### 106TH CONGRESS 1ST SESSION

# H. R. 2658

To provide that the Commissioner of Food and Drugs shall by regulation require over the counter drug sunscreen products to include an expiration date and storage recommendations on their label.

# IN THE HOUSE OF REPRESENTATIVES

July 30, 1999

Mr. Crowley (for himself, Mrs. Maloney of New York, Mr. McNulty, Ms. McKinney, Mr. McGovern, and Ms. Lee) introduced the following bill; which was referred to the Committee on Commerce

# A BILL

- To provide that the Commissioner of Food and Drugs shall by regulation require over the counter drug sunscreen products to include an expiration date and storage recommendations on their label.
  - 1 Be it enacted by the Senate and House of Representa-
  - 2 tives of the United States of America in Congress assembled,
  - 3 SECTION 1. SHORT TITLE.
  - 4 This Act may be cited as the "Safe Sunscreen,
  - 5 Healthy Skin Act".
  - 6 SEC. 2. FINDINGS.
  - 7 The Congress finds the following:

- (1) According to the American Cancer Society, over 800,000 new skin cancer cases of highly curable basal cell or squamous cell cancers are diagnosed per year.
  - (2) In 1995, over 34,100 persons were diagnosed with melanoma, the most serious type of skin cancer. Since 1973, the incidence rate of melanoma has increased about 4 percent per year. An additional 16,000 invasive nonmelanoma skin cancer cases occurred in 1995, mostly sarcomas, including Kaposi's sarcoma.
  - (3) Approximately 9,300 deaths occurred in 1995, 7,200 from malignant melanoma and 2,100 due to other skin cancers. According to the American Cancer Society's "Cancer Facts & Figures—1995" the best ways to prevent skin cancer are as follows: "The sun's ultraviolet rays are the strongest between 10 a.m. and 3 p.m., exposure at these times should be avoided, and protective clothing should be worn."
  - (4) Because of the possible link between severe sunburns in childhood and greatly increased risk of melanoma in later life, children, in particular, should be protected from the sun.

- 1 (5) Considering that half of all new cancers are 2 skin cancers, malignant melanoma, the deadliest 3 form of skin cancer, will claim over 7,300 lives this 4 year, 1,200 people will die from other forms of skin 5 cancer, and an estimated 1,000,000 new cases of 6 skin cancer were diagnosed in the United States in 7 1996, this Act takes on a special urgency.
- 8 (6) Sunscreen products have an effectiveness 9 life of 3 to 5 years. In light of how important these 10 products are in combating skin cancer, it is appro-11 priate that the consumer know that sunscreen is not 12 protective against the sun's rays after a certain 13 point. This especially becomes true with children's 14 sunscreen, as young people tend to be more severely burned and are in greater danger than adults. 15

#### 16 SEC. 3. LABELING.

17 (a) Expiration Date and Storage Recommenda-18 TIONS.—The Commissioner of Food and Drugs shall require over the counter drug sunscreen products which are 19 designed to screen the ultra violet rays of the sun on indi-20 21 viduals who use the products to include on the label of the products a date beyond which the product is not an 23 effective screen of such rays and recommendations for the storage of the products to avoid reducing the effectiveness 25 of the products.

- 1 (b) Enforcement.—For purposes of the Federal
- 2 Food, Drug, and Cosmetic Act, an over the counter drug
- 3 sunscreen product which does not contain the date and
- 4 storage recommendations required by regulations under
- 5 subsection (a) shall be considered to be a misbranded
- 6 drug.

## 7 SEC. 4. EFFECTIVE DATE.

- 8 This Act shall take effect on the first day of January
- 9 next succeeding the date of its enactment.
