

developing the Protocol's flexibility mechanisms, including international emissions trading and joint implementation, which are essential to achieving countries' greenhouse gas (GHG) emissions reduction commitments under the Protocol. They believe transparent rules for these mechanisms must be developed.

The Presidents further note the potential of the Kyoto Protocol mechanisms to promote investment in all areas where it is possible to limit or reduce GHG emissions. They reaffirm the opposition of the U.S. and Russian governments to proposals that limit the Kyoto Protocol mechanisms by placing quantitative restrictions on the transfer of Parties' assigned amounts. The Presidents reiterate the commitment of their governments to work for agreement on these and other issues at the Sixth Meeting of the Conference of the Parties taking place in The Hague in November of this year.

Building upon previous joint accomplishments, the U.S. and Russia plan to continue their cooperation on the problem of global climate change.

President Clinton declares the intention of the Government of the United States of America to continue cooperation with Russia in the measurement and reporting of GHG emissions, the development of market-based tools for managing those emissions, and the identification of specific opportunities in Russia to further reduce or sequester those emissions.

President Putin, noting the significant contributions made by the Russian Federation to reduce emissions of greenhouse gases, declares the intention of the Russian Federation to expand and strengthen the mutually-beneficial U.S.-Russian cooperation in the area of the fight against global warming, paying special attention to the activities of the Joint Russian-American Climate Policy Working Group.

Through these actions, Presidents Clinton and Putin express their conviction that effective steps can be taken by political leaders, and by leaders in scientific, business, and other circles, to protect the planet that we share from the threat of global warming.

### **Joint Statement Concerning Management and Disposition of Excess Weapon-Grade Plutonium and Related Cooperation**

*June 4, 2000*

The Presidents of the United States and the Russian Federation announced today completion of the bilateral Agreement for the management and disposition of weapon-grade plutonium withdrawn from their respective nuclear weapon programs and declared excess to defense purposes. This Agreement will ensure that this plutonium will be changed into forms unusable for nuclear weapons by consumption as fuel in nuclear reactors or by immobilization rendering it suitable for geologic disposal.

Based on the 1998 Summit Joint Statement of Principles for Management and Disposition of Plutonium, this Agreement charts the course and sets the conditions for such activities. It reconfirms our determination to take steps necessary to ensure that it is never again used for nuclear weapons or any other military purpose and is managed and disposed in a way that is safe, secure, ecologically sound, transparent and irreversible. It reaffirms our commitment to nuclear disarmament.

This Agreement will ensure that the management and disposition activities are monitored and, thus, transparent for the international community. It provides for International Atomic Energy Agency (IAEA) verification once appropriate agreements with the IAEA are concluded.

This Agreement builds on the approaches to such plutonium management and disposition agreed at the 1996 G-8 Moscow Nuclear Safety and Security Summit. We reaffirm our intentions to continue to work closely with other countries, in particular other G-8 leaders, who have provided strong support over past years for initiation and implementation of these programs. In this regard, we hope that significant progress will be made as well at the G-8 Summit this July in Okinawa.

This Agreement will enable new cooperation to go forward between the United States and the Russian Federation. We note that the United States Congress has appropriated 200 million USD for this cooperation and the U.S. Administration intends to seek additional appropriations.

This Agreement will soon be signed by Vice President Gore and Prime Minister Kasyanov.

### **Joint Statement on Principles of Strategic Stability**

*June 4, 2000*

1. The Presidents of the United States of America and the Russian Federation agree on the need to maintain strategic nuclear stability. Agreements between them help accomplish this objective.

2. They are dedicated to the cause of strengthening strategic stability and international security. They agree that capability for deterrence has been and remains a key aspect of stability and predictability in the international security environment.

3. The Presidents, welcoming the ratification of START-II Treaty and related documents by the Russian Federation, look forward to the completion of the ratification process in the United States.

4. They announce that discussions will intensify on further reductions in the strategic forces of the United States and Russia within the framework of a future START-III Treaty, and on ABM issues, in accordance with the Moscow Statement of 1998 and Cologne Statement of 1999 by the Presidents.

5. They agree on the essential contribution of the ABM Treaty to reductions in offensive forces, and reaffirm their commitment to that Treaty as a cornerstone of strategic stability.

6. They agree that the international community faces a dangerous and growing threat of proliferation of weapons of mass destruction and their means of delivery, including missiles and missile technologies, and stress their desire to reverse that process, including through existing and possible new international legal mechanisms. They agree that this new threat represents a potentially significant change in the strategic situation and international security environment.

7. They agree that this emerging threat to security should be addressed and resolved through mutual cooperation and mutual respect of each other's security interests.

8. They recall the existing provision of the ABM Treaty to consider possible changes in the strategic situation that have a bearing on the provisions of the Treaty, and, as appropriate, to consider possible proposals for further increasing the viability of the Treaty.

9. The Presidents reaffirm their commitment to continuing efforts to strengthen the ABM Treaty and to enhance its viability and effectiveness in the future, taking into account any changes in the international security environment.

10. In reinforcing the effectiveness of the ABM Treaty under present and prospective conditions the United States of America and the Russian Federation attach great importance to enhancing the viability of the Treaty through measures to promote greater cooperation, openness, and trust between the sides.

11. The United States of America and the Russian Federation note the importance of the consultative process and reaffirm their determination to continue consultations in the future to promote the objectives and implementation of the provisions of the ABM Treaty.

12. The key provisions recorded in our agreements and statements, including at the highest level, create a basis for both countries' activities regarding strategic arms under present-day conditions.

13. Such an approach creates confidence that the further strengthening of strategic stability and further reductions in nuclear forces will be based on a foundation that has been tested over decades and advances both countries' interests and security.
