"; that its property was public property; that it was not carrying on private business, but public business. That court, having denied the petition for want of jurisdiction, the district submitted a motion for a new trial in which it assigned, among other things, that the court erred in holding that petitioner was created for the purpose of performing governmental functions, "for the reason that the Courts of Texas, as well as the other Courts in the Nation, have uniformly held that the furnishing of water for irrigation was purely a proprietary function . . ." Substantially the same thing was repeated in other assignments of error. In the petition for rehearing in this court, the district challenged our determination that respondent was a political subdivision of the state "created for the local exercise of her sovereign powers," and asserted to the contrary that the facts would demonstrate that "respondent is a corporation organized for essentially proprietary purposes." It is not open to dispute that the statements quoted from our opinion in the *Ashton* case were made after due consideration, and the case itself decided and the rehearing denied in the light of the issue thus definitely presented. Compare *Bingham v. United States*, 296 U. S. 211, 218-219.

"No higher police duty rests upon municipal authority," this court said in *Columbus v. Mercantile Trust Co.*, 218 U. S. 645, 658, "than that of furnishing an ample supply of pure and wholesome water for public and domestic uses. The preservation of the health of the community is best obtained by the discharge of this duty, to say nothing of the preservation of property from fire, so constant an attendant upon crowded conditions of municipal life."

In *Dunbar v. New York City*, 251 U. S. 516, we sustained a charter provision giving a lien for water charges upon a building in which the water had been used, although the charges had been incurred by tenants and not by the owner, saying—"And as a supply of water is necessary it is only an ordinary and legal exertion of government to provide means for its compulsory compensation."

In *German Alliance Ins. Co. v. Home Water Co.*, 226 U. S. 220, the City of Spartanburg had entered into a contract with the respondent by which the latter was empowered to supply the city and its inhabitants with water suitable for fire, sanitary and domestic purposes. The petitioner had issued a policy of fire insurance upon certain property, which was destroyed by fire. It paid the amount of the loss, and took an assignment from the insured of all claims and demands against any person arising from or connected with the loss. It brought suit against the respondent on the ground that the fire could easily have been extinguished if respondent had complied with its contract. This court held that the action was not maintainable for reasons which appear in the opinion. The city, it was said, was under no *legal* obligation to furnish water; and it did not subject itself to a new or greater liability because it voluntarily undertook to do so (pp. 227-228). "It acted in a governmental capacity, and was no more responsible for failure in that respect than it would have been for failure to furnish adequate police protection."

We conclude that the acquisition and distribution of a supply of water for the needs of the modern city involve the exercise of essential governmental functions, and this conclusion is fortified by a consideration of the public uses to which the water is put. Without such a supply, public schools, public sewers so necessary to preserve health, fire departments, street sprinkling and cleaning, public buildings, parks, playgrounds, and public baths,

could not exist. And this is equivalent, in a very real sense, to saying that the city itself would then disappear. More than one-fourth of the water furnished by the city of New York, we are told by the record, is utilized for these public purposes. Certainly, the maintenance of public schools, a fire department, a system of sewers, parks and public buildings, to say nothing of other public facilities and uses, calls for the exercise of governmental functions. And so far as these are concerned, the water supply is a necessary auxiliary, and, therefore, partakes of their nature. *New York ex rel. Rogers v. Graves*, 299 U. S. 401, 406. Moreover, the health and comfort of the city's population of 7,000,000 souls, and in some degree their very existence, are dependent upon an adequate supply of pure and wholesome water. It may be, as it is suggested, that private corporations would be able and willing to undertake to provide a supply of water for all purposes; but if the State and City of New York be of opinion, as they evidently are, that the service should not be entrusted to private hands but should be rendered by the city itself as an appropriate means of discharging its duty to protect the health, safety and lives of its inhabitants, we do not doubt that it may do so in the exercise of its essential governmental functions.

We find nothing that detracts from this view in the fact that in former times the business of furnishing water to urban communities, including New York, in fact was left largely, or even entirely, to private enterprise. The tendency for many years has been in the opposite direction, until now in nearly all the larger cities of the country the duty has been assumed by the municipal authorities. Governmental functions are not to be regarded as non-existent because they are held in abeyance, or because they lie dormant, for a time. If they be by their nature governmental, they are none the less so because the use of them has had a recent beginning.

The principle finds illustration in our decision in *Shoemaker v. United States*, 147 U. S. 282, 297, where it was held that land taken by an exercise of the power of eminent domain for the establishment of Rock Creek Park in the District of Columbia was taken for a public use, and that the amount required to be paid was validly assessed upon lands in the district specially benefited thereby. At the beginning of the opinion in that case, this court said: "In the memory of men now living, a proposition to take private property, without the consent of its owner, for a public park, and to assess a proportionate part of the cost upon real estate benefited thereby, would have been regarded as a novel exercise of legislative power." It was pointed out that Central Park in New York was the first place provided for the inhabitants of any city or town in the United States as a pleasure ground for rest and exercise in the open air, but that in 1892, when the opinion was written, there was scarcely a city of any considerable size in the country that did not have, or had not projected, such parks.

Respondent contends that the municipality, in supplying water to its inhabitants, is engaged in selling water for profit; and seems to think that this, if true, stamps the operation as private and not governmental in character. We first pause to observe that the overhead due to the enormous cost of the system, and the fact that so large a proportion of the water is diverted for public use, rather plainly suggests that no real profit is likely to result. And to say that, because the city makes a charge for furnishing water to private consumers, it follows that the operation of the water works is corporate and not governmental, is to beg the question. What the city is engaged in doing in that respect is rather rendering a service than selling a commodity. If that service be governmental it does not become private because a charge is made for it, or a profit realized. A state, for example,

constructs and operates a highway. It may, if it choose, exact compensation for its use from those who travel over it (see *Bingaman v. Golden Eagle Lines*, 297 U. S. 626, 628); but this does not destroy the claim that the maintenance of the highway is a public and governmental function. The state or the city may exact a tuition charge for instruction in the public schools; but thereby the maintenance of the public schools does not cease to be a function of the government. The state exacts a fee for issuing a license or granting a permit; for recording a deed; for rendering a variety of services in the judicial department. Do these various services thereby lose their character as governmental functions? The federal Post-Office Department, charges for its services; but no one would question the fact that its operation calls into exercise a governmental function.

The contention is made that our decisions in *South Carolina v. United States*, 199 U. S. 437, 461, 462, and *Flint v. Stone Tracy Co.*, 220 U. S. 107, 172, are to the effect that the supplying of water is not a governmental function; but in neither case was that question in issue, and what was said by the court was wholly unnecessary to the disposition of the cases and merely by way of illustration. Expressions of that kind may be respected, but do not control in a subsequent case when the precise point is presented for decision. *Osaka Shosen Kaisha Line v. United States*, *ante*, pp. 98, 103, and authorities cited. The precise point is presented here, has been fully considered, and is decided otherwise. Neither *Ohio v. Helvering*, 292 U. S. 360, nor *Helvering v. Powers*, 293 U. S. 214, relied upon by respondent, is in point. What has already been said distinguishes those cases from the one now under consideration.

We have not failed to give careful consideration to *Blair v. Byers*, 35 F. (2d) 326, and *Denman v. Commissioner*, 73 F. (2d) 193, both of which take a view con-

trary to that which we have expressed. To the extent of this conflict, those cases are disapproved. Both rely on *South Carolina v. United States* and *Flint v. Stone Tracy Co.*, *supra*, which we have already distinguished.

Reversed.

MR. JUSTICE STONE and MR. JUSTICE CARDOZO, concurring in the result:

We concur in the result upon the ground that the petitioner has brought himself within the terms of the exemption prescribed by Treasury Regulation 74, Article 643, which for the purposes of this case may be accepted as valid, its validity not being challenged by counsel for the Government.

In the absence of such a challenge no opinion is expressed as to the need for revision of the doctrine of implied immunities declared in earlier decisions.

We leave that subject open.

MR. JUSTICE ROBERTS, dissenting:

I regret that I am unable to concur in the opinion of the court. I think that the judgment should be affirmed.

There is no occasion now to discuss the dual character of our form of government, and the consequent dual allegiance of a citizen of a state to his state and to the United States, to elaborate the thesis that the integrity of each government is to be maintained against invasions by the other, or to reiterate that the implied immunity of the one from taxation by the other springs from the necessity that neither shall, by the exercise of the power to tax, burden, hinder or destroy the operation or existence of the other. There is universal recognition of the truth of these tenets, and of their fundamental relation to the preservation of the constitutional framework of the nation. Our difficulties arise, not in their statement as guiding principles, but, as in this instance, in their application to specific cases.

The frank admissions of counsel at the bar concerning the confusion and apparent inconsistency in administrative rulings as to the taxability of compensation of municipal employees seems to call for an equally candid statement that our decisions in the same field have not furnished the executive a consistent rule of action. The need of equitable and uniform administration of tax laws, national and state, and the just demand of the citizen that the rules governing the enforcement of those laws shall be ascertainable require an attempt at rationalization and restatement.

It seems to me that the reciprocal rights and immunities of the national and a state government may be safeguarded by the observance of two limitations upon their respective powers of taxation. These are that the exactions of the one must not discriminate against the means and instrumentalities of the other and must not directly burden the operations of that other. To state these canons otherwise: an exaction by either government which hits the means or instrumentalities of the other infringes the principle of immunity if it discriminates against them and in favor of private citizens or if the burden of the tax be palpable and direct rather than hypothetical and remote. Tested by these criteria the imposition of the challenged tax in the instant case was lawful.

The petitioner is a citizen of New York. By virtue of that status he is also a citizen of the United States. He owes allegiance to each government. He derives income from the exercise of his profession. His obligation as a citizen is to contribute to the support of the governments under whose joint protection he lives and pursues his calling. His liability to fulfill that obligation to the national government by payment of income tax upon his salary would be unquestioned were it not for the character of his employer. If the water works of New York

City were operated by a private corporation under a public franchise and if the petitioner held a like position with the corporation, there could be no question that the imposition of a federal income tax, measured by his compensation, would be justified. If petitioner, instead of holding a so-called official position under the municipal government of New York City, were consulted from time to time with respect to its water problems his compensation would be subject to income tax. (*Metcalf & Eddy v. Mitchell*, 269 U. S. 514.) He is put into an untaxable class upon the theory that as an official of the municipality, which in turn is an arm of the state, he is an "instrumentality" of the state, and to tax him upon his salary is to lay a burden upon the state government which, however trifling, is forbidden by the implied immunity of the state from burdens imposed by the United States. The petitioner seeks to show the reality of the supposed burden by the suggestion that if his salary and the compensation of others employed by the city is subject to federal income tax, the municipality will be compelled to pay higher salaries in order to obtain the services of such persons and the consequent aggregate increase in outlay will entail a heavy financial load. We know, however, that professional services are offered in the industrial and business field; and that while there is no hard and fast standard of compensation, and men bargain for their rewards, salaries do bear some relation to experience and ability. There is a market in which a professional man offers his services and municipalities are bidders in that market. We know further that those in private employment holding positions comparable to that of the petitioner pay a tax equal to that levied upon him. It is clear that any consideration of the petitioner's immunity from federal income tax would be altogether remote, impalpable and unascertainable in influencing

him to accept a position under the municipality rather than under a private employer.

In reason and logic it is difficult to differentiate the present case from that of a private citizen who furnishes goods, performs work or renders service to a state or a municipality under a contract or an officer or employe of a corporation which does the same. Income tax on the compensation paid or the profit realized is a necessary cost incident to the performance of the contract and as such must be taken into account in fixing the consideration demanded of the city government. In quite as real a sense, as in this case, the taxation of income of such persons and, as well, the taxation of the corporation itself, lays a burden upon the funds of the state or its agency. Nevertheless, the courts have repeatedly declared that the doctrine of immunity will not serve to exempt such persons or corporations from the exaction.

The importance of the case arises out of the fact that the claimed exemption may well extend to millions of persons (whose work nowise differs from that of their fellows in private enterprise) who are employed by municipal subdivisions and districts throughout the nation and that, on the other hand, the powers of the states to tax may be inhibited in the case of hundreds of thousands of similar employes of federal agencies of one sort or another. Such exemptions from taxation ought to be strictly limited. They are essentially unfair. They are unsound because federal or state business ought to bear its proportionate share of taxation in order that comparison may be made between the cost of conducting public and private business.

We are here concerned only with the question of the taxation of salaries or compensation received by those rendering to a municipality services of the same kind as are rendered to private employers and need not go be-

yond the precise issue here presented. We have no concern with the exaction of a sales tax by the federal government on sales to a state government or one of its subdivisions, or the reverse; we are not called upon to define the power to levy taxes upon real property owned by a state or by the national government. We have no occasion to discuss the power of either government to impose excise taxes upon transactions of the other or upon the evidence of such transactions. Nor are we called upon here to determine the validity of a nondiscriminatory tax upon the salary of a governmental officer whose duties and functions have no analogue in the conduct of a business or the pursuit of a profession, but are both peculiar to and essential to the operation of government. The sole question here is whether one performing work or rendering service of a type commonly done or rendered in ordinary commercial life for gain is exempt from the normal burden of a tax on that gain for the support of the national government because his compensation is paid by a state agency instead of a private employer. I think the imposition of a tax upon such gain where, as here, the tax falls equally upon all employed in like occupation, and where the supposed burden of the tax upon state government is indirect, remote, and imponderable, is not inconsistent with the principle of immunity inherent in the constitutional relation of state and nation.

MR. JUSTICE BRANDEIS joins in this opinion.
